- *She wrote a short paragraph that included "taret organ."*
- *Understanding "taret organ" helps you talk about this topic clearly.*

---

taricha *(noun)*

Pacific newts.

- *In class, the teacher used "taricha" to mean pacific newts.*
- *He looked up "taricha" because he had never seen it before.*

---

taricha granulosa *(noun)*

Newt of humid coast from Alaska to southern California.

- *Understanding "taricha granulosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "taricha granulosa."*

---

taricha torosa *(noun)*

Newt that is similar to Taricha granulosa in characteristics and habitat.

- *In class, the teacher used "taricha torosa" to mean newt that is similar to taricha granulosa in....*
- *They discussed "taricha torosa" during the group presentation.*

---

tarpan *(noun)*

European wild horse extinct since the early 20th century.

- *He looked up "tarpan" because he had never seen it before.*
- *They discussed "tarpan" during the group presentation.*

---

tarriance *(noun)*

The act of tarrying.

- *They discussed "tarriance" during the group presentation.*
- *In class, the teacher used "tarriance" to mean the act of tarrying.*

tarrietia *(noun)*

Small genus of east Asian and Australian timber trees.

- *They discussed "tarrietia" during the group presentation.*
- *The article explained what "tarrietia" means with a simple example.*

tarrietia argyrodendron *(noun)*

Australian timber tree.

- *The article explained what "tarrietia argyrodendron" means with a simple example.*
- *Understanding "tarrietia argyrodendron" helps you talk about this topic clearly.*

tarsiidae *(noun)*

Coextensive with the genus Tarsius: tarsiers.

- *Understanding "tarsiidae" helps you talk about this topic clearly.*
- *In class, the teacher used "tarsiidae" to mean coextensive with the genus tarsius: tarsiers.*

tarsioidea *(noun)*

In some classifications assigned to the suborder Prosimii.

- *They discussed "tarsioidea" during the group presentation.*
- *He looked up "tarsioidea" because he had never seen it before.*

tarsius syrichta *(noun)*

A variety of tarsier.

- *Understanding "tarsius syrichta" helps you talk about this topic clearly.*
- *They discussed "tarsius syrichta" during the group presentation.*

tartarean *(adjective)*

Of or relating to or characteristic of Hades or Tartarus.

- *Would you call this situation "tartarean"? Explain why.*
- *A "tartarean" approach may work better in this case.*

tarweed *(noun)*

Any of various resinous glandular plants of the genus Madia; of western North and South America.

- *He looked up "tarweed" because he had never seen it before.*
- *She wrote a short paragraph that included "tarweed."*

The use of the telephone as an interactive medium for promotion and sales.

- *In class, the teacher used "teleselling" to mean the use of the telephone as an interactive medium....*
- *The article explained what "teleselling" means with a simple example.*

---

telethermometer *(noun)*

A thermometer that registers the temperature at some distant point.

- *Understanding "telethermometer" helps you talk about this topic clearly.*
- *They discussed "telethermometer" during the group presentation.*

telferage *(noun)*

A transportation system in which cars (telphers) are suspended from cables and operated on electricity.

- *She wrote a short paragraph that included "telferage."*
- *He looked up "telferage" because he had never seen it before.*

telingo potato *(noun)*

Putrid-smelling aroid of southeastern Asia (especially the Philippines) grown for its edible tuber.

- *The article explained what "telingo potato" means with a simple example.*
- *In class, the teacher used "telingo potato" to mean putrid-smelling aroid of southeastern asia....*

telint *(noun)*

Intelligence derived from the interception and processing and analysis of foreign telemetry.

- *Understanding "telint" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "telint."*

teliospore *(noun)*

A chlamydospore that develops in the last stage of the life cycle of the rust fungus.

- *Understanding "teliospore" helps you talk about this topic clearly.*
- *He looked up "teliospore" because he had never seen it before.*

tellima *(noun)*

Genus of hardy perennials with palmately lobed leaves and long racemes of small nodding five-petaled flowers; western North America.

- *In class, the teacher used "tellima" to mean genus of hardy perennials with palmately lobed....*
- *The article explained what "tellima" means with a simple example.*

tellima affinis *(noun)*

California perennial herb cultivated for its racemose white flowers with widely spreading petals; sometimes placed in genus Tellima.

- *In class, the teacher used "tellima affinis" to mean california perennial herb cultivated for its....*
- *He looked up "tellima affinis" because he had never seen it before.*

tellima grandiflora *(noun)*

Plant growing in clumps with mostly basal leaves and cream-colored or pale pink fringed flowers in several long racemes; Alaska to coastal central California and east to Idaho.

- *They discussed "tellima grandiflora" during the group presentation.*
- *Understanding "tellima grandiflora" helps you talk about this topic clearly.*

telocentric *(adjective)*

Having the form of a straight rod because the centromere is in a terminal position.

- *A telocentric chromosome.*
- *Students compared "telocentric" with similar adjectives in the lesson.*

telocentric chromosome *(noun)*

A chromosome like a straight rod with the centromere in terminal position.

- *He looked up "telocentric chromosome" because he had never seen it before.*
- *They discussed "telocentric chromosome" during the group presentation.*

telopea oreades *(noun)*

Tall shrub of eastern Australia having oblanceolate to obovate leaves and red flowers in compact racemes.

- *They discussed "telopea oreades" during the group presentation.*
- *Understanding "telopea oreades" helps you talk about this topic clearly.*

telopea speciosissima *(noun)*

Straggling shrub with narrow leaves and conspicuous red flowers in dense globular racemes.

- *He looked up "telopea speciosissima" because he had never seen it before.*
- *In class, the teacher used "telopea speciosissima" to mean straggling shrub with narrow leaves and conspicuous....*

---

telosporidia *(noun)*

Parasitic sporozoans that form spores containing one or more infective sporozoites.

- *They discussed "telosporidia" during the group presentation.*
- *The article explained what "telosporidia" means with a simple example.*

---

telpher *(noun)*

One of the conveyances (or cars) in a telpherage.

- *In class, the teacher used "telpher" to mean one of the conveyances (or cars) in a telpherage.*
- *The article explained what "telpher" means with a simple example.*

---

telpherage *(noun)*

A transportation system in which cars (telphers) are suspended from cables and operated on electricity.

- *She wrote a short paragraph that included "telpherage."*
- *The article explained what "telpherage" means with a simple example.*

---

telsontail *(noun)*

Any of several minute primitive wingless and eyeless insects having a cone-shaped head; inhabit damp soil or decaying organic matter.

- *She wrote a short paragraph that included "telsontail."*
- *The article explained what "telsontail" means with a simple example.*

---

temerarious *(adjective)*

Presumptuously daring.

- *It is useful to describe something as "temerarious" when it is presumptuously daring.*
- *Would you call this situation "temerarious"? Explain why.*

---

---

tepary bean *(noun)*

Twining plant of southwestern United States and Mexico having roundish white or yellow or brown or black beans.

- *She wrote a short paragraph that included "tepary bean."*
- *They discussed "tepary bean" during the group presentation.*

---

tepidity *(noun)*

A warmness resembling the temperature of the skin.

- *In class, the teacher used "tepidity" to mean a warmness resembling the temperature of the skin.*
- *The article explained what "tepidity" means with a simple example.*

---

tepidness *(noun)*

A warmness resembling the temperature of the skin.

- *The article explained what "tepidness" means with a simple example.*
- *They discussed "tepidness" during the group presentation.*

---

teraflop *(noun)*

(computer science) a unit for measuring the speed of a computer system.

- *The article explained what "teraflop" means with a simple example.*
- *In class, the teacher used "teraflop" to mean (computer science) a unit for measuring the speed....*

---

teratogenesis *(noun)*

The development of defects in an embryo.

- *She wrote a short paragraph that included "teratogenesis."*
- *He looked up "teratogenesis" because he had never seen it before.*

---

tercelet *(noun)*

Male hawk especially male peregrine or gyrfalcon.

- *He looked up "tercelet" because he had never seen it before.*
- *They discussed "tercelet" during the group presentation.*

---

tercentennial *(noun)*

The 300th anniversary (or the celebration of it).

- *Understanding "tercentennial" helps you talk about this topic clearly.*
- *The article explained what "tercentennial" means with a simple example.*

---

terebella *(noun)*

Type genus of Terebellidae; tube-forming marine polychete worms with many filamentous tentacles.

- *Understanding "terebella" helps you talk about this topic clearly.*
- *He looked up "terebella" because he had never seen it before.*

---

terebellidae *(noun)*

Marine burrowing or tube-forming polychete worms usually having long thick bodies.

- *Understanding "terebellidae" helps you talk about this topic clearly.*
- *In class, the teacher used "terebellidae" to mean marine burrowing or tube-forming polychete worms....*

---

teredinid *(noun)*

Wormlike marine bivalve that bores into wooden piers and ships by means of drill-like shells.

- *He looked up "teredinid" because he had never seen it before.*
- *In class, the teacher used "teredinid" to mean wormlike marine bivalve that bores into wooden....*

---

terefah *(adjective)*

- *The article explained what "tergiversator" means with a simple example.*
- *They discussed "tergiversator" during the group presentation.*

---

terminative *(adjective)*

Coming to an end.

- *A contract terminative with the end of the war.*
- *Students compared "terminative" with similar adjectives in the lesson.*

---

ternion *(noun)*

The cardinal number that is the sum of one and one and one.

- *They discussed "ternion" during the group presentation.*
- *Understanding "ternion" helps you talk about this topic clearly.*

---

terrapene *(noun)*

Box turtles.

- *In class, the teacher used "terrapene" to mean box turtles.*
- *The article explained what "terrapene" means with a simple example.*

---

terrapene ornata *(noun)*

Primarily a prairie turtle of western United States and northern Mexico.

- *They discussed "terrapene ornata" during the group presentation.*
- *In class, the teacher used "terrapene ornata" to mean primarily a prairie turtle of western united states....*

---

terreplein *(noun)*

Level space where heavy guns can be mounted behind the parapet at the top of a rampart.

- *Understanding "terreplein" helps you talk about this topic clearly.*
- *They discussed "terreplein" during the group presentation.*

---

terrietia *(noun)*

Small genus of timber trees of eastern Asia, Australasia and tropical Africa that form large buttresses.

- *The article explained what "terrietia" means with a simple example.*
- *In class, the teacher used "terrietia" to mean small genus of timber trees of eastern asia,....*

---

terrietia trifoliolata *(noun)*

Large tree of Australasia.

- *They discussed "terrietia trifoliolata" during the group presentation.*
- *He looked up "terrietia trifoliolata" because he had never seen it before.*

territorialisation *(noun)*

The act of organizing as a territory.

- *He looked up "territorialisation" because he had never seen it before.*
- *She wrote a short paragraph that included "territorialisation."*

territorialise *(verb)*

Place on a territorial basis.

- *The coach explained when to use "territorialise" and when to wait.*
- *Learners should practice how to use "territorialise" in real sentences.*

territorialization *(noun)*

The act of organizing as a territory.

- *They discussed "territorialization" during the group presentation.*
- *Understanding "territorialization" helps you talk about this topic clearly.*

territorialize *(verb)*

Place on a territorial basis.

- *The railways were territorialized.*
- *He did not know how to use "territorialize" until he saw an example.*

terrorisation *(noun)*

The act of inspiring with fear.

- *She wrote a short paragraph that included "terrorisation."*
- *They discussed "terrorisation" during the group presentation.*

terrorization *(noun)*

The act of inspiring with fear.

- *Understanding "terrorization" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "terrorization."*

tertigravida *(noun)*

A woman who is pregnant for the third time.

- *Understanding "tertigravida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tertigravida."*

---

tetrabasic acid *(noun)*

An acid containing four replaceable hydrogen atoms per molecule.

- *The article explained what "tetrabasic acid" means with a simple example.*
- *In class, the teacher used "tetrabasic acid" to mean an acid containing four replaceable hydrogen atoms....*

---

tetrabromo-phenolsulfonephthalein *(noun)*

A dye used as an acid-base indicator.

- *She wrote a short paragraph that included "tetrabromo-phenolsulfonephthalein."*

- *They discussed "tetrabromo-phenolsulfonephthalein" during the group presentation.*

---

tetracaine *(noun)*

A crystalline compound used in the form of a hydrochloride as a local anesthetic.

- *In class, the teacher used "tetracaine" to mean a crystalline compound used in the form of a....*
- *The article explained what "tetracaine" means with a simple example.*

---

tetrachlorethylene *(noun)*

Anthelmintic agent used against hookworm and other nematodes.

- *He looked up "tetrachlorethylene" because he had never seen it before.*
- *In class, the teacher used "tetrachlorethylene" to mean anthelmintic agent used against hookworm and other....*

---

tetrachloromethane *(noun)*

A colorless nonflammable liquid used as a solvent for fats and oils; because of its toxicity its use as a cleaning fluid or fire extinguisher has declined.

- *The article explained what "tetrachloromethane" means with a simple example.*
- *In class, the teacher used "tetrachloromethane" to mean a colorless nonflammable liquid used as a solvent....*

---

tetraclinis *(noun)*

Sandarac tree.

- *He looked up "tetraclinis" because he had never seen it before.*
- *They discussed "tetraclinis" during the group presentation.*

---

tetraclinis articulata *(noun)*

Large coniferous evergreen tree of North Africa and Spain having flattened branches and scalelike leaves yielding a hard fragrant wood; bark yields a resin used in varnishes.

- *He looked up "tetraclinis articulata" because he had never seen it before.*
- *Understanding "tetraclinis articulata" helps you talk about this topic clearly.*

---

tetradecanoic acid *(noun)*

A saturated fatty acid occurring naturally in animal and vegetable fats.

- *They discussed "tetradecanoic acid" during the group presentation.*
- *She wrote a short paragraph that included "tetradecanoic acid."*

---

tetragonia *(noun)*

New Zealand spinach.

- *Understanding "tetragonia" helps you talk about this topic clearly.*
- *In class, the teacher used "tetragonia" to mean new zealand spinach.*

---

tetragonia expansa *(noun)*

Coarse sprawling Australasian plant with red or yellow flowers; cultivated for its edible young shoots and succulent leaves.

- *In class, the teacher used "tetragonia expansa" to mean coarse sprawling australasian plant with red or....*
- *The article explained what "tetragonia expansa" means with a simple example.*

---

tetragonia tetragonioides *(noun)*

Coarse sprawling Australasian plant with red or yellow flowers; cultivated for its edible young shoots and succulent leaves.

- *The article explained what "tetragonia tetragonioides" means with a simple example.*
- *She wrote a short paragraph that included "tetragonia tetragonioides."*

---

tetragoniaceae *(noun)*

Succulent herbs or small shrubs mostly of South Africa but also New Zealand and North America: carpetweeds; fig marigolds.

- *He looked up "tetragoniaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "tetragoniaceae."*

---

tetragonurus *(noun)*

A genus of Stromateidae.

- *They discussed "tetragonurus" during the group presentation.*
- *He looked up "tetragonurus" because he had never seen it before.*

---

tetrahalide *(noun)*

Any halide containing four halogen atoms in its molecules.

- *She wrote a short paragraph that included "tetrahalide."*
- *They discussed "tetrahalide" during the group presentation.*

---

tetraiodothyronine *(noun)*

Hormone produced by the thyroid glands to regulate metabolism by controlling the rate of oxidation in cells.

- *She wrote a short paragraph that included "tetraiodothyronine."*
- *He looked up "tetraiodothyronine" because he had never seen it before.*

---

tetramerous *(adjective)*

Having or consisting of four similar parts; tetramerous flowers.

- *A "tetramerous" approach may work better in this case.*
- *Students compared "tetramerous" with similar adjectives in the lesson.*

---

tetramethyldiarsine *(noun)*

A poisonous oily liquid with a garlicky odor composed of 2 cacodyl groups; undergoes spontaneous combustion in dry air.

- *He looked up "tetramethyldiarsine" because he had never seen it before.*
- *She wrote a short paragraph that included "tetramethyldiarsine."*

---

tetrametric *(adjective)*

Of or relating to verse lines written in tetrameter.

- *It is useful to describe something as "tetrametric" when it is of or relating to verse lines written in tetrameter.*
- *A "tetrametric" approach may work better in this case.*

---

tetraneuris *(noun)*

Genus of hairy yellow-flowered plants of the western United States.

- *In class, the teacher used "tetraneuris" to mean genus of hairy yellow-flowered plants of the....*
- *The article explained what "tetraneuris" means with a simple example.*

---

tetraneuris acaulis *(noun)*

Perennial having tufted basal leaves and short leafless stalks each bearing a solitary yellow flower head; dry hillsides and plains of west central North America.

- *Understanding "tetraneuris acaulis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tetraneuris acaulis."*

---

tetraneuris grandiflora *(noun)*

Whitish hairy plant with featherlike leaves and a few stout stems each bearing an especially handsome solitary large yellow flower head; mountainous regions north central United States.

- *They discussed "tetraneuris grandiflora" during the group presentation.*
- *She wrote a short paragraph that included "tetraneuris grandiflora."*

---

tetranychid *(noun)*

Web-spinning mite that attacks garden plants and fruit trees.

- *She wrote a short paragraph that included "tetranychid."*
- *He looked up "tetranychid" because he had never seen it before.*

---

tetranychidae *(noun)*

Plant-feeding mites.

- *She wrote a short paragraph that included "tetranychidae."*
- *Understanding "tetranychidae" helps you talk about this topic clearly.*

---

tetrao urogallus *(noun)*

Large black Old World grouse.

- *The article explained what "tetrao urogallus" means with a simple example.*
- *She wrote a short paragraph that included "tetrao urogallus."*

---

tetrapturus *(noun)*

A genus of Istiophoridae.

- *They discussed "tetrapturus" during the group presentation.*
- *The article explained what "tetrapturus" means with a simple example.*

---

tetrasaccharide *(noun)*

Any of a variety of carbohydrates that yield four monosaccharide molecules on complete hydrolysis.

- *The article explained what "tetrasaccharide" means with a simple example.*
- *They discussed "tetrasaccharide" during the group presentation.*

---

tetraskele *(noun)*

A figure consisting of four stylized human arms or legs (or bent lines) radiating from a center.

- *Understanding "tetraskele" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tetraskele."*

---

tetraskelion *(noun)*

A figure consisting of four stylized human arms or legs (or bent lines) radiating from a center.

- *They discussed "tetraskelion" during the group presentation.*
- *He looked up "tetraskelion" because he had never seen it before.*

---

tetrasporangium *(noun)*

A sporangium containing four asexual spores.

- *They discussed "tetrasporangium" during the group presentation.*
- *Understanding "tetrasporangium" helps you talk about this topic clearly.*

---

tetraspore *(noun)*

One of the four asexual spores produced within a sporangium.

- *They discussed "tetraspore" during the group presentation.*
- *Understanding "tetraspore" helps you talk about this topic clearly.*

---

tetri *(noun)*

100 tetri equal 1 lari in Georgia.

- *In class, the teacher used "tetri" to mean 100 tetri equal 1 lari in georgia.*
- *He looked up "tetri" because he had never seen it before.*

---

tetrose *(noun)*

Any monosaccharide sugar containing four atoms of carbon per molecule.

- *In class, the teacher used "tetrose" to mean any monosaccharide sugar containing four atoms of....*
- *The article explained what "tetrose" means with a simple example.*

---

tetryl *(noun)*

A yellow crystalline explosive solid that is used in detonators.

- *He looked up "tetryl" because he had never seen it before.*
- *They discussed "tetryl" during the group presentation.*

---

tetterwort *(noun)*

Perennial woodland native of North America having a red root and red sap and bearing a solitary lobed leaf and white flower in early spring and having acrid emetic properties; rootstock used as a stimulant and expectorant.

- *Understanding "tetterwort" helps you talk about this topic clearly.*
- *He looked up "tetterwort" because he had never seen it before.*

---

tettigoniid *(noun)*

Grasshoppers with long threadlike antennae and well-developed stridulating organs on the forewings of the male.

- *In class, the teacher used "tettigoniid" to mean grasshoppers with long threadlike antennae and....*
- *They discussed "tettigoniid" during the group presentation.*

---

tettigoniidae *(noun)*

Long-horned grasshoppers; katydids.

- *In class, the teacher used "tettigoniidae" to mean long-horned grasshoppers; katydids.*
- *The article explained what "tettigoniidae" means with a simple example.*

teucrium chamaedrys *(noun)*

European perennial subshrub with red-purple or bright rose flowers with red and white spots.

- *They discussed "teucrium chamaedrys" during the group presentation.*
- *Understanding "teucrium chamaedrys" helps you talk about this topic clearly.*

teucrium scorodonia *(noun)*

European germander with one-sided racemes of yellow flowers; naturalized in North America.

- *The article explained what "teucrium scorodonia" means with a simple example.*
- *Understanding "teucrium scorodonia" helps you talk about this topic clearly.*

teutoburger wald *(noun)*

A battle in 9 AD in which the Germans under Arminius annihilated three Roman Legions.

- *Understanding "teutoburger wald" helps you talk about this topic clearly.*
- *He looked up "teutoburger wald" because he had never seen it before.*

teutonist *(noun)*

A specialist in the history of the Teutonic people or language (especially with respect to the Teutonic influence on the history of England).

- *They discussed "teutonist" during the group presentation.*
- *Understanding "teutonist" helps you talk about this topic clearly.*

texas chachalaca *(noun)*

Of Mexico and Texas.

- *He looked up "texas chachalaca" because he had never seen it before.*
- *In class, the teacher used "texas chachalaca" to mean of mexico and texas.*

texas snowbells *(noun)*

Styrax of southwestern United States; a threatened species.

- *In class, the teacher used "texas snowbells" to mean styrax of southwestern united states; a threatened....*
- *The article explained what "texas snowbells" means with a simple example.*

texas storksbill *(noun)*

Of prairies and desert areas of southwestern United States and Mexico.

- *He looked up "texas storksbill" because he had never seen it before.*
- *She wrote a short paragraph that included "texas storksbill."*

thalamostriate vein *(noun)*

A vein serving the thalamus and corpus striatum.

- *He looked up "thalamostriate vein" because he had never seen it before.*
- *In class, the teacher used "thalamostriate vein" to mean a vein serving the thalamus and corpus striatum.*

thalarctos *(noun)*

Polar bears; in some classifications not a separate genus from Ursus.

- *The article explained what "thalarctos" means with a simple example.*
- *She wrote a short paragraph that included "thalarctos."*

thalarctos maritimus *(noun)*

White bear of Arctic regions.

- *Understanding "thalarctos maritimus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "thalarctos maritimus."*

thalassic *(adjective)*

Relating to the seas, especially smaller or inland seas; - Scientific American.

- *Deposits of sediment in gulfs and seas rather than in the ocean proper are known as thalassic deposits.*
- *Would you call this situation "thalassic"? Explain why.*

thalassoma *(noun)*

A genus of Labridae.

- *She wrote a short paragraph that included "thalassoma."*
- *They discussed "thalassoma" during the group presentation.*

---

thalassoma bifasciatum *(noun)*

Small Atlantic wrasse the male of which has a brilliant blue head.

- *They discussed "thalassoma bifasciatum" during the group presentation.*
- *He looked up "thalassoma bifasciatum" because he had never seen it before.*

---

thaliacea *(noun)*

Small class of free-swimming tunicates; sometimes classified as an order.

- *In class, the teacher used "thaliacea" to mean small class of free-swimming tunicates; sometimes....*
- *The article explained what "thaliacea" means with a simple example.*

---

thalloid *(adjective)*

Of or relating to or resembling or consisting of a thallus.

- *The speaker chose "thalloid" because it captured the feeling precisely.*
- *It is useful to describe something as "thalloid" when it is of or relating to or resembling or consisting of a....*

---

thallophyta *(noun)*

Used only in former classifications: comprising what is now considered a heterogeneous assemblage of flowerless and seedless organisms: algae; bacteria; fungi; lichens.

- *In class, the teacher used "thallophyta" to mean used only in former classifications: comprising....*
- *The article explained what "thallophyta" means with a simple example.*

---

thallophyte *(noun)*

Any of a group of cryptogamic organisms consisting principally of a thallus and thus showing no differentiation into stem and root and leaf.

- *He looked up "thallophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "thallophyte."*

---

thallophytic *(adjective)*

Pertaining to or characteristic of thallophytes.

- *A "thallophytic" approach may work better in this case.*
- *Students compared "thallophytic" with similar adjectives in the lesson.*

---

thalmencephalon *(noun)*

The posterior division of the forebrain; connects the cerebral hemispheres with the mesencephalon.

- *The article explained what "thalmencephalon" means with a simple example.*
- *She wrote a short paragraph that included "thalmencephalon."*

---

thammuz *(noun)*

The tenth month of the civil year; the fourth month of the ecclesiastic year (in June and July).

- *In class, the teacher used "thammuz" to mean the tenth month of the civil year; the fourth month....*
- *The article explained what "thammuz" means with a simple example.*

---

thamnophilus *(noun)*

A genus of Formicariidae.

- *In class, the teacher used "thamnophilus" to mean a genus of formicariidae.*
- *They discussed "thamnophilus" during the group presentation.*

---

thamnophis sauritus *(noun)*

Slender yellow-striped North American garter snake; prefers wet places.

- *She wrote a short paragraph that included "thamnophis sauritus."*
- *Understanding "thamnophis sauritus" helps you talk about this topic clearly.*

---

thaneship *(noun)*

The position of thane.

- *He looked up "thaneship" because he had never seen it before.*

- *Understanding "thaneship" helps you talk about this topic clearly.*

thaumatolatry *(noun)*

The worship of miracles.

- *She wrote a short paragraph that included "thaumatolatry."*
- *He looked up "thaumatolatry" because he had never seen it before.*

thaumaturgist *(noun)*

One who practices magic or sorcery.

- *He looked up "thaumaturgist" because he had never seen it before.*
- *They discussed "thaumaturgist" during the group presentation.*

theaceae *(noun)*

A family of trees and shrubs of the order Parietales.

- *In class, the teacher used "theaceae" to mean a family of trees and shrubs of the order parietales.*
- *The article explained what "theaceae" means with a simple example.*

theatergoer *(noun)*

Someone who attends the theater.

- *Understanding "theatergoer" helps you talk about this topic clearly.*
- *The article explained what "theatergoer" means with a simple example.*

thecodont *(noun)*

Presumably in the common ancestral line to dinosaurs and crocodiles and birds.

- *Understanding "thecodont" helps you talk about this topic clearly.*
- *The article explained what "thecodont" means with a simple example.*

thecodont reptile *(noun)*

Presumably in the common ancestral line to dinosaurs and crocodiles and birds.

- *They discussed "thecodont reptile" during the group presentation.*
- *Understanding "thecodont reptile" helps you talk about this topic clearly.*

thecodontia *(noun)*

Extinct terrestrial reptiles having teeth set in sockets; of the late Permian to Triassic.

- *In class, the teacher used "thecodontia" to mean extinct terrestrial reptiles having teeth set in....*
- *Understanding "thecodontia" helps you talk about this topic clearly.*

theelin *(noun)*

A naturally occurring weak estrogenic hormone secreted by the mammalian ovary; synthesized (trade name Estronol) and used to treat estrogen deficiency.

- *She wrote a short paragraph that included "theelin."*
- *He looked up "theelin" because he had never seen it before.*

theistical *(adjective)*

Of or relating to theism.

- *Students compared "theistical" with similar adjectives in the lesson.*
- *A "theistical" approach may work better in this case.*

thelarche *(noun)*

The start of breast development in a woman at the beginning of puberty.

- *Understanding "thelarche" helps you talk about this topic clearly.*
- *He looked up "thelarche" because he had never seen it before.*

thelephoraceae *(noun)*

Fungi having leathery or membranous sporophores.

- *Understanding "thelephoraceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "thelephoraceae."*

thelypteridaceae *(noun)*

Genera Thelypteris, Phegopteris, and others.

- *She wrote a short paragraph that included "thelypteridaceae."*
- *He looked up "thelypteridaceae" because he had never seen it before.*

---

thelypteris *(noun)*

Marsh ferns: in some classification systems considered part of genus Dryopteris in family Dryopteridaceae.

- *She wrote a short paragraph that included "thelypteris."*
- *He looked up "thelypteris" because he had never seen it before.*

---

thelypteris dryopteris *(noun)*

Bright blue-green fern widely distributed especially in damp acid woodlands of temperate northern hemisphere.

- *Understanding "thelypteris dryopteris" helps you talk about this topic clearly.*
- *He looked up "thelypteris dryopteris" because he had never seen it before.*

---

thelypteris hexagonoptera *(noun)*

Beech fern of North American woodlands having straw-colored stripes.

- *Understanding "thelypteris hexagonoptera" helps you talk about this topic clearly.*
- *They discussed "thelypteris hexagonoptera" during the group presentation.*

---

thelypteris palustris *(noun)*

Fern having pinnatifid fronds and growing in wet places; cosmopolitan in north temperate regions.

- *In class, the teacher used "thelypteris palustris" to mean fern having pinnatifid fronds and growing in wet....*
- *The article explained what "thelypteris palustris" means with a simple example.*

---

thelypteris palustris pubescens *(noun)*

Fern of northeastern North America.

- *He looked up "thelypteris palustris pubescens" because he had never seen it before.*
- *Understanding "thelypteris palustris pubescens" helps you talk about this topic clearly.*

---

thelypteris phegopteris *(noun)*

Beech fern of North America and Eurasia.

- *The article explained what "thelypteris phegopteris" means with a simple example.*
- *In class, the teacher used "thelypteris phegopteris" to mean beech fern of north america and eurasia.*

---

thelypteris simulata *(noun)*

Delicate feathery shield fern of the eastern United States; sometimes placed in genus Thelypteris.

- *The article explained what "thelypteris simulata" means with a simple example.*
- *In class, the teacher used "thelypteris simulata" to mean delicate feathery shield fern of the eastern united....*

---

thenal *(adjective)*

Of or relating to the palm of the hand or to the area at the base of the thumb.

- *It is useful to describe something as "thenal" when it is of or relating to the palm of the hand or to the....*
- *The speaker chose "thenal" because it captured the feeling precisely.*

---

theobid *(noun)*

A colorless crystalline alkaloid derived from tea leaves or made synthetically; used in medicine as a bronchial dilator.

- *The article explained what "theobid" means with a simple example.*
- *They discussed "theobid" during the group presentation.*

---

theologiser *(noun)*

Someone who is learned in theology or who speculates about theology.

- *She wrote a short paragraph that included "theologiser."*
- *They discussed "theologiser" during the group presentation.*

---

theologizer *(noun)*

Someone who is learned in theology or who speculates about theology.

- *Understanding "theologizer" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "theologizer."*

---

theophrastaceae *(noun)*

Family of mainly tropical American trees and shrubs similar to those of the Myrsinaceae; often included in the Myrsinaceae.

- *She wrote a short paragraph that included "theophrastaceae."*
- *He looked up "theophrastaceae" because he had never seen it before.*

---

theoriser *(noun)*

Someone who theorizes (especially in science or art).

- *The article explained what "theoriser" means with a simple example.*
- *In class, the teacher used "theoriser" to mean someone who theorizes (especially in science or art).*

---

theorizer *(noun)*

Someone who theorizes (especially in science or art).

- *He looked up "theorizer" because he had never seen it before.*
- *She wrote a short paragraph that included "theorizer."*

---

theoterrorism *(noun)*

Terrorism for a religious purpose.

- *The article explained what "theoterrorism" means with a simple example.*
- *In class, the teacher used "theoterrorism" to mean terrorism for a religious purpose.*

---

theraphosidae *(noun)*

Large tropical spiders; tarantulas.

- *The article explained what "theraphosidae" means with a simple example.*
- *She wrote a short paragraph that included "theraphosidae."*

---

therapsid *(noun)*

Probably warm-blooded; considered direct ancestor of mammals.

- *He looked up "therapsid" because he had never seen it before.*
- *Understanding "therapsid" helps you talk about this topic clearly.*

---

therapsida *(noun)*

Extinct mammal-like reptiles found inhabiting all continents from the mid Permian to late Triassic.

- *They discussed "therapsida" during the group presentation.*
- *He looked up "therapsida" because he had never seen it before.*

---

thereinafter *(adverb)*

In the following part of a given matter, as in a document or speech.

- *Using "thereinafter" can make your explanation more exact.*
- *He answered "thereinafter," which changed the tone of the conversation.*

---

therewithal *(adverb)*

Together with all that; besides; - Shakespeare.

- *Thy slanders I forgive; and therewithal remit thy other forfeits.*
- *Using "therewithal" can make your explanation more exact.*

---

theridiid *(noun)*

Spider having a comb-like row of bristles on each hind foot.

- *Understanding "theridiid" helps you talk about this topic clearly.*
- *In class, the teacher used "theridiid" to mean spider having a comb-like row of bristles on each....*

---

theridiidae *(noun)*

A family of comb-footed spiders.

- *Understanding "theridiidae" helps you talk about this topic clearly.*
- *The article explained what "theridiidae" means with a simple example.*

thermel *(noun)*

A thermometer that uses thermoelectric current to measure temperature.

- *The article explained what "thermel" means with a simple example.*
- *Understanding "thermel" helps you talk about this topic clearly.*

thermion *(noun)*

An electrically charged particle (electron or ion) emitted by a substance at a high temperature.

- *In class, the teacher used "thermion" to mean an electrically charged particle (electron or ion)....*
- *Understanding "thermion" helps you talk about this topic clearly.*

thermoacidophile *(noun)*

Archaebacteria that thrive in strongly acidic environments at high temperatures.

- *They discussed "thermoacidophile" during the group presentation.*
- *Understanding "thermoacidophile" helps you talk about this topic clearly.*

thermobia *(noun)*

A genus of Lepismatidae.

- *She wrote a short paragraph that included "thermobia."*
- *He looked up "thermobia" because he had never seen it before.*

thermobia domestica *(noun)*

Lives in warm moist areas e.g. around furnaces.

- *Understanding "thermobia domestica" helps you talk about this topic clearly.*
- *In class, the teacher used "thermobia domestica" to mean lives in warm moist areas e.g. around furnaces.*

thermocautery *(noun)*

Cautery (destruction of tissue) by heat.

- *He looked up "thermocautery" because he had never seen it before.*
- *She wrote a short paragraph that included "thermocautery."*

thermocoagulation *(noun)*

Congealing tissue by heat (as by electric current).

- *They discussed "thermocoagulation" during the group presentation.*
- *She wrote a short paragraph that included "thermocoagulation."*

thermoelectrical *(adjective)*

Involving or resulting from thermoelectricity.

- *A "thermoelectrical" approach may work better in this case.*
- *It is useful to describe something as "thermoelectrical" when it is involving or resulting from thermoelectricity.*

thermograph *(noun)*

A thermometer that records temperature variations on a graph as a function of time.

- *The article explained what "thermograph" means with a simple example.*
- *They discussed "thermograph" during the group presentation.*

thermogravimeter *(noun)*

A hydrometer that includes a thermometer.

- *They discussed "thermogravimeter" during the group presentation.*
- *In class, the teacher used "thermogravimeter" to mean a hydrometer that includes a thermometer.*

thermogravimetry *(noun)*

The measurement of changes in weight as a function of changes in temperature used as a technique of chemically analyzing substances.

- *She wrote a short paragraph that included "thermogravimetry."*
- *He looked up "thermogravimetry" because he had never seen it before.*

thermohydrometer *(noun)*

A hydrometer that includes a thermometer.

- *In class, the teacher used "thermohydrometer" to mean a hydrometer that includes a thermometer.*
- *The article explained what "thermohydrometer" means with a simple example.*

---

thermohydrometric *(adjective)*

Of or relating to thermal hydrometry.

- *Her writing became clearer after she learned "thermohydrometric."*
- *A "thermohydrometric" approach may work better in this case.*

---

thermojunction *(noun)*

A junction between two dissimilar metals across which a voltage appears.

- *They discussed "thermojunction" during the group presentation.*
- *She wrote a short paragraph that included "thermojunction."*

---

thermolabile *(adjective)*

(chemistry, physics, biology) readily changed or destroyed by heat.

- *It is useful to describe something as "thermolabile" when it is (chemistry, physics, biology) readily changed or....*
- *Students compared "thermolabile" with similar adjectives in the lesson.*

---

thermometrograph *(noun)*

A thermometer that records temperature variations on a graph as a function of time.

- *Understanding "thermometrograph" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "thermometrograph."*

---

thermopsis *(noun)*

Genus of American and Asiatic showy rhizomatous herbs: bush peas.

- *He looked up "thermopsis" because he had never seen it before.*
- *In class, the teacher used "thermopsis" to mean genus of american and asiatic showy rhizomatous....*

---

thermopsis macrophylla *(noun)*

Western United States bushy herb having yellow pea-like flowers.

- *He looked up "thermopsis macrophylla" because he had never seen it before.*
- *Understanding "thermopsis macrophylla" helps you talk about this topic clearly.*

---

thermopsis villosa *(noun)*

Eastern United States bush pea.

- *In class, the teacher used "thermopsis villosa" to mean eastern united states bush pea.*
- *The article explained what "thermopsis villosa" means with a simple example.*

---

thermoreceptor *(noun)*

A sensory receptor that responds to heat and cold.

- *They discussed "thermoreceptor" during the group presentation.*
- *In class, the teacher used "thermoreceptor" to mean a sensory receptor that responds to heat and cold.*

---

thermoregulator *(noun)*

A regulator for automatically regulating temperature by starting or stopping the supply of heat.

- *He looked up "thermoregulator" because he had never seen it before.*
- *They discussed "thermoregulator" during the group presentation.*

---

thermotropism *(noun)*

An orienting response to warmth.

- *The article explained what "thermotropism" means with a simple example.*
- *She wrote a short paragraph that included "thermotropism."*

---

theropoda *(noun)*

Carnivorous saurischian dinosaurs with short forelimbs; Jurassic and Cretaceous.

- *In class, the teacher used "theropoda" to mean carnivorous saurischian dinosaurs with short....*

- *The article explained what "theropoda" means with a simple example.*

---

thespesia *(noun)*

A small genus of tropical trees including the portia tree.

- *In class, the teacher used "thespesia" to mean a small genus of tropical trees including the....*
- *The article explained what "thespesia" means with a simple example.*

---

thessalia *(noun)*

A fertile plain on the Aegean Sea in east central Greece; Thessaly was a former region of ancient Greece.

- *He looked up "thessalia" because he had never seen it before.*
- *She wrote a short paragraph that included "thessalia."*

---

thevetia *(noun)*

Genus of poisonous tropical American evergreen shrubs and trees having entire leaves and large cymose flowers.

- *In class, the teacher used "thevetia" to mean genus of poisonous tropical american evergreen....*
- *They discussed "thevetia" during the group presentation.*

---

thevetia neriifolia *(noun)*

Tropical American shrub or small tree having glossy dark green leaves and fragrant saffron yellow to orange or peach- colored flowers; all parts highly poisonous.

- *He looked up "thevetia neriifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "thevetia neriifolia."*

---

thevetia peruviana *(noun)*

Tropical American shrub or small tree having glossy dark green leaves and fragrant saffron yellow to orange or peach- colored flowers; all parts highly poisonous.

- *She wrote a short paragraph that included "thevetia peruviana."*
- *Understanding "thevetia peruviana" helps you talk about this topic clearly.*

---

thiazine *(noun)*

A compound made up of a ring of four carbon atoms and one sulfur atom and one nitrogen atom.

- *Understanding "thiazine" helps you talk about this topic clearly.*
- *In class, the teacher used "thiazine" to mean a compound made up of a ring of four carbon atoms....*

---

thibet *(noun)*

An autonomous region of the Peoples Republic of China; located in the Himalayas.

- *He looked up "thibet" because he had never seen it before.*
- *She wrote a short paragraph that included "thibet."*

---

thickhead *(noun)*

Australian and southeastern Asian birds with a melodious whistling call.

- *The article explained what "thickhead" means with a simple example.*
- *Understanding "thickhead" helps you talk about this topic clearly.*

---

thickspread *(adjective)*

Covered thickly.

- *Toast thickspread with jam.*
- *It is useful to describe something as "thickspread" when it is covered thickly.*

---

thielavia *(noun)*

Genus of fungi having spherical brown perithecia and some conidia borne in chains; cause root rot.

- *The article explained what "thielavia" means with a simple example.*
- *In class, the teacher used "thielavia" to mean genus of fungi having spherical brown perithecia....*

---

thielavia basicola *(noun)*

Fungus causing brown root rot in plants of the pea and potato and cucumber families.

- *She wrote a short paragraph that included "thielavia basicola."*
- *He looked up "thielavia basicola" because he had never seen it before.*

---

thievishly *(adverb)*

In a manner characteristic of a thief.

- *The narrator describes the scene "thievishly" in the final chapter.*
- *She spoke "thievishly," and the audience immediately understood her point.*

---

thievishness *(noun)*

Having a disposition to steal.

- *She wrote a short paragraph that included "thievishness."*
- *They discussed "thievishness" during the group presentation.*

---

thimbleberry *(noun)*

Raspberry native to eastern North America having black thimble-shaped fruit.

- *They discussed "thimbleberry" during the group presentation.*
- *She wrote a short paragraph that included "thimbleberry."*

---

thimblerig *(noun)*

A swindling sleight-of-hand game; victim guesses which of three things a pellet is under.

- *She wrote a short paragraph that included "thimblerig."*
- *He looked up "thimblerig" because he had never seen it before.*

---

thingmabob *(noun)*

Something unspecified whose name is either forgotten or not known.

- *She wrote a short paragraph that included "thingmabob."*
- *Understanding "thingmabob" helps you talk about this topic clearly.*

---

thingmajig *(noun)*

Something unspecified whose name is either forgotten or not known.

- *Understanding "thingmajig" helps you talk about this topic clearly.*
- *The article explained what "thingmajig" means with a simple example.*

---

thingumabob *(noun)*

Something unspecified whose name is either forgotten or not known.

- *He looked up "thingumabob" because he had never seen it before.*
- *She wrote a short paragraph that included "thingumabob."*

---

thingumajig *(noun)*

Something unspecified whose name is either forgotten or not known.

- *They discussed "thingumajig" during the group presentation.*
- *The article explained what "thingumajig" means with a simple example.*

---

thingummy *(noun)*

Something unspecified whose name is either forgotten or not known.

- *He looked up "thingummy" because he had never seen it before.*
- *Understanding "thingummy" helps you talk about this topic clearly.*

---

thiobacteria *(noun)*

Any bacterium of the genus Thiobacillus.

- *The article explained what "thiobacteria" means with a simple example.*
- *Understanding "thiobacteria" helps you talk about this topic clearly.*

---

thiobacteriaceae *(noun)*

Free-living coccoid to rod-shaped bacteria that derive energy from oxidizing sulfur or sulfur compounds.

- *They discussed "thiobacteriaceae" during the group presentation.*
- *He looked up "thiobacteriaceae" because he had never seen it before.*

---

thiocyanic acid *(noun)*

An unstable acid that can be obtained by distilling a thiocyanate salt.

- *In class, the teacher used "thiocyanic acid" to mean an unstable acid that can be obtained by distilling....*
- *Understanding "thiocyanic acid" helps you talk about this topic clearly.*

---

thiodiphenylamine *(noun)*

A compound used primarily in veterinary medicine to rid farm animals of internal parasites.

- *She wrote a short paragraph that included "thiodiphenylamine."*
- *They discussed "thiodiphenylamine" during the group presentation.*

---

thiopentobarbital sodium *(noun)*

Barbiturate that is a hygroscopic powder (trade name Pentothal) that is a strong barbiturate that acts rapidly; induces a relaxed state when injected as a general anesthetic.

- *In class, the teacher used "thiopentobarbital sodium" to mean barbiturate that is a hygroscopic powder (trade....*
- *They discussed "thiopentobarbital sodium" during the group presentation.*

---

thiosulfil *(noun)*

Trade name for a sulfonamide antibacterial.

- *They discussed "thiosulfil" during the group presentation.*
- *He looked up "thiosulfil" because he had never seen it before.*

---

thiotepa *(noun)*

An antineoplastic drug used to treat certain malignancies.

- *He looked up "thiotepa" because he had never seen it before.*
- *In class, the teacher used "thiotepa" to mean an antineoplastic drug used to treat certain....*

---

thiothixene *(noun)*

A tranquilizer (trade name Navane) used to treat schizophrenia.

- *They discussed "thiothixene" during the group presentation.*
- *In class, the teacher used "thiothixene" to mean a tranquilizer (trade name navane) used to treat....*

---

thirster *(noun)*

A person with a strong desire for something.

- *A thirster after blood.*
- *The article explained what "thirster" means with a simple example.*

---

thistlelike *(adjective)*

Resembling a thistle.

- *Students compared "thistlelike" with similar adjectives in the lesson.*
- *A "thistlelike" approach may work better in this case.*

---

thlaspi *(noun)*

Herbs of temperate regions: pennycress.

- *She wrote a short paragraph that included "thlaspi."*
- *The article explained what "thlaspi" means with a simple example.*

---

thlaspi arvense *(noun)*

Foetid Eurasian weed having round flat pods; naturalized throughout North America.

- *The article explained what "thlaspi arvense" means with a simple example.*
- *They discussed "thlaspi arvense" during the group presentation.*

---

tholepin *(noun)*

A holder attached to the gunwale of a boat that holds the oar in place and acts as a fulcrum for rowing.

- *The article explained what "tholepin" means with a simple example.*
- *She wrote a short paragraph that included "tholepin."*

---

thomas straussler *(noun)*

British dramatist (born in Czechoslovakia in 1937).

- *Understanding "thomas straussler" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "thomas straussler."*

thomomys bottae *(noun)*

Of valleys and mountain meadows of western United States.

- *She wrote a short paragraph that included "thomomys bottae."*
- *The article explained what "thomomys bottae" means with a simple example.*

thomomys talpoides *(noun)*

Greyish to brown gopher of western and central United States.

- *The article explained what "thomomys talpoides" means with a simple example.*
- *Understanding "thomomys talpoides" helps you talk about this topic clearly.*

thor hyerdahl *(noun)*

Norwegian anthropologist noted for his studies of cultural diffusion (1914-2002).

- *In class, the teacher used "thor hyerdahl" to mean norwegian anthropologist noted for his studies of....*
- *The article explained what "thor hyerdahl" means with a simple example.*

thoracocentesis *(noun)*

Removal of fluid from the chest by centesis for diagnostic or therapeutic purposes.

- *In class, the teacher used "thoracocentesis" to mean removal of fluid from the chest by centesis for....*
- *The article explained what "thoracocentesis" means with a simple example.*

thoracoepigastric vein *(noun)*

A vein arising from the region of the superficial epigastric vein and opening into the axillary vein or thoracic vein.

- *They discussed "thoracoepigastric vein" during the group presentation.*
- *The article explained what "thoracoepigastric vein" means with a simple example.*

thoreauvian *(adjective)*

Relating to or like or in the manner of Henry David Thoreau.

- *Would you call this situation "thoreauvian"? Explain why.*
- *It is useful to describe something as "thoreauvian" when it is relating to or like or in the manner of henry david....*

thoriate *(verb)*

Impregnate with thorium oxide to increase thermionic emission.

- *Learners should practice how to use "thoriate" in real sentences.*
- *In everyday English, people use "thoriate" when talking about this idea.*

thorite *(noun)*

A radioactive mineral consisting of thorium silicate; it is a source of thorium that is found in coarse granite.

- *They discussed "thorite" during the group presentation.*
- *Understanding "thorite" helps you talk about this topic clearly.*

thornbill *(noun)*

Any of various South American hummingbirds with a sharp pointed bill.

- *Understanding "thornbill" helps you talk about this topic clearly.*
- *He looked up "thornbill" because he had never seen it before.*

thorniness *(noun)*

The quality of being covered with prickly thorns or spines.

- *The article explained what "thorniness" means with a simple example.*
- *In class, the teacher used "thorniness" to mean the quality of being covered with prickly thorns or....*

thoroughwort *(noun)*

Perennial herb of southeastern United States having white-rayed flower heads; formerly used as in folk medicine.

- *Understanding "thoroughwort" helps you talk about this topic clearly.*
- *In class, the teacher used "thoroughwort" to mean perennial herb of southeastern united states having....*

thorshavn *(noun)*

The administrative center of the Faroe Islands.

- *They discussed "thorshavn" during the group presentation.*
- *She wrote a short paragraph that included "thorshavn."*

---

thortveitite *(noun)*

A mineral consisting of scandium yttrium silicate; a source of scandium.

- *The article explained what "thortveitite" means with a simple example.*
- *Understanding "thortveitite" helps you talk about this topic clearly.*

---

threadfish *(noun)*

Fish having greatly elongated front rays on dorsal and anal fins.

- *Understanding "threadfish" helps you talk about this topic clearly.*
- *The article explained what "threadfish" means with a simple example.*

---

threadleaf groundsel *(noun)*

Bluish-green bushy leafy plant covered with close white wool and bearing branched clusters of yellow flower heads; southwestern United States; toxic to range livestock.

- *They discussed "threadleaf groundsel" during the group presentation.*
- *He looked up "threadleaf groundsel" because he had never seen it before.*

---

threadworm *(noun)*

Small threadlike worm infesting human intestines and rectum especially in children.

- *They discussed "threadworm" during the group presentation.*
- *The article explained what "threadworm" means with a simple example.*

---

threskiornis *(noun)*

Type genus of the Threskiornithidae.

- *The article explained what "threskiornis" means with a simple example.*
- *She wrote a short paragraph that included "threskiornis."*

---

threskiornis aethiopica *(noun)*

African ibis venerated by ancient Egyptians.

- *Understanding "threskiornis aethiopica" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "threskiornis aethiopica."*

---

thriftless *(adjective)*

Careless of the future.

- *Students compared "thriftless" with similar adjectives in the lesson.*
- *A "thriftless" approach may work better in this case.*

---

thriftlessly *(adverb)*

In a thriftless manner.

- *He lives thriftlessly from day to day.*
- *The narrator describes the scene "thriftlessly" in the final chapter.*

---

thriftlessness *(noun)*

The trait of wasting resources.

- *A life characterized by thriftlessness and waste.*
- *She wrote a short paragraph that included "thriftlessness."*

---

thriftshop *(noun)*

A shop that sells secondhand goods at reduced prices.

- *She wrote a short paragraph that included "thriftshop."*
- *They discussed "thriftshop" during the group presentation.*

---

thrillful *(adjective)*

Full of excitement; thrilled.

- *Students compared "thrillful" with similar adjectives in the lesson.*

- *It is useful to describe something as "thrillful" when it is full of excitement; thrilled.*

---

thrinax *(noun)*

Small to medium-sized fan palms.

- *He looked up "thrinax" because he had never seen it before.*
- *They discussed "thrinax" during the group presentation.*

---

thrinax keyensis *(noun)*

Small stocky fan palm of southern Florida and Cuba.

- *They discussed "thrinax keyensis" during the group presentation.*
- *In class, the teacher used "thrinax keyensis" to mean small stocky fan palm of southern florida and cuba.*

---

thrinax microcarpa *(noun)*

Small stocky fan palm of southern Florida and Cuba.

- *She wrote a short paragraph that included "thrinax microcarpa."*
- *He looked up "thrinax microcarpa" because he had never seen it before.*

---

thrinax morrisii *(noun)*

Small stocky fan palm of southern Florida and Cuba.

- *Understanding "thrinax morrisii" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "thrinax morrisii."*

---

thrinax parviflora *(noun)*

Small palm of southern Florida and West Indies closely resembling the silvertop palmetto.

- *He looked up "thrinax parviflora" because he had never seen it before.*
- *They discussed "thrinax parviflora" during the group presentation.*

---

thripid *(noun)*

Any of various small to minute sucking insects with narrow feathery wings if any; they feed on plant sap and many are destructive.

- *In class, the teacher used "thripid" to mean any of various small to minute sucking insects with....*
- *The article explained what "thripid" means with a simple example.*

---

thrips tobaci *(noun)*

Injurious to onion plants and sometimes tobacco.

- *He looked up "thrips tobaci" because he had never seen it before.*
- *Understanding "thrips tobaci" helps you talk about this topic clearly.*

---

throatwort *(noun)*

European bellflower with blue-purple to lilac flowers formerly used to treat sore throat.

- *Understanding "throatwort" helps you talk about this topic clearly.*
- *The article explained what "throatwort" means with a simple example.*

---

thrombocyte *(noun)*

Tiny bits of protoplasm found in vertebrate blood; essential for blood clotting.

- *In class, the teacher used "thrombocyte" to mean tiny bits of protoplasm found in vertebrate blood;....*
- *Understanding "thrombocyte" helps you talk about this topic clearly.*

---

thrombokinase *(noun)*

An enzyme liberated from blood platelets that converts prothrombin into thrombin as blood starts to clot.

- *In class, the teacher used "thrombokinase" to mean an enzyme liberated from blood platelets that....*
- *They discussed "thrombokinase" during the group presentation.*

---

thrombose *(verb)*

Become blocked by a thrombus.

- *The blood vessel thrombosed.*
- *Can you use "thrombose" in a sentence that fits this situation?*

---

throttlehold *(noun)*

Complete power over a person or situation.

- *She wrote a short paragraph that included "throttlehold."*
- *They discussed "throttlehold" during the group presentation.*

throttler *(noun)*

Someone who kills by strangling.

- *He looked up "throttler" because he had never seen it before.*
- *She wrote a short paragraph that included "throttler."*

throwster *(noun)*

A person who twists silk or rayon filaments into a thread or yarn.

- *Understanding "throwster" helps you talk about this topic clearly.*
- *In class, the teacher used "throwster" to mean a person who twists silk or rayon filaments into a....*

thryothorus *(noun)*

Carolina wrens.

- *She wrote a short paragraph that included "thryothorus."*
- *He looked up "thryothorus" because he had never seen it before.*

thryothorus ludovicianus *(noun)*

Large United States wren with a musical call.

- *The article explained what "thryothorus ludovicianus" means with a simple example.*
- *She wrote a short paragraph that included "thryothorus ludovicianus."*

thujopsis *(noun)*

One species; has close similarity to genus Thuja.

- *They discussed "thujopsis" during the group presentation.*
- *He looked up "thujopsis" because he had never seen it before.*

thumbnut *(noun)*

A threaded nut with winglike projections for thumb and forefinger leverage in turning.

- *They discussed "thumbnut" during the group presentation.*
- *Understanding "thumbnut" helps you talk about this topic clearly.*

thumbstall *(noun)*

Protective covering for an injured thumb.

- *Understanding "thumbstall" helps you talk about this topic clearly.*
- *The article explained what "thumbstall" means with a simple example.*

thunbergia *(noun)*

A genus of herbs or vines of the family Acanthaceae.

- *The article explained what "thunbergia" means with a simple example.*
- *They discussed "thunbergia" during the group presentation.*

thunbergia alata *(noun)*

Tropical African climbing plant having yellow flowers with a dark purple center.

- *He looked up "thunbergia alata" because he had never seen it before.*
- *In class, the teacher used "thunbergia alata" to mean tropical african climbing plant having yellow....*

thunnus alalunga *(noun)*

Large pelagic tuna the source of most canned tuna; reaches 93 pounds and has long pectoral fins; found worldwide in tropical and temperate waters.

- *Understanding "thunnus alalunga" helps you talk about this topic clearly.*
- *The article explained what "thunnus alalunga" means with a simple example.*

thunnus albacares *(noun)*

May reach 400 pounds; worldwide in tropics.

- *She wrote a short paragraph that included "thunnus albacares."*
- *The article explained what "thunnus albacares" means with a simple example.*

---

thunnus thynnus *(noun)*

Largest tuna; to 1500 pounds; of mostly temperate seas: feed in polar regions but breed in tropics.

- *In class, the teacher used "thunnus thynnus" to mean largest tuna; to 1500 pounds; of mostly temperate....*
- *The article explained what "thunnus thynnus" means with a simple example.*

---

thurifer *(noun)*

An acolyte who carries a thurible.

- *The article explained what "thurifer" means with a simple example.*
- *Understanding "thurifer" helps you talk about this topic clearly.*

---

thurify *(verb)*

Perfume especially with a censer.

- *He did not know how to use "thurify" until he saw an example.*
- *Can you use "thurify" in a sentence that fits this situation?*

---

thwarter *(noun)*

Someone who systematically obstructs some action that others want to take.

- *They discussed "thwarter" during the group presentation.*
- *He looked up "thwarter" because he had never seen it before.*

---

thwartwise *(adjective)*

Extending or lying across; in a crosswise direction; at right angles to the long axis.

- *Would you call this situation "thwartwise"? Explain why.*
- *Her writing became clearer after she learned "thwartwise."*

---

thylacinus *(noun)*

Tasmanian wolf.

- *In class, the teacher used "thylacinus" to mean tasmanian wolf.*
- *He looked up "thylacinus" because he had never seen it before.*

---

thylacinus cynocephalus *(noun)*

Rare doglike carnivorous marsupial of Tasmania having stripes on its back; probably extinct.

- *In class, the teacher used "thylacinus cynocephalus" to mean rare doglike carnivorous marsupial of tasmania....*
- *They discussed "thylacinus cynocephalus" during the group presentation.*

---

thyme-leaved sandwort *(noun)*

Eurasian annual sprawling plant naturalized throughout North America.

- *They discussed "thyme-leaved sandwort" during the group presentation.*
- *The article explained what "thyme-leaved sandwort" means with a simple example.*

---

thymelaeaceae *(noun)*

Family of trees and shrubs and herbs having tough bark that are found especially in Australia and tropical Africa.

- *Understanding "thymelaeaceae" helps you talk about this topic clearly.*
- *They discussed "thymelaeaceae" during the group presentation.*

---

thymelaeales *(noun)*

Myrtaceae; Combretaceae; Elaeagnaceae; Haloragidaceae; Melastomaceae; Lecythidaceae; Lythraceae; Rhizophoraceae; Onagraceae; Lecythidaceae; Punicaceae.

- *In class, the teacher used "thymelaeales" to mean myrtaceae; combretaceae; elaeagnaceae;....*
- *They discussed "thymelaeales" during the group presentation.*

---

thymus serpyllum *(noun)*

Aromatic dwarf shrub common on banks and hillsides in Europe; naturalized in United States.

- *The article explained what "thymus serpyllum" means with a simple example.*
- *In class, the teacher used "thymus serpyllum" to mean aromatic dwarf shrub common on banks and hillsides....*

thyreophora *(noun)*

Armored dinosaurs: stegosaurs and ankylosaurs.

- *They discussed "thyreophora" during the group presentation.*
- *The article explained what "thyreophora" means with a simple example.*

thyreophoran *(noun)*

Armored dinosaurs: stegosaurs and ankylosaurs.

- *She wrote a short paragraph that included "thyreophoran."*
- *He looked up "thyreophoran" because he had never seen it before.*

thyrocalcitonin *(noun)*

Thyroid hormone that tends to lower the level of calcium in the blood plasma and inhibit resorption of bone.

- *In class, the teacher used "thyrocalcitonin" to mean thyroid hormone that tends to lower the level of....*
- *The article explained what "thyrocalcitonin" means with a simple example.*

thyroidal *(adjective)*

Of or relating to the thyroid gland.

- *Thyroidal uptake.*
- *Students compared "thyroidal" with similar adjectives in the lesson.*

thyronine *(noun)*

A phenolic amino acid of which thyroxine is a derivative.

- *Understanding "thyronine" helps you talk about this topic clearly.*
- *They discussed "thyronine" during the group presentation.*

thyroprotein *(noun)*

A preparation made from iodinated protein and having an action similar to thyroxine.

- *The article explained what "thyroprotein" means with a simple example.*
- *They discussed "thyroprotein" during the group presentation.*

thyrotoxic *(adjective)*

Of or relating to or affected by hyperthyroidism.

- *Her writing became clearer after she learned "thyrotoxic."*
- *The speaker chose "thyrotoxic" because it captured the feeling precisely.*

thyrotrophic hormone *(noun)*

Anterior pituitary hormone that stimulates the function of the thyroid gland.

- *She wrote a short paragraph that included "thyrotrophic hormone."*
- *They discussed "thyrotrophic hormone" during the group presentation.*

thyrotrophin *(noun)*

Anterior pituitary hormone that stimulates the function of the thyroid gland.

- *In class, the teacher used "thyrotrophin" to mean anterior pituitary hormone that stimulates the....*
- *They discussed "thyrotrophin" during the group presentation.*

thyrotropic hormone *(noun)*

Anterior pituitary hormone that stimulates the function of the thyroid gland.

- *They discussed "thyrotropic hormone" during the group presentation.*
- *The article explained what "thyrotropic hormone" means with a simple example.*

thyrse *(noun)*

A dense flower cluster (as of the lilac or horse chestnut) in which the main axis is racemose and the branches are cymose.

- *They discussed "thyrse" during the group presentation.*
- *He looked up "thyrse" because he had never seen it before.*

thyrsopteris *(noun)*

A terrestrial tree fern of South America.

- *In class, the teacher used "thyrsopteris" to mean a terrestrial tree fern of south america.*
- *The article explained what "thyrsopteris" means with a simple example.*

---

thyrsopteris elegans *(noun)*

A terrestrial tree fern of South America.

- *They discussed "thyrsopteris elegans" during the group presentation.*
- *He looked up "thyrsopteris elegans" because he had never seen it before.*

---

thysanocarpus *(noun)*

Small genus of herbs of upland regions of the Pacific coast of North America.

- *In class, the teacher used "thysanocarpus" to mean small genus of herbs of upland regions of the....*
- *They discussed "thysanocarpus" during the group presentation.*

---

thysanopter *(noun)*

An insect of the order Thysanoptera.

- *They discussed "thysanopter" during the group presentation.*
- *Understanding "thysanopter" helps you talk about this topic clearly.*

---

thysanopteron *(noun)*

An insect of the order Thysanoptera.

- *He looked up "thysanopteron" because he had never seen it before.*
- *She wrote a short paragraph that included "thysanopteron."*

---

thysanopterous insect *(noun)*

An insect of the order Thysanoptera.

- *In class, the teacher used "thysanopterous insect" to mean an insect of the order thysanoptera.*
- *They discussed "thysanopterous insect" during the group presentation.*

---

thysanura *(noun)*

Firebrats; silverfish; machilids.

- *She wrote a short paragraph that included "thysanura."*
- *Understanding "thysanura" helps you talk about this topic clearly.*

---

thysanuran insect *(noun)*

Primitive wingless insects: bristletail.

- *The article explained what "thysanuran insect" means with a simple example.*
- *In class, the teacher used "thysanuran insect" to mean primitive wingless insects: bristletail.*

---

thysanuron *(noun)*

Primitive wingless insects: bristletail.

- *They discussed "thysanuron" during the group presentation.*
- *The article explained what "thysanuron" means with a simple example.*

---

tiarella *(noun)*

Small genus of North American herbs having mostly basal leaves and slender racemes of delicate white flowers.

- *In class, the teacher used "tiarella" to mean small genus of north american herbs having mostly....*
- *The article explained what "tiarella" means with a simple example.*

---

tiarella cordifolia *(noun)*

Stoloniferous white-flowered spring-blooming woodland plant.

- *He looked up "tiarella cordifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "tiarella cordifolia."*

---

tiarella unifoliata *(noun)*

Plant with tiny white flowers hanging in loose clusters on leafy stems; moist woods from Alaska to central California and east to Montana.

- *Understanding "tiarella unifoliata" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “tiarella unifoliata.”*

tibialis anticus *(noun)*

A muscle running from the tibia to the first metatarsal and cuneiform bones.

- *Understanding “tibialis anticus” helps you talk about this topic clearly.*
- *In class, the teacher used “tibialis anticus” to mean a muscle running from the tibia to the first....*

tibialis posticus *(noun)*

A deep muscle of the leg.

- *She wrote a short paragraph that included “tibialis posticus.”*
- *Understanding “tibialis posticus” helps you talk about this topic clearly.*

tibicen *(noun)*

Harvest flies.

- *Understanding “tibicen” helps you talk about this topic clearly.*
- *He looked up “tibicen” because he had never seen it before.*

tibit *(noun)*

A unit of information equal to 1024 gibibits or 2^40 (1,099,511,627,776) bits.

- *In class, the teacher used “tibit” to mean a unit of information equal to 1024 gibibits or....*
- *Understanding “tibit” helps you talk about this topic clearly.*

tichodroma *(noun)*

Wall creepers; in some classifications placed in family Sittidae.

- *He looked up “tichodroma” because he had never seen it before.*
- *They discussed “tichodroma” during the group presentation.*

tichodroma muriaria *(noun)*

Crimson-and-grey songbird that inhabits town walls and mountain cliffs of southern Eurasia and northern Africa.

- *In class, the teacher used “tichodroma muriaria” to mean crimson-and-grey songbird that inhabits town walls....*
- *The article explained what “tichodroma muriaria” means with a simple example.*

tichodrome *(noun)*

Crimson-and-grey songbird that inhabits town walls and mountain cliffs of southern Eurasia and northern Africa.

- *Understanding “tichodrome” helps you talk about this topic clearly.*
- *In class, the teacher used “tichodrome” to mean crimson-and-grey songbird that inhabits town walls....*

tickseed *(noun)*

Any of numerous plants of the genus Coreopsis having a profusion of showy usually yellow daisylike flowers over long periods; North and South America.

- *He looked up “tickseed” because he had never seen it before.*
- *Understanding “tickseed” helps you talk about this topic clearly.*

tickseed sunflower *(noun)*

North American bur marigold with large flowers.

- *She wrote a short paragraph that included “tickseed sunflower.”*
- *He looked up “tickseed sunflower” because he had never seen it before.*

ticktack *(verb)*

Make a sound like a clock or a timer.

- *Learners should practice how to use “ticktack” in real sentences.*
- *In everyday English, people use “ticktack” when talking about this idea.*

ticktacktoe *(noun)*

A game in which two players alternately put crosses and circles in one of the compartments of a square grid of nine spaces; the object is to get a row of three crosses or three circles before the opponent does.

- *He looked up “ticktacktoe” because he had never seen it before.*
- *Understanding “ticktacktoe” helps you talk about this topic clearly.*

ticktacktoo *(noun)*

A game in which two players alternately put crosses and circles in one of the compartments of a square grid of nine spaces; the object is to get a row of three crosses or three circles before the opponent does.

- *Understanding "ticktacktoo" helps you talk about this topic clearly.*
- *He looked up "ticktacktoo" because he had never seen it before.*

tickweed *(noun)*

Any of numerous plants of the genus Coreopsis having a profusion of showy usually yellow daisylike flowers over long periods; North and South America.

- *Understanding "tickweed" helps you talk about this topic clearly.*
- *The article explained what "tickweed" means with a simple example.*

tidemark *(noun)*

Indicator consisting of a line at the highwater or low-water limits of the tides.

- *The article explained what "tidemark" means with a simple example.*
- *In class, the teacher used "tidemark" to mean indicator consisting of a line at the highwater or....*

tidytips *(noun)*

California annual having flower heads with yellow rays tipped with white.

- *Understanding "tidytips" helps you talk about this topic clearly.*
- *In class, the teacher used "tidytips" to mean california annual having flower heads with yellow....*

tiepin *(noun)*

A pin used to hold the tie in place.

- *She wrote a short paragraph that included "tiepin."*
- *They discussed "tiepin" during the group presentation.*

tiercel *(noun)*

Male hawk especially male peregrine or gyrfalcon.

- *In class, the teacher used "tiercel" to mean male hawk especially male peregrine or gyrfalcon.*
- *The article explained what "tiercel" means with a simple example.*

tightfistedness *(noun)*

Extreme stinginess.

- *He looked up "tightfistedness" because he had never seen it before.*
- *Understanding "tightfistedness" helps you talk about this topic clearly.*

tightfitting *(adjective)*

Fitting snugly.

- *A "tightfitting" approach may work better in this case.*
- *Students compared "tightfitting" with similar adjectives in the lesson.*

tiglon *(noun)*

Offspring of a male tiger and a female lion.

- *They discussed "tiglon" during the group presentation.*
- *In class, the teacher used "tiglon" to mean offspring of a male tiger and a female lion.*

tigon *(noun)*

Offspring of a male tiger and a female lion.

- *They discussed "tigon" during the group presentation.*
- *The article explained what "tigon" means with a simple example.*

tiliaceae *(noun)*

Chiefly trees and shrubs of tropical and temperate regions of especially southeastern Asia and Brazil; genera Tilia, Corchorus, Entelea, Grewia, Sparmannia.

- *They discussed "tiliaceae" during the group presentation.*
- *She wrote a short paragraph that included "tiliaceae."*

tiliomycetes *(noun)*

Category used in some systems to comprise the two orders Ustilaginales (smuts) and Uredinales (rusts).

- *They discussed "tiliomycetes" during the group presentation.*
- *Understanding "tiliomycetes" helps you talk about this topic clearly.*

tillandsia usneoides *(noun)*

Dense festoons of greenish-grey hairlike flexuous strands anchored to tree trunks and branches by sparse wiry roots; southeastern United States and West Indies to South America.

- *He looked up "tillandsia usneoides" because he had never seen it before.*
- *She wrote a short paragraph that included "tillandsia usneoides."*

tilletia *(noun)*

A genus of fungi belonging to the family Tilletiaceae.

- *He looked up "tilletia" because he had never seen it before.*
- *They discussed "tilletia" during the group presentation.*

tilletia caries *(noun)*

Fungus that destroys kernels of wheat by replacing them with greasy masses of smelly spores.

- *She wrote a short paragraph that included "tilletia caries."*
- *They discussed "tilletia caries" during the group presentation.*

tilletia foetida *(noun)*

Similar to Tilletia caries.

- *In class, the teacher used "tilletia foetida" to mean similar to tilletia caries.*
- *Understanding "tilletia foetida" helps you talk about this topic clearly.*

tilletiaceae *(noun)*

A family of smut fungi having a simple promycelium bearing the spores in an apical cluster.

- *In class, the teacher used "tilletiaceae" to mean a family of smut fungi having a simple promycelium....*
- *The article explained what "tilletiaceae" means with a simple example.*

tiltyard *(noun)*

(formerly) an enclosed field for tilting contests.

- *She wrote a short paragraph that included "tiltyard."*
- *The article explained what "tiltyard" means with a simple example.*

timalia *(noun)*

Type genus of the Timaliidae.

- *They discussed "timalia" during the group presentation.*
- *Understanding "timalia" helps you talk about this topic clearly.*

timeserver *(noun)*

One who conforms to current ways and opinions for personal advantage.

- *Understanding "timeserver" helps you talk about this topic clearly.*
- *He looked up "timeserver" because he had never seen it before.*

timework *(noun)*

Work paid for at a rate per unit of time.

- *In class, the teacher used "timework" to mean work paid for at a rate per unit of time.*
- *He looked up "timework" because he had never seen it before.*

timimoun *(noun)*

A town in central Algeria in the Atlas Mountains.

- *In class, the teacher used "timimoun" to mean a town in central algeria in the atlas mountains.*
- *He looked up "timimoun" because he had never seen it before.*

timucu *(noun)*

Found in warm waters of western Atlantic.

- *The article explained what “timucu” means with a simple example.*
- *Understanding “timucu” helps you talk about this topic clearly.*

---

tinamidae *(noun)*

Comprising the tinamous.

- *He looked up “tinamidae” because he had never seen it before.*
- *She wrote a short paragraph that included “tinamidae.”*

---

tinamiformes *(noun)*

Coextensive with the family Tinamidae.

- *He looked up “tinamiformes” because he had never seen it before.*
- *Understanding “tinamiformes” helps you talk about this topic clearly.*

---

tinea pellionella *(noun)*

The larvae live in tubes of its food material fastened with silk that it spins.

- *Understanding “tinea pellionella” helps you talk about this topic clearly.*
- *In class, the teacher used “tinea pellionella” to mean the larvae live in tubes of its food material....*

---

tineid *(noun)*

Small yellowish moths whose larvae feed on wool or fur.

- *She wrote a short paragraph that included “tineid.”*
- *The article explained what “tineid” means with a simple example.*

---

tineid moth *(noun)*

Small yellowish moths whose larvae feed on wool or fur.

- *They discussed “tineid moth” during the group presentation.*
- *She wrote a short paragraph that included “tineid moth.”*

---

tineidae *(noun)*

Clothes moths.

- *She wrote a short paragraph that included “tineidae.”*
- *He looked up “tineidae” because he had never seen it before.*

---

tineoid *(noun)*

Small dull-colored moth with chewing mouthparts.

- *He looked up “tineoid” because he had never seen it before.*
- *She wrote a short paragraph that included “tineoid.”*

---

tineoid moth *(noun)*

Small dull-colored moth with chewing mouthparts.

- *Understanding “tineoid moth” helps you talk about this topic clearly.*
- *In class, the teacher used “tineoid moth” to mean small dull-colored moth with chewing mouthparts.*

---

tineoidea *(noun)*

Clothes moths; carpet moths; leaf miners.

- *He looked up “tineoidea” because he had never seen it before.*
- *They discussed “tineoidea” during the group presentation.*

---

tineola *(noun)*

Webbing clothes moths.

- *He looked up “tineola” because he had never seen it before.*
- *She wrote a short paragraph that included “tineola.”*

---

tineola bisselliella *(noun)*

Moth that forms a web in which it lives.

- *The article explained what “tineola bisselliella” means with a simple example.*
- *In class, the teacher used “tineola bisselliella” to mean moth that forms a web in which it lives.*

tininess *(noun)*

The property of being very small in size.

- *She wrote a short paragraph that included "tininess."*
- *The article explained what "tininess" means with a simple example.*

tinseled *(adjective)*

Glittering with gold or silver.

- *Students compared "tinseled" with similar adjectives in the lesson.*
- *A "tinseled" approach may work better in this case.*

tinselly *(adjective)*

Glittering with gold or silver.

- *Would you call this situation "tinselly"? Explain why.*
- *Students compared "tinselly" with similar adjectives in the lesson.*

tinsnips *(noun)*

(plural) hand shears for cutting sheet metal.

- *In class, the teacher used "tinsnips" to mean (plural) hand shears for cutting sheet metal.*
- *They discussed "tinsnips" during the group presentation.*

tintack *(noun)*

Tack or small nail of tinned iron.

- *In class, the teacher used "tintack" to mean tack or small nail of tinned iron.*
- *Understanding "tintack" helps you talk about this topic clearly.*

tinter *(noun)*

A hairdresser who tints hair.

- *Understanding "tinter" helps you talk about this topic clearly.*
- *They discussed "tinter" during the group presentation.*

tintinnabulate *(verb)*

Ring or sound like a small bell.

- *Learners should practice how to use "tintinnabulate" in real sentences.*
- *In everyday English, people use "tintinnabulate" when talking about this idea.*

tintinnabulation *(noun)*

The sound of a bell ringing; ; ; –E. A. Poe.

- *The tintinnabulation that so voluminously swells from the ringing and the dinging of the bells.*
- *The article explained what "tintinnabulation" means with a simple example.*

tintometer *(noun)*

A measuring instrument used in colorimetric analysis to determine the quantity of a substance from the color it yields with specific reagents.

- *She wrote a short paragraph that included "tintometer."*
- *They discussed "tintometer" during the group presentation.*

tippytoe *(verb)*

Walk on one's toes.

- *Learners should practice how to use "tippytoe" in real sentences.*
- *In everyday English, people use "tippytoe" when talking about this idea.*

tipuana *(noun)*

One species: South American tree: tipu tree.

- *He looked up "tipuana" because he had never seen it before.*
- *Understanding "tipuana" helps you talk about this topic clearly.*

tirelessness *(noun)*

Tireless determination.

- *Understanding "tirelessness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tirelessness."*

---

tiresomeness *(noun)*

Dullness owing to length or slowness.

- *They discussed "tiresomeness" during the group presentation.*
- *In class, the teacher used "tiresomeness" to mean dullness owing to length or slowness.*

---

tirich mir *(noun)*

A mountain in the Hindu Kush in Pakistan (25,230 feet high).

- *She wrote a short paragraph that included "tirich mir."*
- *He looked up "tirich mir" because he had never seen it before.*

---

tirolean *(noun)*

Soft green felt hat with a feather or brush cockade.

- *He looked up "tirolean" because he had never seen it before.*
- *In class, the teacher used "tirolean" to mean soft green felt hat with a feather or brush cockade.*

---

tishah b'ab *(noun)*

(Judaism) a major fast day on the Jewish calendar commemorating the destruction of the temples in Jerusalem.

- *The article explained what "tishah b'ab" means with a simple example.*
- *They discussed "tishah b'ab" during the group presentation.*

---

tishah b'av *(noun)*

(Judaism) a major fast day on the Jewish calendar commemorating the destruction of the temples in Jerusalem.

- *They discussed "tishah b'av" during the group presentation.*
- *The article explained what "tishah b'av" means with a simple example.*

---

titaness *(noun)*

(Greek mythology) any of the primordial giant goddesses who were offspring of Uranus (heaven) and Gaea (earth) in ancient mythology.

- *They discussed "titaness" during the group presentation.*
- *The article explained what "titaness" means with a simple example.*

---

titanosaurian *(noun)*

Amphibious quadrupedal herbivorous dinosaur with a long thin neck and whiplike tail; of the Cretaceous mostly in the southern hemisphere.

- *In class, the teacher used "titanosaurian" to mean amphibious quadrupedal herbivorous dinosaur with a....*
- *Understanding "titanosaurian" helps you talk about this topic clearly.*

---

titanosauridae *(noun)*

Herbivorous dinosaurs of the Cretaceous.

- *She wrote a short paragraph that included "titanosauridae."*
- *Understanding "titanosauridae" helps you talk about this topic clearly.*

---

titanosaurus *(noun)*

Genus of herbivorous dinosaurs flourishing during the Cretaceous in South America.

- *He looked up "titanosaurus" because he had never seen it before.*
- *She wrote a short paragraph that included "titanosaurus."*

---

titfer *(noun)*

Long tubular cell peculiar to xylem.

- *Understanding “tracheid” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “tracheid.”*

trachelospermum *(noun)*

Genus of Asiatic woody vines with milky sap in leaves and stems.

- *She wrote a short paragraph that included “trachelospermum.”*
- *The article explained what “trachelospermum” means with a simple example.*

trachelospermum jasminoides *(noun)*

Evergreen Chinese woody climber with shiny dark green leaves and intensely fragrant white flowers.

- *She wrote a short paragraph that included “trachelospermum jasminoides.”*
- *He looked up “trachelospermum jasminoides” because he had never seen it before.*

tracheophyta *(noun)*

In former classifications: comprising plants with a vascular system including ferns and fern allies as well as seed plants.

- *Understanding “tracheophyta” helps you talk about this topic clearly.*
- *They discussed “tracheophyta” during the group presentation.*

tracheophyte *(noun)*

Green plant having a vascular system: ferns, gymnosperms, angiosperms.

- *In class, the teacher used “tracheophyte” to mean green plant having a vascular system: ferns,....*
- *The article explained what “tracheophyte” means with a simple example.*

trachinotus *(noun)*

A genus of Carangidae.

- *He looked up “trachinotus” because he had never seen it before.*
- *Understanding “trachinotus” helps you talk about this topic clearly.*

trachinotus carolinus *(noun)*

Found in coastal waters New England to Brazil except clear waters of West Indies.

- *He looked up “trachinotus carolinus” because he had never seen it before.*
- *In class, the teacher used “trachinotus carolinus” to mean found in coastal waters new england to brazil....*

trachinotus falcatus *(noun)*

Large game fish; found in waters of the West Indies.

- *They discussed “trachinotus falcatus” during the group presentation.*
- *Understanding “trachinotus falcatus” helps you talk about this topic clearly.*

trachipteridae *(noun)*

Ribbonfishes.

- *They discussed “trachipteridae” during the group presentation.*
- *He looked up “trachipteridae” because he had never seen it before.*

trachipterus *(noun)*

Type genus of the Trachipteridae.

- *Understanding “trachipterus” helps you talk about this topic clearly.*
- *In class, the teacher used “trachipterus” to mean type genus of the trachipteridae.*

trachipterus arcticus *(noun)*

Deep-sea ribbonfish.

- *Understanding "trachipterus arcticus" helps you talk about this topic clearly.*
- *He looked up "trachipterus arcticus" because he had never seen it before.*

trachodon *(noun)*

Large duck-billed dinosaur of the Cretaceous period.

- *Understanding "trachodon" helps you talk about this topic clearly.*
- *They discussed "trachodon" during the group presentation.*

trachodont *(noun)*

Large duck-billed dinosaur of the Cretaceous period.

- *He looked up "trachodont" because he had never seen it before.*
- *She wrote a short paragraph that included "trachodont."*

trachurus symmetricus *(noun)*

A California food fish.

- *Understanding "trachurus symmetricus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "trachurus symmetricus."*

tracklayer *(noun)*

A workman who lays and repairs railroad tracks.

- *They discussed "treillage" during the group presentation.*
- *In class, the teacher used "treillage" to mean latticework used to support climbing plants.*

tremella *(noun)*

Fungi with yellowish gelatinous sporophores having convolutions resembling those of the brain.

- *Understanding "tremella" helps you talk about this topic clearly.*
- *He looked up "tremella" because he had never seen it before.*

tremella foliacea *(noun)*

A jelly fungus with a fruiting body 5-15 cm broad and gelatinous in consistency; resembles a bunch of leaf lettuce; mostly water and brownish in color.

- *Understanding "tremella foliacea" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tremella foliacea."*

tremella fuciformis *(noun)*

Popular in China and Japan and Taiwan; gelatinous mushrooms; most are dried.

- *The article explained what "tremella fuciformis" means with a simple example.*
- *They discussed "tremella fuciformis" during the group presentation.*

tremella lutescens *(noun)*

A yellow jelly fungus.

- *Understanding "tremella lutescens" helps you talk about this topic clearly.*
- *The article explained what "tremella lutescens" means with a simple example.*

---

tremella reticulata *(noun)*

A jelly fungus with an erect whitish fruiting body and a highly variable shape (sometimes resembling coral fungi).

- *In class, the teacher used "tremella reticulata" to mean a jelly fungus with an erect whitish fruiting body....*
- *The article explained what "tremella reticulata" means with a simple example.*

---

tremellaceae *(noun)*

A family of basidiomycetous fungi of the order Tremellales that have the basidium divided longitudinally.

- *He looked up "tremellaceae" because he had never seen it before.*
- *In class, the teacher used "tremellaceae" to mean a family of basidiomycetous fungi of the order....*

---

tremellales *(noun)*

Fungi varying from gelatinous to waxy or even horny in texture; most are saprophytic.

- *Understanding "tremellales" helps you talk about this topic clearly.*
- *The article explained what "tremellales" means with a simple example.*

---

trenail *(noun)*

A wooden peg that is used to fasten timbers in shipbuilding; water causes the peg to swell and hold the timbers fast.

- *She wrote a short paragraph that included "trenail."*
- *Understanding "trenail" helps you talk about this topic clearly.*

---

trencherman *(noun)*

A person who is devoted to eating and drinking to excess.

- *They discussed "trencherman" during the group presentation.*
- *The article explained what "trencherman" means with a simple example.*

---

trephination *(noun)*

An operation that removes a circular section of bone from the skull.

- *They discussed "trephination" during the group presentation.*
- *He looked up "trephination" because he had never seen it before.*

---

trephritidae *(noun)*

Fruit flies; some leaf miners.

- *She wrote a short paragraph that included "trephritidae."*
- *He looked up "trephritidae" because he had never seen it before.*

---

trepid *(adjective)*

Timid by nature or revealing timidity.

- *It is useful to describe something as "trepid" when it is timid by nature or revealing timidity.*
- *A "trepid" approach may work better in this case.*

---

trepidly *(adverb)*

In a timorous and trepid manner.

- *Try rewriting the sentence and include "trepidly" naturally.*
- *Using "trepidly" can make your explanation more exact.*

---

treponemataceae *(noun)*

Small spirochetes some parasitic or pathogenic.

- *He looked up "treponemataceae" because he had never seen it before.*
- *In class, the teacher used "treponemataceae" to mean small spirochetes some parasitic or pathogenic.*

---

trespass de bonis asportatis *(noun)*

An action brought to recover damages from a person who has taken goods or property from its rightful owner.

- *They discussed "trespass de bonis asportatis" during the group presentation.*

- *She wrote a short paragraph that included "trespass de bonis asportatis."*

---

trespass quare clausum fregit *(noun)*

The defendant unlawfully enters the land of the plaintiff.

- *He looked up "trespass quare clausum fregit" because he had never seen it before.*
- *They discussed "trespass quare clausum fregit" during the group presentation.*

---

trestlework *(noun)*

A supporting structure composed of a system of connected trestles; for a bridge or pier or scaffold e.g.

- *He looked up "trestlework" because he had never seen it before.*
- *In class, the teacher used "trestlework" to mean a supporting structure composed of a system of....*

---

tri-iodomethane *(noun)*

Sweet smelling yellow solid haloform CHI3.

- *The article explained what "tri-iodomethane" means with a simple example.*
- *They discussed "tri-iodomethane" during the group presentation.*

---

tri-iodothyronine *(noun)*

Thyronine with three iodine atoms added.

- *They discussed "tri-iodothyronine" during the group presentation.*
- *She wrote a short paragraph that included "tri-iodothyronine."*

---

triaenodon *(noun)*

A genus of Triakidae.

- *She wrote a short paragraph that included "triaenodon."*
- *He looked up "triaenodon" because he had never seen it before.*

---

triaenodon obseus *(noun)*

Smooth dogfish of Pacific and Indian Oceans and Red Sea having white-tipped dorsal and caudal fins.

- *In class, the teacher used "triaenodon obseus" to mean smooth dogfish of pacific and indian oceans and red....*
- *The article explained what "triaenodon obseus" means with a simple example.*

---

triakidae *(noun)*

Small sharks with smooth skins and lacking spines on their dorsal fins.

- *In class, the teacher used "triakidae" to mean small sharks with smooth skins and lacking spines....*
- *He looked up "triakidae" because he had never seen it before.*

---

trialeurodes *(noun)*

A genus of Aleyrodidae.

- *The article explained what "trialeurodes" means with a simple example.*
- *In class, the teacher used "trialeurodes" to mean a genus of aleyrodidae.*

---

trialeurodes vaporariorum *(noun)*

Whitefly that inhabits greenhouses.

- *He looked up "trialeurodes vaporariorum" because he had never seen it before.*
- *She wrote a short paragraph that included "trialeurodes vaporariorum."*

---

triangularity *(noun)*

The property of being shaped like a triangle.

- *She wrote a short paragraph that included "triangularity."*
- *He looked up "triangularity" because he had never seen it before.*

---

tribade *(noun)*

A female homosexual.

- *They discussed "tribade" during the group presentation.*
- *He looked up "tribade" because he had never seen it before.*

---

tribadism *(noun)*

A form of lesbianism that simulates heterosexual intercourse.

- *They discussed "tribadism" during the group presentation.*
- *She wrote a short paragraph that included "tribadism."*

tribalisation *(noun)*

The act of making tribal; unification on a tribal basis.

- *They discussed "tribalisation" during the group presentation.*
- *Understanding "tribalisation" helps you talk about this topic clearly.*

tribalization *(noun)*

The act of making tribal; unification on a tribal basis.

- *In class, the teacher used "tribalization" to mean the act of making tribal; unification on a tribal basis.*
- *The article explained what "tribalization" means with a simple example.*

tribasic acid *(noun)*

An acid containing three replaceable hydrogen atoms per molecule.

- *He looked up "tribasic acid" because he had never seen it before.*
- *In class, the teacher used "tribasic acid" to mean an acid containing three replaceable hydrogen atoms....*

tribasic sodium phosphate *(noun)*

The tertiary phosphate of sodium used as a builder in soaps and detergents.

- *He looked up "tribasic sodium phosphate" because he had never seen it before.*
- *In class, the teacher used "tribasic sodium phosphate" to mean the tertiary phosphate of sodium used as a builder....*

tribe bovini *(noun)*

Term not used technically; essentially coextensive with genus Bos.

- *She wrote a short paragraph that included "tribe bovini."*
- *He looked up "tribe bovini" because he had never seen it before.*

tribe synercus *(noun)*

Cape buffalo.

- *In class, the teacher used "tribe synercus" to mean cape buffalo.*
- *They discussed "tribe synercus" during the group presentation.*

tribologist *(noun)*

A specialist in tribology.

- *Understanding "tribologist" helps you talk about this topic clearly.*
- *They discussed "tribologist" during the group presentation.*

tribonema *(noun)*

Type genus of Tribonemaceae.

- *She wrote a short paragraph that included "tribonema."*
- *Understanding "tribonema" helps you talk about this topic clearly.*

tribonemaceae *(noun)*

Simple filamentous freshwater yellow-green algae.

- *The article explained what "tribonemaceae" means with a simple example.*
- *In class, the teacher used "tribonemaceae" to mean simple filamentous freshwater yellow-green algae.*

tribromoethanol *(noun)*

An intravenous anesthetic.

- *They discussed "tribromoethanol" during the group presentation.*
- *The article explained what "tribromoethanol" means with a simple example.*

tribromoethyl alcohol *(noun)*

An intravenous anesthetic.

- *Understanding "tribromoethyl alcohol" helps you talk about this topic clearly.*
- *The article explained what "tribromoethyl alcohol" means with a simple example.*

---

tribromomethane *(noun)*

Colorless liquid haloform CHBr3.

- *Understanding "tribromomethane" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tribromomethane."*

---

tribulus terestris *(noun)*

Tropical annual procumbent poisonous subshrub having fruit that splits into five spiny nutlets; serious pasture weed.

- *They discussed "tribulus terestris" during the group presentation.*
- *She wrote a short paragraph that included "tribulus terestris."*

---

tribuneship *(noun)*

The position of tribune.

- *The article explained what "tribuneship" means with a simple example.*
- *She wrote a short paragraph that included "tribuneship."*

---

tributyrin *(noun)*

A bitter oily triglyceride of butyric acid; a form of butyrin.

- *In class, the teacher used "tributyrin" to mean a bitter oily triglyceride of butyric acid; a form....*
- *The article explained what "tributyrin" means with a simple example.*

---

tricentenary *(adjective)*

Of or relating to or completing a period of 300 years.

- *Would you call this situation "tricentenary"? Explain why.*
- *Students compared "tricentenary" with similar adjectives in the lesson.*

---

trichechidae *(noun)*

Comprising only the manatees.

- *The article explained what "trichechidae" means with a simple example.*
- *They discussed "trichechidae" during the group presentation.*

---

trichechus *(noun)*

Type and sole genus of the Trichechidae.

- *In class, the teacher used "trichechus" to mean type and sole genus of the trichechidae.*
- *The article explained what "trichechus" means with a simple example.*

---

trichechus manatus *(noun)*

Sirenian mammal of tropical coastal waters of America; the flat tail is rounded.

- *She wrote a short paragraph that included "trichechus manatus."*
- *The article explained what "trichechus manatus" means with a simple example.*

---

trichina *(noun)*

Parasitic nematode occurring in the intestines of pigs and rats and human beings and producing larvae that form cysts in skeletal muscles.

- *He looked up "trichina" because he had never seen it before.*
- *She wrote a short paragraph that included "trichina."*

---

trichion *(noun)*

Point where the hairline meets the midpoint of the forehead.

- *In class, the teacher used "trichion" to mean point where the hairline meets the midpoint of the....*
- *The article explained what "trichion" means with a simple example.*

---

trichiuridae *(noun)*

Cutlassfishes.

- *They discussed "trichiuridae" during the group presentation.*
- *Understanding "trichiuridae" helps you talk about this topic clearly.*

trichloracetic acid *(noun)*

A strong acid made by chlorinating acetic acid.

- *She wrote a short paragraph that included "trichloracetic acid."*
- *Understanding "trichloracetic acid" helps you talk about this topic clearly.*

trichlormethiazide *(noun)*

Diuretic drug (trade name Naqua) used to treat hypertension.

- *They discussed "trichlormethiazide" during the group presentation.*
- *He looked up "trichlormethiazide" because he had never seen it before.*

trichloromethane *(noun)*

A volatile liquid haloform (CHCl3); formerly used as an anesthetic.

- *He looked up "trichloromethane" because he had never seen it before.*
- *She wrote a short paragraph that included "trichloromethane."*

trichobezoar *(noun)*

A compact mass of hair that forms in the alimentary canal (especially in the stomach of animals as a result of licking fur).

- *Understanding "trichobezoar" helps you talk about this topic clearly.*
- *They discussed "trichobezoar" during the group presentation.*

trichoceros *(noun)*

Small genus of small epiphytic or terrestrial orchids of tropical South America.

- *She wrote a short paragraph that included "trichoceros."*
- *They discussed "trichoceros" during the group presentation.*

trichodesmium *(noun)*

Large colonial bacterium common in tropical open-ocean waters; important in carbon and nitrogen fixation.

- *She wrote a short paragraph that included "trichodesmium."*
- *He looked up "trichodesmium" because he had never seen it before.*

trichoglossus *(noun)*

A genus of Loriinae.

- *They discussed "trichoglossus" during the group presentation.*
- *In class, the teacher used "trichoglossus" to mean a genus of loriinae.*

trichoglossus moluccanus *(noun)*

A kind of lorikeet.

- *The article explained what "trichoglossus moluccanus" means with a simple example.*
- *She wrote a short paragraph that included "trichoglossus moluccanus."*

tricholoma *(noun)*

Agarics with white spores and a fleshy stalk and notched gills; of various colors both edible and inedible.

- *In class, the teacher used "tricholoma" to mean agarics with white spores and a fleshy stalk and....*
- *The article explained what "tricholoma" means with a simple example.*

tricholoma aurantium *(noun)*

An orange tan agaric whose gills become brown by maturity; has a strong odor and taste.

- *In class, the teacher used "tricholoma aurantium" to mean an orange tan agaric whose gills become brown by....*
- *They discussed "tricholoma aurantium" during the group presentation.*

tricholoma flavovirens *(noun)*

An edible agaric with yellow gills and a viscid yellow cap that has a brownish center.

- *She wrote a short paragraph that included "tricholoma flavovirens."*
- *He looked up "tricholoma flavovirens" because he had never seen it before.*

tricholoma irinum *(noun)*

An edible agaric with large silky white caps and thick stalks.

- *Understanding "tricholoma irinum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tricholoma irinum."*

---

tricholoma pardinum *(noun)*

A poisonous agaric having a pale cap with fine grey fibrils.

- *Understanding "tricholoma pardinum" helps you talk about this topic clearly.*
- *In class, the teacher used "tricholoma pardinum" to mean a poisonous agaric having a pale cap with fine grey....*

---

tricholoma pessundatum *(noun)*

A mildly poisonous agaric with a viscid reddish brown cap and white gills and stalk.

- *They discussed "tricholoma pessundatum" during the group presentation.*
- *The article explained what "tricholoma pessundatum" means with a simple example.*

---

tricholoma populinum *(noun)*

An edible agaric that fruits in great clusters (especially in sandy soil under cottonwood trees).

- *She wrote a short paragraph that included "tricholoma populinum."*
- *The article explained what "tricholoma populinum" means with a simple example.*

---

tricholoma sejunctum *(noun)*

An agaric with a cap that is coated with dark fibrils in the center and has yellowish margins.

- *Understanding "tricholoma sejunctum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tricholoma sejunctum."*

---

tricholoma vaccinum *(noun)*

An agaric with a cap that is densely covered with reddish fibrils and pale gills and stalk.

- *He looked up "tricholoma vaccinum" because he had never seen it before.*
- *She wrote a short paragraph that included "tricholoma vaccinum."*

---

tricholoma venenata *(noun)*

A poisonous white agaric.

- *In class, the teacher used "tricholoma venenata" to mean a poisonous white agaric.*
- *The article explained what "tricholoma venenata" means with a simple example.*

---

tricholomataceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *They discussed "tricholomataceae" during the group presentation.*
- *The article explained what "tricholomataceae" means with a simple example.*

---

trichomanes boschianum *(noun)*

A variety of bristle fern.

- *He looked up "trichomanes boschianum" because he had never seen it before.*
- *She wrote a short paragraph that included "trichomanes boschianum."*

---

trichomanes reniforme *(noun)*

Large fern of New Zealand having kidney-shaped fronds.

- *Understanding "trichomanes reniforme" helps you talk about this topic clearly.*
- *In class, the teacher used "trichomanes reniforme" to mean large fern of new zealand having kidney-shaped fronds.*

---

trichomonad *(noun)*

Cause of trichomoniasis in women and cattle and birds.

- *In class, the teacher used "trichomonad" to mean cause of trichomoniasis in women and cattle and birds.*
- *The article explained what "trichomonad" means with a simple example.*

---

trichophaga *(noun)*

Carpet moths.

- *He looked up "trichophaga" because he had never seen it before.*

- *In class, the teacher used “trichophaga” to mean carpet moths.*

trichophaga tapetzella *(noun)*

Larvae feed on carpets and other woolens.

- *He looked up “trichophaga tapetzella” because he had never seen it before.*
- *In class, the teacher used “trichophaga tapetzella” to mean larvae feed on carpets and other woolens.*

trichostema *(noun)*

Genus of North American aromatic herbs or subshrubs: blue curls.

- *They discussed “trichostema” during the group presentation.*
- *Understanding “trichostema” helps you talk about this topic clearly.*

trichostema dichotomum *(noun)*

Aromatic plant of the eastern United States.

- *Understanding “trichostema dichotomum” helps you talk about this topic clearly.*
- *In class, the teacher used “trichostema dichotomum” to mean aromatic plant of the eastern united states.*

trichostema lanatum *(noun)*

An aromatic plant with wooly leaves found in southern California and Mexico.

- *They discussed “trichostema lanatum” during the group presentation.*
- *In class, the teacher used “trichostema lanatum” to mean an aromatic plant with wooly leaves found in....*

trichostema lanceolatum *(noun)*

Aromatic plant of western United States.

- *He looked up “trichostema lanceolatum” because he had never seen it before.*
- *In class, the teacher used “trichostema lanceolatum” to mean aromatic plant of western united states.*

trichostigma *(noun)*

A genus of erect or climbing shrubs found in tropical South America.

- *He looked up “trichostigma” because he had never seen it before.*
- *Understanding “trichostigma” helps you talk about this topic clearly.*

trichosurus *(noun)*

A genus of Phalangeridae.

- *The article explained what “trichosurus” means with a simple example.*
- *She wrote a short paragraph that included “trichosurus.”*

trichosurus vulpecula *(noun)*

Bushy-tailed phalanger.

- *He looked up “trichosurus vulpecula” because he had never seen it before.*
- *They discussed “trichosurus vulpecula” during the group presentation.*

trichroism *(noun)*

Pleochroism of a crystal so that it exhibits three different colors when viewed from three different directions.

- *In class, the teacher used “trichroism” to mean pleochroism of a crystal so that it exhibits three....*
- *He looked up “trichroism” because he had never seen it before.*

trichys *(noun)*

A genus of Hystricidae.

- *In class, the teacher used “trichys” to mean a genus of hystricidae.*
- *The article explained what “trichys” means with a simple example.*

trichys lipura *(noun)*

Porcupine of Borneo and Sumatra having short spines and a long tail.

- *She wrote a short paragraph that included “trichys lipura.”*
- *They discussed “trichys lipura” during the group presentation.*

trickily *(adverb)*

In an artful manner.

- *The narrator describes the scene "trickily" in the final chapter.*
- *Using "trickily" can make your explanation more exact.*

---

tricuspidate *(adjective)*

Having three cusps or points (especially a molar tooth).

- *Her writing became clearer after she learned "tricuspidate."*
- *The speaker chose "tricuspidate" because it captured the feeling precisely.*

---

tridacnidae *(noun)*

Large marine hard-shell clams.

- *He looked up "tridacnidae" because he had never seen it before.*
- *Understanding "tridacnidae" helps you talk about this topic clearly.*

---

tridymite *(noun)*

A mineral form of silica.

- *The article explained what "tridymite" means with a simple example.*
- *She wrote a short paragraph that included "tridymite."*

---

trifler *(noun)*

One who behaves lightly or not seriously.

- *He looked up "trifler" because he had never seen it before.*
- *She wrote a short paragraph that included "trifler."*

---

trifluoromethane *(noun)*

Colorless gas haloform CHF3 (similar to chloroform).

- *Understanding "trifluoromethane" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "trifluoromethane."*

---

trifoliated *(adjective)*

(of a leaf shape) having three leaflets.

- *A "trifoliated" approach may work better in this case.*
- *The speaker chose "trifoliated" because it captured the feeling precisely.*

---

trifoliolate *(adjective)*

(of a leaf shape) having three leaflets.

- *Students compared "trifoliolate" with similar adjectives in the lesson.*
- *Would you call this situation "trifoliolate"? Explain why.*

---

trifoliolate leaf *(noun)*

Having three leaflets.

- *In class, the teacher used "trifoliolate leaf" to mean having three leaflets.*
- *The article explained what "trifoliolate leaf" means with a simple example.*

---

trifolium incarnatum *(noun)*

Southern European annual with spiky heads of crimson flower; extensively cultivated in United States for forage.

- *They discussed "trifolium incarnatum" during the group presentation.*
- *In class, the teacher used "trifolium incarnatum" to mean southern european annual with spiky heads of....*

---

trifolium reflexum *(noun)*

Clover of western United States.

- *She wrote a short paragraph that included "trifolium reflexum."*
- *Understanding "trifolium reflexum" helps you talk about this topic clearly.*

---

trifolium stoloniferum *(noun)*

Clover of western United States.

- *He looked up "trifolium stoloniferum" because he had never seen it before.*
- *She wrote a short paragraph that included "trifolium stoloniferum."*

---

trifurcate *(verb)*

Divide into three.

- *The road trifurcates at the bridge.*
- *Can you use "trifurcate" in a sentence that fits this situation?*

---

trifurcation *(noun)*

The act of splitting into three branches.

- *He looked up "trifurcation" because he had never seen it before.*
- *They discussed "trifurcation" during the group presentation.*

---

trigeminus *(noun)*

The main sensory nerve of the face and motor nerve for the muscles of mastication.

- *The article explained what "trigeminus" means with a simple example.*
- *They discussed "trigeminus" during the group presentation.*

---

trigla lucerna *(noun)*

A kind of gurnard.

- *They discussed "trigla lucerna" during the group presentation.*
- *He looked up "trigla lucerna" because he had never seen it before.*

---

triglidae *(noun)*

In some classifications restricted to the gurnards and subdivided into the subfamilies Triglinae (true sea robins) and Peristediinae (armored sea robins).

- *She wrote a short paragraph that included "triglidae."*
- *They discussed "triglidae" during the group presentation.*

---

triglinae *(noun)*

In some classifications considered a subfamily of Triglidae comprising searobins having ordinary scales and no barbels (true searobins).

- *They discussed "triglinae" during the group presentation.*
- *She wrote a short paragraph that included "triglinae."*

---

triglochin *(noun)*

Perennial or annual bog or marsh plants; includes arrow grass.

- *She wrote a short paragraph that included "triglochin."*
- *He looked up "triglochin" because he had never seen it before.*

---

triglochin maritima *(noun)*

Tufted perennial found in shallow water or marshland; sometimes poisons livestock.

- *The article explained what "triglochin maritima" means with a simple example.*
- *In class, the teacher used "triglochin maritima" to mean tufted perennial found in shallow water or....*

---

trigonella foenumgraecum *(noun)*

Annual herb or southern Europe and eastern Asia having off-white flowers and aromatic seeds used medicinally and in curry.

- *They discussed "trigonella foenumgraecum" during the group presentation.*
- *The article explained what "trigonella foenumgraecum" means with a simple example.*

---

trigonella ornithopodioides *(noun)*

Old World herb related to fenugreek.

- *He looked up "trigonella ornithopodioides" because he had never seen it before.*
- *They discussed "trigonella ornithopodioides" during the group presentation.*

---

trigonometrician *(noun)*

A mathematician specializing in trigonometry.

- *He looked up "trigonometrician" because he had never seen it before.*
- *They discussed "trigonometrician" during the group presentation.*

trigonum cerebrale *(noun)*

An arched bundle of white fibers at the base of the brain by which the hippocampus of each hemisphere projects to the contralateral hippocampus and to the thalamus and mamillary bodies.

- *Understanding "trigonum cerebrale" helps you talk about this topic clearly.*
- *In class, the teacher used "trigonum cerebrale" to mean an arched bundle of white fibers at the base of the....*

triiodomethane *(noun)*

A yellowish crystalline solid with a penetrating odor; sometimes used as an antiseptic dressing.

- *In class, the teacher used "triiodomethane" to mean a yellowish crystalline solid with a penetrating....*
- *Understanding "triiodomethane" helps you talk about this topic clearly.*

trilisa *(noun)*

Genus of herbs of southern United States.

- *He looked up "trilisa" because he had never seen it before.*
- *She wrote a short paragraph that included "trilisa."*

trilisa odoratissima *(noun)*

Perennial of southeastern United States with leaves having the fragrance of vanilla.

- *They discussed "trilisa odoratissima" during the group presentation.*
- *Understanding "trilisa odoratissima" helps you talk about this topic clearly.*

trilliaceae *(noun)*

Small family of herbs having flowers with 3 petals and 3 sepals; in some classification systems considered a subfamily of the Liliaceae.

- *They discussed "trilliaceae" during the group presentation.*
- *He looked up "trilliaceae" because he had never seen it before.*

trillium erectum *(noun)*

Trillium of eastern North America having malodorous pink to purple flowers and an astringent root used in folk medicine especially to ease childbirth.

- *The article explained what "trillium erectum" means with a simple example.*
- *In class, the teacher used "trillium erectum" to mean trillium of eastern north america having malodorous....*

trillium recurvatum *(noun)*

Trillium of central United States having dark purple sessile flowers.

- *In class, the teacher used "trillium recurvatum" to mean trillium of central united states having dark....*
- *The article explained what "trillium recurvatum" means with a simple example.*

trilobate *(adjective)*

(of a leaf shape) divided into three lobes.

- *It is useful to describe something as "trilobate" when it is (of a leaf shape) divided into three lobes.*
- *The speaker chose "trilobate" because it captured the feeling precisely.*

trilobated *(adjective)*

(of a leaf shape) divided into three lobes.

- *Students compared "trilobated" with similar adjectives in the lesson.*
- *A "trilobated" approach may work better in this case.*

trimly *(adverb)*

In a trim manner.

- *He was trimly attired.*
- *Try rewriting the sentence and include "trimly" naturally.*

trimorphodon *(noun)*

Lyre snakes.

- *The article explained what "trimorphodon" means with a simple example.*
- *She wrote a short paragraph that included "trimorphodon."*

trimorphodon lambda *(noun)*

Of desert regions of southwestern North America.

- *Understanding "trimorphodon lambda" helps you talk about this topic clearly.*
- *The article explained what "trimorphodon lambda" means with a simple example.*

---

trimotored *(adjective)*

Having three motors.

- *A "trimotored" approach may work better in this case.*
- *Would you call this situation "trimotored"? Explain why.*

---

trimox *(noun)*

An antibiotic; a semisynthetic oral penicillin (trade names Amoxil and Larotid and Polymox and Trimox and Augmentin) used to treat bacterial infections.

- *The article explained what "trimox" means with a simple example.*
- *They discussed "trimox" during the group presentation.*

---

trinectes *(noun)*

A genus of Soleidae.

- *They discussed "trinectes" during the group presentation.*
- *Understanding "trinectes" helps you talk about this topic clearly.*

---

trinectes maculatus *(noun)*

Useless as food; in coastal streams from Maine to Texas and Panama.

- *He looked up "trinectes maculatus" because he had never seen it before.*
- *Understanding "trinectes maculatus" helps you talk about this topic clearly.*

---

tringa melanoleuca *(noun)*

A variety of yellowlegs.

- *They discussed "tringa melanoleuca" during the group presentation.*
- *The article explained what "tringa melanoleuca" means with a simple example.*

---

tringa nebularia *(noun)*

Large European sandpiper with greenish legs.

- *He looked up "tringa nebularia" because he had never seen it before.*
- *Understanding "tringa nebularia" helps you talk about this topic clearly.*

---

tringa totanus *(noun)*

A common Old World wading bird with long red legs.

- *She wrote a short paragraph that included "tringa totanus."*
- *They discussed "tringa totanus" during the group presentation.*

---

trinil man *(noun)*

Fossil remains found in Java; formerly called Pithecanthropus erectus.

- *He looked up "trinil man" because he had never seen it before.*
- *They discussed "trinil man" during the group presentation.*

---

trinitroglycerin *(noun)*

A heavy yellow poisonous oily explosive liquid obtained by nitrating glycerol; used in making explosives and medically as a vasodilator (trade names Nitrospan and Nitrostat).

- *In class, the teacher used "trinitroglycerin" to mean a heavy yellow poisonous oily explosive liquid....*
- *He looked up "trinitroglycerin" because he had never seen it before.*

---

trinketry *(noun)*

Trinkets and other ornaments of dress collectively.

- *Understanding "trinketry" helps you talk about this topic clearly.*
- *He looked up "trinketry" because he had never seen it before.*

---

trinuclear *(adjective)*

Having three nuclei.

- *Her writing became clearer after she learned "trinuclear."*

- *Would you call this situation "trinuclear"? Explain why.*

---

trinucleate *(adjective)*

Having three nuclei.

- *Would you call this situation "trinucleate"? Explain why.*
- *Students compared "trinucleate" with similar adjectives in the lesson.*

---

trinucleated *(adjective)*

Having three nuclei.

- *It is useful to describe something as "trinucleated" when it is having three nuclei.*
- *The speaker chose "trinucleated" because it captured the feeling precisely.*

---

triolein *(noun)*

A naturally occurring glyceride of oleic acid that is found in fats and oils.

- *In class, the teacher used "triolein" to mean a naturally occurring glyceride of oleic acid that....*
- *Understanding "triolein" helps you talk about this topic clearly.*

---

trionychidae *(noun)*

Soft-shelled turtles.

- *They discussed "trionychidae" during the group presentation.*
- *In class, the teacher used "trionychidae" to mean soft-shelled turtles.*

---

trionyx *(noun)*

Type genus of the Trionychidae.

- *They discussed "trionyx" during the group presentation.*
- *Understanding "trionyx" helps you talk about this topic clearly.*

---

trionyx muticus *(noun)*

River turtle of Mississippi basin; prefers running water.

- *They discussed "trionyx muticus" during the group presentation.*
- *Understanding "trionyx muticus" helps you talk about this topic clearly.*

---

trionyx spiniferus *(noun)*

River turtle of western United States with a warty shell; prefers quiet water.

- *They discussed "trionyx spiniferus" during the group presentation.*
- *The article explained what "trionyx spiniferus" means with a simple example.*

---

triopidae *(noun)*

A family of Notostraca.

- *She wrote a short paragraph that included "triopidae."*
- *Understanding "triopidae" helps you talk about this topic clearly.*

---

triose *(noun)*

Any monosaccharide sugar containing three atoms of carbon per molecule.

- *Understanding "triose" helps you talk about this topic clearly.*
- *They discussed "triose" during the group presentation.*

---

triostium *(noun)*

Genus of Asiatic and North American herbs: feverroot.

- *In class, the teacher used "triostium" to mean genus of asiatic and north american herbs: feverroot.*
- *They discussed "triostium" during the group presentation.*

---

triostium perfoliatum *(noun)*

Coarse weedy American perennial herb with large usually perfoliate leaves and purple or dull red flowers.

- *In class, the teacher used "triostium perfoliatum" to mean coarse weedy american perennial herb with large....*
- *He looked up "triostium perfoliatum" because he had never seen it before.*

---

tripalmitin *(noun)*

A triglyceride of palmitic acid.

- *The article explained what "tripalmitin" means with a simple example.*
- *She wrote a short paragraph that included "tripalmitin."*

triphammer *(noun)*

A massive power hammer; raised by a cam until released to fall under gravity.

- *She wrote a short paragraph that included "triphammer."*
- *Understanding "triphammer" helps you talk about this topic clearly.*

triphosphopyridine *(noun)*

A pyridine ring with three phosphorus groups.

- *He looked up "triphosphopyridine" because he had never seen it before.*
- *In class, the teacher used "triphosphopyridine" to mean a pyridine ring with three phosphorus groups.*

triphosphopyridine nucleotide *(noun)*

A coenzyme of several enzymes.

- *In class, the teacher used "triphosphopyridine nucleotide" to mean a coenzyme of several enzymes.*
- *He looked up "triphosphopyridine nucleotide" because he had never seen it before.*

triphosphoric acid *(noun)*

An acid that is a partial anhydride of three molecules of phosphoric acid; known chiefly in the form of its salts and esters.

- *She wrote a short paragraph that included "triphosphoric acid."*
- *He looked up "triphosphoric acid" because he had never seen it before.*

tripinnated *(adjective)*

(of a leaf shape) thrice pinnate.

- *Students compared "tripinnated" with similar adjectives in the lesson.*
- *A "tripinnated" approach may work better in this case.*

tripinnatifid *(adjective)*

(of a leaf shape) bipinnatifid with segments pinnatifid.

- *A "tripinnatifid" approach may work better in this case.*
- *Would you call this situation "tripinnatifid"? Explain why.*

tripletail *(noun)*

Large food fish of warm waters worldwide having long anal and dorsal fins that with a caudal fin suggest a three-lobed tail.

- *Understanding "tripletail" helps you talk about this topic clearly.*
- *They discussed "tripletail" during the group presentation.*

tripleurospermum *(noun)*

Small genus comprising plants often included in genus Matricaria.

- *They discussed "tripleurospermum" during the group presentation.*
- *The article explained what "tripleurospermum" means with a simple example.*

tripleurospermum inodorum *(noun)*

Ubiquitous European annual weed with white flowers and finely divided leaves naturalized and sometimes cultivated in eastern North America; sometimes included in genus Matricaria.

- *Understanding "tripleurospermum inodorum" helps you talk about this topic clearly.*
- *He looked up "tripleurospermum inodorum" because he had never seen it before.*

tripleurospermum oreades tchihatchewii *(noun)*

Mat-forming perennial herb of Asia Minor; sometimes included in genus Matricaria.

- *He looked up "tripleurospermum oreades tchihatchewii" because he had never seen it before.*
- *In class, the teacher used "tripleurospermum oreades tchihatchewii" to mean mat-forming perennial herb of asia minor; sometimes....*

tripleurospermum tchihatchewii *(noun)*

Low densely tufted perennial herb of Turkey having small white flowers; used as a ground cover in dry places; sometimes included in genus Matricaria.

- *She wrote a short paragraph that included "tripleurospermum tchihatchewii."*
- *Understanding "tripleurospermum tchihatchewii" helps you talk about this topic clearly.*

---

triplicity *(noun)*

The property of being triple.

- *The article explained what "triplicity" means with a simple example.*
- *In class, the teacher used "triplicity" to mean the property of being triple.*

---

triplochiton *(noun)*

Small genus of tropical African trees with maplelike leaves.

- *The article explained what "triplochiton" means with a simple example.*
- *In class, the teacher used "triplochiton" to mean small genus of tropical african trees with....*

---

triplochiton scleroxcylon *(noun)*

Large west African tree having large palmately lobed leaves and axillary cymose panicles of small white flowers and one-winged seeds; yields soft white to pale yellow wood.

- *Understanding "triplochiton scleroxcylon" helps you talk about this topic clearly.*
- *In class, the teacher used "triplochiton scleroxcylon" to mean large west african tree having large palmately....*

---

triquetral *(noun)*

A wrist bone that articulates with the pisiform and hamate and lunate bones.

- *The article explained what "triquetral" means with a simple example.*
- *In class, the teacher used "triquetral" to mean a wrist bone that articulates with the pisiform and....*

---

triquetral bone *(noun)*

A wrist bone that articulates with the pisiform and hamate and lunate bones.

- *They discussed "triquetral bone" during the group presentation.*
- *In class, the teacher used "triquetral bone" to mean a wrist bone that articulates with the pisiform and....*

---

triquetrous leek *(noun)*

European leek naturalized in Great Britain; leaves are triangular.

- *Understanding "triquetrous leek" helps you talk about this topic clearly.*
- *The article explained what "triquetrous leek" means with a simple example.*

---

trisaccharide *(noun)*

Any of a variety of carbohydrates that yield three monosaccharide molecules on complete hydrolysis.

- *He looked up "trisaccharide" because he had never seen it before.*
- *They discussed "trisaccharide" during the group presentation.*

---

trisect *(verb)*

Cut in three.

- *Trisect a line.*
- *The coach explained when to use "trisect" and when to wait.*

---

triskaidekaphobic *(adjective)*

Suffering from triskaidekaphobia (abnormal fear of the number 13).

- *A "triskaidekaphobic" approach may work better in this case.*
- *It is useful to describe something as "triskaidekaphobic" when it is suffering from triskaidekaphobia (abnormal fear of....*

---

tristearin *(noun)*

A triglyceride of stearic acid.

- *She wrote a short paragraph that included "tristearin."*
- *He looked up "tristearin" because he had never seen it before.*

---

tritanopic *(adjective)*

Inability to see the color blue or to distinguish the colors blue and yellow.

- *A "tritanopic" approach may work better in this case.*
- *The speaker chose "tritanopic" because it captured the feeling precisely.*

tritely *(adverb)*

In a trite manner.

- *Tritely expressed emotions.*
- *Try rewriting the sentence and include "tritely" naturally.*

tritheist *(noun)*

Someone (not an orthodox Christian) who believes that the Father and Son and Holy Ghost are three separate gods.

- *Understanding "tritheist" helps you talk about this topic clearly.*
- *They discussed "tritheist" during the group presentation.*

triticum aestivum spelta *(noun)*

Hardy wheat grown mostly in Europe for livestock feed.

- *In class, the teacher used "triticum aestivum spelta" to mean hardy wheat grown mostly in europe for livestock feed.*
- *He looked up "triticum aestivum spelta" because he had never seen it before.*

triticum dicoccum *(noun)*

Hard red wheat grown especially in Russia and Germany; in United States as stock feed.

- *In class, the teacher used "triticum dicoccum" to mean hard red wheat grown especially in russia and....*
- *He looked up "triticum dicoccum" because he had never seen it before.*

triticum dicoccum dicoccoides *(noun)*

Found wild in Palestine; held to be prototype of cultivated wheat.

- *She wrote a short paragraph that included "triticum dicoccum dicoccoides."*
- *They discussed "triticum dicoccum dicoccoides" during the group presentation.*

triticum spelta *(noun)*

Hardy wheat grown mostly in Europe for livestock feed.

- *Understanding "triticum spelta" helps you talk about this topic clearly.*
- *They discussed "triticum spelta" during the group presentation.*

triticum turgidum *(noun)*

Wheat with hard dark-colored kernels high in gluten and used for bread and pasta; grown especially in southern Russia, North Africa, and northern central North America.

- *In class, the teacher used "triticum turgidum" to mean wheat with hard dark-colored kernels high in gluten....*
- *The article explained what "triticum turgidum" means with a simple example.*

tritoma *(noun)*

A plant of the genus Kniphofia having long grasslike leaves and tall scapes of red or yellow drooping flowers.

- *In class, the teacher used "tritoma" to mean a plant of the genus kniphofia having long....*
- *They discussed "tritoma" during the group presentation.*

trochilidae *(noun)*

Hummingbirds.

- *Understanding "trochilidae" helps you talk about this topic clearly.*
- *In class, the teacher used "trochilidae" to mean hummingbirds.*

trochlearis *(noun)*

Either of the two cranial nerves on either side that control the superior oblique muscles of the eyes.

- *Understanding "trochlearis" helps you talk about this topic clearly.*
- *He looked up "trochlearis" because he had never seen it before.*

trofim denisovich lysenko *(noun)*

Soviet geneticist whose adherence to Lamarck's theory of evolution was favored by Stalin (1898-1976).

- *In class, the teacher used "trofim denisovich lysenko" to mean soviet geneticist whose adherence to lamarck's....*
- *He looked up "trofim denisovich lysenko" because he had never seen it before.*

trogium *(noun)*

A genus of Psocidae.

- *She wrote a short paragraph that included "trogium."*
- *He looked up "trogium" because he had never seen it before.*

---

trogium pulsatorium *(noun)*

A variety of booklouse.

- *In class, the teacher used "trogium pulsatorium" to mean a variety of booklouse.*
- *They discussed "trogium pulsatorium" during the group presentation.*

---

troglodytes aedon *(noun)*

Common American wren that nests around houses.

- *The article explained what "troglodytes aedon" means with a simple example.*
- *She wrote a short paragraph that included "troglodytes aedon."*

---

trogonidae *(noun)*

Coextensive with the order Trogoniformes.

- *In class, the teacher used "trogonidae" to mean coextensive with the order trogoniformes.*
- *They discussed "trogonidae" during the group presentation.*

---

trollius *(noun)*

Perennial herbs of north temperate regions: globeflowers.

- *In class, the teacher used "trollius" to mean perennial herbs of north temperate regions:....*
- *The article explained what "trollius" means with a simple example.*

---

trombicula *(noun)*

Type genus of the family Trombiculidae.

- *In class, the teacher used "trombicula" to mean type genus of the family trombiculidae.*
- *The article explained what "trombicula" means with a simple example.*

---

trombiculid *(noun)*

Mite that as nymph and adult feeds on early stages of small arthropods but whose larvae are parasitic on terrestrial vertebrates.

- *In class, the teacher used "trombiculid" to mean mite that as nymph and adult feeds on early stages....*
- *He looked up "trombiculid" because he had never seen it before.*

---

trombidiid *(noun)*

Mite that in all stages feeds on other arthropods.

- *She wrote a short paragraph that included "trombidiid."*
- *He looked up "trombidiid" because he had never seen it before.*

---

trompillo *(noun)*

Weedy nightshade with silvery foliage and violet or blue or white flowers; roundish berry widely used to curdle milk; central United States to South America.

- *He looked up "trompillo" because he had never seen it before.*
- *Understanding "trompillo" helps you talk about this topic clearly.*

---

tropaeolaceae *(noun)*

Coextensive with the genus Tropaeolum.

- *The article explained what "tropaeolaceae" means with a simple example.*
- *They discussed "tropaeolaceae" during the group presentation.*

---

tropaeolum peregrinum *(noun)*

A climber having flowers that are the color of canaries.

- *In class, the teacher used "tropaeolum peregrinum" to mean a climber having flowers that are the color of canaries.*
- *The article explained what "tropaeolum peregrinum" means with a simple example.*

---

trophobiosis *(noun)*

A symbiotic relation in which one organism protects the other in return for some kind of food product.

- *The article explained what "trophobiosis" means with a simple example.*

- *She wrote a short paragraph that included “trophobiosis.”*

---

trophotropic *(adjective)*

Of or relating to trophotropism.

- *A “trophotropic” approach may work better in this case.*
- *The speaker chose “trophotropic” because it captured the feeling precisely.*

---

trophotropism *(noun)*

An orienting response to food.

- *He looked up “trophotropism” because he had never seen it before.*
- *She wrote a short paragraph that included “trophotropism.”*

---

tropicbird *(noun)*

Mostly white web-footed tropical seabird often found far from land.

- *In class, the teacher used “tropicbird” to mean mostly white web-footed tropical seabird often....*
- *The article explained what “tropicbird” means with a simple example.*

---

tropidoclonion *(noun)*

Lined snakes.

- *They discussed “tropidoclonion” during the group presentation.*
- *In class, the teacher used “tropidoclonion” to mean lined snakes.*

---

tropidoclonion lineatum *(noun)*

Secretive snake of city dumps and parks as well as prairies and open woods; feeds on earthworms; of central United States.

- *In class, the teacher used “tropidoclonion lineatum” to mean secretive snake of city dumps and parks as well as....*
- *They discussed “tropidoclonion lineatum” during the group presentation.*

---

troponomy *(noun)*

The place names of a region or a language considered collectively.

- *She wrote a short paragraph that included “troponomy.”*
- *He looked up “troponomy” because he had never seen it before.*

---

troponymy *(noun)*

The semantic relation of being a manner of does something.

- *They discussed “troponymy” during the group presentation.*
- *The article explained what “troponymy” means with a simple example.*

---

trotline *(noun)*

A long fishing line with many shorter lines and hooks attached to it (usually suspended between buoys).

- *They discussed “trotline” during the group presentation.*
- *He looked up “trotline” because he had never seen it before.*

---

troubler *(noun)*

Someone who deliberately stirs up trouble.

- *The article explained what “troubler” means with a simple example.*
- *In class, the teacher used “troubler” to mean someone who deliberately stirs up trouble.*

---

trousering *(noun)*

Any fabric used to make trousers.

- *Understanding “trousering” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “trousering.”*

---

truckage *(noun)*

The activity of transporting goods by truck.

- *Understanding “truckage” helps you talk about this topic clearly.*
- *He looked up “truckage” because he had never seen it before.*

---

truckler *(noun)*

Someone who humbles himself as a sign of respect; who behaves as if he had no self-respect.

- *In class, the teacher used "truckler" to mean someone who humbles himself as a sign of respect;....*
- *The article explained what "truckler" means with a simple example.*

---

truckling *(noun)*

The act of obeying meanly (especially obeying in a humble manner or for unworthy reasons).

- *She wrote a short paragraph that included "truckling."*
- *They discussed "truckling" during the group presentation.*

---

truculency *(noun)*

Obstreperous and defiant aggressiveness.

- *He looked up "truculency" because he had never seen it before.*
- *In class, the teacher used "truculency" to mean obstreperous and defiant aggressiveness.*

---

trudger *(noun)*

Someone who walks in a laborious heavy-footed manner.

- *The article explained what "trudger" means with a simple example.*
- *They discussed "trudger" during the group presentation.*

---

true tulipwood *(noun)*

Light easily worked wood of a tulip tree; used for furniture and veneer.

- *The article explained what "true tulipwood" means with a simple example.*
- *In class, the teacher used "true tulipwood" to mean light easily worked wood of a tulip tree; used for....*

---

truehearted *(adjective)*

Unwavering in devotion to friend or vow or cause; ; ; - Campaign song for William Henry Harrison.

- *A "truehearted" approach may work better in this case.*
- *Students compared "truehearted" with similar adjectives in the lesson.*

---

trumpetfish *(noun)*

Tropical Atlantic fish with a long snout; swims snout down.

- *They discussed "trumpetfish" during the group presentation.*
- *He looked up "trumpetfish" because he had never seen it before.*

---

trumpetwood *(noun)*

Tropical American tree with large peltate leaves and hollow stems.

- *Understanding "trumpetwood" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "trumpetwood."*

---

truncocolumella *(noun)*

A genus of fungi belonging to the family Rhizopogonaceae.

- *They discussed "truncocolumella" during the group presentation.*
- *The article explained what "truncocolumella" means with a simple example.*

---

truncocolumella citrina *(noun)*

A fungus with a round yellow to orange fruiting body that is found on the surface of the ground or partially buried; has a distinctive sterile column extending into the spore-bearing tissue.

- *The article explained what "truncocolumella citrina" means with a simple example.*
- *Understanding "truncocolumella citrina" helps you talk about this topic clearly.*

---

truncus celiacus *(noun)*

An artery that originates from the abdominal aorta just below the diaphragm and branches into the left gastric artery and the common hepatic artery and the splenic artery.

- *They discussed "truncus celiacus" during the group presentation.*
- *He looked up "truncus celiacus" because he had never seen it before.*

---

truncus pulmonalis *(noun)*

The artery that carries venous blood from the right ventricle of the heart and divides into the right and left pulmonary arteries.

- *He looked up "truncus pulmonalis" because he had never seen it before.*
- *In class, the teacher used "truncus pulmonalis" to mean the artery that carries venous blood from the right....*

---

trunkfish *(noun)*

Any of numerous small tropical fishes having body and head encased in bony plates.

- *In class, the teacher used "trunkfish" to mean any of numerous small tropical fishes having body....*
- *Understanding "trunkfish" helps you talk about this topic clearly.*

---

trunnel *(noun)*

A wooden peg that is used to fasten timbers in shipbuilding; water causes the peg to swell and hold the timbers fast.

- *Understanding "trunnel" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "trunnel."*

---

trustbuster *(noun)*

A federal agent who engages in trust busting.

- *The article explained what "trustbuster" means with a simple example.*
- *In class, the teacher used "trustbuster" to mean a federal agent who engages in trust busting.*

---

trustfully *(adverb)*

With trust; in a trusting manner.

- *His mouth grinned trustfully.*
- *He answered "trustfully," which changed the tone of the conversation.*

---

trustfulness *(noun)*

The trait of believing in the honesty and reliability of others.

- *Understanding "trustfulness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "trustfulness."*

---

trustiness *(noun)*

The trait of deserving trust and confidence.

- *Understanding "trustiness" helps you talk about this topic clearly.*
- *He looked up "trustiness" because he had never seen it before.*

---

trustingness *(noun)*

The trait of believing in the honesty and reliability of others.

- *They discussed "trustingness" during the group presentation.*
- *Understanding "trustingness" helps you talk about this topic clearly.*

---

trygve halvden lie *(noun)*

Norwegian diplomat who was the first Secretary General of the United Nations (1896-1968).

- *She wrote a short paragraph that included "trygve halvden lie."*
- *They discussed "trygve halvden lie" during the group presentation.*

---

trypetidae *(noun)*

Fruit flies; some leaf miners.

- *The article explained what "trypetidae" means with a simple example.*
- *Understanding "trypetidae" helps you talk about this topic clearly.*

---

tryptophane *(noun)*

An amino acid that occurs in proteins; is essential for growth and normal metabolism; a precursor of niacin.

- *Understanding "tryptophane" helps you talk about this topic clearly.*
- *He looked up "tryptophane" because he had never seen it before.*

---

tsaristic *(adjective)*

Of or relating to or characteristic of a czar.

- *Students compared "tsaristic" with similar adjectives in the lesson.*
- *It is useful to describe something as "tsaristic" when it is of or relating to or characteristic of a czar.*

tsatske *(noun)*

(Yiddish) an attractive, unconventional woman.

- *They discussed "tsatske" during the group presentation.*
- *Understanding "tsatske" helps you talk about this topic clearly.*

tshatshke *(noun)*

(Yiddish) an attractive, unconventional woman.

- *The article explained what "tshatshke" means with a simple example.*
- *They discussed "tshatshke" during the group presentation.*

tsine *(noun)*

Wild ox of the Malay Archipelago.

- *She wrote a short paragraph that included "tsine."*
- *The article explained what "tsine" means with a simple example.*

tsuga mertensiana *(noun)*

Large evergreen of western United States; wood much harder than Canadian hemlock.

- *The article explained what "tsuga mertensiana" means with a simple example.*
- *They discussed "tsuga mertensiana" during the group presentation.*

tsuris *(noun)*

(Yiddish) aggravating trouble.

- *The frustrating tsuris he subjected himself to.*
- *He looked up "tsuris" because he had never seen it before.*

tubbiness *(noun)*

The property of having a plump and round body.

- *The article explained what "tubbiness" means with a simple example.*
- *They discussed "tubbiness" during the group presentation.*

tubelike *(adjective)*

Constituting a tube; having hollow tubes (as for the passage of fluids).

- *Her writing became clearer after she learned "tubelike."*
- *Students compared "tubelike" with similar adjectives in the lesson.*

tuberaceae *(noun)*

Family of fungi whose ascocarps resemble tubers and vary in size from that of an acorn to that of a large apple.

- *The article explained what "tuberaceae" means with a simple example.*
- *In class, the teacher used "tuberaceae" to mean family of fungi whose ascocarps resemble tubers and....*

tuberales *(noun)*

Small order of fungi belonging to the subdivision Ascomycota having closed underground ascocarps.

- *She wrote a short paragraph that included "tuberales."*
- *The article explained what "tuberales" means with a simple example.*

tubercularia *(noun)*

Type genus of the Tuberculariaceae; fungi with nodules of red or pink conidia; some cause diebacks of woody plants.

- *They discussed "tubercularia" during the group presentation.*
- *In class, the teacher used "tubercularia" to mean type genus of the tuberculariaceae; fungi with....*

tuberculariaceae *(noun)*

Large family of mainly saprophytic imperfect fungi.

- *She wrote a short paragraph that included "tuberculariaceae."*
- *Understanding "tuberculariaceae" helps you talk about this topic clearly.*

tuberculoid *(adjective)*

Resembling tuberculosis.

- *Tuberculoid lesions.*
- *Tuberculoid leprosy.*

---

tubful *(noun)*

The amount that a tub will hold.

- *He looked up "tubful" because he had never seen it before.*
- *She wrote a short paragraph that included "tubful."*

---

tubuai islands *(noun)*

A chain of small islands in French Polynesia.

- *He looked up "tubuai islands" because he had never seen it before.*
- *In class, the teacher used "tubuai islands" to mean a chain of small islands in french polynesia.*

---

tubulidentata *(noun)*

An order of Eutheria.

- *In class, the teacher used "tubulidentata" to mean an order of eutheria.*
- *They discussed "tubulidentata" during the group presentation.*

---

tucana *(noun)*

A large faint constellation in the southern hemisphere containing most of the Small Magellanic Cloud.

- *In class, the teacher used "tucana" to mean a large faint constellation in the southern....*
- *The article explained what "tucana" means with a simple example.*

---

tughrik *(noun)*

The basic unit of money in Mongolia.

- *He looked up "tughrik" because he had never seen it before.*
- *They discussed "tughrik" during the group presentation.*

---

tugrik *(noun)*

The basic unit of money in Mongolia.

- *Understanding "tugrik" helps you talk about this topic clearly.*
- *They discussed "tugrik" during the group presentation.*

---

tuille *(noun)*

Armor plate that protects the hip and thigh.

- *She wrote a short paragraph that included "tuille."*
- *He looked up "tuille" because he had never seen it before.*

---

tulestoma *(noun)*

Type genus of the Tulostomaceae.

- *In class, the teacher used "tulestoma" to mean type genus of the tulostomaceae.*
- *Understanding "tulestoma" helps you talk about this topic clearly.*

---

tulipa armena *(noun)*

Small early blooming tulip.

- *She wrote a short paragraph that included "tulipa armena."*
- *He looked up "tulipa armena" because he had never seen it before.*

---

tulipa clusiana *(noun)*

Eurasian tulip with small flowers blotched at the base.

- *They discussed "tulipa clusiana" during the group presentation.*
- *The article explained what "tulipa clusiana" means with a simple example.*

---

tulipa gesneriana *(noun)*

Tall late blooming tulip.

- *In class, the teacher used "tulipa gesneriana" to mean tall late blooming tulip.*

- *Understanding “tulipa gesneriana” helps you talk about this topic clearly.*

---

tulipwood tree *(noun)*

Any of various trees yielding variously colored woods similar to true tulipwood.

- *They discussed “tulipwood tree” during the group presentation.*
- *In class, the teacher used “tulipwood tree” to mean any of various trees yielding variously colored....*

---

tulostoma *(noun)*

Type genus of the Tulostomaceae.

- *He looked up “tulostoma” because he had never seen it before.*
- *She wrote a short paragraph that included “tulostoma.”*

---

tulostomaceae *(noun)*

Stalked puffballs.

- *In class, the teacher used “tulostomaceae” to mean stalked puffballs.*
- *They discussed “tulostomaceae” during the group presentation.*

---

tulostomataceae *(noun)*

Stalked puffballs.

- *The article explained what “tulostomataceae” means with a simple example.*
- *In class, the teacher used “tulostomataceae” to mean stalked puffballs.*

---

tulostomatales *(noun)*

An order of fungi belonging to the class Gasteromycetes.

- *She wrote a short paragraph that included “tulostomatales.”*
- *The article explained what “tulostomatales” means with a simple example.*

---

tumblebug *(noun)*

Any of various dung beetles.

- *She wrote a short paragraph that included “tumblebug.”*
- *The article explained what “tumblebug” means with a simple example.*

---

tumbrel *(noun)*

A farm dumpcart for carrying dung; carts of this type were used to carry prisoners to the guillotine during the French Revolution.

- *She wrote a short paragraph that included “tumbrel.”*
- *He looked up “tumbrel” because he had never seen it before.*

---

tumbril *(noun)*

A farm dumpcart for carrying dung; carts of this type were used to carry prisoners to the guillotine during the French Revolution.

- *They discussed “tumbril” during the group presentation.*
- *Understanding “tumbril” helps you talk about this topic clearly.*

---

tumefaction *(noun)*

The process of tumefying; the organic process whereby tissue becomes swollen by the accumulation of fluid within it.

- *She wrote a short paragraph that included “tumefaction.”*
- *He looked up “tumefaction” because he had never seen it before.*

---

tumefy *(verb)*

Cause to become very swollen.

- *Learners should practice how to use “tumefy” in real sentences.*
- *In everyday English, people use “tumefy” when talking about this idea.*

---

tumesce *(verb)*

Expand abnormally.

- *She tried to use “tumesce” carefully so everyone would understand.*
- *In everyday English, people use “tumesce” when talking about this idea.*

---

tunaburger *(noun)*

A sandwich that resembles a hamburger but made with tuna instead of beef.

- *She wrote a short paragraph that included "tunaburger."*
- *The article explained what "tunaburger" means with a simple example.*

tunefulness *(noun)*

The property of having a melody.

- *In class, the teacher used "tunefulness" to mean the property of having a melody.*
- *He looked up "tunefulness" because he had never seen it before.*

tungstic acid *(noun)*

An oxyacid of tungsten (often polymeric in nature) formed by neutralizing alkaline tungstate solutions.

- *In class, the teacher used "tungstic acid" to mean an oxyacid of tungsten (often polymeric in nature)....*
- *The article explained what "tungstic acid" means with a simple example.*

tunica conjunctiva bulbi *(noun)*

The part of the conjunctiva covering the anterior face of the sclera and the surface epithelium of the cornea.

- *He looked up "tunica conjunctiva bulbi" because he had never seen it before.*
- *In class, the teacher used "tunica conjunctiva bulbi" to mean the part of the conjunctiva covering the anterior....*

tunica conjunctiva palpebrarum *(noun)*

The part of the conjunctiva lining the posterior surface of the eyelids; continuous with the bulbar conjunctiva.

- *The article explained what "tunica conjunctiva palpebrarum" means with a simple example.*
- *They discussed "tunica conjunctiva palpebrarum" during the group presentation.*

tunker *(noun)*

An adherent of Baptistic doctrines (who practice baptism by immersion).

- *They discussed "tunker" during the group presentation.*
- *The article explained what "tunker" means with a simple example.*

tunnage *(noun)*

A tax imposed on ships that enter the US; based on the tonnage of the ship.

- *He looked up "tunnage" because he had never seen it before.*
- *Understanding "tunnage" helps you talk about this topic clearly.*

- *Understanding "tupungatito" helps you talk about this topic clearly.*
- *In class, the teacher used "tupungatito" to mean an inactive volcano in central chile; last erupted....*

---

tupungato *(noun)*

A mountain in the Andes on the border between Argentina and Chile (22,310 feet high).

- *The article explained what "tupungato" means with a simple example.*
- *In class, the teacher used "tupungato" to mean a mountain in the andes on the border between....*

---

turaco *(noun)*

Large brightly crested bird of Africa.

- *In class, the teacher used "turaco" to mean large brightly crested bird of africa.*
- *The article explained what "turaco" means with a simple example.*

---

turacou *(noun)*

Large brightly crested bird of Africa.

- *The article explained what "turacou" means with a simple example.*
- *In class, the teacher used "turacou" to mean large brightly crested bird of africa.*

---

turakoo *(noun)*

Large brightly crested bird of Africa.

- *They discussed "turakoo" during the group presentation.*
- *In class, the teacher used "turakoo" to mean large brightly crested bird of africa.*

---

turbatrix *(noun)*

A genus of Cephalobidae.

- *She wrote a short paragraph that included "turbatrix."*
- *The article explained what "turbatrix" means with a simple example.*

---

turbatrix aceti *(noun)*

Minute eelworm that feeds on organisms that cause fermentation in e.g. vinegar.

- *They discussed "turbatrix aceti" during the group presentation.*
- *Understanding "turbatrix aceti" helps you talk about this topic clearly.*

---

turbidness *(noun)*

Muddiness created by stirring up sediment or having foreign particles suspended.

- *They discussed "turbidness" during the group presentation.*
- *He looked up "turbidness" because he had never seen it before.*

---

turbinal *(noun)*

Any of the scrolled spongy bones of the nasal passages in man and other vertebrates.

- *She wrote a short paragraph that included "turbinal."*
- *He looked up "turbinal" because he had never seen it before.*

---

turbogenerator *(noun)*

Generator consisting of a steam turbine coupled to an electric generator for the production of electric power.

- *They discussed "turbogenerator" during the group presentation.*
- *In class, the teacher used "turbogenerator" to mean generator consisting of a steam turbine coupled to....*

---

turbulency *(noun)*

Unstable flow of a liquid or gas.

- *The article explained what "turbulency" means with a simple example.*
- *In class, the teacher used "turbulency" to mean unstable flow of a liquid or gas.*

---

turdidae *(noun)*

Thrushes; in some classifications considered a subfamily (Turdinae) of the family Muscicapidae.

- *He looked up "turdidae" because he had never seen it before.*
- *She wrote a short paragraph that included "turdidae."*

turdinae *(noun)*

Alternative classification for the thrushes.

- *Understanding "turdinae" helps you talk about this topic clearly.*
- *In class, the teacher used "turdinae" to mean alternative classification for the thrushes.*

turdus greyi *(noun)*

Robin of Mexico and Central America.

- *She wrote a short paragraph that included "turdus greyi."*
- *He looked up "turdus greyi" because he had never seen it before.*

turdus philomelos *(noun)*

Common Old World thrush noted for its song.

- *She wrote a short paragraph that included "turdus philomelos."*
- *He looked up "turdus philomelos" because he had never seen it before.*

turdus viscivorus *(noun)*

Large European thrush that feeds on mistletoe berries.

- *He looked up "turdus viscivorus" because he had never seen it before.*
- *She wrote a short paragraph that included "turdus viscivorus."*

turgidly *(adverb)*

In a turgid manner.

- *She spoke "turgidly," and the audience immediately understood her point.*
- *Place "turgidly" carefully so the meaning stays clear.*

A republic in Asia to the east of the Caspian Sea and to the south of Kazakhstan and to the north of Iran; an Asian soviet from 1925 to 1991.

- *He looked up "turkmenia" because he had never seen it before.*
- *They discussed "turkmenia" during the group presentation.*

turkomen *(noun)*

A republic in Asia to the east of the Caspian Sea and to the south of Kazakhstan and to the north of Iran; an Asian soviet from 1925 to 1991.

- *The article explained what "turkomen" means with a simple example.*
- *They discussed "turkomen" during the group presentation.*

turncock *(noun)*

One employed to control water supply by turning water mains on and off.

- *The article explained what "turncock" means with a simple example.*
- *Understanding "turncock" helps you talk about this topic clearly.*

turnery *(noun)*

Workshop where objects are made on a lathe.

- *She wrote a short paragraph that included "turnery."*
- *He looked up "turnery" because he had never seen it before.*

turnicidae *(noun)*

Small Old World birds resembling but not related to true quail.

- *Understanding "turnicidae" helps you talk about this topic clearly.*
- *He looked up "turnicidae" because he had never seen it before.*

turnix *(noun)*

Type genus of the Turnicidae: button quail.

- *He looked up "turnix" because he had never seen it before.*
- *In class, the teacher used "turnix" to mean type genus of the turnicidae: button quail.*

turnix sylvatica *(noun)*

A variety of button quail having stripes.

- *He looked up "turnix sylvatica" because he had never seen it before.*
- *She wrote a short paragraph that included "turnix sylvatica."*

---

turnspit *(noun)*

A roasting spit that can be turned.

- *They discussed "turnspit" during the group presentation.*
- *The article explained what "turnspit" means with a simple example.*

---

turnup *(noun)*

The lap consisting of a turned-back hem encircling the end of the sleeve or leg.

- *Understanding "turnup" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "turnup."*

---

turnverein *(noun)*

A club of tumblers or gymnasts.

- *Understanding "turnverein" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "turnverein."*

---

turreae *(noun)*

- *He looked up "turreae" because he had never seen it before.*
- *She wrote a short paragraph that included "turreae."*

---

turritis *(noun)*

Closely related to and often included in genus Arabis.

- *Understanding "turritis" helps you talk about this topic clearly.*
- *They discussed "turritis" during the group presentation.*

---

turritis glabra *(noun)*

Or genus Arabis: erect cress widely distributed throughout Europe.

- *The article explained what "turritis glabra" means with a simple example.*
- *In class, the teacher used "turritis glabra" to mean or genus arabis: erect cress widely distributed....*

---

turtlehead *(noun)*

Showy perennial of marshlands of eastern and central North America having waxy lanceolate leaves and flower with lower part creamy white and upper parts pale pink to deep purple.

- *In class, the teacher used "turtlehead" to mean showy perennial of marshlands of eastern and....*
- *The article explained what "turtlehead" means with a simple example.*

---

turtler *(noun)*

Someone whose occupation is hunting turtles.

- *In class, the teacher used "turtler" to mean someone whose occupation is hunting turtles.*
- *The article explained what "turtler" means with a simple example.*

---

tussah *(noun)*

Oriental moth that produces brownish silk.

- *He looked up "tussah" because he had never seen it before.*
- *Understanding "tussah" helps you talk about this topic clearly.*

---

tusseh *(noun)*

Oriental moth that produces brownish silk.

- *Understanding "tusseh" helps you talk about this topic clearly.*
- *The article explained what "tusseh" means with a simple example.*

---

tusser *(noun)*

Oriental moth that produces brownish silk.

- *In class, the teacher used "tusser" to mean oriental moth that produces brownish silk.*

- *They discussed "tusser" during the group presentation.*

---

tussilago *(noun)*

Genus of low creeping yellow-flowered perennial herbs of north temperate regions: coltsfoots; in some classifications includes species often placed in other genera especially Homogyne and Petasites.

- *The article explained what "tussilago" means with a simple example.*
- *She wrote a short paragraph that included "tussilago."*

---

tussilago alpina *(noun)*

Rhizomatous herb with purple-red flowers suitable for groundcover; sometimes placed in genus Tussilago.

- *He looked up "tussilago alpina" because he had never seen it before.*
- *She wrote a short paragraph that included "tussilago alpina."*

---

tussilago farfara *(noun)*

Perennial herb with large rounded leaves resembling a colt's foot and yellow flowers appearing before the leaves do; native to Europe but now nearly cosmopolitan; used medicinally especially formerly.

- *Understanding "tussilago farfara" helps you talk about this topic clearly.*
- *They discussed "tussilago farfara" during the group presentation.*

---

tussore *(noun)*

Oriental moth that produces brownish silk.

- *The article explained what "tussore" means with a simple example.*
- *In class, the teacher used "tussore" to mean oriental moth that produces brownish silk.*

---

tussur *(noun)*

Oriental moth that produces brownish silk.

- *He looked up "tussur" because he had never seen it before.*
- *Understanding "tussur" helps you talk about this topic clearly.*

---

tutelar *(adjective)*

Creeping evergreen subshrub of the northern parts of Europe and Asia with delicate fragrant tubular bell-shaped usually pink flowers borne in pairs.

- *She wrote a short paragraph that included "twinflower."*
- *He looked up "twinflower" because he had never seen it before.*

twinjet *(noun)*

A jet plane propelled by two jet engines.

- *They discussed "twinjet" during the group presentation.*
- *In class, the teacher used "twinjet" to mean a jet plane propelled by two jet engines.*

twinkler *(noun)*

An object that emits or reflects light in an intermittent flickering manner.

- *He looked up "twinkler" because he had never seen it before.*
- *She wrote a short paragraph that included "twinkler."*

twirlingly *(adverb)*

Doing twirls.

- *They had a most twirlingly magnificent time.*
- *The narrator describes the scene "twirlingly" in the final chapter.*

twistwood *(noun)*

Vigorous deciduous European treelike shrub common along waysides; red berries turn black.

- *He looked up "twistwood" because he had never seen it before.*
- *In class, the teacher used "twistwood" to mean vigorous deciduous european treelike shrub common....*

twoscore *(adjective)*

Being ten more than thirty.

- *Students compared "twoscore" with similar adjectives in the lesson.*
- *A "twoscore" approach may work better in this case.*

---

tyiyn *(noun)*

100 tyiyn equal 1 som in Kyrgyzstan.

- *The article explained what "tyiyn" means with a simple example.*
- *Understanding "tyiyn" helps you talk about this topic clearly.*

---

tylenchidae *(noun)*

A family of Nematoda.

- *He looked up "tylenchidae" because he had never seen it before.*
- *In class, the teacher used "tylenchidae" to mean a family of nematoda.*

---

tylenchus *(noun)*

Type genus of the family Tylenchidae.

- *She wrote a short paragraph that included "tylenchus."*
- *Understanding "tylenchus" helps you talk about this topic clearly.*

---

tylenchus tritici *(noun)*

Small roundworm parasitic on wheat.

- *She wrote a short paragraph that included "tylenchus tritici."*
- *He looked up "tylenchus tritici" because he had never seen it before.*

---

tympan *(noun)*

A musical percussion instrument; usually consists of a hollow cylinder with a membrane stretched across each end.

- *They discussed "tympan" during the group presentation.*
- *The article explained what "tympan" means with a simple example.*

---

tympanist *(noun)*

A person who plays the kettledrums.

- *They discussed "tympanist" during the group presentation.*
- *He looked up "tympanist" because he had never seen it before.*

---

tympanitic *(adjective)*

Of or relating to tympanites.

- *Students compared "tympanitic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "tympanitic."*

---

tympanoplasty *(noun)*

Surgical correction or repair of defects or injuries in the eardrum or the bones of the middle ear.

- *They discussed "tympanoplasty" during the group presentation.*
- *The article explained what "tympanoplasty" means with a simple example.*

---

tympanuchus *(noun)*

Prairie chickens.

- *They discussed "tympanuchus" during the group presentation.*
- *Understanding "tympanuchus" helps you talk about this topic clearly.*

---

tympanuchus cupido *(noun)*

The most common variety of prairie chicken.

- *The article explained what "tympanuchus cupido" means with a simple example.*
- *Understanding "tympanuchus cupido" helps you talk about this topic clearly.*

---

tympanuchus cupido cupido *(noun)*

Extinct prairie chicken.

- *She wrote a short paragraph that included "tympanuchus cupido cupido."*

- *They discussed “tympanuchus cupido cupido” during the group presentation.*

tympanuchus pallidicinctus *(noun)*

A smaller prairie chicken of western Texas.

- *The article explained what “tympanuchus pallidicinctus” means with a simple example.*
- *They discussed “tympanuchus pallidicinctus” during the group presentation.*

typesetter’s case *(noun)*

(printing) the receptacle in which a compositor has his type, which is divided into compartments for the different letters, spaces, or numbers.

---

ulfilas *(noun)*

A Christian believed to be of Cappadocian descent who became bishop of the Visigoths in 341 and translated the Bible from Greek into Gothic; traditionally held to have invented the Gothic alphabet (311-382).

- *Understanding "ulfilas" helps you talk about this topic clearly.*
- *They discussed "ulfilas" during the group presentation.*

---

ulmaceae *(noun)*

A dicot family of the order Urticales including: genera Ulmus, Celtis, Planera, Trema.

- *She wrote a short paragraph that included "ulmaceae."*
- *They discussed "ulmaceae" during the group presentation.*

---

ulmus campestris sarniensis *(noun)*

A variety of the English elm with erect branches and broader leaves.

- *He looked up "ulmus campestris sarniensis" because he had never seen it before.*
- *She wrote a short paragraph that included "ulmus campestris sarniensis."*

---

ulmus campestris wheatleyi *(noun)*

A variety of the English elm with erect branches and broader leaves.

- *The article explained what "ulmus campestris wheatleyi" means with a simple example.*
- *They discussed "ulmus campestris wheatleyi" during the group presentation.*

---

ulmus crassifolia *(noun)*

Elm of southern United States and Mexico having spreading pendulous corky branches.

- *Understanding "ulmus crassifolia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ulmus crassifolia."*

---

ulmus parvifolia *(noun)*

Small fast-growing tree native to Asia; widely grown as shelterbelts and hedges.

- *They discussed "ulmus parvifolia" during the group presentation.*
- *Understanding "ulmus parvifolia" helps you talk about this topic clearly.*

---

ulmus sarniensis *(noun)*

A variety of the English elm with erect branches and broader leaves.

- *They discussed "ulmus sarniensis" during the group presentation.*

- *The article explained what "ulmus sarniensis" means with a simple example.*

---

ulmus thomasii *(noun)*

Tall widely distributed elm of eastern North America.

- *Understanding "ulmus thomasii" helps you talk about this topic clearly.*
- *In class, the teacher used "ulmus thomasii" to mean tall widely distributed elm of eastern north america.*

---

ulteriority *(noun)*

The quality of being ulterior.

- *A terrible feeling of ulteriority.*
- *His stories were too susceptible to ulteriority.*

---

ulteriorly *(adverb)*

In an ulterior manner.

- *The narrator describes the scene "ulteriorly" in the final chapter.*
- *Using "ulteriorly" can make your explanation more exact.*

---

ultracef *(noun)*

A cephalosporin antibiotic (trade name Ultracef).

- *Understanding "ultracef" helps you talk about this topic clearly.*
- *He looked up "ultracef" because he had never seen it before.*

---

ultramicroscope *(noun)*

Light microscope that uses scattered light to show particles too small to see with ordinary microscopes.

- *Understanding "ultramicroscope" helps you talk about this topic clearly.*
- *The article explained what "ultramicroscope" means with a simple example.*

---

ultramicroscopic *(adjective)*

Too small to be seen without an ultramicroscope.

- *The speaker chose "ultramicroscopic" because it captured the feeling precisely.*
- *It is useful to describe something as "ultramicroscopic" when it is too small to be seen without an ultramicroscope.*

---

ultranationalistic *(adjective)*

Fanatically patriotic.

- *Would you call this situation "ultranationalistic"? Explain why.*
- *Her writing became clearer after she learned "ultranationalistic."*

---

With no sugar added.

- *Would you call this situation "unsugared"? Explain why.*
- *Students compared "unsugared" with similar adjectives in the lesson.*

---

unsuitableness *(noun)*

The quality of having the wrong properties for a specific purpose.

- *She wrote a short paragraph that included "unsuitableness."*
- *He looked up "unsuitableness" because he had never seen it before.*

---

unsusceptible *(adjective)*

Not susceptible to.

- *Students compared "unsusceptible" with similar adjectives in the lesson.*
- *Would you call this situation "unsusceptible"? Explain why.*

---

unsyllabic *(adjective)*

Not forming a syllable or the nucleus of a syllable; consisting of a consonant sound accompanied in the same syllable by a vowel sound or consisting of a vowel sound dominated by other vowel sounds in a syllable (as the second vowel in a falling diphthong).

- *Students compared "unsyllabic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "unsyllabic."*

---

unsyllabled *(adjective)*

Not articulated in syllables.

- *Her writing became clearer after she learned "unsyllabled."*
- *Students compared "unsyllabled" with similar adjectives in the lesson.*

---

unsymbolic *(adjective)*

Not standing for something else.

- *Her writing became clearer after she learned "unsymbolic."*
- *Students compared "unsymbolic" with similar adjectives in the lesson.*

---

unsymmetric *(adjective)*

Lacking symmetry.

- *Students compared "unsymmetric" with similar adjectives in the lesson.*
- *A "unsymmetric" approach may work better in this case.*

---

unsymmetrically *(adverb)*

In an asymmetrical manner.

- *He answered "unsymmetrically," which changed the tone of the conversation.*
- *She spoke "unsymmetrically," and the audience immediately understood her point.*

---

unsynchronised *(adjective)*

Not occurring together.

- *Would you call this situation "unsynchronised"? Explain why.*
- *A "unsynchronised" approach may work better in this case.*

---

unsynchronous *(adjective)*

Not occurring together.

- *Would you call this situation "unsynchronous"? Explain why.*

- *Students compared "unsynchronous" with similar adjectives in the lesson.*

---

unsystematically *(adverb)*

In an unsystematic manner.

- *His books were lined up unsystematically on the shelf.*
- *Using "unsystematically" can make your explanation more exact.*

---

untactful *(adjective)*

Lacking or showing a lack of what is fitting and considerate in dealing with others.

- *Students compared "untactful" with similar adjectives in the lesson.*
- *It is useful to describe something as "untactful" when it is lacking or showing a lack of what is fitting and....*

---

untaped *(adjective)*

Not recorded on film or tape.

- *The speaker chose "untaped" because it captured the feeling precisely.*
- *Would you call this situation "untaped"? Explain why.*

---

untechnical *(adjective)*

Not characteristic of or skilled in applied arts and sciences.

- *An untechnical reader.*
- *Would you call this situation "untechnical"? Explain why.*

---

untempting *(adjective)*

Not appealing to the senses.

- *Untempting food.*
- *Her writing became clearer after she learned "untempting."*

---

unthaw *(verb)*

Become or cause to become soft or liquid.

- *In everyday English, people use "unthaw" when talking about this idea.*
- *She tried to use "unthaw" carefully so everyone would understand.*

---

Still frozen.

- *There wasn't time to cook the unthawed turkey, so they had to settle for hotdogs.*
- *It is useful to describe something as "unthawed" when it is still frozen.*

---

untheatrical *(adjective)*

Not suited to or characteristic of the stage or theater.

- *A well-written but untheatrical play.*
- *An untheatrical personality.*

---

unthematic *(adjective)*

Not relating to a melodic subject.

- *There is nothing unthematic in this composition.*
- *It is useful to describe something as "unthematic" when it is not relating to a melodic subject.*

---

unthoughtfulness *(noun)*

The trait of not thinking carefully before acting.

- *Understanding "unthoughtfulness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "unthoughtfulness."*

---

untier *(noun)*

A person who unfastens or unwraps or opens.

- *The article explained what "untier" means with a simple example.*
- *Understanding "untier" helps you talk about this topic clearly.*

---

untimbered *(adjective)*

Lacking timbers.

- *An untimbered boat.*
- *The speaker chose "untimbered" because it captured the feeling precisely.*

---

untimeliness *(noun)*

The quality of occurring at an inconvenient time.

- *He looked up "untimeliness" because he had never seen it before.*
- *In class, the teacher used "untimeliness" to mean the quality of occurring at an inconvenient time.*

---

untipped *(adjective)*

Not provided with a special tip.

- *Untipped cigarettes.*
- *The speaker chose "untipped" because it captured the feeling precisely.*

---

untired *(adjective)*

With unreduced energy.

- *Her writing became clearer after she learned "untired."*
- *Students compared "untired" with similar adjectives in the lesson.*

---

untoothed *(adjective)*

Having no notches.

- *Would you call this situation "untoothed"? Explain why.*
- *Her writing became clearer after she learned "untoothed."*

---

untoughened *(adjective)*

Physically untoughened.

- *Would you call this situation "untoughened"? Explain why.*
- *It is useful to describe something as "untoughened" when it is physically untoughened.*

---

untransferable *(adjective)*

Incapable of being transferred.

- *It is useful to describe something as "untransferable" when it is incapable of being transferred.*
- *Would you call this situation "untransferable"? Explain why.*

---

untransmutable *(adjective)*

Not capable of being changed into something else.

- *Her writing became clearer after she learned "untransmutable."*
- *Students compared "untransmutable" with similar adjectives in the lesson.*

---

untravelled *(adjective)*

Not traveled over or through.

- *Would you call this situation "untravelled"? Explain why.*
- *It is useful to describe something as "untravelled" when it is not traveled over or through.*

---

untraversable *(adjective)*

Incapable of being traversed.

- *Would you call this situation "untraversable"? Explain why.*
- *Her writing became clearer after she learned "untraversable."*

---

untraversed *(adjective)*

Not traveled over or through.

- *An untraversed region.*
- *The speaker chose "untraversed" because it captured the feeling precisely.*

---

untrod *(adjective)*

Lacking pathways.

- *Would you call this situation "untrod"? Explain why.*
- *The speaker chose "untrod" because it captured the feeling precisely.*

---

untruly *(adverb)*

In a untrue manner.

- *He silenced the whisperings which connected her, untruly and unfairly, with his separation from his wife.*
- *The narrator describes the scene "untruly" in the final chapter.*

---

untrustiness *(noun)*

The trait of not deserving trust or confidence.

- *She wrote a short paragraph that included "untrustiness."*
- *Understanding "untrustiness" helps you talk about this topic clearly.*

---

untrusty *(adjective)*

Not worthy of trust or belief.

- *Would you call this situation "untrusty"? Explain why.*
- *Her writing became clearer after she learned "untrusty."*

---

untufted *(adjective)*

Not adorned with tufts.

- *Untufted ears.*
- *The speaker chose "untufted" because it captured the feeling precisely.*

---

untune *(verb)*

Cause to be out of tune.

- *Don't untune that string!*
- *He did not know how to use "untune" until he saw an example.*

---

untuneful *(adjective)*

Not having a musical sound or pleasing tune.

- *Would you call this situation "untuneful"? Explain why.*
- *The speaker chose "untuneful" because it captured the feeling precisely.*

---

untwine *(verb)*

Undo what has been twined together.

- *Untwine the strings.*
- *The coach explained when to use "untwine" and when to wait.*

---

untypically *(adverb)*

In a manner that is not typical.

- *She spoke "untypically," and the audience immediately understood her point.*
- *Place "untypically" carefully so the meaning stays clear.*

---

ununbium *(noun)*

A radioactive transuranic element.

- *She wrote a short paragraph that included "ununbium."*
- *He looked up "ununbium" because he had never seen it before.*

---

ununderstandably *(adverb)*

In an unintelligible manner.

- *Using "ununderstandably" can make your explanation more exact.*
- *He answered "ununderstandably," which changed the tone of the conversation.*

---

ununderstood *(adjective)*

Not understood; - Psychiatry.

- *Should not tamely submit to the unpredictable and ununderstood cycles of wars.*
- *Would you call this situation "ununderstood"? Explain why.*

ununhexium *(noun)*

A radioactive transuranic element.

- *In class, the teacher used "ununhexium" to mean a radioactive transuranic element.*
- *Understanding "ununhexium" helps you talk about this topic clearly.*

ununpentium *(noun)*

A radioactive transuranic element.

- *In class, the teacher used "ununpentium" to mean a radioactive transuranic element.*
- *The article explained what "ununpentium" means with a simple example.*

ununquadium *(noun)*

A radioactive transuranic element.

- *In class, the teacher used "ununquadium" to mean a radioactive transuranic element.*
- *He looked up "ununquadium" because he had never seen it before.*

ununtrium *(noun)*

A radioactive transuranic element.

- *She wrote a short paragraph that included "ununtrium."*
- *He looked up "ununtrium" because he had never seen it before.*

Environment & Climate

sustainability *(noun)*

The quality of causing little or no damage to the environment and therefore being able to continue for a long time.

