---

macowanites *(noun)*

A stout-stemmed genus of fungus belonging to the family Secotiaceae having fruiting bodies that never expand completely.

- *The article explained what "macowanites" means with a simple example.*
- *In class, the teacher used "macowanites" to mean a stout-stemmed genus of fungus belonging to the....*

---

macowanites americanus *(noun)*

A small fungus with a fragile cap that cracks to expose the white context and a white stalk that is practically enclosed by the cap.

- *She wrote a short paragraph that included "macowanites americanus."*
- *He looked up "macowanites americanus" because he had never seen it before.*

---

macrocephalon maleo *(noun)*

Celebes megapode that lays eggs in holes in sandy beaches.

- *He looked up "macrocephalon maleo" because he had never seen it before.*
- *She wrote a short paragraph that included "macrocephalon maleo."*

---

macrocheira *(noun)*

Giant crabs of Japan.

- *He looked up "macrocheira" because he had never seen it before.*
- *She wrote a short paragraph that included "macrocheira."*

---

macrocheira kaempferi *(noun)*

Very large deep-water Japanese crab.

- *In class, the teacher used "macrocheira kaempferi" to mean very large deep-water japanese crab.*
- *Understanding "macrocheira kaempferi" helps you talk about this topic clearly.*

---

macroclemys *(noun)*

Includes the alligator snapping turtle.

- *She wrote a short paragraph that included "macroclemys."*
- *He looked up "macroclemys" because he had never seen it before.*

---

macroclemys temmincki *(noun)*

Large species having three ridges on its back; found in southeastern United States.

- *He looked up "macroclemys temmincki" because he had never seen it before.*
- *They discussed "macroclemys temmincki" during the group presentation.*

---

macrocyte *(noun)*

Abnormally large red blood cell (associated with pernicious anemia).

- *She wrote a short paragraph that included "macrocyte."*
- *The article explained what "macrocyte" means with a simple example.*

---

macrodactylus *(noun)*

A genus of Melolonthidae.

- *They discussed "macrodactylus" during the group presentation.*
- *In class, the teacher used "macrodactylus" to mean a genus of melolonthidae.*

---

macrodactylus subspinosus *(noun)*

Common North American beetle: larvae feed on roots and adults on leaves and flowers of e.g. rose bushes or apple trees or grape vines.

- *She wrote a short paragraph that included "macrodactylus subspinosus."*
- *He looked up "macrodactylus subspinosus" because he had never seen it before.*

---

macrodantin *(noun)*

Derivative of nitrofuran used as an antibacterial medicine (trade name Macrodantin) effective against a broad range of Gram-positive and Gram-negative bacteria; used to treat infections of the urinary tract.

- *He looked up "macrodantin" because he had never seen it before.*
- *She wrote a short paragraph that included "macrodantin."*

macroeconomist *(noun)*

An economist who specializes in macroeconomics.

- *She wrote a short paragraph that included "macroeconomist."*
- *The article explained what "macroeconomist" means with a simple example.*

macroglia *(noun)*

Tissue consisting of large stellate neuroglial cells.

- *She wrote a short paragraph that included "macroglia."*
- *He looked up "macroglia" because he had never seen it before.*

macronectes *(noun)*

Giant petrels.

- *Understanding "macronectes" helps you talk about this topic clearly.*
- *They discussed "macronectes" during the group presentation.*

macronectes giganteus *(noun)*

Large brownish petrel chiefly of Antarctic seas.

- *They discussed "macronectes giganteus" during the group presentation.*
- *He looked up "macronectes giganteus" because he had never seen it before.*

macropodidae *(noun)*

Kangaroos; wallabies.

- *Understanding "macropodidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "macropodidae."*

macropus agiles *(noun)*

A small wallaby having a height of 30 inches.

- *They discussed "macropus agiles" during the group presentation.*
- *The article explained what "macropus agiles" means with a simple example.*

macrorhamphosidae *(noun)*

Bellows fishes.

- *They discussed "macrorhamphosidae" during the group presentation.*
- *She wrote a short paragraph that included "macrorhamphosidae."*

macroscopical *(adjective)*

Visible to the naked eye; using the naked eye.

- *Would you call this situation "macroscopical"? Explain why.*
- *Her writing became clearer after she learned "macroscopical."*

macrosporangium *(noun)*

A plant structure that produces megaspores.

- *The article explained what "macrosporangium" means with a simple example.*
- *Understanding "macrosporangium" helps you talk about this topic clearly.*

macrospore *(noun)*

Larger of the two types of spore produced in heterosporous plants; develops in ovule into a female gametophyte.

- *The article explained what "macrospore" means with a simple example.*
- *Understanding "macrospore" helps you talk about this topic clearly.*

macrotis *(noun)*

A genus of Peramelidae.

- *Understanding "macrotis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "macrotis."*

macrotis lagotis *(noun)*

Bandicoot with leathery ears like a rabbit.

- *The article explained what "macrotis lagotis" means with a simple example.*
- *Understanding "macrotis lagotis" helps you talk about this topic clearly.*

---

macrotus *(noun)*

Large-eared greyish bat of southern California and northwestern Mexico.

- *Understanding "macrotus" helps you talk about this topic clearly.*
- *The article explained what "macrotus" means with a simple example.*

---

macrotus californicus *(noun)*

Large-eared greyish bat of southern California and northwestern Mexico.

- *Understanding "macrotus californicus" helps you talk about this topic clearly.*
- *They discussed "macrotus californicus" during the group presentation.*

---

macrotyloma *(noun)*

Annual or perennial vines of Africa and India and Australia; plants often placed in genus Dolichos.

- *He looked up "macrotyloma" because he had never seen it before.*
- *In class, the teacher used "macrotyloma" to mean annual or perennial vines of africa and india and....*

---

macrotyloma uniflorum *(noun)*

Twining herb of Old World tropics cultivated in India for food and fodder; sometimes placed in genus Dolichos.

- *The article explained what "macrotyloma uniflorum" means with a simple example.*
- *She wrote a short paragraph that included "macrotyloma uniflorum."*

---

macrozamia *(noun)*

Any treelike cycad of the genus Macrozamia having erect trunks and pinnate leaves and large cones with sometimes edible nuts; Australia.

- *He looked up "macrozamia" because he had never seen it before.*
- *She wrote a short paragraph that included "macrozamia."*

---

macrozamia communis *(noun)*

Large attractive palmlike evergreen cycad of New South Wales.

- *They discussed "macrozamia communis" during the group presentation.*
- *Understanding "macrozamia communis" helps you talk about this topic clearly.*

---

macrozamia spiralis *(noun)*

Large attractive palmlike evergreen cycad of New South Wales.

- *She wrote a short paragraph that included "macrozamia spiralis."*
- *He looked up "macrozamia spiralis" because he had never seen it before.*

---

macrozoarces *(noun)*

A genus of Zoarcidae.

- *They discussed "macrozoarces" during the group presentation.*
- *She wrote a short paragraph that included "macrozoarces."*

---

macrozoarces americanus *(noun)*

Common along northeastern coast of North America.

- *The article explained what "macrozoarces americanus" means with a simple example.*
- *They discussed "macrozoarces americanus" during the group presentation.*

---

maculation *(noun)*

A small contrasting part of something.

- *She wrote a short paragraph that included "maculation."*
- *They discussed "maculation" during the group presentation.*

---

macule *(noun)*

A patch of skin that is discolored but not usually elevated; caused by various diseases.

- *She wrote a short paragraph that included "macule."*

- *Understanding "macule" helps you talk about this topic clearly.*

---

madake *(noun)*

Large bamboo having thick-walled culms; native of China and perhaps Japan; widely grown elsewhere.

- *They discussed "madake" during the group presentation.*
- *He looked up "madake" because he had never seen it before.*

---

madderwort *(noun)*

Any of numerous trees or shrubs or vines of the family Rubiaceae.

- *She wrote a short paragraph that included "madderwort."*
- *Understanding "madderwort" helps you talk about this topic clearly.*

---

madeiras *(noun)*

A group of volcanic islands in the Atlantic Ocean to the west of Morocco; the group forms an autonomous region of Portugal.

- *He looked up "madeiras" because he had never seen it before.*
- *She wrote a short paragraph that included "madeiras."*

---

madnep *(noun)*

Biennial weed in Europe and America having large pinnate leaves and yellow flowers and a bitter and somewhat poisonous root; the ancestor of cultivated parsnip.

- *They discussed "madnep" during the group presentation.*
- *She wrote a short paragraph that included "madnep."*

---

madoqua *(noun)*

Genus comprising some small antelopes of eastern and northeastern Africa.

- *In class, the teacher used "madoqua" to mean genus comprising some small antelopes of eastern....*
- *The article explained what "madoqua" means with a simple example.*

---

madreporaria *(noun)*

Stony corals.

- *They discussed "madreporaria" during the group presentation.*
- *He looked up "madreporaria" because he had never seen it before.*

---

madrepore *(noun)*

Corals having calcareous skeletons aggregations of which form reefs and islands.

- *They discussed "madrepore" during the group presentation.*
- *She wrote a short paragraph that included "madrepore."*

---

madrigalist *(noun)*

A singer of madrigals.

- *They discussed "madrigalist" during the group presentation.*
- *She wrote a short paragraph that included "madrigalist."*

---

madrilene *(noun)*

A tomato-flavored consomme; often served chilled.

- *The article explained what "madrilene" means with a simple example.*
- *They discussed "madrilene" during the group presentation.*

---

madriporian coral *(noun)*

Corals having calcareous skeletons aggregations of which form reefs and islands.

- *She wrote a short paragraph that included "madriporian coral."*
- *He looked up "madriporian coral" because he had never seen it before.*

---

madrono *(noun)*

Evergreen tree of the Pacific coast of North America having glossy leathery leaves and orange-red edible berries; wood used for furniture and bark for tanning.

- *Understanding "madrono" helps you talk about this topic clearly.*
- *They discussed "madrono" during the group presentation.*

---

madwort *(noun)*

Any garden plant of the genus Alyssum having clusters of small yellow or white flowers.

- *He looked up "madwort" because he had never seen it before.*
- *They discussed "madwort" during the group presentation.*

---

maeandra *(noun)*

Brain corals.

- *The article explained what "maeandra" means with a simple example.*
- *They discussed "maeandra" during the group presentation.*

---

magicicada *(noun)*

Seventeen-year locust.

- *The article explained what "magicicada" means with a simple example.*
- *In class, the teacher used "magicicada" to mean seventeen-year locust.*

---

magicicada septendecim *(noun)*

North American cicada; appears in great numbers at infrequent intervals because the nymphs take 13 to 17 years to mature.

- *He looked up "magicicada septendecim" because he had never seen it before.*
- *In class, the teacher used "magicicada septendecim" to mean north american cicada; appears in great numbers at....*

---

magnanimousness *(noun)*

The quality of elevation of mind and exaltation of character or ideals or conduct.

- *He looked up "magnanimousness" because he had never seen it before.*
- *Understanding "magnanimousness" helps you talk about this topic clearly.*

---

magniloquent *(adjective)*

Lofty in style.

- *Students compared "magniloquent" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "magniloquent."*

---

magnolia fraseri *(noun)*

Small erect deciduous tree with large leaves in coiled formations at branch tips.

- *In class, the teacher used "magnolia fraseri" to mean small erect deciduous tree with large leaves in....*
- *Understanding "magnolia fraseri" helps you talk about this topic clearly.*

---

magnolia tripetala *(noun)*

Small deciduous tree of eastern North America having creamy white flowers and large leaves in formations like umbrellas at the ends of branches.

- *Understanding "magnolia tripetala" helps you talk about this topic clearly.*
- *The article explained what "magnolia tripetala" means with a simple example.*

---

magnoliaceae *(noun)*

Subclass Magnoliidae: genera Liriodendron, Magnolia, and Manglietia.

- *Understanding "magnoliaceae" helps you talk about this topic clearly.*
- *The article explained what "magnoliaceae" means with a simple example.*

---

magnoliid dicot family *(noun)*

Family of dicotyledonous flowering plants regarded as among the most primitive of extant angiosperms.

- *She wrote a short paragraph that included "magnoliid dicot family."*
- *He looked up "magnoliid dicot family" because he had never seen it before.*

---

magnoliid dicot genus *(noun)*

Genus of dicotyledonous flowering plants regarded as among the most primitive of extant angiosperms.

- *She wrote a short paragraph that included "magnoliid dicot genus."*
- *They discussed "magnoliid dicot genus" during the group presentation.*

---

magnoliophyta *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *In class, the teacher used "magnoliophyta" to mean comprising flowering plants that produce seeds....*
- *The article explained what "magnoliophyta" means with a simple example.*

---

magnoliopsid *(noun)*

Flowering plant with two cotyledons; the stem grows by deposit on its outside.

- *Understanding "magnoliopsid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "magnoliopsid."*

---

magnoliopsid family *(noun)*

Family of flowering plants having two cotyledons (embryonic leaves) in the seed which usually appear at germination.

- *He looked up "magnoliopsid family" because he had never seen it before.*
- *She wrote a short paragraph that included "magnoliopsid family."*

---

magnoliopsid genus *(noun)*

Genus of flowering plants having two cotyledons (embryonic leaves) in the seed which usually appear at germination.

- *He looked up "magnoliopsid genus" because he had never seen it before.*
- *Understanding "magnoliopsid genus" helps you talk about this topic clearly.*

---

magyarorszag *(noun)*

A republic in central Europe.

- *She wrote a short paragraph that included "magyarorszag."*
- *He looked up "magyarorszag" because he had never seen it before.*

---

mahagua *(noun)*

Erect forest tree of Cuba and Jamaica having variably hairy leaves and orange-yellow or orange-red flowers; yields a moderately dense timber for cabinetwork and gunstocks.

- *He looked up "mahagua" because he had never seen it before.*
- *Understanding "mahagua" helps you talk about this topic clearly.*

---

maharanee *(noun)*

A great rani; a princess in India or the wife of a maharaja.

- *In class, the teacher used "maharanee" to mean a great rani; a princess in india or the wife of a....*
- *Understanding "maharanee" helps you talk about this topic clearly.*

---

mahayanist *(noun)*

An adherent of Mahayana Buddhism.

- *The article explained what "mahayanist" means with a simple example.*
- *In class, the teacher used "mahayanist" to mean an adherent of mahayana buddhism.*

---

mahernia verticillata *(noun)*

African shrub having decumbent stems and slender yellow honey-scented flowers either solitary or in pairs.

- *They discussed "mahernia verticillata" during the group presentation.*
- *In class, the teacher used "mahernia verticillata" to mean african shrub having decumbent stems and slender....*

---

mahgrib *(noun)*

The region of northwest Africa comprising the Atlas Mountains and the coastlands of Morocco and Algeria and Tunisia.

- *He looked up "mahgrib" because he had never seen it before.*
- *She wrote a short paragraph that included "mahgrib."*

---

mahoe *(noun)*

Erect forest tree of Cuba and Jamaica having variably hairy leaves and orange-yellow or orange-red flowers; yields a moderately dense timber for cabinetwork and gunstocks.

- *In class, the teacher used "mahoe" to mean erect forest tree of cuba and jamaica having....*
- *He looked up "mahoe" because he had never seen it before.*

---

mahound *(noun)*

The Arab prophet who, according to Islam, was the last messenger of Allah (570-632).

- *He looked up "mahound" because he had never seen it before.*
- *She wrote a short paragraph that included "mahound."*

mahuang *(noun)*

Chinese ephedra yielding ephedrine.

- *They discussed "mahuang" during the group presentation.*
- *Understanding "mahuang" helps you talk about this topic clearly.*

maianthemum *(noun)*

Sometimes placed in family Convallariaceae: false lily of the valley.

- *He looked up "maianthemum" because he had never seen it before.*
- *Understanding "maianthemum" helps you talk about this topic clearly.*

maianthemum bifolium *(noun)*

Small white-flowered plant of western Europe to Japan.

- *The article explained what "maianthemum bifolium" means with a simple example.*
- *In class, the teacher used "maianthemum bifolium" to mean small white-flowered plant of western europe to japan.*

maianthemum canadense *(noun)*

Small two-leaved herb of the northern United States and parts of Canada having racemes of small fragrant white flowers.

- *In class, the teacher used "maianthemum canadense" to mean small two-leaved herb of the northern united states....*
- *The article explained what "maianthemum canadense" means with a simple example.*

maidenhair spleenwort *(noun)*

Small rock-inhabiting fern of northern temperate zone and Hawaii with pinnate fronds.

- *The article explained what "maidenhair spleenwort" means with a simple example.*
- *In class, the teacher used "maidenhair spleenwort" to mean small rock-inhabiting fern of northern temperate....*

maidenlike *(adjective)*

Befitting or characteristic of a maiden.

- *A "maidenlike" approach may work better in this case.*
- *It is useful to describe something as "maidenlike" when it is befitting or characteristic of a maiden.*

maidhood *(noun)*

The childhood of a girl.

- *The article explained what "maidhood" means with a simple example.*
- *She wrote a short paragraph that included "maidhood."*

maiger *(noun)*

Large European marine food fish.

- *They discussed "maiger" during the group presentation.*
- *She wrote a short paragraph that included "maiger."*

maikoa *(noun)*

A South American plant that is cultivated for its large fragrant trumpet-shaped flowers.

- *Understanding "maikoa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "maikoa."*

maimer *(noun)*

A person who mutilates or destroys or disfigures or cripples.

- *They discussed "maimer" during the group presentation.*
- *The article explained what "maimer" means with a simple example.*

maja squinado *(noun)*

A large spider crab of Europe.

- *She wrote a short paragraph that included "maja squinado."*
- *They discussed "maja squinado" during the group presentation.*

majagua *(noun)*

Erect forest tree of Cuba and Jamaica having variably hairy leaves and orange-yellow or orange-red flowers; yields a moderately dense timber for cabinetwork and gunstocks.

- *In class, the teacher used "majagua" to mean erect forest tree of cuba and jamaica having....*
- *The article explained what "majagua" means with a simple example.*

---

majidae *(noun)*

Spider crabs.

- *She wrote a short paragraph that included "majidae."*
- *He looked up "majidae" because he had never seen it before.*

---

majuscular *(adjective)*

Of the nature of a majuscule or written in majuscules.

- *A "majuscular" approach may work better in this case.*
- *Her writing became clearer after she learned "majuscular."*

---

makaira albida *(noun)*

Small marlin (to 180 pounds) of western Atlantic.

- *She wrote a short paragraph that included "makaira albida."*
- *He looked up "makaira albida" because he had never seen it before.*

---

makaira marlina *(noun)*

Large game fish in the Pacific Ocean; may reach 1000 pounds.

- *He looked up "makaira marlina" because he had never seen it before.*
- *She wrote a short paragraph that included "makaira marlina."*

---

makaira mazara *(noun)*

Large game fish in the Pacific Ocean; may reach 1000 pounds.

- *Understanding "makaira mazara" helps you talk about this topic clearly.*
- *He looked up "makaira mazara" because he had never seen it before.*

---

makaira mitsukurii *(noun)*

Pacific food and game fish marked with dark blue vertical stripes.

- *Understanding "makaira mitsukurii" helps you talk about this topic clearly.*
- *The article explained what "makaira mitsukurii" means with a simple example.*

---

makaira nigricans *(noun)*

Largest marlin; may reach 2000 pounds; found worldwide in warm seas.

- *In class, the teacher used "makaira nigricans" to mean largest marlin; may reach 2000 pounds; found....*
- *The article explained what "makaira nigricans" means with a simple example.*

---

makataimeshekiakiak *(noun)*

Sauk leader who in 1832 led Fox and Sauk warriors against the United States (1767-1838).

- *The article explained what "makataimeshekiakiak" means with a simple example.*
- *Understanding "makataimeshekiakiak" helps you talk about this topic clearly.*

---

makomako *(noun)*

Graceful deciduous shrub or small tree having attractive foliage and small red berries that turn black at maturity and are used for making wine.

- *Understanding "makomako" helps you talk about this topic clearly.*
- *The article explained what "makomako" means with a simple example.*

---

malacanthidae *(noun)*

Short-headed marine fishes; often brightly colored.

- *Understanding "malacanthidae" helps you talk about this topic clearly.*
- *In class, the teacher used "malacanthidae" to mean short-headed marine fishes; often brightly colored.*

---

malachias *(noun)*

A Hebrew minor prophet of the 5th century BC.

- *She wrote a short paragraph that included "malachias."*

- *Understanding "malachias" helps you talk about this topic clearly.*

malaclemys *(noun)*

American terrapins.

- *Understanding "malaclemys" helps you talk about this topic clearly.*
- *He looked up "malaclemys" because he had never seen it before.*

malaclemys centrata *(noun)*

Of marshes along Atlantic and Gulf Coasts of United States.

- *Understanding "malaclemys centrata" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "malaclemys centrata."*

malacologist *(noun)*

A zoologist specializing in the study of mollusks.

- *She wrote a short paragraph that included "malacologist."*
- *They discussed "malacologist" during the group presentation.*

malaconotinae *(noun)*

An African bush shrikes.

- *The article explained what "malaconotinae" means with a simple example.*
- *In class, the teacher used "malaconotinae" to mean an african bush shrikes.*

malacopterygian *(noun)*

Any fish of the superorder Malacopterygii.

- *He looked up "malacopterygian" because he had never seen it before.*
- *She wrote a short paragraph that included "malacopterygian."*

malacopterygii *(noun)*

An extensive group of teleost fishes having fins supported by flexible cartilaginous rays.

- *He looked up "malacopterygii" because he had never seen it before.*
- *She wrote a short paragraph that included "malacopterygii."*

malacosoma *(noun)*

Tent caterpillars.

- *The article explained what "malacosoma" means with a simple example.*
- *Understanding "malacosoma" helps you talk about this topic clearly.*

malacosoma americana *(noun)*

Moth whose larvae are tent caterpillars.

- *He looked up "malacosoma americana" because he had never seen it before.*
- *Understanding "malacosoma americana" helps you talk about this topic clearly.*

malacosoma disstria *(noun)*

Moth whose gregarious larvae spin webs resembling carpets.

- *Understanding "malacosoma disstria" helps you talk about this topic clearly.*
- *They discussed "malacosoma disstria" during the group presentation.*

malacostracan crustacean *(noun)*

A major subclass of crustaceans.

- *In class, the teacher used "malacostracan crustacean" to mean a major subclass of crustaceans.*
- *The article explained what "malacostracan crustacean" means with a simple example.*

malacothamnus *(noun)*

Genus of shrubs or small trees: chaparral mallow.

- *The article explained what "malacothamnus" means with a simple example.*
- *In class, the teacher used "malacothamnus" to mean genus of shrubs or small trees: chaparral mallow.*

malacothamnus fasciculatus *(noun)*

Shrub of coastal ranges of California and Baja California having hairy branches and spikes of numerous mauve flowers; sometimes placed in genus Sphaeralcea.

- *Understanding "malacothamnus fasciculatus" helps you talk about this topic clearly.*
- *The article explained what "malacothamnus fasciculatus" means with a simple example.*

---

maladjustive *(adjective)*

Poorly adjusted.

- *A "maladjustive" approach may work better in this case.*
- *Her writing became clearer after she learned "maladjustive."*

---

maladroitly *(adverb)*

In a maladroit manner.

- *He dealt with the situation maladroitly.*
- *Place "maladroitly" carefully so the meaning stays clear.*

---

malahini *(noun)*

A newcomer to Hawaii.

- *She wrote a short paragraph that included "malahini."*
- *He looked up "malahini" because he had never seen it before.*

---

malapropos *(adjective)*

Of an inappropriate or incorrectly applied nature.

- *It is useful to describe something as "malapropos" when it is of an inappropriate or incorrectly applied nature.*
- *The speaker chose "malapropos" because it captured the feeling precisely.*

---

malaxis ophioglossoides *(noun)*

North American orchid having a solitary leaf and flowers with threadlike petals.

- *He looked up "malaxis ophioglossoides" because he had never seen it before.*
- *She wrote a short paragraph that included "malaxis ophioglossoides."*

---

malaxis-unifolia *(noun)*

North American orchid having a solitary leaf and flowers with threadlike petals.

- *She wrote a short paragraph that included "malaxis-unifolia."*
- *Understanding "malaxis-unifolia" helps you talk about this topic clearly.*

---

malcolmia *(noun)*

Genus of plants usually found in coastal habitats; Mediterranean to Afghanistan.

- *She wrote a short paragraph that included "malcolmia."*
- *He looked up "malcolmia" because he had never seen it before.*

---

malcolmia maritima *(noun)*

Erect branching herb cultivated for its loose racemes of fragrant white or pink or red or lilac flowers; native to sands and sea cliffs of southwestern Greece and southern Albania.

- *The article explained what "malcolmia maritima" means with a simple example.*
- *She wrote a short paragraph that included "malcolmia maritima."*

---

maldivan *(noun)*

A native or inhabitant of Maldives.

- *He looked up "maldivan" because he had never seen it before.*
- *Understanding "maldivan" helps you talk about this topic clearly.*

---

maleberry *(noun)*

Deciduous much-branched shrub with dense downy panicles of small bell-shaped white flowers.

- *The article explained what "maleberry" means with a simple example.*
- *Understanding "maleberry" helps you talk about this topic clearly.*

---

malemute *(noun)*

Breed of sled dog developed in Alaska.

- *In class, the teacher used "malemute" to mean breed of sled dog developed in alaska.*
- *They discussed "malemute" during the group presentation.*

---

maleo *(noun)*

Celebes megapode that lays eggs in holes in sandy beaches.

- *He looked up "maleo" because he had never seen it before.*
- *They discussed "maleo" during the group presentation.*

---

malevolency *(noun)*

The quality of threatening evil.

- *She wrote a short paragraph that included "malevolency."*
- *He looked up "malevolency" because he had never seen it before.*

---

malfeasant *(noun)*

One guilty of malfeasance.

- *Understanding "malfeasant" helps you talk about this topic clearly.*
- *They discussed "malfeasant" during the group presentation.*

---

Coextensive with the subclass Metatheria.

- *In class, the teacher used "marsupialia" to mean coextensive with the subclass metatheria.*
- *The article explained what "marsupialia" means with a simple example.*

---

martes foina *(noun)*

Eurasian marten having a brown coat with pale breast and throat.

- *The article explained what "martes foina" means with a simple example.*
- *In class, the teacher used "martes foina" to mean eurasian marten having a brown coat with pale....*

---

martes pennanti *(noun)*

Large dark brown North American arboreal carnivorous mammal.

- *The article explained what "martes pennanti" means with a simple example.*
- *They discussed "martes pennanti" during the group presentation.*

---

martes zibellina *(noun)*

Marten of northern Asian forests having luxuriant dark brown fur.

- *In class, the teacher used "martes zibellina" to mean marten of northern asian forests having luxuriant....*
- *They discussed "martes zibellina" during the group presentation.*

---

martynia *(noun)*

Sprawling annual or perennial herb of Central America and West Indies having creamy-white to red-purple bell-shaped flowers followed by unusual horned fruit.

- *They discussed "martynia" during the group presentation.*
- *She wrote a short paragraph that included "martynia."*

---

martynia annua *(noun)*

Sprawling annual or perennial herb of Central America and West Indies having creamy-white to red-purple bell-shaped flowers followed by unusual horned fruit.

- *He looked up "martynia annua" because he had never seen it before.*
- *In class, the teacher used "martynia annua" to mean sprawling annual or perennial herb of central....*

---

martynia arenaria *(noun)*

Alternatively placed in genus Martynia.

- *Understanding "martynia arenaria" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “martynia arenaria.”*

martynia fragrans *(noun)*

A herbaceous plant of the genus Proboscidea.

- *She wrote a short paragraph that included “martynia fragrans.”*
- *He looked up “martynia fragrans” because he had never seen it before.*

martyniaceae *(noun)*

In most classifications not considered a separate family but included in the Pedaliaceae.

- *She wrote a short paragraph that included “martyniaceae.”*
- *The article explained what “martyniaceae” means with a simple example.*

martyrise *(verb)*

Torture and torment like a martyr.

- *She tried to use “martyrise” carefully so everyone would understand.*
- *He did not know how to use “martyrise” until he saw an example.*

martyrize *(verb)*

Torture and torment like a martyr.

- *In everyday English, people use “martyrize” when talking about this idea.*
- *Learners should practice how to use “martyrize” in real sentences.*

---

massorete *(noun)*

A scholar who is expert on the Masorah (especially one of the Jewish scribes who contributed to the Masorah).

- *She wrote a short paragraph that included "massorete."*
- *They discussed "massorete" during the group presentation.*

---

masterwort *(noun)*

Any plant of the genus Astrantia.

- *Understanding "masterwort" helps you talk about this topic clearly.*
- *They discussed "masterwort" during the group presentation.*

---

masticophis *(noun)*

Whip snakes.

- *In class, the teacher used "masticophis" to mean whip snakes.*
- *They discussed "masticophis" during the group presentation.*

---

masticophis flagellum *(noun)*

A whipsnake of southern United States and Mexico; tail resembles a braided whip.

- *She wrote a short paragraph that included "masticophis flagellum."*
- *He looked up "masticophis flagellum" because he had never seen it before.*

---

masticophis lateralis *(noun)*

A whipsnake of scrublands and rocky hillsides.

- *The article explained what "masticophis lateralis" means with a simple example.*
- *In class, the teacher used "masticophis lateralis" to mean a whipsnake of scrublands and rocky hillsides.*

---

mastigomycota *(noun)*

Fungi in which the spores and gametes are motile; in some systems placed in the Phycomycetes group with the Zygomycota.

- *They discussed "mastigomycota" during the group presentation.*
- *She wrote a short paragraph that included "mastigomycota."*

---

mastigomycotina *(noun)*

Fungi in which the spores and gametes are motile; in some systems placed in the Phycomycetes group with the Zygomycota.

- *He looked up "mastigomycotina" because he had never seen it before.*
- *Understanding "mastigomycotina" helps you talk about this topic clearly.*

---

mastigophora *(noun)*

Protozoa having flagella.

- *He looked up "mastigophora" because he had never seen it before.*
- *Understanding "mastigophora" helps you talk about this topic clearly.*

---

mastigophoran *(noun)*

A usually nonphotosynthetic free-living protozoan with whiplike appendages; some are pathogens of humans and other animals.

- *In class, the teacher used "mastigophoran" to mean a usually nonphotosynthetic free-living protozoan....*
- *The article explained what "mastigophoran" means with a simple example.*

---

mastigophore *(noun)*

A usually nonphotosynthetic free-living protozoan with whiplike appendages; some are pathogens of humans and other animals.

- *Understanding "mastigophore" helps you talk about this topic clearly.*
- *The article explained what "mastigophore" means with a simple example.*

---

mastigoproctus *(noun)*

Giant whip scorpions.

- *He looked up "mastigoproctus" because he had never seen it before.*
- *She wrote a short paragraph that included "mastigoproctus."*

---

mastigoproctus giganteus *(noun)*

Large whip-scorpion of Mexico and southern United States that emits a vinegary odor when alarmed.

- *She wrote a short paragraph that included "mastigoproctus giganteus."*
- *They discussed "mastigoproctus giganteus" during the group presentation.*

---

mastocyte *(noun)*

A large connective tissue cell that contains histamine and heparin and serotonin which are released in allergic reactions or in response to injury or inflammation.

- *She wrote a short paragraph that included "mastocyte."*
- *He looked up "mastocyte" because he had never seen it before.*

---

mastodont *(noun)*

Extinct elephant-like mammal that flourished worldwide from Miocene through Pleistocene times; differ from mammoths in the form of the molar teeth.

- *She wrote a short paragraph that included "mastodont."*
- *He looked up "mastodont" because he had never seen it before.*

---

mastoidal *(noun)*

Process of the temporal bone behind the ear at the base of the skull.

- *He looked up "mastoidal" because he had never seen it before.*
- *She wrote a short paragraph that included "mastoidal."*

---

mastoidale *(noun)*

The craniometric point at the lowest point of the mastoid process.

- *The article explained what "mastoidale" means with a simple example.*
- *In class, the teacher used "mastoidale" to mean the craniometric point at the lowest point of the....*

---

mastotermes *(noun)*

Primitive genus of termites; mostly extinct; sometimes considered the most primitive Isoptera.

- *He looked up "mastotermes" because he had never seen it before.*
- *Understanding "mastotermes" helps you talk about this topic clearly.*

---

mastotermes darwiniensis *(noun)*

Australian termite; sole living species of Mastotermes; called a living fossil; apparent missing link between cockroaches and termites.

- *In class, the teacher used "mastotermes darwiniensis" to mean australian termite; sole living species of....*
- *He looked up "mastotermes darwiniensis" because he had never seen it before.*

---

mastotermes electrodominicus *(noun)*

Extinct termite found in amber in the Dominican Republic.

- *They discussed "mastotermes electrodominicus" during the group presentation.*
- *Understanding "mastotermes electrodominicus" helps you talk about this topic clearly.*

mastotermes electromexicus *(noun)*

An extinct termite found in amber in southern Mexico.

- *He looked up "mastotermes electromexicus" because he had never seen it before.*
- *In class, the teacher used "mastotermes electromexicus" to mean an extinct termite found in amber in southern mexico.*

mastotermitidae *(noun)*

Primitive termites.

- *He looked up "mastotermitidae" because he had never seen it before.*
- *In class, the teacher used "mastotermitidae" to mean primitive termites.*

matchbush *(noun)*

Any of several plants of the genus Gutierrezia having tiny flower heads that resemble the heads of matches.

- *They discussed "matchbush" during the group presentation.*
- *She wrote a short paragraph that included "matchbush."*

matchweed *(noun)*

Any of several plants of the genus Gutierrezia having tiny flower heads that resemble the heads of matches.

- *He looked up "matchweed" because he had never seen it before.*
- *They discussed "matchweed" during the group presentation.*

- *They discussed "meatman" during the group presentation.*

mebaral *(noun)*

A long-acting crystalline barbiturate (trade name Mebaral) used as a sedative and as an anticonvulsant in the treatment of epilepsy.

- *He looked up "mebaral" because he had never seen it before.*
- *Understanding "mebaral" helps you talk about this topic clearly.*

mebibit *(noun)*

A unit of information equal to 1024 kibibits or 2^20 (1,048,576) bits.

- *In class, the teacher used "mebibit" to mean a unit of information equal to 1024 kibibits or....*
- *He looked up "mebibit" because he had never seen it before.*

mebibyte *(noun)*

A unit of information equal to 1024 kibibytes or 2^20 (1,048,576) bytes.

- *The article explained what "mebibyte" means with a simple example.*
- *In class, the teacher used "mebibyte" to mean a unit of information equal to 1024 kibibytes or....*

mecholyl *(noun)*

Parasympathomimetic drug (trademark Mecholyl) that stimulates secretions and smooth muscle activity.

- *The article explained what "mecholyl" means with a simple example.*
- *In class, the teacher used "mecholyl" to mean parasympathomimetic drug (trademark mecholyl) that....*

meclofenamate *(noun)*

A nonsteroidal anti-inflammatory (trade name Meclomen) used to treat arthritis.

- *They discussed "meclofenamate" during the group presentation.*
- *He looked up "meclofenamate" because he had never seen it before.*

meclofenamate sodium *(noun)*

A nonsteroidal anti-inflammatory (trade name Meclomen) used to treat arthritis.

- *He looked up "meclofenamate sodium" because he had never seen it before.*
- *She wrote a short paragraph that included "meclofenamate sodium."*

meclomen *(noun)*

A nonsteroidal anti-inflammatory (trade name Meclomen) used to treat arthritis.

- *Understanding "meclomen" helps you talk about this topic clearly.*
- *The article explained what "meclomen" means with a simple example.*

meconopsis betonicifolia *(noun)*

Chinese perennial having mauve-pink to bright sky blue flowers in drooping cymes.

- *He looked up "meconopsis betonicifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "meconopsis betonicifolia."*

meconopsis cambrica *(noun)*

Widely cultivated west European plant with showy pale yellow flowers.

- *In class, the teacher used "meconopsis cambrica" to mean widely cultivated west european plant with showy....*
- *They discussed "meconopsis cambrica" during the group presentation.*

---

mecoptera *(noun)*

An order of carnivorous insects usually having long membranous wings and long beaklike heads with chewing mouths at the tip.

- *In class, the teacher used "mecoptera" to mean an order of carnivorous insects usually having long....*
- *Understanding "mecoptera" helps you talk about this topic clearly.*

---

mecopteran *(noun)*

Any of various carnivorous insects of the order Mecoptera.

- *Understanding "mecopteran" helps you talk about this topic clearly.*
- *In class, the teacher used "mecopteran" to mean any of various carnivorous insects of the order....*

---

meddlesomeness *(noun)*

Aggressiveness as evidenced by intruding; by advancing yourself or your ideas without invitation.

- *Understanding "meddlesomeness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "meddlesomeness."*

---

medicago intertexta *(noun)*

An annual of the Mediterranean area having spiny seed pods and leaves with dark spots.

- *The article explained what "medicago intertexta" means with a simple example.*
- *Understanding "medicago intertexta" helps you talk about this topic clearly.*

---

medicago lupulina *(noun)*

Prostrate European herb with small yellow flowers and curved black pods; naturalized in North America.

- *The article explained what "medicago lupulina" means with a simple example.*
- *In class, the teacher used "medicago lupulina" to mean prostrate european herb with small yellow flowers....*

---

medicative *(adjective)*

Having the properties of medicine.

- *Medicative drugs.*
- *Her writing became clearer after she learned "medicative."*

---

mediety *(noun)*

One of two (approximately) equal parts.

- *The article explained what "mediety" means with a simple example.*
- *Understanding "mediety" helps you talk about this topic clearly.*

---

medieval schoolman *(noun)*

A scholar in one of the universities of the Middle Ages; versed in scholasticism.

- *They discussed "medieval schoolman" during the group presentation.*
- *The article explained what "medieval schoolman" means with a simple example.*

---

medinilla magnifica *(noun)*

A beautiful tropical evergreen epiphytic shrub grown for its lush foliage and huge panicles of pink flowers; Philippines.

- *In class, the teacher used "medinilla magnifica" to mean a beautiful tropical evergreen epiphytic shrub....*
- *He looked up "medinilla magnifica" because he had never seen it before.*

---

meditativeness *(noun)*

Deep serious thoughtfulness.

- *The article explained what "meditativeness" means with a simple example.*
- *In class, the teacher used "meditativeness" to mean deep serious thoughtfulness.*

---

medullated nerve fiber *(noun)*

A nerve fiber encased in a sheath of myelin.

- *She wrote a short paragraph that included "medullated nerve fiber."*
- *He looked up "medullated nerve fiber" because he had never seen it before.*

medusan *(noun)*

One of two forms that coelenterates take: it is the free-swimming sexual phase in the life cycle of a coelenterate; in this phase it has a gelatinous umbrella-shaped body and tentacles.

- *They discussed "medusan" during the group presentation.*
- *She wrote a short paragraph that included "medusan."*

medusoid *(noun)*

One of two forms that coelenterates take: it is the free-swimming sexual phase in the life cycle of a coelenterate; in this phase it has a gelatinous umbrella-shaped body and tentacles.

- *In class, the teacher used "medusoid" to mean one of two forms that coelenterates take: it is the....*
- *They discussed "medusoid" during the group presentation.*

meeter *(noun)*

A person who is present and participates in a meeting.

- *In class, the teacher used "meeter" to mean a person who is present and participates in a meeting.*
- *He looked up "meeter" because he had never seen it before.*

mefoxin *(noun)*

One of several broad spectrum antibiotic substances obtained from fungi and related to penicillin (trade names Mefoxin); addition of side chains has produced semisynthetic antibiotics with greater antibacterial activity.

- *Understanding "mefoxin" helps you talk about this topic clearly.*
- *The article explained what "mefoxin" means with a simple example.*

megabat *(noun)*

Large Old World bat of warm and tropical regions that feeds on fruit.

- *She wrote a short paragraph that included "megabat."*
- *Understanding "megabat" helps you talk about this topic clearly.*

megachilidae *(noun)*

Leaf-cutting and mason bees.

- *They discussed "megachilidae" during the group presentation.*
- *She wrote a short paragraph that included "megachilidae."*

megacycle *(noun)*

One million periods per second.

- *Understanding "megacycle" helps you talk about this topic clearly.*
- *The article explained what "megacycle" means with a simple example.*

megacycle per second *(noun)*

One million periods per second.

- *The article explained what "megacycle per second" means with a simple example.*
- *They discussed "megacycle per second" during the group presentation.*

megaderma *(noun)*

Type genus of the Megadermatidae.

- *She wrote a short paragraph that included "megaderma."*
- *Understanding "megaderma" helps you talk about this topic clearly.*

megaderma lyra *(noun)*

Large carnivorous Old World bat with very large ears.

- *They discussed "megaderma lyra" during the group presentation.*
- *In class, the teacher used "megaderma lyra" to mean large carnivorous old world bat with very large ears.*

megadermatidae *(noun)*

Old World false vampire bats.

- *He looked up "megadermatidae" because he had never seen it before.*
- *She wrote a short paragraph that included "megadermatidae."*

megaflop *(noun)*

(computer science) a unit for measuring the speed of a computer system.

- *The article explained what "megaflop" means with a simple example.*
- *Understanding "megaflop" helps you talk about this topic clearly.*

---

megagametophyte *(noun)*

The female gametophyte produced by the megaspore of a plant that produces both microspore and megaspores.

- *They discussed "megagametophyte" during the group presentation.*
- *He looked up "megagametophyte" because he had never seen it before.*

---

megalobatrachus *(noun)*

Giant salamanders; in some classifications included in the genus Cryptobranchus.

- *Understanding "megalobatrachus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "megalobatrachus."*

---

megalobatrachus maximus *(noun)*

Large (up to more than three feet) edible salamander of Asia.