- *The company has made sustainability a central part of its business strategy.*
- *Experts question the sustainability of farming methods that exhaust the soil.*

biodiversity *(noun)*

The variety of plant and animal life in a particular habitat or in the world as a whole.

- *Rainforests contain an extraordinary level of biodiversity.*
- *The loss of biodiversity threatens the stability of entire ecosystems.*

deforestation *(noun)*

The cutting down or burning of trees over a large area, destroying forests.

- *Deforestation in the Amazon has accelerated over the past decade.*
- *Deforestation contributes to climate change by releasing stored carbon.*

emission *(noun)*

The release of gas, heat, or other substances into the air, especially from industry or vehicles.

- *The city aims to cut carbon emissions by half.*
- *Car emissions are a major source of air pollution.*

carbon footprint *(noun)*

The total amount of greenhouse gases produced by a person, organization, or activity.

- *Flying frequently increases your carbon footprint.*
- *The company published a plan to reduce its carbon footprint.*

mitigate *(verb)*

To make something less harmful, serious, or painful.

- *Planting trees can help mitigate the effects of climate change.*
- *Safety rules are meant to mitigate workplace risks.*

adaptation *(noun)*

The process of adjusting to new conditions, especially environmental change.

- *Coastal cities need adaptation plans for rising sea levels.*
- *Crop adaptation is essential as temperatures rise.*

glacier *(noun)*

A huge mass of ice that moves very slowly down a mountain or across land.

- *The glacier has retreated several kilometers since 1950.*
- *Melting glaciers raise global sea levels.*

---

renewable energy *(noun)*

Energy from sources that are naturally replaced, such as sun, wind, and water.

- *The country is shifting toward renewable energy.*
- *Investing in renewable energy creates new jobs.*

---

desertification *(noun)*

The process by which fertile land becomes desert, often because of drought or poor land use.

- *Overgrazing has sped up desertification in the region.*
- *Desertification forces many farmers to leave their land.*

---

ozone *(noun)*

A form of oxygen in the upper atmosphere that protects Earth from harmful ultraviolet light.

- *The ozone layer has slowly begun to recover.*
- *Certain chemicals can damage atmospheric ozone.*

---

watershed *(noun)*

An area of land that drains into a particular river or lake; also, a turning point.

- *Pollution upstream affects the entire watershed.*
- *The election was a watershed in the nation's history.*

---

centaurea solstitialis *(noun)*

European weed having a winged stem and hairy leaves; adventive in the eastern United States.

- *Understanding "centaurea solstitialis" helps you talk about this topic clearly.*
- *In class, the teacher used "centaurea solstitialis" to mean european weed having a winged stem and hairy....*

---

centauria calcitrapa *(noun)*

Mediterranean annual or biennial herb having pinkish to purple flowers surrounded by spine-tipped scales; naturalized in America.

- *He looked up "centauria calcitrapa" because he had never seen it before.*
- *In class, the teacher used "centauria calcitrapa" to mean mediterranean annual or biennial herb having....*

---

centaurium *(noun)*

Genus of low-growing herbs mostly of northern hemisphere having flowers with protruding spirally twisted anthers.

- *They discussed "centaurium" during the group presentation.*
- *The article explained what "centaurium" means with a simple example.*

---

centaurium calycosum *(noun)*

Erect plant with small clusters of pink trumpet-shaped flowers of southwestern United States.

- *They discussed "centaurium calycosum" during the group presentation.*
- *In class, the teacher used "centaurium calycosum" to mean erect plant with small clusters of pink....*

---

centaurium minus *(noun)*

Common European glabrous annual centaury with flowers in dense cymes.

- *They discussed "centaurium minus" during the group presentation.*
- *In class, the teacher used "centaurium minus" to mean common european glabrous annual centaury with....*

---

centaurium scilloides *(noun)*

Tufted perennial of western Europe and Azores having bright pink to white flowers.

- *In class, the teacher used "centaurium scilloides" to mean tufted perennial of western europe and azores....*
- *The article explained what "centaurium scilloides" means with a simple example.*

---

centranthus *(noun)*

Genus of southern European herbs and subshrubs.

- *They discussed "centranthus" during the group presentation.*
- *She wrote a short paragraph that included "centranthus."*

---

centranthus ruber *(noun)*

European herb with small fragrant crimson or white spurred flowers.

- *They discussed "centranthus ruber" during the group presentation.*
- *The article explained what "centranthus ruber" means with a simple example.*

---

centrolobium *(noun)*

A genus of Centrolobium.

- *The article explained what "centrolobium" means with a simple example.*
- *In class, the teacher used "centrolobium" to mean a genus of centrolobium.*

---

centrolobium robustum *(noun)*

Brazilian tree with handsomely marked wood.

- *Understanding "centrolobium robustum" helps you talk about this topic clearly.*
- *The article explained what "centrolobium robustum" means with a simple example.*

---

centrosema *(noun)*

A genus of chiefly tropical American vines of the family Leguminosae having trifoliate leaves and large flowers.

- *They discussed "centrosema" during the group presentation.*
- *In class, the teacher used "centrosema" to mean a genus of chiefly tropical american vines of the....*

---

centrosema virginianum *(noun)*

Large-flowered weakly twining or prostrate vine of New Jersey to tropical eastern North America, sometimes cultivated for its purple and white flowers.

- *In class, the teacher used "centrosema virginianum" to mean large-flowered weakly twining or prostrate vine of....*
- *They discussed "centrosema virginianum" during the group presentation.*

---

centrospermae *(noun)*

Used in former classification systems; approximately synonymous with order Caryophyllales.

- *Understanding "centrospermae" helps you talk about this topic clearly.*
- *In class, the teacher used "centrospermae" to mean used in former classification systems;....*

---

centunculus *(noun)*

A dicotyledonous genus of the family Primulaceae.

- *The article explained what "centunculus" means with a simple example.*
- *In class, the teacher used "centunculus" to mean a dicotyledonous genus of the family primulaceae.*

---

cephalanthera *(noun)*

Small genus of temperate Old World terrestrial orchids.

- *He looked up "cephalanthera" because he had never seen it before.*
- *She wrote a short paragraph that included "cephalanthera."*

---

cephalanthera rubra *(noun)*

Orchid of Mediterranean and Asia having a lax spike of bright rose-pink flowers.

- *In class, the teacher used "cephalanthera rubra" to mean orchid of mediterranean and asia having a lax spike....*
- *He looked up "cephalanthera rubra" because he had never seen it before.*

---

cephalotaceae *(noun)*

A family of plants of order Rosales; coextensive with the genus Cephalotus.

- *They discussed "cephalotaceae" during the group presentation.*
- *In class, the teacher used "cephalotaceae" to mean a family of plants of order rosales; coextensive....*

---

cephalotaxaceae *(noun)*

A family of Cephalotaxaceae.

- *In class, the teacher used "cephalotaxaceae" to mean a family of cephalotaxaceae.*
- *Understanding "cephalotaxaceae" helps you talk about this topic clearly.*

cephalotaxus *(noun)*

The genus of Cephalotaxus (see plum-yews).

- *She wrote a short paragraph that included "cephalotaxus."*
- *The article explained what "cephalotaxus" means with a simple example.*

cephalotus *(noun)*

One species: Australian pitcher plant.

- *In class, the teacher used "cephalotus" to mean one species: australian pitcher plant.*
- *Understanding "cephalotus" helps you talk about this topic clearly.*

cephalotus follicularis *(noun)*

A carnivorous perennial herb having a green pitcher and hinged lid both with red edges; western Australia.

- *She wrote a short paragraph that included "cephalotus follicularis."*
- *Understanding "cephalotus follicularis" helps you talk about this topic clearly.*

ceratonia siliqua *(noun)*

Evergreen Mediterranean tree with edible pods; the biblical carob.

- *Understanding "ceratonia siliqua" helps you talk about this topic clearly.*
- *They discussed "ceratonia siliqua" during the group presentation.*

ceratopetalum *(noun)*

A dicotyledonous genus of the family Cunoniaceae.

- *In class, the teacher used "ceratopetalum" to mean a dicotyledonous genus of the family cunoniaceae.*
- *They discussed "ceratopetalum" during the group presentation.*

ceratopetalum gummiferum *(noun)*

Australian tree or shrub with red flowers; often used in Christmas decoration.

- *Understanding "ceratopetalum gummiferum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ceratopetalum gummiferum."*

ceratophyllaceae *(noun)*

Coextensive with the genus Ceratophyllum: hornworts.

- *In class, the teacher used "ceratophyllaceae" to mean coextensive with the genus ceratophyllum: hornworts.*
- *The article explained what "ceratophyllaceae" means with a simple example.*

ceratopteris *(noun)*

Water ferns.

- *They discussed "ceratopteris" during the group presentation.*
- *He looked up "ceratopteris" because he had never seen it before.*

ceratopteris pteridioides *(noun)*

Aquatic fern of tropical America often used in aquariums.

- *Understanding "ceratopteris pteridioides" helps you talk about this topic clearly.*
- *The article explained what "ceratopteris pteridioides" means with a simple example.*

ceratopteris thalictroides *(noun)*

Pantropical aquatic fern.

- *In class, the teacher used "ceratopteris thalictroides" to mean pantropical aquatic fern.*
- *The article explained what "ceratopteris thalictroides" means with a simple example.*

ceratostomataceae *(noun)*

Fungi having carbonous perithecia with long necks.

- *The article explained what "ceratostomataceae" means with a simple example.*
- *She wrote a short paragraph that included "ceratostomataceae."*

ceratostomella *(noun)*

Genus of fungi forming continuous hyaline spores.

- *The article explained what "ceratostomella" means with a simple example.*
- *Understanding "ceratostomella" helps you talk about this topic clearly.*

---

ceratostomella ulmi *(noun)*

Fungus causing Dutch elm disease.

- *In class, the teacher used "ceratostomella ulmi" to mean fungus causing dutch elm disease.*
- *The article explained what "ceratostomella ulmi" means with a simple example.*

---

ceratozamia *(noun)*

A small cycad of the genus Ceratozamia having a short scaly woody trunk and fernlike foliage and woody cones; Mexico.

- *He looked up "ceratozamia" because he had never seen it before.*
- *She wrote a short paragraph that included "ceratozamia."*

---

cercidiphyllum *(noun)*

One species: katsura tree.

- *Understanding "cercidiphyllum" helps you talk about this topic clearly.*
- *They discussed "cercidiphyllum" during the group presentation.*

---

cercidiphyllum japonicum *(noun)*

Rapidly growing deciduous tree of low mountainsides of China and Japan; grown as an ornamental for its dark blue-green candy-scented foliage that becomes yellow to scarlet in autumn.

- *He looked up "cercidiphyllum japonicum" because he had never seen it before.*
- *She wrote a short paragraph that included "cercidiphyllum japonicum."*

---

cercidium *(noun)*

Spiny shrubs or small trees sometimes placed in genus Parkinsonia: paloverde.

- *She wrote a short paragraph that included "cercidium."*
- *They discussed "cercidium" during the group presentation.*

---

cercidium floridum *(noun)*

Densely branched spiny tree of southwestern United States having showy yellow flowers and blue-green bark; sometimes placed in genus Cercidium.

- *They discussed "cercidium floridum" during the group presentation.*
- *Understanding "cercidium floridum" helps you talk about this topic clearly.*

---

cercospora kopkei *(noun)*

Fungus causing yellow spot (a sugarcane disease in Australia).

- *Understanding "cercospora kopkei" helps you talk about this topic clearly.*
- *The article explained what "cercospora kopkei" means with a simple example.*

---

cercosporella *(noun)*

Form genus of imperfect fungi lacking pigment in the spores and conidiophores.

- *He looked up "cercosporella" because he had never seen it before.*
- *She wrote a short paragraph that included "cercosporella."*

---

ceroxylon alpinum *(noun)*

Palm of the Andes yielding a resinous wax which is mixed with tallow to make candles.

- *The article explained what "ceroxylon alpinum" means with a simple example.*
- *They discussed "ceroxylon alpinum" during the group presentation.*

---

ceroxylon andicola *(noun)*

Palm of the Andes yielding a resinous wax which is mixed with tallow to make candles.

- *In class, the teacher used "ceroxylon andicola" to mean palm of the andes yielding a resinous wax which is....*
- *The article explained what "ceroxylon andicola" means with a simple example.*

---

cestrum *(noun)*

Genus of fragrant tropical American shrubs.

- *The article explained what "cestrum" means with a simple example.*

- *In class, the teacher used “cestrum” to mean genus of fragrant tropical american shrubs.*

---

cestrum diurnum *(noun)*

West Indian evergreen shrub having clusters of funnel-shaped white flowers that are fragrant by day.

- *The article explained what “cestrum diurnum” means with a simple example.*
- *They discussed “cestrum diurnum” during the group presentation.*

---

cestrum nocturnum *(noun)*

West Indian evergreen shrub having clusters of funnel-shaped yellow-white flowers that are fragrant by night.

- *In class, the teacher used “cestrum nocturnum” to mean west indian evergreen shrub having clusters of....*
- *The article explained what “cestrum nocturnum” means with a simple example.*

---

ceterach *(noun)*

Small genus of Old World ferns; superseded in some classification systems which place plants of this genus in e.g. genera Asplenium and Pleurosorus.

- *The article explained what “ceterach” means with a simple example.*
- *In class, the teacher used “ceterach” to mean small genus of old world ferns; superseded in some....*

---

ceterach officinarum *(noun)*

Small European fern with chaffy leathery fronds.

- *In class, the teacher used “ceterach officinarum” to mean small european fern with chaffy leathery fronds.*
- *The article explained what “ceterach officinarum” means with a simple example.*

---

cetraria *(noun)*

Foliose lichens chiefly of northern latitudes.

- *The article explained what “cetraria” means with a simple example.*
- *Understanding “cetraria” helps you talk about this topic clearly.*

---

cetraria islandica *(noun)*

Lichen with branched flattened partly erect thallus that grows in mountainous and Arctic regions; used as a medicine or food for humans and livestock; a source of glycerol.

- *They discussed “cetraria islandica” during the group presentation.*
- *He looked up “cetraria islandica” because he had never seen it before.*

---

chadlock *(noun)*

Weedy Eurasian plant often a pest in grain fields.

- *The article explained what “chadlock” means with a simple example.*
- *They discussed “chadlock” during the group presentation.*

---

chaenactis *(noun)*

Any of several United States plants having long stalks of funnel-shaped white or yellow flowers.

- *They discussed “chaenactis” during the group presentation.*
- *In class, the teacher used “chaenactis” to mean any of several united states plants having long....*

---

chaenomeles *(noun)*

Flowering quince.

- *He looked up “chaenomeles” because he had never seen it before.*
- *They discussed “chaenomeles” during the group presentation.*

---

chaenomeles japonica *(noun)*

Deciduous thorny shrub native to Japan having red blossoms.

- *The article explained what “chaenomeles japonica” means with a simple example.*
- *They discussed “chaenomeles japonica” during the group presentation.*

---

chaenomeles speciosa *(noun)*

Deciduous thorny shrub native to China having red or white blossoms.

- *The article explained what “chaenomeles speciosa” means with a simple example.*
- *Understanding “chaenomeles speciosa” helps you talk about this topic clearly.*

---

chafeweed *(noun)*

Weedy perennial of north temperate regions having woolly foliage and dirty white flowers in a leafy spike.

- *In class, the teacher used "chafeweed" to mean weedy perennial of north temperate regions having....*
- *The article explained what "chafeweed" means with a simple example.*

chaffweed *(noun)*

Weedy plant having short dry chafflike leaves.

- *She wrote a short paragraph that included "chaffweed."*
- *He looked up "chaffweed" because he had never seen it before.*

chalaza *(noun)*

Basal part of a plant ovule opposite the micropyle; where integument and nucellus are joined.

- *He looked up "chalaza" because he had never seen it before.*
- *Understanding "chalaza" helps you talk about this topic clearly.*

chalybite *(noun)*

Iron ore in the form of ferrous carbonate.

- *She wrote a short paragraph that included "chalybite."*
- *They discussed "chalybite" during the group presentation.*

chamaecrista *(noun)*

Genus of tropical herbs or subshrubs having sensitive leaves and suddenly dehiscing pods; some species placed in genus Cassia.

- *They discussed "chamaecrista" during the group presentation.*
- *In class, the teacher used "chamaecrista" to mean genus of tropical herbs or subshrubs having....*

chamaecrista fasciculata *(noun)*

Tropical American plant having leaflets somewhat sensitive to the touch; sometimes placed in genus Cassia.

- *She wrote a short paragraph that included "chamaecrista fasciculata."*
- *The article explained what "chamaecrista fasciculata" means with a simple example.*

chamaecyparis lawsoniana *(noun)*

Large timber tree of western North America with trunk diameter to 12 feet and height to 200 feet.

- *They discussed "chamaecyparis lawsoniana" during the group presentation.*
- *He looked up "chamaecyparis lawsoniana" because he had never seen it before.*

chamaecyparis nootkatensis *(noun)*

Tall evergreen of the Pacific coast of North America often cultivated for ornament.

- *He looked up "chamaecyparis nootkatensis" because he had never seen it before.*
- *They discussed "chamaecyparis nootkatensis" during the group presentation.*

chamaecyparis thyoides *(noun)*

Slow-growing medium-sized cedar of east coast of the United States; resembles American arborvitae.

- *She wrote a short paragraph that included "chamaecyparis thyoides."*
- *He looked up "chamaecyparis thyoides" because he had never seen it before.*

chamaecytisus *(noun)*

Small late-flowering trees or subshrubs having yellow to red flowers and leathery or woody pods; often especially formerly included in genus Cytisus.

- *The article explained what "chamaecytisus" means with a simple example.*
- *They discussed "chamaecytisus" during the group presentation.*

chamaecytisus palmensis *(noun)*

Shrub of Canary Islands having bristle-tipped oblanceolate leaves; used as cattle fodder.

- *They discussed "chamaecytisus palmensis" during the group presentation.*
- *She wrote a short paragraph that included "chamaecytisus palmensis."*

chamaedaphne *(noun)*

One species: leatherleaf.

- *She wrote a short paragraph that included "chamaedaphne."*
- *Understanding "chamaedaphne" helps you talk about this topic clearly.*

---

chamaedaphne calyculata *(noun)*

North temperate bog shrub with evergreen leathery leaves and small white cylindrical flowers.

- *In class, the teacher used "chamaedaphne calyculata" to mean north temperate bog shrub with evergreen leathery....*
- *He looked up "chamaedaphne calyculata" because he had never seen it before.*

---

chamaemelum *(noun)*

Small genus of plants sometimes included in genus Anthemis: chamomile.

- *They discussed "chamaemelum" during the group presentation.*
- *He looked up "chamaemelum" because he had never seen it before.*

---

chamaemelum nobilis *(noun)*

Eurasian plant with apple-scented foliage and white-rayed flowers and feathery leaves used medicinally; in some classification systems placed in genus Anthemis.

- *The article explained what "chamaemelum nobilis" means with a simple example.*
- *They discussed "chamaemelum nobilis" during the group presentation.*

---

chanar *(noun)*

Thorny shrub or small tree common in central Argentina having small orange or yellow flowers followed by edible berries.

- *The article explained what "chanar" means with a simple example.*
- *In class, the teacher used "chanar" to mean thorny shrub or small tree common in central....*

---

chantarelle *(noun)*

Widely distributed edible mushroom rich yellow in color with a smooth cap and a pleasant apricot aroma.

- *The article explained what "chantarelle" means with a simple example.*
- *They discussed "chantarelle" during the group presentation.*

---

chaulmoogra *(noun)*

East Indian tree with oily seeds yield chaulmoogra oil used to treat leprosy.

- *In class, the teacher used "chaulmoogra" to mean east indian tree with oily seeds yield chaulmoogra....*
- *Understanding "chaulmoogra" helps you talk about this topic clearly.*

---

chaulmoogra tree *(noun)*

East Indian tree with oily seeds yield chaulmoogra oil used to treat leprosy.

- *Understanding "chaulmoogra tree" helps you talk about this topic clearly.*
- *He looked up "chaulmoogra tree" because he had never seen it before.*

---

chaulmugra *(noun)*

East Indian tree with oily seeds yield chaulmoogra oil used to treat leprosy.

- *The article explained what "chaulmugra" means with a simple example.*
- *They discussed "chaulmugra" during the group presentation.*

---

checkerbloom *(noun)*

Perennial purple-flowered wild mallow of western North America that is also cultivated.

- *Understanding "checkerbloom" helps you talk about this topic clearly.*
- *They discussed "checkerbloom" during the group presentation.*

---

cheeseflower *(noun)*

Erect or decumbent Old World perennial with axillary clusters of rosy-purple flowers; introduced in United States.

- *He looked up "cheeseflower" because he had never seen it before.*
- *They discussed "cheeseflower" during the group presentation.*

---

cheilanthes *(noun)*

Small evergreen ferns: lipferns; in some classifications placed in family Polypodiaceae or Adiantaceae.

- *Understanding "cheilanthes" helps you talk about this topic clearly.*
- *In class, the teacher used "cheilanthes" to mean small evergreen ferns: lipferns; in some....*

cheilanthes alabamensis *(noun)*

Southeastern United States to northern Mexico and Jamaica.

- *He looked up "cheilanthes alabamensis" because he had never seen it before.*
- *Understanding "cheilanthes alabamensis" helps you talk about this topic clearly.*

cheilanthes eatonii *(noun)*

Lip fern of Texas to Oklahoma and Colorado and Arizona and Mexico having tall erect tufted fronds.

- *They discussed "cheilanthes eatonii" during the group presentation.*
- *Understanding "cheilanthes eatonii" helps you talk about this topic clearly.*

cheilanthes gracillima *(noun)*

Small tufted fern of northwestern America.

- *They discussed "cheilanthes gracillima" during the group presentation.*
- *Understanding "cheilanthes gracillima" helps you talk about this topic clearly.*

cheilanthes lanosa *(noun)*

Small North American evergreen fern whose stipes and lower frond surfaces are densely wooly.

- *In class, the teacher used "cheilanthes lanosa" to mean small north american evergreen fern whose stipes....*
- *Understanding "cheilanthes lanosa" helps you talk about this topic clearly.*

cheiranthus *(noun)*

Old World perennial plants grown for their showy flowers.

- *In class, the teacher used "cheiranthus" to mean old world perennial plants grown for their showy....*
- *He looked up "cheiranthus" because he had never seen it before.*

cheiranthus allionii *(noun)*

Showy erect biennial or short-lived perennial cultivated for its terminal racemes of orange-yellow flowers; sometimes placed in genus Cheiranthus.

- *They discussed "cheiranthus allionii" during the group presentation.*
- *In class, the teacher used "cheiranthus allionii" to mean showy erect biennial or short-lived perennial....*

cheiranthus asperus *(noun)*

Biennial or short-lived perennial prairie rocket having orange-yellow flowers; western North America to Minnesota and Kansas; sometimes placed in genus Cheiranthus.

- *They discussed "cheiranthus asperus" during the group presentation.*
- *The article explained what "cheiranthus asperus" means with a simple example.*

cheiranthus cheiri *(noun)*

Perennial of southern Europe having clusters of fragrant flowers of all colors especially yellow and orange; often naturalized on old walls or cliffs; sometimes placed in genus Erysimum.

- *In class, the teacher used "cheiranthus cheiri" to mean perennial of southern europe having clusters of....*
- *He looked up "cheiranthus cheiri" because he had never seen it before.*

chelidonium *(noun)*

One species: greater celandine.

- *They discussed "chelidonium" during the group presentation.*
- *She wrote a short paragraph that included "chelidonium."*

chelidonium majus *(noun)*

Perennial herb with branched woody stock and bright yellow flowers.

- *They discussed "chelidonium majus" during the group presentation.*
- *The article explained what "chelidonium majus" means with a simple example.*

chenopodiales *(noun)*

Corresponds approximately to the older group Centrospermae.

- *In class, the teacher used "chenopodiales" to mean corresponds approximately to the older group....*
- *The article explained what "chenopodiales" means with a simple example.*

chenopodium ambrosioides *(noun)*

Rank-smelling tropical American pigweed.

- *Understanding "chenopodium ambrosioides" helps you talk about this topic clearly.*
- *They discussed "chenopodium ambrosioides" during the group presentation.*

---

chenopodium botrys *(noun)*

Eurasian aromatic oak-leaved goosefoot with many yellow-green flowers; naturalized North America.

- *Understanding "chenopodium botrys" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chenopodium botrys."*

---

chenopodium capitatum *(noun)*

European annual with clusters of greenish flowers followed by red pulpy berrylike fruit; naturalized North America.

- *She wrote a short paragraph that included "chenopodium capitatum."*
- *They discussed "chenopodium capitatum" during the group presentation.*

---

chenopodium hybridum *(noun)*

Herb considered fatal to swine.

- *The article explained what "chenopodium hybridum" means with a simple example.*
- *In class, the teacher used "chenopodium hybridum" to mean herb considered fatal to swine.*

---

chenopodium vulvaria *(noun)*

European goosefoot with strong-scented foliage; adventive in eastern North America.

- *The article explained what "chenopodium vulvaria" means with a simple example.*
- *They discussed "chenopodium vulvaria" during the group presentation.*

---

chichipe *(noun)*

Tall treelike Mexican cactus with edible red fruit.

- *She wrote a short paragraph that included "chichipe."*
- *They discussed "chichipe" during the group presentation.*

---

chiggerflower *(noun)*

Erect perennial of eastern and southern United States having showy orange flowers.

- *He looked up "chiggerflower" because he had never seen it before.*
- *Understanding "chiggerflower" helps you talk about this topic clearly.*

---

chile tarweed *(noun)*

South American herb with sticky glandular foliage; source of madia oil.

- *She wrote a short paragraph that included "chile tarweed."*
- *The article explained what "chile tarweed" means with a simple example.*

---

chilean firebush *(noun)*

Grown for outstanding display of brilliant usually scarlet-crimson flowers; Andes.

- *He looked up "chilean firebush" because he had never seen it before.*
- *In class, the teacher used "chilean firebush" to mean grown for outstanding display of brilliant usually....*

---

chilean flameflower *(noun)*

Grown for outstanding display of brilliant usually scarlet-crimson flowers; Andes.

- *Understanding "chilean flameflower" helps you talk about this topic clearly.*
- *The article explained what "chilean flameflower" means with a simple example.*

---

chilopsis *(noun)*

One species: desert willow.

- *Understanding "chilopsis" helps you talk about this topic clearly.*
- *He looked up "chilopsis" because he had never seen it before.*

---

chilopsis linearis *(noun)*

Evergreen shrubby tree resembling a willow of dry regions of southwestern North America having showy purplish flowers and long seed pods.

- *She wrote a short paragraph that included "chilopsis linearis."*

- *Understanding "chilopsis linearis" helps you talk about this topic clearly.*

chimaphila *(noun)*

Small genus of evergreen herbs with long creeping rootstocks and shining leaves; North America; Europe; east Asia.

- *Understanding "chimaphila" helps you talk about this topic clearly.*
- *In class, the teacher used "chimaphila" to mean small genus of evergreen herbs with long creeping....*

chimaphila corymbosa *(noun)*

Eurasian herb with white or pinkish flowers in a terminal corymb.

- *She wrote a short paragraph that included "chimaphila corymbosa."*
- *The article explained what "chimaphila corymbosa" means with a simple example.*

chimaphila umbellata *(noun)*

Eurasian herb with white or pinkish flowers in a terminal corymb.

- *She wrote a short paragraph that included "chimaphila umbellata."*
- *He looked up "chimaphila umbellata" because he had never seen it before.*

chimonanthus *(noun)*

Small genus of Asian deciduous or evergreen shrubs having fragrant flowers: winter sweet.

- *She wrote a short paragraph that included "chimonanthus."*
- *The article explained what "chimonanthus" means with a simple example.*

chimonanthus praecox *(noun)*

Deciduous Japanese shrub cultivated for its fragrant yellow flowers.

- *She wrote a short paragraph that included "chimonanthus praecox."*
- *He looked up "chimonanthus praecox" because he had never seen it before.*

chincherinchee *(noun)*

South African perennial with long-lasting spikes of white blossoms that are shipped in to Europe and America for use as winter cut flowers.

- *He looked up "chincherinchee" because he had never seen it before.*
- *They discussed "chincherinchee" during the group presentation.*

chinchona *(noun)*

Any of several trees of the genus Cinchona.

- *The article explained what "chinchona" means with a simple example.*
- *In class, the teacher used "chinchona" to mean any of several trees of the genus cinchona.*

chinese scholartree *(noun)*

Handsome roundheaded deciduous tree having compound dark green leaves and profuse panicles of fragrant creamy-white flowers; China and Japan.

- *The article explained what "chinese scholartree" means with a simple example.*
- *She wrote a short paragraph that included "chinese scholartree."*

chinese wistaria *(noun)*

Having deep purple flowers.

- *The article explained what "chinese wistaria" means with a simple example.*
- *They discussed "chinese wistaria" during the group presentation.*

chinkapin oak *(noun)*

Medium-sized deciduous tree of the eastern United States that yields a strong durable wood.

- *In class, the teacher used "chinkapin oak" to mean medium-sized deciduous tree of the eastern united....*
- *The article explained what "chinkapin oak" means with a simple example.*

chiococca *(noun)*

Shrubs of tropical and subtropical New World.

- *In class, the teacher used "chiococca" to mean shrubs of tropical and subtropical new world.*
- *The article explained what "chiococca" means with a simple example.*

chiococca alba *(noun)*

Evergreen climbing shrub of southern Florida and West Indies grown for its racemes of fragrant white to creamy flowers followed by globose white succulent berries.

- *In class, the teacher used "chiococca alba" to mean evergreen climbing shrub of southern florida and....*
- *The article explained what "chiococca alba" means with a simple example.*

---

chionanthus *(noun)*

Deciduous trees or shrubs: fringe tree.

- *In class, the teacher used "chionanthus" to mean deciduous trees or shrubs: fringe tree.*
- *They discussed "chionanthus" during the group presentation.*

---

chionanthus virginicus *(noun)*

Small bushy tree of southeastern United States having profuse clusters of white flowers.

- *She wrote a short paragraph that included "chionanthus virginicus."*
- *Understanding "chionanthus virginicus" helps you talk about this topic clearly.*

---

chionochloa conspicua *(noun)*

Used by Maoris for thatching.

- *Understanding "chionochloa conspicua" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chionochloa conspicua."*

---

chiropteran *(noun)*

Nocturnal mouselike mammal with forelimbs modified to form membranous wings and anatomical adaptations for echolocation by which they navigate.

- *She wrote a short paragraph that included "chiropteran."*
- *He looked up "chiropteran" because he had never seen it before.*

---

chittam bark *(noun)*

Dried bark of the cascara buckthorn used as a laxative.

- *In class, the teacher used "chittam bark" to mean dried bark of the cascara buckthorn used as a laxative.*
- *The article explained what "chittam bark" means with a simple example.*

---

chittamwood *(noun)*

Deciduous tree of southeastern United States and Mexico.

- *They discussed "chittamwood" during the group presentation.*
- *Understanding "chittamwood" helps you talk about this topic clearly.*

---

chittem bark *(noun)*

Dried bark of the cascara buckthorn used as a laxative.

- *He looked up "chittem bark" because he had never seen it before.*
- *She wrote a short paragraph that included "chittem bark."*

---

chittimwood *(noun)*

Deciduous tree of southeastern United States and Mexico.

- *She wrote a short paragraph that included "chittimwood."*
- *He looked up "chittimwood" because he had never seen it before.*

---

chlamydospore *(noun)*

Thick-walled asexual resting spore of certain fungi and algae.

- *He looked up "chlamydospore" because he had never seen it before.*
- *In class, the teacher used "chlamydospore" to mean thick-walled asexual resting spore of certain fungi....*

---

chloranthaceae *(noun)*

Small family of tropical herbs and shrubs and trees.

- *In class, the teacher used "chloranthaceae" to mean small family of tropical herbs and shrubs and trees.*
- *They discussed "chloranthaceae" during the group presentation.*

---

chloranthus *(noun)*

Type genus of the Chloranthaceae.

- *She wrote a short paragraph that included "chloranthus."*
- *He looked up "chloranthus" because he had never seen it before.*

---

chlorenchyma *(noun)*

Parenchyma whose cells contain chloroplasts.

- *They discussed "chlorenchyma" during the group presentation.*
- *Understanding "chlorenchyma" helps you talk about this topic clearly.*

---

chloris gayana *(noun)*

Perennial grass of South Africa introduced into United States; cultivated as forage grass in dry regions.

- *The article explained what "chloris gayana" means with a simple example.*
- *Understanding "chloris gayana" helps you talk about this topic clearly.*

---

chlorophyllum molybdites *(noun)*

A poisonous agaric with a fibrillose cap and brown scales on a white ground color; cap can reach a diameter of 30 cm; often forms 'fairy rings'.

- *He looked up "chlorophyllum molybdites" because he had never seen it before.*
- *In class, the teacher used "chlorophyllum molybdites" to mean a poisonous agaric with a fibrillose cap and brown....*

---

chloroxylon *(noun)*

Deciduous trees of India and Sri Lanka.

- *They discussed "chloroxylon" during the group presentation.*
- *Understanding "chloroxylon" helps you talk about this topic clearly.*

---

chloroxylon swietenia *(noun)*

East Indian tree with valuable hard lustrous yellowish wood.

- *He looked up "chloroxylon swietenia" because he had never seen it before.*
- *She wrote a short paragraph that included "chloroxylon swietenia."*

---

chokedamp *(noun)*

The atmosphere in a mine following an explosion; high in carbon dioxide and incapable of supporting life.

- *He looked up "chokedamp" because he had never seen it before.*
- *She wrote a short paragraph that included "chokedamp."*

---

chordospartium *(noun)*

2 species of small New Zealand trees: weeping tree broom; endangered.

- *In class, the teacher used "chordospartium" to mean 2 species of small new zealand trees: weeping tree....*
- *The article explained what "chordospartium" means with a simple example.*

---

chorizema *(noun)*

Genus of Australian twining vines and small shrubs: flame peas.

- *Understanding "chorizema" helps you talk about this topic clearly.*
- *They discussed "chorizema" during the group presentation.*

---

christella *(noun)*

Any of several tropical ferns of the genus Christella having thin brittle fronds.

- *They discussed "christella" during the group presentation.*
- *Understanding "christella" helps you talk about this topic clearly.*

---

christian friedrich schonbein *(noun)*

German chemist who discovered ozone and developed guncotton as a propellant in firearms (1799-1868).

- *He looked up "christian friedrich schonbein" because he had never seen it before.*
- *They discussed "christian friedrich schonbein" during the group presentation.*

---

christian schonbein *(noun)*

German chemist who discovered ozone and developed guncotton as a propellant in firearms (1799-1868).

- *In class, the teacher used "christian schonbein" to mean german chemist who discovered ozone and developed....*
- *Understanding "christian schonbein" helps you talk about this topic clearly.*

christmasberry *(noun)*

Spiny evergreen shrub of southeastern United States having spreading branches usually blue or mauve flowers and red berries.

- *He looked up "christmasberry" because he had never seen it before.*
- *In class, the teacher used "christmasberry" to mean spiny evergreen shrub of southeastern united states....*

chromoplast *(noun)*

Plastid containing pigments other than chlorophyll usually yellow or orange carotenoids.

- *Understanding "chromoplast" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chromoplast."*

chrysanthemum balsamita *(noun)*

Tansy-scented Eurasian perennial herb with buttonlike yellow flowers; used as potherb or salad green and sometimes for potpourri or tea or flavoring; sometimes placed in genus Chrysanthemum.

- *Understanding "chrysanthemum balsamita" helps you talk about this topic clearly.*
- *In class, the teacher used "chrysanthemum balsamita" to mean tansy-scented eurasian perennial herb with....*

chrysanthemum cinerariifolium *(noun)*

White-flowered pyrethrum of Balkan area whose pinnate leaves are white and silky-hairy below; source of an insecticide; sometimes placed in genus Chrysanthemum.

- *Understanding "chrysanthemum cinerariifolium" helps you talk about this topic clearly.*
- *In class, the teacher used "chrysanthemum cinerariifolium" to mean white-flowered pyrethrum of balkan area whose....*

chrysanthemum coccineum *(noun)*

Spring-flowering garden perennial of Asiatic origin having finely divided aromatic leaves and white to pink-purple flowers; source of an insecticide; sometimes placed in genus Chrysanthemum.

- *He looked up "chrysanthemum coccineum" because he had never seen it before.*
- *She wrote a short paragraph that included "chrysanthemum coccineum."*

chrysanthemum coronarium *(noun)*

Shrubby annual of the Mediterranean region with yellowish-white flowers.

- *The article explained what "chrysanthemum coronarium" means with a simple example.*
- *They discussed "chrysanthemum coronarium" during the group presentation.*

chrysanthemum coronarium spatiosum *(noun)*

Grown for its succulent edible leaves used in Asian cooking.

- *In class, the teacher used "chrysanthemum coronarium spatiosum" to mean grown for its succulent edible leaves used in asian....*
- *The article explained what "chrysanthemum coronarium spatiosum" means with a simple example.*

chrysanthemum lacustre *(noun)*

Perennial of Portugal similar to the oxeye daisy.

- *They discussed "chrysanthemum lacustre" during the group presentation.*
- *The article explained what "chrysanthemum lacustre" means with a simple example.*

chrysanthemum leucanthemum *(noun)*

Tall leafy-stemmed Eurasian perennial with white flowers; widely naturalized; often placed in genus Chrysanthemum.

- *In class, the teacher used "chrysanthemum leucanthemum" to mean tall leafy-stemmed eurasian perennial with white....*
- *The article explained what "chrysanthemum leucanthemum" means with a simple example.*

chrysanthemum ptarmiciflorum *(noun)*

Shrubby perennial of the Canary Islands having white flowers and leaves and hairy stems covered with dustlike down; sometimes placed in genus Chrysanthemum.

- *Understanding "chrysanthemum ptarmiciflorum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chrysanthemum ptarmiciflorum."*

chrysanthemum segetum *(noun)*

European herb with bright yellow flowers; a common weed in grain fields.

- *Understanding "chrysanthemum segetum" helps you talk about this topic clearly.*
- *In class, the teacher used "chrysanthemum segetum" to mean european herb with bright yellow flowers; a common....*

chrysobalanus icaco *(noun)*

Small tropical American tree bearing edible plumlike fruit.

- *They discussed "chrysobalanus icaco" during the group presentation.*
- *She wrote a short paragraph that included "chrysobalanus icaco."*

---

chrysolepis *(noun)*

Two species: golden chinkapins.

- *They discussed "chrysolepis" during the group presentation.*
- *The article explained what "chrysolepis" means with a simple example.*

---

chrysolepis chrysophylla *(noun)*

Small ornamental evergreen tree of Pacific Coast whose glossy yellow-green leaves are yellow beneath; bears edible nuts.

- *She wrote a short paragraph that included "chrysolepis chrysophylla."*
- *Understanding "chrysolepis chrysophylla" helps you talk about this topic clearly.*

---

chrysolepis sempervirens *(noun)*

Evergreen shrub similar to golden chinkapin; mountains of California.

- *Understanding "chrysolepis sempervirens" helps you talk about this topic clearly.*
- *They discussed "chrysolepis sempervirens" during the group presentation.*

---

chrysophyllum *(noun)*

Tropical American evergreen trees or shrubs.

- *The article explained what "chrysophyllum" means with a simple example.*
- *Understanding "chrysophyllum" helps you talk about this topic clearly.*

---

chrysophyllum cainito *(noun)*

Evergreen tree of West Indies and Central America having edible purple fruit star-shaped in cross section and dark green leaves with golden silky undersides.

- *He looked up "chrysophyllum cainito" because he had never seen it before.*
- *She wrote a short paragraph that included "chrysophyllum cainito."*

---

chrysophyllum oliviforme *(noun)*

Tropical American timber tree with dark hard heavy wood and small plumlike purple fruit.

- *The article explained what "chrysophyllum oliviforme" means with a simple example.*
- *In class, the teacher used "chrysophyllum oliviforme" to mean tropical american timber tree with dark hard heavy....*

---

chrysopsis *(noun)*

Golden aster.

- *She wrote a short paragraph that included "chrysopsis."*
- *Understanding "chrysopsis" helps you talk about this topic clearly.*

---

chrysopsis mariana *(noun)*

Perennial golden aster of southeastern United States.

- *In class, the teacher used "chrysopsis mariana" to mean perennial golden aster of southeastern united states.*
- *He looked up "chrysopsis mariana" because he had never seen it before.*

---

chrysopsis villosa *(noun)*

Hairy perennial with yellow flower heads in branched clusters; found almost everywhere in dry places from Canada to west central and western United States; sometimes placed in genus Chrysopsis.

- *The article explained what "chrysopsis villosa" means with a simple example.*
- *They discussed "chrysopsis villosa" during the group presentation.*

---

chrysosplenium *(noun)*

Genus of widely distributed semiaquatic herbs with minute greenish-yellow apetalous flowers.

- *They discussed "chrysosplenium" during the group presentation.*
- *He looked up "chrysosplenium" because he had never seen it before.*

---

chrysosplenium americanum *(noun)*

Aquatic herb with yellowish flowers; central and western United States.

- *The article explained what "chrysosplenium americanum" means with a simple example.*

- *In class, the teacher used "chrysosplenium americanum" to mean aquatic herb with yellowish flowers; central and....*

---

chrysothamnus *(noun)*

Genus of low branching shrubs of western North America.

- *He looked up "chrysothamnus" because he had never seen it before.*
- *In class, the teacher used "chrysothamnus" to mean genus of low branching shrubs of western north america.*

---

chrysothamnus nauseosus *(noun)*

Pleasantly aromatic shrub having erect slender flexible hairy branches and dense clusters of small yellow flowers covering vast areas of western alkali plains and affording a retreat for jackrabbits; source of a yellow dye used by the Navajo.

- *Understanding "chrysothamnus nauseosus" helps you talk about this topic clearly.*
- *They discussed "chrysothamnus nauseosus" during the group presentation.*

---

chufa *(noun)*

European sedge having small edible nutlike tubers.

- *The article explained what "chufa" means with a simple example.*
- *In class, the teacher used "chufa" to mean european sedge having small edible nutlike tubers.*

---

chytridiaceae *(noun)*

A family of aquatic fungi of order Chytridiales.

- *The article explained what "chytridiaceae" means with a simple example.*
- *In class, the teacher used "chytridiaceae" to mean a family of aquatic fungi of order chytridiales.*

---

chytridiales *(noun)*

Simple aquatic fungi mostly saprophytic but some parasitic on higher plants or animals or fresh water fungi; sometimes placed in class Oomycetes.

- *She wrote a short paragraph that included "chytridiales."*
- *He looked up "chytridiales" because he had never seen it before.*

---

chytridiomycetes *(noun)*

A class of mostly aquatic fungi; saprophytic or parasitic on algae or fungi or plants.

- *The article explained what "chytridiomycetes" means with a simple example.*
- *She wrote a short paragraph that included "chytridiomycetes."*

---

cibotium *(noun)*

In some classification systems placed in family Cyatheaceae: ornamental tree ferns with coarse gracefully drooping fronds.

- *Understanding "cibotium" helps you talk about this topic clearly.*
- *In class, the teacher used "cibotium" to mean in some classification systems placed in family....*

---

cibotium barometz *(noun)*

Asiatic tree fern having dense matted hairs sometimes used as a styptic.

- *Understanding "cibotium barometz" helps you talk about this topic clearly.*
- *In class, the teacher used "cibotium barometz" to mean asiatic tree fern having dense matted hairs....*

---

cicer arietinum *(noun)*

Asiatic herb cultivated for its short pods with one or two edible seeds.

- *In class, the teacher used "cicer arietinum" to mean asiatic herb cultivated for its short pods with one....*
- *The article explained what "cicer arietinum" means with a simple example.*

---

cichorium endivia *(noun)*

Widely cultivated herb with leaves valued as salad green; either curly serrated leaves or broad flat ones that are usually blanched.

- *The article explained what "cichorium endivia" means with a simple example.*
- *In class, the teacher used "cichorium endivia" to mean widely cultivated herb with leaves valued as salad....*

---

cichorium intybus *(noun)*

Perennial Old World herb having rayed flower heads with blue florets cultivated for its root and its heads of crisp edible leaves used in salads.

- *She wrote a short paragraph that included "cichorium intybus."*
- *The article explained what "cichorium intybus" means with a simple example.*

cicuta verosa *(noun)*

Tall erect highly poisonous Eurasiatic perennial herb locally abundant in marshy areas.

- *She wrote a short paragraph that included "cicuta verosa."*
- *Understanding "cicuta verosa" helps you talk about this topic clearly.*

cimicifuga *(noun)*

Small genus of perennial herbs of north temperate regions: bugbane.

- *The article explained what "cimicifuga" means with a simple example.*
- *In class, the teacher used "cimicifuga" to mean small genus of perennial herbs of north temperate....*

cimicifuga americana *(noun)*

Bugbane of the eastern United States having erect racemes of white flowers.

- *He looked up "cimicifuga americana" because he had never seen it before.*
- *In class, the teacher used "cimicifuga americana" to mean bugbane of the eastern united states having erect....*

cimicifuga foetida *(noun)*

Bugbane of Siberia and eastern Asia having ill-smelling green-white flowers.

- *They discussed "cimicifuga foetida" during the group presentation.*
- *The article explained what "cimicifuga foetida" means with a simple example.*

cimicifuga racemosa *(noun)*

North American bugbane found from Maine and Ontario to Wisconsin and south to Georgia.

- *Understanding "cimicifuga racemosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cimicifuga racemosa."*

cinchona calisaya *(noun)*

Peruvian shrub or small tree having large glossy leaves and cymes of fragrant yellow to green or red flowers; cultivated for its medicinal bark.

- *Understanding "cinchona calisaya" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cinchona calisaya."*

cinchona lancifolia *(noun)*

Colombian tree; source of Cartagena bark (a cinchona bark).

- *She wrote a short paragraph that included "cinchona lancifolia."*
- *They discussed "cinchona lancifolia" during the group presentation.*

cinchona ledgeriana *(noun)*

Peruvian shrub or small tree having large glossy leaves and cymes of fragrant yellow to green or red flowers; cultivated for its medicinal bark.

- *She wrote a short paragraph that included "cinchona ledgeriana."*
- *He looked up "cinchona ledgeriana" because he had never seen it before.*

cinnamomum loureirii *(noun)*

Tropical southeast Asian tree with aromatic bark; yields a bark used medicinally.

- *In class, the teacher used "cinnamomum loureirii" to mean tropical southeast asian tree with aromatic bark;....*
- *They discussed "cinnamomum loureirii" during the group presentation.*

cinnamomum zeylanicum *(noun)*

Tropical Asian tree with aromatic yellowish-brown bark; source of the spice cinnamon.

- *She wrote a short paragraph that included "cinnamomum zeylanicum."*
- *The article explained what "cinnamomum zeylanicum" means with a simple example.*

circaea *(noun)*

Enchanter's nightshade.

- *He looked up "circaea" because he had never seen it before.*
- *In class, the teacher used "circaea" to mean enchanter's nightshade.*

circaea alpina *(noun)*

An Alpine variety of enchanter's nightshade.

- *They discussed "circaea alpina" during the group presentation.*
- *In class, the teacher used "circaea alpina" to mean an alpine variety of enchanter's nightshade.*

---

circaea lutetiana *(noun)*

Tall evening primrose with inconspicuous flowers.

- *She wrote a short paragraph that included "circaea lutetiana."*
- *Understanding "circaea lutetiana" helps you talk about this topic clearly.*

---

circis siliquastrum *(noun)*

Small tree of the eastern Mediterranean having abundant purplish-red flowers growing on old wood directly from stems and appearing before the leaves: widely cultivated in mild regions; wood valuable for veneers.

- *Understanding "circis siliquastrum" helps you talk about this topic clearly.*
- *In class, the teacher used "circis siliquastrum" to mean small tree of the eastern mediterranean having....*

---

cirrhus *(noun)*

Usually coiled.

- *In class, the teacher used "cirrhus" to mean usually coiled.*
- *They discussed "cirrhus" during the group presentation.*

---

cirsium flodmanii *(noun)*

Thistle of western North America having white woolly leaves.

- *The article explained what "cirsium flodmanii" means with a simple example.*
- *Understanding "cirsium flodmanii" helps you talk about this topic clearly.*

---

cirsium helenioides *(noun)*

Perennial stoloniferous thistle of northern Europe with lanceolate basal leaves and usually solitary heads of reddish-purple flowers.

- *She wrote a short paragraph that included "cirsium helenioides."*
- *The article explained what "cirsium helenioides" means with a simple example.*

---

cirsium heterophylum *(noun)*

Perennial stoloniferous thistle of northern Europe with lanceolate basal leaves and usually solitary heads of reddish-purple flowers.

- *Understanding "cirsium heterophylum" helps you talk about this topic clearly.*
- *He looked up "cirsium heterophylum" because he had never seen it before.*

---

cirsium rivulare *(noun)*

Of central and southwestern Europe.

- *Understanding "cirsium rivulare" helps you talk about this topic clearly.*
- *In class, the teacher used "cirsium rivulare" to mean of central and southwestern europe.*

---

cistaceae *(noun)*

Shrubs or woody herbs of temperate regions especially Mediterranean.

- *In class, the teacher used "cistaceae" to mean shrubs or woody herbs of temperate regions....*
- *Understanding "cistaceae" helps you talk about this topic clearly.*

---

cistus ladanifer *(noun)*

Shrub having white flowers and viscid stems and leaves yielding a fragrant oleoresin used in perfumes especially as a fixative.

- *She wrote a short paragraph that included "cistus ladanifer."*
- *He looked up "cistus ladanifer" because he had never seen it before.*

---

cistus ladanum *(noun)*

Shrub having white flowers and viscid stems and leaves yielding a fragrant oleoresin used in perfumes especially as a fixative.

- *The article explained what "cistus ladanum" means with a simple example.*
- *She wrote a short paragraph that included "cistus ladanum."*

---

citrange tree *(noun)*

More aromatic and acidic than oranges.

- *She wrote a short paragraph that included "citrange tree."*

- *They discussed "citrange tree" during the group presentation.*

---

citroncirus *(noun)*

A cross between Citrus sinensis and Poncirus trifoliata.

- *They discussed "citroncirus" during the group presentation.*
- *The article explained what "citroncirus" means with a simple example.*

---

citroncirus webberi *(noun)*

More aromatic and acidic than oranges.

- *They discussed "citroncirus webberi" during the group presentation.*
- *In class, the teacher used "citroncirus webberi" to mean more aromatic and acidic than oranges.*

---

citronwood *(noun)*

Durable fragrant wood; used in building (as in the roof of the cathedral at Cordova, Spain).

- *He looked up "citronwood" because he had never seen it before.*
- *They discussed "citronwood" during the group presentation.*

---

citrus aurantifolia *(noun)*

Any of various related trees bearing limes.

- *The article explained what "citrus aurantifolia" means with a simple example.*
- *She wrote a short paragraph that included "citrus aurantifolia."*

---

citrus bergamia *(noun)*

Small tree with pear-shaped fruit whose oil is used in perfumery; Italy.

- *He looked up "citrus bergamia" because he had never seen it before.*
- *In class, the teacher used "citrus bergamia" to mean small tree with pear-shaped fruit whose oil is used....*

---

citrus decumana *(noun)*

Southeastern Asian tree producing large fruits resembling grapefruits.

- *He looked up "citrus decumana" because he had never seen it before.*
- *She wrote a short paragraph that included "citrus decumana."*

---

citrus limetta *(noun)*

Lemon tree having fruit with a somewhat insipid sweetish pulp.

- *He looked up "citrus limetta" because he had never seen it before.*
- *She wrote a short paragraph that included "citrus limetta."*

---

citrus limonia *(noun)*

Hybrid between mandarin orange and lemon having very acid fruit with orange peel.

- *The article explained what "citrus limonia" means with a simple example.*
- *Understanding "citrus limonia" helps you talk about this topic clearly.*

---

cladode *(noun)*

A flattened stem resembling and functioning as a leaf.

- *Understanding "cladode" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cladode."*

---

cladonia rangiferina *(noun)*

An erect greyish branching lichen of Arctic and even some north temperate regions constituting the chief food for reindeer and caribou and sometimes being eaten by humans.

- *She wrote a short paragraph that included "cladonia rangiferina."*
- *The article explained what "cladonia rangiferina" means with a simple example.*

---

cladoniaceae *(noun)*

A family of lichens.

- *She wrote a short paragraph that included "cladoniaceae."*
- *He looked up "cladoniaceae" because he had never seen it before.*

---

cladophyll *(noun)*

A flattened stem resembling and functioning as a leaf.

- *In class, the teacher used "cladophyll" to mean a flattened stem resembling and functioning as a leaf.*
- *They discussed "cladophyll" during the group presentation.*

---

cladrastis *(noun)*

Yellowwoods.

- *He looked up "cladrastis" because he had never seen it before.*
- *They discussed "cladrastis" during the group presentation.*

---

cladrastis kentukea *(noun)*

Small handsome roundheaded deciduous tree having showy white flowers in terminal clusters and heavy hardwood yielding yellow dye.

- *He looked up "cladrastis kentukea" because he had never seen it before.*
- *Understanding "cladrastis kentukea" helps you talk about this topic clearly.*

---

cladrastis lutea *(noun)*

Small handsome roundheaded deciduous tree having showy white flowers in terminal clusters and heavy hardwood yielding yellow dye.

- *They discussed "cladrastis lutea" during the group presentation.*
- *Understanding "cladrastis lutea" helps you talk about this topic clearly.*

---

clammyweed *(noun)*

Strong-scented herb common in southern United States covered with intermixed gland and hairs.

- *Understanding "clammyweed" helps you talk about this topic clearly.*
- *He looked up "clammyweed" because he had never seen it before.*

---

class acrasiomycetes *(noun)*

Cellular slime molds; in some classifications placed in kingdom Protoctista.

- *Understanding "class acrasiomycetes" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "class acrasiomycetes."*

---

class angiospermae *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *They discussed "class angiospermae" during the group presentation.*
- *He looked up "class angiospermae" because he had never seen it before.*

---

class anthoceropsida *(noun)*

Hornworts: in some classification systems included in the class Hepaticopsida.

- *In class, the teacher used "class anthoceropsida" to mean hornworts: in some classification systems included....*
- *They discussed "class anthoceropsida" during the group presentation.*

---

class bryopsida *(noun)*

True mosses: bryophytes having leafy rather than thalloid gametophytes: comprises orders Andreaeales; Bryales; Dicranales; Eubryales; Sphagnales.

- *The article explained what "class bryopsida" means with a simple example.*
- *In class, the teacher used "class bryopsida" to mean true mosses: bryophytes having leafy rather than....*

---

class chytridiomycetes *(noun)*

A class of mostly aquatic fungi; saprophytic or parasitic on algae or fungi or plants.

- *They discussed "class chytridiomycetes" during the group presentation.*
- *In class, the teacher used "class chytridiomycetes" to mean a class of mostly aquatic fungi; saprophytic or....*

---

class cycadopsida *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *In class, the teacher used "class cycadopsida" to mean palmlike gymnosperms: includes the surviving order....*
- *He looked up "class cycadopsida" because he had never seen it before.*

---

class deuteromycetes *(noun)*

Form class; coextensive with subdivision Deuteromycota.

- *In class, the teacher used “class deuteromycetes” to mean form class; coextensive with subdivision deuteromycota.*
- *They discussed “class deuteromycetes” during the group presentation.*

---

class equisetatae *(noun)*

Horsetails and related forms.

- *They discussed “class equisetatae” during the group presentation.*
- *The article explained what “class equisetatae” means with a simple example.*

---

class eumycetes *(noun)*

Category used in some classifications: coextensive with division Eumycota.

- *He looked up “class eumycetes” because he had never seen it before.*
- *They discussed “class eumycetes” during the group presentation.*

---

class gasteromycetes *(noun)*

Fungi in which the hymenium is enclosed until after spores have matured: puffballs; earth stars; stinkhorn fungi.

- *The article explained what “class gasteromycetes” means with a simple example.*
- *They discussed “class gasteromycetes” during the group presentation.*

---

class gastromycetes *(noun)*

Fungi in which the hymenium is enclosed until after spores have matured: puffballs; earth stars; stinkhorn fungi.

- *He looked up “class gastromycetes” because he had never seen it before.*
- *Understanding “class gastromycetes” helps you talk about this topic clearly.*

---

class ginkgophytina *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *Understanding “class ginkgophytina” helps you talk about this topic clearly.*
- *In class, the teacher used “class ginkgophytina” to mean ginkgos: in some systems classified as a class and....*

---

class ginkgopsida *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *In class, the teacher used “class ginkgopsida” to mean ginkgos: in some systems classified as a class and....*
- *The article explained what “class ginkgopsida” means with a simple example.*

---

class gnetopsida *(noun)*

Gymnospermous flowering plants; supposed link between conifers and angiosperms; in some systems classified as a class (Gnetopsida) and in others as a subdivision (Gnetophytina or Gnetophyta).

- *He looked up “class gnetopsida” because he had never seen it before.*
- *They discussed “class gnetopsida” during the group presentation.*

---

class hemiascomycetes *(noun)*

Class of fungi in which no ascocarps are formed: yeasts and some plant parasites.

- *The article explained what “class hemiascomycetes” means with a simple example.*
- *In class, the teacher used “class hemiascomycetes” to mean class of fungi in which no ascocarps are formed:....*

---

class hepaticae *(noun)*

Liverworts: comprises orders Anthocerotales; Jungermanniales; Marchantiales; Sphaerocarpales.

- *He looked up “class hepaticae” because he had never seen it before.*
- *She wrote a short paragraph that included “class hepaticae.”*

---

class hepaticopsida *(noun)*

Liverworts: comprises orders Anthocerotales; Jungermanniales; Marchantiales; Sphaerocarpales.

- *Understanding “class hepaticopsida” helps you talk about this topic clearly.*
- *In class, the teacher used “class hepaticopsida” to mean liverworts: comprises orders anthocerotales;....*

---

class hymenomycetes *(noun)*

Used in some classifications; usually coextensive with order Agaricales: mushrooms; toadstools; agarics; bracket fungi.

- *He looked up “class hymenomycetes” because he had never seen it before.*
- *Understanding “class hymenomycetes” helps you talk about this topic clearly.*

class liliopsida *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *In class, the teacher used "class liliopsida" to mean comprising seed plants that produce an embryo with....*
- *He looked up "class liliopsida" because he had never seen it before.*

class lycopodiate *(noun)*

Club mosses and related forms: includes Lycopodiales; Isoetales; Selaginellales; and extinct Lepidodendrales; sometimes considered a subdivision of Tracheophyta.

- *She wrote a short paragraph that included "class lycopodiate."*
- *The article explained what "class lycopodiate" means with a simple example.*

class lycopodineae *(noun)*

Alternative designation for the class Lycopsida.

- *In class, the teacher used "class lycopodineae" to mean alternative designation for the class lycopsida.*
- *He looked up "class lycopodineae" because he had never seen it before.*

class lycopsida *(noun)*

Club mosses and related forms: includes Lycopodiales; Isoetales; Selaginellales; and extinct Lepidodendrales; sometimes considered a subdivision of Tracheophyta.

- *He looked up "class lycopsida" because he had never seen it before.*
- *Understanding "class lycopsida" helps you talk about this topic clearly.*

class monocotyledonae *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *He looked up "class monocotyledonae" because he had never seen it before.*
- *In class, the teacher used "class monocotyledonae" to mean comprising seed plants that produce an embryo with....*

class monocotyledones *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *He looked up "class monocotyledones" because he had never seen it before.*
- *She wrote a short paragraph that included "class monocotyledones."*

class myxomycetes *(noun)*

The class of true slime molds; essentially equivalent to the division Myxomycota.

- *She wrote a short paragraph that included "class myxomycetes."*
- *They discussed "class myxomycetes" during the group presentation.*

class oomycetes *(noun)*

Nonphotosynthetic fungi that resemble algae and that reproduce by forming oospores; sometimes classified as protoctists.

- *Understanding "class oomycetes" helps you talk about this topic clearly.*
- *In class, the teacher used "class oomycetes" to mean nonphotosynthetic fungi that resemble algae and....*

class pinopsida *(noun)*

Most conifers: in some systems classified as a class (Pinopsida) and in others as a subdivision (Pinophytina); used in some classifications for one of five subdivisions of Gymnospermophyta.

- *The article explained what "class pinopsida" means with a simple example.*
- *Understanding "class pinopsida" helps you talk about this topic clearly.*

class plectomycetes *(noun)*

Class of fungi in which the fruiting body is a cleistothecium (it releases spores only on decay or disintegration).

- *She wrote a short paragraph that included "class plectomycetes."*
- *He looked up "class plectomycetes" because he had never seen it before.*

class psilopsida *(noun)*

Whisk ferns; comprising the family Psilotaceae or Psilotatae: vascular plants with no roots, partial if any leaf differentiation, and rudimentary spore sacs.

- *Understanding "class psilopsida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "class psilopsida."*

class psilotatae *(noun)*

Whisk ferns; comprising the family Psilotaceae or Psilotatae: vascular plants with no roots, partial if any leaf differentiation, and rudimentary spore sacs.

- *In class, the teacher used "class psilotatae" to mean whisk ferns; comprising the family psilotaceae or....*
- *The article explained what "class psilotatae" means with a simple example.*

class pteridospermopsida *(noun)*

Extinct gymnosperms most of Carboniferous to Jurassic: seed ferns and allies.

- *Understanding "class pteridospermopsida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "class pteridospermopsida."*

class pyrenomycetes *(noun)*

Class of fungi in which the fruiting body is a perithecium; includes powdery mildews and ergot and Neurospora.

- *They discussed "class pyrenomycetes" during the group presentation.*
- *Understanding "class pyrenomycetes" helps you talk about this topic clearly.*

class sphenopsida *(noun)*

Horsetails and related forms.

- *Understanding "class sphenopsida" helps you talk about this topic clearly.*
- *The article explained what "class sphenopsida" means with a simple example.*

class taxopsida *(noun)*

Yews: in some systems classified as a class (Taxopsida) and in others as a subdivision (Taxophytina) used in some classifications for one of five subdivisions of Gymnospermophyta.

- *The article explained what "class taxopsida" means with a simple example.*
- *In class, the teacher used "class taxopsida" to mean yews: in some systems classified as a class....*

class tiliomycetes *(noun)*

Category used in some systems to comprise the two orders Ustilaginales (smuts) and Uredinales (rusts).

- *She wrote a short paragraph that included "class tiliomycetes."*
- *He looked up "class tiliomycetes" because he had never seen it before.*

class zygomycetes *(noun)*

Class of fungi coextensive with subdivision Zygomycota.

- *The article explained what "class zygomycetes" means with a simple example.*
- *They discussed "class zygomycetes" during the group presentation.*

clathraceae *(noun)*

Family of fleshy fungi resembling stinkhorns.

- *They discussed "clathraceae" during the group presentation.*
- *In class, the teacher used "clathraceae" to mean family of fleshy fungi resembling stinkhorns.*

clathrus *(noun)*

Type genus of the Clathraceae.

- *In class, the teacher used "clathrus" to mean type genus of the clathraceae.*
- *Understanding "clathrus" helps you talk about this topic clearly.*

clatonia lanceolata *(noun)*

Small slender plant having one pair of succulent leaves at the middle of the stem and a loose raceme of white or pink or rose bowl-shaped flowers and an edible corm.

- *They discussed "clatonia lanceolata" during the group presentation.*
- *She wrote a short paragraph that included "clatonia lanceolata."*

clavariaceae *(noun)*

Fleshy fungi: coral fungi.

- *The article explained what "clavariaceae" means with a simple example.*
- *Understanding "clavariaceae" helps you talk about this topic clearly.*

clavicipitaceae *(noun)*

Any of various mushrooms of the class Ascomycetes.

- *They discussed "clavicipitaceae" during the group presentation.*
- *She wrote a short paragraph that included "clavicipitaceae."*

---

clearweed *(noun)*

A plants of the genus Pilea having drooping green flower clusters and smooth translucent stems and leaves.

- *He looked up "clearweed" because he had never seen it before.*
- *She wrote a short paragraph that included "clearweed."*

---

cleistes *(noun)*

Terrestrial orchids of North and South America having slender fibrous roots; allied to genus Pogonia.

- *Understanding "cleistes" helps you talk about this topic clearly.*
- *In class, the teacher used "cleistes" to mean terrestrial orchids of north and south america....*

---

cleistes divaricata *(noun)*

Orchid of northeastern United States with magenta-pink flowers having funnel-shaped lip; sometimes placed in genus Pogonia.

- *Understanding "cleistes divaricata" helps you talk about this topic clearly.*
- *In class, the teacher used "cleistes divaricata" to mean orchid of northeastern united states with....*

---

cleistes rosea *(noun)*

Orchid of central and northern South America having 1- to 3-blossomed racemes of large showy rose-colored flowers; sometimes placed in genus Pogonia.

- *Understanding "cleistes rosea" helps you talk about this topic clearly.*
- *In class, the teacher used "cleistes rosea" to mean orchid of central and northern south america having....*

---

cleistocarp *(noun)*

Closed spore-bearing structure of some fungi (especially Aspergillaceae and Erysiphaceae) from which spores are released only by decay or disintegration.

- *She wrote a short paragraph that included "cleistocarp."*
- *The article explained what "cleistocarp" means with a simple example.*

---

cleistothecium *(noun)*

Closed spore-bearing structure of some fungi (especially Aspergillaceae and Erysiphaceae) from which spores are released only by decay or disintegration.

- *In class, the teacher used "cleistothecium" to mean closed spore-bearing structure of some fungi....*
- *The article explained what "cleistothecium" means with a simple example.*

---

clematis baldwinii *(noun)*

Erect clematis of Florida having pink to purple flowers.

- *They discussed "clematis baldwinii" during the group presentation.*
- *She wrote a short paragraph that included "clematis baldwinii."*

---

clematis lasiantha *(noun)*

Clematis of California.

- *She wrote a short paragraph that included "clematis lasiantha."*
- *Understanding "clematis lasiantha" helps you talk about this topic clearly.*

---

clematis ochreleuca *(noun)*

Shrubby clematis of the eastern United States having curly foliage.

- *She wrote a short paragraph that included "clematis ochreleuca."*
- *He looked up "clematis ochreleuca" because he had never seen it before.*

---

clematis tangutica *(noun)*

Chinese clematis with serrate leaves and large yellow flowers.

- *In class, the teacher used "clematis tangutica" to mean chinese clematis with serrate leaves and large....*
- *He looked up "clematis tangutica" because he had never seen it before.*

---

clematis texensis *(noun)*

Woody vine of Texas having showy solitary nodding scarlet flowers.

- *She wrote a short paragraph that included "clematis texensis."*

- *He looked up “clematis texensis” because he had never seen it before.*

clematis verticillaris *(noun)*

Climber of northeastern North America having waxy purplish-blue flowers.

- *She wrote a short paragraph that included “clematis verticillaris.”*
- *The article explained what “clematis verticillaris” means with a simple example.*

clematis viorna *(noun)*

Scandent subshrub of southeastern United States having large red-purple bell-shaped flowers with leathery recurved sepals.

- *She wrote a short paragraph that included “clematis viorna.”*
- *The article explained what “clematis viorna” means with a simple example.*

clematis vitalba *(noun)*

Vigorous deciduous climber of Europe to Afghanistan and Lebanon having panicles of fragrant green-white flowers in summer and autumn.

- *She wrote a short paragraph that included “clematis vitalba.”*
- *Understanding “clematis vitalba” helps you talk about this topic clearly.*

cleome hassleriana *(noun)*

Native to South America but naturalized in warm parts of United States; grown for its long-lasting spider-shaped white to pink-purple flowers.

- *In class, the teacher used “cleome hassleriana” to mean native to south america but naturalized in warm....*
- *The article explained what “cleome hassleriana” means with a simple example.*

clethra alnifolia *(noun)*

Shrub of eastern and southern coastal United States having beautiful racemes of spice-scented white flowers.

- *He looked up “clethra alnifolia” because he had never seen it before.*
- *Understanding “clethra alnifolia” helps you talk about this topic clearly.*

clethraceae *(noun)*

Coextensive with the genus Clethra.

- *The article explained what “clethraceae” means with a simple example.*
- *She wrote a short paragraph that included “clethraceae.”*

clianthus *(noun)*

Any of various shrubs or vines of the genus Clianthus having compound leaves and pea-like red flowers in drooping racemes.

- *They discussed “clianthus” during the group presentation.*
- *He looked up “clianthus” because he had never seen it before.*

clianthus formosus *(noun)*

Sprawling shrubby perennial noted for its scarlet black-marked flowers; widely distributed in dry parts of Australia.

- *She wrote a short paragraph that included “clianthus formosus.”*
- *The article explained what “clianthus formosus” means with a simple example.*

clianthus puniceus *(noun)*

Evergreen shrub with scarlet to white clawlike or beaklike flowers; New Zealand.

- *She wrote a short paragraph that included “clianthus puniceus.”*
- *They discussed “clianthus puniceus” during the group presentation.*

clianthus speciosus *(noun)*

Sprawling shrubby perennial noted for its scarlet black-marked flowers; widely distributed in dry parts of Australia.

- *She wrote a short paragraph that included “clianthus speciosus.”*
- *He looked up “clianthus speciosus” because he had never seen it before.*

cliftonia *(noun)*

One species: titi.

- *They discussed “cliftonia” during the group presentation.*
- *In class, the teacher used “cliftonia” to mean one species: titi.*

cliftonia monophylla *(noun)*

Tree of low-lying coastal areas of southeastern United States having glossy leaves and racemes of fragrant white flowers.

- *In class, the teacher used "cliftonia monophylla" to mean tree of low-lying coastal areas of southeastern....*
- *The article explained what "cliftonia monophylla" means with a simple example.*

climbing fumitory *(noun)*

Vine with feathery leaves and white or pinkish flowers; sometimes placed in genus Fumaria.

- *In class, the teacher used "climbing fumitory" to mean vine with feathery leaves and white or pinkish....*
- *The article explained what "climbing fumitory" means with a simple example.*

climbing hempweed *(noun)*

Herb of tropical America having vanilla-scented flowers; climbs up trees.

- *In class, the teacher used "climbing hempweed" to mean herb of tropical america having vanilla-scented....*
- *The article explained what "climbing hempweed" means with a simple example.*

clinopodium grandiflorum *(noun)*

Aromatic herb with large pink flowers; southern and southeastern Europe; Anatolia; northern Iran.

- *She wrote a short paragraph that included "clinopodium grandiflorum."*
- *They discussed "clinopodium grandiflorum" during the group presentation.*

clinopodium vulgare *(noun)*

Aromatic herb having heads of small pink or whitish flowers; widely distributed in United States, Europe and Asia.

- *The article explained what "clinopodium vulgare" means with a simple example.*
- *She wrote a short paragraph that included "clinopodium vulgare."*

clintonia *(noun)*

Any temperate liliaceous plant of the genus Clintonia having broad basal leaves and white or yellowish or purplish flowers followed by blue or black berries.

- *She wrote a short paragraph that included "clintonia."*
- *Understanding "clintonia" helps you talk about this topic clearly.*

clintonia andrewsiana *(noun)*

Plant with nearly leafless stalk topped by a cluster of red or reddish lavender flowers; California to Oregon.

- *He looked up "clintonia andrewsiana" because he had never seen it before.*
- *She wrote a short paragraph that included "clintonia andrewsiana."*

clintonia borealis *(noun)*

Common woodland herb of temperate North America having yellow nodding flowers and small round blue fruits.

- *In class, the teacher used "clintonia borealis" to mean common woodland herb of temperate north america....*
- *He looked up "clintonia borealis" because he had never seen it before.*

clintonia uniflora *(noun)*

Plant with 1 or 2 white starlike flowers on short leafless stalks; Alaska to California and east to Oregon and Montana.

- *The article explained what "clintonia uniflora" means with a simple example.*
- *She wrote a short paragraph that included "clintonia uniflora."*

clitocybe clavipes *(noun)*

An agaric with a flat cap that is greyish or yellowish brown with pallid gills and a stalk that bulges toward the base.

- *The article explained what "clitocybe clavipes" means with a simple example.*
- *They discussed "clitocybe clavipes" during the group presentation.*

clitocybe dealbata *(noun)*

A small poisonous agaric; has a dry white cap with crowded gills and a short stalk.

- *He looked up "clitocybe dealbata" because he had never seen it before.*
- *Understanding "clitocybe dealbata" helps you talk about this topic clearly.*

clitocybe subconnexa *(noun)*

An edible white agaric that fruits in dense clusters; the gills are narrow and crowded and the stalk is fleshy and unpolished.

- *He looked up "clitocybe subconnexa" because he had never seen it before.*
- *She wrote a short paragraph that included "clitocybe subconnexa."*

---

clitoria *(noun)*

Genus of tropical shrubs or vines having pinnate leaves and large axillary flowers.

- *The article explained what "clitoria" means with a simple example.*
- *They discussed "clitoria" during the group presentation.*

---

clitoria mariana *(noun)*

Large-flowered wild twining vine of southeastern and central United States having pale blue flowers.

- *Understanding "clitoria mariana" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "clitoria mariana."*

---

clitoria turnatea *(noun)*

Vine of tropical Asia having pinnate leaves and bright blue flowers with yellow centers.

- *The article explained what "clitoria turnatea" means with a simple example.*
- *They discussed "clitoria turnatea" during the group presentation.*

---

clivers *(noun)*

Annual having the stem beset with curved prickles; North America and Europe and Asia.

- *He looked up "clivers" because he had never seen it before.*
- *She wrote a short paragraph that included "clivers."*

---

clotbur *(noun)*

Any of several erect biennial herbs of temperate Eurasia having stout taproots and producing burs.

- *She wrote a short paragraph that included "clotbur."*
- *He looked up "clotbur" because he had never seen it before.*

---

cloveroot *(noun)*

Hairy Eurasian plant with small yellow flowers and an astringent root formerly used medicinally.

- *They discussed "cloveroot" during the group presentation.*
- *She wrote a short paragraph that included "cloveroot."*

---

clubmoss family *(noun)*

A family of ferns belonging to the order Lycopodiales.

- *He looked up "clubmoss family" because he had never seen it before.*
- *They discussed "clubmoss family" during the group presentation.*

---

clubroot fungus *(noun)*

A fungus resembling slime mold that causes swellings or distortions of the roots of cabbages and related plants.

- *He looked up "clubroot fungus" because he had never seen it before.*
- *She wrote a short paragraph that included "clubroot fungus."*

---

clusia *(noun)*

An aromatic tree of the genus Clusia having large white or yellow or pink flowers.

- *They discussed "clusia" during the group presentation.*
- *He looked up "clusia" because he had never seen it before.*

---

clusia flava *(noun)*

A West Indies clusia having fig-shaped fruit.

- *She wrote a short paragraph that included "clusia flava."*
- *He looked up "clusia flava" because he had never seen it before.*

---

clusia insignis *(noun)*

Epiphytic clusia of British Guiana.

- *They discussed "clusia insignis" during the group presentation.*
- *He looked up "clusia insignis" because he had never seen it before.*

clusia major *(noun)*

A common tropical American clusia having solitary white or rose flowers.

- *He looked up "clusia major" because he had never seen it before.*
- *She wrote a short paragraph that included "clusia major."*

clusia rosea *(noun)*

A common tropical American clusia having solitary white or rose flowers.

- *They discussed "clusia rosea" during the group presentation.*
- *He looked up "clusia rosea" because he had never seen it before.*

clusiaceae *(noun)*

Widely distributed family of chiefly tropical trees and shrubs and vines that produce oils and resins and some usable timber.

- *She wrote a short paragraph that included "clusiaceae."*
- *They discussed "clusiaceae" during the group presentation.*

clytocybe alba *(noun)*

A large white agaric; edible but not palatable.

- *Understanding "clytocybe alba" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "clytocybe alba."*

cnicus *(noun)*

One species: blessed thistle.

- *The article explained what "cnicus" means with a simple example.*
- *They discussed "cnicus" during the group presentation.*

cnicus benedictus *(noun)*

Annual of Mediterranean to Portugal having hairy stems and minutely spiny-toothed leaves and large heads of yellow flowers.

- *They discussed "cnicus benedictus" during the group presentation.*
- *She wrote a short paragraph that included "cnicus benedictus."*

cnidoscolus *(noun)*

A genus of perennial plant with bristles; belonging to the family Euphorbiaceae.

- *Understanding "cnidoscolus" helps you talk about this topic clearly.*
- *In class, the teacher used "cnidoscolus" to mean a genus of perennial plant with bristles; belonging....*

cnidoscolus urens *(noun)*

A stinging herb of tropical America.

- *The article explained what "cnidoscolus urens" means with a simple example.*
- *In class, the teacher used "cnidoscolus urens" to mean a stinging herb of tropical america.*

coast boykinia *(noun)*

Plant with leaves mostly at the base and openly branched clusters of small white flowers; western North America.

- *Understanding "coast boykinia" helps you talk about this topic clearly.*
- *He looked up "coast boykinia" because he had never seen it before.*

coast polypody *(noun)*

Stiff leathery-leaved fern of western North America having ovate fronds parted to the midrib.

- *Understanding "coast polypody" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "coast polypody."*

cobnut *(noun)*

Small nut-bearing tree much grown in Europe.

- *The article explained what "cobnut" means with a simple example.*
- *In class, the teacher used "cobnut" to mean small nut-bearing tree much grown in europe.*

cochlearia *(noun)*

A genus of the family Cruciferae.

- *The article explained what “cochlearia” means with a simple example.*
- *They discussed “cochlearia” during the group presentation.*

---

cochlearia officinalis *(noun)*

A widely distributed Arctic cress reputed to have value in treatment or prevention of scurvy; a concentrated source of vitamin C.

- *In class, the teacher used “cochlearia officinalis” to mean a widely distributed arctic cress reputed to have....*
- *The article explained what “cochlearia officinalis” means with a simple example.*

---

cocklebur *(noun)*

Any coarse weed of the genus Xanthium having spiny burrs.

- *In class, the teacher used “cocklebur” to mean any coarse weed of the genus xanthium having spiny....*
- *The article explained what “cocklebur” means with a simple example.*

---

cockleburr *(noun)*

Any coarse weed of the genus Xanthium having spiny burrs.

- *In class, the teacher used “cockleburr” to mean any coarse weed of the genus xanthium having spiny....*
- *They discussed “cockleburr” during the group presentation.*

---

cocksfoot *(noun)*

Widely grown stout Old World hay and pasture grass.

- *They discussed “cocksfoot” during the group presentation.*
- *He looked up “cocksfoot” because he had never seen it before.*

---

cocoswood *(noun)*

Wood of the granadilla tree used for making musical instruments especially clarinets.

- *He looked up “cocoswood” because he had never seen it before.*
- *They discussed “cocoswood” during the group presentation.*

---

cocozelle *(noun)*

Squash plant having dark green fruit with skin mottled with light green or yellow.

- *In class, the teacher used “cocozelle” to mean squash plant having dark green fruit with skin....*
- *Understanding “cocozelle” helps you talk about this topic clearly.*

---

cocuswood *(noun)*

Wood of the granadilla tree used for making musical instruments especially clarinets.

- *He looked up “cocuswood” because he had never seen it before.*
- *In class, the teacher used “cocuswood” to mean wood of the granadilla tree used for making musical....*

---

codariocalyx *(noun)*

Used in some classifications for plants usually included in genus Desmodium.

- *He looked up “codariocalyx” because he had never seen it before.*
- *In class, the teacher used “codariocalyx” to mean used in some classifications for plants usually....*

---

codariocalyx motorius *(noun)*

Erect tropical Asian shrub whose small lateral leaflets rotate on their axes and jerk up and down under the influence of sunshine.

- *He looked up “codariocalyx motorius” because he had never seen it before.*
- *In class, the teacher used “codariocalyx motorius” to mean erect tropical asian shrub whose small lateral....*

---

codiaeum *(noun)*

Evergreen tropical trees and shrubs with thick and colorful leathery leaves; Malaya and Pacific islands.

- *They discussed “codiaeum” during the group presentation.*
- *She wrote a short paragraph that included “codiaeum.”*

---

codiaeum variegatum *(noun)*

Grown in many varieties for their brightly colored foliage; widely cultivated as a houseplant.

- *He looked up “codiaeum variegatum” because he had never seen it before.*

- *She wrote a short paragraph that included "codiaeum variegatum."*

codlins-and-cream *(noun)*

Plant of Europe and Asia having purplish-red flowers and hairy stems and leaves; introduced into North America.

- *The article explained what "codlins-and-cream" means with a simple example.*
- *They discussed "codlins-and-cream" during the group presentation.*

coeloglossum *(noun)*

Terrestrial orchids of cooler parts of North America and Europe: satyr orchid.

- *In class, the teacher used "coeloglossum" to mean terrestrial orchids of cooler parts of north....*
- *They discussed "coeloglossum" during the group presentation.*

coeloglossum bracteatum *(noun)*

Orchid with broad ovate leaves and long-bracted green very irregular flowers.

- *He looked up "coeloglossum bracteatum" because he had never seen it before.*
- *Understanding "coeloglossum bracteatum" helps you talk about this topic clearly.*

coeloglossum viride *(noun)*

Orchid having hooded long-bracted green to yellow-green flowers suffused with purple.

- *The article explained what "coeloglossum viride" means with a simple example.*
- *Understanding "coeloglossum viride" helps you talk about this topic clearly.*

coffea liberica *(noun)*

Small tree of West Africa.

- *She wrote a short paragraph that included "coffea liberica."*
- *Understanding "coffea liberica" helps you talk about this topic clearly.*

coffeeberry *(noun)*

Evergreen shrub of western United States bearing small red or black fruits.

- *In class, the teacher used "coffeeberry" to mean evergreen shrub of western united states bearing....*
- *The article explained what "coffeeberry" means with a simple example.*

cohune *(noun)*

Tropical American feather palm whose large nuts yield valuable oil and a kind of vegetable ivory.

- *In class, the teacher used "cohune" to mean tropical american feather palm whose large nuts....*
- *He looked up "cohune" because he had never seen it before.*

cohune fat *(noun)*

Semisolid fat from nuts of the cohune palm; used in cooking and soap making.

- *They discussed "cohune fat" during the group presentation.*
- *She wrote a short paragraph that included "cohune fat."*

cohune nut *(noun)*

Nut of the cohune palm having hard white shells like those of ivory nuts.

- *The article explained what "cohune nut" means with a simple example.*
- *She wrote a short paragraph that included "cohune nut."*

cohune oil *(noun)*

Semisolid fat from nuts of the cohune palm; used in cooking and soap making.

- *Understanding "cohune oil" helps you talk about this topic clearly.*
- *The article explained what "cohune oil" means with a simple example.*

cohune palm *(noun)*

Tropical American feather palm whose large nuts yield valuable oil and a kind of vegetable ivory.

- *Understanding "cohune palm" helps you talk about this topic clearly.*
- *In class, the teacher used "cohune palm" to mean tropical american feather palm whose large nuts....*

cohune-nut oil *(noun)*

Semisolid fat from nuts of the cohune palm; used in cooking and soap making.

- *In class, the teacher used "cohune-nut oil" to mean semisolid fat from nuts of the cohune palm; used in....*
- *The article explained what "cohune-nut oil" means with a simple example.*

---

coigue *(noun)*

Chilean evergreen whose leafy boughs are used for thatching.

- *In class, the teacher used "coigue" to mean chilean evergreen whose leafy boughs are used for....*
- *The article explained what "coigue" means with a simple example.*

---

colchicaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted: genera Colchicum and Gloriosa.

- *Understanding "colchicaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "colchicaceae" to mean one of many subfamilies into which some....*

---

colchicum autumnale *(noun)*

Bulbous autumn-flowering herb with white, purple or lavender-and-white flowers; native to western and central Europe.

- *They discussed "colchicum autumnale" during the group presentation.*
- *The article explained what "colchicum autumnale" means with a simple example.*

---

coleus amboinicus *(noun)*

An aromatic fleshy herb of India and Ceylon to South Africa; sometimes placed in genus Plectranthus.

- *The article explained what "coleus amboinicus" means with a simple example.*
- *In class, the teacher used "coleus amboinicus" to mean an aromatic fleshy herb of india and ceylon to....*

---

coleus aromaticus *(noun)*

An aromatic fleshy herb of India and Ceylon to South Africa; sometimes placed in genus Plectranthus.

- *They discussed "coleus aromaticus" during the group presentation.*
- *In class, the teacher used "coleus aromaticus" to mean an aromatic fleshy herb of india and ceylon to....*

---

coleus blumei *(noun)*

Perennial aromatic herb of southeastern Asia having large usually bright-colored or blotched leaves and spikes of blue-violet flowers; sometimes placed in genus Solenostemon.

- *She wrote a short paragraph that included "coleus blumei."*
- *Understanding "coleus blumei" helps you talk about this topic clearly.*

---

colewort *(noun)*

A hardy cabbage with coarse curly leaves that do not form a head.

- *The article explained what "colewort" means with a simple example.*
- *In class, the teacher used "colewort" to mean a hardy cabbage with coarse curly leaves that do....*

---

colicroot *(noun)*

Any of several perennials of the genus Aletris having grasslike leaves and bitter roots reputed to cure colic.

- *Understanding "colicroot" helps you talk about this topic clearly.*
- *He looked up "colicroot" because he had never seen it before.*

---

collinsia *(noun)*

Genus of hardy annual herbs of western United States.

- *He looked up "collinsia" because he had never seen it before.*
- *She wrote a short paragraph that included "collinsia."*

---

collinsia bicolor *(noun)*

White and lavender to pale-blue flowers grow in perfect rings of widely spaced bands around the stems forming a kind of pagoda; California.

- *Understanding "collinsia bicolor" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "collinsia bicolor."*

---

collinsia heterophylla *(noun)*

White and lavender to pale-blue flowers grow in perfect rings of widely spaced bands around the stems forming a kind of pagoda; California.

- *She wrote a short paragraph that included “collinsia heterophylla.”*
- *The article explained what “collinsia heterophylla” means with a simple example.*

---

collinsia parviflora *(noun)*

Small widely branching western plant with tiny blue-and-white flowers; British Columbia to Ontario and south to California and Colorado.

- *He looked up “collinsia parviflora” because he had never seen it before.*
- *She wrote a short paragraph that included “collinsia parviflora.”*

---

collinsia verna *(noun)*

Eastern United States plant with whorls of blue-and-white flowers.

- *In class, the teacher used “collinsia verna” to mean eastern united states plant with whorls of....*
- *Understanding “collinsia verna” helps you talk about this topic clearly.*

---

collinsonia *(noun)*

Small genus of perennial erect or spreading aromatic herbs; United States.

- *The article explained what “collinsonia” means with a simple example.*
- *In class, the teacher used “collinsonia” to mean small genus of perennial erect or spreading....*

---

collinsonia canadensis *(noun)*

Erect perennial strong-scented with serrate pointed leaves and a loose panicle of yellowish flowers; the eastern United States.

- *He looked up “collinsonia canadensis” because he had never seen it before.*
- *She wrote a short paragraph that included “collinsonia canadensis.”*

---

coloradillo *(noun)*

Handsome shrub with showy orange to scarlet or crimson flowers; Florida and West Indies to Mexico and Brazil.

- *Understanding “coloradillo” helps you talk about this topic clearly.*
- *They discussed “coloradillo” during the group presentation.*

---

colubrina *(noun)*

Mostly tropical American shrubs or small trees with small yellowish flowers and yellow or red fruits.

- *They discussed “colubrina” during the group presentation.*
- *She wrote a short paragraph that included “colubrina.”*

---

columnea *(noun)*

Tropical plant having thick hairy somewhat toothed leaves and solitary or clustered yellow to scarlet flowers; many cultivated for their flowers and ornamental foliage.

- *In class, the teacher used “columnea” to mean tropical plant having thick hairy somewhat toothed....*
- *He looked up “columnea” because he had never seen it before.*

---

colutea *(noun)*

Small genus of Eurasian shrubs with yellow flowers and bladdery pods.

- *They discussed “colutea” during the group presentation.*
- *She wrote a short paragraph that included “colutea.”*

---

colutea arborescens *(noun)*

Yellow-flowered European shrub cultivated for its succession of yellow flowers and very inflated bladdery pods and as a source of wildlife food.

- *In class, the teacher used “colutea arborescens” to mean yellow-flowered european shrub cultivated for its....*
- *The article explained what “colutea arborescens” means with a simple example.*

---

comandra *(noun)*

Small genus of chiefly North American parasitic plants.

- *The article explained what “comandra” means with a simple example.*
- *She wrote a short paragraph that included “comandra.”*

---

comandra pallida *(noun)*

Woody creeping parasite of western North America having numerous thick powdery leaves and panicles of small dull-white flowers.

- *In class, the teacher used “comandra pallida” to mean woody creeping parasite of western north america....*
- *The article explained what “comandra pallida” means with a simple example.*

combretaceae *(noun)*

A family of tropical trees and shrubs of the order Myrtales.

- *She wrote a short paragraph that included "combretaceae."*
- *He looked up "combretaceae" because he had never seen it before.*

combretum appiculatum *(noun)*

Small deciduous tree of the Transvaal having spikes of yellow flowers.

- *They discussed "combretum appiculatum" during the group presentation.*
- *The article explained what "combretum appiculatum" means with a simple example.*

combretum bracteosum *(noun)*

Ornamental African shrub or climber with red flowers.

- *She wrote a short paragraph that included "combretum bracteosum."*
- *He looked up "combretum bracteosum" because he had never seen it before.*

combretum erythrophyllum *(noun)*

Small South African tree having creamy yellow fragrant flowers usually growing on stream banks.

- *He looked up "combretum erythrophyllum" because he had never seen it before.*
- *They discussed "combretum erythrophyllum" during the group presentation.*

commelina *(noun)*

Any plant of the genus Commelina.

- *She wrote a short paragraph that included "commelina."*
- *They discussed "commelina" during the group presentation.*

commelinaceae *(noun)*

Large widely distributed family of chiefly perennial herbs or climbers: spiderworts.

- *The article explained what "commelinaceae" means with a simple example.*
- *She wrote a short paragraph that included "commelinaceae."*

commelinales *(noun)*

An order of monocotyledonous herbs.

- *She wrote a short paragraph that included "commelinales."*
- *He looked up "commelinales" because he had never seen it before.*

commelinidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises about 19,000 species in 25 families of mostly terrestrial herbs especially of moist places including: Cyperaceae; Gramineae; Bromeliaceae; and Zingiberaceae.

- *She wrote a short paragraph that included "commelinidae."*
- *He looked up "commelinidae" because he had never seen it before.*

commiphora meccanensis *(noun)*

Small evergreen tree of Africa and Asia; leaves have a strong aromatic odor when bruised.

- *Understanding "commiphora meccanensis" helps you talk about this topic clearly.*
- *He looked up "commiphora meccanensis" because he had never seen it before.*

common allamanda *(noun)*

Vigorous evergreen climbing plant of South America having glossy leathery foliage and golden yellow flowers.

- *Understanding "common allamanda" helps you talk about this topic clearly.*
- *He looked up "common allamanda" because he had never seen it before.*

common amsinckia *(noun)*

Annual of western United States with coiled spikes of yellow-orange coiled flowers.

- *They discussed "common amsinckia" during the group presentation.*
- *The article explained what "common amsinckia" means with a simple example.*

common calamint *(noun)*

Mint-scented perennial of central and southern Europe.

- *He looked up "common calamint" because he had never seen it before.*
- *In class, the teacher used "common calamint" to mean mint-scented perennial of central and southern europe.*

---

common milkwort *(noun)*

Small European perennial with numerous branches having racemes of blue, pink or white flowers; formerly reputed to promote human lactation.

- *He looked up "common milkwort" because he had never seen it before.*
- *She wrote a short paragraph that included "common milkwort."*

---

common moonseed *(noun)*

A woody vine of eastern North America having large oval leaves and small white flowers and purple to blue-black fruits.

- *The article explained what "common moonseed" means with a simple example.*
- *In class, the teacher used "common moonseed" to mean a woody vine of eastern north america having large....*

---

common moonwort *(noun)*

Of America and Eurasia and Australia.

- *He looked up "common moonwort" because he had never seen it before.*
- *In class, the teacher used "common moonwort" to mean of america and eurasia and australia.*

---

common nardoo *(noun)*

Australian clover fern.

- *He looked up "common nardoo" because he had never seen it before.*
- *Understanding "common nardoo" helps you talk about this topic clearly.*

---

common polypody *(noun)*

Mat-forming lithophytic or terrestrial fern with creeping rootstocks and large pinnatifid fronds found throughout North America and Europe and Africa and east Asia.

- *They discussed "common polypody" during the group presentation.*
- *Understanding "common polypody" helps you talk about this topic clearly.*

---

common tarweed *(noun)*

California annual having red-brown spots near the base of its yellow flower rays.

- *She wrote a short paragraph that included "common tarweed."*
- *They discussed "common tarweed" during the group presentation.*

---

common vetchling *(noun)*

Scrambling perennial Eurasian wild pea having yellowish flowers and compressed seed pods; cultivated for forage.

- *She wrote a short paragraph that included "common vetchling."*
- *He looked up "common vetchling" because he had never seen it before.*

---

common wolffia *(noun)*

Smallest flowering plants known; of the Americas.

- *The article explained what "common wolffia" means with a simple example.*
- *They discussed "common wolffia" during the group presentation.*

---

comptonia *(noun)*

One species: sweet fern.

- *He looked up "comptonia" because he had never seen it before.*
- *She wrote a short paragraph that included "comptonia."*

---

comptonia asplenifolia *(noun)*

Deciduous shrub of eastern North America with sweet scented fernlike leaves and tiny white flowers.

- *They discussed "comptonia asplenifolia" during the group presentation.*
- *In class, the teacher used "comptonia asplenifolia" to mean deciduous shrub of eastern north america with sweet....*

---

comptonia peregrina *(noun)*

Deciduous shrub of eastern North America with sweet scented fernlike leaves and tiny white flowers.

- *The article explained what "comptonia peregrina" means with a simple example.*
- *In class, the teacher used "comptonia peregrina" to mean deciduous shrub of eastern north america with sweet....*

---

conacaste *(noun)*

Tropical South American tree having a wide-spreading crown of bipinnate leaves and coiled ear-shaped fruits; grown for shade and ornament as well as valuable timber.

- *The article explained what "conacaste" means with a simple example.*
- *They discussed "conacaste" during the group presentation.*

---

conessi *(noun)*

Tropical Asian tree with hard white wood and bark formerly used as a remedy for dysentery and diarrhea.

- *In class, the teacher used "conessi" to mean tropical asian tree with hard white wood and bark....*
- *The article explained what "conessi" means with a simple example.*

---

congoo mallee *(noun)*

Small shrubby mallee.

- *They discussed "congoo mallee" during the group presentation.*
- *He looked up "congoo mallee" because he had never seen it before.*

---

conic verpa *(noun)*

A morel with a fertile portion that has a relatively smooth surface; the stalk is fragile.

- *In class, the teacher used "conic verpa" to mean a morel with a fertile portion that has a....*
- *They discussed "conic verpa" during the group presentation.*

---

conic waxycap *(noun)*

A fungus having an acutely conic cap and dry stalks.

- *She wrote a short paragraph that included "conic waxycap."*
- *Understanding "conic waxycap" helps you talk about this topic clearly.*

---

conidiophore *(noun)*

A specialized fungal hypha that produces conidia.

- *They discussed "conidiophore" during the group presentation.*
- *In class, the teacher used "conidiophore" to mean a specialized fungal hypha that produces conidia.*

---

conidiospore *(noun)*

An asexually produced fungal spore formed on a conidiophore.

- *He looked up "conidiospore" because he had never seen it before.*
- *Understanding "conidiospore" helps you talk about this topic clearly.*

---

conidium *(noun)*

An asexually produced fungal spore formed on a conidiophore.

- *He looked up "conidium" because he had never seen it before.*
- *They discussed "conidium" during the group presentation.*

---

coniferales *(noun)*

Profusely branching and chiefly evergreen trees and some shrubs having narrow or needlelike leaves.

- *They discussed "coniferales" during the group presentation.*
- *In class, the teacher used "coniferales" to mean profusely branching and chiefly evergreen trees and....*

---

coniogramme *(noun)*

Terrestrial ferns of Pacific islands and Asia.

- *They discussed "coniogramme" during the group presentation.*
- *She wrote a short paragraph that included "coniogramme."*

---

coniogramme japonica *(noun)*

Fast-growing sturdy Japanese fern; cultivated for their attractive broad dark-green pinnate fronds.

- *He looked up "coniogramme japonica" because he had never seen it before.*
- *She wrote a short paragraph that included "coniogramme japonica."*

connaraceae *(noun)*

Mostly tropical climbing shrubs or small trees; closely related to Leguminosae.

- *Understanding "connaraceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "connaraceae."*

connarus *(noun)*

Large genus of tropical trees and shrubs; type genus of the Connaraceae.

- *The article explained what "connarus" means with a simple example.*
- *Understanding "connarus" helps you talk about this topic clearly.*

connarus guianensis *(noun)*

Tropical American and east African tree with strikingly marked hardwood used in cabinetwork.

- *The article explained what "connarus guianensis" means with a simple example.*
- *Understanding "connarus guianensis" helps you talk about this topic clearly.*

conocarpus *(noun)*

Monotypic genus of tropical American trees: button tree.

- *They discussed "conocarpus" during the group presentation.*
- *The article explained what "conocarpus" means with a simple example.*

conocarpus erectus *(noun)*

Evergreen tree or shrub with fruit resembling buttons and yielding heavy hard compact wood.

- *Understanding "conocarpus erectus" helps you talk about this topic clearly.*
- *In class, the teacher used "conocarpus erectus" to mean evergreen tree or shrub with fruit resembling....*

conoclinium coelestinum *(noun)*

Rhizomatous plant of central and southeastern United States and West Indies having large showy heads of clear blue flowers; sometimes placed in genus Eupatorium.

- *Understanding "conoclinium coelestinum" helps you talk about this topic clearly.*
- *The article explained what "conoclinium coelestinum" means with a simple example.*

conopodium *(noun)*

A genus of dicotyledonous plants of the family Umbelliferae.

- *They discussed "conopodium" during the group presentation.*
- *The article explained what "conopodium" means with a simple example.*

conopodium denudatum *(noun)*

A common European plant having edible tubers with the flavor of roasted chestnuts.

- *Understanding "conopodium denudatum" helps you talk about this topic clearly.*
- *He looked up "conopodium denudatum" because he had never seen it before.*

conospermum *(noun)*

Australian shrubs (some trees) with flowers in dense spikes: smoke bush.

- *Understanding "conospermum" helps you talk about this topic clearly.*
- *The article explained what "conospermum" means with a simple example.*

conradina *(noun)*

Small genus of low aromatic shrubs of southeastern United States.

- *She wrote a short paragraph that included "conradina."*
- *He looked up "conradina" because he had never seen it before.*

conradina glabra *(noun)*

Small shrub of Apalachicola River area in southeastern United States having highly aromatic pinkish flowers; a threatened species.

- *Understanding "conradina glabra" helps you talk about this topic clearly.*
- *They discussed "conradina glabra" during the group presentation.*

convallaria *(noun)*

Sometimes placed in family Convallariaceae: lily of the valley.

- *In class, the teacher used "convallaria" to mean sometimes placed in family convallariaceae: lily of....*
- *The article explained what "convallaria" means with a simple example.*

---

convallaria majalis *(noun)*

Low-growing perennial plant having usually two large oblong lanceolate leaves and a raceme of small fragrant nodding bell-shaped flowers followed by scarlet berries.

- *She wrote a short paragraph that included "convallaria majalis."*
- *He looked up "convallaria majalis" because he had never seen it before.*

---

convallariaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *Understanding "convallariaceae" helps you talk about this topic clearly.*
- *They discussed "convallariaceae" during the group presentation.*

---

convolvulus scammonia *(noun)*

Twining plant of Asia Minor having cream-colored to purple flowers and long thick roots yielding a cathartic resin.

- *Understanding "convolvulus scammonia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "convolvulus scammonia."*

---

conyza *(noun)*

Common American weed or wildflower.

- *In class, the teacher used "conyza" to mean common american weed or wildflower.*
- *Understanding "conyza" helps you talk about this topic clearly.*

---

conyza canadensis *(noun)*

Common North American weed with linear leaves and small discoid heads of yellowish flowers; widely naturalized throughout temperate regions; sometimes placed in genus Erigeron.

- *She wrote a short paragraph that included "conyza canadensis."*
- *Understanding "conyza canadensis" helps you talk about this topic clearly.*

---

coolwart *(noun)*

Stoloniferous white-flowered spring-blooming woodland plant.

- *They discussed "coolwart" during the group presentation.*
- *The article explained what "coolwart" means with a simple example.*

---

coontie *(noun)*

Small tough woody zamia of Florida and West Indies and Cuba; roots and half-buried stems yield an arrowroot.

- *The article explained what "coontie" means with a simple example.*
- *Understanding "coontie" helps you talk about this topic clearly.*

---

copernicia *(noun)*

Slow-growing tropical fan palms.

- *The article explained what "copernicia" means with a simple example.*
- *Understanding "copernicia" helps you talk about this topic clearly.*

---

copernicia alba *(noun)*

South American palm yielding a wax similar to carnauba wax.

- *The article explained what "copernicia alba" means with a simple example.*
- *They discussed "copernicia alba" during the group presentation.*

---

copernicia australis *(noun)*

South American palm yielding a wax similar to carnauba wax.

- *They discussed "copernicia australis" during the group presentation.*
- *She wrote a short paragraph that included "copernicia australis."*

---

copernicia cerifera *(noun)*

Brazilian fan palm having an edible root; source of a useful leaf fiber and a brittle yellowish wax.

- *He looked up "copernicia cerifera" because he had never seen it before.*
- *She wrote a short paragraph that included "copernicia cerifera."*

copernicia prunifera *(noun)*

Brazilian fan palm having an edible root; source of a useful leaf fiber and a brittle yellowish wax.

- *They discussed "copernicia prunifera" during the group presentation.*
- *Understanding "copernicia prunifera" helps you talk about this topic clearly.*

coprinaceae *(noun)*

Used in some classifications for the genus Coprinus.

- *In class, the teacher used "coprinaceae" to mean used in some classifications for the genus coprinus.*
- *The article explained what "coprinaceae" means with a simple example.*

coprinus atramentarius *(noun)*

Having a cap that melts into an inky fluid after spores have matured.

- *She wrote a short paragraph that included "coprinus atramentarius."*
- *He looked up "coprinus atramentarius" because he had never seen it before.*

coprinus comatus *(noun)*

Common edible mushroom having an elongated shaggy white cap and black spores.

- *They discussed "coprinus comatus" during the group presentation.*
- *She wrote a short paragraph that included "coprinus comatus."*

coptis trifolia groenlandica *(noun)*

Low-growing perennial of North America woodlands having trifoliate leaves and yellow rootstock and white flowers.

- *The article explained what "coptis trifolia groenlandica" means with a simple example.*
- *They discussed "coptis trifolia groenlandica" during the group presentation.*

coquilla nut *(noun)*

Nut having a hard hazel-brown shell used like vegetable ivory.

- *The article explained what "coquilla nut" means with a simple example.*
- *Understanding "coquilla nut" helps you talk about this topic clearly.*

coracan *(noun)*

East Indian cereal grass whose seed yield a somewhat bitter flour, a staple in the Orient.

- *She wrote a short paragraph that included "coracan."*
- *The article explained what "coracan" means with a simple example.*

corakan *(noun)*

East Indian cereal grass whose seed yield a somewhat bitter flour, a staple in the Orient.

- *The article explained what "corakan" means with a simple example.*
- *They discussed "corakan" during the group presentation.*

coralbells *(noun)*

Perennial plant of the western United States having bright red flowers in feathery spikes; used as an ornamental.

- *The article explained what "coralbells" means with a simple example.*
- *In class, the teacher used "coralbells" to mean perennial plant of the western united states having....*

coralberry *(noun)*

Shrub with coral-red berries; Japan to northern India.

- *The article explained what "coralberry" means with a simple example.*
- *She wrote a short paragraph that included "coralberry."*

corallorhiza *(noun)*

Genus of leafless root-parasitic orchids having small purplish or yellowish racemose flowers with lobed lips; widely distributed in temperate regions.

- *In class, the teacher used "corallorhiza" to mean genus of leafless root-parasitic orchids having....*
- *Understanding "corallorhiza" helps you talk about this topic clearly.*

corallorhiza maculata *(noun)*

Common coral root having yellowish- or reddish- or purplish-brown leafless stems bearing loose racemes of similarly colored flowers with white purple-spotted lips; Guatemala to Canada.

- *Understanding "corallorhiza maculata" helps you talk about this topic clearly.*
- *They discussed "corallorhiza maculata" during the group presentation.*

---

corallorhiza striata *(noun)*

Nearly leafless wildflower with erect reddish-purple stems bearing racemes of pale pinkish and brownish-striped flowers; western Canada to Mexico.

- *In class, the teacher used "corallorhiza striata" to mean nearly leafless wildflower with erect....*
- *He looked up "corallorhiza striata" because he had never seen it before.*

---

corallorhiza trifida *(noun)*

Plant having clumps of nearly leafless pale yellowish to greenish stems bearing similarly colored flowers with white lower lips; northern New Mexico north through South Dakota and Washington to Alaska.

- *The article explained what "corallorhiza trifida" means with a simple example.*
- *In class, the teacher used "corallorhiza trifida" to mean plant having clumps of nearly leafless pale....*

---

coralroot *(noun)*

European bittercress having a knotted white rootstock.

- *The article explained what "coralroot" means with a simple example.*
- *In class, the teacher used "coralroot" to mean european bittercress having a knotted white rootstock.*

---

coralwood *(noun)*

East Indian tree with racemes of yellow-white flowers; cultivated as an ornamental.

- *He looked up "coralwood" because he had never seen it before.*
- *She wrote a short paragraph that included "coralwood."*

---

coralwort *(noun)*

European bittercress having a knotted white rootstock.

- *They discussed "coralwort" during the group presentation.*
- *She wrote a short paragraph that included "coralwort."*

---

cordaitaceae *(noun)*

Chiefly Paleozoic plants; Cordaites is the chief and typical genus.

- *She wrote a short paragraph that included "cordaitaceae."*
- *The article explained what "cordaitaceae" means with a simple example.*

---

cordaitales *(noun)*

Extinct plants having tall arborescent trunks comparable to or more advanced than cycads; known from the Pennsylvanian period; probably extinct since the Mesozoic era.

- *They discussed "cordaitales" during the group presentation.*
- *In class, the teacher used "cordaitales" to mean extinct plants having tall arborescent trunks....*

---

cordaites *(noun)*

Tall Paleozoic trees superficially resembling modern screw pines; structurally intermediate in some ways between cycads and conifers.

- *He looked up "cordaites" because he had never seen it before.*
- *She wrote a short paragraph that included "cordaites."*

---

cordia alliodora *(noun)*

Large tropical American tree of the genus Cordia grown for its abundant creamy white flowers and valuable wood.

- *She wrote a short paragraph that included "cordia alliodora."*
- *They discussed "cordia alliodora" during the group presentation.*

---

cordia gerascanthus *(noun)*

Tropical American timber tree.

- *Understanding "cordia gerascanthus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cordia gerascanthus."*

---

coriandrum *(noun)*

Small genus of annual Mediterranean herbs.

- *Understanding "coriandrum" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “coriandrum.”*

---

coriandrum sativum *(noun)*

Old World herb with aromatic leaves and seed resembling parsley.

- *She wrote a short paragraph that included “coriandrum sativum.”*
- *He looked up “coriandrum sativum” because he had never seen it before.*

---

corkwood *(noun)*

Very small deciduous dioecious tree or shrub of damp habitats in southeastern United States having extremely light wood.

- *Understanding “corkwood” helps you talk about this topic clearly.*
- *They discussed “corkwood” during the group presentation.*

---

corkwood family *(noun)*

Coextensive with the genus Leitneria; commonly isolated in a distinct order.

- *He looked up “corkwood family” because he had never seen it before.*
- *They discussed “corkwood family” during the group presentation.*

---

corkwood tree *(noun)*

Very small deciduous dioecious tree or shrub of damp habitats in southeastern United States having extremely light wood.

- *He looked up “corkwood tree” because he had never seen it before.*
- *They discussed “corkwood tree” during the group presentation.*

---

cormous plant *(noun)*

Plant growing from a corm.

- *She wrote a short paragraph that included “cormous plant.”*
- *Understanding “cormous plant” helps you talk about this topic clearly.*

---

corn mayweed *(noun)*

European white-flowered weed naturalized in North America.

- *Understanding “corn mayweed” helps you talk about this topic clearly.*
- *He looked up “corn mayweed” because he had never seen it before.*

---

corn spurrey *(noun)*

Small European weed with whorled leaves and white flowers.

- *In class, the teacher used “corn spurrey” to mean small european weed with whorled leaves and white....*
- *Understanding “corn spurrey” helps you talk about this topic clearly.*

---

corn spurry *(noun)*

Small European weed with whorled leaves and white flowers.

- *She wrote a short paragraph that included “corn spurry.”*
- *They discussed “corn spurry” during the group presentation.*

---

cornaceae *(noun)*

A rosid dicot family of the order Umbellales including: genera Aucuba, Cornus, Corokia, Curtisia, Griselinia, Helwingia.

- *They discussed “cornaceae” during the group presentation.*
- *She wrote a short paragraph that included “cornaceae.”*

---

cornhusk *(noun)*

The husk of an ear of corn.

- *She wrote a short paragraph that included “cornhusk.”*
- *The article explained what “cornhusk” means with a simple example.*

---

cornsilk *(noun)*

Each of the long filamentous styles that grow as a silky tuft at the tip of an ear of Indian corn.

- *They discussed “cornsilk” during the group presentation.*
- *She wrote a short paragraph that included “cornsilk.”*

---

cornsmut *(noun)*

A smut fungus attacking Indian corn.

- *The article explained what "cornsmut" means with a simple example.*
- *In class, the teacher used "cornsmut" to mean a smut fungus attacking indian corn.*

---

cornus amomum *(noun)*

Shrub of eastern North America having purplish stems and blue fruit.

- *In class, the teacher used "cornus amomum" to mean shrub of eastern north america having purplish....*
- *Understanding "cornus amomum" helps you talk about this topic clearly.*

---

corokia *(noun)*

Evergreen shrubs with intricately twisted wiry stems that in summer are smothered in small yellow flowers; grows in New Zealand.

- *In class, the teacher used "corokia" to mean evergreen shrubs with intricately twisted wiry....*
- *The article explained what "corokia" means with a simple example.*

---

coronilla *(noun)*

Any of various plants of the genus Coronilla having purple or pink or yellow flowers in long axillary heads or umbels.

- *The article explained what "coronilla" means with a simple example.*
- *Understanding "coronilla" helps you talk about this topic clearly.*

---

coronilla varia *(noun)*

European herb resembling vetch; naturalized in the eastern United States; having umbels of pink-and-white flowers and sharp-angled pods.

- *Understanding "coronilla varia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "coronilla varia."*

---

corozo *(noun)*

Any of several tropical American palms bearing corozo nuts.

- *Understanding "corozo" helps you talk about this topic clearly.*
- *The article explained what "corozo" means with a simple example.*

---

corozo palm *(noun)*

Any of several tropical American palms bearing corozo nuts.

- *He looked up "corozo palm" because he had never seen it before.*
- *They discussed "corozo palm" during the group presentation.*

---

cortaderia *(noun)*

Tall ornamental grasses of South America and New Zealand and New Guinea: pampas grass.

- *He looked up "cortaderia" because he had never seen it before.*
- *Understanding "cortaderia" helps you talk about this topic clearly.*

---

cortaderia richardii *(noun)*

Tall grass of New Zealand grown for plumelike flower heads.

- *She wrote a short paragraph that included "cortaderia richardii."*
- *They discussed "cortaderia richardii" during the group presentation.*

---

cortaderia selloana *(noun)*

Tall perennial grass of pampas of South America having silvery plumes and growing in large dense clumps.

- *She wrote a short paragraph that included "cortaderia selloana."*
- *He looked up "cortaderia selloana" because he had never seen it before.*

---

corticium salmonicolor *(noun)*

Fungus causing pink disease in citrus and coffee and rubber trees etc.

- *She wrote a short paragraph that included "corticium salmonicolor."*
- *He looked up "corticium salmonicolor" because he had never seen it before.*

---

cortinariaceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *Understanding "cortinariaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cortinariaceae."*

---

cortinarius armillatus *(noun)*

A fungus with large tawny caps and pale cinnamon gills and a red band of veil around the stalk; usually found near birch trees.

- *They discussed "cortinarius armillatus" during the group presentation.*
- *He looked up "cortinarius armillatus" because he had never seen it before.*

---

cortinarius atkinsonianus *(noun)*

An edible fungus with a slimy viscid cap that is initially yellow but turns olive and then tawny; flesh is lavender.

- *He looked up "cortinarius atkinsonianus" because he had never seen it before.*
- *She wrote a short paragraph that included "cortinarius atkinsonianus."*

---

cortinarius corrugatus *(noun)*

A fungus with a viscid wrinkled tawny cap; the stalk has a basal bulb that diminishes as the stalk elongates; the gills are dark violet at first but soon turn brown.

- *He looked up "cortinarius corrugatus" because he had never seen it before.*
- *She wrote a short paragraph that included "cortinarius corrugatus."*

---

cortinarius semisanguineus *(noun)*

A fungus with a dry brown cap and rusty red gills and a yellowish stalk.

- *She wrote a short paragraph that included "cortinarius semisanguineus."*
- *He looked up "cortinarius semisanguineus" because he had never seen it before.*

---

cortinarius subfoetidus *(noun)*

A fungus with a sticky lavender cap and stalk that whitish above and covered with a silky lavender sheath.

- *Understanding "cortinarius subfoetidus" helps you talk about this topic clearly.*
- *They discussed "cortinarius subfoetidus" during the group presentation.*

---

cortinarius violaceus *(noun)*

A fungus that is violet overall with a squamulose cap.

- *He looked up "cortinarius violaceus" because he had never seen it before.*
- *They discussed "cortinarius violaceus" during the group presentation.*

---

coryanthes *(noun)*

Small genus of tropical American epiphytic or lithophytic orchids.

- *Understanding "coryanthes" helps you talk about this topic clearly.*
- *The article explained what "coryanthes" means with a simple example.*

---

corydalis claviculata *(noun)*

Annual vine with decompound leaves and racemes of yellow and pink flowers.

- *The article explained what "corydalis claviculata" means with a simple example.*
- *Understanding "corydalis claviculata" helps you talk about this topic clearly.*

---

corylaceae *(noun)*

Used in some classification systems for the genus Corylus.

- *He looked up "corylaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "corylaceae."*

---

corylopsis *(noun)*

Small genus of deciduous shrubs of temperate regions of Asia.

- *She wrote a short paragraph that included "corylopsis."*
- *Understanding "corylopsis" helps you talk about this topic clearly.*

---

corypha *(noun)*

Large fan palms of tropical Asia to Australia.

- *Understanding "corypha" helps you talk about this topic clearly.*
- *The article explained what "corypha" means with a simple example.*

corypha gebanga *(noun)*

Large-leaved palm of Malay to Philippines and northern Australia; leaves used for thatching or plaiting into containers.

- *They discussed "corypha gebanga" during the group presentation.*
- *She wrote a short paragraph that included "corypha gebanga."*

corypha umbraculifera *(noun)*

Tall palm of southern India and Sri Lanka with gigantic leaves used as umbrellas and fans or cut into strips for writing paper.

- *Understanding "corypha umbraculifera" helps you talk about this topic clearly.*
- *The article explained what "corypha umbraculifera" means with a simple example.*

corypha utan *(noun)*

Large-leaved palm of Malay to Philippines and northern Australia; leaves used for thatching or plaiting into containers.

- *In class, the teacher used "corypha utan" to mean large-leaved palm of malay to philippines and....*
- *Understanding "corypha utan" helps you talk about this topic clearly.*

coryphantha *(noun)*

A cactus of the genus Coryphantha.

- *The article explained what "coryphantha" means with a simple example.*
- *They discussed "coryphantha" during the group presentation.*

cosmea *(noun)*

Any of various mostly Mexican herbs of the genus Cosmos having radiate heads of variously colored flowers and pinnate leaves; popular fall-blooming annuals.

- *Understanding "cosmea" helps you talk about this topic clearly.*
- *They discussed "cosmea" during the group presentation.*

costusroot *(noun)*

Annual herb of the eastern Himalayas (Kashmir) having purple florets and a fragrant root that yields a volatile oil used in perfumery and for preserving furs.

- *The article explained what "costusroot" means with a simple example.*
- *They discussed "costusroot" during the group presentation.*

cotinus coggygria *(noun)*

Old World shrub having large plumes of yellowish feathery flowers resembling puffs of smoke.

- *The article explained what "cotinus coggygria" means with a simple example.*
- *In class, the teacher used "cotinus coggygria" to mean old world shrub having large plumes of yellowish....*

cotinus obovatus *(noun)*

Shrubby tree of southern United States having large plumes of feathery flowers resembling puffs of smoke.

- *Understanding "cotinus obovatus" helps you talk about this topic clearly.*
- *The article explained what "cotinus obovatus" means with a simple example.*

cotoneaster dammeri *(noun)*

Climbing evergreen shrub with white flowers and red berries; often used as ground cover.

- *Understanding "cotoneaster dammeri" helps you talk about this topic clearly.*
- *The article explained what "cotoneaster dammeri" means with a simple example.*

cotoneaster horizontalis *(noun)*

Deciduous flat-growing shrub with a fanned herringbone pattern and having reddish flowers and orange-red berries; used as a ground cover.

- *The article explained what "cotoneaster horizontalis" means with a simple example.*
- *In class, the teacher used "cotoneaster horizontalis" to mean deciduous flat-growing shrub with a fanned....*

cottonweed *(noun)*

An American everlasting having foliage with soft wooly hairs and corymbose heads with pearly white bracts.

- *He looked up "cottonweed" because he had never seen it before.*
- *Understanding "cottonweed" helps you talk about this topic clearly.*

cotula *(noun)*

Cosmopolitan herbs especially southern hemisphere; many used as ground covers.

- *In class, the teacher used "cotula" to mean cosmopolitan herbs especially southern hemisphere;....*
- *They discussed "cotula" during the group presentation.*

---

cotula coronopifolia *(noun)*

South African herb with golden-yellow globose flower heads; naturalized in moist areas along coast of California; cultivated as an ornamental.

- *In class, the teacher used "cotula coronopifolia" to mean south african herb with golden-yellow globose....*
- *The article explained what "cotula coronopifolia" means with a simple example.*

---

coumara nut *(noun)*

Fragrant black nutlike seeds of the tonka bean tree; used in perfumes and medicines and as a substitute for vanilla.

- *The article explained what "coumara nut" means with a simple example.*
- *In class, the teacher used "coumara nut" to mean fragrant black nutlike seeds of the tonka bean....*

---

coumarouna *(noun)*

Tropical American trees: tonka beans.

- *Understanding "coumarouna" helps you talk about this topic clearly.*
- *They discussed "coumarouna" during the group presentation.*

---

coumarouna odorata *(noun)*

Tall tropical South American tree having pulpy egg-shaped pods of fragrant black almond-shaped seeds used for flavoring.

- *In class, the teacher used "coumarouna odorata" to mean tall tropical south american tree having pulpy....*
- *Understanding "coumarouna odorata" helps you talk about this topic clearly.*

---

courbaril *(noun)*

West Indian locust tree having pinnate leaves and panicles of large white or purplish flowers; yields very hard tough wood.

- *The article explained what "courbaril" means with a simple example.*
- *Understanding "courbaril" helps you talk about this topic clearly.*

---

courbaril copal *(noun)*

Resin from the courbaril tree.

- *He looked up "courbaril copal" because he had never seen it before.*
- *In class, the teacher used "courbaril copal" to mean resin from the courbaril tree.*

---

cowage *(noun)*

The annual woody vine of Asia having long clusters of purplish flowers and densely hairy pods; cultivated in southern United States for green manure and grazing.

- *In class, the teacher used "cowage" to mean the annual woody vine of asia having long clusters....*
- *Understanding "cowage" helps you talk about this topic clearly.*

---

cowherb *(noun)*

European annual with pale rose-colored flowers; cultivated flower or self-sown grainfield weed; introduced in North America; sometimes classified as a soapwort.

- *Understanding "cowherb" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cowherb."*

---

cowpen daisy *(noun)*

Coarse greyish-green annual yellow-flowered herb; southwestern United States to Mexico.

- *He looked up "cowpen daisy" because he had never seen it before.*
- *In class, the teacher used "cowpen daisy" to mean coarse greyish-green annual yellow-flowered herb;....*

---

coyol *(noun)*

Tropical American palm having edible nuts and yielding a useful fiber.

- *He looked up "coyol" because he had never seen it before.*
- *She wrote a short paragraph that included "coyol."*

---

coyol palm *(noun)*

Tropical American palm having edible nuts and yielding a useful fiber.

- *In class, the teacher used "coyol palm" to mean tropical american palm having edible nuts and....*

- *They discussed "coyol palm" during the group presentation.*

crackerberry *(noun)*

Creeping perennial herb distinguished by red berries and clustered leaf whorls at the tips of shoots; Greenland to Alaska.

- *She wrote a short paragraph that included "crackerberry."*
- *They discussed "crackerberry" during the group presentation.*

crampbark *(noun)*

Deciduous thicket-forming Old World shrub with clusters of white flowers and small bright red berries.

- *They discussed "crampbark" during the group presentation.*
- *Understanding "crampbark" helps you talk about this topic clearly.*

craspedia *(noun)*

Herbs of Australia and New Zealand.

- *He looked up "craspedia" because he had never seen it before.*
- *She wrote a short paragraph that included "craspedia."*

crassulaceae *(noun)*

Succulent shrubs and herbs.

- *In class, the teacher used "crassulaceae" to mean succulent shrubs and herbs.*
- *Understanding "crassulaceae" helps you talk about this topic clearly.*

crataegus aestivalis *(noun)*

Hawthorn of southern United States bearing a juicy, acidic, scarlet fruit that is often used in jellies or preserves.

- *He looked up "crataegus aestivalis" because he had never seen it before.*
- *She wrote a short paragraph that included "crataegus aestivalis."*

crataegus apiifolia *(noun)*

Southern United States hawthorn with pinnately lobed leaves.

- *She wrote a short paragraph that included "crataegus apiifolia."*
- *He looked up "crataegus apiifolia" because he had never seen it before.*

crataegus biltmoreana *(noun)*

Common shrub or small tree of the eastern United States having few thorns and white flowers in corymbs followed by bright orange-red berries.

- *The article explained what "crataegus biltmoreana" means with a simple example.*
- *She wrote a short paragraph that included "crataegus biltmoreana."*

crataegus calpodendron *(noun)*

Erect and almost thornless American hawthorn with somewhat pear-shaped berries.

- *Understanding "crataegus calpodendron" helps you talk about this topic clearly.*
- *He looked up "crataegus calpodendron" because he had never seen it before.*

crataegus marshallii *(noun)*

Southern United States hawthorn with pinnately lobed leaves.

- *She wrote a short paragraph that included "crataegus marshallii."*
- *He looked up "crataegus marshallii" because he had never seen it before.*

crataegus monogyna *(noun)*

European hawthorn having deeply cleft leaves and bright red fruits; widely cultivated in many varieties and often grown as impenetrable hedges; established as an escape in eastern North America.

- *The article explained what "crataegus monogyna" means with a simple example.*
- *Understanding "crataegus monogyna" helps you talk about this topic clearly.*

crataegus oxyacantha *(noun)*

Evergreen hawthorn of southeastern Europe.

- *They discussed "crataegus oxyacantha" during the group presentation.*
- *In class, the teacher used "crataegus oxyacantha" to mean evergreen hawthorn of southeastern europe.*

crataegus oxycantha *(noun)*

Thorny Eurasian shrub of small tree having dense clusters of white to scarlet flowers followed by deep red berries; established as an escape in eastern North America.

- *He looked up "crataegus oxycantha" because he had never seen it before.*
- *They discussed "crataegus oxycantha" during the group presentation.*

crataegus pedicellata *(noun)*

American red-fruited hawthorn with dense corymbs of pink-red flowers.

- *They discussed "crataegus pedicellata" during the group presentation.*
- *The article explained what "crataegus pedicellata" means with a simple example.*

crateva *(noun)*

Tropical genus of small trees or shrubs.

- *He looked up "crateva" because he had never seen it before.*
- *In class, the teacher used "crateva" to mean tropical genus of small trees or shrubs.*

crazyweed *(noun)*

Any of several leguminous plants of western North America causing locoism in livestock.

- *Understanding "crazyweed" helps you talk about this topic clearly.*
- *He looked up "crazyweed" because he had never seen it before.*

creamcups *(noun)*

California plant with small pale yellow flowers.

- *The article explained what "creamcups" means with a simple example.*
- *Understanding "creamcups" helps you talk about this topic clearly.*

creashak *(noun)*

Evergreen mat-forming shrub of North America and northern Eurasia having small white flowers and red berries; leaves turn red in autumn.

- *In class, the teacher used "creashak" to mean evergreen mat-forming shrub of north america and....*
- *The article explained what "creashak" means with a simple example.*

crescentia *(noun)*

A genus of tropical American trees of the family Bignoniaceae; has a short trunk and crooked limbs and drooping branches.

- *She wrote a short paragraph that included "crescentia."*
- *The article explained what "crescentia" means with a simple example.*

crescentia cujete *(noun)*

Tropical American evergreen that produces large round gourds.

- *She wrote a short paragraph that included "crescentia cujete."*
- *They discussed "crescentia cujete" during the group presentation.*

crinkleroot *(noun)*

North American herb with pungent scaly or toothed roots.

- *Understanding "crinkleroot" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "crinkleroot."*

crocanthemum canadense *(noun)*

Perennial of the eastern United States having early solitary yellow flowers followed by late petalless flowers; so-called because ice crystals form on it during first frosts.

- *He looked up "crocanthemum canadense" because he had never seen it before.*
- *She wrote a short paragraph that included "crocanthemum canadense."*

cronartium *(noun)*

Rust fungi having aecia produced in raised or swollen sori and teliospores borne in waxy columns.

- *In class, the teacher used "cronartium" to mean rust fungi having aecia produced in raised or....*
- *He looked up "cronartium" because he had never seen it before.*

cronartium ribicola *(noun)*

Fungus causing white pine blister rust and having a complex life cycle requiring a plant of genus Ribes as alternate host.

- *They discussed "cronartium ribicola" during the group presentation.*
- *He looked up "cronartium ribicola" because he had never seen it before.*

---

crotal *(noun)*

Any of several lichens of the genus Parmelia from which reddish brown or purple dyes are made.

- *The article explained what "crotal" means with a simple example.*
- *They discussed "crotal" during the group presentation.*

---

crotalaria sagitallis *(noun)*

Tropical American annual herb having an inflated pod in which the ripe seeds rattle.

- *They discussed "crotalaria sagitallis" during the group presentation.*
- *She wrote a short paragraph that included "crotalaria sagitallis."*

---

croton eluteria *(noun)*

West Indian shrub with aromatic bark.

- *He looked up "croton eluteria" because he had never seen it before.*
- *In class, the teacher used "croton eluteria" to mean west indian shrub with aromatic bark.*

---

croton tiglium *(noun)*

Tropical Asiatic shrub; source of croton oil.

- *He looked up "croton tiglium" because he had never seen it before.*
- *They discussed "croton tiglium" during the group presentation.*

---

crottal *(noun)*

Any of several lichens of the genus Parmelia from which reddish brown or purple dyes are made.

- *They discussed "crottal" during the group presentation.*
- *He looked up "crottal" because he had never seen it before.*

---

crottle *(noun)*

Any of several lichens of the genus Parmelia from which reddish brown or purple dyes are made.

- *The article explained what "crottle" means with a simple example.*
- *They discussed "crottle" during the group presentation.*

---

crownbeard *(noun)*

Any plant of the genus Verbesina having clustered white or yellow flower heads.

- *She wrote a short paragraph that included "crownbeard."*
- *He looked up "crownbeard" because he had never seen it before.*

---

cryptocoryne *(noun)*

Any plant of the genus Cryptocoryne; evergreen perennials growing in fresh or brackish water; tropical Asia.

- *The article explained what "cryptocoryne" means with a simple example.*
- *In class, the teacher used "cryptocoryne" to mean any plant of the genus cryptocoryne; evergreen....*

---

cryptogam *(noun)*

Formerly recognized taxonomic group including all flowerless and seedless plants that reproduce by means of spores: ferns, mosses, algae, fungi.

- *He looked up "cryptogam" because he had never seen it before.*
- *In class, the teacher used "cryptogam" to mean formerly recognized taxonomic group including all....*

---

cryptogamia *(noun)*

In former classification systems: one of two major plant divisions, including all plants that do not bear seeds: ferns, mosses, algae, fungi.

- *Understanding "cryptogamia" helps you talk about this topic clearly.*
- *He looked up "cryptogamia" because he had never seen it before.*

---

cryptogramma *(noun)*

Sometimes placed in family Polypodiaceae or Cryptogrammataceae.

- *In class, the teacher used "cryptogramma" to mean sometimes placed in family polypodiaceae or....*

- *He looked up "cryptogramma" because he had never seen it before.*

cryptogramma acrostichoides *(noun)*

Rock-inhabiting fern of northern North America growing in massive tufts and having fronds resembling parsley.

- *In class, the teacher used "cryptogramma acrostichoides" to mean rock-inhabiting fern of northern north america....*
- *The article explained what "cryptogramma acrostichoides" means with a simple example.*

cryptogramma crispa *(noun)*

Fern of Europe and Asia Minor having short slender rhizome and densely tufted bright green fronds resembling parsley.

- *Understanding "cryptogramma crispa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cryptogramma crispa."*

cryptogrammataceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *They discussed "cryptogrammataceae" during the group presentation.*
- *In class, the teacher used "cryptogrammataceae" to mean one of a number of families into which the family....*

cuckooflower *(noun)*

A bitter cress of Europe and America.

- *The article explained what "cuckooflower" means with a simple example.*
- *In class, the teacher used "cuckooflower" to mean a bitter cress of europe and america.*

cuckoopint *(noun)*

Common European arum with lanceolate spathe and short purple spadix; emerges in early spring; source of a starch called arum.

- *She wrote a short paragraph that included "cuckoopint."*
- *The article explained what "cuckoopint" means with a simple example.*

cucumis melo cantalupensis *(noun)*

A variety of muskmelon vine having fruit with a tan rind and orange flesh.

- *He looked up "cucumis melo cantalupensis" because he had never seen it before.*
- *They discussed "cucumis melo cantalupensis" during the group presentation.*

cucumis melo inodorus *(noun)*

Any of a variety of muskmelon vines having fruit with a smooth white rind and white or greenish flesh that does not have a musky smell.

- *She wrote a short paragraph that included "cucumis melo inodorus."*
- *The article explained what "cucumis melo inodorus" means with a simple example.*

cucurbita argyrosperma *(noun)*

Plant bearing squash having globose to ovoid fruit with variously striped grey and green and white warty rinds.

- *He looked up "cucurbita argyrosperma" because he had never seen it before.*
- *In class, the teacher used "cucurbita argyrosperma" to mean plant bearing squash having globose to ovoid fruit....*

cucurbita foetidissima *(noun)*

Perennial vine of dry parts of central and southwestern United States and Mexico having small hard mottled green inedible fruit.

- *She wrote a short paragraph that included "cucurbita foetidissima."*
- *He looked up "cucurbita foetidissima" because he had never seen it before.*

cucurbita maxima turbaniformis *(noun)*

Squash plants bearing hard-shelled fruit shaped somewhat like a turban with a rounded central portion protruding from the end opposite the stem.

- *He looked up "cucurbita maxima turbaniformis" because he had never seen it before.*
- *They discussed "cucurbita maxima turbaniformis" during the group presentation.*

cucurbita pepo melopepo *(noun)*

Any of various usually bushy plants producing fruit that is eaten while immature and before the rind or seeds harden.

- *They discussed "cucurbita pepo melopepo" during the group presentation.*
- *Understanding "cucurbita pepo melopepo" helps you talk about this topic clearly.*

cudweed *(noun)*

Perennial cottony-white herb of southwestern United States.

- *They discussed "cudweed" during the group presentation.*
- *Understanding "cudweed" helps you talk about this topic clearly.*

---

culcita *(noun)*

Includes some plants usually placed in e.g. genus Dicksonia: terrestrial ferns resembling bracken; tropical America; Malaysia to Australia and Polynesia; southwestern Europe and Atlantic islands.

- *The article explained what "culcita" means with a simple example.*
- *In class, the teacher used "culcita" to mean includes some plants usually placed in e.g. genus....*

---

culcita dubia *(noun)*

Resembles Pteridium aquilinum; of Queensland, Australia.

- *In class, the teacher used "culcita dubia" to mean resembles pteridium aquilinum; of queensland, australia.*
- *Understanding "culcita dubia" helps you talk about this topic clearly.*

---

cumfrey *(noun)*

Perennial herbs of Europe and Iran; make rapidly growing groundcover for shaded areas.

- *She wrote a short paragraph that included "cumfrey."*
- *He looked up "cumfrey" because he had never seen it before.*

---

cuminum cyminum *(noun)*

Dwarf Mediterranean annual long cultivated for its aromatic seeds.

- *Understanding "cuminum cyminum" helps you talk about this topic clearly.*
- *The article explained what "cuminum cyminum" means with a simple example.*

---

cumquat *(noun)*

Any of several trees or shrubs of the genus Fortunella bearing small orange-colored edible fruits with thick sweet-flavored skin and sour pulp.

- *In class, the teacher used "cumquat" to mean any of several trees or shrubs of the genus....*
- *They discussed "cumquat" during the group presentation.*

---

cunonia family *(noun)*

Trees or shrubs or climbers; mostly southern hemisphere.

- *She wrote a short paragraph that included "cunonia family."*
- *He looked up "cunonia family" because he had never seen it before.*

---

cunoniaceae *(noun)*

Trees or shrubs or climbers; mostly southern hemisphere.

- *She wrote a short paragraph that included "cunoniaceae."*
- *The article explained what "cunoniaceae" means with a simple example.*

---

cupflower *(noun)*

Any of various plants of the genus Nierembergia having upturned bell-shaped flowers.

- *They discussed "cupflower" during the group presentation.*
- *In class, the teacher used "cupflower" to mean any of various plants of the genus nierembergia....*

---

cupressaceae *(noun)*

Cypresses and junipers and many cedars.

- *Understanding "cupressaceae" helps you talk about this topic clearly.*
- *The article explained what "cupressaceae" means with a simple example.*

---

cupressus abramsiana *(noun)*

Rare California cypress taller than but closely related to gowen cypress and sometimes considered the same species.

- *In class, the teacher used "cupressus abramsiana" to mean rare california cypress taller than but closely....*
- *The article explained what "cupressus abramsiana" means with a simple example.*

---

cupressus goveniana *(noun)*

Small sometimes shrubby tree native to California; often used as an ornamental; in some classification systems includes the pygmy cypress and the Santa Cruz cypress.

- *The article explained what "cupressus goveniana" means with a simple example.*
- *In class, the teacher used "cupressus goveniana" to mean small sometimes shrubby tree native to california;....*

---

cupressus goveniana abramsiana *(noun)*

Rare California cypress taller than but closely related to gowen cypress and sometimes considered the same species.

- *In class, the teacher used "cupressus goveniana abramsiana" to mean rare california cypress taller than but closely....*
- *Understanding "cupressus goveniana abramsiana" helps you talk about this topic clearly.*

---

cupressus goveniana pigmaea *(noun)*

Rare small cypress native to northern California; sometimes considered the same species as gowen cypress.

- *The article explained what "cupressus goveniana pigmaea" means with a simple example.*
- *They discussed "cupressus goveniana pigmaea" during the group presentation.*

---

cupressus guadalupensis *(noun)*

Relatively low wide-spreading endemic on Guadalupe Island; cultivated for its bluish foliage.

- *He looked up "cupressus guadalupensis" because he had never seen it before.*
- *Understanding "cupressus guadalupensis" helps you talk about this topic clearly.*

---

cupressus lusitanica *(noun)*

Tall spreading evergreen found in Mexico having drooping branches; believed to have been introduced into Portugal from Goa.

- *In class, the teacher used "cupressus lusitanica" to mean tall spreading evergreen found in mexico having....*
- *The article explained what "cupressus lusitanica" means with a simple example.*

---

cupressus pigmaea *(noun)*

Rare small cypress native to northern California; sometimes considered the same species as gowen cypress.

- *The article explained what "cupressus pigmaea" means with a simple example.*
- *In class, the teacher used "cupressus pigmaea" to mean rare small cypress native to northern california;....*

---

curlycup gumweed *(noun)*

Perennial gumweed of western and central North America.

- *She wrote a short paragraph that included "curlycup gumweed."*
- *They discussed "curlycup gumweed" during the group presentation.*

---

currajong *(noun)*

Widely distributed tree of eastern Australia yielding a tough durable fiber and soft light attractively grained wood; foliage is an important emergency food for cattle.

- *They discussed "currajong" during the group presentation.*
- *He looked up "currajong" because he had never seen it before.*

---

curtisia *(noun)*

A large evergreen tree of South Africa.

- *He looked up "curtisia" because he had never seen it before.*
- *She wrote a short paragraph that included "curtisia."*

---

cuscuta gronovii *(noun)*

Leafless parasitic vine with dense clusters of small white bell-shaped flowers on orange-yellow stems that twine around clover or flax.

- *She wrote a short paragraph that included "cuscuta gronovii."*
- *They discussed "cuscuta gronovii" during the group presentation.*

---

cushion calamint *(noun)*

Aromatic herb having heads of small pink or whitish flowers; widely distributed in United States, Europe and Asia.

- *Understanding "cushion calamint" helps you talk about this topic clearly.*
- *He looked up "cushion calamint" because he had never seen it before.*

---

cutleaved coneflower *(noun)*

Tall leafy plant with erect branches ending in large yellow flower heads with downward-arching rays; grow in Rocky Mountains south to Arizona and east to the Atlantic coast.

- *She wrote a short paragraph that included "cutleaved coneflower."*
- *He looked up "cutleaved coneflower" because he had never seen it before.*

cyamopsis *(noun)*

Small genus of annual usually hairy herbs of tropical Africa and Arabia.

- *In class, the teacher used "cyamopsis" to mean small genus of annual usually hairy herbs of....*
- *The article explained what "cyamopsis" means with a simple example.*

cyamopsis psoraloides *(noun)*

Drought-tolerant herb grown for forage and for its seed which yield a gum used as a thickening agent or sizing material.

- *The article explained what "cyamopsis psoraloides" means with a simple example.*
- *They discussed "cyamopsis psoraloides" during the group presentation.*

cyamopsis tetragonolobus *(noun)*

Drought-tolerant herb grown for forage and for its seed which yield a gum used as a thickening agent or sizing material.

- *In class, the teacher used "cyamopsis tetragonolobus" to mean drought-tolerant herb grown for forage and for its....*
- *The article explained what "cyamopsis tetragonolobus" means with a simple example.*

cyatheaceae *(noun)*

Tropical tree ferns.

- *They discussed "cyatheaceae" during the group presentation.*
- *In class, the teacher used "cyatheaceae" to mean tropical tree ferns.*

cycadaceae *(noun)*

Ancient palmlike plants closely related to ferns in that fertilization is by means of spermatozoids.

- *The article explained what "cycadaceae" means with a simple example.*
- *In class, the teacher used "cycadaceae" to mean ancient palmlike plants closely related to ferns in....*

cycadales *(noun)*

Primitive tropical gymnosperms abundant in the Mesozoic, now reduced to a few scattered tropical forms.

- *She wrote a short paragraph that included "cycadales."*
- *The article explained what "cycadales" means with a simple example.*

cycadofilicales *(noun)*

Fossil gymnospermous trees or climbing plants from the Devonian: seed ferns.

- *She wrote a short paragraph that included "cycadofilicales."*
- *The article explained what "cycadofilicales" means with a simple example.*

cycadophyta *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *She wrote a short paragraph that included "cycadophyta."*
- *The article explained what "cycadophyta" means with a simple example.*

cycadophytina *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *In class, the teacher used "cycadophytina" to mean palmlike gymnosperms: includes the surviving order....*
- *He looked up "cycadophytina" because he had never seen it before.*

cycadopsida *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *He looked up "cycadopsida" because he had never seen it before.*
- *They discussed "cycadopsida" during the group presentation.*

cycas circinalis *(noun)*

Southeastern Indian cycad with palmlike foliage.

- *In class, the teacher used "cycas circinalis" to mean southeastern indian cycad with palmlike foliage.*
- *Understanding "cycas circinalis" helps you talk about this topic clearly.*

cycas revoluta *(noun)*

Dwarf palmlike cycad of Japan that yields sago.

- *They discussed "cycas revoluta" during the group presentation.*
- *The article explained what "cycas revoluta" means with a simple example.*

cyclamen hederifolium *(noun)*

Common wild European cyclamen with pink flowers.

- *They discussed "cyclamen hederifolium" during the group presentation.*
- *In class, the teacher used "cyclamen hederifolium" to mean common wild european cyclamen with pink flowers.*

cyclamen neopolitanum *(noun)*

Common wild European cyclamen with pink flowers.

- *They discussed "cyclamen neopolitanum" during the group presentation.*
- *In class, the teacher used "cyclamen neopolitanum" to mean common wild european cyclamen with pink flowers.*

cycloloma *(noun)*

A caryophyllaceous genus of the family Chenopodiaceae.

- *The article explained what "cycloloma" means with a simple example.*
- *Understanding "cycloloma" helps you talk about this topic clearly.*

cycloloma atriplicifolium *(noun)*

Bushy annual weed of central North America having greenish flowers and winged seeds.

- *He looked up "cycloloma atriplicifolium" because he had never seen it before.*
- *She wrote a short paragraph that included "cycloloma atriplicifolium."*

cyclophorus *(noun)*

Tropical Old World ferns having closely crowded circular sori and no indusia.

- *They discussed "cyclophorus" during the group presentation.*
- *He looked up "cyclophorus" because he had never seen it before.*

cyclophorus lingua *(noun)*

East Asian fern having fronds shaped like tongues; sometimes placed in genus Cyclophorus.

- *They discussed "cyclophorus lingua" during the group presentation.*
- *In class, the teacher used "cyclophorus lingua" to mean east asian fern having fronds shaped like tongues;....*

cyclosorus *(noun)*

Small genus of terrestrial ferns of tropical and subtropical southern hemisphere.

- *In class, the teacher used "cyclosorus" to mean small genus of terrestrial ferns of tropical and....*
- *Understanding "cyclosorus" helps you talk about this topic clearly.*

cycnoches *(noun)*

Genus of epiphytic or terrestrial tropical American orchids.

- *They discussed "cycnoches" during the group presentation.*
- *She wrote a short paragraph that included "cycnoches."*

cymbid *(noun)*

Any of various plants of the genus Cymbidium having narrow leaves and a long drooping cluster of numerous showy and variously colored boat-shaped flowers; extensively hybridized and cultivated as houseplants and important florists' flowers.

- *Understanding "cymbid" helps you talk about this topic clearly.*
- *They discussed "cymbid" during the group presentation.*

cymling *(noun)*

Squash plant having flattened round fruit with a scalloped edge; usually greenish white.

- *They discussed "cymling" during the group presentation.*
- *The article explained what "cymling" means with a simple example.*

cymule *(noun)*

A small cyme, generally with few flowers.

- *She wrote a short paragraph that included "cymule."*
- *He looked up "cymule" because he had never seen it before.*

cynancum *(noun)*

Any of various mostly giant tropical lianas of Africa and Madagascar having greenish or purple flowers and long smooth pods; roots formerly used as an emetic.

- *He looked up "cynancum" because he had never seen it before.*
- *In class, the teacher used "cynancum" to mean any of various mostly giant tropical lianas of....*

cynara cardunculus *(noun)*

Southern European plant having spiny leaves and purple flowers cultivated for its edible leafstalks and roots.

- *The article explained what "cynara cardunculus" means with a simple example.*
- *Understanding "cynara cardunculus" helps you talk about this topic clearly.*

cynara scolymus *(noun)*

Mediterranean thistlelike plant widely cultivated for its large edible flower head.

- *They discussed "cynara scolymus" during the group presentation.*
- *The article explained what "cynara scolymus" means with a simple example.*

cynodon plectostachyum *(noun)*

Perennial grass having stems 3 to 4 feet high; used especially in Africa and India for pasture and hay.

- *The article explained what "cynodon plectostachyum" means with a simple example.*
- *In class, the teacher used "cynodon plectostachyum" to mean perennial grass having stems 3 to 4 feet high; used....*

cynoglossum *(noun)*

A large genus of tall rough herbs belonging to the family Boraginaceae.

- *She wrote a short paragraph that included "cynoglossum."*
- *They discussed "cynoglossum" during the group presentation.*

cynoglossum amabile *(noun)*

Biennial east Asian herb grown for its usually bright blue flowers.

- *He looked up "cynoglossum amabile" because he had never seen it before.*
- *They discussed "cynoglossum amabile" during the group presentation.*

cynoglossum officinale *(noun)*

Biennial shrub of Europe and western Asia having coarse tongue-shaped leaves and dark reddish-purple flowers.

- *They discussed "cynoglossum officinale" during the group presentation.*
- *He looked up "cynoglossum officinale" because he had never seen it before.*

cynoglossum virginaticum *(noun)*

Perennial shrub of North America having coarse tongue-shaped leaves and pale-blue to purple flowers.

- *They discussed "cynoglossum virginaticum" during the group presentation.*
- *She wrote a short paragraph that included "cynoglossum virginaticum."*

cyperus alternifolius *(noun)*

African sedge widely cultivated as an ornamental water plant for its terminal umbrellalike cluster of slender grasslike leaves.

- *In class, the teacher used "cyperus alternifolius" to mean african sedge widely cultivated as an ornamental....*
- *Understanding "cyperus alternifolius" helps you talk about this topic clearly.*

cyphomandra *(noun)*

Tree tomato.

- *He looked up "cyphomandra" because he had never seen it before.*
- *Understanding "cyphomandra" helps you talk about this topic clearly.*

cypre *(noun)*

Large tropical American tree of the genus Cordia grown for its abundant creamy white flowers and valuable wood.

- *She wrote a short paragraph that included “cypre.”*
- *The article explained what “cypre” means with a simple example.*

---

cypripedia *(noun)*

A plant or flower of the genus Cypripedium.

- *He looked up “cypripedia” because he had never seen it before.*
- *They discussed “cypripedia” during the group presentation.*

---

cypripedium acaule *(noun)*

Once common rose pink woodland orchid of eastern North America.

- *He looked up “cypripedium acaule” because he had never seen it before.*
- *They discussed “cypripedium acaule” during the group presentation.*

---

cypripedium arietinum *(noun)*

Orchid of northern North America having a brownish-green flower and red-and-white lip suggestive of a ram’s head.

- *They discussed “cypripedium arietinum” during the group presentation.*
- *He looked up “cypripedium arietinum” because he had never seen it before.*

---

cypripedium calceolus *(noun)*

Maroon to purple-brown orchid with yellow lip; Europe, North America and Japan.

- *He looked up “cypripedium calceolus” because he had never seen it before.*
- *In class, the teacher used “cypripedium calceolus” to mean maroon to purple-brown orchid with yellow lip;....*

---

cypripedium calceolus pubescens *(noun)*

Plant of eastern and central North America having slightly fragrant purple-marked greenish-yellow flowers.

- *Understanding “cypripedium calceolus pubescens” helps you talk about this topic clearly.*
- *They discussed “cypripedium calceolus pubescens” during the group presentation.*

---

cypripedium parviflorum *(noun)*

Maroon to purple-brown orchid with yellow lip; Europe, North America and Japan.

- *He looked up “cypripedium parviflorum” because he had never seen it before.*
- *Understanding “cypripedium parviflorum” helps you talk about this topic clearly.*

---

cyrilla *(noun)*

Shrub or small tree of southeastern United States to West Indies and Brazil; grown for the slender racemes of white flowers and orange and crimson foliage.

- *Understanding “cyrilla” helps you talk about this topic clearly.*
- *They discussed “cyrilla” during the group presentation.*

---

cyrilla family *(noun)*

Shrubs and trees with leathery leaves and small white flowers in racemes: genera Cyrilla and Cliftonia.

- *He looked up “cyrilla family” because he had never seen it before.*
- *They discussed “cyrilla family” during the group presentation.*

---

cyrilla racemiflora *(noun)*

Shrub or small tree of southeastern United States to West Indies and Brazil; grown for the slender racemes of white flowers and orange and crimson foliage.

- *The article explained what “cyrilla racemiflora” means with a simple example.*
- *In class, the teacher used “cyrilla racemiflora” to mean shrub or small tree of southeastern united states....*

---

cyrilliaceae *(noun)*

Shrubs and trees with leathery leaves and small white flowers in racemes: genera Cyrilla and Cliftonia.

- *She wrote a short paragraph that included “cyrilliaceae.”*
- *He looked up “cyrilliaceae” because he had never seen it before.*

---

cyrtomium *(noun)*

Small genus of tropical Asiatic greenhouse ferns; in some classifications placed in Polypodiaceae.

- *They discussed “cyrtomium” during the group presentation.*
- *He looked up “cyrtomium” because he had never seen it before.*

cyrtomium aculeatum *(noun)*

Tropical Old World fern having glossy fronds suggestive of holly; sometimes placed in genus Polystichum.

- *Understanding "cyrtomium aculeatum" helps you talk about this topic clearly.*
- *He looked up "cyrtomium aculeatum" because he had never seen it before.*

cystopteris *(noun)*

Chiefly small perennial rock ferns: bladder ferns; in some classifications placed in Polypodiaceae.

- *She wrote a short paragraph that included "cystopteris."*
- *He looked up "cystopteris" because he had never seen it before.*

cystopteris bulbifera *(noun)*

North American fern often bearing bulbils on the leaflets.

- *She wrote a short paragraph that included "cystopteris bulbifera."*
- *The article explained what "cystopteris bulbifera" means with a simple example.*

cystopteris fragilis *(noun)*

Delicate fern widely distributed in North America and European having thin pinnatifid fronds with brittle stems.

- *In class, the teacher used "cystopteris fragilis" to mean delicate fern widely distributed in north america....*
- *The article explained what "cystopteris fragilis" means with a simple example.*

cystopteris montana *(noun)*

Fern of rocky mountainous areas of hemisphere.

- *The article explained what "cystopteris montana" means with a simple example.*
- *She wrote a short paragraph that included "cystopteris montana."*

cytesis proliferus *(noun)*

Shrub of Canary Islands having bristle-tipped oblanceolate leaves; used as cattle fodder.

- *She wrote a short paragraph that included "cytesis proliferus."*
- *He looked up "cytesis proliferus" because he had never seen it before.*

cytisus multiflorus *(noun)*

Low European broom having trifoliate leaves and yellowish-white flowers.

- *Understanding "cytisus multiflorus" helps you talk about this topic clearly.*
- *They discussed "cytisus multiflorus" during the group presentation.*

cytisus ramentaceus *(noun)*

Erect shrub having large trifoliate leaves and dense clusters of yellow flowers followed by poisonous seeds; Yugoslavia; sometimes placed in genus Cytisus.

- *He looked up "cytisus ramentaceus" because he had never seen it before.*
- *They discussed "cytisus ramentaceus" during the group presentation.*

daboecia *(noun)*

A dicotyledonous genus of the family Ericaceae.

- *He looked up "daboecia" because he had never seen it before.*
- *She wrote a short paragraph that included "daboecia."*

daboecia cantabrica *(noun)*

Low straggling evergreen shrub of western Europe represented by several varieties with flowers from white to rose-purple.

- *In class, the teacher used "daboecia cantabrica" to mean low straggling evergreen shrub of western europe....*
- *He looked up "daboecia cantabrica" because he had never seen it before.*

dacridium laxifolius *(noun)*

Low-growing to prostrate shrub with slender trailing branches; New Zealand.

- *Understanding "dacridium laxifolius" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dacridium laxifolius."*

dacrycarpus *(noun)*

Evergreen coniferous shrubs or trees of New Zealand to Malaysia and Philippines.

- *The article explained what "dacrycarpus" means with a simple example.*
- *They discussed "dacrycarpus" during the group presentation.*

---

dacrycarpus dacrydioides *(noun)*

New Zealand evergreen valued for its light easily worked wood.

- *She wrote a short paragraph that included "dacrycarpus dacrydioides."*
- *He looked up "dacrycarpus dacrydioides" because he had never seen it before.*

---

dacrydium *(noun)*

Australasian evergreen trees or shrubs.

- *Understanding "dacrydium" helps you talk about this topic clearly.*
- *They discussed "dacrydium" during the group presentation.*

---

dacrydium bidwilli *(noun)*

New Zealand shrub.

- *In class, the teacher used "dacrydium bidwilli" to mean new zealand shrub.*
- *He looked up "dacrydium bidwilli" because he had never seen it before.*

---

dacrydium colensoi *(noun)*

New Zealand silver pine of conical habit with long slender flexuous branches; adapted to cold wet summers and high altitudes.

- *In class, the teacher used "dacrydium colensoi" to mean new zealand silver pine of conical habit with long....*
- *The article explained what "dacrydium colensoi" means with a simple example.*

---

dacrydium cupressinum *(noun)*

Tall New Zealand timber tree.

- *In class, the teacher used "dacrydium cupressinum" to mean tall new zealand timber tree.*
- *They discussed "dacrydium cupressinum" during the group presentation.*

---

dacrydium franklinii *(noun)*

Tasmanian timber tree with yellow aromatic wavy-grained wood used for carving and ship building; sometimes placed in genus Dacrydium.

- *They discussed "dacrydium franklinii" during the group presentation.*
- *Understanding "dacrydium franklinii" helps you talk about this topic clearly.*

---

dacrymyces *(noun)*

Type genus of the Dacrymycetaceae: fungi with a bifurcate basidium that lacks septa.

- *Understanding "dacrymyces" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dacrymyces."*

---

dacrymycetaceae *(noun)*

A family of basidiomycetous fungi belonging to the order Tremellales having a bifurcate basidium that lacks septa.

- *In class, the teacher used "dacrymycetaceae" to mean a family of basidiomycetous fungi belonging to the....*
- *He looked up "dacrymycetaceae" because he had never seen it before.*

---

dactyloctenium *(noun)*

A monocotyledonous genus of the family Gramineae.

- *The article explained what "dactyloctenium" means with a simple example.*
- *In class, the teacher used "dactyloctenium" to mean a monocotyledonous genus of the family gramineae.*

---

dactyloctenium aegypticum *(noun)*

A creeping grass with spikes like fingers.

- *They discussed "dactyloctenium aegypticum" during the group presentation.*
- *He looked up "dactyloctenium aegypticum" because he had never seen it before.*

---

dactylorhiza *(noun)*

Genus of terrestrial orchids of Europe and Asia and North Africa.

- *He looked up "dactylorhiza" because he had never seen it before.*

- *Understanding "dactylorhiza" helps you talk about this topic clearly.*

dactylorhiza fuchsii *(noun)*

European orchid having lanceolate leaves spotted purple and pink to white or mauve flowers spotted or lined deep red or purple.

- *The article explained what "dactylorhiza fuchsii" means with a simple example.*
- *Understanding "dactylorhiza fuchsii" helps you talk about this topic clearly.*

dactylorhiza maculata fuchsii *(noun)*

European orchid having lanceolate leaves spotted purple and pink to white or mauve flowers spotted or lined deep red or purple.

- *They discussed "dactylorhiza maculata fuchsii" during the group presentation.*
- *The article explained what "dactylorhiza maculata fuchsii" means with a simple example.*

dagame *(noun)*

Source of a tough elastic wood.

- *She wrote a short paragraph that included "dagame."*
- *The article explained what "dagame" means with a simple example.*

daisybush *(noun)*

Any of various mostly Australian attractively shaped shrubs of the genus Olearia grown for their handsome and sometimes fragrant evergreen foliage and profusion of daisy flowers with white or purple or blue rays.

- *In class, the teacher used "daisybush" to mean any of various mostly australian attractively....*
- *He looked up "daisybush" because he had never seen it before.*

daisyleaf grape fern *(noun)*

Of North America and Eurasia.

- *Understanding "daisyleaf grape fern" helps you talk about this topic clearly.*
- *He looked up "daisyleaf grape fern" because he had never seen it before.*

dalbergia cearensis *(noun)*

Brazilian tree yielding a handsome cabinet wood.

- *He looked up "dalbergia cearensis" because he had never seen it before.*
- *In class, the teacher used "dalbergia cearensis" to mean brazilian tree yielding a handsome cabinet wood.*

dalbergia sissoo *(noun)*

East Indian tree whose leaves are used for fodder; yields a compact dark brown durable timber used in shipbuilding and making railroad ties.

- *She wrote a short paragraph that included "dalbergia sissoo."*
- *The article explained what "dalbergia sissoo" means with a simple example.*

dalbergia stevensonii *(noun)*

Central American tree yielding a valuable dark streaked rosewood.

- *Understanding "dalbergia stevensonii" helps you talk about this topic clearly.*
- *They discussed "dalbergia stevensonii" during the group presentation.*

dalea *(noun)*

Indigo bush.

- *They discussed "dalea" during the group presentation.*
- *In class, the teacher used "dalea" to mean indigo bush.*

dalea spinosa *(noun)*

Greyish-green shrub of desert regions of southwestern United States and Mexico having sparse foliage and terminal spikes of bluish violet flowers; locally important as source of a light-colored honey of excellent flavor.

- *He looked up "dalea spinosa" because he had never seen it before.*
- *She wrote a short paragraph that included "dalea spinosa."*

dallisgrass *(noun)*

Tall tufted perennial tropical American grass naturalized as pasture and forage grass in southern United States.

- *She wrote a short paragraph that included "dallisgrass."*
- *The article explained what "dallisgrass" means with a simple example.*

dammar pine *(noun)*

Any of various trees of the genus Agathis; yield dammar resin.

- *In class, the teacher used "dammar pine" to mean any of various trees of the genus agathis; yield....*
- *The article explained what "dammar pine" means with a simple example.*

danaea *(noun)*

Fairly small terrestrial ferns of tropical America.

- *Understanding "danaea" helps you talk about this topic clearly.*
- *They discussed "danaea" during the group presentation.*

danewort *(noun)*

Dwarf herbaceous elder of Europe having pink flowers and a nauseous odor.

- *He looked up "danewort" because he had never seen it before.*
- *She wrote a short paragraph that included "danewort."*

dangleberry *(noun)*

Huckleberry of the eastern United States with pink flowers and sweet blue fruit.

- *The article explained what "dangleberry" means with a simple example.*
- *She wrote a short paragraph that included "dangleberry."*

daphne cneorum *(noun)*

Widely cultivated low evergreen shrub with dense clusters of fragrant pink to deep rose flowers.

- *She wrote a short paragraph that included "daphne cneorum."*
- *The article explained what "daphne cneorum" means with a simple example.*

daphne laureola *(noun)*

Bushy Eurasian shrub with glossy leathery oblong leaves and yellow-green flowers.

- *The article explained what "daphne laureola" means with a simple example.*
- *In class, the teacher used "daphne laureola" to mean bushy eurasian shrub with glossy leathery oblong....*

daphne mezereum *(noun)*

Small European deciduous shrub with fragrant lilac-colored flowers followed by red berries on highly toxic twigs.

- *In class, the teacher used "daphne mezereum" to mean small european deciduous shrub with fragrant....*
- *Understanding "daphne mezereum" helps you talk about this topic clearly.*

darlingtonia *(noun)*

One species: California pitcher plant.

- *He looked up "darlingtonia" because he had never seen it before.*
- *They discussed "darlingtonia" during the group presentation.*

darlingtonia californica *(noun)*

Marsh or bog herb having solitary pendulous yellow-green flowers and somewhat twisted pitchers with broad wings below.

- *She wrote a short paragraph that included "darlingtonia californica."*
- *He looked up "darlingtonia californica" because he had never seen it before.*

darmera *(noun)*

One species.

- *In class, the teacher used "darmera" to mean one species.*
- *He looked up "darmera" because he had never seen it before.*

darmera peltata *(noun)*

Rhizomatous perennial herb with large dramatic peltate leaves and white to bright pink flowers in round heads on leafless stems; colonizes stream banks in the Sierra Nevada in California.

- *They discussed "darmera peltata" during the group presentation.*
- *He looked up "darmera peltata" because he had never seen it before.*

davalia bullata *(noun)*

Feathery fern of tropical Asia and Malaysia.

- *She wrote a short paragraph that included “davalia bullata.”*
- *He looked up “davalia bullata” because he had never seen it before.*

davalia bullata mariesii *(noun)*

Feathery fern of tropical Asia and Malaysia.

- *Understanding “davalia bullata mariesii” helps you talk about this topic clearly.*
- *The article explained what “davalia bullata mariesii” means with a simple example.*

davallia *(noun)*

Any fern of the genus Davallia; having scaly creeping rhizomes.

- *Understanding “davallia” helps you talk about this topic clearly.*
- *In class, the teacher used “davallia” to mean any fern of the genus davallia; having scaly....*

davallia canariensis *(noun)*

Fern of the Canary Islands and Madeira.

- *Understanding “davallia canariensis” helps you talk about this topic clearly.*
- *In class, the teacher used “davallia canariensis” to mean fern of the canary islands and madeira.*

davallia mariesii *(noun)*

Feathery fern of tropical Asia and Malaysia.

- *The article explained what “davallia mariesii” means with a simple example.*
- *Understanding “davallia mariesii” helps you talk about this topic clearly.*

davallia pyxidata *(noun)*

A hare’s-foot fern of the genus Davallia.

- *Understanding “davallia pyxidata” helps you talk about this topic clearly.*
- *In class, the teacher used “davallia pyxidata” to mean a hare’s-foot fern of the genus davallia.*

davalliaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *He looked up “davalliaceae” because he had never seen it before.*
- *She wrote a short paragraph that included “davalliaceae.”*

daviesia *(noun)*

Genus of Australasian shrubs and subshrubs having small yellow or purple flowers followed by short triangular pods.

- *He looked up “daviesia” because he had never seen it before.*
- *She wrote a short paragraph that included “daviesia.”*

dayflower *(noun)*

Any plant of the family Commelinaceae.

- *She wrote a short paragraph that included “dayflower.”*
- *He looked up “dayflower” because he had never seen it before.*

decarburise *(verb)*

Remove carbon from (an engine).