- *Understanding "megalobatrachus maximus" helps you talk about this topic clearly.*
- *In class, the teacher used "megalobatrachus maximus" to mean large (up to more than three feet) edible....*

---

megaloblast *(noun)*

Abnormally large red blood cell present in pernicious anemia and folic acid deficiency.

- *They discussed "megaloblast" during the group presentation.*
- *In class, the teacher used "megaloblast" to mean abnormally large red blood cell present in....*

---

megalocyte *(noun)*

Abnormally large red blood cell (associated with pernicious anemia).

- *He looked up "megalocyte" because he had never seen it before.*
- *They discussed "megalocyte" during the group presentation.*

---

megalomanic *(adjective)*

Suffering from megalomania.

- *The speaker chose "megalomanic" because it captured the feeling precisely.*
- *It is useful to describe something as "megalomanic" when it is suffering from megalomania.*

---

megalonychidae *(noun)*

Mammal family consisting of the two-toed sloths.

- *Understanding "megalonychidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "megalonychidae."*

---

megaloptera *(noun)*

In some classifications considered a separate order: alderflies; dobsonflies; snake flies.

- *They discussed "megaloptera" during the group presentation.*
- *She wrote a short paragraph that included "megaloptera."*

---

megalosaur *(noun)*

Gigantic carnivorous bipedal dinosaur of the Jurassic or early Cretaceous in Europe.

- *He looked up "megalosaur" because he had never seen it before.*
- *In class, the teacher used "megalosaur" to mean gigantic carnivorous bipedal dinosaur of the....*

---

megalosauridae *(noun)*

Megalosaurs.

- *They discussed "megalosauridae" during the group presentation.*
- *The article explained what "megalosauridae" means with a simple example.*

---

megapode *(noun)*

Large-footed short-winged birds of Australasia; build mounds of decaying vegetation to incubate eggs.

- *In class, the teacher used "megapode" to mean large-footed short-winged birds of australasia;....*

- *The article explained what “megapode” means with a simple example.*

---

megapodius *(noun)*

Type genus of the Megapodiidae.

- *Understanding “megapodius” helps you talk about this topic clearly.*
- *In class, the teacher used “megapodius” to mean type genus of the megapodiidae.*

---

megaptera novaeangliae *(noun)*

Large whalebone whale with long flippers noted for arching or humping its back as it dives.

- *Understanding “megaptera novaeangliae” helps you talk about this topic clearly.*
- *In class, the teacher used “megaptera novaeangliae” to mean large whalebone whale with long flippers noted for....*

---

megascopic *(adjective)*

Visible to the naked eye (especially of rocks and anatomical features).

- *Her writing became clearer after she learned “megascopic.”*
- *Would you call this situation “megascopic”? Explain why.*

---

megasporangium *(noun)*

A plant structure that produces megaspores.

- *The article explained what “megasporangium” means with a simple example.*
- *Understanding “megasporangium” helps you talk about this topic clearly.*

---

megaspore *(noun)*

Larger of the two types of spore produced in heterosporous plants; develops in ovule into a female gametophyte.

- *The article explained what “megaspore” means with a simple example.*
- *Understanding “megaspore” helps you talk about this topic clearly.*

---

megasporophyll *(noun)*

In non-flowering plants, a sporophyll that bears only megasporangia.

- *Understanding “megasporophyll” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “megasporophyll.”*

---

megatherian *(noun)*

A large extinct ground sloth.

- *They discussed “megatherian” during the group presentation.*
- *Understanding “megatherian” helps you talk about this topic clearly.*

---

megatherian mammal *(noun)*

A large extinct ground sloth.

- *In class, the teacher used “megatherian mammal” to mean a large extinct ground sloth.*
- *They discussed “megatherian mammal” during the group presentation.*

---

megatheriid *(noun)*

A large extinct ground sloth.

- *The article explained what “megatheriid” means with a simple example.*
- *They discussed “megatheriid” during the group presentation.*

---

megatheriidae *(noun)*

Extinct ground sloths.

- *The article explained what “megatheriidae” means with a simple example.*
- *Understanding “megatheriidae” helps you talk about this topic clearly.*

---

megohm *(noun)*

A unit of resistance equal to one million ohms.

- *She wrote a short paragraph that included “megohm.”*
- *The article explained what “megohm” means with a simple example.*

---

melagueta pepper *(noun)*

West African plant bearing pungent peppery seeds.

- *She wrote a short paragraph that included "melagueta pepper."*
- *He looked up "melagueta pepper" because he had never seen it before.*

---

melampodium *(noun)*

Herbs and subshrubs of warm North America.

- *Understanding "melampodium" helps you talk about this topic clearly.*
- *The article explained what "melampodium" means with a simple example.*

---

melampodium leucanthum *(noun)*

Bushy subshrub having flower heads that resemble asters with broad white rays; found in desert areas of Arizona east to Kansas and south to Mexico.

- *Understanding "melampodium leucanthum" helps you talk about this topic clearly.*
- *The article explained what "melampodium leucanthum" means with a simple example.*

---

melampsora *(noun)*

Rusts having sessile one-celled teliospores in a single layer.

- *They discussed "melampsora" during the group presentation.*
- *In class, the teacher used "melampsora" to mean rusts having sessile one-celled teliospores in a....*

---

melampsora lini *(noun)*

Fungus causing flax rust.

- *The article explained what "melampsora lini" means with a simple example.*
- *Understanding "melampsora lini" helps you talk about this topic clearly.*

---

melancholiac *(noun)*

Someone subject to melancholia.

- *In class, the teacher used "melancholiac" to mean someone subject to melancholia.*
- *They discussed "melancholiac" during the group presentation.*

---

melanerpes *(noun)*

A genus of Picidae.

- *In class, the teacher used "melanerpes" to mean a genus of picidae.*
- *They discussed "melanerpes" during the group presentation.*

---

melanerpes erythrocephalus *(noun)*

Black-and-white North American woodpecker having a red head and neck.

- *He looked up "melanerpes erythrocephalus" because he had never seen it before.*
- *Understanding "melanerpes erythrocephalus" helps you talk about this topic clearly.*

---

melanitta nigra *(noun)*

A variety of scoter.

- *Understanding "melanitta nigra" helps you talk about this topic clearly.*
- *In class, the teacher used "melanitta nigra" to mean a variety of scoter.*

---

melanoblast *(noun)*

An epidermal cell that is a precursor of a melanocyte.

- *In class, the teacher used "melanoblast" to mean an epidermal cell that is a precursor of a melanocyte.*
- *Understanding "melanoblast" helps you talk about this topic clearly.*

---

melanoderma *(noun)*

Abnormally dark skin caused by increased deposits of melatonin.

- *They discussed "melanoderma" during the group presentation.*
- *Understanding "melanoderma" helps you talk about this topic clearly.*

---

melanogrammus aeglefinus *(noun)*

Important food fish on both sides of the Atlantic; related to cod but usually smaller.

- *She wrote a short paragraph that included "melanogrammus aeglefinus."*
- *Understanding "melanogrammus aeglefinus" helps you talk about this topic clearly.*

---

melanotis *(noun)*

A genus of Mimidae.

- *In class, the teacher used "melanotis" to mean a genus of mimidae.*
- *He looked up "melanotis" because he had never seen it before.*

---

melanotis caerulescens *(noun)*

Mockingbird of Mexico.

- *She wrote a short paragraph that included "melanotis caerulescens."*
- *Understanding "melanotis caerulescens" helps you talk about this topic clearly.*

---

melanthiaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted: includes Aletris; Narthecium; Veratrum.

- *She wrote a short paragraph that included "melanthiaceae."*
- *He looked up "melanthiaceae" because he had never seen it before.*

---

melastoma *(noun)*

Type genus of Melastomataceae; Asiatic shrubs with leathery leaves and large purple flowers followed by edible fleshy black berries.

- *The article explained what "melastoma" means with a simple example.*
- *Understanding "melastoma" helps you talk about this topic clearly.*

---

melastoma malabathricum *(noun)*

Evergreen spreading shrub of India and southeastern Asia having large purple flowers.

- *She wrote a short paragraph that included "melastoma malabathricum."*
- *He looked up "melastoma malabathricum" because he had never seen it before.*

---

melchite *(noun)*

An Orthodox Christian or Uniate Christian belonging to the patriarchate of Alexandria or Antioch or Jerusalem.

- *The article explained what "melchite" means with a simple example.*
- *Understanding "melchite" helps you talk about this topic clearly.*

---

meleagrididae *(noun)*

Turkeys and some extinct forms.

- *The article explained what "meleagrididae" means with a simple example.*
- *In class, the teacher used "meleagrididae" to mean turkeys and some extinct forms.*

---

meleagris gallopavo *(noun)*

Large gallinaceous bird with fan-shaped tail; widely domesticated for food.

- *In class, the teacher used "meleagris gallopavo" to mean large gallinaceous bird with fan-shaped tail;....*
- *Understanding "meleagris gallopavo" helps you talk about this topic clearly.*

---

melia azedarach *(noun)*

Tree of northern India and China having purple blossoms and small inedible yellow fruits; naturalized in the southern United States as a shade tree.

- *She wrote a short paragraph that included "melia azedarach."*
- *He looked up "melia azedarach" because he had never seen it before.*

---

melia azederach *(noun)*

Tree of northern India and China having purple blossoms and small inedible yellow fruits; naturalized in the southern United States as a shade tree.

- *They discussed "melia azederach" during the group presentation.*
- *Understanding "melia azederach" helps you talk about this topic clearly.*

---

melicocca *(noun)*

Tropical American trees and shrubs bearing berries.

- *He looked up "melicocca" because he had never seen it before.*
- *She wrote a short paragraph that included "melicocca."*

melicocca bijuga *(noun)*

Tropical American tree bearing a small edible fruit with green leathery skin and sweet juicy translucent pulp.

- *Understanding "melicocca bijuga" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "melicocca bijuga."*

melicocca bijugatus *(noun)*

Tropical American tree bearing a small edible fruit with green leathery skin and sweet juicy translucent pulp.

- *Understanding "melicocca bijugatus" helps you talk about this topic clearly.*
- *He looked up "melicocca bijugatus" because he had never seen it before.*

melicoccus *(noun)*

Tropical American trees and shrubs bearing berries.

- *She wrote a short paragraph that included "melicoccus."*
- *He looked up "melicoccus" because he had never seen it before.*

melicytus *(noun)*

A genus of deciduous shrubs or trees; fruit is a berry; grow in New Zealand and Fiji and Solomon Islands.

- *She wrote a short paragraph that included "melicytus."*
- *Understanding "melicytus" helps you talk about this topic clearly.*

melilot *(noun)*

Erect annual or biennial plant grown extensively especially for hay and soil improvement.

- *Understanding "melilot" helps you talk about this topic clearly.*
- *The article explained what "melilot" means with a simple example.*

melinae *(noun)*

Subdivision not used in some classifications: badgers.

- *They discussed "melinae" during the group presentation.*
- *He looked up "melinae" because he had never seen it before.*

meliorative *(adjective)*

Tending to ameliorate.

- *The speaker chose "meliorative" because it captured the feeling precisely.*
- *A "meliorative" approach may work better in this case.*

meliorist *(noun)*

A disputant who advocates reform.

- *In class, the teacher used "meliorist" to mean a disputant who advocates reform.*
- *The article explained what "meliorist" means with a simple example.*

meliphagidae *(noun)*

Honey eaters.

- *In class, the teacher used "meliphagidae" to mean honey eaters.*
- *He looked up "meliphagidae" because he had never seen it before.*

mellisonant *(adjective)*

Pleasing to the ear.

- *Would you call this situation "mellisonant"? Explain why.*
- *It is useful to describe something as "mellisonant" when it is pleasing to the ear.*

mellivora capensis *(noun)*

Nocturnal badger-like carnivore of wooded regions of Africa and southern Asia.

- *The article explained what "mellivora capensis" means with a simple example.*
- *She wrote a short paragraph that included "mellivora capensis."*

mellowingly *(adverb)*

So as to mellow.

- *The rays of the sun struck the earth mellowingly.*
- *Using "mellowingly" can make your explanation more exact.*

---

mellowly *(adverb)*

(obsolete) in a mellow manner.

- *Using "mellowly" can make your explanation more exact.*
- *The narrator describes the scene "mellowly" in the final chapter.*

---

melocactus *(noun)*

Genus of strongly ribbed globose or spheroid cacti of tropical South and Central America and the Caribbean.

- *He looked up "melocactus" because he had never seen it before.*
- *In class, the teacher used "melocactus" to mean genus of strongly ribbed globose or spheroid cacti....*

---

melodiousness *(noun)*

The property of having a melody.

- *Understanding "melodiousness" helps you talk about this topic clearly.*
- *The article explained what "melodiousness" means with a simple example.*

---

melogale *(noun)*

A genus of Mustelidae.

- *He looked up "melogale" because he had never seen it before.*
- *She wrote a short paragraph that included "melogale."*

---

meloid *(noun)*

Beetle that produces a secretion that blisters the skin.

- *He looked up "meloid" because he had never seen it before.*
- *Understanding "meloid" helps you talk about this topic clearly.*

---

meloidae *(noun)*

Blister beetles.

- *He looked up "meloidae" because he had never seen it before.*
- *In class, the teacher used "meloidae" to mean blister beetles.*

---

melolontha *(noun)*

A genus of Melolonthidae.

- *She wrote a short paragraph that included "melolontha."*
- *He looked up "melolontha" because he had never seen it before.*

---

melolontha melolontha *(noun)*

Any of various large European beetles destructive to vegetation as both larvae and adult.

- *He looked up "melolontha melolontha" because he had never seen it before.*
- *In class, the teacher used "melolontha melolontha" to mean any of various large european beetles destructive....*

---

melolonthid beetle *(noun)*

Any of various beetles of the family (or subfamily) Melolonthidae.

- *He looked up "melolonthid beetle" because he had never seen it before.*
- *She wrote a short paragraph that included "melolonthid beetle."*

---

melolonthidae *(noun)*

Considered a separate family in some classification systems.

- *She wrote a short paragraph that included "melolonthidae."*
- *Understanding "melolonthidae" helps you talk about this topic clearly.*

---

melophagus *(noun)*

An arthropod genus of wingless flies including the sheep ked.

- *The article explained what "melophagus" means with a simple example.*

- *She wrote a short paragraph that included “melophagus.”*

melophagus ovinus *(noun)*

Wingless fly that is an external parasite on sheep and cattle.

- *The article explained what “melophagus ovinus” means with a simple example.*
- *They discussed “melophagus ovinus” during the group presentation.*

melopsittacus *(noun)*

A genus of Psittacidae.

- *They discussed “melopsittacus” during the group presentation.*
- *He looked up “melopsittacus” because he had never seen it before.*

melopsittacus undulatus *(noun)*

Small Australian parakeet usually light green with black and yellow markings in the wild but bred in many colors.

- *Understanding “melopsittacus undulatus” helps you talk about this topic clearly.*
- *In class, the teacher used “melopsittacus undulatus” to mean small australian parakeet usually light green with....*

melosa *(noun)*

South American herb with sticky glandular foliage; source of madia oil.

- *They discussed “melosa” during the group presentation.*
- *He looked up “melosa” because he had never seen it before.*

melospiza *(noun)*

American song sparrow and swamp sparrow.

- *Understanding “melospiza” helps you talk about this topic clearly.*
- *In class, the teacher used “melospiza” to mean american song sparrow and swamp sparrow.*

melospiza georgiana *(noun)*

North American finch of marshy area.

- *The article explained what “melospiza georgiana” means with a simple example.*
- *Understanding “melospiza georgiana” helps you talk about this topic clearly.*

melospiza melodia *(noun)*

Small songbird common in North America.

- *The article explained what “melospiza melodia” means with a simple example.*
- *Understanding “melospiza melodia” helps you talk about this topic clearly.*

meltable *(adjective)*

Capable of melting.

- *Students compared “meltable” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “meltable.”*

melursus *(noun)*

Sloth bears; in some classifications not a separate genus from Ursus.

- *Understanding “melursus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “melursus.”*

melursus ursinus *(noun)*

Common coarse-haired long-snouted bear of south-central Asia.

- *They discussed “melursus ursinus” during the group presentation.*
- *He looked up “melursus ursinus” because he had never seen it before.*

memberless *(adjective)*

Of a group or set having no members.

- *The speaker chose “memberless” because it captured the feeling precisely.*
- *It is useful to describe something as “memberless” when it is of a group or set having no members.*

membracidae *(noun)*

Plant hoppers: treehoppers.

- *Understanding "membracidae" helps you talk about this topic clearly.*
- *In class, the teacher used "membracidae" to mean plant hoppers: treehoppers.*

---

memoriser *(noun)*

A person who learns by rote.

- *She wrote a short paragraph that included "memoriser."*
- *They discussed "memoriser" during the group presentation.*

---

memorizer *(noun)*

A person who learns by rote.

- *Understanding "memorizer" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "memorizer."*

---

mendaciously *(adverb)*

In a mendacious and untruthful manner.

- *Using "mendaciously" can make your explanation more exact.*
- *She spoke "mendaciously," and the audience immediately understood her point.*

---

mendeleyev *(noun)*

Russian chemist who developed a periodic table of the chemical elements and predicted the discovery of several new elements (1834-1907).

- *Understanding "mendeleyev" helps you talk about this topic clearly.*
- *In class, the teacher used "mendeleyev" to mean russian chemist who developed a periodic table of....*

---

menially *(adverb)*

In a menial manner.

- *Try rewriting the sentence and include "menially" naturally.*
- *The narrator describes the scene "menially" in the final chapter.*

---

meniere *(noun)*

French otologist who first described a form of vertigo now known as Meniere's disease and identified the semicircular canals as the site of the lesion (1799-1862).

- *The article explained what "meniere" means with a simple example.*
- *In class, the teacher used "meniere" to mean french otologist who first described a form of....*

---

meninx *(noun)*

A membrane (one of 3) that envelops the brain and spinal cord.

- *She wrote a short paragraph that included "meninx."*
- *He looked up "meninx" because he had never seen it before.*

---

menippe *(noun)*

Stone crabs.

- *In class, the teacher used "menippe" to mean stone crabs.*
- *Understanding "menippe" helps you talk about this topic clearly.*

---

menippe mercenaria *(noun)*

Large edible crab of the southern coast of the United States (particularly Florida).

- *They discussed "menippe mercenaria" during the group presentation.*
- *She wrote a short paragraph that included "menippe mercenaria."*

---

menispermaceae *(noun)*

Herbaceous or woody climbers.

- *She wrote a short paragraph that included "menispermaceae."*
- *Understanding "menispermaceae" helps you talk about this topic clearly.*

---

menispermum *(noun)*

Climbing herbs.

- *Understanding "menispermum" helps you talk about this topic clearly.*
- *They discussed "menispermum" during the group presentation.*

---

menispermum canadense *(noun)*

A woody vine of eastern North America having large oval leaves and small white flowers and purple to blue-black fruits.

- *He looked up "menispermum canadense" because he had never seen it before.*
- *Understanding "menispermum canadense" helps you talk about this topic clearly.*

---

menopon *(noun)*

Chicken lice.

- *Understanding "menopon" helps you talk about this topic clearly.*
- *He looked up "menopon" because he had never seen it before.*

---

menopon gallinae *(noun)*

A louse parasitic on poultry.

- *They discussed "menopon gallinae" during the group presentation.*
- *The article explained what "menopon gallinae" means with a simple example.*

---

menopon palladum *(noun)*

A louse parasitic on poultry.

- *In class, the teacher used "menopon palladum" to mean a louse parasitic on poultry.*
- *The article explained what "menopon palladum" means with a simple example.*

---

menorrhea *(noun)*

Flow of blood from the uterus; occurs at roughly monthly intervals during a woman's reproductive years.

- *She wrote a short paragraph that included "menorrhea."*
- *Understanding "menorrhea" helps you talk about this topic clearly.*

---

menotyphla *(noun)*

Elephant shrews; tree shrews.

- *The article explained what "menotyphla" means with a simple example.*
- *In class, the teacher used "menotyphla" to mean elephant shrews; tree shrews.*

---

mensal line *(noun)*

A crease on the palm; palmists say it indicates your emotional nature.

- *He looked up "mensal line" because he had never seen it before.*
- *They discussed "mensal line" during the group presentation.*

---

mensh *(noun)*

A decent responsible person with admirable characteristics.

- *They discussed "mensh" during the group presentation.*
- *She wrote a short paragraph that included "mensh."*

---

mensurable *(adjective)*

Capable of being measured.

- *Would you call this situation "mensurable"? Explain why.*
- *It is useful to describe something as "mensurable" when it is capable of being measured.*

---

mentha citrata *(noun)*

Mint with leaves having perfume like that of the bergamot orange.

- *The article explained what "mentha citrata" means with a simple example.*
- *Understanding "mentha citrata" helps you talk about this topic clearly.*

---

mentha pulegium *(noun)*

Eurasian perennial mint have small lilac-blue flowers and ovate leaves; yields an aromatic oil.

- *They discussed "mentha pulegium" during the group presentation.*
- *He looked up "mentha pulegium" because he had never seen it before.*

menticirrhus *(noun)*

Kingfishes; whiting.

- *She wrote a short paragraph that included "menticirrhus."*
- *They discussed "menticirrhus" during the group presentation.*

menticirrhus americanus *(noun)*

Whiting of the southeastern coast of North America.

- *They discussed "menticirrhus americanus" during the group presentation.*
- *The article explained what "menticirrhus americanus" means with a simple example.*

microbat *(noun)*

Typically having large ears and feeding primarily on insects; worldwide in distribution.

- *The article explained what "microbat" means with a simple example.*
- *In class, the teacher used "microbat" to mean typically having large ears and feeding primarily....*

microchiroptera *(noun)*

Most of the bats in the world; all bats except fruit bats insectivorous bats.

- *The article explained what "microchiroptera" means with a simple example.*
- *In class, the teacher used "microchiroptera" to mean most of the bats in the world; all bats except....*

micrococcaceae *(noun)*

Spherical or elliptical usually aerobic eubacteria that produce yellow or orange or red pigment; includes toxin-producing forms as well as harmless commensals and saprophytes.

- *She wrote a short paragraph that included "micrococcaceae."*
- *Understanding "micrococcaceae" helps you talk about this topic clearly.*

microcyte *(noun)*

An abnormally small red blood cell (less than 5 microns in diameter).

- *The article explained what "microcyte" means with a simple example.*
- *They discussed "microcyte" during the group presentation.*

microdipodops *(noun)*

Kangaroo mice.

- *In class, the teacher used "microdipodops" to mean kangaroo mice.*
- *The article explained what "microdipodops" means with a simple example.*

microeconomist *(noun)*

An economist who specializes in microeconomics.

- *The article explained what "microeconomist" means with a simple example.*
- *They discussed "microeconomist" during the group presentation.*

---

microfarad *(noun)*

A unit of capacitance equal to one millionth of a farad.

- *He looked up "microfarad" because he had never seen it before.*
- *She wrote a short paragraph that included "microfarad."*

---

microgametophyte *(noun)*

The male gametophyte produced by a microspore.

- *She wrote a short paragraph that included "microgametophyte."*
- *They discussed "microgametophyte" during the group presentation.*

---

microgauss *(noun)*

A unit of magnetic flux density equal to one millionth of a gauss.

- *They discussed "microgauss" during the group presentation.*
- *The article explained what "microgauss" means with a simple example.*

---

microgliacyte *(noun)*

A cell of the microglia that may become phagocytic and collect waste products of nerve tissue.

- *Understanding "microgliacyte" helps you talk about this topic clearly.*
- *The article explained what "microgliacyte" means with a simple example.*

---

microgramma *(noun)*

Epiphytic ferns of tropical America and Africa.

- *The article explained what "microgramma" means with a simple example.*
- *She wrote a short paragraph that included "microgramma."*

---

microgramma-piloselloides *(noun)*

Epiphytic ferns with long rhizomes; tropical America.

- *Understanding "microgramma-piloselloides" helps you talk about this topic clearly.*
- *They discussed "microgramma-piloselloides" during the group presentation.*

---

microhylidae *(noun)*

Narrow-mouthed toads and sheep frogs; some burrow and some are arboreal; found worldwide.

- *Understanding "microhylidae" helps you talk about this topic clearly.*
- *He looked up "microhylidae" because he had never seen it before.*

---

micromeria *(noun)*

Large genus of fragrant chiefly Old World herbs.

- *Understanding "micromeria" helps you talk about this topic clearly.*
- *He looked up "micromeria" because he had never seen it before.*

---

micromeria chamissonis *(noun)*

Trailing perennial evergreen herb of northwestern United States with small white flowers; used medicinally.

- *She wrote a short paragraph that included "micromeria chamissonis."*
- *Understanding "micromeria chamissonis" helps you talk about this topic clearly.*

---

micromeria douglasii *(noun)*

Trailing perennial evergreen herb of northwestern United States with small white flowers; used medicinally.

- *They discussed "micromeria douglasii" during the group presentation.*
- *Understanding "micromeria douglasii" helps you talk about this topic clearly.*

---

micromeria juliana *(noun)*

Dwarf aromatic shrub of Mediterranean regions.

- *In class, the teacher used "micromeria juliana" to mean dwarf aromatic shrub of mediterranean regions.*

- *The article explained what "micromeria juliana" means with a simple example.*

---

micrometeor *(noun)*

A meteorite or meteoroid so small that it drifts down to earth without becoming intensely heated in the atmosphere.

- *Understanding "micrometeor" helps you talk about this topic clearly.*
- *In class, the teacher used "micrometeor" to mean a meteorite or meteoroid so small that it drifts....*

---

micromicron *(noun)*

A metric unit of length equal to one trillionth of a meter.

- *He looked up "micromicron" because he had never seen it before.*
- *They discussed "micromicron" during the group presentation.*

---

micromillimeter *(noun)*

A metric unit of length equal to one billionth of a meter.

- *In class, the teacher used "micromillimeter" to mean a metric unit of length equal to one billionth of a....*
- *The article explained what "micromillimeter" means with a simple example.*

---

micromillimetre *(noun)*

A metric unit of length equal to one billionth of a meter.

- *In class, the teacher used "micromillimetre" to mean a metric unit of length equal to one billionth of a....*
- *The article explained what "micromillimetre" means with a simple example.*

---

micromyx *(noun)*

Old World harvest mice.

- *In class, the teacher used "micromyx" to mean old world harvest mice.*
- *They discussed "micromyx" during the group presentation.*

---

micromyx minutus *(noun)*

Small reddish-brown Eurasian mouse inhabiting e.g. cornfields.

- *They discussed "micromyx minutus" during the group presentation.*
- *She wrote a short paragraph that included "micromyx minutus."*

---

micronase *(noun)*

An oral antidiabetic drug (trade names DiaBeta and Micronase) that stimulates the release of insulin from the pancreas.

- *She wrote a short paragraph that included "micronase."*
- *Understanding "micronase" helps you talk about this topic clearly.*

---

micronor *(noun)*

Trade name for and oral contraceptive containing the progestin compound norethindrone.

- *The article explained what "micronor" means with a simple example.*
- *Understanding "micronor" helps you talk about this topic clearly.*

---

microphage *(noun)*

A neutrophil that ingests small things (as bacteria).

- *They discussed "microphage" during the group presentation.*
- *The article explained what "microphage" means with a simple example.*

---

microphallus *(noun)*

An abnormally small penis.

- *The article explained what "microphallus" means with a simple example.*
- *In class, the teacher used "microphallus" to mean an abnormally small penis.*

---

micropogonias undulatus *(noun)*

A silvery-bodied croaker with dark markings and tiny barbels.

- *She wrote a short paragraph that included "micropogonias undulatus."*
- *Understanding "micropogonias undulatus" helps you talk about this topic clearly.*

---

micropterus dolomieu *(noun)*

A variety of black bass; the angle of the jaw falls below the eye.

- *She wrote a short paragraph that included "micropterus dolomieu."*
- *The article explained what "micropterus dolomieu" means with a simple example.*

---

micropterus pseudoplites *(noun)*

A variety of black bass.

- *Understanding "micropterus pseudoplites" helps you talk about this topic clearly.*
- *The article explained what "micropterus pseudoplites" means with a simple example.*

---

microradian *(noun)*

A unit of angular distance equal to one thousandth of a milliradian.

- *The article explained what "microradian" means with a simple example.*
- *In class, the teacher used "microradian" to mean a unit of angular distance equal to one thousandth....*

---

microscopium *(noun)*

A faint constellation in the southern hemisphere near Sagittarius and Capricornus.

- *He looked up "microscopium" because he had never seen it before.*
- *They discussed "microscopium" during the group presentation.*

---

microsome *(noun)*

A tiny granule in the cytoplasm that is where protein synthesis takes place under the direction of mRNA.

- *Understanding "microsome" helps you talk about this topic clearly.*
- *He looked up "microsome" because he had never seen it before.*

---

microsorium *(noun)*

Tropical usually epiphytic ferns; Africa to Asia and Polynesia to Australia.

- *The article explained what "microsorium" means with a simple example.*
- *In class, the teacher used "microsorium" to mean tropical usually epiphytic ferns; africa to asia....*

---

microsorium punctatum *(noun)*

Tropical Africa to Australasia and Polynesia.

- *Understanding "microsorium punctatum" helps you talk about this topic clearly.*
- *He looked up "microsorium punctatum" because he had never seen it before.*

---

microsporangium *(noun)*

A plant structure that produces microspores.

- *They discussed "microsporangium" during the group presentation.*
- *He looked up "microsporangium" because he had never seen it before.*

---

microspore *(noun)*

Smaller of the two types of spore produced in heterosporous plants; develops in the pollen sac into a male gametophyte.

- *They discussed "microspore" during the group presentation.*
- *He looked up "microspore" because he had never seen it before.*

---

microsporidian *(noun)*

Parasite of arthropods and fishes that invade and destroy host cells.

- *She wrote a short paragraph that included "microsporidian."*
- *The article explained what "microsporidian" means with a simple example.*

---

microsporophyll *(noun)*

In non-flowering plants, a sporophyll that bears only microsporangia.

- *He looked up "microsporophyll" because he had never seen it before.*
- *Understanding "microsporophyll" helps you talk about this topic clearly.*

---

microstomus *(noun)*

A genus of Pleuronectidae.

- *The article explained what "microstomus" means with a simple example.*
- *In class, the teacher used "microstomus" to mean a genus of pleuronectidae.*

---

microstomus kitt *(noun)*

European flatfish highly valued as food.

- *They discussed "microstomus kitt" during the group presentation.*
- *Understanding "microstomus kitt" helps you talk about this topic clearly.*

---

microstrobos *(noun)*

2 species of small evergreen shrubs of Australia and Tasmania.

- *He looked up "microstrobos" because he had never seen it before.*
- *She wrote a short paragraph that included "microstrobos."*

---

microstrobos niphophilus *(noun)*

Small shrub or Tasmania having short stiff branches.

- *The article explained what "microstrobos niphophilus" means with a simple example.*
- *Understanding "microstrobos niphophilus" helps you talk about this topic clearly.*

---

microtus ochrogaster *(noun)*

Typical vole of the extended prairie region of central United States and southern Canada.

- *The article explained what "microtus ochrogaster" means with a simple example.*
- *Understanding "microtus ochrogaster" helps you talk about this topic clearly.*

---

microtus pennsylvaticus *(noun)*

Widely distributed in grasslands of northern United States and Canada.

- *Understanding "microtus pennsylvaticus" helps you talk about this topic clearly.*
- *They discussed "microtus pennsylvaticus" during the group presentation.*

---

microtus richardsoni *(noun)*

Of western North America.

- *He looked up "microtus richardsoni" because he had never seen it before.*
- *In class, the teacher used "microtus richardsoni" to mean of western north america.*

---

microvolt *(noun)*

A unit of potential equal to one millionth of a volt.

- *She wrote a short paragraph that included "microvolt."*
- *Understanding "microvolt" helps you talk about this topic clearly.*

---

microzide *(noun)*

A diuretic drug (trade name Microzide, Esidrix, and HydroDIURIL) used in the treatment of hypertension.

- *In class, the teacher used "microzide" to mean a diuretic drug (trade name microzide, esidrix, and....*
- *The article explained what "microzide" means with a simple example.*

---

micruroides *(noun)*

Coral snakes.

- *Understanding "micruroides" helps you talk about this topic clearly.*
- *In class, the teacher used "micruroides" to mean coral snakes.*

---

micruroides euryxanthus *(noun)*

Ranges from Central America to southwestern United States.

- *In class, the teacher used "micruroides euryxanthus" to mean ranges from central america to southwestern united....*
- *The article explained what "micruroides euryxanthus" means with a simple example.*

---

micrurus *(noun)*

Coral snakes.

- *Understanding "micrurus" helps you talk about this topic clearly.*
- *In class, the teacher used "micrurus" to mean coral snakes.*

micrurus fulvius *(noun)*

Ranges from Central America to southeastern United States.

- *In class, the teacher used "micrurus fulvius" to mean ranges from central america to southeastern united....*
- *The article explained what "micrurus fulvius" means with a simple example.*

middlemost *(adjective)*

Being in the exact middle.

- *It is useful to describe something as "middlemost" when it is being in the exact middle.*
- *The speaker chose "middlemost" because it captured the feeling precisely.*

midgrass *(noun)*

- *In class, the teacher used "midgrass" to mean any of various grasses of moderate height which....*
- *They discussed "midgrass" during the group presentation.*

midinette *(noun)*

A Parisian salesgirl.

- *The article explained what "midinette" means with a simple example.*
- *Understanding "midinette" helps you talk about this topic clearly.*

midmost *(adverb)*

The middle or central part or point.

- *Using "midmost" can make your explanation more exact.*
- *The narrator describes the scene "midmost" in the final chapter.*

midwatch *(noun)*

A watch during the night (as from midnight to 8 a.m.).

- *The article explained what "midwatch" means with a simple example.*
- *In class, the teacher used "midwatch" to mean a watch during the night (as from midnight to 8 a.m.).*

midweekly *(adjective)*

Occurring during the middle of the week.

- *Midweekly prayer meetings.*
- *A "midweekly" approach may work better in this case.*

mierkat *(noun)*

A mongoose-like viverrine of South Africa having a face like a lemur and only four toes.

- *They discussed "mierkat" during the group presentation.*
- *She wrote a short paragraph that included "mierkat."*

mikania *(noun)*

Large genus of evergreen lianas of tropical America.

- *He looked up "mikania" because he had never seen it before.*
- *She wrote a short paragraph that included "mikania."*

mikania scandens *(noun)*

Herb of tropical America having vanilla-scented flowers; climbs up trees.

- *She wrote a short paragraph that included "mikania scandens."*
- *They discussed "mikania scandens" during the group presentation.*

mikhail ilarionovich kutuzov *(noun)*

Russian field marshal who commanded the Russian opposition to Napoleon (1745-1813).

- *Understanding "mikhail ilarionovich kutuzov" helps you talk about this topic clearly.*
- *He looked up "mikhail ilarionovich kutuzov" because he had never seen it before.*

mikhail yurievich lermontov *(noun)*

Russian writer (1814-1841).

- *The article explained what "mikhail yurievich lermontov" means with a simple example.*
- *In class, the teacher used "mikhail yurievich lermontov" to mean russian writer (1814-1841).*

---

mikmaq *(noun)*

A member of the Algonquian people inhabiting the Maritime Provinces of Canada.

- *He looked up "mikmaq" because he had never seen it before.*
- *She wrote a short paragraph that included "mikmaq."*

---

mikolaj kopernik *(noun)*

Polish astronomer who produced a workable model of the solar system with the sun in the center (1473-1543).

- *He looked up "mikolaj kopernik" because he had never seen it before.*
- *In class, the teacher used "mikolaj kopernik" to mean polish astronomer who produced a workable model of....*

---

milcher *(noun)*

Cattle that are reared for their milk.

- *Understanding "milcher" helps you talk about this topic clearly.*
- *In class, the teacher used "milcher" to mean cattle that are reared for their milk.*

---

militance *(noun)*

A militant aggressiveness.

- *Understanding "militance" helps you talk about this topic clearly.*
- *In class, the teacher used "militance" to mean a militant aggressiveness.*

---

milium *(noun)*

A small whitish lump in the skin due to a clogged sebaceous gland.

- *They discussed "milium" during the group presentation.*
- *In class, the teacher used "milium" to mean a small whitish lump in the skin due to a clogged....*

---

milkcap *(noun)*

Edible mushroom.

- *They discussed "milkcap" during the group presentation.*
- *Understanding "milkcap" helps you talk about this topic clearly.*

---

milkless *(adjective)*

Having no milk.

- *Milkless breasts.*
- *Students compared "milkless" with similar adjectives in the lesson.*

---

milklike *(adjective)*

Resembling milk in color not clear.

- *Students compared "milklike" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "milklike."*

---

milkwort *(noun)*

Any of various plants of the genus Polygala.

- *She wrote a short paragraph that included "milkwort."*
- *They discussed "milkwort" during the group presentation.*

---

milkwort family *(noun)*

Trees, shrubs, and herbs widely distributed throughout both hemispheres.

- *The article explained what "milkwort family" means with a simple example.*
- *Understanding "milkwort family" helps you talk about this topic clearly.*

---

millenarist *(noun)*

A person who believes in the coming of the millennium (a time of great peace and prosperity).

- *In class, the teacher used "millenarist" to mean a person who believes in the coming of the....*

- *They discussed “millenarist” during the group presentation.*

millepede *(noun)*

Any of numerous herbivorous nonpoisonous arthropods having a cylindrical body of 20 to 100 or more segments most with two pairs of legs.

- *The article explained what “millepede” means with a simple example.*
- *They discussed “millepede” during the group presentation.*

millettia *(noun)*

Any of several tropical trees or shrubs yielding showy streaked dark reddish or chocolate-colored wood.

- *They discussed “millettia” during the group presentation.*
- *The article explained what “millettia” means with a simple example.*

millicurie *(noun)*

A unit of radioactivity equal to one thousandth of a curie.

- *The article explained what “millicurie” means with a simple example.*
- *In class, the teacher used “millicurie” to mean a unit of radioactivity equal to one thousandth of....*

millidegree *(noun)*

A unit of temperature equal to one-thousandth of a degree.

- *The article explained what “millidegree” means with a simple example.*
- *They discussed “millidegree” during the group presentation.*

milliequivalent *(noun)*

One-thousandth of an equivalent.

- *She wrote a short paragraph that included “milliequivalent.”*
- *Understanding “milliequivalent” helps you talk about this topic clearly.*

millifarad *(noun)*

A unit of capacitance equal to one thousandth of a farad.

- *She wrote a short paragraph that included “millifarad.”*
- *He looked up “millifarad” because he had never seen it before.*

millihenry *(noun)*

A unit of inductance equal to one thousandth of a henry.

- *They discussed “millihenry” during the group presentation.*
- *The article explained what “millihenry” means with a simple example.*

millime *(noun)*

1,000 millimes equal 1 dinar in Tunisia.

- *She wrote a short paragraph that included “millime.”*
- *He looked up “millime” because he had never seen it before.*

millimicron *(noun)*

A metric unit of length equal to one billionth of a meter.

- *She wrote a short paragraph that included “millimicron.”*
- *He looked up “millimicron” because he had never seen it before.*

milline *(noun)*

An advertising measure; one agate line appearing in one million copies of a publication.

- *Understanding “milline” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “milline.”*

millionfold *(adverb)*

By a factor of a million.

- *It increased a millionfold.*
- *Try rewriting the sentence and include “millionfold” naturally.*

milliped *(noun)*

Any of numerous herbivorous nonpoisonous arthropods having a cylindrical body of 20 to 100 or more segments most with two pairs of legs.

- *Understanding "milliped" helps you talk about this topic clearly.*
- *The article explained what "milliped" means with a simple example.*

---

milliradian *(noun)*

A unit of angular distance equal to one thousandth of a radian.

- *In class, the teacher used "milliradian" to mean a unit of angular distance equal to one thousandth....*
- *They discussed "milliradian" during the group presentation.*

---

millivolt *(noun)*

A unit of potential equal to one thousandth of a volt.

- *He looked up "millivolt" because he had never seen it before.*
- *She wrote a short paragraph that included "millivolt."*

---

milontin *(noun)*

Anticonvulsant (trade name Milontin) used to treat petit mal.

- *He looked up "milontin" because he had never seen it before.*
- *Understanding "milontin" helps you talk about this topic clearly.*

---

miltomate *(noun)*

Mexican annual naturalized in eastern North America having yellow to purple edible fruit resembling small tomatoes.

- *In class, the teacher used "miltomate" to mean mexican annual naturalized in eastern north america....*
- *He looked up "miltomate" because he had never seen it before.*

---

miltonia *(noun)*

Genus of tropical American orchids.

- *The article explained what "miltonia" means with a simple example.*
- *In class, the teacher used "miltonia" to mean genus of tropical american orchids.*

---

mimicker *(noun)*

Someone who mimics (especially an actor or actress).

- *The article explained what "mimicker" means with a simple example.*
- *In class, the teacher used "mimicker" to mean someone who mimics (especially an actor or actress).*

---

- *They discussed "ministrant" during the group presentation.*
- *Understanding "ministrant" helps you talk about this topic clearly.*

---

minnewit *(noun)*

Dutch colonist who bought Manhattan from the Native Americans for the equivalent of $24 (1580-1638).

- *They discussed "minnewit" during the group presentation.*
- *The article explained what "minnewit" means with a simple example.*

---

minniebush *(noun)*

Low shrub of the eastern United States with downy twigs.

- *In class, the teacher used "minniebush" to mean low shrub of the eastern united states with downy twigs.*
- *The article explained what "minniebush" means with a simple example.*

---

minuartia *(noun)*

Mostly perennial herbs of northern hemisphere often with mat-forming habit; most often placed in genus Arenaria: sandworts.

- *He looked up "minuartia" because he had never seen it before.*
- *She wrote a short paragraph that included "minuartia."*

---

minuend *(noun)*

The number from which the subtrahend is subtracted.