- *In everyday English, people use “decarburise” when talking about this idea.*
- *Learners should practice how to use “decarburise” in real sentences.*

decarburize *(verb)*

Remove carbon from (an engine).

- *The coach explained when to use “decarburize” and when to wait.*
- *Can you use “decarburize” in a sentence that fits this situation?*

decoke *(verb)*

Remove carbon from (an engine).

- *Can you use “decoke” in a sentence that fits this situation?*

- *He did not know how to use “decoke” until he saw an example.*

decompound leaf *(noun)*

A leaf having divisions that are themselves compound.

- *He looked up “decompound leaf” because he had never seen it before.*
- *She wrote a short paragraph that included “decompound leaf.”*

decumaria *(noun)*

Small genus of woody climbers with adhesive aerial roots; sometimes placed in family Saxifragaceae.

- *The article explained what “decumaria” means with a simple example.*
- *In class, the teacher used “decumaria” to mean small genus of woody climbers with adhesive aerial....*

decumaria barbara *(noun)*

Woody climber of southeastern United States having white flowers in compound terminal clusters.

- *In class, the teacher used “decumaria barbara” to mean woody climber of southeastern united states having....*
- *The article explained what “decumaria barbara” means with a simple example.*

decumaria barbata *(noun)*

Woody climber of southeastern United States having white flowers in compound terminal clusters.

- *Understanding “decumaria barbata” helps you talk about this topic clearly.*
- *The article explained what “decumaria barbata” means with a simple example.*

decumary *(noun)*

Woody climber of southeastern United States having white flowers in compound terminal clusters.

- *In class, the teacher used “decumary” to mean woody climber of southeastern united states having....*
- *They discussed “decumary” during the group presentation.*

deerberry *(noun)*

Small branching blueberry common in marshy areas of the eastern United States having greenish or yellowish unpalatable berries reputedly eaten by deer.

- *He looked up “deerberry” because he had never seen it before.*
- *Understanding “deerberry” helps you talk about this topic clearly.*

delairea *(noun)*

One species: German ivy.

- *She wrote a short paragraph that included “delairea.”*
- *He looked up “delairea” because he had never seen it before.*

delairea odorata *(noun)*

South African succulent evergreen twining climber with yellow flowers grown primarily as a houseplant for its foliage; sometimes placed in genus Senecio.

- *They discussed “delairea odorata” during the group presentation.*
- *He looked up “delairea odorata” because he had never seen it before.*

delonix *(noun)*

Evergreen or deciduous trees of tropical Africa and India.

- *They discussed “delonix” during the group presentation.*
- *The article explained what “delonix” means with a simple example.*

delonix regia *(noun)*

Showy tropical tree or shrub native to Madagascar; widely planted in tropical regions for its immense racemes of scarlet and orange flowers; sometimes placed in genus Poinciana.

- *They discussed “delonix regia” during the group presentation.*
- *Understanding “delonix regia” helps you talk about this topic clearly.*

delphinium ajacis *(noun)*

Commonly cultivated larkspur of southern Europe having unbranched spikelike racemes of blue or sometimes purplish or pinkish flowers; sometime placed in genus Delphinium.

- *In class, the teacher used “delphinium ajacis” to mean commonly cultivated larkspur of southern europe....*
- *He looked up “delphinium ajacis” because he had never seen it before.*

dematiaceae *(noun)*

Family of imperfect mushrooms having dark-colored hyphae or conidia.

- *She wrote a short paragraph that included "dematiaceae."*
- *He looked up "dematiaceae" because he had never seen it before.*

---

dendranthema *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *They discussed "dendranthema" during the group presentation.*
- *She wrote a short paragraph that included "dendranthema."*

---

dendrocalamus *(noun)*

Giant clump-forming bamboos.

- *He looked up "dendrocalamus" because he had never seen it before.*
- *She wrote a short paragraph that included "dendrocalamus."*

---

dendrocalamus giganteus *(noun)*

Immense tropical southeast Asian bamboo with tough hollow culms that resemble tree trunks.

- *She wrote a short paragraph that included "dendrocalamus giganteus."*
- *The article explained what "dendrocalamus giganteus" means with a simple example.*

---

dendromecon *(noun)*

One species: bush poppy.

- *Understanding "dendromecon" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dendromecon."*

---

dennstaedtia *(noun)*

Chiefly terrestrial ferns; in some classification systems placed in family Polypodiaceae.

- *Understanding "dennstaedtia" helps you talk about this topic clearly.*
- *The article explained what "dennstaedtia" means with a simple example.*

---

dennstaedtia punctilobula *(noun)*

Fern of eastern North America with pale green fronds and an aroma like hay.

- *In class, the teacher used "dennstaedtia punctilobula" to mean fern of eastern north america with pale green....*
- *They discussed "dennstaedtia punctilobula" during the group presentation.*

---

dennstaedtiaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *He looked up "dennstaedtiaceae" because he had never seen it before.*
- *They discussed "dennstaedtiaceae" during the group presentation.*

---

dentaria *(noun)*

Usually included in genus Cardamine; in some classifications considered a separate genus.

- *In class, the teacher used "dentaria" to mean usually included in genus cardamine; in some....*
- *Understanding "dentaria" helps you talk about this topic clearly.*

---

dentaria bulbifera *(noun)*

European bittercress having a knotted white rootstock.

- *In class, the teacher used "dentaria bulbifera" to mean european bittercress having a knotted white rootstock.*
- *He looked up "dentaria bulbifera" because he had never seen it before.*

---

dentaria diphylla *(noun)*

North American herb with pungent scaly or toothed roots.

- *They discussed "dentaria diphylla" during the group presentation.*
- *Understanding "dentaria diphylla" helps you talk about this topic clearly.*

---

deparia *(noun)*

Classification used for 5 species of terrestrial ferns usually placed in other genera.

- *In class, the teacher used "deparia" to mean classification used for 5 species of terrestrial....*
- *The article explained what "deparia" means with a simple example.*

---

deparia acrostichoides *(noun)*

Fern with elongate silvery outgrowths enclosing the developing spores.

- *In class, the teacher used "deparia acrostichoides" to mean fern with elongate silvery outgrowths enclosing the....*
- *Understanding "deparia acrostichoides" helps you talk about this topic clearly.*

---

descurainia *(noun)*

Includes annual or biennial herbs of America and Europe very similar to and often included among those of genera Sisymbrium or Hugueninia; not recognized in some classification systems.

- *Understanding "descurainia" helps you talk about this topic clearly.*
- *In class, the teacher used "descurainia" to mean includes annual or biennial herbs of america and....*

---

descurainia pinnata *(noun)*

North American herb with bitter-tasting pinnate leaves resembling those of tansy.

- *She wrote a short paragraph that included "descurainia pinnata."*
- *They discussed "descurainia pinnata" during the group presentation.*

---

desmanthus *(noun)*

Genus of American herbs or shrubs with sensitive pinnate leaves and small whitish flowers.

- *He looked up "desmanthus" because he had never seen it before.*
- *Understanding "desmanthus" helps you talk about this topic clearly.*

---

desmanthus ilinoensis *(noun)*

Perennial herb of North American prairies having dense heads of small white flowers.

- *They discussed "desmanthus ilinoensis" during the group presentation.*
- *He looked up "desmanthus ilinoensis" because he had never seen it before.*

---

desmodium gyrans *(noun)*

Erect tropical Asian shrub whose small lateral leaflets rotate on their axes and jerk up and down under the influence of sunshine.

- *The article explained what "desmodium gyrans" means with a simple example.*
- *In class, the teacher used "desmodium gyrans" to mean erect tropical asian shrub whose small lateral....*

---

desmodium motorium *(noun)*

Erect tropical Asian shrub whose small lateral leaflets rotate on their axes and jerk up and down under the influence of sunshine.

- *She wrote a short paragraph that included "desmodium motorium."*
- *Understanding "desmodium motorium" helps you talk about this topic clearly.*

---

desmodium tortuosum *(noun)*

West Indian forage plant cultivated in southern United States as forage and to improve soil.

- *The article explained what "desmodium tortuosum" means with a simple example.*
- *They discussed "desmodium tortuosum" during the group presentation.*

---

deuteromycetes *(noun)*

Form class; coextensive with subdivision Deuteromycota.

- *He looked up "deuteromycetes" because he had never seen it before.*
- *In class, the teacher used "deuteromycetes" to mean form class; coextensive with subdivision deuteromycota.*

---

deuteromycota *(noun)*

Large and heterogeneous form division of fungi comprising forms for which no sexually reproductive stage is known.

- *The article explained what "deuteromycota" means with a simple example.*
- *Understanding "deuteromycota" helps you talk about this topic clearly.*

---

deuteromycotina *(noun)*

Large and heterogeneous form division of fungi comprising forms for which no sexually reproductive stage is known.

- *Understanding "deuteromycotina" helps you talk about this topic clearly.*
- *The article explained what "deuteromycotina" means with a simple example.*

devilwood *(noun)*

Small tree of southern United States having panicles of dull white flowers followed by dark purple fruits.

- *She wrote a short paragraph that included "devilwood."*
- *He looked up "devilwood" because he had never seen it before.*

dhava *(noun)*

An Indian tree of the family Combretaceae that is a source of timber and gum.

- *In class, the teacher used "dhava" to mean an indian tree of the family combretaceae that is a....*
- *The article explained what "dhava" means with a simple example.*

dhawa *(noun)*

An Indian tree of the family Combretaceae that is a source of timber and gum.

- *She wrote a short paragraph that included "dhawa."*
- *The article explained what "dhawa" means with a simple example.*

diacalpa *(noun)*

One species: delicate fern of foothills of Himalayas.

- *They discussed "diacalpa" during the group presentation.*
- *The article explained what "diacalpa" means with a simple example.*

diangus gratianopolitanus *(noun)*

Mat-forming perennial of central Europe with large fragrant pink or red flowers.

- *She wrote a short paragraph that included "diangus gratianopolitanus."*
- *He looked up "diangus gratianopolitanus" because he had never seen it before.*

dianthus caryophyllus *(noun)*

Eurasian plant with pink to purple-red spice-scented usually double flowers; widely cultivated in many varieties and many colors.

- *The article explained what "dianthus caryophyllus" means with a simple example.*
- *Understanding "dianthus caryophyllus" helps you talk about this topic clearly.*

dianthus chinensis heddewigii *(noun)*

A flowering variety of China pink distinguished by jagged-edged petals.

- *She wrote a short paragraph that included "dianthus chinensis heddewigii."*
- *He looked up "dianthus chinensis heddewigii" because he had never seen it before.*

dianthus latifolius *(noun)*

Much-branched pink with flowers in clusters; closely related to sweet William.

- *In class, the teacher used "dianthus latifolius" to mean much-branched pink with flowers in clusters;....*
- *Understanding "dianthus latifolius" helps you talk about this topic clearly.*

dianthus plumarius *(noun)*

European pink cultivated for its very fragrant pink or rosy flowers.

- *In class, the teacher used "dianthus plumarius" to mean european pink cultivated for its very fragrant pink....*
- *Understanding "dianthus plumarius" helps you talk about this topic clearly.*

dianthus supurbus *(noun)*

Eurasian perennial pink having fragrant lilac or rose flowers with deeply fringed margins.

- *She wrote a short paragraph that included "dianthus supurbus."*
- *Understanding "dianthus supurbus" helps you talk about this topic clearly.*

diapensia *(noun)*

Any boreal low-growing evergreen plant of the genus Diapensia.

- *In class, the teacher used "diapensia" to mean any boreal low-growing evergreen plant of the genus....*
- *He looked up "diapensia" because he had never seen it before.*

diapensia family *(noun)*

North temperate low evergreen plants; in some classifications placed in its own order Diapensiales.

- *Understanding "diapensia family" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "diapensia family."*

diapensiaceae *(noun)*

North temperate low evergreen plants; in some classifications placed in its own order Diapensiales.

- *Understanding "diapensiaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "diapensiaceae" to mean north temperate low evergreen plants; in some....*

diapensiales *(noun)*

Used in some classifications: coextensive with family Diapensiaceae.

- *In class, the teacher used "diapensiales" to mean used in some classifications: coextensive with....*
- *The article explained what "diapensiales" means with a simple example.*

dicentra cucullaria *(noun)*

Delicate spring-flowering plant of the eastern United States having white flowers with double spurs.

- *The article explained what "dicentra cucullaria" means with a simple example.*
- *They discussed "dicentra cucullaria" during the group presentation.*

dichondra *(noun)*

A creeping perennial herb with hairy stems and orbicular to reniform leaves and small white to greenish flowers; used as a grass substitute in warm regions.

- *He looked up "dichondra" because he had never seen it before.*
- *She wrote a short paragraph that included "dichondra."*

dichondra micrantha *(noun)*

A creeping perennial herb with hairy stems and orbicular to reniform leaves and small white to greenish flowers; used as a grass substitute in warm regions.

- *The article explained what "dichondra micrantha" means with a simple example.*
- *Understanding "dichondra micrantha" helps you talk about this topic clearly.*

dicksonia *(noun)*

Tree ferns of temperate Australasia having bipinnatifid or tripinnatifid fronds and usually marginal sori; in some classification systems placed in family Cyatheaceae.

- *She wrote a short paragraph that included "dicksonia."*
- *They discussed "dicksonia" during the group presentation.*

dicksonia antarctica *(noun)*

Of Australia and Tasmania; often cultivated; hardy in cool climates.

- *The article explained what "dicksonia antarctica" means with a simple example.*
- *In class, the teacher used "dicksonia antarctica" to mean of australia and tasmania; often cultivated; hardy....*

dicksoniaceae *(noun)*

Tree ferns: genera Dicksonia, Cibotium, Culcita, and Thyrsopteris elegans.

- *The article explained what "dicksoniaceae" means with a simple example.*
- *She wrote a short paragraph that included "dicksoniaceae."*

dicotyledon *(noun)*

Flowering plant with two cotyledons; the stem grows by deposit on its outside.

- *In class, the teacher used "dicotyledon" to mean flowering plant with two cotyledons; the stem grows....*
- *He looked up "dicotyledon" because he had never seen it before.*

dicranaceae *(noun)*

Mosses having costate leaves and long-stalked capsules with cleft peristome.

- *He looked up "dicranaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "dicranaceae."*

dicranales *(noun)*

Widely distributed order of mosses with erect gametophores and sporophytes at the tips of stems.

- *Understanding "dicranales" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included "dicranales."*

dicranopteris *(noun)*

Terrestrial ferns of forest margin or open ground; pantropical.

- *She wrote a short paragraph that included "dicranopteris."*
- *They discussed "dicranopteris" during the group presentation.*

dicranum *(noun)*

Type genus of Dicranaceae.

- *They discussed "dicranum" during the group presentation.*
- *He looked up "dicranum" because he had never seen it before.*

dictamnus *(noun)*

A dicotyledonous genus of the family Rutaceae.

- *Understanding "dictamnus" helps you talk about this topic clearly.*
- *The article explained what "dictamnus" means with a simple example.*

dictamnus alba *(noun)*

Eurasian perennial herb with white flowers that emit flammable vapor in hot weather.

- *Understanding "dictamnus alba" helps you talk about this topic clearly.*
- *In class, the teacher used "dictamnus alba" to mean eurasian perennial herb with white flowers that....*

dictostylium *(noun)*

Any slime mold of the genus Dictostylium.

- *Understanding "dictostylium" helps you talk about this topic clearly.*
- *They discussed "dictostylium" during the group presentation.*

dictyophera *(noun)*

Closely related to genus Phallus distinguished by an indusium hanging like a skirt from below the pileus.

- *He looked up "dictyophera" because he had never seen it before.*
- *She wrote a short paragraph that included "dictyophera."*

dieffenbachia sequine *(noun)*

An evergreen plant with large showy dark green leaves; contains a poison that swells the tongue and throat hence the name.

- *The article explained what "dieffenbachia sequine" means with a simple example.*
- *They discussed "dieffenbachia sequine" during the group presentation.*

diervilla *(noun)*

Small genus of low deciduous shrubs: bush honeysuckles.

- *Understanding "diervilla" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "diervilla."*

diervilla lonicera *(noun)*

Spreading bush of northeastern United States having small clusters of fragrant green and yellow flowers.

- *The article explained what "diervilla lonicera" means with a simple example.*
- *Understanding "diervilla lonicera" helps you talk about this topic clearly.*

diervilla sessilifolia *(noun)*

Bush honeysuckle of southeastern United States having large crowded clusters of sulfur-yellow flowers.

- *She wrote a short paragraph that included "diervilla sessilifolia."*
- *He looked up "diervilla sessilifolia" because he had never seen it before.*

digitaria sanguinalis *(noun)*

A European forage grass grown for hay; a naturalized weed in United States.

- *Understanding "digitaria sanguinalis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "digitaria sanguinalis."*

dillenia *(noun)*

Any of several evergreen trees or shrubs of the genus Dillenia grown for their foliage and nodding flowers resembling magnolias which are followed by fruit that is used in curries and jellies and preserves.

- *In class, the teacher used "dillenia" to mean any of several evergreen trees or shrubs of the....*
- *The article explained what "dillenia" means with a simple example.*

---

dilleniaceae *(noun)*

Chiefly tropical shrubs and trees and climbers having leathery leaves or flattened leaflike stems: genera Dillenia and Hibbertia.

- *Understanding "dilleniaceae" helps you talk about this topic clearly.*
- *They discussed "dilleniaceae" during the group presentation.*

---

dilleniid dicot family *(noun)*

Family of more or less advanced dicotyledonous trees and shrubs and herbs.

- *She wrote a short paragraph that included "dilleniid dicot family."*
- *They discussed "dilleniid dicot family" during the group presentation.*

---

dilleniid dicot genus *(noun)*

Genus of more or less advanced dicotyledonous trees and shrubs and herbs.

- *She wrote a short paragraph that included "dilleniid dicot genus."*
- *He looked up "dilleniid dicot genus" because he had never seen it before.*

---

dimocarpus longan *(noun)*

Tree of southeastern Asia to Australia grown primarily for its sweet edible fruit resembling litchi nuts; sometimes placed in genera Euphorbia or Nephelium.

- *He looked up "dimocarpus longan" because he had never seen it before.*
- *She wrote a short paragraph that included "dimocarpus longan."*

---

dimorphotheca *(noun)*

South African herbs or subshrubs with usually yellow flowers.

- *The article explained what "dimorphotheca" means with a simple example.*
- *Understanding "dimorphotheca" helps you talk about this topic clearly.*

---

dionaea *(noun)*

A genus of the family Droseraceae.

- *She wrote a short paragraph that included "dionaea."*
- *Understanding "dionaea" helps you talk about this topic clearly.*

---

dionaea muscipula *(noun)*

Carnivorous plant of coastal plains of the Carolinas having sensitive hinged marginally bristled leaf blades that close and entrap insects.

- *He looked up "dionaea muscipula" because he had never seen it before.*
- *In class, the teacher used "dionaea muscipula" to mean carnivorous plant of coastal plains of the....*

---

dioon *(noun)*

Any cycad of the genus Dioon; handsome palmlike cycads with robust crowns of leaves and rugged trunks.

- *The article explained what "dioon" means with a simple example.*
- *She wrote a short paragraph that included "dioon."*

---

dioscorea bulbifera *(noun)*

Yam of tropical Africa and Asia cultivated for it large tubers.

- *They discussed "dioscorea bulbifera" during the group presentation.*
- *The article explained what "dioscorea bulbifera" means with a simple example.*

---

dioscorea elephantipes *(noun)*

South African vine having a massive rootstock covered with deeply fissured bark.

- *They discussed "dioscorea elephantipes" during the group presentation.*
- *Understanding "dioscorea elephantipes" helps you talk about this topic clearly.*

---

dioscorea trifida *(noun)*

Tropical American yam with small yellow edible tubers.

- *Understanding "dioscorea trifida" helps you talk about this topic clearly.*
- *He looked up "dioscorea trifida" because he had never seen it before.*

---

diospyros ebenum *(noun)*

Tropical tree of southern Asia having hard dark-colored heartwood used in cabinetwork.

- *He looked up "diospyros ebenum" because he had never seen it before.*
- *In class, the teacher used "diospyros ebenum" to mean tropical tree of southern asia having hard....*

---

diospyros kurzii *(noun)*

Large Asiatic tree having hard marbled zebrawood.

- *Understanding "diospyros kurzii" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "diospyros kurzii."*

---

dipladenia *(noun)*

Genus of tropical South American tuberous perennial woody vines with large racemose flowers and milky sap.

- *The article explained what "dipladenia" means with a simple example.*
- *They discussed "dipladenia" during the group presentation.*

---

dipladenia boliviensis *(noun)*

Shrubby climber having glossy leaves and white funnel-shaped flowers with yellow throats.

- *Understanding "dipladenia boliviensis" helps you talk about this topic clearly.*
- *The article explained what "dipladenia boliviensis" means with a simple example.*

---

diplazium pycnocarpon *(noun)*

North American fern with narrow fronds on yellowish leafstalks.

- *She wrote a short paragraph that included "diplazium pycnocarpon."*
- *He looked up "diplazium pycnocarpon" because he had never seen it before.*

---

diplopterygium *(noun)*

Scandent thicket-forming ferns of Asia to western Pacific.

- *He looked up "diplopterygium" because he had never seen it before.*
- *Understanding "diplopterygium" helps you talk about this topic clearly.*

---

diplopterygium longissimum *(noun)*

Large scrambling fern forming large patches to 18 feet high; Pacific region and China.

- *She wrote a short paragraph that included "diplopterygium longissimum."*
- *He looked up "diplopterygium longissimum" because he had never seen it before.*

---

diplotaxis *(noun)*

Wall rocket.

- *The article explained what "diplotaxis" means with a simple example.*
- *In class, the teacher used "diplotaxis" to mean wall rocket.*

---

diplotaxis erucoides *(noun)*

From Mediterranean region; a naturalized weed throughout southern Europe.

- *Understanding "diplotaxis erucoides" helps you talk about this topic clearly.*
- *He looked up "diplotaxis erucoides" because he had never seen it before.*

---

diplotaxis muralis *(noun)*

Yellow-flowered European plant that grows on old walls and in waste places; an adventive weed in North America.

- *Understanding "diplotaxis muralis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "diplotaxis muralis."*

---

diplotaxis tenuifolia *(noun)*

Yellow-flowered European plant that grows on old walls and in waste places; an adventive weed in North America.

- *The article explained what "diplotaxis tenuifolia" means with a simple example.*
- *Understanding "diplotaxis tenuifolia" helps you talk about this topic clearly.*

dipogon *(noun)*

One species: Australian pea.

- *Understanding "dipogon" helps you talk about this topic clearly.*
- *They discussed "dipogon" during the group presentation.*

dipogon lignosus *(noun)*

South African evergreen partly woody vine grown for its clusters of rosy purple flowers followed by edible pods like snap beans; also grown as green manure; sometimes placed in genus Dolichos.

- *In class, the teacher used "dipogon lignosus" to mean south african evergreen partly woody vine grown for....*
- *They discussed "dipogon lignosus" during the group presentation.*

dippel's oil *(noun)*

Dark-colored ill-smelling oil obtained by carbonizing bone; used especially in sheep dips and in denaturing alcohol.

- *Understanding "dippel's oil" helps you talk about this topic clearly.*
- *The article explained what "dippel's oil" means with a simple example.*

dipsacaceae *(noun)*

Chiefly southern European herbs with flowers usually in dense cymose heads.

- *She wrote a short paragraph that included "dipsacaceae."*
- *He looked up "dipsacaceae" because he had never seen it before.*

dipsacus *(noun)*

Type genus of the Dipsacaceae: teasel.

- *Understanding "dipsacus" helps you talk about this topic clearly.*
- *In class, the teacher used "dipsacus" to mean type genus of the dipsacaceae: teasel.*

dipsacus fullonum *(noun)*

Teasel with lilac flowers native to Old World but naturalized in North America; dried flower heads used to raise a nap on woolen cloth.

- *He looked up "dipsacus fullonum" because he had never seen it before.*
- *Understanding "dipsacus fullonum" helps you talk about this topic clearly.*

dipsacus sativus *(noun)*

Similar to the common teasel and similarly used; widespread in Europe and North Africa and western Asia; naturalized in United States.

- *She wrote a short paragraph that included "dipsacus sativus."*
- *He looked up "dipsacus sativus" because he had never seen it before.*

dipsacus sylvestris *(noun)*

European teasel with white to pink flowers; naturalized in United States.

- *He looked up "dipsacus sylvestris" because he had never seen it before.*
- *She wrote a short paragraph that included "dipsacus sylvestris."*

dipterocarpaceae *(noun)*

Chiefly tropical Asian trees with two-winged fruits; yield valuable woods and aromatic oils and resins.

- *Understanding "dipterocarpaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dipterocarpaceae."*

dipteronia *(noun)*

Small genus of large deciduous shrubs having large clusters of winged seeds that turn red as they mature; central and southern China.

- *The article explained what "dipteronia" means with a simple example.*
- *In class, the teacher used "dipteronia" to mean small genus of large deciduous shrubs having large....*

dipteryx *(noun)*

Tropical American trees: tonka beans.

- *She wrote a short paragraph that included "dipteryx."*
- *They discussed "dipteryx" during the group presentation.*

dipteryx odorata *(noun)*

Tall tropical South American tree having pulpy egg-shaped pods of fragrant black almond-shaped seeds used for flavoring.

- *They discussed "dipteryx odorata" during the group presentation.*
- *Understanding "dipteryx odorata" helps you talk about this topic clearly.*

---

dirca *(noun)*

Deciduous shrub of North America: leatherwood.

- *They discussed "dirca" during the group presentation.*
- *The article explained what "dirca" means with a simple example.*

---

dirca palustris *(noun)*

Deciduous shrub of eastern North America having tough flexible branches and pliable bark and small yellow flowers.

- *He looked up "dirca palustris" because he had never seen it before.*
- *They discussed "dirca palustris" during the group presentation.*

---

discina *(noun)*

Any fungus of the genus Discina.

- *They discussed "discina" during the group presentation.*
- *He looked up "discina" because he had never seen it before.*

---

discina macrospora *(noun)*

A discina with a flat or saucer-shaped fertile body that is brown on the upper surface; has a short stalk; not recommended for eating.

- *In class, the teacher used "discina macrospora" to mean a discina with a flat or saucer-shaped fertile body....*
- *He looked up "discina macrospora" because he had never seen it before.*

---

disciotis venosa *(noun)*

An edible morel with a cup-shaped or saucer-shaped fruiting body can be up to 20 cm wide; the fertile surface inside the cup has wrinkles radiating from the center; can be easily confused with inedible mushrooms.

- *They discussed "disciotis venosa" during the group presentation.*
- *The article explained what "disciotis venosa" means with a simple example.*

---

discomycete *(noun)*

Any fungus that is a member of the subclass Discomycetes.

- *She wrote a short paragraph that included "discomycete."*
- *The article explained what "discomycete" means with a simple example.*

---

discomycetes *(noun)*

A large and taxonomically difficult group of Ascomycetes in which the fleshy fruiting body is disklike or cup-shaped.

- *Understanding "discomycetes" helps you talk about this topic clearly.*
- *They discussed "discomycetes" during the group presentation.*

---

ditchmoss *(noun)*

Submerged freshwater perennials.

- *Understanding "ditchmoss" helps you talk about this topic clearly.*
- *He looked up "ditchmoss" because he had never seen it before.*

---

division anthophyta *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *The article explained what "division anthophyta" means with a simple example.*
- *In class, the teacher used "division anthophyta" to mean comprising flowering plants that produce seeds....*

---

division eumycota *(noun)*

True fungi; eukaryotic heterotrophic walled organisms; distinguished from Myxomycota (funguslike slime molds): comprises subdivisions Mastigomycotina; Zygomycotina; Ascomycotina; Basidiomycotina; Deuteromycotina (imperfect fungi).

- *Understanding "division eumycota" helps you talk about this topic clearly.*
- *They discussed "division eumycota" during the group presentation.*

---

division gymnomycota *(noun)*

Slime molds; organisms having a noncellular and multinucleate creeping vegetative phase and a propagative spore-producing stage: comprises Myxomycetes and Acrasiomycetes; in some classifications placed in the kingdom Protoctista.

- *Understanding "division gymnomycota" helps you talk about this topic clearly.*
- *The article explained what "division gymnomycota" means with a simple example.*

---

division lichenes *(noun)*

Comprising the lichens which grow symbiotically with algae; sometimes treated as an independent group more or less coordinate with algae and fungi.

- *He looked up "division lichenes" because he had never seen it before.*
- *Understanding "division lichenes" helps you talk about this topic clearly.*

---

division magnoliophyta *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *She wrote a short paragraph that included "division magnoliophyta."*
- *He looked up "division magnoliophyta" because he had never seen it before.*

---

division myxomycota *(noun)*

Slime molds; organisms having a noncellular and multinucleate creeping vegetative phase and a propagative spore-producing stage: comprises Myxomycetes and Acrasiomycetes; in some classifications placed in the kingdom Protoctista.

- *They discussed "division myxomycota" during the group presentation.*
- *The article explained what "division myxomycota" means with a simple example.*

---

division tracheophyta *(noun)*

In former classifications: comprising plants with a vascular system including ferns and fern allies as well as seed plants.

- *The article explained what "division tracheophyta" means with a simple example.*
- *Understanding "division tracheophyta" helps you talk about this topic clearly.*

---

dodonaea *(noun)*

A genus of tropical shrub or tree.

- *They discussed "dodonaea" during the group presentation.*
- *Understanding "dodonaea" helps you talk about this topic clearly.*

---

dolichos biflorus *(noun)*

Twining herb of Old World tropics cultivated in India for food and fodder; sometimes placed in genus Dolichos.

- *The article explained what "dolichos biflorus" means with a simple example.*
- *They discussed "dolichos biflorus" during the group presentation.*

---

dolichos lignosus *(noun)*

South African evergreen partly woody vine grown for its clusters of rosy purple flowers followed by edible pods like snap beans; also grown as green manure; sometimes placed in genus Dolichos.

- *They discussed "dolichos lignosus" during the group presentation.*
- *She wrote a short paragraph that included "dolichos lignosus."*

---

domatium *(noun)*

A part of a plant (e.g., a leaf) that has been modified to provide protection for insects or mites or fungi.

- *In class, the teacher used "domatium" to mean a part of a plant (e.g., a leaf) that has been....*
- *The article explained what "domatium" means with a simple example.*

---

dombeya *(noun)*

Any of various shrubs or small trees of the genus Dombeya grown for their rounded clusters of exquisite often sweet-scented flowers usually hanging beneath the leaves.

- *They discussed "dombeya" during the group presentation.*
- *Understanding "dombeya" helps you talk about this topic clearly.*

---

doodia *(noun)*

Any fern of the genus Doodia having pinnate fronds with sharply dentate pinnae.

- *In class, the teacher used "doodia" to mean any fern of the genus doodia having pinnate fronds....*
- *The article explained what "doodia" means with a simple example.*

---

doronicum *(noun)*

Genus of Eurasian perennial tuberous or rhizomatous herbs: leopard's bane.

- *He looked up "doronicum" because he had never seen it before.*
- *They discussed "doronicum" during the group presentation.*

dorotheanthus *(noun)*

A caryophyllaceous genus of Dorotheanthus.

- *In class, the teacher used "dorotheanthus" to mean a caryophyllaceous genus of dorotheanthus.*
- *The article explained what "dorotheanthus" means with a simple example.*

dorotheanthus bellidiformis *(noun)*

Low-growing showy succulent annual of South Africa having white or pink or red or orange flowers and spatulate leaves covered in papillae that resemble small crystals.

- *The article explained what "dorotheanthus bellidiformis" means with a simple example.*
- *In class, the teacher used "dorotheanthus bellidiformis" to mean low-growing showy succulent annual of south africa....*

doryopteris *(noun)*

Small to medium tropical tufted ferns; sometimes placed in family Adiantaceae.

- *Understanding "doryopteris" helps you talk about this topic clearly.*
- *In class, the teacher used "doryopteris" to mean small to medium tropical tufted ferns; sometimes....*

doryopteris pedata *(noun)*

Tropical American fern with coarsely lobed to palmatifid fronds.

- *The article explained what "doryopteris pedata" means with a simple example.*
- *They discussed "doryopteris pedata" during the group presentation.*

dotted gayfeather *(noun)*

Herb with many stems bearing narrow slender wands of crowded rose-lavender flowers; central United States and Canada to Texas and northern Mexico.

- *He looked up "dotted gayfeather" because he had never seen it before.*
- *In class, the teacher used "dotted gayfeather" to mean herb with many stems bearing narrow slender wands....*

dourah *(noun)*

Sorghums of dry regions of Asia and North Africa.

- *She wrote a short paragraph that included "dourah."*
- *He looked up "dourah" because he had never seen it before.*

dovyalis *(noun)*

Small genus of sometimes spiny shrubs or small trees; Africa; India; Sri Lanka.

- *They discussed "dovyalis" during the group presentation.*
- *The article explained what "dovyalis" means with a simple example.*

dovyalis caffra *(noun)*

Vigorous South African spiny shrub grown for its round yellow juicy edible fruits.

- *In class, the teacher used "dovyalis caffra" to mean vigorous south african spiny shrub grown for its....*
- *They discussed "dovyalis caffra" during the group presentation.*

dovyalis hebecarpa *(noun)*

A small shrubby spiny tree cultivated for its maroon-purple fruit with sweet purple pulp tasting like gooseberries; Sri Lanka and India.

- *In class, the teacher used "dovyalis hebecarpa" to mean a small shrubby spiny tree cultivated for its....*
- *Understanding "dovyalis hebecarpa" helps you talk about this topic clearly.*

downy bromegrass *(noun)*

Annual or winter annual grass with softly hairy leaves of the Mediterranean.

- *Understanding "downy bromegrass" helps you talk about this topic clearly.*
- *In class, the teacher used "downy bromegrass" to mean annual or winter annual grass with softly hairy....*

dracaenaceae *(noun)*

One of two subfamilies to which some classification systems assign some members of the Agavaceae.

- *She wrote a short paragraph that included "dracaenaceae."*
- *He looked up "dracaenaceae" because he had never seen it before.*

dracenaceae *(noun)*

One of two subfamilies to which some classification systems assign some members of the Agavaceae.

- *In class, the teacher used "dracenaceae" to mean one of two subfamilies to which some classification....*
- *The article explained what "dracenaceae" means with a simple example.*

---

dracocephalum *(noun)*

Genus of American herbs and dwarf shrubs of the mind family: dragonheads.

- *In class, the teacher used "dracocephalum" to mean genus of american herbs and dwarf shrubs of the....*
- *They discussed "dracocephalum" during the group presentation.*

---

dracocephalum parviflorum *(noun)*

American herb having sharply serrate lanceolate leaves and spikes of blue to violet flowers.

- *The article explained what "dracocephalum parviflorum" means with a simple example.*
- *She wrote a short paragraph that included "dracocephalum parviflorum."*

---

dracontium *(noun)*

Any plant of the genus Dracontium; strongly malodorous tropical American plants usually with gigantic leaves.

- *He looked up "dracontium" because he had never seen it before.*
- *She wrote a short paragraph that included "dracontium."*

---

drimys *(noun)*

Shrubs and trees of southern hemisphere having aromatic foliage.

- *He looked up "drimys" because he had never seen it before.*
- *Understanding "drimys" helps you talk about this topic clearly.*

---

drimys winteri *(noun)*

South American evergreen tree yielding winter's bark and a light soft wood similar to basswood.

- *Understanding "drimys winteri" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "drimys winteri."*

---

dropseed *(noun)*

A grass of the genus Sporobolus.

- *Understanding "dropseed" helps you talk about this topic clearly.*
- *He looked up "dropseed" because he had never seen it before.*

---

droseraceae *(noun)*

A family of carnivorous herbs and shrubs.

- *He looked up "droseraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "droseraceae."*

---

drosophyllum *(noun)*

One species.

- *He looked up "drosophyllum" because he had never seen it before.*
- *She wrote a short paragraph that included "drosophyllum."*

---

drosophyllum lusitanicum *(noun)*

Perennial of dry habitats whose leaves have glandular hairs that secrete adhesive and digestive fluid for capture and digestion of insects; Portugal, southern Spain and Morocco.

- *He looked up "drosophyllum lusitanicum" because he had never seen it before.*
- *She wrote a short paragraph that included "drosophyllum lusitanicum."*

---

drupelet *(noun)*

A small part of an aggregate fruit that resembles a drupe.

- *They discussed "drupelet" during the group presentation.*
- *She wrote a short paragraph that included "drupelet."*

---

dryadella *(noun)*

Comprises tropical American species usually placed in genus Masdevallia: very dwarf plants having short tufted and usually unifoliate stems with usually solitary flowers.

- *He looked up "dryadella" because he had never seen it before.*

- *They discussed "dryadella" during the group presentation.*

---

dryas octopetala *(noun)*

Creeping evergreen shrub with large white flowers; widely distributed in northern portions of Eurasia and North America.

- *The article explained what "dryas octopetala" means with a simple example.*
- *She wrote a short paragraph that included "dryas octopetala."*

---

drymoglossum *(noun)*

Epiphytic ferns of Madagascar to tropical Asia and New Guinea.

- *She wrote a short paragraph that included "drymoglossum."*
- *He looked up "drymoglossum" because he had never seen it before.*

---

drynaria *(noun)*

Large robust epiphytic ferns of tropical forest and scrub; Africa and Asia and Australia.

- *In class, the teacher used "drynaria" to mean large robust epiphytic ferns of tropical forest and....*
- *They discussed "drynaria" during the group presentation.*

---

drynaria rigidula *(noun)*

Giant epiphytic or lithophytic fern; Asia to Polynesia and Australia.

- *They discussed "drynaria rigidula" during the group presentation.*
- *She wrote a short paragraph that included "drynaria rigidula."*

---

dryopteridaceae *(noun)*

Alternative names for one of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *They discussed "dryopteridaceae" during the group presentation.*
- *She wrote a short paragraph that included "dryopteridaceae."*

---

dryopteris filix-mas *(noun)*

Fern of North America and Europe whose rhizomes and stalks yield an oleoresin used to expel tapeworms.

- *She wrote a short paragraph that included "dryopteris filix-mas."*
- *The article explained what "dryopteris filix-mas" means with a simple example.*

---

dryopteris goldiana *(noun)*

North American fern with a blackish lustrous stipe.

- *He looked up "dryopteris goldiana" because he had never seen it before.*
- *In class, the teacher used "dryopteris goldiana" to mean north american fern with a blackish lustrous stipe.*

---

dryopteris hexagonoptera *(noun)*

Beech fern of North American woodlands having straw-colored stripes.

- *In class, the teacher used "dryopteris hexagonoptera" to mean beech fern of north american woodlands having....*
- *They discussed "dryopteris hexagonoptera" during the group presentation.*

---

dryopteris noveboracensis *(noun)*

Slender shield fern of moist woods of eastern North America; sometimes placed in genus Dryopteris.

- *In class, the teacher used "dryopteris noveboracensis" to mean slender shield fern of moist woods of eastern north....*
- *The article explained what "dryopteris noveboracensis" means with a simple example.*

---

dryopteris oreades *(noun)*

A fern of the genus Dryopteris.

- *Understanding "dryopteris oreades" helps you talk about this topic clearly.*
- *In class, the teacher used "dryopteris oreades" to mean a fern of the genus dryopteris.*

---

dryopteris oreopteris *(noun)*

Common European mountain fern having fragrant lemon or balsam scented fronds.

- *The article explained what "dryopteris oreopteris" means with a simple example.*
- *In class, the teacher used "dryopteris oreopteris" to mean common european mountain fern having fragrant lemon....*

---

dryopteris phegopteris *(noun)*

Beech fern of North America and Eurasia.

- *She wrote a short paragraph that included "dryopteris phegopteris."*
- *He looked up "dryopteris phegopteris" because he had never seen it before.*

dryopteris thelypteris *(noun)*

Fern having pinnatifid fronds and growing in wet places; cosmopolitan in north temperate regions.

- *Understanding "dryopteris thelypteris" helps you talk about this topic clearly.*
- *He looked up "dryopteris thelypteris" because he had never seen it before.*

dryopteris thelypteris pubescens *(noun)*

Fern of northeastern North America.

- *In class, the teacher used "dryopteris thelypteris pubescens" to mean fern of northeastern north america.*
- *The article explained what "dryopteris thelypteris pubescens" means with a simple example.*

drypis *(noun)*

Spiny-leaved perennial herb of southern Europe having terminal clusters of small flowers.

- *She wrote a short paragraph that included "drypis."*
- *The article explained what "drypis" means with a simple example.*

duke of argyll's tea tree *(noun)*

Deciduous erect or spreading shrub with spiny branches and violet-purple flowers followed by orange-red berries; southeastern Europe to China.

- *She wrote a short paragraph that included "duke of argyll's tea tree."*
- *The article explained what "duke of argyll's tea tree" means with a simple example.*

dundathu pine *(noun)*

Australian timber tree resembling the kauri but having wood much lighter in weight and softer.

- *She wrote a short paragraph that included "dundathu pine."*
- *Understanding "dundathu pine" helps you talk about this topic clearly.*

duramen *(noun)*

The older inactive central wood of a tree or woody plant; usually darker and denser than the surrounding sapwood.

- *He looked up "duramen" because he had never seen it before.*
- *She wrote a short paragraph that included "duramen."*

durio zibethinus *(noun)*

Tree of southeastern Asia having edible oval fruit with a hard spiny rind.

- *He looked up "durio zibethinus" because he had never seen it before.*
- *In class, the teacher used "durio zibethinus" to mean tree of southeastern asia having edible oval fruit....*

durion *(noun)*

Tree of southeastern Asia having edible oval fruit with a hard spiny rind.

- *The article explained what "durion" means with a simple example.*
- *She wrote a short paragraph that included "durion."*

durmast *(noun)*

Deciduous European oak valued for its tough elastic wood.

- *In class, the teacher used "durmast" to mean deciduous european oak valued for its tough elastic....*
- *They discussed "durmast" during the group presentation.*

dwarf chinkapin oak *(noun)*

Deciduous shrubby tree of northeastern and central United States having a sweet edible nut and often forming dense thickets.

- *In class, the teacher used "dwarf chinkapin oak" to mean deciduous shrubby tree of northeastern and central....*
- *Understanding "dwarf chinkapin oak" helps you talk about this topic clearly.*

dwarf golden chinkapin *(noun)*

Evergreen shrub similar to golden chinkapin; mountains of California.

- *In class, the teacher used "dwarf golden chinkapin" to mean evergreen shrub similar to golden chinkapin;....*
- *They discussed "dwarf golden chinkapin" during the group presentation.*

---

dwarf hulsea *(noun)*

Similar to but smaller than alpine hulsea.

- *In class, the teacher used "dwarf hulsea" to mean similar to but smaller than alpine hulsea.*
- *The article explained what "dwarf hulsea" means with a simple example.*

---

dwarf lycopod *(noun)*

Tufted spikemoss forming loose spreading mats; eastern North America.

- *In class, the teacher used "dwarf lycopod" to mean tufted spikemoss forming loose spreading mats;....*
- *The article explained what "dwarf lycopod" means with a simple example.*

---

dwarf nipplewort *(noun)*

Small European herb with small yellow flowers.

- *He looked up "dwarf nipplewort" because he had never seen it before.*
- *In class, the teacher used "dwarf nipplewort" to mean small european herb with small yellow flowers.*

---

dyer's greenweed *(noun)*

Small Eurasian shrub having clusters of yellow flowers that yield a dye; common as a weed in Britain and the United States; sometimes grown as an ornamental.

- *In class, the teacher used "dyer's greenweed" to mean small eurasian shrub having clusters of yellow....*
- *He looked up "dyer's greenweed" because he had never seen it before.*

---

dyeweed *(noun)*

Small Eurasian shrub having clusters of yellow flowers that yield a dye; common as a weed in Britain and the United States; sometimes grown as an ornamental.

- *They discussed "dyeweed" during the group presentation.*
- *In class, the teacher used "dyeweed" to mean small eurasian shrub having clusters of yellow....*

---

earleaved umbrella tree *(noun)*

Small erect deciduous tree with large leaves in coiled formations at branch tips.

- *They discussed "earleaved umbrella tree" during the group presentation.*
- *The article explained what "earleaved umbrella tree" means with a simple example.*

---

earthball *(noun)*

Any of various fungi of the genus Scleroderma having hard-skinned subterranean fruiting bodies resembling truffles.

- *She wrote a short paragraph that included "earthball."*
- *He looked up "earthball" because he had never seen it before.*

---

earthnut *(noun)*

A common European plant having edible tubers with the flavor of roasted chestnuts.

- *They discussed "earthnut" during the group presentation.*
- *The article explained what "earthnut" means with a simple example.*

---

earthnut pea *(noun)*

European herb bearing small tubers used for food and in Scotland to flavor whiskey.

- *They discussed "earthnut pea" during the group presentation.*
- *Understanding "earthnut pea" helps you talk about this topic clearly.*

---

earthstar *(noun)*

Any fungus of the family Geastraceae; in form suggesting a puffball whose outer peridium splits into the shape of a star.

- *Understanding "earthstar" helps you talk about this topic clearly.*
- *He looked up "earthstar" because he had never seen it before.*

---

earthtongue *(noun)*

Any club-shaped fungus of the genus Geoglossum.

- *Understanding "earthtongue" helps you talk about this topic clearly.*
- *In class, the teacher used "earthtongue" to mean any club-shaped fungus of the genus geoglossum.*

ebenaceae *(noun)*

Fruit and timber trees of tropical and warm regions including ebony and persimmon.

- *They discussed "ebenaceae" during the group presentation.*
- *The article explained what "ebenaceae" means with a simple example.*

ebenales *(noun)*

Trees or shrubs of the families Ebenaceae or Sapotaceae or Styracaceae or Symplocaceae.

- *The article explained what "ebenales" means with a simple example.*
- *In class, the teacher used "ebenales" to mean trees or shrubs of the families ebenaceae or....*

ebony spleenwort *(noun)*

Common North American fern with polished black stripes.

- *In class, the teacher used "ebony spleenwort" to mean common north american fern with polished black stripes.*
- *Understanding "ebony spleenwort" helps you talk about this topic clearly.*

eburophyton *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *The article explained what "eburophyton" means with a simple example.*
- *They discussed "eburophyton" during the group presentation.*

eburophyton austinae *(noun)*

Waxy white nearly leafless plant with stems in clusters and racemes of white flowers; northwestern United States to northern California and east to Idaho.

- *They discussed "eburophyton austinae" during the group presentation.*
- *The article explained what "eburophyton austinae" means with a simple example.*

ecballium *(noun)*

Exploding cucumber; squirting cucumber.

- *In class, the teacher used "ecballium" to mean exploding cucumber; squirting cucumber.*
- *He looked up "ecballium" because he had never seen it before.*

ecballium elaterium *(noun)*

Mediterranean vine having oblong fruit that when ripe expels its seeds and juice violently when touched.

- *He looked up "ecballium elaterium" because he had never seen it before.*
- *In class, the teacher used "ecballium elaterium" to mean mediterranean vine having oblong fruit that when....*

echinocactus grusonii *(noun)*

Large cactus of east central Mexico having golden to pale yellow flowers and spines.

- *She wrote a short paragraph that included "echinocactus grusonii."*
- *He looked up "echinocactus grusonii" because he had never seen it before.*

echinocereus *(noun)*

Large genus of low-growing shrubby ribbed cacti of Mexico and southwestern United States.

- *They discussed "echinocereus" during the group presentation.*
- *Understanding "echinocereus" helps you talk about this topic clearly.*

echinochloa crusgalli *(noun)*

A coarse annual panic grass; a cosmopolitan weed; occasionally used for hay or grazing.

- *They discussed "echinochloa crusgalli" during the group presentation.*
- *Understanding "echinochloa crusgalli" helps you talk about this topic clearly.*

echinochloa frumentacea *(noun)*

Coarse annual grass cultivated in Japan and southeastern Asia for its edible seeds and for forage; important wildlife food in United States.

- *He looked up "echinochloa frumentacea" because he had never seen it before.*
- *Understanding "echinochloa frumentacea" helps you talk about this topic clearly.*

echinops *(noun)*

Genus of Mediterranean and Eurasian herbs: globe thistles.

- *They discussed "echinops" during the group presentation.*
- *Understanding "echinops" helps you talk about this topic clearly.*

---

effervescing *(adjective)*

Emitting or filled with bubbles as from carbonation or fermentation.

- *A "effervescing" approach may work better in this case.*
- *Students compared "effervescing" with similar adjectives in the lesson.*

---

eichhornia spesiosa *(noun)*

A tropical floating aquatic plant having spikes of large blue flowers; troublesome in clogging waterways especially in southern United States.

- *The article explained what "eichhornia spesiosa" means with a simple example.*
- *Understanding "eichhornia spesiosa" helps you talk about this topic clearly.*

---

elaeagnaceae *(noun)*

Shrubs or small trees often armed.

- *In class, the teacher used "elaeagnaceae" to mean shrubs or small trees often armed.*
- *He looked up "elaeagnaceae" because he had never seen it before.*

---

elaeagnus augustifolia *(noun)*

Deciduous shrubby tree of Europe and western Asia having grey leaves and small yellow fruits covered in silvery scales; sometimes spiny.

- *In class, the teacher used "elaeagnus augustifolia" to mean deciduous shrubby tree of europe and western asia....*
- *The article explained what "elaeagnus augustifolia" means with a simple example.*

---

elaeagnus commutata *(noun)*

Deciduous unarmed North American shrub with silvery leaves and fruits.

- *Understanding "elaeagnus commutata" helps you talk about this topic clearly.*
- *They discussed "elaeagnus commutata" during the group presentation.*

---

elaeocarpaceae *(noun)*

Genus of trees and shrubs widely distributed in warm regions some yielding useful timber; in some classifications included in the family Santalaceae.

- *She wrote a short paragraph that included "elaeocarpaceae."*
- *He looked up "elaeocarpaceae" because he had never seen it before.*

---

elaeocarpus *(noun)*

Type genus of the family Elaeocarpaceae.

- *Understanding "elaeocarpus" helps you talk about this topic clearly.*
- *They discussed "elaeocarpus" during the group presentation.*

---

elaeocarpus family *(noun)*

Genus of trees and shrubs widely distributed in warm regions some yielding useful timber; in some classifications included in the family Santalaceae.

- *He looked up "elaeocarpus family" because he had never seen it before.*
- *They discussed "elaeocarpus family" during the group presentation.*

---

elaeocarpus grandis *(noun)*

Australian tree having hard white timber and glossy green leaves with white flowers followed by one-seeded glossy blue fruit.

- *He looked up "elaeocarpus grandis" because he had never seen it before.*
- *She wrote a short paragraph that included "elaeocarpus grandis."*

---

elecampane *(noun)*

Tall coarse Eurasian herb having daisylike yellow flowers with narrow petals whose rhizomatous roots are used medicinally.

- *The article explained what "elecampane" means with a simple example.*
- *They discussed "elecampane" during the group presentation.*

---

elegant brodiaea *(noun)*

Brodiaea having an umbel of violet or blue-violet flowers atop a leafless stalk; northern Oregon to southern California.

- *She wrote a short paragraph that included "elegant brodiaea."*

- *Understanding "elegant brodiaea" helps you talk about this topic clearly.*

eleocharis acicularis *(noun)*

Fine-leaved aquatic spike rush; popular as aerator for aquariums.

- *She wrote a short paragraph that included "eleocharis acicularis."*
- *He looked up "eleocharis acicularis" because he had never seen it before.*

elephantopus *(noun)*

Perennial American herb.

- *Understanding "elephantopus" helps you talk about this topic clearly.*
- *He looked up "elephantopus" because he had never seen it before.*

elettaria cardamomum *(noun)*

Rhizomatous herb of India having aromatic seeds used as seasoning.

- *The article explained what "elettaria cardamomum" means with a simple example.*
- *In class, the teacher used "elettaria cardamomum" to mean rhizomatous herb of india having aromatic seeds....*

eleusine coracana *(noun)*

East Indian cereal grass whose seed yield a somewhat bitter flour, a staple in the Orient.

- *He looked up "eleusine coracana" because he had never seen it before.*
- *Understanding "eleusine coracana" helps you talk about this topic clearly.*

elkwood *(noun)*

Small deciduous tree of eastern North America having creamy white flowers and large leaves in formations like umbrellas at the ends of branches.

- *She wrote a short paragraph that included "elkwood."*
- *The article explained what "elkwood" means with a simple example.*

elsholtzia *(noun)*

Any of various aromatic herbs of the genus Elsholtzia having blue or purple flowers in one-sided spikes.

- *She wrote a short paragraph that included "elsholtzia."*
- *The article explained what "elsholtzia" means with a simple example.*

elymus condensatus *(noun)*

Stout perennial grass of western North America.

- *He looked up "elymus condensatus" because he had never seen it before.*
- *Understanding "elymus condensatus" helps you talk about this topic clearly.*

elymus trachycaulos *(noun)*

North American grass cultivated in western United States as excellent forage crop.

- *The article explained what "elymus trachycaulos" means with a simple example.*
- *In class, the teacher used "elymus trachycaulos" to mean north american grass cultivated in western united....*

embothrium *(noun)*

Small genus of South American evergreen shrubs or small trees with long willowy branches and flowers in flamboyant terminal clusters.

- *He looked up "embothrium" because he had never seen it before.*
- *Understanding "embothrium" helps you talk about this topic clearly.*

embothrium coccineum *(noun)*

Grown for outstanding display of brilliant usually scarlet-crimson flowers; Andes.

- *Understanding "embothrium coccineum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "embothrium coccineum."*

emilia flammea *(noun)*

Tropical African annual having scarlet tassel-shaped flower heads; sometimes placed in genus Cacalia.

- *In class, the teacher used "emilia flammea" to mean tropical african annual having scarlet....*
- *Understanding "emilia flammea" helps you talk about this topic clearly.*

emmanthe *(noun)*

One species: yellow bells.

- *She wrote a short paragraph that included "emmanthe."*
- *The article explained what "emmanthe" means with a simple example.*

---

emmanthe penduliflora *(noun)*

Viscid herb of arid or desert habitats of southwestern United States having pendulous yellow flowers.

- *He looked up "emmanthe penduliflora" because he had never seen it before.*
- *Understanding "emmanthe penduliflora" helps you talk about this topic clearly.*

---

empetraceae *(noun)*

Heathlike shrubs.

- *Understanding "empetraceae" helps you talk about this topic clearly.*
- *The article explained what "empetraceae" means with a simple example.*

---

enation *(noun)*

A natural projection or outgrowth from a plant body or organ.

- *In class, the teacher used "enation" to mean a natural projection or outgrowth from a plant body....*
- *Understanding "enation" helps you talk about this topic clearly.*

---

encelia *(noun)*

Genus of shrubs of southwestern United States and Mexico: brittlebush.

- *She wrote a short paragraph that included "encelia."*
- *Understanding "encelia" helps you talk about this topic clearly.*

---

encelia farinosa *(noun)*

Fragrant rounded shrub of southwestern United States and adjacent Mexico having brittle stems and small crowded blue-green leaves and yellow flowers; produces a resin used in incense and varnish and in folk medicine.

- *Understanding "encelia farinosa" helps you talk about this topic clearly.*
- *He looked up "encelia farinosa" because he had never seen it before.*

---

enceliopsis *(noun)*

Small genus of xerophytic herbs of southwestern United States.

- *In class, the teacher used "enceliopsis" to mean small genus of xerophytic herbs of southwestern....*
- *He looked up "enceliopsis" because he had never seen it before.*

---

enceliopsis nudicaulis *(noun)*

Herb having a basal cluster of grey-green leaves and leafless stalks each with a solitary broad yellow flower head; desert areas Idaho to Arizona.

- *She wrote a short paragraph that included "enceliopsis nudicaulis."*
- *The article explained what "enceliopsis nudicaulis" means with a simple example.*

---

encephalartos *(noun)*

Any of numerous cycads of the genus Encephalartos having stout cylindrical trunks and a terminal crown of long often spiny pinnate leaves.

- *They discussed "encephalartos" during the group presentation.*
- *The article explained what "encephalartos" means with a simple example.*

---

encephalartos caffer *(noun)*

South African cycad; the farinaceous pith of the fruit used as food.

- *He looked up "encephalartos caffer" because he had never seen it before.*
- *In class, the teacher used "encephalartos caffer" to mean south african cycad; the farinaceous pith of the....*

---

enchanter's nightshade *(noun)*

Any of several erect perennial rhizomatous herbs of the genus Circaea having white flowers that open at dawn; northern hemisphere.

- *The article explained what "enchanter's nightshade" means with a simple example.*
- *Understanding "enchanter's nightshade" helps you talk about this topic clearly.*

---

encyclia *(noun)*

Large genus of epiphytic and lithophytic orchids of tropical and subtropical Americas and West Indies; formerly included in genus Epidendrum.

- *In class, the teacher used "encyclia" to mean large genus of epiphytic and lithophytic orchids of....*
- *Understanding "encyclia" helps you talk about this topic clearly.*

---

encyclia citrina *(noun)*

Mexican epiphytic orchid with glaucous grey-green leaves and lemon- to golden-yellow flowers appearing only partially opened; sometimes placed in genus Cattleya.

- *He looked up "encyclia citrina" because he had never seen it before.*
- *She wrote a short paragraph that included "encyclia citrina."*

---

encyclia tampensis *(noun)*

Orchid of Florida and the Bahamas having showy brightly colored flowers; sometimes placed in genus Epidendrum.

- *He looked up "encyclia tampensis" because he had never seen it before.*
- *In class, the teacher used "encyclia tampensis" to mean orchid of florida and the bahamas having showy....*

---

encyclia venosa *(noun)*

Mexican epiphytic orchid having pale green or yellow-green flowers with white purple-veined lip.

- *In class, the teacher used "encyclia venosa" to mean mexican epiphytic orchid having pale green or....*
- *The article explained what "encyclia venosa" means with a simple example.*

---

endogen *(noun)*

A monocotyledonous flowering plant; the stem grows by deposits on its inside.

- *He looked up "endogen" because he had never seen it before.*
- *They discussed "endogen" during the group presentation.*

---

endomycetales *(noun)*

Fungi having a zygote or a single cell developing directly into an ascus.

- *The article explained what "endomycetales" means with a simple example.*
- *In class, the teacher used "endomycetales" to mean fungi having a zygote or a single cell developing....*

---

engelmann's spruce *(noun)*

Tall spruce of Rocky Mountains and British Columbia with blue-green needles and acutely conic crown; wood used for rough lumber and boxes.

- *They discussed "engelmann's spruce" during the group presentation.*
- *In class, the teacher used "engelmann's spruce" to mean tall spruce of rocky mountains and british columbia....*

---

engelmannia *(noun)*

Common erect hairy perennial of plains and prairies of southern and central United States having flowers that resemble sunflowers.

- *They discussed "engelmannia" during the group presentation.*
- *He looked up "engelmannia" because he had never seen it before.*

---

ensete *(noun)*

Old World tropical herbs: Abyssinian bananas.

- *Understanding "ensete" helps you talk about this topic clearly.*
- *He looked up "ensete" because he had never seen it before.*

---

ensete ventricosum *(noun)*

Large evergreen arborescent herb having huge paddle-shaped leaves and bearing inedible fruit that resemble bananas but edible young flower shoots; sometimes placed in genus Musa.

- *She wrote a short paragraph that included "ensete ventricosum."*
- *Understanding "ensete ventricosum" helps you talk about this topic clearly.*

---

ensiform leaf *(noun)*

A sword-shaped leaf; as of iris.

- *They discussed "ensiform leaf" during the group presentation.*
- *Understanding "ensiform leaf" helps you talk about this topic clearly.*

---

entandrophragma *(noun)*

Cedar mahogany trees.

- *They discussed "entandrophragma" during the group presentation.*
- *The article explained what "entandrophragma" means with a simple example.*

entandrophragma cylindricum *(noun)*

African tree having rather lightweight cedar-scented wood varying in color from pink to reddish brown.

- *In class, the teacher used "entandrophragma cylindricum" to mean african tree having rather lightweight....*
- *The article explained what "entandrophragma cylindricum" means with a simple example.*

entelea *(noun)*

A genus of evergreen shrub that grows in New Zealand.

- *Understanding "entelea" helps you talk about this topic clearly.*
- *He looked up "entelea" because he had never seen it before.*

enterolobium *(noun)*

Small genus of tropical American timber trees closely allied to genus Albizia.

- *They discussed "enterolobium" during the group presentation.*
- *He looked up "enterolobium" because he had never seen it before.*

enterolobium cyclocarpa *(noun)*

Tropical South American tree having a wide-spreading crown of bipinnate leaves and coiled ear-shaped fruits; grown for shade and ornament as well as valuable timber.

- *Understanding "enterolobium cyclocarpa" helps you talk about this topic clearly.*
- *In class, the teacher used "enterolobium cyclocarpa" to mean tropical south american tree having a....*

entoloma *(noun)*

Agarics with pink spores but lacking both volva and annulus (includes some that are poisonous).

- *They discussed "entoloma" during the group presentation.*
- *In class, the teacher used "entoloma" to mean agarics with pink spores but lacking both volva and....*

entoloma aprile *(noun)*

An agaric with a dark brown conical cap; fruits in early spring.

- *Understanding "entoloma aprile" helps you talk about this topic clearly.*
- *They discussed "entoloma aprile" during the group presentation.*

entoloma lividum *(noun)*

A deadly poisonous agaric; a large cap that is first white (livid or lead-colored) and then turns yellowish or tan.

- *She wrote a short paragraph that included "entoloma lividum."*
- *The article explained what "entoloma lividum" means with a simple example.*

entoloma sinuatum *(noun)*

A deadly poisonous agaric; a large cap that is first white (livid or lead-colored) and then turns yellowish or tan.

- *They discussed "entoloma sinuatum" during the group presentation.*
- *He looked up "entoloma sinuatum" because he had never seen it before.*

entolomataceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *He looked up "entolomataceae" because he had never seen it before.*
- *Understanding "entolomataceae" helps you talk about this topic clearly.*

entomophthora *(noun)*

Type genus of the Entomophthoraceae; fungi parasitic on insects.

- *In class, the teacher used "entomophthora" to mean type genus of the entomophthoraceae; fungi....*
- *The article explained what "entomophthora" means with a simple example.*

entomophthoraceae *(noun)*

Mostly parasitic lower fungi that typically develop in the bodies of insects.

- *Understanding "entomophthoraceae" helps you talk about this topic clearly.*
- *He looked up "entomophthoraceae" because he had never seen it before.*

entomophthorales *(noun)*

Coextensive with the family Entomophthoraceae.

- *In class, the teacher used "entomophthorales" to mean coextensive with the family entomophthoraceae.*
- *Understanding "entomophthorales" helps you talk about this topic clearly.*

---

epacridaceae *(noun)*

Australasian shrubs or small trees.

- *They discussed "epacridaceae" during the group presentation.*
- *In class, the teacher used "epacridaceae" to mean australasian shrubs or small trees.*

---

epacris *(noun)*

Any heathlike evergreen shrub of the genus Epacris grown for their showy and crowded spikes of small bell-shaped or tubular flowers.

- *They discussed "epacris" during the group presentation.*
- *In class, the teacher used "epacris" to mean any heathlike evergreen shrub of the genus epacris....*

---

epacris family *(noun)*

Australasian shrubs or small trees.

- *She wrote a short paragraph that included "epacris family."*
- *The article explained what "epacris family" means with a simple example.*

---

epacris impressa *(noun)*

Spindly upright shrub of southern Australia and Tasmania having white to rose or purple-red flowers.

- *They discussed "epacris impressa" during the group presentation.*
- *In class, the teacher used "epacris impressa" to mean spindly upright shrub of southern australia and....*

---

epacris obtusifolia *(noun)*

Small erect shrub of Australia and Tasmania with fragrant ivory flowers.

- *He looked up "epacris obtusifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "epacris obtusifolia."*

---

epacris purpurascens *(noun)*

Small shrub of southern and western Australia having pinkish to rosy purple tubular flowers.

- *He looked up "epacris purpurascens" because he had never seen it before.*
- *She wrote a short paragraph that included "epacris purpurascens."*

---

ephedraceae *(noun)*

Ephedras: in some classifications included in the Gnetaceae.

- *They discussed "ephedraceae" during the group presentation.*
- *Understanding "ephedraceae" helps you talk about this topic clearly.*

---

epicalyx *(noun)*

A group of bracts simulating a calyx as in a carnation or hibiscus.

- *They discussed "epicalyx" during the group presentation.*
- *In class, the teacher used "epicalyx" to mean a group of bracts simulating a calyx as in a....*

---

epicarp *(noun)*

Outermost layer of the pericarp of fruits as the skin of a peach or grape.

- *Understanding "epicarp" helps you talk about this topic clearly.*
- *In class, the teacher used "epicarp" to mean outermost layer of the pericarp of fruits as the....*

---

epidendron *(noun)*

Any of various orchids of the genus Epidendrum.

- *Understanding "epidendron" helps you talk about this topic clearly.*
- *He looked up "epidendron" because he had never seen it before.*

---

epidendrum tampense *(noun)*

Orchid of Florida and the Bahamas having showy brightly colored flowers; sometimes placed in genus Epidendrum.

- *In class, the teacher used "epidendrum tampense" to mean orchid of florida and the bahamas having showy....*

- *He looked up “epidendrum tampense” because he had never seen it before.*

epidendrum venosum *(noun)*

Mexican epiphytic orchid having pale green or yellow-green flowers with white purple-veined lip.

- *He looked up “epidendrum venosum” because he had never seen it before.*
- *In class, the teacher used “epidendrum venosum” to mean mexican epiphytic orchid having pale green or....*

epigaea *(noun)*

Small creeping evergreen shrubs: trailing arbutus.

- *Understanding “epigaea” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “epigaea.”*

epigaea repens *(noun)*

Low-growing evergreen shrub of eastern North America with leathery leaves and clusters of fragrant pink or white flowers.

- *The article explained what “epigaea repens” means with a simple example.*
- *In class, the teacher used “epigaea repens” to mean low-growing evergreen shrub of eastern north....*

epipactis *(noun)*

Genus of hardy orchids with leafy-bracted racemes of greenish or purplish irregular flowers.

- *Understanding “epipactis” helps you talk about this topic clearly.*
- *They discussed “epipactis” during the group presentation.*

epipactis gigantea *(noun)*

Orchid growing along streams or ponds of western North America having leafy stems and 1 greenish-brown and pinkish flower in the axil of each upper leaf.

- *Understanding “epipactis gigantea” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “epipactis gigantea.”*

epipactis helleborine *(noun)*

European orchid with spikes of green and pinkish or purplish flowers.

- *She wrote a short paragraph that included “epipactis helleborine.”*
- *He looked up “epipactis helleborine” because he had never seen it before.*

epipremnum *(noun)*

Small genus of evergreen lianas of southeastern Asia to western Pacific areas.

- *He looked up “epipremnum” because he had never seen it before.*
- *She wrote a short paragraph that included “epipremnum.”*

epipremnum aureum *(noun)*

Evergreen liana widely cultivated for its variegated foliage.

- *She wrote a short paragraph that included “epipremnum aureum.”*
- *The article explained what “epipremnum aureum” means with a simple example.*

episcia *(noun)*

Any plant of the genus Episcia; usually creeping and stoloniferous and of cascading habit; grown for their colorful foliage and flowers.

- *Understanding “episcia” helps you talk about this topic clearly.*
- *He looked up “episcia” because he had never seen it before.*

episcia dianthiflora *(noun)*

Low-growing creeping perennial of Central America having deeply fringed white flowers; sometimes placed in genus Episcia.

- *She wrote a short paragraph that included “episcia dianthiflora.”*
- *He looked up “episcia dianthiflora” because he had never seen it before.*

episperm *(noun)*

Protective outer layer of seeds of flowering plants.

- *They discussed “episperm” during the group presentation.*
- *She wrote a short paragraph that included “episperm.”*

equisetaceae *(noun)*

Sole surviving family of the Equisetales: fern allies.

- *The article explained what "equisetaceae" means with a simple example.*
- *Understanding "equisetaceae" helps you talk about this topic clearly.*

---

equisetales *(noun)*

Lower tracheophytes in existence since the Devonian.

- *She wrote a short paragraph that included "equisetales."*
- *They discussed "equisetales" during the group presentation.*

---

equisetatae *(noun)*

Horsetails and related forms.

- *The article explained what "equisetatae" means with a simple example.*
- *In class, the teacher used "equisetatae" to mean horsetails and related forms.*

---

equisetum hyemale *(noun)*

Evergreen erect horsetail with rough-edged stems; formerly used for scouring utensils.

- *The article explained what "equisetum hyemale" means with a simple example.*
- *She wrote a short paragraph that included "equisetum hyemale."*

---

equisetum hyemale robustum *(noun)*

Evergreen erect horsetail with rough-edged stems; formerly used for scouring utensils.

- *Understanding "equisetum hyemale robustum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "equisetum hyemale robustum."*

---

equisetum robustum *(noun)*

Evergreen erect horsetail with rough-edged stems; formerly used for scouring utensils.

- *The article explained what "equisetum robustum" means with a simple example.*
- *Understanding "equisetum robustum" helps you talk about this topic clearly.*

---

equisetum sylvaticum *(noun)*

Eurasia except southern Russia; northern North America.

- *She wrote a short paragraph that included "equisetum sylvaticum."*
- *Understanding "equisetum sylvaticum" helps you talk about this topic clearly.*

---

eragrostic abyssinica *(noun)*

An African grass economically important as a cereal grass (yielding white flour of good quality) as well as for forage and hay.

- *The article explained what "eragrostic abyssinica" means with a simple example.*
- *In class, the teacher used "eragrostic abyssinica" to mean an african grass economically important as a cereal....*

---

eragrostis curvula *(noun)*

Perennial South African grass having densely clumped flimsy stems; introduced into United States especially for erosion control.

- *The article explained what "eragrostis curvula" means with a simple example.*
- *Understanding "eragrostis curvula" helps you talk about this topic clearly.*

---

eranthis *(noun)*

Winter aconite.

- *He looked up "eranthis" because he had never seen it before.*
- *In class, the teacher used "eranthis" to mean winter aconite.*

---

eranthis hyemalis *(noun)*

Small Old World perennial herb grown for its bright yellow flowers which appear in early spring often before snow is gone.

- *Understanding "eranthis hyemalis" helps you talk about this topic clearly.*
- *He looked up "eranthis hyemalis" because he had never seen it before.*

---

erechtites hieracifolia *(noun)*

An American weedy plant with small white or greenish flowers.

- *In class, the teacher used "erechtites hieracifolia" to mean an american weedy plant with small white or....*
- *He looked up "erechtites hieracifolia" because he had never seen it before.*

---

erianthus *(noun)*

Genus of reedlike grasses having spikes crowded in a panicle covered with long silky hairs.

- *She wrote a short paragraph that included "erianthus."*
- *They discussed "erianthus" during the group presentation.*

---

erianthus ravennae *(noun)*

Grass often cultivated for its long white-ribbed leaves and large plumes resembling those of pampas grass.

- *They discussed "erianthus ravennae" during the group presentation.*
- *She wrote a short paragraph that included "erianthus ravennae."*

---

erica lusitanica *(noun)*

Erect dense shrub native to western Iberian peninsula having profuse white or pink flowers; naturalized in southwestern England.

- *The article explained what "erica lusitanica" means with a simple example.*
- *She wrote a short paragraph that included "erica lusitanica."*

---

erica perspicua *(noun)*

South African shrub grown for its profusion of white flowers.

- *Understanding "erica perspicua" helps you talk about this topic clearly.*
- *In class, the teacher used "erica perspicua" to mean south african shrub grown for its profusion of....*

---

erica tetralix *(noun)*

Dwarf European shrub with rose-colored flowers.

- *The article explained what "erica tetralix" means with a simple example.*
- *They discussed "erica tetralix" during the group presentation.*

---

ericales *(noun)*

Ericaceae; Clethraceae; Diapensiaceae; Epacridaceae; Lennoaceae; Pyrolaceae; Monotropaceae.

- *In class, the teacher used "ericales" to mean ericaceae; clethraceae; diapensiaceae;....*
- *Understanding "ericales" helps you talk about this topic clearly.*

---

erigeron aurantiacus *(noun)*

Mat-forming herb of Turkestan with nearly double orange-yellow flowers.

- *They discussed "erigeron aurantiacus" during the group presentation.*
- *The article explained what "erigeron aurantiacus" means with a simple example.*

---

erigeron divergens *(noun)*

Well-branched plant with hairy leaves and stems each with a solitary flower head with narrow white or pink or lavender rays; western North America.

- *He looked up "erigeron divergens" because he had never seen it before.*
- *She wrote a short paragraph that included "erigeron divergens."*

---

erigeron philadelphicus *(noun)*

Especially pretty plant having a delicate fringe of threadlike rays around flower heads having very slender white or pink rays; United States and Canada.

- *Understanding "erigeron philadelphicus" helps you talk about this topic clearly.*
- *The article explained what "erigeron philadelphicus" means with a simple example.*

---

erigeron pulchellus *(noun)*

Common perennial of eastern North America having flowers with usually violet-purple rays.

- *In class, the teacher used "erigeron pulchellus" to mean common perennial of eastern north america having....*
- *Understanding "erigeron pulchellus" helps you talk about this topic clearly.*

---

erigonum fasciculatum *(noun)*

Low-growing shrub with spreading branches and flowers in loose heads; desert regions of western United States (California to Utah).

- *They discussed "erigonum fasciculatum" during the group presentation.*
- *In class, the teacher used "erigonum fasciculatum" to mean low-growing shrub with spreading branches and....*

eringo *(noun)*

Any plant of the genus Eryngium.

- *Understanding "eringo" helps you talk about this topic clearly.*
- *He looked up "eringo" because he had never seen it before.*

eriobotrya *(noun)*

Asiatic evergreen fruit trees.

- *Understanding "eriobotrya" helps you talk about this topic clearly.*
- *The article explained what "eriobotrya" means with a simple example.*

eriobotrya japonica *(noun)*

Evergreen tree of warm regions having fuzzy yellow olive-sized fruit with a large free stone; native to China and Japan.

- *She wrote a short paragraph that included "eriobotrya japonica."*
- *The article explained what "eriobotrya japonica" means with a simple example.*

eriocaulaceae *(noun)*

Chiefly tropical aquatic or bog herbs: pipeworts.

- *The article explained what "eriocaulaceae" means with a simple example.*
- *She wrote a short paragraph that included "eriocaulaceae."*

eriocaulon *(noun)*

Type genus of the Eriocaulaceae: rushlike aquatic or marginal perennials usually found in shallow waters of acid lakes and pools and bogs.

- *They discussed "eriocaulon" during the group presentation.*
- *In class, the teacher used "eriocaulon" to mean type genus of the eriocaulaceae: rushlike aquatic....*

eriocaulon aquaticum *(noun)*

Aquatic perennial of North America and Ireland and Hebrides having translucent green leaves in a basal spiral and dense buttonlike racemes of minute white flowers.

- *They discussed "eriocaulon aquaticum" during the group presentation.*
- *The article explained what "eriocaulon aquaticum" means with a simple example.*

eriodictyon *(noun)*

Small genus of evergreen shrubs of southwestern United States and Mexico.

- *They discussed "eriodictyon" during the group presentation.*
- *In class, the teacher used "eriodictyon" to mean small genus of evergreen shrubs of southwestern....*

eriodictyon californicum *(noun)*

Viscid evergreen shrub of western United States with white to deep lilac flowers; the sticky aromatic leaves are used in treating bronchial and pulmonary illnesses.

- *They discussed "eriodictyon californicum" during the group presentation.*
- *He looked up "eriodictyon californicum" because he had never seen it before.*

eriogonum allenii *(noun)*

Late blooming perennial plant of shale barrens of Virginia having flowers in flat-topped clusters.

- *She wrote a short paragraph that included "eriogonum allenii."*
- *The article explained what "eriogonum allenii" means with a simple example.*

eriophyllum *(noun)*

Genus of hairy herbs and shrubs of western North America.

- *He looked up "eriophyllum" because he had never seen it before.*
- *She wrote a short paragraph that included "eriophyllum."*

eriophyllum lanatum *(noun)*

Greyish woolly leafy perennial with branched stems ending in leafless stalks bearing golden-yellow flower heads; dry areas western North America.

- *He looked up "eriophyllum lanatum" because he had never seen it before.*
- *They discussed "eriophyllum lanatum" during the group presentation.*

eriophyllum wallacei *(noun)*

Tiny grey woolly tufted annual with small golden-yellow flower heads; southeastern California to northwestern Arizona and southwestern Utah; sometimes placed in genus Eriophyllum.

- *In class, the teacher used "eriophyllum wallacei" to mean tiny grey woolly tufted annual with small....*
- *The article explained what "eriophyllum wallacei" means with a simple example.*

---

erodium cicutarium *(noun)*

European weed naturalized in southwestern United States and Mexico having reddish decumbent stems with small fernlike leaves and small deep reddish-lavender flowers followed by slender fruits that stick straight up; often grown for forage.

- *She wrote a short paragraph that included "erodium cicutarium."*
- *The article explained what "erodium cicutarium" means with a simple example.*

---

erodium moschatum *(noun)*

Low annual European herb naturalized in America; similar to alfilaria.

- *Understanding "erodium moschatum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "erodium moschatum."*

---

erodium texanum *(noun)*

Of prairies and desert areas of southwestern United States and Mexico.

- *They discussed "erodium texanum" during the group presentation.*
- *She wrote a short paragraph that included "erodium texanum."*

---

erose leaf *(noun)*

A leaf having a jagged margin as though gnawed.

- *He looked up "erose leaf" because he had never seen it before.*
- *In class, the teacher used "erose leaf" to mean a leaf having a jagged margin as though gnawed.*

---

eruca *(noun)*

Annual to perennial herbs of the Mediterranean region.

- *In class, the teacher used "eruca" to mean annual to perennial herbs of the mediterranean region.*
- *They discussed "eruca" during the group presentation.*

---

eruca sativa *(noun)*

Erect European annual often grown as a salad crop to be harvested when young and tender.

- *Understanding "eruca sativa" helps you talk about this topic clearly.*
- *The article explained what "eruca sativa" means with a simple example.*

---

eruca vesicaria sativa *(noun)*

Erect European annual often grown as a salad crop to be harvested when young and tender.

- *She wrote a short paragraph that included "eruca vesicaria sativa."*
- *Understanding "eruca vesicaria sativa" helps you talk about this topic clearly.*

---

eryngium aquaticum *(noun)*

Coarse prickly perennial eryngo with aromatic roots; southeastern United States; often confused with rattlesnake master.

- *He looked up "eryngium aquaticum" because he had never seen it before.*
- *In class, the teacher used "eryngium aquaticum" to mean coarse prickly perennial eryngo with aromatic....*

---

eryngium yuccifolium *(noun)*

Coarse prickly perennial eryngo of United States thought to cure rattlesnake bite.

- *They discussed "eryngium yuccifolium" during the group presentation.*
- *The article explained what "eryngium yuccifolium" means with a simple example.*

---

eryngo *(noun)*

Any plant of the genus Eryngium.

- *In class, the teacher used "eryngo" to mean any plant of the genus eryngium.*
- *Understanding "eryngo" helps you talk about this topic clearly.*

---

erysimum allionii *(noun)*

Showy erect biennial or short-lived perennial cultivated for its terminal racemes of orange-yellow flowers; sometimes placed in genus Cheiranthus.

- *Understanding "erysimum allionii" helps you talk about this topic clearly.*

- *They discussed "erysimum allionii" during the group presentation.*

---

erysimum arkansanum *(noun)*

Biennial or short-lived perennial prairie rocket having orange-yellow flowers; western North America to Minnesota and Kansas; sometimes placed in genus Cheiranthus.

- *He looked up "erysimum arkansanum" because he had never seen it before.*
- *They discussed "erysimum arkansanum" during the group presentation.*

---

erysimum asperum *(noun)*

Biennial or short-lived perennial prairie rocket having orange-yellow flowers; western North America to Minnesota and Kansas; sometimes placed in genus Cheiranthus.

- *Understanding "erysimum asperum" helps you talk about this topic clearly.*
- *The article explained what "erysimum asperum" means with a simple example.*

---

erysimum cheiranthoides *(noun)*

Slender yellow-flowered European mustard often troublesome as a weed; formerly used as an anthelmintic.

- *They discussed "erysimum cheiranthoides" during the group presentation.*
- *The article explained what "erysimum cheiranthoides" means with a simple example.*

---

erysimum cheiri *(noun)*

Perennial of southern Europe having clusters of fragrant flowers of all colors especially yellow and orange; often naturalized on old walls or cliffs; sometimes placed in genus Erysimum.

- *The article explained what "erysimum cheiri" means with a simple example.*
- *In class, the teacher used "erysimum cheiri" to mean perennial of southern europe having clusters of....*

---

erysiphaceae *(noun)*

Family of fungi parasitic mostly on leaves; includes powdery mildews.

- *She wrote a short paragraph that included "erysiphaceae."*
- *The article explained what "erysiphaceae" means with a simple example.*

---

erysiphales *(noun)*

Saprophytic and parasitic fungi that live on plants.

- *They discussed "erysiphales" during the group presentation.*
- *In class, the teacher used "erysiphales" to mean saprophytic and parasitic fungi that live on plants.*

---

erythrina caffra *(noun)*

Small semi-evergreen broad-spreading tree of eastern South Africa with orange-scarlet flowers and small coral-red seeds; yields a light soft wood used for fence posts or shingles.

- *They discussed "erythrina caffra" during the group presentation.*
- *The article explained what "erythrina caffra" means with a simple example.*

---

erythrina corallodendrum *(noun)*

Deciduous shrub having racemes of deep red flowers and black-spotted red seeds.

- *They discussed "erythrina corallodendrum" during the group presentation.*
- *In class, the teacher used "erythrina corallodendrum" to mean deciduous shrub having racemes of deep red flowers....*

---

erythrina lysistemon *(noun)*

Small semi-evergreen tree of South Africa having dense clusters of clear scarlet flowers and red seeds.

- *She wrote a short paragraph that included "erythrina lysistemon."*
- *He looked up "erythrina lysistemon" because he had never seen it before.*

---

erythrina vespertilio *(noun)*

Prickly Australian coral tree having soft spongy wood.

- *In class, the teacher used "erythrina vespertilio" to mean prickly australian coral tree having soft spongy wood.*
- *Understanding "erythrina vespertilio" helps you talk about this topic clearly.*

---

erythronium albidum *(noun)*

North American dogtooth having solitary white flowers with yellow centers and blue or pink exteriors.

- *Understanding "erythronium albidum" helps you talk about this topic clearly.*
- *The article explained what "erythronium albidum" means with a simple example.*

---

erythroxylaceae *(noun)*

A family of plants of order Geraniales; have drupaceous fruit.

- *They discussed "erythroxylaceae" during the group presentation.*
- *The article explained what "erythroxylaceae" means with a simple example.*

---

erythroxylon *(noun)*

A large genus of South American shrubs and small trees of the family Erythroxylaceae.

- *She wrote a short paragraph that included "erythroxylon."*
- *Understanding "erythroxylon" helps you talk about this topic clearly.*

---

erythroxylon coca *(noun)*

A South American shrub whose leaves are chewed by natives of the Andes; a source of cocaine.

- *She wrote a short paragraph that included "erythroxylon coca."*
- *They discussed "erythroxylon coca" during the group presentation.*

---

erythroxylon truxiuense *(noun)*

A South American shrub whose leaves are a source of cocaine.

- *The article explained what "erythroxylon truxiuense" means with a simple example.*
- *In class, the teacher used "erythroxylon truxiuense" to mean a south american shrub whose leaves are a source of....*

---

erythroxylum *(noun)*

A large genus of South American shrubs and small trees of the family Erythroxylaceae.

- *In class, the teacher used "erythroxylum" to mean a large genus of south american shrubs and small....*
- *The article explained what "erythroxylum" means with a simple example.*

---

eschalot *(noun)*

Type of onion plant producing small clustered mild-flavored bulbs used as seasoning.

- *They discussed "eschalot" during the group presentation.*
- *He looked up "eschalot" because he had never seen it before.*

---

eschscholtzia *(noun)*

Showy herbs of western North America.

- *He looked up "eschscholtzia" because he had never seen it before.*
- *They discussed "eschscholtzia" during the group presentation.*

---

eschscholtzia californica *(noun)*

Of Pacific coast of North America; widely cultivated for its yellow to red flowers.

- *She wrote a short paragraph that included "eschscholtzia californica."*
- *He looked up "eschscholtzia californica" because he had never seen it before.*

---

esparcet *(noun)*

Eurasian perennial herb having pale pink flowers and curved pods; naturalized in Britain and North America grasslands on calcareous soils; important forage crop and source of honey in Britain.

- *The article explained what "esparcet" means with a simple example.*
- *They discussed "esparcet" during the group presentation.*

---

euascomycetes *(noun)*

Category not used in many classification systems.

- *He looked up "euascomycetes" because he had never seen it before.*
- *In class, the teacher used "euascomycetes" to mean category not used in many classification systems.*

---

eubryales *(noun)*

Mosses with perennial erect gametophores and stems with rows of leaves and drooping capsules.

- *In class, the teacher used "eubryales" to mean mosses with perennial erect gametophores and stems....*
- *He looked up "eubryales" because he had never seen it before.*

---

eucalypt gunnii *(noun)*

Small to medium-sized tree of Tasmania.

- *They discussed "eucalypt gunnii" during the group presentation.*
- *In class, the teacher used "eucalypt gunnii" to mean small to medium-sized tree of tasmania.*

---

eucalypt tereticornis *(noun)*

Tall tree of Queensland and New South Wales and Victoria.

- *Understanding "eucalypt tereticornis" helps you talk about this topic clearly.*
- *In class, the teacher used "eucalypt tereticornis" to mean tall tree of queensland and new south wales and....*

---

eucalyptus amygdalina *(noun)*

Red gum tree of Tasmania.

- *He looked up "eucalyptus amygdalina" because he had never seen it before.*
- *In class, the teacher used "eucalyptus amygdalina" to mean red gum tree of tasmania.*

---

eucalyptus calophylla *(noun)*

Very large red gum tree.

- *He looked up "eucalyptus calophylla" because he had never seen it before.*
- *She wrote a short paragraph that included "eucalyptus calophylla."*

---

eucalyptus delegatensis *(noun)*

Tall timber tree with hard heavy pinkish or light brown wood.

- *She wrote a short paragraph that included "eucalyptus delegatensis."*
- *The article explained what "eucalyptus delegatensis" means with a simple example.*

---

eucalyptus dumosa *(noun)*

Small shrubby mallee.

- *Understanding "eucalyptus dumosa" helps you talk about this topic clearly.*
- *He looked up "eucalyptus dumosa" because he had never seen it before.*

---

eucalyptus fraxinoides *(noun)*

Large tree with dark compact bark on lower trunk but smooth and white above; yields lumber similar to that of European or American ashes.

- *They discussed "eucalyptus fraxinoides" during the group presentation.*
- *The article explained what "eucalyptus fraxinoides" means with a simple example.*

---

eucalyptus pauciflora *(noun)*

Small to medium-sized tree of Australia and Tasmania having smooth white to light-grey bark shedding in patches or strips.

- *She wrote a short paragraph that included "eucalyptus pauciflora."*
- *The article explained what "eucalyptus pauciflora" means with a simple example.*

---

eucalyptusd eugenioides *(noun)*

Stringybark having white wood.

- *He looked up "eucalyptusd eugenioides" because he had never seen it before.*
- *Understanding "eucalyptusd eugenioides" helps you talk about this topic clearly.*

---

eucalytus stellulata *(noun)*

A small mallee with rough dark-colored bark toward the butt; yields a red eucalyptus kino gum.

- *In class, the teacher used "eucalytus stellulata" to mean a small mallee with rough dark-colored bark toward....*
- *The article explained what "eucalytus stellulata" means with a simple example.*

---

eucarya *(noun)*

Quandong trees.

- *Understanding "eucarya" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "eucarya."*

---

eucarya acuminata *(noun)*

Australian tree with edible flesh and edible nutlike seed.

- *The article explained what "eucarya acuminata" means with a simple example.*
- *They discussed "eucarya acuminata" during the group presentation.*

eugenia aromaticum *(noun)*

Moderate sized very symmetrical red-flowered evergreen widely cultivated in the tropics for its flower buds which are source of cloves.

- *He looked up "eugenia aromaticum" because he had never seen it before.*
- *She wrote a short paragraph that included "eugenia aromaticum."*

eugenia caryophyllatum *(noun)*

Moderate sized very symmetrical red-flowered evergreen widely cultivated in the tropics for its flower buds which are source of cloves.

- *Understanding "eugenia caryophyllatum" helps you talk about this topic clearly.*
- *In class, the teacher used "eugenia caryophyllatum" to mean moderate sized very symmetrical red-flowered....*

eugenia corynantha *(noun)*

Australian tree with sour red fruit.

- *The article explained what "eugenia corynantha" means with a simple example.*
- *They discussed "eugenia corynantha" during the group presentation.*

eugenia dicrana *(noun)*

Tree of extreme southern Florida and West Indies having thin scaly bark and aromatic fruits and seeds and yielding hard heavy close-grained zebrawood.

- *In class, the teacher used "eugenia dicrana" to mean tree of extreme southern florida and west indies....*
- *They discussed "eugenia dicrana" during the group presentation.*

eumycetes *(noun)*

Category used in some classifications: coextensive with division Eumycota.

- *Understanding "eumycetes" helps you talk about this topic clearly.*
- *In class, the teacher used "eumycetes" to mean category used in some classifications: coextensive....*

eumycota *(noun)*

True fungi; eukaryotic heterotrophic walled organisms; distinguished from Myxomycota (funguslike slime molds): comprises subdivisions Mastigomycotina; Zygomycotina; Ascomycotina; Basidiomycotina; Deuteromycotina (imperfect fungi).

- *She wrote a short paragraph that included "eumycota."*
- *Understanding "eumycota" helps you talk about this topic clearly.*

euonymous alatus *(noun)*

Bushy deciduous shrub with branches having thin wide corky longitudinal wings; brilliant red in autumn; northeastern Asia to central China.

- *Understanding "euonymous alatus" helps you talk about this topic clearly.*
- *He looked up "euonymous alatus" because he had never seen it before.*

euonymus atropurpureus *(noun)*

Deciduous shrub having purple capsules enclosing scarlet seeds.

- *Understanding "euonymus atropurpureus" helps you talk about this topic clearly.*
- *In class, the teacher used "euonymus atropurpureus" to mean deciduous shrub having purple capsules enclosing....*

euonymus radicans vegetus *(noun)*

Broad and bushy Asiatic twining shrub with pinkish fruit; many subspecies or varieties.

- *They discussed "euonymus radicans vegetus" during the group presentation.*
- *In class, the teacher used "euonymus radicans vegetus" to mean broad and bushy asiatic twining shrub with pinkish....*

eupatorium cannabinum *(noun)*

Coarse European herb with palmately divided leaves and clusters of small reddish-purple flower heads.

- *They discussed "eupatorium cannabinum" during the group presentation.*
- *In class, the teacher used "eupatorium cannabinum" to mean coarse european herb with palmately divided leaves....*

eupatorium capillifolium *(noun)*

Weedy plant of southeastern United States having divided leaves and long clusters of greenish flowers.

- *The article explained what "eupatorium capillifolium" means with a simple example.*
- *She wrote a short paragraph that included "eupatorium capillifolium."*

eupatorium coelestinum *(noun)*

Rhizomatous plant of central and southeastern United States and West Indies having large showy heads of clear blue flowers; sometimes placed in genus Eupatorium.

- *She wrote a short paragraph that included "eupatorium coelestinum."*
- *He looked up "eupatorium coelestinum" because he had never seen it before.*

---

eupatorium perfoliatum *(noun)*

Perennial herb of southeastern United States having white-rayed flower heads; formerly used as in folk medicine.

- *She wrote a short paragraph that included "eupatorium perfoliatum."*
- *He looked up "eupatorium perfoliatum" because he had never seen it before.*

---

eupatorium rugosum *(noun)*

American herb having flat-topped clusters of small white flower heads; reputedly a cause of trembles and milk sickness; sometimes placed in genus Eupatorium.

- *The article explained what "eupatorium rugosum" means with a simple example.*
- *She wrote a short paragraph that included "eupatorium rugosum."*

---

euphorbia amygdaloides *(noun)*

European perennial herb with greenish yellow terminal flower clusters.

- *Understanding "euphorbia amygdaloides" helps you talk about this topic clearly.*
- *The article explained what "euphorbia amygdaloides" means with a simple example.*

---

euphorbia antisyphilitica *(noun)*

Wax-coated shrub of northern Mexico and southwestern United States.

- *Understanding "euphorbia antisyphilitica" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "euphorbia antisyphilitica."*

---

euphorbia corollata *(noun)*

Common perennial United States spurge having showy white petallike bracts.

- *Understanding "euphorbia corollata" helps you talk about this topic clearly.*
- *They discussed "euphorbia corollata" during the group presentation.*

---

euphorbia cyathophora *(noun)*

Poinsettia of United States and eastern Mexico; often confused with Euphorbia heterophylla.

- *They discussed "euphorbia cyathophora" during the group presentation.*
- *Understanding "euphorbia cyathophora" helps you talk about this topic clearly.*

---

euphorbia cyparissias *(noun)*

Old World perennial having foliage resembling cypress; naturalized as a weed in the United States.

- *Understanding "euphorbia cyparissias" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "euphorbia cyparissias."*

---

euphorbia esula *(noun)*

Tall European perennial naturalized and troublesome as a weed in eastern North America.

- *They discussed "euphorbia esula" during the group presentation.*
- *She wrote a short paragraph that included "euphorbia esula."*

---

euphorbia helioscopia *(noun)*

Not unattractive European weed whose flowers turn toward the sun.

- *They discussed "euphorbia helioscopia" during the group presentation.*
- *She wrote a short paragraph that included "euphorbia helioscopia."*

---

euphorbia lathyris *(noun)*

Poisonous Old World spurge; adventive in America; seeds yield a purgative oil.

- *They discussed "euphorbia lathyris" during the group presentation.*
- *He looked up "euphorbia lathyris" because he had never seen it before.*

---

euphorbia milii *(noun)*

Somewhat climbing bushy spurge of Madagascar having long woody spiny stems with few leaves and flowers with scarlet bracts.

- *They discussed "euphorbia milii" during the group presentation.*

- *In class, the teacher used "euphorbia milii" to mean somewhat climbing bushy spurge of madagascar having....*

---

euphorbia peplus *(noun)*

An Old World spurge introduced as a weed in the eastern United States.

- *In class, the teacher used "euphorbia peplus" to mean an old world spurge introduced as a weed in the....*
- *The article explained what "euphorbia peplus" means with a simple example.*

---

european brooklime *(noun)*

European plant having low-lying stems with blue flowers; sparsely naturalized in North America.

- *They discussed "european brooklime" during the group presentation.*
- *She wrote a short paragraph that included "european brooklime."*

---

european cranberrybush *(noun)*

Deciduous thicket-forming Old World shrub with clusters of white flowers and small bright red berries.

- *They discussed "european cranberrybush" during the group presentation.*
- *Understanding "european cranberrybush" helps you talk about this topic clearly.*

---

european pasqueflower *(noun)*

European perennial having usually violet or white spring flowers.

- *The article explained what "european pasqueflower" means with a simple example.*
- *They discussed "european pasqueflower" during the group presentation.*

---

european sanicle *(noun)*

Sanicle of Europe and Asia having white to pale pink flowers.

- *He looked up "european sanicle" because he had never seen it before.*
- *She wrote a short paragraph that included "european sanicle."*

---

eurotiales *(noun)*

Order of fungi having a closed ascocarp (cleistothecium) with the asci scattered rather than gathered in a hymenium.

- *They discussed "eurotiales" during the group presentation.*
- *The article explained what "eurotiales" means with a simple example.*

---

eurotium *(noun)*

A genus of fungi belonging to the order Eurotiales.

- *Understanding "eurotium" helps you talk about this topic clearly.*
- *In class, the teacher used "eurotium" to mean a genus of fungi belonging to the order eurotiales.*

---

eusporangium *(noun)*

A sporangium that arises from a group of epidermal cells.

- *The article explained what "eusporangium" means with a simple example.*
- *In class, the teacher used "eusporangium" to mean a sporangium that arises from a group of epidermal....*

---

eustoma *(noun)*

Small genus of herbs of warm regions of southern North America to northern South America.

- *He looked up "eustoma" because he had never seen it before.*
- *They discussed "eustoma" during the group presentation.*

---

eustoma grandiflorum *(noun)*

One of the most handsome prairie wildflowers having large erect bell-shaped bluish flowers; of moist places in prairies and fields from eastern Colorado and Nebraska south to New Mexico and Texas.

- *In class, the teacher used "eustoma grandiflorum" to mean one of the most handsome prairie wildflowers having....*
- *They discussed "eustoma grandiflorum" during the group presentation.*

---

evernia *(noun)*

Lichens of the family Usneaceae having a pendulous or shrubby thallus.

- *Understanding "evernia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "evernia."*

exacum *(noun)*

Genus of tropical Asiatic and African plants: especially Persian violets.

- *She wrote a short paragraph that included "exacum."*
- *He looked up "exacum" because he had never seen it before.*

exacum affine *(noun)*

Perennial cultivated especially as a houseplant for its fragrant bluish to dark lavender flowers.

- *Understanding "exacum affine" helps you talk about this topic clearly.*
- *They discussed "exacum affine" during the group presentation.*

exocarp *(noun)*

Outermost layer of the pericarp of fruits as the skin of a peach or grape.

- *He looked up "exocarp" because he had never seen it before.*
- *Understanding "exocarp" helps you talk about this topic clearly.*

exogen *(noun)*

Flowering plant with two cotyledons; the stem grows by deposit on its outside.

- *He looked up "exogen" because he had never seen it before.*
- *They discussed "exogen" during the group presentation.*

fagales *(noun)*

An order of dicotyledonous trees of the subclass Hamamelidae.

- *The article explained what "fagales" means with a simple example.*
- *Understanding "fagales" helps you talk about this topic clearly.*

fagopyrum *(noun)*

Buckwheat; in some classifications included in the genus Polygonum.

- *Understanding "fagopyrum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "fagopyrum."*

fagopyrum esculentum *(noun)*

A member of the genus Fagopyrum; annual Asian plant with clusters of small pinkish white flowers and small edible triangular seeds which are used whole or ground into flour.

- *They discussed "fagopyrum esculentum" during the group presentation.*
- *He looked up "fagopyrum esculentum" because he had never seen it before.*

fagus sylvatica atropunicea *(noun)*

Variety of European beech with shining purple or copper-colored leaves.

- *They discussed "fagus sylvatica atropunicea" during the group presentation.*
- *In class, the teacher used "fagus sylvatica atropunicea" to mean variety of european beech with shining purple or....*

falcatifolium *(noun)*

Sickle pines: dioecious evergreen tropical trees and shrubs having sickle-shaped leaves; similar to Dacrycarpus in habit; Malaysia and Philippines to New Guinea and New Caledonia.

- *Understanding "falcatifolium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "falcatifolium."*

falcatifolium falciforme *(noun)*

Small tropical rain forest tree of Indonesia and Malaysia.

- *Understanding "falcatifolium falciforme" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "falcatifolium falciforme."*

falcatifolium taxoides *(noun)*

A rain forest tree or shrub of New Caledonia having a conic crown and pale green sickle-shaped leaves; host species for the rare parasite yew.

- *They discussed "falcatifolium taxoides" during the group presentation.*
- *In class, the teacher used "falcatifolium taxoides" to mean a rain forest tree or shrub of new caledonia having....*

false alumroot *(noun)*

Plant growing in clumps with mostly basal leaves and cream-colored or pale pink fringed flowers in several long racemes; Alaska to coastal central California and east to Idaho.

- *He looked up "false alumroot" because he had never seen it before.*
- *She wrote a short paragraph that included "false alumroot."*

false beachdrops *(noun)*

Fleshy tawny or reddish saprophytic herb resembling the Indian pipe and growing in woodland humus of eastern North America; in some classifications placed in a separate genus Hypopitys.

- *He looked up "false beachdrops" because he had never seen it before.*
- *They discussed "false beachdrops" during the group presentation.*

false bugbane *(noun)*

Tall perennial of the eastern United States having large basal leaves and white summer flowers.

- *She wrote a short paragraph that included "false bugbane."*
- *They discussed "false bugbane" during the group presentation.*

false deathcap *(noun)*

Agaric often confused with the death cup.

- *She wrote a short paragraph that included "false deathcap."*
- *Understanding "false deathcap" helps you talk about this topic clearly.*

false goatsbeard *(noun)*

North American astilbe with panicles of creamy white flowers.

- *They discussed "false goatsbeard" during the group presentation.*
- *Understanding "false goatsbeard" helps you talk about this topic clearly.*

false gromwell *(noun)*

Any of several North American perennial herbs with hairy foliage and small yellowish or greenish flowers.

- *In class, the teacher used "false gromwell" to mean any of several north american perennial herbs with....*
- *They discussed "false gromwell" during the group presentation.*

false miterwort *(noun)*

Stoloniferous white-flowered spring-blooming woodland plant.

- *In class, the teacher used "false miterwort" to mean stoloniferous white-flowered spring-blooming....*
- *Understanding "false miterwort" helps you talk about this topic clearly.*

false mitrewort *(noun)*

Stoloniferous white-flowered spring-blooming woodland plant.

- *In class, the teacher used "false mitrewort" to mean stoloniferous white-flowered spring-blooming....*
- *Understanding "false mitrewort" helps you talk about this topic clearly.*

family aceraceae *(noun)*

A family of trees and shrubs of order Sapindales including the maples.

- *Understanding "family aceraceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family aceraceae" to mean a family of trees and shrubs of order sapindales....*

family actinidiaceae *(noun)*

Tropical trees or shrubs or woody vines.

- *Understanding "family actinidiaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family actinidiaceae."*

family adiantaceae *(noun)*

Used in some classification systems for some genera of the family Polypodiaceae (or Pteridaceae).

- *In class, the teacher used "family adiantaceae" to mean used in some classification systems for some genera....*
- *The article explained what "family adiantaceae" means with a simple example.*

family agaricaceae *(noun)*

Large family including many familiar mushrooms.

- *Understanding "family agaricaceae" helps you talk about this topic clearly.*

- *He looked up "family agaricaceae" because he had never seen it before.*

family agavaceae *(noun)*

Chiefly tropical and xerophytic plants: includes Dracenaceae (Dracaenaceae); comprises plants that in some classifications are divided between the Amaryllidaceae and the Liliaceae.

- *In class, the teacher used "family agavaceae" to mean chiefly tropical and xerophytic plants: includes....*
- *The article explained what "family agavaceae" means with a simple example.*

family aizoaceae *(noun)*

Succulent herbs or small shrubs mostly of South Africa but also New Zealand and North America: carpetweeds; fig marigolds.

- *Understanding "family aizoaceae" helps you talk about this topic clearly.*
- *He looked up "family aizoaceae" because he had never seen it before.*

family albuginaceae *(noun)*

Fungi that produce white sori resembling blisters on certain flowering plants.

- *They discussed "family albuginaceae" during the group presentation.*
- *Understanding "family albuginaceae" helps you talk about this topic clearly.*

family alismataceae *(noun)*

Perennial or annual aquatic or marsh plants.

- *Understanding "family alismataceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family alismataceae."*

family alliaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes especially genus Allium.

- *The article explained what "family alliaceae" means with a simple example.*
- *She wrote a short paragraph that included "family alliaceae."*

family allioniaceae *(noun)*

A family of flowering plants of the order Caryophyllales.

- *They discussed "family allioniaceae" during the group presentation.*
- *In class, the teacher used "family allioniaceae" to mean a family of flowering plants of the order....*

family aloeaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *Understanding "family aloeaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family aloeaceae."*

family alstroemeriaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; sometimes included in subfamily Amaryllidaceae.

- *Understanding "family alstroemeriaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family alstroemeriaceae" to mean one of many families or subfamilies into which some....*

family amaranthaceae *(noun)*

Cosmopolitan family of herbs and shrubs.

- *The article explained what "family amaranthaceae" means with a simple example.*
- *Understanding "family amaranthaceae" helps you talk about this topic clearly.*

family ambrosiaceae *(noun)*

In some classifications considered a separate family comprising a subgroup of the Compositae including the ragweeds.

- *He looked up "family ambrosiaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family ambrosiaceae."*

family amygdalaceae *(noun)*

Used in former classifications for plum and peach and almond trees which are now usually classified as members of the genus Prunus.

- *Understanding "family amygdalaceae" helps you talk about this topic clearly.*
- *He looked up "family amygdalaceae" because he had never seen it before.*

family annonaceae *(noun)*

Chiefly tropical trees or shrubs.

- *The article explained what "family annonaceae" means with a simple example.*
- *She wrote a short paragraph that included "family annonaceae."*

family aphyllanthaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Aphyllanthes.

- *Understanding "family aphyllanthaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family aphyllanthaceae."*

family aquifoliaceae *(noun)*

Widely distributed shrubs and trees.

- *They discussed "family aquifoliaceae" during the group presentation.*
- *Understanding "family aquifoliaceae" helps you talk about this topic clearly.*

family araliaceae *(noun)*

Mostly tropical trees and shrubs and lianas: genera Panax and Hedera.

- *He looked up "family araliaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family araliaceae."*

family araucariaceae *(noun)*

Tall evergreen cone-bearing trees of South America and Australia with broad leathery leaves; in some classifications included in the Pinaceae.

- *They discussed "family araucariaceae" during the group presentation.*
- *She wrote a short paragraph that included "family araucariaceae."*

family arecaceae *(noun)*

Chiefly tropical trees and shrubs and vines usually having a tall columnar trunk bearing a crown of very large leaves; coextensive with the order Palmales.

- *Understanding "family arecaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family arecaceae" to mean chiefly tropical trees and shrubs and vines usually....*

family aristolochiaceae *(noun)*

Family of birthworts (including wild ginger).

- *Understanding "family aristolochiaceae" helps you talk about this topic clearly.*
- *He looked up "family aristolochiaceae" because he had never seen it before.*

family asclepiadaceae *(noun)*

Widely distributed family of herbs and shrubs of the order Gentianales; most with milky juice.

- *The article explained what "family asclepiadaceae" means with a simple example.*
- *Understanding "family asclepiadaceae" helps you talk about this topic clearly.*

family asparagaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae: includes genera Asparagus and sometimes Ruscus.

- *Understanding "family asparagaceae" helps you talk about this topic clearly.*
- *He looked up "family asparagaceae" because he had never seen it before.*

family aspergillaceae *(noun)*

Family of fungi including some common molds.

- *Understanding "family aspergillaceae" helps you talk about this topic clearly.*
- *They discussed "family aspergillaceae" during the group presentation.*

family asphodelaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae.

- *She wrote a short paragraph that included "family asphodelaceae."*
- *The article explained what "family asphodelaceae" means with a simple example.*

family aspleniaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems; includes genera Asplenium, Pleurosorus, Schaffneria.

- *The article explained what "family aspleniaceae" means with a simple example.*
- *She wrote a short paragraph that included "family aspleniaceae."*

---

family athyriaceae *(noun)*

Alternative names for one of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *Understanding "family athyriaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family athyriaceae."*

---

family auriculariaceae *(noun)*

Fungi having gelatinous sporophores.

- *He looked up "family auriculariaceae" because he had never seen it before.*
- *In class, the teacher used "family auriculariaceae" to mean fungi having gelatinous sporophores.*

---

family avicenniaceae *(noun)*

Used in some classifications: coextensive with the genus Avicennia.

- *He looked up "family avicenniaceae" because he had never seen it before.*
- *Understanding "family avicenniaceae" helps you talk about this topic clearly.*

---

family azollaceae *(noun)*

Used in some classifications for the genus Azolla.

- *They discussed "family azollaceae" during the group presentation.*
- *The article explained what "family azollaceae" means with a simple example.*

---

family balsaminaceae *(noun)*

Distinguished from the family Geraniaceae by the irregular flowers.

- *He looked up "family balsaminaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family balsaminaceae."*

---

family batidaceae *(noun)*

Family coextensive with genus Batis: saltworts.

- *They discussed "family batidaceae" during the group presentation.*
- *The article explained what "family batidaceae" means with a simple example.*

---

family begoniaceae *(noun)*

Monoecious succulent herbs or shrubs of tropical and warm regions especially America.

- *The article explained what "family begoniaceae" means with a simple example.*
- *She wrote a short paragraph that included "family begoniaceae."*

---

family bennettitaceae *(noun)*

A family of fossil gymnospermous plants of the Carboniferous.

- *In class, the teacher used "family bennettitaceae" to mean a family of fossil gymnospermous plants of the....*
- *He looked up "family bennettitaceae" because he had never seen it before.*

---

family berberidaceae *(noun)*

Shrubs or herbs.

- *Understanding "family berberidaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family berberidaceae" to mean shrubs or herbs.*

---

family betulaceae *(noun)*

Monoecious trees and shrubs (including the genera Betula and Alnus and Carpinus and Corylus and Ostrya and Ostryopsis).

- *They discussed "family betulaceae" during the group presentation.*
- *She wrote a short paragraph that included "family betulaceae."*

---

family bignoniaceae *(noun)*

Trees or shrubs or woody vines or herbs having fruit resembling gourds or capsules; sometimes placed in the order Scrophulariales.

- *The article explained what "family bignoniaceae" means with a simple example.*
- *In class, the teacher used "family bignoniaceae" to mean trees or shrubs or woody vines or herbs having....*

family blastodiaceae *(noun)*

A family of saprobic fungi of order Blastocladiales.

- *The article explained what "family blastodiaceae" means with a simple example.*
- *In class, the teacher used "family blastodiaceae" to mean a family of saprobic fungi of order blastocladiales.*

family blechnaceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems; includes genera Blechnum, Doodia, Sadleria, Stenochlaena, and Woodwardia.

- *She wrote a short paragraph that included "family blechnaceae."*
- *They discussed "family blechnaceae" during the group presentation.*

family boletaceae *(noun)*

Family of fleshy fungi having the germ pores easily separating from the cup and often from each other.

- *They discussed "family boletaceae" during the group presentation.*
- *In class, the teacher used "family boletaceae" to mean family of fleshy fungi having the germ pores easily....*

family bombacaceae *(noun)*

Tropical trees with large dry or fleshy fruit containing usually woolly seeds.

- *They discussed "family bombacaceae" during the group presentation.*
- *He looked up "family bombacaceae" because he had never seen it before.*

family bromeliaceae *(noun)*

A family of tropical American plants of order Xyridales including several (as the pineapple) of economic importance.

- *She wrote a short paragraph that included "family bromeliaceae."*
- *He looked up "family bromeliaceae" because he had never seen it before.*

family bryaceae *(noun)*

A family of acrocarpous mosses.

- *Understanding "family bryaceae" helps you talk about this topic clearly.*
- *They discussed "family bryaceae" during the group presentation.*

family burmanniaceae *(noun)*

Family of chiefly tropical herbs with basal leaves like bracts and small flowers.

- *She wrote a short paragraph that included "family burmanniaceae."*
- *They discussed "family burmanniaceae" during the group presentation.*

family burseraceae *(noun)*

Resinous or aromatic chiefly tropical shrubs or trees.

- *He looked up "family burseraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family burseraceae."*

family buxaceae *(noun)*

Widely distributed evergreen shrubs and trees.

- *He looked up "family buxaceae" because he had never seen it before.*
- *Understanding "family buxaceae" helps you talk about this topic clearly.*

family caesalpiniaceae *(noun)*

Spiny trees, shrubs, or perennial herbs, including the genera Caesalpinia, Cassia, Ceratonia, Bauhinia; commonly included in the family Leguminosae.

- *He looked up "family caesalpiniaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family caesalpiniaceae."*

family callitrichaceae *(noun)*

Dicot aquatic herbs.

- *He looked up "family callitrichaceae" because he had never seen it before.*
- *Understanding "family callitrichaceae" helps you talk about this topic clearly.*

family calostomataceae *(noun)*

A family of fungi belonging to the order Tulostomatales.

- *He looked up "family calostomataceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family calostomataceae."*

family calycanthaceae *(noun)*

Shrubs or small trees having aromatic bark; the eastern United States and eastern Asia.

- *Understanding "family calycanthaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family calycanthaceae" to mean shrubs or small trees having aromatic bark; the....*

family campanulaceae *(noun)*

Family of plants of the order Campanulales; in some classifications includes Lobeliaceae.

- *Understanding "family campanulaceae" helps you talk about this topic clearly.*
- *The article explained what "family campanulaceae" means with a simple example.*

family canellaceae *(noun)*

One genus: aromatic tropical trees of eastern Africa and Florida to West Indies.

- *He looked up "family canellaceae" because he had never seen it before.*
- *In class, the teacher used "family canellaceae" to mean one genus: aromatic tropical trees of eastern....*

family cannabidaceae *(noun)*

Two genera of erect or twining herbs that are pollinated by the wind, including the genera Cannabis and Humulus; term not used in all classifications; in some the genus Cannabis is placed in the family Moraceae and the genus Humulus in the family Urticaceae.

- *They discussed "family cannabidaceae" during the group presentation.*
- *The article explained what "family cannabidaceae" means with a simple example.*

family cannaceae *(noun)*

Coextensive with the genus Canna.

- *She wrote a short paragraph that included "family cannaceae."*
- *He looked up "family cannaceae" because he had never seen it before.*

family capparidaceae *(noun)*

A dilleniid dicot family of the order Rhoeadales that includes: genera Capparis, Cleome, Crateva, and Polanisia.

- *She wrote a short paragraph that included "family capparidaceae."*
- *He looked up "family capparidaceae" because he had never seen it before.*

family caprifoliaceae *(noun)*

Shrubs and small trees and woody vines.

- *He looked up "family caprifoliaceae" because he had never seen it before.*
- *In class, the teacher used "family caprifoliaceae" to mean shrubs and small trees and woody vines.*

family caricaceae *(noun)*

Trees native to tropical America and Africa with milky juice and large palmately lobed leaves.

- *The article explained what "family caricaceae" means with a simple example.*
- *Understanding "family caricaceae" helps you talk about this topic clearly.*

family carpinaceae *(noun)*

Used in some classification systems for the genera Carpinus, Ostryopsis, and Ostryopsis.

- *In class, the teacher used "family carpinaceae" to mean used in some classification systems for the genera....*
- *The article explained what "family carpinaceae" means with a simple example.*

family caryocaraceae *(noun)*

Small genus of tropical South American trees.

- *They discussed "family caryocaraceae" during the group presentation.*
- *He looked up "family caryocaraceae" because he had never seen it before.*

family casuarinaceae *(noun)*

One genus: genus Casuarina.

- *She wrote a short paragraph that included "family casuarinaceae."*

- *He looked up “family casuarinaceae” because he had never seen it before.*

family cecropiaceae *(noun)*

In some classifications included in family Moraceae.

- *Understanding “family cecropiaceae” helps you talk about this topic clearly.*
- *In class, the teacher used “family cecropiaceae” to mean in some classifications included in family moraceae.*

family celastraceae *(noun)*

Trees and shrubs and woody vines usually having bright-colored fruits.

- *They discussed “family celastraceae” during the group presentation.*
- *She wrote a short paragraph that included “family celastraceae.”*

family cephalotaceae *(noun)*

A family of plants of order Rosales; coextensive with the genus Cephalotus.

- *She wrote a short paragraph that included “family cephalotaceae.”*
- *The article explained what “family cephalotaceae” means with a simple example.*

family cephalotaxaceae *(noun)*

A family of Cephalotaxaceae.

- *Understanding “family cephalotaxaceae” helps you talk about this topic clearly.*
- *He looked up “family cephalotaxaceae” because he had never seen it before.*

family ceratophyllaceae *(noun)*

Coextensive with the genus Ceratophyllum: hornworts.

- *Understanding “family ceratophyllaceae” helps you talk about this topic clearly.*
- *In class, the teacher used “family ceratophyllaceae” to mean coextensive with the genus ceratophyllum: hornworts.*

family ceratostomataceae *(noun)*

Fungi having carbonous perithecia with long necks.

- *They discussed “family ceratostomataceae” during the group presentation.*
- *He looked up “family ceratostomataceae” because he had never seen it before.*

family chloranthaceae *(noun)*

Small family of tropical herbs and shrubs and trees.

- *Understanding “family chloranthaceae” helps you talk about this topic clearly.*
- *They discussed “family chloranthaceae” during the group presentation.*

family chytridiaceae *(noun)*

A family of aquatic fungi of order Chytridiales.

- *They discussed “family chytridiaceae” during the group presentation.*
- *In class, the teacher used “family chytridiaceae” to mean a family of aquatic fungi of order chytridiales.*

family cistaceae *(noun)*

Shrubs or woody herbs of temperate regions especially Mediterranean.

- *Understanding “family cistaceae” helps you talk about this topic clearly.*
- *He looked up “family cistaceae” because he had never seen it before.*

family cladoniaceae *(noun)*

A family of lichens.

- *The article explained what “family cladoniaceae” means with a simple example.*
- *In class, the teacher used “family cladoniaceae” to mean a family of lichens.*

family clathraceae *(noun)*

Family of fleshy fungi resembling stinkhorns.

- *She wrote a short paragraph that included “family clathraceae.”*
- *The article explained what “family clathraceae” means with a simple example.*

family clavariaceae *(noun)*

Fleshy fungi: coral fungi.

- *They discussed "family clavariaceae" during the group presentation.*
- *Understanding "family clavariaceae" helps you talk about this topic clearly.*

family clethraceae *(noun)*

Coextensive with the genus Clethra.

- *They discussed "family clethraceae" during the group presentation.*
- *He looked up "family clethraceae" because he had never seen it before.*

family clusiaceae *(noun)*

Widely distributed family of chiefly tropical trees and shrubs and vines that produce oils and resins and some usable timber.

- *The article explained what "family clusiaceae" means with a simple example.*
- *Understanding "family clusiaceae" helps you talk about this topic clearly.*

family colchicaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted: genera Colchicum and Gloriosa.

- *He looked up "family colchicaceae" because he had never seen it before.*
- *Understanding "family colchicaceae" helps you talk about this topic clearly.*

family combretaceae *(noun)*

A family of tropical trees and shrubs of the order Myrtales.

- *The article explained what "family combretaceae" means with a simple example.*
- *She wrote a short paragraph that included "family combretaceae."*

family commelinaceae *(noun)*

Large widely distributed family of chiefly perennial herbs or climbers: spiderworts.

- *They discussed "family commelinaceae" during the group presentation.*
- *He looked up "family commelinaceae" because he had never seen it before.*

family connaraceae *(noun)*

Mostly tropical climbing shrubs or small trees; closely related to Leguminosae.

- *He looked up "family connaraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family connaraceae."*

family convallariaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *He looked up "family convallariaceae" because he had never seen it before.*
- *They discussed "family convallariaceae" during the group presentation.*

family coprinaceae *(noun)*

Used in some classifications for the genus Coprinus.

- *Understanding "family coprinaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family coprinaceae" to mean used in some classifications for the genus coprinus.*

family cordaitaceae *(noun)*

Chiefly Paleozoic plants; Cordaites is the chief and typical genus.

- *The article explained what "family cordaitaceae" means with a simple example.*
- *In class, the teacher used "family cordaitaceae" to mean chiefly paleozoic plants; cordaites is the chief....*

family cornaceae *(noun)*

A rosid dicot family of the order Umbellales including: genera Aucuba, Cornus, Corokia, Curtisia, Griselinia, Helwingia.

- *She wrote a short paragraph that included "family cornaceae."*
- *He looked up "family cornaceae" because he had never seen it before.*

family cortinariaceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *He looked up "family cortinariaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family cortinariaceae."*

---

family corylaceae *(noun)*

Used in some classification systems for the genus Corylus.

- *In class, the teacher used "family corylaceae" to mean used in some classification systems for the genus....*
- *He looked up "family corylaceae" because he had never seen it before.*

---

family crassulaceae *(noun)*

Succulent shrubs and herbs.

- *Understanding "family crassulaceae" helps you talk about this topic clearly.*
- *He looked up "family crassulaceae" because he had never seen it before.*

---

family cryptogrammataceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *She wrote a short paragraph that included "family cryptogrammataceae."*
- *The article explained what "family cryptogrammataceae" means with a simple example.*

---

family cunoniaceae *(noun)*

Trees or shrubs or climbers; mostly southern hemisphere.

- *The article explained what "family cunoniaceae" means with a simple example.*
- *In class, the teacher used "family cunoniaceae" to mean trees or shrubs or climbers; mostly southern hemisphere.*

---

family cupressaceae *(noun)*

Cypresses and junipers and many cedars.

- *He looked up "family cupressaceae" because he had never seen it before.*
- *In class, the teacher used "family cupressaceae" to mean cypresses and junipers and many cedars.*

---

family cyatheaceae *(noun)*

Tropical tree ferns.

- *She wrote a short paragraph that included "family cyatheaceae."*
- *The article explained what "family cyatheaceae" means with a simple example.*

---

family cycadaceae *(noun)*

Ancient palmlike plants closely related to ferns in that fertilization is by means of spermatozoids.

- *They discussed "family cycadaceae" during the group presentation.*
- *The article explained what "family cycadaceae" means with a simple example.*

---

family cyrilliaceae *(noun)*

Shrubs and trees with leathery leaves and small white flowers in racemes: genera Cyrilla and Cliftonia.

- *The article explained what "family cyrilliaceae" means with a simple example.*
- *In class, the teacher used "family cyrilliaceae" to mean shrubs and trees with leathery leaves and small....*

---

family dacrymycetaceae *(noun)*

A family of basidiomycetous fungi belonging to the order Tremellales having a bifurcate basidium that lacks septa.

- *Understanding "family dacrymycetaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family dacrymycetaceae."*

---

family davalliaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *In class, the teacher used "family davalliaceae" to mean one of a number of families into which....*
- *He looked up "family davalliaceae" because he had never seen it before.*

---

family dematiaceae *(noun)*

Family of imperfect mushrooms having dark-colored hyphae or conidia.

- *The article explained what "family dematiaceae" means with a simple example.*
- *She wrote a short paragraph that included "family dematiaceae."*

family dennstaedtiaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *In class, the teacher used "family dennstaedtiaceae" to mean one of a number of families into which....*
- *Understanding "family dennstaedtiaceae" helps you talk about this topic clearly.*

family diapensiaceae *(noun)*

North temperate low evergreen plants; in some classifications placed in its own order Diapensiales.

- *He looked up "family diapensiaceae" because he had never seen it before.*
- *Understanding "family diapensiaceae" helps you talk about this topic clearly.*

family dicksoniaceae *(noun)*

Tree ferns: genera Dicksonia, Cibotium, Culcita, and Thyrsopteris elegans.

- *They discussed "family dicksoniaceae" during the group presentation.*
- *He looked up "family dicksoniaceae" because he had never seen it before.*

family dicranaceae *(noun)*

Mosses having costate leaves and long-stalked capsules with cleft peristome.

- *In class, the teacher used "family dicranaceae" to mean mosses having costate leaves and long-stalked....*
- *The article explained what "family dicranaceae" means with a simple example.*

family dilleniaceae *(noun)*

Chiefly tropical shrubs and trees and climbers having leathery leaves or flattened leaflike stems: genera Dillenia and Hibbertia.

- *He looked up "family dilleniaceae" because he had never seen it before.*
- *They discussed "family dilleniaceae" during the group presentation.*

family dipsacaceae *(noun)*

Chiefly southern European herbs with flowers usually in dense cymose heads.

- *The article explained what "family dipsacaceae" means with a simple example.*
- *She wrote a short paragraph that included "family dipsacaceae."*

family dipterocarpaceae *(noun)*

Chiefly tropical Asian trees with two-winged fruits; yield valuable woods and aromatic oils and resins.

- *He looked up "family dipterocarpaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family dipterocarpaceae."*

family droseraceae *(noun)*

A family of carnivorous herbs and shrubs.

- *In class, the teacher used "family droseraceae" to mean a family of carnivorous herbs and shrubs.*
- *The article explained what "family droseraceae" means with a simple example.*

family dryopteridaceae *(noun)*

Alternative names for one of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *She wrote a short paragraph that included "family dryopteridaceae."*
- *He looked up "family dryopteridaceae" because he had never seen it before.*

family ebenaceae *(noun)*

Fruit and timber trees of tropical and warm regions including ebony and persimmon.

- *She wrote a short paragraph that included "family ebenaceae."*
- *They discussed "family ebenaceae" during the group presentation.*

family elaeagnaceae *(noun)*

Shrubs or small trees often armed.

- *Understanding "family elaeagnaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family elaeagnaceae."*

family elaeocarpaceae *(noun)*

Genus of trees and shrubs widely distributed in warm regions some yielding useful timber; in some classifications included in the family Santalaceae.

- *The article explained what "family elaeocarpaceae" means with a simple example.*
- *In class, the teacher used "family elaeocarpaceae" to mean genus of trees and shrubs widely distributed in....*

---

family empetraceae *(noun)*

Heathlike shrubs.

- *He looked up "family empetraceae" because he had never seen it before.*
- *In class, the teacher used "family empetraceae" to mean heathlike shrubs.*

---

family entolomataceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *In class, the teacher used "family entolomataceae" to mean a family of fungi belonging to the order agaricales.*
- *They discussed "family entolomataceae" during the group presentation.*

---

family entomophthoraceae *(noun)*

Mostly parasitic lower fungi that typically develop in the bodies of insects.

- *He looked up "family entomophthoraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family entomophthoraceae."*

---

family epacridaceae *(noun)*

Australasian shrubs or small trees.

- *She wrote a short paragraph that included "family epacridaceae."*
- *The article explained what "family epacridaceae" means with a simple example.*

---

family ephedraceae *(noun)*

Ephedras: in some classifications included in the Gnetaceae.

- *She wrote a short paragraph that included "family ephedraceae."*
- *Understanding "family ephedraceae" helps you talk about this topic clearly.*

---

family equisetaceae *(noun)*

Sole surviving family of the Equisetales: fern allies.

- *They discussed "family equisetaceae" during the group presentation.*
- *Understanding "family equisetaceae" helps you talk about this topic clearly.*

---

family eriocaulaceae *(noun)*

Chiefly tropical aquatic or bog herbs: pipeworts.

- *They discussed "family eriocaulaceae" during the group presentation.*
- *He looked up "family eriocaulaceae" because he had never seen it before.*

---

family erysiphaceae *(noun)*

Family of fungi parasitic mostly on leaves; includes powdery mildews.

- *The article explained what "family erysiphaceae" means with a simple example.*
- *In class, the teacher used "family erysiphaceae" to mean family of fungi parasitic mostly on leaves;....*

---

family erythroxylaceae *(noun)*

A family of plants of order Geraniales; have drupaceous fruit.

- *She wrote a short paragraph that included "family erythroxylaceae."*
- *They discussed "family erythroxylaceae" during the group presentation.*

---

family fistulinaceae *(noun)*

A family of fungi closely related to the family Polyporaceae except that the tubes on the undersurface of the cap are separate from each other.

- *She wrote a short paragraph that included "family fistulinaceae."*
- *The article explained what "family fistulinaceae" means with a simple example.*

---

family flacourtiaceae *(noun)*

Chiefly tropical trees and shrubs.

- *Understanding "family flacourtiaceae" helps you talk about this topic clearly.*

- *The article explained what "family flacourtiaceae" means with a simple example.*

family fouquieriaceae *(noun)*

Small family of spiny shrubs or trees of southwestern United States.

- *In class, the teacher used "family fouquieriaceae" to mean small family of spiny shrubs or trees of....*
- *The article explained what "family fouquieriaceae" means with a simple example.*

family fumariaceae *(noun)*

Erect or climbing herbs of the northern hemisphere and southern Africa: bleeding heart; Dutchman's breeches; fumitory; squirrel corn.

- *She wrote a short paragraph that included "family fumariaceae."*
- *He looked up "family fumariaceae" because he had never seen it before.*

family funkaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hosta.

- *The article explained what "family funkaceae" means with a simple example.*
- *They discussed "family funkaceae" during the group presentation.*

family geastraceae *(noun)*

A family of earthstar fungi belonging to the order Lycoperdales.

- *The article explained what "family geastraceae" means with a simple example.*
- *They discussed "family geastraceae" during the group presentation.*

family gentianaceae *(noun)*

Chiefly herbaceous plants with showy flowers; some are cultivated as ornamentals.

- *The article explained what "family gentianaceae" means with a simple example.*
- *In class, the teacher used "family gentianaceae" to mean chiefly herbaceous plants with showy flowers; some....*

family geoglossaceae *(noun)*

A family of fungi belonging to the order Helotiales.

- *Understanding "family geoglossaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family geoglossaceae."*

family geraniaceae *(noun)*

Chiefly herbaceous plants.

- *They discussed "family geraniaceae" during the group presentation.*
- *She wrote a short paragraph that included "family geraniaceae."*

family gesneriaceae *(noun)*

Large family of tropical herbs or shrubs or lianas; in some classification systems placed in the order Scrophulariales.

- *He looked up "family gesneriaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family gesneriaceae."*

family ginkgoaceae *(noun)*

Constituting the order Ginkgoales; includes the genus Ginkgo and extinct forms.

- *Understanding "family ginkgoaceae" helps you talk about this topic clearly.*
- *The article explained what "family ginkgoaceae" means with a simple example.*

family gleicheniaceae *(noun)*

A family of ferns belonging to order Filicales.

- *They discussed "family gleicheniaceae" during the group presentation.*
- *The article explained what "family gleicheniaceae" means with a simple example.*

family gnetaceae *(noun)*

Plants having small unisexual flowers and fleshy or winged fruit: in some classifications includes the genera Ephedra and Welwitschia as well as genus Gnetum.

- *The article explained what "family gnetaceae" means with a simple example.*
- *In class, the teacher used "family gnetaceae" to mean plants having small unisexual flowers and fleshy or....*

family goodeniaceae *(noun)*

A family of sappy plants that grow in Australasia and southeast China.

- *Understanding "family goodeniaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family goodeniaceae" to mean a family of sappy plants that grow in australasia....*

---

family graminaceae *(noun)*

The grasses: chiefly herbaceous but some woody plants including cereals; bamboo; reeds; sugar cane.

- *She wrote a short paragraph that included "family graminaceae."*
- *The article explained what "family graminaceae" means with a simple example.*

---

family grossulariaceae *(noun)*

In some classifications considered a part of the family Saxifragaceae: plants whose fruit is a berry.

- *In class, the teacher used "family grossulariaceae" to mean in some classifications considered a part of the....*
- *They discussed "family grossulariaceae" during the group presentation.*

---

family guttiferae *(noun)*

Widely distributed family of chiefly tropical trees and shrubs and vines that produce oils and resins and some usable timber.

- *In class, the teacher used "family guttiferae" to mean widely distributed family of chiefly tropical trees....*
- *The article explained what "family guttiferae" means with a simple example.*

---

family haemodoraceae *(noun)*

Some genera placed in family Liliaceae.

- *In class, the teacher used "family haemodoraceae" to mean some genera placed in family liliaceae.*
- *The article explained what "family haemodoraceae" means with a simple example.*

---

family haloragaceae *(noun)*

A family of dicotyledonous plants of the order Myrtales.

- *She wrote a short paragraph that included "family haloragaceae."*
- *He looked up "family haloragaceae" because he had never seen it before.*

---

family haloragidaceae *(noun)*

A family of dicotyledonous plants of the order Myrtales.

- *Understanding "family haloragidaceae" helps you talk about this topic clearly.*
- *The article explained what "family haloragidaceae" means with a simple example.*

---

family hamamelidaceae *(noun)*

Comprises genera Hamamelis, Corylopsis, Fothergilla, Liquidambar, Parrotia, and other small genera.

- *They discussed "family hamamelidaceae" during the group presentation.*
- *She wrote a short paragraph that included "family hamamelidaceae."*

---

family helotiaceae *(noun)*

A fungus family of order Helotiales.

- *Understanding "family helotiaceae" helps you talk about this topic clearly.*
- *He looked up "family helotiaceae" because he had never seen it before.*

---

family helvellaceae *(noun)*

Family of false morels or lorchels; some are edible and some are poisonous.

- *The article explained what "family helvellaceae" means with a simple example.*
- *She wrote a short paragraph that included "family helvellaceae."*

---

family hemerocallidaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hemerocallis.

- *Understanding "family hemerocallidaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family hemerocallidaceae."*

---

family hippocastanaceae *(noun)*

Trees having showy flowers and inedible nutlike seeds in a leathery capsule.

- *She wrote a short paragraph that included "family hippocastanaceae."*
- *The article explained what "family hippocastanaceae" means with a simple example.*

---

family hostaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hosta.

- *She wrote a short paragraph that included "family hostaceae."*
- *He looked up "family hostaceae" because he had never seen it before.*

---

family hyacinthaceae *(noun)*

One of many families or subfamilies in which some classification systems subdivide the Liliaceae but not widely accepted.

- *The article explained what "family hyacinthaceae" means with a simple example.*
- *They discussed "family hyacinthaceae" during the group presentation.*

---

family hydnaceae *(noun)*

Tooth fungi.

- *Understanding "family hydnaceae" helps you talk about this topic clearly.*
- *He looked up "family hydnaceae" because he had never seen it before.*

---

family hydnoraceae *(noun)*

A family of flowering plants in Africa and Argentina that are parasitic on the roots of other plants.

- *They discussed "family hydnoraceae" during the group presentation.*
- *She wrote a short paragraph that included "family hydnoraceae."*

---

family hydrangeaceae *(noun)*

Sometimes included in the family Saxifragaceae.

- *The article explained what "family hydrangeaceae" means with a simple example.*
- *In class, the teacher used "family hydrangeaceae" to mean sometimes included in the family saxifragaceae.*

---

family hydrocharidaceae *(noun)*

Simple nearly stemless freshwater aquatic plants; widely distributed.

- *He looked up "family hydrocharidaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family hydrocharidaceae."*

---

family hydrocharitaceae *(noun)*

Simple nearly stemless freshwater aquatic plants; widely distributed.

- *Understanding "family hydrocharitaceae" helps you talk about this topic clearly.*
- *He looked up "family hydrocharitaceae" because he had never seen it before.*

---

family hydrophyllaceae *(noun)*

Perennial woodland herbs.

- *He looked up "family hydrophyllaceae" because he had never seen it before.*
- *In class, the teacher used "family hydrophyllaceae" to mean perennial woodland herbs.*

---

family hygrophoraceae *(noun)*

A family of fungi belonging to the order Agaricales; the gills of these fungi have a clean waxy appearance.

- *The article explained what "family hygrophoraceae" means with a simple example.*
- *Understanding "family hygrophoraceae" helps you talk about this topic clearly.*

---

family hymenophyllaceae *(noun)*

Terrestrial (hygrophytic) or epiphytic ferns: filmy ferns.

- *Understanding "family hymenophyllaceae" helps you talk about this topic clearly.*
- *The article explained what "family hymenophyllaceae" means with a simple example.*

---

family hypericaceae *(noun)*

Used in some classification systems for plants usually included among the Guttiferae.

- *They discussed "family hypericaceae" during the group presentation.*
- *The article explained what "family hypericaceae" means with a simple example.*

family hypocreaceae *(noun)*

Family of fungi having brightly colored fleshy or membranous ascocarps; sometimes placed in its own order Hypocreales.

- *They discussed "family hypocreaceae" during the group presentation.*
- *He looked up "family hypocreaceae" because he had never seen it before.*

family hypoxidaceae *(noun)*

In some classification systems included in the Amaryllidaceae.

- *He looked up "family hypoxidaceae" because he had never seen it before.*
- *In class, the teacher used "family hypoxidaceae" to mean in some classification systems included in the....*

family isoetaceae *(noun)*

Quillworts; coextensive with the genus Isoetes.

- *She wrote a short paragraph that included "family isoetaceae."*
- *The article explained what "family isoetaceae" means with a simple example.*

family juglandaceae *(noun)*

Trees having usually edible nuts: butternuts; walnuts; hickories; pecans.

- *Understanding "family juglandaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family juglandaceae" to mean trees having usually edible nuts: butternuts;....*

family juncaceae *(noun)*

Tufted herbs resembling grasses: rushes.

- *They discussed "family juncaceae" during the group presentation.*
- *He looked up "family juncaceae" because he had never seen it before.*

family juncaginaceae *(noun)*

A family of monocotyledonous bog herbs of order Naiadales.

- *In class, the teacher used "family juncaginaceae" to mean a family of monocotyledonous bog herbs of order....*
- *The article explained what "family juncaginaceae" means with a simple example.*

family jungermanniaceae *(noun)*

Comprising the leafy members of the order Jungermanniales.

- *They discussed "family jungermanniaceae" during the group presentation.*
- *He looked up "family jungermanniaceae" because he had never seen it before.*

family lardizabalaceae *(noun)*

Thick-stemmed lianas and some shrubs; some have edible fruit.

- *She wrote a short paragraph that included "family lardizabalaceae."*
- *He looked up "family lardizabalaceae" because he had never seen it before.*

family lecanoraceae *(noun)*

A fungus family of the division Lichenes.

- *She wrote a short paragraph that included "family lecanoraceae."*
- *They discussed "family lecanoraceae" during the group presentation.*

family lecythidaceae *(noun)*

Large tropical trees bearing large fruits with woody skins.

- *She wrote a short paragraph that included "family lecythidaceae."*
- *He looked up "family lecythidaceae" because he had never seen it before.*

family leitneriaceae *(noun)*

Coextensive with the genus Leitneria; commonly isolated in a distinct order.

- *She wrote a short paragraph that included "family leitneriaceae."*
- *They discussed "family leitneriaceae" during the group presentation.*

family lemnaceae *(noun)*

Family of small free-floating thalloid plants.

- *She wrote a short paragraph that included "family lemnaceae."*
- *The article explained what "family lemnaceae" means with a simple example.*

---

family lennoaceae *(noun)*

Family of fleshy parasitic herbs lacking green foliage and having heads of small flowers; California and Mexico.

- *They discussed "family lennoaceae" during the group presentation.*
- *She wrote a short paragraph that included "family lennoaceae."*

---

family lentibulariaceae *(noun)*

Carnivorous aquatic or bog plants: genera Utricularia, Pinguicula, and Genlisea.

- *Understanding "family lentibulariaceae" helps you talk about this topic clearly.*
- *The article explained what "family lentibulariaceae" means with a simple example.*

---

family lepidobotryaceae *(noun)*

Family created in 1950 solely for the classification of a distinctive African tree repeatedly classified in other families; trees long believed to exist only in Africa.

- *Understanding "family lepidobotryaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family lepidobotryaceae."*

---

family lepidodendraceae *(noun)*

Fossil plants characterized by conspicuous spirally arranged leaf scars on the trunk.

- *The article explained what "family lepidodendraceae" means with a simple example.*
- *In class, the teacher used "family lepidodendraceae" to mean fossil plants characterized by conspicuous spirally....*

---

family lepiotaceae *(noun)*

A family of fungi having free gills and a cap that is cleanly separable from the stalk.

- *He looked up "family lepiotaceae" because he had never seen it before.*
- *In class, the teacher used "family lepiotaceae" to mean a family of fungi having free gills and a cap that....*

---

family linaceae *(noun)*

A widely distributed family of plants.

- *He looked up "family linaceae" because he had never seen it before.*
- *In class, the teacher used "family linaceae" to mean a widely distributed family of plants.*

---

family loasaceae *(noun)*

Family of bristly hairy sometimes climbing plants; America and Africa and southern Arabia.

- *He looked up "family loasaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family loasaceae."*

---

family lobeliaceae *(noun)*

Not recognized in all classification systems; in some classifications lobeliaceous plants are included in family Campanulaceae.

- *In class, the teacher used "family lobeliaceae" to mean not recognized in all classification systems; in....*
- *Understanding "family lobeliaceae" helps you talk about this topic clearly.*

---

family loganiaceae *(noun)*

A dicotyledonous family of plants of order Gentianales.

- *The article explained what "family loganiaceae" means with a simple example.*
- *Understanding "family loganiaceae" helps you talk about this topic clearly.*

---

family lomariopsidaceae *(noun)*

Small family of usually scandent ferns.

- *He looked up "family lomariopsidaceae" because he had never seen it before.*
- *They discussed "family lomariopsidaceae" during the group presentation.*

---

family lophosoriaceae *(noun)*

Very small family of tree ferns.

- *In class, the teacher used "family lophosoriaceae" to mean very small family of tree ferns.*

- *Understanding "family lophosoriaceae" helps you talk about this topic clearly.*

family loranthaceae *(noun)*

In some classification includes Viscaceae: parasitic or hemiparasitic shrublets or shrubs or small trees of tropical and temperate regions; attach to hosts by haustoria.

- *The article explained what "family loranthaceae" means with a simple example.*
- *In class, the teacher used "family loranthaceae" to mean in some classification includes viscaceae:....*

family loxomataceae *(noun)*

Very small family of New Zealand ferns.

- *The article explained what "family loxomataceae" means with a simple example.*
- *In class, the teacher used "family loxomataceae" to mean very small family of new zealand ferns.*

family lycoperdaceae *(noun)*

A fungus family belonging to the order Lycoperdales; includes puffballs.

- *She wrote a short paragraph that included "family lycoperdaceae."*
- *He looked up "family lycoperdaceae" because he had never seen it before.*

family lycopodiaceae *(noun)*

A family of ferns belonging to the order Lycopodiales.

- *Understanding "family lycopodiaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family lycopodiaceae."*

family lythraceae *(noun)*

Herbs and shrubs and small trees with pink or purple flowers.

- *He looked up "family lythraceae" because he had never seen it before.*
- *In class, the teacher used "family lythraceae" to mean herbs and shrubs and small trees with pink or....*

family magnoliaceae *(noun)*

Subclass Magnoliidae: genera Liriodendron, Magnolia, and Manglietia.

- *He looked up "family magnoliaceae" because he had never seen it before.*
- *In class, the teacher used "family magnoliaceae" to mean subclass magnoliidae: genera liriodendron,....*

family marantaceae *(noun)*

Tropical perennial herbs with usually starchy rhizomes.

- *In class, the teacher used "family marantaceae" to mean tropical perennial herbs with usually starchy rhizomes.*
- *He looked up "family marantaceae" because he had never seen it before.*

family marattiaceae *(noun)*

Constituting the order Marattiales: chiefly tropical eusporangiate ferns with gigantic fronds.

- *The article explained what "family marattiaceae" means with a simple example.*
- *Understanding "family marattiaceae" helps you talk about this topic clearly.*

family marchantiaceae *(noun)*

Liverworts with prostrate and usually dichotomously branched thalli.

- *Understanding "family marchantiaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family marchantiaceae" to mean liverworts with prostrate and usually dichotomously....*

family marsileaceae *(noun)*

Clover ferns.

- *He looked up "family marsileaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family marsileaceae."*

family martyniaceae *(noun)*

In most classifications not considered a separate family but included in the Pedaliaceae.

- *The article explained what "family martyniaceae" means with a simple example.*
- *In class, the teacher used "family martyniaceae" to mean in most classifications not considered a separate....*

family mayacaceae *(noun)*

A monocotyledonous family of bog plants of order Xyridales.

- *In class, the teacher used "family mayacaceae" to mean a monocotyledonous family of bog plants of order....*
- *He looked up "family mayacaceae" because he had never seen it before.*

---

family melanthiaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted: includes Aletris; Narthecium; Veratrum.

- *The article explained what "family melanthiaceae" means with a simple example.*
- *In class, the teacher used "family melanthiaceae" to mean one of many subfamilies into which some....*

---

family melastomaceae *(noun)*

A family of trees and bushes and herbs of order Myrtales; many are cultivated as ornamentals.

- *She wrote a short paragraph that included "family melastomaceae."*
- *He looked up "family melastomaceae" because he had never seen it before.*

---

family melastomataceae *(noun)*

A family of trees and bushes and herbs of order Myrtales; many are cultivated as ornamentals.

- *He looked up "family melastomataceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family melastomataceae."*

---

family menispermaceae *(noun)*

Herbaceous or woody climbers.

- *The article explained what "family menispermaceae" means with a simple example.*
- *They discussed "family menispermaceae" during the group presentation.*

---

family menyanthaceae *(noun)*

A dicotyledonous family of marsh plants of order Gentianales.

- *The article explained what "family menyanthaceae" means with a simple example.*
- *She wrote a short paragraph that included "family menyanthaceae."*

---

family mimosaceae *(noun)*

Family of spiny woody plants (usually shrubs or small trees) whose leaves mimic animals in sensitivity to touch; commonly included in the family Leguminosae.

- *Understanding "family mimosaceae" helps you talk about this topic clearly.*
- *The article explained what "family mimosaceae" means with a simple example.*

---

family mniaceae *(noun)*

Family of erect mosses with club-shaped paraphyses and the hexagonal cells of the upper leaf surface; sometimes treated as a subfamily of Bryaceae.

- *They discussed "family mniaceae" during the group presentation.*
- *In class, the teacher used "family mniaceae" to mean family of erect mosses with club-shaped paraphyses....*

---

family moniliaceae *(noun)*

Family of imperfect fungi having white or brightly colored hyphae and spores that are produced directly on the mycelium and not aggregated in fruiting bodies.

- *They discussed "family moniliaceae" during the group presentation.*
- *Understanding "family moniliaceae" helps you talk about this topic clearly.*

---

family monotropaceae *(noun)*

Used in some classification for saprophytic herbs sometimes included in the family Pyrolaceae: genera Monotropa and Sarcodes.

- *They discussed "family monotropaceae" during the group presentation.*
- *In class, the teacher used "family monotropaceae" to mean used in some classification for saprophytic herbs....*

---

family morchellaceae *(noun)*

A family of edible fungi including the true morels.

- *She wrote a short paragraph that included "family morchellaceae."*
- *He looked up "family morchellaceae" because he had never seen it before.*

---

family mucoraceae *(noun)*

Large family of chiefly saprophytic fungi that includes many common molds destructive to food products.

- *The article explained what "family mucoraceae" means with a simple example.*
- *In class, the teacher used "family mucoraceae" to mean large family of chiefly saprophytic fungi that....*

---

family musaceae *(noun)*

Treelike tropical Asian herbs.

- *He looked up "family musaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family musaceae."*

---

family myricaceae *(noun)*

Constituting the order Myricales.

- *She wrote a short paragraph that included "family myricaceae."*
- *The article explained what "family myricaceae" means with a simple example.*

---

family myristicaceae *(noun)*

Family of aromatic tropical trees with arillate seeds.

- *She wrote a short paragraph that included "family myristicaceae."*
- *He looked up "family myristicaceae" because he had never seen it before.*

---

family myrsinaceae *(noun)*

Family of Old World tropical trees and shrubs; some in Florida.

- *She wrote a short paragraph that included "family myrsinaceae."*
- *He looked up "family myrsinaceae" because he had never seen it before.*

---

family naiadaceae *(noun)*

Monotypic family of aquatic plants having narrow leaves and small flowers.

- *He looked up "family naiadaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family naiadaceae."*

---

family najadaceae *(noun)*

Monotypic family of aquatic plants having narrow leaves and small flowers.

- *They discussed "family najadaceae" during the group presentation.*
- *She wrote a short paragraph that included "family najadaceae."*

---

family nepenthaceae *(noun)*

Coextensive with the genus Nepenthes.

- *The article explained what "family nepenthaceae" means with a simple example.*
- *Understanding "family nepenthaceae" helps you talk about this topic clearly.*

---

family nidulariaceae *(noun)*

Bird's-nest fungi.

- *The article explained what "family nidulariaceae" means with a simple example.*
- *They discussed "family nidulariaceae" during the group presentation.*

---

family nyctaginaceae *(noun)*

A family of flowering plants of the order Caryophyllales.

- *Understanding "family nyctaginaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family nyctaginaceae" to mean a family of flowering plants of the order....*

---

family nymphaeaceae *(noun)*

Dicot aquatic plants.

- *The article explained what "family nymphaeaceae" means with a simple example.*
- *Understanding "family nymphaeaceae" helps you talk about this topic clearly.*

---

family nyssaceae *(noun)*

A family of dicotyledonous trees of order Myrtales that includes the sour gum trees.

- *He looked up "family nyssaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family nyssaceae."*

family ochnaceae *(noun)*

Family of tropical evergreen trees and shrubs with thick shining parallel-veined leaves.

- *The article explained what "family ochnaceae" means with a simple example.*
- *Understanding "family ochnaceae" helps you talk about this topic clearly.*

family oleaceae *(noun)*

Trees and shrubs having berries or drupes or capsules as fruits; sometimes placed in the order Oleales: olive; ash; jasmine; privet; lilac.

- *She wrote a short paragraph that included "family oleaceae."*
- *They discussed "family oleaceae" during the group presentation.*

family oleandraceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *Understanding "family oleandraceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family oleandraceae" to mean one of a number of families into which....*

family onagraceae *(noun)*

A large and widely distributed family of plants of the order Myrtales.

- *In class, the teacher used "family onagraceae" to mean a large and widely distributed family of plants of....*
- *The article explained what "family onagraceae" means with a simple example.*

family ophioglossaceae *(noun)*

A family of succulent ferns of order Ophioglossales; cosmopolitan in distribution.

- *Understanding "family ophioglossaceae" helps you talk about this topic clearly.*
- *He looked up "family ophioglossaceae" because he had never seen it before.*

family orobanchaceae *(noun)*

Brown or yellow leafless herbs; sometimes placed in the order Scrophulariales.

- *The article explained what "family orobanchaceae" means with a simple example.*
- *Understanding "family orobanchaceae" helps you talk about this topic clearly.*

family osmundaceae *(noun)*

Large family of ferns widely distributed in temperate and tropical areas.

- *She wrote a short paragraph that included "family osmundaceae."*
- *Understanding "family osmundaceae" helps you talk about this topic clearly.*

family oxalidaceae *(noun)*

A family of widely distributed herbs of the order Geraniales; have compound leaves and pentamerous flowers.

- *He looked up "family oxalidaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family oxalidaceae."*

family paeoniaceae *(noun)*

Perennial rhizomatous herbs and shrubs; of temperate Europe and North America.

- *They discussed "family paeoniaceae" during the group presentation.*
- *The article explained what "family paeoniaceae" means with a simple example.*

family palmaceae *(noun)*

Chiefly tropical trees and shrubs and vines usually having a tall columnar trunk bearing a crown of very large leaves; coextensive with the order Palmales.

- *They discussed "family palmaceae" during the group presentation.*
- *The article explained what "family palmaceae" means with a simple example.*

family pandanaceae *(noun)*

Family of woody plants of the order Pandanales including pandanus.

- *She wrote a short paragraph that included "family pandanaceae."*
- *He looked up "family pandanaceae" because he had never seen it before.*

family papaveraceae *(noun)*

Herbs or shrubs having milky and often colored juices and capsular fruits.

- *In class, the teacher used "family papaveraceae" to mean herbs or shrubs having milky and often colored....*
- *Understanding "family papaveraceae" helps you talk about this topic clearly.*

---

family papilionacea *(noun)*

Leguminous plants whose flowers have butterfly-shaped corollas; commonly included in the family Leguminosae.

- *Understanding "family papilionacea" helps you talk about this topic clearly.*
- *The article explained what "family papilionacea" means with a simple example.*

---

family parkeriaceae *(noun)*

Coextensive with the genus Ceratopteris; sometimes included in family Polypodiaceae.

- *They discussed "family parkeriaceae" during the group presentation.*
- *She wrote a short paragraph that included "family parkeriaceae."*

---

family parmeliaceae *(noun)*

A family of lichens.

- *She wrote a short paragraph that included "family parmeliaceae."*
- *He looked up "family parmeliaceae" because he had never seen it before.*

---

family passifloraceae *(noun)*

Tropical woody tendril-climbing vines.

- *In class, the teacher used "family passifloraceae" to mean tropical woody tendril-climbing vines.*
- *They discussed "family passifloraceae" during the group presentation.*

---

family pedaliaceae *(noun)*

The family of plants of order Polemoniales.

- *He looked up "family pedaliaceae" because he had never seen it before.*
- *In class, the teacher used "family pedaliaceae" to mean the family of plants of order polemoniales.*

---

family peronosporaceae *(noun)*

Parasitic fungi: downy mildews.

- *In class, the teacher used "family peronosporaceae" to mean parasitic fungi: downy mildews.*
- *Understanding "family peronosporaceae" helps you talk about this topic clearly.*

---

family pertusariaceae *(noun)*

A fungus family of division Lichenes.

- *In class, the teacher used "family pertusariaceae" to mean a fungus family of division lichenes.*
- *Understanding "family pertusariaceae" helps you talk about this topic clearly.*

---

family pezizaceae *(noun)*

Large family comprising many typical cup fungi.

- *The article explained what "family pezizaceae" means with a simple example.*
- *In class, the teacher used "family pezizaceae" to mean large family comprising many typical cup fungi.*

---

family phallaceae *(noun)*

A family of fungi belonging to the order Phallales and comprising the true stinkhorns.

- *In class, the teacher used "family phallaceae" to mean a family of fungi belonging to the order phallales....*
- *They discussed "family phallaceae" during the group presentation.*

---

family phyllocladaceae *(noun)*

A family of Phyllocladaceae.

- *They discussed "family phyllocladaceae" during the group presentation.*
- *Understanding "family phyllocladaceae" helps you talk about this topic clearly.*

---

family phytolaccaceae *(noun)*

Chiefly tropical herbaceous plants (including shrubs and trees) with racemose flowers: genera Phytolacca, Agdestis, Ercilla, Rivina, Trichostigma.

- *In class, the teacher used "family phytolaccaceae" to mean chiefly tropical herbaceous plants (including....*

- *The article explained what "family phytolaccaceae" means with a simple example.*

family piperaceae *(noun)*

Tropical woody vines and herbaceous plants having aromatic herbage and minute flowers in spikelets.

- *The article explained what "family piperaceae" means with a simple example.*
- *Understanding "family piperaceae" helps you talk about this topic clearly.*

family plantaginaceae *(noun)*

Cosmopolitan family of small herbs and a few shrubs; most are troublesome weeds.

- *The article explained what "family plantaginaceae" means with a simple example.*
- *She wrote a short paragraph that included "family plantaginaceae."*

family plasmodiophoraceae *(noun)*

Family of fungi often causing hypertrophy in seed plants.

- *He looked up "family plasmodiophoraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family plasmodiophoraceae."*

family platanaceae *(noun)*

Coextensive with the genus Platanus: plane trees.

- *The article explained what "family platanaceae" means with a simple example.*
- *In class, the teacher used "family platanaceae" to mean coextensive with the genus platanus: plane trees.*

family plumbaginaceae *(noun)*

Perennial herbs and shrubs and lianas; cosmopolitan especially in saltwater areas.

- *He looked up "family plumbaginaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family plumbaginaceae."*

family pluteaceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *She wrote a short paragraph that included "family pluteaceae."*
- *He looked up "family pluteaceae" because he had never seen it before.*

family podocarpaceae *(noun)*

Gymnosperms with simple persistent needlelike or scalelike leaves.

- *The article explained what "family podocarpaceae" means with a simple example.*
- *They discussed "family podocarpaceae" during the group presentation.*

family polemoniaceae *(noun)*

A widely distributed family of chiefly herbaceous plants of the order Polemoniales; often have showy flowers.

- *Understanding "family polemoniaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family polemoniaceae."*

family polygalaceae *(noun)*

Trees, shrubs, and herbs widely distributed throughout both hemispheres.

- *The article explained what "family polygalaceae" means with a simple example.*
- *In class, the teacher used "family polygalaceae" to mean trees, shrubs, and herbs widely distributed....*

family polypodiaceae *(noun)*

Ferns: a large family that in some classification systems has been subdivided into several families (including Aspleniaceae and Blechnaceae and Davalliaceae and Dennstaedtiaceae and Dryopteridaceae and Oleandraceae and Pteridaceae).

- *The article explained what "family polypodiaceae" means with a simple example.*
- *In class, the teacher used "family polypodiaceae" to mean ferns: a large family that in some classification....*

family polyporaceae *(noun)*

Fungi that become corky or woody with age, often forming shelflike growths on trees.

- *Understanding "family polyporaceae" helps you talk about this topic clearly.*
- *The article explained what "family polyporaceae" means with a simple example.*

family pontederiaceae *(noun)*

Aquatic or bog plants.

- *The article explained what "family pontederiaceae" means with a simple example.*
- *In class, the teacher used "family pontederiaceae" to mean aquatic or bog plants.*

family portulacaceae *(noun)*

Family of usually succulent herbs; cosmopolitan in distribution especially in Americas.

- *The article explained what "family portulacaceae" means with a simple example.*
- *Understanding "family portulacaceae" helps you talk about this topic clearly.*

family potamogetonaceae *(noun)*

Plants that grow in ponds and slow streams; sometimes includes family Zosteraceae.

- *Understanding "family potamogetonaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family potamogetonaceae."*

family primulaceae *(noun)*

A dicotyledonous family of the order Primulales with a regular flower; widely distributed in the northern hemisphere.

- *He looked up "family primulaceae" because he had never seen it before.*
- *Understanding "family primulaceae" helps you talk about this topic clearly.*

family psilophytaceae *(noun)*

Paleozoic plants.

- *She wrote a short paragraph that included "family psilophytaceae."*
- *He looked up "family psilophytaceae" because he had never seen it before.*

family psilotaceae *(noun)*

Small family of lower ferns having nearly naked stems and minute scalelike leaves.

- *In class, the teacher used "family psilotaceae" to mean small family of lower ferns having nearly naked....*
- *The article explained what "family psilotaceae" means with a simple example.*

family pteridaceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems; Pteridaceae is itself in turn sometimes further subdivided.

- *They discussed "family pteridaceae" during the group presentation.*
- *Understanding "family pteridaceae" helps you talk about this topic clearly.*

family pucciniaceae *(noun)*

Large important family of rust fungi.

- *Understanding "family pucciniaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family pucciniaceae."*

family punicaceae *(noun)*

One species: pomegranates.

- *Understanding "family punicaceae" helps you talk about this topic clearly.*
- *They discussed "family punicaceae" during the group presentation.*

family pyrolaceae *(noun)*

Evergreen herbs of temperate regions: genera Pyrola, Chimaphila, Moneses, Orthilia.

- *She wrote a short paragraph that included "family pyrolaceae."*
- *He looked up "family pyrolaceae" because he had never seen it before.*

family pythiaceae *(noun)*

Fungi having sporangia usually borne successively and singly at the tips of branching sporangiophores.

- *They discussed "family pythiaceae" during the group presentation.*
- *Understanding "family pythiaceae" helps you talk about this topic clearly.*

family rafflesiaceae *(noun)*

A family of parasitic plants of the order Aristolochiales.

- *The article explained what "family rafflesiaceae" means with a simple example.*
- *Understanding "family rafflesiaceae" helps you talk about this topic clearly.*

---

family rapateaceae *(noun)*

South American herbs somewhat resembling members of the Juncaceae.

- *In class, the teacher used "family rapateaceae" to mean south american herbs somewhat resembling members of....*
- *The article explained what "family rapateaceae" means with a simple example.*

---

family resedaceae *(noun)*

Mainly Mediterranean herbs: mignonette.

- *Understanding "family resedaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family resedaceae" to mean mainly mediterranean herbs: mignonette.*

---

family rhamnaceae *(noun)*

Trees and shrubs usually thorny bearing drupaceous fruit many having medicinal value.

- *They discussed "family rhamnaceae" during the group presentation.*
- *In class, the teacher used "family rhamnaceae" to mean trees and shrubs usually thorny bearing drupaceous....*

---

family rhizophoraceae *(noun)*

Trees and shrubs that usually form dense jungles along tropical seacoasts.

- *In class, the teacher used "family rhizophoraceae" to mean trees and shrubs that usually form dense jungles....*
- *The article explained what "family rhizophoraceae" means with a simple example.*

---

family rhizopogonaceae *(noun)*

A family of fungi of order Hymenogastrales having round subterranean sporophores.

- *He looked up "family rhizopogonaceae" because he had never seen it before.*
- *In class, the teacher used "family rhizopogonaceae" to mean a family of fungi of order hymenogastrales having....*

---

family rhyniaceae *(noun)*

Primitive plants of the Paleozoic.

- *She wrote a short paragraph that included "family rhyniaceae."*
- *He looked up "family rhyniaceae" because he had never seen it before.*

---

family roccellaceae *(noun)*

A fungus family of division Lichenes.

- *She wrote a short paragraph that included "family roccellaceae."*
- *They discussed "family roccellaceae" during the group presentation.*

---

family roridulaceae *(noun)*

In some classifications included in the family Droseraceae.

- *In class, the teacher used "family roridulaceae" to mean in some classifications included in the family....*
- *They discussed "family roridulaceae" during the group presentation.*

---

family ruscaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *In class, the teacher used "family ruscaceae" to mean one of many subfamilies into which some....*
- *The article explained what "family ruscaceae" means with a simple example.*

---

family russulaceae *(noun)*

Used in some classification systems for the genus Russula.

- *She wrote a short paragraph that included "family russulaceae."*
- *He looked up "family russulaceae" because he had never seen it before.*

---

family saccharomycetaceae *(noun)*

Family of fungi comprising the typical yeasts: reproduce by budding and ferment carbohydrates.

- *She wrote a short paragraph that included "family saccharomycetaceae."*

- *Understanding "family saccharomycetaceae" helps you talk about this topic clearly.*

---

family salicaceae *(noun)*

Two genera of trees or shrubs having hairy catkins: Salix; Populus.

- *She wrote a short paragraph that included "family salicaceae."*
- *He looked up "family salicaceae" because he had never seen it before.*

---

family salvadoraceae *(noun)*

A family of Old World shrubs and trees of order Gentianales; related to Oleaceae but having four stamens and four petals.

- *She wrote a short paragraph that included "family salvadoraceae."*
- *They discussed "family salvadoraceae" during the group presentation.*

---

family salviniaceae *(noun)*

Water ferns.

- *She wrote a short paragraph that included "family salviniaceae."*
- *The article explained what "family salviniaceae" means with a simple example.*

---

family santalaceae *(noun)*

Chiefly tropical herbs or shrubs or trees bearing nuts or one-seeded fruit.

- *In class, the teacher used "family santalaceae" to mean chiefly tropical herbs or shrubs or trees bearing....*
- *He looked up "family santalaceae" because he had never seen it before.*

---

family sapotaceae *(noun)*

Tropical trees or shrubs with milky juice and often edible fleshy fruit.

- *He looked up "family sapotaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family sapotaceae."*

---

family sarcoscyphaceae *(noun)*

Family of fungi belonging to the order Pezizales.