- *Understanding "minuend" helps you talk about this topic clearly.*
- *They discussed "minuend" during the group presentation.*

minuscular *(adjective)*

Of or relating to a small cursive script developed from uncial; 7th to 9th centuries.

- *A "minuscular" approach may work better in this case.*
- *Students compared "minuscular" with similar adjectives in the lesson.*

mirabilis longiflora *(noun)*

Leafy wildflower having fragrant slender white or pale pink trumpet-shaped flowers; southwestern United States and northern Mexico.

- *They discussed "mirabilis longiflora" during the group presentation.*
- *Understanding "mirabilis longiflora" helps you talk about this topic clearly.*

mirabilis oblongifolia *(noun)*

Leafy wildflower with lavender-pink flowers that open in the evening and remain through cool part of the next day; found in open woods or brush in mountains of southern Colorado to Arizona and into Mexico.

- *She wrote a short paragraph that included "mirabilis oblongifolia."*
- *The article explained what "mirabilis oblongifolia" means with a simple example.*

mirid *(noun)*

A variety of leaf bug.

- *They discussed "mirid" during the group presentation.*
- *In class, the teacher used "mirid" to mean a variety of leaf bug.*

mirid bug *(noun)*

A variety of leaf bug.

- *She wrote a short paragraph that included "mirid bug."*
- *He looked up "mirid bug" because he had never seen it before.*

mirky *(adjective)*

(of liquids) clouded as with sediment.

- *Students compared "mirky" with similar adjectives in the lesson.*
- *A "mirky" approach may work better in this case.*

mirounga *(noun)*

Elephant seals.

- *Understanding "mirounga" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "mirounga."*

mirrorlike *(adjective)*

Capable of reflecting light like a mirror.

- *Mirrorlike surface of the lake.*
- *Would you call this situation "mirrorlike"? Explain why.*

Creeping evergreen herbs of North America.

- *They discussed "mitchella" during the group presentation.*
- *Understanding "mitchella" helps you talk about this topic clearly.*

---

mitchella repens *(noun)*

Creeping woody plant of eastern North America with shiny evergreen leaves and scarlet berries.

- *In class, the teacher used "mitchella repens" to mean creeping woody plant of eastern north america with....*
- *He looked up "mitchella repens" because he had never seen it before.*

---

mitella *(noun)*

Genus of low slender herbs of North America and northeastern Asia having flowers with trifid or pinnatifid petals.

- *In class, the teacher used "mitella" to mean genus of low slender herbs of north america and....*
- *The article explained what "mitella" means with a simple example.*

---

mitella diphylla *(noun)*

Miterwort of northeastern North America usually with two opposite leaves on erect flowering stems that terminate in erect racemes of white flowers.

- *They discussed "mitella diphylla" during the group presentation.*
- *He looked up "mitella diphylla" because he had never seen it before.*

mitella pentandra *(noun)*

Small plant with leaves in a basal cluster and tiny greenish flowers in slender racemes; northwestern North America to California and Colorado.

- *They discussed "mitella pentandra" during the group presentation.*
- *In class, the teacher used "mitella pentandra" to mean small plant with leaves in a basal cluster and tiny....*

miterwort *(noun)*

Any of various rhizomatous perennial herbs of the genus Mitella having a capsule resembling a bishop's miter.

- *The article explained what "miterwort" means with a simple example.*
- *They discussed "miterwort" during the group presentation.*

mithan *(noun)*

Ox of southeast Asia sometimes considered a domesticated breed of the gaur.

- *They discussed "mithan" during the group presentation.*
- *He looked up "mithan" because he had never seen it before.*

mithracin *(noun)*

An antineoplastic drug (trade name Mithracin) used to treat cancer of the testes.

- *They discussed "mithracin" during the group presentation.*
- *She wrote a short paragraph that included "mithracin."*

mithraist *(noun)*

Adherent of Mithraism.

- *The article explained what "mithraist" means with a simple example.*
- *In class, the teacher used "mithraist" to mean adherent of mithraism.*

mithramycin *(noun)*

An antineoplastic drug (trade name Mithracin) used to treat cancer of the testes.

- *She wrote a short paragraph that included "mithramycin."*
- *They discussed "mithramycin" during the group presentation.*

mithridate mustard *(noun)*

Foetid Eurasian weed having round flat pods; naturalized throughout North America.

- *She wrote a short paragraph that included "mithridate mustard."*
- *The article explained what "mithridate mustard" means with a simple example.*

mitigable *(adjective)*

Capable of being alleviated.

- *It is useful to describe something as "mitigable" when it is capable of being alleviated.*
- *Students compared "mitigable" with similar adjectives in the lesson.*

mitigative *(adjective)*

Moderating pain or sorrow by making it easier to bear.

- *Her writing became clearer after she learned "mitigative."*
- *Students compared "mitigative" with similar adjectives in the lesson.*

mitigatory *(adjective)*

Moderating pain or sorrow by making it easier to bear.

- *A "mitigatory" approach may work better in this case.*
- *Would you call this situation "mitigatory"? Explain why.*

mitrewort *(noun)*

Any of various rhizomatous perennial herbs of the genus Mitella having a capsule resembling a bishop's miter.

- *The article explained what "mitrewort" means with a simple example.*
- *They discussed "mitrewort" during the group presentation.*

mitrula elegans *(noun)*

A discomycete that is 3-8 cm high with an orange to yellow fertile portion and white or pinkish stalks often half in and half out of the water.

- *The article explained what "mitrula elegans" means with a simple example.*
- *Understanding "mitrula elegans" helps you talk about this topic clearly.*

---

mixable *(adjective)*

(chemistry, physics) capable of being mixed.

- *It is useful to describe something as "mixable" when it is (chemistry, physics) capable of being mixed.*
- *A "mixable" approach may work better in this case.*

---

mniaceae *(noun)*

Family of erect mosses with club-shaped paraphyses and the hexagonal cells of the upper leaf surface; sometimes treated as a subfamily of Bryaceae.

- *The article explained what "mniaceae" means with a simple example.*
- *In class, the teacher used "mniaceae" to mean family of erect mosses with club-shaped paraphyses....*

---

mnium *(noun)*

Mosses similar to those of genus Bryum but larger.

- *He looked up "mnium" because he had never seen it before.*
- *She wrote a short paragraph that included "mnium."*

---

moban *(noun)*

Antipsychotic drug (trade name Moban) used in the treatment of schizophrenia.

- *The article explained what "moban" means with a simple example.*
- *They discussed "moban" during the group presentation.*

---

mobbish *(adjective)*

Characteristic of a mob; disorderly or lawless.

- *Fanned mounting tension into mobbish terrorizing.*
- *Would you call this situation "mobbish"? Explain why.*

---

moblike *(adjective)*

Characteristic of a mob; disorderly or lawless.

- *Moblike mentality.*
- *Her writing became clearer after she learned "moblike."*

---

mobula hypostoma *(noun)*

Small manta (to 4 feet) that travels in schools.

- *In class, the teacher used "mobula hypostoma" to mean small manta (to 4 feet) that travels in schools.*
- *They discussed "mobula hypostoma" during the group presentation.*

---

mobulidae *(noun)*

Large rays lacking venomous spines: mantas.

- *He looked up "mobulidae" because he had never seen it before.*
- *They discussed "mobulidae" during the group presentation.*

---

mobuto lake *(noun)*

A shallow lake on the border between Uganda and Congo in the Great Rift Valley.

- *The article explained what "mobuto lake" means with a simple example.*
- *She wrote a short paragraph that included "mobuto lake."*

---

mockernut *(noun)*

Smooth-barked North American hickory with 7 to 9 leaflets bearing a hard-shelled edible nut.

- *In class, the teacher used "mockernut" to mean smooth-barked north american hickory with 7 to 9....*
- *The article explained what "mockernut" means with a simple example.*

---

mockernut hickory *(noun)*

Smooth-barked North American hickory with 7 to 9 leaflets bearing a hard-shelled edible nut.

- *She wrote a short paragraph that included "mockernut hickory."*

- *The article explained what "mockernut hickory" means with a simple example.*

---

moderateness *(noun)*

The property of being moderate in price or expenditures.

- *In class, the teacher used "moderateness" to mean the property of being moderate in price or expenditures.*
- *Understanding "moderateness" helps you talk about this topic clearly.*

---

moderationist *(noun)*

A moderate drinker (as opposed to a total abstainer).

- *In class, the teacher used "moderationist" to mean a moderate drinker (as opposed to a total abstainer).*
- *Understanding "moderationist" helps you talk about this topic clearly.*

---

modernness *(noun)*

The quality of being current or of the present.

- *In class, the teacher used "modernness" to mean the quality of being current or of the present.*
- *The article explained what "modernness" means with a simple example.*

---

modest moussorgsky *(noun)*

Russian composer of operas and orchestral works (1839-1881).

- *Understanding "modest moussorgsky" helps you talk about this topic clearly.*
- *They discussed "modest moussorgsky" during the group presentation.*

---

modest petrovich moussorgsky *(noun)*

Russian composer of operas and orchestral works (1839-1881).

- *In class, the teacher used "modest petrovich moussorgsky" to mean russian composer of operas and orchestral works....*
- *The article explained what "modest petrovich moussorgsky" means with a simple example.*

---

modestness *(noun)*

The property of being moderate in price or expenditures.

- *The modestness of the living standards here becomes obvious immediately.*
- *She wrote a short paragraph that included "modestness."*

---

modicon *(noun)*

Trade name for an oral contraceptive containing estradiol and norethindrone.

- *She wrote a short paragraph that included "modicon."*
- *He looked up "modicon" because he had never seen it before.*

---

modishly *(adverb)*

In a stylish manner.

- *Using "modishly" can make your explanation more exact.*
- *She spoke "modishly," and the audience immediately understood her point.*

---

moehringia *(noun)*

Low-growing herbs widely distributed in temperate and Arctic northern hemisphere: sandworts; distinguished from members of the genus Arenaria mainly by having four-petaled rather than five-petaled flowers.

- *The article explained what "moehringia" means with a simple example.*
- *In class, the teacher used "moehringia" to mean low-growing herbs widely distributed in temperate....*

---

moehringia lateriflora *(noun)*

Low-growing herb having clusters of small white four-petaled flowers.

- *Understanding "moehringia lateriflora" helps you talk about this topic clearly.*
- *He looked up "moehringia lateriflora" because he had never seen it before.*

---

moehringia mucosa *(noun)*

Loosely matted plant with moss-like foliage studded with tiny starry four-petaled white blossoms; mountains of central and southern Europe.

- *They discussed "moehringia mucosa" during the group presentation.*
- *She wrote a short paragraph that included "moehringia mucosa."*

mogdad coffee *(noun)*

Very leafy malodorous tropical weedy shrub whose seeds have been used as an adulterant for coffee; sometimes classified in genus Cassia.

- *Understanding "mogdad coffee" helps you talk about this topic clearly.*
- *The article explained what "mogdad coffee" means with a simple example.*

mohorovicic *(noun)*

Yugoslav geophysicist for whom the Mohorovicic discontinuity was named (1857-1936).

- *He looked up "mohorovicic" because he had never seen it before.*
- *They discussed "mohorovicic" during the group presentation.*

mohorovicic discontinuity *(noun)*

The boundary between the Earth's crust and the underlying mantle.

- *The Mohorovicic discontinuity averages 5 miles down under oceans and 20 miles down under continents.*
- *Understanding "mohorovicic discontinuity" helps you talk about this topic clearly.*

mohria caffrorum *(noun)*

Sweetly scented African fern with narrow bipinnate fronds.

- *They discussed "mohria caffrorum" during the group presentation.*
- *Understanding "mohria caffrorum" helps you talk about this topic clearly.*

moirae *(noun)*

Any of the three Greek goddesses of fate or destiny; identified with the Roman Parcae and similar to the Norse Norns.

- *She wrote a short paragraph that included "moirae."*
- *The article explained what "moirae" means with a simple example.*

moistly *(adverb)*

In a damp manner.

- *The narrator describes the scene "moistly" in the final chapter.*
- *Using "moistly" can make your explanation more exact.*

mojarra *(noun)*

Small silvery schooling fishes with protrusible mouths found in warm coastal waters.

- *He looked up "mojarra" because he had never seen it before.*
- *She wrote a short paragraph that included "mojarra."*

molal concentration *(noun)*

Concentration measured by the number of moles of solute per kilogram of solvent.

- *Understanding "molal concentration" helps you talk about this topic clearly.*
- *He looked up "molal concentration" because he had never seen it before.*

moldiness *(noun)*

The quality of smelling or tasting old or stale or mouldy.

- *Understanding "moldiness" helps you talk about this topic clearly.*
- *He looked up "moldiness" because he had never seen it before.*

molidae *(noun)*

Ocean sunfishes.

- *They discussed "molidae" during the group presentation.*
- *He looked up "molidae" because he had never seen it before.*

molindone *(noun)*

Antipsychotic drug (trade name Moban) used in the treatment of schizophrenia.

- *They discussed "molindone" during the group presentation.*
- *The article explained what "molindone" means with a simple example.*

molluga *(noun)*

Carpetweeds.

- *The article explained what “molluga” means with a simple example.*
- *Understanding “molluga” helps you talk about this topic clearly.*

---

molluga verticillata *(noun)*

Annual prostrate mat-forming weed having whorled leaves and small greenish-white flowers; widespread throughout North America.

- *They discussed “molluga verticillata” during the group presentation.*
- *She wrote a short paragraph that included “molluga verticillata.”*

---

mollycoddler *(noun)*

Someone who pampers or spoils by excessive indulgence.

- *In class, the teacher used “mollycoddler” to mean someone who pampers or spoils by excessive indulgence.*
- *Understanding “mollycoddler” helps you talk about this topic clearly.*

---

mollymawk *(noun)*

Large web-footed birds of the southern hemisphere having long narrow wings; noted for powerful gliding flight.

- *They discussed “mollymawk” during the group presentation.*
- *She wrote a short paragraph that included “mollymawk.”*

---

molossidae *(noun)*

Mastiff bats; freetail bats.

- *He looked up “molossidae” because he had never seen it before.*
- *In class, the teacher used “molossidae” to mean mastiff bats; freetail bats.*

---

molucella *(noun)*

Small genus of aromatic herbs of Mediterranean regions; widely cultivated.

- *He looked up “molucella” because he had never seen it before.*
- *She wrote a short paragraph that included “molucella.”*

---

molucella laevis *(noun)*

Aromatic annual with a tall stems of small whitish flowers enclosed in a greatly enlarged saucer-shaped or bell-shaped calyx.

- *Understanding “molucella laevis” helps you talk about this topic clearly.*
- *He looked up “molucella laevis” because he had never seen it before.*

---

molva molva *(noun)*

Elongated marine food fish of Greenland and northern Europe; often salted and dried.

- *Understanding “molva molva” helps you talk about this topic clearly.*
- *The article explained what “molva molva” means with a simple example.*

---

mombin *(noun)*

Common tropical American shrub or small tree with purplish fruit.

- *In class, the teacher used “mombin” to mean common tropical american shrub or small tree with....*
- *He looked up “mombin” because he had never seen it before.*

---

mombin tree *(noun)*

Common tropical American shrub or small tree with purplish fruit.

- *Understanding “mombin tree” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “mombin tree.”*

---

momentaneous *(adjective)*

Lasting for a markedly brief time.

- *Rapid momentaneous association of things that meet and pass.*
- *A “momentaneous” approach may work better in this case.*

---

momently *(adverb)*

For an instant or moment.

- *A cardinal perched momently on the dogwood branch.*

- *She will be with you momently.*

---

momentously *(adverb)*

In a momentous way.

- *Place "momentously" carefully so the meaning stays clear.*
- *Try rewriting the sentence and include "momentously" naturally.*

---

momentousness *(noun)*

Utmost importance.

- *In class, the teacher used "momentousness" to mean utmost importance.*
- *Understanding "momentousness" helps you talk about this topic clearly.*

---

momordica balsamina *(noun)*

A tropical Old World flowering vine with red or orange warty fruit.

- *The article explained what "momordica balsamina" means with a simple example.*
- *Understanding "momordica balsamina" helps you talk about this topic clearly.*

---

momot *(noun)*

Tropical American bird resembling a blue jay and having greenish and bluish plumage.

- *He looked up "momot" because he had never seen it before.*
- *They discussed "momot" during the group presentation.*

---

momotidae *(noun)*

A family of birds of the order Coraciiformes.

- *They discussed "momotidae" during the group presentation.*
- *She wrote a short paragraph that included "momotidae."*

---

momotus *(noun)*

Type genus of the Momotidae.

- *Understanding "momotus" helps you talk about this topic clearly.*
- *The article explained what "momotus" means with a simple example.*

---

monandrous *(adjective)*

Having only one husband at a time.

- *Would you call this situation "monandrous"? Explain why.*
- *Students compared "monandrous" with similar adjectives in the lesson.*

---

monarchal *(adjective)*

Ruled by or having the supreme power resting with a monarch.

- *Monarchal government.*
- *Monarchal pomp.*

---

monarda clinopodia *(noun)*

Perennial herb of North America (New York to Illinois and mountains of Alaska) having aromatic leaves and clusters of yellowish-pink balls.

- *He looked up "monarda clinopodia" because he had never seen it before.*
- *She wrote a short paragraph that included "monarda clinopodia."*

---

monarda fistulosa *(noun)*

Perennial herb of North America.

- *He looked up "monarda fistulosa" because he had never seen it before.*
- *They discussed "monarda fistulosa" during the group presentation.*

---

monardella *(noun)*

A genus of fragrant herbs of the family Labiatae in the western United States.

- *They discussed "monardella" during the group presentation.*
- *The article explained what "monardella" means with a simple example.*

---

monardella lanceolata *(noun)*

Fragrant California annual herb having lanceolate leaves and clusters of rose-purple flowers.

- *She wrote a short paragraph that included "monardella lanceolata."*
- *Understanding "monardella lanceolata" helps you talk about this topic clearly.*

---

monastical *(adjective)*

Of communal life sequestered from the world under religious vows.

- *A "monastical" approach may work better in this case.*
- *Would you call this situation "monastical"? Explain why.*

---

monaul *(noun)*

Brilliantly colored pheasant of southern Asia.

- *He looked up "monaul" because he had never seen it before.*
- *In class, the teacher used "monaul" to mean brilliantly colored pheasant of southern asia.*

---

monaurally *(adverb)*

In a monaural manner.

- *The stimuli were presented monaurally.*
- *He answered "monaurally," which changed the tone of the conversation.*

---

monecious *(adjective)*

Having male and female reproductive organs in the same plant or animal.

- *It is useful to describe something as "monecious" when it is having male and female reproductive organs in the....*
- *A "monecious" approach may work better in this case.*

---

monera *(noun)*

Prokaryotic bacteria and blue-green algae and various primitive pathogens; because of lack of consensus on how to divide the organisms into phyla informal names are used for the major divisions.

- *In class, the teacher used "monera" to mean prokaryotic bacteria and blue-green algae and....*
- *He looked up "monera" because he had never seen it before.*

---

moneran *(noun)*

Organisms that typically reproduce by asexual budding or fission and whose nutritional mode is absorption or photosynthesis or chemosynthesis.

- *Understanding "moneran" helps you talk about this topic clearly.*
- *They discussed "moneran" during the group presentation.*

---

moneron *(noun)*

Organisms that typically reproduce by asexual budding or fission and whose nutritional mode is absorption or photosynthesis or chemosynthesis.

- *He looked up "moneron" because he had never seen it before.*
- *They discussed "moneron" during the group presentation.*

---

moneses *(noun)*

One species: one-flowered wintergreen; sometimes included in genus Pyrola.

- *In class, the teacher used "moneses" to mean one species: one-flowered wintergreen; sometimes....*
- *He looked up "moneses" because he had never seen it before.*

---

moneses uniflora *(noun)*

Delicate evergreen dwarf herb of north temperate regions having a solitary white terminal flower; sometimes placed in genus Pyrola.

- *Understanding "moneses uniflora" helps you talk about this topic clearly.*
- *The article explained what "moneses uniflora" means with a simple example.*

---

monestrous *(adjective)*

Having one estrous cycle per year.

- *The speaker chose "monestrous" because it captured the feeling precisely.*
- *It is useful to describe something as "monestrous" when it is having one estrous cycle per year.*

---

moneygrubber *(noun)*

Someone whose main interest in life is moneymaking.

- *She wrote a short paragraph that included "moneygrubber."*

- *The article explained what "moneygrubber" means with a simple example.*

---

moneywort *(noun)*

A loosestrife vine.

- *He looked up "moneywort" because he had never seen it before.*
- *In class, the teacher used "moneywort" to mean a loosestrife vine.*

---

mongrelise *(verb)*

Cause to become a mongrel.

- *In everyday English, people use "mongrelise" when talking about this idea.*
- *Can you use "mongrelise" in a sentence that fits this situation?*

---

mongrelize *(verb)*

Cause to become a mongrel.

- *Mongrelized dogs.*
- *The coach explained when to use "mongrelize" and when to wait.*

---

monilia *(noun)*

Any of the yeastlike imperfect fungi of the genus Monilia.