- *In class, the teacher used "family sarcoscyphaceae" to mean family of fungi belonging to the order pezizales.*
- *The article explained what "family sarcoscyphaceae" means with a simple example.*

---

family sarraceniaceae *(noun)*

Insectivorous plants.

- *The article explained what "family sarraceniaceae" means with a simple example.*
- *In class, the teacher used "family sarraceniaceae" to mean insectivorous plants.*

---

family saururaceae *(noun)*

Family of perennial aromatic herbs: genera Saururus, Anemopsis, Houttuynia.

- *She wrote a short paragraph that included "family saururaceae."*
- *He looked up "family saururaceae" because he had never seen it before.*

---

family saxifragaceae *(noun)*

A large and diverse family of evergreen or deciduous herbs; widely distributed in northern temperate and cold regions; sometimes includes genera of the family Hydrangeaceae.

- *In class, the teacher used "family saxifragaceae" to mean a large and diverse family of evergreen or....*
- *He looked up "family saxifragaceae" because he had never seen it before.*

---

family scheuchzeriaceae *(noun)*

A family of monocotyledonous bog herbs of order Naiadales.

- *He looked up "family scheuchzeriaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family scheuchzeriaceae."*

---

family schizaeaceae *(noun)*

Small family of mainly tropical ferns.

- *He looked up "family schizaeaceae" because he had never seen it before.*
- *In class, the teacher used "family schizaeaceae" to mean small family of mainly tropical ferns.*

---

family schizosaccharomycetaceae *(noun)*

A family of fungi belonging to order Endomycetales.

- *The article explained what "family schizosaccharomycetaceae" means with a simple example.*
- *She wrote a short paragraph that included "family schizosaccharomycetaceae."*

family sciadopityaceae *(noun)*

Family comprising a single genus that until recently was considered part of Taxodiaceae.

- *In class, the teacher used "family sciadopityaceae" to mean family comprising a single genus that until....*
- *Understanding "family sciadopityaceae" helps you talk about this topic clearly.*

family sclerodermataceae *(noun)*

A family of fungi or order Sclerodermatales with a single-layered peridium; includes earthballs.

- *In class, the teacher used "family sclerodermataceae" to mean a family of fungi or order sclerodermatales with a....*
- *The article explained what "family sclerodermataceae" means with a simple example.*

family sclerotiniaceae *(noun)*

A fungus family of order Helotiales.

- *The article explained what "family sclerotiniaceae" means with a simple example.*
- *Understanding "family sclerotiniaceae" helps you talk about this topic clearly.*

family secotiaceae *(noun)*

A family of fungi that have a stalk and cap and a wrinkled mass of tissue (the gleba) where spores are produced; are often dismissed as misshapen forms of other fungi.

- *He looked up "family secotiaceae" because he had never seen it before.*
- *They discussed "family secotiaceae" during the group presentation.*

family selaginellaceae *(noun)*

Lesser club mosses: terrestrial chiefly tropical plants resembling mosses.

- *They discussed "family selaginellaceae" during the group presentation.*
- *The article explained what "family selaginellaceae" means with a simple example.*

family septobasidiaceae *(noun)*

A family of fungi belonging to the subdivision Basidiomycota.

- *He looked up "family septobasidiaceae" because he had never seen it before.*
- *Understanding "family septobasidiaceae" helps you talk about this topic clearly.*

family simaroubaceae *(noun)*

Chiefly tropical trees and shrubs with bitter bark having dry usually one-seeded winged fruit.

- *She wrote a short paragraph that included "family simaroubaceae."*
- *He looked up "family simaroubaceae" because he had never seen it before.*

family sparganiaceae *(noun)*

Coextensive with the genus Sparganium.

- *In class, the teacher used "family sparganiaceae" to mean coextensive with the genus sparganium.*
- *He looked up "family sparganiaceae" because he had never seen it before.*

family sphaeriaceae *(noun)*

Parasitic fungi having globose and sometimes necked or beaked perithecia.

- *The article explained what "family sphaeriaceae" means with a simple example.*
- *She wrote a short paragraph that included "family sphaeriaceae."*

family sphaerobolaceae *(noun)*

Monotypic family of fungi in which the more or less spherical gleba is forcibly ejected at maturity.

- *Understanding "family sphaerobolaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family sphaerobolaceae" to mean monotypic family of fungi in which the more or less....*

family sphaerocarpaceae *(noun)*

Liverworts with bilaterally symmetrical gametophytes; sometimes placed in the order Jungermanniales.

- *They discussed "family sphaerocarpaceae" during the group presentation.*
- *The article explained what "family sphaerocarpaceae" means with a simple example.*

---

family staphylaceae *(noun)*

A family of dicotyledonous plants of order Sapindales found mostly in the north temperate zone.

- *He looked up "family staphylaceae" because he had never seen it before.*
- *In class, the teacher used "family staphylaceae" to mean a family of dicotyledonous plants of order....*

---

family sterculiaceae *(noun)*

A large family of plants of order Malvales.

- *He looked up "family sterculiaceae" because he had never seen it before.*
- *Understanding "family sterculiaceae" helps you talk about this topic clearly.*

---

family strelitziaceae *(noun)*

Woody plants with erect stems of tropical South America and South Africa and Madagascar; in some classifications included in the family Musaceae.

- *They discussed "family strelitziaceae" during the group presentation.*
- *He looked up "family strelitziaceae" because he had never seen it before.*

---

family strophariaceae *(noun)*

Sometimes included in family Agaricaceae.

- *The article explained what "family strophariaceae" means with a simple example.*
- *She wrote a short paragraph that included "family strophariaceae."*

---

family styracaceae *(noun)*

A widely distributed family of shrubs and trees of order Ebenales.

- *She wrote a short paragraph that included "family styracaceae."*
- *Understanding "family styracaceae" helps you talk about this topic clearly.*

---

family symplocaceae *(noun)*

A dicotyledonous family of order Ebenales.

- *In class, the teacher used "family symplocaceae" to mean a dicotyledonous family of order ebenales.*
- *The article explained what "family symplocaceae" means with a simple example.*

---

family synchytriaceae *(noun)*

A fungus family of order Chytridiales.

- *Understanding "family synchytriaceae" helps you talk about this topic clearly.*
- *He looked up "family synchytriaceae" because he had never seen it before.*

---

family taccaceae *(noun)*

Small family of tropical herbs.

- *Understanding "family taccaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family taccaceae" to mean small family of tropical herbs.*

---

family tamaricaceae *(noun)*

Family of desert shrubs and trees (mostly halophytes and xerophytes).

- *He looked up "family tamaricaceae" because he had never seen it before.*
- *They discussed "family tamaricaceae" during the group presentation.*

---

family taxaceae *(noun)*

Sometimes classified as member of order Taxales.

- *Understanding "family taxaceae" helps you talk about this topic clearly.*
- *They discussed "family taxaceae" during the group presentation.*

---

family tecophilaeacea *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *He looked up "family tecophilaeacea" because he had never seen it before.*
- *In class, the teacher used "family tecophilaeacea" to mean one of many subfamilies into which some....*

family tetragoniaceae *(noun)*

Succulent herbs or small shrubs mostly of South Africa but also New Zealand and North America: carpetweeds; fig marigolds.

- *In class, the teacher used "family tetragoniaceae" to mean succulent herbs or small shrubs mostly of south....*
- *He looked up "family tetragoniaceae" because he had never seen it before.*

family theaceae *(noun)*

A family of trees and shrubs of the order Parietales.

- *Understanding "family theaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family theaceae" to mean a family of trees and shrubs of the order parietales.*

family thelephoraceae *(noun)*

Fungi having leathery or membranous sporophores.

- *He looked up "family thelephoraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family thelephoraceae."*

family thelypteridaceae *(noun)*

Genera Thelypteris, Phegopteris, and others.

- *The article explained what "family thelypteridaceae" means with a simple example.*
- *She wrote a short paragraph that included "family thelypteridaceae."*

family theophrastaceae *(noun)*

Family of mainly tropical American trees and shrubs similar to those of the Myrsinaceae; often included in the Myrsinaceae.

- *The article explained what "family theophrastaceae" means with a simple example.*
- *In class, the teacher used "family theophrastaceae" to mean family of mainly tropical american trees and shrubs....*

family thymelaeaceae *(noun)*

Family of trees and shrubs and herbs having tough bark that are found especially in Australia and tropical Africa.

- *He looked up "family thymelaeaceae" because he had never seen it before.*
- *They discussed "family thymelaeaceae" during the group presentation.*

family tiliaceae *(noun)*

Chiefly trees and shrubs of tropical and temperate regions of especially southeastern Asia and Brazil; genera Tilia, Corchorus, Entelea, Grewia, Sparmannia.

- *She wrote a short paragraph that included "family tiliaceae."*
- *He looked up "family tiliaceae" because he had never seen it before.*

family tilletiaceae *(noun)*

A family of smut fungi having a simple promycelium bearing the spores in an apical cluster.

- *Understanding "family tilletiaceae" helps you talk about this topic clearly.*
- *The article explained what "family tilletiaceae" means with a simple example.*

family trapaceae *(noun)*

Family comprising solely the genus Trapa; in some classifications treated as a subfamily or tribe of the family Onagraceae.

- *In class, the teacher used "family trapaceae" to mean family comprising solely the genus trapa; in some....*
- *They discussed "family trapaceae" during the group presentation.*

family tremellaceae *(noun)*

A family of basidiomycetous fungi of the order Tremellales that have the basidium divided longitudinally.

- *In class, the teacher used "family tremellaceae" to mean a family of basidiomycetous fungi of the order....*
- *The article explained what "family tremellaceae" means with a simple example.*

family tricholomataceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *She wrote a short paragraph that included "family tricholomataceae."*
- *They discussed "family tricholomataceae" during the group presentation.*

family trilliaceae *(noun)*

Small family of herbs having flowers with 3 petals and 3 sepals; in some classification systems considered a subfamily of the Liliaceae.

- *She wrote a short paragraph that included "family trilliaceae."*
- *He looked up "family trilliaceae" because he had never seen it before.*

---

family tropaeolaceae *(noun)*

Coextensive with the genus Tropaeolum.

- *They discussed "family tropaeolaceae" during the group presentation.*
- *She wrote a short paragraph that included "family tropaeolaceae."*

---

family tuberaceae *(noun)*

Family of fungi whose ascocarps resemble tubers and vary in size from that of an acorn to that of a large apple.

- *They discussed "family tuberaceae" during the group presentation.*
- *The article explained what "family tuberaceae" means with a simple example.*

---

family tuberculariaceae *(noun)*

Large family of mainly saprophytic imperfect fungi.

- *The article explained what "family tuberculariaceae" means with a simple example.*
- *They discussed "family tuberculariaceae" during the group presentation.*

---

family tulostomaceae *(noun)*

Stalked puffballs.

- *Understanding "family tulostomaceae" helps you talk about this topic clearly.*
- *They discussed "family tulostomaceae" during the group presentation.*

---

family tulostomataceae *(noun)*

Stalked puffballs.

- *They discussed "family tulostomataceae" during the group presentation.*
- *The article explained what "family tulostomataceae" means with a simple example.*

---

family typhaceae *(noun)*

Perennial marsh plants with creeping rootstocks and long linear leaves.

- *Understanding "family typhaceae" helps you talk about this topic clearly.*
- *They discussed "family typhaceae" during the group presentation.*

---

family ulmaceae *(noun)*

A dicot family of the order Urticales including: genera Ulmus, Celtis, Planera, Trema.

- *The article explained what "family ulmaceae" means with a simple example.*
- *Understanding "family ulmaceae" helps you talk about this topic clearly.*

---

family urticaceae *(noun)*

A family of plants of order Urticales including many nettles with stinging hairs.

- *He looked up "family urticaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family urticaceae."*

---

family usneaceae *(noun)*

Fruticose lichens having prostrate or erect or pendulous thalli: genera Usnea, Evernia, Ramalina, Alectoria.

- *He looked up "family usneaceae" because he had never seen it before.*
- *In class, the teacher used "family usneaceae" to mean fruticose lichens having prostrate or erect or....*

---

family ustilaginaceae *(noun)*

A fungus family of loose smuts.

- *The article explained what "family ustilaginaceae" means with a simple example.*
- *They discussed "family ustilaginaceae" during the group presentation.*

---

family valerianaceae *(noun)*

Genus of mostly herbs having a characteristic fetid odor.

- *The article explained what "family valerianaceae" means with a simple example.*

- *In class, the teacher used "family valerianaceae" to mean genus of mostly herbs having a characteristic fetid....*

family violaceae *(noun)*

A family of order Parietales including the genera Viola, Hybanthus, Hymenanthera, Melicytus.

- *The article explained what "family violaceae" means with a simple example.*
- *In class, the teacher used "family violaceae" to mean a family of order parietales including the genera....*

family viscaceae *(noun)*

In some classifications considered a subfamily of Loranthaceae.

- *He looked up "family viscaceae" because he had never seen it before.*
- *They discussed "family viscaceae" during the group presentation.*

family vitaceae *(noun)*

A family of vines belonging to order Rhamnales.

- *Understanding "family vitaceae" helps you talk about this topic clearly.*
- *The article explained what "family vitaceae" means with a simple example.*

family vittariaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems: genus Vittaria.

- *Understanding "family vittariaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family vittariaceae" to mean one of a number of families into which....*

family volvariaceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *Understanding "family volvariaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family volvariaceae" to mean a family of fungi belonging to the order agaricales.*

family welwitschiaceae *(noun)*

In some classifications included in the Gnetaceae.

- *He looked up "family welwitschiaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family welwitschiaceae."*

family winteraceae *(noun)*

Small family of chiefly tropical shrubs and trees of genera Drimys and Pseudowintera; sometimes included in Magnoliaceae.

- *He looked up "family winteraceae" because he had never seen it before.*
- *Understanding "family winteraceae" helps you talk about this topic clearly.*

family xanthorrhoeaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *She wrote a short paragraph that included "family xanthorrhoeaceae."*
- *Understanding "family xanthorrhoeaceae" helps you talk about this topic clearly.*

family xylariaceae *(noun)*

Family of fungi characterized by dark brown to black spores.

- *He looked up "family xylariaceae" because he had never seen it before.*
- *Understanding "family xylariaceae" helps you talk about this topic clearly.*

family xyridaceae *(noun)*

Plants of tropical to temperate regions; usually in wet places.

- *She wrote a short paragraph that included "family xyridaceae."*
- *They discussed "family xyridaceae" during the group presentation.*

family zamiaceae *(noun)*

A family of cycads often included in the family Cycadaceae: zamias.

- *In class, the teacher used "family zamiaceae" to mean a family of cycads often included in the family....*
- *He looked up "family zamiaceae" because he had never seen it before.*

family zannichelliaceae *(noun)*

Alternative classification for some genera included in Potamogetonaceae; one species.

- *He looked up "family zannichelliaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family zannichelliaceae."*

family zosteraceae *(noun)*

Used in some classifications: essentially equivalent to Potamogetonaceae.

- *In class, the teacher used "family zosteraceae" to mean used in some classifications: essentially....*
- *They discussed "family zosteraceae" during the group presentation.*

family zygophyllaceae *(noun)*

Small trees, shrubs, and herbs of warm arid and saline regions; often resinous; some poisonous: genera Zygophyllum, Tribulus, Guaiacum, Larrea.

- *She wrote a short paragraph that included "family zygophyllaceae."*
- *They discussed "family zygophyllaceae" during the group presentation.*

fanweed *(noun)*

Foetid Eurasian weed having round flat pods; naturalized throughout North America.

- *He looked up "fanweed" because he had never seen it before.*
- *She wrote a short paragraph that included "fanweed."*

fanwort *(noun)*

Common aquatic plant of eastern North America having floating and submerged leaves and white yellow-spotted flowers.

- *She wrote a short paragraph that included "fanwort."*
- *They discussed "fanwort" during the group presentation.*

farkleberry *(noun)*

Shrub or small tree of eastern United States having black inedible berries.

- *She wrote a short paragraph that included "farkleberry."*
- *The article explained what "farkleberry" means with a simple example.*

feabane mullet *(noun)*

Hairy perennial Eurasian herb with yellow daisylike flowers reputed to destroy or drive away fleas.

- *They discussed "feabane mullet" during the group presentation.*
- *Understanding "feabane mullet" helps you talk about this topic clearly.*

featherfoil *(noun)*

A plant of the genus Hottonia.

- *The article explained what "featherfoil" means with a simple example.*
- *In class, the teacher used "featherfoil" to mean a plant of the genus hottonia.*

federita *(noun)*

A Sudanese sorghum having exceptionally large soft white grains.

- *Understanding "federita" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "federita."*

felicia amelloides *(noun)*

Hairy South African or Australian subshrub that has daisylike flowers with blue rays.

- *He looked up "felicia amelloides" because he had never seen it before.*
- *Understanding "felicia amelloides" helps you talk about this topic clearly.*

felicia bergeriana *(noun)*

Softly hairy South African herb having flowers with bright blue rays.

- *She wrote a short paragraph that included "felicia bergeriana."*
- *They discussed "felicia bergeriana" during the group presentation.*

felwort *(noun)*

Gentian of Europe and China having creamy white flowers with fringed corollas.

- *The article explained what "felwort" means with a simple example.*
- *In class, the teacher used "felwort" to mean gentian of europe and china having creamy white....*

---

fern rhapis *(noun)*

Small graceful palm with reedlike stems and leaf bases clothed with loose coarse fibers.

- *Understanding "fern rhapis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "fern rhapis."*

---

ferocactus *(noun)*

Genus of nearly globular cacti of Mexico and southwestern United States: barrel cacti.

- *The article explained what "ferocactus" means with a simple example.*
- *In class, the teacher used "ferocactus" to mean genus of nearly globular cacti of mexico and....*

---

feterita *(noun)*

A Sudanese sorghum having exceptionally large soft white grains.

- *In class, the teacher used "feterita" to mean a sudanese sorghum having exceptionally large soft....*
- *He looked up "feterita" because he had never seen it before.*

---

fetid bugbane *(noun)*

Bugbane of Siberia and eastern Asia having ill-smelling green-white flowers.

- *Understanding "fetid bugbane" helps you talk about this topic clearly.*
- *In class, the teacher used "fetid bugbane" to mean bugbane of siberia and eastern asia having....*

---

fetterbush *(noun)*

Ornamental evergreen shrub of southeastern United States having small white bell-shaped flowers.

- *He looked up "fetterbush" because he had never seen it before.*
- *Understanding "fetterbush" helps you talk about this topic clearly.*

---

feverroot *(noun)*

Coarse weedy American perennial herb with large usually perfoliate leaves and purple or dull red flowers.

- *He looked up "feverroot" because he had never seen it before.*
- *She wrote a short paragraph that included "feverroot."*

---

ficus deltoidea *(noun)*

Shrub or small tree often grown as a houseplant having foliage like mistletoe.

- *The article explained what "ficus deltoidea" means with a simple example.*
- *In class, the teacher used "ficus deltoidea" to mean shrub or small tree often grown as a houseplant....*

---

ficus diversifolia *(noun)*

Shrub or small tree often grown as a houseplant having foliage like mistletoe.

- *The article explained what "ficus diversifolia" means with a simple example.*
- *In class, the teacher used "ficus diversifolia" to mean shrub or small tree often grown as a houseplant....*

---

ficus rubiginosa *(noun)*

Australian tree resembling the banyan often planted for ornament; introduced into South Africa for brushwood.

- *She wrote a short paragraph that included "ficus rubiginosa."*
- *He looked up "ficus rubiginosa" because he had never seen it before.*

---

ficus sycomorus *(noun)*

Thick-branched wide-spreading tree of Africa and adjacent southwestern Asia often buttressed with branches rising from near the ground; produces cluster of edible but inferior figs on short leafless twigs; the biblical sycamore.

- *He looked up "ficus sycomorus" because he had never seen it before.*
- *In class, the teacher used "ficus sycomorus" to mean thick-branched wide-spreading tree of africa and....*

---

fiddleneck *(noun)*

Hairy annual of California to Mexico with crowded cymes of small blue to lilac or mauve flowers.

- *She wrote a short paragraph that included "fiddleneck."*
- *He looked up "fiddleneck" because he had never seen it before.*

field pennycress *(noun)*

Foetid Eurasian weed having round flat pods; naturalized throughout North America.

- *Understanding "field pennycress" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "field pennycress."*

field pussytoes *(noun)*

A variety of pussytoes.

- *They discussed "field pussytoes" during the group presentation.*
- *He looked up "field pussytoes" because he had never seen it before.*

field sandbur *(noun)*

Grass of the eastern United States and tropical America having spikelets enclosed in prickly burs.

- *The article explained what "field sandbur" means with a simple example.*
- *In class, the teacher used "field sandbur" to mean grass of the eastern united states and tropical....*

figwort *(noun)*

Any of numerous tall coarse woodland plants of the genus Scrophularia.

- *Understanding "figwort" helps you talk about this topic clearly.*
- *In class, the teacher used "figwort" to mean any of numerous tall coarse woodland plants of the....*

figwort family *(noun)*

A family of dicotyledonous plants of the order Polemoniales; includes figwort and snapdragon and foxglove and toadflax and speedwell and mullein; in some classifications placed in the order Scrophulariales.

- *He looked up "figwort family" because he had never seen it before.*
- *Understanding "figwort family" helps you talk about this topic clearly.*

filago *(noun)*

Any plant of the genus Filago having capitate clusters of small woolly flower heads.

- *Understanding "filago" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "filago."*

filago germanica *(noun)*

(literally an undutiful herb) a variety of cotton rose.

- *The article explained what "filago germanica" means with a simple example.*
- *Understanding "filago germanica" helps you talk about this topic clearly.*

filaree *(noun)*

European weed naturalized in southwestern United States and Mexico having reddish decumbent stems with small fernlike leaves and small deep reddish-lavender flowers followed by slender fruits that stick straight up; often grown for forage.

- *Understanding "filaree" helps you talk about this topic clearly.*
- *The article explained what "filaree" means with a simple example.*

filicales *(noun)*

True (leptosporangiate) ferns.

- *He looked up "filicales" because he had never seen it before.*
- *She wrote a short paragraph that included "filicales."*

fingerflower *(noun)*

Tall leafy European biennial or perennial having spectacular clusters of large tubular pink-purple flowers; leaves yield drug digitalis and are poisonous to livestock.

- *In class, the teacher used "fingerflower" to mean tall leafy european biennial or perennial having....*
- *Understanding "fingerflower" helps you talk about this topic clearly.*

fingerroot *(noun)*

Tall leafy European biennial or perennial having spectacular clusters of large tubular pink-purple flowers; leaves yield drug digitalis and are poisonous to livestock.

- *She wrote a short paragraph that included "fingerroot."*
- *The article explained what "fingerroot" means with a simple example.*

fir clubmoss *(noun)*

Of northern Europe and America; resembling a miniature fir.

- *She wrote a short paragraph that included "fir clubmoss."*
- *He looked up "fir clubmoss" because he had never seen it before.*

---

firethorn *(noun)*

Any of various thorny shrubs of the genus Pyracantha bearing small white flowers followed by hard red or orange-red berries.

- *They discussed "firethorn" during the group presentation.*
- *Understanding "firethorn" helps you talk about this topic clearly.*

---

firewheel tree *(noun)*

Eastern Australian tree widely cultivated as a shade tree and for its glossy leaves and circular clusters of showy red to orange-scarlet flowers.

- *The article explained what "firewheel tree" means with a simple example.*
- *In class, the teacher used "firewheel tree" to mean eastern australian tree widely cultivated as a....*

---

firmiana *(noun)*

Small genus of Asian trees or shrubs.

- *They discussed "firmiana" during the group presentation.*
- *She wrote a short paragraph that included "firmiana."*

---

firmiana simplex *(noun)*

Deciduous tree widely grown in southern United States as an ornamental for its handsome maplelike foliage and long racemes of yellow-green flowers followed by curious leaflike pods.

- *The article explained what "firmiana simplex" means with a simple example.*
- *In class, the teacher used "firmiana simplex" to mean deciduous tree widely grown in southern united....*

---

fishpole bamboo *(noun)*

Small bamboo of southeastern China having slender culms flexuous when young.

- *Understanding "fishpole bamboo" helps you talk about this topic clearly.*
- *He looked up "fishpole bamboo" because he had never seen it before.*

---

fistulina *(noun)*

Fungi having each pore separate though crowded.

- *The article explained what "fistulina" means with a simple example.*
- *They discussed "fistulina" during the group presentation.*

---

fistulina hepatica *(noun)*

A popular edible fungus with a cap the color of liver or raw meat; abundant in southeastern United States.

- *Understanding "fistulina hepatica" helps you talk about this topic clearly.*
- *The article explained what "fistulina hepatica" means with a simple example.*

---

fistulinaceae *(noun)*

A family of fungi closely related to the family Polyporaceae except that the tubes on the undersurface of the cap are separate from each other.

- *They discussed "fistulinaceae" during the group presentation.*
- *In class, the teacher used "fistulinaceae" to mean a family of fungi closely related to the family....*

---

flacourtia *(noun)*

Often spiny trees or shrubs of tropical Asia and Africa.

- *He looked up "flacourtia" because he had never seen it before.*
- *They discussed "flacourtia" during the group presentation.*

---

flacourtia family *(noun)*

Chiefly tropical trees and shrubs.

- *In class, the teacher used "flacourtia family" to mean chiefly tropical trees and shrubs.*
- *Understanding "flacourtia family" helps you talk about this topic clearly.*

---

flacourtia indica *(noun)*

Small shrubby tree of Madagascar cultivated in tropical regions as a hedge plant and for its deep red acid fruits resembling small plums.

- *He looked up "flacourtia indica" because he had never seen it before.*
- *Understanding "flacourtia indica" helps you talk about this topic clearly.*

---

flacourtiaceae *(noun)*

Chiefly tropical trees and shrubs.

- *In class, the teacher used "flacourtiaceae" to mean chiefly tropical trees and shrubs.*
- *The article explained what "flacourtiaceae" means with a simple example.*

---

flagroot *(noun)*

Perennial marsh plant having swordlike leaves and aromatic roots.

- *He looked up "flagroot" because he had never seen it before.*
- *In class, the teacher used "flagroot" to mean perennial marsh plant having swordlike leaves and....*

---

flame durrajong *(noun)*

South Australian tree having panicles of brilliant scarlet flowers.

- *The article explained what "flame durrajong" means with a simple example.*
- *In class, the teacher used "flame durrajong" to mean south australian tree having panicles of brilliant....*

---

flameflower *(noun)*

A plant of the genus Kniphofia having long grasslike leaves and tall scapes of red or yellow drooping flowers.

- *Understanding "flameflower" helps you talk about this topic clearly.*
- *They discussed "flameflower" during the group presentation.*

---

flammulina *(noun)*

A genus of agarics.

- *In class, the teacher used "flammulina" to mean a genus of agarics.*
- *He looked up "flammulina" because he had never seen it before.*

---

flammulina velutipes *(noun)*

An edible agaric that is available in early spring or late fall when few other mushrooms are; has a viscid smooth orange to brown cap and a velvety stalk that turns black in maturity and pallid gills; often occur in clusters.

- *They discussed "flammulina velutipes" during the group presentation.*
- *Understanding "flammulina velutipes" helps you talk about this topic clearly.*

---

flannelbush *(noun)*

Any of several handsome evergreen shrubs of California and northern Mexico having downy lobed leaves and showy yellow flowers.

- *In class, the teacher used "flannelbush" to mean any of several handsome evergreen shrubs of....*
- *Understanding "flannelbush" helps you talk about this topic clearly.*

---

fleawort *(noun)*

Plantain of Mediterranean regions whose seeds swell and become gelatinous when moist and are used as a mild laxative.

- *He looked up "fleawort" because he had never seen it before.*
- *She wrote a short paragraph that included "fleawort."*

---

flindersia *(noun)*

Small genus of Australian timber trees.

- *She wrote a short paragraph that included "flindersia."*
- *The article explained what "flindersia" means with a simple example.*

---

flindersia australis *(noun)*

Tall Australian timber tree yielding tough hard wood used for staves etc.

- *The article explained what "flindersia australis" means with a simple example.*
- *Understanding "flindersia australis" helps you talk about this topic clearly.*

---

flindersia schottiana *(noun)*

Australian timber tree whose bark yields a poison.

- *They discussed "flindersia schottiana" during the group presentation.*
- *She wrote a short paragraph that included "flindersia schottiana."*

flindosa *(noun)*

Tall Australian timber tree yielding tough hard wood used for staves etc.

- *Understanding "flindosa" helps you talk about this topic clearly.*
- *The article explained what "flindosa" means with a simple example.*

flindosy *(noun)*

Tall Australian timber tree yielding tough hard wood used for staves etc.

- *Understanding "flindosy" helps you talk about this topic clearly.*
- *They discussed "flindosy" during the group presentation.*

floccose chanterelle *(noun)*

A mildly poisonous fungus with a fruiting body shaped like a hollow trumpet.

- *The article explained what "floccose chanterelle" means with a simple example.*
- *She wrote a short paragraph that included "floccose chanterelle."*

florest's cineraria *(noun)*

Herb derived from Pericallis cruenta and widely cultivated in a variety of profusely flowering forms with florets from white to pink to red or purple or violet or blue.

- *They discussed "florest's cineraria" during the group presentation.*
- *The article explained what "florest's cineraria" means with a simple example.*

floweret *(noun)*

A diminutive flower (especially one that is part of a composite flower).

- *Understanding "floweret" helps you talk about this topic clearly.*
- *They discussed "floweret" during the group presentation.*

foamflower *(noun)*

Stoloniferous white-flowered spring-blooming woodland plant.

- *In class, the teacher used "foamflower" to mean stoloniferous white-flowered spring-blooming....*
- *The article explained what "foamflower" means with a simple example.*

foetid bugbane *(noun)*

Bugbane of Siberia and eastern Asia having ill-smelling green-white flowers.

- *They discussed "foetid bugbane" during the group presentation.*
- *He looked up "foetid bugbane" because he had never seen it before.*

fomes igniarius *(noun)*

Fungus used in the preparation of punk for fuses.

- *They discussed "fomes igniarius" during the group presentation.*
- *He looked up "fomes igniarius" because he had never seen it before.*

forestiera *(noun)*

Any plant of the genus Forestiera.

- *Understanding "forestiera" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "forestiera."*

forestiera neomexicana *(noun)*

Spiny branching deciduous shrub of southwestern United States having clusters of insignificant yellow-white flowers appearing before leaves followed by attractive black berrylike fruits.

- *In class, the teacher used "forestiera neomexicana" to mean spiny branching deciduous shrub of southwestern....*
- *They discussed "forestiera neomexicana" during the group presentation.*

form genus rhizoctinia *(noun)*

Form genus of imperfect fungi some species of which are now placed in genera Pellicularia and Corticium because their perfect stages have been found.

- *Understanding "form genus rhizoctinia" helps you talk about this topic clearly.*
- *He looked up "form genus rhizoctinia" because he had never seen it before.*

fortunella *(noun)*

Small genus of shrubs native to south China producing small ovoid fruits resembling oranges: includes kumquats.

- *He looked up "fortunella" because he had never seen it before.*
- *Understanding "fortunella" helps you talk about this topic clearly.*

---

fortunella japonica *(noun)*

Shrub bearing round-fruited kumquats.

- *The article explained what "fortunella japonica" means with a simple example.*
- *Understanding "fortunella japonica" helps you talk about this topic clearly.*

---

fortunella margarita *(noun)*

Shrub bearing oval-fruited kumquats.

- *He looked up "fortunella margarita" because he had never seen it before.*
- *She wrote a short paragraph that included "fortunella margarita."*

---

fothergilla *(noun)*

Small genus of deciduous shrubs of the southeastern United States.

- *They discussed "fothergilla" during the group presentation.*
- *She wrote a short paragraph that included "fothergilla."*

---

fouquieria *(noun)*

Resinous succulent trees or shrubs of desert and semidesert regions of southwestern United States that are leafless most of the year.

- *Understanding "fouquieria" helps you talk about this topic clearly.*
- *They discussed "fouquieria" during the group presentation.*

---

fouquieria columnaris *(noun)*

Candlewood of Mexico and southwestern California having tall columnar stems and bearing honey-scented creamy yellow flowers.

- *The article explained what "fouquieria columnaris" means with a simple example.*
- *In class, the teacher used "fouquieria columnaris" to mean candlewood of mexico and southwestern california....*

---

fouquieria splendens *(noun)*

Desert shrub of southwestern United States and Mexico having slender naked spiny branches that after the rainy season put forth foliage and clusters of red flowers.

- *He looked up "fouquieria splendens" because he had never seen it before.*
- *They discussed "fouquieria splendens" during the group presentation.*

---

fouquieriaceae *(noun)*

Small family of spiny shrubs or trees of southwestern United States.

- *He looked up "fouquieriaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "fouquieriaceae."*

---

foxberry *(noun)*

Low evergreen shrub of high north temperate regions of Europe and Asia and America bearing red edible berries.

- *They discussed "foxberry" during the group presentation.*
- *He looked up "foxberry" because he had never seen it before.*

---

fragaria ananassa *(noun)*

Widely cultivated.

- *She wrote a short paragraph that included "fragaria ananassa."*
- *They discussed "fragaria ananassa" during the group presentation.*

---

fragaria chiloensis *(noun)*

Wild strawberry of western United States and South America; source of many varieties of cultivated strawberries.

- *Understanding "fragaria chiloensis" helps you talk about this topic clearly.*
- *He looked up "fragaria chiloensis" because he had never seen it before.*

---

fragrant woodsia *(noun)*

A common rock-inhabiting fern of northern temperate regions having rusty-brown stipes and lanceolate pinnate fronds.

- *They discussed "fragrant woodsia" during the group presentation.*

- *In class, the teacher used "fragrant woodsia" to mean a common rock-inhabiting fern of northern temperate....*

---

francoa *(noun)*

Perennial evergreen herbs with white or pink flowers; Chile.

- *He looked up "francoa" because he had never seen it before.*
- *She wrote a short paragraph that included "francoa."*

---

francoa ramosa *(noun)*

Chilean evergreen shrub having delicate spikes of small white flowers.

- *She wrote a short paragraph that included "francoa ramosa."*
- *He looked up "francoa ramosa" because he had never seen it before.*

---

frangipanni *(noun)*

Any of various tropical American deciduous shrubs or trees of the genus Plumeria having milky sap and showy fragrant funnel-shaped variously colored flowers.

- *She wrote a short paragraph that included "frangipanni."*
- *He looked up "frangipanni" because he had never seen it before.*

---

frasera *(noun)*

Genus of North American herbs: columbo; includes some species sometimes placed in genus Swertia.

- *Understanding "frasera" helps you talk about this topic clearly.*
- *In class, the teacher used "frasera" to mean genus of north american herbs: columbo; includes....*

---

frasera speciosa *(noun)*

Tall herb with panicles of white flowers flushed with green; northwestern United States; sometimes placed in genus Swertia.

- *She wrote a short paragraph that included "frasera speciosa."*
- *The article explained what "frasera speciosa" means with a simple example.*

---

fraxinella *(noun)*

Eurasian perennial herb with white flowers that emit flammable vapor in hot weather.

- *In class, the teacher used "fraxinella" to mean eurasian perennial herb with white flowers that....*
- *He looked up "fraxinella" because he had never seen it before.*

---

fraxinus dipetala *(noun)*

Shrubby California ash with showy off-white flowers.

- *Understanding "fraxinus dipetala" helps you talk about this topic clearly.*
- *The article explained what "fraxinus dipetala" means with a simple example.*

---

fraxinus oregona *(noun)*

Timber tree of western North America yielding hard light wood; closely related to the red ash.

- *The article explained what "fraxinus oregona" means with a simple example.*
- *In class, the teacher used "fraxinus oregona" to mean timber tree of western north america yielding hard....*

---

fraxinus ornus *(noun)*

Southern Mediterranean ash having fragrant white flowers in dense panicles and yielding manna.

- *The article explained what "fraxinus ornus" means with a simple example.*
- *In class, the teacher used "fraxinus ornus" to mean southern mediterranean ash having fragrant white....*

---

fraxinus pennsylvanica subintegerrima *(noun)*

A variety of red ash having glossy branchlets and lower leaf surfaces.

- *In class, the teacher used "fraxinus pennsylvanica subintegerrima" to mean a variety of red ash having glossy branchlets and....*
- *He looked up "fraxinus pennsylvanica subintegerrima" because he had never seen it before.*

---

fraxinus quadrangulata *(noun)*

Ash of central and southern United States with bluish-green foliage and hard brown wood.

- *In class, the teacher used "fraxinus quadrangulata" to mean ash of central and southern united states with....*
- *They discussed "fraxinus quadrangulata" during the group presentation.*

---

fraxinus texensis *(noun)*

Low-growing ash of Texas.

- *She wrote a short paragraph that included "fraxinus texensis."*
- *He looked up "fraxinus texensis" because he had never seen it before.*

---

fremontia *(noun)*

Flannelbush.

- *They discussed "fremontia" during the group presentation.*
- *The article explained what "fremontia" means with a simple example.*

---

fremontodendron *(noun)*

Flannelbush.

- *In class, the teacher used "fremontodendron" to mean flannelbush.*
- *Understanding "fremontodendron" helps you talk about this topic clearly.*

---

frijol *(noun)*

The common bean plant grown for the beans rather than the pods (especially a variety with large red kidney-shaped beans).

- *He looked up "frijol" because he had never seen it before.*
- *They discussed "frijol" during the group presentation.*

---

frijole *(noun)*

The common bean plant grown for the beans rather than the pods (especially a variety with large red kidney-shaped beans).

- *The article explained what "frijole" means with a simple example.*
- *She wrote a short paragraph that included "frijole."*

---

frijolillo *(noun)*

Shrub or small tree having pinnate leaves poisonous to livestock and dense racemes of intensely fragrant blue flowers and red beans.

- *He looked up "frijolillo" because he had never seen it before.*
- *She wrote a short paragraph that included "frijolillo."*

---

frijolito *(noun)*

Shrub or small tree having pinnate leaves poisonous to livestock and dense racemes of intensely fragrant blue flowers and red beans.

- *In class, the teacher used "frijolito" to mean shrub or small tree having pinnate leaves poisonous....*
- *They discussed "frijolito" during the group presentation.*

---

fringepod *(noun)*

Annual herb having pinnatifid basal leaves and slender racemes of small white flowers followed by one-seeded winged silicles.

- *He looked up "fringepod" because he had never seen it before.*
- *She wrote a short paragraph that included "fringepod."*

---

fritillaria biflora *(noun)*

Herb of southwestern United States having dark purple bell-shaped flowers mottled with green.

- *In class, the teacher used "fritillaria biflora" to mean herb of southwestern united states having dark....*
- *They discussed "fritillaria biflora" during the group presentation.*

---

fritillaria pluriflora *(noun)*

California herb with pinkish purple flowers.

- *They discussed "fritillaria pluriflora" during the group presentation.*
- *He looked up "fritillaria pluriflora" because he had never seen it before.*

---

fritillaria recurva *(noun)*

Western United States herb with scarlet and yellow narrow bell-shaped flowers.

- *She wrote a short paragraph that included "fritillaria recurva."*
- *He looked up "fritillaria recurva" because he had never seen it before.*

---

froelichia *(noun)*

Genus of erect or procumbent herbs of the Americas having spikes of woolly white flowers: cottonweed.

- *Understanding "froelichia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "froelichia."*

---

frogbit *(noun)*

European floating plant with roundish heart-shaped leaves and white flowers.

- *They discussed "frogbit" during the group presentation.*
- *She wrote a short paragraph that included "frogbit."*

---

frogbit family *(noun)*

Simple nearly stemless freshwater aquatic plants; widely distributed.

- *She wrote a short paragraph that included "frogbit family."*
- *He looked up "frogbit family" because he had never seen it before.*

---

frostweed *(noun)*

Tall perennial herb having clusters of white flowers; the eastern United States.

- *She wrote a short paragraph that included "frostweed."*
- *They discussed "frostweed" during the group presentation.*

---

frostwort *(noun)*

Perennial of the eastern United States having early solitary yellow flowers followed by late petalless flowers; so-called because ice crystals form on it during first frosts.

- *He looked up "frostwort" because he had never seen it before.*
- *She wrote a short paragraph that included "frostwort."*

---

fruitage *(noun)*

The yield of fruit.

- *A tree highly recommended for its fruitage.*
- *The article explained what "fruitage" means with a simple example.*

---

fruitlet *(noun)*

A diminutive fruit, especially one that is part of a multiple fruit.

- *The article explained what "fruitlet" means with a simple example.*
- *In class, the teacher used "fruitlet" to mean a diminutive fruit, especially one that is part of....*

---

fuchsia excorticata *(noun)*

Erect deciduous shrub or tree to 10 feet with maroon flowers; New Zealand.

- *Understanding "fuchsia excorticata" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "fuchsia excorticata."*

---

fumaria *(noun)*

Annual herbs whose flowers have only one petal spurred at the base.

- *The article explained what "fumaria" means with a simple example.*
- *In class, the teacher used "fumaria" to mean annual herbs whose flowers have only one petal....*

---

fumaria claviculata *(noun)*

Annual vine with decompound leaves and racemes of yellow and pink flowers.

- *Understanding "fumaria claviculata" helps you talk about this topic clearly.*
- *He looked up "fumaria claviculata" because he had never seen it before.*

---

fumaria fungosa *(noun)*

Vine with feathery leaves and white or pinkish flowers; sometimes placed in genus Fumaria.

- *He looked up "fumaria fungosa" because he had never seen it before.*
- *She wrote a short paragraph that included "fumaria fungosa."*

---

fumaria officinalis *(noun)*

Delicate European herb with greyish leaves and spikes of purplish flowers; formerly used medicinally.

- *In class, the teacher used "fumaria officinalis" to mean delicate european herb with greyish leaves and....*
- *He looked up "fumaria officinalis" because he had never seen it before.*

fumaria sempervirens *(noun)*

Glaucous herb of northeastern United States and Canada having loose racemes of yellow-tipped pink flowers; sometimes placed in genus Fumaria.

- *In class, the teacher used "fumaria sempervirens" to mean glaucous herb of northeastern united states and....*
- *They discussed "fumaria sempervirens" during the group presentation.*

fumariaceae *(noun)*

Erect or climbing herbs of the northern hemisphere and southern Africa: bleeding heart; Dutchman's breeches; fumitory; squirrel corn.

- *They discussed "fumariaceae" during the group presentation.*
- *She wrote a short paragraph that included "fumariaceae."*

fumeroot *(noun)*

Herb of northern Europe and Asia having erect racemes of red flowers.

- *They discussed "fumeroot" during the group presentation.*
- *He looked up "fumeroot" because he had never seen it before.*

fumewort *(noun)*

Herb of northern Europe and Asia having erect racemes of red flowers.

- *She wrote a short paragraph that included "fumewort."*
- *They discussed "fumewort" during the group presentation.*

fumitory *(noun)*

Delicate European herb with greyish leaves and spikes of purplish flowers; formerly used medicinally.

- *She wrote a short paragraph that included "fumitory."*
- *He looked up "fumitory" because he had never seen it before.*

fumitory family *(noun)*

Erect or climbing herbs of the northern hemisphere and southern Africa: bleeding heart; Dutchman's breeches; fumitory; squirrel corn.

- *The article explained what "fumitory family" means with a simple example.*
- *In class, the teacher used "fumitory family" to mean erect or climbing herbs of the northern hemisphere....*

fungi imperfecti *(noun)*

Large and heterogeneous form division of fungi comprising forms for which no sexually reproductive stage is known.

- *She wrote a short paragraph that included "fungi imperfecti."*
- *He looked up "fungi imperfecti" because he had never seen it before.*

funicle *(noun)*

The stalk of a plant ovule or seed.

- *He looked up "funicle" because he had never seen it before.*
- *In class, the teacher used "funicle" to mean the stalk of a plant ovule or seed.*

funka *(noun)*

Robust east Asian clump-forming perennial herbs having racemose flowers: plantain lilies; sometimes placed in family Hostaceae.

- *They discussed "funka" during the group presentation.*
- *In class, the teacher used "funka" to mean robust east asian clump-forming perennial herbs....*

funkaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hosta.

- *She wrote a short paragraph that included "funkaceae."*
- *Understanding "funkaceae" helps you talk about this topic clearly.*

fusain *(noun)*

A stick of black carbon material used for drawing.

- *He looked up "fusain" because he had never seen it before.*
- *They discussed "fusain" during the group presentation.*

fusanus *(noun)*

Quandong trees.

- *They discussed "fusanus" during the group presentation.*
- *In class, the teacher used "fusanus" to mean quandong trees.*

---

fusanus acuminatus *(noun)*

Australian tree with edible flesh and edible nutlike seed.

- *The article explained what "fusanus acuminatus" means with a simple example.*
- *She wrote a short paragraph that included "fusanus acuminatus."*

---

fuscoboletinus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *She wrote a short paragraph that included "fuscoboletinus."*
- *He looked up "fuscoboletinus" because he had never seen it before.*

---

fuscoboletinus paluster *(noun)*

An edible fungus with a pinkish purple cap and stalk and a pore surface that is yellow with large angular pores that become like gills in maturity.

- *She wrote a short paragraph that included "fuscoboletinus paluster."*
- *The article explained what "fuscoboletinus paluster" means with a simple example.*

---

fuscoboletinus serotinus *(noun)*

An edible fungus with a broadly convex brown cap and a whitish pore surface and stalk.

- *They discussed "fuscoboletinus serotinus" during the group presentation.*
- *He looked up "fuscoboletinus serotinus" because he had never seen it before.*

---

galax urceolata *(noun)*

Tufted evergreen perennial herb having spikes of tiny white flowers and glossy green round to heart-shaped leaves that become coppery to maroon or purplish in fall.

- *They discussed "galax urceolata" during the group presentation.*
- *Understanding "galax urceolata" helps you talk about this topic clearly.*

---

galbulus *(noun)*

The seed-producing cone of a cypress tree.

- *They discussed "galbulus" during the group presentation.*
- *In class, the teacher used "galbulus" to mean the seed-producing cone of a cypress tree.*

---

galega *(noun)*

Small genus of Eurasian herbs: goat's rue.

- *The article explained what "galega" means with a simple example.*
- *In class, the teacher used "galega" to mean small genus of eurasian herbs: goat's rue.*

---

galega officinalis *(noun)*

Tall bushy European perennial grown for its pinnate foliage and slender spikes of blue flowers; sometimes used medicinally.

- *In class, the teacher used "galega officinalis" to mean tall bushy european perennial grown for its pinnate....*
- *Understanding "galega officinalis" helps you talk about this topic clearly.*

---

galeopsis *(noun)*

Erect annual European herbs.

- *She wrote a short paragraph that included "galeopsis."*
- *The article explained what "galeopsis" means with a simple example.*

---

galeopsis tetrahit *(noun)*

Coarse bristly Eurasian plant with white or reddish flowers and foliage resembling that of a nettle; common as a weed in United States.

- *Understanding "galeopsis tetrahit" helps you talk about this topic clearly.*
- *The article explained what "galeopsis tetrahit" means with a simple example.*

---

galiella rufa *(noun)*

The cup-shaped fruiting body of this discomycete has a jellylike interior and a short stalk.

- *They discussed "galiella rufa" during the group presentation.*

- *She wrote a short paragraph that included “galiella rufa.”*

galingale *(noun)*

European sedge having rough-edged leaves and spikelets of reddish flowers and aromatic roots.

- *Understanding “galingale” helps you talk about this topic clearly.*
- *They discussed “galingale” during the group presentation.*

galium aparine *(noun)*

Annual having the stem beset with curved prickles; North America and Europe and Asia.

- *The article explained what “galium aparine” means with a simple example.*
- *She wrote a short paragraph that included “galium aparine.”*

galium mollugo *(noun)*

Eurasian herb with ample panicles of small white flowers; naturalized in North America.

- *He looked up “galium mollugo” because he had never seen it before.*
- *She wrote a short paragraph that included “galium mollugo.”*

gallberry *(noun)*

Evergreen holly of eastern North America with oblong leathery leaves and small black berries.

- *He looked up “gallberry” because he had never seen it before.*
- *Understanding “gallberry” helps you talk about this topic clearly.*

galtonia candicans *(noun)*

Southern African herb with white bell-shaped flowers.

- *They discussed “galtonia candicans” during the group presentation.*
- *He looked up “galtonia candicans” because he had never seen it before.*

gametangium *(noun)*

Cell or organ in which gametes develop.

- *The article explained what “gametangium” means with a simple example.*
- *She wrote a short paragraph that included “gametangium.”*

gametoecium *(noun)*

Gametangia and surrounding bracts.

- *He looked up “gametoecium” because he had never seen it before.*
- *She wrote a short paragraph that included “gametoecium.”*

gametophore *(noun)*

A modified branch bearing gametangia as in the thalloid liverworts.

- *The article explained what “gametophore” means with a simple example.*
- *In class, the teacher used “gametophore” to mean a modified branch bearing gametangia as in the....*

garambulla *(noun)*

Arborescent cactus of western Mexico bearing a small oblong edible berrylike fruit.

- *He looked up “garambulla” because he had never seen it before.*
- *She wrote a short paragraph that included “garambulla.”*

garambulla cactus *(noun)*

Arborescent cactus of western Mexico bearing a small oblong edible berrylike fruit.

- *She wrote a short paragraph that included “garambulla cactus.”*
- *He looked up “garambulla cactus” because he had never seen it before.*

garcinia hanburyi *(noun)*

Low spreading tree of Indonesia yielding an orange to brown gum resin (gamboge) used as a pigment when powdered.

- *In class, the teacher used “garcinia hanburyi” to mean low spreading tree of indonesia yielding an orange....*
- *They discussed “garcinia hanburyi” during the group presentation.*

garcinia mangostana *(noun)*

East Indian tree with thick leathery leaves and edible fruit.

- *She wrote a short paragraph that included "garcinia mangostana."*
- *The article explained what "garcinia mangostana" means with a simple example.*

---

garden orache *(noun)*

Asiatic plant resembling spinach often used as a potherb; naturalized in Europe and North America.

- *They discussed "garden orache" during the group presentation.*
- *In class, the teacher used "garden orache" to mean asiatic plant resembling spinach often used as a....*

---

garden symphilid *(noun)*

Minute arthropod often infesting the underground parts of truck-garden and greenhouse crops.

- *He looked up "garden symphilid" because he had never seen it before.*
- *They discussed "garden symphilid" during the group presentation.*

---

gardenia jasminoides *(noun)*

Evergreen shrub widely cultivated for its large fragrant waxlike white flowers and glossy leaves.

- *They discussed "gardenia jasminoides" during the group presentation.*
- *In class, the teacher used "gardenia jasminoides" to mean evergreen shrub widely cultivated for its large....*

---

garget *(noun)*

Tall coarse perennial American herb having small white flowers followed by blackish-red berries on long drooping racemes; young fleshy stems are edible; berries and root are poisonous.

- *He looked up "garget" because he had never seen it before.*
- *Understanding "garget" helps you talk about this topic clearly.*

---

gasolene *(noun)*

A volatile flammable mixture of hydrocarbons (hexane and heptane and octane etc.) derived from petroleum; used mainly as a fuel in internal-combustion engines.

- *In class, the teacher used "gasolene" to mean a volatile flammable mixture of hydrocarbons....*
- *The article explained what "gasolene" means with a simple example.*

---

gasteromycete *(noun)*

Any fungus of the class Gasteromycetes.

- *In class, the teacher used "gasteromycete" to mean any fungus of the class gasteromycetes.*
- *The article explained what "gasteromycete" means with a simple example.*

---

gasteromycetes *(noun)*

Fungi in which the hymenium is enclosed until after spores have matured: puffballs; earth stars; stinkhorn fungi.

- *She wrote a short paragraph that included "gasteromycetes."*
- *They discussed "gasteromycetes" during the group presentation.*

---

gastroboletus *(noun)*

A genus of fungi belonging to the family Secotiaceae; they resemble boletes but the spores are not discharged from the basidium.

- *In class, the teacher used "gastroboletus" to mean a genus of fungi belonging to the family....*
- *He looked up "gastroboletus" because he had never seen it before.*

---

gastroboletus scabrosus *(noun)*

A dingy yellow brown fungus with a rough stalk that superficially resembles a bolete.

- *They discussed "gastroboletus scabrosus" during the group presentation.*
- *The article explained what "gastroboletus scabrosus" means with a simple example.*

---

gastroboletus turbinatus *(noun)*

A fungus with a cap that can vary from red to dark brown; superficially resembles a bolete.

- *The article explained what "gastroboletus turbinatus" means with a simple example.*
- *In class, the teacher used "gastroboletus turbinatus" to mean a fungus with a cap that can vary from red to dark....*

---

gastrocybe *(noun)*

A genus of fungi of the family Secotiaceae.

- *She wrote a short paragraph that included "gastrocybe."*
- *He looked up "gastrocybe" because he had never seen it before.*

---

gastrolobium *(noun)*

Any of various Australian evergreen shrubs of the genus Gastrolobium having whorled compound leaves poisonous to livestock and showy yellow to deep reddish-orange flowers followed by two-seeded pods.

- *Understanding "gastrolobium" helps you talk about this topic clearly.*
- *He looked up "gastrolobium" because he had never seen it before.*

---

gastromycete *(noun)*

Any fungus of the class Gasteromycetes.

- *She wrote a short paragraph that included "gastromycete."*
- *He looked up "gastromycete" because he had never seen it before.*

---

gastromycetes *(noun)*

Fungi in which the hymenium is enclosed until after spores have matured: puffballs; earth stars; stinkhorn fungi.

- *Understanding "gastromycetes" helps you talk about this topic clearly.*
- *The article explained what "gastromycetes" means with a simple example.*

---

gaultheria hispidula *(noun)*

Slow-growing procumbent evergreen shrublet of northern North America and Japan having white flowers and numerous white fleshy rough and hairy seeds.

- *They discussed "gaultheria hispidula" during the group presentation.*
- *Understanding "gaultheria hispidula" helps you talk about this topic clearly.*

---

gayfeather *(noun)*

Any of various North American plants of the genus Liatris having racemes or panicles of small discoid flower heads.

- *In class, the teacher used "gayfeather" to mean any of various north american plants of the genus....*
- *The article explained what "gayfeather" means with a simple example.*

---

gaylussacia *(noun)*

Deciduous or evergreen shrubs of North America: black huckleberries.

- *He looked up "gaylussacia" because he had never seen it before.*
- *Understanding "gaylussacia" helps you talk about this topic clearly.*

---

gaylussacia baccata *(noun)*

Low shrub of the eastern United States bearing shiny black edible fruit; best known of the huckleberries.

- *She wrote a short paragraph that included "gaylussacia baccata."*
- *They discussed "gaylussacia baccata" during the group presentation.*

---

gaylussacia brachycera *(noun)*

Creeping evergreen shrub of southeastern United States having small shiny boxlike leaves and flavorless berries.

- *In class, the teacher used "gaylussacia brachycera" to mean creeping evergreen shrub of southeastern united....*
- *Understanding "gaylussacia brachycera" helps you talk about this topic clearly.*

---

gaylussacia frondosa *(noun)*

Huckleberry of the eastern United States with pink flowers and sweet blue fruit.

- *Understanding "gaylussacia frondosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gaylussacia frondosa."*

---

gaywings *(noun)*

Common trailing perennial milkwort of eastern North America having leaves like wintergreen and usually rosy-purple flowers with winged sepals.

- *The article explained what "gaywings" means with a simple example.*
- *Understanding "gaywings" helps you talk about this topic clearly.*

---

gazania *(noun)*

Any plant of the genus Gazania valued for their showy daisy flowers.

- *They discussed "gazania" during the group presentation.*
- *He looked up "gazania" because he had never seen it before.*

gazania rigens *(noun)*

Decumbent South African perennial with short densely leafy stems and orange flower rays with black eyespots at base.

- *She wrote a short paragraph that included "gazania rigens."*
- *Understanding "gazania rigens" helps you talk about this topic clearly.*

geastraceae *(noun)*

A family of earthstar fungi belonging to the order Lycoperdales.

- *She wrote a short paragraph that included "geastraceae."*
- *Understanding "geastraceae" helps you talk about this topic clearly.*

geastrum *(noun)*

Type genus of Geastraceae; fungi whose outer peridium when dry splits into starlike segments.

- *Understanding "geastrum" helps you talk about this topic clearly.*
- *They discussed "geastrum" during the group presentation.*

geastrum coronatum *(noun)*

An earthstar with a bluish spore sac and a purplish brown gleba; at maturity the outer layer splits into rays that bend backward and elevate the spore sac.

- *He looked up "geastrum coronatum" because he had never seen it before.*
- *She wrote a short paragraph that included "geastrum coronatum."*

gebang palm *(noun)*

Large-leaved palm of Malay to Philippines and northern Australia; leaves used for thatching or plaiting into containers.

- *Understanding "gebang palm" helps you talk about this topic clearly.*
- *In class, the teacher used "gebang palm" to mean large-leaved palm of malay to philippines and....*

geglossaceae *(noun)*

A type of ascomycetous fungus.

- *The article explained what "geglossaceae" means with a simple example.*
- *In class, the teacher used "geglossaceae" to mean a type of ascomycetous fungus.*

genipa *(noun)*

Any tree of the genus Genipa bearing yellow flowers and edible fruit with a thick rind.

- *He looked up "genipa" because he had never seen it before.*
- *She wrote a short paragraph that included "genipa."*

genipa americana *(noun)*

Tree of the West Indies and northern South America bearing succulent edible orange-sized fruit.

- *They discussed "genipa americana" during the group presentation.*
- *She wrote a short paragraph that included "genipa americana."*

genista raetam *(noun)*

Desert shrub of Syria and Arabia having small white flowers; constitutes the juniper of the Old Testament; sometimes placed in genus Genista.

- *The article explained what "genista raetam" means with a simple example.*
- *Understanding "genista raetam" helps you talk about this topic clearly.*

genlisea *(noun)*

Rootless carnivorous swamp plants having at the base of the stem a rosette of foliage and leaves consisting of slender tubes swollen in the middle to form traps; each tube passes into two long spirally twisted arms with stiff hairs.

- *In class, the teacher used "genlisea" to mean rootless carnivorous swamp plants having at the....*
- *Understanding "genlisea" helps you talk about this topic clearly.*

gentiana andrewsii *(noun)*

Gentian of eastern North America having tubular blue or white flowers that open little if at all.

- *She wrote a short paragraph that included "gentiana andrewsii."*
- *The article explained what "gentiana andrewsii" means with a simple example.*

gentiana calycosa *(noun)*

Tufted sometimes sprawling perennial with blue flowers spotted with green; western North America.

- *Understanding "gentiana calycosa" helps you talk about this topic clearly.*
- *The article explained what "gentiana calycosa" means with a simple example.*

---

gentiana crinita *(noun)*

Tall widely distributed fringed gentian of eastern North America having violet-blue or white fringed flowers.

- *The article explained what "gentiana crinita" means with a simple example.*
- *She wrote a short paragraph that included "gentiana crinita."*

---

gentiana detonsa *(noun)*

Medium-tall fringed gentian with pale-blue to blue-purple flowers; circumboreal in distribution.

- *She wrote a short paragraph that included "gentiana detonsa."*
- *Understanding "gentiana detonsa" helps you talk about this topic clearly.*

---

gentiana holopetala *(noun)*

Small blue-flowered fringed gentian of Sierra Nevada mountains.

- *He looked up "gentiana holopetala" because he had never seen it before.*
- *They discussed "gentiana holopetala" during the group presentation.*

---

gentiana pneumonanthe *(noun)*

Perennial Eurasian gentian with sky-blue funnel-shaped flowers of damp open heaths.

- *The article explained what "gentiana pneumonanthe" means with a simple example.*
- *In class, the teacher used "gentiana pneumonanthe" to mean perennial eurasian gentian with sky-blue....*

---

gentiana quinquefolia *(noun)*

Gentian of eastern North America having clusters of bristly blue flowers.

- *He looked up "gentiana quinquefolia" because he had never seen it before.*
- *She wrote a short paragraph that included "gentiana quinquefolia."*

---

gentiana thermalis *(noun)*

Small blue-flowered fringed gentian of western United States (Rocky Mountains) especially around hot springs in Yellowstone National Park.

- *He looked up "gentiana thermalis" because he had never seen it before.*
- *She wrote a short paragraph that included "gentiana thermalis."*

---

gentianaceae *(noun)*

Chiefly herbaceous plants with showy flowers; some are cultivated as ornamentals.

- *She wrote a short paragraph that included "gentianaceae."*
- *The article explained what "gentianaceae" means with a simple example.*

---

gentianales *(noun)*

An order of dicotyledonous plants having gamopetalous flowers; Gentianaceae; Apocynaceae; Asclepiadaceae; Loganiaceae; Oleaceae; Salvadoraceae.

- *They discussed "gentianales" during the group presentation.*
- *In class, the teacher used "gentianales" to mean an order of dicotyledonous plants having....*

---

gentianella *(noun)*

Genus of herbs with flowers that resemble gentian; in some classifications included in genus Gentiana.

- *He looked up "gentianella" because he had never seen it before.*
- *They discussed "gentianella" during the group presentation.*

---

gentianella amarella *(noun)*

Gentian of Europe and China having creamy white flowers with fringed corollas.

- *The article explained what "gentianella amarella" means with a simple example.*
- *In class, the teacher used "gentianella amarella" to mean gentian of europe and china having creamy white....*

---

gentianella quinquefolia *(noun)*

Gentian of eastern North America having clusters of bristly blue flowers.

- *The article explained what "gentianella quinquefolia" means with a simple example.*

- *She wrote a short paragraph that included "gentianella quinquefolia."*

---

gentianopsid procera *(noun)*

Small blue-flowered fringed gentian of east central North America.

- *She wrote a short paragraph that included "gentianopsid procera."*
- *He looked up "gentianopsid procera" because he had never seen it before.*

---

gentianopsis *(noun)*

Genus of fringed gentians; in some classifications included in genus Gentiana.

- *He looked up "gentianopsis" because he had never seen it before.*
- *She wrote a short paragraph that included "gentianopsis."*

---

gentianopsis crinita *(noun)*

Tall widely distributed fringed gentian of eastern North America having violet-blue or white fringed flowers.

- *Understanding "gentianopsis crinita" helps you talk about this topic clearly.*
- *The article explained what "gentianopsis crinita" means with a simple example.*

---

gentianopsis detonsa *(noun)*

Medium-tall fringed gentian with pale-blue to blue-purple flowers; circumboreal in distribution.

- *In class, the teacher used "gentianopsis detonsa" to mean medium-tall fringed gentian with pale-blue to....*
- *He looked up "gentianopsis detonsa" because he had never seen it before.*

---

gentianopsis holopetala *(noun)*

Small blue-flowered fringed gentian of Sierra Nevada mountains.

- *The article explained what "gentianopsis holopetala" means with a simple example.*
- *She wrote a short paragraph that included "gentianopsis holopetala."*

---

gentianopsis thermalis *(noun)*

Small blue-flowered fringed gentian of western United States (Rocky Mountains) especially around hot springs in Yellowstone National Park.

- *The article explained what "gentianopsis thermalis" means with a simple example.*
- *In class, the teacher used "gentianopsis thermalis" to mean small blue-flowered fringed gentian of western....*

---

genus abelmoschus *(noun)*

Genus of tropical coarse herbs having large lobed leaves and often yellow flowers.

- *In class, the teacher used "genus abelmoschus" to mean genus of tropical coarse herbs having large lobed....*
- *He looked up "genus abelmoschus" because he had never seen it before.*

---

genus abronia *(noun)*

Genus of western North American herbs having showy flowers.

- *Understanding "genus abronia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus abronia" to mean genus of western north american herbs having showy....*

---

genus acalypha *(noun)*

A genus of herbs and shrubs belonging to the family Euphorbiaceae.

- *The article explained what "genus acalypha" means with a simple example.*
- *Understanding "genus acalypha" helps you talk about this topic clearly.*

---

genus acanthocereus *(noun)*

Mostly trailing cacti having nocturnal white flowers; tropical America and Caribbean region.

- *The article explained what "genus acanthocereus" means with a simple example.*
- *In class, the teacher used "genus acanthocereus" to mean mostly trailing cacti having nocturnal white....*

---

genus achimenes *(noun)*

Genus of tropical perennial American herbs.

- *She wrote a short paragraph that included "genus achimenes."*
- *They discussed "genus achimenes" during the group presentation.*

---

genus achras *(noun)*

Tropical trees having papery leaves and large fruit.

- *He looked up "genus achras" because he had never seen it before.*
- *Understanding "genus achras" helps you talk about this topic clearly.*

---

genus acinos *(noun)*

Plants closely allied to the genera Satureja and Calamintha.

- *The article explained what "genus acinos" means with a simple example.*
- *They discussed "genus acinos" during the group presentation.*

---

genus acocanthera *(noun)*

Small genus of trees and shrubs containing strongly toxic cardiac glycosides; Arabia to Africa.

- *She wrote a short paragraph that included "genus acocanthera."*
- *He looked up "genus acocanthera" because he had never seen it before.*

---

genus acokanthera *(noun)*

Small genus of trees and shrubs containing strongly toxic cardiac glycosides; Arabia to Africa.

- *The article explained what "genus acokanthera" means with a simple example.*
- *In class, the teacher used "genus acokanthera" to mean small genus of trees and shrubs containing strongly....*

---

genus acrocarpus *(noun)*

Small genus of trees of Indonesia and Malaysia.

- *The article explained what "genus acrocarpus" means with a simple example.*
- *Understanding "genus acrocarpus" helps you talk about this topic clearly.*

---

genus acroclinium *(noun)*

Genus of herbs and shrubs of Australia and South Africa: everlasting flower; most species usually placed in genus Helipterum.

- *In class, the teacher used "genus acroclinium" to mean genus of herbs and shrubs of australia and south....*
- *He looked up "genus acroclinium" because he had never seen it before.*

---

genus acrocomia *(noun)*

Central and South American feather palms.

- *Understanding "genus acrocomia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus acrocomia" to mean central and south american feather palms.*

---

genus acrostichum *(noun)*

In some classification systems placed in family Polypodiaceae.

- *In class, the teacher used "genus acrostichum" to mean in some classification systems placed in family....*
- *The article explained what "genus acrostichum" means with a simple example.*

---

genus actiniopteris *(noun)*

Terrestrial ferns of tropical Asia and Africa.

- *He looked up "genus actiniopteris" because he had never seen it before.*
- *Understanding "genus actiniopteris" helps you talk about this topic clearly.*

---

genus actinomeris *(noun)*

Used in some classification systems for plants now included in genus Verbesina.

- *Understanding "genus actinomeris" helps you talk about this topic clearly.*
- *In class, the teacher used "genus actinomeris" to mean used in some classification systems for plants now....*

---

genus adenanthera *(noun)*

Small genus of trees of tropical Asia and Pacific areas.

- *The article explained what "genus adenanthera" means with a simple example.*
- *They discussed "genus adenanthera" during the group presentation.*

---

genus adlumia *(noun)*

One species: climbing fumitory.

- *The article explained what "genus adlumia" means with a simple example.*
- *In class, the teacher used "genus adlumia" to mean one species: climbing fumitory.*

---

genus aegiceras *(noun)*

A genus of herbs of the family Verbenaceae.

- *He looked up "genus aegiceras" because he had never seen it before.*
- *She wrote a short paragraph that included "genus aegiceras."*

---

genus aerides *(noun)*

Epiphytic orchids of tropical Asia having stiff leaves and fragrant white flowers in arching racemes.

- *The article explained what "genus aerides" means with a simple example.*
- *In class, the teacher used "genus aerides" to mean epiphytic orchids of tropical asia having stiff....*

---

genus aeschynanthus *(noun)*

Large genus of East Indian ornamental woody epiphytic plants.

- *He looked up "genus aeschynanthus" because he had never seen it before.*
- *Understanding "genus aeschynanthus" helps you talk about this topic clearly.*

---

genus aethionema *(noun)*

Old World genus of the family Cruciferae.

- *The article explained what "genus aethionema" means with a simple example.*
- *In class, the teacher used "genus aethionema" to mean old world genus of the family cruciferae.*

---

genus aethusa *(noun)*

Fool's parsley.

- *They discussed "genus aethusa" during the group presentation.*
- *The article explained what "genus aethusa" means with a simple example.*

---

genus aframomum *(noun)*

An African genus of plants of the family Zingiberaceae.

- *She wrote a short paragraph that included "genus aframomum."*
- *He looked up "genus aframomum" because he had never seen it before.*

---

genus afrocarpus *(noun)*

Dioecious evergreen trees or shrubs; equatorial to southern and southeastern Africa: yellowwood; similar to trees or genus Podocarpus.

- *In class, the teacher used "genus afrocarpus" to mean dioecious evergreen trees or shrubs; equatorial to....*
- *The article explained what "genus afrocarpus" means with a simple example.*

---

genus agalinis *(noun)*

Semiparasitic herb with purple or white or pink flowers; grows in the United States and West Indies.

- *Understanding "genus agalinis" helps you talk about this topic clearly.*
- *The article explained what "genus agalinis" means with a simple example.*

---

genus agdestis *(noun)*

A genus with one species that is a rapidly growing climbing vine with tuberous roots; grown in hot climates.

- *Understanding "genus agdestis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus agdestis" to mean a genus with one species that is a rapidly growing....*

---

genus ageratina *(noun)*

Annual to perennial herbs or shrubs of eastern United States and Central and South America.

- *In class, the teacher used "genus ageratina" to mean annual to perennial herbs or shrubs of eastern....*
- *They discussed "genus ageratina" during the group presentation.*

---

genus aglaomorpha *(noun)*

Epiphytic ferns of tropical Asia.

- *She wrote a short paragraph that included "genus aglaomorpha."*
- *Understanding "genus aglaomorpha" helps you talk about this topic clearly.*

genus aglaonema *(noun)*

Climbing herbs of southeastern Asia having thick fleshy oblong leaves and naked unisexual flowers: Chinese evergreen.

- *They discussed "genus aglaonema" during the group presentation.*
- *He looked up "genus aglaonema" because he had never seen it before.*

genus agrimonia *(noun)*

Genus of herbs found chiefly in north temperate regions having pinnate leaves and yellow flowers followed by bristly fruit.

- *They discussed "genus agrimonia" during the group presentation.*
- *She wrote a short paragraph that included "genus agrimonia."*

genus agrostemma *(noun)*

A caryophylloid dicot genus including corn cockles.

- *In class, the teacher used "genus agrostemma" to mean a caryophylloid dicot genus including corn cockles.*
- *Understanding "genus agrostemma" helps you talk about this topic clearly.*

genus albatrellus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *They discussed "genus albatrellus" during the group presentation.*
- *Understanding "genus albatrellus" helps you talk about this topic clearly.*

genus albizzia *(noun)*

Large genus of unarmed trees and shrubs of Old World tropics.

- *He looked up "genus albizzia" because he had never seen it before.*
- *In class, the teacher used "genus albizzia" to mean large genus of unarmed trees and shrubs of old....*

genus albuca *(noun)*

Genus of bulbous plants of South Africa; sometimes placed in subfamily Hyacinthaceae.

- *In class, the teacher used "genus albuca" to mean genus of bulbous plants of south africa; sometimes....*
- *The article explained what "genus albuca" means with a simple example.*

genus albugo *(noun)*

Type genus of the Albuginaceae; fungi causing white rusts.

- *In class, the teacher used "genus albugo" to mean type genus of the albuginaceae; fungi causing white....*
- *He looked up "genus albugo" because he had never seen it before.*

genus alcea *(noun)*

Genus of erect herbs of the Middle East having showy flowers: hollyhocks; in some classification systems synonymous with genus Althaea.

- *In class, the teacher used "genus alcea" to mean genus of erect herbs of the middle east having....*
- *Understanding "genus alcea" helps you talk about this topic clearly.*

genus aldrovanda *(noun)*

One species: waterwheel plant.

- *He looked up "genus aldrovanda" because he had never seen it before.*
- *She wrote a short paragraph that included "genus aldrovanda."*

genus alectoria *(noun)*

Lichens having dark brown erect or pendulous much-branched cylindrical thallus.

- *Understanding "genus alectoria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus alectoria."*

genus aletris *(noun)*

Small genus of bitter-rooted herbs of eastern North America and Asia; sometimes placed in family Melanthiaceae.

- *Understanding "genus aletris" helps you talk about this topic clearly.*
- *He looked up "genus aletris" because he had never seen it before.*

genus alisma *(noun)*

Small genus of aquatic or semiaquatic plants.

- *The article explained what "genus alisma" means with a simple example.*
- *In class, the teacher used "genus alisma" to mean small genus of aquatic or semiaquatic plants.*

---

genus allamanda *(noun)*

Genus of tropical American woody vines.

- *She wrote a short paragraph that included "genus allamanda."*
- *Understanding "genus allamanda" helps you talk about this topic clearly.*

---

genus alliaria *(noun)*

A genus of herbs of the family Cruciferae; have broad leaves and white flowers and long siliques.

- *They discussed "genus alliaria" during the group presentation.*
- *She wrote a short paragraph that included "genus alliaria."*

---

genus allionia *(noun)*

Small genus of chiefly American herbs.

- *The article explained what "genus allionia" means with a simple example.*
- *In class, the teacher used "genus allionia" to mean small genus of chiefly american herbs.*

---

genus alpinia *(noun)*

Perennial rhizomatous herbs of Asia and Australia and Polynesia having ginger-scented rhizomes.

- *He looked up "genus alpinia" because he had never seen it before.*
- *In class, the teacher used "genus alpinia" to mean perennial rhizomatous herbs of asia and australia....*

---

genus alsobia *(noun)*

Tropical American herbs sometimes included in genus Episcia.

- *She wrote a short paragraph that included "genus alsobia."*
- *They discussed "genus alsobia" during the group presentation.*

---

genus alstonia *(noun)*

Genus of evergreen trees or shrubs with white funnel-shaped flowers and milky sap; tropical Africa to southeastern Asia and Polynesia.

- *The article explained what "genus alstonia" means with a simple example.*
- *She wrote a short paragraph that included "genus alstonia."*

---

genus alternanthera *(noun)*

Genus of low herbs of tropical America and Australia; includes genus Telanthera.

- *She wrote a short paragraph that included "genus alternanthera."*
- *He looked up "genus alternanthera" because he had never seen it before.*

---

genus amauropelta *(noun)*

Epiphytic or terrestrial ferns of America and Africa and Polynesia.

- *They discussed "genus amauropelta" during the group presentation.*
- *Understanding "genus amauropelta" helps you talk about this topic clearly.*

---

genus amberboa *(noun)*

Herbs of Mediterranean to central Asia cultivated for their flowers.

- *They discussed "genus amberboa" during the group presentation.*
- *In class, the teacher used "genus amberboa" to mean herbs of mediterranean to central asia cultivated....*

---

genus amianthum *(noun)*

One species: fly poison; sometimes placed in family Melanthiaceae.

- *In class, the teacher used "genus amianthum" to mean one species: fly poison; sometimes placed in family....*
- *He looked up "genus amianthum" because he had never seen it before.*

---

genus ammobium *(noun)*

Small genus of Australian herbs grown for their flowers.

- *They discussed "genus ammobium" during the group presentation.*

- *In class, the teacher used "genus ammobium" to mean small genus of australian herbs grown for their flowers.*

---

genus amorpha *(noun)*

American herbs or shrubs usually growing in dry sunny habitats on prairies and hillsides.

- *Understanding "genus amorpha" helps you talk about this topic clearly.*
- *They discussed "genus amorpha" during the group presentation.*

---

genus amphicarpa *(noun)*

Very small genus of twining vines of North America and Asia: hog peanut.

- *He looked up "genus amphicarpa" because he had never seen it before.*
- *Understanding "genus amphicarpa" helps you talk about this topic clearly.*

---

genus amphicarpaea *(noun)*

Very small genus of twining vines of North America and Asia: hog peanut.

- *He looked up "genus amphicarpaea" because he had never seen it before.*
- *In class, the teacher used "genus amphicarpaea" to mean very small genus of twining vines of north america....*

---

genus amsinckia *(noun)*

Rough annual herbs of Europe and the Americas: fiddlenecks.

- *He looked up "genus amsinckia" because he had never seen it before.*
- *In class, the teacher used "genus amsinckia" to mean rough annual herbs of europe and the americas:....*

---

genus amsonia *(noun)*

Genus of herbs and subshrubs with milky juice and showy bluish flowers; Europe to Asia Minor to Japan and North America.

- *Understanding "genus amsonia" helps you talk about this topic clearly.*
- *They discussed "genus amsonia" during the group presentation.*

---

genus anacyclus *(noun)*

A Spanish pellitory.

- *They discussed "genus anacyclus" during the group presentation.*
- *He looked up "genus anacyclus" because he had never seen it before.*

---

genus anadenanthera *(noun)*

2 species of tropical American shrubs or trees.

- *In class, the teacher used "genus anadenanthera" to mean 2 species of tropical american shrubs or trees.*
- *He looked up "genus anadenanthera" because he had never seen it before.*

---

genus anagallis *(noun)*

Chiefly Old World herbs.

- *In class, the teacher used "genus anagallis" to mean chiefly old world herbs.*
- *They discussed "genus anagallis" during the group presentation.*

---

genus anagyris *(noun)*

Very small genus of shrubs of southern Europe having backward curving seed pods.

- *In class, the teacher used "genus anagyris" to mean very small genus of shrubs of southern europe....*
- *Understanding "genus anagyris" helps you talk about this topic clearly.*

---

genus anaphalis *(noun)*

A genus of herbs of north temperate regions having hoary leaves: pearly everlasting.

- *They discussed "genus anaphalis" during the group presentation.*
- *In class, the teacher used "genus anaphalis" to mean a genus of herbs of north temperate regions having....*

---

genus anastatica *(noun)*

One species: rose of Jericho; resurrection plant.

- *She wrote a short paragraph that included "genus anastatica."*
- *The article explained what "genus anastatica" means with a simple example.*

---

genus anchusa *(noun)*

Rough and hairy Old World herbs.

- *The article explained what "genus anchusa" means with a simple example.*
- *She wrote a short paragraph that included "genus anchusa."*

---

genus andira *(noun)*

Small genus of evergreen trees of tropical America and western Africa.

- *She wrote a short paragraph that included "genus andira."*
- *Understanding "genus andira" helps you talk about this topic clearly.*

---

genus andreaea *(noun)*

Brown or blackish Alpine mosses having a dehiscent capsule with 4 longitudinal slits.

- *The article explained what "genus andreaea" means with a simple example.*
- *They discussed "genus andreaea" during the group presentation.*

---

genus andryala *(noun)*

A genus of hardy hairy latex-producing perennials of Mediterranean area.

- *In class, the teacher used "genus andryala" to mean a genus of hardy hairy latex-producing perennials....*
- *He looked up "genus andryala" because he had never seen it before.*

---

genus anemonella *(noun)*

One species: rue anemone.

- *He looked up "genus anemonella" because he had never seen it before.*
- *She wrote a short paragraph that included "genus anemonella."*

---

genus anemopsis *(noun)*

One species: yerba mansa.

- *They discussed "genus anemopsis" during the group presentation.*
- *In class, the teacher used "genus anemopsis" to mean one species: yerba mansa.*

---

genus angiopteris *(noun)*

One species: tree fern.

- *The article explained what "genus angiopteris" means with a simple example.*
- *She wrote a short paragraph that included "genus angiopteris."*

---

genus angraecum *(noun)*

Genus of tropical Old World epiphytic orchids with showy flowers sometimes grotesque.

- *She wrote a short paragraph that included "genus angraecum."*
- *He looked up "genus angraecum" because he had never seen it before.*

---

genus angrecum *(noun)*

Genus of tropical Old World epiphytic orchids with showy flowers sometimes grotesque.

- *In class, the teacher used "genus angrecum" to mean genus of tropical old world epiphytic orchids with....*
- *They discussed "genus angrecum" during the group presentation.*

---

genus anigozanthus *(noun)*

Genus of monocotyledonous plants with curious woolly flowers on sturdy stems above a fan of sword-shaped leaves; includes kangaroo's paw and Australian sword lily; sometimes placed in family Amaryllidaceae.

- *She wrote a short paragraph that included "genus anigozanthus."*
- *He looked up "genus anigozanthus" because he had never seen it before.*

---

genus anoectochilus *(noun)*

Genus of delicate Asiatic orchids.

- *The article explained what "genus anoectochilus" means with a simple example.*
- *In class, the teacher used "genus anoectochilus" to mean genus of delicate asiatic orchids.*

---

genus anogramma *(noun)*

A genus of ferns belonging to the family Pteridaceae.

- *She wrote a short paragraph that included "genus anogramma."*
- *He looked up "genus anogramma" because he had never seen it before.*

---

genus antennaria *(noun)*

Small woolly perennial herbs having small whitish discoid flowers surrounded by a ring of club-shaped bristles.

- *The article explained what "genus antennaria" means with a simple example.*
- *They discussed "genus antennaria" during the group presentation.*

---

genus anthericum *(noun)*

Genus of Old World (mainly African) perennial herbs; sometimes placed in family Asphodelaceae.

- *In class, the teacher used "genus anthericum" to mean genus of old world (mainly african) perennial....*
- *Understanding "genus anthericum" helps you talk about this topic clearly.*

---

genus antheropeas *(noun)*

Small genus of North American herbs often included in genus Eriophyllum.

- *He looked up "genus antheropeas" because he had never seen it before.*
- *They discussed "genus antheropeas" during the group presentation.*

---

genus anthriscus *(noun)*

Chervil: of Europe, North Africa and Asia.

- *Understanding "genus anthriscus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus anthriscus" to mean chervil: of europe, north africa and asia.*

---

genus anthyllis *(noun)*

Genus of Mediterranean herbs and shrubs.

- *Understanding "genus anthyllis" helps you talk about this topic clearly.*
- *They discussed "genus anthyllis" during the group presentation.*

---

genus aphyllanthes *(noun)*

One species; small fibrous-rooted perennial with rushlike foliage and deep blue flowers; sometimes placed in its own family Aphyllanthaceae.

- *They discussed "genus aphyllanthes" during the group presentation.*
- *He looked up "genus aphyllanthes" because he had never seen it before.*

---

genus apios *(noun)*

Twining perennial North American plants.

- *Understanding "genus apios" helps you talk about this topic clearly.*
- *The article explained what "genus apios" means with a simple example.*

---

genus aplectrum *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *The article explained what "genus aplectrum" means with a simple example.*
- *In class, the teacher used "genus aplectrum" to mean a monocotyledonous genus of the family orchidaceae.*

---

genus aporocactus *(noun)*

Small genus of epiphytic cacti of Mexico.

- *Understanding "genus aporocactus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus aporocactus."*

---

genus araujia *(noun)*

Small genus of South American evergreen vines.

- *The article explained what "genus araujia" means with a simple example.*
- *In class, the teacher used "genus araujia" to mean small genus of south american evergreen vines.*

---

genus arceuthobium *(noun)*

Genus of chiefly American plants parasitic on conifers.

- *In class, the teacher used "genus arceuthobium" to mean genus of chiefly american plants parasitic on conifers.*
- *The article explained what "genus arceuthobium" means with a simple example.*

genus arctotis *(noun)*

Herbs and subshrubs: African daisy.

- *They discussed "genus arctotis" during the group presentation.*
- *He looked up "genus arctotis" because he had never seen it before.*

genus ardisia *(noun)*

Tropical evergreen subshrubs (some climbers) to trees of Asia and Australasia to Americas.

- *The article explained what "genus ardisia" means with a simple example.*
- *In class, the teacher used "genus ardisia" to mean tropical evergreen subshrubs (some climbers) to....*

genus arenga *(noun)*

A genus of tropical Asian and Malaysian palm trees.

- *In class, the teacher used "genus arenga" to mean a genus of tropical asian and malaysian palm trees.*
- *Understanding "genus arenga" helps you talk about this topic clearly.*

genus argyranthemum *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *He looked up "genus argyranthemum" because he had never seen it before.*
- *She wrote a short paragraph that included "genus argyranthemum."*

genus argyreia *(noun)*

Woody climbers of tropical Asia to Australia.

- *Understanding "genus argyreia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus argyreia" to mean woody climbers of tropical asia to australia.*

genus argyroxiphium *(noun)*

Small genus of Hawaiian spreading and rosette-forming shrubs.

- *In class, the teacher used "genus argyroxiphium" to mean small genus of hawaiian spreading and....*
- *Understanding "genus argyroxiphium" helps you talk about this topic clearly.*

genus ariocarpus *(noun)*

Slow-growing geophytic cacti; northern and eastern Mexico; southern Texas.

- *The article explained what "genus ariocarpus" means with a simple example.*
- *In class, the teacher used "genus ariocarpus" to mean slow-growing geophytic cacti; northern and eastern....*

genus arisarum *(noun)*

Tuberous or rhizomatous perennial herbs; mainly Mediterranean area.

- *In class, the teacher used "genus arisarum" to mean tuberous or rhizomatous perennial herbs; mainly....*
- *The article explained what "genus arisarum" means with a simple example.*

genus aristotelia *(noun)*

Small genus of shrubs or small trees of Australia and New Zealand and western South America.

- *They discussed "genus aristotelia" during the group presentation.*
- *In class, the teacher used "genus aristotelia" to mean small genus of shrubs or small trees of australia....*

genus armillariella *(noun)*

A honey-colored diminutive form of genus Armillaria; grows in clusters; edible (when cooked) but most attention has been on how to get rid of it.

- *They discussed "genus armillariella" during the group presentation.*
- *She wrote a short paragraph that included "genus armillariella."*

genus armoracia *(noun)*

Horseradish.

- *The article explained what "genus armoracia" means with a simple example.*
- *In class, the teacher used "genus armoracia" to mean horseradish.*

genus arnoseris *(noun)*

Lamb succory.

- *In class, the teacher used "genus arnoseris" to mean lamb succory.*
- *Understanding "genus arnoseris" helps you talk about this topic clearly.*

---

genus arthropteris *(noun)*

Tropical and subtropical Old World epiphytic or lithophytic ferns.

- *She wrote a short paragraph that included "genus arthropteris."*
- *The article explained what "genus arthropteris" means with a simple example.*

---

genus arundinaria *(noun)*

North American bamboo.

- *He looked up "genus arundinaria" because he had never seen it before.*
- *Understanding "genus arundinaria" helps you talk about this topic clearly.*

---

genus aspalathus *(noun)*

Genus of South African heathlike shrubs.

- *In class, the teacher used "genus aspalathus" to mean genus of south african heathlike shrubs.*
- *The article explained what "genus aspalathus" means with a simple example.*

---

genus asphodeline *(noun)*

Genus of rhizomatous perennial or biennial herbs with numerous sometimes fragrant flowers in long cylindrical racemes; Mediterranean region to Caucasus; sometimes placed in family Asphodelaceae.

- *Understanding "genus asphodeline" helps you talk about this topic clearly.*
- *They discussed "genus asphodeline" during the group presentation.*

---

genus asphodelus *(noun)*

Small genus of tall striking annuals or perennials with grasslike foliage and flowers in dense racemes or panicles; Mediterranean to Himalayas; sometimes placed in family Asphodelaceae.

- *Understanding "genus asphodelus" helps you talk about this topic clearly.*
- *The article explained what "genus asphodelus" means with a simple example.*

---

genus astrantia *(noun)*

A genus of Eurasian herbs of the family Umbelliferae with aromatic roots and palmate leaves and showy flowers.

- *The article explained what "genus astrantia" means with a simple example.*
- *They discussed "genus astrantia" during the group presentation.*

---

genus astreus *(noun)*

A genus of fungi belonging to the family Geastraceae.

- *The article explained what "genus astreus" means with a simple example.*
- *Understanding "genus astreus" helps you talk about this topic clearly.*

---

genus astroloma *(noun)*

Evergreen shrubs of Australia and Tasmania.

- *Understanding "genus astroloma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus astroloma."*

---

genus astronium *(noun)*

A genus of dicotyledonous plants of the family Anacardiaceae.

- *In class, the teacher used "genus astronium" to mean a genus of dicotyledonous plants of the family....*
- *He looked up "genus astronium" because he had never seen it before.*

---

genus athrotaxis *(noun)*

A genus of gymnosperm.

- *They discussed "genus athrotaxis" during the group presentation.*
- *In class, the teacher used "genus athrotaxis" to mean a genus of gymnosperm.*

---

genus attalea *(noun)*

Unarmed feather palms of central and northern South America.

- *Understanding "genus attalea" helps you talk about this topic clearly.*

- *In class, the teacher used “genus attalea” to mean unarmed feather palms of central and northern south....*

---

genus aucuba *(noun)*

Hardy evergreen dioecious shrubs and small trees from Japan.

- *The article explained what “genus aucuba” means with a simple example.*
- *Understanding “genus aucuba” helps you talk about this topic clearly.*

---

genus aureolaria *(noun)*

Small genus of North American herbs often root-parasitic and bearing golden-yellow flowers; sometimes placed in genus Gerardia.

- *She wrote a short paragraph that included “genus aureolaria.”*
- *They discussed “genus aureolaria” during the group presentation.*

---

genus austrocedrus *(noun)*

One species; formerly included in genus Libocedrus.

- *He looked up “genus austrocedrus” because he had never seen it before.*
- *Understanding “genus austrocedrus” helps you talk about this topic clearly.*

---

genus austrotaxus *(noun)*

A gymnosperm genus having one species: New Caledonian yew.

- *She wrote a short paragraph that included “genus austrotaxus.”*
- *He looked up “genus austrotaxus” because he had never seen it before.*

---

genus averrhoa *(noun)*

Trees native to East Indies having pinnate leaves: carambolas.

- *In class, the teacher used “genus averrhoa” to mean trees native to east indies having pinnate leaves:....*
- *The article explained what “genus averrhoa” means with a simple example.*

---

genus ayapana *(noun)*

Genus of tropical American herbs sometimes included in genus Eupatorium.

- *She wrote a short paragraph that included “genus ayapana.”*
- *They discussed “genus ayapana” during the group presentation.*

---

genus ballota *(noun)*

Perennial herbs or subshrubs of especially Mediterranean area: black horehound.

- *They discussed “genus ballota” during the group presentation.*
- *In class, the teacher used “genus ballota” to mean perennial herbs or subshrubs of especially....*

---

genus balsamorhiza *(noun)*

Genus of coarse western American herbs with large roots containing an aromatic balsam.

- *She wrote a short paragraph that included “genus balsamorhiza.”*
- *He looked up “genus balsamorhiza” because he had never seen it before.*

---

genus baphia *(noun)*

Small genus of shrubs and lianas and trees of Africa and Madagascar.

- *The article explained what “genus baphia” means with a simple example.*
- *In class, the teacher used “genus baphia” to mean small genus of shrubs and lianas and trees of....*

---

genus barbarea *(noun)*

Biennial or perennial herbs of north temperate regions: winter cress.

- *Understanding “genus barbarea” helps you talk about this topic clearly.*
- *He looked up “genus barbarea” because he had never seen it before.*

---

genus bassia *(noun)*

Summer cypress.

- *They discussed “genus bassia” during the group presentation.*
- *The article explained what “genus bassia” means with a simple example.*

---

genus beaumontia *(noun)*

Small genus of evergreen woody vines in the East Indies and Asia.

- *She wrote a short paragraph that included "genus beaumontia."*
- *They discussed "genus beaumontia" during the group presentation.*

---

genus belamcanda *(noun)*

A monocotyledonous genus of the family Iridaceae.

- *He looked up "genus belamcanda" because he had never seen it before.*
- *Understanding "genus belamcanda" helps you talk about this topic clearly.*

---

genus bennettitis *(noun)*

Type of the Bennettitales.

- *She wrote a short paragraph that included "genus bennettitis."*
- *Understanding "genus bennettitis" helps you talk about this topic clearly.*

---

genus bergenia *(noun)*

Genus of perennial spring-blooming rhizomatous herbs with thick evergreen leaves; eastern Asia.

- *The article explained what "genus bergenia" means with a simple example.*
- *She wrote a short paragraph that included "genus bergenia."*

---

genus berteroa *(noun)*

Hoary alyssum.

- *Understanding "genus berteroa" helps you talk about this topic clearly.*
- *In class, the teacher used "genus berteroa" to mean hoary alyssum.*

---

genus bessera *(noun)*

Small genus of cormous perennials of Mexico; sometimes placed in family Alliaceae.

- *They discussed "genus bessera" during the group presentation.*
- *She wrote a short paragraph that included "genus bessera."*

---

genus besseya *(noun)*

Genus of North American spring wildflowers.

- *In class, the teacher used "genus besseya" to mean genus of north american spring wildflowers.*
- *The article explained what "genus besseya" means with a simple example.*

---

genus bignonia *(noun)*

One species: cross vine.

- *She wrote a short paragraph that included "genus bignonia."*
- *The article explained what "genus bignonia" means with a simple example.*

---

genus biscutella *(noun)*

Genus of Eurasian herbs and small shrubs: buckler mustard.

- *He looked up "genus biscutella" because he had never seen it before.*
- *In class, the teacher used "genus biscutella" to mean genus of eurasian herbs and small shrubs: buckler....*

---

genus blandfordia *(noun)*

Small genus of tuberous Australian perennial herbs.

- *He looked up "genus blandfordia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus blandfordia."*

---

genus blastocladia *(noun)*

A genus of fungi of the family Blastodiaceae.

- *They discussed "genus blastocladia" during the group presentation.*
- *She wrote a short paragraph that included "genus blastocladia."*

---

genus blastomyces *(noun)*

Genus of pathogenic yeastlike fungi.

- *He looked up “genus blastomyces” because he had never seen it before.*
- *She wrote a short paragraph that included “genus blastomyces.”*

---

genus blechnum *(noun)*

In some classification systems placed in family Polypodiaceae; terrestrial ferns of cosmopolitan distribution mainly in southern hemisphere: hard ferns.

- *Understanding “genus blechnum” helps you talk about this topic clearly.*
- *He looked up “genus blechnum” because he had never seen it before.*

---

genus blephilia *(noun)*

Small genus of North American herbs: wood mints.

- *He looked up “genus blephilia” because he had never seen it before.*
- *They discussed “genus blephilia” during the group presentation.*

---

genus bletia *(noun)*

Genus of tropical American terrestrial orchids with large purple or pink flowers.

- *The article explained what “genus bletia” means with a simple example.*
- *Understanding “genus bletia” helps you talk about this topic clearly.*

---

genus bletilla *(noun)*

Small genus of chiefly east Asiatic hardy terrestrial orchids similar to genus Bletia.

- *The article explained what “genus bletilla” means with a simple example.*
- *In class, the teacher used “genus bletilla” to mean small genus of chiefly east asiatic hardy....*

---

genus blighia *(noun)*

Small genus of western African evergreen trees and shrubs bearing fleshy capsular three-seeded fruits edible when neither unripe nor overripe.

- *Understanding “genus blighia” helps you talk about this topic clearly.*
- *The article explained what “genus blighia” means with a simple example.*

---

genus bloomeria *(noun)*

Small genus of bulbous perennial herbs of southwestern United States and Mexico; sometimes placed in family Alliaceae.

- *Understanding “genus bloomeria” helps you talk about this topic clearly.*
- *They discussed “genus bloomeria” during the group presentation.*

---

genus bocconia *(noun)*

Tropical American trees or shrubs closely related to genus Macleaya.

- *He looked up “genus bocconia” because he had never seen it before.*
- *She wrote a short paragraph that included “genus bocconia.”*

---

genus boehmeria *(noun)*

False nettle.

- *In class, the teacher used “genus boehmeria” to mean false nettle.*
- *They discussed “genus boehmeria” during the group presentation.*

---

genus bolbitis *(noun)*

Terrestrial or less than normally scandent ferns of tropical regions of northern hemisphere.

- *In class, the teacher used “genus bolbitis” to mean terrestrial or less than normally scandent ferns of....*
- *The article explained what “genus bolbitis” means with a simple example.*

---

genus boletellus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *They discussed “genus boletellus” during the group presentation.*
- *He looked up “genus boletellus” because he had never seen it before.*

---

genus boltonia *(noun)*

Genus of tall leafy perennial herbs of eastern America and eastern Asia having flowers that resemble asters.

- *In class, the teacher used “genus boltonia” to mean genus of tall leafy perennial herbs of eastern....*
- *The article explained what “genus boltonia” means with a simple example.*

genus bomarea *(noun)*

Large genus of tropical American vines having showy often spotted umbellate flowers; sometimes placed in family Liliaceae especially subfamily Alstroemeriaceae.

- *The article explained what "genus bomarea" means with a simple example.*
- *They discussed "genus bomarea" during the group presentation.*

genus borago *(noun)*

Perennial herbs of the Mediterranean region.

- *In class, the teacher used "genus borago" to mean perennial herbs of the mediterranean region.*
- *He looked up "genus borago" because he had never seen it before.*

genus bougainvillaea *(noun)*

Ornamental tropical woody vines.

- *She wrote a short paragraph that included "genus bougainvillaea."*
- *He looked up "genus bougainvillaea" because he had never seen it before.*

genus bowiea *(noun)*

Small genus of tropical African perennial bulbous herbs with deciduous twining stems; sometimes placed in family Hyacinthaceae.

- *The article explained what "genus bowiea" means with a simple example.*
- *In class, the teacher used "genus bowiea" to mean small genus of tropical african perennial bulbous....*

genus boykinia *(noun)*

Genus of perennial rhizomatous herbs with flowers in panicles; North America; Japan.

- *He looked up "genus boykinia" because he had never seen it before.*
- *In class, the teacher used "genus boykinia" to mean genus of perennial rhizomatous herbs with flowers....*

genus brachychiton *(noun)*

Australian trees (usually with swollen trunks).

- *Understanding "genus brachychiton" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus brachychiton."*

genus brachycome *(noun)*

Mostly Australian herbs having basal or alternate leaves and loosely corymbose flower heads.

- *They discussed "genus brachycome" during the group presentation.*
- *He looked up "genus brachycome" because he had never seen it before.*

genus brachystegia *(noun)*

Small genus of tropical African timber trees having pale golden heartwood uniformly striped with dark brown or black:.

- *In class, the teacher used "genus brachystegia" to mean small genus of tropical african timber trees having....*
- *They discussed "genus brachystegia" during the group presentation.*

genus brasenia *(noun)*

Alternatively, a member of the family Nymphaeaceae.

- *They discussed "genus brasenia" during the group presentation.*
- *The article explained what "genus brasenia" means with a simple example.*

genus brassavola *(noun)*

Genus of tropical American epiphytic or lithophytic rhizomatous orchids.

- *He looked up "genus brassavola" because he had never seen it before.*
- *She wrote a short paragraph that included "genus brassavola."*

genus brassia *(noun)*

Genus of tropical American epiphytic orchids having striking axillary racemes of yellow to green spiderlike flowers with long slender sepals and warty lips: spider orchids.

- *They discussed "genus brassia" during the group presentation.*
- *She wrote a short paragraph that included "genus brassia."*

genus brickelia *(noun)*

Genus of herbs of southwestern America having usually creamy florets followed by one-seeded fruits in a prominent bristly sheath.

- *In class, the teacher used "genus brickelia" to mean genus of herbs of southwestern america having....*
- *He looked up "genus brickelia" because he had never seen it before.*

---

genus brodiaea *(noun)*

Genus of western United States bulbous plants with basal leaves and variously colored flowers; sometimes placed in family Alliaceae.

- *The article explained what "genus brodiaea" means with a simple example.*
- *In class, the teacher used "genus brodiaea" to mean genus of western united states bulbous plants with....*

---

genus broussonetia *(noun)*

Paper mulberry.

- *He looked up "genus broussonetia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus broussonetia."*

---

genus browallia *(noun)*

Small genus of tropical South American annuals.

- *They discussed "genus browallia" during the group presentation.*
- *The article explained what "genus browallia" means with a simple example.*

---

genus bruckenthalia *(noun)*

A genus containing only one species: spike heath.

- *She wrote a short paragraph that included "genus bruckenthalia."*
- *Understanding "genus bruckenthalia" helps you talk about this topic clearly.*

---

genus brunfelsia *(noun)*

Genus of tropical American shrubs grown for their flowers followed by fleshy berrylike fruits.

- *She wrote a short paragraph that included "genus brunfelsia."*
- *He looked up "genus brunfelsia" because he had never seen it before.*

---

genus brya *(noun)*

Genus of prickly shrubs and small trees of the Caribbean region; source of a durable hardwood.

- *In class, the teacher used "genus brya" to mean genus of prickly shrubs and small trees of the....*
- *They discussed "genus brya" during the group presentation.*

---

genus bryanthus *(noun)*

A genus allied to and once included in genus Phyllodoce.

- *He looked up "genus bryanthus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus bryanthus."*

---

genus bryonia *(noun)*

Climbing perennial herbs: bryony.

- *Understanding "genus bryonia" helps you talk about this topic clearly.*
- *He looked up "genus bryonia" because he had never seen it before.*

---

genus buchloe *(noun)*

Buffalo grass.

- *Understanding "genus buchloe" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus buchloe."*

---

genus buckleya *(noun)*

Small genus of Asiatic and American parasitic shrubs.

- *He looked up "genus buckleya" because he had never seen it before.*
- *They discussed "genus buckleya" during the group presentation.*

---

genus bumelia *(noun)*

Deciduous or evergreen American shrubs small trees having very hard wood and milky latex.

- *They discussed "genus bumelia" during the group presentation.*

- *In class, the teacher used “genus bumelia” to mean deciduous or evergreen american shrubs small trees....*

genus burmannia *(noun)*

Type genus of the Burmanniaceae; slender herbs of warm regions with leaves resembling scales and flowers with a three-angled or three-winged perianth.

- *They discussed “genus burmannia” during the group presentation.*
- *The article explained what “genus burmannia” means with a simple example.*

genus bursera *(noun)*

Type genus of Burseraceae; tropical and subtropical American shrubs and trees some yielding timber and gum elemi.

- *Understanding “genus bursera” helps you talk about this topic clearly.*
- *He looked up “genus bursera” because he had never seen it before.*

genus cabomba *(noun)*

Alternatively, a member of the family Nymphaeaceae; a small genus of American aquatic plants.

- *The article explained what “genus cabomba” means with a simple example.*
- *She wrote a short paragraph that included “genus cabomba.”*

genus cacalia *(noun)*

Genus of tall smooth herbs of forested mountains of Europe and Asia minor; in some classifications includes many plants usually placed in genus Emilia.

- *Understanding “genus cacalia” helps you talk about this topic clearly.*
- *In class, the teacher used “genus cacalia” to mean genus of tall smooth herbs of forested mountains of....*

genus cakile *(noun)*

Small genus of succulent annual herbs found on sandy shores of North America and Europe.

- *She wrote a short paragraph that included “genus cakile.”*
- *He looked up “genus cakile” because he had never seen it before.*

genus caladenia *(noun)*

Terrestrial orchids of Australia to New Caledonia.

- *He looked up “genus caladenia” because he had never seen it before.*
- *In class, the teacher used “genus caladenia” to mean terrestrial orchids of australia to new caledonia.*

genus calandrinia *(noun)*

Large genus of low-growing herbs; widespread throughout tropical and warm temperate regions having usually basal leaves and panicles of purplish ephemeral flowers.

- *He looked up “genus calandrinia” because he had never seen it before.*
- *She wrote a short paragraph that included “genus calandrinia.”*

genus calliandra *(noun)*

Genus of pinnate-leaved shrubs and small trees of tropical and subtropical North and South America and India and West Africa.

- *They discussed “genus calliandra” during the group presentation.*
- *In class, the teacher used “genus calliandra” to mean genus of pinnate-leaved shrubs and small trees of....*

genus callistephus *(noun)*

One species: erect Asiatic herb with large flowers.

- *The article explained what “genus callistephus” means with a simple example.*
- *They discussed “genus callistephus” during the group presentation.*

genus callitriche *(noun)*

Water starworts.

- *In class, the teacher used “genus callitriche” to mean water starworts.*
- *The article explained what “genus callitriche” means with a simple example.*

genus callitris *(noun)*

Evergreen monoecious coniferous trees or shrubs: cypress pines.

- *The article explained what “genus callitris” means with a simple example.*
- *They discussed “genus callitris” during the group presentation.*

genus calocarpum *(noun)*

A genus of tropical American trees of the family Sapotaceae.

- *The article explained what "genus calocarpum" means with a simple example.*
- *In class, the teacher used "genus calocarpum" to mean a genus of tropical american trees of the family....*

---

genus calocedrus *(noun)*

Tall evergreens of western North America and eastern Asia; formerly included in genus Libocedrus.

- *She wrote a short paragraph that included "genus calocedrus."*
- *They discussed "genus calocedrus" during the group presentation.*

---

genus calochortus *(noun)*

Large genus of western North American leafy-stemmed bulbous herbs.

- *They discussed "genus calochortus" during the group presentation.*
- *She wrote a short paragraph that included "genus calochortus."*

---

genus calopogon *(noun)*

Terrestrial orchids of North America.

- *He looked up "genus calopogon" because he had never seen it before.*
- *She wrote a short paragraph that included "genus calopogon."*

---

genus calvatia *(noun)*

Genus of puffballs having outer casings whose upper parts break at maturity into angular pieces to expose the spores.

- *They discussed "genus calvatia" during the group presentation.*
- *The article explained what "genus calvatia" means with a simple example.*

---

genus calycanthus *(noun)*

A magnoliid dicot genus of the family Calycanthaceae including: allspice.

- *The article explained what "genus calycanthus" means with a simple example.*
- *In class, the teacher used "genus calycanthus" to mean a magnoliid dicot genus of the family....*

---

genus calycophyllum *(noun)*

Medium to large tropical American trees having shiny reddish-brown shredding bark.

- *In class, the teacher used "genus calycophyllum" to mean medium to large tropical american trees having....*
- *He looked up "genus calycophyllum" because he had never seen it before.*

---

genus calystegia *(noun)*

Climbing or scrambling herbs: bindweed.

- *Understanding "genus calystegia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus calystegia" to mean climbing or scrambling herbs: bindweed.*

---

genus camassia *(noun)*

Genus of scapose herbs of North and South America having large edible bulbs.

- *Understanding "genus camassia" helps you talk about this topic clearly.*
- *They discussed "genus camassia" during the group presentation.*

---

genus camptosorus *(noun)*

Classification used in some especially former systems for plants usually placed in genus Asplenium.

- *In class, the teacher used "genus camptosorus" to mean classification used in some especially former....*
- *The article explained what "genus camptosorus" means with a simple example.*

---

genus campyloneurum *(noun)*

Epiphytic ferns of tropical America.

- *They discussed "genus campyloneurum" during the group presentation.*
- *In class, the teacher used "genus campyloneurum" to mean epiphytic ferns of tropical america.*

---

genus cananga *(noun)*

A genus of Malayan tree.

- *She wrote a short paragraph that included "genus cananga."*
- *Understanding "genus cananga" helps you talk about this topic clearly.*

---

genus canangium *(noun)*

A genus of Malayan tree.

- *She wrote a short paragraph that included "genus canangium."*
- *He looked up "genus canangium" because he had never seen it before.*

---

genus canavalia *(noun)*

Herbs or woody vines of mainly American tropics and subtropics.

- *In class, the teacher used "genus canavalia" to mean herbs or woody vines of mainly american tropics and....*
- *The article explained what "genus canavalia" means with a simple example.*

---

genus cantharellus *(noun)*

A well-known genus of fungus; has funnel-shaped fruiting body; includes the chanterelles.

- *He looked up "genus cantharellus" because he had never seen it before.*
- *Understanding "genus cantharellus" helps you talk about this topic clearly.*

---

genus capsella *(noun)*

Shepherd's purse.

- *They discussed "genus capsella" during the group presentation.*
- *The article explained what "genus capsella" means with a simple example.*

---

genus cardiospermum *(noun)*

Tendril-climbing herbs or shrubs whose seeds have a white heart-shaped spot.

- *She wrote a short paragraph that included "genus cardiospermum."*
- *Understanding "genus cardiospermum" helps you talk about this topic clearly.*

---

genus carnegiea *(noun)*

Caryophylloid dicot genus with only one species: saguaro.

- *They discussed "genus carnegiea" during the group presentation.*
- *The article explained what "genus carnegiea" means with a simple example.*

---

genus carpenteria *(noun)*

One species; sometimes placed in family Saxifragaceae.

- *He looked up "genus carpenteria" because he had never seen it before.*
- *Understanding "genus carpenteria" helps you talk about this topic clearly.*

---

genus carpobrotus *(noun)*

A caryophyllaceous genus of Carpobrotus.

- *In class, the teacher used "genus carpobrotus" to mean a caryophyllaceous genus of carpobrotus.*
- *He looked up "genus carpobrotus" because he had never seen it before.*

---

genus caryocar *(noun)*

Type genus of the Caryocaraceae; South American trees yielding strong fine-grained wood and edible nuts.

- *Understanding "genus caryocar" helps you talk about this topic clearly.*
- *In class, the teacher used "genus caryocar" to mean type genus of the caryocaraceae; south american....*

---

genus caryota *(noun)*

Fishtail palms.

- *She wrote a short paragraph that included "genus caryota."*
- *He looked up "genus caryota" because he had never seen it before.*

---

genus castanopsis *(noun)*

Evergreen trees and shrubs of warm regions valued for their foliage; southeastern United States and eastern Australia and northern New Zealand.

- *In class, the teacher used "genus castanopsis" to mean evergreen trees and shrubs of warm regions valued....*
- *Understanding "genus castanopsis" helps you talk about this topic clearly.*

genus castanospermum *(noun)*

A rosid dicot genus of the subfamily Papilionoideae having one species: Moreton Bay chestnut.

- *In class, the teacher used "genus castanospermum" to mean a rosid dicot genus of the subfamily papilionoideae....*
- *Understanding "genus castanospermum" helps you talk about this topic clearly.*

genus castilleia *(noun)*

Genus of western North and South American perennials often partially parasitic on roots of grasses.

- *The article explained what "genus castilleia" means with a simple example.*
- *In class, the teacher used "genus castilleia" to mean genus of western north and south american....*

genus catananche *(noun)*

Genus of Mediterranean herbs: cupid's dart.

- *In class, the teacher used "genus catananche" to mean genus of mediterranean herbs: cupid's dart.*
- *They discussed "genus catananche" during the group presentation.*

genus catasetum *(noun)*

Genus of tropical American orchids having showy male and female flowers usually on separate inflorescences.

- *The article explained what "genus catasetum" means with a simple example.*
- *They discussed "genus catasetum" during the group presentation.*

genus cathaya *(noun)*

One species; related to Pseudotsuga and Larix.

- *She wrote a short paragraph that included "genus cathaya."*
- *They discussed "genus cathaya" during the group presentation.*

genus caulophyllum *(noun)*

Blue cohosh.

- *They discussed "genus caulophyllum" during the group presentation.*
- *She wrote a short paragraph that included "genus caulophyllum."*

genus celastrus *(noun)*

Genus of woody vines and erect shrubs (type genus of the Celastraceae) that is native chiefly to Asia and Australia: includes bittersweet.

- *In class, the teacher used "genus celastrus" to mean genus of woody vines and erect shrubs (type genus....*
- *Understanding "genus celastrus" helps you talk about this topic clearly.*

genus centaurium *(noun)*

Genus of low-growing herbs mostly of northern hemisphere having flowers with protruding spirally twisted anthers.

- *She wrote a short paragraph that included "genus centaurium."*
- *He looked up "genus centaurium" because he had never seen it before.*

genus centranthus *(noun)*

Genus of southern European herbs and subshrubs.

- *She wrote a short paragraph that included "genus centranthus."*
- *The article explained what "genus centranthus" means with a simple example.*

genus centrolobium *(noun)*

A genus of Centrolobium.

- *They discussed "genus centrolobium" during the group presentation.*
- *Understanding "genus centrolobium" helps you talk about this topic clearly.*

genus centrosema *(noun)*

A genus of chiefly tropical American vines of the family Leguminosae having trifoliate leaves and large flowers.

- *She wrote a short paragraph that included "genus centrosema."*
- *Understanding "genus centrosema" helps you talk about this topic clearly.*

genus centunculus *(noun)*

A dicotyledonous genus of the family Primulaceae.

- *They discussed "genus centunculus" during the group presentation.*
- *Understanding "genus centunculus" helps you talk about this topic clearly.*

---

genus cephalanthera *(noun)*

Small genus of temperate Old World terrestrial orchids.

- *In class, the teacher used "genus cephalanthera" to mean small genus of temperate old world terrestrial orchids.*
- *They discussed "genus cephalanthera" during the group presentation.*

---

genus cephalotaxus *(noun)*

The genus of Cephalotaxus (see plum-yews).

- *The article explained what "genus cephalotaxus" means with a simple example.*
- *They discussed "genus cephalotaxus" during the group presentation.*

---

genus cephalotus *(noun)*

One species: Australian pitcher plant.

- *Understanding "genus cephalotus" helps you talk about this topic clearly.*
- *The article explained what "genus cephalotus" means with a simple example.*

---

genus ceratopetalum *(noun)*

A dicotyledonous genus of the family Cunoniaceae.

- *Understanding "genus ceratopetalum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus ceratopetalum."*

---

genus ceratopteris *(noun)*

Water ferns.

- *She wrote a short paragraph that included "genus ceratopteris."*
- *They discussed "genus ceratopteris" during the group presentation.*

---

genus ceratostomella *(noun)*

Genus of fungi forming continuous hyaline spores.

- *They discussed "genus ceratostomella" during the group presentation.*
- *He looked up "genus ceratostomella" because he had never seen it before.*

---

genus ceratozamia *(noun)*

Small genus of Mexican cycads; sometimes classified in family Cycadaceae.

- *In class, the teacher used "genus ceratozamia" to mean small genus of mexican cycads; sometimes classified....*
- *The article explained what "genus ceratozamia" means with a simple example.*

---

genus cercidiphyllum *(noun)*

One species: katsura tree.

- *He looked up "genus cercidiphyllum" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cercidiphyllum."*

---

genus cercidium *(noun)*

Spiny shrubs or small trees sometimes placed in genus Parkinsonia: paloverde.

- *The article explained what "genus cercidium" means with a simple example.*
- *She wrote a short paragraph that included "genus cercidium."*

---

genus cercosporella *(noun)*

Form genus of imperfect fungi lacking pigment in the spores and conidiophores.

- *In class, the teacher used "genus cercosporella" to mean form genus of imperfect fungi lacking pigment in....*
- *They discussed "genus cercosporella" during the group presentation.*

---

genus cestrum *(noun)*

Genus of fragrant tropical American shrubs.

- *They discussed "genus cestrum" during the group presentation.*

- *She wrote a short paragraph that included "genus cestrum."*

---

genus ceterach *(noun)*

Small genus of Old World ferns; superseded in some classification systems which place plants of this genus in e.g. genera Asplenium and Pleurosorus.

- *They discussed "genus ceterach" during the group presentation.*
- *She wrote a short paragraph that included "genus ceterach."*

---

genus cetraria *(noun)*

Foliose lichens chiefly of northern latitudes.

- *They discussed "genus cetraria" during the group presentation.*
- *He looked up "genus cetraria" because he had never seen it before.*

---

genus chaenactis *(noun)*

Genus of flowering herbs of western United States.

- *She wrote a short paragraph that included "genus chaenactis."*
- *Understanding "genus chaenactis" helps you talk about this topic clearly.*

---

genus chaenomeles *(noun)*

Flowering quince.

- *In class, the teacher used "genus chaenomeles" to mean flowering quince.*
- *The article explained what "genus chaenomeles" means with a simple example.*

---

genus chamaecrista *(noun)*

Genus of tropical herbs or subshrubs having sensitive leaves and suddenly dehiscing pods; some species placed in genus Cassia.

- *She wrote a short paragraph that included "genus chamaecrista."*
- *Understanding "genus chamaecrista" helps you talk about this topic clearly.*

---

genus chamaecytisus *(noun)*

Small late-flowering trees or subshrubs having yellow to red flowers and leathery or woody pods; often especially formerly included in genus Cytisus.

- *They discussed "genus chamaecytisus" during the group presentation.*
- *In class, the teacher used "genus chamaecytisus" to mean small late-flowering trees or subshrubs having....*

---

genus chamaedaphne *(noun)*

One species: leatherleaf.

- *The article explained what "genus chamaedaphne" means with a simple example.*
- *In class, the teacher used "genus chamaedaphne" to mean one species: leatherleaf.*

---

genus chamaemelum *(noun)*

Small genus of plants sometimes included in genus Anthemis: chamomile.

- *She wrote a short paragraph that included "genus chamaemelum."*
- *They discussed "genus chamaemelum" during the group presentation.*

---

genus cheilanthes *(noun)*

Small evergreen ferns: lipferns; in some classifications placed in family Polypodiaceae or Adiantaceae.

- *He looked up "genus cheilanthes" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cheilanthes."*

---

genus cheiranthus *(noun)*

Old World perennial plants grown for their showy flowers.

- *Understanding "genus cheiranthus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus cheiranthus" to mean old world perennial plants grown for their showy....*

---

genus chelidonium *(noun)*

One species: greater celandine.

- *She wrote a short paragraph that included "genus chelidonium."*
- *The article explained what "genus chelidonium" means with a simple example.*

---

genus chilopsis *(noun)*

One species: desert willow.

- *He looked up "genus chilopsis" because he had never seen it before.*
- *In class, the teacher used "genus chilopsis" to mean one species: desert willow.*

---

genus chimaphila *(noun)*

Small genus of evergreen herbs with long creeping rootstocks and shining leaves; North America; Europe; east Asia.

- *He looked up "genus chimaphila" because he had never seen it before.*
- *She wrote a short paragraph that included "genus chimaphila."*

---

genus chimonanthus *(noun)*

Small genus of Asian deciduous or evergreen shrubs having fragrant flowers: winter sweet.

- *The article explained what "genus chimonanthus" means with a simple example.*
- *They discussed "genus chimonanthus" during the group presentation.*

---

genus chinchona *(noun)*

Large genus of trees of Andean region of South America having medicinal bark.

- *They discussed "genus chinchona" during the group presentation.*
- *Understanding "genus chinchona" helps you talk about this topic clearly.*

---

genus chiococca *(noun)*

Shrubs of tropical and subtropical New World.

- *Understanding "genus chiococca" helps you talk about this topic clearly.*
- *They discussed "genus chiococca" during the group presentation.*

---

genus chionanthus *(noun)*

Deciduous trees or shrubs: fringe tree.

- *Understanding "genus chionanthus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus chionanthus."*

---

genus chloranthus *(noun)*

Type genus of the Chloranthaceae.

- *The article explained what "genus chloranthus" means with a simple example.*
- *Understanding "genus chloranthus" helps you talk about this topic clearly.*

---

genus chlorophyllum *(noun)*

A genus of fungus belonging to the family Lepiotaceae.

- *In class, the teacher used "genus chlorophyllum" to mean a genus of fungus belonging to the family lepiotaceae.*
- *The article explained what "genus chlorophyllum" means with a simple example.*

---

genus chloroxylon *(noun)*

Deciduous trees of India and Sri Lanka.

- *She wrote a short paragraph that included "genus chloroxylon."*
- *He looked up "genus chloroxylon" because he had never seen it before.*

---

genus chordospartium *(noun)*

2 species of small New Zealand trees: weeping tree broom; endangered.

- *Understanding "genus chordospartium" helps you talk about this topic clearly.*
- *They discussed "genus chordospartium" during the group presentation.*

---

genus chorizema *(noun)*

Genus of Australian twining vines and small shrubs: flame peas.

- *He looked up "genus chorizema" because he had never seen it before.*
- *She wrote a short paragraph that included "genus chorizema."*

---

genus christella *(noun)*

Medium to large terrestrial ferns of tropical forests of Old World to Americas.

- *She wrote a short paragraph that included "genus christella."*
- *He looked up "genus christella" because he had never seen it before.*

---

genus chrysolepis *(noun)*

Two species: golden chinkapins.

- *She wrote a short paragraph that included "genus chrysolepis."*
- *He looked up "genus chrysolepis" because he had never seen it before.*

---

genus chrysophyllum *(noun)*

Tropical American evergreen trees or shrubs.

- *They discussed "genus chrysophyllum" during the group presentation.*
- *He looked up "genus chrysophyllum" because he had never seen it before.*

---

genus chrysopsis *(noun)*

Golden aster.

- *The article explained what "genus chrysopsis" means with a simple example.*
- *In class, the teacher used "genus chrysopsis" to mean golden aster.*

---

genus chrysosplenium *(noun)*

Genus of widely distributed semiaquatic herbs with minute greenish-yellow apetalous flowers.

- *She wrote a short paragraph that included "genus chrysosplenium."*
- *They discussed "genus chrysosplenium" during the group presentation.*

---

genus chrysothamnus *(noun)*

Genus of low branching shrubs of western North America.

- *In class, the teacher used "genus chrysothamnus" to mean genus of low branching shrubs of western north america.*
- *Understanding "genus chrysothamnus" helps you talk about this topic clearly.*

---

genus cibotium *(noun)*

In some classification systems placed in family Cyatheaceae: ornamental tree ferns with coarse gracefully drooping fronds.

- *He looked up "genus cibotium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cibotium."*

---

genus cimicifuga *(noun)*

Small genus of perennial herbs of north temperate regions: bugbane.

- *They discussed "genus cimicifuga" during the group presentation.*
- *She wrote a short paragraph that included "genus cimicifuga."*

---

genus circaea *(noun)*

Enchanter's nightshade.

- *In class, the teacher used "genus circaea" to mean enchanter's nightshade.*
- *Understanding "genus circaea" helps you talk about this topic clearly.*

---

genus citroncirus *(noun)*

A cross between Citrus sinensis and Poncirus trifoliata.

- *She wrote a short paragraph that included "genus citroncirus."*
- *He looked up "genus citroncirus" because he had never seen it before.*

---

genus cladrastis *(noun)*

Yellowwoods.

- *In class, the teacher used "genus cladrastis" to mean yellowwoods.*
- *The article explained what "genus cladrastis" means with a simple example.*

---

genus clathrus *(noun)*

Type genus of the Clathraceae.

- *Understanding "genus clathrus" helps you talk about this topic clearly.*
- *The article explained what "genus clathrus" means with a simple example.*

genus cleistes *(noun)*

Terrestrial orchids of North and South America having slender fibrous roots; allied to genus Pogonia.

- *He looked up "genus cleistes" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cleistes."*

genus clianthus *(noun)*

Genus of semi-prostrate Australasian shrubs or vines.

- *She wrote a short paragraph that included "genus clianthus."*
- *They discussed "genus clianthus" during the group presentation.*

genus cliftonia *(noun)*

One species: titi.

- *She wrote a short paragraph that included "genus cliftonia."*
- *Understanding "genus cliftonia" helps you talk about this topic clearly.*

genus clintonia *(noun)*

Sometimes placed in family Convallariaceae.

- *The article explained what "genus clintonia" means with a simple example.*
- *In class, the teacher used "genus clintonia" to mean sometimes placed in family convallariaceae.*

genus clitoria *(noun)*

Genus of tropical shrubs or vines having pinnate leaves and large axillary flowers.

- *They discussed "genus clitoria" during the group presentation.*
- *In class, the teacher used "genus clitoria" to mean genus of tropical shrubs or vines having pinnate....*

genus clusia *(noun)*

Tropical American aromatic trees or shrubs; often epiphytic; some stranglers.

- *She wrote a short paragraph that included "genus clusia."*
- *They discussed "genus clusia" during the group presentation.*

genus cnicus *(noun)*

One species: blessed thistle.

- *They discussed "genus cnicus" during the group presentation.*
- *In class, the teacher used "genus cnicus" to mean one species: blessed thistle.*

genus cnidoscolus *(noun)*

A genus of perennial plant with bristles; belonging to the family Euphorbiaceae.

- *He looked up "genus cnidoscolus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cnidoscolus."*

genus cochlearia *(noun)*

A genus of the family Cruciferae.

- *They discussed "genus cochlearia" during the group presentation.*
- *In class, the teacher used "genus cochlearia" to mean a genus of the family cruciferae.*

genus codariocalyx *(noun)*

Used in some classifications for plants usually included in genus Desmodium.

- *In class, the teacher used "genus codariocalyx" to mean used in some classifications for plants usually....*
- *Understanding "genus codariocalyx" helps you talk about this topic clearly.*

genus codiaeum *(noun)*

Evergreen tropical trees and shrubs with thick and colorful leathery leaves; Malaya and Pacific islands.

- *She wrote a short paragraph that included "genus codiaeum."*
- *The article explained what "genus codiaeum" means with a simple example.*

genus coeloglossum *(noun)*

Terrestrial orchids of cooler parts of North America and Europe: satyr orchid.

- *Understanding "genus coeloglossum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus coeloglossum."*

---

genus coelogyne *(noun)*

Large diverse genus of tropical Asiatic epiphytic orchids.

- *She wrote a short paragraph that included "genus coelogyne."*
- *He looked up "genus coelogyne" because he had never seen it before.*

---

genus collinsia *(noun)*

Genus of hardy annual herbs of western United States.

- *In class, the teacher used "genus collinsia" to mean genus of hardy annual herbs of western united states.*
- *The article explained what "genus collinsia" means with a simple example.*

---

genus collinsonia *(noun)*

Small genus of perennial erect or spreading aromatic herbs; United States.

- *They discussed "genus collinsonia" during the group presentation.*
- *Understanding "genus collinsonia" helps you talk about this topic clearly.*

---

genus colubrina *(noun)*

Mostly tropical American shrubs or small trees with small yellowish flowers and yellow or red fruits.

- *She wrote a short paragraph that included "genus colubrina."*
- *The article explained what "genus colubrina" means with a simple example.*

---

genus columnea *(noun)*

Genus of tropical American subshrubs and lianas.

- *Understanding "genus columnea" helps you talk about this topic clearly.*
- *In class, the teacher used "genus columnea" to mean genus of tropical american subshrubs and lianas.*

---

genus colutea *(noun)*

Small genus of Eurasian shrubs with yellow flowers and bladdery pods.

- *She wrote a short paragraph that included "genus colutea."*
- *The article explained what "genus colutea" means with a simple example.*

---

genus comandra *(noun)*

Small genus of chiefly North American parasitic plants.

- *They discussed "genus comandra" during the group presentation.*
- *The article explained what "genus comandra" means with a simple example.*

---

genus commelina *(noun)*

Type genus of the Commelinaceae; large genus of herbs of branching or creeping habit: day flower; widow's tears.

- *The article explained what "genus commelina" means with a simple example.*
- *She wrote a short paragraph that included "genus commelina."*

---

genus comptonia *(noun)*

One species: sweet fern.

- *In class, the teacher used "genus comptonia" to mean one species: sweet fern.*
- *They discussed "genus comptonia" during the group presentation.*

---

genus coniogramme *(noun)*

Terrestrial ferns of Pacific islands and Asia.

- *She wrote a short paragraph that included "genus coniogramme."*
- *The article explained what "genus coniogramme" means with a simple example.*

---

genus connarus *(noun)*

Large genus of tropical trees and shrubs; type genus of the Connaraceae.

- *They discussed "genus connarus" during the group presentation.*

- *He looked up “genus connarus” because he had never seen it before.*

---

genus conocarpus *(noun)*

Monotypic genus of tropical American trees: button tree.

- *She wrote a short paragraph that included “genus conocarpus.”*
- *He looked up “genus conocarpus” because he had never seen it before.*

---

genus conopodium *(noun)*

A genus of dicotyledonous plants of the family Umbelliferae.

- *She wrote a short paragraph that included “genus conopodium.”*
- *He looked up “genus conopodium” because he had never seen it before.*

---

genus conospermum *(noun)*

Australian shrubs (some trees) with flowers in dense spikes: smoke bush.

- *He looked up “genus conospermum” because he had never seen it before.*
- *They discussed “genus conospermum” during the group presentation.*

---

genus conradina *(noun)*

Small genus of low aromatic shrubs of southeastern United States.

- *The article explained what “genus conradina” means with a simple example.*
- *In class, the teacher used “genus conradina” to mean small genus of low aromatic shrubs of southeastern....*

---

genus convallaria *(noun)*

Sometimes placed in family Convallariaceae: lily of the valley.

- *Understanding “genus convallaria” helps you talk about this topic clearly.*
- *They discussed “genus convallaria” during the group presentation.*

---

genus conyza *(noun)*

Common American weed or wildflower.

- *Understanding “genus conyza” helps you talk about this topic clearly.*
- *The article explained what “genus conyza” means with a simple example.*

---

genus copernicia *(noun)*

Slow-growing tropical fan palms.

- *They discussed “genus copernicia” during the group presentation.*
- *He looked up “genus copernicia” because he had never seen it before.*

---

genus corallorhiza *(noun)*

Genus of leafless root-parasitic orchids having small purplish or yellowish racemose flowers with lobed lips; widely distributed in temperate regions.

- *Understanding “genus corallorhiza” helps you talk about this topic clearly.*
- *The article explained what “genus corallorhiza” means with a simple example.*

---

genus cordaites *(noun)*

Tall Paleozoic trees superficially resembling modern screw pines; structurally intermediate in some ways between cycads and conifers.

- *In class, the teacher used “genus cordaites” to mean tall paleozoic trees superficially resembling....*
- *The article explained what “genus cordaites” means with a simple example.*

---

genus coriandrum *(noun)*

Small genus of annual Mediterranean herbs.

- *He looked up “genus coriandrum” because he had never seen it before.*
- *Understanding “genus coriandrum” helps you talk about this topic clearly.*

---

genus corokia *(noun)*

Evergreen shrubs with intricately twisted wiry stems that in summer are smothered in small yellow flowers; grows in New Zealand.

- *Understanding “genus corokia” helps you talk about this topic clearly.*
- *They discussed “genus corokia” during the group presentation.*

---

genus coronilla *(noun)*

Genus of Old World shrubs and herbs.

- *They discussed "genus coronilla" during the group presentation.*
- *He looked up "genus coronilla" because he had never seen it before.*

genus corozo *(noun)*

A monocotyledonous genus of tropical American palm trees.

- *He looked up "genus corozo" because he had never seen it before.*
- *They discussed "genus corozo" during the group presentation.*

genus cortaderia *(noun)*

Tall ornamental grasses of South America and New Zealand and New Guinea: pampas grass.

- *In class, the teacher used "genus cortaderia" to mean tall ornamental grasses of south america and new....*
- *He looked up "genus cortaderia" because he had never seen it before.*

genus coryanthes *(noun)*

Small genus of tropical American epiphytic or lithophytic orchids.

- *He looked up "genus coryanthes" because he had never seen it before.*
- *They discussed "genus coryanthes" during the group presentation.*

genus corylopsis *(noun)*

Small genus of deciduous shrubs of temperate regions of Asia.

- *The article explained what "genus corylopsis" means with a simple example.*
- *In class, the teacher used "genus corylopsis" to mean small genus of deciduous shrubs of temperate....*

genus corypha *(noun)*

Large fan palms of tropical Asia to Australia.

- *He looked up "genus corypha" because he had never seen it before.*
- *They discussed "genus corypha" during the group presentation.*

genus coryphantha *(noun)*

Mainly globose cacti of southwestern United States and Mexico covered with many nodules; superficially resembling and formerly included in genus Mammillaria.

- *They discussed "genus coryphantha" during the group presentation.*
- *In class, the teacher used "genus coryphantha" to mean mainly globose cacti of southwestern united states....*

genus cotula *(noun)*

Cosmopolitan herbs especially southern hemisphere; many used as ground covers.

- *Understanding "genus cotula" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus cotula."*

genus coumarouna *(noun)*

Tropical American trees: tonka beans.

- *He looked up "genus coumarouna" because he had never seen it before.*
- *She wrote a short paragraph that included "genus coumarouna."*

genus craspedia *(noun)*

Herbs of Australia and New Zealand.

- *In class, the teacher used "genus craspedia" to mean herbs of australia and new zealand.*
- *They discussed "genus craspedia" during the group presentation.*

genus crateva *(noun)*

Tropical genus of small trees or shrubs.

- *In class, the teacher used "genus crateva" to mean tropical genus of small trees or shrubs.*
- *Understanding "genus crateva" helps you talk about this topic clearly.*

genus crescentia *(noun)*

A genus of tropical American trees of the family Bignoniaceae; has a short trunk and crooked limbs and drooping branches.

- *The article explained what "genus crescentia" means with a simple example.*
- *They discussed "genus crescentia" during the group presentation.*

---

genus cronartium *(noun)*

Rust fungi having aecia produced in raised or swollen sori and teliospores borne in waxy columns.

- *Understanding "genus cronartium" helps you talk about this topic clearly.*
- *In class, the teacher used "genus cronartium" to mean rust fungi having aecia produced in raised or....*

---

genus cryptocoryne *(noun)*

Water trumpet; aquatic herbs having broad leaves and long slender spathes; often used as aquarium plants.

- *They discussed "genus cryptocoryne" during the group presentation.*
- *Understanding "genus cryptocoryne" helps you talk about this topic clearly.*

---

genus cryptogramma *(noun)*

Sometimes placed in family Polypodiaceae or Cryptogrammataceae.

- *Understanding "genus cryptogramma" helps you talk about this topic clearly.*
- *In class, the teacher used "genus cryptogramma" to mean sometimes placed in family polypodiaceae or....*

---

genus culcita *(noun)*

Includes some plants usually placed in e.g. genus Dicksonia: terrestrial ferns resembling bracken; tropical America; Malaysia to Australia and Polynesia; southwestern Europe and Atlantic islands.

- *They discussed "genus culcita" during the group presentation.*
- *She wrote a short paragraph that included "genus culcita."*

---

genus curtisia *(noun)*

A large evergreen tree of South Africa.

- *In class, the teacher used "genus curtisia" to mean a large evergreen tree of south africa.*
- *The article explained what "genus curtisia" means with a simple example.*

---

genus cyamopsis *(noun)*

Small genus of annual usually hairy herbs of tropical Africa and Arabia.

- *Understanding "genus cyamopsis" helps you talk about this topic clearly.*
- *They discussed "genus cyamopsis" during the group presentation.*

---

genus cycloloma *(noun)*

A caryophyllaceous genus of the family Chenopodiaceae.

- *They discussed "genus cycloloma" during the group presentation.*
- *He looked up "genus cycloloma" because he had never seen it before.*

---

genus cyclophorus *(noun)*

Tropical Old World ferns having closely crowded circular sori and no indusia.

- *She wrote a short paragraph that included "genus cyclophorus."*
- *They discussed "genus cyclophorus" during the group presentation.*

---

genus cyclosorus *(noun)*

Small genus of terrestrial ferns of tropical and subtropical southern hemisphere.

- *Understanding "genus cyclosorus" helps you talk about this topic clearly.*
- *The article explained what "genus cyclosorus" means with a simple example.*

---

genus cycnoches *(noun)*

Genus of epiphytic or terrestrial tropical American orchids.

- *She wrote a short paragraph that included "genus cycnoches."*
- *The article explained what "genus cycnoches" means with a simple example.*

---

genus cynancum *(noun)*

Genus of perennial tropical African lianas.

- *In class, the teacher used "genus cynancum" to mean genus of perennial tropical african lianas.*
- *Understanding "genus cynancum" helps you talk about this topic clearly.*

genus cynoglossum *(noun)*

A large genus of tall rough herbs belonging to the family Boraginaceae.

- *The article explained what "genus cynoglossum" means with a simple example.*
- *She wrote a short paragraph that included "genus cynoglossum."*

genus cyphomandra *(noun)*

Tree tomato.

- *In class, the teacher used "genus cyphomandra" to mean tree tomato.*
- *He looked up "genus cyphomandra" because he had never seen it before.*

genus cyrilla *(noun)*

One species: trees and shrubs having flowers with acute or twisted petals and wingless fruit.

- *He looked up "genus cyrilla" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cyrilla."*

genus cyrtomium *(noun)*

Small genus of tropical Asiatic greenhouse ferns; in some classifications placed in Polypodiaceae.

- *She wrote a short paragraph that included "genus cyrtomium."*
- *They discussed "genus cyrtomium" during the group presentation.*

genus cystopteris *(noun)*

Chiefly small perennial rock ferns: bladder ferns; in some classifications placed in Polypodiaceae.

- *The article explained what "genus cystopteris" means with a simple example.*
- *Understanding "genus cystopteris" helps you talk about this topic clearly.*

genus daboecia *(noun)*

A dicotyledonous genus of the family Ericaceae.

- *In class, the teacher used "genus daboecia" to mean a dicotyledonous genus of the family ericaceae.*
- *The article explained what "genus daboecia" means with a simple example.*

genus dacrycarpus *(noun)*

Evergreen coniferous shrubs or trees of New Zealand to Malaysia and Philippines.

- *They discussed "genus dacrycarpus" during the group presentation.*
- *In class, the teacher used "genus dacrycarpus" to mean evergreen coniferous shrubs or trees of new zealand....*

genus dacrydium *(noun)*

Australasian evergreen trees or shrubs.

- *He looked up "genus dacrydium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus dacrydium."*

genus dacrymyces *(noun)*

Type genus of the Dacrymycetaceae: fungi with a bifurcate basidium that lacks septa.

- *He looked up "genus dacrymyces" because he had never seen it before.*
- *Understanding "genus dacrymyces" helps you talk about this topic clearly.*

genus dactyloctenium *(noun)*

A monocotyledonous genus of the family Gramineae.

- *They discussed "genus dactyloctenium" during the group presentation.*
- *Understanding "genus dactyloctenium" helps you talk about this topic clearly.*

genus dactylorhiza *(noun)*

Genus of terrestrial orchids of Europe and Asia and North Africa.

- *In class, the teacher used "genus dactylorhiza" to mean genus of terrestrial orchids of europe and asia and....*
- *He looked up "genus dactylorhiza" because he had never seen it before.*

genus dalea *(noun)*

Indigo bush.

- *She wrote a short paragraph that included "genus dalea."*
- *Understanding "genus dalea" helps you talk about this topic clearly.*

---

genus danaea *(noun)*

Fairly small terrestrial ferns of tropical America.

- *He looked up "genus danaea" because he had never seen it before.*
- *She wrote a short paragraph that included "genus danaea."*

---

genus darlingtonia *(noun)*

One species: California pitcher plant.

- *In class, the teacher used "genus darlingtonia" to mean one species: california pitcher plant.*
- *The article explained what "genus darlingtonia" means with a simple example.*

---

genus darmera *(noun)*

One species.

- *Understanding "genus darmera" helps you talk about this topic clearly.*
- *In class, the teacher used "genus darmera" to mean one species.*

---

genus davallia *(noun)*

Old World tropical fern; in some classification systems placed directly in family Polypodiaceae.

- *He looked up "genus davallia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus davallia."*

---

genus daviesia *(noun)*

Genus of Australasian shrubs and subshrubs having small yellow or purple flowers followed by short triangular pods.

- *In class, the teacher used "genus daviesia" to mean genus of australasian shrubs and subshrubs having....*
- *The article explained what "genus daviesia" means with a simple example.*

---

genus decumaria *(noun)*

Small genus of woody climbers with adhesive aerial roots; sometimes placed in family Saxifragaceae.

- *They discussed "genus decumaria" during the group presentation.*
- *Understanding "genus decumaria" helps you talk about this topic clearly.*

---

genus delairea *(noun)*

One species: German ivy.

- *The article explained what "genus delairea" means with a simple example.*
- *In class, the teacher used "genus delairea" to mean one species: german ivy.*

---

genus delonix *(noun)*

Evergreen or deciduous trees of tropical Africa and India.

- *She wrote a short paragraph that included "genus delonix."*
- *He looked up "genus delonix" because he had never seen it before.*

---

genus dendranthema *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *She wrote a short paragraph that included "genus dendranthema."*
- *The article explained what "genus dendranthema" means with a simple example.*

---

genus dendrocalamus *(noun)*

Giant clump-forming bamboos.

- *In class, the teacher used "genus dendrocalamus" to mean giant clump-forming bamboos.*
- *The article explained what "genus dendrocalamus" means with a simple example.*

---

genus dendromecon *(noun)*

One species: bush poppy.

- *He looked up "genus dendromecon" because he had never seen it before.*

- *Understanding "genus dendromecon" helps you talk about this topic clearly.*

genus dennstaedtia *(noun)*

Chiefly terrestrial ferns; in some classification systems placed in family Polypodiaceae.

- *He looked up "genus dennstaedtia" because he had never seen it before.*
- *They discussed "genus dennstaedtia" during the group presentation.*

genus dentaria *(noun)*

Usually included in genus Cardamine; in some classifications considered a separate genus.

- *Understanding "genus dentaria" helps you talk about this topic clearly.*
- *The article explained what "genus dentaria" means with a simple example.*

genus deparia *(noun)*

Classification used for 5 species of terrestrial ferns usually placed in other genera.

- *Understanding "genus deparia" helps you talk about this topic clearly.*
- *He looked up "genus deparia" because he had never seen it before.*

genus descurainia *(noun)*

Includes annual or biennial herbs of America and Europe very similar to and often included among those of genera Sisymbrium or Hugueninia; not recognized in some classification systems.

- *He looked up "genus descurainia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus descurainia."*

genus desmanthus *(noun)*

Genus of American herbs or shrubs with sensitive pinnate leaves and small whitish flowers.

- *In class, the teacher used "genus desmanthus" to mean genus of american herbs or shrubs with sensitive....*
- *He looked up "genus desmanthus" because he had never seen it before.*

genus diacalpa *(noun)*

One species: delicate fern of foothills of Himalayas.

- *She wrote a short paragraph that included "genus diacalpa."*
- *He looked up "genus diacalpa" because he had never seen it before.*

genus diapensia *(noun)*

Type genus of Diapensiaceae.

- *Understanding "genus diapensia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus diapensia" to mean type genus of diapensiaceae.*

genus dichondra *(noun)*

Genus of chiefly tropical prostrate perennial herbs with creeping stems that root at the nodes.

- *In class, the teacher used "genus dichondra" to mean genus of chiefly tropical prostrate perennial herbs....*
- *They discussed "genus dichondra" during the group presentation.*

genus dicksonia *(noun)*

Tree ferns of temperate Australasia having bipinnatifid or tripinnatifid fronds and usually marginal sori; in some classification systems placed in family Cyatheaceae.

- *The article explained what "genus dicksonia" means with a simple example.*
- *She wrote a short paragraph that included "genus dicksonia."*

genus dicranopteris *(noun)*

Terrestrial ferns of forest margin or open ground; pantropical.

- *The article explained what "genus dicranopteris" means with a simple example.*
- *She wrote a short paragraph that included "genus dicranopteris."*

genus dicranum *(noun)*

Type genus of Dicranaceae.

- *She wrote a short paragraph that included "genus dicranum."*
- *They discussed "genus dicranum" during the group presentation.*

genus dictamnus *(noun)*

A dicotyledonous genus of the family Rutaceae.

- *He looked up "genus dictamnus" because he had never seen it before.*
- *They discussed "genus dictamnus" during the group presentation.*

---

genus dictostylium *(noun)*

Genus of slime molds that grow on dung and decaying vegetation.

- *He looked up "genus dictostylium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus dictostylium."*

---

genus dictyophera *(noun)*

Closely related to genus Phallus distinguished by an indusium hanging like a skirt from below the pileus.

- *In class, the teacher used "genus dictyophera" to mean closely related to genus phallus distinguished by....*
- *They discussed "genus dictyophera" during the group presentation.*

---

genus diervilla *(noun)*

Small genus of low deciduous shrubs: bush honeysuckles.

- *He looked up "genus diervilla" because he had never seen it before.*
- *Understanding "genus diervilla" helps you talk about this topic clearly.*

---

genus dillenia *(noun)*

East Indian and Australian shrubs and trees having panicles of large white or yellow flowers.

- *Understanding "genus dillenia" helps you talk about this topic clearly.*
- *They discussed "genus dillenia" during the group presentation.*

---

genus dimorphotheca *(noun)*

South African herbs or subshrubs with usually yellow flowers.

- *They discussed "genus dimorphotheca" during the group presentation.*
- *He looked up "genus dimorphotheca" because he had never seen it before.*

---

genus dionaea *(noun)*

A genus of the family Droseraceae.

- *The article explained what "genus dionaea" means with a simple example.*
- *In class, the teacher used "genus dionaea" to mean a genus of the family droseraceae.*

---

genus dioon *(noun)*

Small genus of arborescent cycads of Mexico and Central America; sometimes classified in family Cycadaceae.

- *They discussed "genus dioon" during the group presentation.*
- *The article explained what "genus dioon" means with a simple example.*

---

genus dipladenia *(noun)*

Genus of tropical South American tuberous perennial woody vines with large racemose flowers and milky sap.

- *They discussed "genus dipladenia" during the group presentation.*
- *In class, the teacher used "genus dipladenia" to mean genus of tropical south american tuberous perennial....*

---

genus diplopterygium *(noun)*

Scandent thicket-forming ferns of Asia to western Pacific.

- *In class, the teacher used "genus diplopterygium" to mean scandent thicket-forming ferns of asia to western....*
- *He looked up "genus diplopterygium" because he had never seen it before.*

---

genus diplotaxis *(noun)*

Wall rocket.

- *They discussed "genus diplotaxis" during the group presentation.*
- *Understanding "genus diplotaxis" helps you talk about this topic clearly.*

---

genus dipogon *(noun)*

One species: Australian pea.

- *He looked up "genus dipogon" because he had never seen it before.*
- *She wrote a short paragraph that included "genus dipogon."*

---

genus dipsacus *(noun)*

Type genus of the Dipsacaceae: teasel.

- *He looked up "genus dipsacus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus dipsacus."*

---

genus dipteronia *(noun)*

Small genus of large deciduous shrubs having large clusters of winged seeds that turn red as they mature; central and southern China.

- *They discussed "genus dipteronia" during the group presentation.*
- *She wrote a short paragraph that included "genus dipteronia."*

---

genus dipteryx *(noun)*

Tropical American trees: tonka beans.

- *The article explained what "genus dipteryx" means with a simple example.*
- *She wrote a short paragraph that included "genus dipteryx."*

---

genus dirca *(noun)*

Deciduous shrub of North America: leatherwood.

- *She wrote a short paragraph that included "genus dirca."*
- *He looked up "genus dirca" because he had never seen it before.*

---

genus discina *(noun)*

A genus of fungi of the family Helvellaceae with a cup-shaped or saucer-shaped fruiting body and ornamented spores.

- *She wrote a short paragraph that included "genus discina."*
- *They discussed "genus discina" during the group presentation.*

---

genus dodonaea *(noun)*

A genus of tropical shrub or tree.

- *She wrote a short paragraph that included "genus dodonaea."*
- *He looked up "genus dodonaea" because he had never seen it before.*

---

genus dombeya *(noun)*

Genus of African shrubs or small trees.

- *She wrote a short paragraph that included "genus dombeya."*
- *He looked up "genus dombeya" because he had never seen it before.*

---

genus doodia *(noun)*

In some classification systems placed in family Polypodiaceae; small terrestrial colony-forming ferns of Australasia.

- *Understanding "genus doodia" helps you talk about this topic clearly.*
- *They discussed "genus doodia" during the group presentation.*

---

genus doronicum *(noun)*

Genus of Eurasian perennial tuberous or rhizomatous herbs: leopard's bane.

- *In class, the teacher used "genus doronicum" to mean genus of eurasian perennial tuberous or rhizomatous....*
- *The article explained what "genus doronicum" means with a simple example.*

---

genus dorotheanthus *(noun)*

A caryophyllaceous genus of Dorotheanthus.

- *Understanding "genus dorotheanthus" helps you talk about this topic clearly.*
- *He looked up "genus dorotheanthus" because he had never seen it before.*

---

genus doryopteris *(noun)*

Small to medium tropical tufted ferns; sometimes placed in family Adiantaceae.

- *He looked up "genus doryopteris" because he had never seen it before.*
- *She wrote a short paragraph that included "genus doryopteris."*

genus dovyalis *(noun)*

Small genus of sometimes spiny shrubs or small trees; Africa; India; Sri Lanka.

- *She wrote a short paragraph that included "genus dovyalis."*
- *He looked up "genus dovyalis" because he had never seen it before.*

genus dracocephalum *(noun)*

Genus of American herbs and dwarf shrubs of the mind family: dragonheads.

- *Understanding "genus dracocephalum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus dracocephalum."*

genus dracontium *(noun)*

Small genus of tropical American cormous herbs.

- *In class, the teacher used "genus dracontium" to mean small genus of tropical american cormous herbs.*
- *The article explained what "genus dracontium" means with a simple example.*

genus drimys *(noun)*

Shrubs and trees of southern hemisphere having aromatic foliage.

- *In class, the teacher used "genus drimys" to mean shrubs and trees of southern hemisphere having....*
- *He looked up "genus drimys" because he had never seen it before.*

genus drosophyllum *(noun)*

One species.

- *In class, the teacher used "genus drosophyllum" to mean one species.*
- *They discussed "genus drosophyllum" during the group presentation.*

genus dryadella *(noun)*

Comprises tropical American species usually placed in genus Masdevallia: very dwarf plants having short tufted and usually unifoliate stems with usually solitary flowers.

- *In class, the teacher used "genus dryadella" to mean comprises tropical american species usually placed....*
- *The article explained what "genus dryadella" means with a simple example.*

genus drymoglossum *(noun)*

Epiphytic ferns of Madagascar to tropical Asia and New Guinea.

- *The article explained what "genus drymoglossum" means with a simple example.*
- *In class, the teacher used "genus drymoglossum" to mean epiphytic ferns of madagascar to tropical asia and....*

genus drynaria *(noun)*

Large robust epiphytic ferns of tropical forest and scrub; Africa and Asia and Australia.

- *Understanding "genus drynaria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus drynaria."*

genus drypis *(noun)*

One species.

- *The article explained what "genus drypis" means with a simple example.*
- *They discussed "genus drypis" during the group presentation.*

genus eburophyton *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *They discussed "genus eburophyton" during the group presentation.*
- *In class, the teacher used "genus eburophyton" to mean a monocotyledonous genus of the family orchidaceae.*

genus ecballium *(noun)*

Exploding cucumber; squirting cucumber.

- *Understanding "genus ecballium" helps you talk about this topic clearly.*
- *In class, the teacher used "genus ecballium" to mean exploding cucumber; squirting cucumber.*

genus echinocereus *(noun)*

Large genus of low-growing shrubby ribbed cacti of Mexico and southwestern United States.

- *She wrote a short paragraph that included "genus echinocereus."*
- *He looked up "genus echinocereus" because he had never seen it before.*

---

genus echinops *(noun)*

Genus of Mediterranean and Eurasian herbs: globe thistles.

- *She wrote a short paragraph that included "genus echinops."*
- *He looked up "genus echinops" because he had never seen it before.*

---

genus elaeocarpus *(noun)*

Type genus of the family Elaeocarpaceae.

- *He looked up "genus elaeocarpus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus elaeocarpus."*

---

genus elephantopus *(noun)*

Perennial American herb.

- *He looked up "genus elephantopus" because he had never seen it before.*
- *In class, the teacher used "genus elephantopus" to mean perennial american herb.*

---

genus elsholtzia *(noun)*

Genus of Asiatic and African aromatic herbs.

- *The article explained what "genus elsholtzia" means with a simple example.*
- *They discussed "genus elsholtzia" during the group presentation.*

---

genus embothrium *(noun)*

Small genus of South American evergreen shrubs or small trees with long willowy branches and flowers in flamboyant terminal clusters.

- *In class, the teacher used "genus embothrium" to mean small genus of south american evergreen shrubs or....*
- *He looked up "genus embothrium" because he had never seen it before.*

---

genus emmanthe *(noun)*

One species: yellow bells.

- *The article explained what "genus emmanthe" means with a simple example.*
- *They discussed "genus emmanthe" during the group presentation.*

---

genus encelia *(noun)*

Genus of shrubs of southwestern United States and Mexico: brittlebush.

- *The article explained what "genus encelia" means with a simple example.*
- *In class, the teacher used "genus encelia" to mean genus of shrubs of southwestern united states and....*

---

genus enceliopsis *(noun)*

Small genus of xerophytic herbs of southwestern United States.

- *Understanding "genus enceliopsis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus enceliopsis" to mean small genus of xerophytic herbs of southwestern....*

---

genus encephalartos *(noun)*

Genus of arborescent African cycads; sometimes classified in family Cycadaceae.

- *She wrote a short paragraph that included "genus encephalartos."*
- *He looked up "genus encephalartos" because he had never seen it before.*

---

genus encyclia *(noun)*

Large genus of epiphytic and lithophytic orchids of tropical and subtropical Americas and West Indies; formerly included in genus Epidendrum.

- *Understanding "genus encyclia" helps you talk about this topic clearly.*
- *The article explained what "genus encyclia" means with a simple example.*

---

genus engelmannia *(noun)*

One species: North American herbs that resemble sunflowers.

- *She wrote a short paragraph that included "genus engelmannia."*

- *They discussed "genus engelmannia" during the group presentation.*

---

genus ensete *(noun)*

Old World tropical herbs: Abyssinian bananas.

- *He looked up "genus ensete" because he had never seen it before.*
- *In class, the teacher used "genus ensete" to mean old world tropical herbs: abyssinian bananas.*

---

genus entandrophragma *(noun)*

Cedar mahogany trees.

- *She wrote a short paragraph that included "genus entandrophragma."*
- *He looked up "genus entandrophragma" because he had never seen it before.*

---

genus entelea *(noun)*

A genus of evergreen shrub that grows in New Zealand.

- *He looked up "genus entelea" because he had never seen it before.*
- *In class, the teacher used "genus entelea" to mean a genus of evergreen shrub that grows in new zealand.*

---

genus enterolobium *(noun)*

Small genus of tropical American timber trees closely allied to genus Albizia.

- *She wrote a short paragraph that included "genus enterolobium."*
- *They discussed "genus enterolobium" during the group presentation.*

---

genus entoloma *(noun)*

Agarics with pink spores but lacking both volva and annulus (includes some that are poisonous).

- *She wrote a short paragraph that included "genus entoloma."*
- *Understanding "genus entoloma" helps you talk about this topic clearly.*

---

genus entomophthora *(noun)*

Type genus of the Entomophthoraceae; fungi parasitic on insects.

- *Understanding "genus entomophthora" helps you talk about this topic clearly.*
- *He looked up "genus entomophthora" because he had never seen it before.*

---

genus epacris *(noun)*

Type genus of the Epacridaceae: Australian heath.

- *She wrote a short paragraph that included "genus epacris."*
- *Understanding "genus epacris" helps you talk about this topic clearly.*

---

genus epigaea *(noun)*

Small creeping evergreen shrubs: trailing arbutus.

- *He looked up "genus epigaea" because he had never seen it before.*
- *Understanding "genus epigaea" helps you talk about this topic clearly.*

---

genus epipactis *(noun)*

Genus of hardy orchids with leafy-bracted racemes of greenish or purplish irregular flowers.

- *He looked up "genus epipactis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus epipactis."*

---

genus epipremnum *(noun)*

Small genus of evergreen lianas of southeastern Asia to western Pacific areas.

- *In class, the teacher used "genus epipremnum" to mean small genus of evergreen lianas of southeastern....*
- *They discussed "genus epipremnum" during the group presentation.*

---

genus episcia *(noun)*

Genus of tropical American herbs having soft hairy foliage.

- *He looked up "genus episcia" because he had never seen it before.*
- *In class, the teacher used "genus episcia" to mean genus of tropical american herbs having soft hairy....*

---

genus eranthis *(noun)*

Winter aconite.

- *In class, the teacher used "genus eranthis" to mean winter aconite.*
- *Understanding "genus eranthis" helps you talk about this topic clearly.*

---

genus erechtites *(noun)*

Coarse herbs with whitish discoid flower heads and silky pappus.

- *In class, the teacher used "genus erechtites" to mean coarse herbs with whitish discoid flower heads and....*
- *Understanding "genus erechtites" helps you talk about this topic clearly.*

---

genus erianthus *(noun)*

Genus of reedlike grasses having spikes crowded in a panicle covered with long silky hairs.

- *The article explained what "genus erianthus" means with a simple example.*
- *She wrote a short paragraph that included "genus erianthus."*

---

genus eriobotrya *(noun)*

Asiatic evergreen fruit trees.

- *He looked up "genus eriobotrya" because he had never seen it before.*
- *They discussed "genus eriobotrya" during the group presentation.*

---

genus eriocaulon *(noun)*

Type genus of the Eriocaulaceae: rushlike aquatic or marginal perennials usually found in shallow waters of acid lakes and pools and bogs.

- *She wrote a short paragraph that included "genus eriocaulon."*
- *Understanding "genus eriocaulon" helps you talk about this topic clearly.*

---

genus eriodictyon *(noun)*

Small genus of evergreen shrubs of southwestern United States and Mexico.

- *She wrote a short paragraph that included "genus eriodictyon."*
- *Understanding "genus eriodictyon" helps you talk about this topic clearly.*

---

genus eriophyllum *(noun)*

Genus of hairy herbs and shrubs of western North America.

- *In class, the teacher used "genus eriophyllum" to mean genus of hairy herbs and shrubs of western north....*
- *They discussed "genus eriophyllum" during the group presentation.*

---

genus eruca *(noun)*

Annual to perennial herbs of the Mediterranean region.

- *Understanding "genus eruca" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus eruca."*

---

genus erythroxylon *(noun)*

A large genus of South American shrubs and small trees of the family Erythroxylaceae.

- *The article explained what "genus erythroxylon" means with a simple example.*
- *In class, the teacher used "genus erythroxylon" to mean a large genus of south american shrubs and small....*

---

genus erythroxylum *(noun)*

A large genus of South American shrubs and small trees of the family Erythroxylaceae.

- *Understanding "genus erythroxylum" helps you talk about this topic clearly.*
- *He looked up "genus erythroxylum" because he had never seen it before.*

---

genus eschscholtzia *(noun)*

Showy herbs of western North America.

- *In class, the teacher used "genus eschscholtzia" to mean showy herbs of western north america.*
- *The article explained what "genus eschscholtzia" means with a simple example.*

---

genus eucarya *(noun)*

Quandong trees.

- *He looked up "genus eucarya" because he had never seen it before.*
- *Understanding "genus eucarya" helps you talk about this topic clearly.*

---

genus eurotium *(noun)*

A genus of fungi belonging to the order Eurotiales.

- *He looked up "genus eurotium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus eurotium."*

---

genus eustoma *(noun)*

Small genus of herbs of warm regions of southern North America to northern South America.

- *In class, the teacher used "genus eustoma" to mean small genus of herbs of warm regions of southern....*
- *The article explained what "genus eustoma" means with a simple example.*

---

genus evernia *(noun)*

Lichens of the family Usneaceae having a pendulous or shrubby thallus.

- *He looked up "genus evernia" because he had never seen it before.*
- *Understanding "genus evernia" helps you talk about this topic clearly.*

---

genus exacum *(noun)*

Genus of tropical Asiatic and African plants: especially Persian violets.

- *The article explained what "genus exacum" means with a simple example.*
- *In class, the teacher used "genus exacum" to mean genus of tropical asiatic and african plants:....*

---

genus fagopyrum *(noun)*

Buckwheat; in some classifications included in the genus Polygonum.

- *He looked up "genus fagopyrum" because he had never seen it before.*
- *Understanding "genus fagopyrum" helps you talk about this topic clearly.*

---

genus falcatifolium *(noun)*

Sickle pines: dioecious evergreen tropical trees and shrubs having sickle-shaped leaves; similar to Dacrycarpus in habit; Malaysia and Philippines to New Guinea and New Caledonia.

- *He looked up "genus falcatifolium" because he had never seen it before.*
- *Understanding "genus falcatifolium" helps you talk about this topic clearly.*

---

genus ferocactus *(noun)*

Genus of nearly globular cacti of Mexico and southwestern United States: barrel cacti.

- *They discussed "genus ferocactus" during the group presentation.*
- *She wrote a short paragraph that included "genus ferocactus."*

---

genus filago *(noun)*

Genus of small woolly herbs.

- *He looked up "genus filago" because he had never seen it before.*
- *Understanding "genus filago" helps you talk about this topic clearly.*

---

genus firmiana *(noun)*

Small genus of Asian trees or shrubs.

- *She wrote a short paragraph that included "genus firmiana."*
- *The article explained what "genus firmiana" means with a simple example.*

---

genus fistulina *(noun)*

Fungi having each pore separate though crowded.

- *They discussed "genus fistulina" during the group presentation.*
- *In class, the teacher used "genus fistulina" to mean fungi having each pore separate though crowded.*

---

genus flacourtia *(noun)*

Often spiny trees or shrubs of tropical Asia and Africa.

- *In class, the teacher used "genus flacourtia" to mean often spiny trees or shrubs of tropical asia and africa.*
- *The article explained what "genus flacourtia" means with a simple example.*

genus flammulina *(noun)*

A genus of agarics.

- *Understanding "genus flammulina" helps you talk about this topic clearly.*
- *In class, the teacher used "genus flammulina" to mean a genus of agarics.*

genus flindersia *(noun)*

Small genus of Australian timber trees.

- *The article explained what "genus flindersia" means with a simple example.*
- *They discussed "genus flindersia" during the group presentation.*

genus forestiera *(noun)*

Genus of often spiny American shrubs and trees.

- *He looked up "genus forestiera" because he had never seen it before.*
- *Understanding "genus forestiera" helps you talk about this topic clearly.*

genus fortunella *(noun)*

Small genus of shrubs native to south China producing small ovoid fruits resembling oranges: includes kumquats.

- *In class, the teacher used "genus fortunella" to mean small genus of shrubs native to south china....*
- *He looked up "genus fortunella" because he had never seen it before.*

genus fothergilla *(noun)*

Small genus of deciduous shrubs of the southeastern United States.

- *She wrote a short paragraph that included "genus fothergilla."*
- *The article explained what "genus fothergilla" means with a simple example.*

genus fouquieria *(noun)*

Resinous succulent trees or shrubs of desert and semidesert regions of southwestern United States that are leafless most of the year.

- *He looked up "genus fouquieria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus fouquieria."*

genus francoa *(noun)*

Perennial evergreen herbs with white or pink flowers; Chile.

- *In class, the teacher used "genus francoa" to mean perennial evergreen herbs with white or pink....*
- *They discussed "genus francoa" during the group presentation.*

genus frasera *(noun)*

Genus of North American herbs: columbo; includes some species sometimes placed in genus Swertia.

- *He looked up "genus frasera" because he had never seen it before.*
- *She wrote a short paragraph that included "genus frasera."*

genus fremontia *(noun)*

Flannelbush.

- *She wrote a short paragraph that included "genus fremontia."*
- *He looked up "genus fremontia" because he had never seen it before.*

genus fremontodendron *(noun)*

Flannelbush.

- *Understanding "genus fremontodendron" helps you talk about this topic clearly.*
- *The article explained what "genus fremontodendron" means with a simple example.*

genus froelichia *(noun)*

Genus of erect or procumbent herbs of the Americas having spikes of woolly white flowers: cottonweed.

- *He looked up "genus froelichia" because he had never seen it before.*
- *Understanding "genus froelichia" helps you talk about this topic clearly.*

genus fumaria *(noun)*

Annual herbs whose flowers have only one petal spurred at the base.

- *They discussed "genus fumaria" during the group presentation.*
- *She wrote a short paragraph that included "genus fumaria."*

---

genus funka *(noun)*

Robust east Asian clump-forming perennial herbs having racemose flowers: plantain lilies; sometimes placed in family Hostaceae.

- *She wrote a short paragraph that included "genus funka."*
- *Understanding "genus funka" helps you talk about this topic clearly.*

---

genus fusanus *(noun)*

Quandong trees.

- *She wrote a short paragraph that included "genus fusanus."*
- *Understanding "genus fusanus" helps you talk about this topic clearly.*

---

genus fuscoboletinus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *The article explained what "genus fuscoboletinus" means with a simple example.*
- *Understanding "genus fuscoboletinus" helps you talk about this topic clearly.*

---

genus galega *(noun)*

Small genus of Eurasian herbs: goat's rue.

- *They discussed "genus galega" during the group presentation.*
- *Understanding "genus galega" helps you talk about this topic clearly.*

---

genus galeopsis *(noun)*

Erect annual European herbs.

- *The article explained what "genus galeopsis" means with a simple example.*
- *They discussed "genus galeopsis" during the group presentation.*

---

genus gastroboletus *(noun)*

A genus of fungi belonging to the family Secotiaceae; they resemble boletes but the spores are not discharged from the basidium.

- *Understanding "genus gastroboletus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus gastroboletus" to mean a genus of fungi belonging to the family....*

---

genus gastrocybe *(noun)*

A genus of fungi of the family Secotiaceae.

- *The article explained what "genus gastrocybe" means with a simple example.*
- *Understanding "genus gastrocybe" helps you talk about this topic clearly.*

---

genus gastrolobium *(noun)*

Genus of Australian evergreen shrubs poisonous to livestock: poison bush.

- *He looked up "genus gastrolobium" because he had never seen it before.*
- *In class, the teacher used "genus gastrolobium" to mean genus of australian evergreen shrubs poisonous to....*

---

genus gaylussacia *(noun)*

Deciduous or evergreen shrubs of North America: black huckleberries.

- *In class, the teacher used "genus gaylussacia" to mean deciduous or evergreen shrubs of north america:....*
- *He looked up "genus gaylussacia" because he had never seen it before.*

---

genus gazania *(noun)*

Genus of tomentose tropical African herbs with milky sap.

- *She wrote a short paragraph that included "genus gazania."*
- *They discussed "genus gazania" during the group presentation.*

---

genus geastrum *(noun)*

Type genus of Geastraceae; fungi whose outer peridium when dry splits into starlike segments.

- *He looked up "genus geastrum" because he had never seen it before.*

- *She wrote a short paragraph that included "genus geastrum."*

genus genipa *(noun)*

Tropical American evergreen trees or shrubs bearing yellow flowers and succulent edible fruit with a thick rind.

- *In class, the teacher used "genus genipa" to mean tropical american evergreen trees or shrubs bearing....*
- *The article explained what "genus genipa" means with a simple example.*

genus genlisea *(noun)*

Small genus of carnivorous plants of tropical African swamps.

- *Understanding "genus genlisea" helps you talk about this topic clearly.*
- *The article explained what "genus genlisea" means with a simple example.*

genus gentianella *(noun)*

Genus of herbs with flowers that resemble gentian; in some classifications included in genus Gentiana.

- *In class, the teacher used "genus gentianella" to mean genus of herbs with flowers that resemble gentian;....*
- *The article explained what "genus gentianella" means with a simple example.*

genus gentianopsis *(noun)*

Genus of fringed gentians; in some classifications included in genus Gentiana.

- *In class, the teacher used "genus gentianopsis" to mean genus of fringed gentians; in some classifications....*
- *They discussed "genus gentianopsis" during the group presentation.*

genus geoffroea *(noun)*

Small genus of shrubs or small trees of tropical and subtropical America.

- *Understanding "genus geoffroea" helps you talk about this topic clearly.*
- *In class, the teacher used "genus geoffroea" to mean small genus of shrubs or small trees of tropical....*

genus geoglossum *(noun)*

Type genus of the Geoglossaceae comprising the earthtongues.

- *The article explained what "genus geoglossum" means with a simple example.*
- *In class, the teacher used "genus geoglossum" to mean type genus of the geoglossaceae comprising the....*

genus gerardia *(noun)*

Genus of annual or perennial herbs with showy pink or purple or yellow flowers; plants often assigned to genera Aureolaria or Agalinis.

- *They discussed "genus gerardia" during the group presentation.*
- *She wrote a short paragraph that included "genus gerardia."*

genus gerea *(noun)*

Small genus of hairy herbs with yellow flowers.

- *Understanding "genus gerea" helps you talk about this topic clearly.*
- *He looked up "genus gerea" because he had never seen it before.*

genus gesneria *(noun)*

Large genus of tropical American herbs having showy tubular flowers.

- *Understanding "genus gesneria" helps you talk about this topic clearly.*
- *He looked up "genus gesneria" because he had never seen it before.*

genus glaucium *(noun)*

Herbs of Europe and North Africa and Asia: horned poppy.

- *They discussed "genus glaucium" during the group presentation.*
- *In class, the teacher used "genus glaucium" to mean herbs of europe and north africa and asia: horned poppy.*

genus glaux *(noun)*

Sea milkwort.

- *She wrote a short paragraph that included "genus glaux."*
- *He looked up "genus glaux" because he had never seen it before.*

genus gleditsia *(noun)*

Deciduous trees: honey locusts.

- *He looked up "genus gleditsia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus gleditsia."*

---

genus gleichenia *(noun)*

Type genus of Gleicheniaceae: leptosporangiate ferns with sessile sporangia; South Africa to Malaysia and New Zealand.

- *The article explained what "genus gleichenia" means with a simple example.*
- *In class, the teacher used "genus gleichenia" to mean type genus of gleicheniaceae: leptosporangiate....*

---

genus gliricidia *(noun)*

Small genus of low-branching profusely flowering trees of tropical America.

- *They discussed "genus gliricidia" during the group presentation.*
- *She wrote a short paragraph that included "genus gliricidia."*

---

genus glossodia *(noun)*

Small genus of Australian orchids.

- *She wrote a short paragraph that included "genus glossodia."*
- *He looked up "genus glossodia" because he had never seen it before.*

---

genus gnaphalium *(noun)*

Large widely distributed genus of coarse hairy herbs with whitish involucres.

- *Understanding "genus gnaphalium" helps you talk about this topic clearly.*
- *In class, the teacher used "genus gnaphalium" to mean large widely distributed genus of coarse hairy....*

---

genus gnetum *(noun)*

Type genus of the Gnetaceae; small trees or shrubs usually with climbing jointed stems and terminal spikes of flowers with orange-red seeds clustered in rough cones.

- *He looked up "genus gnetum" because he had never seen it before.*
- *Understanding "genus gnetum" helps you talk about this topic clearly.*

---

genus gomphrena *(noun)*

Genus of tropical herbs or subshrubs having flowers in close heads; tropical America and Australia.

- *The article explained what "genus gomphrena" means with a simple example.*
- *In class, the teacher used "genus gomphrena" to mean genus of tropical herbs or subshrubs having flowers....*

---

genus goniopteris *(noun)*

Terrestrial ferns of Florida and West Indies to Central and South America.

- *They discussed "genus goniopteris" during the group presentation.*
- *He looked up "genus goniopteris" because he had never seen it before.*

---

genus goodyera *(noun)*

Genus of small orchids of the northern hemisphere with creeping rhizomes and stalked ovate leaves and small flowers.

- *Understanding "genus goodyera" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus goodyera."*

---

genus grammatophyllum *(noun)*

Small genus of large epiphytic or terrestrial orchids of southeastern Asia to Polynesia; the giants of the Orchidaceae having long narrow leaves and drooping flower clusters often 6 feet long.

- *They discussed "genus grammatophyllum" during the group presentation.*
- *In class, the teacher used "genus grammatophyllum" to mean small genus of large epiphytic or terrestrial....*

---

genus graptophyllum *(noun)*

Caricature plant.

- *In class, the teacher used "genus graptophyllum" to mean caricature plant.*
- *Understanding "genus graptophyllum" helps you talk about this topic clearly.*

---

genus grias *(noun)*

Anchovy pear tree.

- *Understanding "genus grias" helps you talk about this topic clearly.*
- *They discussed "genus grias" during the group presentation.*

---

genus grindelia *(noun)*

Large genus of coarse gummy herbs of western North and Central America.

- *The article explained what "genus grindelia" means with a simple example.*
- *In class, the teacher used "genus grindelia" to mean large genus of coarse gummy herbs of western north....*

---

genus griselinia *(noun)*

Evergreen shrubs of New Zealand and South America.

- *The article explained what "genus griselinia" means with a simple example.*
- *In class, the teacher used "genus griselinia" to mean evergreen shrubs of new zealand and south america.*

---

genus groenlandia *(noun)*

A monocotyledonous genus of the family Potamogetonaceae.

- *In class, the teacher used "genus groenlandia" to mean a monocotyledonous genus of the family potamogetonaceae.*
- *The article explained what "genus groenlandia" means with a simple example.*

---

genus guevina *(noun)*

One species: Chilean nut.

- *The article explained what "genus guevina" means with a simple example.*
- *In class, the teacher used "genus guevina" to mean one species: chilean nut.*

---

genus gutierrezia *(noun)*

Sticky perennial herbs and subshrubs of western North America and warm South America.

- *The article explained what "genus gutierrezia" means with a simple example.*
- *Understanding "genus gutierrezia" helps you talk about this topic clearly.*

---

genus gymnadenia *(noun)*

Small genus of terrestrial orchids of North America and temperate Eurasia.

- *They discussed "genus gymnadenia" during the group presentation.*
- *He looked up "genus gymnadenia" because he had never seen it before.*

---

genus gymnadeniopsis *(noun)*

Genus of North American terrestrial orchids usually included in genus Habenaria.

- *He looked up "genus gymnadeniopsis" because he had never seen it before.*
- *In class, the teacher used "genus gymnadeniopsis" to mean genus of north american terrestrial orchids usually....*

---

genus gymnocalycium *(noun)*

Large genus of low-growing globular South American cacti with spiny ribs covered with many tubercles.

- *She wrote a short paragraph that included "genus gymnocalycium."*
- *The article explained what "genus gymnocalycium" means with a simple example.*

---

genus gymnocarpium *(noun)*

Oak ferns: in some classification systems included in genus Thelypteris.

- *She wrote a short paragraph that included "genus gymnocarpium."*
- *He looked up "genus gymnocarpium" because he had never seen it before.*

---

genus gymnocladus *(noun)*

Small genus of deciduous trees of China and United States having paniculate flowers and thick pulpy pods.

- *He looked up "genus gymnocladus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus gymnocladus."*

---

genus gymnopilus *(noun)*

A genus of fungus characterized by the orange color of the spore deposit.

- *The article explained what "genus gymnopilus" means with a simple example.*
- *In class, the teacher used "genus gymnopilus" to mean a genus of fungus characterized by the orange color....*

genus gymnosporangium *(noun)*

Genus of fungi that produce galls on cedars and other conifers of genera Juniperus and Libocedrus and causes rust spots on apples and pears and other plants of family Rosaceae.

- *They discussed "genus gymnosporangium" during the group presentation.*
- *The article explained what "genus gymnosporangium" means with a simple example.*

genus gynura *(noun)*

Genus of Old World tropical herbs: velvet plants.

- *He looked up "genus gynura" because he had never seen it before.*
- *She wrote a short paragraph that included "genus gynura."*

genus gyromitra *(noun)*

A genus of fungi of the family Helvellaceae with a fertile portion that is tan to brown.

- *Understanding "genus gyromitra" helps you talk about this topic clearly.*
- *The article explained what "genus gyromitra" means with a simple example.*

genus haastia *(noun)*

Genus of New Zealand mat-forming herbs or subshrubs: vegetable sheep.

- *She wrote a short paragraph that included "genus haastia."*
- *They discussed "genus haastia" during the group presentation.*

genus hackelia *(noun)*

Stickweed; beggar's lice.

- *He looked up "genus hackelia" because he had never seen it before.*
- *They discussed "genus hackelia" during the group presentation.*

genus haemanthus *(noun)*

Genus of African deciduous or evergreen bulbous herbs: blood lilies.

- *He looked up "genus haemanthus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus haemanthus."*

genus haematoxylon *(noun)*

Small genus of tropical American spiny bushy shrubs or trees.

- *They discussed "genus haematoxylon" during the group presentation.*
- *In class, the teacher used "genus haematoxylon" to mean small genus of tropical american spiny bushy shrubs....*

genus haematoxylum *(noun)*

Small genus of tropical American spiny bushy shrubs or trees.

- *He looked up "genus haematoxylum" because he had never seen it before.*
- *She wrote a short paragraph that included "genus haematoxylum."*

genus haemodorum *(noun)*

Type genus of family Haemodoraceae.

- *She wrote a short paragraph that included "genus haemodorum."*
- *Understanding "genus haemodorum" helps you talk about this topic clearly.*

genus halenia *(noun)*

Genus of herbs of Eurasia and the Americas: spurred gentians.

- *He looked up "genus halenia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus halenia."*

genus halesia *(noun)*

Deciduous small trees or shrubs of China and eastern North America.

- *The article explained what "genus halesia" means with a simple example.*
- *They discussed "genus halesia" during the group presentation.*

genus halimodendron *(noun)*

One species: salt tree.

- *Understanding "genus halimodendron" helps you talk about this topic clearly.*
- *The article explained what "genus halimodendron" means with a simple example.*

---

genus halocarpus *(noun)*

Dioecious trees or shrubs of New Zealand; similar in habit to Dacrydium.

- *Understanding "genus halocarpus" helps you talk about this topic clearly.*
- *They discussed "genus halocarpus" during the group presentation.*

---

genus halogeton *(noun)*

A caryophyllaceous genus of the family Chenopodiaceae.

- *The article explained what "genus halogeton" means with a simple example.*
- *In class, the teacher used "genus halogeton" to mean a caryophyllaceous genus of the family chenopodiaceae.*

---

genus hamamelidanthum *(noun)*

Genus of fossil plants of the Oligocene having flowers resembling those of the witch hazel; found in Baltic region.

- *She wrote a short paragraph that included "genus hamamelidanthum."*
- *Understanding "genus hamamelidanthum" helps you talk about this topic clearly.*

---

genus hamamelidoxylon *(noun)*

Genus of fossil plants having wood identical with or similar to that of the witch hazel.

- *They discussed "genus hamamelidoxylon" during the group presentation.*
- *She wrote a short paragraph that included "genus hamamelidoxylon."*

---

genus hamamelites *(noun)*

Genus of fossil plants having leaves similar to those of the witch hazel.

- *In class, the teacher used "genus hamamelites" to mean genus of fossil plants having leaves similar to....*
- *Understanding "genus hamamelites" helps you talk about this topic clearly.*

---

genus hamelia *(noun)*

Evergreen tropical American shrubs or small trees.

- *The article explained what "genus hamelia" means with a simple example.*
- *In class, the teacher used "genus hamelia" to mean evergreen tropical american shrubs or small trees.*

---

genus haplopappus *(noun)*

Genus of North and South American perennial herbs or shrubs with yellow flowers; in some classifications include species placed in other genera especially Hazardia.

- *They discussed "genus haplopappus" during the group presentation.*
- *The article explained what "genus haplopappus" means with a simple example.*

---

genus hardenbergia *(noun)*

Small genus of Australian woody vines with small violet flowers; closely related to genus Kennedia.

- *He looked up "genus hardenbergia" because he had never seen it before.*
- *In class, the teacher used "genus hardenbergia" to mean small genus of australian woody vines with small....*

---

genus harpullia *(noun)*

Genus of tropical Asiatic and African trees.

- *He looked up "genus harpullia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus harpullia."*

---

genus harrisia *(noun)*

Genus of slender often treelike spiny cacti with solitary showy nocturnal white or pink flowers; Florida and Caribbean to South America.

- *She wrote a short paragraph that included "genus harrisia."*
- *They discussed "genus harrisia" during the group presentation.*

---

genus hatiora *(noun)*

Small genus of South American epiphytic or lithophytic cacti.

- *Understanding "genus hatiora" helps you talk about this topic clearly.*

- *They discussed "genus hatiora" during the group presentation.*

genus hazardia *(noun)*

Small genus of shrubs and subshrubs of western United States having flowers that change color as they mature.

- *He looked up "genus hazardia" because he had never seen it before.*
- *Understanding "genus hazardia" helps you talk about this topic clearly.*

genus hedeoma *(noun)*

Small genus of American herbs (American pennyroyal).

- *They discussed "genus hedeoma" during the group presentation.*
- *He looked up "genus hedeoma" because he had never seen it before.*

genus heliamphora *(noun)*

Genus of pitcher plants of the Guiana Highlands in South America.

- *In class, the teacher used "genus heliamphora" to mean genus of pitcher plants of the guiana highlands in....*
- *Understanding "genus heliamphora" helps you talk about this topic clearly.*

genus helianthemum *(noun)*

Widely distributed evergreen or semi-evergreen shrublets; America; Europe and North Africa to Asia Minor and central Asia.

- *They discussed "genus helianthemum" during the group presentation.*
- *She wrote a short paragraph that included "genus helianthemum."*

genus helicteres *(noun)*

Genus of shrubs and small trees of tropical America and Asia having cylindrical fruits spirally twisted around one another.

- *He looked up "genus helicteres" because he had never seen it before.*
- *In class, the teacher used "genus helicteres" to mean genus of shrubs and small trees of tropical america....*

genus heliophila *(noun)*

Genus of South African flowering herbs and subshrubs.

- *She wrote a short paragraph that included "genus heliophila."*
- *He looked up "genus heliophila" because he had never seen it before.*

genus helipterum *(noun)*

Genus of South African and Australian herbs or shrubs grown as everlastings; the various Helipterum species are currently in process of being assigned to other genera especially genera Pteropogon and Hyalosperma.

- *The article explained what "genus helipterum" means with a simple example.*
- *They discussed "genus helipterum" during the group presentation.*

genus helminthostachys *(noun)*

One species: terrestrial fern of southeastern Asia and Australia.

- *The article explained what "genus helminthostachys" means with a simple example.*
- *Understanding "genus helminthostachys" helps you talk about this topic clearly.*

genus helotium *(noun)*

Type genus of the Helotiaceae.

- *The article explained what "genus helotium" means with a simple example.*
- *In class, the teacher used "genus helotium" to mean type genus of the helotiaceae.*

genus helvella *(noun)*

Type genus of the Helvellaceae.

- *She wrote a short paragraph that included "genus helvella."*
- *He looked up "genus helvella" because he had never seen it before.*

genus helwingia *(noun)*

Deciduous dioecious shrubs native to woodland thickets in low mountains in Japan.

- *In class, the teacher used "genus helwingia" to mean deciduous dioecious shrubs native to woodland....*
- *Understanding "genus helwingia" helps you talk about this topic clearly.*

genus helxine *(noun)*

One species; a dwarf creeping mat-forming evergreen herb.

- *She wrote a short paragraph that included "genus helxine."*
- *The article explained what "genus helxine" means with a simple example.*

genus heritiera *(noun)*

Small genus of timber trees of eastern Asia, Australasia and tropical Africa that form large buttresses.

- *They discussed "genus heritiera" during the group presentation.*
- *The article explained what "genus heritiera" means with a simple example.*

genus hermannia *(noun)*

Genus of African herbs and subshrubs having honey-scented bell-shaped flowers.

- *She wrote a short paragraph that included "genus hermannia."*
- *He looked up "genus hermannia" because he had never seen it before.*

genus hernaria *(noun)*

Low-growing Old World herbs with minute bright green leaves.

- *He looked up "genus hernaria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus hernaria."*

genus heteranthera *(noun)*

Mud plantains.

- *They discussed "genus heteranthera" during the group presentation.*
- *In class, the teacher used "genus heteranthera" to mean mud plantains.*

genus heteromeles *(noun)*

One species: toyon; in some classifications included in genus Photinia.

- *She wrote a short paragraph that included "genus heteromeles."*
- *They discussed "genus heteromeles" during the group presentation.*

genus heterotheca *(noun)*

Genus of yellow-flowered North American herbs.

- *Understanding "genus heterotheca" helps you talk about this topic clearly.*
- *They discussed "genus heterotheca" during the group presentation.*

genus hexalectris *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *In class, the teacher used "genus hexalectris" to mean a monocotyledonous genus of the family orchidaceae.*
- *They discussed "genus hexalectris" during the group presentation.*

genus hibbertia *(noun)*

Evergreen heathlike or scandent shrubs of Madagascar; Australasia; Polynesia.

- *He looked up "genus hibbertia" because he had never seen it before.*
- *They discussed "genus hibbertia" during the group presentation.*

genus himantoglossum *(noun)*

Small genus of terrestrial orchids of Europe and Mediterranean region.

- *Understanding "genus himantoglossum" helps you talk about this topic clearly.*
- *The article explained what "genus himantoglossum" means with a simple example.*

genus hippocrepis *(noun)*

Species of Old World herbs or subshrubs: horseshoe vetch.

- *He looked up "genus hippocrepis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus hippocrepis."*

genus hoheria *(noun)*

Small genus of shrubs and small trees of New Zealand: lacebarks.

- *In class, the teacher used "genus hoheria" to mean small genus of shrubs and small trees of new....*
- *The article explained what "genus hoheria" means with a simple example.*

---

genus holarrhena *(noun)*

Genus of deciduous trees and shrubs of tropical Africa and Asia.

- *In class, the teacher used "genus holarrhena" to mean genus of deciduous trees and shrubs of tropical....*
- *They discussed "genus holarrhena" during the group presentation.*

---

genus homogyne *(noun)*

Small genus of low perennial herbs of montane Europe; in some classifications included in genus Tussilago.

- *Understanding "genus homogyne" helps you talk about this topic clearly.*
- *The article explained what "genus homogyne" means with a simple example.*

---

genus horneophyton *(noun)*

Devonian fossil plant considered one of the earliest forms of vascular land plants; similar to genus Rhynia but smaller.

- *She wrote a short paragraph that included "genus horneophyton."*
- *He looked up "genus horneophyton" because he had never seen it before.*

---

genus hottonia *(noun)*

Aquatic herbs.

- *Understanding "genus hottonia" helps you talk about this topic clearly.*
- *The article explained what "genus hottonia" means with a simple example.*

---

genus houttuynia *(noun)*

One species; east Asian low-growing plant of wet places.

- *In class, the teacher used "genus houttuynia" to mean one species; east asian low-growing plant of wet places.*
- *He looked up "genus houttuynia" because he had never seen it before.*

---

genus hudsonia *(noun)*

Small evergreen subshrubs of North America.

- *The article explained what "genus hudsonia" means with a simple example.*
- *She wrote a short paragraph that included "genus hudsonia."*

---

genus hugueninia *(noun)*

One species: tansy-leaved rocket.

- *The article explained what "genus hugueninia" means with a simple example.*
- *She wrote a short paragraph that included "genus hugueninia."*

---

genus hulsea *(noun)*

Small genus of erect balsam-scented herbs; Pacific coast of the northwestern United States.

- *Understanding "genus hulsea" helps you talk about this topic clearly.*
- *In class, the teacher used "genus hulsea" to mean small genus of erect balsam-scented herbs; pacific....*

---

genus hunnemania *(noun)*

One species: golden cup.

- *In class, the teacher used "genus hunnemania" to mean one species: golden cup.*
- *They discussed "genus hunnemania" during the group presentation.*

---

genus hyacinthoides *(noun)*

Small genus of perennial bulbs of western Europe and North Africa; sometimes placed in family Hyacinthaceae.

- *He looked up "genus hyacinthoides" because he had never seen it before.*
- *They discussed "genus hyacinthoides" during the group presentation.*

---

genus hyalosperma *(noun)*

Genus of herbs of temperate Australia including some from genus Helipterum.

- *The article explained what "genus hyalosperma" means with a simple example.*

- *She wrote a short paragraph that included "genus hyalosperma."*

---

genus hybanthus *(noun)*

A genus of herbs and small shrubs with white or purple flowers; grows in tropical or subtropical regions.

- *In class, the teacher used "genus hybanthus" to mean a genus of herbs and small shrubs with white or....*
- *Understanding "genus hybanthus" helps you talk about this topic clearly.*

---

genus hydnocarpus *(noun)*

Medium to large Indonesian and Malaysian trees.

- *Understanding "genus hydnocarpus" helps you talk about this topic clearly.*
- *The article explained what "genus hydnocarpus" means with a simple example.*

---

genus hydnum *(noun)*

Type genus of Hydnaceae.

- *The article explained what "genus hydnum" means with a simple example.*
- *In class, the teacher used "genus hydnum" to mean type genus of hydnaceae.*

---

genus hydrastis *(noun)*

Small genus of perennial herbs having rhizomes and palmate leaves and small solitary flowers; of northeastern United States and Japan.

- *They discussed "genus hydrastis" during the group presentation.*
- *The article explained what "genus hydrastis" means with a simple example.*

---

genus hygrocybe *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *Understanding "genus hygrocybe" helps you talk about this topic clearly.*
- *In class, the teacher used "genus hygrocybe" to mean a genus of fungi belonging to the family hygrophoraceae.*

---

genus hygrophorus *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *He looked up "genus hygrophorus" because he had never seen it before.*
- *Understanding "genus hygrophorus" helps you talk about this topic clearly.*

---

genus hygrotrama *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *Understanding "genus hygrotrama" helps you talk about this topic clearly.*
- *He looked up "genus hygrotrama" because he had never seen it before.*

---

genus hylocereus *(noun)*

Genus of climbing or epiphytic tropical American cacti with angular stems and mostly white very fragrant flowers.

- *She wrote a short paragraph that included "genus hylocereus."*
- *They discussed "genus hylocereus" during the group presentation.*

---

genus hymenaea *(noun)*

Genus of tropical American timber trees.

- *Understanding "genus hymenaea" helps you talk about this topic clearly.*
- *The article explained what "genus hymenaea" means with a simple example.*

---

genus hymenanthera *(noun)*

A genus of slender evergreen shrubs; grow in Australia and New Zealand.

- *Understanding "genus hymenanthera" helps you talk about this topic clearly.*
- *They discussed "genus hymenanthera" during the group presentation.*

---

genus hymenophyllum *(noun)*

Type genus of the Hymenophyllaceae: filmy ferns.

- *The article explained what "genus hymenophyllum" means with a simple example.*
- *Understanding "genus hymenophyllum" helps you talk about this topic clearly.*

---

genus hypochaeris *(noun)*

Widely distributed genus of herbs with milky juice; includes some cosmopolitan weeds.

- *The article explained what "genus hypochaeris" means with a simple example.*
- *In class, the teacher used "genus hypochaeris" to mean widely distributed genus of herbs with milky juice;....*

genus hypochoeris *(noun)*

Widely distributed genus of herbs with milky juice; includes some cosmopolitan weeds.

- *They discussed "genus hypochoeris" during the group presentation.*
- *The article explained what "genus hypochoeris" means with a simple example.*

genus hypopitys *(noun)*

Term used in some classifications for the pinesaps, which are usually included in the genus Monotropa.

- *They discussed "genus hypopitys" during the group presentation.*
- *The article explained what "genus hypopitys" means with a simple example.*

genus hypoxis *(noun)*

Small plants that resemble amaryllis and that grow from a corm and bear flowers on a leafless stalk; sometimes classified as member of the family Amaryllidaceae: star grass.

- *He looked up "genus hypoxis" because he had never seen it before.*
- *They discussed "genus hypoxis" during the group presentation.*

genus hyssopus *(noun)*

Eurasian genus of perennial herbs or subshrubs.

- *In class, the teacher used "genus hyssopus" to mean eurasian genus of perennial herbs or subshrubs.*
- *They discussed "genus hyssopus" during the group presentation.*

genus iberis *(noun)*

Old World herbs and subshrubs: candytuft.

- *He looked up "genus iberis" because he had never seen it before.*
- *They discussed "genus iberis" during the group presentation.*

genus idesia *(noun)*

One species.

- *She wrote a short paragraph that included "genus idesia."*
- *Understanding "genus idesia" helps you talk about this topic clearly.*

genus illecebrum *(noun)*

One species: coral necklace.

- *In class, the teacher used "genus illecebrum" to mean one species: coral necklace.*
- *They discussed "genus illecebrum" during the group presentation.*

genus illicium *(noun)*

Anise trees: evergreen trees with aromatic leaves.

- *In class, the teacher used "genus illicium" to mean anise trees: evergreen trees with aromatic leaves.*
- *The article explained what "genus illicium" means with a simple example.*

genus iresine *(noun)*

Genus of tropical American herbs or subshrubs.

- *The article explained what "genus iresine" means with a simple example.*
- *In class, the teacher used "genus iresine" to mean genus of tropical american herbs or subshrubs.*

genus isatis *(noun)*

Old World genus of annual to perennial herbs: woad.

- *She wrote a short paragraph that included "genus isatis."*
- *Understanding "genus isatis" helps you talk about this topic clearly.*

genus isopyrum *(noun)*

Tufted perennial herbs of northern hemisphere.

- *In class, the teacher used "genus isopyrum" to mean tufted perennial herbs of northern hemisphere.*
- *He looked up "genus isopyrum" because he had never seen it before.*

---

genus jacksonia *(noun)*

Genus of yellow-flowered Australian unarmed or spiny shrubs without true leaves but having leaflike stems or branches.

- *She wrote a short paragraph that included "genus jacksonia."*
- *He looked up "genus jacksonia" because he had never seen it before.*

---

genus jacquinia *(noun)*

Sometimes placed in family Myrsinaceae.

- *The article explained what "genus jacquinia" means with a simple example.*
- *She wrote a short paragraph that included "genus jacquinia."*

---

genus jamesonia *(noun)*

Xerophytic ferns of South America.

- *They discussed "genus jamesonia" during the group presentation.*
- *She wrote a short paragraph that included "genus jamesonia."*

---

genus kennedia *(noun)*

Genus of Australian woody vines having showy red or purplish flowers.

- *They discussed "genus kennedia" during the group presentation.*
- *She wrote a short paragraph that included "genus kennedia."*

---

genus kennedya *(noun)*

Genus of Australian woody vines having showy red or purplish flowers.

- *The article explained what "genus kennedya" means with a simple example.*
- *They discussed "genus kennedya" during the group presentation.*

---

genus keteleeria *(noun)*

A genus of keteleeria.

- *The article explained what "genus keteleeria" means with a simple example.*
- *In class, the teacher used "genus keteleeria" to mean a genus of keteleeria.*

---

genus kiggelaria *(noun)*

Small genus of South African shrubs or small trees.

- *He looked up "genus kiggelaria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus kiggelaria."*

---

genus kirkia *(noun)*

Small genus of tropical South African trees and shrubs.

- *She wrote a short paragraph that included "genus kirkia."*
- *He looked up "genus kirkia" because he had never seen it before.*

---

genus knightia *(noun)*

Small genus of trees or shrubs of New Zealand and New Caledonia.

- *The article explained what "genus knightia" means with a simple example.*
- *They discussed "genus knightia" during the group presentation.*

---

genus kniphofia *(noun)*

Genus of showy clump-forming African herbs with grasslike leaves; sometimes placed in family Aloeaceae.

- *She wrote a short paragraph that included "genus kniphofia."*
- *Understanding "genus kniphofia" helps you talk about this topic clearly.*

---

genus koellia *(noun)*

American mountain mint.

- *She wrote a short paragraph that included "genus koellia."*
- *He looked up "genus koellia" because he had never seen it before.*

genus kohleria *(noun)*

Genus of tropical American shrubs.

- *The article explained what "genus kohleria" means with a simple example.*
- *They discussed "genus kohleria" during the group presentation.*

genus kolkwitzia *(noun)*

Chinese genus of 1 species: beauty bush.

- *She wrote a short paragraph that included "genus kolkwitzia."*
- *He looked up "genus kolkwitzia" because he had never seen it before.*

genus kosteletzya *(noun)*

Small genus of herbs of southeastern United States and tropical America and Africa.

- *They discussed "genus kosteletzya" during the group presentation.*
- *In class, the teacher used "genus kosteletzya" to mean small genus of herbs of southeastern united states....*

genus krigia *(noun)*

Small herbs closely related to chicory: dwarf dandelions.

- *The article explained what "genus krigia" means with a simple example.*
- *In class, the teacher used "genus krigia" to mean small herbs closely related to chicory: dwarf....*

genus laccopetalum *(noun)*

One species: giant buttercup.

- *He looked up "genus laccopetalum" because he had never seen it before.*
- *In class, the teacher used "genus laccopetalum" to mean one species: giant buttercup.*

genus lagarostrobus *(noun)*

Genus of dioecious evergreen trees of New Zealand and Tasmania; similar to genus Dacrydium.

- *Understanding "genus lagarostrobus" helps you talk about this topic clearly.*
- *He looked up "genus lagarostrobus" because he had never seen it before.*

genus lagenaria *(noun)*

Bottle gourds.

- *He looked up "genus lagenaria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus lagenaria."*

genus lagenophera *(noun)*

Small genus of herbs of Australia and South America having small solitary white or purple flowers similar to true daisies of genus Bellis.

- *Understanding "genus lagenophera" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus lagenophera."*

genus lagerstroemia *(noun)*

Shrubs or small trees of tropical Asia and Africa usually with showy white, pink, or purplish flowers.

- *She wrote a short paragraph that included "genus lagerstroemia."*
- *They discussed "genus lagerstroemia" during the group presentation.*

genus laguncularia *(noun)*

A genus of Laguncularia.

- *Understanding "genus laguncularia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus laguncularia" to mean a genus of laguncularia.*

genus lambertia *(noun)*

Small genus of Australian shrubs.

- *They discussed "genus lambertia" during the group presentation.*
- *In class, the teacher used "genus lambertia" to mean small genus of australian shrubs.*

genus languas *(noun)*

Perennial rhizomatous herbs of Asia and Australia and Polynesia having ginger-scented rhizomes.

- *They discussed "genus languas" during the group presentation.*
- *The article explained what "genus languas" means with a simple example.*

---

genus lansium *(noun)*

A dicotyledonous genus of the family Meliaceae.

- *She wrote a short paragraph that included "genus lansium."*
- *They discussed "genus lansium" during the group presentation.*

---

genus laportea *(noun)*

Mostly tropical stinging herbs or trees: nettle.

- *In class, the teacher used "genus laportea" to mean mostly tropical stinging herbs or trees: nettle.*
- *The article explained what "genus laportea" means with a simple example.*

---

genus lappula *(noun)*

Stickweed; beggar's lice.

- *The article explained what "genus lappula" means with a simple example.*
- *In class, the teacher used "genus lappula" to mean stickweed; beggar's lice.*

---

genus lardizabala *(noun)*

Evergreen monoecious climbers of South America having dark mauve-blue edible berries.

- *They discussed "genus lardizabala" during the group presentation.*
- *He looked up "genus lardizabala" because he had never seen it before.*

---

genus lasthenia *(noun)*

Small genus of herbs of Pacific coast of North and South America.

- *She wrote a short paragraph that included "genus lasthenia."*
- *Understanding "genus lasthenia" helps you talk about this topic clearly.*

---

genus lastreopsis *(noun)*

Tropical terrestrial shield ferns.

- *They discussed "genus lastreopsis" during the group presentation.*
- *Understanding "genus lastreopsis" helps you talk about this topic clearly.*

---

genus lavatera *(noun)*

Widespread genus of herbs or softwood arborescent shrubs cultivated for their showy flowers.

- *He looked up "genus lavatera" because he had never seen it before.*
- *They discussed "genus lavatera" during the group presentation.*

---

genus lecanopteris *(noun)*

Epiphytic ferns of southeastern Asia to New Guinea.

- *She wrote a short paragraph that included "genus lecanopteris."*
- *The article explained what "genus lecanopteris" means with a simple example.*

---

genus leccinum *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *He looked up "genus leccinum" because he had never seen it before.*
- *They discussed "genus leccinum" during the group presentation.*

---

genus leiophyllum *(noun)*

One species: sand myrtle.

- *In class, the teacher used "genus leiophyllum" to mean one species: sand myrtle.*
- *He looked up "genus leiophyllum" because he had never seen it before.*

---

genus leitneria *(noun)*

One species: corkwood.

- *They discussed "genus leitneria" during the group presentation.*

- *The article explained what "genus leitneria" means with a simple example.*

genus lemaireocereus *(noun)*

Tropical American cacti usually tall and branching with stout spines and funnel-shaped flowers and globular or ovoid often edible fruit.

- *She wrote a short paragraph that included "genus lemaireocereus."*
- *Understanding "genus lemaireocereus" helps you talk about this topic clearly.*

genus leonotis *(noun)*

Small genus of tropical herbs and subshrubs of South Africa.

- *The article explained what "genus leonotis" means with a simple example.*
- *They discussed "genus leonotis" during the group presentation.*

genus leonurus *(noun)*

Genus of stout Old World herbs having flowers in whorls.

- *She wrote a short paragraph that included "genus leonurus."*
- *Understanding "genus leonurus" helps you talk about this topic clearly.*

genus lepechinia *(noun)*

A dicotyledonous genus of the family Labiatae.

- *In class, the teacher used "genus lepechinia" to mean a dicotyledonous genus of the family labiatae.*
- *Understanding "genus lepechinia" helps you talk about this topic clearly.*

genus lepidobotrys *(noun)*

A genus of dicotyledonous trees belonging to the family Lepidobotryaceae.

- *In class, the teacher used "genus lepidobotrys" to mean a genus of dicotyledonous trees belonging to the....*
- *Understanding "genus lepidobotrys" helps you talk about this topic clearly.*

genus lepidothamnus *(noun)*

Small usually shrubby conifers.

- *The article explained what "genus lepidothamnus" means with a simple example.*
- *Understanding "genus lepidothamnus" helps you talk about this topic clearly.*

genus lepiota *(noun)*

Agarics with white spores that includes several edible and poisonous mushrooms: parasol mushrooms.

- *Understanding "genus lepiota" helps you talk about this topic clearly.*
- *The article explained what "genus lepiota" means with a simple example.*

genus leptarrhena *(noun)*

One species: leatherleaf saxifrage.

- *In class, the teacher used "genus leptarrhena" to mean one species: leatherleaf saxifrage.*
- *He looked up "genus leptarrhena" because he had never seen it before.*

genus leptopteris *(noun)*

Including some ferns sometimes placed in genus Todea.

- *She wrote a short paragraph that included "genus leptopteris."*
- *They discussed "genus leptopteris" during the group presentation.*

genus lesquerella *(noun)*

Genus of low-growing hairy herbs: bladderpods.

- *The article explained what "genus lesquerella" means with a simple example.*
- *In class, the teacher used "genus lesquerella" to mean genus of low-growing hairy herbs: bladderpods.*

genus leucadendron *(noun)*

Large genus of evergreen trees and shrubs having silvery white leaves and solitary terminal flowers with conspicuous silvery bracts.

- *He looked up "genus leucadendron" because he had never seen it before.*
- *They discussed "genus leucadendron" during the group presentation.*

genus leucanthemum *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *In class, the teacher used "genus leucanthemum" to mean comprises plants often included in the genus....*
- *The article explained what "genus leucanthemum" means with a simple example.*

genus leucogenes *(noun)*

New Zealand edelweiss.

- *In class, the teacher used "genus leucogenes" to mean new zealand edelweiss.*
- *The article explained what "genus leucogenes" means with a simple example.*

genus leucothoe *(noun)*

American and Asiatic deciduous and evergreen shrubs.

- *He looked up "genus leucothoe" because he had never seen it before.*
- *They discussed "genus leucothoe" during the group presentation.*

genus levisticum *(noun)*

Genus of aromatic European herbs with yellow flowers.

- *The article explained what "genus levisticum" means with a simple example.*
- *In class, the teacher used "genus levisticum" to mean genus of aromatic european herbs with yellow flowers.*

genus lewisia *(noun)*

Genus of western North American low-growing herbs having linear woolly leaves and large pink flowers.

- *Understanding "genus lewisia" helps you talk about this topic clearly.*
- *The article explained what "genus lewisia" means with a simple example.*

genus leycesteria *(noun)*

Small species of shrubs of western Himalayas to China.

- *He looked up "genus leycesteria" because he had never seen it before.*
- *They discussed "genus leycesteria" during the group presentation.*

genus leymus *(noun)*

Genus that in some classifications overlaps the genus Elymus.

- *She wrote a short paragraph that included "genus leymus."*
- *They discussed "genus leymus" during the group presentation.*

genus libocedrus *(noun)*

Cypresses that resemble cedars.

- *Understanding "genus libocedrus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus libocedrus."*

genus ligularia *(noun)*

Genus of Old World herbs resembling groundsel: leopard plants.

- *Understanding "genus ligularia" helps you talk about this topic clearly.*
- *They discussed "genus ligularia" during the group presentation.*

genus limnobium *(noun)*

American frogbit.

- *Understanding "genus limnobium" helps you talk about this topic clearly.*
- *In class, the teacher used "genus limnobium" to mean american frogbit.*

genus linanthus *(noun)*

A genus of herbs of the family Polemoniaceae; found in western United States.

- *In class, the teacher used "genus linanthus" to mean a genus of herbs of the family polemoniaceae; found....*
- *Understanding "genus linanthus" helps you talk about this topic clearly.*

genus lindera *(noun)*

Aromatic evergreen or deciduous dioecious shrubs or trees of eastern Asia and North America.

- *They discussed "genus lindera" during the group presentation.*
- *In class, the teacher used "genus lindera" to mean aromatic evergreen or deciduous dioecious shrubs or....*

---

genus lindheimera *(noun)*

One species: Texas star.

- *He looked up "genus lindheimera" because he had never seen it before.*
- *In class, the teacher used "genus lindheimera" to mean one species: texas star.*

---

genus listera *(noun)*

Genus of terrestrial orchids having usually a single pair of broad shining leaves near the middle of the stem; found in temperate Asia and North America and Europe.

- *Understanding "genus listera" helps you talk about this topic clearly.*
- *He looked up "genus listera" because he had never seen it before.*

---

genus lithocarpus *(noun)*

Tanbark oaks.

- *In class, the teacher used "genus lithocarpus" to mean tanbark oaks.*
- *The article explained what "genus lithocarpus" means with a simple example.*

---

genus lithophragma *(noun)*

Small genus of perennial herbs of the western North America.

- *He looked up "genus lithophragma" because he had never seen it before.*
- *She wrote a short paragraph that included "genus lithophragma."*

---

genus lithospermum *(noun)*

Annual or perennial herbaceous or shrubby plants; cosmopolitan except Australia.

- *The article explained what "genus lithospermum" means with a simple example.*
- *In class, the teacher used "genus lithospermum" to mean annual or perennial herbaceous or shrubby plants;....*

---

genus livistona *(noun)*

Fan palms of Asia and Australia and Malaysia.

- *The article explained what "genus livistona" means with a simple example.*
- *Understanding "genus livistona" helps you talk about this topic clearly.*

---

genus loasa *(noun)*

Genus of tropical American prickly herbs or subshrubs.

- *Understanding "genus loasa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus loasa."*

---

genus lobularia *(noun)*

Sweet alyssum.

- *The article explained what "genus lobularia" means with a simple example.*
- *Understanding "genus lobularia" helps you talk about this topic clearly.*

---

genus logania *(noun)*

Type genus of the Loganiaceae; Australian and New Zealand shrubs sometimes cultivated for their flowers.

- *She wrote a short paragraph that included "genus logania."*
- *They discussed "genus logania" during the group presentation.*

---

genus loiseleuria *(noun)*

One species: alpine azalea.

- *Understanding "genus loiseleuria" helps you talk about this topic clearly.*
- *In class, the teacher used "genus loiseleuria" to mean one species: alpine azalea.*

---

genus lomatia *(noun)*

Small genus of low-growing evergreens of Chile and Australia; some yield dyes.

- *She wrote a short paragraph that included "genus lomatia."*
- *Understanding "genus lomatia" helps you talk about this topic clearly.*

genus lomogramma *(noun)*

Large scandent ferns of southeastern Asia.

- *Understanding "genus lomogramma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus lomogramma."*

genus lonas *(noun)*

One species: yellow ageratum.

- *The article explained what "genus lonas" means with a simple example.*
- *In class, the teacher used "genus lonas" to mean one species: yellow ageratum.*

genus lonchocarpus *(noun)*

Genus of chiefly tropical American shrubs and trees having pinnate leaves and red or white flowers.

- *The article explained what "genus lonchocarpus" means with a simple example.*
- *They discussed "genus lonchocarpus" during the group presentation.*

genus lophosoria *(noun)*

One species: tree fern of Central and South America.

- *He looked up "genus lophosoria" because he had never seen it before.*
- *They discussed "genus lophosoria" during the group presentation.*

genus loranthus *(noun)*

Type genus of the Loranthaceae: 1 species.

- *He looked up "genus loranthus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus loranthus."*

genus lovoa *(noun)*

Genus of African timber trees.

- *She wrote a short paragraph that included "genus lovoa."*
- *He looked up "genus lovoa" because he had never seen it before.*

genus loxoma *(noun)*

One species of terrestrial ferns of New Zealand.

- *He looked up "genus loxoma" because he had never seen it before.*
- *Understanding "genus loxoma" helps you talk about this topic clearly.*

genus lycoperdon *(noun)*

Genus of fungi whose fruiting body tapers toward a base consisting of spongy mycelium.

- *The article explained what "genus lycoperdon" means with a simple example.*
- *They discussed "genus lycoperdon" during the group presentation.*

genus lycopus *(noun)*

Small genus of herbs of the mint family.

- *They discussed "genus lycopus" during the group presentation.*
- *He looked up "genus lycopus" because he had never seen it before.*

genus lyginopteris *(noun)*

Genus of fossil seed ferns of the Carboniferous.

- *The article explained what "genus lyginopteris" means with a simple example.*
- *In class, the teacher used "genus lyginopteris" to mean genus of fossil seed ferns of the carboniferous.*

genus lygodium *(noun)*

Chiefly tropical climbing ferns.

- *In class, the teacher used "genus lygodium" to mean chiefly tropical climbing ferns.*
- *He looked up "genus lygodium" because he had never seen it before.*

genus lyonia *(noun)*

Evergreen or deciduous shrubs or small trees of United States to Antilles and eastern Asia to the Himalaya.

- *In class, the teacher used "genus lyonia" to mean evergreen or deciduous shrubs or small trees of....*
- *Understanding "genus lyonia" helps you talk about this topic clearly.*

---

genus lysichiton *(noun)*

Skunk cabbage.

- *He looked up "genus lysichiton" because he had never seen it before.*
- *In class, the teacher used "genus lysichiton" to mean skunk cabbage.*

---

genus lysichitum *(noun)*

Skunk cabbage.

- *The article explained what "genus lysichitum" means with a simple example.*
- *She wrote a short paragraph that included "genus lysichitum."*

---

genus lysiloma *(noun)*

Small genus of tropical American trees and shrubs with pinnate leaves and flat straight pods.

- *In class, the teacher used "genus lysiloma" to mean small genus of tropical american trees and shrubs....*
- *He looked up "genus lysiloma" because he had never seen it before.*

---

genus machaeranthera *(noun)*

Wildflowers of western North America.

- *He looked up "genus machaeranthera" because he had never seen it before.*
- *She wrote a short paragraph that included "genus machaeranthera."*

---

genus macleaya *(noun)*

A perennial herb of eastern Asia: plume poppy.

- *The article explained what "genus macleaya" means with a simple example.*
- *She wrote a short paragraph that included "genus macleaya."*

---

genus maclura *(noun)*

Yellowwood trees or shrubs.

- *They discussed "genus maclura" during the group presentation.*
- *She wrote a short paragraph that included "genus maclura."*

---

genus macowanites *(noun)*

A stout-stemmed genus of fungus belonging to the family Secotiaceae having fruiting bodies that never expand completely.

- *They discussed "genus macowanites" during the group presentation.*
- *Understanding "genus macowanites" helps you talk about this topic clearly.*

---

genus macrothelypteris *(noun)*

Medium to large terrestrial ferns of tropical Asia to Polynesia and Australia; naturalized in Americas.

- *They discussed "genus macrothelypteris" during the group presentation.*
- *He looked up "genus macrothelypteris" because he had never seen it before.*

---

genus macrotyloma *(noun)*

Annual or perennial vines of Africa and India and Australia; plants often placed in genus Dolichos.

- *In class, the teacher used "genus macrotyloma" to mean annual or perennial vines of africa and india and....*
- *Understanding "genus macrotyloma" helps you talk about this topic clearly.*

---

genus macrozamia *(noun)*

Genus of large evergreen Australian cycads; sometimes classified in family Cycadaceae.

- *In class, the teacher used "genus macrozamia" to mean genus of large evergreen australian cycads;....*
- *They discussed "genus macrozamia" during the group presentation.*

---

genus maianthemum *(noun)*

Sometimes placed in family Convallariaceae: false lily of the valley.

- *In class, the teacher used "genus maianthemum" to mean sometimes placed in family convallariaceae: false....*

- *He looked up “genus maianthemum” because he had never seen it before.*

---

genus malacothamnus *(noun)*

Genus of shrubs or small trees: chaparral mallow.

- *They discussed “genus malacothamnus” during the group presentation.*
- *Understanding “genus malacothamnus” helps you talk about this topic clearly.*

---

genus malaxis *(noun)*

Large genus of largely terrestrial orchids with one or a few plicate leaves and slender spikes or tiny mostly green flowers; cosmopolitan.

- *The article explained what “genus malaxis” means with a simple example.*
- *In class, the teacher used “genus malaxis” to mean large genus of largely terrestrial orchids with one....*

---

genus malcolmia *(noun)*

Genus of plants usually found in coastal habitats; Mediterranean to Afghanistan.

- *The article explained what “genus malcolmia” means with a simple example.*
- *In class, the teacher used “genus malcolmia” to mean genus of plants usually found in coastal habitats;....*

---

genus malope *(noun)*

Small genus of chiefly European herbs.

- *He looked up “genus malope” because he had never seen it before.*
- *They discussed “genus malope” during the group presentation.*

---

genus malosma *(noun)*

One species; often included in the genus Rhus.

- *He looked up “genus malosma” because he had never seen it before.*
- *Understanding “genus malosma” helps you talk about this topic clearly.*

---

genus malpighia *(noun)*

Type genus of the Malpighiaceae.

- *In class, the teacher used “genus malpighia” to mean type genus of the malpighiaceae.*
- *They discussed “genus malpighia” during the group presentation.*

---

genus malvastrum *(noun)*

Genus of mallows characterized by red and yellow flowers often placed in other genera.

- *He looked up “genus malvastrum” because he had never seen it before.*
- *She wrote a short paragraph that included “genus malvastrum.”*

---

genus malvaviscus *(noun)*

Small genus of shrubs of Central and South America: wax mallows.

- *In class, the teacher used “genus malvaviscus” to mean small genus of shrubs of central and south america:....*
- *The article explained what “genus malvaviscus” means with a simple example.*

---

genus mammea *(noun)*

American and Asiatic trees having edible one-seeded fruit.

- *In class, the teacher used “genus mammea” to mean american and asiatic trees having edible one-seeded....*
- *Understanding “genus mammea” helps you talk about this topic clearly.*

---

genus mandevilla *(noun)*

Genus of tropical South American tuberous perennial woody vines with large racemose flowers and milky sap.

- *They discussed “genus mandevilla” during the group presentation.*
- *He looked up “genus mandevilla” because he had never seen it before.*

---

genus manglietia *(noun)*

A genus of flowering tree of the family Magnoliaceae found from Malay to southern China.

- *The article explained what “genus manglietia” means with a simple example.*
- *In class, the teacher used “genus manglietia” to mean a genus of flowering tree of the family....*

---

genus manilkara *(noun)*

Genus of large evergreen trees with milky latex; pantropical.

- *He looked up "genus manilkara" because he had never seen it before.*
- *In class, the teacher used "genus manilkara" to mean genus of large evergreen trees with milky latex;....*

---

genus marasmius *(noun)*

Chiefly small mushrooms with white spores.

- *Understanding "genus marasmius" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus marasmius."*

---

genus marattia *(noun)*

Type genus of the Marattiaceae: ferns having the sporangia fused together in two rows.

- *She wrote a short paragraph that included "genus marattia."*
- *They discussed "genus marattia" during the group presentation.*

---

genus marrubium *(noun)*

Old World aromatic herbs: horehound.

- *He looked up "genus marrubium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus marrubium."*

---

genus marsilea *(noun)*

Clover ferns.

- *Understanding "genus marsilea" helps you talk about this topic clearly.*
- *He looked up "genus marsilea" because he had never seen it before.*

---

genus martynia *(noun)*

In some classifications includes the unicorn plants.

- *She wrote a short paragraph that included "genus martynia."*
- *The article explained what "genus martynia" means with a simple example.*

---

genus masdevallia *(noun)*

Large genus of tropical American mostly epiphytic orchids whose flowers have sepals fused at the base forming a tube; includes orchids sometimes placed in genera Dracula and Dryadella and Scaphosepalum.

- *They discussed "genus masdevallia" during the group presentation.*
- *In class, the teacher used "genus masdevallia" to mean large genus of tropical american mostly epiphytic....*

---

genus matteuccia *(noun)*

Small genus sometimes included in genus Onoclea; in some classifications both genera are placed in Polypodiaceae.

- *Understanding "genus matteuccia" helps you talk about this topic clearly.*
- *He looked up "genus matteuccia" because he had never seen it before.*

---

genus matthiola *(noun)*

Genus of Old World plants grown as ornamentals.

- *They discussed "genus matthiola" during the group presentation.*
- *He looked up "genus matthiola" because he had never seen it before.*

---

genus maxillaria *(noun)*

Large genus of tropical American epiphytic orchids with persistent leathery leaves and single-flowered scapes.

- *In class, the teacher used "genus maxillaria" to mean large genus of tropical american epiphytic orchids....*
- *They discussed "genus maxillaria" during the group presentation.*

---

genus mayaca *(noun)*

Small genus of delicate mossy bog plants having white or violet flowers.

- *He looked up "genus mayaca" because he had never seen it before.*
- *She wrote a short paragraph that included "genus mayaca."*

---

genus medinilla *(noun)*

Tropical Old World ornamental evergreen shrubs having fleshy leaves and large panicles of white pink flowers.

- *The article explained what “genus medinilla” means with a simple example.*
- *In class, the teacher used “genus medinilla” to mean tropical old world ornamental evergreen shrubs....*

---

genus melampodium *(noun)*

Herbs and subshrubs of warm North America.

- *He looked up “genus melampodium” because he had never seen it before.*
- *They discussed “genus melampodium” during the group presentation.*

---

genus melampsora *(noun)*

Rusts having sessile one-celled teliospores in a single layer.

- *She wrote a short paragraph that included “genus melampsora.”*
- *Understanding “genus melampsora” helps you talk about this topic clearly.*

---

genus melastoma *(noun)*

Type genus of Melastomataceae; Asiatic shrubs with leathery leaves and large purple flowers followed by edible fleshy black berries.

- *They discussed “genus melastoma” during the group presentation.*
- *He looked up “genus melastoma” because he had never seen it before.*

---

genus melicocca *(noun)*

Tropical American trees and shrubs bearing berries.

- *In class, the teacher used “genus melicocca” to mean tropical american trees and shrubs bearing berries.*
- *The article explained what “genus melicocca” means with a simple example.*

---

genus melicoccus *(noun)*

Tropical American trees and shrubs bearing berries.

- *The article explained what “genus melicoccus” means with a simple example.*
- *In class, the teacher used “genus melicoccus” to mean tropical american trees and shrubs bearing berries.*

---

genus melicytus *(noun)*

A genus of deciduous shrubs or trees; fruit is a berry; grow in New Zealand and Fiji and Solomon Islands.

- *The article explained what “genus melicytus” means with a simple example.*
- *In class, the teacher used “genus melicytus” to mean a genus of deciduous shrubs or trees; fruit is a....*

---

genus melocactus *(noun)*

Genus of strongly ribbed globose or spheroid cacti of tropical South and Central America and the Caribbean.

- *In class, the teacher used “genus melocactus” to mean genus of strongly ribbed globose or spheroid cacti....*
- *Understanding “genus melocactus” helps you talk about this topic clearly.*

---

genus meniscium *(noun)*

Terrestrial ferns of tropical Americas.

- *In class, the teacher used “genus meniscium” to mean terrestrial ferns of tropical americas.*
- *They discussed “genus meniscium” during the group presentation.*

---

genus menispermum *(noun)*

Climbing herbs.

- *He looked up “genus menispermum” because he had never seen it before.*
- *She wrote a short paragraph that included “genus menispermum.”*

---

genus mentzelia *(noun)*

Genus of bristly herbs or subshrubs of western America lacking stinging hairs.

- *They discussed “genus mentzelia” during the group presentation.*
- *Understanding “genus mentzelia” helps you talk about this topic clearly.*

---

genus menyanthes *(noun)*

The type genus of the Menyanthaceae; one species: bogbeans.

- *In class, the teacher used “genus menyanthes” to mean the type genus of the menyanthaceae; one species:....*
- *He looked up “genus menyanthes” because he had never seen it before.*

genus menziesia *(noun)*

Deciduous shrubs of North America and eastern Asia.

- *She wrote a short paragraph that included "genus menziesia."*
- *He looked up "genus menziesia" because he had never seen it before.*

genus mercurialis *(noun)*

A genus of slender herbs belonging to the family Euphorbiaceae.

- *He looked up "genus mercurialis" because he had never seen it before.*
- *In class, the teacher used "genus mercurialis" to mean a genus of slender herbs belonging to the family....*

genus mertensia *(noun)*

A genus of herbs belonging to the family Boraginaceae that grow in temperate regions and have blue or purple flowers shaped like funnels.

- *He looked up "genus mertensia" because he had never seen it before.*
- *They discussed "genus mertensia" during the group presentation.*

genus meryta *(noun)*

Small to medium evergreen dioecious trees of oceanic climates: puka.

- *In class, the teacher used "genus meryta" to mean small to medium evergreen dioecious trees of....*
- *The article explained what "genus meryta" means with a simple example.*

genus mesua *(noun)*

Genus of tropical Asiatic trees having large solitary flowers.

- *She wrote a short paragraph that included "genus mesua."*
- *The article explained what "genus mesua" means with a simple example.*

genus metroxylon *(noun)*

A genus of Malayan pinnate-leaved palm trees that flower and fruit once and then die.

- *She wrote a short paragraph that included "genus metroxylon."*
- *They discussed "genus metroxylon" during the group presentation.*

genus microgramma *(noun)*

Epiphytic ferns of tropical America and Africa.

- *They discussed "genus microgramma" during the group presentation.*
- *The article explained what "genus microgramma" means with a simple example.*

genus micromeria *(noun)*

Large genus of fragrant chiefly Old World herbs.

- *He looked up "genus micromeria" because he had never seen it before.*
- *In class, the teacher used "genus micromeria" to mean large genus of fragrant chiefly old world herbs.*

genus microsorium *(noun)*

Tropical usually epiphytic ferns; Africa to Asia and Polynesia to Australia.

- *They discussed "genus microsorium" during the group presentation.*
- *Understanding "genus microsorium" helps you talk about this topic clearly.*

genus microstrobos *(noun)*

2 species of small evergreen shrubs of Australia and Tasmania.

- *In class, the teacher used "genus microstrobos" to mean 2 species of small evergreen shrubs of australia....*
- *The article explained what "genus microstrobos" means with a simple example.*

genus mikania *(noun)*

Large genus of evergreen lianas of tropical America.

- *In class, the teacher used "genus mikania" to mean large genus of evergreen lianas of tropical america.*
- *They discussed "genus mikania" during the group presentation.*

genus millettia *(noun)*

Genus of trees and shrubs of the Old World tropics.

- *She wrote a short paragraph that included "genus millettia."*
- *He looked up "genus millettia" because he had never seen it before.*

---

genus miltonia *(noun)*

Genus of tropical American orchids.

- *They discussed "genus miltonia" during the group presentation.*
- *She wrote a short paragraph that included "genus miltonia."*

---

genus minuartia *(noun)*

Mostly perennial herbs of northern hemisphere often with mat-forming habit; most often placed in genus Arenaria: sandworts.

- *In class, the teacher used "genus minuartia" to mean mostly perennial herbs of northern hemisphere often....*
- *They discussed "genus minuartia" during the group presentation.*

---

genus mitchella *(noun)*

Creeping evergreen herbs of North America.

- *She wrote a short paragraph that included "genus mitchella."*
- *He looked up "genus mitchella" because he had never seen it before.*

---

genus mitella *(noun)*

Genus of low slender herbs of North America and northeastern Asia having flowers with trifid or pinnatifid petals.

- *Understanding "genus mitella" helps you talk about this topic clearly.*
- *They discussed "genus mitella" during the group presentation.*

---

genus mnium *(noun)*

Mosses similar to those of genus Bryum but larger.

- *In class, the teacher used "genus mnium" to mean mosses similar to those of genus bryum but larger.*
- *They discussed "genus mnium" during the group presentation.*

---

genus moehringia *(noun)*

Low-growing herbs widely distributed in temperate and Arctic northern hemisphere: sandworts; distinguished from members of the genus Arenaria mainly by having four-petaled rather than five-petaled flowers.

- *They discussed "genus moehringia" during the group presentation.*
- *Understanding "genus moehringia" helps you talk about this topic clearly.*

---

genus mohria *(noun)*

African terrestrial ferns.

- *In class, the teacher used "genus mohria" to mean african terrestrial ferns.*
- *They discussed "genus mohria" during the group presentation.*

---

genus molluga *(noun)*

Carpetweeds.

- *They discussed "genus molluga" during the group presentation.*
- *He looked up "genus molluga" because he had never seen it before.*

---

genus molucella *(noun)*

Small genus of aromatic herbs of Mediterranean regions; widely cultivated.

- *In class, the teacher used "genus molucella" to mean small genus of aromatic herbs of mediterranean....*
- *The article explained what "genus molucella" means with a simple example.*

---

genus monardella *(noun)*

A genus of fragrant herbs of the family Labiatae in the western United States.

- *She wrote a short paragraph that included "genus monardella."*
- *He looked up "genus monardella" because he had never seen it before.*

---

genus moneses *(noun)*

One species: one-flowered wintergreen; sometimes included in genus Pyrola.

- *Understanding "genus moneses" helps you talk about this topic clearly.*

- *In class, the teacher used “genus moneses” to mean one species: one-flowered wintergreen; sometimes....*

---

genus monilia *(noun)*

Genus of parasitic yeastlike imperfect fungi having spherical or oval conidia in branched chains; some species usually placed in other genera especially genus Candida.

- *The article explained what “genus monilia” means with a simple example.*
- *Understanding “genus monilia” helps you talk about this topic clearly.*

---

genus monotropa *(noun)*

Leafless fleshy saprophytic plants; in some classifications placed in the family Pyrolaceae.

- *The article explained what “genus monotropa” means with a simple example.*
- *In class, the teacher used “genus monotropa” to mean leafless fleshy saprophytic plants; in some....*

---

genus montia *(noun)*

Small genus of densely tufted annual herbs; north temperate regions and South America and tropical Africa and Asia.

- *Understanding “genus montia” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus montia.”*

---

genus muntingia *(noun)*

One species: Jamaican cherry; sometimes placed in family Flacourtiaceae.

- *Understanding “genus muntingia” helps you talk about this topic clearly.*
- *In class, the teacher used “genus muntingia” to mean one species: jamaican cherry; sometimes placed in....*

---

genus mutinus *(noun)*

A genus of fungi belonging to the family Phallaceae.

- *They discussed “genus mutinus” during the group presentation.*
- *Understanding “genus mutinus” helps you talk about this topic clearly.*

---

genus mutisia *(noun)*

Genus of South American shrubs or lianas having large flower heads with feathery pappuses.

- *He looked up “genus mutisia” because he had never seen it before.*
- *In class, the teacher used “genus mutisia” to mean genus of south american shrubs or lianas having....*

---

genus myrciaria *(noun)*

A genus of tropical American trees and shrubs of the myrtle family.

- *The article explained what “genus myrciaria” means with a simple example.*
- *In class, the teacher used “genus myrciaria” to mean a genus of tropical american trees and shrubs of....*

---

genus myricaria *(noun)*

Small genus of deciduous shrubs or subshrubs of southern Europe to Siberia and China; tolerant of chalky soil.

- *The article explained what “genus myricaria” means with a simple example.*
- *In class, the teacher used “genus myricaria” to mean small genus of deciduous shrubs or subshrubs of....*

---

genus myroxylon *(noun)*

A genus of tropical American trees having pinnate leaves and white flowers.

- *She wrote a short paragraph that included “genus myroxylon.”*
- *He looked up “genus myroxylon” because he had never seen it before.*

---

genus myrrhis *(noun)*

European perennial herbs having pinnate leaves and umbels of white flowers.

- *He looked up “genus myrrhis” because he had never seen it before.*
- *She wrote a short paragraph that included “genus myrrhis.”*

---

genus myrsine *(noun)*

Evergreen trees and shrubs having aromatic foliage; Africa; Asia (New Zealand).

- *The article explained what “genus myrsine” means with a simple example.*
- *Understanding “genus myrsine” helps you talk about this topic clearly.*

---

genus myrtillocactus *(noun)*

Small genus of arborescent cacti of Mexico and Central America.

- *She wrote a short paragraph that included "genus myrtillocactus."*
- *He looked up "genus myrtillocactus" because he had never seen it before.*

---

genus nabalus *(noun)*

Genus of North American and east Asian perennial herbs; sometimes included in genus Prenanthes.

- *In class, the teacher used "genus nabalus" to mean genus of north american and east asian perennial....*
- *Understanding "genus nabalus" helps you talk about this topic clearly.*

---

genus nageia *(noun)*

Small genus of Asian evergreen trees having columnar crowns and distinguished by leaves lacking a midrib; eastern Asia including India and Philippines and New Guinea.

- *The article explained what "genus nageia" means with a simple example.*
- *In class, the teacher used "genus nageia" to mean small genus of asian evergreen trees having....*

---

genus napaea *(noun)*

One species: glade mallow.

- *He looked up "genus napaea" because he had never seen it before.*
- *In class, the teacher used "genus napaea" to mean one species: glade mallow.*

---

genus narthecium *(noun)*

Bog asphodels; sometimes placed in family Melanthiaceae.

- *In class, the teacher used "genus narthecium" to mean bog asphodels; sometimes placed in family melanthiaceae.*
- *Understanding "genus narthecium" helps you talk about this topic clearly.*

---

genus nauclea *(noun)*

Small genus of evergreen tropical shrubs or trees with smooth leathery leaves.

- *They discussed "genus nauclea" during the group presentation.*
- *Understanding "genus nauclea" helps you talk about this topic clearly.*

---

genus nemophila *(noun)*

Genus of ornamental chiefly California herbs: baby blue-eyes.

- *They discussed "genus nemophila" during the group presentation.*
- *The article explained what "genus nemophila" means with a simple example.*

---

genus neohygrophorus *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *Understanding "genus neohygrophorus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus neohygrophorus."*

---

genus neolentinus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *In class, the teacher used "genus neolentinus" to mean a genus of fungi belonging to the family polyporaceae.*
- *He looked up "genus neolentinus" because he had never seen it before.*

---

genus nephelium *(noun)*

A genus of dicotyledonous trees of the family Sapindaceae that are native to Asia and Australia.

- *The article explained what "genus nephelium" means with a simple example.*
- *They discussed "genus nephelium" during the group presentation.*

---

genus nephrolepis *(noun)*

Small genus of tropical ferns; sometimes placed in Polypodiaceae.

- *She wrote a short paragraph that included "genus nephrolepis."*
- *Understanding "genus nephrolepis" helps you talk about this topic clearly.*

---

genus nephthytis *(noun)*

Small genus of tropical western African creeping or twining herbs.

- *Understanding "genus nephthytis" helps you talk about this topic clearly.*
- *They discussed "genus nephthytis" during the group presentation.*

---

genus nicandra *(noun)*

Sturdy annual of Peru.

- *In class, the teacher used "genus nicandra" to mean sturdy annual of peru.*
- *Understanding "genus nicandra" helps you talk about this topic clearly.*

---

genus nidularia *(noun)*

Type genus of the Nidulariaceae.

- *She wrote a short paragraph that included "genus nidularia."*
- *Understanding "genus nidularia" helps you talk about this topic clearly.*

---

genus nierembergia *(noun)*

Genus of tropical American erect or creeping herbs with solitary flowers.

- *In class, the teacher used "genus nierembergia" to mean genus of tropical american erect or creeping herbs....*
- *The article explained what "genus nierembergia" means with a simple example.*

---

genus nigroporus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *He looked up "genus nigroporus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus nigroporus."*

---

genus nolina *(noun)*

Perennial plants resembling yucca; found in southern United States and Mexico.

- *She wrote a short paragraph that included "genus nolina."*
- *They discussed "genus nolina" during the group presentation.*

---

genus nopalea *(noun)*

A genus of the cactus family with scarlet flowers.

- *In class, the teacher used "genus nopalea" to mean a genus of the cactus family with scarlet flowers.*
- *The article explained what "genus nopalea" means with a simple example.*

---

genus nuytsia *(noun)*

One species.

- *The article explained what "genus nuytsia" means with a simple example.*
- *In class, the teacher used "genus nuytsia" to mean one species.*

---

genus nyctaginia *(noun)*

A caryophyllaceous genus of the family Nyctaginaceae having only one species.

- *The article explained what "genus nyctaginia" means with a simple example.*
- *In class, the teacher used "genus nyctaginia" to mean a caryophyllaceous genus of the family....*

---

genus ochna *(noun)*

Type genus of Ochnaceae; evergreen trees and shrubs of Old World tropics.

- *She wrote a short paragraph that included "genus ochna."*
- *They discussed "genus ochna" during the group presentation.*

---

genus ochroma *(noun)*

One species: balsa.

- *The article explained what "genus ochroma" means with a simple example.*
- *Understanding "genus ochroma" helps you talk about this topic clearly.*

---

genus oleandra *(noun)*

Or family Polypodiaceae: tropical epiphytic or terrestrial ferns.

- *In class, the teacher used "genus oleandra" to mean or family polypodiaceae: tropical epiphytic or....*
- *The article explained what "genus oleandra" means with a simple example.*

genus olfersia *(noun)*

Genus of fern having only one species.

- *The article explained what "genus olfersia" means with a simple example.*
- *In class, the teacher used "genus olfersia" to mean genus of fern having only one species.*

genus oligoporus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *They discussed "genus oligoporus" during the group presentation.*
- *The article explained what "genus oligoporus" means with a simple example.*

genus omphalotus *(noun)*

A genus of fungi with a depressed disc in the cap.

- *He looked up "genus omphalotus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus omphalotus."*

genus onobrychis *(noun)*

Genus of Old World herbs having pinnate leaves and pink or whites racemose flowers followed by flat unjointed pods.

- *He looked up "genus onobrychis" because he had never seen it before.*
- *They discussed "genus onobrychis" during the group presentation.*

genus onoclea *(noun)*

One species: sensitive fern; in some classifications included in Polypodiaceae.

- *She wrote a short paragraph that included "genus onoclea."*
- *He looked up "genus onoclea" because he had never seen it before.*

genus ononis *(noun)*

Genus of European subshrubs or herbs having pink or purple or yellow solitary or clustered flowers: restharrow.

- *He looked up "genus ononis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus ononis."*

genus onopordon *(noun)*

A genus of Eurasian herbs of the family Compositae with prickly foliage and large purplish flowers.

- *Understanding "genus onopordon" helps you talk about this topic clearly.*
- *The article explained what "genus onopordon" means with a simple example.*

genus onopordum *(noun)*

A genus of Eurasian herbs of the family Compositae with prickly foliage and large purplish flowers.

- *She wrote a short paragraph that included "genus onopordum."*
- *He looked up "genus onopordum" because he had never seen it before.*

genus onosmodium *(noun)*

A genus of North American perennial herbs of the family Boraginaceae.

- *Understanding "genus onosmodium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus onosmodium."*

genus onychium *(noun)*

Small terrestrial ferns of Old World tropics and subtropics: clawed ferns; sometimes placed in family Cryptogrammataceae.

- *Understanding "genus onychium" helps you talk about this topic clearly.*
- *He looked up "genus onychium" because he had never seen it before.*

genus ophioglossum *(noun)*

The type genus of the fern family Ophioglossaceae.

- *The article explained what "genus ophioglossum" means with a simple example.*
- *In class, the teacher used "genus ophioglossum" to mean the type genus of the fern family ophioglossaceae.*

genus orbignya *(noun)*

Palms of southern Mexico to northern South America: babassu palm.

- *The article explained what "genus orbignya" means with a simple example.*
- *She wrote a short paragraph that included "genus orbignya."*

---

genus oreopteris *(noun)*

3 species of ferns formerly included in genus Dryopteris or Thelypteris.

- *He looked up "genus oreopteris" because he had never seen it before.*
- *She wrote a short paragraph that included "genus oreopteris."*

---

genus orites *(noun)*

Small genus of Australian shrubs or trees.

- *He looked up "genus orites" because he had never seen it before.*
- *She wrote a short paragraph that included "genus orites."*

---

genus ormosia *(noun)*

Genus of tropical shrubs and trees having usually odd-pinnate leaves with large leaflets and pink to reddish wood.

- *Understanding "genus ormosia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus ormosia" to mean genus of tropical shrubs and trees having usually....*

---

genus ornithogalum *(noun)*

Sometimes placed in family Hyacinthaceae.

- *They discussed "genus ornithogalum" during the group presentation.*
- *In class, the teacher used "genus ornithogalum" to mean sometimes placed in family hyacinthaceae.*

---

genus orontium *(noun)*

One species of aquatic plant: golden club.

- *She wrote a short paragraph that included "genus orontium."*
- *Understanding "genus orontium" helps you talk about this topic clearly.*

---

genus orthilia *(noun)*

A shrubby perennial rhizomatous evergreen herb; grows in damp coniferous woodlands in northern temperate regions.

- *He looked up "genus orthilia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus orthilia."*

---

genus ostryopsis *(noun)*

Deciduous monoecious shrubs of China and Mongolia resembling trees of the genus Ostrya; sometimes placed in subfamily or family Carpinaceae.

- *The article explained what "genus ostryopsis" means with a simple example.*
- *Understanding "genus ostryopsis" helps you talk about this topic clearly.*

---

genus othonna *(noun)*

Genus of western African herbs or shrubs.

- *They discussed "genus othonna" during the group presentation.*
- *Understanding "genus othonna" helps you talk about this topic clearly.*

---

genus oxandra *(noun)*

Genus of tropical trees.

- *She wrote a short paragraph that included "genus oxandra."*
- *The article explained what "genus oxandra" means with a simple example.*

---

genus oxytropis *(noun)*

Large widely-distributed genus of evergreen shrubs or subshrubs having odd-pinnate leaves and racemose or spicate flowers each having a pea-like corolla with a clawed petal.

- *She wrote a short paragraph that included "genus oxytropis."*
- *He looked up "genus oxytropis" because he had never seen it before.*

---

genus ozonium *(noun)*

Form genus of imperfect fungi.

- *She wrote a short paragraph that included "genus ozonium."*

- *He looked up “genus ozonium” because he had never seen it before.*

---

genus ozothamnus *(noun)*

Genus of Australian shrubs and perennial herbs; sometimes included in genus Helichrysum.

- *He looked up “genus ozothamnus” because he had never seen it before.*
- *She wrote a short paragraph that included “genus ozothamnus.”*

---

genus pachyrhizus *(noun)*

Small genus of tropical vines having tuberous roots.

- *In class, the teacher used “genus pachyrhizus” to mean small genus of tropical vines having tuberous roots.*
- *They discussed “genus pachyrhizus” during the group presentation.*

---

genus pachysandra *(noun)*

Evergreen perennial procumbent subshrubs or herbs.

- *He looked up “genus pachysandra” because he had never seen it before.*
- *Understanding “genus pachysandra” helps you talk about this topic clearly.*

---

genus packera *(noun)*

Genus of American of east Asian perennial herbs with yellow to orange or red flower rays; sometimes included in genus Senecio.

- *The article explained what “genus packera” means with a simple example.*
- *They discussed “genus packera” during the group presentation.*

---

genus palaquium *(noun)*

Large genus of Malaysian trees with milky juice and leathery leaves.

- *They discussed “genus palaquium” during the group presentation.*
- *In class, the teacher used “genus palaquium” to mean large genus of malaysian trees with milky juice and....*

---

genus paliurus *(noun)*

Thorny Eurasian shrubs.

- *They discussed “genus paliurus” during the group presentation.*
- *In class, the teacher used “genus paliurus” to mean thorny eurasian shrubs.*

---

genus parasitaxus *(noun)*

One species: parasite yew.

- *She wrote a short paragraph that included “genus parasitaxus.”*
- *He looked up “genus parasitaxus” because he had never seen it before.*

---

genus parathelypteris *(noun)*

Terrestrial ferns of warm and tropical Asia and North America.

- *The article explained what “genus parathelypteris” means with a simple example.*
- *In class, the teacher used “genus parathelypteris” to mean terrestrial ferns of warm and tropical asia and....*

---

genus parietaria *(noun)*

Small genus of stingless herbs.

- *He looked up “genus parietaria” because he had never seen it before.*
- *They discussed “genus parietaria” during the group presentation.*

---

genus parkia *(noun)*

Genus of tropical Old World trees: nitta trees.

- *He looked up “genus parkia” because he had never seen it before.*
- *She wrote a short paragraph that included “genus parkia.”*

---

genus parkinsonia *(noun)*

Small genus of spiny shrubs or small trees.

- *The article explained what “genus parkinsonia” means with a simple example.*
- *In class, the teacher used “genus parkinsonia” to mean small genus of spiny shrubs or small trees.*

---

genus parnassia *(noun)*

Genus of bog herbs of Arctic and northern temperate regions.

- *He looked up "genus parnassia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus parnassia."*

---

genus parochetus *(noun)*

One species: shamrock pea.

- *Understanding "genus parochetus" helps you talk about this topic clearly.*
- *He looked up "genus parochetus" because he had never seen it before.*

---

genus parrotia *(noun)*

One species: iron tree.

- *He looked up "genus parrotia" because he had never seen it before.*
- *Understanding "genus parrotia" helps you talk about this topic clearly.*

---

genus parrotiopsis *(noun)*

One species: deciduous tree of the Himalaya Mountains.

- *The article explained what "genus parrotiopsis" means with a simple example.*
- *They discussed "genus parrotiopsis" during the group presentation.*

---

genus parthenocissus *(noun)*

Woody vines having disklike tips on the tendrils.

- *The article explained what "genus parthenocissus" means with a simple example.*
- *In class, the teacher used "genus parthenocissus" to mean woody vines having disklike tips on the tendrils.*

---

genus pastinaca *(noun)*

A rosid dicot genus of the family Umbelliferae; includes parsnips.

- *Understanding "genus pastinaca" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus pastinaca."*

---

genus payena *(noun)*

Genus of medium to large Malaysian trees yielding gutta-percha.

- *He looked up "genus payena" because he had never seen it before.*
- *They discussed "genus payena" during the group presentation.*

---

genus pecopteris *(noun)*

Genus of Carboniferous fossil ferns.

- *Understanding "genus pecopteris" helps you talk about this topic clearly.*
- *He looked up "genus pecopteris" because he had never seen it before.*

---

genus pedilanthus *(noun)*

Tropical American succulent shrubs.

- *They discussed "genus pedilanthus" during the group presentation.*
- *In class, the teacher used "genus pedilanthus" to mean tropical american succulent shrubs.*

---

genus pediocactus *(noun)*

Low-growing cacti of the Great Plains of North America.

- *He looked up "genus pediocactus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pediocactus."*

---

genus peireskia *(noun)*

Genus of tropical American shrubby trees and woody climbers having slender branches with broad flat leaves and large panicles of flowers.

- *They discussed "genus peireskia" during the group presentation.*
- *The article explained what "genus peireskia" means with a simple example.*

---

genus pellaea *(noun)*

Genus of chiefly small rock-loving ferns; in some classification systems it is placed in the family Polypodiaceae or Adiantaceae.

- *In class, the teacher used "genus pellaea" to mean genus of chiefly small rock-loving ferns; in some....*
- *He looked up "genus pellaea" because he had never seen it before.*

---

genus pellicularia *(noun)*

Genus of fungi having the hymenium in the form of a crust; some species formerly placed in form genus Rhizoctinia.

- *She wrote a short paragraph that included "genus pellicularia."*
- *They discussed "genus pellicularia" during the group presentation.*

---

genus peltandra *(noun)*

Small genus of North American marsh or aquatic herbs.

- *The article explained what "genus peltandra" means with a simple example.*
- *Understanding "genus peltandra" helps you talk about this topic clearly.*

---

genus peltiphyllum *(noun)*

One species.

- *The article explained what "genus peltiphyllum" means with a simple example.*
- *In class, the teacher used "genus peltiphyllum" to mean one species.*

---

genus pereskia *(noun)*

Genus of tropical American shrubby trees and woody climbers having slender branches with broad flat leaves and large panicles of flowers.

- *Understanding "genus pereskia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus pereskia" to mean genus of tropical american shrubby trees and woody....*

---

genus periploca *(noun)*

Genus of woody vines of warm regions of the Old World.

- *She wrote a short paragraph that included "genus periploca."*
- *The article explained what "genus periploca" means with a simple example.*

---

genus persoonia *(noun)*

Australian undershrubs to small trees: geebungs.

- *In class, the teacher used "genus persoonia" to mean australian undershrubs to small trees: geebungs.*
- *The article explained what "genus persoonia" means with a simple example.*

---

genus pertusaria *(noun)*

Crustose lichens that are a source of the dye archil and of litmus.

- *He looked up "genus pertusaria" because he had never seen it before.*
- *They discussed "genus pertusaria" during the group presentation.*

---

genus petasites *(noun)*

Genus of rhizomatous herbs of north temperate regions: butterbur; sweet coltsfoot.

- *Understanding "genus petasites" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus petasites."*

---

genus petrocoptis *(noun)*

Perennial tussock-forming rock plants; of Pyrenees and mountains of northern Spain; similar to and sometimes placed in genus Lychnis.

- *Understanding "genus petrocoptis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus petrocoptis" to mean perennial tussock-forming rock plants; of pyrenees....*

---

genus petteria *(noun)*

One species: Dalmatian laburnum.

- *In class, the teacher used "genus petteria" to mean one species: dalmatian laburnum.*
- *Understanding "genus petteria" helps you talk about this topic clearly.*

---

genus phaius *(noun)*

Genus of Asiatic and Australian terrestrial orchids.

- *He looked up "genus phaius" because he had never seen it before.*
- *She wrote a short paragraph that included "genus phaius."*

genus phegopteris *(noun)*

Beech ferns: genus is variously classified: considered alternative name for genus Dryopteris or included in genus Thelypteris.

- *Understanding "genus phegopteris" helps you talk about this topic clearly.*
- *They discussed "genus phegopteris" during the group presentation.*

genus phellodendron *(noun)*

Small genus of aromatic deciduous trees of east Asia often having thick corky bark.

- *In class, the teacher used "genus phellodendron" to mean small genus of aromatic deciduous trees of east....*
- *They discussed "genus phellodendron" during the group presentation.*

genus phillyrea *(noun)*

Small genus of evergreen shrubs of the Mediterranean region.

- *In class, the teacher used "genus phillyrea" to mean small genus of evergreen shrubs of the....*
- *They discussed "genus phillyrea" during the group presentation.*

genus phlebodium *(noun)*

Chiefly epiphytic tropical ferns with free veins bearing sori.

- *They discussed "genus phlebodium" during the group presentation.*
- *In class, the teacher used "genus phlebodium" to mean chiefly epiphytic tropical ferns with free veins....*

genus phleum *(noun)*

Grasses native to temperate regions.

- *They discussed "genus phleum" during the group presentation.*
- *She wrote a short paragraph that included "genus phleum."*

genus phlomis *(noun)*

Large genus of Old World aromatic herbs or subshrubs or shrubs having often woolly leaves.

- *He looked up "genus phlomis" because he had never seen it before.*
- *In class, the teacher used "genus phlomis" to mean large genus of old world aromatic herbs or....*

genus phoenicophorium *(noun)*

Latanier palm.

- *She wrote a short paragraph that included "genus phoenicophorium."*
- *He looked up "genus phoenicophorium" because he had never seen it before.*

genus pholidota *(noun)*

Genus of mostly epiphytic orchids of Indonesia and the western Pacific.

- *In class, the teacher used "genus pholidota" to mean genus of mostly epiphytic orchids of indonesia and....*
- *He looked up "genus pholidota" because he had never seen it before.*

genus pholiota *(noun)*

Genus of gilled agarics of Europe and North America having brown spores and an annulus; grows on open ground or decaying wood.

- *Understanding "genus pholiota" helps you talk about this topic clearly.*
- *They discussed "genus pholiota" during the group presentation.*

genus pholistoma *(noun)*

Straggling herbs of southwestern United States.

- *He looked up "genus pholistoma" because he had never seen it before.*
- *They discussed "genus pholistoma" during the group presentation.*

genus phoradendron *(noun)*

Any of various American parasitic plants similar to Old World mistletoe: false mistletoe.

- *Understanding "genus phoradendron" helps you talk about this topic clearly.*
- *They discussed "genus phoradendron" during the group presentation.*

genus phragmipedium *(noun)*

Genus of tropical American orchid species often included in genus Cypripedium or Paphiopedilum and Selenipedium: lady slippers.

- *He looked up "genus phragmipedium" because he had never seen it before.*
- *They discussed "genus phragmipedium" during the group presentation.*

---

genus phyllitis *(noun)*

A genus of ferns belonging to the family Polypodiaceae (in some classification systems included in genus Asplenium).

- *In class, the teacher used "genus phyllitis" to mean a genus of ferns belonging to the family....*
- *He looked up "genus phyllitis" because he had never seen it before.*

---

genus phyllocladus *(noun)*

Celery pine.

- *In class, the teacher used "genus phyllocladus" to mean celery pine.*
- *They discussed "genus phyllocladus" during the group presentation.*

---

genus phyllodoce *(noun)*

Small genus of evergreen Arctic and alpine shrubs.

- *The article explained what "genus phyllodoce" means with a simple example.*
- *Understanding "genus phyllodoce" helps you talk about this topic clearly.*

---

genus phylloporus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *They discussed "genus phylloporus" during the group presentation.*
- *He looked up "genus phylloporus" because he had never seen it before.*

---

genus physaria *(noun)*

Small genus of western North American herbs similar to Lesquerella: bladderpods.

- *The article explained what "genus physaria" means with a simple example.*
- *Understanding "genus physaria" helps you talk about this topic clearly.*

---

genus physostegia *(noun)*

Genus of North American perennial herbs.

- *Understanding "genus physostegia" helps you talk about this topic clearly.*
- *The article explained what "genus physostegia" means with a simple example.*

---

genus physostigma *(noun)*

African woody vines: calabar beans.

- *He looked up "genus physostigma" because he had never seen it before.*
- *They discussed "genus physostigma" during the group presentation.*

---

genus phytelephas *(noun)*

Small genus of South American feather palms.

- *They discussed "genus phytelephas" during the group presentation.*
- *She wrote a short paragraph that included "genus phytelephas."*

---

genus pickeringia *(noun)*

One species: chaparral pea.

- *Understanding "genus pickeringia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus pickeringia."*

---

genus picrasma *(noun)*

Small genus of deciduous trees of tropical America and Asia.

- *He looked up "genus picrasma" because he had never seen it before.*
- *They discussed "genus picrasma" during the group presentation.*

---

genus picris *(noun)*

Genus of weedy Old World yellow-flowered herbs usually containing a bitter-tasting substance: bitterweed.

- *He looked up "genus picris" because he had never seen it before.*

- *She wrote a short paragraph that included "genus picris."*

---

genus pinckneya *(noun)*

Small genus of shrubs or small trees of southeastern United States and northern South America.

- *He looked up "genus pinckneya" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pinckneya."*

---

genus piptadenia *(noun)*

Tropical American trees and shrubs; often placed in other genera.

- *She wrote a short paragraph that included "genus piptadenia."*
- *He looked up "genus piptadenia" because he had never seen it before.*

---

genus pipturus *(noun)*

An Australian genus of woody plants of the family Urticaceae.

- *He looked up "genus pipturus" because he had never seen it before.*
- *They discussed "genus pipturus" during the group presentation.*

---

genus piqueria *(noun)*

Small genus of tropical American perennial herbs or subshrubs with white to pale yellow flowers; often included in genus Stevia.

- *Understanding "genus piqueria" helps you talk about this topic clearly.*
- *They discussed "genus piqueria" during the group presentation.*

---

genus piscidia *(noun)*

Genus of shrubs or small trees having indehiscent pods with black seeds; roots and bark yield fish poisons.

- *In class, the teacher used "genus piscidia" to mean genus of shrubs or small trees having indehiscent....*
- *The article explained what "genus piscidia" means with a simple example.*

---

genus pistia *(noun)*

One species: water lettuce.

- *He looked up "genus pistia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pistia."*

---

genus pithecellobium *(noun)*

Thorny shrubs and trees of tropical and subtropical America and Asia.

- *Understanding "genus pithecellobium" helps you talk about this topic clearly.*
- *They discussed "genus pithecellobium" during the group presentation.*

---

genus pithecolobium *(noun)*

Thorny shrubs and trees of tropical and subtropical America and Asia.

- *In class, the teacher used "genus pithecolobium" to mean thorny shrubs and trees of tropical and subtropical....*
- *The article explained what "genus pithecolobium" means with a simple example.*

---

genus pityrogramma *(noun)*

Terrestrial tropical ferns having fronds with powdery yellowish or white undersides; sometimes placed in family Polypodiaceae or Adiantaceae.

- *Understanding "genus pityrogramma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus pityrogramma."*

---

genus plagianthus *(noun)*

Small genus of shrubs and trees of Australia and New Zealand.

- *He looked up "genus plagianthus" because he had never seen it before.*
- *In class, the teacher used "genus plagianthus" to mean small genus of shrubs and trees of australia and....*

---

genus planera *(noun)*

A deciduous tree of the family Ulmaceae that grows in the southeastern United States.

- *The article explained what "genus planera" means with a simple example.*
- *She wrote a short paragraph that included "genus planera."*

---

genus plasmodiophora *(noun)*

Type genus of Plasmodiophoraceae comprising minute plant parasitic fungi similar to and sometimes included among the slime molds.

- *Understanding "genus plasmodiophora" helps you talk about this topic clearly.*
- *He looked up "genus plasmodiophora" because he had never seen it before.*

---

genus platanthera *(noun)*

Herbaceous terrestrial orchids of temperate northern and southern hemispheres.

- *He looked up "genus platanthera" because he had never seen it before.*
- *She wrote a short paragraph that included "genus platanthera."*

---

genus platycerium *(noun)*

Often epiphytic tropical Old World ferns.

- *She wrote a short paragraph that included "genus platycerium."*
- *The article explained what "genus platycerium" means with a simple example.*

---

genus platylobium *(noun)*

Small genus of Australian evergreen leguminous shrubs or subshrubs.

- *He looked up "genus platylobium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus platylobium."*

---

genus platymiscium *(noun)*

Genus of tropical American trees: quira.

- *She wrote a short paragraph that included "genus platymiscium."*
- *Understanding "genus platymiscium" helps you talk about this topic clearly.*

---

genus platystemon *(noun)*

One species: creamcups.

- *In class, the teacher used "genus platystemon" to mean one species: creamcups.*
- *The article explained what "genus platystemon" means with a simple example.*

---

genus plectania *(noun)*

Genus of fungi in the family Pezizaceae closely related to and often included in genus Peziza.

- *They discussed "genus plectania" during the group presentation.*
- *In class, the teacher used "genus plectania" to mean genus of fungi in the family pezizaceae closely....*

---

genus plectorrhiza *(noun)*

Small genus of Australian orchids.

- *The article explained what "genus plectorrhiza" means with a simple example.*
- *In class, the teacher used "genus plectorrhiza" to mean small genus of australian orchids.*

---

genus pleione *(noun)*

Small genus of dwarf orchids; India to Thailand and Taiwan.

- *In class, the teacher used "genus pleione" to mean small genus of dwarf orchids; india to thailand and....*
- *The article explained what "genus pleione" means with a simple example.*

---

genus pleiospilos *(noun)*

Perennial succulents of South Africa.

- *They discussed "genus pleiospilos" during the group presentation.*
- *He looked up "genus pleiospilos" because he had never seen it before.*

---

genus pleurosorus *(noun)*

Small genus comprising terrestrial ferns; found in Chile and Spain and Morocco and Australia and New Zealand.

- *She wrote a short paragraph that included "genus pleurosorus."*
- *He looked up "genus pleurosorus" because he had never seen it before.*

---

genus pleurothallis *(noun)*

Large genus of epiphytic or lithophytic orchids of tropical America.

- *Understanding "genus pleurothallis" helps you talk about this topic clearly.*
- *He looked up "genus pleurothallis" because he had never seen it before.*

---

genus podalyria *(noun)*

Genus of South African leguminous shrubs often placed in genus Sophora.

- *She wrote a short paragraph that included "genus podalyria."*
- *He looked up "genus podalyria" because he had never seen it before.*

---

genus podophyllum *(noun)*

Perennial rhizomatous herbs.

- *The article explained what "genus podophyllum" means with a simple example.*
- *In class, the teacher used "genus podophyllum" to mean perennial rhizomatous herbs.*

---

genus pogonia *(noun)*

Small but widely distributed genus of orchids closely related to genus Cleistes;: of damp or boggy areas of north temperate zone.

- *She wrote a short paragraph that included "genus pogonia."*
- *The article explained what "genus pogonia" means with a simple example.*

---

genus pogostemon *(noun)*

Genus of Asiatic shrubs or trees whose leaves yield a fragrant oil.

- *The article explained what "genus pogostemon" means with a simple example.*
- *She wrote a short paragraph that included "genus pogostemon."*

---

genus polanisia *(noun)*

Widely distributed herbs having palmate leaves and creamy white to or pink to magenta flowers with many stamens of unequal length.

- *Understanding "genus polanisia" helps you talk about this topic clearly.*
- *The article explained what "genus polanisia" means with a simple example.*

---

genus polemonium *(noun)*

Type genus of the Polemoniaceae.

- *The article explained what "genus polemonium" means with a simple example.*
- *In class, the teacher used "genus polemonium" to mean type genus of the polemoniaceae.*

---

genus polianthes *(noun)*

Genus of perennial tuberous herbs having lily-like flowers; Mexico; sometimes placed in family Amaryllidaceae.

- *She wrote a short paragraph that included "genus polianthes."*
- *The article explained what "genus polianthes" means with a simple example.*

---

genus polybotria *(noun)*

Tropical American ferns; usually terrestrial when young but scandent later.

- *The article explained what "genus polybotria" means with a simple example.*
- *In class, the teacher used "genus polybotria" to mean tropical american ferns; usually terrestrial when....*

---

genus polybotrya *(noun)*

Tropical American ferns; usually terrestrial when young but scandent later.

- *She wrote a short paragraph that included "genus polybotrya."*
- *The article explained what "genus polybotrya" means with a simple example.*

---

genus polygonatum *(noun)*

Sometimes placed in subfamily Convallariaceae.

- *They discussed "genus polygonatum" during the group presentation.*
- *In class, the teacher used "genus polygonatum" to mean sometimes placed in subfamily convallariaceae.*

---

genus pomaderris *(noun)*

A genus of Australasian shrubs and trees.

- *In class, the teacher used "genus pomaderris" to mean a genus of australasian shrubs and trees.*
- *The article explained what "genus pomaderris" means with a simple example.*

genus poncirus *(noun)*

One species: trifoliate orange.

- *The article explained what "genus poncirus" means with a simple example.*
- *In class, the teacher used "genus poncirus" to mean one species: trifoliate orange.*

genus pongamia *(noun)*

One species: Indian beech.

- *In class, the teacher used "genus pongamia" to mean one species: indian beech.*
- *He looked up "genus pongamia" because he had never seen it before.*

genus pontederia *(noun)*

Pickerelweed.

- *She wrote a short paragraph that included "genus pontederia."*
- *He looked up "genus pontederia" because he had never seen it before.*

genus poterium *(noun)*

A genus of thorny herbs or shrubs of the family Rosaceae.

- *They discussed "genus poterium" during the group presentation.*
- *In class, the teacher used "genus poterium" to mean a genus of thorny herbs or shrubs of the family....*

genus pouteria *(noun)*

Tropical American timber tree with edible fruit (canistel).

- *They discussed "genus pouteria" during the group presentation.*
- *He looked up "genus pouteria" because he had never seen it before.*

genus prenanthes *(noun)*

Genus of North American and Asiatic perennial herbs having pinnatisect leaves small heads of drooping yellowish to purple flowers; sometimes includes species often placed in genus Nabalus.

- *Understanding "genus prenanthes" helps you talk about this topic clearly.*
- *The article explained what "genus prenanthes" means with a simple example.*

genus pritzelago *(noun)*

Chamois cress.

- *They discussed "genus pritzelago" during the group presentation.*
- *Understanding "genus pritzelago" helps you talk about this topic clearly.*

genus prumnopitys *(noun)*

Mostly dioecious evergreen conifers; leaves are softer than in Podocarpus.

- *Understanding "genus prumnopitys" helps you talk about this topic clearly.*
- *In class, the teacher used "genus prumnopitys" to mean mostly dioecious evergreen conifers; leaves are....*

genus pseudobombax *(noun)*

Tropical American deciduous shrubs or small trees.

- *She wrote a short paragraph that included "genus pseudobombax."*
- *The article explained what "genus pseudobombax" means with a simple example.*

genus pseudocolus *(noun)*

A genus of fungi belonging to the family Clathraceae.

- *Understanding "genus pseudocolus" helps you talk about this topic clearly.*
- *He looked up "genus pseudocolus" because he had never seen it before.*

genus pseudolarix *(noun)*

One species: golden larch.

- *Understanding "genus pseudolarix" helps you talk about this topic clearly.*
- *The article explained what "genus pseudolarix" means with a simple example.*

genus pseudotaxus *(noun)*

One species.

- *They discussed "genus pseudotaxus" during the group presentation.*
- *She wrote a short paragraph that included "genus pseudotaxus."*

---

genus pseudowintera *(noun)*

Evergreen shrubs or small trees of Australia and New Zealand.

- *He looked up "genus pseudowintera" because he had never seen it before.*
- *They discussed "genus pseudowintera" during the group presentation.*

---

genus psilophyton *(noun)*

Type genus of the Psilophytaceae: genus of small wiry herbaceous Paleozoic plants with underground rhizomes and apical sporangia.

- *The article explained what "genus psilophyton" means with a simple example.*
- *Understanding "genus psilophyton" helps you talk about this topic clearly.*

---

genus psilotum *(noun)*

Type genus of the Psilotaceae.

- *She wrote a short paragraph that included "genus psilotum."*
- *Understanding "genus psilotum" helps you talk about this topic clearly.*

---

genus psophocarpus *(noun)*

Species of tropical Asian and African climbing herbs.

- *She wrote a short paragraph that included "genus psophocarpus."*
- *The article explained what "genus psophocarpus" means with a simple example.*

---

genus psoralea *(noun)*

Widely distributed genus of herbs or shrubs with glandular compound leaves and spicate or racemose purple or white flowers.

- *They discussed "genus psoralea" during the group presentation.*
- *In class, the teacher used "genus psoralea" to mean widely distributed genus of herbs or shrubs with....*

---

genus psychopsis *(noun)*

Epiphytic orchids of Central and South America formerly included in genus Oncidium.

- *She wrote a short paragraph that included "genus psychopsis."*
- *The article explained what "genus psychopsis" means with a simple example.*

---

genus pteretis *(noun)*

Small genus sometimes included in genus Onoclea; in some classifications both genera are placed in Polypodiaceae.

- *In class, the teacher used "genus pteretis" to mean small genus sometimes included in genus onoclea; in....*
- *They discussed "genus pteretis" during the group presentation.*

---

genus pterocarya *(noun)*

Asiatic nut trees: wing nuts.

- *He looked up "genus pterocarya" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pterocarya."*

---

genus pteropogon *(noun)*

Genus of Australian and South African herbs including some from genus Helipterum.

- *They discussed "genus pteropogon" during the group presentation.*
- *She wrote a short paragraph that included "genus pteropogon."*

---

genus pterospermum *(noun)*

Genus of tropical Asian trees and shrubs.

- *She wrote a short paragraph that included "genus pterospermum."*
- *They discussed "genus pterospermum" during the group presentation.*

---

genus pterostylis *(noun)*

Genus of terrestrial orchids of Australia and New Zealand and western Pacific.

- *In class, the teacher used "genus pterostylis" to mean genus of terrestrial orchids of australia and new....*

- *He looked up "genus pterostylis" because he had never seen it before.*

---

genus pulicaria *(noun)*

Genus of temperate Old World herbs: fleabane.

- *Understanding "genus pulicaria" helps you talk about this topic clearly.*
- *They discussed "genus pulicaria" during the group presentation.*

---

genus pycnanthemum *(noun)*

American mountain mint.

- *They discussed "genus pycnanthemum" during the group presentation.*
- *In class, the teacher used "genus pycnanthemum" to mean american mountain mint.*

---

genus pyrrosia *(noun)*

Epiphytic or lithophytic or terrestrial ferns of tropical Old World.

- *The article explained what "genus pyrrosia" means with a simple example.*
- *She wrote a short paragraph that included "genus pyrrosia."*

---

genus pyrularia *(noun)*

Small genus of chiefly Asiatic parasitic shrubs.

- *The article explained what "genus pyrularia" means with a simple example.*
- *Understanding "genus pyrularia" helps you talk about this topic clearly.*

---

genus pyxidanthera *(noun)*

One species: pyxie; the eastern United States.

- *The article explained what "genus pyxidanthera" means with a simple example.*
- *They discussed "genus pyxidanthera" during the group presentation.*

---

genus quamassia *(noun)*

Genus of scapose herbs of North and South America having large edible bulbs.

- *She wrote a short paragraph that included "genus quamassia."*
- *He looked up "genus quamassia" because he had never seen it before.*

---

genus radiigera *(noun)*

A genus of fungus belonging to the family Geastraceae.

- *Understanding "genus radiigera" helps you talk about this topic clearly.*
- *He looked up "genus radiigera" because he had never seen it before.*

---

genus radyera *(noun)*

Very small genus of shrubs of southern hemisphere: bush hibiscus.

- *Understanding "genus radyera" helps you talk about this topic clearly.*
- *They discussed "genus radyera" during the group presentation.*

---

genus ramalina *(noun)*

Shrubby lichens of the family Usneaceae having a flattened thallus.

- *They discussed "genus ramalina" during the group presentation.*
- *The article explained what "genus ramalina" means with a simple example.*

---

genus raoulia *(noun)*

Genus of low-growing mat-forming New Zealand plants; in some classifications includes species placed in genus Haastia.

- *She wrote a short paragraph that included "genus raoulia."*
- *The article explained what "genus raoulia" means with a simple example.*

---

genus ratibida *(noun)*

Genus of perennial wildflowers of North American plains and prairies; often cultivated for their showy flower heads.

- *In class, the teacher used "genus ratibida" to mean genus of perennial wildflowers of north american....*
- *Understanding "genus ratibida" helps you talk about this topic clearly.*

---

genus rauvolfia *(noun)*

Pantropical genus of somewhat poisonous shrubs and small trees.

- *They discussed "genus rauvolfia" during the group presentation.*
- *Understanding "genus rauvolfia" helps you talk about this topic clearly.*

---

genus rauwolfia *(noun)*

Pantropical genus of somewhat poisonous shrubs and small trees.

- *In class, the teacher used "genus rauwolfia" to mean pantropical genus of somewhat poisonous shrubs and....*
- *They discussed "genus rauwolfia" during the group presentation.*

---

genus ravenala *(noun)*

Woody tropical plants with tall trunks; sometimes placed in family Musaceae.

- *He looked up "genus ravenala" because he had never seen it before.*
- *She wrote a short paragraph that included "genus ravenala."*

---

genus regnellidium *(noun)*

One species of aquatic or semiaquatic fern.

- *They discussed "genus regnellidium" during the group presentation.*
- *She wrote a short paragraph that included "genus regnellidium."*

---

genus retrophyllum *(noun)*

Small genus of tropical evergreen dioecious shrubs or trees of Oceania and tropical South America.

- *They discussed "genus retrophyllum" during the group presentation.*
- *In class, the teacher used "genus retrophyllum" to mean small genus of tropical evergreen dioecious shrubs....*

---

genus rhapis *(noun)*

Genus of small clump-forming fan palms of China and Japan.

- *She wrote a short paragraph that included "genus rhapis."*
- *He looked up "genus rhapis" because he had never seen it before.*

---

genus rhipsalis *(noun)*

Large genus of epiphytic or lithophytic unarmed cacti with usually segmented stems and pendulous branches; flowers are small followed by berrylike fruits.

- *They discussed "genus rhipsalis" during the group presentation.*
- *In class, the teacher used "genus rhipsalis" to mean large genus of epiphytic or lithophytic unarmed....*

---

genus rhizoctinia *(noun)*

Form genus of imperfect fungi some species of which are now placed in genera Pellicularia and Corticium because their perfect stages have been found.

- *Understanding "genus rhizoctinia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus rhizoctinia."*

---

genus rhizopogon *(noun)*

A genus of fungi having subterranean sporophores resembling tubers.

- *She wrote a short paragraph that included "genus rhizopogon."*
- *Understanding "genus rhizopogon" helps you talk about this topic clearly.*

---

genus rhodanthe *(noun)*

Genus of xerophytic herbs and shrubs of South Africa and Australia; sometimes included in genus Helipterum.

- *They discussed "genus rhodanthe" during the group presentation.*
- *The article explained what "genus rhodanthe" means with a simple example.*

---

genus rhodosphaera *(noun)*

One species; an Australian evergreen sumac.

- *He looked up "genus rhodosphaera" because he had never seen it before.*
- *She wrote a short paragraph that included "genus rhodosphaera."*

---

genus rhyncostylis *(noun)*

Genus of epiphytic orchids of tropical Asia.

- *The article explained what "genus rhyncostylis" means with a simple example.*
- *She wrote a short paragraph that included "genus rhyncostylis."*

---

genus rhynia *(noun)*

Type genus of the Rhyniaceae; small leafless dichotomously branching fossil plants with terminal sporangia and smooth branching rhizomes.

- *They discussed "genus rhynia" during the group presentation.*
- *She wrote a short paragraph that included "genus rhynia."*

---

genus richea *(noun)*

Evergreen trees or shrubs of mountains of Australia and Tasmania.

- *He looked up "genus richea" because he had never seen it before.*
- *She wrote a short paragraph that included "genus richea."*

---

genus rivina *(noun)*

Small genus of erect perennial shrubby herbs; tropical and subtropical America.

- *The article explained what "genus rivina" means with a simple example.*
- *She wrote a short paragraph that included "genus rivina."*

---

genus roccella *(noun)*

Chiefly fruticose maritime rock-inhabiting lichens.

- *They discussed "genus roccella" during the group presentation.*
- *The article explained what "genus roccella" means with a simple example.*

---

genus romneya *(noun)*

One species: matilija poppy.

- *The article explained what "genus romneya" means with a simple example.*
- *In class, the teacher used "genus romneya" to mean one species: matilija poppy.*

---

genus roridula *(noun)*

Insectivorous undershrubs of South Africa; in some classifications placed in the family Droseraceae.

- *He looked up "genus roridula" because he had never seen it before.*
- *Understanding "genus roridula" helps you talk about this topic clearly.*

---

genus rorippa *(noun)*

Annual and perennial herbs of damp habitats; cosmopolitan except Antarctica.

- *They discussed "genus rorippa" during the group presentation.*
- *In class, the teacher used "genus rorippa" to mean annual and perennial herbs of damp habitats;....*

---

genus rosellinia *(noun)*

Fungi having smooth perithecia with dark one-celled ascospores.

- *Understanding "genus rosellinia" helps you talk about this topic clearly.*
- *They discussed "genus rosellinia" during the group presentation.*

---

genus roystonea *(noun)*

A monocotyledonous genus of West Indian feather palms.

- *Understanding "genus roystonea" helps you talk about this topic clearly.*
- *He looked up "genus roystonea" because he had never seen it before.*

---

genus rumohra *(noun)*

Leatherleaf ferns: in some classifications included in genus Polystichum.

- *In class, the teacher used "genus rumohra" to mean leatherleaf ferns: in some classifications included....*
- *The article explained what "genus rumohra" means with a simple example.*

---

genus ruptiliocarpon *(noun)*

New (1993) genus of trees of Central America now recognized as similar to those of genus Lepidobotrys.

- *The article explained what "genus ruptiliocarpon" means with a simple example.*
- *In class, the teacher used "genus ruptiliocarpon" to mean new (1993) genus of trees of central america now....*

genus sabbatia *(noun)*

Genus of smooth slender North American herbs with showy flowers.

- *The article explained what "genus sabbatia" means with a simple example.*
- *In class, the teacher used "genus sabbatia" to mean genus of smooth slender north american herbs with....*

genus sabinea *(noun)*

Small genus of deciduous West Indian trees or shrubs: carib wood.

- *They discussed "genus sabinea" during the group presentation.*
- *He looked up "genus sabinea" because he had never seen it before.*

genus sadleria *(noun)*

Low tree ferns with large fronds; in rain forests and on lava flows of Hawaiian Islands.

- *They discussed "genus sadleria" during the group presentation.*
- *The article explained what "genus sadleria" means with a simple example.*

genus sagina *(noun)*

Small low-growing annual or perennial herbs of temperate and cool regions.

- *They discussed "genus sagina" during the group presentation.*
- *The article explained what "genus sagina" means with a simple example.*

genus saintpaulia *(noun)*

East African herb with nodding flowers; widely cultivated.

- *They discussed "genus saintpaulia" during the group presentation.*
- *Understanding "genus saintpaulia" helps you talk about this topic clearly.*

genus salpichroa *(noun)*

Herbs of temperate North and South America: cock's eggs.

- *Understanding "genus salpichroa" helps you talk about this topic clearly.*
- *In class, the teacher used "genus salpichroa" to mean herbs of temperate north and south america: cock's eggs.*

genus salpiglossis *(noun)*

Small genus of herbs of the southern Andes having large showy flowers.

- *The article explained what "genus salpiglossis" means with a simple example.*
- *She wrote a short paragraph that included "genus salpiglossis."*

genus samolus *(noun)*

Genus of herbs usually growing in salt marshes: water pimpernels.

- *In class, the teacher used "genus samolus" to mean genus of herbs usually growing in salt marshes:....*
- *Understanding "genus samolus" helps you talk about this topic clearly.*

genus sanicula *(noun)*

Chiefly American herbs: sanicle.

- *He looked up "genus sanicula" because he had never seen it before.*
- *They discussed "genus sanicula" during the group presentation.*

genus santolina *(noun)*

Genus of Mediterranean subshrubs with rayless flower heads.

- *They discussed "genus santolina" during the group presentation.*
- *Understanding "genus santolina" helps you talk about this topic clearly.*

genus sanvitalia *(noun)*

Small genus of tropical American annual herbs: creeping zinnia.

- *Understanding "genus sanvitalia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus sanvitalia."*

genus sapindus *(noun)*

Type genus of the Sapindaceae.

- *The article explained what “genus sapindus” means with a simple example.*
- *In class, the teacher used “genus sapindus” to mean type genus of the sapindaceae.*

---

genus sarcobatus *(noun)*

One species: greasewood.

- *She wrote a short paragraph that included “genus sarcobatus.”*
- *The article explained what “genus sarcobatus” means with a simple example.*

---

genus sarcocephalus *(noun)*

Genus of tropical African trees and shrubs.

- *They discussed “genus sarcocephalus” during the group presentation.*
- *Understanding “genus sarcocephalus” helps you talk about this topic clearly.*

---

genus sarcochilus *(noun)*

Diminutive epiphytic or lithophytic orchids with clumped short-stemmed foliage and arching racemes of colorful flowers; Australia and Polynesia to southeastern Asia.

- *He looked up “genus sarcochilus” because he had never seen it before.*
- *In class, the teacher used “genus sarcochilus” to mean diminutive epiphytic or lithophytic orchids with....*

---

genus sarcodes *(noun)*

Snow plant; in some classifications placed in family Pyrolaceae.

- *Understanding “genus sarcodes” helps you talk about this topic clearly.*
- *In class, the teacher used “genus sarcodes” to mean snow plant; in some classifications placed in....*

---

genus sarcostemma *(noun)*

Succulent subshrubs or vines; tropical and subtropical India and Africa and Malaysia.

- *The article explained what “genus sarcostemma” means with a simple example.*
- *In class, the teacher used “genus sarcostemma” to mean succulent subshrubs or vines; tropical and....*

---

genus saururus *(noun)*

Type genus of the Saururaceae: lizard’s-tails.

- *Understanding “genus saururus” helps you talk about this topic clearly.*
- *He looked up “genus saururus” because he had never seen it before.*

---

genus saussurea *(noun)*

Genus of herbs of temperate and cool regions of Eurasia.

- *In class, the teacher used “genus saussurea” to mean genus of herbs of temperate and cool regions of eurasia.*
- *The article explained what “genus saussurea” means with a simple example.*

---

genus saxe-gothea *(noun)*

One species: Prince Albert’s yew.

- *Understanding “genus saxe-gothea” helps you talk about this topic clearly.*
- *The article explained what “genus saxe-gothea” means with a simple example.*

---

genus saxegothea *(noun)*

One species: Prince Albert’s yew.

- *They discussed “genus saxegothea” during the group presentation.*
- *In class, the teacher used “genus saxegothea” to mean one species: prince albert’s yew.*

---

genus scaphosepalum *(noun)*

Comprises some tropical American species usually placed in genus Masdevallia: diminutive plants with small flowers carried on one scape.

- *She wrote a short paragraph that included “genus scaphosepalum.”*
- *He looked up “genus scaphosepalum” because he had never seen it before.*

---

genus schaffneria *(noun)*

One species.

- *Understanding “genus schaffneria” helps you talk about this topic clearly.*

- *He looked up “genus schaffneria” because he had never seen it before.*

---

genus schinus *(noun)*

Genus of evergreen shrubs and trees of tropical and subtropical regions of South and Central America and Canary Islands and China.

- *They discussed “genus schinus” during the group presentation.*
- *In class, the teacher used “genus schinus” to mean genus of evergreen shrubs and trees of tropical and....*

---

genus schizachyrium *(noun)*

Overlaps the genus Andropogon.

- *The article explained what “genus schizachyrium” means with a simple example.*
- *In class, the teacher used “genus schizachyrium” to mean overlaps the genus andropogon.*

---

genus schizaea *(noun)*

Type genus of the Schizaeaceae cosmopolitan especially in tropics; small leptosporangiate ferns: curly grass fern.

- *Understanding “genus schizaea” helps you talk about this topic clearly.*
- *The article explained what “genus schizaea” means with a simple example.*

---

genus schizanthus *(noun)*

Chilean herbs with orchid-like flowers.

- *In class, the teacher used “genus schizanthus” to mean chilean herbs with orchid-like flowers.*
- *He looked up “genus schizanthus” because he had never seen it before.*

---

genus schizopetalon *(noun)*

Small genus of South American herbs grown for its flowers.

- *The article explained what “genus schizopetalon” means with a simple example.*
- *In class, the teacher used “genus schizopetalon” to mean small genus of south american herbs grown for its....*

---

genus schizophragma *(noun)*

Small genus of deciduous climbing and creeping shrubs with white flowers in flat clusters; sometimes placed in family Saxifragaceae.

- *Understanding “genus schizophragma” helps you talk about this topic clearly.*
- *In class, the teacher used “genus schizophragma” to mean small genus of deciduous climbing and creeping....*

---

genus schlumbergera *(noun)*

South American epiphytic or lithophytic cacti.

- *Understanding “genus schlumbergera” helps you talk about this topic clearly.*
- *The article explained what “genus schlumbergera” means with a simple example.*

---

genus schomburgkia *(noun)*

Genus of tropical American epiphytic orchids with showy racemose flowers.

- *The article explained what “genus schomburgkia” means with a simple example.*
- *She wrote a short paragraph that included “genus schomburgkia.”*

---

genus sciadopitys *(noun)*

Type and sole genus of Sciadopityaceae; Japanese umbrella pines.

- *He looked up “genus sciadopitys” because he had never seen it before.*
- *Understanding “genus sciadopitys” helps you talk about this topic clearly.*

---

genus scindapsus *(noun)*

Evergreen climbers with adhesive adventitious roots; southeastern Asia and Brazil.

- *She wrote a short paragraph that included “genus scindapsus.”*
- *He looked up “genus scindapsus” because he had never seen it before.*

---

genus scleranthus *(noun)*

Small genus of Old World weedy prostrate annuals: knawel.

- *He looked up “genus scleranthus” because he had never seen it before.*
- *Understanding “genus scleranthus” helps you talk about this topic clearly.*

---

genus scolopendrium *(noun)*

A genus of ferns belonging to the family Polypodiaceae (in some classification systems included in genus Asplenium).

- *He looked up "genus scolopendrium" because he had never seen it before.*
- *She wrote a short paragraph that included "genus scolopendrium."*

---

genus scolymus *(noun)*

Small genus of thistlelike herbs of the Mediterranean region.

- *The article explained what "genus scolymus" means with a simple example.*
- *Understanding "genus scolymus" helps you talk about this topic clearly.*

---

genus scopolia *(noun)*

Genus of European perennial herbs yielding medicinal alkaloids.

- *Understanding "genus scopolia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus scopolia."*

---

genus scorzonera *(noun)*

Genus of narrow-leaved European herbs.

- *He looked up "genus scorzonera" because he had never seen it before.*
- *In class, the teacher used "genus scorzonera" to mean genus of narrow-leaved european herbs.*

---

genus scrophularia *(noun)*

Type genus of Scrophulariaceae; named for the plants' supposed ability to cure scrofula: figworts.

- *They discussed "genus scrophularia" during the group presentation.*
- *He looked up "genus scrophularia" because he had never seen it before.*

---

genus sebastiana *(noun)*

Mexican spurges.

- *The article explained what "genus sebastiana" means with a simple example.*
- *In class, the teacher used "genus sebastiana" to mean mexican spurges.*

---

genus selenicereus *(noun)*

Mostly epiphytic climbing cacti that bloom at night.

- *They discussed "genus selenicereus" during the group presentation.*
- *The article explained what "genus selenicereus" means with a simple example.*

---

genus selenipedium *(noun)*

Genus of tall reedlike tropical American orchids; includes species with pods used locally as a substitute for vanilla.

- *Understanding "genus selenipedium" helps you talk about this topic clearly.*
- *They discussed "genus selenipedium" during the group presentation.*

---

genus septobasidium *(noun)*

Type genus of Septobasidiaceae: smooth shelf fungi usually having a well-developed sometimes thick-walled hypobasidium.

- *They discussed "genus septobasidium" during the group presentation.*
- *She wrote a short paragraph that included "genus septobasidium."*

---

genus sequoiadendron *(noun)*

Giant sequoias; sometimes included in the genus Sequoia; until recently placed in the Taxodiaceae.

- *She wrote a short paragraph that included "genus sequoiadendron."*
- *He looked up "genus sequoiadendron" because he had never seen it before.*

---

genus serenoa *(noun)*

One species: saw palmetto.

- *She wrote a short paragraph that included "genus serenoa."*
- *The article explained what "genus serenoa" means with a simple example.*

---

genus sericocarpus *(noun)*

Small genus of herbs of the eastern United States: white-topped asters.

- *They discussed “genus sericocarpus” during the group presentation.*
- *Understanding “genus sericocarpus” helps you talk about this topic clearly.*

---

genus seriphidium *(noun)*

Woody plants grown chiefly for their silver or grey and often aromatic foliage; formerly included in the genus Artemisia.

- *She wrote a short paragraph that included “genus seriphidium.”*
- *He looked up “genus seriphidium” because he had never seen it before.*

---

genus serratula *(noun)*

Genus of Old World perennial herbs with spirally arranged toothed leaves.

- *The article explained what “genus serratula” means with a simple example.*
- *She wrote a short paragraph that included “genus serratula.”*

---

genus seseli *(noun)*

A rosid dicot genus that includes moon carrots.

- *They discussed “genus seseli” during the group presentation.*
- *In class, the teacher used “genus seseli” to mean a rosid dicot genus that includes moon carrots.*

---

genus shortia *(noun)*

Evergreen perennial herbs of North America and eastern Asia: oconee bells.

- *Understanding “genus shortia” helps you talk about this topic clearly.*
- *In class, the teacher used “genus shortia” to mean evergreen perennial herbs of north america and....*

---

genus sidalcea *(noun)*

Genus of showy plants of western North America having palmate leaves and variously colored racemose flowers.

- *Understanding “genus sidalcea” helps you talk about this topic clearly.*
- *In class, the teacher used “genus sidalcea” to mean genus of showy plants of western north america....*

---

genus sideritis *(noun)*

Genus of woolly aromatic herbs or subshrubs or shrubs of Mediterranean region.

- *In class, the teacher used “genus sideritis” to mean genus of woolly aromatic herbs or subshrubs or....*
- *The article explained what “genus sideritis” means with a simple example.*

---

genus silybum *(noun)*

Small genus of east African herbs.

- *She wrote a short paragraph that included “genus silybum.”*
- *Understanding “genus silybum” helps you talk about this topic clearly.*

---

genus simarouba *(noun)*

Type genus of Simaroubaceae; tropical American trees and shrubs having a pale soft wood and bitter bark.

- *They discussed “genus simarouba” during the group presentation.*
- *He looked up “genus simarouba” because he had never seen it before.*

---

genus sinningia *(noun)*

Genus of perennial tuberous herbs and shrubs of Central and South America.

- *Understanding “genus sinningia” helps you talk about this topic clearly.*
- *The article explained what “genus sinningia” means with a simple example.*

---

genus sisymbrium *(noun)*

Genus of Old World annual or biennial or perennial herbs with racemose flowers; many are considered to be weeds.

- *In class, the teacher used “genus sisymbrium” to mean genus of old world annual or biennial or perennial....*
- *The article explained what “genus sisymbrium” means with a simple example.*

---

genus sisyrinchium *(noun)*

Chiefly North American grasslike herbs.

- *She wrote a short paragraph that included “genus sisyrinchium.”*
- *The article explained what “genus sisyrinchium” means with a simple example.*

genus sloanea *(noun)*

Genus of tropical hardwood timber trees.

- *The article explained what "genus sloanea" means with a simple example.*
- *She wrote a short paragraph that included "genus sloanea."*

genus sobralia *(noun)*

Genus of tropical American orchids.

- *She wrote a short paragraph that included "genus sobralia."*
- *He looked up "genus sobralia" because he had never seen it before.*

genus solandra *(noun)*

Shrubby climbers of tropical America.

- *Understanding "genus solandra" helps you talk about this topic clearly.*
- *In class, the teacher used "genus solandra" to mean shrubby climbers of tropical america.*

genus solanopteris *(noun)*

Tropical American epiphytic ferns having rhizomes with tubers and roots as well as scales.

- *The article explained what "genus solanopteris" means with a simple example.*
- *Understanding "genus solanopteris" helps you talk about this topic clearly.*

genus soleirolia *(noun)*

One species; a dwarf creeping mat-forming evergreen herb.

- *The article explained what "genus soleirolia" means with a simple example.*
- *Understanding "genus soleirolia" helps you talk about this topic clearly.*

genus solenostemon *(noun)*

Genus of shrubby often succulent herbs of tropical Africa and Asia; includes some plants often placed in genus Coleus.

- *In class, the teacher used "genus solenostemon" to mean genus of shrubby often succulent herbs of tropical....*
- *The article explained what "genus solenostemon" means with a simple example.*

genus sparaxis *(noun)*

Deciduous perennial herbs of South Africa.

- *She wrote a short paragraph that included "genus sparaxis."*
- *He looked up "genus sparaxis" because he had never seen it before.*

genus sparganium *(noun)*

Type and sole genus of Sparganiaceae; marsh or aquatic herbs of temperate regions.

- *She wrote a short paragraph that included "genus sparganium."*
- *The article explained what "genus sparganium" means with a simple example.*

genus sparmannia *(noun)*

Small genus of tropical African shrubs.

- *In class, the teacher used "genus sparmannia" to mean small genus of tropical african shrubs.*
- *The article explained what "genus sparmannia" means with a simple example.*

genus spartium *(noun)*

One species: Spanish broom.

- *They discussed "genus spartium" during the group presentation.*
- *In class, the teacher used "genus spartium" to mean one species: spanish broom.*

genus spathiphyllum *(noun)*

Evergreen rhizomatous perennials of tropical America and Philippines and Indonesia.

- *Understanding "genus spathiphyllum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus spathiphyllum."*

genus spergula *(noun)*

Small genus of Old World annual herbs: corn spurry.

- *They discussed "genus spergula" during the group presentation.*
- *The article explained what "genus spergula" means with a simple example.*

---

genus spergularia *(noun)*

Chiefly maritime Eurasian herbs: sand spurry; sea spurry.

- *The article explained what "genus spergularia" means with a simple example.*
- *In class, the teacher used "genus spergularia" to mean chiefly maritime eurasian herbs: sand spurry; sea....*

---

genus sphacele *(noun)*

A dicotyledonous genus of the family Labiatae.

- *They discussed "genus sphacele" during the group presentation.*
- *The article explained what "genus sphacele" means with a simple example.*

---

genus sphacelotheca *(noun)*

Genus of smut fungus.

- *He looked up "genus sphacelotheca" because he had never seen it before.*
- *In class, the teacher used "genus sphacelotheca" to mean genus of smut fungus.*

---

genus sphaeralcea *(noun)*

Large genus of chiefly tropical herbs with showy flowers and mostly globose fruits: globe mallows.

- *She wrote a short paragraph that included "genus sphaeralcea."*
- *He looked up "genus sphaeralcea" because he had never seen it before.*

---

genus sphaerocarpos *(noun)*

Type genus of Sphaerocarpaceae; liverworts with small many-lobed usually orbicular thallus.

- *In class, the teacher used "genus sphaerocarpos" to mean type genus of sphaerocarpaceae; liverworts with....*
- *Understanding "genus sphaerocarpos" helps you talk about this topic clearly.*

---

genus sphaerocarpus *(noun)*

Type genus of Sphaerocarpaceae; liverworts with small many-lobed usually orbicular thallus.

- *In class, the teacher used "genus sphaerocarpus" to mean type genus of sphaerocarpaceae; liverworts with....*
- *The article explained what "genus sphaerocarpus" means with a simple example.*

---

genus spiranthes *(noun)*

Large cosmopolitan genus of white-flowered terrestrial orchids.

- *They discussed "genus spiranthes" during the group presentation.*
- *Understanding "genus spiranthes" helps you talk about this topic clearly.*

---

genus spirodela *(noun)*

Minute aquatic herbs floating on the water surface consisting of a shiny leaflike frond and 2-21 roots.

- *They discussed "genus spirodela" during the group presentation.*
- *He looked up "genus spirodela" because he had never seen it before.*

---

genus spondias *(noun)*

Tropical trees having one-seeded fruit.

- *The article explained what "genus spondias" means with a simple example.*
- *Understanding "genus spondias" helps you talk about this topic clearly.*

---

genus spraguea *(noun)*

Small genus of usually perennial herbs having deep woody taproots and flower heads of umbels or cymes.

- *In class, the teacher used "genus spraguea" to mean small genus of usually perennial herbs having deep....*
- *The article explained what "genus spraguea" means with a simple example.*

---

genus stanhopea *(noun)*

Genus of tropical American epiphytic orchids.

- *They discussed "genus stanhopea" during the group presentation.*

- *He looked up “genus stanhopea” because he had never seen it before.*

---

genus stanleya *(noun)*

Prince’s plume.

- *The article explained what “genus stanleya” means with a simple example.*
- *Understanding “genus stanleya” helps you talk about this topic clearly.*

---

genus stapelia *(noun)*

Genus of foul-smelling plants resembling cacti; found from Africa to East India.

- *She wrote a short paragraph that included “genus stapelia.”*
- *They discussed “genus stapelia” during the group presentation.*

---

genus staphylea *(noun)*

A genus of small trees or shrubs of the family Staphylaceae.

- *She wrote a short paragraph that included “genus staphylea.”*
- *They discussed “genus staphylea” during the group presentation.*

---

genus stelis *(noun)*

Genus of small caespitose orchids of tropical America.

- *Understanding “genus stelis” helps you talk about this topic clearly.*
- *The article explained what “genus stelis” means with a simple example.*

---

genus stenocarpus *(noun)*

Small genus of timber trees; Australia to Malaysia.

- *The article explained what “genus stenocarpus” means with a simple example.*
- *They discussed “genus stenocarpus” during the group presentation.*

---

genus stenochlaena *(noun)*

Large tropical ferns; some epiphytic climbers and some terrestrial bog ferns; Africa; Asia; Australasia.

- *They discussed “genus stenochlaena” during the group presentation.*
- *Understanding “genus stenochlaena” helps you talk about this topic clearly.*

---

genus stenotaphrum *(noun)*

Lawn grasses.

- *He looked up “genus stenotaphrum” because he had never seen it before.*
- *She wrote a short paragraph that included “genus stenotaphrum.”*

---

genus stenotus *(noun)*

Genus of western North American low evergreen shrubs growing in dense tufts.

- *The article explained what “genus stenotus” means with a simple example.*
- *In class, the teacher used “genus stenotus” to mean genus of western north american low evergreen....*

---

genus stephanomeria *(noun)*

Malheur wire lettuce.

- *Understanding “genus stephanomeria” helps you talk about this topic clearly.*
- *In class, the teacher used “genus stephanomeria” to mean malheur wire lettuce.*

---

genus sticherus *(noun)*

Umbrella ferns; warm regions of Australia and New Zealand.

- *He looked up “genus sticherus” because he had never seen it before.*
- *Understanding “genus sticherus” helps you talk about this topic clearly.*

---

genus stizolobium *(noun)*

Genus of tropical herbs and woody vines having trifoliate leaves and showy flowers in axillary clusters.

- *She wrote a short paragraph that included “genus stizolobium.”*
- *He looked up “genus stizolobium” because he had never seen it before.*

---

genus stokesia *(noun)*

One species: stokes' aster.

- *They discussed "genus stokesia" during the group presentation.*
- *The article explained what "genus stokesia" means with a simple example.*

---

genus strekelia *(noun)*

A monocotyledonous genus of the amaryllis family.

- *In class, the teacher used "genus strekelia" to mean a monocotyledonous genus of the amaryllis family.*
- *He looked up "genus strekelia" because he had never seen it before.*

---

genus streptosolen *(noun)*

One species: marmalade bush.

- *In class, the teacher used "genus streptosolen" to mean one species: marmalade bush.*
- *They discussed "genus streptosolen" during the group presentation.*

---

genus strobilomyces *(noun)*

Fungi similar to Boletus but with a shaggy scaly cap.

- *The article explained what "genus strobilomyces" means with a simple example.*
- *In class, the teacher used "genus strobilomyces" to mean fungi similar to boletus but with a shaggy scaly cap.*

---

genus strongylodon *(noun)*

Genus of Polynesian or southeastern Asian shrubs or vines.

- *In class, the teacher used "genus strongylodon" to mean genus of polynesian or southeastern asian shrubs or....*
- *They discussed "genus strongylodon" during the group presentation.*

---

genus stropharia *(noun)*

Genus of gill fungi with brown spores that is closely related to Agaricus; here placed in its own family Strophariaceae.

- *She wrote a short paragraph that included "genus stropharia."*
- *He looked up "genus stropharia" because he had never seen it before.*

---

genus stylomecon *(noun)*

One species: wind poppy.

- *They discussed "genus stylomecon" during the group presentation.*
- *She wrote a short paragraph that included "genus stylomecon."*

---

genus stylophorum *(noun)*

Wood poppies.

- *He looked up "genus stylophorum" because he had never seen it before.*
- *They discussed "genus stylophorum" during the group presentation.*

---

genus styphelia *(noun)*

Australian heathlike shrubs.

- *The article explained what "genus styphelia" means with a simple example.*
- *She wrote a short paragraph that included "genus styphelia."*

---

genus subularia *(noun)*

Small genus of herbs of north temperate regions and mountains of tropical Africa.

- *He looked up "genus subularia" because he had never seen it before.*
- *They discussed "genus subularia" during the group presentation.*

---

genus suillus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *She wrote a short paragraph that included "genus suillus."*
- *He looked up "genus suillus" because he had never seen it before.*

---

genus suksdorfia *(noun)*

Small genus of rhizomatous herbs of northwestern America and South America.

- *They discussed "genus suksdorfia" during the group presentation.*
- *He looked up "genus suksdorfia" because he had never seen it before.*

---

genus sundacarpus *(noun)*

One species.

- *She wrote a short paragraph that included "genus sundacarpus."*
- *Understanding "genus sundacarpus" helps you talk about this topic clearly.*

---

genus swainsona *(noun)*

A genus of Australian herbs and subshrubs: darling peas.

- *The article explained what "genus swainsona" means with a simple example.*
- *She wrote a short paragraph that included "genus swainsona."*

---

genus swertia *(noun)*

Genus of herbs of mountains of North America and Eurasia and Africa.

- *She wrote a short paragraph that included "genus swertia."*
- *He looked up "genus swertia" because he had never seen it before.*

---

genus swietinia *(noun)*

Tropical American mahogany trees.

- *The article explained what "genus swietinia" means with a simple example.*
- *In class, the teacher used "genus swietinia" to mean tropical american mahogany trees.*

---

genus symphoricarpos *(noun)*

Deciduous shrubs of North America and Central America and China.

- *They discussed "genus symphoricarpos" during the group presentation.*
- *Understanding "genus symphoricarpos" helps you talk about this topic clearly.*

---

genus symplocarpus *(noun)*

One species: skunk cabbage.

- *In class, the teacher used "genus symplocarpus" to mean one species: skunk cabbage.*
- *They discussed "genus symplocarpus" during the group presentation.*

---

genus symplocus *(noun)*

Type and sole genus of Symplocaceae including sweetleaf.

- *She wrote a short paragraph that included "genus symplocus."*
- *He looked up "genus symplocus" because he had never seen it before.*

---

genus synchytrium *(noun)*

Simple parasitic fungi including pond scum parasites.

- *The article explained what "genus synchytrium" means with a simple example.*
- *In class, the teacher used "genus synchytrium" to mean simple parasitic fungi including pond scum parasites.*

---

genus syngonium *(noun)*

Epiphytic or terrestrial climbing shrubs of Central and South America; used as ornamental houseplants for their velvety foliage.

- *She wrote a short paragraph that included "genus syngonium."*
- *They discussed "genus syngonium" during the group presentation.*

---

genus tabernaemontana *(noun)*

Evergreen tropical trees and shrubs with milky sap.

- *Understanding "genus tabernaemontana" helps you talk about this topic clearly.*
- *They discussed "genus tabernaemontana" during the group presentation.*

---

genus talinum *(noun)*

Genus of mainly American more-or-less succulent herbs.

- *Understanding "genus talinum" helps you talk about this topic clearly.*
- *In class, the teacher used "genus talinum" to mean genus of mainly american more-or-less succulent herbs.*

genus tamarindus *(noun)*

Widely cultivated tropical trees originally of Africa.

- *Understanding "genus tamarindus" helps you talk about this topic clearly.*
- *The article explained what "genus tamarindus" means with a simple example.*

genus tamus *(noun)*

A genus of tuberous vines of the family Dioscoreaceae; has twining stems and heart-shaped leaves and axillary racemes.

- *He looked up "genus tamus" because he had never seen it before.*
- *In class, the teacher used "genus tamus" to mean a genus of tuberous vines of the family....*

genus taraktagenos *(noun)*

Medium to large Indonesian and Malaysian trees.

- *Understanding "genus taraktagenos" helps you talk about this topic clearly.*
- *They discussed "genus taraktagenos" during the group presentation.*

genus taraktogenos *(noun)*

Medium to large Indonesian and Malaysian trees.

- *He looked up "genus taraktogenos" because he had never seen it before.*
- *They discussed "genus taraktogenos" during the group presentation.*

genus tarrietia *(noun)*

Small genus of east Asian and Australian timber trees.

- *She wrote a short paragraph that included "genus tarrietia."*
- *He looked up "genus tarrietia" because he had never seen it before.*

genus tectaria *(noun)*

Terrestrial or epilithic ferns of tropical rain forests.

- *She wrote a short paragraph that included "genus tectaria."*
- *He looked up "genus tectaria" because he had never seen it before.*

genus telanthera *(noun)*

Used in former classifications systems; now included in genus Alternanthera.

- *He looked up "genus telanthera" because he had never seen it before.*
- *In class, the teacher used "genus telanthera" to mean used in former classifications systems; now....*

genus tellima *(noun)*

Genus of hardy perennials with palmately lobed leaves and long racemes of small nodding five-petaled flowers; western North America.

- *Understanding "genus tellima" helps you talk about this topic clearly.*
- *They discussed "genus tellima" during the group presentation.*

genus templetonia *(noun)*

Genus of Australian shrubs or subshrubs: coral bush.

- *In class, the teacher used "genus templetonia" to mean genus of australian shrubs or subshrubs: coral bush.*
- *The article explained what "genus templetonia" means with a simple example.*

genus terrietia *(noun)*

Small genus of timber trees of eastern Asia, Australasia and tropical Africa that form large buttresses.

- *They discussed "genus terrietia" during the group presentation.*
- *Understanding "genus terrietia" helps you talk about this topic clearly.*

genus tetraclinis *(noun)*

Sandarac tree.

- *In class, the teacher used "genus tetraclinis" to mean sandarac tree.*
- *The article explained what "genus tetraclinis" means with a simple example.*

genus tetragonia *(noun)*

New Zealand spinach.

- *He looked up "genus tetragonia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus tetragonia."*

---

genus tetraneuris *(noun)*

Genus of hairy yellow-flowered plants of the western United States.

- *Understanding "genus tetraneuris" helps you talk about this topic clearly.*
- *He looked up "genus tetraneuris" because he had never seen it before.*

---

genus thelypteris *(noun)*

Marsh ferns: in some classification systems considered part of genus Dryopteris in family Dryopteridaceae.

- *The article explained what "genus thelypteris" means with a simple example.*
- *In class, the teacher used "genus thelypteris" to mean marsh ferns: in some classification systems....*

---

genus thermopsis *(noun)*

Genus of American and Asiatic showy rhizomatous herbs: bush peas.

- *In class, the teacher used "genus thermopsis" to mean genus of american and asiatic showy rhizomatous....*
- *Understanding "genus thermopsis" helps you talk about this topic clearly.*

---

genus thespesia *(noun)*

A small genus of tropical trees including the portia tree.

- *Understanding "genus thespesia" helps you talk about this topic clearly.*
- *He looked up "genus thespesia" because he had never seen it before.*

---

genus thevetia *(noun)*

Genus of poisonous tropical American evergreen shrubs and trees having entire leaves and large cymose flowers.

- *Understanding "genus thevetia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus thevetia."*

---

genus thielavia *(noun)*

Genus of fungi having spherical brown perithecia and some conidia borne in chains; cause root rot.

- *They discussed "genus thielavia" during the group presentation.*
- *She wrote a short paragraph that included "genus thielavia."*

---

genus thlaspi *(noun)*

Herbs of temperate regions: pennycress.

- *The article explained what "genus thlaspi" means with a simple example.*
- *They discussed "genus thlaspi" during the group presentation.*

---

genus thrinax *(noun)*

Small to medium-sized fan palms.

- *In class, the teacher used "genus thrinax" to mean small to medium-sized fan palms.*
- *The article explained what "genus thrinax" means with a simple example.*

---

genus thujopsis *(noun)*

One species; has close similarity to genus Thuja.

- *She wrote a short paragraph that included "genus thujopsis."*
- *They discussed "genus thujopsis" during the group presentation.*

---

genus thunbergia *(noun)*

A genus of herbs or vines of the family Acanthaceae.

- *They discussed "genus thunbergia" during the group presentation.*
- *In class, the teacher used "genus thunbergia" to mean a genus of herbs or vines of the family acanthaceae.*

---

genus thyrsopteris *(noun)*

One species.

- *Understanding "genus thyrsopteris" helps you talk about this topic clearly.*

- *They discussed “genus thyrsopteris” during the group presentation.*

---

genus thysanocarpus *(noun)*

Small genus of herbs of upland regions of the Pacific coast of North America.

- *Understanding “genus thysanocarpus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus thysanocarpus.”*

---

genus tiarella *(noun)*

Small genus of North American herbs having mostly basal leaves and slender racemes of delicate white flowers.

- *Understanding “genus tiarella” helps you talk about this topic clearly.*
- *He looked up “genus tiarella” because he had never seen it before.*

---

genus tilletia *(noun)*

A genus of fungi belonging to the family Tilletiaceae.

- *In class, the teacher used “genus tilletia” to mean a genus of fungi belonging to the family tilletiaceae.*
- *The article explained what “genus tilletia” means with a simple example.*

---

genus tipuana *(noun)*

One species: South American tree: tipu tree.

- *In class, the teacher used “genus tipuana” to mean one species: south american tree: tipu tree.*
- *He looked up “genus tipuana” because he had never seen it before.*

---

genus tithonia *(noun)*

Genus of robust herbs of Mexico and Central America: Mexican sunflower.

- *Understanding “genus tithonia” helps you talk about this topic clearly.*
- *They discussed “genus tithonia” during the group presentation.*

---

genus todea *(noun)*

A genus of delicate ferns belonging to the family Osmundaceae.

- *They discussed “genus todea” during the group presentation.*
- *In class, the teacher used “genus todea” to mean a genus of delicate ferns belonging to the family....*

---

genus tofieldia *(noun)*

Genus of perennial herbs of cool temperate regions; sometimes placed in family Melanthiaceae.

- *They discussed “genus tofieldia” during the group presentation.*
- *In class, the teacher used “genus tofieldia” to mean genus of perennial herbs of cool temperate regions;....*

---

genus tolmiea *(noun)*

One species: pickaback plant.

- *They discussed “genus tolmiea” during the group presentation.*
- *The article explained what “genus tolmiea” means with a simple example.*

---

genus townsendia *(noun)*

Genus of western American low tufted herbs: Easter daisy.

- *In class, the teacher used “genus townsendia” to mean genus of western american low tufted herbs: easter....*
- *He looked up “genus townsendia” because he had never seen it before.*

---

genus trachelospermum *(noun)*

Genus of Asiatic woody vines with milky sap in leaves and stems.

- *The article explained what “genus trachelospermum” means with a simple example.*
- *They discussed “genus trachelospermum” during the group presentation.*

---

genus tragopogon *(noun)*

Genus of Old World herbs with linear entire leaves and yellow or purple flower heads.

- *He looked up “genus tragopogon” because he had never seen it before.*
- *They discussed “genus tragopogon” during the group presentation.*

---

genus trautvetteria *(noun)*

Small genus of perennial herbs: false bugbane.

- *Understanding "genus trautvetteria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus trautvetteria."*

genus tremella *(noun)*

Fungi with yellowish gelatinous sporophores having convolutions resembling those of the brain.

- *He looked up "genus tremella" because he had never seen it before.*
- *In class, the teacher used "genus tremella" to mean fungi with yellowish gelatinous sporophores having....*

genus trichoceros *(noun)*

Small genus of small epiphytic or terrestrial orchids of tropical South America.

- *The article explained what "genus trichoceros" means with a simple example.*
- *She wrote a short paragraph that included "genus trichoceros."*

genus tricholoma *(noun)*

Agarics with white spores and a fleshy stalk and notched gills; of various colors both edible and inedible.

- *Understanding "genus tricholoma" helps you talk about this topic clearly.*
- *They discussed "genus tricholoma" during the group presentation.*

genus trichostema *(noun)*

Genus of North American aromatic herbs or subshrubs: blue curls.

- *She wrote a short paragraph that included "genus trichostema."*
- *He looked up "genus trichostema" because he had never seen it before.*

genus trichostigma *(noun)*

A genus of erect or climbing shrubs found in tropical South America.

- *In class, the teacher used "genus trichostigma" to mean a genus of erect or climbing shrubs found in....*
- *He looked up "genus trichostigma" because he had never seen it before.*

genus triglochin *(noun)*

Perennial or annual bog or marsh plants; includes arrow grass.

- *The article explained what "genus triglochin" means with a simple example.*
- *Understanding "genus triglochin" helps you talk about this topic clearly.*

genus trilisa *(noun)*

Genus of herbs of southern United States.

- *In class, the teacher used "genus trilisa" to mean genus of herbs of southern united states.*
- *They discussed "genus trilisa" during the group presentation.*

genus triostium *(noun)*

Genus of Asiatic and North American herbs: feverroot.

- *Understanding "genus triostium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus triostium."*

genus tripleurospermum *(noun)*

Small genus comprising plants often included in genus Matricaria.

- *She wrote a short paragraph that included "genus tripleurospermum."*
- *He looked up "genus tripleurospermum" because he had never seen it before.*

genus triplochiton *(noun)*

Small genus of tropical African trees with maplelike leaves.

- *They discussed "genus triplochiton" during the group presentation.*
- *She wrote a short paragraph that included "genus triplochiton."*

genus trollius *(noun)*

Perennial herbs of north temperate regions: globeflowers.

- *Understanding "genus trollius" helps you talk about this topic clearly.*
- *They discussed "genus trollius" during the group presentation.*

---

genus truncocolumella *(noun)*

A genus of fungi belonging to the family Rhizopogonaceae.

- *She wrote a short paragraph that included "genus truncocolumella."*
- *He looked up "genus truncocolumella" because he had never seen it before.*

---

genus tubercularia *(noun)*

Type genus of the Tuberculariaceae; fungi with nodules of red or pink conidia; some cause diebacks of woody plants.

- *She wrote a short paragraph that included "genus tubercularia."*
- *Understanding "genus tubercularia" helps you talk about this topic clearly.*

---

genus tulestoma *(noun)*

Type genus of the Tulostomaceae.

- *Understanding "genus tulestoma" helps you talk about this topic clearly.*
- *The article explained what "genus tulestoma" means with a simple example.*

---

genus tulostoma *(noun)*

Type genus of the Tulostomaceae.

- *In class, the teacher used "genus tulostoma" to mean type genus of the tulostomaceae.*
- *They discussed "genus tulostoma" during the group presentation.*

---

genus turreae *(noun)*

Genus of trees and shrubs of tropical Africa and Asia and Australia.

- *In class, the teacher used "genus turreae" to mean genus of trees and shrubs of tropical africa and....*
- *They discussed "genus turreae" during the group presentation.*

---

genus turritis *(noun)*

Closely related to and often included in genus Arabis.

- *He looked up "genus turritis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus turritis."*

---

genus tussilago *(noun)*

Genus of low creeping yellow-flowered perennial herbs of north temperate regions: coltsfoots; in some classifications includes species often placed in other genera especially Homogyne and Petasites.

- *They discussed "genus tussilago" during the group presentation.*
- *The article explained what "genus tussilago" means with a simple example.*

---

genus umbellularia *(noun)*

Aromatic evergreen trees of Pacific coast.

- *The article explained what "genus umbellularia" means with a simple example.*
- *She wrote a short paragraph that included "genus umbellularia."*

---

genus urginea *(noun)*

Mediterranean liliaceous plants; sometimes placed in family Hyacinthaceae.

- *They discussed "genus urginea" during the group presentation.*
- *The article explained what "genus urginea" means with a simple example.*

---

genus urocystis *(noun)*

A genus of smut fungi belonging to the family Tilletiaceae.

- *She wrote a short paragraph that included "genus urocystis."*
- *Understanding "genus urocystis" helps you talk about this topic clearly.*

---

genus ursinia *(noun)*

Genus of South African herbs and shrubs cultivated as ornamentals.

- *The article explained what "genus ursinia" means with a simple example.*
- *In class, the teacher used "genus ursinia" to mean genus of south african herbs and shrubs cultivated....*

genus ustilaginoidea *(noun)*

Genus of imperfect fungi causing plant diseases like smut.

- *He looked up "genus ustilaginoidea" because he had never seen it before.*
- *She wrote a short paragraph that included "genus ustilaginoidea."*

genus ustilago *(noun)*

Type genus of the Ustilaginaceae; genus comprising the loose smuts.

- *He looked up "genus ustilago" because he had never seen it before.*
- *She wrote a short paragraph that included "genus ustilago."*

genus uvularia *(noun)*

Genus of perennial rhizomatous herb of southern and southeastern United States.

- *They discussed "genus uvularia" during the group presentation.*
- *He looked up "genus uvularia" because he had never seen it before.*

genus vaccaria *(noun)*

Cow-cockles.

- *In class, the teacher used "genus vaccaria" to mean cow-cockles.*
- *The article explained what "genus vaccaria" means with a simple example.*

genus valerianella *(noun)*

Genus of Old World annual herbs widely naturalized.

- *In class, the teacher used "genus valerianella" to mean genus of old world annual herbs widely naturalized.*
- *He looked up "genus valerianella" because he had never seen it before.*

genus vangueria *(noun)*

Tropical African and Asiatic trees and shrubs having one-seeded fruit.

- *He looked up "genus vangueria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus vangueria."*

genus verbesina *(noun)*

Herbs and shrubs of warm North America to Mexico; includes plants formerly placed in genus Actinomeris.

- *She wrote a short paragraph that included "genus verbesina."*
- *The article explained what "genus verbesina" means with a simple example.*

genus vesicaria *(noun)*

Small genus of chiefly Mediterranean herbs: bladderpods.

- *They discussed "genus vesicaria" during the group presentation.*
- *She wrote a short paragraph that included "genus vesicaria."*

genus viminaria *(noun)*

One species: Australian leafless shrubs: swamp oak.

- *Understanding "genus viminaria" helps you talk about this topic clearly.*
- *The article explained what "genus viminaria" means with a simple example.*

genus vincetoxicum *(noun)*

Genus of chiefly tropical American vines having cordate leaves and large purple or greenish cymose flowers; supposedly having powers as an antidote.

- *He looked up "genus vincetoxicum" because he had never seen it before.*
- *She wrote a short paragraph that included "genus vincetoxicum."*

genus vittaria *(noun)*

Tropical epiphytic ferns with straplike fronds.

- *In class, the teacher used "genus vittaria" to mean tropical epiphytic ferns with straplike fronds.*
- *The article explained what "genus vittaria" means with a simple example.*

genus volvaria *(noun)*

Agarics having pink spores and a distinct volva.

- *In class, the teacher used "genus volvaria" to mean agarics having pink spores and a distinct volva.*
- *The article explained what "genus volvaria" means with a simple example.*

---

genus volvariella *(noun)*

An important genus of mushrooms in the Orient.

- *They discussed "genus volvariella" during the group presentation.*
- *In class, the teacher used "genus volvariella" to mean an important genus of mushrooms in the orient.*

---

genus weigela *(noun)*

East Asian flowering shrubs.

- *He looked up "genus weigela" because he had never seen it before.*
- *In class, the teacher used "genus weigela" to mean east asian flowering shrubs.*

---

genus welwitchia *(noun)*

Type and sole genus of Welwitschiaceae.

- *She wrote a short paragraph that included "genus welwitchia."*
- *Understanding "genus welwitchia" helps you talk about this topic clearly.*

---

genus wintera *(noun)*

Evergreen shrubs or small trees of Australia and New Zealand.

- *Understanding "genus wintera" helps you talk about this topic clearly.*
- *In class, the teacher used "genus wintera" to mean evergreen shrubs or small trees of australia and....*

---

genus wolffia *(noun)*

Minute rootless aquatic herbs having globular fronds floating on or near the water surface and bearing one flower per frond.

- *Understanding "genus wolffia" helps you talk about this topic clearly.*
- *They discussed "genus wolffia" during the group presentation.*

---

genus wolffiella *(noun)*

Minute rootless aquatic herbs having flat fronds floating on or below the water surface and bearing 1-2 flowers per frond; America and Africa.

- *She wrote a short paragraph that included "genus wolffiella."*
- *They discussed "genus wolffiella" during the group presentation.*

---

genus woodsia *(noun)*

Genus of small to medium-sized usually rock-inhabiting ferns of temperate and cold regions; in some classification systems placed in Polypodiaceae.

- *He looked up "genus woodsia" because he had never seen it before.*
- *They discussed "genus woodsia" during the group presentation.*

---

genus woodwardia *(noun)*

In some classification systems placed in family Polypodiaceae: chain ferns.

- *She wrote a short paragraph that included "genus woodwardia."*
- *Understanding "genus woodwardia" helps you talk about this topic clearly.*

---

genus wyethia *(noun)*

Coarse leafy perennial plants resembling sunflowers found especially in the western United States.

- *The article explained what "genus wyethia" means with a simple example.*
- *In class, the teacher used "genus wyethia" to mean coarse leafy perennial plants resembling sunflowers....*

---

genus wynnea *(noun)*

A genus of fungi belonging to the family Sarcoscyphaceae.

- *In class, the teacher used "genus wynnea" to mean a genus of fungi belonging to the family....*
- *The article explained what "genus wynnea" means with a simple example.*

---

genus xanthorroea *(noun)*

Grass trees; sometimes placed in family Xanthorrhoeaceae.

- *The article explained what "genus xanthorroea" means with a simple example.*

- *Understanding "genus xanthorroea" helps you talk about this topic clearly.*

---

genus xanthosoma *(noun)*

Tropical American tuberous perennials.

- *In class, the teacher used "genus xanthosoma" to mean tropical american tuberous perennials.*
- *They discussed "genus xanthosoma" during the group presentation.*

---

genus xeranthemum *(noun)*

Genus of annual densely hairy herbs of Mediterranean to southwestern Asia.

- *In class, the teacher used "genus xeranthemum" to mean genus of annual densely hairy herbs of....*
- *The article explained what "genus xeranthemum" means with a simple example.*

---

genus xerophyllum *(noun)*

Small genus of North American herbs having grasslike basal leaves: squaw grass; sometimes placed in family Melanthiaceae.

- *The article explained what "genus xerophyllum" means with a simple example.*
- *Understanding "genus xerophyllum" helps you talk about this topic clearly.*

---

genus xylaria *(noun)*

Type genus of Xylariaceae; fungi with perithecia in the upper part of erect black woody stromata.

- *Understanding "genus xylaria" helps you talk about this topic clearly.*
- *In class, the teacher used "genus xylaria" to mean type genus of xylariaceae; fungi with perithecia in....*

---

genus xylomelum *(noun)*

Small species of Australian trees or shrubs; grown for their fruit and flowers.

- *He looked up "genus xylomelum" because he had never seen it before.*
- *In class, the teacher used "genus xylomelum" to mean small species of australian trees or shrubs; grown....*

---

genus xylopia *(noun)*

Tropical evergreen trees or shrubs; chiefly African.

- *Understanding "genus xylopia" helps you talk about this topic clearly.*
- *They discussed "genus xylopia" during the group presentation.*

---

genus xylosma *(noun)*

Genus of tropical American and Asiatic spiny evergreen trees and shrubs.

- *The article explained what "genus xylosma" means with a simple example.*
- *In class, the teacher used "genus xylosma" to mean genus of tropical american and asiatic spiny....*

---

genus xyris *(noun)*

Chiefly American marsh plants, having usually yellow flowers.

- *She wrote a short paragraph that included "genus xyris."*
- *He looked up "genus xyris" because he had never seen it before.*

---

genus zannichellia *(noun)*

Horned pondweed: completely submerged herbs; in some classifications included in Potamogetonaceae.

- *Understanding "genus zannichellia" helps you talk about this topic clearly.*
- *He looked up "genus zannichellia" because he had never seen it before.*

---

genus zerumbet *(noun)*

Perennial rhizomatous herbs of Asia and Australia and Polynesia having ginger-scented rhizomes.

- *He looked up "genus zerumbet" because he had never seen it before.*
- *They discussed "genus zerumbet" during the group presentation.*

---

genus zigadenus *(noun)*

Genus of mostly North American poisonous plants; sometimes placed in family Melanthiaceae.

- *In class, the teacher used "genus zigadenus" to mean genus of mostly north american poisonous plants;....*
- *They discussed "genus zigadenus" during the group presentation.*

---

genus zoisia *(noun)*

Lawn grasses native to southeastern Asia and New Zealand; grown especially in warm regions.

- *The article explained what "genus zoisia" means with a simple example.*
- *Understanding "genus zoisia" helps you talk about this topic clearly.*

---

genus zygocactus *(noun)*

Small genus of Brazilian cacti having flat fleshy usually branched joints and showy red or pink flowers followed by red fleshy fruits.

- *He looked up "genus zygocactus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus zygocactus."*

---

genus zygophyllum *(noun)*

Usually tropical herbs or shrubs having ill-smelling foliage and flower buds that are used as capers: bean capers.

- *Understanding "genus zygophyllum" helps you talk about this topic clearly.*
- *He looked up "genus zygophyllum" because he had never seen it before.*

---

geoffroea *(noun)*

Small genus of shrubs or small trees of tropical and subtropical America.

- *In class, the teacher used "geoffroea" to mean small genus of shrubs or small trees of tropical....*
- *He looked up "geoffroea" because he had never seen it before.*

---

geoffroea decorticans *(noun)*

Thorny shrub or small tree common in central Argentina having small orange or yellow flowers followed by edible berries.

- *They discussed "geoffroea decorticans" during the group presentation.*
- *He looked up "geoffroea decorticans" because he had never seen it before.*

---

geogia holly *(noun)*

A holly shrub.

- *He looked up "geogia holly" because he had never seen it before.*
- *Understanding "geogia holly" helps you talk about this topic clearly.*

---

geoglossaceae *(noun)*

A family of fungi belonging to the order Helotiales.

- *In class, the teacher used "geoglossaceae" to mean a family of fungi belonging to the order helotiales.*
- *He looked up "geoglossaceae" because he had never seen it before.*

---

geoglossum *(noun)*

Type genus of the Geoglossaceae comprising the earthtongues.

- *She wrote a short paragraph that included "geoglossum."*
- *He looked up "geoglossum" because he had never seen it before.*

---

geophyte *(noun)*

A perennial plant that propagates by underground bulbs or tubers or corms.

- *They discussed "geophyte" during the group presentation.*
- *She wrote a short paragraph that included "geophyte."*

---

geraniaceae *(noun)*

Chiefly herbaceous plants.

- *The article explained what "geraniaceae" means with a simple example.*
- *They discussed "geraniaceae" during the group presentation.*

---

geraniales *(noun)*

An order of plants of subclass Rosidae including geraniums and many other plants; see Euphorbiaceae; Geraniaceae; Rutaceae; Malpighiaceae; Simaroubaceae; Meliaceae; Zygophyllaceae; Tropaeolaceae.

- *She wrote a short paragraph that included "geraniales."*
- *Understanding "geraniales" helps you talk about this topic clearly.*

---

geranium richardsonii *(noun)*

Geranium of western North America having branched clusters of white or pale pink flowers.

- *She wrote a short paragraph that included "geranium richardsonii."*
- *The article explained what "geranium richardsonii" means with a simple example.*

---

geranium robertianum *(noun)*

A sticky low herb with small reddish-purple flowers; widespread in the northern hemisphere.

- *He looked up "geranium robertianum" because he had never seen it before.*
- *She wrote a short paragraph that included "geranium robertianum."*

---

geranium viscosissimum *(noun)*

Geranium of western North America having pinkish-purple flowers in open clusters.

- *He looked up "geranium viscosissimum" because he had never seen it before.*
- *They discussed "geranium viscosissimum" during the group presentation.*

---

gerardia *(noun)*

Any plant of the genus Gerardia.

- *The article explained what "gerardia" means with a simple example.*
- *In class, the teacher used "gerardia" to mean any plant of the genus gerardia.*

---

gerardia pedicularia *(noun)*

Multi-stemmed North American annual having solitary axillary dark golden-yellow flowers resembling those of the foxglove; sometimes placed in genus Gerardia.

- *Understanding "gerardia pedicularia" helps you talk about this topic clearly.*
- *The article explained what "gerardia pedicularia" means with a simple example.*

---

gerardia virginica *(noun)*

Sparsely branched North American perennial with terminal racemes of bright yellow flowers resembling those of the foxglove; sometimes placed in genus Gerardia.

- *She wrote a short paragraph that included "gerardia virginica."*
- *They discussed "gerardia virginica" during the group presentation.*

---

gerbera jamesonii *(noun)*

Widely cultivated South African perennial having flower heads with orange to flame-colored rays.

- *The article explained what "gerbera jamesonii" means with a simple example.*
- *In class, the teacher used "gerbera jamesonii" to mean widely cultivated south african perennial having....*

---

gerea *(noun)*

Small genus of hairy herbs with yellow flowers.

- *In class, the teacher used "gerea" to mean small genus of hairy herbs with yellow flowers.*
- *The article explained what "gerea" means with a simple example.*

---

gerea canescens *(noun)*

Slender hairy plant with few leaves and golden-yellow flower heads; sandy desert areas of southeastern California to southwestern Utah and western Arizona and northwestern Mexico.

- *She wrote a short paragraph that included "gerea canescens."*
- *He looked up "gerea canescens" because he had never seen it before.*

---

gesneria *(noun)*

Any plant of the genus Gesneria.

- *In class, the teacher used "gesneria" to mean any plant of the genus gesneria.*
- *The article explained what "gesneria" means with a simple example.*

---

gesneria family *(noun)*

Large family of tropical herbs or shrubs or lianas; in some classification systems placed in the order Scrophulariales.

- *Understanding "gesneria family" helps you talk about this topic clearly.*
- *In class, the teacher used "gesneria family" to mean large family of tropical herbs or shrubs or lianas;....*

---

gesneriaceae *(noun)*

Large family of tropical herbs or shrubs or lianas; in some classification systems placed in the order Scrophulariales.

- *Understanding "gesneriaceae" helps you talk about this topic clearly.*
- *He looked up "gesneriaceae" because he had never seen it before.*

gesneriad *(noun)*

Any of numerous tropical or subtropical small shrubs or treelets or epiphytic vines of the family Gesneriaceae: African violet; Cape primroses; gloxinia.