- *She wrote a short paragraph that included "monilia."*
- *He looked up "monilia" because he had never seen it before.*

---

monilia albicans *(noun)*

A parasitic fungus that can infect the mouth or the skin or the intestines or the vagina.

- *He looked up "monilia albicans" because he had never seen it before.*
- *They discussed "monilia albicans" during the group presentation.*

---

moniliaceae *(noun)*

Family of imperfect fungi having white or brightly colored hyphae and spores that are produced directly on the mycelium and not aggregated in fruiting bodies.

- *The article explained what "moniliaceae" means with a simple example.*
- *Understanding "moniliaceae" helps you talk about this topic clearly.*

---

moniliales *(noun)*

Order of imperfect fungi lacking conidiophores of having conidiophores that are superficial and not enclosed in a pycnidium.

- *She wrote a short paragraph that included "moniliales."*
- *They discussed "moniliales" during the group presentation.*

---

monitrice *(noun)*

An assistant (often the father of the soon-to-be-born child) who provides support for a woman in labor by encouraging her to use techniques learned in childbirth-preparation classes.

- *He looked up "monitrice" because he had never seen it before.*
- *She wrote a short paragraph that included "monitrice."*

---

monoblast *(noun)*

A large immature monocyte normally found in bone marrow.

- *The article explained what "monoblast" means with a simple example.*
- *They discussed "monoblast" during the group presentation.*

---

monocanthus *(noun)*

Type genus of the Monocanthidae.

- *They discussed "monocanthus" during the group presentation.*
- *She wrote a short paragraph that included "monocanthus."*

---

monocarp *(noun)*

A plant that bears fruit once and dies.

- *They discussed "monocarp" during the group presentation.*
- *In class, the teacher used "monocarp" to mean a plant that bears fruit once and dies.*

---

monocarpous plant *(noun)*

A plant that bears fruit once and dies.

- *They discussed "monocarpous plant" during the group presentation.*
- *He looked up "monocarpous plant" because he had never seen it before.*

---

monochamus *(noun)*

Sawyer beetles.

- *Understanding "monochamus" helps you talk about this topic clearly.*
- *They discussed "monochamus" during the group presentation.*

---

monochromat *(noun)*

A person who is completely color-blind.

- *The article explained what "monochromat" means with a simple example.*
- *In class, the teacher used "monochromat" to mean a person who is completely color-blind.*

---

monochromic *(adjective)*

Having or appearing to have only one color.

- *It is useful to describe something as "monochromic" when it is having or appearing to have only one color.*
- *Students compared "monochromic" with similar adjectives in the lesson.*

---

monochromous *(adjective)*

Having or appearing to have only one color.

- *Her writing became clearer after she learned "monochromous."*
- *Would you call this situation "monochromous"? Explain why.*

---

monoclinal *(adjective)*

Of a geological structure in which all strata are inclined in the same direction.

- *It is useful to describe something as "monoclinal" when it is of a geological structure in which all strata are....*
- *A "monoclinal" approach may work better in this case.*

---

monoclinous *(adjective)*

Having pistils and stamens in the same flower.

- *It is useful to describe something as "monoclinous" when it is having pistils and stamens in the same flower.*
- *The speaker chose "monoclinous" because it captured the feeling precisely.*

---

monocotyledon *(noun)*

A monocotyledonous flowering plant; the stem grows by deposits on its inside.

- *Understanding "monocotyledon" helps you talk about this topic clearly.*
- *The article explained what "monocotyledon" means with a simple example.*

---

monocotyledonae *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *Understanding "monocotyledonae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "monocotyledonae."*

---

monocotyledones *(noun)*

Comprising seed plants that produce an embryo with a single cotyledon and parallel-veined leaves: includes grasses and lilies and palms and orchids; divided into four subclasses or superorders: Alismatidae; Arecidae; Commelinidae; and Liliidae.

- *Understanding "monocotyledones" helps you talk about this topic clearly.*
- *He looked up "monocotyledones" because he had never seen it before.*

---

monodic *(adjective)*

Having a single vocal part.

- *Her writing became clearer after she learned "monodic."*
- *Students compared "monodic" with similar adjectives in the lesson.*

---

monodical *(adjective)*

Having a single vocal part.

- *Would you call this situation "monodical"? Explain why.*
- *It is useful to describe something as "monodical" when it is having a single vocal part.*

---

monoestrous *(adjective)*

Having one estrous cycle per year.

- *It is useful to describe something as "monoestrous" when it is having one estrous cycle per year.*
- *Would you call this situation "monoestrous"? Explain why.*

---

monogynic *(adjective)*

Having one head or chief wife at a time (along with concubines).

- *Her writing became clearer after she learned "monogynic."*
- *A "monogynic" approach may work better in this case.*

---

monogynist *(noun)*

Someone who practices monogamy (one spouse at a time).

- *She wrote a short paragraph that included "monogynist."*
- *Understanding "monogynist" helps you talk about this topic clearly.*

---

monogynous *(adjective)*

Having one head or chief wife at a time (along with concubines).

- *Would you call this situation "monogynous"? Explain why.*
- *The speaker chose "monogynous" because it captured the feeling precisely.*

---

monoicous *(adjective)*

Having male and female reproductive organs in the same plant or animal.

- *Students compared "monoicous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "monoicous."*

---

monolingually *(adverb)*

In a monolingual manner.

- *She had been reared monolingually.*
- *She spoke "monolingually," and the audience immediately understood her point.*

---

With a dim light.

- *Murkily expressed ideas.*
- *Try rewriting the sentence and include "murkily" naturally.*

---

murmurer *(noun)*

A person who speaks softly and indistinctly.

- *She wrote a short paragraph that included "murmurer."*
- *He looked up "murmurer" because he had never seen it before.*

---

murmurous *(adjective)*

Characterized by soft sounds; ; ; - R.P.Warren.

- *A murmurous brook.*
- *The speaker chose "murmurous" because it captured the feeling precisely.*

---

muroidea *(noun)*

A superfamily of rodents essentially equal to the suborder Myomorpha but with the Dipodidae excluded.

- *Understanding "muroidea" helps you talk about this topic clearly.*
- *He looked up "muroidea" because he had never seen it before.*

---

musa basjoo *(noun)*

Asiatic banana plant cultivated especially as a foliage plant in Japan.

- *He looked up "musa basjoo" because he had never seen it before.*
- *She wrote a short paragraph that included "musa basjoo."*

---

musa ensete *(noun)*

Large evergreen arborescent herb having huge paddle-shaped leaves and bearing inedible fruit that resemble bananas but edible young flower shoots; sometimes placed in genus Musa.

- *He looked up "musa ensete" because he had never seen it before.*
- *Understanding "musa ensete" helps you talk about this topic clearly.*

---

musa paradisiaca *(noun)*

A banana tree bearing hanging clusters of edible angular greenish starchy fruits; tropics and subtropics.

- *In class, the teacher used "musa paradisiaca" to mean a banana tree bearing hanging clusters of edible....*
- *They discussed "musa paradisiaca" during the group presentation.*

---

musa paradisiaca sapientum *(noun)*

Widely cultivated species of banana trees bearing compact hanging clusters of commercially important edible yellow fruit.

- *In class, the teacher used "musa paradisiaca sapientum" to mean widely cultivated species of banana trees bearing....*
- *He looked up "musa paradisiaca sapientum" because he had never seen it before.*

---

musa textilis *(noun)*

Philippine banana tree having leafstalks that yield Manila hemp used for rope and paper etc.

- *In class, the teacher used "musa textilis" to mean philippine banana tree having leafstalks that yield....*
- *The article explained what "musa textilis" means with a simple example.*

---

musaceae *(noun)*

Treelike tropical Asian herbs.

- *Understanding "musaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "musaceae."*

---

musales *(noun)*

Tropical plants.

- *In class, the teacher used "musales" to mean tropical plants.*
- *He looked up "musales" because he had never seen it before.*

---

muscadel *(noun)*

Wine from muscat grapes.

- *In class, the teacher used "muscadel" to mean wine from muscat grapes.*
- *The article explained what "muscadel" means with a simple example.*

---

muscadelle *(noun)*

Wine from muscat grapes.

- *They discussed "muscadelle" during the group presentation.*
- *The article explained what "muscadelle" means with a simple example.*

---

muscardinus *(noun)*

A genus of Gliridae.

- *He looked up "muscardinus" because he had never seen it before.*
- *She wrote a short paragraph that included "muscardinus."*

---

muscardinus avellanarius *(noun)*

A variety of dormouse.

- *The article explained what "muscardinus avellanarius" means with a simple example.*
- *She wrote a short paragraph that included "muscardinus avellanarius."*

---

muscari comosum *(noun)*

Large beautiful Mediterranean species having sterile bluish-violet flowers with fringed corollas forming a tuft above the fertile flowers.

- *They discussed "muscari comosum" during the group presentation.*
- *She wrote a short paragraph that included "muscari comosum."*

---

muscari neglectum *(noun)*

Prolific species having particularly beautiful dark blue flowers.

- *In class, the teacher used "muscari neglectum" to mean prolific species having particularly beautiful dark....*
- *He looked up "muscari neglectum" because he had never seen it before.*

---

muscicapa grisola *(noun)*

Common European woodland flycatcher with greyish-brown plumage.

- *She wrote a short paragraph that included "muscicapa grisola."*
- *He looked up "muscicapa grisola" because he had never seen it before.*

---

muscicapidae *(noun)*

Old World (true) flycatchers.

- *Understanding "muscicapidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "muscicapidae."*

---

muscivora *(noun)*

A genus of Tyrannidae.

- *She wrote a short paragraph that included "muscivora."*
- *He looked up "muscivora" because he had never seen it before.*

---

muscivora-forficata *(noun)*

Grey flycatcher of the southwestern United States and Mexico and Central America having a long forked tail and white breast and salmon and scarlet markings.

- *They discussed "muscivora-forficata" during the group presentation.*
- *In class, the teacher used "muscivora-forficata" to mean grey flycatcher of the southwestern united states....*

---

musclebuilder *(noun)*

Someone who does special exercises to develop a brawny musculature.

- *In class, the teacher used "musclebuilder" to mean someone who does special exercises to develop a....*
- *He looked up "musclebuilder" because he had never seen it before.*

---

muscoidea *(noun)*

Two-winged flies especially the families: Muscidae; Gasterophilidae; Calliphoridae; Tachinidae.

- *In class, the teacher used "muscoidea" to mean two-winged flies especially the families: muscidae;....*
- *The article explained what "muscoidea" means with a simple example.*

---

musculophrenic artery *(noun)*

An artery that supplies the abdomen and intercostal muscles.

- *Understanding "musculophrenic artery" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "musculophrenic artery."*

---

musculophrenic vein *(noun)*

Veins that drain the upper abdominal wall and the lower intercostal spaces and the abdomen.

- *She wrote a short paragraph that included "musculophrenic vein."*
- *The article explained what "musculophrenic vein" means with a simple example.*

---

musculospiral nerve *(noun)*

Largest branch of the brachial plexus; extends down the humerus to the lateral epicondyle where it divides into one branch that goes to the skin on the back of the hand and another that goes to the underlying extensor muscles.

- *They discussed "musculospiral nerve" during the group presentation.*
- *In class, the teacher used "musculospiral nerve" to mean largest branch of the brachial plexus; extends down....*

musculus anconeus *(noun)*

The muscle that extends the forearm and abducts the ulna in pronation of the wrist.

- *She wrote a short paragraph that included "musculus anconeus."*
- *They discussed "musculus anconeus" during the group presentation.*

musculus articularis cubiti *(noun)*

A small branch of the triceps that inserts into the capsule of the elbow joint.

- *He looked up "musculus articularis cubiti" because he had never seen it before.*
- *She wrote a short paragraph that included "musculus articularis cubiti."*

musculus articularis genus *(noun)*

The articular muscle of the knee.

- *In class, the teacher used "musculus articularis genus" to mean the articular muscle of the knee.*
- *The article explained what "musculus articularis genus" means with a simple example.*

musculus deltoideus *(noun)*

A large triangular muscle covering the shoulder joint and serving to abduct and flex and extend and rotate the arm.

- *They discussed "musculus deltoideus" during the group presentation.*
- *In class, the teacher used "musculus deltoideus" to mean a large triangular muscle covering the shoulder....*

musculus intercostalis *(noun)*

Muscles between the ribs; they contract during inspiration.

- *She wrote a short paragraph that included "musculus intercostalis."*
- *Understanding "musculus intercostalis" helps you talk about this topic clearly.*

musculus rhomboideus major *(noun)*

Rhomboid muscle that draws the scapula toward the spinal column.

- *She wrote a short paragraph that included "musculus rhomboideus major."*
- *He looked up "musculus rhomboideus major" because he had never seen it before.*

musculus rhomboideus minor *(noun)*

Rhomboid muscle that draws the scapula toward the vertebral column and slightly upward.

- *She wrote a short paragraph that included "musculus rhomboideus minor."*
- *He looked up "musculus rhomboideus minor" because he had never seen it before.*

musculus scalenus *(noun)*

Any of four pairs of muscles extending from the cervical vertebrae to the second rib; involved in moving the neck and in breathing.

- *The article explained what "musculus scalenus" means with a simple example.*
- *In class, the teacher used "musculus scalenus" to mean any of four pairs of muscles extending from the....*

musculus sphincter ductus choledochi *(noun)*

The smooth muscle sphincter of the common bile duct.

- *The article explained what "musculus sphincter ductus choledochi" means with a simple example.*
- *They discussed "musculus sphincter ductus choledochi" during the group presentation.*

musculus sphincter ductus pancreatici *(noun)*

The smooth muscle sphincter of the main pancreatic duct.

- *Understanding "musculus sphincter ductus pancreatici" helps you talk about this topic clearly.*
- *The article explained what "musculus sphincter ductus pancreatici" means with a simple example.*

musculus sphincter pupillae *(noun)*

A ring of smooth muscle surrounding the iris.

- *She wrote a short paragraph that included "musculus sphincter pupillae."*
- *The article explained what "musculus sphincter pupillae" means with a simple example.*

musculus sphincter urethrae *(noun)*

A striated sphincter muscle that constricts the urethra.

- *They discussed "musculus sphincter urethrae" during the group presentation.*
- *He looked up "musculus sphincter urethrae" because he had never seen it before.*

---

musculus sphincter vesicae *(noun)*

The sphincter muscle of the urinary bladder; made up of a thickened muscular layer of bladder around the urethral opening.

- *The article explained what "musculus sphincter vesicae" means with a simple example.*
- *Understanding "musculus sphincter vesicae" helps you talk about this topic clearly.*

---

musculus sternocleidomastoideus *(noun)*

One of two thick muscles running from the sternum and clavicle to the mastoid and occipital bone; turns head obliquely to the opposite side; when acting together they flex the neck and extend the head.

- *In class, the teacher used "musculus sternocleidomastoideus" to mean one of two thick muscles running from the sternum....*
- *The article explained what "musculus sternocleidomastoideus" means with a simple example.*

---

musicalness *(noun)*

The property of sounding like music.

- *The article explained what "musicalness" means with a simple example.*
- *In class, the teacher used "musicalness" to mean the property of sounding like music.*

---

musicologically *(adverb)*

With respect to musicology.

- *She spoke "musicologically," and the audience immediately understood her point.*
- *Try rewriting the sentence and include "musicologically" naturally.*

---

musingly *(adverb)*

In a reflective manner.

- *'It's funny about that bar,' he said musingly.*
- *He answered "musingly," which changed the tone of the conversation.*

---

muskiness *(noun)*

Having the olfactory properties of musk.

- *He looked up "muskiness" because he had never seen it before.*
- *Understanding "muskiness" helps you talk about this topic clearly.*

---

muskus grass *(noun)*

Low annual European herb naturalized in America; similar to alfilaria.

- *Understanding "muskus grass" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "muskus grass."*

---

muskwood *(noun)*

Musk-scented shrub or tree of southern and southeastern Australia having creamy-yellow flower heads.

- *She wrote a short paragraph that included "muskwood."*
- *They discussed "muskwood" during the group presentation.*

---

musophaga *(noun)*

Type genus of the Musophagidae.

- *They discussed "musophaga" during the group presentation.*
- *The article explained what "musophaga" means with a simple example.*

---

musquash *(noun)*

Beaver-like aquatic rodent of North America with dark glossy brown fur.

- *They discussed "musquash" during the group presentation.*
- *Understanding "musquash" helps you talk about this topic clearly.*

---

mustagh *(noun)*

A mountain range in northern Kashmir; an extension of the Hindu Kush; contains the 2nd highest peak.

- *They discussed "mustagh" during the group presentation.*

- *He looked up “mustagh” because he had never seen it before.*

---

mustagh range *(noun)*

A mountain range in northern Kashmir; an extension of the Hindu Kush; contains the 2nd highest peak.

- *He looked up “mustagh range” because he had never seen it before.*
- *She wrote a short paragraph that included “mustagh range.”*

---

mustela erminea *(noun)*

Mustelid of northern hemisphere in its white winter coat.

- *Understanding “mustela erminea” helps you talk about this topic clearly.*
- *They discussed “mustela erminea” during the group presentation.*

---

mustela frenata *(noun)*

The common American weasel distinguished by large size and black-tipped tail.

- *Understanding “mustela frenata” helps you talk about this topic clearly.*
- *They discussed “mustela frenata” during the group presentation.*

---

mustela rixosa *(noun)*

Of Canada and northeastern United States.

- *They discussed “mustela rixosa” during the group presentation.*
- *Understanding “mustela rixosa” helps you talk about this topic clearly.*

---

musteline *(noun)*

Fissiped fur-bearing carnivorous mammals.

- *He looked up “musteline” because he had never seen it before.*
- *In class, the teacher used “musteline” to mean fissiped fur-bearing carnivorous mammals.*

---

musteline mammal *(noun)*

Fissiped fur-bearing carnivorous mammals.

- *They discussed “musteline mammal” during the group presentation.*
- *In class, the teacher used “musteline mammal” to mean fissiped fur-bearing carnivorous mammals.*

---

mustelus *(noun)*

Smooth dogfishes.

- *He looked up “mustelus” because he had never seen it before.*
- *She wrote a short paragraph that included “mustelus.”*

---

mustelus canis *(noun)*

Found along the Atlantic coast of the Americas.

- *He looked up “mustelus canis” because he had never seen it before.*
- *They discussed “mustelus canis” during the group presentation.*

---

mustelus mustelus *(noun)*

Smooth dogfish of European coastal waters.

- *He looked up “mustelus mustelus” because he had never seen it before.*
- *She wrote a short paragraph that included “mustelus mustelus.”*

---

mustelus norrisi *(noun)*

Found from the northern Gulf of Mexico to Brazil.

- *In class, the teacher used “mustelus norrisi” to mean found from the northern gulf of mexico to brazil.*
- *The article explained what “mustelus norrisi” means with a simple example.*

---

mutableness *(noun)*

The quality of being capable of mutation.

- *They discussed “mutableness” during the group presentation.*
- *Understanding “mutableness” helps you talk about this topic clearly.*

---

mutamycin *(noun)*

A complex of antibiotic substances obtained from a streptomyces bacterium; one form (trade name Mutamycin) shows promise as an anticancer drug.

- *They discussed "mutamycin" during the group presentation.*
- *In class, the teacher used "mutamycin" to mean a complex of antibiotic substances obtained from a....*

---

mutchkin *(noun)*

A Scottish unit of liquid measure equal to 0.9 United States pint.

- *The article explained what "mutchkin" means with a simple example.*
- *She wrote a short paragraph that included "mutchkin."*

---

mutillidae *(noun)*

A family of wasps.

- *He looked up "mutillidae" because he had never seen it before.*
- *They discussed "mutillidae" during the group presentation.*

---

mutinus *(noun)*

A genus of fungi belonging to the family Phallaceae.

- *The article explained what "mutinus" means with a simple example.*
- *In class, the teacher used "mutinus" to mean a genus of fungi belonging to the family phallaceae.*

---

mutinus caninus *(noun)*

A stinkhorn having a stalk without a cap; the slimy gleba is simply plastered on its surface near the apex where winged insects can find it.

- *Understanding "mutinus caninus" helps you talk about this topic clearly.*
- *He looked up "mutinus caninus" because he had never seen it before.*

---

mutisia *(noun)*

Any of various plants of the genus Mutisia.

- *Understanding "mutisia" helps you talk about this topic clearly.*
- *He looked up "mutisia" because he had never seen it before.*

---

mutsuhito *(noun)*

Emperor of Japan who encouraged the modernization of Japan (1852-1912).

- *Understanding "mutsuhito" helps you talk about this topic clearly.*
- *In class, the teacher used "mutsuhito" to mean emperor of japan who encouraged the modernization....*

---

mutterer *(noun)*

A person who speaks softly and indistinctly.

- *In class, the teacher used "mutterer" to mean a person who speaks softly and indistinctly.*
- *They discussed "mutterer" during the group presentation.*

---

muttonfish *(noun)*

Similar to and often marketed as 'red snapper'.

- *She wrote a short paragraph that included "muttonfish."*
- *He looked up "muttonfish" because he had never seen it before.*

---

mutualness *(noun)*

A reciprocality of sentiments.