- *He looked up "gesneriad" because he had never seen it before.*
- *They discussed "gesneriad" during the group presentation.*

geum alleppicum strictum *(noun)*

Erect subshrub with deep yellow flowers; Europe and Asia and North America.

- *They discussed "geum alleppicum strictum" during the group presentation.*
- *In class, the teacher used "geum alleppicum strictum" to mean erect subshrub with deep yellow flowers; europe and....*

geum macrophyllum *(noun)*

Hairy yellow-flowered plant of eastern Asia and North America.

- *She wrote a short paragraph that included "geum macrophyllum."*
- *Understanding "geum macrophyllum" helps you talk about this topic clearly.*

geum rivale *(noun)*

Erect perennial of north temperate zone having pinnate leaves and a few nodding flowers with a brown-purple calyx and orange and pink petals.

- *She wrote a short paragraph that included "geum rivale."*
- *He looked up "geum rivale" because he had never seen it before.*

geum strictum *(noun)*

Erect subshrub with deep yellow flowers; Europe and Asia and North America.

- *The article explained what "geum strictum" means with a simple example.*
- *Understanding "geum strictum" helps you talk about this topic clearly.*

geum triflorum *(noun)*

North American perennial with hairy basal pinnate leaves and purple flowers and plume-tipped fruits.

- *In class, the teacher used "geum triflorum" to mean north american perennial with hairy basal pinnate....*
- *They discussed "geum triflorum" during the group presentation.*

geum urbanum *(noun)*

Hairy Eurasian plant with small yellow flowers and an astringent root formerly used medicinally.

- *In class, the teacher used "geum urbanum" to mean hairy eurasian plant with small yellow flowers and....*
- *The article explained what "geum urbanum" means with a simple example.*

geum virginianum *(noun)*

Avens of Virginia having pale or greenish yellow flowers.

- *They discussed "geum virginianum" during the group presentation.*
- *The article explained what "geum virginianum" means with a simple example.*

giant chinkapin *(noun)*

Small ornamental evergreen tree of Pacific Coast whose glossy yellow-green leaves are yellow beneath; bears edible nuts.

- *In class, the teacher used "giant chinkapin" to mean small ornamental evergreen tree of pacific coast....*
- *He looked up "giant chinkapin" because he had never seen it before.*

giant helleborine *(noun)*

Orchid growing along streams or ponds of western North America having leafy stems and 1 greenish-brown and pinkish flower in the axil of each upper leaf.

- *Understanding "giant helleborine" helps you talk about this topic clearly.*
- *He looked up "giant helleborine" because he had never seen it before.*

giant willowherb *(noun)*

Tall North American perennial with creeping rootstocks and narrow leaves and spikes of pinkish-purple flowers occurring in great abundance in burned-over areas or recent clearings; an important honey plant.

- *In class, the teacher used "giant willowherb" to mean tall north american perennial with creeping....*
- *Understanding "giant willowherb" helps you talk about this topic clearly.*

gidgee *(noun)*

Scrubby Australian acacia having extremely foul-smelling blossoms.

- *She wrote a short paragraph that included "gidgee."*
- *He looked up "gidgee" because he had never seen it before.*

---

ginep *(noun)*

Tropical American tree bearing a small edible fruit with green leathery skin and sweet juicy translucent pulp.

- *The article explained what "ginep" means with a simple example.*
- *In class, the teacher used "ginep" to mean tropical american tree bearing a small edible fruit....*

---

ginkgoaceae *(noun)*

Constituting the order Ginkgoales; includes the genus Ginkgo and extinct forms.

- *In class, the teacher used "ginkgoaceae" to mean constituting the order ginkgoales; includes the....*
- *The article explained what "ginkgoaceae" means with a simple example.*

---

ginkgoales *(noun)*

Coextensive with the family Ginkgoaceae: plants that first appeared in the Permian and now represented by a single surviving species; often included in Coniferales.

- *He looked up "ginkgoales" because he had never seen it before.*
- *She wrote a short paragraph that included "ginkgoales."*

---

ginkgophytina *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *In class, the teacher used "ginkgophytina" to mean ginkgos: in some systems classified as a class and....*
- *The article explained what "ginkgophytina" means with a simple example.*

---

ginkgopsida *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *He looked up "ginkgopsida" because he had never seen it before.*
- *She wrote a short paragraph that included "ginkgopsida."*

---

gipsywort *(noun)*

Hairy Eurasian herb with two-lipped white flowers.

- *Understanding "gipsywort" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gipsywort."*

---

glaciate *(verb)*

Cover with ice or snow or a glacier.

- *The entire area was glaciated.*
- *The coach explained when to use "glaciate" and when to wait.*

---

gladdon *(noun)*

Iris with purple flowers and foul-smelling leaves; southern and western Europe and North Africa.

- *The article explained what "gladdon" means with a simple example.*
- *In class, the teacher used "gladdon" to mean iris with purple flowers and foul-smelling leaves;....*

---

gladdon iris *(noun)*

Iris with purple flowers and foul-smelling leaves; southern and western Europe and North Africa.

- *In class, the teacher used "gladdon iris" to mean iris with purple flowers and foul-smelling leaves;....*
- *Understanding "gladdon iris" helps you talk about this topic clearly.*

---

glasswort *(noun)*

Bushy plant of Old World salt marshes and sea beaches having prickly leaves; burned to produce a crude soda ash.

- *Understanding "glasswort" helps you talk about this topic clearly.*
- *The article explained what "glasswort" means with a simple example.*

---

glaucium *(noun)*

Herbs of Europe and North Africa and Asia: horned poppy.

- *The article explained what "glaucium" means with a simple example.*
- *They discussed "glaucium" during the group presentation.*

---

glaucium flavum *(noun)*

Yellow-flowered Eurasian glaucous herb naturalized in along sandy shores in eastern North America.

- *Understanding "glaucium flavum" helps you talk about this topic clearly.*
- *The article explained what "glaucium flavum" means with a simple example.*

---

glaucous bristlegrass *(noun)*

Common weedy and bristly grass found in nearly all temperate areas.

- *He looked up "glaucous bristlegrass" because he had never seen it before.*
- *She wrote a short paragraph that included "glaucous bristlegrass."*

---

glaux *(noun)*

Sea milkwort.

- *They discussed "glaux" during the group presentation.*
- *The article explained what "glaux" means with a simple example.*

---

glaux maritima *(noun)*

A small fleshy herb common along North American seashores and in brackish marshes having pink or white flowers.

- *She wrote a short paragraph that included "glaux maritima."*
- *They discussed "glaux maritima" during the group presentation.*

---

glechoma hederaceae *(noun)*

Trailing European aromatic plant of the mint family having rounded leaves and small purplish flowers often grown in hanging baskets; naturalized in North America; sometimes placed in genus Nepeta.

- *She wrote a short paragraph that included "glechoma hederaceae."*
- *They discussed "glechoma hederaceae" during the group presentation.*

---

gleditsia *(noun)*

Deciduous trees: honey locusts.

- *Understanding "gleditsia" helps you talk about this topic clearly.*
- *In class, the teacher used "gleditsia" to mean deciduous trees: honey locusts.*

---

gleditsia aquatica *(noun)*

Honey locust of swamps and bottomlands of southern United States having short oval pods; yields dark heavy wood.

- *They discussed "gleditsia aquatica" during the group presentation.*
- *In class, the teacher used "gleditsia aquatica" to mean honey locust of swamps and bottomlands of southern....*

---

gleditsia triacanthos *(noun)*

Tall usually spiny North American tree having small greenish-white flowers in drooping racemes followed by long twisting seed pods; yields very hard durable reddish-brown wood; introduced to temperate Old World.

- *In class, the teacher used "gleditsia triacanthos" to mean tall usually spiny north american tree having small....*
- *The article explained what "gleditsia triacanthos" means with a simple example.*

---

gleichenia *(noun)*

Type genus of Gleicheniaceae: leptosporangiate ferns with sessile sporangia; South Africa to Malaysia and New Zealand.

- *She wrote a short paragraph that included "gleichenia."*
- *He looked up "gleichenia" because he had never seen it before.*

---

gleichenia flabellata *(noun)*

Large Australasian fern with fanlike repeatedly forked fronds; sometimes placed in genus Gleichenia.

- *The article explained what "gleichenia flabellata" means with a simple example.*
- *She wrote a short paragraph that included "gleichenia flabellata."*

---

gleicheniaceae *(noun)*

A family of ferns belonging to order Filicales.

- *The article explained what "gleicheniaceae" means with a simple example.*

- *In class, the teacher used "gleicheniaceae" to mean a family of ferns belonging to order filicales.*

gliricidia *(noun)*

Any of several small deciduous trees valued for their dark wood and dense racemes of nectar-rich pink flowers grown in great profusion on arching branches; roots and bark and leaves and seeds are poisonous.

- *The article explained what "gliricidia" means with a simple example.*
- *In class, the teacher used "gliricidia" to mean any of several small deciduous trees valued for....*

globeflower *(noun)*

Any of several plants of the genus Trollius having globose yellow flowers.

- *In class, the teacher used "globeflower" to mean any of several plants of the genus trollius having....*
- *The article explained what "globeflower" means with a simple example.*

glochid *(noun)*

A barbed spine or bristle (often tufted on cacti).

- *He looked up "glochid" because he had never seen it before.*
- *She wrote a short paragraph that included "glochid."*

glochidium *(noun)*

A barbed spine or bristle (often tufted on cacti).

- *They discussed "glochidium" during the group presentation.*
- *He looked up "glochidium" because he had never seen it before.*

glomerule *(noun)*

A compacted or sessile cyme.

- *In class, the teacher used "glomerule" to mean a compacted or sessile cyme.*
- *He looked up "glomerule" because he had never seen it before.*

glossodia *(noun)*

Small genus of Australian orchids.

- *They discussed "glossodia" during the group presentation.*
- *The article explained what "glossodia" means with a simple example.*

gloxinia spesiosa *(noun)*

South American herb cultivated in many varieties as a houseplant for its large handsome leaves and large variously colored bell-shaped flowers.

- *He looked up "gloxinia spesiosa" because he had never seen it before.*
- *In class, the teacher used "gloxinia spesiosa" to mean south american herb cultivated in many varieties as....*

glycyrrhiza lepidota *(noun)*

North American plant similar to true licorice and having a root with similar properties.

- *Understanding "glycyrrhiza lepidota" helps you talk about this topic clearly.*
- *In class, the teacher used "glycyrrhiza lepidota" to mean north american plant similar to true licorice and....*

gnaphalium *(noun)*

Large widely distributed genus of coarse hairy herbs with whitish involucres.

- *In class, the teacher used "gnaphalium" to mean large widely distributed genus of coarse hairy....*
- *He looked up "gnaphalium" because he had never seen it before.*

gnaphalium sylvaticum *(noun)*

Weedy perennial of north temperate regions having woolly foliage and dirty white flowers in a leafy spike.

- *The article explained what "gnaphalium sylvaticum" means with a simple example.*
- *In class, the teacher used "gnaphalium sylvaticum" to mean weedy perennial of north temperate regions having....*

gnetaceae *(noun)*

Plants having small unisexual flowers and fleshy or winged fruit: in some classifications includes the genera Ephedra and Welwitschia as well as genus Gnetum.

- *She wrote a short paragraph that included "gnetaceae."*
- *He looked up "gnetaceae" because he had never seen it before.*

gnetales *(noun)*

Chiefly tropical or xerophytic woody plants; practically unknown as fossils but considered close to the ancestral line of angiosperms.

- *They discussed "gnetales" during the group presentation.*
- *He looked up "gnetales" because he had never seen it before.*

gnetophyta *(noun)*

Gymnospermous flowering plants; supposed link between conifers and angiosperms; in some systems classified as a class (Gnetopsida) and in others as a subdivision (Gnetophytina or Gnetophyta).

- *They discussed "gnetophyta" during the group presentation.*
- *He looked up "gnetophyta" because he had never seen it before.*

gnetophytina *(noun)*

Gymnospermous flowering plants; supposed link between conifers and angiosperms; in some systems classified as a class (Gnetopsida) and in others as a subdivision (Gnetophytina or Gnetophyta).

- *He looked up "gnetophytina" because he had never seen it before.*
- *They discussed "gnetophytina" during the group presentation.*

gnetopsida *(noun)*

Gymnospermous flowering plants; supposed link between conifers and angiosperms; in some systems classified as a class (Gnetopsida) and in others as a subdivision (Gnetophytina or Gnetophyta).

- *Understanding "gnetopsida" helps you talk about this topic clearly.*
- *In class, the teacher used "gnetopsida" to mean gymnospermous flowering plants; supposed link....*

gnetum *(noun)*

Small tropical tree with tiered branches and divaricate branchlets having broad glossy dark green leaves; exploited for its edible young leaves and seeds that provide a fine flour.

- *Understanding "gnetum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gnetum."*

gnetum gnemon *(noun)*

Small tropical tree with tiered branches and divaricate branchlets having broad glossy dark green leaves; exploited for its edible young leaves and seeds that provide a fine flour.

- *In class, the teacher used "gnetum gnemon" to mean small tropical tree with tiered branches and....*
- *He looked up "gnetum gnemon" because he had never seen it before.*

goatsbeard *(noun)*

Weedy European annual with yellow flowers; naturalized in United States.

- *Understanding "goatsbeard" helps you talk about this topic clearly.*
- *They discussed "goatsbeard" during the group presentation.*

goatsfoot *(noun)*

Short-stemmed South African plant with bluish flowers.

- *He looked up "goatsfoot" because he had never seen it before.*
- *In class, the teacher used "goatsfoot" to mean short-stemmed south african plant with bluish flowers.*

goldcup *(noun)*

Any of various plants of the genus Ranunculus.

- *In class, the teacher used "goldcup" to mean any of various plants of the genus ranunculus.*
- *Understanding "goldcup" helps you talk about this topic clearly.*

golden chinkapin *(noun)*

Small ornamental evergreen tree of Pacific Coast whose glossy yellow-green leaves are yellow beneath; bears edible nuts.

- *In class, the teacher used "golden chinkapin" to mean small ornamental evergreen tree of pacific coast....*
- *The article explained what "golden chinkapin" means with a simple example.*

golden crownbeard *(noun)*

Coarse greyish-green annual yellow-flowered herb; southwestern United States to Mexico.

- *In class, the teacher used "golden crownbeard" to mean coarse greyish-green annual yellow-flowered herb;....*
- *They discussed "golden crownbeard" during the group presentation.*

golden pholiota *(noun)*

A beautiful yellow gilled fungus found from Alaska south along the coast.

- *They discussed "golden pholiota" during the group presentation.*
- *She wrote a short paragraph that included "golden pholiota."*

---

golden polypody *(noun)*

Tropical American fern with brown scaly rhizomes cultivated for its large deeply lobed deep bluish-green fronds; sometimes placed in genus Polypodium.

- *She wrote a short paragraph that included "golden polypody."*
- *Understanding "golden polypody" helps you talk about this topic clearly.*

---

goldenbush *(noun)*

A plant of the genus Haplopappus.

- *They discussed "goldenbush" during the group presentation.*
- *Understanding "goldenbush" helps you talk about this topic clearly.*

---

goldthread *(noun)*

Low-growing perennial of North America woodlands having trifoliate leaves and yellow rootstock and white flowers.

- *He looked up "goldthread" because he had never seen it before.*
- *Understanding "goldthread" helps you talk about this topic clearly.*

---

gomphrena *(noun)*

Genus of tropical herbs or subshrubs having flowers in close heads; tropical America and Australia.

- *She wrote a short paragraph that included "gomphrena."*
- *Understanding "gomphrena" helps you talk about this topic clearly.*

---

gomphrena globosa *(noun)*

Tropical American herb having rose to red or purple flowers that can be dried without losing color.

- *Understanding "gomphrena globosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gomphrena globosa."*

---

gomuti *(noun)*

Malaysian feather palm with base densely clothed with fibers; yields a sweet sap used in wine and trunk pith yields sago.

- *She wrote a short paragraph that included "gomuti."*
- *Understanding "gomuti" helps you talk about this topic clearly.*

---

gomuti palm *(noun)*

Malaysian feather palm with base densely clothed with fibers; yields a sweet sap used in wine and trunk pith yields sago.

- *The article explained what "gomuti palm" means with a simple example.*
- *In class, the teacher used "gomuti palm" to mean malaysian feather palm with base densely clothed....*

---

goniopteris *(noun)*

Terrestrial ferns of Florida and West Indies to Central and South America.

- *The article explained what "goniopteris" means with a simple example.*
- *Understanding "goniopteris" helps you talk about this topic clearly.*

---

goodenia *(noun)*

A genus of shrubs and herbs that grow in Australia and New Guinea and Malaysia and southeast Asia.

- *He looked up "goodenia" because he had never seen it before.*
- *She wrote a short paragraph that included "goodenia."*

---

goodenia family *(noun)*

A family of sappy plants that grow in Australasia and southeast China.

- *In class, the teacher used "goodenia family" to mean a family of sappy plants that grow in australasia....*
- *He looked up "goodenia family" because he had never seen it before.*

---

goodeniaceae *(noun)*

A family of sappy plants that grow in Australasia and southeast China.

- *In class, the teacher used "goodeniaceae" to mean a family of sappy plants that grow in australasia....*

- *The article explained what "goodeniaceae" means with a simple example.*

---

goodyera *(noun)*

Genus of small orchids of the northern hemisphere with creeping rhizomes and stalked ovate leaves and small flowers.

- *In class, the teacher used "goodyera" to mean genus of small orchids of the northern hemisphere....*
- *They discussed "goodyera" during the group presentation.*

---

goora nut *(noun)*

Tree bearing large brown nuts containing e.g. caffeine; source of cola extract.

- *They discussed "goora nut" during the group presentation.*
- *He looked up "goora nut" because he had never seen it before.*

---

gopherwood *(noun)*

Small handsome roundheaded deciduous tree having showy white flowers in terminal clusters and heavy hardwood yielding yellow dye.

- *In class, the teacher used "gopherwood" to mean small handsome roundheaded deciduous tree having....*
- *The article explained what "gopherwood" means with a simple example.*

---

gosan-chiku *(noun)*

Small bamboo of southeastern China having slender culms flexuous when young.

- *The article explained what "gosan-chiku" means with a simple example.*
- *Understanding "gosan-chiku" helps you talk about this topic clearly.*

---

gosmore *(noun)*

European weed widely naturalized in North America having yellow flower heads and leaves resembling a cat's ears.

- *Understanding "gosmore" helps you talk about this topic clearly.*
- *He looked up "gosmore" because he had never seen it before.*

---

gossypium barbadense *(noun)*

Small bushy tree grown on islands of the Caribbean and off the Atlantic coast of the southern United States; yields cotton with unusually long silky fibers.

- *She wrote a short paragraph that included "gossypium barbadense."*
- *Understanding "gossypium barbadense" helps you talk about this topic clearly.*

---

gossypium herbaceum *(noun)*

Old World annual having heart-shaped leaves and large seeds with short greyish lint removed with difficulty; considered an ancestor of modern short-staple cottons.

- *In class, the teacher used "gossypium herbaceum" to mean old world annual having heart-shaped leaves and....*
- *Understanding "gossypium herbaceum" helps you talk about this topic clearly.*

---

gossypium peruvianum *(noun)*

Cotton with long rough hairy fibers.

- *He looked up "gossypium peruvianum" because he had never seen it before.*
- *She wrote a short paragraph that included "gossypium peruvianum."*

---

gossypium thurberi *(noun)*

Shrub of southern Arizona and Mexico.

- *She wrote a short paragraph that included "gossypium thurberi."*
- *They discussed "gossypium thurberi" during the group presentation.*

---

graminaceae *(noun)*

The grasses: chiefly herbaceous but some woody plants including cereals; bamboo; reeds; sugar cane.

- *They discussed "graminaceae" during the group presentation.*
- *In class, the teacher used "graminaceae" to mean the grasses: chiefly herbaceous but some woody....*

---

graminaceous plant *(noun)*

Cosmopolitan herbaceous or woody plants with hollow jointed stems and long narrow leaves.

- *They discussed "graminaceous plant" during the group presentation.*
- *In class, the teacher used "graminaceous plant" to mean cosmopolitan herbaceous or woody plants with hollow....*

---

graminales *(noun)*

Grasses; sedges; rushes.

- *The article explained what “graminales” means with a simple example.*
- *In class, the teacher used “graminales” to mean grasses; sedges; rushes.*

---

gramineous plant *(noun)*

Cosmopolitan herbaceous or woody plants with hollow jointed stems and long narrow leaves.

- *She wrote a short paragraph that included “gramineous plant.”*
- *The article explained what “gramineous plant” means with a simple example.*

---

grammatophyllum *(noun)*

Small genus of large epiphytic or terrestrial orchids of southeastern Asia to Polynesia; the giants of the Orchidaceae having long narrow leaves and drooping flower clusters often 6 feet long.

- *The article explained what “grammatophyllum” means with a simple example.*
- *They discussed “grammatophyllum” during the group presentation.*

---

granadillo *(noun)*

West Indian tree yielding a fine grade of green ebony.

- *The article explained what “granadillo” means with a simple example.*
- *Understanding “granadillo” helps you talk about this topic clearly.*

---

graptophyllum *(noun)*

Caricature plant.

- *He looked up “graptophyllum” because he had never seen it before.*
- *In class, the teacher used “graptophyllum” to mean caricature plant.*

---

graptophyllum pictum *(noun)*

Tropical Old World shrub having purple or red tubular flowers and leaf markings resembling the profile of a human face.

- *He looked up “graptophyllum pictum” because he had never seen it before.*
- *In class, the teacher used “graptophyllum pictum” to mean tropical old world shrub having purple or red....*

---

grass vetchling *(noun)*

Annual European vetch with red flowers.

- *He looked up “grass vetchling” because he had never seen it before.*
- *She wrote a short paragraph that included “grass vetchling.”*

---

gravelweed *(noun)*

Perennial herb with yellow flowers; southern and south central United States.

- *In class, the teacher used “gravelweed” to mean perennial herb with yellow flowers; southern and....*
- *He looked up “gravelweed” because he had never seen it before.*

---

gray polypody *(noun)*

Fern growing on rocks or tree trunks and having fronds greyish and scurfy below; Americas and South Africa.

- *She wrote a short paragraph that included “gray polypody.”*
- *He looked up “gray polypody” because he had never seen it before.*

---

great yellowcress *(noun)*

Perennial herb found on streams and riversides throughout Europe except extreme north and Mediterranean; sometimes placed in genus Nasturtium.

- *They discussed “great yellowcress” during the group presentation.*
- *The article explained what “great yellowcress” means with a simple example.*

---

greater masterwort *(noun)*

European herb with aromatic roots and leaves in a basal tuft and showy compound umbels of white to rosy flowers.

- *In class, the teacher used “greater masterwort” to mean european herb with aromatic roots and leaves in a....*
- *Understanding “greater masterwort” helps you talk about this topic clearly.*

---

greater spearwort *(noun)*

Semiaquatic European crowfoot with leaves shaped like spears.

- *She wrote a short paragraph that included “greater spearwort.”*
- *The article explained what “greater spearwort” means with a simple example.*

---

greater stitchwort *(noun)*

Low-growing north temperate herb having small white star-shaped flowers; named for its alleged ability to ease sharp pains in the side.

- *The article explained what “greater stitchwort” means with a simple example.*
- *Understanding “greater stitchwort” helps you talk about this topic clearly.*

---

green bristlegrass *(noun)*

European foxtail naturalized in North America; often a troublesome weed.

- *Understanding “green bristlegrass” helps you talk about this topic clearly.*
- *They discussed “green bristlegrass” during the group presentation.*

---

green spleenwort *(noun)*

A small fern with slim green fronds; widely distributed in cool parts of northern hemisphere.

- *In class, the teacher used “green spleenwort” to mean a small fern with slim green fronds; widely....*
- *They discussed “green spleenwort” during the group presentation.*

---

greenhood *(noun)*

Any of numerous orchids of the genus Pterostylis having leaves in a basal rosette and green flowers often striped purple or brown or red with the dorsal sepal incurved to form a hood.

- *She wrote a short paragraph that included “greenhood.”*
- *He looked up “greenhood” because he had never seen it before.*

---

greenweed *(noun)*

Small Eurasian shrub having clusters of yellow flowers that yield a dye; common as a weed in Britain and the United States; sometimes grown as an ornamental.

- *Understanding “greenweed” helps you talk about this topic clearly.*
- *In class, the teacher used “greenweed” to mean small eurasian shrub having clusters of yellow....*

---

grevillea banksii *(noun)*

Tall shrub with cylindrical racemes of red flowers and pinnatifid leaves silky and grey beneath; eastern Australia.

- *Understanding “grevillea banksii” helps you talk about this topic clearly.*
- *He looked up “grevillea banksii” because he had never seen it before.*

---

grevillela parallela *(noun)*

Small slender tree with usually entire grey-green pendulous leaves and white or cream-colored flowers; northern Australia.

- *The article explained what “grevillela parallela” means with a simple example.*
- *She wrote a short paragraph that included “grevillela parallela.”*

---

grey polypody *(noun)*

Fern growing on rocks or tree trunks and having fronds greyish and scurfy below; Americas and South Africa.

- *They discussed “grey polypody” during the group presentation.*
- *Understanding “grey polypody” helps you talk about this topic clearly.*

---

grias *(noun)*

Anchovy pear tree.

- *In class, the teacher used “grias” to mean anchovy pear tree.*
- *The article explained what “grias” means with a simple example.*

---

grias cauliflora *(noun)*

West Indian tree bearing edible fruit resembling mango.

- *He looked up “grias cauliflora” because he had never seen it before.*
- *Understanding “grias cauliflora” helps you talk about this topic clearly.*

---

grifola frondosa *(noun)*

Large greyish-brown edible fungus forming a mass of overlapping caps that somewhat resembles a hen at the base of trees.

- *In class, the teacher used “grifola frondosa” to mean large greyish-brown edible fungus forming a mass of....*
- *He looked up “grifola frondosa” because he had never seen it before.*

grindelia *(noun)*

Large genus of coarse gummy herbs of western North and Central America.

- *She wrote a short paragraph that included "grindelia."*
- *He looked up "grindelia" because he had never seen it before.*

grindelia robusta *(noun)*

Perennial gumweed of California and Baja California.

- *The article explained what "grindelia robusta" means with a simple example.*
- *Understanding "grindelia robusta" helps you talk about this topic clearly.*

grindelia squarrosa *(noun)*

Perennial gumweed of western and central North America.

- *In class, the teacher used "grindelia squarrosa" to mean perennial gumweed of western and central north america.*
- *They discussed "grindelia squarrosa" during the group presentation.*

griselinia *(noun)*

Evergreen shrubs of New Zealand and South America.

- *She wrote a short paragraph that included "griselinia."*
- *He looked up "griselinia" because he had never seen it before.*

griselinia littoralis *(noun)*

Small New Zealand broadleaf evergreen tree often cultivated in warm regions as an ornamental.

- *In class, the teacher used "griselinia littoralis" to mean small new zealand broadleaf evergreen tree often....*
- *Understanding "griselinia littoralis" helps you talk about this topic clearly.*

griselinia lucida *(noun)*

South American shrub or small tree having long shining evergreen leaves and panicles of green or yellow flowers.

- *They discussed "griselinia lucida" during the group presentation.*
- *He looked up "griselinia lucida" because he had never seen it before.*

groenlandia *(noun)*

A monocotyledonous genus of the family Potamogetonaceae.

- *He looked up "groenlandia" because he had never seen it before.*
- *They discussed "groenlandia" during the group presentation.*

gromwell *(noun)*

European perennial branching plant; occurs in hedgerows and at the edge of woodlands.

- *The article explained what "gromwell" means with a simple example.*
- *Understanding "gromwell" helps you talk about this topic clearly.*

grossulariaceae *(noun)*

In some classifications considered a part of the family Saxifragaceae: plants whose fruit is a berry.

- *He looked up "grossulariaceae" because he had never seen it before.*
- *Understanding "grossulariaceae" helps you talk about this topic clearly.*

groundberry *(noun)*

Small prostrate or ascending shrub having scarlet flowers and succulent fruit resembling cranberries; sometimes placed in genus Styphelia.

- *The article explained what "groundberry" means with a simple example.*
- *Understanding "groundberry" helps you talk about this topic clearly.*

group amentiferae *(noun)*

Used in some classification systems for plants that bear catkins.

- *Understanding "group amentiferae" helps you talk about this topic clearly.*
- *They discussed "group amentiferae" during the group presentation.*

group centrospermae *(noun)*

Used in former classification systems; approximately synonymous with order Caryophyllales.

- *The article explained what "group centrospermae" means with a simple example.*
- *In class, the teacher used "group centrospermae" to mean used in former classification systems;....*

---

group pteridospermae *(noun)*

Used in some classification systems: a group of extinct fossil gymnosperms coextensive with the order Cycadofilicales.

- *The article explained what "group pteridospermae" means with a simple example.*
- *She wrote a short paragraph that included "group pteridospermae."*

---

group pteridospermaphyta *(noun)*

Used in some classification systems: a group of extinct fossil gymnosperms coextensive with the order Cycadofilicales.

- *Understanding "group pteridospermaphyta" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "group pteridospermaphyta."*

---

grouse whortleberry *(noun)*

Shrub of northwestern North America bearing red berries.

- *He looked up "grouse whortleberry" because he had never seen it before.*
- *Understanding "grouse whortleberry" helps you talk about this topic clearly.*

---

grouseberry *(noun)*

Shrub of northwestern North America bearing red berries.

- *The article explained what "grouseberry" means with a simple example.*
- *In class, the teacher used "grouseberry" to mean shrub of northwestern north america bearing red berries.*

---

grugru *(noun)*

Tropical American feather palm having a swollen spiny trunk and edible nuts.

- *Understanding "grugru" helps you talk about this topic clearly.*
- *The article explained what "grugru" means with a simple example.*

---

grugru palm *(noun)*

Tropical American feather palm having a swollen spiny trunk and edible nuts.

- *He looked up "grugru palm" because he had never seen it before.*
- *They discussed "grugru palm" during the group presentation.*

---

guama *(noun)*

Tropical tree of Central America and West Indies and Puerto Rico having spikes of white flowers; used as shade for coffee plantations.

- *She wrote a short paragraph that included "guama."*
- *He looked up "guama" because he had never seen it before.*

---

guevina *(noun)*

One species: Chilean nut.

- *She wrote a short paragraph that included "guevina."*
- *Understanding "guevina" helps you talk about this topic clearly.*

---

guevina avellana *(noun)*

Chilean shrub bearing coral-red fruit with an edible seed resembling a hazelnut.

- *They discussed "guevina avellana" during the group presentation.*
- *She wrote a short paragraph that included "guevina avellana."*

---

guevina heterophylla *(noun)*

Chilean shrub bearing coral-red fruit with an edible seed resembling a hazelnut.

- *He looked up "guevina heterophylla" because he had never seen it before.*
- *She wrote a short paragraph that included "guevina heterophylla."*

---

gumweed *(noun)*

Any of various western American plants of the genus Grindelia having resinous leaves and stems formerly used medicinally; often poisonous to livestock.

- *In class, the teacher used "gumweed" to mean any of various western american plants of the genus....*

- *Understanding "gumweed" helps you talk about this topic clearly.*

---

gumwood *(noun)*

Wood or lumber from any of various gum trees especially the sweet gum.

- *Understanding "gumwood" helps you talk about this topic clearly.*
- *In class, the teacher used "gumwood" to mean wood or lumber from any of various gum trees....*

---

gutierrezia *(noun)*

Sticky perennial herbs and subshrubs of western North America and warm South America.

- *She wrote a short paragraph that included "gutierrezia."*
- *He looked up "gutierrezia" because he had never seen it before.*

---

gutierrezia microcephala *(noun)*

Similar to Gutierrezia sarothrae but with flower heads having fewer rays and disk flowers.

- *They discussed "gutierrezia microcephala" during the group presentation.*
- *In class, the teacher used "gutierrezia microcephala" to mean similar to gutierrezia sarothrae but with flower....*

---

gutierrezia sarothrae *(noun)*

Low-growing sticky subshrub of southwestern United States having narrow linear leaves on many slender branches and hundreds of tiny yellow flower heads.

- *In class, the teacher used "gutierrezia sarothrae" to mean low-growing sticky subshrub of southwestern united....*
- *The article explained what "gutierrezia sarothrae" means with a simple example.*

---

gutierrezia texana *(noun)*

Annual of southwestern United States having rigid woody branches with sticky foliage and yellow flowers.

- *Understanding "gutierrezia texana" helps you talk about this topic clearly.*
- *The article explained what "gutierrezia texana" means with a simple example.*

---

guttiferae *(noun)*

Widely distributed family of chiefly tropical trees and shrubs and vines that produce oils and resins and some usable timber.

- *He looked up "guttiferae" because he had never seen it before.*
- *In class, the teacher used "guttiferae" to mean widely distributed family of chiefly tropical trees....*

---

guttiferales *(noun)*

Used in some classifications; coextensive with Parietales.

- *They discussed "guttiferales" during the group presentation.*
- *The article explained what "guttiferales" means with a simple example.*

---

gymnadenia *(noun)*

Small genus of terrestrial orchids of North America and temperate Eurasia.

- *The article explained what "gymnadenia" means with a simple example.*
- *Understanding "gymnadenia" helps you talk about this topic clearly.*

---

gymnadenia conopsea *(noun)*

European orchid having dense spikes of fragrant pink or lilac or red flowers with conspicuous spurs.

- *The article explained what "gymnadenia conopsea" means with a simple example.*
- *In class, the teacher used "gymnadenia conopsea" to mean european orchid having dense spikes of fragrant....*

---

gymnadenia odoratissima *(noun)*

Similar to Gymnadenia conopsea but with smaller flowers on shorter stems and having much shorter spurs.

- *He looked up "gymnadenia odoratissima" because he had never seen it before.*
- *She wrote a short paragraph that included "gymnadenia odoratissima."*

---

gymnadeniopsis *(noun)*

Genus of North American terrestrial orchids usually included in genus Habenaria.

- *Understanding "gymnadeniopsis" helps you talk about this topic clearly.*
- *He looked up "gymnadeniopsis" because he had never seen it before.*

---

gymnocalycium *(noun)*

Large genus of low-growing globular South American cacti with spiny ribs covered with many tubercles.

- *They discussed "gymnocalycium" during the group presentation.*
- *She wrote a short paragraph that included "gymnocalycium."*

---

gymnocarpium *(noun)*

Oak ferns: in some classification systems included in genus Thelypteris.

- *They discussed "gymnocarpium" during the group presentation.*
- *Understanding "gymnocarpium" helps you talk about this topic clearly.*

---

gymnocarpium dryopteris *(noun)*

Bright blue-green fern widely distributed especially in damp acid woodlands of temperate northern hemisphere.

- *In class, the teacher used "gymnocarpium dryopteris" to mean bright blue-green fern widely distributed....*
- *They discussed "gymnocarpium dryopteris" during the group presentation.*

---

gymnocarpium robertianum *(noun)*

Yellow-green fern of rocky areas of northern hemisphere.

- *They discussed "gymnocarpium robertianum" during the group presentation.*
- *He looked up "gymnocarpium robertianum" because he had never seen it before.*

---

gymnocladus *(noun)*

Small genus of deciduous trees of China and United States having paniculate flowers and thick pulpy pods.

- *Understanding "gymnocladus" helps you talk about this topic clearly.*
- *In class, the teacher used "gymnocladus" to mean small genus of deciduous trees of china and united....*

---

gymnocladus dioica *(noun)*

Handsome tree of central and eastern North America having large bipinnate leaves and green-white flowers followed by large woody brown pods whose seeds are used as a coffee substitute.

- *The article explained what "gymnocladus dioica" means with a simple example.*
- *In class, the teacher used "gymnocladus dioica" to mean handsome tree of central and eastern north america....*

---

gymnomycota *(noun)*

Slime molds; organisms having a noncellular and multinucleate creeping vegetative phase and a propagative spore-producing stage: comprises Myxomycetes and Acrasiomycetes; in some classifications placed in the kingdom Protoctista.

- *She wrote a short paragraph that included "gymnomycota."*
- *The article explained what "gymnomycota" means with a simple example.*

---

gymnopilus *(noun)*

A genus of fungus characterized by the orange color of the spore deposit.

- *She wrote a short paragraph that included "gymnopilus."*
- *Understanding "gymnopilus" helps you talk about this topic clearly.*

---

gymnopilus spectabilis *(noun)*

A fungus with a brownish orange fruiting body and a ring near the top of the stalk; the taste is bitter and the flesh contains psilocybin and psilocin.

- *He looked up "gymnopilus spectabilis" because he had never seen it before.*
- *Understanding "gymnopilus spectabilis" helps you talk about this topic clearly.*

---

gymnopilus validipes *(noun)*

A poisonous fungus with a dry cap and a cortina that does not leave much of a ring on the robust stalk.

- *He looked up "gymnopilus validipes" because he had never seen it before.*
- *Understanding "gymnopilus validipes" helps you talk about this topic clearly.*

---

gymnopilus ventricosus *(noun)*

A giant fungus of the Pacific Northwest; has a very thick stalk and the cortina leaves a ring high up on the stalk.

- *In class, the teacher used "gymnopilus ventricosus" to mean a giant fungus of the pacific northwest; has a very....*
- *The article explained what "gymnopilus ventricosus" means with a simple example.*

---

gymnospermous tree *(noun)*

Any tree of the division Gymnospermophyta.

- *He looked up "gymnospermous tree" because he had never seen it before.*
- *In class, the teacher used "gymnospermous tree" to mean any tree of the division gymnospermophyta.*

---

gymnospermous yellowwood *(noun)*

Any of various gymnospermous trees having yellow wood.

- *The article explained what "gymnospermous yellowwood" means with a simple example.*
- *In class, the teacher used "gymnospermous yellowwood" to mean any of various gymnospermous trees having yellow wood.*

---

gymnosporangium *(noun)*

Genus of fungi that produce galls on cedars and other conifers of genera Juniperus and Libocedrus and causes rust spots on apples and pears and other plants of family Rosaceae.

- *The article explained what "gymnosporangium" means with a simple example.*
- *She wrote a short paragraph that included "gymnosporangium."*

---

gymnosporangium juniperi-virginianae *(noun)*

Rust fungus causing rust spots on apples and pears etc.

- *The article explained what "gymnosporangium juniperi-virginianae" means with a simple example.*
- *In class, the teacher used "gymnosporangium juniperi-virginianae" to mean rust fungus causing rust spots on apples and pears etc.*

---

gynobase *(noun)*

The enlarged receptacle in which the pistil is borne.

- *He looked up "gynobase" because he had never seen it before.*
- *They discussed "gynobase" during the group presentation.*

---

gynophore *(noun)*

The stalk of a pistil that raises it above the receptacle.

- *The article explained what "gynophore" means with a simple example.*
- *She wrote a short paragraph that included "gynophore."*

---

gynostegium *(noun)*

The crown of the stamen in plants of the genus Asclepias.

- *They discussed "gynostegium" during the group presentation.*
- *He looked up "gynostegium" because he had never seen it before.*

---

gynura *(noun)*

Genus of Old World tropical herbs: velvet plants.

- *Understanding "gynura" helps you talk about this topic clearly.*
- *They discussed "gynura" during the group presentation.*

---

gynura aurantiaca *(noun)*

Javanese foliage plant grown for their handsome velvety leaves with violet-purple hairs.

- *The article explained what "gynura aurantiaca" means with a simple example.*
- *Understanding "gynura aurantiaca" helps you talk about this topic clearly.*

---

gypsyweed *(noun)*

Common hairy European perennial with pale blue or lilac flowers in axillary racemes.

- *The article explained what "gypsyweed" means with a simple example.*
- *Understanding "gypsyweed" helps you talk about this topic clearly.*

---

gypsywort *(noun)*

Hairy Eurasian herb with two-lipped white flowers.

- *In class, the teacher used "gypsywort" to mean hairy eurasian herb with two-lipped white flowers.*
- *He looked up "gypsywort" because he had never seen it before.*

---

gyromitra *(noun)*

Any fungus of the genus Gyromitra.

- *In class, the teacher used "gyromitra" to mean any fungus of the genus gyromitra.*
- *Understanding "gyromitra" helps you talk about this topic clearly.*

gyromitra brunnea *(noun)*

A lorchel with deep brownish red fertile part and white stalk.

- *They discussed "gyromitra brunnea" during the group presentation.*
- *She wrote a short paragraph that included "gyromitra brunnea."*

gyromitra californica *(noun)*

A gyromitra with a brown puffed up fertile part and a thick fluted stalk; found under conifers in California.

- *The article explained what "gyromitra californica" means with a simple example.*
- *In class, the teacher used "gyromitra californica" to mean a gyromitra with a brown puffed up fertile part and....*

gyromitra esculenta *(noun)*

A poisonous gyromitra; the surface of the fertile body is smooth at first and becomes progressively undulating and wrinkled (but never truly pitted); color varies from dull yellow to brown.

- *In class, the teacher used "gyromitra esculenta" to mean a poisonous gyromitra; the surface of the fertile....*
- *The article explained what "gyromitra esculenta" means with a simple example.*

gyromitra fastigiata *(noun)*

A lorchel with deep brownish red fertile part and white stalk.

- *They discussed "gyromitra fastigiata" during the group presentation.*
- *The article explained what "gyromitra fastigiata" means with a simple example.*

gyromitra gigas *(noun)*

A gyromitra with a large irregular stalk and fertile part that is yellow to brown and wrinkled; has early fruiting time.

- *The article explained what "gyromitra gigas" means with a simple example.*
- *They discussed "gyromitra gigas" during the group presentation.*

gyromitra infula *(noun)*

A poisonous fungus; saddle-shaped and dull yellow to brown fertile part is relatively even.

- *They discussed "gyromitra infula" during the group presentation.*
- *He looked up "gyromitra infula" because he had never seen it before.*

gyromitra sphaerospora *(noun)*

A gyromitra with a brown puffed up fertile part and a rosy pink fluted stalk and smooth round spores; found on hardwood slash east of the Great Plains.

- *The article explained what "gyromitra sphaerospora" means with a simple example.*
- *They discussed "gyromitra sphaerospora" during the group presentation.*

haastia *(noun)*

Genus of New Zealand mat-forming herbs or subshrubs: vegetable sheep.

- *They discussed "haastia" during the group presentation.*
- *He looked up "haastia" because he had never seen it before.*

haastia pulvinaris *(noun)*

Cushion-forming New Zealand herb having leaves densely covered with tawny hairs.

- *He looked up "haastia pulvinaris" because he had never seen it before.*
- *Understanding "haastia pulvinaris" helps you talk about this topic clearly.*

habenaria albiflora *(noun)*

Bog orchid of eastern North America with a spike of pure white fringed flowers.

- *They discussed "habenaria albiflora" during the group presentation.*
- *The article explained what "habenaria albiflora" means with a simple example.*

habenaria bifolia *(noun)*

South European orchid having fragrant greenish-white flowers; sometimes placed in genus Habenaria.

- *She wrote a short paragraph that included "habenaria bifolia."*
- *Understanding "habenaria bifolia" helps you talk about this topic clearly.*

habenaria chlorantha *(noun)*

South European orchid with dark green flowers that are larger and less fragrant than Platanthera bifolia; sometimes placed in genus Habenaria.

- *They discussed "habenaria chlorantha" during the group presentation.*
- *The article explained what "habenaria chlorantha" means with a simple example.*

habenaria greenei *(noun)*

Stout orchid of central California to northern Washington having racemes of white fragrant bilaterally symmetrical flowers.

- *He looked up "habenaria greenei" because he had never seen it before.*
- *She wrote a short paragraph that included "habenaria greenei."*

habenaria lacera *(noun)*

Fringed orchid of the eastern United States having a greenish flower with the lip deeply lacerated.

- *They discussed "habenaria lacera" during the group presentation.*
- *He looked up "habenaria lacera" because he had never seen it before.*

habenaria leucophaea *(noun)*

Orchid of boggy or wet lands of north central United States having racemes of very fragrant creamy or greenish white flowers.

- *He looked up "habenaria leucophaea" because he had never seen it before.*
- *In class, the teacher used "habenaria leucophaea" to mean orchid of boggy or wet lands of north central....*

habenaria orbiculata *(noun)*

Orchid having a raceme of large greenish-white flowers on a single flower stalk growing between two elliptic or round basal leaves lying on the ground; from northern Oregon and Montana across Canada to the eastern United States.

- *She wrote a short paragraph that included "habenaria orbiculata."*
- *The article explained what "habenaria orbiculata" means with a simple example.*

habenaria peramoena *(noun)*

Orchid of northeastern and alpine eastern North America closely related to the purple fringed orchids but having rosy-purple or violet flowers with denticulate leaf divisions.

- *They discussed "habenaria peramoena" during the group presentation.*
- *Understanding "habenaria peramoena" helps you talk about this topic clearly.*

habenaria psycodes *(noun)*

North American orchid with clusters of fragrant purple fringed flowers.

- *They discussed "habenaria psycodes" during the group presentation.*
- *She wrote a short paragraph that included "habenaria psycodes."*

habenaria unalascensis *(noun)*

Similar to coastal rein orchid but with smaller flowers; Alaska to Baja California and east to the Dakotas and Colorado.

- *In class, the teacher used "habenaria unalascensis" to mean similar to coastal rein orchid but with smaller....*
- *The article explained what "habenaria unalascensis" means with a simple example.*

hackelia *(noun)*

Stickweed; beggar's lice.

- *Understanding "hackelia" helps you talk about this topic clearly.*
- *The article explained what "hackelia" means with a simple example.*

hackmatack *(noun)*

Poplar of northeastern North America with broad heart-shaped leaves.

- *In class, the teacher used "hackmatack" to mean poplar of northeastern north america with broad....*
- *He looked up "hackmatack" because he had never seen it before.*

haemanthus *(noun)*

Genus of African deciduous or evergreen bulbous herbs: blood lilies.

- *Understanding "haemanthus" helps you talk about this topic clearly.*
- *In class, the teacher used "haemanthus" to mean genus of african deciduous or evergreen bulbous....*

haemanthus coccineus *(noun)*

Spectacular plant having large prostrate leaves barred in reddish-purple and flowers with a clump of long yellow stamens in a coral-red cup of fleshy bracts; South Africa.

- *In class, the teacher used "haemanthus coccineus" to mean spectacular plant having large prostrate leaves....*

- *They discussed "haemanthus coccineus" during the group presentation.*

---

haematoxylon *(noun)*

Small genus of tropical American spiny bushy shrubs or trees.

- *The article explained what "haematoxylon" means with a simple example.*
- *They discussed "haematoxylon" during the group presentation.*

---

haematoxylum *(noun)*

Small genus of tropical American spiny bushy shrubs or trees.

- *Understanding "haematoxylum" helps you talk about this topic clearly.*
- *In class, the teacher used "haematoxylum" to mean small genus of tropical american spiny bushy shrubs....*

---

haematoxylum campechianum *(noun)*

Spiny shrub or small tree of Central America and West Indies having bipinnate leaves and racemes of small bright yellow flowers and yielding a hard brown or brownish-red heartwood used in preparing a black dye.

- *The article explained what "haematoxylum campechianum" means with a simple example.*
- *In class, the teacher used "haematoxylum campechianum" to mean spiny shrub or small tree of central america and....*

---

haemodoraceae *(noun)*

Some genera placed in family Liliaceae.

- *He looked up "haemodoraceae" because he had never seen it before.*
- *In class, the teacher used "haemodoraceae" to mean some genera placed in family liliaceae.*

---

haemodorum *(noun)*

Type genus of family Haemodoraceae.

- *They discussed "haemodorum" during the group presentation.*
- *In class, the teacher used "haemodorum" to mean type genus of family haemodoraceae.*

---

hagberry *(noun)*

Small cherry much liked by birds.

- *In class, the teacher used "hagberry" to mean small cherry much liked by birds.*
- *He looked up "hagberry" because he had never seen it before.*

---

hagberry tree *(noun)*

Small European cherry tree closely resembling the American chokecherry.

- *Understanding "hagberry tree" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hagberry tree."*

---

hairy willowherb *(noun)*

Plant of Europe and Asia having purplish-red flowers and hairy stems and leaves; introduced into North America.

- *He looked up "hairy willowherb" because he had never seen it before.*
- *She wrote a short paragraph that included "hairy willowherb."*

---

hakea leucoptera *(noun)*

Large bushy shrub with pungent pointed leaves and creamy white flowers; central and eastern Australia.

- *In class, the teacher used "hakea leucoptera" to mean large bushy shrub with pungent pointed leaves and....*
- *The article explained what "hakea leucoptera" means with a simple example.*

---

hakea lissosperma *(noun)*

Shrub with pungent rigid needle-shaped leaves and white flowers; eastern Australia.

- *In class, the teacher used "hakea lissosperma" to mean shrub with pungent rigid needle-shaped leaves and....*
- *Understanding "hakea lissosperma" helps you talk about this topic clearly.*

---

halenia *(noun)*

Genus of herbs of Eurasia and the Americas: spurred gentians.

- *Understanding "halenia" helps you talk about this topic clearly.*
- *They discussed "halenia" during the group presentation.*

halesia *(noun)*

Deciduous small trees or shrubs of China and eastern North America.

- *She wrote a short paragraph that included "halesia."*
- *The article explained what "halesia" means with a simple example.*

halesia carolina *(noun)*

Medium-sized tree of West Virginia to Florida and Texas.

- *He looked up "halesia carolina" because he had never seen it before.*
- *She wrote a short paragraph that included "halesia carolina."*

halesia tetraptera *(noun)*

Medium-sized tree of West Virginia to Florida and Texas.

- *She wrote a short paragraph that included "halesia tetraptera."*
- *He looked up "halesia tetraptera" because he had never seen it before.*

halimodendron *(noun)*

One species: salt tree.

- *In class, the teacher used "halimodendron" to mean one species: salt tree.*
- *Understanding "halimodendron" helps you talk about this topic clearly.*

halimodendron argenteum *(noun)*

Spiny shrub of the Caspian salt plains and Siberia having elegant silvery, downy young foliage and mildly fragrant pink-purple blooms.

- *He looked up "halimodendron argenteum" because he had never seen it before.*
- *She wrote a short paragraph that included "halimodendron argenteum."*

halimodendron halodendron *(noun)*

Spiny shrub of the Caspian salt plains and Siberia having elegant silvery, downy young foliage and mildly fragrant pink-purple blooms.

- *He looked up "halimodendron halodendron" because he had never seen it before.*
- *She wrote a short paragraph that included "halimodendron halodendron."*

halocarbon *(noun)*

One of various compounds of carbon and any of the halogens.

- *They discussed "halocarbon" during the group presentation.*
- *She wrote a short paragraph that included "halocarbon."*

halocarpus *(noun)*

Dioecious trees or shrubs of New Zealand; similar in habit to Dacrydium.

- *In class, the teacher used "halocarpus" to mean dioecious trees or shrubs of new zealand; similar....*
- *The article explained what "halocarpus" means with a simple example.*

halocarpus bidwilli *(noun)*

New Zealand shrub.

- *He looked up "halocarpus bidwilli" because he had never seen it before.*
- *Understanding "halocarpus bidwilli" helps you talk about this topic clearly.*

halogeton *(noun)*

A coarse annual herb introduced into North America from Siberia; dangerous to sheep and cattle on western rangelands because of its high oxalate content.

- *She wrote a short paragraph that included "halogeton."*
- *Understanding "halogeton" helps you talk about this topic clearly.*

halogeton glomeratus *(noun)*

A coarse annual herb introduced into North America from Siberia; dangerous to sheep and cattle on western rangelands because of its high oxalate content.

- *Understanding "halogeton glomeratus" helps you talk about this topic clearly.*
- *He looked up "halogeton glomeratus" because he had never seen it before.*

halogeton souda *(noun)*

Algerian plant formerly burned to obtain calcium carbonate.

- *The article explained what "halogeton souda" means with a simple example.*
- *Understanding "halogeton souda" helps you talk about this topic clearly.*

---

halophyte *(noun)*

Plant growing naturally in very salty soil.

- *Understanding "halophyte" helps you talk about this topic clearly.*
- *He looked up "halophyte" because he had never seen it before.*

---

haloragaceae *(noun)*

A family of dicotyledonous plants of the order Myrtales.

- *They discussed "haloragaceae" during the group presentation.*
- *She wrote a short paragraph that included "haloragaceae."*

---

haloragidaceae *(noun)*

A family of dicotyledonous plants of the order Myrtales.

- *In class, the teacher used "haloragidaceae" to mean a family of dicotyledonous plants of the order myrtales.*
- *The article explained what "haloragidaceae" means with a simple example.*

---

hamamelid dicot family *(noun)*

Family of mostly woody dicotyledonous flowering plants with flowers often unisexual and often borne in catkins.

- *She wrote a short paragraph that included "hamamelid dicot family."*
- *The article explained what "hamamelid dicot family" means with a simple example.*

---

hamamelid dicot genus *(noun)*

Genus of mostly woody relatively primitive dicotyledonous flowering plants with flowers often unisexual and often borne in catkins.

- *She wrote a short paragraph that included "hamamelid dicot genus."*
- *Understanding "hamamelid dicot genus" helps you talk about this topic clearly.*

---

hamamelidaceae *(noun)*

Comprises genera Hamamelis, Corylopsis, Fothergilla, Liquidambar, Parrotia, and other small genera.

- *The article explained what "hamamelidaceae" means with a simple example.*
- *They discussed "hamamelidaceae" during the group presentation.*

---

hamamelidanthum *(noun)*

Genus of fossil plants of the Oligocene having flowers resembling those of the witch hazel; found in Baltic region.

- *They discussed "hamamelidanthum" during the group presentation.*
- *In class, the teacher used "hamamelidanthum" to mean genus of fossil plants of the oligocene having....*

---

hamamelidoxylon *(noun)*

Genus of fossil plants having wood identical with or similar to that of the witch hazel.

- *The article explained what "hamamelidoxylon" means with a simple example.*
- *In class, the teacher used "hamamelidoxylon" to mean genus of fossil plants having wood identical with....*

---

hamamelites *(noun)*

Genus of fossil plants having leaves similar to those of the witch hazel.

- *He looked up "hamamelites" because he had never seen it before.*
- *In class, the teacher used "hamamelites" to mean genus of fossil plants having leaves similar to....*

---

hamelia *(noun)*

Any of several flowering tropical or subtropical shrubs of the genus Hamelia.

- *She wrote a short paragraph that included "hamelia."*
- *Understanding "hamelia" helps you talk about this topic clearly.*

---

hamelia erecta *(noun)*

Handsome shrub with showy orange to scarlet or crimson flowers; Florida and West Indies to Mexico and Brazil.

- *She wrote a short paragraph that included "hamelia erecta."*

- *Understanding "hamelia erecta" helps you talk about this topic clearly.*

hamelia patens *(noun)*

Handsome shrub with showy orange to scarlet or crimson flowers; Florida and West Indies to Mexico and Brazil.

- *In class, the teacher used "hamelia patens" to mean handsome shrub with showy orange to scarlet or....*
- *The article explained what "hamelia patens" means with a simple example.*

haplopappus *(noun)*

Genus of North and South American perennial herbs or shrubs with yellow flowers; in some classifications include species placed in other genera especially Hazardia.

- *The article explained what "haplopappus" means with a simple example.*
- *She wrote a short paragraph that included "haplopappus."*

haplopappus acaulis *(noun)*

Dark green erect herb of northwestern United States and southwestern Canada having stiff leaves in dense tufts and yellow flower heads; sometimes placed in genus Haplopappus.

- *They discussed "haplopappus acaulis" during the group presentation.*
- *Understanding "haplopappus acaulis" helps you talk about this topic clearly.*

haplopappus phyllocephalus *(noun)*

Annual of southern United States and Mexico having bristly leaves and pale yellow flowers.

- *He looked up "haplopappus phyllocephalus" because he had never seen it before.*
- *They discussed "haplopappus phyllocephalus" during the group presentation.*

haplopappus spinulosus *(noun)*

Slender perennial of western North America having weakly bristly leaves and yellow flower heads.

- *Understanding "haplopappus spinulosus" helps you talk about this topic clearly.*
- *He looked up "haplopappus spinulosus" because he had never seen it before.*

hardenbergia *(noun)*

Small genus of Australian woody vines with small violet flowers; closely related to genus Kennedia.

- *Understanding "hardenbergia" helps you talk about this topic clearly.*
- *He looked up "hardenbergia" because he had never seen it before.*

hardenbergia comnptoniana *(noun)*

Vigorous climber of the forests of western Australia; grown for their dense racemes of attractive bright rose-purple flowers.

- *She wrote a short paragraph that included "hardenbergia comnptoniana."*
- *He looked up "hardenbergia comnptoniana" because he had never seen it before.*

hardinggrass *(noun)*

Perennial grass of Australia and South Africa; introduced in North America as forage grass.

- *They discussed "hardinggrass" during the group presentation.*
- *Understanding "hardinggrass" helps you talk about this topic clearly.*

hardstem bulrush *(noun)*

Widely distributed North American sedge having rigid olive green stems.

- *They discussed "hardstem bulrush" during the group presentation.*
- *He looked up "hardstem bulrush" because he had never seen it before.*

hardstemmed bulrush *(noun)*

Widely distributed North American sedge having rigid olive green stems.

- *The article explained what "hardstemmed bulrush" means with a simple example.*
- *In class, the teacher used "hardstemmed bulrush" to mean widely distributed north american sedge having....*

harpulla *(noun)*

Fast-growing tree of India and East Indies yielding a wood used especially for building.

- *They discussed "harpulla" during the group presentation.*
- *Understanding "harpulla" helps you talk about this topic clearly.*

harpullia *(noun)*

Any of various tree of the genus Harpullia.

- *Understanding "harpullia" helps you talk about this topic clearly.*
- *They discussed "harpullia" during the group presentation.*

---

harpullia cupanioides *(noun)*

Fast-growing tree of India and East Indies yielding a wood used especially for building.

- *In class, the teacher used "harpullia cupanioides" to mean fast-growing tree of india and east indies yielding....*
- *The article explained what "harpullia cupanioides" means with a simple example.*

---

harpullia pendula *(noun)*

Australian tree yielding a variegated tulipwood.

- *They discussed "harpullia pendula" during the group presentation.*
- *She wrote a short paragraph that included "harpullia pendula."*

---

harrisia *(noun)*

Genus of slender often treelike spiny cacti with solitary showy nocturnal white or pink flowers; Florida and Caribbean to South America.

- *They discussed "harrisia" during the group presentation.*
- *He looked up "harrisia" because he had never seen it before.*

---

hastate leaf *(noun)*

A leaf shaped like a spearhead with flaring pointed lobes at the base.

- *He looked up "hastate leaf" because he had never seen it before.*
- *They discussed "hastate leaf" during the group presentation.*

---

hatiora *(noun)*

Small genus of South American epiphytic or lithophytic cacti.

- *In class, the teacher used "hatiora" to mean small genus of south american epiphytic or....*
- *The article explained what "hatiora" means with a simple example.*

---

hatiora gaertneri *(noun)*

Spring-blooming South American cactus with oblong joints and coral-red flowers; sometimes placed in genus Schlumbergera.

- *The article explained what "hatiora gaertneri" means with a simple example.*
- *She wrote a short paragraph that included "hatiora gaertneri."*

---

haulm *(noun)*

Stems of beans and peas and potatoes and grasses collectively as used for thatching and bedding.

- *She wrote a short paragraph that included "haulm."*
- *He looked up "haulm" because he had never seen it before.*

---

haustorium *(noun)*

A root-like attachment in parasitic plants that penetrates and obtains food from the host.

- *She wrote a short paragraph that included "haustorium."*
- *He looked up "haustorium" because he had never seen it before.*

---

hawkbit *(noun)*

Any of various common wildflowers of the genus Leontodon; of temperate Eurasia to Mediterranean regions.

- *Understanding "hawkbit" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hawkbit."*

---

hazardia *(noun)*

Small genus of shrubs and subshrubs of western United States having flowers that change color as they mature.

- *Understanding "hazardia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hazardia."*

---

hazardia cana *(noun)*

Western American shrubs having white felted foliage and yellow flowers that become red-purple.

- *They discussed “hazardia cana” during the group presentation.*
- *He looked up “hazardia cana” because he had never seen it before.*

---

heartleaf *(noun)*

Wild ginger having persistent heart-shaped pungent leaves; West Virginia to Alabama.

- *He looked up “heartleaf” because he had never seen it before.*
- *She wrote a short paragraph that included “heartleaf.”*

---

heartleaf arnica *(noun)*

Wildflower with heart-shaped leaves and broad yellow flower heads; of alpine areas west of the Rockies from Alaska to southern California.

- *He looked up “heartleaf arnica” because he had never seen it before.*
- *Understanding “heartleaf arnica” helps you talk about this topic clearly.*

---

heartleaf manzanita *(noun)*

Erect California shrub having leaves with heart-shaped lobes at the base.

- *The article explained what “heartleaf manzanita” means with a simple example.*
- *They discussed “heartleaf manzanita” during the group presentation.*

---

heartseed *(noun)*

Herbaceous vine of tropical America and Africa.

- *She wrote a short paragraph that included “heartseed.”*
- *They discussed “heartseed” during the group presentation.*

---

hedeoma *(noun)*

Small genus of American herbs (American pennyroyal).

- *The article explained what “hedeoma” means with a simple example.*
- *Understanding “hedeoma” helps you talk about this topic clearly.*

---

hedeoma oil *(noun)*

Aromatic oil from American pennyroyal.

- *They discussed “hedeoma oil” during the group presentation.*
- *She wrote a short paragraph that included “hedeoma oil.”*

---

hedeoma pulegioides *(noun)*

Erect hairy branching American herb having purple-blue flowers; yields an essential oil used as an insect repellent and sometimes in folk medicine.

- *She wrote a short paragraph that included “hedeoma pulegioides.”*
- *He looked up “hedeoma pulegioides” because he had never seen it before.*

---

hediondilla *(noun)*

Desert shrub of southwestern United States and New Mexico having persistent resinous aromatic foliage and small yellow flowers.

- *The article explained what “hediondilla” means with a simple example.*
- *In class, the teacher used “hediondilla” to mean desert shrub of southwestern united states and new....*

---

hedysarum coronarium *(noun)*

Perennial of southern Europe cultivated for forage and for its nectar-rich pink flowers that make it an important honey crop.

- *The article explained what “hedysarum coronarium” means with a simple example.*
- *She wrote a short paragraph that included “hedysarum coronarium.”*

---

hegari *(noun)*

Sudanese sorghums having white seeds; one variety grown in southwestern United States.

- *In class, the teacher used “hegari” to mean sudanese sorghums having white seeds; one variety....*
- *The article explained what “hegari” means with a simple example.*

---

helenium autumnale *(noun)*

North American perennial with bright yellow late summer flowers.

- *They discussed “helenium autumnale” during the group presentation.*
- *She wrote a short paragraph that included “helenium autumnale.”*

helenium hoopesii *(noun)*

Stout perennial herb of western United States having flower heads with drooping orange-yellow rays; causes spewing sickness in sheep.

- *They discussed "helenium hoopesii" during the group presentation.*
- *He looked up "helenium hoopesii" because he had never seen it before.*

helenium puberulum *(noun)*

A sneezeweed of southwestern United States especially southern California.

- *Understanding "helenium puberulum" helps you talk about this topic clearly.*
- *In class, the teacher used "helenium puberulum" to mean a sneezeweed of southwestern united states....*

heliamphora *(noun)*

Genus of pitcher plants of the Guiana Highlands in South America.

- *He looked up "heliamphora" because he had never seen it before.*
- *In class, the teacher used "heliamphora" to mean genus of pitcher plants of the guiana highlands in....*

helianthemum *(noun)*

Any plant of the genus Helianthemum; vigorous plants of stony alpine meadows and dry scrub regions.

- *The article explained what "helianthemum" means with a simple example.*
- *In class, the teacher used "helianthemum" to mean any plant of the genus helianthemum; vigorous....*

helianthemum canadense *(noun)*

Perennial of the eastern United States having early solitary yellow flowers followed by late petalless flowers; so-called because ice crystals form on it during first frosts.

- *They discussed "helianthemum canadense" during the group presentation.*
- *In class, the teacher used "helianthemum canadense" to mean perennial of the eastern united states having early....*

helianthemum scoparium *(noun)*

Woody yellow-flowered perennial of southeastern United States.

- *In class, the teacher used "helianthemum scoparium" to mean woody yellow-flowered perennial of southeastern....*
- *He looked up "helianthemum scoparium" because he had never seen it before.*

helianthus angustifolius *(noun)*

Sunflower of eastern North America having narrow leaves and found in bogs.

- *He looked up "helianthus angustifolius" because he had never seen it before.*
- *She wrote a short paragraph that included "helianthus angustifolius."*

helianthus laetiflorus *(noun)*

Tall rough-leaved perennial with a few large flower heads; central United States.

- *They discussed "helianthus laetiflorus" during the group presentation.*
- *In class, the teacher used "helianthus laetiflorus" to mean tall rough-leaved perennial with a few large flower....*

helianthus maximilianii *(noun)*

Tall perennial of central United States to Canada having golden-yellow flowers.

- *Understanding "helianthus maximilianii" helps you talk about this topic clearly.*
- *He looked up "helianthus maximilianii" because he had never seen it before.*

helianthus petiolaris *(noun)*

Similar to the common sunflower with slender usually branching stems common in central United States.

- *The article explained what "helianthus petiolaris" means with a simple example.*
- *Understanding "helianthus petiolaris" helps you talk about this topic clearly.*

helichrysum bracteatum *(noun)*

Australian plant naturalized in Spain having flowers of lemon yellow to deep gold; the frequent choice of those who love dried flowers.

- *She wrote a short paragraph that included "helichrysum bracteatum."*
- *He looked up "helichrysum bracteatum" because he had never seen it before.*

helichrysum secundiflorum *(noun)*

Shrub with white woolly branches and woolly leaves having fragrant flowers forming long sprays; flowers suitable for drying; sometimes placed in genus Helichrysum.

- *The article explained what "helichrysum secundiflorum" means with a simple example.*
- *She wrote a short paragraph that included "helichrysum secundiflorum."*

---

helicteres *(noun)*

Genus of shrubs and small trees of tropical America and Asia having cylindrical fruits spirally twisted around one another.

- *Understanding "helicteres" helps you talk about this topic clearly.*
- *He looked up "helicteres" because he had never seen it before.*

---

helicteres isora *(noun)*

East Indian shrub often cultivated for its hairy leaves and orange-red flowers.

- *In class, the teacher used "helicteres isora" to mean east indian shrub often cultivated for its hairy....*
- *They discussed "helicteres isora" during the group presentation.*

---

heliophila *(noun)*

Any of various South African herbs and subshrubs cultivated for long showy racemes of bright blue flowers with white eyes.

- *They discussed "heliophila" during the group presentation.*
- *The article explained what "heliophila" means with a simple example.*

---

heliopsis *(noun)*

Any North American shrubby perennial herb of the genus Heliopsis having large yellow daisylike flowers.

- *He looked up "heliopsis" because he had never seen it before.*
- *They discussed "heliopsis" during the group presentation.*

---

helipterum *(noun)*

Genus of South African and Australian herbs or shrubs grown as everlastings; the various Helipterum species are currently in process of being assigned to other genera especially genera Pteropogon and Hyalosperma.

- *She wrote a short paragraph that included "helipterum."*
- *The article explained what "helipterum" means with a simple example.*

---

helipterum manglesii *(noun)*

Australian annual everlasting having light pink nodding flower heads; sometimes placed in genus Helipterum.

- *Understanding "helipterum manglesii" helps you talk about this topic clearly.*
- *They discussed "helipterum manglesii" during the group presentation.*

---

helleborine *(noun)*

Any of various orchids of the genus Epipactis.

- *The article explained what "helleborine" means with a simple example.*
- *In class, the teacher used "helleborine" to mean any of various orchids of the genus epipactis.*

---

helmetflower *(noun)*

A poisonous herb native to northern Europe having hooded blue-purple flowers; the dried leaves and roots yield aconite.

- *He looked up "helmetflower" because he had never seen it before.*
- *Understanding "helmetflower" helps you talk about this topic clearly.*

---

helminthostachys *(noun)*

One species: terrestrial fern of southeastern Asia and Australia.

- *She wrote a short paragraph that included "helminthostachys."*
- *He looked up "helminthostachys" because he had never seen it before.*

---

helminthostachys zeylanica *(noun)*

Australasian fern with clusters of sporangia on stems of fertile fronds.

- *The article explained what "helminthostachys zeylanica" means with a simple example.*
- *She wrote a short paragraph that included "helminthostachys zeylanica."*

---

helotiaceae *(noun)*

A fungus family of order Helotiales.

- *In class, the teacher used "helotiaceae" to mean a fungus family of order helotiales.*

- *Understanding "helotiaceae" helps you talk about this topic clearly.*

---

helotiales *(noun)*

Order of fungi having asci in a disk-shaped to goblet-shaped apothecium.

- *He looked up "helotiales" because he had never seen it before.*
- *They discussed "helotiales" during the group presentation.*

---

helotium *(noun)*

Type genus of the Helotiaceae.

- *She wrote a short paragraph that included "helotium."*
- *Understanding "helotium" helps you talk about this topic clearly.*

---

helvella *(noun)*

Any fungus of the genus Helvella having the ascocarps stalked or pleated or often in folds.

- *They discussed "helvella" during the group presentation.*
- *The article explained what "helvella" means with a simple example.*

---

helvella acetabulum *(noun)*

A helvella with a cup-shaped fertile body having a brown interior; the stalk is creamy white and heavily ribbed.

- *He looked up "helvella acetabulum" because he had never seen it before.*
- *They discussed "helvella acetabulum" during the group presentation.*

---

helvella crispa *(noun)*

A helvella with a saddle-shaped fertile part and creamy color; the stalk is fluted and pitted.

- *She wrote a short paragraph that included "helvella crispa."*
- *They discussed "helvella crispa" during the group presentation.*

---

helvella sulcata *(noun)*

A helvella with an irregularly convoluted cap that is dark brown when young and becomes dull grey with age; the lower surface of the cap is smooth and pale grey; the stalk is thick and deeply fluted.

- *In class, the teacher used "helvella sulcata" to mean a helvella with an irregularly convoluted cap that....*
- *The article explained what "helvella sulcata" means with a simple example.*

---

helvellaceae *(noun)*

Family of false morels or lorchels; some are edible and some are poisonous.

- *She wrote a short paragraph that included "helvellaceae."*
- *He looked up "helvellaceae" because he had never seen it before.*

---

helwingia *(noun)*

Deciduous dioecious shrubs native to woodland thickets in low mountains in Japan.

- *He looked up "helwingia" because he had never seen it before.*
- *In class, the teacher used "helwingia" to mean deciduous dioecious shrubs native to woodland....*

---

helxine *(noun)*

One species; a dwarf creeping mat-forming evergreen herb.

- *They discussed "helxine" during the group presentation.*
- *She wrote a short paragraph that included "helxine."*

---

helxine soleirolia *(noun)*

Prostrate or creeping Corsican herb with moss-like small round short-stemmed leaves.

- *Understanding "helxine soleirolia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "helxine soleirolia."*

---

hemerocallidaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hemerocallis.

- *In class, the teacher used "hemerocallidaceae" to mean one of many subfamilies into which some....*
- *He looked up "hemerocallidaceae" because he had never seen it before.*

hemerocallis lilio-asphodelus *(noun)*

A day lily with yellow flowers.

- *Understanding "hemerocallis lilio-asphodelus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hemerocallis lilio-asphodelus."*

hemiascomycetes *(noun)*

Class of fungi in which no ascocarps are formed: yeasts and some plant parasites.

- *She wrote a short paragraph that included "hemiascomycetes."*
- *He looked up "hemiascomycetes" because he had never seen it before.*

hemiepiphyte *(noun)*

A plant that is an epiphyte for part of its life.

- *She wrote a short paragraph that included "hemiepiphyte."*
- *Understanding "hemiepiphyte" helps you talk about this topic clearly.*

hemiparasite *(noun)*

A parasitic plant that contains some chlorophyll and therefore is capable of photosynthesis.

- *He looked up "hemiparasite" because he had never seen it before.*
- *They discussed "hemiparasite" during the group presentation.*

hemlock water dropwort *(noun)*

European poisonous herb having tuberous roots, yellow juice that stains the skin, yellow flowers and foliage resembling celery; all parts extremely poisonous.

- *The article explained what "hemlock water dropwort" means with a simple example.*
- *She wrote a short paragraph that included "hemlock water dropwort."*

hepaticae *(noun)*

Liverworts: comprises orders Anthocerotales; Jungermanniales; Marchantiales; Sphaerocarpales.

- *Understanding "hepaticae" helps you talk about this topic clearly.*
- *They discussed "hepaticae" during the group presentation.*

hepaticopsida *(noun)*

Liverworts: comprises orders Anthocerotales; Jungermanniales; Marchantiales; Sphaerocarpales.

- *In class, the teacher used "hepaticopsida" to mean liverworts: comprises orders anthocerotales;....*
- *The article explained what "hepaticopsida" means with a simple example.*

heracleum sphondylium *(noun)*

Tall coarse plant having thick stems and cluster of white to purple flowers.

- *He looked up "heracleum sphondylium" because he had never seen it before.*
- *Understanding "heracleum sphondylium" helps you talk about this topic clearly.*

herba impia *(noun)*

(literally an undutiful herb) a variety of cotton rose.

- *In class, the teacher used "herba impia" to mean (literally an undutiful herb) a variety of cotton rose.*
- *The article explained what "herba impia" means with a simple example.*

heritiera *(noun)*

Small genus of timber trees of eastern Asia, Australasia and tropical Africa that form large buttresses.

- *The article explained what "heritiera" means with a simple example.*
- *She wrote a short paragraph that included "heritiera."*

heritiera littoralis *(noun)*

Small tree of coastal regions of Old World tropics whose leaves are silvery beneath.

- *Understanding "heritiera littoralis" helps you talk about this topic clearly.*
- *He looked up "heritiera littoralis" because he had never seen it before.*

heritiera macrophylla *(noun)*

Large evergreen tree of India and Burma whose leaves are silvery beneath.

- *The article explained what "heritiera macrophylla" means with a simple example.*
- *In class, the teacher used "heritiera macrophylla" to mean large evergreen tree of india and burma whose....*

---

heritiera trifoliolata *(noun)*

Large tree of Australasia.

- *They discussed "heritiera trifoliolata" during the group presentation.*
- *She wrote a short paragraph that included "heritiera trifoliolata."*

---

hermannia *(noun)*

Genus of African herbs and subshrubs having honey-scented bell-shaped flowers.

- *They discussed "hermannia" during the group presentation.*
- *Understanding "hermannia" helps you talk about this topic clearly.*

---

hermannia verticillata *(noun)*

African shrub having decumbent stems and slender yellow honey-scented flowers either solitary or in pairs.

- *She wrote a short paragraph that included "hermannia verticillata."*
- *He looked up "hermannia verticillata" because he had never seen it before.*

---

hernaria *(noun)*

Low-growing Old World herbs with minute bright green leaves.

- *Understanding "hernaria" helps you talk about this topic clearly.*
- *They discussed "hernaria" during the group presentation.*

---

hernaria glabra *(noun)*

Common prostrate Old World herb often used as a ground cover; formerly reputed to cure ruptures.

- *The article explained what "hernaria glabra" means with a simple example.*
- *In class, the teacher used "hernaria glabra" to mean common prostrate old world herb often used as a....*

---

hesperis matronalis *(noun)*

Long cultivated herb having flowers whose scent is more pronounced in the evening; naturalized throughout Europe to Siberia and into North America.

- *She wrote a short paragraph that included "hesperis matronalis."*
- *Understanding "hesperis matronalis" helps you talk about this topic clearly.*

---

heteranthera *(noun)*

Mud plantains.

- *The article explained what "heteranthera" means with a simple example.*
- *They discussed "heteranthera" during the group presentation.*

---

heteranthera dubia *(noun)*

Grassy-leaved North American aquatic plant with yellow star-shaped blossoms.

- *In class, the teacher used "heteranthera dubia" to mean grassy-leaved north american aquatic plant with....*
- *The article explained what "heteranthera dubia" means with a simple example.*

---

heterobasidiomycetes *(noun)*

Category used in some classification systems for various basidiomycetous fungi including rusts and smuts.

- *He looked up "heterobasidiomycetes" because he had never seen it before.*
- *She wrote a short paragraph that included "heterobasidiomycetes."*

---

heteromeles *(noun)*

One species: toyon; in some classifications included in genus Photinia.

- *They discussed "heteromeles" during the group presentation.*
- *He looked up "heteromeles" because he had never seen it before.*

---

heteromeles arbutifolia *(noun)*

Ornamental evergreen treelike shrub of the Pacific coast of the United States having large white flowers and red berrylike fruits; often placed in genus Photinia.

- *She wrote a short paragraph that included "heteromeles arbutifolia."*

- *He looked up "heteromeles arbutifolia" because he had never seen it before.*

---

heterotheca *(noun)*

Genus of yellow-flowered North American herbs.

- *In class, the teacher used "heterotheca" to mean genus of yellow-flowered north american herbs.*
- *The article explained what "heterotheca" means with a simple example.*

---

heterotheca villosa *(noun)*

Hairy perennial with yellow flower heads in branched clusters; found almost everywhere in dry places from Canada to west central and western United States; sometimes placed in genus Chrysopsis.

- *Understanding "heterotheca villosa" helps you talk about this topic clearly.*
- *The article explained what "heterotheca villosa" means with a simple example.*

---

hexalectris *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *He looked up "hexalectris" because he had never seen it before.*
- *She wrote a short paragraph that included "hexalectris."*

---

hexalectris spicata *(noun)*

Orchid with yellowish-brown flowers with dark veins; southeastern Arizona to the eastern United States.

- *The article explained what "hexalectris spicata" means with a simple example.*
- *Understanding "hexalectris spicata" helps you talk about this topic clearly.*

---

hexalectris warnockii *(noun)*

Orchid with slender nearly leafless reddish-brown stems with loose racemes of reddish-brown flowers; of open brushy woods of southeastern Arizona and central Texas.

- *She wrote a short paragraph that included "hexalectris warnockii."*
- *They discussed "hexalectris warnockii" during the group presentation.*

---

hexenbesen *(noun)*

An abnormal tufted growth of small branches on a tree or shrub caused by fungi or insects or other physiological disturbance.

- *They discussed "hexenbesen" during the group presentation.*
- *He looked up "hexenbesen" because he had never seen it before.*

---

hibbertia *(noun)*

Evergreen heathlike or scandent shrubs of Madagascar; Australasia; Polynesia.

- *Understanding "hibbertia" helps you talk about this topic clearly.*
- *The article explained what "hibbertia" means with a simple example.*

---

hibiscus cannabinus *(noun)*

Valuable fiber plant of East Indies now widespread in cultivation.

- *He looked up "hibiscus cannabinus" because he had never seen it before.*
- *She wrote a short paragraph that included "hibiscus cannabinus."*

---

hibiscus farragei *(noun)*

Southern and western Australian shrub with unlobed or shallowly lobed toothed leaves and purple flowers; sometimes placed in genus Hibiscus.

- *She wrote a short paragraph that included "hibiscus farragei."*
- *He looked up "hibiscus farragei" because he had never seen it before.*

---

hibiscus heterophyllus *(noun)*

Australian tree with acid foliage.

- *In class, the teacher used "hibiscus heterophyllus" to mean australian tree with acid foliage.*
- *He looked up "hibiscus heterophyllus" because he had never seen it before.*

---

hibiscus moschatus *(noun)*

Bushy herb of tropical Asia grown for its yellow or pink to scarlet blooms that resemble the hibiscus.

- *She wrote a short paragraph that included "hibiscus moschatus."*
- *He looked up "hibiscus moschatus" because he had never seen it before.*

hibiscus moscheutos *(noun)*

Showy shrub of salt marshes of the eastern United States having large rose-colored flowers.

- *Understanding "hibiscus moscheutos" helps you talk about this topic clearly.*
- *The article explained what "hibiscus moscheutos" means with a simple example.*

hibiscus sabdariffa *(noun)*

East Indian sparsely prickly annual herb or perennial subshrub widely cultivated for its fleshy calyxes used in tarts and jelly and for its bast fiber.

- *The article explained what "hibiscus sabdariffa" means with a simple example.*
- *She wrote a short paragraph that included "hibiscus sabdariffa."*

hibiscus tiliaceus *(noun)*

Shrubby tree widely distributed along tropical shores; yields a light tough wood used for canoe outriggers and a fiber used for cordage and caulk; often cultivated for ornament.

- *They discussed "hibiscus tiliaceus" during the group presentation.*
- *In class, the teacher used "hibiscus tiliaceus" to mean shrubby tree widely distributed along tropical....*

hibiscus trionum *(noun)*

Annual weedy herb with ephemeral yellow purple-eyed flowers; Old World tropics; naturalized as a weed in North America.

- *He looked up "hibiscus trionum" because he had never seen it before.*
- *In class, the teacher used "hibiscus trionum" to mean annual weedy herb with ephemeral yellow purple-eyed....*

hieracium aurantiacum *(noun)*

European hawkweed having flower heads with bright orange-red rays; a troublesome weed especially as naturalized in northeastern North America; sometimes placed in genus Hieracium.

- *She wrote a short paragraph that included "hieracium aurantiacum."*
- *Understanding "hieracium aurantiacum" helps you talk about this topic clearly.*

hieracium pilocella *(noun)*

European hawkweed having soft hairy leaves; sometimes placed in genus Hieracium.

- *In class, the teacher used "hieracium pilocella" to mean european hawkweed having soft hairy leaves;....*
- *He looked up "hieracium pilocella" because he had never seen it before.*

hieracium praealtum *(noun)*

European hawkweed introduced into northeastern United States; locally troublesome weeds.

- *He looked up "hieracium praealtum" because he had never seen it before.*
- *Understanding "hieracium praealtum" helps you talk about this topic clearly.*

hieracium venosum *(noun)*

A hawkweed with a rosette of purple-veined basal leaves; Canada to northern Georgia and Kentucky.

- *In class, the teacher used "hieracium venosum" to mean a hawkweed with a rosette of purple-veined basal....*
- *The article explained what "hieracium venosum" means with a simple example.*

himantoglossum *(noun)*

Small genus of terrestrial orchids of Europe and Mediterranean region.

- *In class, the teacher used "himantoglossum" to mean small genus of terrestrial orchids of europe and....*
- *Understanding "himantoglossum" helps you talk about this topic clearly.*

himantoglossum hircinum *(noun)*

An orchid of the genus Himantoglossum.

- *She wrote a short paragraph that included "himantoglossum hircinum."*
- *He looked up "himantoglossum hircinum" because he had never seen it before.*

hippeastrum puniceum *(noun)*

Amaryllis of tropical America often cultivated as a houseplant for its showy white to red flowers.

- *He looked up "hippeastrum puniceum" because he had never seen it before.*
- *Understanding "hippeastrum puniceum" helps you talk about this topic clearly.*

hippocastanaceae *(noun)*

Trees having showy flowers and inedible nutlike seeds in a leathery capsule.

- *They discussed "hippocastanaceae" during the group presentation.*
- *In class, the teacher used "hippocastanaceae" to mean trees having showy flowers and inedible nutlike....*

---

hippocrepis *(noun)*

Species of Old World herbs or subshrubs: horseshoe vetch.

- *Understanding "hippocrepis" helps you talk about this topic clearly.*
- *In class, the teacher used "hippocrepis" to mean species of old world herbs or subshrubs: horseshoe....*

---

hippocrepis comosa *(noun)*

European woody perennial with yellow umbellate flowers followed by flattened pods that separate into horseshoe-shaped joints.

- *He looked up "hippocrepis comosa" because he had never seen it before.*
- *Understanding "hippocrepis comosa" helps you talk about this topic clearly.*

---

hoary puccoon *(noun)*

Perennial North American plant with greyish hairy foliage yielding a red or yellow pigment.

- *In class, the teacher used "hoary puccoon" to mean perennial north american plant with greyish hairy....*
- *They discussed "hoary puccoon" during the group presentation.*

---

hoheria *(noun)*

Small genus of shrubs and small trees of New Zealand: lacebarks.

- *He looked up "hoheria" because he had never seen it before.*
- *They discussed "hoheria" during the group presentation.*

---

hoheria populnea *(noun)*

Small tree or shrub of New Zealand having a profusion of axillary clusters of honey-scented paper-white flowers and whose bark is used for cordage.

- *He looked up "hoheria populnea" because he had never seen it before.*
- *They discussed "hoheria populnea" during the group presentation.*

---

holarrhena *(noun)*

Genus of deciduous trees and shrubs of tropical Africa and Asia.

- *He looked up "holarrhena" because he had never seen it before.*
- *She wrote a short paragraph that included "holarrhena."*

---

holarrhena antidysenterica *(noun)*

Tropical Asian tree with hard white wood and bark formerly used as a remedy for dysentery and diarrhea.

- *They discussed "holarrhena antidysenterica" during the group presentation.*
- *She wrote a short paragraph that included "holarrhena antidysenterica."*

---

holarrhena pubescens *(noun)*

Tropical Asian tree with hard white wood and bark formerly used as a remedy for dysentery and diarrhea.

- *Understanding "holarrhena pubescens" helps you talk about this topic clearly.*
- *In class, the teacher used "holarrhena pubescens" to mean tropical asian tree with hard white wood and bark....*

---

hollygrape *(noun)*

Ornamental evergreen shrub of Pacific coast of North America having dark green pinnate leaves and racemes of yellow flowers followed by blue-black berries.

- *They discussed "hollygrape" during the group presentation.*
- *She wrote a short paragraph that included "hollygrape."*

---

holophyte *(noun)*

An organism that produces its own food by photosynthesis.

- *He looked up "holophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "holophyte."*

---

homobasidiomycetes *(noun)*

Category used in some classification systems for various basidiomycetous fungi including e.g. mushrooms and puffballs which are usually placed in the classes Gasteromycetes and Hymenomycetes.

- *Understanding "homobasidiomycetes" helps you talk about this topic clearly.*

- *The article explained what "homobasidiomycetes" means with a simple example.*

homocyclic *(adjective)*

Containing a closed ring of atoms of the same kind especially carbon atoms.

- *Students compared "homocyclic" with similar adjectives in the lesson.*
- *A "homocyclic" approach may work better in this case.*

homogyne *(noun)*

Small genus of low perennial herbs of montane Europe; in some classifications included in genus Tussilago.

- *In class, the teacher used "homogyne" to mean small genus of low perennial herbs of montane....*
- *Understanding "homogyne" helps you talk about this topic clearly.*

homogyne alpina *(noun)*

Rhizomatous herb with purple-red flowers suitable for groundcover; sometimes placed in genus Tussilago.

- *She wrote a short paragraph that included "homogyne alpina."*
- *Understanding "homogyne alpina" helps you talk about this topic clearly.*

honeybells *(noun)*

African shrub having decumbent stems and slender yellow honey-scented flowers either solitary or in pairs.

- *The article explained what "honeybells" means with a simple example.*
- *She wrote a short paragraph that included "honeybells."*

honeyflower *(noun)*

Australian shrub whose flowers yield honey copiously.

- *Understanding "honeyflower" helps you talk about this topic clearly.*
- *They discussed "honeyflower" during the group presentation.*

hordeum jubatum *(noun)*

Barley grown for its highly ornamental flower heads with delicate long silky awns; North America and northeastern Asia.

- *In class, the teacher used "hordeum jubatum" to mean barley grown for its highly ornamental flower heads....*
- *They discussed "hordeum jubatum" during the group presentation.*

hordeum murinum *(noun)*

European annual grass often found as a weed in waste ground especially along roadsides and hedgerows.

- *The article explained what "hordeum murinum" means with a simple example.*
- *In class, the teacher used "hordeum murinum" to mean european annual grass often found as a weed in....*

hordeum pusillum *(noun)*

Annual barley native to western North America and widespread in southern United States and tropical America.

- *They discussed "hordeum pusillum" during the group presentation.*
- *She wrote a short paragraph that included "hordeum pusillum."*

horneophyton *(noun)*

Devonian fossil plant considered one of the earliest forms of vascular land plants; similar to genus Rhynia but smaller.

- *They discussed "horneophyton" during the group presentation.*
- *The article explained what "horneophyton" means with a simple example.*

horsemint *(noun)*

An annual horsemint of central and western United States and northern Mexico.

- *She wrote a short paragraph that included "horsemint."*
- *He looked up "horsemint" because he had never seen it before.*

horseweed *(noun)*

Erect perennial strong-scented with serrate pointed leaves and a loose panicle of yellowish flowers; the eastern United States.

- *In class, the teacher used "horseweed" to mean erect perennial strong-scented with serrate pointed....*
- *The article explained what "horseweed" means with a simple example.*

hostaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Hosta.

- *They discussed "hostaceae" during the group presentation.*
- *He looked up "hostaceae" because he had never seen it before.*

---

hottentot's bread *(noun)*

Thick edible rootstock of elephant's-foot.

- *They discussed "hottentot's bread" during the group presentation.*
- *Understanding "hottentot's bread" helps you talk about this topic clearly.*

---

hottentot's bread vine *(noun)*

South African vine having a massive rootstock covered with deeply fissured bark.

- *The article explained what "hottentot's bread vine" means with a simple example.*
- *Understanding "hottentot's bread vine" helps you talk about this topic clearly.*

---

hottentot's fig *(noun)*

Low-growing South African succulent plant having a capsular fruit containing edible pulp.

- *The article explained what "hottentot's fig" means with a simple example.*
- *She wrote a short paragraph that included "hottentot's fig."*

---

hottonia *(noun)*

Aquatic herbs.

- *In class, the teacher used "hottonia" to mean aquatic herbs.*
- *Understanding "hottonia" helps you talk about this topic clearly.*

---

hottonia inflata *(noun)*

A featherfoil of the eastern United States with submerged spongy inflated flower stalks and white flowers.

- *They discussed "hottonia inflata" during the group presentation.*
- *Understanding "hottonia inflata" helps you talk about this topic clearly.*

---

hottonia palustris *(noun)*

Featherfoil of Europe and western Asia having submerged and floating leaves and violet flowers.

- *They discussed "hottonia palustris" during the group presentation.*
- *He looked up "hottonia palustris" because he had never seen it before.*

---

houhere *(noun)*

Small tree or shrub of New Zealand having a profusion of axillary clusters of honey-scented paper-white flowers and whose bark is used for cordage.

- *Understanding "houhere" helps you talk about this topic clearly.*
- *They discussed "houhere" during the group presentation.*

---

houttuynia *(noun)*

One species; east Asian low-growing plant of wet places.

- *He looked up "houttuynia" because he had never seen it before.*
- *Understanding "houttuynia" helps you talk about this topic clearly.*

---

hoya carnosa *(noun)*

Succulent climber of southern Asia with umbels of pink and white star-shaped flowers.

- *Understanding "hoya carnosa" helps you talk about this topic clearly.*
- *The article explained what "hoya carnosa" means with a simple example.*

---

huamachil *(noun)*

Common thorny tropical American tree having terminal racemes of yellow flowers followed by sickle-shaped or circinate edible pods and yielding good timber and a yellow dye and mucilaginous gum.

- *He looked up "huamachil" because he had never seen it before.*
- *She wrote a short paragraph that included "huamachil."*

---

hudsonia *(noun)*

Small evergreen subshrubs of North America.

- *She wrote a short paragraph that included "hudsonia."*
- *They discussed "hudsonia" during the group presentation.*

---

hudsonia ericoides *(noun)*

North American decumbent evergreen heathlike plant with yellow flowers.

- *In class, the teacher used "hudsonia ericoides" to mean north american decumbent evergreen heathlike plant....*
- *He looked up "hudsonia ericoides" because he had never seen it before.*

---

hudsonia tomentosa *(noun)*

Small heathlike plant covered with white down growing on beaches in northeastern North America.

- *They discussed "hudsonia tomentosa" during the group presentation.*
- *Understanding "hudsonia tomentosa" helps you talk about this topic clearly.*

---

hugueninia *(noun)*

One species: tansy-leaved rocket.

- *She wrote a short paragraph that included "hugueninia."*
- *They discussed "hugueninia" during the group presentation.*

---

hugueninia tanacetifolia *(noun)*

Perennial stellate and hairy herb with small yellow flowers of mountains of southern Europe; sometimes placed in genus Sisymbrium.

- *They discussed "hugueninia tanacetifolia" during the group presentation.*
- *The article explained what "hugueninia tanacetifolia" means with a simple example.*

---

huisache *(noun)*

Tropical American thorny shrub or small tree; fragrant yellow flowers used in making perfumery.

- *Understanding "huisache" helps you talk about this topic clearly.*
- *They discussed "huisache" during the group presentation.*

---

hulsea *(noun)*

Small genus of erect balsam-scented herbs; Pacific coast of the northwestern United States.

- *In class, the teacher used "hulsea" to mean small genus of erect balsam-scented herbs; pacific....*
- *He looked up "hulsea" because he had never seen it before.*

---

hulsea algida *(noun)*

Low tufted plant having hairy stems each topped by a flower head with short narrow yellow rays; northwestern United States.

- *In class, the teacher used "hulsea algida" to mean low tufted plant having hairy stems each topped by....*
- *The article explained what "hulsea algida" means with a simple example.*

---

hulsea nana *(noun)*

Similar to but smaller than alpine hulsea.

- *Understanding "hulsea nana" helps you talk about this topic clearly.*
- *The article explained what "hulsea nana" means with a simple example.*

---

hunnemania fumariifolia *(noun)*

Native of Mexican highlands grown for its glossy clear yellow flowers and blue-grey finely dissected foliage.

- *In class, the teacher used "hunnemania fumariifolia" to mean native of mexican highlands grown for its glossy....*
- *The article explained what "hunnemania fumariifolia" means with a simple example.*

---

hunnemannia *(noun)*

One species: golden cup.

- *In class, the teacher used "hunnemannia" to mean one species: golden cup.*
- *Understanding "hunnemannia" helps you talk about this topic clearly.*

---

hyacinthaceae *(noun)*

One of many families or subfamilies in which some classification systems subdivide the Liliaceae but not widely accepted.

- *She wrote a short paragraph that included "hyacinthaceae."*
- *Understanding "hyacinthaceae" helps you talk about this topic clearly.*

hyacinthoides *(noun)*

Small genus of perennial bulbs of western Europe and North Africa; sometimes placed in family Hyacinthaceae.

- *Understanding "hyacinthoides" helps you talk about this topic clearly.*
- *The article explained what "hyacinthoides" means with a simple example.*

hyacinthoides nonscripta *(noun)*

Sometimes placed in genus Scilla.

- *She wrote a short paragraph that included "hyacinthoides nonscripta."*
- *They discussed "hyacinthoides nonscripta" during the group presentation.*

hyacinthus candicans *(noun)*

Southern African herb with white bell-shaped flowers.

- *In class, the teacher used "hyacinthus candicans" to mean southern african herb with white bell-shaped flowers.*
- *He looked up "hyacinthus candicans" because he had never seen it before.*

hyacinthus orientalis albulus *(noun)*

Hyacinth with loosely flowered spikes, several growing from one bulb.

- *In class, the teacher used "hyacinthus orientalis albulus" to mean hyacinth with loosely flowered spikes, several....*
- *The article explained what "hyacinthus orientalis albulus" means with a simple example.*

hyalosperma *(noun)*

Genus of herbs of temperate Australia including some from genus Helipterum.

- *She wrote a short paragraph that included "hyalosperma."*
- *They discussed "hyalosperma" during the group presentation.*

hybanthus *(noun)*

A genus of herbs and small shrubs with white or purple flowers; grows in tropical or subtropical regions.

- *He looked up "hybanthus" because he had never seen it before.*
- *In class, the teacher used "hybanthus" to mean a genus of herbs and small shrubs with white or....*

hydathode *(noun)*

A pore that exudes water on the surface or margin of a leaf of higher plants.

- *In class, the teacher used "hydathode" to mean a pore that exudes water on the surface or margin....*
- *The article explained what "hydathode" means with a simple example.*

hydnaceae *(noun)*

Tooth fungi.

- *In class, the teacher used "hydnaceae" to mean tooth fungi.*
- *Understanding "hydnaceae" helps you talk about this topic clearly.*

hydnocarpus *(noun)*

Medium to large Indonesian and Malaysian trees.

- *In class, the teacher used "hydnocarpus" to mean medium to large indonesian and malaysian trees.*
- *Understanding "hydnocarpus" helps you talk about this topic clearly.*

hydnocarpus kurzii *(noun)*

East Indian tree with oily seeds yield chaulmoogra oil used to treat leprosy.

- *In class, the teacher used "hydnocarpus kurzii" to mean east indian tree with oily seeds yield chaulmoogra....*
- *He looked up "hydnocarpus kurzii" because he had never seen it before.*

hydnocarpus laurifolia *(noun)*

Leathery-leaved tree of western India bearing round fruits with brown densely hairy rind enclosing oily pulp that yields hydnocarpus oil.

- *He looked up "hydnocarpus laurifolia" because he had never seen it before.*
- *They discussed "hydnocarpus laurifolia" during the group presentation.*

hydnocarpus oil *(noun)*

Oil from seeds of trees of the genus Hydnocarpus especially Hydnocarpus wightiana (Hydnocarpus laurifolia).

- *Understanding "hydnocarpus oil" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hydnocarpus oil."*

---

hydnocarpus wightiana *(noun)*

Leathery-leaved tree of western India bearing round fruits with brown densely hairy rind enclosing oily pulp that yields hydnocarpus oil.

- *He looked up "hydnocarpus wightiana" because he had never seen it before.*
- *She wrote a short paragraph that included "hydnocarpus wightiana."*

---

hydnoraceae *(noun)*

A family of flowering plants in Africa and Argentina that are parasitic on the roots of other plants.

- *The article explained what "hydnoraceae" means with a simple example.*
- *They discussed "hydnoraceae" during the group presentation.*

---

hydnum *(noun)*

Type genus of Hydnaceae.

- *She wrote a short paragraph that included "hydnum."*
- *Understanding "hydnum" helps you talk about this topic clearly.*

---

hydrangea petiolaris *(noun)*

Deciduous climber with aerial roots having large flat flower heads.

- *They discussed "hydrangea petiolaris" during the group presentation.*
- *In class, the teacher used "hydrangea petiolaris" to mean deciduous climber with aerial roots having large....*

---

hydrangeaceae *(noun)*

Sometimes included in the family Saxifragaceae.

- *She wrote a short paragraph that included "hydrangeaceae."*
- *He looked up "hydrangeaceae" because he had never seen it before.*

---

hydrastis *(noun)*

Small genus of perennial herbs having rhizomes and palmate leaves and small solitary flowers; of northeastern United States and Japan.

- *The article explained what "hydrastis" means with a simple example.*
- *She wrote a short paragraph that included "hydrastis."*

---

hydrastis canadensis *(noun)*

Perennial herb of northeastern United States having a thick knotted yellow rootstock and large rounded leaves.

- *He looked up "hydrastis canadensis" because he had never seen it before.*
- *She wrote a short paragraph that included "hydrastis canadensis."*

---

hydrocharidaceae *(noun)*

Simple nearly stemless freshwater aquatic plants; widely distributed.

- *Understanding "hydrocharidaceae" helps you talk about this topic clearly.*
- *He looked up "hydrocharidaceae" because he had never seen it before.*

---

hydrocharis morsus-ranae *(noun)*

European floating plant with roundish heart-shaped leaves and white flowers.

- *She wrote a short paragraph that included "hydrocharis morsus-ranae."*
- *Understanding "hydrocharis morsus-ranae" helps you talk about this topic clearly.*

---

hydrocharitaceae *(noun)*

Simple nearly stemless freshwater aquatic plants; widely distributed.

- *In class, the teacher used "hydrocharitaceae" to mean simple nearly stemless freshwater aquatic plants;....*
- *Understanding "hydrocharitaceae" helps you talk about this topic clearly.*

---

hydrochlorofluorocarbon *(noun)*

A fluorocarbon that is replacing chlorofluorocarbon as a refrigerant and propellant in aerosol cans; considered to be somewhat less destructive to the atmosphere.

- *They discussed "hydrochlorofluorocarbon" during the group presentation.*

- *She wrote a short paragraph that included "hydrochlorofluorocarbon."*

hydrofluorocarbon *(noun)*

A fluorocarbon emitted as a by-product of industrial manufacturing.

- *In class, the teacher used "hydrofluorocarbon" to mean a fluorocarbon emitted as a by-product of....*
- *He looked up "hydrofluorocarbon" because he had never seen it before.*

hydrophyllaceae *(noun)*

Perennial woodland herbs.

- *Understanding "hydrophyllaceae" helps you talk about this topic clearly.*
- *The article explained what "hydrophyllaceae" means with a simple example.*

hydrophyllum virginianum *(noun)*

Showy perennial herb with white flowers; leaves sometimes used as edible greens in southeastern United States.

- *He looked up "hydrophyllum virginianum" because he had never seen it before.*
- *Understanding "hydrophyllum virginianum" helps you talk about this topic clearly.*

hydrophyte *(noun)*

A plant that grows partly or wholly in water whether rooted in the mud, as a lotus, or floating without anchorage, as the water hyacinth.

- *In class, the teacher used "hydrophyte" to mean a plant that grows partly or wholly in water....*
- *The article explained what "hydrophyte" means with a simple example.*

hydrophytic plant *(noun)*

A plant that grows partly or wholly in water whether rooted in the mud, as a lotus, or floating without anchorage, as the water hyacinth.

- *In class, the teacher used "hydrophytic plant" to mean a plant that grows partly or wholly in water....*
- *He looked up "hydrophytic plant" because he had never seen it before.*

hygrocybe *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *In class, the teacher used "hygrocybe" to mean a genus of fungi belonging to the family hygrophoraceae.*
- *He looked up "hygrocybe" because he had never seen it before.*

hygrocybe acutoconica *(noun)*

A fungus having an acutely conic cap and dry stalks.

- *They discussed "hygrocybe acutoconica" during the group presentation.*
- *The article explained what "hygrocybe acutoconica" means with a simple example.*

hygrophoraceae *(noun)*

A family of fungi belonging to the order Agaricales; the gills of these fungi have a clean waxy appearance.

- *She wrote a short paragraph that included "hygrophoraceae."*
- *They discussed "hygrophoraceae" during the group presentation.*

hygrophorus *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *Understanding "hygrophorus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hygrophorus."*

hygrophorus borealis *(noun)*

A fungus with a white convex cap and arcuate white gills and a stalk that tapers toward the base.

- *She wrote a short paragraph that included "hygrophorus borealis."*
- *The article explained what "hygrophorus borealis" means with a simple example.*

hygrophorus caeruleus *(noun)*

A fungus with a broadly convex cap that is cream color with a tint of blue over the margin; waxy gills are bluish green to blue-grey; a short stalk tapers abruptly at the base.

- *She wrote a short paragraph that included "hygrophorus caeruleus."*
- *The article explained what "hygrophorus caeruleus" means with a simple example.*

hygrophorus inocybiformis *(noun)*

A fungus with a drab squamulose cap and grey-brown squamules over the white background of the stalk and waxy grey-white gills.

- *They discussed "hygrophorus inocybiformis" during the group presentation.*
- *In class, the teacher used "hygrophorus inocybiformis" to mean a fungus with a drab squamulose cap and grey-brown....*

hygrophorus kauffmanii *(noun)*

A fungus with a slightly viscid cap; cap and gills are reddish brown and the stalk is grey.

- *They discussed "hygrophorus kauffmanii" during the group presentation.*
- *She wrote a short paragraph that included "hygrophorus kauffmanii."*

hygrophorus marzuolus *(noun)*

A grey fungus frequently found near melting snow banks.

- *In class, the teacher used "hygrophorus marzuolus" to mean a grey fungus frequently found near melting snow banks.*
- *They discussed "hygrophorus marzuolus" during the group presentation.*

hygrophorus purpurascens *(noun)*

A fungus with a viscid purplish red cap and stalk; found under spruce and other conifers.

- *She wrote a short paragraph that included "hygrophorus purpurascens."*
- *Understanding "hygrophorus purpurascens" helps you talk about this topic clearly.*

hygrophorus russula *(noun)*

An edible fungus with a reddish cap and close pale gills and dry stalk; found under hardwoods.

- *She wrote a short paragraph that included "hygrophorus russula."*
- *Understanding "hygrophorus russula" helps you talk about this topic clearly.*

hygrophorus sordidus *(noun)*

An edible fungus with a large white cap and a dry stalk and white gills.

- *They discussed "hygrophorus sordidus" during the group presentation.*
- *The article explained what "hygrophorus sordidus" means with a simple example.*

hygrophorus tennesseensis *(noun)*

A fungus having a brownish sticky cap with a white margin and white gills and an odor of raw potatoes.

- *The article explained what "hygrophorus tennesseensis" means with a simple example.*
- *Understanding "hygrophorus tennesseensis" helps you talk about this topic clearly.*

hygrophorus turundus *(noun)*

A small fungus with orange cap and yellow gills found in sphagnum bogs.

- *He looked up "hygrophorus turundus" because he had never seen it before.*
- *Understanding "hygrophorus turundus" helps you talk about this topic clearly.*

hygrophyte *(noun)*

A plant that grows in a moist habitat.

- *The article explained what "hygrophyte" means with a simple example.*
- *She wrote a short paragraph that included "hygrophyte."*

hygrotrama *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *In class, the teacher used "hygrotrama" to mean a genus of fungi belonging to the family hygrophoraceae.*
- *The article explained what "hygrotrama" means with a simple example.*

hygrotrama foetens *(noun)*

A small grey-brown fungus with an unpleasant odor of mothballs.

- *Understanding "hygrotrama foetens" helps you talk about this topic clearly.*
- *He looked up "hygrotrama foetens" because he had never seen it before.*

hylocereus *(noun)*

Genus of climbing or epiphytic tropical American cacti with angular stems and mostly white very fragrant flowers.

- *They discussed "hylocereus" during the group presentation.*
- *He looked up "hylocereus" because he had never seen it before.*

---

hymenaea *(noun)*

Genus of tropical American timber trees.

- *In class, the teacher used "hymenaea" to mean genus of tropical american timber trees.*
- *Understanding "hymenaea" helps you talk about this topic clearly.*

---

hymenaea courbaril *(noun)*

West Indian locust tree having pinnate leaves and panicles of large white or purplish flowers; yields very hard tough wood.

- *They discussed "hymenaea courbaril" during the group presentation.*
- *The article explained what "hymenaea courbaril" means with a simple example.*

---

hymenanthera *(noun)*

A genus of slender evergreen shrubs; grow in Australia and New Zealand.

- *In class, the teacher used "hymenanthera" to mean a genus of slender evergreen shrubs; grow in....*
- *The article explained what "hymenanthera" means with a simple example.*

---

hymenogastrales *(noun)*

An order of fungi belonging to the class Gasteromycetes; has a distinct basidiocarp with a fleshy or waxy gleba (sometimes placed in subclass Homobasidiomycetes).

- *Understanding "hymenogastrales" helps you talk about this topic clearly.*
- *They discussed "hymenogastrales" during the group presentation.*

---

hymenomycetes *(noun)*

Used in some classifications; usually coextensive with order Agaricales: mushrooms; toadstools; agarics; bracket fungi.

- *Understanding "hymenomycetes" helps you talk about this topic clearly.*
- *The article explained what "hymenomycetes" means with a simple example.*

---

hymenophyllaceae *(noun)*

Terrestrial (hygrophytic) or epiphytic ferns: filmy ferns.

- *In class, the teacher used "hymenophyllaceae" to mean terrestrial (hygrophytic) or epiphytic ferns: filmy....*
- *The article explained what "hymenophyllaceae" means with a simple example.*

---

hymenophyllum *(noun)*

Type genus of the Hymenophyllaceae: filmy ferns.

- *She wrote a short paragraph that included "hymenophyllum."*
- *He looked up "hymenophyllum" because he had never seen it before.*

---

hymenoxys acaulis *(noun)*

Perennial having tufted basal leaves and short leafless stalks each bearing a solitary yellow flower head; dry hillsides and plains of west central North America.

- *In class, the teacher used "hymenoxys acaulis" to mean perennial having tufted basal leaves and short....*
- *He looked up "hymenoxys acaulis" because he had never seen it before.*

---

hymenoxys grandiflora *(noun)*

Whitish hairy plant with featherlike leaves and a few stout stems each bearing an especially handsome solitary large yellow flower head; mountainous regions north central United States.

- *The article explained what "hymenoxys grandiflora" means with a simple example.*
- *They discussed "hymenoxys grandiflora" during the group presentation.*

---

hyoscyamus muticus *(noun)*

Poisonous herb whose leaves are a source of hyoscyamine.

- *They discussed "hyoscyamus muticus" during the group presentation.*
- *She wrote a short paragraph that included "hyoscyamus muticus."*

---

hypericaceae *(noun)*

Used in some classification systems for plants usually included among the Guttiferae.

- *The article explained what "hypericaceae" means with a simple example.*
- *In class, the teacher used "hypericaceae" to mean used in some classification systems for plants....*

hypericales *(noun)*

A large order of dicotyledonous plants of subclass Dilleniidae.

- *She wrote a short paragraph that included "hypericales."*
- *The article explained what "hypericales" means with a simple example.*

hypericum androsaemum *(noun)*

Deciduous bushy Eurasian shrub with golden yellow flowers and reddish-purple fruits from which a soothing salve is made in Spain.

- *He looked up "hypericum androsaemum" because he had never seen it before.*
- *Understanding "hypericum androsaemum" helps you talk about this topic clearly.*

hypericum ascyron *(noun)*

Perennial shrub having large star-shaped yellow flowers in narrowly pyramidal cymes.

- *They discussed "hypericum ascyron" during the group presentation.*
- *He looked up "hypericum ascyron" because he had never seen it before.*

hypericum calycinum *(noun)*

Creeping evergreen shrub with bright yellow star-shaped summer flowers; useful as ground cover.

- *They discussed "hypericum calycinum" during the group presentation.*
- *She wrote a short paragraph that included "hypericum calycinum."*

hypericum gentianoides *(noun)*

Annual wiry-stemmed North American weed with minute scalelike leaves and small yellow flowers.

- *Understanding "hypericum gentianoides" helps you talk about this topic clearly.*
- *The article explained what "hypericum gentianoides" means with a simple example.*

hypericum hypericoides *(noun)*

Low shrubby plant having yellow flowers with four petals arranged in a cross; Bermuda and southeastern United States to West Indies and eastern Mexico.

- *He looked up "hypericum hypericoides" because he had never seen it before.*
- *In class, the teacher used "hypericum hypericoides" to mean low shrubby plant having yellow flowers with four....*

hypericum prolificum *(noun)*

Stiff shrub having oblong entire leaves and dense cymes of yellow flowers.

- *Understanding "hypericum prolificum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hypericum prolificum."*

hypericum pyramidatum *(noun)*

Perennial shrub having large star-shaped yellow flowers in narrowly pyramidal cymes.

- *The article explained what "hypericum pyramidatum" means with a simple example.*
- *In class, the teacher used "hypericum pyramidatum" to mean perennial shrub having large star-shaped yellow....*

hypericum spathulatum *(noun)*

Stiff shrub having oblong entire leaves and dense cymes of yellow flowers.

- *Understanding "hypericum spathulatum" helps you talk about this topic clearly.*
- *They discussed "hypericum spathulatum" during the group presentation.*

hypericum tetrapterum *(noun)*

European perennial St John's wort; Ireland and France to western Siberia.

- *She wrote a short paragraph that included "hypericum tetrapterum."*
- *The article explained what "hypericum tetrapterum" means with a simple example.*

hypericum virginianum *(noun)*

Perennial marsh herb with pink to mauve flowers; southeastern United States.

- *They discussed "hypericum virginianum" during the group presentation.*
- *Understanding "hypericum virginianum" helps you talk about this topic clearly.*

hypobasidium *(noun)*

Special cell constituting the base of the basidium in various fungi especially of the order Tremellales.

- *He looked up "hypobasidium" because he had never seen it before.*
- *Understanding "hypobasidium" helps you talk about this topic clearly.*

---

hypochaeris *(noun)*

Widely distributed genus of herbs with milky juice; includes some cosmopolitan weeds.

- *She wrote a short paragraph that included "hypochaeris."*
- *He looked up "hypochaeris" because he had never seen it before.*

---

hypochaeris radicata *(noun)*

European weed widely naturalized in North America having yellow flower heads and leaves resembling a cat's ears.

- *In class, the teacher used "hypochaeris radicata" to mean european weed widely naturalized in north america....*
- *Understanding "hypochaeris radicata" helps you talk about this topic clearly.*

---

hypochoeris *(noun)*

Widely distributed genus of herbs with milky juice; includes some cosmopolitan weeds.

- *The article explained what "hypochoeris" means with a simple example.*
- *She wrote a short paragraph that included "hypochoeris."*

---

hypocreaceae *(noun)*

Family of fungi having brightly colored fleshy or membranous ascocarps; sometimes placed in its own order Hypocreales.

- *The article explained what "hypocreaceae" means with a simple example.*
- *She wrote a short paragraph that included "hypocreaceae."*

---

hypocreales *(noun)*

Used in some classifications for the family Hypocreaceae.

- *She wrote a short paragraph that included "hypocreales."*
- *He looked up "hypocreales" because he had never seen it before.*

---

hypopitys *(noun)*

Term used in some classifications for the pinesaps, which are usually included in the genus Monotropa.

- *The article explained what "hypopitys" means with a simple example.*
- *She wrote a short paragraph that included "hypopitys."*

---

hypoxidaceae *(noun)*

In some classification systems included in the Amaryllidaceae.

- *Understanding "hypoxidaceae" helps you talk about this topic clearly.*
- *The article explained what "hypoxidaceae" means with a simple example.*

---

hypoxis *(noun)*

Small plants that resemble amaryllis and that grow from a corm and bear flowers on a leafless stalk; sometimes classified as member of the family Amaryllidaceae: star grass.

- *Understanding "hypoxis" helps you talk about this topic clearly.*
- *The article explained what "hypoxis" means with a simple example.*

---

hypoxis hirsuta *(noun)*

Perennial star grass of North America.

- *He looked up "hypoxis hirsuta" because he had never seen it before.*
- *She wrote a short paragraph that included "hypoxis hirsuta."*

---

hyssopus *(noun)*

Eurasian genus of perennial herbs or subshrubs.

- *He looked up "hyssopus" because he had never seen it before.*
- *She wrote a short paragraph that included "hyssopus."*

---

hyssopus officinalis *(noun)*

A European mint with aromatic and pungent leaves used in perfumery and as a seasoning in cookery; often cultivated as a remedy for bruises; yields hyssop oil.

- *She wrote a short paragraph that included "hyssopus officinalis."*

- *Understanding "hyssopus officinalis" helps you talk about this topic clearly.*

---

iberis *(noun)*

Old World herbs and subshrubs: candytuft.

- *Understanding "iberis" helps you talk about this topic clearly.*
- *The article explained what "iberis" means with a simple example.*

---

ibolium privet *(noun)*

Fast-growing and tightly branched hybrid of Ligustrum ovalifolium and Ligustrum obtusifolium.

- *They discussed "ibolium privet" during the group presentation.*
- *He looked up "ibolium privet" because he had never seen it before.*

---

ibota privet *(noun)*

Fast-growing and tightly branched hybrid of Ligustrum ovalifolium and Ligustrum obtusifolium.

- *She wrote a short paragraph that included "ibota privet."*
- *He looked up "ibota privet" because he had never seen it before.*

---

icaco *(noun)*

Small tropical American tree bearing edible plumlike fruit.

- *She wrote a short paragraph that included "icaco."*
- *Understanding "icaco" helps you talk about this topic clearly.*

---

idesia *(noun)*

Deciduous roundheaded Asiatic tree widely grown in mild climates as an ornamental for its heart-shaped leaves and fragrant yellow-green flowers followed by hanging clusters of fleshy orange-red berries.

- *They discussed "idesia" during the group presentation.*
- *In class, the teacher used "idesia" to mean deciduous roundheaded asiatic tree widely grown in....*

---

idesia polycarpa *(noun)*

Deciduous roundheaded Asiatic tree widely grown in mild climates as an ornamental for its heart-shaped leaves and fragrant yellow-green flowers followed by hanging clusters of fleshy orange-red berries.

- *In class, the teacher used "idesia polycarpa" to mean deciduous roundheaded asiatic tree widely grown in....*
- *The article explained what "idesia polycarpa" means with a simple example.*

---

ilama *(noun)*

Tropical American tree grown in southern United States having a whitish pink-tinged fruit.

- *In class, the teacher used "ilama" to mean tropical american tree grown in southern united....*
- *The article explained what "ilama" means with a simple example.*

---

ilama tree *(noun)*

Tropical American tree grown in southern United States having a whitish pink-tinged fruit.

- *Understanding "ilama tree" helps you talk about this topic clearly.*
- *In class, the teacher used "ilama tree" to mean tropical american tree grown in southern united....*

---

ilex paraguariensis *(noun)*

South American holly; leaves used in making a drink like tea.

- *In class, the teacher used "ilex paraguariensis" to mean south american holly; leaves used in making a drink....*
- *They discussed "ilex paraguariensis" during the group presentation.*

---

iliamna acerifolia *(noun)*

Perennial of northwestern United States and western Canada resembling a hollyhock and having white or pink flowers.

- *Understanding "iliamna acerifolia" helps you talk about this topic clearly.*
- *They discussed "iliamna acerifolia" during the group presentation.*

---

iliamna remota *(noun)*

A rare mallow found only in Illinois resembling the common hollyhock and having pale rose-mauve flowers; sometimes placed in genus Sphaeralcea.

- *She wrote a short paragraph that included "iliamna remota."*
- *Understanding "iliamna remota" helps you talk about this topic clearly.*

iliamna ruvularis *(noun)*

Perennial of northwestern United States and western Canada resembling a hollyhock and having white or pink flowers.

- *He looked up "iliamna ruvularis" because he had never seen it before.*
- *She wrote a short paragraph that included "iliamna ruvularis."*

illecebrum *(noun)*

One species: coral necklace.

- *He looked up "illecebrum" because he had never seen it before.*
- *She wrote a short paragraph that included "illecebrum."*

illecebrum verticullatum *(noun)*

Glabrous annual with slender taproot and clusters of white flowers; western Europe especially western Mediterranean and Atlantic coastal areas.

- *The article explained what "illecebrum verticullatum" means with a simple example.*
- *She wrote a short paragraph that included "illecebrum verticullatum."*

illicium *(noun)*

Anise trees: evergreen trees with aromatic leaves.

- *He looked up "illicium" because he had never seen it before.*
- *They discussed "illicium" during the group presentation.*

illicium anisatum *(noun)*

Small shrubby tree of Japan and Taiwan; flowers are not fragrant.

- *Understanding "illicium anisatum" helps you talk about this topic clearly.*
- *He looked up "illicium anisatum" because he had never seen it before.*

illicium floridanum *(noun)*

Small shrubby tree with purple flowers; found in wet soils of southeastern United States.

- *They discussed "illicium floridanum" during the group presentation.*
- *He looked up "illicium floridanum" because he had never seen it before.*

illicium verum *(noun)*

Small tree of China and Vietnam bearing anise-scented star-shaped fruit used in food and medicinally as a carminative.

- *She wrote a short paragraph that included "illicium verum."*
- *The article explained what "illicium verum" means with a simple example.*

imbauba *(noun)*

Tropical American tree with large peltate leaves and hollow stems.

- *She wrote a short paragraph that included "imbauba."*
- *Understanding "imbauba" helps you talk about this topic clearly.*

imou pine *(noun)*

Tall New Zealand timber tree.

- *Understanding "imou pine" helps you talk about this topic clearly.*
- *They discussed "imou pine" during the group presentation.*

incienso *(noun)*

Fragrant rounded shrub of southwestern United States and adjacent Mexico having brittle stems and small crowded blue-green leaves and yellow flowers; produces a resin used in incense and varnish and in folk medicine.

- *He looked up "incienso" because he had never seen it before.*
- *They discussed "incienso" during the group presentation.*

indene *(noun)*

A colorless liquid hydrocarbon extracted from petroleum or coal tar and used in making synthetic resins.

- *The article explained what "indene" means with a simple example.*
- *She wrote a short paragraph that included "indene."*

indian breadroot *(noun)*

Densely hairy perennial of central North America having edible tuberous roots.

- *She wrote a short paragraph that included "indian breadroot."*
- *Understanding "indian breadroot" helps you talk about this topic clearly.*

indian rattlebox *(noun)*

Erect subshrub having purple-tinted flowers and an inflated pod in which the ripe seeds rattle; India.

- *Understanding "indian rattlebox" helps you talk about this topic clearly.*
- *In class, the teacher used "indian rattlebox" to mean erect subshrub having purple-tinted flowers and an....*

indigofera suffruticosa *(noun)*

Shrub of West Indies and South America that is a source of indigo dye.

- *Understanding "indigofera suffruticosa" helps you talk about this topic clearly.*
- *In class, the teacher used "indigofera suffruticosa" to mean shrub of west indies and south america that is a....*

inkberry *(noun)*

Evergreen holly of eastern North America with oblong leathery leaves and small black berries.

- *In class, the teacher used "inkberry" to mean evergreen holly of eastern north america with....*
- *Understanding "inkberry" helps you talk about this topic clearly.*

innocense *(noun)*

White and lavender to pale-blue flowers grow in perfect rings of widely spaced bands around the stems forming a kind of pagoda; California.

- *Understanding "innocense" helps you talk about this topic clearly.*
- *They discussed "innocense" during the group presentation.*

ipomoea leptophylla *(noun)*

A morning glory with long roots of western United States.

- *Understanding "ipomoea leptophylla" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ipomoea leptophylla."*

ipomoea orizabensis *(noun)*

Tropical American morning glory.

- *The article explained what "ipomoea orizabensis" means with a simple example.*
- *In class, the teacher used "ipomoea orizabensis" to mean tropical american morning glory.*

ipomoea panurata *(noun)*

Tropical American prostrate or climbing herbaceous perennial having an enormous starchy root; sometimes held to be source of the sweet potato.

- *In class, the teacher used "ipomoea panurata" to mean tropical american prostrate or climbing herbaceous....*
- *They discussed "ipomoea panurata" during the group presentation.*

ipomoea pes-caprae *(noun)*

A prostrate perennial of coastal sand dunes Florida to Texas.

- *She wrote a short paragraph that included "ipomoea pes-caprae."*
- *Understanding "ipomoea pes-caprae" helps you talk about this topic clearly.*

ipomoea quamoclit *(noun)*

Tropical American annual climber having red (sometimes white) flowers and finely dissected leaves; naturalized in United States and elsewhere.

- *She wrote a short paragraph that included "ipomoea quamoclit."*
- *He looked up "ipomoea quamoclit" because he had never seen it before.*

iresine *(noun)*

Genus of tropical American herbs or subshrubs.

- *She wrote a short paragraph that included "iresine."*
- *Understanding "iresine" helps you talk about this topic clearly.*

iresine herbstii *(noun)*

South American plant having green to purple or red branches with green to purple ornamental foliage and spikes of insignificant woolly flowers with dry membranous bracts.

- *The article explained what “iresine herbstii” means with a simple example.*
- *In class, the teacher used “iresine herbstii” to mean south american plant having green to purple or red....*

---

iresine reticulata *(noun)*

South American plant having green to purple or red branches with green to purple ornamental foliage and spikes of insignificant woolly flowers with dry membranous bracts.

- *They discussed “iresine reticulata” during the group presentation.*
- *In class, the teacher used “iresine reticulata” to mean south american plant having green to purple or red....*

---

iridaceous plant *(noun)*

Any bulbous plant of the family Iridaceae.

- *She wrote a short paragraph that included “iridaceous plant.”*
- *They discussed “iridaceous plant” during the group presentation.*

---

iris filifolia *(noun)*

Bulbous Spanish iris with red-violet flowers.

- *He looked up “iris filifolia” because he had never seen it before.*
- *Understanding “iris filifolia” helps you talk about this topic clearly.*

---

iris foetidissima *(noun)*

Iris with purple flowers and foul-smelling leaves; southern and western Europe and North Africa.

- *In class, the teacher used “iris foetidissima” to mean iris with purple flowers and foul-smelling leaves;....*
- *He looked up “iris foetidissima” because he had never seen it before.*

---

iris kaempferi *(noun)*

Iris native to Japan having large showy flowers.

- *The article explained what “iris kaempferi” means with a simple example.*
- *In class, the teacher used “iris kaempferi” to mean iris native to japan having large showy flowers.*

---

iris kochii *(noun)*

Iris of northern Italy having deep blue-purple flowers; similar to but smaller than Iris germanica.

- *He looked up “iris kochii” because he had never seen it before.*
- *In class, the teacher used “iris kochii” to mean iris of northern italy having deep blue-purple....*

---

iris pseudacorus *(noun)*

Common yellow-flowered iris of Europe and North Africa, naturalized in United States and often cultivated.

- *She wrote a short paragraph that included “iris pseudacorus.”*
- *They discussed “iris pseudacorus” during the group presentation.*

---

iris tingitana *(noun)*

Bulbous Spanish iris having blue flowers.

- *Understanding “iris tingitana” helps you talk about this topic clearly.*
- *In class, the teacher used “iris tingitana” to mean bulbous spanish iris having blue flowers.*

---

iris xiphioides *(noun)*

Bulbous iris native to the Pyrenees; widely cultivated for its large delicate flowers in various colors except yellow.

- *She wrote a short paragraph that included “iris xiphioides.”*
- *They discussed “iris xiphioides” during the group presentation.*

---

iris xiphium *(noun)*

Bulbous iris of western Mediterranean region having usually violet-purple flowers.

- *She wrote a short paragraph that included “iris xiphium.”*
- *He looked up “iris xiphium” because he had never seen it before.*

---

irvingia gabonensis *(noun)*

African tree with edible yellow fruit resembling mangos; valued for its oil-rich seed and hardy green wood that resists termites.

- *He looked up “irvingia gabonensis” because he had never seen it before.*
- *Understanding “irvingia gabonensis” helps you talk about this topic clearly.*

isatis *(noun)*

Old World genus of annual to perennial herbs: woad.

- *They discussed "isatis" during the group presentation.*
- *In class, the teacher used "isatis" to mean old world genus of annual to perennial herbs: woad.*

isatis tinctoria *(noun)*

European biennial formerly grown for the blue coloring matter yielded by its leaves.

- *Understanding "isatis tinctoria" helps you talk about this topic clearly.*
- *The article explained what "isatis tinctoria" means with a simple example.*

isocyclic *(adjective)*

Containing a closed ring of atoms of the same kind especially carbon atoms.

- *Would you call this situation "isocyclic"? Explain why.*
- *A "isocyclic" approach may work better in this case.*

isoetaceae *(noun)*

Quillworts; coextensive with the genus Isoetes.

- *They discussed "isoetaceae" during the group presentation.*
- *In class, the teacher used "isoetaceae" to mean quillworts; coextensive with the genus isoetes.*

isoetales *(noun)*

Aquatic or marsh-growing fern allies; known to have existed since the Cenozoic; sometimes included in Lycopodiales.

- *The article explained what "isoetales" means with a simple example.*
- *In class, the teacher used "isoetales" to mean aquatic or marsh-growing fern allies; known to have....*

isopyrum *(noun)*

Tufted perennial herbs of northern hemisphere.

- *He looked up "isopyrum" because he had never seen it before.*
- *Understanding "isopyrum" helps you talk about this topic clearly.*

isopyrum biternatum *(noun)*

Slender erect perennial of eastern North America having tuberous roots and pink-tinged white flowers; resembles meadow rue.

- *The article explained what "isopyrum biternatum" means with a simple example.*
- *In class, the teacher used "isopyrum biternatum" to mean slender erect perennial of eastern north america....*

iva xanthifolia *(noun)*

Tall annual marsh elder common in moist rich soil in central North America that can cause contact dermatitis; produces much pollen that is a major cause of hay fever.

- *The article explained what "iva xanthifolia" means with a simple example.*
- *She wrote a short paragraph that included "iva xanthifolia."*

jaboncillo *(noun)*

Evergreen of tropical America having pulpy fruit containing saponin which was used as soap by Native Americans.

- *The article explained what "jaboncillo" means with a simple example.*
- *Understanding "jaboncillo" helps you talk about this topic clearly.*

jaboticaba tree *(noun)*

Small evergreen tropical tree native to Brazil and West Indies but introduced into southern United States; grown in Brazil for its edible tough-skinned purple grapelike fruit that grows all along the branches.

- *In class, the teacher used "jaboticaba tree" to mean small evergreen tropical tree native to brazil and....*
- *They discussed "jaboticaba tree" during the group presentation.*

jacksonia *(noun)*

Genus of yellow-flowered Australian unarmed or spiny shrubs without true leaves but having leaflike stems or branches.

- *They discussed "jacksonia" during the group presentation.*
- *Understanding "jacksonia" helps you talk about this topic clearly.*

jacquinia *(noun)*

Sometimes placed in family Myrsinaceae.

- *She wrote a short paragraph that included "jacquinia."*
- *They discussed "jacquinia" during the group presentation.*

jacquinia armillaris *(noun)*

Small West Indian shrub or tree with hard glossy seeds patterned yellow and brown that are used to make bracelets.

- *She wrote a short paragraph that included "jacquinia armillaris."*
- *He looked up "jacquinia armillaris" because he had never seen it before.*

jacquinia keyensis *(noun)*

West Indian shrub or small tree having leathery saponaceous leaves and extremely hard wood.

- *Understanding "jacquinia keyensis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "jacquinia keyensis."*

jafnea semitosta *(noun)*

The fruiting bodies of this discomycete have a firm texture and long retain their cup shape; the pale brown interior blends with the color of dead leaves.

- *He looked up "jafnea semitosta" because he had never seen it before.*
- *She wrote a short paragraph that included "jafnea semitosta."*

jambosa *(noun)*

Tropical tree of the East Indies cultivated for its edible fruit.

- *She wrote a short paragraph that included "jambosa."*
- *He looked up "jambosa" because he had never seen it before.*

jamesonia *(noun)*

Xerophytic ferns of South America.

- *The article explained what "jamesonia" means with a simple example.*
- *In class, the teacher used "jamesonia" to mean xerophytic ferns of south america.*

japanese wistaria *(noun)*

Having flowers of pink to mauve or violet-blue.

- *They discussed "japanese wistaria" during the group presentation.*
- *She wrote a short paragraph that included "japanese wistaria."*

jasminum mesnyi *(noun)*

Evergreen rambling yellow-flowered shrub of western China.

- *She wrote a short paragraph that included "jasminum mesnyi."*
- *Understanding "jasminum mesnyi" helps you talk about this topic clearly.*

jasminum nudiflorum *(noun)*

Deciduous rambling shrub widely cultivated for its winter-blooming yellow flowers.

- *She wrote a short paragraph that included "jasminum nudiflorum."*
- *He looked up "jasminum nudiflorum" because he had never seen it before.*

jatropha curcus *(noun)*

Small tropical American tree yielding purple dye and a tanning extract and bearing physic nuts containing a purgative oil that is poisonous in large quantities.

- *Understanding "jatropha curcus" helps you talk about this topic clearly.*
- *In class, the teacher used "jatropha curcus" to mean small tropical american tree yielding purple dye....*

jatropha stimulosus *(noun)*

A stinging herb of tropical America.

- *She wrote a short paragraph that included "jatropha stimulosus."*
- *The article explained what "jatropha stimulosus" means with a simple example.*

jatropha urens *(noun)*

A stinging herb of tropical America.

- *In class, the teacher used "jatropha urens" to mean a stinging herb of tropical america.*
- *The article explained what "jatropha urens" means with a simple example.*

---

jellyleaf *(noun)*

Herb widely distributed in tropics and subtropics used for forage and medicinally as a demulcent and having a fine soft bast stronger than jute; sometimes an aggressive weed.

- *He looked up "jellyleaf" because he had never seen it before.*
- *In class, the teacher used "jellyleaf" to mean herb widely distributed in tropics and subtropics....*

---

jewbush *(noun)*

Low tropical American shrub having powerful emetic properties.

- *He looked up "jewbush" because he had never seen it before.*
- *She wrote a short paragraph that included "jewbush."*

---

jiqui *(noun)*

Cuban timber tree with hard wood very resistant to moisture.

- *In class, the teacher used "jiqui" to mean cuban timber tree with hard wood very resistant to....*
- *The article explained what "jiqui" means with a simple example.*

---

jocote *(noun)*

Common tropical American shrub or small tree with purplish fruit.

- *Understanding "jocote" helps you talk about this topic clearly.*
- *He looked up "jocote" because he had never seen it before.*

---

joewood *(noun)*

West Indian shrub or small tree having leathery saponaceous leaves and extremely hard wood.

- *The article explained what "joewood" means with a simple example.*
- *In class, the teacher used "joewood" to mean west indian shrub or small tree having leathery....*

---

juglandaceae *(noun)*

Trees having usually edible nuts: butternuts; walnuts; hickories; pecans.

- *In class, the teacher used "juglandaceae" to mean trees having usually edible nuts: butternuts;....*
- *The article explained what "juglandaceae" means with a simple example.*

---

juglandales *(noun)*

Coextensive with the family Juglandaceae.

- *He looked up "juglandales" because he had never seen it before.*
- *In class, the teacher used "juglandales" to mean coextensive with the family juglandaceae.*

---

jumby bead *(noun)*

West Indian tree similar to Ormosia monosperma but larger and having smaller leaflets and smaller seeds.

- *She wrote a short paragraph that included "jumby bead."*
- *They discussed "jumby bead" during the group presentation.*

---

jumby bean *(noun)*

Small tree of West Indies and northeastern Venezuela having large oblong pointed leaflets and panicles of purple flowers; seeds are black or scarlet with black spots.

- *They discussed "jumby bean" during the group presentation.*
- *She wrote a short paragraph that included "jumby bean."*

---

jumby tree *(noun)*

Small tree of West Indies and northeastern Venezuela having large oblong pointed leaflets and panicles of purple flowers; seeds are black or scarlet with black spots.

- *She wrote a short paragraph that included "jumby tree."*
- *He looked up "jumby tree" because he had never seen it before.*

---

juncaceae *(noun)*

Tufted herbs resembling grasses: rushes.

- *The article explained what "juncaceae" means with a simple example.*
- *She wrote a short paragraph that included "juncaceae."*

juncaginaceae *(noun)*

A family of monocotyledonous bog herbs of order Naiadales.

- *He looked up "juncaginaceae" because he had never seen it before.*
- *In class, the teacher used "juncaginaceae" to mean a family of monocotyledonous bog herbs of order....*

juncus articulatus *(noun)*

Rush of Australia.

- *She wrote a short paragraph that included "juncus articulatus."*
- *The article explained what "juncus articulatus" means with a simple example.*

juncus bufonius *(noun)*

Low-growing annual rush of damp low-lying ground; nearly cosmopolitan.

- *They discussed "juncus bufonius" during the group presentation.*
- *He looked up "juncus bufonius" because he had never seen it before.*

juncus effusus *(noun)*

Tall rush with soft erect or arching stems found in Eurasia, Australia, New Zealand, and common in North America.

- *She wrote a short paragraph that included "juncus effusus."*
- *He looked up "juncus effusus" because he had never seen it before.*

juncus inflexus *(noun)*

Tall rush of temperate regions.

- *Understanding "juncus inflexus" helps you talk about this topic clearly.*
- *He looked up "juncus inflexus" because he had never seen it before.*

juncus leseurii *(noun)*

Rush of the Pacific coast of North America.

- *Understanding "juncus leseurii" helps you talk about this topic clearly.*
- *They discussed "juncus leseurii" during the group presentation.*

juneberry *(noun)*

Any of various North American trees or shrubs having showy white flowers and edible blue-black or purplish fruit.

- *He looked up "juneberry" because he had never seen it before.*
- *In class, the teacher used "juneberry" to mean any of various north american trees or shrubs....*

juneberry holly *(noun)*

A holly shrub.

- *In class, the teacher used "juneberry holly" to mean a holly shrub.*
- *The article explained what "juneberry holly" means with a simple example.*

jungermanniaceae *(noun)*

Comprising the leafy members of the order Jungermanniales.

- *The article explained what "jungermanniaceae" means with a simple example.*
- *She wrote a short paragraph that included "jungermanniaceae."*

jungermanniales *(noun)*

Large order of chiefly tropical liverworts.

- *She wrote a short paragraph that included "jungermanniales."*
- *He looked up "jungermanniales" because he had never seen it before.*

juniperus bermudiana *(noun)*

Ornamental densely pyramidal juniper of Bermuda; fairly large for a juniper.

- *She wrote a short paragraph that included "juniperus bermudiana."*
- *The article explained what "juniperus bermudiana" means with a simple example.*

juniperus flaccida *(noun)*

Small tree of western Texas and mountains of Mexico having spreading branches with drooping branchlets.

- *In class, the teacher used "juniperus flaccida" to mean small tree of western texas and mountains of mexico....*
- *The article explained what "juniperus flaccida" means with a simple example.*

---

juniperus horizontalis *(noun)*

Low to prostrate shrub of Canada and northern United States; bronzed purple in winter.

- *She wrote a short paragraph that included "juniperus horizontalis."*
- *The article explained what "juniperus horizontalis" means with a simple example.*

---

juniperus silicicola *(noun)*

Juniper of swampy coastal regions of southeastern United States; similar to eastern red cedar.

- *They discussed "juniperus silicicola" during the group presentation.*
- *He looked up "juniperus silicicola" because he had never seen it before.*

---

jupati *(noun)*

A tall Brazilian feather palm with a terminal crown of very large leathery pinnatisect leaves rising from long strong stems used for structural purposes.

- *They discussed "jupati" during the group presentation.*
- *In class, the teacher used "jupati" to mean a tall brazilian feather palm with a terminal crown....*

---

jupati palm *(noun)*

A tall Brazilian feather palm with a terminal crown of very large leathery pinnatisect leaves rising from long strong stems used for structural purposes.

- *She wrote a short paragraph that included "jupati palm."*
- *Understanding "jupati palm" helps you talk about this topic clearly.*

---

jupaty *(noun)*

A tall Brazilian feather palm with a terminal crown of very large leathery pinnatisect leaves rising from long strong stems used for structural purposes.

- *The article explained what "jupaty" means with a simple example.*
- *In class, the teacher used "jupaty" to mean a tall brazilian feather palm with a terminal crown....*

---

kahikatea *(noun)*

New Zealand evergreen valued for its light easily worked wood.

- *She wrote a short paragraph that included "kahikatea."*
- *Understanding "kahikatea" helps you talk about this topic clearly.*

---

kalantas *(noun)*

Philippine timber tree having hard red fragrant wood.

- *She wrote a short paragraph that included "kalantas."*
- *The article explained what "kalantas" means with a simple example.*

---

kalmia polifolia *(noun)*

Laurel of bogs of northwestern United States having small purple flowers and pale leaves that are glaucous beneath.

- *In class, the teacher used "kalmia polifolia" to mean laurel of bogs of northwestern united states having....*
- *The article explained what "kalmia polifolia" means with a simple example.*

---

kalumpang *(noun)*

Large tree of Old World tropics having foul-smelling orange-red blossoms followed by red pods enclosing oil-rich seeds sometimes used as food.

- *In class, the teacher used "kalumpang" to mean large tree of old world tropics having....*
- *Understanding "kalumpang" helps you talk about this topic clearly.*

---

kanaf *(noun)*

Valuable fiber plant of East Indies now widespread in cultivation.

- *The article explained what "kanaf" means with a simple example.*
- *Understanding "kanaf" helps you talk about this topic clearly.*

---

kapuka *(noun)*

Small New Zealand broadleaf evergreen tree often cultivated in warm regions as an ornamental.

- *She wrote a short paragraph that included "kapuka."*

- *The article explained what “kapuka” means with a simple example.*

katharobe *(noun)*

An organism that lives in an oxygenated medium lacking organic matter.

- *The article explained what “katharobe” means with a simple example.*
- *They discussed “katharobe” during the group presentation.*

kaury *(noun)*

Tall timber tree of New Zealand having white straight-grained wood.

- *He looked up “kaury” because he had never seen it before.*
- *They discussed “kaury” during the group presentation.*

kawaka *(noun)*

New Zealand timber tree resembling the cypress.

- *In class, the teacher used “kawaka” to mean new zealand timber tree resembling the cypress.*
- *The article explained what “kawaka” means with a simple example.*

kekule formula *(noun)*

A closed chain of 6 carbon atoms with hydrogen atoms attached.

- *The article explained what “kekule formula” means with a simple example.*
- *In class, the teacher used “kekule formula” to mean a closed chain of 6 carbon atoms with hydrogen....*

kelpwort *(noun)*

Bushy plant of Old World salt marshes and sea beaches having prickly leaves; burned to produce a crude soda ash.

- *In class, the teacher used “kelpwort” to mean bushy plant of old world salt marshes and sea....*
- *They discussed “kelpwort” during the group presentation.*

kennedia *(noun)*

Genus of Australian woody vines having showy red or purplish flowers.

- *The article explained what “kennedia” means with a simple example.*
- *In class, the teacher used “kennedia” to mean genus of australian woody vines having showy red or....*

kennedia coccinea *(noun)*

Prostrate or twining woody vine with small leathery leaves and umbels of red flowers; Australia and Tasmania.

- *He looked up “kennedia coccinea” because he had never seen it before.*
- *Understanding “kennedia coccinea” helps you talk about this topic clearly.*

kennedia prostrata *(noun)*

Hairy trailing or prostrate western Australian vine with bright scarlet-pink flowers.

- *She wrote a short paragraph that included “kennedia prostrata.”*
- *He looked up “kennedia prostrata” because he had never seen it before.*

kennedya *(noun)*

Genus of Australian woody vines having showy red or purplish flowers.

- *She wrote a short paragraph that included “kennedya.”*
- *The article explained what “kennedya” means with a simple example.*

kentan *(noun)*

East Asian perennial having large reddish-orange black-spotted flowers with reflexed petals.

- *They discussed “kentan” during the group presentation.*
- *He looked up “kentan” because he had never seen it before.*

kentucy blue grass *(noun)*

Valuable meadow and pasture grass in Europe and especially central United States having tall stalks and slender bright green leaves; a chief constituent in lawn grass mixtures.

- *The article explained what “kentucy blue grass” means with a simple example.*
- *Understanding “kentucy blue grass” helps you talk about this topic clearly.*

keteleeria *(noun)*

Asiatic conifers resembling firs.

- *She wrote a short paragraph that included "keteleeria."*
- *Understanding "keteleeria" helps you talk about this topic clearly.*

ketembilla *(noun)*

A small shrubby spiny tree cultivated for its maroon-purple fruit with sweet purple pulp tasting like gooseberries; Sri Lanka and India.

- *In class, the teacher used "ketembilla" to mean a small shrubby spiny tree cultivated for its....*
- *Understanding "ketembilla" helps you talk about this topic clearly.*

ketembilla tree *(noun)*

A small shrubby spiny tree cultivated for its maroon-purple fruit with sweet purple pulp tasting like gooseberries; Sri Lanka and India.

- *Understanding "ketembilla tree" helps you talk about this topic clearly.*
- *He looked up "ketembilla tree" because he had never seen it before.*

ketohexose *(noun)*

A monosaccharide having six carbon atoms and a ketone group.

- *She wrote a short paragraph that included "ketohexose."*
- *The article explained what "ketohexose" means with a simple example.*

keurboom *(noun)*

Tree with odd-pinnate leaves and racemes of fragrant pink to purple flowers.

- *He looked up "keurboom" because he had never seen it before.*
- *She wrote a short paragraph that included "keurboom."*

khesari *(noun)*

European annual grown for forage; seeds used for food in India and for stock elsewhere.

- *They discussed "khesari" during the group presentation.*
- *In class, the teacher used "khesari" to mean european annual grown for forage; seeds used for....*

kiaat *(noun)*

Deciduous South African tree having large odd-pinnate leaves and profuse fragrant orange-yellow flowers; yields a red juice and heavy strong durable wood.

- *In class, the teacher used "kiaat" to mean deciduous south african tree having large....*
- *He looked up "kiaat" because he had never seen it before.*

kiggelaria *(noun)*

Small genus of South African shrubs or small trees.

- *Understanding "kiggelaria" helps you talk about this topic clearly.*
- *In class, the teacher used "kiggelaria" to mean small genus of south african shrubs or small trees.*

kiggelaria africana *(noun)*

Large much-branched shrub grown primarily for its evergreen foliage.

- *The article explained what "kiggelaria africana" means with a simple example.*
- *Understanding "kiggelaria africana" helps you talk about this topic clearly.*

kingcup *(noun)*

Any of various plants of the genus Ranunculus.

- *The article explained what "kingcup" means with a simple example.*
- *Understanding "kingcup" helps you talk about this topic clearly.*

kirkia *(noun)*

Small genus of tropical South African trees and shrubs.

- *They discussed "kirkia" during the group presentation.*
- *The article explained what "kirkia" means with a simple example.*

kirkia wilmsii *(noun)*

Small African deciduous tree with spreading crown having leaves clustered toward ends of branches and clusters of creamy flowers resembling lilacs.

- *They discussed “kirkia wilmsii” during the group presentation.*
- *In class, the teacher used “kirkia wilmsii” to mean small african deciduous tree with spreading crown....*

---

kitambilla *(noun)*

A small shrubby spiny tree cultivated for its maroon-purple fruit with sweet purple pulp tasting like gooseberries; Sri Lanka and India.

- *In class, the teacher used “kitambilla” to mean a small shrubby spiny tree cultivated for its....*
- *Understanding “kitambilla” helps you talk about this topic clearly.*

---

kitembilla *(noun)*

A small shrubby spiny tree cultivated for its maroon-purple fruit with sweet purple pulp tasting like gooseberries; Sri Lanka and India.

- *He looked up “kitembilla” because he had never seen it before.*
- *Understanding “kitembilla” helps you talk about this topic clearly.*

---

kittul *(noun)*

Fishtail palm of India to Malay Peninsula; sap yields a brown sugar (jaggery) and trunk pith yields sago.

- *The article explained what “kittul” means with a simple example.*
- *In class, the teacher used “kittul” to mean fishtail palm of india to malay peninsula; sap....*

---

kitul *(noun)*

Fishtail palm of India to Malay Peninsula; sap yields a brown sugar (jaggery) and trunk pith yields sago.

- *She wrote a short paragraph that included “kitul.”*
- *He looked up “kitul” because he had never seen it before.*

---

kitul tree *(noun)*

Fishtail palm of India to Malay Peninsula; sap yields a brown sugar (jaggery) and trunk pith yields sago.

- *The article explained what “kitul tree” means with a simple example.*
- *She wrote a short paragraph that included “kitul tree.”*

---

klammath weed *(noun)*

Yellow-flowered perennial common in fields and waste places but a weed in rangelands.

- *He looked up “klammath weed” because he had never seen it before.*
- *She wrote a short paragraph that included “klammath weed.”*

---

knawe *(noun)*

Widely distributed low-growing Eurasian herb having narrow leaves and inconspicuous green flowers.

- *In class, the teacher used “knawe” to mean widely distributed low-growing eurasian herb having....*
- *The article explained what “knawe” means with a simple example.*

---

knawel *(noun)*

Widely distributed low-growing Eurasian herb having narrow leaves and inconspicuous green flowers.

- *In class, the teacher used “knawel” to mean widely distributed low-growing eurasian herb having....*
- *He looked up “knawel” because he had never seen it before.*

---

knightia *(noun)*

Small genus of trees or shrubs of New Zealand and New Caledonia.

- *She wrote a short paragraph that included “knightia.”*
- *The article explained what “knightia” means with a simple example.*

---

kniphofia *(noun)*

A plant of the genus Kniphofia having long grasslike leaves and tall scapes of red or yellow drooping flowers.

- *They discussed “kniphofia” during the group presentation.*
- *In class, the teacher used “kniphofia” to mean a plant of the genus kniphofia having long....*

---

kniphofia praecox *(noun)*

Widely cultivated hybrid poker plant.

- *They discussed “kniphofia praecox” during the group presentation.*
- *She wrote a short paragraph that included “kniphofia praecox.”*

kniphofia uvaria *(noun)*

Clump-forming plant of South Africa with spikes of scarlet flowers.

- *She wrote a short paragraph that included "kniphofia uvaria."*
- *He looked up "kniphofia uvaria" because he had never seen it before.*

knobcone pine *(noun)*

Medium-sized three-needled pine of the Pacific coast of the United States having a prominent knob on each scale of the cone.

- *They discussed "knobcone pine" during the group presentation.*
- *Understanding "knobcone pine" helps you talk about this topic clearly.*

koellia *(noun)*

American mountain mint.

- *They discussed "koellia" during the group presentation.*
- *Understanding "koellia" helps you talk about this topic clearly.*

kohleria *(noun)*

Shrubby herb cultivated for their soft velvety foliage and showy scarlet flowers.

- *She wrote a short paragraph that included "kohleria."*
- *The article explained what "kohleria" means with a simple example.*

kok-saghyz *(noun)*

Perennial dandelion native to Kazakhstan cultivated for its fleshy roots that have high rubber content.

- *In class, the teacher used "kok-saghyz" to mean perennial dandelion native to kazakhstan cultivated....*
- *He looked up "kok-saghyz" because he had never seen it before.*

kok-sagyz *(noun)*

Perennial dandelion native to Kazakhstan cultivated for its fleshy roots that have high rubber content.

- *He looked up "kok-sagyz" because he had never seen it before.*
- *She wrote a short paragraph that included "kok-sagyz."*

kolkwitzia *(noun)*

Chinese genus of 1 species: beauty bush.

- *They discussed "kolkwitzia" during the group presentation.*
- *Understanding "kolkwitzia" helps you talk about this topic clearly.*

kolkwitzia amabilis *(noun)*

Chinese deciduous shrub with yellow-throated pinkish flowers and bristly fruit; often cultivated as an ornamental.

- *She wrote a short paragraph that included "kolkwitzia amabilis."*
- *He looked up "kolkwitzia amabilis" because he had never seen it before.*

konini *(noun)*

Erect deciduous shrub or tree to 10 feet with maroon flowers; New Zealand.

- *In class, the teacher used "konini" to mean erect deciduous shrub or tree to 10 feet with....*
- *They discussed "konini" during the group presentation.*

kosteletzya *(noun)*

Small genus of herbs of southeastern United States and tropical America and Africa.

- *The article explained what "kosteletzya" means with a simple example.*
- *They discussed "kosteletzya" during the group presentation.*

kosteletzya virginica *(noun)*

Subshrub of southeastern United States to New York.

- *She wrote a short paragraph that included "kosteletzya virginica."*
- *He looked up "kosteletzya virginica" because he had never seen it before.*

kowhai *(noun)*

Shrub or small tree of New Zealand and Chile having pendulous racemes of tubular golden-yellow flowers; yields a hard strong wood.

- *She wrote a short paragraph that included "kowhai."*
- *He looked up "kowhai" because he had never seen it before.*

krigia *(noun)*

Any small branched yellow-flowered North American herb of the genus Krigia.

- *She wrote a short paragraph that included "krigia."*
- *Understanding "krigia" helps you talk about this topic clearly.*

krigia bulbosa *(noun)*

Small yellow-flowered herb resembling dandelions of central and southeastern United States.

- *The article explained what "krigia bulbosa" means with a simple example.*
- *She wrote a short paragraph that included "krigia bulbosa."*

krigia dandelion *(noun)*

Small yellow-flowered herb resembling dandelions of central and southeastern United States.

- *The article explained what "krigia dandelion" means with a simple example.*
- *They discussed "krigia dandelion" during the group presentation.*

krubi *(noun)*

Malodorous tropical plant having a spathe that resembles the corolla of a morning glory and attains a diameter of several feet.

- *She wrote a short paragraph that included "krubi."*
- *Understanding "krubi" helps you talk about this topic clearly.*

kurakkan *(noun)*

East Indian cereal grass whose seed yield a somewhat bitter flour, a staple in the Orient.

- *He looked up "kurakkan" because he had never seen it before.*
- *They discussed "kurakkan" during the group presentation.*

kurchee *(noun)*

Tropical Asian tree with hard white wood and bark formerly used as a remedy for dysentery and diarrhea.

- *They discussed "kurchee" during the group presentation.*
- *In class, the teacher used "kurchee" to mean tropical asian tree with hard white wood and bark....*

kurchi *(noun)*

Tropical Asian tree with hard white wood and bark formerly used as a remedy for dysentery and diarrhea.

- *He looked up "kurchi" because he had never seen it before.*
- *They discussed "kurchi" during the group presentation.*

kurrat *(noun)*

Coarse Old World perennial having a large bulb and tall stalk of greenish purple-tinged flowers; widely naturalized.

- *They discussed "kurrat" during the group presentation.*
- *The article explained what "kurrat" means with a simple example.*

kweek *(noun)*

Trailing grass native to Europe now cosmopolitan in warm regions; used for lawns and pastures especially in southern United States and India.

- *She wrote a short paragraph that included "kweek."*
- *He looked up "kweek" because he had never seen it before.*

laburnum anagyroides *(noun)*

An ornamental shrub or tree of the genus Laburnum; often cultivated for Easter decorations.

- *In class, the teacher used "laburnum anagyroides" to mean an ornamental shrub or tree of the genus laburnum;....*
- *The article explained what "laburnum anagyroides" means with a simple example.*

laccopetalum *(noun)*

One species: giant buttercup.

- *Understanding "laccopetalum" helps you talk about this topic clearly.*

- *He looked up “laccopetalum” because he had never seen it before.*

laccopetalum giganteum *(noun)*

Spectacular perennial native of wet montane grasslands of Peru; formerly included in genus Ranunculus.

- *They discussed “laccopetalum giganteum” during the group presentation.*
- *Understanding “laccopetalum giganteum” helps you talk about this topic clearly.*

lacebark *(noun)*

Small tree or shrub of New Zealand having a profusion of axillary clusters of honey-scented paper-white flowers and whose bark is used for cordage.

- *They discussed “lacebark” during the group presentation.*
- *He looked up “lacebark” because he had never seen it before.*

lacepod *(noun)*

Annual herb having pinnatifid basal leaves and slender racemes of small white flowers followed by one-seeded winged silicles.

- *Understanding “lacepod” helps you talk about this topic clearly.*
- *The article explained what “lacepod” means with a simple example.*

lacewood *(noun)*

Variably colored and sometimes variegated hard tough elastic wood of a sycamore tree.

- *In class, the teacher used “lacewood” to mean variably colored and sometimes variegated hard....*
- *The article explained what “lacewood” means with a simple example.*

lactuca sativa asparagina *(noun)*

Lettuce valued especially for its edible stems.

- *Understanding “lactuca sativa asparagina” helps you talk about this topic clearly.*
- *They discussed “lactuca sativa asparagina” during the group presentation.*

lactuca scariola *(noun)*

European annual wild lettuce having prickly stems; a troublesome weed in parts of United States.

- *The article explained what “lactuca scariola” means with a simple example.*
- *In class, the teacher used “lactuca scariola” to mean european annual wild lettuce having prickly stems;....*

lactuca serriola *(noun)*

European annual wild lettuce having prickly stems; a troublesome weed in parts of United States.

- *He looked up “lactuca serriola” because he had never seen it before.*
- *She wrote a short paragraph that included “lactuca serriola.”*

ladanum *(noun)*

A soft blackish-brown resinous exudate from various rockroses used in perfumes especially as a fixative.

- *In class, the teacher used “ladanum” to mean a soft blackish-brown resinous exudate from various....*
- *They discussed “ladanum” during the group presentation.*

lady’s-eardrop *(noun)*

Erect or climbing shrub of Brazil with deep pink to red flowers.

- *In class, the teacher used “lady’s-eardrop” to mean erect or climbing shrub of brazil with deep pink to....*
- *The article explained what “lady’s-eardrop” means with a simple example.*

lagarostrobus *(noun)*

Genus of dioecious evergreen trees of New Zealand and Tasmania; similar to genus Dacrydium.

- *In class, the teacher used “lagarostrobus” to mean genus of dioecious evergreen trees of new zealand....*
- *The article explained what “lagarostrobus” means with a simple example.*

lagarostrobus colensoi *(noun)*

Timber tree of New Zealand having shiny white wood.

- *He looked up “lagarostrobus colensoi” because he had never seen it before.*
- *She wrote a short paragraph that included “lagarostrobus colensoi.”*

lagarostrobus franklinii *(noun)*

Tasmanian timber tree with yellow aromatic wavy-grained wood used for carving and ship building; sometimes placed in genus Dacrydium.

- *The article explained what "lagarostrobus franklinii" means with a simple example.*
- *In class, the teacher used "lagarostrobus franklinii" to mean tasmanian timber tree with yellow aromatic....*

---

lagenaria *(noun)*

Bottle gourds.

- *Understanding "lagenaria" helps you talk about this topic clearly.*
- *They discussed "lagenaria" during the group presentation.*

---

lagenaria siceraria *(noun)*

Old World climbing plant with hard-shelled bottle-shaped gourds as fruits.

- *The article explained what "lagenaria siceraria" means with a simple example.*
- *In class, the teacher used "lagenaria siceraria" to mean old world climbing plant with hard-shelled....*

---

lagenophera *(noun)*

Small genus of herbs of Australia and South America having small solitary white or purple flowers similar to true daisies of genus Bellis.

- *In class, the teacher used "lagenophera" to mean small genus of herbs of australia and south america....*
- *They discussed "lagenophera" during the group presentation.*

---

lagerstroemia *(noun)*

Shrubs or small trees of tropical Asia and Africa usually with showy white, pink, or purplish flowers.

- *They discussed "lagerstroemia" during the group presentation.*
- *He looked up "lagerstroemia" because he had never seen it before.*

---

lagerstroemia indica *(noun)*

Ornamental shrub from eastern India commonly planted in the southern United States.

- *They discussed "lagerstroemia indica" during the group presentation.*
- *She wrote a short paragraph that included "lagerstroemia indica."*

---

lagerstroemia speciosa *(noun)*

Native to Asia, Australia, and East Indies, where it provides timber called pyinma; used elsewhere as an ornamental for its large showy flowers.

- *He looked up "lagerstroemia speciosa" because he had never seen it before.*
- *She wrote a short paragraph that included "lagerstroemia speciosa."*

---

laguncularia *(noun)*

A genus of Laguncularia.

- *In class, the teacher used "laguncularia" to mean a genus of laguncularia.*
- *He looked up "laguncularia" because he had never seen it before.*

---

laguncularia racemosa *(noun)*

Shrub to moderately large tree that grows in brackish water along the seacoasts of western Africa and tropical America; locally important as a source of tannin.

- *They discussed "laguncularia racemosa" during the group presentation.*
- *Understanding "laguncularia racemosa" helps you talk about this topic clearly.*

---

lalthyrus tingitanus *(noun)*

North African annual resembling the sweet pea having showy but odorless flowers.

- *Understanding "lalthyrus tingitanus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lalthyrus tingitanus."*

---

lamb succory *(noun)*

Small European herb with small yellow flowers.

- *Understanding "lamb succory" helps you talk about this topic clearly.*
- *In class, the teacher used "lamb succory" to mean small european herb with small yellow flowers.*

---

lambertia *(noun)*

Small genus of Australian shrubs.

- *The article explained what "lambertia" means with a simple example.*
- *They discussed "lambertia" during the group presentation.*

---

lambertia formosa *(noun)*

Erect bushy shrub of eastern Australia having terminal clusters of red flowers yielding much nectar.

- *Understanding "lambertia formosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lambertia formosa."*

---

lambkill *(noun)*

North American dwarf shrub resembling mountain laurel but having narrower leaves and small red flowers; poisonous to young stock.

- *In class, the teacher used "lambkill" to mean north american dwarf shrub resembling mountain....*
- *Understanding "lambkill" helps you talk about this topic clearly.*

---

lamellate placentation *(noun)*

With ovules on thin extensions of the placentae into a compound ovary.

- *The article explained what "lamellate placentation" means with a simple example.*
- *In class, the teacher used "lamellate placentation" to mean with ovules on thin extensions of the placentae....*

---

lamium amplexicaule *(noun)*

Eurasian plant having toothed leaves and small two-lipped white or purplish-red flowers.

- *She wrote a short paragraph that included "lamium amplexicaule."*
- *Understanding "lamium amplexicaule" helps you talk about this topic clearly.*

---

lanceolate spleenwort *(noun)*

A spleenwort of western Europe.

- *The article explained what "lanceolate spleenwort" means with a simple example.*
- *She wrote a short paragraph that included "lanceolate spleenwort."*

---

lancewood *(noun)*

Source of most of the lancewood of commerce.

- *Understanding "lancewood" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lancewood."*

---

lancewood tree *(noun)*

Source of most of the lancewood of commerce.

- *He looked up "lancewood tree" because he had never seen it before.*
- *She wrote a short paragraph that included "lancewood tree."*

---

langsat *(noun)*

East Indian tree bearing an edible yellow berry.

- *Understanding "langsat" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "langsat."*

---

langset *(noun)*

East Indian tree bearing an edible yellow berry.

- *In class, the teacher used "langset" to mean east indian tree bearing an edible yellow berry.*
- *Understanding "langset" helps you talk about this topic clearly.*

---

languas speciosa *(noun)*

Cultivated for its shining oblong leaves and arching clusters of white flowers with pink shading and crinkled yellow lips with variegated magenta stripes.

- *Understanding "languas speciosa" helps you talk about this topic clearly.*
- *He looked up "languas speciosa" because he had never seen it before.*

---

lanseh tree *(noun)*

East Indian tree bearing an edible yellow berry.

- *She wrote a short paragraph that included "lanseh tree."*
- *They discussed "lanseh tree" during the group presentation.*

lansium domesticum *(noun)*

East Indian tree bearing an edible yellow berry.

- *The article explained what "lansium domesticum" means with a simple example.*
- *They discussed "lansium domesticum" during the group presentation.*

laportea *(noun)*

Mostly tropical stinging herbs or trees: nettle.

- *He looked up "laportea" because he had never seen it before.*
- *They discussed "laportea" during the group presentation.*

laportea canadensis *(noun)*

American perennial herb found in rich woods and provided with stinging hairs; provides fibers used for textiles.

- *They discussed "laportea canadensis" during the group presentation.*
- *Understanding "laportea canadensis" helps you talk about this topic clearly.*

lappula *(noun)*

Stickweed; beggar's lice.

- *She wrote a short paragraph that included "lappula."*
- *Understanding "lappula" helps you talk about this topic clearly.*

lardizabala *(noun)*

Evergreen monoecious climbers of South America having dark mauve-blue edible berries.

- *The article explained what "lardizabala" means with a simple example.*
- *Understanding "lardizabala" helps you talk about this topic clearly.*

lardizabala family *(noun)*

Thick-stemmed lianas and some shrubs; some have edible fruit.

- *They discussed "lardizabala family" during the group presentation.*
- *Understanding "lardizabala family" helps you talk about this topic clearly.*

lardizabalaceae *(noun)*

Thick-stemmed lianas and some shrubs; some have edible fruit.

- *They discussed "lardizabalaceae" during the group presentation.*
- *He looked up "lardizabalaceae" because he had never seen it before.*

large-flowered calamint *(noun)*

Aromatic herb with large pink flowers; southern and southeastern Europe; Anatolia; northern Iran.

- *They discussed "large-flowered calamint" during the group presentation.*
- *Understanding "large-flowered calamint" helps you talk about this topic clearly.*

large-flowered fiddleneck *(noun)*

Annual of the western United States having large coiled flower spikes; a threatened species.

- *They discussed "large-flowered fiddleneck" during the group presentation.*
- *She wrote a short paragraph that included "large-flowered fiddleneck."*

largeleaf holly *(noun)*

A holly tree.

- *The article explained what "largeleaf holly" means with a simple example.*
- *They discussed "largeleaf holly" during the group presentation.*

larix laricina *(noun)*

Medium-sized larch of Canada and northern United States including Alaska having a broad conic crown and rust-brown scaly bark.

- *She wrote a short paragraph that included "larix laricina."*
- *Understanding "larix laricina" helps you talk about this topic clearly.*

larix lyallii *(noun)*

Medium-sized larch of the Rocky Mountains; closely related to Larix occidentalis.

- *Understanding "larix lyallii" helps you talk about this topic clearly.*
- *The article explained what "larix lyallii" means with a simple example.*

---

larix russica *(noun)*

Medium-sized larch of northeastern Russia and Siberia having narrowly conic crown and soft narrow bright-green leaves; used in cultivation.

- *In class, the teacher used "larix russica" to mean medium-sized larch of northeastern russia and....*
- *They discussed "larix russica" during the group presentation.*

---

larix siberica *(noun)*

Medium-sized larch of northeastern Russia and Siberia having narrowly conic crown and soft narrow bright-green leaves; used in cultivation.

- *In class, the teacher used "larix siberica" to mean medium-sized larch of northeastern russia and....*
- *Understanding "larix siberica" helps you talk about this topic clearly.*

---

lasthenia *(noun)*

Small genus of herbs of Pacific coast of North and South America.

- *They discussed "lasthenia" during the group presentation.*
- *In class, the teacher used "lasthenia" to mean small genus of herbs of pacific coast of north and....*

---

lasthenia chrysostoma *(noun)*

Small slender woolly annual with very narrow opposite leaves and branches bearing solitary golden-yellow flower heads; southwestern Oregon to Baja California and Arizona; often cultivated.

- *She wrote a short paragraph that included "lasthenia chrysostoma."*
- *The article explained what "lasthenia chrysostoma" means with a simple example.*

---

lastreopsis *(noun)*

Tropical terrestrial shield ferns.

- *The article explained what "lastreopsis" means with a simple example.*
- *In class, the teacher used "lastreopsis" to mean tropical terrestrial shield ferns.*

---

latanier *(noun)*

Fan palms of the southern United States and the Caribbean region.

- *Understanding "latanier" helps you talk about this topic clearly.*
- *The article explained what "latanier" means with a simple example.*

---

latanier palm *(noun)*

Fan palms of the southern United States and the Caribbean region.

- *He looked up "latanier palm" because he had never seen it before.*
- *They discussed "latanier palm" during the group presentation.*

---

lathyrus latifolius *(noun)*

Perennial climber of central and southern Europe having purple or pink or white flowers; naturalized in North America.

- *He looked up "lathyrus latifolius" because he had never seen it before.*
- *She wrote a short paragraph that included "lathyrus latifolius."*

---

lathyrus nissolia *(noun)*

Annual European vetch with red flowers.

- *Understanding "lathyrus nissolia" helps you talk about this topic clearly.*
- *In class, the teacher used "lathyrus nissolia" to mean annual european vetch with red flowers.*

---

lathyrus odoratus *(noun)*

Climbing garden plant having fragrant pastel-colored flowers.

- *They discussed "lathyrus odoratus" during the group presentation.*
- *The article explained what "lathyrus odoratus" means with a simple example.*

---

lathyrus vernus *(noun)*

Bushy European perennial having nodding racemose violet-blue flowers.

- *The article explained what "lathyrus vernus" means with a simple example.*

- *In class, the teacher used "lathyrus vernus" to mean bushy european perennial having nodding racemose....*

laticifer *(noun)*

A plant duct containing latex.

- *They discussed "laticifer" during the group presentation.*
- *Understanding "laticifer" helps you talk about this topic clearly.*

lauhala *(noun)*

Polynesian screw pine.

- *Understanding "lauhala" helps you talk about this topic clearly.*
- *The article explained what "lauhala" means with a simple example.*

lavandula stoechas *(noun)*

Shrubby greyish lavender of southwestern Europe having usually reddish-purple flowers.

- *In class, the teacher used "lavandula stoechas" to mean shrubby greyish lavender of southwestern europe....*
- *He looked up "lavandula stoechas" because he had never seen it before.*

lavatera *(noun)*

Widespread genus of herbs or softwood arborescent shrubs cultivated for their showy flowers.

- *Understanding "lavatera" helps you talk about this topic clearly.*
- *The article explained what "lavatera" means with a simple example.*

lavatera arborea *(noun)*

Arborescent perennial shrub having palmately lobed furry leaves and showy red-purple flowers; southwestern United States.

- *He looked up "lavatera arborea" because he had never seen it before.*
- *In class, the teacher used "lavatera arborea" to mean arborescent perennial shrub having palmately lobed....*

lawyerbush *(noun)*

Stout-stemmed trailing shrub of New Zealand that scrambles over other growth.

- *Understanding "lawyerbush" helps you talk about this topic clearly.*
- *He looked up "lawyerbush" because he had never seen it before.*

layia platyglossa *(noun)*

California annual having flower heads with yellow rays tipped with white.

- *They discussed "layia platyglossa" during the group presentation.*
- *In class, the teacher used "layia platyglossa" to mean california annual having flower heads with yellow....*

leadplant *(noun)*

Shrub of sandy woodlands and stream banks of western United States having hoary pinnate flowers and dull-colored racemose flowers; thought to indicate the presence of lead ore.

- *She wrote a short paragraph that included "leadplant."*
- *They discussed "leadplant" during the group presentation.*

leadwort *(noun)*

A plant of the genus Plumbago with blue flowers.

- *Understanding "leadwort" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "leadwort."*

leadwort family *(noun)*

Perennial herbs and shrubs and lianas; cosmopolitan especially in saltwater areas.

- *He looked up "leadwort family" because he had never seen it before.*
- *She wrote a short paragraph that included "leadwort family."*

leafage *(noun)*

The main organ of photosynthesis and transpiration in higher plants.

- *She wrote a short paragraph that included "leafage."*
- *They discussed "leafage" during the group presentation.*

leafstalk *(noun)*

The slender stem that supports the blade of a leaf.

- *The article explained what "leafstalk" means with a simple example.*
- *In class, the teacher used "leafstalk" to mean the slender stem that supports the blade of a leaf.*

---

leatherleaf *(noun)*

Stiff leathery-leaved fern of western North America having ovate fronds parted to the midrib.

- *The article explained what "leatherleaf" means with a simple example.*
- *In class, the teacher used "leatherleaf" to mean stiff leathery-leaved fern of western north america....*

---

leatherleaf fern *(noun)*

Widely distributed fern of tropical southern hemisphere having leathery pinnatifid fronds.

- *In class, the teacher used "leatherleaf fern" to mean widely distributed fern of tropical southern....*
- *They discussed "leatherleaf fern" during the group presentation.*

---

leatherleaf saxifrage *(noun)*

Plant with basal leathery elliptic leaves and erect leafless flower stalks each bearing a dense roundish cluster of tiny white flowers; moist places of northwestern North America to Oregon and Idaho.

- *They discussed "leatherleaf saxifrage" during the group presentation.*
- *The article explained what "leatherleaf saxifrage" means with a simple example.*

---

leatherleaf wood fern *(noun)*

North American fern with evergreen fronds.

- *They discussed "leatherleaf wood fern" during the group presentation.*
- *He looked up "leatherleaf wood fern" because he had never seen it before.*

---

leathery polypody *(noun)*

Stiff leathery-leaved fern of western North America having ovate fronds parted to the midrib.

- *Understanding "leathery polypody" helps you talk about this topic clearly.*
- *In class, the teacher used "leathery polypody" to mean stiff leathery-leaved fern of western north america....*

---

lecanopteris *(noun)*

Any of several bizarre ferns of the genus Lecanopteris having swollen hollow rhizomes that provide homes for symbiotic ants.

- *They discussed "lecanopteris" during the group presentation.*
- *She wrote a short paragraph that included "lecanopteris."*

---

lecanoraceae *(noun)*

A fungus family of the division Lichenes.

- *They discussed "lecanoraceae" during the group presentation.*
- *The article explained what "lecanoraceae" means with a simple example.*

---

leccinum *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *Understanding "leccinum" helps you talk about this topic clearly.*
- *The article explained what "leccinum" means with a simple example.*

---

leccinum fibrillosum *(noun)*

An edible fungus with a dark reddish brown cap and a wide light tan stalk that expands toward the base.

- *Understanding "leccinum fibrillosum" helps you talk about this topic clearly.*
- *They discussed "leccinum fibrillosum" during the group presentation.*

---

lechanorales *(noun)*

Category used in some classification systems for all lichens that produce apothecia.

- *They discussed "lechanorales" during the group presentation.*
- *The article explained what "lechanorales" means with a simple example.*

---

lecythidaceae *(noun)*

Large tropical trees bearing large fruits with woody skins.

- *They discussed “lecythidaceae” during the group presentation.*
- *She wrote a short paragraph that included “lecythidaceae.”*

---

ledum groenlandicum *(noun)*

Evergreen shrub of eastern North America having white or creamy bell-shaped flowers and dark green hairy leaves used for tea during American Revolution.

- *She wrote a short paragraph that included “ledum groenlandicum.”*
- *Understanding “ledum groenlandicum” helps you talk about this topic clearly.*

---

leichtlin’s camas *(noun)*

Camas found to the west of Cascade Mountains.

- *The article explained what “leichtlin’s camas” means with a simple example.*
- *In class, the teacher used “leichtlin’s camas” to mean camas found to the west of cascade mountains.*

---

leiophyllum *(noun)*

One species: sand myrtle.

- *He looked up “leiophyllum” because he had never seen it before.*
- *Understanding “leiophyllum” helps you talk about this topic clearly.*

---

leiophyllum buxifolium *(noun)*

Low-growing evergreen shrub of New Jersey to Florida grown for its many white star-shaped flowers and glossy foliage.

- *In class, the teacher used “leiophyllum buxifolium” to mean low-growing evergreen shrub of new jersey to....*
- *They discussed “leiophyllum buxifolium” during the group presentation.*

---

leitneria *(noun)*

One species: corkwood.

- *The article explained what “leitneria” means with a simple example.*
- *She wrote a short paragraph that included “leitneria.”*

---

leitneria floridana *(noun)*

Very small deciduous dioecious tree or shrub of damp habitats in southeastern United States having extremely light wood.

- *She wrote a short paragraph that included “leitneria floridana.”*
- *He looked up “leitneria floridana” because he had never seen it before.*

---

leitneriaceae *(noun)*

Coextensive with the genus Leitneria; commonly isolated in a distinct order.

- *They discussed “leitneriaceae” during the group presentation.*
- *The article explained what “leitneriaceae” means with a simple example.*

---

lemaireocereus *(noun)*

Tropical American cacti usually tall and branching with stout spines and funnel-shaped flowers and globular or ovoid often edible fruit.

- *They discussed “lemaireocereus” during the group presentation.*
- *In class, the teacher used “lemaireocereus” to mean tropical american cacti usually tall and branching....*

---

lemaireocereus chichipe *(noun)*

Tall treelike Mexican cactus with edible red fruit.

- *Understanding “lemaireocereus chichipe” helps you talk about this topic clearly.*
- *He looked up “lemaireocereus chichipe” because he had never seen it before.*

---

lemanderin *(noun)*

Hybrid between mandarin orange and lemon having very acid fruit with orange peel.

- *They discussed “lemanderin” during the group presentation.*
- *The article explained what “lemanderin” means with a simple example.*

---

lemna trisulca *(noun)*

Cosmopolitan in temperate regions except North America.

- *In class, the teacher used “lemna trisulca” to mean cosmopolitan in temperate regions except north america.*
- *They discussed “lemna trisulca” during the group presentation.*

lemnaceae *(noun)*

Family of small free-floating thalloid plants.

- *They discussed "lemnaceae" during the group presentation.*
- *In class, the teacher used "lemnaceae" to mean family of small free-floating thalloid plants.*

lemonwood *(noun)*

South African evergreen having hard tough wood.

- *Understanding "lemonwood" helps you talk about this topic clearly.*
- *In class, the teacher used "lemonwood" to mean south african evergreen having hard tough wood.*

lemonwood tree *(noun)*

South African evergreen having hard tough wood.

- *He looked up "lemonwood tree" because he had never seen it before.*
- *Understanding "lemonwood tree" helps you talk about this topic clearly.*

lennoaceae *(noun)*

Family of fleshy parasitic herbs lacking green foliage and having heads of small flowers; California and Mexico.

- *The article explained what "lennoaceae" means with a simple example.*
- *They discussed "lennoaceae" during the group presentation.*

lens culinaris *(noun)*

Widely cultivated Eurasian annual herb grown for its edible flattened seeds that are cooked like peas and also ground into meal and for its leafy stalks that are used as fodder.

- *Understanding "lens culinaris" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lens culinaris."*

lentibulariaceae *(noun)*

Carnivorous aquatic or bog plants: genera Utricularia, Pinguicula, and Genlisea.

- *In class, the teacher used "lentibulariaceae" to mean carnivorous aquatic or bog plants: genera....*
- *The article explained what "lentibulariaceae" means with a simple example.*

lenticel *(noun)*

One of many raised pores on the stems of woody plants that allow the interchange of gas between the atmosphere and the interior tissue.

- *Understanding "lenticel" helps you talk about this topic clearly.*
- *The article explained what "lenticel" means with a simple example.*

lentinus edodes *(noun)*

Edible east Asian mushroom having a golden or dark brown to blackish cap and an inedible stipe.

- *In class, the teacher used "lentinus edodes" to mean edible east asian mushroom having a golden or dark....*
- *He looked up "lentinus edodes" because he had never seen it before.*

lentinus lepideus *(noun)*

A fungus with a scaly cap and white flesh and a ring on the stalk (with scales below the ring); odor reminiscent of licorice.

- *The article explained what "lentinus lepideus" means with a simple example.*
- *Understanding "lentinus lepideus" helps you talk about this topic clearly.*

lentisk *(noun)*

An evergreen shrub of the Mediterranean region that is cultivated for its resin.

- *In class, the teacher used "lentisk" to mean an evergreen shrub of the mediterranean region that....*
- *He looked up "lentisk" because he had never seen it before.*

leonotis *(noun)*

Small genus of tropical herbs and subshrubs of South Africa.

- *She wrote a short paragraph that included "leonotis."*
- *The article explained what "leonotis" means with a simple example.*

leonotis leonurus *(noun)*

Relatively nontoxic South African herb smoked like tobacco.

- *Understanding "leonotis leonurus" helps you talk about this topic clearly.*
- *They discussed "leonotis leonurus" during the group presentation.*

---

leonotis nepetaefolia *(noun)*

Pantropical herb having whorls of striking lipped flowers; naturalized in United States.

- *He looked up "leonotis nepetaefolia" because he had never seen it before.*
- *She wrote a short paragraph that included "leonotis nepetaefolia."*

---

leonotis nepetifolia *(noun)*

Pantropical herb having whorls of striking lipped flowers; naturalized in United States.

- *She wrote a short paragraph that included "leonotis nepetifolia."*
- *The article explained what "leonotis nepetifolia" means with a simple example.*

---

leontodon autumnalis *(noun)*

Fall-blooming European herb with a yellow flower; naturalized in the United States.

- *She wrote a short paragraph that included "leontodon autumnalis."*
- *Understanding "leontodon autumnalis" helps you talk about this topic clearly.*

---

leontopodium alpinum *(noun)*

Alpine perennial plant native to Europe having leaves covered with whitish down and small flower heads held in stars of glistening whitish bracts.

- *She wrote a short paragraph that included "leontopodium alpinum."*
- *Understanding "leontopodium alpinum" helps you talk about this topic clearly.*

---

leonurus *(noun)*

Genus of stout Old World herbs having flowers in whorls.

- *They discussed "leonurus" during the group presentation.*
- *In class, the teacher used "leonurus" to mean genus of stout old world herbs having flowers in whorls.*

---

leonurus cardiaca *(noun)*

Bitter Old World herb of hedgerows and woodland margins having toothed leaves and white or pale pink flowers.

- *They discussed "leonurus cardiaca" during the group presentation.*
- *In class, the teacher used "leonurus cardiaca" to mean bitter old world herb of hedgerows and woodland....*

---

leopardbane *(noun)*

Any of several herbs of the genus Doronicum having alternate often clasping stem leaves cultivated for their long stalks of yellow flower heads.

- *The article explained what "leopardbane" means with a simple example.*
- *In class, the teacher used "leopardbane" to mean any of several herbs of the genus doronicum having....*

---

leotia lubrica *(noun)*

A discomycete that develops in clusters of slippery rubbery gelatinous fruiting bodies that are dingy yellow to tan in color.

- *He looked up "leotia lubrica" because he had never seen it before.*
- *She wrote a short paragraph that included "leotia lubrica."*

---

lepechinia *(noun)*

A dicotyledonous genus of the family Labiatae.

- *He looked up "lepechinia" because he had never seen it before.*
- *In class, the teacher used "lepechinia" to mean a dicotyledonous genus of the family labiatae.*

---

lepechinia calycina *(noun)*

California plant with woolly stems and leaves and large white flowers.

- *Understanding "lepechinia calycina" helps you talk about this topic clearly.*
- *In class, the teacher used "lepechinia calycina" to mean california plant with woolly stems and leaves and....*

---

lepidobotryaceae *(noun)*

Family created in 1950 solely for the classification of a distinctive African tree repeatedly classified in other families; trees long believed to exist only in Africa.

- *In class, the teacher used "lepidobotryaceae" to mean family created in 1950 solely for the....*

- *He looked up “lepidobotryaceae” because he had never seen it before.*

lepidobotrys *(noun)*

African tree often classified in other families; similar to the Costa Rican caracolito in wood structure as well as in fruit and flowers and leaves and seeds.

- *He looked up “lepidobotrys” because he had never seen it before.*
- *In class, the teacher used “lepidobotrys” to mean african tree often classified in other families;....*

lepidodendraceae *(noun)*

Fossil plants characterized by conspicuous spirally arranged leaf scars on the trunk.

- *She wrote a short paragraph that included “lepidodendraceae.”*
- *The article explained what “lepidodendraceae” means with a simple example.*

lepidodendrales *(noun)*

Fossil arborescent plants arising during the early Devonian and conspicuous throughout the Carboniferous.

- *They discussed “lepidodendrales” during the group presentation.*
- *In class, the teacher used “lepidodendrales” to mean fossil arborescent plants arising during the early....*

lepidothamnus *(noun)*

Small usually shrubby conifers.

- *She wrote a short paragraph that included “lepidothamnus.”*
- *He looked up “lepidothamnus” because he had never seen it before.*

lepidothamnus fonkii *(noun)*

About the hardiest Podocarpaceae species; prostrate spreading shrub similar to mountain rimu; mountains of southern Chile.

- *She wrote a short paragraph that included “lepidothamnus fonkii.”*
- *The article explained what “lepidothamnus fonkii” means with a simple example.*

lepidothamnus laxifolius *(noun)*

Low-growing to prostrate shrub with slender trailing branches; New Zealand.

- *They discussed “lepidothamnus laxifolius” during the group presentation.*
- *The article explained what “lepidothamnus laxifolius” means with a simple example.*

lepiota *(noun)*

Any fungus of the genus Lepiota.

- *In class, the teacher used “lepiota” to mean any fungus of the genus lepiota.*
- *Understanding “lepiota” helps you talk about this topic clearly.*

lepiota americana *(noun)*

An agaric with a pallid cap and a stalk that is enlarged near the base.

- *She wrote a short paragraph that included “lepiota americana.”*
- *Understanding “lepiota americana” helps you talk about this topic clearly.*

lepiota cepaestipes *(noun)*

A white agaric that tends to cluster and has a club-shaped base.

- *In class, the teacher used “lepiota cepaestipes” to mean a white agaric that tends to cluster and has a....*
- *The article explained what “lepiota cepaestipes” means with a simple example.*

lepiota clypeolaria *(noun)*

An agaric with a ragged stalk and a soft floccose cap.

- *They discussed “lepiota clypeolaria” during the group presentation.*
- *The article explained what “lepiota clypeolaria” means with a simple example.*

lepiota morgani *(noun)*

An agaric regarded as poisonous.

- *She wrote a short paragraph that included “lepiota morgani.”*
- *Understanding “lepiota morgani” helps you talk about this topic clearly.*

lepiota naucina *(noun)*

An agaric with greyish white fruiting body and gills that change from pink to dingy red.

- *They discussed "lepiota naucina" during the group presentation.*
- *Understanding "lepiota naucina" helps you talk about this topic clearly.*

lepiota procera *(noun)*

Edible long-stalked mushroom with white flesh and gills and spores; found in open woodlands in autumn.

- *In class, the teacher used "lepiota procera" to mean edible long-stalked mushroom with white flesh and....*
- *Understanding "lepiota procera" helps you talk about this topic clearly.*

lepiota rhacodes *(noun)*

An agaric with a large cap with brown scales and a thick stalk.

- *The article explained what "lepiota rhacodes" means with a simple example.*
- *Understanding "lepiota rhacodes" helps you talk about this topic clearly.*

lepiota rubrotincta *(noun)*

An agaric with a relatively small pink to red cap and white gills and stalk.

- *They discussed "lepiota rubrotincta" during the group presentation.*
- *She wrote a short paragraph that included "lepiota rubrotincta."*

lepiotaceae *(noun)*

A family of fungi having free gills and a cap that is cleanly separable from the stalk.

- *Understanding "lepiotaceae" helps you talk about this topic clearly.*
- *The article explained what "lepiotaceae" means with a simple example.*

lepista irina *(noun)*

An edible agaric with large silky white caps and thick stalks.

- *The article explained what "lepista irina" means with a simple example.*
- *She wrote a short paragraph that included "lepista irina."*

leptarrhena *(noun)*

One species: leatherleaf saxifrage.

- *He looked up "leptarrhena" because he had never seen it before.*
- *Understanding "leptarrhena" helps you talk about this topic clearly.*

leptarrhena pyrolifolia *(noun)*

Plant with basal leathery elliptic leaves and erect leafless flower stalks each bearing a dense roundish cluster of tiny white flowers; moist places of northwestern North America to Oregon and Idaho.

- *In class, the teacher used "leptarrhena pyrolifolia" to mean plant with basal leathery elliptic leaves and erect....*
- *Understanding "leptarrhena pyrolifolia" helps you talk about this topic clearly.*

leptopteris *(noun)*

Including some ferns sometimes placed in genus Todea.

- *They discussed "leptopteris" during the group presentation.*
- *He looked up "leptopteris" because he had never seen it before.*

leptopteris superba *(noun)*

New Zealand with pinnate fronds and a densely woolly stalks; sometimes included in genus Todea.

- *They discussed "leptopteris superba" during the group presentation.*
- *Understanding "leptopteris superba" helps you talk about this topic clearly.*

leptosporangium *(noun)*

A sporangium formed from a single epidermal cell; characteristic of the Filicales or of almost all modern ferns.

- *The article explained what "leptosporangium" means with a simple example.*
- *In class, the teacher used "leptosporangium" to mean a sporangium formed from a single epidermal cell;....*

lespedeza stipulacea *(noun)*

Annual native to Korea but widely cultivated for forage and hay in hot dry regions.

- *He looked up "lespedeza stipulacea" because he had never seen it before.*
- *They discussed "lespedeza stipulacea" during the group presentation.*

---

lesquerella *(noun)*

Genus of low-growing hairy herbs: bladderpods.

- *She wrote a short paragraph that included "lesquerella."*
- *He looked up "lesquerella" because he had never seen it before.*

---

lesser calamint *(noun)*

Low-growing strongly aromatic perennial herb of southern Europe to Great Britain; naturalized in United States.

- *The article explained what "lesser calamint" means with a simple example.*
- *She wrote a short paragraph that included "lesser calamint."*

---

lesser spearwort *(noun)*

Semiaquatic Eurasian perennial crowfoot with leaves shaped like spears; naturalized in New Zealand.

- *They discussed "lesser spearwort" during the group presentation.*
- *The article explained what "lesser spearwort" means with a simple example.*

---

lesser twayblade *(noun)*

Orchid having two triangular leaves and a short lax raceme of green to rust-colored flowers with the lip flushed mauve; Europe and Asia and North America and Greenland.

- *They discussed "lesser twayblade" during the group presentation.*
- *In class, the teacher used "lesser twayblade" to mean orchid having two triangular leaves and a short lax....*

---

leucadendron *(noun)*

Large genus of evergreen trees and shrubs having silvery white leaves and solitary terminal flowers with conspicuous silvery bracts.

- *Understanding "leucadendron" helps you talk about this topic clearly.*
- *The article explained what "leucadendron" means with a simple example.*

---

leucadendron argenteum *(noun)*

Small South African tree with long silvery silky foliage.

- *In class, the teacher used "leucadendron argenteum" to mean small south african tree with long silvery silky....*
- *They discussed "leucadendron argenteum" during the group presentation.*

---

leucanthemum *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *He looked up "leucanthemum" because he had never seen it before.*
- *She wrote a short paragraph that included "leucanthemum."*

---

leucanthemum lacustre *(noun)*

Perennial of Portugal similar to the oxeye daisy.

- *The article explained what "leucanthemum lacustre" means with a simple example.*
- *She wrote a short paragraph that included "leucanthemum lacustre."*

---

leucanthemum maximum *(noun)*

Similar to oxeye daisy.

- *He looked up "leucanthemum maximum" because he had never seen it before.*
- *They discussed "leucanthemum maximum" during the group presentation.*

---

leucanthemum superbum *(noun)*

Hybrid garden flower derived from Chrysanthemum maximum and Chrysanthemum lacustre having large white flower heads resembling oxeye daisies; often placed in the genus Chrysanthemum.

- *She wrote a short paragraph that included "leucanthemum superbum."*
- *He looked up "leucanthemum superbum" because he had never seen it before.*

---

leucanthemum vulgare *(noun)*

Tall leafy-stemmed Eurasian perennial with white flowers; widely naturalized; often placed in genus Chrysanthemum.

- *Understanding "leucanthemum vulgare" helps you talk about this topic clearly.*
- *The article explained what "leucanthemum vulgare" means with a simple example.*

leucogenes *(noun)*

New Zealand edelweiss.

- *He looked up "leucogenes" because he had never seen it before.*
- *They discussed "leucogenes" during the group presentation.*

leucogenes leontopodium *(noun)*

Perennial herb closely resembling European edelweiss; New Zealand.

- *The article explained what "leucogenes leontopodium" means with a simple example.*
- *In class, the teacher used "leucogenes leontopodium" to mean perennial herb closely resembling european....*

leucothoe *(noun)*

Any plant of the genus Leucothoe; grown for their beautiful white flowers; glossy foliage contains a poisonous substance similar to that found in genus Kalmia.

- *Understanding "leucothoe" helps you talk about this topic clearly.*
- *The article explained what "leucothoe" means with a simple example.*

leucothoe editorum *(noun)*

Fast-growing evergreen shrub of southeastern United States having arching interlaced branches and racemes of white flowers.

- *She wrote a short paragraph that included "leucothoe editorum."*
- *He looked up "leucothoe editorum" because he had never seen it before.*

leucothoe fontanesiana *(noun)*

Fast-growing evergreen shrub of southeastern United States having arching interlaced branches and racemes of white flowers.

- *The article explained what "leucothoe fontanesiana" means with a simple example.*
- *In class, the teacher used "leucothoe fontanesiana" to mean fast-growing evergreen shrub of southeastern united....*

leucothoe racemosa *(noun)*

Bushy deciduous shrub of the eastern United States with long racemes of pinkish flowers.

- *She wrote a short paragraph that included "leucothoe racemosa."*
- *He looked up "leucothoe racemosa" because he had never seen it before.*

levisticum *(noun)*

Genus of aromatic European herbs with yellow flowers.

- *She wrote a short paragraph that included "levisticum."*
- *He looked up "levisticum" because he had never seen it before.*

levisticum officinale *(noun)*

Herb native to southern Europe; cultivated for its edible stalks and foliage and seeds.

- *They discussed "levisticum officinale" during the group presentation.*
- *The article explained what "levisticum officinale" means with a simple example.*

lewisia *(noun)*

Genus of western North American low-growing herbs having linear woolly leaves and large pink flowers.

- *In class, the teacher used "lewisia" to mean genus of western north american low-growing herbs....*
- *Understanding "lewisia" helps you talk about this topic clearly.*

lewisia cotyledon *(noun)*

Evergreen perennial having a dense basal rosette of long spatula-shaped leaves and panicles of pink or white-and-red-striped or pink-purple flowers; found on cliffs and in rock crevices in mountains of southwestern Oregon and northern California.

- *She wrote a short paragraph that included "lewisia cotyledon."*
- *They discussed "lewisia cotyledon" during the group presentation.*

lewisia rediviva *(noun)*

Showy succulent ground-hugging plant of Rocky Mountains regions having deep to pale pink flowers and fleshy farinaceous roots; the Montana state flower.

- *Understanding "lewisia rediviva" helps you talk about this topic clearly.*
- *In class, the teacher used "lewisia rediviva" to mean showy succulent ground-hugging plant of rocky....*

leycesteria *(noun)*

Small species of shrubs of western Himalayas to China.

- *Understanding "leycesteria" helps you talk about this topic clearly.*
- *The article explained what "leycesteria" means with a simple example.*

leycesteria formosa *(noun)*

Shrub honeysuckle with drooping spikes of purplish flowers.

- *She wrote a short paragraph that included "leycesteria formosa."*
- *They discussed "leycesteria formosa" during the group presentation.*

leymus *(noun)*

Genus that in some classifications overlaps the genus Elymus.

- *They discussed "leymus" during the group presentation.*
- *He looked up "leymus" because he had never seen it before.*

leymus arenaria *(noun)*

A dune grass of the Pacific seacoast used as a sand binder.

- *Understanding "leymus arenaria" helps you talk about this topic clearly.*
- *The article explained what "leymus arenaria" means with a simple example.*

leymus condensatus *(noun)*

Stout perennial grass of western North America.

- *He looked up "leymus condensatus" because he had never seen it before.*
- *Understanding "leymus condensatus" helps you talk about this topic clearly.*

liatris pycnostachya *(noun)*

Perennial of southeastern and central United States having very dense spikes of purple flowers; often cultivated for cut flowers.

- *In class, the teacher used "liatris pycnostachya" to mean perennial of southeastern and central united states....*
- *The article explained what "liatris pycnostachya" means with a simple example.*

libocedrus *(noun)*

Cypresses that resemble cedars.

- *In class, the teacher used "libocedrus" to mean cypresses that resemble cedars.*
- *They discussed "libocedrus" during the group presentation.*

libocedrus bidwillii *(noun)*

Evergreen tree of New Zealand resembling the kawaka.

- *She wrote a short paragraph that included "libocedrus bidwillii."*
- *He looked up "libocedrus bidwillii" because he had never seen it before.*

libocedrus decurrens *(noun)*

Tall tree of the Pacific coast of North America having foliage like cypress and cinnamon-red bark.

- *She wrote a short paragraph that included "libocedrus decurrens."*
- *Understanding "libocedrus decurrens" helps you talk about this topic clearly.*

libocedrus plumosa *(noun)*

New Zealand timber tree resembling the cypress.

- *The article explained what "libocedrus plumosa" means with a simple example.*
- *In class, the teacher used "libocedrus plumosa" to mean new zealand timber tree resembling the cypress.*

lichenales *(noun)*

Category used especially in former classifications for organisms now constituting the division Lichenes.

- *He looked up "lichenales" because he had never seen it before.*
- *She wrote a short paragraph that included "lichenales."*

lichenes *(noun)*

Comprising the lichens which grow symbiotically with algae; sometimes treated as an independent group more or less coordinate with algae and fungi.

- *The article explained what "lichenes" means with a simple example.*
- *Understanding "lichenes" helps you talk about this topic clearly.*

---

lignosae *(noun)*

A category in some early taxonomies.

- *He looked up "lignosae" because he had never seen it before.*
- *She wrote a short paragraph that included "lignosae."*

---

ligularia *(noun)*

Genus of Old World herbs resembling groundsel: leopard plants.

- *In class, the teacher used "ligularia" to mean genus of old world herbs resembling groundsel:....*
- *The article explained what "ligularia" means with a simple example.*

---

ligustrum amurense *(noun)*

Eastern Asian shrub cultivated especially for its persistent foliage.

- *He looked up "ligustrum amurense" because he had never seen it before.*
- *She wrote a short paragraph that included "ligustrum amurense."*

---

ligustrum ibolium *(noun)*

Fast-growing and tightly branched hybrid of Ligustrum ovalifolium and Ligustrum obtusifolium.

- *She wrote a short paragraph that included "ligustrum ibolium."*
- *They discussed "ligustrum ibolium" during the group presentation.*

---

ligustrum obtusifolium *(noun)*

Small deciduous shrub having graceful arching branches and luxuriant foliage.

- *He looked up "ligustrum obtusifolium" because he had never seen it before.*
- *She wrote a short paragraph that included "ligustrum obtusifolium."*

---

ligustrum ovalifolium *(noun)*

Semi-evergreen Japanese shrub having malodorous flowers; used extensively for hedges because more likely to stay green that common privet.

- *She wrote a short paragraph that included "ligustrum ovalifolium."*
- *The article explained what "ligustrum ovalifolium" means with a simple example.*

---

liliaceous plant *(noun)*

Plant growing from a bulb or corm or rhizome or tuber.

- *The article explained what "liliaceous plant" means with a simple example.*
- *In class, the teacher used "liliaceous plant" to mean plant growing from a bulb or corm or rhizome or tuber.*

---

liliales *(noun)*

An order of monocotyledonous plants including Amaryllidaceae and Liliaceae and Iridaceae.

- *She wrote a short paragraph that included "liliales."*
- *The article explained what "liliales" means with a simple example.*

---

liliid monocot family *(noun)*

Family of monocotyledonous plants of the subclass Liliidae; mostly herbs usually with petaloid sepals and petals and compound pistils.

- *He looked up "liliid monocot family" because he had never seen it before.*
- *Understanding "liliid monocot family" helps you talk about this topic clearly.*

---

liliid monocot genus *(noun)*

Genus of monocotyledonous plants comprising mostly herbs having usually petaloid sepals and petals and compound pistils.

- *He looked up "liliid monocot genus" because he had never seen it before.*
- *She wrote a short paragraph that included "liliid monocot genus."*

---

liliidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises 17 families including: Liliaceae; Alliaceae; Amaryllidaceae; Iridaceae; Orchidaceae; Trilliaceae.

- *She wrote a short paragraph that included "liliidae."*
- *They discussed "liliidae" during the group presentation.*

liliopsid *(noun)*

A monocotyledonous flowering plant; the stem grows by deposits on its inside.

- *The article explained what "liliopsid" means with a simple example.*
- *In class, the teacher used "liliopsid" to mean a monocotyledonous flowering plant; the stem grows....*

liliopsid family *(noun)*

Family of flowering plants having a single cotyledon (embryonic leaf) in the seed.

- *They discussed "liliopsid family" during the group presentation.*
- *In class, the teacher used "liliopsid family" to mean family of flowering plants having a single....*

liliopsid genus *(noun)*

Genus of flowering plants having a single cotyledon (embryonic leaf) in the seed.

- *They discussed "liliopsid genus" during the group presentation.*
- *Understanding "liliopsid genus" helps you talk about this topic clearly.*

liliopsida *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *He looked up "liliopsida" because he had never seen it before.*
- *They discussed "liliopsida" during the group presentation.*

lilium auratum *(noun)*

Japanese lily with golden rays.

- *They discussed "lilium auratum" during the group presentation.*
- *He looked up "lilium auratum" because he had never seen it before.*

lilium catesbaei *(noun)*

Lily of southeastern United States having cup-shaped flowers with deep yellow to scarlet recurved petals.

- *They discussed "lilium catesbaei" during the group presentation.*
- *In class, the teacher used "lilium catesbaei" to mean lily of southeastern united states having....*

lilium columbianum *(noun)*

Lily of western North America with showy orange-red purple-spotted flowers.

- *He looked up "lilium columbianum" because he had never seen it before.*
- *Understanding "lilium columbianum" helps you talk about this topic clearly.*

lilium lancifolium *(noun)*

East Asian perennial having large reddish-orange black-spotted flowers with reflexed petals.

- *She wrote a short paragraph that included "lilium lancifolium."*
- *He looked up "lilium lancifolium" because he had never seen it before.*

lilium longiflorum *(noun)*

Tall lily have large white trumpet-shaped flowers that bloom in the spring.

- *He looked up "lilium longiflorum" because he had never seen it before.*
- *In class, the teacher used "lilium longiflorum" to mean tall lily have large white trumpet-shaped flowers....*

lilium maritinum *(noun)*

Orange-flowered lily of Pacific coast of United States.

- *He looked up "lilium maritinum" because he had never seen it before.*
- *They discussed "lilium maritinum" during the group presentation.*

lilium michiganense *(noun)*

Lily of central North America having recurved orange-red flowers with deep crimson spots.

- *They discussed "lilium michiganense" during the group presentation.*
- *In class, the teacher used "lilium michiganense" to mean lily of central north america having recurved....*

lilium pardalinum *(noun)*

Lily of western United States having orange-red to crimson maroon-spotted flowers.

- *She wrote a short paragraph that included "lilium pardalinum."*
- *He looked up "lilium pardalinum" because he had never seen it before.*

---

lilium philadelphicum *(noun)*

Lily of eastern North America having orange to orange-red purple-spotted flowers.

- *They discussed "lilium philadelphicum" during the group presentation.*
- *The article explained what "lilium philadelphicum" means with a simple example.*

---

lilium superbum *(noun)*

Lily of the eastern United States with orange to red maroon-spotted flowers.

- *She wrote a short paragraph that included "lilium superbum."*
- *The article explained what "lilium superbum" means with a simple example.*

---

lilyturf *(noun)*

Asiatic perennial tufted herb with grasslike evergreen foliage and clusters of dark mauve grapelike flowers; grown as ground cover.

- *The article explained what "lilyturf" means with a simple example.*
- *In class, the teacher used "lilyturf" to mean asiatic perennial tufted herb with grasslike....*

---

limnobium *(noun)*

American frogbit.

- *In class, the teacher used "limnobium" to mean american frogbit.*
- *He looked up "limnobium" because he had never seen it before.*

---

limnodium spongia *(noun)*

American plant with roundish heart-shaped or kidney-shaped leaves; usually rooted in muddy bottoms of ponds and ditches.

- *She wrote a short paragraph that included "limnodium spongia."*
- *They discussed "limnodium spongia" during the group presentation.*

---

linaceae *(noun)*

A widely distributed family of plants.

- *Understanding "linaceae" helps you talk about this topic clearly.*
- *The article explained what "linaceae" means with a simple example.*

---

linanthus *(noun)*

A genus of herbs of the family Polemoniaceae; found in western United States.

- *He looked up "linanthus" because he had never seen it before.*
- *In class, the teacher used "linanthus" to mean a genus of herbs of the family polemoniaceae; found....*

---

linanthus dianthiflorus *(noun)*

Low wiry-stemmed branching herb or southern California having fringed pink flowers.

- *In class, the teacher used "linanthus dianthiflorus" to mean low wiry-stemmed branching herb or southern....*
- *They discussed "linanthus dianthiflorus" during the group presentation.*

---

linanthus dichotomus *(noun)*

Small California annual with white flowers.

- *She wrote a short paragraph that included "linanthus dichotomus."*
- *Understanding "linanthus dichotomus" helps you talk about this topic clearly.*

---

lindera *(noun)*

Aromatic evergreen or deciduous dioecious shrubs or trees of eastern Asia and North America.

- *The article explained what "lindera" means with a simple example.*
- *They discussed "lindera" during the group presentation.*

---

lindera benzoin *(noun)*

Deciduous shrub of the eastern United States having highly aromatic leaves and bark and yellow flowers followed by scarlet or yellow berries.

- *In class, the teacher used "lindera benzoin" to mean deciduous shrub of the eastern united states having....*
- *The article explained what "lindera benzoin" means with a simple example.*

---

lindheimera *(noun)*

One species: Texas star.

- *Understanding "lindheimera" helps you talk about this topic clearly.*
- *He looked up "lindheimera" because he had never seen it before.*

---

lindheimera texana *(noun)*

Texas annual with coarsely pinnatifid leaves; cultivated for its showy radiate yellow flower heads.

- *The article explained what "lindheimera texana" means with a simple example.*
- *She wrote a short paragraph that included "lindheimera texana."*

---

lingberry *(noun)*

Low evergreen shrub of high north temperate regions of Europe and Asia and America bearing red edible berries.

- *Understanding "lingberry" helps you talk about this topic clearly.*
- *He looked up "lingberry" because he had never seen it before.*

---

lingenberry *(noun)*

Low evergreen shrub of high north temperate regions of Europe and Asia and America bearing red edible berries.

- *The article explained what "lingenberry" means with a simple example.*
- *They discussed "lingenberry" during the group presentation.*

---

linosyris vulgaris *(noun)*

Early-flowering perennial of southern and southeastern Europe with flower heads resembling those of goldenrod.

- *They discussed "linosyris vulgaris" during the group presentation.*
- *In class, the teacher used "linosyris vulgaris" to mean early-flowering perennial of southern and....*

---

liparis *(noun)*

An orchid of the genus Liparis having few leaves and usually fairly small yellow-green or dull purple flowers in terminal racemes.

- *In class, the teacher used "liparis" to mean an orchid of the genus liparis having few leaves....*
- *The article explained what "liparis" means with a simple example.*

---

liparis loeselii *(noun)*

Small terrestrial orchid of eastern North America and Europe having two nearly basal leaves and dull yellow-green racemose flowers.

- *He looked up "liparis loeselii" because he had never seen it before.*
- *In class, the teacher used "liparis loeselii" to mean small terrestrial orchid of eastern north america....*

---

lipfern *(noun)*

Any of various terrestrial ferns of the genus Cheilanthes; cosmopolitan in arid and semiarid temperate or tropical regions.

- *Understanding "lipfern" helps you talk about this topic clearly.*
- *They discussed "lipfern" during the group presentation.*

---

liquidambar styraciflua *(noun)*

A North American tree of the genus Liquidambar having prickly spherical fruit clusters and fragrant sap.

- *He looked up "liquidambar styraciflua" because he had never seen it before.*
- *They discussed "liquidambar styraciflua" during the group presentation.*

---

listera *(noun)*

Genus of terrestrial orchids having usually a single pair of broad shining leaves near the middle of the stem; found in temperate Asia and North America and Europe.

- *In class, the teacher used "listera" to mean genus of terrestrial orchids having usually a....*
- *The article explained what "listera" means with a simple example.*

---

listera convallarioides *(noun)*

Small orchid with two elliptic leaves and a slender raceme of small green flowers; western North America.

- *They discussed "listera convallarioides" during the group presentation.*
- *Understanding "listera convallarioides" helps you talk about this topic clearly.*

listera cordata *(noun)*

Orchid having two triangular leaves and a short lax raceme of green to rust-colored flowers with the lip flushed mauve; Europe and Asia and North America and Greenland.

- *He looked up "listera cordata" because he had never seen it before.*
- *In class, the teacher used "listera cordata" to mean orchid having two triangular leaves and a short lax....*

listera ovata *(noun)*

Orchid having a pair of ovate leaves and a long slender raceme of green flowers sometimes tinged red-brown; Europe to central Asia.

- *She wrote a short paragraph that included "listera ovata."*
- *The article explained what "listera ovata" means with a simple example.*

lithocarpus *(noun)*

Tanbark oaks.

- *He looked up "lithocarpus" because he had never seen it before.*
- *She wrote a short paragraph that included "lithocarpus."*

lithocarpus densiflorus *(noun)*

Evergreen tree of the Pacific coast area having large leathery leaves; yields tanbark.

- *He looked up "lithocarpus densiflorus" because he had never seen it before.*
- *She wrote a short paragraph that included "lithocarpus densiflorus."*

lithocarpus glaber *(noun)*

Small evergreen tree of China and Japan.

- *The article explained what "lithocarpus glaber" means with a simple example.*
- *In class, the teacher used "lithocarpus glaber" to mean small evergreen tree of china and japan.*

lithocarpus glabra *(noun)*

Small evergreen tree of China and Japan.

- *They discussed "lithocarpus glabra" during the group presentation.*
- *Understanding "lithocarpus glabra" helps you talk about this topic clearly.*

lithophragma *(noun)*

Small genus of perennial herbs of the western North America.

- *Understanding "lithophragma" helps you talk about this topic clearly.*
- *In class, the teacher used "lithophragma" to mean small genus of perennial herbs of the western north....*

lithophragma affine *(noun)*

California perennial herb cultivated for its racemose white flowers with widely spreading petals; sometimes placed in genus Tellima.

- *The article explained what "lithophragma affine" means with a simple example.*
- *In class, the teacher used "lithophragma affine" to mean california perennial herb cultivated for its....*

lithophragma affinis *(noun)*

California perennial herb cultivated for its racemose white flowers with widely spreading petals; sometimes placed in genus Tellima.

- *Understanding "lithophragma affinis" helps you talk about this topic clearly.*
- *The article explained what "lithophragma affinis" means with a simple example.*

lithophragma parviflorum *(noun)*

Plant with mostly basal leaves and slender open racemes of white or pale pink flowers; prairies and open forest of northwestern United States to British Columbia and Alberta.

- *They discussed "lithophragma parviflorum" during the group presentation.*
- *She wrote a short paragraph that included "lithophragma parviflorum."*

lithophyte *(noun)*

Plant that grows on rocks or stony soil and derives nourishment from the atmosphere.

- *In class, the teacher used "lithophyte" to mean plant that grows on rocks or stony soil and derives....*
- *They discussed "lithophyte" during the group presentation.*

lithophytic plant *(noun)*

Plant that grows on rocks or stony soil and derives nourishment from the atmosphere.

- *In class, the teacher used "lithophytic plant" to mean plant that grows on rocks or stony soil and derives....*
- *The article explained what "lithophytic plant" means with a simple example.*

---

lithospermum *(noun)*

Annual or perennial herbaceous or shrubby plants; cosmopolitan except Australia.

- *She wrote a short paragraph that included "lithospermum."*
- *Understanding "lithospermum" helps you talk about this topic clearly.*

---

lithospermum canescens *(noun)*

Perennial North American plant with greyish hairy foliage yielding a red or yellow pigment.

- *Understanding "lithospermum canescens" helps you talk about this topic clearly.*
- *In class, the teacher used "lithospermum canescens" to mean perennial north american plant with greyish hairy....*

---

lithospermum caroliniense *(noun)*

Perennial plant of eastern North America having hairy foliage yielding a red or yellow pigment.

- *She wrote a short paragraph that included "lithospermum caroliniense."*
- *They discussed "lithospermum caroliniense" during the group presentation.*

---

lithospermum officinale *(noun)*

European perennial branching plant; occurs in hedgerows and at the edge of woodlands.

- *They discussed "lithospermum officinale" during the group presentation.*
- *In class, the teacher used "lithospermum officinale" to mean european perennial branching plant; occurs in....*

---

little clubmoss *(noun)*

Of northern Europe and America; resembling a miniature fir.

- *He looked up "little clubmoss" because he had never seen it before.*
- *She wrote a short paragraph that included "little clubmoss."*

---

little ebony spleenwort *(noun)*

Fern of tropical America: from southern United States to West Indies and Mexico to Brazil.

- *Understanding "little ebony spleenwort" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "little ebony spleenwort."*

---

liverleaf *(noun)*

Any of several plants of the genus Hepatica having three-lobed leaves and white or pinkish flowers in early spring; of moist and mossy subalpine woodland areas of north temperate regions.

- *In class, the teacher used "liverleaf" to mean any of several plants of the genus hepatica having....*
- *The article explained what "liverleaf" means with a simple example.*

---

livistona *(noun)*

Fan palms of Asia and Australia and Malaysia.

- *She wrote a short paragraph that included "livistona."*
- *He looked up "livistona" because he had never seen it before.*

---

livistona australis *(noun)*

Australian palm with leaf buds that are edible when young.

- *The article explained what "livistona australis" means with a simple example.*
- *In class, the teacher used "livistona australis" to mean australian palm with leaf buds that are edible when....*

---

loasa *(noun)*

Any of various perennial South American plants of the genus Loasa having stinging hairs and showy white or yellow or reddish-orange flowers.

- *In class, the teacher used "loasa" to mean any of various perennial south american plants of....*
- *They discussed "loasa" during the group presentation.*

---

loasa family *(noun)*

Family of bristly hairy sometimes climbing plants; America and Africa and southern Arabia.

- *Understanding "loasa family" helps you talk about this topic clearly.*

- *They discussed "loasa family" during the group presentation.*

loasaceae *(noun)*

Family of bristly hairy sometimes climbing plants; America and Africa and southern Arabia.

- *Understanding "loasaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "loasaceae."*

lobed spleenwort *(noun)*

A spleenwort of eastern and southern United States.

- *She wrote a short paragraph that included "lobed spleenwort."*
- *The article explained what "lobed spleenwort" means with a simple example.*

lobelia dortmanna *(noun)*

Erect perennial aquatic herb of Europe and North America having submerged spongy leaves and pendulous racemes of blue flowers above the water.

- *Understanding "lobelia dortmanna" helps you talk about this topic clearly.*
- *He looked up "lobelia dortmanna" because he had never seen it before.*

lobelia siphilitica *(noun)*

Tall erect and very leafy perennial herb of eastern North America having dense spikes of blue flowers.

- *They discussed "lobelia siphilitica" during the group presentation.*
- *He looked up "lobelia siphilitica" because he had never seen it before.*

lobeliaceae *(noun)*

Not recognized in all classification systems; in some classifications lobeliaceous plants are included in family Campanulaceae.

- *He looked up "lobeliaceae" because he had never seen it before.*
- *They discussed "lobeliaceae" during the group presentation.*

lobularia *(noun)*

Sweet alyssum.

- *She wrote a short paragraph that included "lobularia."*
- *He looked up "lobularia" because he had never seen it before.*

lobularia maritima *(noun)*

Perennial European plant having clusters of small fragrant usually white flowers; widely grown in gardens.

- *The article explained what "lobularia maritima" means with a simple example.*
- *In class, the teacher used "lobularia maritima" to mean perennial european plant having clusters of small....*

locoweed *(noun)*

Any of several leguminous plants of western North America causing locoism in livestock.

- *He looked up "locoweed" because he had never seen it before.*
- *She wrote a short paragraph that included "locoweed."*

logania *(noun)*

Type genus of the Loganiaceae; Australian and New Zealand shrubs sometimes cultivated for their flowers.

- *They discussed "logania" during the group presentation.*
- *He looked up "logania" because he had never seen it before.*

loganiaceae *(noun)*

A dicotyledonous family of plants of order Gentianales.

- *She wrote a short paragraph that included "loganiaceae."*
- *They discussed "loganiaceae" during the group presentation.*

loiseleuria *(noun)*

One species: alpine azalea.

- *In class, the teacher used "loiseleuria" to mean one species: alpine azalea.*
- *He looked up "loiseleuria" because he had never seen it before.*

loiseleuria procumbens *(noun)*

Creeping mat-forming evergreen shrub of high mountain regions of northern hemisphere grown for its rose-pink flowers.

- *Understanding "loiseleuria procumbens" helps you talk about this topic clearly.*
- *In class, the teacher used "loiseleuria procumbens" to mean creeping mat-forming evergreen shrub of high....*

lolium temulentum *(noun)*

Weedy annual grass often occurs in grainfields and other cultivated land; seeds sometimes considered poisonous.

- *In class, the teacher used "lolium temulentum" to mean weedy annual grass often occurs in grainfields and....*
- *The article explained what "lolium temulentum" means with a simple example.*

lomariopsidaceae *(noun)*

Small family of usually scandent ferns.

- *Understanding "lomariopsidaceae" helps you talk about this topic clearly.*
- *They discussed "lomariopsidaceae" during the group presentation.*

lomatia *(noun)*

Any of various ornamental evergreens of the genus Lomatia having attractive fragrant flowers.

- *They discussed "lomatia" during the group presentation.*
- *In class, the teacher used "lomatia" to mean any of various ornamental evergreens of the genus....*

loment *(noun)*

Seedpods that are constricted between the seeds and that break apart when mature into single-seeded segments.

- *She wrote a short paragraph that included "loment."*
- *He looked up "loment" because he had never seen it before.*

lomogramma *(noun)*

Large scandent ferns of southeastern Asia.

- *In class, the teacher used "lomogramma" to mean large scandent ferns of southeastern asia.*
- *They discussed "lomogramma" during the group presentation.*

lonas *(noun)*

One species: yellow ageratum.

- *She wrote a short paragraph that included "lonas."*
- *Understanding "lonas" helps you talk about this topic clearly.*

lonas annua *(noun)*

Shrub of southwestern Mediterranean region having yellow daisylike flowers.

- *In class, the teacher used "lonas annua" to mean shrub of southwestern mediterranean region having....*
- *The article explained what "lonas annua" means with a simple example.*

lonas inodora *(noun)*

Shrub of southwestern Mediterranean region having yellow daisylike flowers.

- *She wrote a short paragraph that included "lonas inodora."*
- *Understanding "lonas inodora" helps you talk about this topic clearly.*

lonchocarpus *(noun)*

Genus of chiefly tropical American shrubs and trees having pinnate leaves and red or white flowers.

- *She wrote a short paragraph that included "lonchocarpus."*
- *The article explained what "lonchocarpus" means with a simple example.*

longanberry *(noun)*

Tree of southeastern Asia to Australia grown primarily for its sweet edible fruit resembling litchi nuts; sometimes placed in genera Euphorbia or Nephelium.

- *They discussed "longanberry" during the group presentation.*
- *Understanding "longanberry" helps you talk about this topic clearly.*

longar palm *(noun)*

Tall fan palm of Africa and India and Malaysia yielding a hard wood and sweet sap that is a source of palm wine and sugar; leaves used for thatching and weaving.

- *The article explained what “longar palm” means with a simple example.*
- *In class, the teacher used “longar palm” to mean tall fan palm of africa and india and malaysia....*

---

longheaded thimbleweed *(noun)*

Thimbleweed of northern North America.

- *The article explained what “longheaded thimbleweed” means with a simple example.*
- *In class, the teacher used “longheaded thimbleweed” to mean thimbleweed of northern north america.*

---

longroot *(noun)*

Deep-rooted perennial of southeastern United States.

- *Understanding “longroot” helps you talk about this topic clearly.*
- *He looked up “longroot” because he had never seen it before.*

---

lonicera albiflora *(noun)*

Bushy honeysuckle with twining branches and white or yellow-white flowers; southern United States.

- *They discussed “lonicera albiflora” during the group presentation.*
- *Understanding “lonicera albiflora” helps you talk about this topic clearly.*

---

lonicera caprifolium *(noun)*

Deciduous climbing shrub with fragrant yellow-white flowers in axillary whorls.

- *He looked up “lonicera caprifolium” because he had never seen it before.*
- *They discussed “lonicera caprifolium” during the group presentation.*

---

lonicera involucrata *(noun)*

Shrubby honeysuckle with purple flowers; western North America.

- *They discussed “lonicera involucrata” during the group presentation.*
- *She wrote a short paragraph that included “lonicera involucrata.”*

---

lonicera japonica halliana *(noun)*

A variety of Japanese honeysuckle that grows like a vine; established as an aggressive escape in southeastern United States.

- *He looked up “lonicera japonica halliana” because he had never seen it before.*
- *In class, the teacher used “lonicera japonica halliana” to mean a variety of japanese honeysuckle that grows like a....*

---

lonicera morrowii *(noun)*

A grey deciduous honeysuckle shrub paired white flowers turning yellow; Japan.

- *She wrote a short paragraph that included “lonicera morrowii.”*
- *He looked up “lonicera morrowii” because he had never seen it before.*

---

lonicera periclymenum *(noun)*

European twining honeysuckle with fragrant red and yellow-white flowers.

- *They discussed “lonicera periclymenum” during the group presentation.*
- *In class, the teacher used “lonicera periclymenum” to mean european twining honeysuckle with fragrant red and....*

---

lonicera tatarica *(noun)*

A honeysuckle shrub of southern Russia to central Asia.

- *Understanding “lonicera tatarica” helps you talk about this topic clearly.*
- *The article explained what “lonicera tatarica” means with a simple example.*

---

lonicera xylosteum *(noun)*

Cultivated Eurasian shrub with twin yellowish-white flowers and scarlet fruit.

- *They discussed “lonicera xylosteum” during the group presentation.*
- *The article explained what “lonicera xylosteum” means with a simple example.*

---

lontar *(noun)*

Tall fan palm of Africa and India and Malaysia yielding a hard wood and sweet sap that is a source of palm wine and sugar; leaves used for thatching and weaving.

- *Understanding “lontar” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “lontar.”*

lophosoria *(noun)*

One species: tree fern of Central and South America.

- *Understanding "lophosoria" helps you talk about this topic clearly.*
- *The article explained what "lophosoria" means with a simple example.*

lophosoriaceae *(noun)*

Very small family of tree ferns.

- *He looked up "lophosoriaceae" because he had never seen it before.*
- *They discussed "lophosoriaceae" during the group presentation.*

loranthaceae *(noun)*

In some classification includes Viscaceae: parasitic or hemiparasitic shrublets or shrubs or small trees of tropical and temperate regions; attach to hosts by haustoria.

- *She wrote a short paragraph that included "loranthaceae."*
- *He looked up "loranthaceae" because he had never seen it before.*

loranthus *(noun)*

Type genus of the Loranthaceae: 1 species.

- *Understanding "loranthus" helps you talk about this topic clearly.*
- *They discussed "loranthus" during the group presentation.*

loranthus europaeus *(noun)*

Shrub of central and southeastern Europe; partially parasitic on beeches, chestnuts and oaks.

- *They discussed "loranthus europaeus" during the group presentation.*
- *She wrote a short paragraph that included "loranthus europaeus."*

lorchel *(noun)*

A large fungus of the family Helvellaceae.

- *She wrote a short paragraph that included "lorchel."*
- *He looked up "lorchel" because he had never seen it before.*

lotus berthelotii *(noun)*

Low-growing much-branched perennial of Canary Islands having orange-red to scarlet or purple flowers; naturalized in United States.

- *Understanding "lotus berthelotii" helps you talk about this topic clearly.*
- *The article explained what "lotus berthelotii" means with a simple example.*

lotus tetragonolobus *(noun)*

Sprawling European annual having a 4-winged edible pod.

- *The article explained what "lotus tetragonolobus" means with a simple example.*
- *She wrote a short paragraph that included "lotus tetragonolobus."*

loufah sponge *(noun)*

The dried fibrous part of the fruit of a plant of the genus Luffa; used as a washing sponge or strainer.

- *The article explained what "loufah sponge" means with a simple example.*
- *Understanding "loufah sponge" helps you talk about this topic clearly.*

lovoa *(noun)*

Genus of African timber trees.

- *They discussed "lovoa" during the group presentation.*
- *The article explained what "lovoa" means with a simple example.*

lovoa klaineana *(noun)*

Tropical African timber tree with wood that resembles mahogany.

- *The article explained what "lovoa klaineana" means with a simple example.*
- *In class, the teacher used "lovoa klaineana" to mean tropical african timber tree with wood that....*

low gallberry holly *(noun)*

An evergreen shrub.

- *He looked up "low gallberry holly" because he had never seen it before.*
- *She wrote a short paragraph that included "low gallberry holly."*

---

lowbush penstemon *(noun)*

Low bushy plant with large showy pale lavender or blue-violet flowers in narrow clusters at ends of stems.

- *She wrote a short paragraph that included "lowbush penstemon."*
- *They discussed "lowbush penstemon" during the group presentation.*

---

loxoma *(noun)*

One species of terrestrial ferns of New Zealand.

- *Understanding "loxoma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "loxoma."*

---

loxomataceae *(noun)*

Very small family of New Zealand ferns.

- *She wrote a short paragraph that included "loxomataceae."*
- *The article explained what "loxomataceae" means with a simple example.*

---

lucanidae *(noun)*

Stag beetles.

- *He looked up "lucanidae" because he had never seen it before.*
- *Understanding "lucanidae" helps you talk about this topic clearly.*

---

lufengpithecus *(noun)*

A genus of Hominidae.

- *He looked up "lufengpithecus" because he had never seen it before.*
- *She wrote a short paragraph that included "lufengpithecus."*

---

luffa acutangula *(noun)*

Loofah of Pakistan; widely cultivated throughout tropics.

- *They discussed "luffa acutangula" during the group presentation.*
- *She wrote a short paragraph that included "luffa acutangula."*

---

lugworm *(noun)*

Marine worms having a row of tufted gills along each side of the back; often used for fishing bait.

- *She wrote a short paragraph that included "lugworm."*
- *Understanding "lugworm" helps you talk about this topic clearly.*

---

lumbus *(noun)*

Either side of the backbone between the hipbone and the ribs in humans as well as quadrupeds.

- *He looked up "lumbus" because he had never seen it before.*
- *Understanding "lumbus" helps you talk about this topic clearly.*

---

lumpenus *(noun)*

A genus of Stichaeidae.

- *She wrote a short paragraph that included "lumpenus."*
- *They discussed "lumpenus" during the group presentation.*

---

lumpenus lumpretaeformis *(noun)*

Found in Arctic and northern Atlantic waters.

- *Understanding "lumpenus lumpretaeformis" helps you talk about this topic clearly.*
- *They discussed "lumpenus lumpretaeformis" during the group presentation.*

---

lumpfish *(noun)*

Clumsy soft thick-bodied northern Atlantic fish with pelvic fins fused into a sucker; edible roe used for caviar.

- *Understanding "lumpfish" helps you talk about this topic clearly.*

- *They discussed "lumpfish" during the group presentation.*

lumpsucker *(noun)*

Any of several very small lumpfishes.

- *She wrote a short paragraph that included "lumpsucker."*
- *They discussed "lumpsucker" during the group presentation.*

lunda cirrhata *(noun)*

Northern Pacific puffin having a large yellow plume over each eye.

- *In class, the teacher used "lunda cirrhata" to mean northern pacific puffin having a large yellow plume....*
- *Understanding "lunda cirrhata" helps you talk about this topic clearly.*

lungen *(noun)*

Tree of southeastern Asia to Australia grown primarily for its sweet edible fruit resembling litchi nuts; sometimes placed in genera Euphorbia or Nephelium.

- *She wrote a short paragraph that included "lungen."*
- *They discussed "lungen" during the group presentation.*

lupinus arboreus *(noun)*

Evergreen shrub of the Pacific coast of the United States having showy yellow or blue flowers; naturalized in Australia.

- *The article explained what "lupinus arboreus" means with a simple example.*
- *Understanding "lupinus arboreus" helps you talk about this topic clearly.*

lupinus subcarnosus *(noun)*

Low-growing annual herb of southwestern United States (Texas) having silky foliage and blue flowers; a leading cause of livestock poisoning in the southwestern United States.

- *Understanding "lupinus subcarnosus" helps you talk about this topic clearly.*
- *He looked up "lupinus subcarnosus" because he had never seen it before.*

lupinus texensis *(noun)*

Closely resembles Lupinus subcarnosus; southwestern United States (Texas).

- *She wrote a short paragraph that included "lupinus texensis."*
- *They discussed "lupinus texensis" during the group presentation.*

luscinia megarhynchos *(noun)*

European songbird noted for its melodious nocturnal song.

- *He looked up "luscinia megarhynchos" because he had never seen it before.*
- *They discussed "luscinia megarhynchos" during the group presentation.*

lutjanus apodus *(noun)*

Food fish of warm Caribbean and Atlantic waters.

- *He looked up "lutjanus apodus" because he had never seen it before.*
- *She wrote a short paragraph that included "lutjanus apodus."*

lutjanus blackfordi *(noun)*

An esteemed food fish with pinkish red head and body; common in the Atlantic coastal waters of North America and the Gulf of Mexico.

- *The article explained what "lutjanus blackfordi" means with a simple example.*
- *In class, the teacher used "lutjanus blackfordi" to mean an esteemed food fish with pinkish red head and....*

lutrinae *(noun)*

Subdivision not used in some classifications: otters.

- *He looked up "lutrinae" because he had never seen it before.*
- *She wrote a short paragraph that included "lutrinae."*

luvarus *(noun)*

Type genus of the Luvaridae.

- *In class, the teacher used "luvarus" to mean type genus of the luvaridae.*
- *The article explained what "luvarus" means with a simple example.*

luvarus imperialis *(noun)*

Large silvery fish found worldwide in warm seas but nowhere common; resembles a whale and feeds on plankton.

- *They discussed "luvarus imperialis" during the group presentation.*
- *She wrote a short paragraph that included "luvarus imperialis."*

---

lycaena *(noun)*

Type genus of the Lycaenidae; small slender butterflies with upper surface of wings usually metallic blue or green or copper.

- *She wrote a short paragraph that included "lycaena."*
- *He looked up "lycaena" because he had never seen it before.*

---

lycaena hypophlaeas *(noun)*

Common copper butterfly of central and eastern North America.

- *The article explained what "lycaena hypophlaeas" means with a simple example.*
- *She wrote a short paragraph that included "lycaena hypophlaeas."*

---

lycaenid *(noun)*

Any of various butterflies of the family Lycaenidae.

- *She wrote a short paragraph that included "lycaenid."*
- *Understanding "lycaenid" helps you talk about this topic clearly.*

---

lycaenid butterfly *(noun)*

Any of various butterflies of the family Lycaenidae.

- *In class, the teacher used "lycaenid butterfly" to mean any of various butterflies of the family lycaenidae.*
- *The article explained what "lycaenid butterfly" means with a simple example.*

---

lycaeon *(noun)*

African hunting dog.

- *The article explained what "lycaeon" means with a simple example.*
- *She wrote a short paragraph that included "lycaeon."*

---

lychins chalcedonica *(noun)*

Eurasian garden perennial having scarlet flowers in dense terminal heads.

- *Understanding "lychins chalcedonica" helps you talk about this topic clearly.*
- *He looked up "lychins chalcedonica" because he had never seen it before.*

---

lychins floscuculi *(noun)*

Common perennial native to Europe and western Asia having usually pink flowers with ragged petals.

- *The article explained what "lychins floscuculi" means with a simple example.*
- *They discussed "lychins floscuculi" during the group presentation.*

---

lychnis flos-cuculi *(noun)*

Common perennial native to Europe and western Asia having usually pink flowers with ragged petals.

- *In class, the teacher used "lychnis flos-cuculi" to mean common perennial native to europe and western asia....*
- *Understanding "lychnis flos-cuculi" helps you talk about this topic clearly.*

---

lycium barbarum *(noun)*

Deciduous erect or spreading shrub with spiny branches and violet-purple flowers followed by orange-red berries; southeastern Europe to China.

- *They discussed "lycium barbarum" during the group presentation.*
- *The article explained what "lycium barbarum" means with a simple example.*

---

lycium carolinianum *(noun)*

Spiny evergreen shrub of southeastern United States having spreading branches usually blue or mauve flowers and red berries.

- *They discussed "lycium carolinianum" during the group presentation.*
- *In class, the teacher used "lycium carolinianum" to mean spiny evergreen shrub of southeastern united states....*

---

lycium halimifolium *(noun)*

Deciduous erect or spreading shrub with spiny branches and violet-purple flowers followed by orange-red berries; southeastern Europe to China.

- *The article explained what "lycium halimifolium" means with a simple example.*
- *In class, the teacher used "lycium halimifolium" to mean deciduous erect or spreading shrub with spiny....*

---

lycoperdaceae *(noun)*

A fungus family belonging to the order Lycoperdales; includes puffballs.

- *They discussed "lycoperdaceae" during the group presentation.*
- *He looked up "lycoperdaceae" because he had never seen it before.*

---

lycoperdales *(noun)*

Small order of basidiomycetous fungi having fleshy often globose fruiting bodies; includes puffballs and earthstars.

- *The article explained what "lycoperdales" means with a simple example.*
- *She wrote a short paragraph that included "lycoperdales."*

---

lycoperdon *(noun)*

Genus of fungi whose fruiting body tapers toward a base consisting of spongy mycelium.

- *She wrote a short paragraph that included "lycoperdon."*
- *The article explained what "lycoperdon" means with a simple example.*

---

lycopersicon esculentum cerasiforme *(noun)*

Plant bearing small red to yellow fruit.

- *She wrote a short paragraph that included "lycopersicon esculentum cerasiforme."*
- *Understanding "lycopersicon esculentum cerasiforme" helps you talk about this topic clearly.*

---

lycophyta *(noun)*

Used in some classifications for the class Lycopsida: club mosses.

- *They discussed "lycophyta" during the group presentation.*
- *She wrote a short paragraph that included "lycophyta."*

---

lycopod *(noun)*

Primitive evergreen moss-like plant with spores in club-shaped strobiles.

- *In class, the teacher used "lycopod" to mean primitive evergreen moss-like plant with spores in....*
- *He looked up "lycopod" because he had never seen it before.*

---

lycopodiaceae *(noun)*

A family of ferns belonging to the order Lycopodiales.

- *In class, the teacher used "lycopodiaceae" to mean a family of ferns belonging to the order lycopodiales.*
- *He looked up "lycopodiaceae" because he had never seen it before.*

---

lycopodiales *(noun)*

Lower vascular plants coextensive with the family Lycopodiaceae; in some classifications includes the Selaginellaceae and Isoetaceae.

- *He looked up "lycopodiales" because he had never seen it before.*
- *She wrote a short paragraph that included "lycopodiales."*

---

lycopodiate *(noun)*

Club mosses and related forms: includes Lycopodiales; Isoetales; Selaginellales; and extinct Lepidodendrales; sometimes considered a subdivision of Tracheophyta.

- *They discussed "lycopodiate" during the group presentation.*
- *He looked up "lycopodiate" because he had never seen it before.*

---

lycopodineae *(noun)*

Alternative designation for the class Lycopsida.

- *He looked up "lycopodineae" because he had never seen it before.*
- *They discussed "lycopodineae" during the group presentation.*

---

lycopodium alopecuroides *(noun)*

Ground pine thickly covered with bristly leaves; widely distributed in barren sandy or peaty moist coastal regions of eastern and southeastern United States.

- *Understanding "lycopodium alopecuroides" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lycopodium alopecuroides."*

lycopodium clavitum *(noun)*

A variety of club moss.

- *Understanding "lycopodium clavitum" helps you talk about this topic clearly.*
- *He looked up "lycopodium clavitum" because he had never seen it before.*

lycopodium complanatum *(noun)*

A variety of club moss.

- *In class, the teacher used "lycopodium complanatum" to mean a variety of club moss.*
- *Understanding "lycopodium complanatum" helps you talk about this topic clearly.*

lycopodium lucidulum *(noun)*

A variety of club moss.

- *They discussed "lycopodium lucidulum" during the group presentation.*
- *The article explained what "lycopodium lucidulum" means with a simple example.*

lycopodium obscurum *(noun)*

A variety of club moss.

- *She wrote a short paragraph that included "lycopodium obscurum."*
- *He looked up "lycopodium obscurum" because he had never seen it before.*

lycopodium selago *(noun)*

Of northern Europe and America; resembling a miniature fir.

- *Understanding "lycopodium selago" helps you talk about this topic clearly.*
- *In class, the teacher used "lycopodium selago" to mean of northern europe and america; resembling a....*

lycopsida *(noun)*

Club mosses and related forms: includes Lycopodiales; Isoetales; Selaginellales; and extinct Lepidodendrales; sometimes considered a subdivision of Tracheophyta.

- *Understanding "lycopsida" helps you talk about this topic clearly.*
- *The article explained what "lycopsida" means with a simple example.*

lycopus *(noun)*

Small genus of herbs of the mint family.

- *The article explained what "lycopus" means with a simple example.*
- *Understanding "lycopus" helps you talk about this topic clearly.*

lycopus americanus *(noun)*

Aromatic perennial herb of United States.

- *She wrote a short paragraph that included "lycopus americanus."*
- *They discussed "lycopus americanus" during the group presentation.*

lycopus europaeus *(noun)*

Hairy Eurasian herb with two-lipped white flowers.

- *In class, the teacher used "lycopus europaeus" to mean hairy eurasian herb with two-lipped white flowers.*
- *Understanding "lycopus europaeus" helps you talk about this topic clearly.*

lycopus virginicus *(noun)*

A mildly narcotic and astringent aromatic herb having small whitish flowers; eastern United States.

- *He looked up "lycopus virginicus" because he had never seen it before.*
- *They discussed "lycopus virginicus" during the group presentation.*

lycosa tarentula *(noun)*

Large southern European spider once thought to be the cause of tarantism (uncontrollable bodily movement).

- *The article explained what "lycosa tarentula" means with a simple example.*
- *In class, the teacher used "lycosa tarentula" to mean large southern european spider once thought to be....*

lygaeid *(noun)*

A true bug: usually bright-colored; pest of cultivated crops and some fruit trees.

- *The article explained what "lygaeid" means with a simple example.*
- *They discussed "lygaeid" during the group presentation.*

---

lygaeid bug *(noun)*

A true bug: usually bright-colored; pest of cultivated crops and some fruit trees.

- *They discussed "lygaeid bug" during the group presentation.*
- *The article explained what "lygaeid bug" means with a simple example.*

---

lygaeidae *(noun)*

Lygaeid bugs.

- *The article explained what "lygaeidae" means with a simple example.*
- *Understanding "lygaeidae" helps you talk about this topic clearly.*

---

lyginopteridales *(noun)*

Fossil gymnospermous trees or climbing plants from the Devonian: seed ferns.

- *They discussed "lyginopteridales" during the group presentation.*
- *Understanding "lyginopteridales" helps you talk about this topic clearly.*

---

lyginopteris *(noun)*

Genus of fossil seed ferns of the Carboniferous.

- *She wrote a short paragraph that included "lyginopteris."*
- *Understanding "lyginopteris" helps you talk about this topic clearly.*

---

lygodium *(noun)*

Chiefly tropical climbing ferns.

- *He looked up "lygodium" because he had never seen it before.*
- *Understanding "lygodium" helps you talk about this topic clearly.*

---

lygodium microphyllum *(noun)*

Tropical fern widespread in Old World; naturalized in Jamaica and Florida.

- *The article explained what "lygodium microphyllum" means with a simple example.*
- *Understanding "lygodium microphyllum" helps you talk about this topic clearly.*

---

lygodium palmatum *(noun)*

Delicate fern of the eastern United States having a twining stem and palmately-lobed sterile fronds and forked fertile fronds.

- *She wrote a short paragraph that included "lygodium palmatum."*
- *Understanding "lygodium palmatum" helps you talk about this topic clearly.*

---

lygus lineolaris *(noun)*

Widespread plant and fruit pest.

- *Understanding "lygus lineolaris" helps you talk about this topic clearly.*
- *In class, the teacher used "lygus lineolaris" to mean widespread plant and fruit pest.*

---

lymantriid *(noun)*

Dull-colored moth whose larvae have tufts of hair on the body and feed on the leaves of many deciduous trees.

- *They discussed "lymantriid" during the group presentation.*
- *The article explained what "lymantriid" means with a simple example.*

---

lymantriidae *(noun)*

Tussock moths.

- *They discussed "lymantriidae" during the group presentation.*
- *In class, the teacher used "lymantriidae" to mean tussock moths.*

---

lymphocytic choriomeningitis virus *(noun)*

The RNA virus that causes lymphocytic choriomeningitis; infects mice and monkeys and dogs and guinea pigs and human beings.

- *The article explained what "lymphocytic choriomeningitis virus" means with a simple example.*

- *In class, the teacher used "lymphocytic choriomeningitis virus" to mean the rna virus that causes lymphocytic....*

lynx pardina *(noun)*

Of southern Europe.

- *Understanding "lynx pardina" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lynx pardina."*

lyonia *(noun)*

Evergreen or deciduous shrubs or small trees of United States to Antilles and eastern Asia to the Himalaya.

- *He looked up "lyonia" because he had never seen it before.*
- *In class, the teacher used "lyonia" to mean evergreen or deciduous shrubs or small trees of....*

lyonia ligustrina *(noun)*

Deciduous much-branched shrub with dense downy panicles of small bell-shaped white flowers.

- *He looked up "lyonia ligustrina" because he had never seen it before.*
- *Understanding "lyonia ligustrina" helps you talk about this topic clearly.*

lyonia lucida *(noun)*

Showy evergreen shrub of southeastern United States with shiny leaves and angled branches and clusters of pink to reddish flowers that resemble an umbel.

- *Understanding "lyonia lucida" helps you talk about this topic clearly.*
- *In class, the teacher used "lyonia lucida" to mean showy evergreen shrub of southeastern united states....*

lyonia mariana *(noun)*

Deciduous shrub of coastal plain of the eastern United States having nodding pinkish-white flowers; poisonous to stock.

- *The article explained what "lyonia mariana" means with a simple example.*
- *Understanding "lyonia mariana" helps you talk about this topic clearly.*

lyrate leaf *(noun)*

A simple leaf having curvature suggestive of a lyre.

- *They discussed "lyrate leaf" during the group presentation.*
- *Understanding "lyrate leaf" helps you talk about this topic clearly.*

lyreflower *(noun)*

Garden plant having deep-pink drooping heart-shaped flowers.

- *She wrote a short paragraph that included "lyreflower."*
- *They discussed "lyreflower" during the group presentation.*

lyrurus *(noun)*

Black grouse.

- *Understanding "lyrurus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lyrurus."*

lyrurus mlokosiewiczi *(noun)*

A black grouse of western Asia.

- *They discussed "lyrurus mlokosiewiczi" during the group presentation.*
- *The article explained what "lyrurus mlokosiewiczi" means with a simple example.*

lyrurus tetrix *(noun)*

Large northern European grouse that is black with a lyre-shaped tail.

- *He looked up "lyrurus tetrix" because he had never seen it before.*
- *She wrote a short paragraph that included "lyrurus tetrix."*

lysichiton *(noun)*

Skunk cabbage.

- *Understanding "lysichiton" helps you talk about this topic clearly.*
- *He looked up "lysichiton" because he had never seen it before.*

lysichiton americanum *(noun)*

Clump-forming deciduous perennial swamp plant of western North America similar to Symplocarpus foetidus but having a yellow spathe.

- *In class, the teacher used "lysichiton americanum" to mean clump-forming deciduous perennial swamp plant of....*
- *The article explained what "lysichiton americanum" means with a simple example.*

---

lysichitum *(noun)*

Skunk cabbage.

- *She wrote a short paragraph that included "lysichitum."*
- *They discussed "lysichitum" during the group presentation.*

---

lysiloma *(noun)*

Small genus of tropical American trees and shrubs with pinnate leaves and flat straight pods.

- *He looked up "lysiloma" because he had never seen it before.*
- *Understanding "lysiloma" helps you talk about this topic clearly.*

---

lysiloma bahamensis *(noun)*

A tree of the West Indies and Florida and Mexico; resembles tamarind and has long flat pods.

- *She wrote a short paragraph that included "lysiloma bahamensis."*
- *The article explained what "lysiloma bahamensis" means with a simple example.*

---

lysiloma latisiliqua *(noun)*

A tree of the West Indies and Florida and Mexico; resembles tamarind and has long flat pods.

- *He looked up "lysiloma latisiliqua" because he had never seen it before.*
- *In class, the teacher used "lysiloma latisiliqua" to mean a tree of the west indies and florida and mexico;....*

---

lysiloma sabicu *(noun)*

West Indian tree yielding a hard dark brown wood resembling mahogany in texture and value.

- *She wrote a short paragraph that included "lysiloma sabicu."*
- *The article explained what "lysiloma sabicu" means with a simple example.*

---

lysimachia ciliatum *(noun)*

Of North America.

- *He looked up "lysimachia ciliatum" because he had never seen it before.*
- *She wrote a short paragraph that included "lysimachia ciliatum."*

---

lysimachia clethroides duby *(noun)*

A variety of the loosestrife herb.

- *He looked up "lysimachia clethroides duby" because he had never seen it before.*
- *Understanding "lysimachia clethroides duby" helps you talk about this topic clearly.*

---

lysimachia nemorum *(noun)*

Trailing European evergreen with yellow flowers.

- *The article explained what "lysimachia nemorum" means with a simple example.*
- *Understanding "lysimachia nemorum" helps you talk about this topic clearly.*

---

lysimachia nummularia *(noun)*

A loosestrife vine.

- *The article explained what "lysimachia nummularia" means with a simple example.*
- *They discussed "lysimachia nummularia" during the group presentation.*

---

lysimachia quadrifolia *(noun)*

Common North American yellow-flowered plant.

- *They discussed "lysimachia quadrifolia" during the group presentation.*
- *He looked up "lysimachia quadrifolia" because he had never seen it before.*

---

lythraceae *(noun)*

Herbs and shrubs and small trees with pink or purple flowers.

- *Understanding "lythraceae" helps you talk about this topic clearly.*
- *The article explained what "lythraceae" means with a simple example.*

---

lythrum hyssopifolia *(noun)*

Annual with small solitary pink flowers; originally of Europe but widely naturalized in moist areas.

- *The article explained what "lythrum hyssopifolia" means with a simple example.*
- *She wrote a short paragraph that included "lythrum hyssopifolia."*

---

lythrum salicaria *(noun)*

Marsh herb with a long spike of purple flowers; originally of Europe but now rampant in eastern United States.

- *In class, the teacher used "lythrum salicaria" to mean marsh herb with a long spike of purple flowers;....*
- *They discussed "lythrum salicaria" during the group presentation.*

---

macadamia ternifolia *(noun)*

Small Australian tree with racemes of pink flowers; widely cultivated (especially in Hawaii) for its sweet edible nuts.

- *She wrote a short paragraph that included "macadamia ternifolia."*
- *Understanding "macadamia ternifolia" helps you talk about this topic clearly.*

---

macadamia tetraphylla *(noun)*

Bushy tree with pink to purple flowers.

- *In class, the teacher used "macadamia tetraphylla" to mean bushy tree with pink to purple flowers.*
- *The article explained what "macadamia tetraphylla" means with a simple example.*

---

macamba *(noun)*

Tropical American feather palm having a swollen spiny trunk and edible nuts.

- *He looked up "macamba" because he had never seen it before.*
- *They discussed "macamba" during the group presentation.*

---

machaeranthera *(noun)*

Wildflowers of western North America.

- *Understanding "machaeranthera" helps you talk about this topic clearly.*
- *In class, the teacher used "machaeranthera" to mean wildflowers of western north america.*

---

machaeranthera bigelovii *(noun)*

Wild aster having leafy stems and flower heads with narrow bright reddish-lavender or purple rays; western Colorado to Arizona.

- *He looked up "machaeranthera bigelovii" because he had never seen it before.*
- *They discussed "machaeranthera bigelovii" during the group presentation.*

---

machaeranthera tanacetifolia *(noun)*

Wild aster with fernlike leaves and flower heads with very narrow bright purple rays; Alberta to Texas and Mexico.

- *In class, the teacher used "machaeranthera tanacetifolia" to mean wild aster with fernlike leaves and flower heads....*
- *The article explained what "machaeranthera tanacetifolia" means with a simple example.*

Psychology & Behavior

cognitive *(adjective)*

Connected with the mental processes of thinking, understanding, learning, and remembering.

- *Puzzles and reading can help maintain cognitive abilities as we age.*
- *The study examined the cognitive development of children who learn two languages.*

---

An animal that has a body temperature that is relatively constant and independent of the environmental temperature.

- *In class, the teacher used "homeotherm" to mean an animal that has a body temperature that is....*
- *Understanding "homeotherm" helps you talk about this topic clearly.*

---

homoiotherm *(noun)*

An animal that has a body temperature that is relatively constant and independent of the environmental temperature.

- *She wrote a short paragraph that included "homoiotherm."*
- *He looked up "homoiotherm" because he had never seen it before.*

---

homotherm *(noun)*

An animal that has a body temperature that is relatively constant and independent of the environmental temperature.

- *She wrote a short paragraph that included "homotherm."*
- *They discussed "homotherm" during the group presentation.*

---

hoodooism *(noun)*

A religious cult practiced chiefly in Caribbean countries (especially Haiti); involves witchcraft and animistic deities.

- *They discussed "hoodooism" during the group presentation.*
- *Understanding "hoodooism" helps you talk about this topic clearly.*

---

horoscopy *(noun)*

The drawing up and interpretation of horoscopes.

- *Understanding "horoscopy" helps you talk about this topic clearly.*
- *The article explained what "horoscopy" means with a simple example.*

---

housecraft *(noun)*

Skill in domestic management.

- *Understanding "housecraft" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "housecraft."*

---

huffiness *(noun)*

A passing state of anger and resentment.

- *They discussed "huffiness" during the group presentation.*
- *He looked up "huffiness" because he had never seen it before.*

huffishness *(noun)*

A feeling of sulky resentment.

- *Understanding "huffishness" helps you talk about this topic clearly.*
- *In class, the teacher used "huffishness" to mean a feeling of sulky resentment.*

hurler's disease *(noun)*

Hereditary disease (autosomal recessive) consisting of an error is mucopolysaccharide metabolism; characterized by severe abnormalities in development of skeletal cartilage and bone and mental retardation.

- *In class, the teacher used "hurler's disease" to mean hereditary disease (autosomal recessive) consisting....*
- *They discussed "hurler's disease" during the group presentation.*

hurler's syndrome *(noun)*

Hereditary disease (autosomal recessive) consisting of an error is mucopolysaccharide metabolism; characterized by severe abnormalities in development of skeletal cartilage and bone and mental retardation.

- *The article explained what "hurler's syndrome" means with a simple example.*
- *They discussed "hurler's syndrome" during the group presentation.*

hydrokinetics *(noun)*

Study of fluids in motion.

- *He looked up "hydrokinetics" because he had never seen it before.*
- *She wrote a short paragraph that included "hydrokinetics."*

hydromancy *(noun)*

Divination by water (as by patterns seen in the ebb and flow of the tides).

- *In class, the teacher used "hydromancy" to mean divination by water (as by patterns seen in the ebb....*
- *The article explained what "hydromancy" means with a simple example.*

hygienics *(noun)*

The science concerned with the prevention of illness and maintenance of health.

- *The article explained what "hygienics" means with a simple example.*
- *Understanding "hygienics" helps you talk about this topic clearly.*

hypostatise *(verb)*

Construe as a real existence, of a conceptual entity.

- *Can you use "hypostatise" in a sentence that fits this situation?*
- *The coach explained when to use "hypostatise" and when to wait.*

hypostatize *(verb)*

Construe as a real existence, of a conceptual entity.

- *She tried to use "hypostatize" carefully so everyone would understand.*
- *Learners should practice how to use "hypostatize" in real sentences.*

hypsography *(noun)*

The scientific study of the earth's configuration above sea level (emphasizing the measurement of land altitudes relative to sea level).

- *Understanding "hypsography" helps you talk about this topic clearly.*
- *He looked up "hypsography" because he had never seen it before.*

hysteron proteron *(noun)*

The logical fallacy of using as a true premise a proposition that is yet to be proved.

- *She wrote a short paragraph that included "hysteron proteron."*
- *He looked up "hysteron proteron" because he had never seen it before.*

ignorantness *(noun)*

Ignorance (especially of orthodox beliefs).

- *They discussed "ignorantness" during the group presentation.*
- *Understanding "ignorantness" helps you talk about this topic clearly.*

---

ismailism *(noun)*

The branch of Shiism noted for its esoteric philosophy.

- *Understanding "ismailism" helps you talk about this topic clearly.*
- *The article explained what "ismailism" means with a simple example.*

---

jacques francois fromental elie halevy *(noun)*

French operatic composer (1799-1862).

- *They discussed "jacques francois fromental elie halevy" during the group presentation.*
- *He looked up "jacques francois fromental elie halevy" because he had never seen it before.*

---

jesuitism *(noun)*

The theology or the practices of the Jesuits (often considered to be casuistic).

- *They discussed "jesuitism" during the group presentation.*
- *She wrote a short paragraph that included "jesuitism."*

---

jesuitry *(noun)*

The theology or the practices of the Jesuits (often considered to be casuistic).

- *She wrote a short paragraph that included "jesuitry."*
- *He looked up "jesuitry" because he had never seen it before.*

jocundity *(noun)*

A feeling facetious merriment.

- *She wrote a short paragraph that included "jocundity."*
- *He looked up "jocundity" because he had never seen it before.*

jolliness *(noun)*

Feeling jolly and jovial and full of good humor.

- *She wrote a short paragraph that included "jolliness."*
- *They discussed "jolliness" during the group presentation.*

joylessness *(noun)*

A feeling of dismal cheerlessness.

- *In class, the teacher used "joylessness" to mean a feeling of dismal cheerlessness.*
- *They discussed "joylessness" during the group presentation.*

jubilancy *(noun)*

A feeling of extreme joy.

- *She wrote a short paragraph that included "jubilancy."*
- *Understanding "jubilancy" helps you talk about this topic clearly.*

kabbalism *(noun)*

The doctrines of the Kabbalah.

- *He looked up "kabbalism" because he had never seen it before.*
- *Understanding "kabbalism" helps you talk about this topic clearly.*

kinaesthesia *(noun)*

The ability to feel movements of the limbs and body.

- *She wrote a short paragraph that included "kinaesthesia."*
- *He looked up "kinaesthesia" because he had never seen it before.*

kinaesthesis *(noun)*

The ability to feel movements of the limbs and body.

- *She wrote a short paragraph that included "kinaesthesis."*
- *Understanding "kinaesthesis" helps you talk about this topic clearly.*

kinanesthesia *(noun)*

Inability to sense movement.

- *The article explained what "kinanesthesia" means with a simple example.*
- *Understanding "kinanesthesia" helps you talk about this topic clearly.*

kindheartedness *(noun)*

Sympathy arising from a kind heart.

- *In class, the teacher used "kindheartedness" to mean sympathy arising from a kind heart.*
- *The article explained what "kindheartedness" means with a simple example.*

kinesthesia *(noun)*

The ability to feel movements of the limbs and body.

- *In class, the teacher used "kinesthesia" to mean the ability to feel movements of the limbs and body.*
- *The article explained what "kinesthesia" means with a simple example.*

kinesthesis *(noun)*

The ability to feel movements of the limbs and body.

- *In class, the teacher used "kinesthesis" to mean the ability to feel movements of the limbs and body.*
- *The article explained what "kinesthesis" means with a simple example.*

kinesthetics *(noun)*

The ability to feel movements of the limbs and body.

- *He looked up "kinesthetics" because he had never seen it before.*
- *Understanding "kinesthetics" helps you talk about this topic clearly.*

---

knightliness *(noun)*

The medieval principles governing knighthood and knightly conduct.

- *The article explained what "knightliness" means with a simple example.*
- *In class, the teacher used "knightliness" to mean the medieval principles governing knighthood and....*

Worship of Krishna the 8th avatar of Vishnu.

- *She wrote a short paragraph that included "krishnaism."*
- *Understanding "krishnaism" helps you talk about this topic clearly.*

---

kussmaul's coma *(noun)*

Coma that can develop in inadequately treated cases of diabetes mellitus.

- *They discussed "kussmaul's coma" during the group presentation.*
- *Understanding "kussmaul's coma" helps you talk about this topic clearly.*

---

ladylikeness *(noun)*

Behavior befitting a lady.

- *He looked up "ladylikeness" because he had never seen it before.*
- *She wrote a short paragraph that included "ladylikeness."*

---

lafora's disease *(noun)*

Epilepsy characterized by clonus of muscle groups and progressive mental deterioration and genetic origin.

- *She wrote a short paragraph that included "lafora's disease."*
- *They discussed "lafora's disease" during the group presentation.*

---

lateralisation *(noun)*

Localization of function on either the right or left sides of the brain.

- *In class, the teacher used "lateralisation" to mean localization of function on either the right or....*
- *Understanding "lateralisation" helps you talk about this topic clearly.*

---

le chatelier's law *(noun)*

The principle that if any change is imposed on a system that is in equilibrium then the system tends to adjust to a new equilibrium counteracting the change.

- *He looked up "le chatelier's law" because he had never seen it before.*
- *They discussed "le chatelier's law" during the group presentation.*

---

learnedness *(noun)*

Profound scholarly knowledge.

- *Understanding "learnedness" helps you talk about this topic clearly.*
- *They discussed "learnedness" during the group presentation.*

---

lecherousness *(noun)*

A strong sexual desire.

- *She wrote a short paragraph that included "lecherousness."*
- *Understanding "lecherousness" helps you talk about this topic clearly.*

---

legionella pneumophilia *(noun)*

The motile aerobic rod-shaped Gram-negative bacterium that thrives in central heating and air conditioning systems and can cause Legionnaires' disease.

- *They discussed "legionella pneumophilia" during the group presentation.*
- *The article explained what "legionella pneumophilia" means with a simple example.*

---

lenify *(verb)*

Cause to be more favorably inclined; gain the good will of.

- *He did not know how to use "lenify" until he saw an example.*

- *She tried to use “lenify” carefully so everyone would understand.*

lepidopterology *(noun)*

The branch of entomology dealing with Lepidoptera.

- *Understanding “lepidopterology” helps you talk about this topic clearly.*
- *He looked up “lepidopterology” because he had never seen it before.*

lepidoptery *(noun)*

The branch of entomology dealing with Lepidoptera.

- *She wrote a short paragraph that included “lepidoptery.”*
- *Understanding “lepidoptery” helps you talk about this topic clearly.*

lexicostatistics *(noun)*

A statistical technique used in glottochronology; used to estimate how long ago different languages evolved from a common source language.

- *The article explained what “lexicostatistics” means with a simple example.*
- *Understanding “lexicostatistics” helps you talk about this topic clearly.*

liberalness *(noun)*

An inclination to favor progress and individual freedom.

- *Understanding “liberalness” helps you talk about this topic clearly.*
- *They discussed “liberalness” during the group presentation.*

lipochondrodystrophy *(noun)*

Hereditary disease (autosomal recessive) consisting of an error is mucopolysaccharide metabolism; characterized by severe abnormalities in development of skeletal cartilage and bone and mental retardation.

- *The article explained what “lipochondrodystrophy” means with a simple example.*
- *In class, the teacher used “lipochondrodystrophy” to mean hereditary disease (autosomal recessive) consisting....*

lipread *(verb)*

Interpret by lipreading; of deaf people.

- *He did not know how to use “lipread” until he saw an example.*
- *She tried to use “lipread” carefully so everyone would understand.*

literalise *(verb)*

Make literal.

- *She tried to use “literalise” carefully so everyone would understand.*
- *Learners should practice how to use “literalise” in real sentences.*

literalize *(verb)*

Make literal.

- *Literalize metaphors.*
- *In everyday English, people use “literalize” when talking about this idea.*

lithomancy *(noun)*

Divination by means of stones or stone talismans.

- *In class, the teacher used “lithomancy” to mean divination by means of stones or stone talismans.*
- *Understanding “lithomancy” helps you talk about this topic clearly.*

liturgics *(noun)*

The study of liturgies.

- *He looked up “liturgics” because he had never seen it before.*
- *In class, the teacher used “liturgics” to mean the study of liturgies.*

liturgiology *(noun)*

The study of liturgies.

- *Understanding “liturgiology” helps you talk about this topic clearly.*
- *They discussed “liturgiology” during the group presentation.*

luckiness *(noun)*

An auspicious state resulting from favorable outcomes.

- *They discussed "luckiness" during the group presentation.*
- *Understanding "luckiness" helps you talk about this topic clearly.*

lues venerea *(noun)*

A common venereal disease caused by the treponema pallidum spirochete; symptoms change through progressive stages; can be congenital (transmitted through the placenta).

- *The article explained what "lues venerea" means with a simple example.*
- *They discussed "lues venerea" during the group presentation.*

lumpish *(adjective)*

Mentally sluggish.

- *Would you call this situation "lumpish"? Explain why.*
- *It is useful to describe something as "lumpish" when it is mentally sluggish.*

lustfulness *(noun)*

A strong sexual desire.

- *In class, the teacher used "lustfulness" to mean a strong sexual desire.*
- *The article explained what "lustfulness" means with a simple example.*

lymphadenoma *(noun)*

An abnormally enlarged lymph node.

- *She wrote a short paragraph that included "lymphadenoma."*
- *They discussed "lymphadenoma" during the group presentation.*

lymphangiectasia *(noun)*

Dilatation of a lymph vessel.

- *She wrote a short paragraph that included "lymphangiectasia."*
- *They discussed "lymphangiectasia" during the group presentation.*

lymphangiectasis *(noun)*

Dilatation of a lymph vessel.

- *She wrote a short paragraph that included "lymphangiectasis."*
- *The article explained what "lymphangiectasis" means with a simple example.*

lymphocytic choriomeningitis *(noun)*

A form of viral meningitis caused by a virus carried by the common house mouse.

- *Understanding "lymphocytic choriomeningitis" helps you talk about this topic clearly.*
- *In class, the teacher used "lymphocytic choriomeningitis" to mean a form of viral meningitis caused by a virus....*

lymphocytopenia *(noun)*

An abnormally small number of lymphocytes in the circulating blood.

- *They discussed "lymphocytopenia" during the group presentation.*
- *Understanding "lymphocytopenia" helps you talk about this topic clearly.*

lymphogranuloma *(noun)*

Swelling of a lymph node.

- *They discussed "lymphogranuloma" during the group presentation.*
- *He looked up "lymphogranuloma" because he had never seen it before.*

lymphogranuloma venereum *(noun)*

Infectious disease caused by a species of chlamydia bacterium; transmitted by sexual contact; characterized by genital lesions and swelling of lymph nodes in the groin.

- *Understanding "lymphogranuloma venereum" helps you talk about this topic clearly.*
- *He looked up "lymphogranuloma venereum" because he had never seen it before.*

lymphopathia venereum *(noun)*

Infectious disease caused by a species of chlamydia bacterium; transmitted by sexual contact; characterized by genital lesions and swelling of lymph nodes in the groin.

- *The article explained what "lymphopathia venereum" means with a simple example.*
- *In class, the teacher used "lymphopathia venereum" to mean infectious disease caused by a species of chlamydia....*

---

lymphuria *(noun)*

The presence of lymph in the urine.

- *The article explained what "lymphuria" means with a simple example.*
- *She wrote a short paragraph that included "lymphuria."*

---

lysinemia *(noun)*

An inborn error of metabolism in which the lack of certain enzymes leads to an inability to metabolize the amino acid lysine; characterized by muscular weakness and mental retardation.

- *They discussed "lysinemia" during the group presentation.*
- *He looked up "lysinemia" because he had never seen it before.*

---

lysogenicity *(noun)*

The condition of a host bacterium that has incorporated a phage into its own genetic material.

- *She wrote a short paragraph that included "lysogenicity."*
- *He looked up "lysogenicity" because he had never seen it before.*

---

lysogeny *(noun)*

The condition of a host bacterium that has incorporated a phage into its own genetic material.

- *When a phage infects a bacterium it can either destroy its host or be incorporated in the host genome in a state of lysogeny.*
- *Understanding "lysogeny" helps you talk about this topic clearly.*

---

macrencephaly *(noun)*

An abnormally large braincase.

- *He looked up "macrencephaly" because he had never seen it before.*
- *In class, the teacher used "macrencephaly" to mean an abnormally large braincase.*

---

macrocytosis *(noun)*

The presence of macrocytes in the blood.

- *He looked up "macrocytosis" because he had never seen it before.*
- *In class, the teacher used "macrocytosis" to mean the presence of macrocytes in the blood.*

---

macroglossia *(noun)*

A congenital disorder characterized by an abnormally large tongue; often seen in cases of Down's syndrome.

- *In class, the teacher used "macroglossia" to mean a congenital disorder characterized by an....*
- *The article explained what "macroglossia" means with a simple example.*

---

magnolia soulangiana *(noun)*

Large deciduous shrub or small tree having large open rosy to purplish flowers; native to Asia; prized as an ornamental in eastern North America.

- *Understanding "magnolia soulangiana" helps you talk about this topic clearly.*
- *They discussed "magnolia soulangiana" during the group presentation.*

---

mahayanism *(noun)*

The religious doctrine of Mahayana Buddhism.

- *Understanding "mahayanism" helps you talk about this topic clearly.*
- *He looked up "mahayanism" because he had never seen it before.*

---

mahdism *(noun)*

Any pathology of the breast.

- *They discussed "mazopathy" during the group presentation.*
- *She wrote a short paragraph that included "mazopathy."*

---

mcardle's disease *(noun)*

An inherited disease in which abnormal amounts of glycogen accumulate in skeletal muscle; results in weakness and cramping.

- *He looked up "mcardle's disease" because he had never seen it before.*
- *She wrote a short paragraph that included "mcardle's disease."*

---

meckel's diverticulum *(noun)*

A congenital diverticulum in the ileum resulting from incomplete closure of the yolk sac.

- *Understanding "meckel's diverticulum" helps you talk about this topic clearly.*
- *In class, the teacher used "meckel's diverticulum" to mean a congenital diverticulum in the ileum resulting....*

---

medinilla *(noun)*

Tropical Old World ornamental evergreen shrubs having fleshy leaves and large panicles of white pink flowers.

- *She wrote a short paragraph that included "medinilla."*
- *He looked up "medinilla" because he had never seen it before.*

---

megacardia *(noun)*

An abnormal enlargement of the heart.

- *Understanding "megacardia" helps you talk about this topic clearly.*
- *They discussed "megacardia" during the group presentation.*

---

megacephaly *(noun)*

An abnormally large head; differs from hydrocephalus because there is no increased intracranial pressure and the overgrowth is symmetrical.

- *In class, the teacher used "megacephaly" to mean an abnormally large head; differs from....*
- *He looked up "megacephaly" because he had never seen it before.*

---

megalocardia *(noun)*

An abnormal enlargement of the heart.

- *They discussed "megalocardia" during the group presentation.*
- *He looked up "megalocardia" because he had never seen it before.*

---

megalocephaly *(noun)*

An abnormally large head; differs from hydrocephalus because there is no increased intracranial pressure and the overgrowth is symmetrical.

- *The article explained what "megalocephaly" means with a simple example.*
- *In class, the teacher used "megalocephaly" to mean an abnormally large head; differs from....*

---

megalohepatia *(noun)*

Abnormal enlargement of the liver.

- *They discussed "megalohepatia" during the group presentation.*
- *He looked up "megalohepatia" because he had never seen it before.*

---

megrims *(noun)*

A state of depression.

- *In class, the teacher used "megrims" to mean a state of depression.*
- *The article explained what "megrims" means with a simple example.*

---

melagra *(noun)*

Rheumatic or myalgic pains in the arms or legs.

- *The article explained what "melagra" means with a simple example.*
- *In class, the teacher used "melagra" to mean rheumatic or myalgic pains in the arms or legs.*

---

melastomaceae *(noun)*

A family of trees and bushes and herbs of order Myrtales; many are cultivated as ornamentals.

- *They discussed "melastomaceae" during the group presentation.*
- *He looked up "melastomaceae" because he had never seen it before.*

---

melastomataceae *(noun)*

A family of trees and bushes and herbs of order Myrtales; many are cultivated as ornamentals.

- *Understanding "melastomataceae" helps you talk about this topic clearly.*
- *He looked up "melastomataceae" because he had never seen it before.*

---

meliorism *(noun)*

The belief that the world can be made better by human effort.

- *They discussed "meliorism" during the group presentation.*
- *Understanding "meliorism" helps you talk about this topic clearly.*

mendeleev's law *(noun)*

(chemistry) the principle that chemical properties of the elements are periodic functions of their atomic numbers.

- *She wrote a short paragraph that included "mendeleev's law."*
- *They discussed "mendeleev's law" during the group presentation.*

mendelianism *(noun)*

The theory of inheritance based on Mendel's laws.

- *He looked up "mendelianism" because he had never seen it before.*
- *She wrote a short paragraph that included "mendelianism."*

mendelism *(noun)*

Recurrent eye inflammation in horses; sometimes resulting in blindness.

- *Understanding "mooneye" helps you talk about this topic clearly.*
- *He looked up "mooneye" because he had never seen it before.*

---

morbidness *(noun)*

An abnormally gloomy or unhealthy state of mind.

- *He looked up "morbidness" because he had never seen it before.*
- *She wrote a short paragraph that included "morbidness."*

---

morbilli *(noun)*

An acute and highly contagious viral disease marked by distinct red spots followed by a rash; occurs primarily in children.

- *In class, the teacher used "morbilli" to mean an acute and highly contagious viral disease marked....*

- *They discussed "morbilli" during the group presentation.*

---

moronity *(noun)*

Mild mental retardation.

- *The article explained what "moronity" means with a simple example.*
- *She wrote a short paragraph that included "moronity."*

---

moroseness *(noun)*

A gloomy ill-tempered feeling.

- *He looked up "moroseness" because he had never seen it before.*
- *In class, the teacher used "moroseness" to mean a gloomy ill-tempered feeling.*

---

morphophonemics *(noun)*

The study of the phonological realization of the allomorphs of the morphemes of a language.

- *She wrote a short paragraph that included "morphophonemics."*
- *The article explained what "morphophonemics" means with a simple example.*

---

morphophysiology *(noun)*

The study of anatomy in its relation to function.

- *Understanding "morphophysiology" helps you talk about this topic clearly.*
- *They discussed "morphophysiology" during the group presentation.*

---

motionlessness *(noun)*

A state of no motion or movement.

- *The utter motionlessness of a marble statue.*
- *In class, the teacher used "motionlessness" to mean a state of no motion or movement.*

---

motoneuron *(noun)*

A neuron conducting impulses outwards from the brain or spinal cord.

- *In class, the teacher used "motoneuron" to mean a neuron conducting impulses outwards from the....*
- *Understanding "motoneuron" helps you talk about this topic clearly.*

---

motorial *(adjective)*

Of nerves and nerve impulses; conveying information away from the CNS.

- *Her writing became clearer after she learned "motorial."*
- *Would you call this situation "motorial"? Explain why.*

---

mountain fetterbush *(noun)*

Ornamental evergreen shrub of southeastern United States having small white bell-shaped flowers.

- *They discussed "mountain fetterbush" during the group presentation.*
- *He looked up "mountain fetterbush" because he had never seen it before.*

---

mournfulness *(noun)*

A state of gloomy sorrow.

- *The article explained what "mournfulness" means with a simple example.*
- *In class, the teacher used "mournfulness" to mean a state of gloomy sorrow.*

---

mucoviscidosis *(noun)*

The most common congenital disease; the child's lungs and intestines and pancreas become clogged with thick mucus; caused by defect in a single gene; no cure is known.

- *In class, the teacher used "mucoviscidosis" to mean the most common congenital disease; the child's....*
- *The article explained what "mucoviscidosis" means with a simple example.*

---

mugginess *(noun)*

A state of warm humidity.

- *In class, the teacher used "mugginess" to mean a state of warm humidity.*
- *They discussed "mugginess" during the group presentation.*

---

muhammadanism *(noun)*

The monotheistic religious system of Muslims founded in Arabia in the 7th century and based on the teachings of Muhammad as laid down in the Koran.

- *The term Muhammadanism is offensive to Muslims who believe that Allah, not Muhammad, founded their religion.*
- *He looked up "muhammadanism" because he had never seen it before.*

multiple mononeuropathy *(noun)*

Pathology of several individual nerve trunks.

- *He looked up "multiple mononeuropathy" because he had never seen it before.*
- *In class, the teacher used "multiple mononeuropathy" to mean pathology of several individual nerve trunks.*

multivalence *(noun)*

(chemistry) the state of having a valence greater than two.

- *They discussed "multivalence" during the group presentation.*
- *She wrote a short paragraph that included "multivalence."*

multivalency *(noun)*

(chemistry) the state of having a valence greater than two.

- *She wrote a short paragraph that included "multivalency."*
- *They discussed "multivalency" during the group presentation.*

mumification necrosis *(noun)*

(pathology) gangrene that develops in the presence of arterial obstruction and is characterized by dryness of the dead tissue and a dark brown color.

- *The article explained what "mumification necrosis" means with a simple example.*
- *She wrote a short paragraph that included "mumification necrosis."*

mumpsimus *(noun)*

A traditional notion that is obstinately held although it is unreasonable.

- *He still holds to the old mumpsimus that a woman's place is in the kitchen.*
- *In class, the teacher used "mumpsimus" to mean a traditional notion that is obstinately held....*

murderousness *(noun)*

A bloodthirsty hatred arousing murderous impulses.

- *They discussed "murderousness" during the group presentation.*
- *She wrote a short paragraph that included "murderousness."*

musca volitans *(noun)*

Spots before the eyes caused by opaque cell fragments in the vitreous humor and lens.

- *The article explained what "musca volitans" means with a simple example.*
- *In class, the teacher used "musca volitans" to mean spots before the eyes caused by opaque cell....*

muscae volitantes *(noun)*

Spots before the eyes caused by opaque cell fragments in the vitreous humor and lens.

- *The article explained what "muscae volitantes" means with a simple example.*
- *She wrote a short paragraph that included "muscae volitantes."*

musicogenic epilepsy *(noun)*

Reflex epilepsy induced by music.

- *They discussed "musicogenic epilepsy" during the group presentation.*
- *He looked up "musicogenic epilepsy" because he had never seen it before.*

musophobia *(noun)*

A morbid fear of mice.

- *They discussed "musophobia" during the group presentation.*
- *She wrote a short paragraph that included "musophobia."*

mussiness *(noun)*

A state of confusion and disorderliness.

- *She smoothed the mussiness of the bed.*
- *In class, the teacher used "mussiness" to mean a state of confusion and disorderliness.*

---

mycoplasmal pneumonia *(noun)*

An acute respiratory disease marked by high fever and coughing; caused by mycoplasma; primarily affecting children and young adults.

- *In class, the teacher used "mycoplasmal pneumonia" to mean an acute respiratory disease marked by high fever....*
- *Understanding "mycoplasmal pneumonia" helps you talk about this topic clearly.*

---

myelatelia *(noun)*

Any developmental defect of the spinal cord.

- *She wrote a short paragraph that included "myelatelia."*
- *He looked up "myelatelia" because he had never seen it before.*

---

myeloblastic leukemia *(noun)*

A malignant neoplasm of blood-forming tissues; characterized by numerous myeloblasts in the blood stream.

- *They discussed "myeloblastic leukemia" during the group presentation.*
- *The article explained what "myeloblastic leukemia" means with a simple example.*

---

myelocytic leukemia *(noun)*

A malignant neoplasm of blood-forming tissues; marked by proliferation of myelocytes and their presence in the blood.

- *They discussed "myelocytic leukemia" during the group presentation.*
- *Understanding "myelocytic leukemia" helps you talk about this topic clearly.*

---

myocardiopathy *(noun)*

A disorder (usually of unknown origin) of the heart muscle (myocardium).

- *They discussed "myocardiopathy" during the group presentation.*
- *Understanding "myocardiopathy" helps you talk about this topic clearly.*

---

myodynia *(noun)*

Pain in a muscle or group of muscles.

- *He looked up "myodynia" because he had never seen it before.*
- *Understanding "myodynia" helps you talk about this topic clearly.*

---

myoglobinuria *(noun)*

The presence of myoglobin in the urine.

- *They discussed "myoglobinuria" during the group presentation.*
- *She wrote a short paragraph that included "myoglobinuria."*

---

myology *(noun)*

The branch of physiology that studies muscles.

- *He looked up "myology" because he had never seen it before.*
- *Understanding "myology" helps you talk about this topic clearly.*

---

myometritis *(noun)*

Inflammation of the myometrium.

- *He looked up "myometritis" because he had never seen it before.*
- *In class, the teacher used "myometritis" to mean inflammation of the myometrium.*

---

myosarcoma *(noun)*

Sarcoma of muscle tissue.

- *The article explained what "myosarcoma" means with a simple example.*
- *Understanding "myosarcoma" helps you talk about this topic clearly.*

---

myosis *(noun)*

An acute infectious disease occurring in epidemic form and featuring paroxysms of pain (usually in the chest).

- *He looked up "myosis" because he had never seen it before.*
- *They discussed "myosis" during the group presentation.*

myositis trichinosa *(noun)*

Infestation by trichina larvae that are transmitted by eating inadequately cooked meat (especially pork); larvae migrate from the intestinal tract to the muscles where they become encysted.

- *She wrote a short paragraph that included "myositis trichinosa."*
- *He looked up "myositis trichinosa" because he had never seen it before.*

mysophilia *(noun)*

Abnormal attraction to filth.

- *She wrote a short paragraph that included "mysophilia."*
- *The article explained what "mysophilia" means with a simple example.*

mysophobia *(noun)*

A morbid fear of dirt or contamination.

- *The article explained what "mysophobia" means with a simple example.*
- *Understanding "mysophobia" helps you talk about this topic clearly.*

mythicise *(verb)*

Interpret as a myth or in terms of mythology.

- *In everyday English, people use "mythicise" when talking about this idea.*
- *He did not know how to use "mythicise" until he saw an example.*

mythicize *(verb)*

Interpret as a myth or in terms of mythology.

- *Mythicize the ancient stories.*
- *The Europeans have mythicized Rte. 66.*

myxoedema *(noun)*

Hypothyroidism marked by dry skin and swellings around lips and nose as well as mental deterioration.

- *The article explained what "myxoedema" means with a simple example.*
- *In class, the teacher used "myxoedema" to mean hypothyroidism marked by dry skin and swellings....*

nabothian cyst *(noun)*

A cyst that forms in the nabothian glands of the uterine cervix.

- *The article explained what "nabothian cyst" means with a simple example.*
- *In class, the teacher used "nabothian cyst" to mean a cyst that forms in the nabothian glands of the....*

nabothian follicle *(noun)*

A cyst that forms in the nabothian glands of the uterine cervix.

- *He looked up "nabothian follicle" because he had never seen it before.*
- *In class, the teacher used "nabothian follicle" to mean a cyst that forms in the nabothian glands of the....*

naegele's rule *(noun)*

Rule for calculating an expected delivery date; subtract three months from the first day of the last menstrual period and add seven days to that date.

- *The article explained what "naegele's rule" means with a simple example.*
- *She wrote a short paragraph that included "naegele's rule."*

namelessness *(noun)*

The state of being anonymous.

- *She wrote a short paragraph that included "namelessness."*
- *The article explained what "namelessness" means with a simple example.*

nanism *(noun)*

A genetic abnormality resulting in short stature.

- *He looked up "nanism" because he had never seen it before.*
- *They discussed "nanism" during the group presentation.*

nanocephaly *(noun)*

An abnormally small head and underdeveloped brain.

- *In class, the teacher used "nanocephaly" to mean an abnormally small head and underdeveloped brain.*
- *Understanding "nanocephaly" helps you talk about this topic clearly.*

---

nanophthalmos *(noun)*

Condition in which both eyes are abnormally small but otherwise normal.

- *In class, the teacher used "nanophthalmos" to mean condition in which both eyes are abnormally small....*
- *The article explained what "nanophthalmos" means with a simple example.*

---

narcissus jonquilla *(noun)*

Widely cultivated ornamental plant native to southern Europe but naturalized elsewhere having fragrant yellow or white clustered flowers.

- *Understanding "narcissus jonquilla" helps you talk about this topic clearly.*
- *He looked up "narcissus jonquilla" because he had never seen it before.*

---

natriuresis *(noun)*

The presence of abnormally large amounts of sodium in the urine.

- *The article explained what "natriuresis" means with a simple example.*
- *In class, the teacher used "natriuresis" to mean the presence of abnormally large amounts of sodium....*

---

naupathia *(noun)*

Motion sickness experienced while traveling on water.

- *She wrote a short paragraph that included "naupathia."*
- *He looked up "naupathia" because he had never seen it before.*

---

neckcloth *(noun)*

An ornamental white cravat.

- *She wrote a short paragraph that included "neckcloth."*
- *He looked up "neckcloth" because he had never seen it before.*

---

necrobiosis lipoidica *(noun)*

Skin disease marked by thin shiny patches (especially on the legs); often associated with diabetes mellitus.

- *He looked up "necrobiosis lipoidica" because he had never seen it before.*
- *She wrote a short paragraph that included "necrobiosis lipoidica."*

---

necrobiosis lipoidica diabeticorum *(noun)*

Skin disease marked by thin shiny patches (especially on the legs); often associated with diabetes mellitus.

- *In class, the teacher used "necrobiosis lipoidica diabeticorum" to mean skin disease marked by thin shiny patches....*
- *He looked up "necrobiosis lipoidica diabeticorum" because he had never seen it before.*

---

neotony *(noun)*

The state resulting when juvenile characteristics are retained by the adults of a species.

- *In class, the teacher used "neotony" to mean the state resulting when juvenile characteristics....*
- *Understanding "neotony" helps you talk about this topic clearly.*

---

nephology *(noun)*

The branch of meteorology that studies clouds and cloud formation.

- *The article explained what "nephology" means with a simple example.*
- *In class, the teacher used "nephology" to mean the branch of meteorology that studies clouds and....*

---

nephralgia *(noun)*

Pain in the kidney (usually felt in the loins).

- *She wrote a short paragraph that included "nephralgia."*
- *Understanding "nephralgia" helps you talk about this topic clearly.*

---

nephroangiosclerosis *(noun)*

Kidney disease that is usually associated with hypertension; sclerosis of the renal arterioles reduces blood flow that can lead to kidney failure and heart failure.

- *She wrote a short paragraph that included "nephroangiosclerosis."*

- *Understanding "nephroangiosclerosis" helps you talk about this topic clearly.*

---

nephroblastoma *(noun)*

Malignant renal tumor of young children characterized by hypertension and blood in the urine and the presence of a palpable mass.

- *The article explained what "nephroblastoma" means with a simple example.*
- *Understanding "nephroblastoma" helps you talk about this topic clearly.*

---

nephroptosia *(noun)*

Prolapse of the kidney.

- *In class, the teacher used "nephroptosia" to mean prolapse of the kidney.*
- *They discussed "nephroptosia" during the group presentation.*

---

nephroptosis *(noun)*

Prolapse of the kidney.

- *In class, the teacher used "nephroptosis" to mean prolapse of the kidney.*
- *The article explained what "nephroptosis" means with a simple example.*

---

nephrosclerosis *(noun)*

Kidney disease that is usually associated with hypertension; sclerosis of the renal arterioles reduces blood flow that can lead to kidney failure and heart failure.

- *The article explained what "nephrosclerosis" means with a simple example.*
- *They discussed "nephrosclerosis" during the group presentation.*

---

nephthytis afzelii *(noun)*

Tropical rhizomatous plant cultivated as an ornamental for its large sagittate leaves.

- *He looked up "nephthytis afzelii" because he had never seen it before.*
- *They discussed "nephthytis afzelii" during the group presentation.*

---

neuralgy *(noun)*

Acute spasmodic pain along the course of one or more nerves.

- *She wrote a short paragraph that included "neuralgy."*
- *Understanding "neuralgy" helps you talk about this topic clearly.*

---

neurilemoma *(noun)*

Tumor of the fibrous covering of a peripheral nerve.

- *In class, the teacher used "neurilemoma" to mean tumor of the fibrous covering of a peripheral nerve.*
- *He looked up "neurilemoma" because he had never seen it before.*

---

neurinoma *(noun)*

Tumor (usually benign) of the sheath surrounding a nerve.

- *Understanding "neurinoma" helps you talk about this topic clearly.*
- *He looked up "neurinoma" because he had never seen it before.*

---

neurodermatitis *(noun)*

Dermatitis in which localized areas (especially the forearms or back of the neck or outer part of the ankle) itch persistently; cause is unknown.

- *They discussed "neurodermatitis" during the group presentation.*
- *He looked up "neurodermatitis" because he had never seen it before.*

---

neuroepithelioma *(noun)*

Malignant tumor of the neuroepithelium.

- *In class, the teacher used "neuroepithelioma" to mean malignant tumor of the neuroepithelium.*
- *He looked up "neuroepithelioma" because he had never seen it before.*

---

neurofibroma *(noun)*

Tumor of the fibrous covering of a peripheral nerve.

- *They discussed "neurofibroma" during the group presentation.*
- *She wrote a short paragraph that included "neurofibroma."*

---

neurohormone *(noun)*

A hormone that is released by nerve impulses (e.g., norepinephrine or vasopressin).

- *They discussed "neurohormone" during the group presentation.*
- *In class, the teacher used "neurohormone" to mean a hormone that is released by nerve impulses (e.g.,....*

---

neurosarcoma *(noun)*

A malignant neoplasm of nerve tissue and fibrous tissue and connective tissue.

- *They discussed "neurosarcoma" during the group presentation.*
- *The article explained what "neurosarcoma" means with a simple example.*

---

nevoid elephantiasis *(noun)*

Thickening of the skin (usually unilateral on an extremity) caused by congenital enlargement of lymph vessel and lymph vessel obstruction.

- *They discussed "nevoid elephantiasis" during the group presentation.*
- *In class, the teacher used "nevoid elephantiasis" to mean thickening of the skin (usually unilateral on an....*

---

nierembergia frutescens *(noun)*

Shrubby Chilean herb having bluish-white tubular flowers used as an ornamental.

- *He looked up "nierembergia frutescens" because he had never seen it before.*
- *She wrote a short paragraph that included "nierembergia frutescens."*

---

nihility *(noun)*

The state of nonexistence.

- *He looked up "nihility" because he had never seen it before.*
- *Understanding "nihility" helps you talk about this topic clearly.*

---

nikolaas tinbergen *(noun)*

Dutch zoologist who showed that much animal behavior is innate and stereotyped (1907-1988).

- *He looked up "nikolaas tinbergen" because he had never seen it before.*
- *She wrote a short paragraph that included "nikolaas tinbergen."*

---

nonbiodegradable pollution *(noun)*

Pollution that accumulates in the environment and may appear in the food chain.

- *In class, the teacher used "nonbiodegradable pollution" to mean pollution that accumulates in the environment and....*
- *The article explained what "nonbiodegradable pollution" means with a simple example.*

---

nonconformance *(noun)*

A lack of orthodoxy in thoughts or beliefs.

- *In class, the teacher used "nonconformance" to mean a lack of orthodoxy in thoughts or beliefs.*
- *The article explained what "nonconformance" means with a simple example.*

---

nonconformism *(noun)*

A lack of orthodoxy in thoughts or beliefs.

- *In class, the teacher used "nonconformism" to mean a lack of orthodoxy in thoughts or beliefs.*
- *The article explained what "nonconformism" means with a simple example.*

---

nonfluent aphasia *(noun)*

Aphasia in which expression by speech or writing is severely impaired.

- *He looked up "nonfluent aphasia" because he had never seen it before.*
- *Understanding "nonfluent aphasia" helps you talk about this topic clearly.*

---

nongonococcal urethritis *(noun)*

Sexually transmitted urethritis (usually caused by chlamydia).

- *He looked up "nongonococcal urethritis" because he had never seen it before.*
- *She wrote a short paragraph that included "nongonococcal urethritis."*

---

nonoccurrence *(noun)*

Absence by virtue of not occurring.

- *He looked up “nonoccurrence” because he had never seen it before.*
- *They discussed “nonoccurrence” during the group presentation.*

---

nonpartisanship *(noun)*

An inclination to weigh both views or opinions equally.

- *She wrote a short paragraph that included “nonpartisanship.”*
- *He looked up “nonpartisanship” because he had never seen it before.*

---

nonplus *(verb)*

Be a mystery or bewildering to.

- *In everyday English, people use “nonplus” when talking about this idea.*
- *She tried to use “nonplus” carefully so everyone would understand.*

---

nonpsychoactive *(adjective)*

Not affecting the mind or mental processes.

- *A nonpsychoactive pain reliever.*
- *The speaker chose “nonpsychoactive” because it captured the feeling precisely.*

---

nonrapid eye movement *(noun)*

A recurring sleep state during which rapid eye movements do not occur and dreaming does not occur; accounts for about 75% of normal sleep time.

- *The article explained what “nonrapid eye movement” means with a simple example.*
- *In class, the teacher used “nonrapid eye movement” to mean a recurring sleep state during which rapid eye....*

---

nonrapid eye movement sleep *(noun)*

A recurring sleep state during which rapid eye movements do not occur and dreaming does not occur; accounts for about 75% of normal sleep time.

- *Understanding “nonrapid eye movement sleep” helps you talk about this topic clearly.*
- *In class, the teacher used “nonrapid eye movement sleep” to mean a recurring sleep state during which rapid eye....*

---

nonsegmental *(adjective)*

Having a body that is not divided into segments.

- *Her writing became clearer after she learned “nonsegmental.”*
- *Would you call this situation “nonsegmental”? Explain why.*

---

nonsocial infection *(noun)*

An infection that is acquired at a hospital or other healthcare facility.

- *She wrote a short paragraph that included “nonsocial infection.”*
- *The article explained what “nonsocial infection” means with a simple example.*

---

nonsubjective *(adjective)*

Undistorted by emotion or personal bias; based on observable phenomena.

- *The speaker chose “nonsubjective” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “nonsubjective.”*

---

nonthrombocytopenic purpura *(noun)*

Purpura resulting from a defect in the capillaries caused by bacteria or drugs.

- *The article explained what “nonthrombocytopenic purpura” means with a simple example.*
- *Understanding “nonthrombocytopenic purpura” helps you talk about this topic clearly.*

---

normothermia *(noun)*

Normal body temperature.

- *They discussed “normothermia” during the group presentation.*
- *He looked up “normothermia” because he had never seen it before.*

---

noxiously *(adverb)*

In a detrimental manner.

- *Place “noxiously” carefully so the meaning stays clear.*
- *Try rewriting the sentence and include “noxiously” naturally.*

nucleonics *(noun)*

The branch of physics that studies the internal structure of atomic nuclei.

- *She wrote a short paragraph that included "nucleonics."*
- *He looked up "nucleonics" because he had never seen it before.*

nudeness *(noun)*

The state of being without clothing or covering of any kind.

- *They discussed "nudeness" during the group presentation.*
- *She wrote a short paragraph that included "nudeness."*

nyctalopia *(noun)*

Inability to see clearly in dim light; due to a deficiency of vitamin A or to a retinal disorder.

- *Understanding "nyctalopia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nyctalopia."*

nyctophobia *(noun)*

A morbid fear of night or darkness.

- *Understanding "nyctophobia" helps you talk about this topic clearly.*
- *He looked up "nyctophobia" because he had never seen it before.*

nympholepsy *(noun)*

A frenzy of emotion; as for something unattainable.

- *In class, the teacher used "nympholepsy" to mean a frenzy of emotion; as for something unattainable.*
- *The article explained what "nympholepsy" means with a simple example.*

oarsmanship *(noun)*

Skill as an oarsman.

- *She wrote a short paragraph that included "oarsmanship."*
- *They discussed "oarsmanship" during the group presentation.*

obiism *(noun)*

Belief in a kind of sorcery that originated in Africa and is practiced in the West Indies.

- *She wrote a short paragraph that included "obiism."*
- *He looked up "obiism" because he had never seen it before.*

obscureness *(noun)*

The state of being humble and unimportant.

- *Understanding "obscureness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "obscureness."*

obstipation *(noun)*

Severe constipation resulting from an obstruction in the intestines.

- *Understanding "obstipation" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "obstipation."*

ochronosis *(noun)*

An accumulation of dark pigment in cartilage and other connective tissue; usually a symptom of alkaptonuria or phenol poisoning.

- *The article explained what "ochronosis" means with a simple example.*
- *They discussed "ochronosis" during the group presentation.*

oculopharyngeal muscular dystrophy *(noun)*

A form of muscular dystrophy that usually begins between early adulthood and middle age and first affects muscles of the eyelid and throat; progresses slowly with swallowing problems common as the disease progresses; inheritance is autosomal dominant.

- *The article explained what "oculopharyngeal muscular dystrophy" means with a simple example.*
- *She wrote a short paragraph that included "oculopharyngeal muscular dystrophy."*

odontalgia *(noun)*

An ache localized in or around a tooth.

- *Understanding "odontalgia" helps you talk about this topic clearly.*
- *The article explained what "odontalgia" means with a simple example.*

---

odynophagia *(noun)*

Severe pain on swallowing due to a disorder of the esophagus.

- *She wrote a short paragraph that included "odynophagia."*
- *Understanding "odynophagia" helps you talk about this topic clearly.*

---

oesophagitis *(noun)*

Inflammation of the esophagus; often caused by gastroesophageal reflux.

- *They discussed "oesophagitis" during the group presentation.*
- *The article explained what "oesophagitis" means with a simple example.*

---

oligodactyly *(noun)*

Congenital condition in which some fingers or toes are missing.

- *He looked up "oligodactyly" because he had never seen it before.*
- *She wrote a short paragraph that included "oligodactyly."*

---

oligodontia *(noun)*

Congenital condition in which some of the teeth are missing.

- *She wrote a short paragraph that included "oligodontia."*
- *The article explained what "oligodontia" means with a simple example.*

---

omphaloskepsis *(noun)*

Literally, the contemplation of one's navel, which is an idiom usually meaning complacent self-absorption.

- *He looked up "omphaloskepsis" because he had never seen it before.*
- *In class, the teacher used "omphaloskepsis" to mean literally, the contemplation of one's navel, which....*

---

oneirism *(noun)*

Absentminded dreaming while awake.

- *In class, the teacher used "oneirism" to mean absentminded dreaming while awake.*
- *Understanding "oneirism" helps you talk about this topic clearly.*

---

oneiromancy *(noun)*

Divination through the interpretation of dreams.

- *In class, the teacher used "oneiromancy" to mean divination through the interpretation of dreams.*
- *They discussed "oneiromancy" during the group presentation.*

---

onomancy *(noun)*

Divination by the letters of a name.

- *He looked up "onomancy" because he had never seen it before.*
- *She wrote a short paragraph that included "onomancy."*

---

onycholysis *(noun)*

Separation of a nail from its normal attachment to the nail bed.

- *Understanding "onycholysis" helps you talk about this topic clearly.*
- *In class, the teacher used "onycholysis" to mean separation of a nail from its normal attachment to....*

---

onychosis *(noun)*

Any disease or disorder of the nails.

- *She wrote a short paragraph that included "onychosis."*
- *Understanding "onychosis" helps you talk about this topic clearly.*

---

oology *(noun)*

The branch of zoology that studies eggs (especially birds' eggs and their size, shape, coloration, and number).

- *They discussed "oology" during the group presentation.*
- *The article explained what "oology" means with a simple example.*

---

oophoritis *(noun)*

Inflammation of one or both ovaries.

- *In class, the teacher used "oophoritis" to mean inflammation of one or both ovaries.*
- *The article explained what "oophoritis" means with a simple example.*

---

operationalism *(noun)*

(philosophy) the doctrine that the meaning of a proposition consists of the operations involved in proving or applying it.

- *They discussed "operationalism" during the group presentation.*
- *He looked up "operationalism" because he had never seen it before.*

---

ophidism *(noun)*

Poisoning by snake venom.

- *The article explained what "ophidism" means with a simple example.*
- *In class, the teacher used "ophidism" to mean poisoning by snake venom.*

---

ophthalmia neonatorum *(noun)*

Ophthalmia in newborns; contracted while passing through the birth canal; usually prevented with silver nitrate drops.

- *She wrote a short paragraph that included "ophthalmia neonatorum."*
- *Understanding "ophthalmia neonatorum" helps you talk about this topic clearly.*

---

ophthalmitis *(noun)*

Severe conjunctivitis.

- *In class, the teacher used "ophthalmitis" to mean severe conjunctivitis.*
- *He looked up "ophthalmitis" because he had never seen it before.*

---

opisthorchiasis *(noun)*

Infestation with flukes obtained from eating raw fish; common in eastern Asia.

- *Understanding "opisthorchiasis" helps you talk about this topic clearly.*
- *The article explained what "opisthorchiasis" means with a simple example.*

---

opisthotonos *(noun)*

Severe spasm in which the back arches and the head bends back and heels flex toward the back.

- *They discussed "opisthotonos" during the group presentation.*
- *Understanding "opisthotonos" helps you talk about this topic clearly.*

---

orchidalgia *(noun)*

Pain in the testes.

- *The article explained what "orchidalgia" means with a simple example.*
- *Understanding "orchidalgia" helps you talk about this topic clearly.*

---

orleanism *(noun)*

The political philosophy of the Orleanists.

- *He looked up "orleanism" because he had never seen it before.*
- *She wrote a short paragraph that included "orleanism."*

---

ornamentalist *(noun)*

Someone who decorates.

- *They discussed "ornamentalist" during the group presentation.*
- *She wrote a short paragraph that included "ornamentalist."*

---

ornithosis *(noun)*

An atypical pneumonia caused by a rickettsia microorganism and transmitted to humans from infected birds.

- *Understanding "ornithosis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ornithosis."*

orology *(noun)*

The science of mountains.

- *They discussed "orology" during the group presentation.*
- *She wrote a short paragraph that included "orology."*

orphanhood *(noun)*

The condition of being a child without living parents.

- *In class, the teacher used "orphanhood" to mean the condition of being a child without living parents.*
- *The article explained what "orphanhood" means with a simple example.*

orthochorea *(noun)*

A form of chorea in which spasms occur mainly when the patient is erect.

- *In class, the teacher used "orthochorea" to mean a form of chorea in which spasms occur mainly when....*
- *He looked up "orthochorea" because he had never seen it before.*

orthodonture *(noun)*

The branch of dentistry dealing with the prevention or correction of irregularities of the teeth.

- *They discussed "orthodonture" during the group presentation.*
- *The article explained what "orthodonture" means with a simple example.*

orthopnea *(noun)*

Form of dyspnea in which the person can breathe comfortably only when standing or sitting erect; associated with asthma and emphysema and angina pectoris.

- *He looked up "orthopnea" because he had never seen it before.*
- *They discussed "orthopnea" during the group presentation.*

oscheocele *(noun)*

Swelling of the scrotum.

- *In class, the teacher used "oscheocele" to mean swelling of the scrotum.*
- *Understanding "oscheocele" helps you talk about this topic clearly.*

oscheocoele *(noun)*

Swelling of the scrotum.

- *The article explained what "oscheocoele" means with a simple example.*
- *In class, the teacher used "oscheocoele" to mean swelling of the scrotum.*

osteitis deformans *(noun)*

A disease of bone occurring in the middle aged and elderly; excessive bone destruction sometimes leading to bone pain and fractures and skeletal deformities.

- *The article explained what "osteitis deformans" means with a simple example.*
- *They discussed "osteitis deformans" during the group presentation.*

osteoblastoma *(noun)*

Benign tumor of bone and fibrous tissue; occurs in the vertebrae or femur or tibia or arm bones (especially in young adults).

- *She wrote a short paragraph that included "osteoblastoma."*
- *He looked up "osteoblastoma" because he had never seen it before.*

osteochondroma *(noun)*

Benign tumor containing both bone and cartilage; usually occurs near the end of a long bone.

- *The article explained what "osteochondroma" means with a simple example.*
- *In class, the teacher used "osteochondroma" to mean benign tumor containing both bone and cartilage;....*

osteosclerosis *(noun)*

Abnormal hardening or eburnation of bone.

- *She wrote a short paragraph that included "osteosclerosis."*
- *The article explained what "osteosclerosis" means with a simple example.*

osteosclerosis congenita *(noun)*

An inherited skeletal disorder beginning before birth; cartilage is converted to bone resulting in dwarfism.

- *She wrote a short paragraph that included “osteosclerosis congenita.”*
- *Understanding “osteosclerosis congenita” helps you talk about this topic clearly.*

---

otalgia *(noun)*

An ache localized in the middle or inner ear.

- *They discussed “otalgia” during the group presentation.*
- *Understanding “otalgia” helps you talk about this topic clearly.*

---

otorrhea *(noun)*

Discharge from the external ear.

- *He looked up “otorrhea” because he had never seen it before.*
- *She wrote a short paragraph that included “otorrhea.”*

---

ovaritis *(noun)*

Inflammation of the ovaries.

- *They discussed “ovaritis” during the group presentation.*
- *He looked up “ovaritis” because he had never seen it before.*

---

overanxiety *(noun)*

Excessive anxiety.

- *Understanding “overanxiety” helps you talk about this topic clearly.*
- *He looked up “overanxiety” because he had never seen it before.*

---

overcapitalise *(verb)*

Overestimate the market value of.

- *He did not know how to use “overcapitalise” until he saw an example.*
- *Can you use “overcapitalise” in a sentence that fits this situation?*

---

overcapitalize *(verb)*

Overestimate the market value of.

- *Overcapitalize a property.*
- *Learners should practice how to use “overcapitalize” in real sentences.*

---

overjoy *(verb)*

Cause to feel extremely joyful or happy.

- *The economic growth overjoyed the German industry.*
- *She tried to use “overjoy” carefully so everyone would understand.*

---

overleap *(verb)*

Leave undone or leave out.

- *The coach explained when to use “overleap” and when to wait.*
- *Learners should practice how to use “overleap” in real sentences.*

---

overreckoning *(noun)*

A calculation that results in an estimate that is too high.

- *In class, the teacher used “overreckoning” to mean a calculation that results in an estimate that is....*
- *The article explained what “overreckoning” means with a simple example.*

---

oversensitiveness *(noun)*

Sensitivity leading to easy irritation or upset.

- *They discussed “oversensitiveness” during the group presentation.*
- *He looked up “oversensitiveness” because he had never seen it before.*

---

oxycephaly *(noun)*

A congenital abnormality of the skull; the top of the skull assumes a cone shape.

- *Understanding “oxycephaly” helps you talk about this topic clearly.*

- *He looked up "oxycephaly" because he had never seen it before.*

---

oxyopia *(noun)*

Unusually acute vision.

- *The article explained what "oxyopia" means with a simple example.*
- *She wrote a short paragraph that included "oxyopia."*

---

ozaena *(noun)*

A chronic disease of the nose characterized by a foul-smelling nasal discharge and atrophy of nasal structures.

- *Understanding "ozaena" helps you talk about this topic clearly.*
- *The article explained what "ozaena" means with a simple example.*

---

ozena *(noun)*

A chronic disease of the nose characterized by a foul-smelling nasal discharge and atrophy of nasal structures.

- *She wrote a short paragraph that included "ozena."*
- *Understanding "ozena" helps you talk about this topic clearly.*

---

pachycheilia *(noun)*

An abnormal thickness of the lips.

- *He looked up "pachycheilia" because he had never seen it before.*
- *In class, the teacher used "pachycheilia" to mean an abnormal thickness of the lips.*

---

pachyderma *(noun)*

Thickening of the skin (usually unilateral on an extremity) caused by congenital enlargement of lymph vessel and lymph vessel obstruction.

- *He looked up "pachyderma" because he had never seen it before.*
- *Understanding "pachyderma" helps you talk about this topic clearly.*

---

pacificism *(noun)*

The doctrine that all violence is unjustifiable.

- *He looked up "pacificism" because he had never seen it before.*
- *She wrote a short paragraph that included "pacificism."*

---

pahlevi *(noun)*

Shah of Iran who was deposed in 1979 by Islamic fundamentalists (1919-1980).

- *She wrote a short paragraph that included "pahlevi."*
- *He looked up "pahlevi" because he had never seen it before.*

---

palaeoanthropology *(noun)*

The scientific study of human fossils.

- *In class, the teacher used "palaeoanthropology" to mean the scientific study of human fossils.*
- *The article explained what "palaeoanthropology" means with a simple example.*

---

palaeobiology *(noun)*

A branch of paleontology that deals with the origin and growth and structure of fossil animals and plants as living organisms.

- *The article explained what "palaeobiology" means with a simple example.*
- *Understanding "palaeobiology" helps you talk about this topic clearly.*

---

palaeodendrology *(noun)*

The branch of paleobotany that studies fossil trees.

- *She wrote a short paragraph that included "palaeodendrology."*
- *He looked up "palaeodendrology" because he had never seen it before.*

---

palaeoethnography *(noun)*

The ethnography of paleolithic humans.

- *She wrote a short paragraph that included "palaeoethnography."*
- *They discussed "palaeoethnography" during the group presentation.*

---

palaeogeology *(noun)*

The study of geologic features once at the surface of the earth but now buried beneath rocks.

- *He looked up "palaeogeology" because he had never seen it before.*
- *Understanding "palaeogeology" helps you talk about this topic clearly.*

---

palaeology *(noun)*

The study of (especially prehistoric) antiquities.

- *She wrote a short paragraph that included "palaeology."*
- *They discussed "palaeology" during the group presentation.*

---

palaeopathology *(noun)*

The study of disease of former times (as inferred from fossil evidence).

- *She wrote a short paragraph that included "palaeopathology."*
- *They discussed "palaeopathology" during the group presentation.*

---

palaeornithology *(noun)*

The paleobiology of birds.

- *She wrote a short paragraph that included "palaeornithology."*
- *They discussed "palaeornithology" during the group presentation.*

---

palaeozoology *(noun)*

The study of fossil animals.

- *The article explained what "palaeozoology" means with a simple example.*
- *Understanding "palaeozoology" helps you talk about this topic clearly.*

---

palaetiology *(noun)*

The explanation of past events in terms of scientific causes (as geological causes).

- *In class, the teacher used "palaetiology" to mean the explanation of past events in terms of....*
- *Understanding "palaetiology" helps you talk about this topic clearly.*

---

paleodendrology *(noun)*

The branch of paleobotany that studies fossil trees.

- *In class, the teacher used "paleodendrology" to mean the branch of paleobotany that studies fossil trees.*
- *They discussed "paleodendrology" during the group presentation.*

---

paleoethnography *(noun)*

The ethnography of paleolithic humans.

- *In class, the teacher used "paleoethnography" to mean the ethnography of paleolithic humans.*
- *He looked up "paleoethnography" because he had never seen it before.*

---

paleogeology *(noun)*

The study of geologic features once at the surface of the earth but now buried beneath rocks.

- *The article explained what "paleogeology" means with a simple example.*
- *She wrote a short paragraph that included "paleogeology."*

---

paleology *(noun)*

The study of (especially prehistoric) antiquities.

- *In class, the teacher used "paleology" to mean the study of (especially prehistoric) antiquities.*
- *He looked up "paleology" because he had never seen it before.*

---

paleomammalogy *(noun)*

The paleobiology of ancient mammals.

- *They discussed "paleomammalogy" during the group presentation.*
- *In class, the teacher used "paleomammalogy" to mean the paleobiology of ancient mammals.*

---

paleornithology *(noun)*

The paleobiology of birds.

- *In class, the teacher used "paleornithology" to mean the paleobiology of birds.*
- *He looked up "paleornithology" because he had never seen it before.*

---

paleozoology *(noun)*

The study of fossil animals.

- *Understanding "paleozoology" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "paleozoology."*

---

paletiology *(noun)*

The explanation of past events in terms of scientific causes (as geological causes).

- *They discussed "paletiology" during the group presentation.*
- *In class, the teacher used "paletiology" to mean the explanation of past events in terms of....*

---

palilalia *(noun)*

A pathological condition in which a word is rapidly and involuntarily repeated.

- *She wrote a short paragraph that included "palilalia."*
- *The article explained what "palilalia" means with a simple example.*

---

palmature *(noun)*

An abnormality in which the fingers are webbed.

- *They discussed "palmature" during the group presentation.*
- *He looked up "palmature" because he had never seen it before.*

---

pancarditis *(noun)*

Inflammation of the entire heart (the epicardium and the myocardium and the endocardium).

- *In class, the teacher used "pancarditis" to mean inflammation of the entire heart (the epicardium....*
- *Understanding "pancarditis" helps you talk about this topic clearly.*

---

panencephalitis *(noun)*

Diffuse inflammation of the entire brain.

- *Understanding "panencephalitis" helps you talk about this topic clearly.*
- *They discussed "panencephalitis" during the group presentation.*

---

pansinusitis *(noun)*

Inflammation of all of the paranasal sinuses.

- *Understanding "pansinusitis" helps you talk about this topic clearly.*
- *They discussed "pansinusitis" during the group presentation.*

---

papism *(noun)*

The beliefs and practices of the Catholic Church based in Rome.

- *Understanding "papism" helps you talk about this topic clearly.*
- *In class, the teacher used "papism" to mean the beliefs and practices of the catholic church....*

---

pappataci fever *(noun)*

A mild viral disease transmitted by the bite of the sand fly Phlebotomus papatasii.

- *The article explained what "pappataci fever" means with a simple example.*
- *They discussed "pappataci fever" during the group presentation.*

---

papulovesicle *(noun)*

A papule that changes into a blister.

- *In class, the teacher used "papulovesicle" to mean a papule that changes into a blister.*
- *The article explained what "papulovesicle" means with a simple example.*

---

paracentral scotoma *(noun)*

A scotoma that is adjacent to the fixation point.

- *They discussed "paracentral scotoma" during the group presentation.*
- *The article explained what "paracentral scotoma" means with a simple example.*

paracervical block *(noun)*

Regional anesthesia resulting from the injection of a local anesthetic on each side of the cervix; used during labor and childbirth.

- *He looked up "paracervical block" because he had never seen it before.*
- *They discussed "paracervical block" during the group presentation.*

paracosm *(noun)*

A prolonged fantasy world invented by children; can have a definite geography and language and history.

- *Understanding "paracosm" helps you talk about this topic clearly.*
- *He looked up "paracosm" because he had never seen it before.*

paralogism *(noun)*

An unintentionally invalid argument.

- *The article explained what "paralogism" means with a simple example.*
- *In class, the teacher used "paralogism" to mean an unintentionally invalid argument.*

paralysis agitans *(noun)*

A degenerative disorder of the central nervous system characterized by tremor and impaired muscular coordination.

- *She wrote a short paragraph that included "paralysis agitans."*
- *They discussed "paralysis agitans" during the group presentation.*

paralytic abasia *(noun)*

Abasia related to paralysis of the leg muscles.

- *Understanding "paralytic abasia" helps you talk about this topic clearly.*
- *In class, the teacher used "paralytic abasia" to mean abasia related to paralysis of the leg muscles.*

parametritis *(noun)*

Inflammation of connective tissue adjacent to the uterus.

- *They discussed "parametritis" during the group presentation.*
- *He looked up "parametritis" because he had never seen it before.*

paramnesia *(noun)*

(psychiatry) a disorder of memory in which dreams or fantasies are confused with reality.

- *She wrote a short paragraph that included "paramnesia."*
- *The article explained what "paramnesia" means with a simple example.*

parasitaemia *(noun)*

A condition in which parasites are present in the blood.

- *They discussed "parasitaemia" during the group presentation.*
- *The article explained what "parasitaemia" means with a simple example.*

pargetry *(noun)*

Ornamental plasterwork.

- *Understanding "pargetry" helps you talk about this topic clearly.*
- *The article explained what "pargetry" means with a simple example.*

parkia javanica *(noun)*

Tall evergreen rain forest tree with wide-spreading crown having yellow-white flowers; grown as an ornamental in parks and large gardens.

- *They discussed "parkia javanica" during the group presentation.*
- *In class, the teacher used "parkia javanica" to mean tall evergreen rain forest tree with wide-spreading....*

parosamia *(noun)*

A disorder in the sense of smell.

- *The article explained what "parosamia" means with a simple example.*
- *She wrote a short paragraph that included "parosamia."*

paroxysmal trepidant abasia *(noun)*

Abasia related to spasticity of the legs.

- *In class, the teacher used "paroxysmal trepidant abasia" to mean abasia related to spasticity of the legs.*
- *They discussed "paroxysmal trepidant abasia" during the group presentation.*

---

parseeism *(noun)*

The faith of a Zoroastrian sect in India.

- *The article explained what "parseeism" means with a simple example.*
- *In class, the teacher used "parseeism" to mean the faith of a zoroastrian sect in india.*

---

parsiism *(noun)*

The faith of a Zoroastrian sect in India.

- *Understanding "parsiism" helps you talk about this topic clearly.*
- *They discussed "parsiism" during the group presentation.*

---

partialness *(noun)*

The state of being only a part; not total; incomplete.

- *Understanding "partialness" helps you talk about this topic clearly.*
- *In class, the teacher used "partialness" to mean the state of being only a part; not total; incomplete.*

---

parturiency *(noun)*

Concluding state of pregnancy; from the onset of contractions to the birth of a child.

- *In class, the teacher used "parturiency" to mean concluding state of pregnancy; from the onset of....*
- *The article explained what "parturiency" means with a simple example.*

---

passionateness *(noun)*

A strong feeling or emotion.

- *Understanding "passionateness" helps you talk about this topic clearly.*
- *In class, the teacher used "passionateness" to mean a strong feeling or emotion.*

---

passivism *(noun)*

The doctrine that all violence is unjustifiable.

- *She wrote a short paragraph that included "passivism."*
- *Understanding "passivism" helps you talk about this topic clearly.*

---

pasteurellosis *(noun)*

An acute infectious disease characterized by pneumonia and blood infection.

- *They discussed "pasteurellosis" during the group presentation.*
- *The article explained what "pasteurellosis" means with a simple example.*

---

pavor nocturnus *(noun)*

A disorder of sleep characterized by a dream of terrifying dimensions far worse than a typical nightmare; they occur during NREM sleep.

- *The article explained what "pavor nocturnus" means with a simple example.*
- *Understanding "pavor nocturnus" helps you talk about this topic clearly.*

---

peaceableness *(noun)*

A state that is calm and tranquil.

- *They discussed "peaceableness" during the group presentation.*
- *The article explained what "peaceableness" means with a simple example.*

---

peliosis *(noun)*

Any of several blood diseases causing subcutaneous bleeding.

- *Understanding "peliosis" helps you talk about this topic clearly.*
- *They discussed "peliosis" during the group presentation.*

---

pennilessness *(noun)*

A state of lacking money.

- *Understanding "pennilessness" helps you talk about this topic clearly.*

- *The article explained what "pennilessness" means with a simple example.*

---

pennisetum ruppelii *(noun)*

Tall perennial ornamental grass with long nodding flower plumes of tropical Africa and Asia.

- *He looked up "pennisetum ruppelii" because he had never seen it before.*
- *In class, the teacher used "pennisetum ruppelii" to mean tall perennial ornamental grass with long nodding....*

---

pennisetum setaceum *(noun)*

Tall perennial ornamental grass with long nodding flower plumes of tropical Africa and Asia.

- *The article explained what "pennisetum setaceum" means with a simple example.*
- *Understanding "pennisetum setaceum" helps you talk about this topic clearly.*

---

pensiveness *(noun)*

Persistent morbid meditation on a problem.

- *The article explained what "pensiveness" means with a simple example.*
- *Understanding "pensiveness" helps you talk about this topic clearly.*

---

perceptivity *(noun)*

A feeling of understanding.

- *In class, the teacher used "perceptivity" to mean a feeling of understanding.*
- *Understanding "perceptivity" helps you talk about this topic clearly.*

---

periarteritis *(noun)*

Inflammation of the outer coat of an artery.

- *They discussed "periarteritis" during the group presentation.*
- *The article explained what "periarteritis" means with a simple example.*

---

periarteritis nodosa *(noun)*

A progressive disease of connective tissue that is characterized by nodules along arteries; nodules may block the artery and result in inadequate circulation to the particular area.

- *The article explained what "periarteritis nodosa" means with a simple example.*
- *In class, the teacher used "periarteritis nodosa" to mean a progressive disease of connective tissue that is....*

---

pericementoclasia *(noun)*

Pus pocket formation around a tooth.

- *In class, the teacher used "pericementoclasia" to mean pus pocket formation around a tooth.*
- *Understanding "pericementoclasia" helps you talk about this topic clearly.*

---

perilousness *(noun)*

The state of being dangerous.

- *He looked up "perilousness" because he had never seen it before.*
- *Understanding "perilousness" helps you talk about this topic clearly.*

---

periodontia *(noun)*

The branch of dentistry dealing with diseases of the gums and other structures around the teeth.

- *In class, the teacher used "periodontia" to mean the branch of dentistry dealing with diseases of....*
- *He looked up "periodontia" because he had never seen it before.*

---

perleche *(noun)*

A disorder of the lips marked by scaling and fissures at the corners of the mouth; caused by a deficiency of riboflavin.

- *In class, the teacher used "perleche" to mean a disorder of the lips marked by scaling and....*
- *Understanding "perleche" helps you talk about this topic clearly.*

---

pernio *(noun)*

Inflammation of the hands and feet caused by exposure to cold and moisture.

- *They discussed "pernio" during the group presentation.*
- *In class, the teacher used "pernio" to mean inflammation of the hands and feet caused by....*

---

perspicaciousness *(noun)*

Intelligence manifested by being astute (as in business dealings).

- *She wrote a short paragraph that included "perspicaciousness."*
- *He looked up "perspicaciousness" because he had never seen it before.*

---

pestis ambulans *(noun)*

A mild form of bubonic plague.

- *They discussed "pestis ambulans" during the group presentation.*
- *Understanding "pestis ambulans" helps you talk about this topic clearly.*

---

pestis bubonica *(noun)*

The most common form of the plague in humans; characterized by chills, prostration, delirium and the formation of buboes in the armpits and groin; does not spread from person to person.

- *She wrote a short paragraph that included "pestis bubonica."*
- *Understanding "pestis bubonica" helps you talk about this topic clearly.*

---

petitio principii *(noun)*

The logical fallacy of assuming the conclusion in the premises; begging the question.

- *She wrote a short paragraph that included "petitio principii."*
- *He looked up "petitio principii" because he had never seen it before.*

---

phaeochromocytoma *(noun)*

A vascular tumor of the adrenal gland; hypersecretion of epinephrine results in intermittent or sustained hypertension.

- *Understanding "phaeochromocytoma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "phaeochromocytoma."*

---

phalacrosis *(noun)*

The condition of having no hair on the top of the head.

- *She wrote a short paragraph that included "phalacrosis."*
- *The article explained what "phalacrosis" means with a simple example.*

---

phalangitis *(noun)*

Inflammation of a finger or toe.

- *Understanding "phalangitis" helps you talk about this topic clearly.*
- *They discussed "phalangitis" during the group presentation.*

---

philhellenism *(noun)*

Admiration for Greece and the Greeks and Greek customs.

- *He looked up "philhellenism" because he had never seen it before.*
- *She wrote a short paragraph that included "philhellenism."*

---

philogyny *(noun)*

Admiration for women.

- *They discussed "philogyny" during the group presentation.*
- *The article explained what "philogyny" means with a simple example.*

---

phlebothrombosis *(noun)*

Thrombosis of a vein without prior inflammation of the vein; associated with sluggish blood flow (as in prolonged bedrest or pregnancy or surgery) or with rapid coagulation of the blood.

- *He looked up "phlebothrombosis" because he had never seen it before.*
- *In class, the teacher used "phlebothrombosis" to mean thrombosis of a vein without prior inflammation of....*

---

phlebotomus *(noun)*

A mild viral disease transmitted by the bite of the sand fly Phlebotomus papatasii.

- *Understanding "phlebotomus" helps you talk about this topic clearly.*
- *They discussed "phlebotomus" during the group presentation.*

---

phlegmasia alba dolens *(noun)*

Painful thrombosis of the femoral vein in the leg following childbirth.

- *In class, the teacher used "phlegmasia alba dolens" to mean painful thrombosis of the femoral vein in the leg....*
- *Understanding "phlegmasia alba dolens" helps you talk about this topic clearly.*

---

phobophobia *(noun)*

A morbid fear of developing a phobia.

- *They discussed "phobophobia" during the group presentation.*
- *In class, the teacher used "phobophobia" to mean a morbid fear of developing a phobia.*

---

phocomelia *(noun)*

An abnormality of development in which the upper part of an arm or leg is missing so the hands or feet are attached to the body like stumps; rare condition that results from taking thalidomide during pregnancy.

- *She wrote a short paragraph that included "phocomelia."*
- *The article explained what "phocomelia" means with a simple example.*

---

phonemics *(noun)*

The study of the sound system of a given language and the analysis and classification of its phonemes.

- *In class, the teacher used "phonemics" to mean the study of the sound system of a given language....*
- *The article explained what "phonemics" means with a simple example.*

---

phonophobia *(noun)*

A morbid fear of sounds including your own voice.

- *They discussed "phonophobia" during the group presentation.*
- *The article explained what "phonophobia" means with a simple example.*

---

photalgia *(noun)*

Pain in the eye resulting from exposure to bright light (often associated with albinism).

- *They discussed "photalgia" during the group presentation.*
- *In class, the teacher used "photalgia" to mean pain in the eye resulting from exposure to bright....*

---

photinia arbutifolia *(noun)*

Ornamental evergreen treelike shrub of the Pacific coast of the United States having large white flowers and red berrylike fruits; often placed in genus Photinia.

- *He looked up "photinia arbutifolia" because he had never seen it before.*
- *In class, the teacher used "photinia arbutifolia" to mean ornamental evergreen treelike shrub of the pacific....*

---

photoretinitis *(noun)*

Damage to the retina resulting from exposure of the eye to the sun without adequate protection.

- *They discussed "photoretinitis" during the group presentation.*
- *He looked up "photoretinitis" because he had never seen it before.*

---

phrenitis *(noun)*

Inflammation of the brain usually caused by a virus; symptoms include headache and neck pain and drowsiness and nausea and fever ('phrenitis' is no longer in scientific use).

- *He looked up "phrenitis" because he had never seen it before.*
- *In class, the teacher used "phrenitis" to mean inflammation of the brain usually caused by a....*

---

phycomycosis *(noun)*

Any fungal infection caused by fungi of the Phycomycetes group.

- *Understanding "phycomycosis" helps you talk about this topic clearly.*
- *They discussed "phycomycosis" during the group presentation.*

---

physalis alkekengi *(noun)*

Old World perennial cultivated for its ornamental inflated papery orange-red calyx.

- *In class, the teacher used "physalis alkekengi" to mean old world perennial cultivated for its ornamental....*
- *They discussed "physalis alkekengi" during the group presentation.*

---

phytology *(noun)*

The branch of biology that studies plants.

- *They discussed "phytology" during the group presentation.*
- *Understanding "phytology" helps you talk about this topic clearly.*

pinckneya pubens *(noun)*

Ornamental shrub or small tree of swampy areas in southwestern United States having large pink or white sepals and yielding Georgia bark for treating fever.

- *The article explained what "pinckneya pubens" means with a simple example.*
- *She wrote a short paragraph that included "pinckneya pubens."*

pinealoma *(noun)*

Tumor of the pineal gland.

- *Understanding "pinealoma" helps you talk about this topic clearly.*
- *In class, the teacher used "pinealoma" to mean tumor of the pineal gland.*

pinkroot *(noun)*

A fungal disease of onions.

- *He looked up "pinkroot" because he had never seen it before.*
- *They discussed "pinkroot" during the group presentation.*

piquance *(noun)*

The quality of being agreeably stimulating or mentally exciting.

- *Understanding "piquance" helps you talk about this topic clearly.*
- *He looked up "piquance" because he had never seen it before.*

piquantness *(noun)*

The quality of being agreeably stimulating or mentally exciting.

- *They discussed "piquantness" during the group presentation.*
- *He looked up "piquantness" because he had never seen it before.*

placidness *(noun)*

A feeling of calmness; a quiet and undisturbed feeling.

- *In class, the teacher used "placidness" to mean a feeling of calmness; a quiet and undisturbed feeling.*
- *He looked up "placidness" because he had never seen it before.*

plaintiveness *(noun)*

Expressing sorrowfulness.

- *The article explained what "plaintiveness" means with a simple example.*
- *Understanding "plaintiveness" helps you talk about this topic clearly.*

pleomorphic rhabdosarcoma *(noun)*

Form of rhabdomyosarcoma that affects limb muscles of older adults.

- *He looked up "pleomorphic rhabdosarcoma" because he had never seen it before.*
- *Understanding "pleomorphic rhabdosarcoma" helps you talk about this topic clearly.*

pleuralgia *(noun)*

Pain in the chest caused by inflammation of the muscles between the ribs.

- *In class, the teacher used "pleuralgia" to mean pain in the chest caused by inflammation of the....*
- *He looked up "pleuralgia" because he had never seen it before.*

pleurodynia *(noun)*

Pain in the chest caused by inflammation of the muscles between the ribs.

- *Understanding "pleurodynia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pleurodynia."*

plumate *(adjective)*

Having an ornamental plume or feathery tuft.

- *Students compared "plumate" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "plumate."*

plumbism *(noun)*

Toxic condition produced by the absorption of excessive lead into the system.

- *The article explained what "plumbism" means with a simple example.*
- *Understanding "plumbism" helps you talk about this topic clearly.*

---

pneumocytosis *(noun)*

Pneumonia occurring in infants or in persons with impaired immune systems (as AIDS victims).

- *Understanding "pneumocytosis" helps you talk about this topic clearly.*
- *They discussed "pneumocytosis" during the group presentation.*

---

pneumonoconiosis *(noun)*

Chronic respiratory disease caused by inhaling metallic or mineral particles.

- *In class, the teacher used "pneumonoconiosis" to mean chronic respiratory disease caused by inhaling....*
- *He looked up "pneumonoconiosis" because he had never seen it before.*

---

poenology *(noun)*

The branch of criminology concerned with prison management and prisoner rehabilitation.

- *He looked up "poenology" because he had never seen it before.*
- *She wrote a short paragraph that included "poenology."*

---

pollinosis *(noun)*

A seasonal rhinitis resulting from an allergic reaction to pollen.

- *Understanding "pollinosis" helps you talk about this topic clearly.*
- *In class, the teacher used "pollinosis" to mean a seasonal rhinitis resulting from an allergic....*

---

polyneuritic psychosis *(noun)*

Dementia observed during the last stages of severe chronic alcoholism; involves loss of memory for recent events although long term memory is intact.

- *Understanding "polyneuritic psychosis" helps you talk about this topic clearly.*
- *The article explained what "polyneuritic psychosis" means with a simple example.*

---

polyneuritis *(noun)*

Inflammation of many or all of the peripheral nerves (as in leprosy).