- *She wrote a short paragraph that included "mutualness."*
- *He looked up "mutualness" because he had never seen it before.*

---

muzjik *(noun)*

A Russian peasant (especially prior to 1917).

- *In class, the teacher used "muzjik" to mean a russian peasant (especially prior to 1917).*
- *The article explained what "muzjik" means with a simple example.*

---

muztag *(noun)*

A highest mountain peak in the Kunlun Shan in China; near the Indian border (23,891 feet high).

- *He looked up "muztag" because he had never seen it before.*
- *Understanding "muztag" helps you talk about this topic clearly.*

---

muztagh *(noun)*

A highest mountain peak in the Kunlun Shan in China; near the Indian border (23,891 feet high).

- *In class, the teacher used "muztagh" to mean a highest mountain peak in the kunlun shan in....*
- *They discussed "muztagh" during the group presentation.*

---

muzzler *(noun)*

Someone who muzzles animals.

- *She wrote a short paragraph that included "muzzler."*
- *He looked up "muzzler" because he had never seen it before.*

---

myacidae *(noun)*

Soft-shell clams.

- *She wrote a short paragraph that included "myacidae."*
- *They discussed "myacidae" during the group presentation.*

---

mycelia sterilia *(noun)*

Order of imperfect fungi having no known spore stage.

- *She wrote a short paragraph that included "mycelia sterilia."*
- *He looked up "mycelia sterilia" because he had never seen it before.*

---

mycenaen *(noun)*

A native or inhabitant of ancient Mycenae.

- *Understanding "mycenaen" helps you talk about this topic clearly.*
- *The article explained what "mycenaen" means with a simple example.*

---

mycetophilidae *(noun)*

Fungus gnats.

- *She wrote a short paragraph that included "mycetophilidae."*
- *They discussed "mycetophilidae" during the group presentation.*

---

mycobacteriaceae *(noun)*

A family of bacteria.

- *The article explained what "mycobacteriaceae" means with a simple example.*
- *They discussed "mycobacteriaceae" during the group presentation.*

---

mycophage *(noun)*

A person or animal who eats fungi (especially mushrooms).

- *The article explained what "mycophage" means with a simple example.*
- *She wrote a short paragraph that included "mycophage."*

---

mycophagist *(noun)*

A person or animal who eats fungi (especially mushrooms).

- *He looked up "mycophagist" because he had never seen it before.*
- *In class, the teacher used "mycophagist" to mean a person or animal who eats fungi (especially....*

---

mycoplasmataceae *(noun)*

Pleomorphic Gram-negative nonmotile microorganism similar to both viruses and bacteria; parasitic in mammals.

- *The article explained what "mycoplasmataceae" means with a simple example.*
- *In class, the teacher used "mycoplasmataceae" to mean pleomorphic gram-negative nonmotile microorganism....*

---

mycoplasmatales *(noun)*

Coextensive with the family Mycoplasmataceae.

- *She wrote a short paragraph that included "mycoplasmatales."*
- *He looked up "mycoplasmatales" because he had never seen it before.*

mycostatin *(noun)*

An antifungal and antibiotic (trade names Mycostatin and Nystan) discovered in New York State; derived from soil fungi actinomycetes.

- *She wrote a short paragraph that included "mycostatin."*
- *They discussed "mycostatin" during the group presentation.*

mycrosporidia *(noun)*

An order in the subclass Cnidosporidia.

- *The article explained what "mycrosporidia" means with a simple example.*
- *Understanding "mycrosporidia" helps you talk about this topic clearly.*

mycteria *(noun)*

A genus of storks of the family Ciconiidae now including only the American wood ibis.

- *He looked up "mycteria" because he had never seen it before.*
- *In class, the teacher used "mycteria" to mean a genus of storks of the family ciconiidae now....*

mycteria americana *(noun)*

An American stork that resembles the true ibises in having a downward-curved bill; inhabits wooded swamps of New World tropics.

- *They discussed "mycteria americana" during the group presentation.*
- *In class, the teacher used "mycteria americana" to mean an american stork that resembles the true ibises in....*

mycteroperca bonaci *(noun)*

Large dark grouper with a thick head and rough scales.

- *Understanding "mycteroperca bonaci" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "mycteroperca bonaci."*

myctophidae *(noun)*

Deep-sea fishes comprising the lantern fishes.

- *They discussed "myctophidae" during the group presentation.*
- *The article explained what "myctophidae" means with a simple example.*

myelencephalon *(noun)*

The posterior part of the hindbrain in developing vertebrates; forms the medulla oblongata in adults.

- *He looked up "myelencephalon" because he had never seen it before.*
- *In class, the teacher used "myelencephalon" to mean the posterior part of the hindbrain in developing....*

myeloblast *(noun)*

A precursor of leukocytes that normally occurs only in bone marrow.

- *He looked up "myeloblast" because he had never seen it before.*
- *Understanding "myeloblast" helps you talk about this topic clearly.*

myelocyte *(noun)*

An immature leukocyte normally found in bone marrow.

- *The article explained what "myelocyte" means with a simple example.*
- *She wrote a short paragraph that included "myelocyte."*

myenteric plexus *(noun)*

A plexus of unmyelinated fibers and postganglionic autonomic cell bodies in the muscular coat of the esophagus and stomach and intestines.

- *She wrote a short paragraph that included "myenteric plexus."*
- *Understanding "myenteric plexus" helps you talk about this topic clearly.*

mylitta *(noun)*

Babylonian and Assyrian goddess of love and fertility and war; counterpart to the Phoenician Astarte.

- *He looked up "mylitta" because he had never seen it before.*
- *In class, the teacher used "mylitta" to mean babylonian and assyrian goddess of love and....*

mylodon *(noun)*

Large (bear-sized) extinct edentate mammal of the Pleistocene in South America.

- *Understanding "mylodon" helps you talk about this topic clearly.*
- *In class, the teacher used "mylodon" to mean large (bear-sized) extinct edentate mammal of the....*

Science & Research

hypothesis *(noun)*

An idea or explanation that is based on limited evidence and is used as a starting point for further investigation.

- *The researchers designed an experiment to test their hypothesis.*
- *Her hypothesis was that lack of sleep affects memory in teenagers.*

empirical *(adjective)*

Based on observation, experience, or experiment rather than on theory or pure logic.

- *There is strong empirical evidence linking smoking to lung disease.*
- *The theory sounds convincing, but it lacks empirical support.*

correlation *(noun)*

A connection or relationship between two or more things, in which they change together, though one does not necessarily cause the other.

- *The study found a strong correlation between exercise and better mental health.*
- *Remember that correlation does not prove causation.*

variable *(noun)*

A factor that can change in an experiment or study and that may affect the results.

- *Temperature was the main variable in the experiment.*
- *Researchers controlled other variables carefully.*

sample *(noun)*

A small group chosen from a larger population for study, meant to represent the whole.

- *The survey used a sample of one thousand adults.*
- *A larger sample usually gives more reliable results.*

peer review *(noun)*

The evaluation of scientific work by other experts in the same field before it is published.

- *The article passed peer review and will appear next month.*
- *Peer review helps maintain quality in research.*

replicate *(verb)*

To repeat an experiment or study to see if the same results appear again.

- *Other labs could not replicate the original findings.*
- *Science advances when results can be reliably replicated.*

molecule *(noun)*

The smallest unit of a chemical substance that still has the properties of that substance.

- *A water molecule contains two hydrogen atoms and one oxygen atom.*
- *Scientists study how molecules interact.*

genome *(noun)*

The complete set of genetic material of an organism.

- *Scientists mapped the human genome in the early 2000s.*
- *Comparing genomes helps explain how species are related.*

catalyst *(noun)*

A substance that speeds up a chemical reaction without being used up; also, something that causes change.

- *Enzymes act as catalysts in the body.*
- *The speech was a catalyst for political reform.*

anomaly *(noun)*

Something that is different from what is normal or expected.

- *The data showed an anomaly that required further study.*
- *Scientists investigate anomalies to improve their models.*

---

isotope *(noun)*

A form of a chemical element with the same number of protons but a different number of neutrons.

- *Carbon-14 is a radioactive isotope used in dating ancient objects.*
- *Isotopes of the same element behave chemically in similar ways.*

---

protocol *(noun)*

A detailed plan or set of rules for carrying out a scientific experiment or medical procedure.

- *The lab followed a strict safety protocol.*
- *Researchers published the study protocol in advance.*

---

centralistic *(adjective)*

Advocating centralization.

- *Her writing became clearer after she learned "centralistic."*
- *Students compared "centralistic" with similar adjectives in the lesson.*

---

centroidal *(adjective)*

Of or relating to (especially passing through) a centroid.

- *A "centroidal" approach may work better in this case.*
- *Students compared "centroidal" with similar adjectives in the lesson.*

---

centrosomic *(adjective)*

Of or relating to a centrosome.

- *Would you call this situation "centrosomic"? Explain why.*
- *It is useful to describe something as "centrosomic" when it is of or relating to a centrosome.*

---

cephalopodan *(adjective)*

Relating or belonging to the class Cephalopoda.

- *Would you call this situation "cephalopodan"? Explain why.*
- *A "cephalopodan" approach may work better in this case.*

---

cephalothin *(noun)*

A semisynthetic analogue of cephalosporin.

- *The article explained what "cephalothin" means with a simple example.*
- *She wrote a short paragraph that included "cephalothin."*

---

cerate *(noun)*

A hard medicated paste made of lard or oil mixed with wax or resin.

- *He looked up "cerate" because he had never seen it before.*
- *She wrote a short paragraph that included "cerate."*

---

ceratin *(noun)*

A fibrous scleroprotein that occurs in the outer layer of the skin and in horny tissues such as hair, feathers, nails, and hooves.

- *He looked up "ceratin" because he had never seen it before.*
- *In class, the teacher used "ceratin" to mean a fibrous scleroprotein that occurs in the outer....*

---

cercarial *(adjective)*

Of or relating to cercaria.

- *Students compared "cercarial" with similar adjectives in the lesson.*
- *Would you call this situation "cercarial"? Explain why.*

---

cerecloth *(noun)*

A waterproof waxed cloth once used as a shroud.

- *They discussed "cerecloth" during the group presentation.*
- *In class, the teacher used "cerecloth" to mean a waterproof waxed cloth once used as a shroud.*

cerement *(noun)*

Burial garment in which a corpse is wrapped.

- *They discussed "cerement" during the group presentation.*
- *He looked up "cerement" because he had never seen it before.*

ceresin *(noun)*

A white wax extracted from ozokerite.

- *She wrote a short paragraph that included "ceresin."*
- *He looked up "ceresin" because he had never seen it before.*

cerotic acid *(noun)*

A white solid fatty acid found in waxes (such as beeswax).

- *Understanding "cerotic acid" helps you talk about this topic clearly.*
- *The article explained what "cerotic acid" means with a simple example.*

cerous *(adjective)*

Of or relating to or containing cerium with valence 3.

- *The speaker chose "cerous" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "cerous."*

ceruminous *(adjective)*

Relating to or secreting cerumen.

- *It is useful to describe something as "ceruminous" when it is relating to or secreting cerumen.*
- *A "ceruminous" approach may work better in this case.*

ceruse *(noun)*

A poisonous white pigment that contains lead.

- *They discussed "ceruse" during the group presentation.*
- *Understanding "ceruse" helps you talk about this topic clearly.*

cervine *(adjective)*

Relating to or resembling deer.

- *Students compared "cervine" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "cervine."*

cetaceous *(adjective)*

Of or relating to whales and dolphins etc.

- *Would you call this situation "cetaceous"? Explain why.*
- *Her writing became clearer after she learned "cetaceous."*

cetrimide *(noun)*

A cationic detergent that is a powerful disinfectant.

- *Understanding "cetrimide" helps you talk about this topic clearly.*
- *In class, the teacher used "cetrimide" to mean a cationic detergent that is a powerful disinfectant.*

ceylonite *(noun)*

A dark-colored spinel containing iron.

- *In class, the teacher used "ceylonite" to mean a dark-colored spinel containing iron.*
- *He looked up "ceylonite" because he had never seen it before.*

chabasite *(noun)*

A group of minerals of the zeolite family consisting of a hydrous silicate of calcium and aluminum.

- *Understanding "chabasite" helps you talk about this topic clearly.*
- *They discussed "chabasite" during the group presentation.*

chabazite *(noun)*

A group of minerals of the zeolite family consisting of a hydrous silicate of calcium and aluminum.

- *The article explained what “chabazite” means with a simple example.*

- *Students compared "cheliceral" with similar adjectives in the lesson.*
- *A "cheliceral" approach may work better in this case.*

chelicerate *(adjective)*

Of or relating to or resembling chelicerae.

- *A "chelicerate" approach may work better in this case.*
- *The speaker chose "chelicerate" because it captured the feeling precisely.*

chelicerous *(adjective)*

Having chelicerae.

- *Students compared "chelicerous" with similar adjectives in the lesson.*
- *Would you call this situation "chelicerous"? Explain why.*

cheliferous *(adjective)*

Having chelae.

- *Her writing became clearer after she learned "cheliferous."*
- *The speaker chose "cheliferous" because it captured the feeling precisely.*

chemoreceptive *(adjective)*

Of or relating to chemoreceptors.

- *The speaker chose "chemoreceptive" because it captured the feeling precisely.*
- *It is useful to describe something as "chemoreceptive" when it is of or relating to chemoreceptors.*

chemosorption *(noun)*

Adsorption (especially when irreversible) by means of chemical instead of physical forces.

- *Understanding "chemosorption" helps you talk about this topic clearly.*
- *The article explained what "chemosorption" means with a simple example.*

chemotherapeutical *(adjective)*

Of or relating to chemotherapy.

- *The speaker chose "chemotherapeutical" because it captured the feeling precisely.*
- *It is useful to describe something as "chemotherapeutical" when it is of or relating to chemotherapy.*

cheoplastic metal *(noun)*

Any alloy that fuses at low temperatures and can be used molding artificial teeth.

- *Understanding "cheoplastic metal" helps you talk about this topic clearly.*
- *In class, the teacher used "cheoplastic metal" to mean any alloy that fuses at low temperatures and can be....*

chernozemic soil *(noun)*

A rich black loam of Russia.

- *Understanding "chernozemic soil" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chernozemic soil."*

chiasmal *(adjective)*

Of or relating to a chiasm.

- *It is useful to describe something as "chiasmal" when it is of or relating to a chiasm.*
- *The speaker chose "chiasmal" because it captured the feeling precisely.*

chiasmatic *(adjective)*

Of or relating to a chiasm.

- *Would you call this situation "chiasmatic"? Explain why.*
- *Her writing became clearer after she learned "chiasmatic."*

chiasmic *(adjective)*

Of or relating to a chiasm.

- *A "chiasmic" approach may work better in this case.*
- *It is useful to describe something as "chiasmic" when it is of or relating to a chiasm.*

---

chiffonier *(noun)*

A tall elegant chest of drawers.

- *The article explained what "chiffonier" means with a simple example.*
- *Understanding "chiffonier" helps you talk about this topic clearly.*

---

- *The speaker chose "chimeral" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "chimeral."*

---

chimneypot *(noun)*

A short earthenware pipe on the top of a chimney to increase the draft.

- *Understanding "chimneypot" helps you talk about this topic clearly.*
- *The article explained what "chimneypot" means with a simple example.*

---

chimneystack *(noun)*

The part of the chimney that is above the roof; usually has several flues.

- *They discussed "chimneystack" during the group presentation.*
- *In class, the teacher used "chimneystack" to mean the part of the chimney that is above the roof;....*

---

chiromantic *(adjective)*

Of or relating to palmistry.

- *A "chiromantic" approach may work better in this case.*
- *Her writing became clearer after she learned "chiromantic."*

---

chloroacetophenone *(noun)*

A tear gas that is weaker than CS gas but lasts longer.

- *In class, the teacher used "chloroacetophenone" to mean a tear gas that is weaker than cs gas but lasts longer.*
- *Understanding "chloroacetophenone" helps you talk about this topic clearly.*

---

chlorobenzylidenemalononitrile *(noun)*

A tear gas that is stronger than CN gas but wears off faster; can be deployed by grenades or cluster bombs; can cause skin burns and fatal pulmonary edema.

- *She wrote a short paragraph that included "chlorobenzylidenemalononitrile."*
- *They discussed "chlorobenzylidenemalononitrile" during the group presentation.*

---

chlorohydric acid *(noun)*

An aqueous solution of hydrogen chloride; a strongly corrosive acid.

- *She wrote a short paragraph that included "chlorohydric acid."*
- *He looked up "chlorohydric acid" because he had never seen it before.*

---

chlorophyllose *(adjective)*

Relating to or being or containing chlorophyll.

- *The speaker chose "chlorophyllose" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "chlorophyllose."*

---

chlorophyllous *(adjective)*

Relating to or being or containing chlorophyll.

- *Her writing became clearer after she learned "chlorophyllous."*
- *Students compared "chlorophyllous" with similar adjectives in the lesson.*

chloropicrin *(noun)*

A heavy colorless insoluble liquid compound that causes tears and vomiting; used as a pesticide and as tear gas.

- *Understanding "chloropicrin" helps you talk about this topic clearly.*
- *They discussed "chloropicrin" during the group presentation.*

chlorous acid *(noun)*

(HClO2) a strongly oxidizing acid; known only in solution.

- *He looked up "chlorous acid" because he had never seen it before.*
- *In class, the teacher used "chlorous acid" to mean (hclo2) a strongly oxidizing acid; known only in....*

choleraic *(adjective)*

Relating to or resulting from or resembling cholera.

- *Would you call this situation "choleraic"? Explain why.*
- *The speaker chose "choleraic" because it captured the feeling precisely.*

cholesterin *(noun)*

An animal sterol that is normally synthesized by the liver; the most abundant steroid in animal tissues.

- *Understanding "cholesterin" helps you talk about this topic clearly.*
- *He looked up "cholesterin" because he had never seen it before.*

---

commutate *(verb)*

Reverse the direction of (an alternating electric current) each half cycle so as to produce a unidirectional current.

- *In everyday English, people use "commutate" when talking about this idea.*
- *He did not know how to use "commutate" until he saw an example.*

---

complexify *(verb)*

Have or develop complicating consequences.

- *She tried to use "complexify" carefully so everyone would understand.*
- *In everyday English, people use "complexify" when talking about this idea.*

---

compositor's case *(noun)*

(printing) the receptacle in which a compositor has his type, which is divided into compartments for the different letters, spaces, or numbers.

- *For English, a compositor will ordinarily have two such cases, the upper case containing the capitals and the lower case containing the small letters.*
- *The article explained what "compositor's case" means with a simple example.*

---

conceptualistic *(adjective)*

Involving or characteristic of conceptualism.

- *Would you call this situation "conceptualistic"? Explain why.*
- *It is useful to describe something as "conceptualistic" when it is involving or characteristic of conceptualism.*

---

concessive *(adjective)*

Of or pertaining to concession.

- *It is useful to describe something as "concessive" when it is of or pertaining to concession.*
- *The speaker chose "concessive" because it captured the feeling precisely.*

---

concretise *(verb)*

Become specific.

- *In everyday English, people use "concretise" when talking about this idea.*
- *Learners should practice how to use "concretise" in real sentences.*

---

concretistic *(adjective)*

Of or relating to concrete representations of abstractions.

- *A concretistic-seeming statement.*
- *It is useful to describe something as "concretistic" when it is of or relating to concrete representations of....*

---

conelike *(adjective)*

Relating to or resembling a cone.

- *Conelike fruit.*
- *Would you call this situation "conelike"? Explain why.*

---

congealment *(noun)*

The process of congealing; solidification by (or as if by) freezing.

- *She wrote a short paragraph that included "congealment."*
- *He looked up "congealment" because he had never seen it before.*

---

congelation *(noun)*

The process of congealing; solidification by (or as if by) freezing.

- *She wrote a short paragraph that included "congelation."*
- *Understanding "congelation" helps you talk about this topic clearly.*

---

congenerical *(adjective)*

Belonging to the same genus.

- *Students compared "congenerical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "congenerical."*

---

congenerous *(adjective)*

Belonging to the same genus.

- *Students compared "congenerous" with similar adjectives in the lesson.*
- *It is useful to describe something as "congenerous" when it is belonging to the same genus.*

---

conglobate *(verb)*

Assume a globular shape.

- *The coach explained when to use "conglobate" and when to wait.*
- *She tried to use "conglobate" carefully so everyone would understand.*

---

conglobe *(verb)*

Assume a globular shape.

- *Can you use "conglobe" in a sentence that fits this situation?*
- *She tried to use "conglobe" carefully so everyone would understand.*

---

conima *(noun)*

A gum resin from the poison hemlock, Conium maculatum.

- *She wrote a short paragraph that included "conima."*
- *Understanding "conima" helps you talk about this topic clearly.*

---

conspirative *(adjective)*

Relating to or characteristic of conspiracy or conspirators.

- *The discovery of possible conspirative codes.*
- *Her writing became clearer after she learned "conspirative."*

---

constantan *(noun)*

An alloy of copper and nickel with high electrical resistance and a low temperature coefficient; used as resistance wire.