- *The article explained what "polyneuritis" means with a simple example.*
- *They discussed "polyneuritis" during the group presentation.*

---

polyostotic fibrous dysplasia *(noun)*

Fibrous dysplasia of bone affecting multiple bones.

- *The article explained what "polyostotic fibrous dysplasia" means with a simple example.*
- *In class, the teacher used "polyostotic fibrous dysplasia" to mean fibrous dysplasia of bone affecting multiple bones.*

---

polypus *(noun)*

A small vascular growth on the surface of a mucous membrane.

- *He looked up "polypus" because he had never seen it before.*
- *They discussed "polypus" during the group presentation.*

---

polysomy *(noun)*

Congenital defect of having one or more extra chromosomes in somatic cells.

- *Understanding "polysomy" helps you talk about this topic clearly.*
- *The article explained what "polysomy" means with a simple example.*

---

polyvalence *(noun)*

(chemistry) the state of having a valence greater than two.

- *He looked up "polyvalence" because he had never seen it before.*
- *They discussed "polyvalence" during the group presentation.*

---

polyvalency *(noun)*

(chemistry) the state of having a valence greater than two.

- *In class, the teacher used "polyvalency" to mean (chemistry) the state of having a valence greater....*

- *The article explained what "polyvalency" means with a simple example.*

---

posology *(noun)*

The pharmacological determination of appropriate doses of drugs and medicines.

- *He looked up "posology" because he had never seen it before.*
- *In class, the teacher used "posology" to mean the pharmacological determination of appropriate....*

---

possibleness *(noun)*

Capability of existing or happening or being true.

- *He looked up "possibleness" because he had never seen it before.*
- *They discussed "possibleness" during the group presentation.*

---

posterior synechia *(noun)*

Adhesion between the iris and the lens.

- *They discussed "posterior synechia" during the group presentation.*
- *In class, the teacher used "posterior synechia" to mean adhesion between the iris and the lens.*

---

posthitis *(noun)*

Inflammation of the foreskin of the penis; usually caused by bacterial infection.

- *The article explained what "posthitis" means with a simple example.*
- *In class, the teacher used "posthitis" to mean inflammation of the foreskin of the penis; usually....*

---

pott's disease *(noun)*

TB of the spine with destruction of vertebrae resulting in curvature of the spine.

- *She wrote a short paragraph that included "pott's disease."*
- *He looked up "pott's disease" because he had never seen it before.*

---

precedency *(noun)*

Status established in order of importance or urgency.

- *Understanding "precedency" helps you talk about this topic clearly.*
- *The article explained what "precedency" means with a simple example.*

---

predestinarianism *(noun)*

The belief or doctrine of predestinarians.

- *Understanding "predestinarianism" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "predestinarianism."*

---

preemployment training program *(noun)*

A training program to prepare you for employment.

- *She wrote a short paragraph that included "preemployment training program."*
- *They discussed "preemployment training program" during the group presentation.*

---

preformation *(noun)*

A theory (popular in the 18th century and now discredited) that an individual develops by simple enlargement of a tiny fully formed organism (a homunculus) that exists in the germ cell.

- *In class, the teacher used "preformation" to mean a theory (popular in the 18th century and now....*
- *He looked up "preformation" because he had never seen it before.*

---

preinvasive cancer *(noun)*

A cluster of malignant cells that has not yet invaded the deeper epithelial tissue or spread to other parts of the body.

- *In class, the teacher used "preinvasive cancer" to mean a cluster of malignant cells that has not yet....*
- *They discussed "preinvasive cancer" during the group presentation.*

---

prejudgement *(noun)*

A judgment reached before the evidence is available.

- *In class, the teacher used "prejudgement" to mean a judgment reached before the evidence is available.*
- *Understanding "prejudgement" helps you talk about this topic clearly.*

---

prematureness *(noun)*

The state of being premature.

- *In class, the teacher used "prematureness" to mean the state of being premature.*
- *He looked up "prematureness" because he had never seen it before.*

---

preoccupancy *(noun)*

The mental state of being preoccupied by something.

- *Understanding "preoccupancy" helps you talk about this topic clearly.*
- *They discussed "preoccupancy" during the group presentation.*

---

preordain *(verb)*

Foreordain or determine beforehand.

- *The coach explained when to use "preordain" and when to wait.*
- *She tried to use "preordain" carefully so everyone would understand.*

---

preordination *(noun)*

(theology) being determined in advance; especially the doctrine (usually associated with Calvin) that God has foreordained every event throughout eternity (including the final salvation of mankind).

- *Understanding "preordination" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "preordination."*

---

prepossess *(verb)*

Make a positive impression (on someone) beforehand.

- *A prepossessing appearance.*
- *The idea of his failure prepossesses him.*

---

prepossession *(noun)*

An opinion formed beforehand without adequate evidence.

- *The king's prepossession in my favor is very valuable.*
- *The article explained what "prepossession" means with a simple example.*

---

prepotency *(noun)*

The state of being predominant over others.

- *They discussed "prepotency" during the group presentation.*
- *Understanding "prepotency" helps you talk about this topic clearly.*

---

presenile dementia *(noun)*

Dementia with onset before the age of 65.

- *Understanding "presenile dementia" helps you talk about this topic clearly.*
- *The article explained what "presenile dementia" means with a simple example.*

---

prestigiousness *(noun)*

A high standing achieved through success or influence or wealth etc.

- *They discussed "prestigiousness" during the group presentation.*
- *The article explained what "prestigiousness" means with a simple example.*

---

pretermission *(noun)*

Letting pass without notice.

- *In class, the teacher used "pretermission" to mean letting pass without notice.*
- *They discussed "pretermission" during the group presentation.*

---

pretermit *(verb)*

Leave undone or leave out.

- *The coach explained when to use "pretermit" and when to wait.*
- *Can you use "pretermit" in a sentence that fits this situation?*

---

pridefulness *(noun)*

A feeling of self-respect and personal worth.

- *He looked up "pridefulness" because he had never seen it before.*
- *She wrote a short paragraph that included "pridefulness."*

---

privateness *(noun)*

The condition of being concealed or hidden.

- *He looked up "privateness" because he had never seen it before.*
- *Understanding "privateness" helps you talk about this topic clearly.*

---

proctalgia *(noun)*

Pain in the rectum.

- *In class, the teacher used "proctalgia" to mean pain in the rectum.*
- *He looked up "proctalgia" because he had never seen it before.*

---

proctocele *(noun)*

Protrusion or herniation of the rectum into the vagina; can occur if pelvic muscles are weakened by childbirth.

- *He looked up "proctocele" because he had never seen it before.*
- *In class, the teacher used "proctocele" to mean protrusion or herniation of the rectum into the....*

---

procursive epilepsy *(noun)*

Epilepsy in which a seizure is induced by whirling or running.

- *The article explained what "procursive epilepsy" means with a simple example.*
- *Understanding "procursive epilepsy" helps you talk about this topic clearly.*

---

prodroma *(noun)*

An early symptom that a disease is developing or that an attack is about to occur.

- *He looked up "prodroma" because he had never seen it before.*
- *She wrote a short paragraph that included "prodroma."*

---

profaneness *(noun)*

An attitude of irreverence or contempt for a divinity.

- *In class, the teacher used "profaneness" to mean an attitude of irreverence or contempt for a divinity.*
- *They discussed "profaneness" during the group presentation.*

---

prolapsus *(noun)*

The slipping or falling out of place of an organ (as the uterus).

- *They discussed "prolapsus" during the group presentation.*
- *He looked up "prolapsus" because he had never seen it before.*

---

properness *(noun)*

Correct or appropriate behavior.

- *She wrote a short paragraph that included "properness."*
- *He looked up "properness" because he had never seen it before.*

---

prospicience *(noun)*

Seeing ahead; knowing in advance; foreseeing.

- *In class, the teacher used "prospicience" to mean seeing ahead; knowing in advance; foreseeing.*
- *The article explained what "prospicience" means with a simple example.*

---

prosthodontia *(noun)*

The branch of dentistry dealing with the replacement of teeth and related mouth or jaw structures by artificial devices.

- *In class, the teacher used "prosthodontia" to mean the branch of dentistry dealing with the....*
- *He looked up "prosthodontia" because he had never seen it before.*

---

protanopia *(noun)*

Dichromacy characterized by lowered sensitivity to long wavelengths of light resulting in an inability to distinguish red and purplish blue.

- *They discussed "protanopia" during the group presentation.*
- *The article explained what "protanopia" means with a simple example.*

protoanthropology *(noun)*

The study humans prior to the invention of writing.

- *He looked up "protoanthropology" because he had never seen it before.*
- *In class, the teacher used "protoanthropology" to mean the study humans prior to the invention of writing.*

protoarchaeology *(noun)*

The study of prehistoric human artifacts and human fossils.

- *Understanding "protoarchaeology" helps you talk about this topic clearly.*
- *In class, the teacher used "protoarchaeology" to mean the study of prehistoric human artifacts and human....*

protoarcheology *(noun)*

The study of prehistoric human artifacts and human fossils.

- *She wrote a short paragraph that included "protoarcheology."*
- *He looked up "protoarcheology" because he had never seen it before.*

protohistory *(noun)*

The study humans prior to the invention of writing.

- *In class, the teacher used "protohistory" to mean the study humans prior to the invention of writing.*
- *Understanding "protohistory" helps you talk about this topic clearly.*

protology *(noun)*

The study of origins and first things.

- *To Christians, protology refers to God's fundamental purpose for humanity.*
- *They discussed "protology" during the group presentation.*

prunus besseyi *(noun)*

Dwarf ornamental shrub of western United States having large black to red and yellow sweet edible fruit.

- *The article explained what "prunus besseyi" means with a simple example.*
- *Understanding "prunus besseyi" helps you talk about this topic clearly.*

prunus sieboldii *(noun)*

Ornamental tree with inedible fruit widely cultivated in many varieties for its pink blossoms.

- *The article explained what "prunus sieboldii" means with a simple example.*
- *They discussed "prunus sieboldii" during the group presentation.*

prunus subhirtella *(noun)*

Shrub or tree native to Japan cultivated as an ornamental for its rose-pink flowers.

- *He looked up "prunus subhirtella" because he had never seen it before.*
- *She wrote a short paragraph that included "prunus subhirtella."*

pruriency *(noun)*

Feeling morbid sexual desire or a propensity to lewdness.

- *The article explained what "pruriency" means with a simple example.*
- *Understanding "pruriency" helps you talk about this topic clearly.*

pruritus vulvae *(noun)*

Persistent itching of the external female genitalia.

- *They discussed "pruritus vulvae" during the group presentation.*
- *He looked up "pruritus vulvae" because he had never seen it before.*

psammoma *(noun)*

A tumor derived from fibrous tissue of the meninges or choroid plexus or certain other structures associated with the brain; characterized by sandlike particles.

- *She wrote a short paragraph that included "psammoma."*
- *They discussed "psammoma" during the group presentation.*

psephology *(noun)*

The branch of sociology that studies election trends (as by opinion polls).

- *In class, the teacher used "psephology" to mean the branch of sociology that studies election....*
- *They discussed "psephology" during the group presentation.*

---

pseudocyesis *(noun)*

Physiological state in which a woman exhibits symptoms of pregnancy but is not pregnant.

- *He looked up "pseudocyesis" because he had never seen it before.*
- *In class, the teacher used "pseudocyesis" to mean physiological state in which a woman exhibits....*

---

pseudohallucination *(noun)*

An image vivid enough to be a hallucination but recognized as unreal.

- *The article explained what "pseudohallucination" means with a simple example.*
- *Understanding "pseudohallucination" helps you talk about this topic clearly.*

---

pseudohermaphroditism *(noun)*

Congenital condition in which a person has external genitalia of one sex and internal sex organs of the other sex.

- *He looked up "pseudohermaphroditism" because he had never seen it before.*
- *In class, the teacher used "pseudohermaphroditism" to mean congenital condition in which a person has external....*

---

pseudohypertrophic dystrophy *(noun)*

The most common form of muscular dystrophy; inheritance is X-linked recessive (carried by females but affecting only males).

- *The article explained what "pseudohypertrophic dystrophy" means with a simple example.*
- *They discussed "pseudohypertrophic dystrophy" during the group presentation.*

---

pseudorubella *(noun)*

A viral disease of infants and young children; characterized by abrupt high fever and mild sore throat; a few days later there is a faint pinkish rash that lasts for a few hours to a few days.

- *She wrote a short paragraph that included "pseudorubella."*
- *They discussed "pseudorubella" during the group presentation.*

---

pseudosmallpox *(noun)*

A mild form of smallpox caused by a less virulent form of the virus.

- *In class, the teacher used "pseudosmallpox" to mean a mild form of smallpox caused by a less virulent....*
- *The article explained what "pseudosmallpox" means with a simple example.*

---

pseudovariola *(noun)*

A mild form of smallpox caused by a less virulent form of the virus.

- *Understanding "pseudovariola" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pseudovariola."*

---

psilosis *(noun)*

A chronic disorder that occurs in tropical and non-tropical forms and in both children and adults; nutrients are not absorbed; symptoms include foul-smelling diarrhea and emaciation.

- *He looked up "psilosis" because he had never seen it before.*
- *They discussed "psilosis" during the group presentation.*

---

psychometrika *(noun)*

Any branch of psychology concerned with psychological measurements.

- *She wrote a short paragraph that included "psychometrika."*
- *Understanding "psychometrika" helps you talk about this topic clearly.*

---

psychoneurosis *(noun)*

A mental or personality disturbance not attributable to any known neurological or organic dysfunction.

- *Understanding "psychoneurosis" helps you talk about this topic clearly.*
- *In class, the teacher used "psychoneurosis" to mean a mental or personality disturbance not....*

---

psychonomics *(noun)*

The branch of psychology that uses experimental methods to study psychological issues.

- *The article explained what "psychonomics" means with a simple example.*

- *In class, the teacher used "psychonomics" to mean the branch of psychology that uses experimental....*

---

psychopathologic *(adjective)*

Suffering from an undiagnosed mental disorder.

- *It is useful to describe something as "psychopathologic" when it is suffering from an undiagnosed mental disorder.*
- *A "psychopathologic" approach may work better in this case.*

---

psychosexuality *(noun)*

The mental representation of sexual activities.

- *In class, the teacher used "psychosexuality" to mean the mental representation of sexual activities.*
- *He looked up "psychosexuality" because he had never seen it before.*

---

psychotherapeutics *(noun)*

The branch of psychiatry concerned with psychological methods.

- *The article explained what "psychotherapeutics" means with a simple example.*
- *In class, the teacher used "psychotherapeutics" to mean the branch of psychiatry concerned with....*

---

pteridology *(noun)*

The branch of botany that studies ferns.

- *Understanding "pteridology" helps you talk about this topic clearly.*
- *They discussed "pteridology" during the group presentation.*

---

pterospermum acerifolium *(noun)*

Indian tree having fragrant nocturnal white flowers and yielding a reddish wood used for planking; often grown as an ornamental or shade tree.

- *They discussed "pterospermum acerifolium" during the group presentation.*
- *He looked up "pterospermum acerifolium" because he had never seen it before.*

---

pullorum disease *(noun)*

A serious bacterial disease of young chickens.

- *In class, the teacher used "pullorum disease" to mean a serious bacterial disease of young chickens.*
- *He looked up "pullorum disease" because he had never seen it before.*

---

purkinje's system *(noun)*

A network of Purkinje fibers that carry the cardiac impulse from the atrioventricular node to the ventricles of the heart and causes them to contract.

- *She wrote a short paragraph that included "purkinje's system."*
- *He looked up "purkinje's system" because he had never seen it before.*

---

purkinje's tissue *(noun)*

A network of Purkinje fibers that carry the cardiac impulse from the atrioventricular node to the ventricles of the heart and causes them to contract.

- *They discussed "purkinje's tissue" during the group presentation.*
- *Understanding "purkinje's tissue" helps you talk about this topic clearly.*

---

purpura hemorrhagica *(noun)*

Purpura associated with a reduction in circulating blood platelets which can result from a variety of factors.

- *The article explained what "purpura hemorrhagica" means with a simple example.*
- *Understanding "purpura hemorrhagica" helps you talk about this topic clearly.*

---

purulency *(noun)*

Symptom of being purulent (containing or forming pus).

- *The article explained what "purulency" means with a simple example.*
- *In class, the teacher used "purulency" to mean symptom of being purulent (containing or forming pus).*

---

puseyism *(noun)*

Principles of the founders of the Oxford movement as expounded in pamphlets called 'Tracts for the Times'.

- *She wrote a short paragraph that included "puseyism."*
- *He looked up "puseyism" because he had never seen it before.*

---

putridity *(noun)*

The state of being putrid.

- *He looked up "putridity" because he had never seen it before.*
- *They discussed "putridity" during the group presentation.*

putridness *(noun)*

In a state of progressive putrefaction.

- *She wrote a short paragraph that included "putridness."*
- *He looked up "putridness" because he had never seen it before.*

pyaemia *(noun)*

Septicemia caused by pus-forming bacteria being released from an abscess.

- *He looked up "pyaemia" because he had never seen it before.*
- *In class, the teacher used "pyaemia" to mean septicemia caused by pus-forming bacteria being....*

pycnodysostosis *(noun)*

A form of dwarfism accompanied by fragile bones and bad teeth.

- *The article explained what "pycnodysostosis" means with a simple example.*
- *She wrote a short paragraph that included "pycnodysostosis."*

pycnosis *(noun)*

A degenerative state of the cell nucleus.

- *In class, the teacher used "pycnosis" to mean a degenerative state of the cell nucleus.*
- *They discussed "pycnosis" during the group presentation.*

pyelitis *(noun)*

Inflammation of the renal pelvis.

- *She wrote a short paragraph that included "pyelitis."*
- *He looked up "pyelitis" because he had never seen it before.*

pyemia *(noun)*

Septicemia caused by pus-forming bacteria being released from an abscess.

- *The article explained what "pyemia" means with a simple example.*
- *They discussed "pyemia" during the group presentation.*

pyknosis *(noun)*

A degenerative state of the cell nucleus.

- *Understanding "pyknosis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pyknosis."*

pyorrhea *(noun)*

Chronic periodontitis; purulent inflammation of the teeth sockets.

- *He looked up "pyorrhea" because he had never seen it before.*
- *Understanding "pyorrhea" helps you talk about this topic clearly.*

pyorrhea alveolaris *(noun)*

Chronic periodontitis; purulent inflammation of the teeth sockets.

- *In class, the teacher used "pyorrhea alveolaris" to mean chronic periodontitis; purulent inflammation of the....*
- *Understanding "pyorrhea alveolaris" helps you talk about this topic clearly.*

pyorrhoea *(noun)*

Chronic periodontitis; purulent inflammation of the teeth sockets.

- *She wrote a short paragraph that included "pyorrhoea."*
- *He looked up "pyorrhoea" because he had never seen it before.*

pyromancy *(noun)*

Divination by fire or flames.

- *He looked up "pyromancy" because he had never seen it before.*
- *Understanding "pyromancy" helps you talk about this topic clearly.*

---

pyrophobia *(noun)*

A morbid fear of fire.

- *They discussed "pyrophobia" during the group presentation.*
- *The article explained what "pyrophobia" means with a simple example.*

---

pyrosis *(noun)*

A painful burning sensation in the chest caused by gastroesophageal reflux (backflow from the stomach irritating the esophagus); symptomatic of an ulcer or a diaphragmatic hernia or other disorder.

- *She wrote a short paragraph that included "pyrosis."*
- *He looked up "pyrosis" because he had never seen it before.*

---

pyuria *(noun)*

Presence of white blood cells in the urine; symptom of urinary tract infection.

- *In class, the teacher used "pyuria" to mean presence of white blood cells in the urine; symptom....*
- *The article explained what "pyuria" means with a simple example.*

---

qabbala *(noun)*

An esoteric theosophy of rabbinical origin based on the Hebrew scriptures and developed between the 7th and 18th centuries.

- *In class, the teacher used "qabbala" to mean an esoteric theosophy of rabbinical origin based on....*
- *They discussed "qabbala" during the group presentation.*

---

qabbalah *(noun)*

An esoteric theosophy of rabbinical origin based on the Hebrew scriptures and developed between the 7th and 18th centuries.

- *Understanding "qabbalah" helps you talk about this topic clearly.*
- *They discussed "qabbalah" during the group presentation.*

---

quadrantanopia *(noun)*

Blindness in one fourth of the visual field.

- *Understanding "quadrantanopia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "quadrantanopia."*

---

quantise *(verb)*

Apply quantum theory to; restrict the number of possible values of (a quantity) or states of (a physical entity or system) so that certain variables can assume only certain discrete magnitudes that are integral multiples of a common factor.

- *The coach explained when to use "quantise" and when to wait.*
- *She tried to use "quantise" carefully so everyone would understand.*

---

queckenstedt's test *(noun)*

A test to determine whether there is a blockage of the spinal canal.

- *He looked up "queckenstedt's test" because he had never seen it before.*
- *She wrote a short paragraph that included "queckenstedt's test."*

---

quiescency *(noun)*

A state of quiet (but possibly temporary) inaction.

- *She wrote a short paragraph that included "quiescency."*
- *Understanding "quiescency" helps you talk about this topic clearly.*

---

quincke's edema *(noun)*

Recurrent large circumscribed areas of subcutaneous edema; onset is sudden and it disappears within 24 hours; seen mainly in young women, often as an allergic reaction to food or drugs.

- *In class, the teacher used "quincke's edema" to mean recurrent large circumscribed areas of subcutaneous....*
- *The article explained what "quincke's edema" means with a simple example.*

---

quixotism *(noun)*

Quixotic (romantic and impractical) behavior.

- *The article explained what "quixotism" means with a simple example.*

- *In class, the teacher used "quixotism" to mean quixotic (romantic and impractical) behavior.*

---

rachischisis *(noun)*

A not uncommon congenital defect in which a vertebra is malformed; unless several vertebrae are affected or there is myelomeningocele there are few symptoms; can be diagnosed by amniocentesis.

- *They discussed "rachischisis" during the group presentation.*
- *Understanding "rachischisis" helps you talk about this topic clearly.*

---

rachitis *(noun)*

Childhood disease caused by deficiency of vitamin D and sunlight associated with impaired metabolism of calcium and phosphorus.

- *The article explained what "rachitis" means with a simple example.*
- *They discussed "rachitis" during the group presentation.*

---

radiculitis *(noun)*

Inflammation of the radicle of a nerve.

- *They discussed "radiculitis" during the group presentation.*
- *He looked up "radiculitis" because he had never seen it before.*

---

ragpicker's disease *(noun)*

A form of anthrax infection acquired by inhalation of dust containing Bacillus anthracis; initial symptoms (chill and cough and dyspnea and rapid pulse) are followed by extreme cardiovascular collapse.

- *In class, the teacher used "ragpicker's disease" to mean a form of anthrax infection acquired by inhalation....*
- *He looked up "ragpicker's disease" because he had never seen it before.*

---

ragsorter's disease *(noun)*

A form of anthrax infection acquired by inhalation of dust containing Bacillus anthracis; initial symptoms (chill and cough and dyspnea and rapid pulse) are followed by extreme cardiovascular collapse.

- *The article explained what "ragsorter's disease" means with a simple example.*
- *They discussed "ragsorter's disease" during the group presentation.*

---

raiu *(noun)*

Radioactive iodine test that measures the amount of radioactive iodine taken up by the thyroid gland.

- *She wrote a short paragraph that included "raiu."*
- *He looked up "raiu" because he had never seen it before.*

---

ranula *(noun)*

A cyst on the underside of the tongue.

- *She wrote a short paragraph that included "ranula."*
- *He looked up "ranula" because he had never seen it before.*

---

raptus hemorrhagicus *(noun)*

Seizure caused by a sudden profuse hemorrhage.

- *Understanding "raptus hemorrhagicus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "raptus hemorrhagicus."*

---

ratability *(noun)*

The state of being liable to assessment or taxation.

- *The article explained what "ratability" means with a simple example.*
- *She wrote a short paragraph that included "ratability."*

---

ratbite fever *(noun)*

Either of two infectious diseases transmitted to humans by the bite of a rat or mouse; characterized by fever and headache and nausea and skin eruptions.

- *She wrote a short paragraph that included "ratbite fever."*
- *He looked up "ratbite fever" because he had never seen it before.*

---

rateability *(noun)*

The state of being liable to assessment or taxation.

- *Understanding "rateability" helps you talk about this topic clearly.*
- *The article explained what "rateability" means with a simple example.*

ratiocinate *(verb)*

Reason methodologically and logically.

- *Can you use "ratiocinate" in a sentence that fits this situation?*
- *She tried to use "ratiocinate" carefully so everyone would understand.*

ravenousness *(noun)*

Excessive desire to eat.

- *He looked up "ravenousness" because he had never seen it before.*
- *Understanding "ravenousness" helps you talk about this topic clearly.*

razbliuto *(noun)*

The sentimental feeling you have about someone you once loved but no longer do.

- *He looked up "razbliuto" because he had never seen it before.*
- *She wrote a short paragraph that included "razbliuto."*

reactionism *(noun)*

The political orientation of reactionaries.

- *In class, the teacher used "reactionism" to mean the political orientation of reactionaries.*
- *He looked up "reactionism" because he had never seen it before.*

reattribute *(verb)*

Attribute to another source.

- *Can you use "reattribute" in a sentence that fits this situation?*
- *The coach explained when to use "reattribute" and when to wait.*

- *Understanding "somaesthesia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "somaesthesia."*

---

somaesthesis *(noun)*

The faculty of bodily perception; sensory systems associated with the body; includes skin senses and proprioception and the internal organs.

- *Understanding "somaesthesis" helps you talk about this topic clearly.*
- *He looked up "somaesthesis" because he had never seen it before.*

---

somataesthesis *(noun)*

The faculty of bodily perception; sensory systems associated with the body; includes skin senses and proprioception and the internal organs.

- *They discussed "somataesthesis" during the group presentation.*
- *Understanding "somataesthesis" helps you talk about this topic clearly.*

---

somatesthesia *(noun)*

The perception of tactual or proprioceptive or gut sensations.

- *He looked up "somatesthesia" because he had never seen it before.*
- *In class, the teacher used "somatesthesia" to mean the perception of tactual or proprioceptive or gut....*

---

somatosense *(noun)*

Any of the sensory systems that mediate sensations of pressure and tickle and warmth and cold and vibration and limb position and limb movement and pain.

- *She wrote a short paragraph that included "somatosense."*
- *Understanding "somatosense" helps you talk about this topic clearly.*

---

sombreness *(noun)*

A state of partial or total darkness.

- *The article explained what "sombreness" means with a simple example.*
- *In class, the teacher used "sombreness" to mean a state of partial or total darkness.*

---

somesthesia *(noun)*

The perception of tactual or proprioceptive or gut sensations.

- *He relied on somesthesia to warn him of pressure changes.*
- *She wrote a short paragraph that included "somesthesia."*

---

somesthesis *(noun)*

The faculty of bodily perception; sensory systems associated with the body; includes skin senses and proprioception and the internal organs.

- *She wrote a short paragraph that included “somesthesis.”*
- *The article explained what “somesthesis” means with a simple example.*

---

sootiness *(noun)*

The state of being dirty with soot.

- *The article explained what “sootiness” means with a simple example.*
- *In class, the teacher used “sootiness” to mean the state of being dirty with soot.*

---

soporiferous *(adjective)*

Inducing mental lethargy.

- *Would you call this situation “soporiferous”? Explain why.*
- *The speaker chose “soporiferous” because it captured the feeling precisely.*

---

sorrowfulness *(noun)*

The state of being sad.

- *In class, the teacher used “sorrowfulness” to mean the state of being sad.*
- *He looked up “sorrowfulness” because he had never seen it before.*

---

southernism *(noun)*

An attitude characteristic of Southerners (especially in the US).

- *They discussed “southernism” during the group presentation.*
- *Understanding “southernism” helps you talk about this topic clearly.*

---

spastic abasia *(noun)*

Abasia due to spastic contractions of the leg muscles.

- *Understanding “spastic abasia” helps you talk about this topic clearly.*
- *In class, the teacher used “spastic abasia” to mean abasia due to spastic contractions of the leg muscles.*

---

spathiphyllum *(noun)*

Any of various plants of the genus Spathiphyllum having a white or green spathe and a spike of fragrant flowers and often cultivated as an ornamental.

- *In class, the teacher used “spathiphyllum” to mean any of various plants of the genus spathiphyllum....*
- *They discussed “spathiphyllum” during the group presentation.*

---

spavin *(noun)*

A swelling of the hock joint of a horse; resulting in lameness.

- *The article explained what “spavin” means with a simple example.*
- *She wrote a short paragraph that included “spavin.”*

---

spelaeology *(noun)*

The scientific study of caves.

- *In class, the teacher used “spelaeology” to mean the scientific study of caves.*
- *They discussed “spelaeology” during the group presentation.*

---

spellbind *(verb)*

To render motionless, as with a fixed stare or by arousing terror or awe.

- *In everyday English, people use “spellbind” when talking about this idea.*
- *Can you use “spellbind” in a sentence that fits this situation?*

---

spelunk *(verb)*

Explore natural caves.

- *She tried to use “spelunk” carefully so everyone would understand.*
- *Learners should practice how to use “spelunk” in real sentences.*

---

spielmeyer-vogt disease *(noun)*

A congenital progressive disorder of lipid metabolism having an onset at age 5 and characterized by blindness and dementia and early death.

- *In class, the teacher used “spielmeyer-vogt disease” to mean a congenital progressive disorder of lipid....*
- *The article explained what “spielmeyer-vogt disease” means with a simple example.*

spinnable *(adjective)*

Capable or susceptible to being influenced by biased information.

- *Would you call this situation "spinnable"? Explain why.*
- *Her writing became clearer after she learned "spinnable."*

splenitis *(noun)*

Inflammation of the spleen.

- *The article explained what "splenitis" means with a simple example.*
- *She wrote a short paragraph that included "splenitis."*

spondylarthritis *(noun)*

Arthritis that affects one or more of the intervertebral joints in the spine.

- *They discussed "spondylarthritis" during the group presentation.*
- *In class, the teacher used "spondylarthritis" to mean arthritis that affects one or more of the....*

spongioblastoma *(noun)*

A fast-growing malignant brain tumor composed of spongioblasts; nearly always fatal.

- *He looked up "spongioblastoma" because he had never seen it before.*
- *She wrote a short paragraph that included "spongioblastoma."*

spotlessness *(noun)*

The state of being spotlessly clean.

- *Understanding "spotlessness" helps you talk about this topic clearly.*
- *He looked up "spotlessness" because he had never seen it before.*

sprachgefuhl *(noun)*

An intuitive feeling for the natural idiom of a language.

- *Dubyuh has no sprachgefuhl.*
- *He looked up "sprachgefuhl" because he had never seen it before.*

spruceness *(noun)*

The state of being neat and smart and trim.

- *She wrote a short paragraph that included "spruceness."*
- *They discussed "spruceness" during the group presentation.*

spuriousness *(noun)*

State of lacking genuineness.

- *The article explained what "spuriousness" means with a simple example.*
- *She wrote a short paragraph that included "spuriousness."*

squalidness *(noun)*

Sordid dirtiness.

- *Understanding "squalidness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "squalidness."*

squirreltail barley *(noun)*

Barley grown for its highly ornamental flower heads with delicate long silky awns; North America and northeastern Asia.

- *He looked up "squirreltail barley" because he had never seen it before.*
- *Understanding "squirreltail barley" helps you talk about this topic clearly.*

squirreltail grass *(noun)*

Barley grown for its highly ornamental flower heads with delicate long silky awns; North America and northeastern Asia.

- *They discussed "squirreltail grass" during the group presentation.*
- *She wrote a short paragraph that included "squirreltail grass."*

sspe *(noun)*

A rare chronic progressive encephalitis caused by the measles virus and occurring primarily in children and young adults; death usually occurs within three years; characterized by primary measles infection before the age of two years.

- *They discussed "sspe" during the group presentation.*
- *In class, the teacher used "sspe" to mean a rare chronic progressive encephalitis caused by....*

---

stationariness *(noun)*

Remaining in place.

- *The article explained what "stationariness" means with a simple example.*
- *She wrote a short paragraph that included "stationariness."*

---

status asthmaticus *(noun)*

A prolonged and severe asthma attack that does not respond to standard treatment.

- *Understanding "status asthmaticus" helps you talk about this topic clearly.*
- *The article explained what "status asthmaticus" means with a simple example.*

---

steatocystoma *(noun)*

A common cyst of the skin; filled with fatty matter (sebum) that is secreted by a sebaceous gland that has been blocked.

- *Understanding "steatocystoma" helps you talk about this topic clearly.*
- *He looked up "steatocystoma" because he had never seen it before.*

---

steel onself for *(verb)*

Prepare mentally or emotionally for something unpleasant.

- *Can you use "steel onself for" in a sentence that fits this situation?*
- *He did not know how to use "steel onself for" until he saw an example.*

---

stemmatics *(noun)*

The humanistic discipline that attempts to reconstruct the transmission of a text (especially a text in manuscript form) on the basis of relations between the various surviving manuscripts (sometimes using cladistic analysis).

- *Transcription errors are of decisive importance in stemmatics.*
- *Understanding "stemmatics" helps you talk about this topic clearly.*

---

stemmatology *(noun)*

The humanistic discipline that attempts to reconstruct the transmission of a text (especially a text in manuscript form) on the basis of relations between the various surviving manuscripts (sometimes using cladistic analysis).

- *Stemmatology also plays an important role in musicology.*
- *The article explained what "stemmatology" means with a simple example.*

---

sterileness *(noun)*

(of non-living objects) the state of being free of pathogenic organisms.

- *She wrote a short paragraph that included "sterileness."*
- *Understanding "sterileness" helps you talk about this topic clearly.*

---

sternutation *(noun)*

A symptom consisting of the involuntary expulsion of air from the nose.

- *Understanding "sternutation" helps you talk about this topic clearly.*
- *The article explained what "sternutation" means with a simple example.*

---

strawberry haemangioma *(noun)*

A congenital bright red superficial vascular tumor resembling a strawberry; tends to decrease in size during childhood.

- *He looked up "strawberry haemangioma" because he had never seen it before.*
- *Understanding "strawberry haemangioma" helps you talk about this topic clearly.*

---

streptosolen jamesonii *(noun)*

Evergreen South American shrub having showy trumpet-shaped orange flowers; grown as an ornamental or houseplant.

- *They discussed "streptosolen jamesonii" during the group presentation.*
- *He looked up "streptosolen jamesonii" because he had never seen it before.*

---

subacute sclerosing leukoencephalitis *(noun)*

A rare chronic progressive encephalitis caused by the measles virus and occurring primarily in children and young adults; death usually occurs within three years; characterized by primary measles infection before the age of two years.

- *In class, the teacher used "subacute sclerosing leukoencephalitis" to mean a rare chronic progressive encephalitis caused by....*
- *He looked up "subacute sclerosing leukoencephalitis" because he had never seen it before.*

---

subacute sclerosing panencephalitis *(noun)*

A rare chronic progressive encephalitis caused by the measles virus and occurring primarily in children and young adults; death usually occurs within three years; characterized by primary measles infection before the age of two years.

- *The article explained what "subacute sclerosing panencephalitis" means with a simple example.*
- *She wrote a short paragraph that included "subacute sclerosing panencephalitis."*

---

subedit *(verb)*

Edit and correct (written or printed material).

- *She tried to use "subedit" carefully so everyone would understand.*
- *He did not know how to use "subedit" until he saw an example.*

---

subnormality *(noun)*

The state of being less than normal (especially with respect to intelligence).

- *She wrote a short paragraph that included "subnormality."*
- *Understanding "subnormality" helps you talk about this topic clearly.*

---

subordinateness *(noun)*

Secondary importance.

- *They discussed "subordinateness" during the group presentation.*
- *The article explained what "subordinateness" means with a simple example.*

---

subservientness *(noun)*

In a subservient state.

- *She wrote a short paragraph that included "subservientness."*
- *Understanding "subservientness" helps you talk about this topic clearly.*

---

subtilize *(verb)*

Mark fine distinctions and subtleties, as among words.

- *In everyday English, people use "subtilize" when talking about this idea.*
- *Can you use "subtilize" in a sentence that fits this situation?*

---

succedaneum *(noun)*

(medicine) something that can be used as a substitute (especially any medicine that may be taken in place of another).

- *She wrote a short paragraph that included "succedaneum."*
- *He looked up "succedaneum" because he had never seen it before.*

---

suffragism *(noun)*

The belief that the right to vote should be extended (as to women).

- *They discussed "suffragism" during the group presentation.*
- *She wrote a short paragraph that included "suffragism."*

---

sugariness *(noun)*

The taste experience when sugar dissolves in the mouth.

- *In class, the teacher used "sugariness" to mean the taste experience when sugar dissolves in the mouth.*
- *He looked up "sugariness" because he had never seen it before.*

---

sulkiness *(noun)*

A mood or display of sullen aloofness or withdrawal.

- *The article explained what "sulkiness" means with a simple example.*
- *Understanding "sulkiness" helps you talk about this topic clearly.*

---

sumerology *(noun)*

The archeology of ancient Sumerians.

- *In class, the teacher used “sumerology” to mean the archeology of ancient sumerians.*
- *Understanding “sumerology” helps you talk about this topic clearly.*

---

supposal *(noun)*

A hypothesis that is taken for granted.

- *They discussed “supposal” during the group presentation.*
- *Understanding “supposal” helps you talk about this topic clearly.*

---

suprainfection *(noun)*

Secondary infection caused by an opportunistic infection.

- *Understanding “suprainfection” helps you talk about this topic clearly.*
- *He looked up “suprainfection” because he had never seen it before.*

---

surmontil *(noun)*

Tricyclic antidepressant drug (trade name Surmontil) used to treat depression and anxiety and (sometimes) insomnia.

- *The article explained what “surmontil” means with a simple example.*
- *They discussed “surmontil” during the group presentation.*

---

susceptibleness *(noun)*

The state of being susceptible; easily affected.

- *Understanding “susceptibleness” helps you talk about this topic clearly.*
- *The article explained what “susceptibleness” means with a simple example.*

---

swither *(noun)*

Agitation resulting from active worry.

- *In class, the teacher used “swither” to mean agitation resulting from active worry.*
- *The article explained what “swither” means with a simple example.*

---

swivet *(noun)*

A panic or extreme discomposure.

- *It threw her into a swivet.*
- *Understanding “swivet” helps you talk about this topic clearly.*

---

sydenham’s chorea *(noun)*

Chorea occurring chiefly in children and associated with rheumatic fever.

- *She wrote a short paragraph that included “sydenham’s chorea.”*
- *They discussed “sydenham’s chorea” during the group presentation.*

---

syllogise *(verb)*

Reason by syllogisms.

- *In everyday English, people use “syllogise” when talking about this idea.*
- *Can you use “syllogise” in a sentence that fits this situation?*

---

syllogize *(verb)*

Reason by syllogisms.

- *The coach explained when to use “syllogize” and when to wait.*
- *She tried to use “syllogize” carefully so everyone would understand.*

---

syndactylism *(noun)*

Birth defect in which there is partial or total webbing connecting two or more fingers or toes.

- *Understanding “syndactylism” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “syndactylism.”*

---

synechia *(noun)*

Adhesions between the iris and the lens or cornea resulting from trauma or eye surgery or as a complication of glaucoma or cataract; can lead to blindness.

- *In class, the teacher used “synechia” to mean adhesions between the iris and the lens or cornea....*
- *He looked up “synechia” because he had never seen it before.*

syngonium *(noun)*

Epiphytic or terrestrial climbing shrubs of Central and South America; used as ornamental houseplants for their velvety foliage.

- *They discussed "syngonium" during the group presentation.*
- *He looked up "syngonium" because he had never seen it before.*

tactual sensation *(noun)*

The sensation produced by pressure receptors in the skin.

- *He looked up "tactual sensation" because he had never seen it before.*
- *In class, the teacher used "tactual sensation" to mean the sensation produced by pressure receptors in the....*

takayasu's arteritis *(noun)*

Disorder characterized by the absence of a pulse in both arms and in the carotid arteries.

- *Understanding "takayasu's arteritis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "takayasu's arteritis."*

talentlessness *(noun)*

A lack of talent.

- *He looked up "talentlessness" because he had never seen it before.*
- *She wrote a short paragraph that included "talentlessness."*

tall cupflower *(noun)*

Shrubby Chilean herb having bluish-white tubular flowers used as an ornamental.

- *He looked up "tall cupflower" because he had never seen it before.*
- *Understanding "tall cupflower" helps you talk about this topic clearly.*

tamponage *(noun)*

Blockage or closure (as of a wound or body cavity) by (or as if by) a tampon (especially to stop bleeding).

- *Understanding "tamponage" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tamponage."*

taphephobia *(noun)*

A morbid fear of being buried alive.

- *They discussed "taphephobia" during the group presentation.*
- *Understanding "taphephobia" helps you talk about this topic clearly.*

tarantism *(noun)*

A nervous disorder characterized by an uncontrollable impulse to dance; popularly attributed to bite of the southern European tarantula or wolf spider.

- *She wrote a short paragraph that included "tarantism."*
- *They discussed "tarantism" during the group presentation.*

tarsitis *(noun)*

Inflammation of the eyelid.

- *She wrote a short paragraph that included "tarsitis."*
- *He looked up "tarsitis" because he had never seen it before.*

taxonomer *(noun)*

A biologist who specializes in the classification of organisms into groups on the basis of their structure and origin and behavior.

- *They discussed "taxonomer" during the group presentation.*
- *She wrote a short paragraph that included "taxonomer."*

tearfulness *(noun)*

Sadness expressed by weeping.

- *Understanding "tearfulness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tearfulness."*

technophilia *(noun)*

Enthusiasm for new technology.

- *In class, the teacher used "technophilia" to mean enthusiasm for new technology.*
- *He looked up "technophilia" because he had never seen it before.*

---

telerobotics *(noun)*

The area of robotics that is concerned with the control of robots from a distance.

- *They discussed "telerobotics" during the group presentation.*
- *The article explained what "telerobotics" means with a simple example.*

---

telescopy *(noun)*

The art of making and using telescopes.

- *In class, the teacher used "telescopy" to mean the art of making and using telescopes.*
- *The article explained what "telescopy" means with a simple example.*

---

tempestuousness *(noun)*

A state of agitation or turbulent change or development.

- *The article explained what "tempestuousness" means with a simple example.*
- *In class, the teacher used "tempestuousness" to mean a state of agitation or turbulent change or development.*

---

templet *(noun)*

A model or standard for making comparisons.

- *She wrote a short paragraph that included "templet."*
- *He looked up "templet" because he had never seen it before.*

---

tendentiousness *(noun)*

An intentional and controversial bias.

- *They discussed "tendentiousness" during the group presentation.*
- *In class, the teacher used "tendentiousness" to mean an intentional and controversial bias.*

---

tenderheartedness *(noun)*

Warm compassionate feelings.

- *He looked up "tenderheartedness" because he had never seen it before.*
- *They discussed "tenderheartedness" during the group presentation.*

---

tendonous synovitis *(noun)*

Inflammation of a tendon and its enveloping sheath.

- *They discussed "tendonous synovitis" during the group presentation.*
- *She wrote a short paragraph that included "tendonous synovitis."*

---

tendosynovitis *(noun)*

Inflammation of a tendon and its enveloping sheath.

- *In class, the teacher used "tendosynovitis" to mean inflammation of a tendon and its enveloping sheath.*
- *The article explained what "tendosynovitis" means with a simple example.*

---

tenonitis *(noun)*

Inflammation of a tendon.

- *They discussed "tenonitis" during the group presentation.*
- *She wrote a short paragraph that included "tenonitis."*

---

tensity *(noun)*

The physical condition of being stretched or strained.

- *He looked up "tensity" because he had never seen it before.*
- *Understanding "tensity" helps you talk about this topic clearly.*

---

testiness *(noun)*

Feeling easily irritated.

- *He looked up "testiness" because he had never seen it before.*

- *Understanding "testiness" helps you talk about this topic clearly.*

---

tetanilla *(noun)*

Clinical neurological syndrome characterized by muscular twitching and cramps and (when severe) seizures; associated with calcium deficiency (hypoparathyroidism) or vitamin D deficiency or alkalosis.

- *He looked up "tetanilla" because he had never seen it before.*
- *She wrote a short paragraph that included "tetanilla."*

---

tetartanopia *(noun)*

A form of dichromacy characterized by lowered sensitivity to yellow light; so rare that its existence has been questioned.

- *Understanding "tetartanopia" helps you talk about this topic clearly.*
- *They discussed "tetartanopia" during the group presentation.*

---

tetchiness *(noun)*

Feeling easily irritated.

- *Understanding "tetchiness" helps you talk about this topic clearly.*
- *They discussed "tetchiness" during the group presentation.*

---

tetrachoric correlation *(noun)*

A correlation coefficient computed for two normally distributed variables that are both expressed as a dichotomy.

- *In class, the teacher used "tetrachoric correlation" to mean a correlation coefficient computed for two normally....*
- *The article explained what "tetrachoric correlation" means with a simple example.*

---

tetrachoric correlation coefficient *(noun)*

A correlation coefficient computed for two normally distributed variables that are both expressed as a dichotomy.

- *She wrote a short paragraph that included "tetrachoric correlation coefficient."*
- *The article explained what "tetrachoric correlation coefficient" means with a simple example.*

---

thanatophobia *(noun)*

A morbid fear of death.

- *He looked up "thanatophobia" because he had never seen it before.*
- *She wrote a short paragraph that included "thanatophobia."*

---

theanthropism *(noun)*

The representation of objects (especially a god) as having human form or traits.

- *He looked up "theanthropism" because he had never seen it before.*
- *Understanding "theanthropism" helps you talk about this topic clearly.*

---

theorisation *(noun)*

The production or use of theories.

- *The article explained what "theorisation" means with a simple example.*
- *They discussed "theorisation" during the group presentation.*

---

theory of preformation *(noun)*

A theory (popular in the 18th century and now discredited) that an individual develops by simple enlargement of a tiny fully formed organism (a homunculus) that exists in the germ cell.

- *Understanding "theory of preformation" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "theory of preformation."*

---

theosophism *(noun)*

Belief in theosophy.

- *The article explained what "theosophism" means with a simple example.*
- *Understanding "theosophism" helps you talk about this topic clearly.*

---

thereness *(noun)*

The state of being there–not here–in position.

- *Things are really there...capture the thereness of them.*
- *They discussed "thereness" during the group presentation.*

thermalgesia *(noun)*

Pain caused by heat.

- *He looked up "thermalgesia" because he had never seen it before.*
- *She wrote a short paragraph that included "thermalgesia."*

thermionics *(noun)*

The branch of electronics dealing with thermionic phenomena (especially thermionic vacuum tubes).

- *She wrote a short paragraph that included "thermionics."*
- *They discussed "thermionics" during the group presentation.*

thermostatics *(noun)*

The aspect of thermodynamics concerned with thermal equilibrium.

- *Understanding "thermostatics" helps you talk about this topic clearly.*
- *The article explained what "thermostatics" means with a simple example.*

thespesia populnea *(noun)*

Pantropical tree of usually seacoasts sometimes cultivated as an ornamental for its rounded heart-shaped leaves and showy yellow and purple flowers; yields valuable pink to dark red close-grained wood and oil from its seeds.

- *In class, the teacher used "thespesia populnea" to mean pantropical tree of usually seacoasts sometimes....*
- *The article explained what "thespesia populnea" means with a simple example.*

thomsen's disease *(noun)*

A mild, rare, congenital form of myotonia characterized by muscle stiffness.

- *In class, the teacher used "thomsen's disease" to mean a mild, rare, congenital form of myotonia....*
- *The article explained what "thomsen's disease" means with a simple example.*

thralldom *(noun)*

The state of being under the control of another person.

- *She wrote a short paragraph that included "thralldom."*
- *The article explained what "thralldom" means with a simple example.*

thresher's lung *(noun)*

Alveolitis caused by an allergic reaction to fungal spores in the dust that is inhaled from moldy hay.

- *They discussed "thresher's lung" during the group presentation.*
- *In class, the teacher used "thresher's lung" to mean alveolitis caused by an allergic reaction to fungal....*

thrombasthenia *(noun)*

A rare autosomal recessive disease in which the platelets do not produce clots in the normal way and hemorrhage results.

- *The article explained what "thrombasthenia" means with a simple example.*
- *She wrote a short paragraph that included "thrombasthenia."*

thrombopenia *(noun)*

A blood disease characterized by an abnormally small number of platelets in the blood.

- *He looked up "thrombopenia" because he had never seen it before.*
- *She wrote a short paragraph that included "thrombopenia."*

thujopsis dolobrata *(noun)*

Slow-growing medium-large Japanese evergreen used as an ornamental.

- *They discussed "thujopsis dolobrata" during the group presentation.*
- *The article explained what "thujopsis dolobrata" means with a simple example.*

thyromegaly *(noun)*

Abnormally enlarged thyroid gland; can result from underproduction or overproduction of hormone or from a deficiency of iodine in the diet.

- *They discussed "thyromegaly" during the group presentation.*
- *The article explained what "thyromegaly" means with a simple example.*

tic douloureux *(noun)*

Intense paroxysmal neuralgia along the trigeminal nerve.

- *He looked up "tic douloureux" because he had never seen it before.*
- *She wrote a short paragraph that included "tic douloureux."*

---

tietze's syndrome *(noun)*

Syndrome characterized by swelling of rib cartilage (causing pain).

- *In class, the teacher used "tietze's syndrome" to mean syndrome characterized by swelling of rib cartilage....*
- *They discussed "tietze's syndrome" during the group presentation.*

---

timidness *(noun)*

Fear of the unknown or unfamiliar or fear of making decisions.

- *He looked up "timidness" because he had never seen it before.*
- *They discussed "timidness" during the group presentation.*

---

timorousness *(noun)*

Fear of the unknown or unfamiliar or fear of making decisions.

- *She wrote a short paragraph that included "timorousness."*
- *They discussed "timorousness" during the group presentation.*

---

tinea barbae *(noun)*

Fungal infection of the face and neck.

- *Understanding "tinea barbae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "tinea barbae."*

---

tinea unguium *(noun)*

Fungal infection of the nails (especially toenails).

- *She wrote a short paragraph that included "tinea unguium."*
- *They discussed "tinea unguium" during the group presentation.*

---

tipsiness *(noun)*

A temporary state resulting from excessive consumption of alcohol.

- *He looked up "tipsiness" because he had never seen it before.*
- *Understanding "tipsiness" helps you talk about this topic clearly.*

---

tocology *(noun)*

The branch of medicine dealing with childbirth and care of the mother.

- *He looked up "tocology" because he had never seen it before.*
- *She wrote a short paragraph that included "tocology."*

---

tollon *(noun)*

Ornamental evergreen treelike shrub of the Pacific coast of the United States having large white flowers and red berrylike fruits; often placed in genus Photinia.

- *He looked up "tollon" because he had never seen it before.*
- *Understanding "tollon" helps you talk about this topic clearly.*

---

toper's nose *(noun)*

Enlargement of the nose with dilation of follicles and redness and prominent vascularity of the skin; often associated with excessive consumption of alcohol.

- *She wrote a short paragraph that included "toper's nose."*
- *The article explained what "toper's nose" means with a simple example.*

---

topknotted *(adjective)*

(of a bird or animal) having a usually ornamental tuft or process on the head; often used in combination.

- *Would you call this situation "topknotted"? Explain why.*
- *It is useful to describe something as "topknotted" when it is (of a bird or animal) having a usually ornamental....*

---

topognosia *(noun)*

Recognition of the location of a stimulus on the skin.

- *They discussed "topognosia" during the group presentation.*
- *He looked up "topognosia" because he had never seen it before.*

---

topognosis *(noun)*

Recognition of the location of a stimulus on the skin.

- *They discussed "topognosis" during the group presentation.*
- *She wrote a short paragraph that included "topognosis."*

---

toponomy *(noun)*

The branch of lexicology that studies the place names of a region or a language.

- *She wrote a short paragraph that included "toponomy."*
- *Understanding "toponomy" helps you talk about this topic clearly.*

---

topsy-turvydom *(noun)*

A state of extreme confusion and disorder.

- *Understanding "topsy-turvydom" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "topsy-turvydom."*

---

topsy-turvyness *(noun)*

A state of extreme confusion and disorder.

- *The article explained what "topsy-turvyness" means with a simple example.*
- *She wrote a short paragraph that included "topsy-turvyness."*

---

torpidity *(noun)*

A state of motor and mental inactivity with a partial suspension of sensibility.

- *He looked up "torpidity" because he had never seen it before.*
- *She wrote a short paragraph that included "torpidity."*

---

toxaemia *(noun)*

- *Understanding “urceole” helps you talk about this topic clearly.*

---

uredinales *(noun)*

Rust fungi: parasitic fungi causing rust in plants; sometimes placed in.

- *In class, the teacher used “uredinales” to mean rust fungi: parasitic fungi causing rust in plants;....*
- *They discussed “uredinales” during the group presentation.*

---

ureteritis *(noun)*

Inflammation of the ureter.

- *In class, the teacher used “ureteritis” to mean inflammation of the ureter.*
- *The article explained what “ureteritis” means with a simple example.*

---

ureterocele *(noun)*

Prolapse of the end of the ureter into the bladder; may obstruct urine flow.

- *She wrote a short paragraph that included “ureterocele.”*
- *He looked up “ureterocele” because he had never seen it before.*

---

ureterorenal reflux *(noun)*

A backflow of urine from the ureter into the renal pelvis.

- *In class, the teacher used “ureterorenal reflux” to mean a backflow of urine from the ureter into the renal....*
- *They discussed “ureterorenal reflux” during the group presentation.*

---

ureterostenosis *(noun)*

Stenosis of the ureter.

- *In class, the teacher used “ureterostenosis” to mean stenosis of the ureter.*
- *He looked up “ureterostenosis” because he had never seen it before.*

---

urethrocele *(noun)*

Prolapse of the urethra into the vagina.

- *He looked up “urethrocele” because he had never seen it before.*
- *They discussed “urethrocele” during the group presentation.*

---

urex *(noun)*

Antibacterial agent (trade names Mandelamine and Urex) that is contained in many products that are used to treat urinary infections.

- *Understanding “urex” helps you talk about this topic clearly.*
- *They discussed “urex” during the group presentation.*

---

urginea *(noun)*

Mediterranean liliaceous plants; sometimes placed in family Hyacinthaceae.

- *The article explained what “urginea” means with a simple example.*
- *She wrote a short paragraph that included “urginea.”*

---

urginea maritima *(noun)*

Having dense spikes of small white flowers and yielding a bulb with medicinal properties.

- *They discussed “urginea maritima” during the group presentation.*

- *He looked up “urginea maritima” because he had never seen it before.*

---

uria aalge *(noun)*

The most frequent variety of murre.

- *They discussed “uria aalge” during the group presentation.*
- *He looked up “uria aalge” because he had never seen it before.*

---

uria lomvia *(noun)*

A variety of murre.

- *The article explained what “uria lomvia” means with a simple example.*
- *Understanding “uria lomvia” helps you talk about this topic clearly.*

---

urial *(noun)*

Bearded reddish sheep of southern Asia.

- *She wrote a short paragraph that included “urial.”*
- *Understanding “urial” helps you talk about this topic clearly.*

---

uricaciduria *(noun)*

Presence of abnormal amounts of uric acid in the urine; symptom of gout.

- *The article explained what “uricaciduria” means with a simple example.*
- *In class, the teacher used “uricaciduria” to mean presence of abnormal amounts of uric acid in the....*

---

uricosuric *(adjective)*

Acting to increase the excretion of uric acid in the urine.

- *Students compared “uricosuric” with similar adjectives in the lesson.*
- *A “uricosuric” approach may work better in this case.*

---

urinator *(noun)*

A person who urinates.

- *Understanding “urinator” helps you talk about this topic clearly.*
- *He looked up “urinator” because he had never seen it before.*

---

uriniferous tubule *(noun)*

Any of the small tubules that are the excretory units of the vertebrate kidney.

- *He looked up “uriniferous tubule” because he had never seen it before.*
- *She wrote a short paragraph that included “uriniferous tubule.”*

---

urnula craterium *(noun)*

An urn-shaped discomycete with a nearly black interior.

- *They discussed “urnula craterium” during the group presentation.*
- *Understanding “urnula craterium” helps you talk about this topic clearly.*

---

urobilin *(noun)*

Brown bile pigment formed from urobilinogens and found in feces and in small amounts in urine.

- *He looked up “urobilin” because he had never seen it before.*
- *She wrote a short paragraph that included “urobilin.”*

---

urobilinogen *(noun)*

A chromogen formed in the intestine from the breakdown of bilirubin; yields urobilins on oxidation; some is excreted in the feces and some is resorbed and excreted in bile or urine.

- *The article explained what “urobilinogen” means with a simple example.*
- *Understanding “urobilinogen” helps you talk about this topic clearly.*

---

urocele *(noun)*

Extravasation of urine into the scrotal sac.

- *She wrote a short paragraph that included “urocele.”*
- *Understanding “urocele” helps you talk about this topic clearly.*

---

urochesia *(noun)*

Passage of urine from the anus.

- *The article explained what “urochesia” means with a simple example.*
- *Understanding “urochesia” helps you talk about this topic clearly.*

urochezia *(noun)*

Passage of urine from the anus.

- *He looked up “urochezia” because he had never seen it before.*
- *She wrote a short paragraph that included “urochezia.”*

urochord *(noun)*

A notochord of a larval tunicate typically confined to the caudal region.

- *In class, the teacher used “urochord” to mean a notochord of a larval tunicate typically confined....*
- *Understanding “urochord” helps you talk about this topic clearly.*

urochordate *(noun)*

Primitive marine animal having a saclike unsegmented body and a urochord that is conspicuous in the larva.

- *Understanding “urochordate” helps you talk about this topic clearly.*
- *He looked up “urochordate” because he had never seen it before.*

urocyon cinereoargenteus *(noun)*

Dark grey American fox; from Central America through southern United States.

- *He looked up “urocyon cinereoargenteus” because he had never seen it before.*
- *She wrote a short paragraph that included “urocyon cinereoargenteus.”*

urocystis *(noun)*

A genus of smut fungi belonging to the family Tilletiaceae.

- *They discussed “urocystis” during the group presentation.*
- *In class, the teacher used “urocystis” to mean a genus of smut fungi belonging to the family....*

urocystis cepulae *(noun)*

Smut fungus causing blackish blisters on scales and leaves of onions; especially destructive to seedlings.

- *He looked up “urocystis cepulae” because he had never seen it before.*
- *She wrote a short paragraph that included “urocystis cepulae.”*

urocystis tritici *(noun)*

Fungus affecting leaves and stems of wheat.

- *They discussed “urocystis tritici” during the group presentation.*
- *The article explained what “urocystis tritici” means with a simple example.*

urodele *(noun)*

Amphibians that resemble lizards.

- *Understanding “urodele” helps you talk about this topic clearly.*
- *They discussed “urodele” during the group presentation.*

urodella *(noun)*

Salamanders; newts; congo snakes.

- *He looked up “urodella” because he had never seen it before.*
- *They discussed “urodella” during the group presentation.*

urodynia *(noun)*

Pain during urination.

- *They discussed “urodynia” during the group presentation.*
- *The article explained what “urodynia” means with a simple example.*

urolith *(noun)*

A urinary stone.

- *She wrote a short paragraph that included “urolith.”*
- *He looked up “urolith” because he had never seen it before.*

---

uropathy *(noun)*

Any pathology of the urinary tract.

- *He looked up “uropathy” because he had never seen it before.*
- *In class, the teacher used “uropathy” to mean any pathology of the urinary tract.*

---

uropsilus *(noun)*

Shrew moles.

- *In class, the teacher used “uropsilus” to mean shrew moles.*
- *The article explained what “uropsilus” means with a simple example.*

---

uropsilus soricipes *(noun)*

Shrew mole of eastern Asia.

- *She wrote a short paragraph that included “uropsilus soricipes.”*
- *He looked up “uropsilus soricipes” because he had never seen it before.*

---

uropygi *(noun)*

Whip scorpions.

- *The article explained what “uropygi” means with a simple example.*
- *Understanding “uropygi” helps you talk about this topic clearly.*

---

uropygial gland *(noun)*

Oil-secreting gland situated at the base of the tail in most birds.

- *Understanding “uropygial gland” helps you talk about this topic clearly.*
- *The article explained what “uropygial gland” means with a simple example.*

---

uropygium *(noun)*

Posterior part of a bird’s body from which the tail feathers grow.

- *She wrote a short paragraph that included “uropygium.”*
- *They discussed “uropygium” during the group presentation.*

---

urosaurus *(noun)*

A reptile genus of Iguanidae.

- *The article explained what “urosaurus” means with a simple example.*
- *She wrote a short paragraph that included “urosaurus.”*

---

urosaurus ornatus *(noun)*

A climbing lizard of western United States and northern Mexico.

- *They discussed “urosaurus ornatus” during the group presentation.*
- *She wrote a short paragraph that included “urosaurus ornatus.”*

---

ursidae *(noun)*

Bears and extinct related forms.

- *They discussed “ursidae” during the group presentation.*
- *She wrote a short paragraph that included “ursidae.”*

---

ursine dasyure *(noun)*

Small ferocious carnivorous marsupial having a mostly black coat and long tail.

- *She wrote a short paragraph that included “ursine dasyure.”*
- *They discussed “ursine dasyure” during the group presentation.*

---

ursinia *(noun)*

Any of various plants of the genus Ursinia grown for their yellow- or orange- or white-rayed flowers.

- *She wrote a short paragraph that included “ursinia.”*
- *He looked up “ursinia” because he had never seen it before.*

ursus arctos middendorffi *(noun)*

Brown bear of coastal Alaska and British Columbia.

- *The article explained what "ursus arctos middendorffi" means with a simple example.*
- *Understanding "ursus arctos middendorffi" helps you talk about this topic clearly.*

ursus middendorffi *(noun)*

Brown bear of coastal Alaska and British Columbia.

- *The article explained what "ursus middendorffi" means with a simple example.*
- *In class, the teacher used "ursus middendorffi" to mean brown bear of coastal alaska and british columbia.*

ursus thibetanus *(noun)*

Bear with a black coat living in central and eastern Asia.

- *The article explained what "ursus thibetanus" means with a simple example.*
- *In class, the teacher used "ursus thibetanus" to mean bear with a black coat living in central and....*

urtica pipulifera *(noun)*

Annual European nettle with stinging foliage and small clusters of green flowers.

- *She wrote a short paragraph that included "urtica pipulifera."*
- *He looked up "urtica pipulifera" because he had never seen it before.*

urticaceae *(noun)*

A family of plants of order Urticales including many nettles with stinging hairs.

- *Understanding "urticaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "urticaceae."*

urticales *(noun)*

An order of dicotyledonous plants including Moraceae and Urticaceae and Ulmaceae.

- *In class, the teacher used "urticales" to mean an order of dicotyledonous plants including....*
- *He looked up "urticales" because he had never seen it before.*

urticate *(verb)*

Sting with or as with nettles and cause a stinging pain or sensation.

- *Can you use "urticate" in a sentence that fits this situation?*
- *The coach explained when to use "urticate" and when to wait.*

urtication *(noun)*

A sensation of having been stung by nettles.

- *He looked up "urtication" because he had never seen it before.*
- *She wrote a short paragraph that included "urtication."*

urubupunga *(noun)*

A waterfall in the Parana river in Brazil.

- *He looked up "urubupunga" because he had never seen it before.*
- *In class, the teacher used "urubupunga" to mean a waterfall in the parana river in brazil.*

urubupunga falls *(noun)*

A waterfall in the Parana river in Brazil.

- *Understanding "urubupunga falls" helps you talk about this topic clearly.*
- *He looked up "urubupunga falls" because he had never seen it before.*

usableness *(noun)*

The quality of being able to provide good service.

- *The article explained what "usableness" means with a simple example.*
- *She wrote a short paragraph that included "usableness."*

usacil *(noun)*

A defense laboratory of the Criminal Investigation Command; the United States Army's primary forensic laboratory in support of criminal intelligence.

- *They discussed "usacil" during the group presentation.*
- *He looked up "usacil" because he had never seen it before.*

---

Capital of modern Macedonia.

- *Understanding "uskub" helps you talk about this topic clearly.*
- *He looked up "uskub" because he had never seen it before.*

---

usneaceae *(noun)*

Fruticose lichens having prostrate or erect or pendulous thalli: genera Usnea, Evernia, Ramalina, Alectoria.

- *Understanding "usneaceae" helps you talk about this topic clearly.*
- *The article explained what "usneaceae" means with a simple example.*

---

ustilaginaceae *(noun)*

A fungus family of loose smuts.

- *She wrote a short paragraph that included "ustilaginaceae."*
- *Understanding "ustilaginaceae" helps you talk about this topic clearly.*

---

ustilaginales *(noun)*

Parasitic fungi causing smuts; sometimes placed in class Tiliomycetes.

- *They discussed "ustilaginales" during the group presentation.*
- *Understanding "ustilaginales" helps you talk about this topic clearly.*

---

ustilaginoidea *(noun)*

Genus of imperfect fungi causing plant diseases like smut.

- *Understanding "ustilaginoidea" helps you talk about this topic clearly.*
- *In class, the teacher used "ustilaginoidea" to mean genus of imperfect fungi causing plant diseases....*

---

ustilaginoidea virens *(noun)*

Fungus causing green smut in rice.

- *She wrote a short paragraph that included "ustilaginoidea virens."*

- *He looked up "ustilaginoidea virens" because he had never seen it before.*

---

ustilago *(noun)*

Type genus of the Ustilaginaceae; genus comprising the loose smuts.

- *Understanding "ustilago" helps you talk about this topic clearly.*
- *They discussed "ustilago" during the group presentation.*

---

ustilago maydis *(noun)*

A common smut attacking Indian corn causing greyish white swellings that rupture to expose a black spore mass.

- *The article explained what "ustilago maydis" means with a simple example.*
- *In class, the teacher used "ustilago maydis" to mean a common smut attacking indian corn causing greyish....*

---

usuli *(noun)*

Sun god; counterpart of Akkadian Shamash.

- *The article explained what "utug" means with a simple example.*
- *Understanding "utug" helps you talk about this topic clearly.*

---

uuq *(noun)*

A radioactive transuranic element.

- *They discussed "uuq" during the group presentation.*
- *Understanding "uuq" helps you talk about this topic clearly.*

---

uveoscleral pathway *(noun)*

A tubule that drains excess aqueous humor.

- *She wrote a short paragraph that included "uveoscleral pathway."*
- *The article explained what "uveoscleral pathway" means with a simple example.*

---

uveous *(adjective)*

Of or relating to the uvea of the eye.

- *Her writing became clearer after she learned "uveous."*
- *A "uveous" approach may work better in this case.*

---

uvularia *(noun)*

Genus of perennial rhizomatous herb of southern and southeastern United States.

- *The article explained what "uvularia" means with a simple example.*
- *Understanding "uvularia" helps you talk about this topic clearly.*

---

uvularia grandiflora *(noun)*

Plant of southern and southeastern United States grown for its yellow flowers that can be dried.

- *Understanding "uvularia grandiflora" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "uvularia grandiflora."*

---

uvulariaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae.

- *They discussed "uvulariaceae" during the group presentation.*
- *He looked up "uvulariaceae" because he had never seen it before.*

---

uvulitis *(noun)*

Inflammation of the uvula.

- *She wrote a short paragraph that included "uvulitis."*
- *Understanding "uvulitis" helps you talk about this topic clearly.*

---

uvulopalatopharyngoplasty *(noun)*

Surgical resection of unnecessary palatal and oropharyngeal tissue to open the airway; intended to cure extreme cases of snoring (with or without sleep apnea).

- *They discussed "uvulopalatopharyngoplasty" during the group presentation.*

- *In class, the teacher used "uvulopalatopharyngoplasty" to mean surgical resection of unnecessary palatal and....*

---

uxorial *(adjective)*

Befitting or characteristic of a wife.

- *Students compared "uxorial" with similar adjectives in the lesson.*
- *It is useful to describe something as "uxorial" when it is befitting or characteristic of a wife.*

---

A member of a Turkic people of Uzbekistan and neighboring areas.

- *She wrote a short paragraph that included "uzbak."*
- *Understanding "uzbak" helps you talk about this topic clearly.*

---

uzbeg *(noun)*

A member of a Turkic people of Uzbekistan and neighboring areas.

- *She wrote a short paragraph that included "uzbeg."*
- *Understanding "uzbeg" helps you talk about this topic clearly.*

---

vacationist *(noun)*

Someone on vacation; someone who is devoting time to pleasure or relaxation rather than to work.

- *She wrote a short paragraph that included "vacationist."*
- *They discussed "vacationist" during the group presentation.*

---

vaccaria *(noun)*

Cow-cockles.

- *He looked up "vaccaria" because he had never seen it before.*
- *They discussed "vaccaria" during the group presentation.*

---

vaccaria hispanica *(noun)*

European annual with pale rose-colored flowers; cultivated flower or self-sown grainfield weed; introduced in North America; sometimes classified as a soapwort.

- *Understanding "vaccaria hispanica" helps you talk about this topic clearly.*
- *They discussed "vaccaria hispanica" during the group presentation.*

---

vaccaria pyramidata *(noun)*

European annual with pale rose-colored flowers; cultivated flower or self-sown grainfield weed; introduced in North America; sometimes classified as a soapwort.

- *In class, the teacher used "vaccaria pyramidata" to mean european annual with pale rose-colored flowers;....*
- *The article explained what "vaccaria pyramidata" means with a simple example.*

---

vaccina *(noun)*

A local infection induced in humans by inoculation with the virus causing cowpox in order to confer resistance to smallpox; normally lasts three weeks and leaves a pitted scar.

- *They discussed "vaccina" during the group presentation.*
- *The article explained what "vaccina" means with a simple example.*

---

vaccinee *(noun)*

A patient who has been vaccinated.

- *Understanding "vaccinee" helps you talk about this topic clearly.*
- *In class, the teacher used "vaccinee" to mean a patient who has been vaccinated.*

---

vaccinia gangrenosa *(noun)*

A severe or even fatal form of vaccinia that occurs mainly in persons with an immunological deficiency; characterized by progressive enlargement of the initial lesion.

- *The article explained what "vaccinia gangrenosa" means with a simple example.*
- *Understanding "vaccinia gangrenosa" helps you talk about this topic clearly.*

---

vaccinium ashei *(noun)*

Shrub of southeastern United States grown commercially especially for canning industry.

- *She wrote a short paragraph that included "vaccinium ashei."*
- *He looked up "vaccinium ashei" because he had never seen it before.*

---

vaccinium caespitosum *(noun)*

Low-growing tufted deciduous shrub of northern and alpine North America having pink to coral-red flowers followed by sweet blue berries.

- *He looked up "vaccinium caespitosum" because he had never seen it before.*
- *She wrote a short paragraph that included "vaccinium caespitosum."*

---

vaccinium corymbosum *(noun)*

High-growing deciduous shrub of eastern North America bearing edible blueish to blackish berries with a distinct bloom; source of most cultivated blueberries.

- *She wrote a short paragraph that included "vaccinium corymbosum."*
- *He looked up "vaccinium corymbosum" because he had never seen it before.*

---

vaccinium macrocarpon *(noun)*

Trailing red-fruited plant.

- *He looked up "vaccinium macrocarpon" because he had never seen it before.*
- *Understanding "vaccinium macrocarpon" helps you talk about this topic clearly.*

---

vaccinium myrsinites *(noun)*

Shrub of the eastern United States having shining evergreen leaves and bluish-black fruit.

- *Understanding "vaccinium myrsinites" helps you talk about this topic clearly.*
- *They discussed "vaccinium myrsinites" during the group presentation.*

---

vaccinium ovatum *(noun)*

Stiff bushy evergreen shrub of western North America having sour black berries and glossy green foliage used in floral arrangements.

- *The article explained what "vaccinium ovatum" means with a simple example.*
- *In class, the teacher used "vaccinium ovatum" to mean stiff bushy evergreen shrub of western north....*

---

vaccinium oxycoccus *(noun)*

Small red-fruited trailing cranberry of Arctic and cool regions of the northern hemisphere.

- *The article explained what "vaccinium oxycoccus" means with a simple example.*
- *Understanding "vaccinium oxycoccus" helps you talk about this topic clearly.*

---

vaccinium pennsylvanicum *(noun)*

Low-growing deciduous shrub of northeastern North America having flowers in compact racemes and bearing sweet dark blue berries.

- *The article explained what "vaccinium pennsylvanicum" means with a simple example.*
- *Understanding "vaccinium pennsylvanicum" helps you talk about this topic clearly.*

---

vaccinium stamineum *(noun)*

Small branching blueberry common in marshy areas of the eastern United States having greenish or yellowish unpalatable berries reputedly eaten by deer.

- *Understanding "vaccinium stamineum" helps you talk about this topic clearly.*
- *In class, the teacher used "vaccinium stamineum" to mean small branching blueberry common in marshy areas of....*

---

vaccinium uliginosum alpinum *(noun)*

An evergreen shrub with leathery leaves.

- *She wrote a short paragraph that included "vaccinium uliginosum alpinum."*
- *Understanding "vaccinium uliginosum alpinum" helps you talk about this topic clearly.*

---

vaccinum *(noun)*

Immunogen consisting of a suspension of weakened or dead pathogenic cells injected in order to stimulate the production of antibodies.

- *Understanding "vaccinum" helps you talk about this topic clearly.*
- *He looked up "vaccinum" because he had never seen it before.*

---

vacillant *(adjective)*

Uncertain in purpose or action.

- *Students compared "vacillant" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "vacillant."*

---

vacillator *(noun)*

One who hesitates (usually out of fear).

- *They discussed "vacillator" during the group presentation.*
- *In class, the teacher used "vacillator" to mean one who hesitates (usually out of fear).*

---

vacuolate *(adjective)*

Formed into or containing one or more vacuoles or small membrane-bound cavities within a cell.

- *Students compared "vacuolate" with similar adjectives in the lesson.*
- *Would you call this situation "vacuolate"? Explain why.*

---

vacuolisation *(noun)*

The state of having become filled with vacuoles.

- *They discussed "vacuolisation" during the group presentation.*
- *She wrote a short paragraph that included "vacuolisation."*

---

vagabondage *(noun)*

Travelling about without any clear destination.

- *She wrote a short paragraph that included "vagabondage."*
- *He looked up "vagabondage" because he had never seen it before.*

---

vagile *(adjective)*

Having freedom to move about.

- *Vagile aquatic animals.*
- *Would you call this situation "vagile"? Explain why.*

---

vaginocele *(noun)*

Hernia projecting into the vagina.

- *The article explained what "vaginocele" means with a simple example.*
- *Understanding "vaginocele" helps you talk about this topic clearly.*

---

vagn walfrid ekman *(noun)*

Swedish oceanographer who recognized the role of the Coriolis effect on ocean currents (1874-1954).

- *The article explained what "vagn walfrid ekman" means with a simple example.*
- *In class, the teacher used "vagn walfrid ekman" to mean swedish oceanographer who recognized the role of....*

---

vaisakha *(noun)*

The second month of the Hindu calendar.

- *In class, the teacher used "vaisakha" to mean the second month of the hindu calendar.*
- *Understanding "vaisakha" helps you talk about this topic clearly.*

---

vaisnavism *(noun)*

Worship of Vishnu one of the 3 chief gods of the Hindu pantheon.

- *The article explained what "vaisnavism" means with a simple example.*

A Cox-2 inhibitor (trade name Bextra) that relieves pain and inflammation without harming the digestive tract.

- *She wrote a short paragraph that included "valdecoxib."*
- *The article explained what "valdecoxib" means with a simple example.*

valentina vladmirovna tereshkova *(noun)*

Soviet cosmonaut who was the first woman in space (born in 1937).

- *The article explained what "valentina vladmirovna tereshkova" means with a simple example.*
- *She wrote a short paragraph that included "valentina vladmirovna tereshkova."*

valerianaceae *(noun)*

Genus of mostly herbs having a characteristic fetid odor.

- *She wrote a short paragraph that included "valerianaceae."*
- *He looked up "valerianaceae" because he had never seen it before.*

valerianella *(noun)*

Genus of Old World annual herbs widely naturalized.

- *He looked up "valerianella" because he had never seen it before.*
- *Understanding "valerianella" helps you talk about this topic clearly.*

valerianella locusta *(noun)*

Widely cultivated as a salad crop and pot herb; often a weed.

- *She wrote a short paragraph that included "valerianella locusta."*
- *They discussed "valerianella locusta" during the group presentation.*

valerianella olitoria *(noun)*

Widely cultivated as a salad crop and pot herb; often a weed.

- *The article explained what "valerianella olitoria" means with a simple example.*
- *Understanding "valerianella olitoria" helps you talk about this topic clearly.*

valeric acid *(noun)*

A clear liquid carboxylic acid used in perfumes and drugs.

- *They discussed "valeric acid" during the group presentation.*
- *The article explained what "valeric acid" means with a simple example.*

valetudinarian *(adjective)*

Of or relating to or characteristic of a person who is a valetudinarian.

- *Her writing became clearer after she learned "valetudinarian."*
- *Students compared "valetudinarian" with similar adjectives in the lesson.*

valetudinarianism *(noun)*

The state of being weak in health or body (especially from old age).

- *In class, the teacher used "valetudinarianism" to mean the state of being weak in health or body....*
- *The article explained what "valetudinarianism" means with a simple example.*

valetudinary *(adjective)*

Of or relating to or characteristic of a person who is a valetudinarian.

- *Would you call this situation "valetudinary"? Explain why.*
- *Students compared "valetudinary" with similar adjectives in the lesson.*

valiancy *(noun)*

The qualities of a hero or heroine; exceptional or heroic courage when facing danger (especially in battle).

- *The article explained what "valiancy" means with a simple example.*
- *They discussed "valiancy" during the group presentation.*

---

---

valorousness *(noun)*

The qualities of a hero or heroine; exceptional or heroic courage when facing danger (especially in battle).

- *In class, the teacher used "valorousness" to mean the qualities of a hero or heroine; exceptional or....*
- *He looked up "valorousness" because he had never seen it before.*

---

valuableness *(noun)*

The positive quality of being precious and beyond value.

- *She wrote a short paragraph that included "valuableness."*
- *He looked up "valuableness" because he had never seen it before.*

---

valuelessness *(noun)*

Having none of the properties that endow something with value.

- *They discussed "valuelessness" during the group presentation.*
- *He looked up "valuelessness" because he had never seen it before.*

---

valvelet *(noun)*

A small valve.

- *The article explained what "valvelet" means with a simple example.*
- *She wrote a short paragraph that included "valvelet."*

---

valvotomy *(noun)*

Incision into a stenosed cardiac valve to relieve the obstruction.

- *She wrote a short paragraph that included "valvotomy."*
- *They discussed "valvotomy" during the group presentation.*

---

valvula *(noun)*

A small valve.

- *She wrote a short paragraph that included "valvula."*
- *He looked up "valvula" because he had never seen it before.*

---

valvule *(noun)*

A small valve.

- *They discussed "valvule" during the group presentation.*

- *Understanding "valvule" helps you talk about this topic clearly.*

---

valvulitis *(noun)*

Inflammation of a valve (especially of a cardiac valve as a consequence of rheumatic fever).

- *The article explained what "valvulitis" means with a simple example.*
- *She wrote a short paragraph that included "valvulitis."*

---

valvulotomy *(noun)*

Incision into a stenosed cardiac valve to relieve the obstruction.

- *He looked up "valvulotomy" because he had never seen it before.*
- *Understanding "valvulotomy" helps you talk about this topic clearly.*

---

vambrace *(noun)*

Cannon of plate armor protecting the forearm.

- *They discussed "vambrace" during the group presentation.*
- *In class, the teacher used "vambrace" to mean cannon of plate armor protecting the forearm.*

---

vamper *(noun)*

A seductive woman who uses her sex appeal to exploit men.

- *The article explained what "vamper" means with a simple example.*
- *In class, the teacher used "vamper" to mean a seductive woman who uses her sex appeal to....*

---

vanadic acid *(noun)*

Any of various oxyacids of vanadium; known mostly in the form of its salts.

- *She wrote a short paragraph that included "vanadic acid."*
- *They discussed "vanadic acid" during the group presentation.*

---

vanadinite *(noun)*

A mineral consisting of chloride and vanadate of lead; a source of vanadium.

- *The article explained what "vanadinite" means with a simple example.*
- *In class, the teacher used "vanadinite" to mean a mineral consisting of chloride and vanadate of....*

---

vancocin *(noun)*

An antibiotic (trade name Vancocin) effective against some bacterial infections.

- *The article explained what "vancocin" means with a simple example.*
- *In class, the teacher used "vancocin" to mean an antibiotic (trade name vancocin) effective....*

---

vaned *(adjective)*

(of an arrow) equipped with feathers.

- *Students compared "vaned" with similar adjectives in the lesson.*
- *A "vaned" approach may work better in this case.*

---

vanellus *(noun)*

Eurasian lapwings.

- *He looked up "vanellus" because he had never seen it before.*
- *Understanding "vanellus" helps you talk about this topic clearly.*

---

vanern *(noun)*

A lake in southwestern Sweden; the largest lake in Sweden.

- *Understanding "vanern" helps you talk about this topic clearly.*
- *In class, the teacher used "vanern" to mean a lake in southwestern sweden; the largest lake in....*

---

vanessa virginiensis *(noun)*

American butterfly having dark brown wings with white and golden orange spots.

- *The article explained what "vanessa virginiensis" means with a simple example.*
- *In class, the teacher used "vanessa virginiensis" to mean american butterfly having dark brown wings with....*

---

vangueria *(noun)*

Tropical African and Asiatic trees and shrubs having one-seeded fruit.

- *Understanding "vangueria" helps you talk about this topic clearly.*
- *They discussed "vangueria" during the group presentation.*

---

vangueria infausta *(noun)*

Small deciduous tree of southern Africa having edible fruit.

- *They discussed "vangueria infausta" during the group presentation.*
- *In class, the teacher used "vangueria infausta" to mean small deciduous tree of southern africa having....*

---

vangueria madagascariensis *(noun)*

Shrubby tree of Madagascar occasionally cultivated for its edible apple-shaped fruit.

- *The article explained what "vangueria madagascariensis" means with a simple example.*
- *Understanding "vangueria madagascariensis" helps you talk about this topic clearly.*

---

vanilla planifolia *(noun)*

A climbing orchid bearing a podlike fruit yielding vanilla beans; widely cultivated from Florida southward throughout tropical America.

- *In class, the teacher used "vanilla planifolia" to mean a climbing orchid bearing a podlike fruit yielding....*
- *Understanding "vanilla planifolia" helps you talk about this topic clearly.*

---

vanisher *(noun)*

A person who disappears.

- *In class, the teacher used "vanisher" to mean a person who disappears.*
- *The article explained what "vanisher" means with a simple example.*

---

vanquishable *(adjective)*

Susceptible to being defeated.

- *A "vanquishable" approach may work better in this case.*
- *It is useful to describe something as "vanquishable" when it is susceptible to being defeated.*

---

vapidly *(adverb)*

In a vapid manner.

- *A vapidly smiling salesman.*
- *The narrator describes the scene "vapidly" in the final chapter.*

---

vapidness *(noun)*

The quality of being vapid and unsophisticated.

- *She wrote a short paragraph that included "vapidness."*
- *He looked up "vapidness" because he had never seen it before.*

---

vaporific *(adjective)*

Resembling or characteristic of vapor.

- *The speaker chose "vaporific" because it captured the feeling precisely.*
- *Would you call this situation "vaporific"? Explain why.*

---

vaporish *(adjective)*

Resembling or characteristic of vapor.

- *It is useful to describe something as "vaporish" when it is resembling or characteristic of vapor.*
- *The speaker chose "vaporish" because it captured the feeling precisely.*

---

vaporizable *(adjective)*

(used of substances) capable of being volatilized.

- *Her writing became clearer after she learned "vaporizable."*
- *Students compared "vaporizable" with similar adjectives in the lesson.*

---

vaporousness *(noun)*

Cloudiness resulting from haze or mist or vapor.

- *He looked up "vaporousness" because he had never seen it before.*
- *They discussed "vaporousness" during the group presentation.*

---

vapourific *(adjective)*

Resembling or characteristic of vapor.

- *It is useful to describe something as "vapourific" when it is resembling or characteristic of vapor.*
- *Would you call this situation "vapourific"? Explain why.*

---

vapourisable *(adjective)*

(used of substances) capable of being volatilized.

- *The speaker chose "vapourisable" because it captured the feeling precisely.*
- *Would you call this situation "vapourisable"? Explain why.*

---

vapourish *(adjective)*

Resembling or characteristic of vapor.

- *The speaker chose "vapourish" because it captured the feeling precisely.*
- *Would you call this situation "vapourish"? Explain why.*

---

vapourous *(adjective)*

So thin as to transmit light.

- *Students compared "vapourous" with similar adjectives in the lesson.*
- *It is useful to describe something as "vapourous" when it is so thin as to transmit light.*

---

vapourousness *(noun)*

Cloudiness resulting from haze or mist or vapor.

- *She wrote a short paragraph that included "vapourousness."*
- *He looked up "vapourousness" because he had never seen it before.*

---

varanidae *(noun)*

Monitor lizards.

- *The article explained what "varanidae" means with a simple example.*
- *In class, the teacher used "varanidae" to mean monitor lizards.*

---

varanus komodoensis *(noun)*

The largest lizard in the world (10 feet); found on Indonesian islands.

- *The article explained what "varanus komodoensis" means with a simple example.*
- *They discussed "varanus komodoensis" during the group presentation.*

---

variableness *(noun)*

The quality of being subject to variation.

- *She wrote a short paragraph that included "variableness."*
- *They discussed "variableness" during the group presentation.*

---

varicelliform *(adjective)*

Resembling the rash of chickenpox.

- *A "varicelliform" approach may work better in this case.*
- *Students compared "varicelliform" with similar adjectives in the lesson.*

---

varicolored *(adjective)*

Having sections or patches colored differently and usually brightly.

- *Would you call this situation "varicolored"? Explain why.*
- *The speaker chose "varicolored" because it captured the feeling precisely.*

---

varicoloured *(adjective)*

Having sections or patches colored differently and usually brightly.

- *A "varicoloured" approach may work better in this case.*
- *The speaker chose "varicoloured" because it captured the feeling precisely.*

varicosis *(noun)*

Pathological condition of being varicose or having varicose veins.

- *She wrote a short paragraph that included "varicosis."*
- *They discussed "varicosis" during the group presentation.*

varicosity *(noun)*

Varix or varicose condition in which a vein is swollen and tortuous.

- *The article explained what "varicosity" means with a simple example.*
- *In class, the teacher used "varicosity" to mean varix or varicose condition in which a vein is....*

variedness *(noun)*

Characterized by variation.

- *Understanding "variedness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "variedness."*

variform *(adjective)*

Varying in form or shape.

- *It is useful to describe something as "variform" when it is varying in form or shape.*
- *Would you call this situation "variform"? Explain why.*

variola vaccina *(noun)*

A local infection induced in humans by inoculation with the virus causing cowpox in order to confer resistance to smallpox; normally lasts three weeks and leaves a pitted scar.

- *She wrote a short paragraph that included "variola vaccina."*
- *The article explained what "variola vaccina" means with a simple example.*

variolar *(adjective)*

Relating to small pox.

- *It is useful to describe something as "variolar" when it is relating to small pox.*
- *The speaker chose "variolar" because it captured the feeling precisely.*

variolic *(adjective)*

Relating to small pox.

- *A "variolic" approach may work better in this case.*
- *Would you call this situation "variolic"? Explain why.*

variolization *(noun)*

The obsolete process of inoculating a susceptible person with material taken from a vesicle of a person who has smallpox.

- *The article explained what "variolization" means with a simple example.*
- *In class, the teacher used "variolization" to mean the obsolete process of inoculating a susceptible....*

variolous *(adjective)*

Relating to small pox.

- *It is useful to describe something as "variolous" when it is relating to small pox.*
- *The speaker chose "variolous" because it captured the feeling precisely.*

varment *(noun)*

Any usually predatory wild animal considered undesirable; e.g., coyote.

- *The article explained what "varment" means with a simple example.*
- *They discussed "varment" during the group presentation.*

varnisher *(noun)*

Someone who applies a finishing coat of varnish.

- *In class, the teacher used "varnisher" to mean someone who applies a finishing coat of varnish.*
- *They discussed "varnisher" during the group presentation.*

vasa efferentia *(noun)*

The several highly convoluted tubules that lead from the rete testis to the vas deferens and form the head of the epididymis.

- *Understanding "vasa efferentia" helps you talk about this topic clearly.*
- *The article explained what "vasa efferentia" means with a simple example.*

---

vascularisation *(noun)*

The organic process whereby body tissue becomes vascular and develops capillaries.

- *He looked up "vascularisation" because he had never seen it before.*
- *Understanding "vascularisation" helps you talk about this topic clearly.*

---

vascularise *(verb)*

Become vascular and have vessels that circulate fluids.

- *The coach explained when to use "vascularise" and when to wait.*
- *He did not know how to use "vascularise" until he saw an example.*

---

vascularize *(verb)*

Become vascular and have vessels that circulate fluids.

- *The egg yolk vascularized.*
- *The yolk sac is gradually vascularized.*

---

vasectomise *(verb)*

Remove the vas deferens.

- *He did not know how to use "vasectomise" until he saw an example.*
- *She tried to use "vasectomise" carefully so everyone would understand.*

---

vasectomize *(verb)*

Remove the vas deferens.

- *Many men choose to be vasectomized as a form of safe birth control.*
- *Learners should practice how to use "vasectomize" in real sentences.*

---

vasiform *(adjective)*

Constituting a tube; having hollow tubes (as for the passage of fluids).

- *Her writing became clearer after she learned "vasiform."*
- *Would you call this situation "vasiform"? Explain why.*

---

vasodilative *(noun)*

A drug that causes dilation of blood vessels.

- *She wrote a short paragraph that included "vasodilative."*
- *Understanding "vasodilative" helps you talk about this topic clearly.*

---

vasomax *(noun)*

A virility drug (trade name Vasomax) to treat erectile dysfunction in men.

- *They discussed "vasomax" during the group presentation.*
- *Understanding "vasomax" helps you talk about this topic clearly.*

---

vasosection *(noun)*

Surgical incision into or division of the vas deferens.

- *He looked up "vasosection" because he had never seen it before.*
- *She wrote a short paragraph that included "vasosection."*

---

vasotomy *(noun)*

Surgical incision into or division of the vas deferens.

- *He looked up "vasotomy" because he had never seen it before.*
- *She wrote a short paragraph that included "vasotomy."*

---

vasovasostomy *(noun)*

A surgical procedure that attempts to restore the function of the vas deferens after a vasectomy.

- *Understanding "vasovasostomy" helps you talk about this topic clearly.*

- *He looked up “vasovasostomy” because he had never seen it before.*

---

vasovesiculitis *(noun)*

Inflammation of the vas deferens and seminal vesicles; usually occurring with prostatitis.

- *She wrote a short paragraph that included “vasovesiculitis.”*
- *He looked up “vasovesiculitis” because he had never seen it before.*

---

vatical *(adjective)*

Resembling or characteristic of a prophet or prophecy.

- *Would you call this situation “vatical”? Explain why.*
- *It is useful to describe something as “vatical” when it is resembling or characteristic of a prophet or prophecy.*

---

vaticination *(noun)*

Knowledge of the future (usually said to be obtained from a divine source).

- *They discussed “vaticination” during the group presentation.*
- *She wrote a short paragraph that included “vaticination.”*

---

vaticinator *(noun)*

An authoritative person who divines the future.

- *In class, the teacher used “vaticinator” to mean an authoritative person who divines the future.*
- *They discussed “vaticinator” during the group presentation.*

---

vaunter *(noun)*

A very boastful and talkative person.

- *They discussed “vaunter” during the group presentation.*
- *In class, the teacher used “vaunter” to mean a very boastful and talkative person.*

---

- *A “vegetive” approach may work better in this case.*
- *It is useful to describe something as “vegetive” when it is of or relating to an activity that is passive and....*

---

veinal *(adjective)*

Relating to the veins of plants.

- *Leaves affected with veinal mosaic.*
- *The speaker chose "veinal" because it captured the feeling precisely.*

---

veinlike *(adjective)*

Having or showing markings that resemble veins.

- *The speaker chose "veinlike" because it captured the feeling precisely.*
- *A "veinlike" approach may work better in this case.*

---

velban *(noun)*

Periwinkle plant derivative used as an antineoplastic drug (trade name Velban) that disrupts cell division.

- *Understanding "velban" helps you talk about this topic clearly.*
- *They discussed "velban" during the group presentation.*

---

velleity *(noun)*

A mere wish, unaccompanied by effort to obtain.

- *Understanding "velleity" helps you talk about this topic clearly.*
- *The article explained what "velleity" means with a simple example.*

---

vellicate *(verb)*

Irritate as if by a nip, pinch, or tear.

- *Smooth surfaces can vellicate the teeth.*
- *He did not know how to use "vellicate" until he saw an example.*

---

vellication *(noun)*

A sudden muscle spasm; especially one caused by a nervous condition.

- *Understanding "vellication" helps you talk about this topic clearly.*
- *The article explained what "vellication" means with a simple example.*

---

velvetleaf *(noun)*

Arborescent perennial shrub having palmately lobed furry leaves and showy red-purple flowers; southwestern United States.

- *Understanding "velvetleaf" helps you talk about this topic clearly.*
- *In class, the teacher used "velvetleaf" to mean arborescent perennial shrub having palmately lobed....*

---

velvetweed *(noun)*

Tall annual herb or subshrub of tropical Asia having velvety leaves and yellow flowers and yielding a strong fiber; naturalized in southeastern Europe and United States.

- *The article explained what "velvetweed" means with a simple example.*
- *Understanding "velvetweed" helps you talk about this topic clearly.*

---

vena anastomotica *(noun)*

Either of two communicating veins serving the brain.

- *She wrote a short paragraph that included "vena anastomotica."*
- *Understanding "vena anastomotica" helps you talk about this topic clearly.*

---

vena appendicularis *(noun)*

A vein that accompanies the appendicular artery and empties into the ileocolic vein.

- *In class, the teacher used "vena appendicularis" to mean a vein that accompanies the appendicular artery and....*
- *Understanding "vena appendicularis" helps you talk about this topic clearly.*

---

vena arcuata renis *(noun)*

Veins that receive blood from interlobular veins of kidney and rectal venules.

- *Understanding "vena arcuata renis" helps you talk about this topic clearly.*
- *They discussed "vena arcuata renis" during the group presentation.*

---

vena auricularis *(noun)*

One of two veins serving the ear region.

- *Understanding "vena auricularis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "vena auricularis."*

---

vena basivertebralis *(noun)*

One of a number of veins draining the spongy substance of the vertebrae and emptying into the anterior internal vertebral venous plexus.

- *Understanding "vena basivertebralis" helps you talk about this topic clearly.*
- *In class, the teacher used "vena basivertebralis" to mean one of a number of veins draining the spongy....*

---

vena brachiocephalica *(noun)*

Veins formed by the union of the internal jugular and subclavian veins.

- *Understanding "vena brachiocephalica" helps you talk about this topic clearly.*
- *The article explained what "vena brachiocephalica" means with a simple example.*

---

vena bronchialis *(noun)*

Veins serving the bronchi; empty into the azygos vein.

- *He looked up "vena bronchialis" because he had never seen it before.*
- *Understanding "vena bronchialis" helps you talk about this topic clearly.*

---

vena bulbi penis *(noun)*

Vein of the head of the penis; tributary of the internal pudendal vein that drains the perineum.

- *They discussed "vena bulbi penis" during the group presentation.*
- *She wrote a short paragraph that included "vena bulbi penis."*

---

vena bulbi vestibuli *(noun)*

Vein of the vestibular bulb.

- *She wrote a short paragraph that included "vena bulbi vestibuli."*
- *They discussed "vena bulbi vestibuli" during the group presentation.*

---

vena canaliculi cochleae *(noun)*

Vein of the cochlear canal.

- *The article explained what "vena canaliculi cochleae" means with a simple example.*
- *They discussed "vena canaliculi cochleae" during the group presentation.*

---

vena centrales retinae *(noun)*

Vein formed by the union of the retinal veins; accompanies central arteries of the retina in the optic nerve.

- *They discussed "vena centrales retinae" during the group presentation.*
- *The article explained what "vena centrales retinae" means with a simple example.*

---

vena centralis glandulae suprarenalis *(noun)*

A single draining vein; on the right it empties into the inferior vena cava; on the left it empties into the left renal vein.

- *She wrote a short paragraph that included "vena centralis glandulae suprarenalis."*
- *He looked up "vena centralis glandulae suprarenalis" because he had never seen it before.*

---

vena cephalica *(noun)*

A large vein of the arm that empties into the axillary vein.

- *In class, the teacher used "vena cephalica" to mean a large vein of the arm that empties into the....*
- *Understanding "vena cephalica" helps you talk about this topic clearly.*

---

vena cephalica accessoria *(noun)*

A vein that passes along the radial edge of the forearm and joins the cephalic vein near the elbow.

- *They discussed "vena cephalica accessoria" during the group presentation.*
- *The article explained what "vena cephalica accessoria" means with a simple example.*

---

vena cervicalis profunda *(noun)*

A vein that accompanies an artery of the same name.

- *Understanding "vena cervicalis profunda" helps you talk about this topic clearly.*
- *He looked up "vena cervicalis profunda" because he had never seen it before.*

vena choroidea *(noun)*

Either of two veins serving the choroid coat of the eye.

- *Understanding "vena choroidea" helps you talk about this topic clearly.*
- *In class, the teacher used "vena choroidea" to mean either of two veins serving the choroid coat of the eye.*

vena circumflexa *(noun)*

Any of several curved parallel veins accompanying arteries of the same name.

- *The article explained what "vena circumflexa" means with a simple example.*
- *In class, the teacher used "vena circumflexa" to mean any of several curved parallel veins accompanying....*

vena circumflexa ilium *(noun)*

Accompanies the artery of the same name.

- *The article explained what "vena circumflexa ilium" means with a simple example.*
- *They discussed "vena circumflexa ilium" during the group presentation.*

vena circumflexus femoris *(noun)*

Either of two veins that accompany arteries of the same name serving the hip and thigh.

- *The article explained what "vena circumflexus femoris" means with a simple example.*
- *Understanding "vena circumflexus femoris" helps you talk about this topic clearly.*

vena clitoridis *(noun)*

Veins that serve the clitoris.

- *In class, the teacher used "vena clitoridis" to mean veins that serve the clitoris.*
- *The article explained what "vena clitoridis" means with a simple example.*

vena colica *(noun)*

Vein serving the large intestine.

- *The article explained what "vena colica" means with a simple example.*
- *She wrote a short paragraph that included "vena colica."*

vena comitans *(noun)*

A vein accompanying another structure; a vein may accompany an artery in such a way that the arterial pulses aid venous return.

- *In class, the teacher used "vena comitans" to mean a vein accompanying another structure; a vein may....*
- *Understanding "vena comitans" helps you talk about this topic clearly.*

vena cystica *(noun)*

Vein that drains the gallbladder.

- *He looked up "vena cystica" because he had never seen it before.*
- *She wrote a short paragraph that included "vena cystica."*

vena diploica *(noun)*

One of the veins serving the spongy part of the cranial bones.

- *They discussed "vena diploica" during the group presentation.*
- *The article explained what "vena diploica" means with a simple example.*

vena dorsalis clitoridis profunda *(noun)*

Deep dorsal vein of the clitoris; tributary of the vesical venous plexus.

- *He looked up "vena dorsalis clitoridis profunda" because he had never seen it before.*
- *She wrote a short paragraph that included "vena dorsalis clitoridis profunda."*

vena emissaria *(noun)*

One of several connecting veins in the scalp and head that drain blood from sinuses in the dura mater to veins outside the skull.

- *In class, the teacher used "vena emissaria" to mean one of several connecting veins in the scalp and....*
- *The article explained what "vena emissaria" means with a simple example.*

vena epigastrica inferior *(noun)*

Empties into the external iliac vein.

- *Understanding "vena epigastrica inferior" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "vena epigastrica inferior."*

---

vena epigastrica superficialis *(noun)*

Empties into the great saphenous vein.

- *She wrote a short paragraph that included "vena epigastrica superficialis."*
- *They discussed "vena epigastrica superficialis" during the group presentation.*

---

vena ethmoidalis *(noun)*

Veins that drain the ethmoidal sinuses and empty into the superior ophthalmic vein.

- *The article explained what "vena ethmoidalis" means with a simple example.*
- *In class, the teacher used "vena ethmoidalis" to mean veins that drain the ethmoidal sinuses and empty....*

---

vena facialis *(noun)*

Any of several veins draining the face.

- *Understanding "vena facialis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "vena facialis."*

---

vena facialis anterior *(noun)*

A continuation of the angular vein; unites with the retromandibular vein before emptying into the internal jugular vein.

- *Understanding "vena facialis anterior" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "vena facialis anterior."*

---

vena gastrica *(noun)*

One of several veins draining the stomach walls.

- *Understanding "vena gastrica" helps you talk about this topic clearly.*
- *He looked up "vena gastrica" because he had never seen it before.*

---

vena gastrica sinistra *(noun)*

Arises from a union of veins from the gastric cardia; runs in the lesser omentum; empties into the portal vein.

- *They discussed "vena gastrica sinistra" during the group presentation.*
- *In class, the teacher used "vena gastrica sinistra" to mean arises from a union of veins from the gastric....*

---

vena gastrica-dextra *(noun)*

Receives veins from the upper surfaces of the stomach and empties into the portal vein.

- *They discussed "vena gastrica-dextra" during the group presentation.*
- *Understanding "vena gastrica-dextra" helps you talk about this topic clearly.*

---

vena gastroomentalis *(noun)*

One of two veins serving the great curvature of the stomach.

- *He looked up "vena gastroomentalis" because he had never seen it before.*
- *They discussed "vena gastroomentalis" during the group presentation.*

---

vena hemiazygos accessoria *(noun)*

A vein formed by the union of the 4th to 7th posterior intercostal veins; empties into the azygos vein.

- *The article explained what "vena hemiazygos accessoria" means with a simple example.*
- *In class, the teacher used "vena hemiazygos accessoria" to mean a vein formed by the union of the 4th to 7th....*

---

vena hemizygos *(noun)*

A continuation of the left ascending lumbar vein; crosses the midline at the 8th vertebra and empties into the azygos vein.

- *The article explained what "vena hemizygos" means with a simple example.*
- *In class, the teacher used "vena hemizygos" to mean a continuation of the left ascending lumbar vein;....*

---

vena ileocolica *(noun)*

A vein that drains the end of the ileum and the appendix and the cecum and the lower part of the ascending colon.

- *Understanding "vena ileocolica" helps you talk about this topic clearly.*

- *They discussed “vena ileocolica” during the group presentation.*

---

vena iliaca *(noun)*

One of three veins draining the pelvic area.

- *She wrote a short paragraph that included “vena iliaca.”*
- *They discussed “vena iliaca” during the group presentation.*

---

vena iliolumbalis *(noun)*

A branch of the internal iliac vein.

- *He looked up “vena iliolumbalis” because he had never seen it before.*
- *Understanding “vena iliolumbalis” helps you talk about this topic clearly.*

---

vena intercapitalis *(noun)*

Veins connecting the dorsal and palmar veins of the hand or the dorsal and plantar veins of the foot.

- *Understanding “vena intercapitalis” helps you talk about this topic clearly.*
- *The article explained what “vena intercapitalis” means with a simple example.*

---

vena intercostalis *(noun)*

Several veins draining the intercostal spaces of the rib cage.

- *He looked up “vena intercostalis” because he had never seen it before.*
- *She wrote a short paragraph that included “vena intercostalis.”*

---

vena intervertebralis *(noun)*

One of several veins accompanying spinal nerves.

- *She wrote a short paragraph that included “vena intervertebralis.”*
- *Understanding “vena intervertebralis” helps you talk about this topic clearly.*

---

vena jugularis *(noun)*

Veins in the neck that return blood from the head.

- *In class, the teacher used “vena jugularis” to mean veins in the neck that return blood from the head.*
- *Understanding “vena jugularis” helps you talk about this topic clearly.*

---

vena lacrimalis *(noun)*

Drains the lacrimal gland; empties into the superior ophthalmic vein.

- *The article explained what “vena lacrimalis” means with a simple example.*
- *They discussed “vena lacrimalis” during the group presentation.*

---

vena laryngea *(noun)*

One of two veins draining the larynx.

- *She wrote a short paragraph that included “vena laryngea.”*
- *They discussed “vena laryngea” during the group presentation.*

---

vena lienalis *(noun)*

A vein formed by several small veins on the surface of the spleen; joins the superior mesenteric to form the portal vein.

- *They discussed “vena lienalis” during the group presentation.*
- *Understanding “vena lienalis” helps you talk about this topic clearly.*

---

vena lingualis *(noun)*

A vein that receives blood from the tongue and the floor of the mouth and empties into the internal jugular or the facial vein.

- *He looked up “vena lingualis” because he had never seen it before.*
- *They discussed “vena lingualis” during the group presentation.*

---

vena lumbalis *(noun)*

Veins that drain the posterior body wall and the lumbar vertebral venous plexuses.

- *She wrote a short paragraph that included “vena lumbalis.”*
- *He looked up “vena lumbalis” because he had never seen it before.*

---

vena maxillaris *(noun)*

Posterior continuation of the pterygoid plexus; joins the superficial temporal vein to form the retromandibular vein.

- *In class, the teacher used "vena maxillaris" to mean posterior continuation of the pterygoid plexus;....*
- *The article explained what "vena maxillaris" means with a simple example.*

---

vena mesenterica *(noun)*

A tributary of the portal vein passing from the intestine between the two layers of mesentery.

- *In class, the teacher used "vena mesenterica" to mean a tributary of the portal vein passing from the....*
- *The article explained what "vena mesenterica" means with a simple example.*

---

vena musculophrenica *(noun)*

Veins that drain the upper abdominal wall and the lower intercostal spaces and the abdomen.

- *In class, the teacher used "vena musculophrenica" to mean veins that drain the upper abdominal wall and the....*
- *The article explained what "vena musculophrenica" means with a simple example.*

---

vena obliqua atrii sinistri *(noun)*

A tributary of the coronary sinus; on the posterior wall of the left atrium.

- *They discussed "vena obliqua atrii sinistri" during the group presentation.*
- *In class, the teacher used "vena obliqua atrii sinistri" to mean a tributary of the coronary sinus; on the posterior....*

---

vena obturatoria *(noun)*

A vein formed by the union of tributaries that drain the hip joints and thigh muscles; empties into the internal iliac vein.

- *He looked up "vena obturatoria" because he had never seen it before.*
- *Understanding "vena obturatoria" helps you talk about this topic clearly.*

---

vena ophthalmica *(noun)*

Either of two veins that serve the eye; empties into the cavernous sinus.

- *In class, the teacher used "vena ophthalmica" to mean either of two veins that serve the eye; empties....*
- *Understanding "vena ophthalmica" helps you talk about this topic clearly.*

---

vena ovarica *(noun)*

One of the veins that drain the ovaries; the right opens into the inferior vena cava; the left opens into the left renal vein.

- *They discussed "vena ovarica" during the group presentation.*
- *She wrote a short paragraph that included "vena ovarica."*

---

vena paraumbilicalis *(noun)*

Small veins arising in skin around the navel; terminate as accessory portal veins.

- *He looked up "vena paraumbilicalis" because he had never seen it before.*
- *Understanding "vena paraumbilicalis" helps you talk about this topic clearly.*

---

vena pericardiaca *(noun)*

Several small veins from the pericardium.

- *In class, the teacher used "vena pericardiaca" to mean several small veins from the pericardium.*
- *They discussed "vena pericardiaca" during the group presentation.*

---

vena pharyngeus *(noun)*

Veins from the pharyngeal plexus that empty into the internal jugular vein.

- *He looked up "vena pharyngeus" because he had never seen it before.*
- *In class, the teacher used "vena pharyngeus" to mean veins from the pharyngeal plexus that empty into....*

---

vena phrenica *(noun)*

Either of two veins that drain the diaphragm.

- *He looked up "vena phrenica" because he had never seen it before.*
- *She wrote a short paragraph that included "vena phrenica."*

---

vena portae *(noun)*

A short vein that carries blood into the liver.

- *They discussed “vena portae” during the group presentation.*
- *She wrote a short paragraph that included “vena portae.”*

---

vena posterior ventriculi sinistri *(noun)*

Arises near the apex of the heart and empties into the coronary sinus.

- *She wrote a short paragraph that included “vena posterior ventriculi sinistri.”*
- *They discussed “vena posterior ventriculi sinistri” during the group presentation.*

---

vena pulmanalis inferior *(noun)*

Either of two pulmonary veins (left and right) returning blood from the inferior lobes of the lungs.

- *In class, the teacher used “vena pulmanalis inferior” to mean either of two pulmonary veins (left and right)....*
- *Understanding “vena pulmanalis inferior” helps you talk about this topic clearly.*

---

vena pulmonalis *(noun)*

Any of four veins that carry arterial blood from the lungs to the left atrium of the heart.

- *Understanding “vena pulmonalis” helps you talk about this topic clearly.*
- *In class, the teacher used “vena pulmonalis” to mean any of four veins that carry arterial blood from....*

---

vena pulmonalis superior *(noun)*

Either of two pulmonary veins (left and right) returning blood from the superior lobes of the lungs.

- *They discussed “vena pulmonalis superior” during the group presentation.*
- *He looked up “vena pulmonalis superior” because he had never seen it before.*

---

vena pylorica *(noun)*

A tributary of the right gastric vein.

- *They discussed “vena pylorica” during the group presentation.*
- *The article explained what “vena pylorica” means with a simple example.*

---

vena rectalis *(noun)*

Any of several veins draining the walls of the anal canal and rectum.

- *They discussed “vena rectalis” during the group presentation.*
- *In class, the teacher used “vena rectalis” to mean any of several veins draining the walls of the anal....*

---

vena renalis *(noun)*

Veins that accompany renal arteries; open into the vena cava at the level of the 2nd lumbar vertebra.

- *Understanding “vena renalis” helps you talk about this topic clearly.*
- *The article explained what “vena renalis” means with a simple example.*

---

vena retromandibularis *(noun)*

Posterior branch of the facial vein; formed by temporal veins in front of the ear.

- *The article explained what “vena retromandibularis” means with a simple example.*
- *In class, the teacher used “vena retromandibularis” to mean posterior branch of the facial vein; formed by....*

---

vena sacralis *(noun)*

Vein of the sacral region.

- *In class, the teacher used “vena sacralis” to mean vein of the sacral region.*
- *They discussed “vena sacralis” during the group presentation.*

---

vena saphena *(noun)*

Either of two chief superficial veins of the leg that drain blood from the foot.

- *In class, the teacher used “vena saphena” to mean either of two chief superficial veins of the leg....*
- *The article explained what “vena saphena” means with a simple example.*

---

vena scrotalis *(noun)*

Veins passing from the scrotum to the pudendal veins.

- *He looked up “vena scrotalis” because he had never seen it before.*
- *She wrote a short paragraph that included “vena scrotalis.”*

vena sigmoideus *(noun)*

Tributaries of the inferior mesenteric vein; drains the sigmoid colon.

- *The article explained what “vena sigmoideus” means with a simple example.*
- *In class, the teacher used “vena sigmoideus” to mean tributaries of the inferior mesenteric vein; drains....*

vena sternocleidomastoidea *(noun)*

Drains the sternocleidomastoid muscle; empties into the internal jugular vein.

- *In class, the teacher used “vena sternocleidomastoidea” to mean drains the sternocleidomastoid muscle; empties into....*
- *Understanding “vena sternocleidomastoidea” helps you talk about this topic clearly.*

vena stylomastoidea *(noun)*

A vein that drains the tympanic cavity and empties into the retromandibular vein.

- *In class, the teacher used “vena stylomastoidea” to mean a vein that drains the tympanic cavity and empties....*
- *Understanding “vena stylomastoidea” helps you talk about this topic clearly.*

vena subclavia *(noun)*

A continuation of the axillary vein; joins the internal jugular to form the brachiocephalic vein.

- *Understanding “vena subclavia” helps you talk about this topic clearly.*
- *They discussed “vena subclavia” during the group presentation.*

vena sublingualis *(noun)*

A tributary of the lingual vein.

- *He looked up “vena sublingualis” because he had never seen it before.*
- *They discussed “vena sublingualis” during the group presentation.*

vena supraorbitalis *(noun)*

Drains the front of the scalp; unites with the supratrochlear vein to form the angular vein.

- *Understanding “vena supraorbitalis” helps you talk about this topic clearly.*
- *They discussed “vena supraorbitalis” during the group presentation.*

vena supratrochlearis *(noun)*

Drains the front of the scalp; unites with the supraorbital vein to form the angular vein.

- *She wrote a short paragraph that included “vena supratrochlearis.”*
- *The article explained what “vena supratrochlearis” means with a simple example.*

vena testicularis *(noun)*

A vein from the testicles.

- *Understanding “vena testicularis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “vena testicularis.”*

vena thoracica *(noun)*

Veins that drain the thoracic walls.

- *Understanding “vena thoracica” helps you talk about this topic clearly.*
- *In class, the teacher used “vena thoracica” to mean veins that drain the thoracic walls.*

vena thoracoepigastrica *(noun)*

A vein arising from the region of the superficial epigastric vein and opening into the axillary vein or thoracic vein.

- *He looked up “vena thoracoepigastrica” because he had never seen it before.*
- *Understanding “vena thoracoepigastrica” helps you talk about this topic clearly.*

vena thyroidea *(noun)*

Any of several small veins draining blood from the thyroid area.

- *They discussed “vena thyroidea” during the group presentation.*
- *Understanding “vena thyroidea” helps you talk about this topic clearly.*

vena trachealis *(noun)*

Several small veins from the trachea.

- *Understanding “vena trachealis” helps you talk about this topic clearly.*
- *He looked up “vena trachealis” because he had never seen it before.*

---

vena umbilicalis *(noun)*

A vein in the umbilical cord; returns nutrient blood from the placenta to the fetus.

- *He looked up “vena umbilicalis” because he had never seen it before.*
- *Understanding “vena umbilicalis” helps you talk about this topic clearly.*

---

vena vertebralis *(noun)*

A vein that goes through the foramina of the cervical vertebrae and forms a plexus around the vertebral artery; empties into the brachiocephalic vein.

- *She wrote a short paragraph that included “vena vertebralis.”*
- *He looked up “vena vertebralis” because he had never seen it before.*

---

vena vertebralis accessoria *(noun)*

A vein that accompanies the vertebral vein but passes through the foramen of the transverse process of the 7th cervical vertebra and empties into the brachiocephalic vein.

- *In class, the teacher used “vena vertebralis accessoria” to mean a vein that accompanies the vertebral vein but....*
- *Understanding “vena vertebralis accessoria” helps you talk about this topic clearly.*

---

vena vertebralis anterior *(noun)*

A vein that accompanies the ascending cervical artery and opens into the vertebral vein.

- *She wrote a short paragraph that included “vena vertebralis anterior.”*
- *He looked up “vena vertebralis anterior” because he had never seen it before.*

---

vena vesicalis *(noun)*

Veins that drain the vesical plexus and join the internal iliac veins.

- *They discussed “vena vesicalis” during the group presentation.*
- *He looked up “vena vesicalis” because he had never seen it before.*

---

vena vestibularis *(noun)*

Veins that drain the saccule and utricle.

- *The article explained what “vena vestibularis” means with a simple example.*
- *She wrote a short paragraph that included “vena vestibularis.”*

---

vena vorticosum *(noun)*

A vein formed by branches from the back surface of the eye and the ciliary body; empties into the ophthalmic veins.

- *She wrote a short paragraph that included “vena vorticosum.”*
- *He looked up “vena vorticosum” because he had never seen it before.*

---

venae centrales hepatis *(noun)*

Terminal branches of the hepatic veins that lie in the hepatic lobules and receive blood from the liver sinusoids.

- *He looked up “venae centrales hepatis” because he had never seen it before.*
- *In class, the teacher used “venae centrales hepatis” to mean terminal branches of the hepatic veins that lie in....*

---

venae cerebrum inferior *(noun)*

Veins that drain the undersurface of the cerebral hemispheres and empty into the cavernous and transverse sinuses.

- *Understanding “venae cerebrum inferior” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “venae cerebrum inferior.”*

---

venae ciliares *(noun)*

Small veins coming from the ciliary body.

- *They discussed “venae ciliares” during the group presentation.*
- *In class, the teacher used “venae ciliares” to mean small veins coming from the ciliary body.*

---

venae conjunctivales *(noun)*

Veins draining the conjunctiva.

- *She wrote a short paragraph that included “venae conjunctivales.”*

- *Understanding "venae conjunctivales" helps you talk about this topic clearly.*

---

venae dorsales clitoridis superficiales *(noun)*

Superficial dorsal veins of the clitoris; tributaries of the external pudendal vein on either side.

- *They discussed "venae dorsales clitoridis superficiales" during the group presentation.*
- *In class, the teacher used "venae dorsales clitoridis superficiales" to mean superficial dorsal veins of the clitoris;...*

---

venae dorsales penis profunda *(noun)*

Deep dorsal vein of the penis; tributary of the prostatic plexus.

- *He looked up "venae dorsales penis profunda" because he had never seen it before.*
- *She wrote a short paragraph that included "venae dorsales penis profunda."*

---

venae dorsales penis superficiales *(noun)*

Superficial dorsal veins of the penis; paired tributaries of the external pudendal veins on each side.

- *He looked up "venae dorsales penis superficiales" because he had never seen it before.*
- *She wrote a short paragraph that included "venae dorsales penis superficiales."*

---

venae epigastricae superiores *(noun)*

Veins that accompany the superior epigastric artery.

- *The article explained what "venae epigastricae superiores" means with a simple example.*
- *In class, the teacher used "venae epigastricae superiores" to mean veins that accompany the superior epigastric artery.*

---

venae episclerales *(noun)*

Small veins in the sclera near the corneal margin; empty into the anterior ciliary veins.

- *They discussed "venae episclerales" during the group presentation.*
- *The article explained what "venae episclerales" means with a simple example.*

---

venae esophageae *(noun)*

Small veins from the esophagus emptying into the brachiocephalic vein or the azygos veins.

- *They discussed "venae esophageae" during the group presentation.*
- *He looked up "venae esophageae" because he had never seen it before.*

---

venae interlobulares hepatis *(noun)*

Interlobular veins of the liver.

- *In class, the teacher used "venae interlobulares hepatis" to mean interlobular veins of the liver.*
- *The article explained what "venae interlobulares hepatis" means with a simple example.*

---

venae interlobulares renis *(noun)*

Interlobular veins of the kidney; receive blood from the arcuate vein and empty into the renal veins.

- *They discussed "venae interlobulares renis" during the group presentation.*
- *He looked up "venae interlobulares renis" because he had never seen it before.*

---

venae labiales anteriores *(noun)*

Veins from the labia majora to the external pudendal vein.

- *Understanding "venae labiales anteriores" helps you talk about this topic clearly.*
- *He looked up "venae labiales anteriores" because he had never seen it before.*

---

venae labiales posteriores *(noun)*

Veins that pass posterior from the labia majora to the internal pudendal vein.

- *She wrote a short paragraph that included "venae labiales posteriores."*
- *He looked up "venae labiales posteriores" because he had never seen it before.*

---

venae meningeae *(noun)*

Veins at accompany the meningeal arteries.

- *Understanding "venae meningeae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "venae meningeae."*

---

venae palpebrales *(noun)*

Veins of the eyelids.

- *In class, the teacher used "venae palpebrales" to mean veins of the eyelids.*
- *He looked up "venae palpebrales" because he had never seen it before.*

---

venae pancreatica *(noun)*

Veins draining the pancreas and emptying into the superior mesenteric and splenic veins.

- *Understanding "venae pancreatica" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "venae pancreatica."*

---

venae profundae clitoridis *(noun)*

Deep veins of the clitoris; join the vesical plexus.

- *They discussed "venae profundae clitoridis" during the group presentation.*
- *In class, the teacher used "venae profundae clitoridis" to mean deep veins of the clitoris; join the vesical plexus.*

---

venae pudendum *(noun)*

Vein of the pudendum.

- *The article explained what "venae pudendum" means with a simple example.*
- *They discussed "venae pudendum" during the group presentation.*

---

venae renis *(noun)*

Veins of the kidney; drain the kidney into the renal vein.

- *In class, the teacher used "venae renis" to mean veins of the kidney; drain the kidney into the....*
- *The article explained what "venae renis" means with a simple example.*

---

venae sclerales *(noun)*

Tributaries of the anterior ciliary veins that drain the sclera of the eye.

- *They discussed "venae sclerales" during the group presentation.*
- *Understanding "venae sclerales" helps you talk about this topic clearly.*

---

venally *(adverb)*

In a corrupt and deceitful manner.

- *Try rewriting the sentence and include "venally" naturally.*
- *Place "venally" carefully so the meaning stays clear.*

---

vendable *(adjective)*

Fit to be offered for sale.

- *A "vendable" approach may work better in this case.*
- *It is useful to describe something as "vendable" when it is fit to be offered for sale.*

---

vendemiaire *(noun)*

First month of the Revolutionary calendar (September and October); the month of the grape harvest.

- *The article explained what "vendemiaire" means with a simple example.*
- *In class, the teacher used "vendemiaire" to mean first month of the revolutionary calendar....*

---

vendible *(adjective)*

Fit to be offered for sale.

- *Her writing became clearer after she learned "vendible."*
- *Would you call this situation "vendible"? Explain why.*

---

vendition *(noun)*

The act of selling goods for a living.

- *He looked up "vendition" because he had never seen it before.*
- *They discussed "vendition" during the group presentation.*

---

venerability *(noun)*

The quality of deserving veneration.

- *He looked up "venerability" because he had never seen it before.*
- *Understanding "venerability" helps you talk about this topic clearly.*

---

venerableness *(noun)*

The quality of deserving veneration.

- *The article explained what "venerableness" means with a simple example.*
- *In class, the teacher used "venerableness" to mean the quality of deserving veneration.*

---

venerator *(noun)*

Someone who regards with deep respect or reverence.

- *He looked up "venerator" because he had never seen it before.*
- *In class, the teacher used "venerator" to mean someone who regards with deep respect or reverence.*

---

veneridae *(noun)*

Hard-shell clams.

- *They discussed "veneridae" during the group presentation.*
- *Understanding "veneridae" helps you talk about this topic clearly.*

---

venesect *(verb)*

Practice venesection.

- *In everyday English, people use "venesect" when talking about this idea.*
- *Learners should practice how to use "venesect" in real sentences.*

---

venezia-euganea *(noun)*

A region of northeastern Italy on the Adriatic.

- *She wrote a short paragraph that included "venezia-euganea."*
- *He looked up "venezia-euganea" because he had never seen it before.*

---

venn's diagram *(noun)*

A diagram that uses circles to represent mathematical or logical sets pictorially inside a rectangle (the universal set); elements that are common to more than one set are represented by intersections of the circles.

- *In class, the teacher used "venn's diagram" to mean a diagram that uses circles to represent....*
- *Understanding "venn's diagram" helps you talk about this topic clearly.*

---

venomed *(adjective)*

Full of malice or hate.

- *Venomed remarks.*
- *It is useful to describe something as "venomed" when it is full of malice or hate.*

---

venose *(adjective)*

Having or showing markings that resemble veins.

- *Would you call this situation "venose"? Explain why.*
- *Her writing became clearer after she learned "venose."*

---

ventail *(noun)*

A medieval hood of mail suspended from a basinet to protect the head and neck.

- *They discussed "ventail" during the group presentation.*
- *The article explained what "ventail" means with a simple example.*

---

venthole *(noun)*

A hole for the escape of gas or air.

- *They discussed "venthole" during the group presentation.*
- *She wrote a short paragraph that included "venthole."*

---

ventner *(noun)*

United States geneticist who published the complete base sequences for all the genes of a free-living organism, the influenza bacterium; later led team that developed a first draft of the entire human genome (born in 1946).

- *Understanding "ventner" helps you talk about this topic clearly.*

- *In class, the teacher used "ventner" to mean united states geneticist who published the complete....*

---

ventose *(noun)*

Sixth month of the Revolutionary calendar (February and March); the windy month.

- *He looked up "ventose" because he had never seen it before.*
- *In class, the teacher used "ventose" to mean sixth month of the revolutionary calendar (february....*

---

ventricous *(adjective)*

Having a swelling on one side.

- *Would you call this situation "ventricous"? Explain why.*
- *Her writing became clearer after she learned "ventricous."*

---

ventriculus *(noun)*

Thick-walled muscular pouch below the crop in many birds and reptiles for grinding food.

- *Understanding "ventriculus" helps you talk about this topic clearly.*
- *In class, the teacher used "ventriculus" to mean thick-walled muscular pouch below the crop in many....*

---

ventriloquy *(noun)*

The art of projecting your voice so that it seems to come from another source (as from a ventriloquist's dummy).

- *He looked up "ventriloquy" because he had never seen it before.*
- *Understanding "ventriloquy" helps you talk about this topic clearly.*

---

venturesomeness *(noun)*

The trait of being adventurous.

- *He looked up "venturesomeness" because he had never seen it before.*
- *Understanding "venturesomeness" helps you talk about this topic clearly.*

---

venula *(noun)*

A minute vein continuous with a capillary.

- *The article explained what "venula" means with a simple example.*
- *In class, the teacher used "venula" to mean a minute vein continuous with a capillary.*

---

venule *(noun)*

A minute vein continuous with a capillary.

- *She wrote a short paragraph that included "venule."*
- *He looked up "venule" because he had never seen it before.*

---

venushair *(noun)*

Delicate maidenhair fern with slender shining black leaf stalks; cosmopolitan.

- *The article explained what "venushair" means with a simple example.*
- *In class, the teacher used "venushair" to mean delicate maidenhair fern with slender shining black....*

---

verbascum blattaria *(noun)*

European mullein with smooth leaves and large yellow or purplish flowers; naturalized as a weed in North America.

- *He looked up "verbascum blattaria" because he had never seen it before.*
- *She wrote a short paragraph that included "verbascum blattaria."*

---

verbascum lychnitis *(noun)*

Densely hairy Eurasian herb with racemose white flowers; naturalized in North America.

- *The article explained what "verbascum lychnitis" means with a simple example.*
- *Understanding "verbascum lychnitis" helps you talk about this topic clearly.*

---

verbascum phoeniceum *(noun)*

Eurasian mullein with showy purple or pink flowers.

- *They discussed "verbascum phoeniceum" during the group presentation.*
- *She wrote a short paragraph that included "verbascum phoeniceum."*

---

verbesina *(noun)*

Herbs and shrubs of warm North America to Mexico; includes plants formerly placed in genus Actinomeris.

- *They discussed "verbesina" during the group presentation.*
- *She wrote a short paragraph that included "verbesina."*

verbesina alternifolia *(noun)*

Perennial herb with showy yellow flowers; the eastern United States.

- *The article explained what "verbesina alternifolia" means with a simple example.*
- *They discussed "verbesina alternifolia" during the group presentation.*

verbesina encelioides *(noun)*

Coarse greyish-green annual yellow-flowered herb; southwestern United States to Mexico.

- *They discussed "verbesina encelioides" during the group presentation.*
- *Understanding "verbesina encelioides" helps you talk about this topic clearly.*

verbesina helianthoides *(noun)*

Perennial herb with yellow flowers; southern and south central United States.

- *He looked up "verbesina helianthoides" because he had never seen it before.*
- *She wrote a short paragraph that included "verbesina helianthoides."*

verbesina virginica *(noun)*

Tall perennial herb having clusters of white flowers; the eastern United States.

- *The article explained what "verbesina virginica" means with a simple example.*
- *She wrote a short paragraph that included "verbesina virginica."*

verbify *(verb)*

Make into a verb.

- *In everyday English, people use "verbify" when talking about this idea.*
- *Learners should practice how to use "verbify" in real sentences.*

verbolatry *(noun)*

The worship of words.

- *In class, the teacher used "verbolatry" to mean the worship of words.*
- *They discussed "verbolatry" during the group presentation.*

A papule that changes into a blister.

- *In class, the teacher used "vesicopapule" to mean a papule that changes into a blister.*
- *The article explained what "vesicopapule" means with a simple example.*

---

vesicula umbilicus *(noun)*

Membranous structure that functions as the circulatory system in mammalian embryos until the heart becomes functional.

- *They discussed "vesicula umbilicus" during the group presentation.*
- *The article explained what "vesicula umbilicus" means with a simple example.*

---

vesiculate *(verb)*

Cause to become vesicular or full of air cells.

- *Vesiculate an organ.*
- *The organs vesiculated.*

---

vesiculation *(noun)*

The formation of vesicles in or beneath the skin.

- *In class, the teacher used "vesiculation" to mean the formation of vesicles in or beneath the skin.*
- *He looked up "vesiculation" because he had never seen it before.*

---

vesiculitis *(noun)*

Inflammation of a seminal vesicle (usually in conjunction with prostatitis).

- *He looked up "vesiculitis" because he had never seen it before.*
- *Understanding "vesiculitis" helps you talk about this topic clearly.*

---

vesiculovirus *(noun)*

An animal virus that causes vesicular stomatitis.

- *The article explained what "vesiculovirus" means with a simple example.*
- *Understanding "vesiculovirus" helps you talk about this topic clearly.*

---

vespa crabro *(noun)*

European hornet introduced into the United States.

- *Understanding "vespa crabro" helps you talk about this topic clearly.*

- *The article explained what “vespa crabro” means with a simple example.*

---

vespertilian bat *(noun)*

A variety of carnivorous bat.

- *She wrote a short paragraph that included “vespertilian bat.”*
- *He looked up “vespertilian bat” because he had never seen it before.*

---

vespertilio *(noun)*

A genus of Vespertilionidae.

- *In class, the teacher used “vespertilio” to mean a genus of vespertilionidae.*
- *The article explained what “vespertilio” means with a simple example.*

---

vespertilio murinus *(noun)*

Common Eurasian bat with white-tipped hairs in its coat.

- *The article explained what “vespertilio murinus” means with a simple example.*
- *They discussed “vespertilio murinus” during the group presentation.*

---

vespertilionid *(noun)*

A variety of carnivorous bat.

- *The article explained what “vespertilionid” means with a simple example.*
- *In class, the teacher used “vespertilionid” to mean a variety of carnivorous bat.*

---

vespertilionidae *(noun)*

The majority of common bats of temperate regions of the world.

- *The article explained what “vespertilionidae” means with a simple example.*
- *In class, the teacher used “vespertilionidae” to mean the majority of common bats of temperate regions of....*

---

vespid *(noun)*

Mostly social nest-building wasps.

- *The article explained what “vespid” means with a simple example.*
- *In class, the teacher used “vespid” to mean mostly social nest-building wasps.*

---

vespid wasp *(noun)*

Mostly social nest-building wasps.

- *He looked up “vespid wasp” because he had never seen it before.*
- *They discussed “vespid wasp” during the group presentation.*

---

vespula maculifrons *(noun)*

Small yellow-marked social wasp commonly nesting in the ground.

- *She wrote a short paragraph that included “vespula maculifrons.”*
- *The article explained what “vespula maculifrons” means with a simple example.*

---

vestiary *(adjective)*

Relating to clothing (especially vestments).

- *A “vestiary” approach may work better in this case.*
- *Would you call this situation “vestiary”? Explain why.*

---

vestiture *(noun)*

An archaic term for clothing.

- *She wrote a short paragraph that included “vestiture.”*
- *He looked up “vestiture” because he had never seen it before.*

---

Slender delicate plant with wide roundish deeply lobed leaves and deep pink to violet funnel-shaped flowers; British Columbia to northern Oregon and west to Idaho and Montana.

- *He looked up "violet suksdorfia" because he had never seen it before.*
- *Understanding "violet suksdorfia" helps you talk about this topic clearly.*

---

violoncellist *(noun)*

Someone who plays a violoncello.

- *They discussed "violoncellist" during the group presentation.*
- *The article explained what "violoncellist" means with a simple example.*

---

viomycin *(noun)*

A basic polypeptide antibiotic (trade name Viocin) administered intramuscularly (along with other drugs) in the treatment of tuberculosis.

- *Understanding "viomycin" helps you talk about this topic clearly.*
- *The article explained what "viomycin" means with a simple example.*

---

viorna baldwinii *(noun)*

Erect clematis of Florida having pink to purple flowers.

- *Understanding "viorna baldwinii" helps you talk about this topic clearly.*
- *He looked up "viorna baldwinii" because he had never seen it before.*

viosterol *(noun)*

A fat-soluble vitamin that prevents rickets.

- *The article explained what "viosterol" means with a simple example.*
- *In class, the teacher used "viosterol" to mean a fat-soluble vitamin that prevents rickets.*

viperidae *(noun)*

Old World vipers.

- *They discussed "viperidae" during the group presentation.*
- *In class, the teacher used "viperidae" to mean old world vipers.*

viperine grass snake *(noun)*

A small harmless grass snake.

- *In class, the teacher used "viperine grass snake" to mean a small harmless grass snake.*
- *The article explained what "viperine grass snake" means with a simple example.*

viracept *(noun)*

A protease inhibitor (trade name Viracept) used in treating HIV usually in combination with other drugs.

- *He looked up "viracept" because he had never seen it before.*
- *In class, the teacher used "viracept" to mean a protease inhibitor (trade name viracept) used in....*

viraemia *(noun)*

The presence of a virus in the blood stream.

- *In class, the teacher used "viraemia" to mean the presence of a virus in the blood stream.*
- *The article explained what "viraemia" means with a simple example.*

viramune *(noun)*

A non-nucleoside reverse transcriptase inhibitor (trade name Viramune) used to treat AIDS and HIV.

- *She wrote a short paragraph that included "viramune."*
- *Understanding "viramune" helps you talk about this topic clearly.*

vireonidae *(noun)*

Small insectivorous American songbirds.

- *In class, the teacher used "vireonidae" to mean small insectivorous american songbirds.*
- *He looked up "vireonidae" because he had never seen it before.*

virgilia oroboides *(noun)*

Tree with odd-pinnate leaves and racemes of fragrant pink to purple flowers.

- *They discussed "virgilia oroboides" during the group presentation.*
- *In class, the teacher used "virgilia oroboides" to mean tree with odd-pinnate leaves and racemes of....*

virginia crownbeard *(noun)*

Tall perennial herb having clusters of white flowers; the eastern United States.

- *Understanding "virginia crownbeard" helps you talk about this topic clearly.*
- *They discussed "virginia crownbeard" during the group presentation.*

virginia serpentaria *(noun)*

Birthwort of the eastern United States woodlands.

- *She wrote a short paragraph that included "virginia serpentaria."*
- *Understanding "virginia serpentaria" helps you talk about this topic clearly.*

virginia serpentary *(noun)*

Birthwort of the eastern United States woodlands.

- *He looked up "virginia serpentary" because he had never seen it before.*
- *She wrote a short paragraph that included "virginia serpentary."*

virginia waterleaf *(noun)*

Showy perennial herb with white flowers; leaves sometimes used as edible greens in southeastern United States.

- *Understanding "virginia waterleaf" helps you talk about this topic clearly.*
- *He looked up "virginia waterleaf" because he had never seen it before.*

---

viricidal *(adjective)*

Tending to destroy viruses.

- *The speaker chose "viricidal" because it captured the feeling precisely.*
- *It is useful to describe something as "viricidal" when it is tending to destroy viruses.*

---

viricide *(noun)*

An agent (physical or chemical) that inactivates or destroys viruses.

- *She wrote a short paragraph that included "viricide."*
- *The article explained what "viricide" means with a simple example.*

---

viridity *(noun)*

Green color or pigment; resembling the color of growing grass.

- *Understanding "viridity" helps you talk about this topic clearly.*
- *He looked up "viridity" because he had never seen it before.*

---

virilisation *(noun)*

The abnormal development of male sexual characteristics in a female (usually as the result of hormone therapies or adrenal malfunction).

- *She wrote a short paragraph that included "virilisation."*
- *They discussed "virilisation" during the group presentation.*

---

virilise *(verb)*

Produce virilism in or cause to assume masculine characteristics, as through a hormonal imbalance or hormone therapy.

- *Can you use "virilise" in a sentence that fits this situation?*
- *She tried to use "virilise" carefully so everyone would understand.*

---

The development of male secondary sexual characteristics in a female (or prematurely in a young boy).

- *The article explained what "virilism" means with a simple example.*
- *In class, the teacher used "virilism" to mean the development of male secondary sexual....*

---

virilize *(verb)*

Produce virilism in or cause to assume masculine characteristics, as through a hormonal imbalance or hormone therapy.

- *She tried to use "virilize" carefully so everyone would understand.*
- *In everyday English, people use "virilize" when talking about this idea.*

---

virino *(noun)*

(microbiology) a hypothetical infectious particle thought to be the cause of scrapie and other degenerative diseases of the central nervous system; consists of nucleic acid in a protective coat of host cell proteins.

- *The article explained what "virino" means with a simple example.*
- *Understanding "virino" helps you talk about this topic clearly.*

---

virucidal *(adjective)*

Tending to destroy viruses.

- *The speaker chose "virucidal" because it captured the feeling precisely.*
- *Would you call this situation "virucidal"? Explain why.*

---

virucide *(noun)*

An agent (physical or chemical) that inactivates or destroys viruses.

- *She wrote a short paragraph that included "virucide."*
- *They discussed "virucide" during the group presentation.*

---

virulency *(noun)*

Extreme harmfulness (as the capacity of a microorganism to cause disease).

- *The article explained what "virulency" means with a simple example.*

- *Understanding "virulency" helps you talk about this topic clearly.*

---

virusoid *(noun)*

The smallest of viruses; a plant virus with its RNA arranged in a circular chromosome without a protein coat.

- *The article explained what "virusoid" means with a simple example.*
- *They discussed "virusoid" during the group presentation.*

---

visaged *(adjective)*

Having a face or visage as specified.

- *Gloomy-visaged funeral directors.*
- *Her writing became clearer after she learned "visaged."*

---

viscaceae *(noun)*

In some classifications considered a subfamily of Loranthaceae.

- *Understanding "viscaceae" helps you talk about this topic clearly.*
- *They discussed "viscaceae" during the group presentation.*

---

viscacha *(noun)*

Gregarious burrowing rodent larger than the chinchillas.

- *In class, the teacher used "viscacha" to mean gregarious burrowing rodent larger than the chinchillas.*
- *The article explained what "viscacha" means with a simple example.*

---

viscidity *(noun)*

The property of being cohesive and sticky.

- *In class, the teacher used "viscidity" to mean the property of being cohesive and sticky.*
- *The article explained what "viscidity" means with a simple example.*

---

viscidly *(adverb)*

In a sticky viscid manner.

- *Try rewriting the sentence and include "viscidly" naturally.*
- *She spoke "viscidly," and the audience immediately understood her point.*

---

viscidness *(noun)*

The property of being cohesive and sticky.

- *The article explained what "viscidness" means with a simple example.*
- *Understanding "viscidness" helps you talk about this topic clearly.*

---

viscometric *(adjective)*

Of or relating to the measurement of viscosity.

- *Students compared "viscometric" with similar adjectives in the lesson.*
- *It is useful to describe something as "viscometric" when it is of or relating to the measurement of viscosity.*

---

viscometry *(noun)*

The measurement of viscosity.

- *They discussed "viscometry" during the group presentation.*
- *She wrote a short paragraph that included "viscometry."*

---

viscosimeter *(noun)*

A measuring instrument for measuring viscosity.

- *She wrote a short paragraph that included "viscosimeter."*
- *They discussed "viscosimeter" during the group presentation.*

---

viscosimetric *(adjective)*

Of or relating to the measurement of viscosity.

- *Would you call this situation "viscosimetric"? Explain why.*
- *A "viscosimetric" approach may work better in this case.*

---

viscosimetry *(noun)*

The measurement of viscosity.

- *The article explained what "viscosimetry" means with a simple example.*
- *In class, the teacher used "viscosimetry" to mean the measurement of viscosity.*

---

viscounty *(noun)*

The domain controlled by a viscount or viscountess.

- *He looked up "viscounty" because he had never seen it before.*
- *In class, the teacher used "viscounty" to mean the domain controlled by a viscount or viscountess.*

---

viscousness *(noun)*

Resistance of a liquid to shear forces (and hence to flow).

- *The article explained what "viscousness" means with a simple example.*
- *In class, the teacher used "viscousness" to mean resistance of a liquid to shear forces (and hence....*

---

viselike *(adjective)*

Clamped as in a vise.

- *A viselike grip.*
- *Would you call this situation "viselike"? Explain why.*

---

vishnuism *(noun)*

Worship of Vishnu one of the 3 chief gods of the Hindu pantheon.

- *Understanding "vishnuism" helps you talk about this topic clearly.*
- *The article explained what "vishnuism" means with a simple example.*

- *In class, the teacher used "wordmonger" to mean a writer who uses language carelessly or....*
- *He looked up "wordmonger" because he had never seen it before.*

---

workbag *(noun)*

Container for holding implements and materials for work (especially for sewing).

- *They discussed "workbag" during the group presentation.*
- *She wrote a short paragraph that included "workbag."*

---

workbasket *(noun)*

Container for holding implements and materials for work (especially for sewing).

- *They discussed "workbasket" during the group presentation.*
- *The article explained what "workbasket" means with a simple example.*

---

workboard *(noun)*

A horizontal board that provides a supported surface for manual work.

- *They discussed "workboard" during the group presentation.*
- *He looked up "workboard" because he had never seen it before.*

---

workfellow *(noun)*

An associate that one works with.

- *Understanding "workfellow" helps you talk about this topic clearly.*
- *In class, the teacher used "workfellow" to mean an associate that one works with.*

---

wormcast *(noun)*

Cylindrical mass of earth voided by a burrowing earthworm or lugworm.

- *He looked up "wormcast" because he had never seen it before.*
- *She wrote a short paragraph that included "wormcast."*

---

wormian bone *(noun)*

Any of the tiny soft bones found in the sutures between cranial bones.

- *They discussed "wormian bone" during the group presentation.*
- *Understanding "wormian bone" helps you talk about this topic clearly.*

---

wormseed *(noun)*

Rank-smelling tropical American pigweed.

- *In class, the teacher used "wormseed" to mean rank-smelling tropical american pigweed.*
- *Understanding "wormseed" helps you talk about this topic clearly.*

---

wormseed mustard *(noun)*

Slender yellow-flowered European mustard often troublesome as a weed; formerly used as an anthelmintic.

- *Understanding "wormseed mustard" helps you talk about this topic clearly.*
- *In class, the teacher used "wormseed mustard" to mean slender yellow-flowered european mustard often....*

worriment *(noun)*

A difficulty that causes anxiety.

- *The article explained what "worriment" means with a simple example.*
- *In class, the teacher used "worriment" to mean a difficulty that causes anxiety.*

worthful *(adjective)*

(Roman Catholic Church) Anglo-Saxon missionary who was sent to Frisia and Germany to spread the Christian faith; was martyred in Frisia (680-754).

- *The article explained what "wynfrith" means with a simple example.*
- *In class, the teacher used "wynfrith" to mean (roman catholic church) anglo-saxon missionary who....*

---

wynnea *(noun)*

A genus of fungi belonging to the family Sarcoscyphaceae.

- *He looked up "wynnea" because he had never seen it before.*
- *She wrote a short paragraph that included "wynnea."*

---

wynnea americana *(noun)*

A fungus composed of several apothecia that look like elongated rabbit ears; the sterile surface is dark brown and warty; the fertile surface is smooth and pinkish orange.

- *They discussed "wynnea americana" during the group presentation.*

- *She wrote a short paragraph that included "wynnea americana."*

---

wynnea sparassoides *(noun)*

A fungus with a long solid stalk embedded in soil and a yellow-brown head shaped like a cauliflower.

- *She wrote a short paragraph that included "wynnea sparassoides."*
- *The article explained what "wynnea sparassoides" means with a simple example.*

---

wyomingite *(noun)*

A native or resident of Wyoming.

- *Understanding "wyomingite" helps you talk about this topic clearly.*
- *In class, the teacher used "wyomingite" to mean a native or resident of wyoming.*

---

xanthelasma *(noun)*

Xanthoma of the eyelids; occurs chiefly in the elderly.

- *He looked up "xanthelasma" because he had never seen it before.*
- *Understanding "xanthelasma" helps you talk about this topic clearly.*

---

xanthemia *(noun)*

Excess carotene in the blood stream; can cause the skin to turn a pale yellow or red color.

- *They discussed "xanthemia" during the group presentation.*
- *She wrote a short paragraph that included "xanthemia."*

---

xanthic acid *(noun)*

Any of a class of unstable organic acids containing sulphur.

- *Understanding "xanthic acid" helps you talk about this topic clearly.*
- *He looked up "xanthic acid" because he had never seen it before.*

---

xanthoma *(noun)*

A skin problem marked by the development (on the eyelids and neck and back) of irregular yellow nodules; sometimes attributable to disturbances of cholesterol metabolism.

- *In class, the teacher used "xanthoma" to mean a skin problem marked by the development (on the....*
- *The article explained what "xanthoma" means with a simple example.*

---

xanthoma disseminatum *(noun)*

Rare chronic xanthoma of adults in which orange or brownish papules develop on many surfaces of the body.

- *They discussed "xanthoma disseminatum" during the group presentation.*
- *The article explained what "xanthoma disseminatum" means with a simple example.*

---

xanthoma multiplex *(noun)*

Widespread xanthomas (especially on elbows and knees); often associated with a disorder of lipid metabolism.

- *Understanding "xanthoma multiplex" helps you talk about this topic clearly.*
- *They discussed "xanthoma multiplex" during the group presentation.*

---

xanthomatosis *(noun)*

Widespread xanthomas (especially on elbows and knees); often associated with a disorder of lipid metabolism.

- *He looked up "xanthomatosis" because he had never seen it before.*
- *They discussed "xanthomatosis" during the group presentation.*

---

xanthomonad *(noun)*

Bacteria producing yellow non-water-soluble pigments; some pathogenic for plants.

- *The article explained what "xanthomonad" means with a simple example.*
- *They discussed "xanthomonad" during the group presentation.*

---

xanthophyceae *(noun)*

Yellow-green algae.

- *She wrote a short paragraph that included "xanthophyceae."*
- *He looked up "xanthophyceae" because he had never seen it before.*

---

xanthophyl *(noun)*

Yellow carotenoid pigments in plants and animal fats and egg yolks.

- *They discussed "xanthophyl" during the group presentation.*
- *In class, the teacher used "xanthophyl" to mean yellow carotenoid pigments in plants and animal....*

---

xanthopsia *(noun)*

Visual defect in which objects appear to have a yellowish hue; sometimes occurs in cases of jaundice.

- *She wrote a short paragraph that included "xanthopsia."*
- *The article explained what "xanthopsia" means with a simple example.*

---

xanthorrhoeaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *They discussed "xanthorrhoeaceae" during the group presentation.*
- *Understanding "xanthorrhoeaceae" helps you talk about this topic clearly.*

---

xanthorroea *(noun)*

Grass trees; sometimes placed in family Xanthorrhoeaceae.

- *She wrote a short paragraph that included "xanthorroea."*
- *He looked up "xanthorroea" because he had never seen it before.*

---

xanthosis *(noun)*

An abnormal yellow discoloration of the skin.

- *The article explained what "xanthosis" means with a simple example.*
- *Understanding "xanthosis" helps you talk about this topic clearly.*

---

xanthosoma *(noun)*

Tropical American tuberous perennials.

- *He looked up "xanthosoma" because he had never seen it before.*
- *She wrote a short paragraph that included "xanthosoma."*

---

xanthosoma atrovirens *(noun)*

Tropical American aroid having edible tubers that are cooked and eaten like yams or potatoes.

- *The article explained what "xanthosoma atrovirens" means with a simple example.*
- *Understanding "xanthosoma atrovirens" helps you talk about this topic clearly.*

---

xanthosoma sagittifolium *(noun)*

Tropical American aroid having edible tubers that are cooked and eaten like yams or potatoes.

- *They discussed "xanthosoma sagittifolium" during the group presentation.*
- *He looked up "xanthosoma sagittifolium" because he had never seen it before.*

---

xantusiidae *(noun)*

Night lizards.

- *She wrote a short paragraph that included "xantusiidae."*
- *He looked up "xantusiidae" because he had never seen it before.*

---

xciv *(adjective)*

Being four more than ninety.

- *Students compared "xciv" with similar adjectives in the lesson.*
- *It is useful to describe something as "xciv" when it is being four more than ninety.*

---

xcl *(adjective)*

Being ten more than one hundred eighty.

- *The speaker chose "xcl" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "xcl."*

---

xcvii *(adjective)*

Being seven more than ninety.

- *Her writing became clearer after she learned “xcvii.”*
- *The speaker chose “xcvii” because it captured the feeling precisely.*

---

xcviii *(adjective)*

Being eight more than ninety.

- *Students compared “xcviii” with similar adjectives in the lesson.*
- *It is useful to describe something as “xcviii” when it is being eight more than ninety.*

---

xenarthra *(noun)*

Armadillos; American anteaters; sloths.

- *She wrote a short paragraph that included “xenarthra.”*
- *He looked up “xenarthra” because he had never seen it before.*

---

xenicidae *(noun)*

Alternative names for the family comprising the New Zealand wrens.

- *Understanding “xenicidae” helps you talk about this topic clearly.*
- *The article explained what “xenicidae” means with a simple example.*

---

xenicus *(noun)*

Type genus for the Xenicidae.

- *They discussed “xenicus” during the group presentation.*
- *Understanding “xenicus” helps you talk about this topic clearly.*

---

xenicus gilviventris *(noun)*

Short-tailed bird resembling a wren.

- *They discussed “xenicus gilviventris” during the group presentation.*
- *Understanding “xenicus gilviventris” helps you talk about this topic clearly.*

---

xenogeneic *(adjective)*

Denoting or relating to cells or tissues from individuals belonging to different species.

- *A “xenogeneic” approach may work better in this case.*
- *Students compared “xenogeneic” with similar adjectives in the lesson.*

---

xenogenesis *(noun)*

The alternation of two or more different forms in the life cycle of a plant or animal.

- *He looked up “xenogenesis” because he had never seen it before.*
- *In class, the teacher used “xenogenesis” to mean the alternation of two or more different forms in....*

---

xenolith *(noun)*

(geology) a piece of rock of different origin from the igneous rock in which it is embedded.

- *They discussed “xenolith” during the group presentation.*
- *The article explained what “xenolith” means with a simple example.*

---

xenopodidae *(noun)*

In some classifications the family of the genus Xenopus which is otherwise included in the family Pipidae.

- *He looked up “xenopodidae” because he had never seen it before.*
- *She wrote a short paragraph that included “xenopodidae.”*

---

xenorhyncus *(noun)*

East Indian and Australian storks.

- *He looked up “xenorhyncus” because he had never seen it before.*
- *In class, the teacher used “xenorhyncus” to mean east indian and australian storks.*

---

xenorhyncus asiaticus *(noun)*

Large mostly white Australian stork.

- *In class, the teacher used “xenorhyncus asiaticus” to mean large mostly white australian stork.*
- *Understanding “xenorhyncus asiaticus” helps you talk about this topic clearly.*

xenosauridae *(noun)*

Monotypic family of Mexican lizards.

- *He looked up "xenosauridae" because he had never seen it before.*
- *She wrote a short paragraph that included "xenosauridae."*

xenosaurus *(noun)*

Type and sole genus of Xenosauridae: slender-bodied Mexican lizards having the upper surface covered with tiny granules and tubercles.

- *She wrote a short paragraph that included "xenosaurus."*
- *The article explained what "xenosaurus" means with a simple example.*

xenotransplant *(noun)*

A surgical procedure in which tissue or whole organs are transfered from one species to another species.

- *She wrote a short paragraph that included "xenotransplant."*
- *The article explained what "xenotransplant" means with a simple example.*

xeranthemum *(noun)*

Any plant of the genus Xeranthemum native to southern Europe having chaffy or silvery flower heads with purplish tubular flowers.

- *He looked up "xeranthemum" because he had never seen it before.*
- *She wrote a short paragraph that included "xeranthemum."*

xeranthemum annuum *(noun)*

Mostly widely cultivated species of everlasting flowers having usually purple flowers; southern Europe to Iran; naturalized elsewhere.

- *In class, the teacher used "xeranthemum annuum" to mean mostly widely cultivated species of everlasting....*
- *Understanding "xeranthemum annuum" helps you talk about this topic clearly.*

xerobates *(noun)*

Possible new genus for desert and Texas tortoises based on recent research.

- *She wrote a short paragraph that included "xerobates."*
- *He looked up "xerobates" because he had never seen it before.*

xerodermia *(noun)*

A mild form of ichthyosis characterized by abnormal dryness and roughness of the skin.

- *He looked up "xerodermia" because he had never seen it before.*
- *In class, the teacher used "xerodermia" to mean a mild form of ichthyosis characterized by abnormal....*

xeroma *(noun)*

Abnormal dryness of the conjunctiva and cornea of the eyes; may be due to a systemic deficiency of vitamin A.

- *He looked up "xeroma" because he had never seen it before.*
- *In class, the teacher used "xeroma" to mean abnormal dryness of the conjunctiva and cornea of....*

xerophile *(noun)*

Plant adapted for life with a limited supply of water; compare hydrophyte and mesophyte.

- *He looked up "xerophile" because he had never seen it before.*
- *They discussed "xerophile" during the group presentation.*

xerophilous plant *(noun)*

Plant adapted for life with a limited supply of water; compare hydrophyte and mesophyte.

- *They discussed "xerophilous plant" during the group presentation.*
- *In class, the teacher used "xerophilous plant" to mean plant adapted for life with a limited supply of....*

xerophthalmia *(noun)*

Abnormal dryness of the conjunctiva and cornea of the eyes; may be due to a systemic deficiency of vitamin A.

- *In class, the teacher used "xerophthalmia" to mean abnormal dryness of the conjunctiva and cornea of....*
- *They discussed "xerophthalmia" during the group presentation.*

xerophthalmus *(noun)*

Abnormal dryness of the conjunctiva and cornea of the eyes; may be due to a systemic deficiency of vitamin A.

- *In class, the teacher used "xerophthalmus" to mean abnormal dryness of the conjunctiva and cornea of....*
- *They discussed "xerophthalmus" during the group presentation.*

---

xerophyllum *(noun)*

Small genus of North American herbs having grasslike basal leaves: squaw grass; sometimes placed in family Melanthiaceae.

- *She wrote a short paragraph that included "xerophyllum."*
- *He looked up "xerophyllum" because he had never seen it before.*

---

xerophyllum tenax *(noun)*

Plant of western North America having woody rhizomes and tufts of stiff grasslike basal leaves and spikes of creamy white flowers.

- *She wrote a short paragraph that included "xerophyllum tenax."*
- *Understanding "xerophyllum tenax" helps you talk about this topic clearly.*

---

xerophyte *(noun)*

Plant adapted for life with a limited supply of water; compare hydrophyte and mesophyte.

- *He looked up "xerophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "xerophyte."*

---

xeroradiography *(noun)*

Radiography using X-rays and xerographic (rather than roentgenographic) techniques.

- *He looked up "xeroradiography" because he had never seen it before.*
- *Understanding "xeroradiography" helps you talk about this topic clearly.*

---

xerotes *(noun)*

The condition of not containing or being covered by a liquid (especially water).

- *He looked up "xerotes" because he had never seen it before.*
- *She wrote a short paragraph that included "xerotes."*

---

xestobium rufovillosum *(noun)*

Bores through wood making a ticking sound popularly thought to presage death.

- *She wrote a short paragraph that included "xestobium rufovillosum."*
- *They discussed "xestobium rufovillosum" during the group presentation.*

---

ximenesia encelioides *(noun)*

Coarse greyish-green annual yellow-flowered herb; southwestern United States to Mexico.

- *The article explained what "ximenesia encelioides" means with a simple example.*
- *In class, the teacher used "ximenesia encelioides" to mean coarse greyish-green annual yellow-flowered herb;....*

---

xiphiidae *(noun)*

Comprising the common swordfishes.

- *She wrote a short paragraph that included "xiphiidae."*
- *They discussed "xiphiidae" during the group presentation.*

---

xiphium iris *(noun)*

Bulbous iris of western Mediterranean region having usually violet-purple flowers.

- *She wrote a short paragraph that included "xiphium iris."*
- *He looked up "xiphium iris" because he had never seen it before.*

---

xiphosura *(noun)*

Horseshoe crabs and extinct forms.

- *They discussed "xiphosura" during the group presentation.*
- *The article explained what "xiphosura" means with a simple example.*

---

xiphosurus polyphemus *(noun)*

Large marine arthropod of the Atlantic coast of North America having a domed carapace that is shaped like a horseshoe and a stiff pointed tail; a living fossil related to the wood louse.

- *He looked up "xiphosurus polyphemus" because he had never seen it before.*

- *In class, the teacher used "xiphosurus polyphemus" to mean large marine arthropod of the atlantic coast of....*

---

xylaria *(noun)*

Type genus of Xylariaceae; fungi with perithecia in the upper part of erect black woody stromata.

- *In class, the teacher used "xylaria" to mean type genus of xylariaceae; fungi with perithecia in....*
- *He looked up "xylaria" because he had never seen it before.*

---

xylaria mali *(noun)*

Fungus causing black root rot in apples.

- *She wrote a short paragraph that included "xylaria mali."*
- *He looked up "xylaria mali" because he had never seen it before.*

---

xylaria polymorpha *(noun)*

The fruiting bodies of the fungi of the genus Xylaria.

- *The article explained what "xylaria polymorpha" means with a simple example.*
- *Understanding "xylaria polymorpha" helps you talk about this topic clearly.*

---

xylariaceae *(noun)*

Family of fungi characterized by dark brown to black spores.

- *Understanding "xylariaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "xylariaceae" to mean family of fungi characterized by dark brown to....*

---

xylocopa *(noun)*

Carpenter bees.

- *The article explained what "xylocopa" means with a simple example.*
- *In class, the teacher used "xylocopa" to mean carpenter bees.*

---

xylol *(noun)*

A colorless flammable volatile liquid hydrocarbon used as a solvent.

- *He looked up "xylol" because he had never seen it before.*
- *She wrote a short paragraph that included "xylol."*

---

xylomelum *(noun)*

Small species of Australian trees or shrubs; grown for their fruit and flowers.

- *Understanding "xylomelum" helps you talk about this topic clearly.*
- *He looked up "xylomelum" because he had never seen it before.*

---

xylomelum pyriforme *(noun)*

Tree bearing pear-shaped fruit with a thick woody epicarp.

- *The article explained what "xylomelum pyriforme" means with a simple example.*
- *They discussed "xylomelum pyriforme" during the group presentation.*

---

xylophonist *(noun)*

Someone who plays a xylophone.

- *The article explained what "xylophonist" means with a simple example.*
- *Understanding "xylophonist" helps you talk about this topic clearly.*

---

xylopia *(noun)*

Tropical evergreen trees or shrubs; chiefly African.

- *In class, the teacher used "xylopia" to mean tropical evergreen trees or shrubs; chiefly african.*
- *The article explained what "xylopia" means with a simple example.*

---

xylopia aethiopica *(noun)*

Tropical west African evergreen tree bearing pungent aromatic seeds used as a condiment and in folk medicine.

- *They discussed "xylopia aethiopica" during the group presentation.*
- *In class, the teacher used "xylopia aethiopica" to mean tropical west african evergreen tree bearing....*

---

xylosma *(noun)*

Shrub or small tree grown as an ornamental in mild climates for its neat evergreen foliage and fragrant late flowers; native of China.

- *She wrote a short paragraph that included "xylosma."*
- *Understanding "xylosma" helps you talk about this topic clearly.*

xylosma congestum *(noun)*

Shrub or small tree grown as an ornamental in mild climates for its neat evergreen foliage and fragrant late flowers; native of China.

- *In class, the teacher used "xylosma congestum" to mean shrub or small tree grown as an ornamental in mild....*
- *The article explained what "xylosma congestum" means with a simple example.*

xyphophorus helleri *(noun)*

Freshwater fish of Central America having a long swordlike tail; popular aquarium fish.

- *He looked up "xyphophorus helleri" because he had never seen it before.*
- *Understanding "xyphophorus helleri" helps you talk about this topic clearly.*

xyridaceae *(noun)*

Plants of tropical to temperate regions; usually in wet places.

- *They discussed "xyridaceae" during the group presentation.*
- *The article explained what "xyridaceae" means with a simple example.*

xyridales *(noun)*

An order of monocotyledonous herbs.

- *The article explained what "xyridales" means with a simple example.*
- *In class, the teacher used "xyridales" to mean an order of monocotyledonous herbs.*

xyris *(noun)*

Chiefly American marsh plants, having usually yellow flowers.

- *They discussed "xyris" during the group presentation.*
- *The article explained what "xyris" means with a simple example.*

xyris operculata *(noun)*

Of Australia.

- *They discussed "xyris operculata" during the group presentation.*
- *She wrote a short paragraph that included "xyris operculata."*

yacca *(noun)*

West Indian evergreen with medium to long leaves.

- *The article explained what "yacca" means with a simple example.*
- *Understanding "yacca" helps you talk about this topic clearly.*

yacca podocarp *(noun)*

West Indian evergreen with medium to long leaves.

- *The article explained what "yacca podocarp" means with a simple example.*
- *In class, the teacher used "yacca podocarp" to mean west indian evergreen with medium to long leaves.*

yahve *(noun)*

A name for the God of the Old Testament as transliterated from the Hebrew consonants YHVH.

- *She wrote a short paragraph that included "yahve."*
- *Understanding "yahve" helps you talk about this topic clearly.*

yahveh *(noun)*

A name for the God of the Old Testament as transliterated from the Hebrew consonants YHVH.

- *The article explained what "yahveh" means with a simple example.*
- *They discussed "yahveh" during the group presentation.*

yahwe *(noun)*

A name for the God of the Old Testament as transliterated from the Hebrew consonants YHVH.

- *Understanding "yahwe" helps you talk about this topic clearly.*
- *They discussed "yahwe" during the group presentation.*

---

yaltopya *(noun)*

Ethiopia is a republic in northeastern Africa on the Red Sea; formerly called Abyssinia.

- *She wrote a short paragraph that included "yaltopya."*
- *He looked up "yaltopya" because he had never seen it before.*

---