- *She wrote a short paragraph that included "constantan."*
- *Understanding "constantan" helps you talk about this topic clearly.*

---

constitutionalise *(verb)*

Incorporate into a constitution, make constitutional.

- *In everyday English, people use "constitutionalise" when talking about this idea.*
- *Can you use "constitutionalise" in a sentence that fits this situation?*

---

constringe *(verb)*

Become tight or as if tight.

- *The coach explained when to use “constringe” and when to wait.*
- *She tried to use “constringe” carefully so everyone would understand.*

---

consubstantiate *(verb)*

Become united in substance.

- *Thought and the object consubstantiate.*
- *Thought is consubstantiated with the object.*

---

contrabassoon *(noun)*

The bassoon that is the largest instrument in the oboe family.

- *In class, the teacher used “contrabassoon” to mean the bassoon that is the largest instrument in the....*
- *The article explained what “contrabassoon” means with a simple example.*

---

contrafagotto *(noun)*

The bassoon that is the largest instrument in the oboe family.

- *They discussed “contrafagotto” during the group presentation.*
- *In class, the teacher used “contrafagotto” to mean the bassoon that is the largest instrument in the....*

---

conventionalise *(verb)*

Make conventional or adapt to conventions.

- *In everyday English, people use “conventionalise” when talking about this idea.*
- *Can you use “conventionalise” in a sentence that fits this situation?*

---

conventionalize *(verb)*

Make conventional or adapt to conventions.

- *Conventionalized behavior.*
- *The coach explained when to use “conventionalize” and when to wait.*

---

cookfire *(noun)*

A fire for cooking.

- *He looked up “cookfire” because he had never seen it before.*
- *She wrote a short paragraph that included “cookfire.”*

---

copaline *(noun)*

Partly mineralized copal dug from the ground.

- *The article explained what “copaline” means with a simple example.*
- *Understanding “copaline” helps you talk about this topic clearly.*

---

copalite *(noun)*

Partly mineralized copal dug from the ground.

- *The article explained what “copalite” means with a simple example.*
- *In class, the teacher used “copalite” to mean partly mineralized copal dug from the ground.*

---

copestone *(noun)*

A stone that forms the top of wall or building.

- *He looked up “copestone” because he had never seen it before.*
- *They discussed “copestone” during the group presentation.*

---

copolymerise *(verb)*

Polymerize together.

- *He did not know how to use “copolymerise” until he saw an example.*
- *She tried to use “copolymerise” carefully so everyone would understand.*

---

copolymerize *(verb)*

Polymerize together.

- *The two substances copolymerized.*
- *Learners should practice how to use “copolymerize” in real sentences.*

copperware *(noun)*

Utensils made with copper.

- *In class, the teacher used "copperware" to mean utensils made with copper.*
- *Understanding "copperware" helps you talk about this topic clearly.*

copyholder *(noun)*

Mechanical device used in printing; holds the copy for the compositor.

- *She wrote a short paragraph that included "copyholder."*
- *Understanding "copyholder" helps you talk about this topic clearly.*

corbiestep *(noun)*

(architecture) a step on the top of a gable wall.

- *He looked up "corbiestep" because he had never seen it before.*
- *In class, the teacher used "corbiestep" to mean (architecture) a step on the top of a gable wall.*

coreferential *(adjective)*

Relating to coreference.

- *A "coreferential" approach may work better in this case.*
- *Her writing became clearer after she learned "coreferential."*

cormose *(adjective)*

Having or producing corms.

- *Students compared "cormose" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "cormose."*

cormous *(adjective)*

Having or producing corms.

- *Would you call this situation "cormous"? Explain why.*
- *Her writing became clearer after she learned "cormous."*

corposant *(noun)*

An electrical discharge accompanied by ionization of surrounding atmosphere.

- *She wrote a short paragraph that included "corposant."*
- *He looked up "corposant" because he had never seen it before.*

corrasion *(noun)*

Erosion by friction.

- *He looked up "corrasion" because he had never seen it before.*
- *They discussed "corrasion" during the group presentation.*

corslet *(noun)*

A piece of body armor for the trunk; usually consists of a breastplate and back piece.

- *Understanding "corslet" helps you talk about this topic clearly.*
- *He looked up "corslet" because he had never seen it before.*

cortef *(noun)*

An adrenal-cortex hormone (trade names Hydrocortone or Cortef) that is active in carbohydrate and protein metabolism.

- *She wrote a short paragraph that included "cortef."*
- *He looked up "cortef" because he had never seen it before.*

corticoid *(noun)*

A steroid hormone produced by the adrenal cortex or synthesized; administered as drugs they reduce swelling and decrease the body's immune response.

- *In class, the teacher used "corticoid" to mean a steroid hormone produced by the adrenal cortex or....*
- *Understanding "corticoid" helps you talk about this topic clearly.*

cortone acetate *(noun)*

A corticosteroid hormone (trade name Cortone Acetate) normally produced by the adrenal cortex; is converted to hydrocortisone.

- *The article explained what "cortone acetate" means with a simple example.*
- *In class, the teacher used "cortone acetate" to mean a corticosteroid hormone (trade name cortone....*

---

corundom *(noun)*

Very hard mineral used as an abrasive.

- *She wrote a short paragraph that included "corundom."*
- *Understanding "corundom" helps you talk about this topic clearly.*

---

coruscate *(verb)*

Be lively or brilliant or exhibit virtuosity.

- *His playing coruscated throughout the concert hall.*
- *In everyday English, people use "coruscate" when talking about this idea.*

---

corvine *(adjective)*

Relating to or resembling a crow.

- *Would you call this situation "corvine"? Explain why.*
- *The speaker chose "corvine" because it captured the feeling precisely.*

---

corymbose *(adjective)*

Resembling a corymb.

- *Her writing became clearer after she learned "corymbose."*
- *A "corymbose" approach may work better in this case.*

---

cosmogonical *(adjective)*

Pertaining to the branch of astronomy dealing with the origin and history and structure and dynamics of the universe.

- *It is useful to describe something as "cosmogonical" when it is pertaining to the branch of astronomy dealing with....*
- *A "cosmogonical" approach may work better in this case.*

---

cosmologic *(adjective)*

Pertaining to the branch of astronomy dealing with the origin and history and structure and dynamics of the universe.

- *Cosmologic science.*
- *Cosmological redshift.*

---

cosmotron *(noun)*

A large proton synchrotron; uses frequency modulation of an electric field to accelerate protons.

- *In class, the teacher used "cosmotron" to mean a large proton synchrotron; uses frequency....*
- *The article explained what "cosmotron" means with a simple example.*

---

cothromboplastin *(noun)*

A coagulation factor formed in the kidney under the influence of vitamin K.

- *Understanding "cothromboplastin" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cothromboplastin."*

---

coude system *(noun)*

A reflecting telescope so constructed that the light is led to a plate holder or spectrograph.

- *She wrote a short paragraph that included "coude system."*
- *The article explained what "coude system" means with a simple example.*

---

coude telescope *(noun)*

A reflecting telescope so constructed that the light is led to a plate holder or spectrograph.

- *In class, the teacher used "coude telescope" to mean a reflecting telescope so constructed that the....*
- *The article explained what "coude telescope" means with a simple example.*

---

coulisse *(noun)*

A timber member grooved to take a sliding panel.

- *She wrote a short paragraph that included "coulisse."*

- *Understanding "coulisse" helps you talk about this topic clearly.*

---

coumarone *(noun)*

A colorless oily compound extracted from coal tar and used in manufacturing synthetic resins.

- *The article explained what "coumarone" means with a simple example.*
- *In class, the teacher used "coumarone" to mean a colorless oily compound extracted from coal tar....*

---

coumarone resin *(noun)*

A thermoplastic resin obtained by polymerization of indene and coumarone; used in coatings and paint and asphalt tile.

- *He looked up "coumarone resin" because he had never seen it before.*
- *They discussed "coumarone resin" during the group presentation.*

---

coumarone-indene resin *(noun)*

A thermoplastic resin obtained by polymerization of indene and coumarone; used in coatings and paint and asphalt tile.

- *He looked up "coumarone-indene resin" because he had never seen it before.*
- *She wrote a short paragraph that included "coumarone-indene resin."*

---

counterchange *(verb)*

Cause to change places.

- *She tried to use "counterchange" carefully so everyone would understand.*
- *He did not know how to use "counterchange" until he saw an example.*

---

counterglow *(noun)*

A faint spot of light in the night sky that appears directly opposite the position of the sun; a reflection of sunlight by micrometeoric material in space.

- *The article explained what "counterglow" means with a simple example.*
- *In class, the teacher used "counterglow" to mean a faint spot of light in the night sky that appears....*

---

counterinsurgent *(adjective)*

Of or relating or characteristic of actions taken by a government to defeat insurgency.

- *Her writing became clearer after she learned "counterinsurgent."*
- *A "counterinsurgent" approach may work better in this case.*

---

counterirritant *(noun)*

A medicine applied locally to produce superficial inflammation in order to reduce deeper inflammation.

- *She wrote a short paragraph that included "counterirritant."*
- *He looked up "counterirritant" because he had never seen it before.*

---

counterstain *(noun)*

A stain of contrasting color that is used when the principal stain does not show the structure clearly.

- *The article explained what "counterstain" means with a simple example.*
- *In class, the teacher used "counterstain" to mean a stain of contrasting color that is used when the....*

---

countinghouse *(noun)*

Office used by the accountants of a business.

- *The article explained what "countinghouse" means with a simple example.*
- *In class, the teacher used "countinghouse" to mean office used by the accountants of a business.*

---

cowbarn *(noun)*

A barn for cows.

- *He looked up "cowbarn" because he had never seen it before.*
- *She wrote a short paragraph that included "cowbarn."*

---

cowhouse *(noun)*

A barn for cows.

- *She wrote a short paragraph that included "cowhouse."*
- *The article explained what "cowhouse" means with a simple example.*

---

cowpie *(noun)*

Fecal matter of a cow.

- *They discussed "cowpie" during the group presentation.*
- *Understanding "cowpie" helps you talk about this topic clearly.*

---

crackleware *(noun)*

Glazed china with a network of fine cracks on the surface.

- *He looked up "crackleware" because he had never seen it before.*
- *They discussed "crackleware" during the group presentation.*

---

craig ventner *(noun)*

United States geneticist who published the complete base sequences for all the genes of a free-living organism, the influenza bacterium; later led team that developed a first draft of the entire human genome (born in 1946).

- *In class, the teacher used "craig ventner" to mean united states geneticist who published the complete....*
- *Understanding "craig ventner" helps you talk about this topic clearly.*

---

crampoon *(noun)*

A hinged pair of curved iron bars; used to raise heavy objects.

- *They discussed "crampoon" during the group presentation.*
- *In class, the teacher used "crampoon" to mean a hinged pair of curved iron bars; used to raise....*

---

craniometer *(noun)*

An instrument for measuring skull sizes.

- *She wrote a short paragraph that included "craniometer."*
- *The article explained what "craniometer" means with a simple example.*

---

craniometric *(adjective)*

Of or relating to craniometry.

- *Would you call this situation "craniometric"? Explain why.*
- *It is useful to describe something as "craniometric" when it is of or relating to craniometry.*

---

craniometrical *(adjective)*

Of or relating to craniometry.

- *The speaker chose "craniometrical" because it captured the feeling precisely.*
- *A "craniometrical" approach may work better in this case.*

---

creaseproof *(adjective)*

Of fabric that does not wrinkle easily.

- *Her writing became clearer after she learned "creaseproof."*
- *The speaker chose "creaseproof" because it captured the feeling precisely.*

---

crenel *(noun)*

A notch or open space between two merlons in a crenelated battlement.

- *The article explained what "crenel" means with a simple example.*
- *Understanding "crenel" helps you talk about this topic clearly.*

---

crenelle *(noun)*

A notch or open space between two merlons in a crenelated battlement.

- *Understanding "crenelle" helps you talk about this topic clearly.*
- *They discussed "crenelle" during the group presentation.*

---

creolize *(verb)*

Develop into a creole.

- *Pidgins often creolize.*
- *In everyday English, people use "creolize" when talking about this idea.*

---

creosol *(noun)*

A colorless to yellow aromatic liquid that is a constituent of creosote.

- *The article explained what “creosol” means with a simple example.*
- *In class, the teacher used “creosol” to mean a colorless to yellow aromatic liquid that is a....*

---

cretonne *(noun)*

An unglazed heavy fabric; brightly printed; used for slipcovers and draperies.

- *He looked up “cretonne” because he had never seen it before.*
- *In class, the teacher used “cretonne” to mean an unglazed heavy fabric; brightly printed; used....*

---

crewelwork *(noun)*

Embroidery done with loosely twisted worsted yarn.

- *She wrote a short paragraph that included “crewelwork.”*
- *He looked up “crewelwork” because he had never seen it before.*

---

crewet *(noun)*

Bottle that holds wine or oil or vinegar for the table.

- *Understanding “crewet” helps you talk about this topic clearly.*
- *In class, the teacher used “crewet” to mean bottle that holds wine or oil or vinegar for the table.*

---

crocolite *(noun)*

A rare lead chromite mineral that forms bright orange crystals.

- *He looked up “crocolite” because he had never seen it before.*
- *Understanding “crocolite” helps you talk about this topic clearly.*

---

cromorne *(noun)*

A Renaissance woodwind with a double reed and a curving tube (crooked horn).

- *They discussed “cromorne” during the group presentation.*
- *She wrote a short paragraph that included “cromorne.”*

---

crossjack *(noun)*

The lowermost sail on a mizzenmast.

- *The article explained what “crossjack” means with a simple example.*
- *Understanding “crossjack” helps you talk about this topic clearly.*

---

crosstie *(noun)*

One of the cross braces that support the rails on a railway track.

- *In class, the teacher used “crosstie” to mean one of the cross braces that support the rails on a....*
- *The article explained what “crosstie” means with a simple example.*

---

croupier’s rake *(noun)*

A small rake used by a croupier to move chips around on the table.

- *Understanding “croupier’s rake” helps you talk about this topic clearly.*
- *The article explained what “croupier’s rake” means with a simple example.*

---

croupy *(adjective)*

Resembling or arising from or indicating croup.

- *Would you call this situation “croupy”? Explain why.*
- *Students compared “croupy” with similar adjectives in the lesson.*

---

crownwork *(noun)*

(dentistry) dental appliance consisting of an artificial crown for a broken or decayed tooth.

- *Understanding “crownwork” helps you talk about this topic clearly.*
- *He looked up “crownwork” because he had never seen it before.*

---

crumhorn *(noun)*

A Renaissance woodwind with a double reed and a curving tube (crooked horn).

- *Understanding “crumhorn” helps you talk about this topic clearly.*
- *The article explained what “crumhorn” means with a simple example.*

cryocautery *(noun)*

An instrument for destroying tissue by freezing it.

- *He looked up "cryocautery" because he had never seen it before.*
- *She wrote a short paragraph that included "cryocautery."*

cryometer *(noun)*

A thermometer designed to measure low temperatures.

- *Understanding "cryometer" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cryometer."*

cryoscope *(noun)*

A measuring instrument for measuring freezing and melting points.

- *They discussed "cryoscope" during the group presentation.*
- *In class, the teacher used "cryoscope" to mean a measuring instrument for measuring freezing and....*

cryptobiotic *(adjective)*

Of or related to the state of cryptobiosis.

- *A "cryptobiotic" approach may work better in this case.*
- *Would you call this situation "cryptobiotic"? Explain why.*

cryptogamous *(adjective)*

Of or relating to a cryptogam.

- *A "cryptogamous" approach may work better in this case.*
- *The speaker chose "cryptogamous" because it captured the feeling precisely.*

cryptograph *(noun)*

A device for deciphering codes and ciphers.

- *The article explained what "cryptograph" means with a simple example.*
- *Understanding "cryptograph" helps you talk about this topic clearly.*

cryptographical *(adjective)*

Of or relating to cryptanalysis.

- *Students compared "cryptographical" with similar adjectives in the lesson.*
- *It is useful to describe something as "cryptographical" when it is of or relating to cryptanalysis.*

cryptological *(adjective)*

Of or relating to cryptanalysis.

- *It is useful to describe something as "cryptological" when it is of or relating to cryptanalysis.*
- *The speaker chose "cryptological" because it captured the feeling precisely.*

crystalise *(verb)*

Cause to take on a definite and clear shape.

- *He did not know how to use "crystalise" until he saw an example.*
- *The coach explained when to use "crystalise" and when to wait.*

cubistic *(adjective)*

Relating to or characteristic of cubism.

- *Would you call this situation "cubistic"? Explain why.*
- *Students compared "cubistic" with similar adjectives in the lesson.*

cubitiere *(noun)*

Body armor that protects the elbow.

- *Understanding "cubitiere" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cubitiere."*

cucurbitaceous *(adjective)*

Of or relating to plants of the family Cucurbitaceae.

- *A "cucurbitaceous" approach may work better in this case.*
- *The speaker chose "cucurbitaceous" because it captured the feeling precisely.*

---

cudbear *(noun)*

A purplish dye obtained from orchil lichens.

- *In class, the teacher used "cudbear" to mean a purplish dye obtained from orchil lichens.*
- *The article explained what "cudbear" means with a simple example.*

---

cuisse *(noun)*

Armor plate that protects the thigh.

- *He looked up "cuisse" because he had never seen it before.*
- *In class, the teacher used "cuisse" to mean armor plate that protects the thigh.*

---

culdoscope *(noun)*

A specialized endoscope for visually examining a woman's pelvic organs.

- *They discussed "culdoscope" during the group presentation.*
- *In class, the teacher used "culdoscope" to mean a specialized endoscope for visually examining a....*

---

cullender *(noun)*

Bowl-shaped strainer; used to wash or drain foods.

- *He looked up "cullender" because he had never seen it before.*
- *She wrote a short paragraph that included "cullender."*

---

cumarone *(noun)*

A colorless oily compound extracted from coal tar and used in manufacturing synthetic resins.

- *In class, the teacher used "cumarone" to mean a colorless oily compound extracted from coal tar....*
- *They discussed "cumarone" during the group presentation.*

---

cuneal *(adjective)*

Shaped like a wedge.

- *Would you call this situation "cuneal"? Explain why.*
- *A "cuneal" approach may work better in this case.*

---

cupel *(noun)*

A small porous bowl made of bone ash used in assaying to separate precious metals from e.g. lead.

- *The article explained what "cupel" means with a simple example.*
- *She wrote a short paragraph that included "cupel."*

---

cuprite *(noun)*

A mineral consisting of cuprous oxide that is a source of copper.

- *Understanding "cuprite" helps you talk about this topic clearly.*
- *He looked up "cuprite" because he had never seen it before.*

---

currycomb *(noun)*

A square comb with rows of small teeth; used to curry horses.

- *He looked up "currycomb" because he had never seen it before.*
- *In class, the teacher used "currycomb" to mean a square comb with rows of small teeth; used to....*

---

cuspidation *(noun)*

A decoration using cusps.

- *They discussed "cuspidation" during the group presentation.*
- *Understanding "cuspidation" helps you talk about this topic clearly.*

---

cutaneal *(adjective)*

Relating to or existing on or affecting the skin.

- *A "cutaneal" approach may work better in this case.*

- *The speaker chose “cutaneal” because it captured the feeling precisely.*

---

cutin *(noun)*

(biochemistry) a waxy transparent material that occurs in the cuticle of plants and consists of highly polymerized esters of fatty acids.

- *She wrote a short paragraph that included “cutin.”*
- *The article explained what “cutin” means with a simple example.*

---

cutinize *(verb)*

Convert into cutin.

- *He did not know how to use “cutinize” until he saw an example.*
- *In everyday English, people use “cutinize” when talking about this idea.*

---

cutlas *(noun)*

A short heavy curved sword with one edge; formerly used by sailors.

- *He looked up “cutlas” because he had never seen it before.*
- *In class, the teacher used “cutlas” to mean a short heavy curved sword with one edge; formerly....*

---

cyanite *(noun)*

A grey or greenish-blue mineral consisting of aluminum silicate in crystalline form; occurs in metaphoric rock, used as a refractory.

- *They discussed “cyanite” during the group presentation.*
- *She wrote a short paragraph that included “cyanite.”*

---

cyanophyte *(adjective)*

Relating to or caused by photosynthetic bacteria of the class Cyanobacteria.

- *It is useful to describe something as “cyanophyte” when it is relating to or caused by photosynthetic bacteria of....*
- *Students compared “cyanophyte” with similar adjectives in the lesson.*

---

cyanuramide *(noun)*

A white crystalline organic base; used mainly in making melamine resins.

- *In class, the teacher used “cyanuramide” to mean a white crystalline organic base; used mainly in....*
- *Understanding “cyanuramide” helps you talk about this topic clearly.*

---

cyberart *(noun)*

Art that is produced with the help of computer hardware and software.

- *Understanding “cyberart” helps you talk about this topic clearly.*
- *In class, the teacher used “cyberart” to mean art that is produced with the help of computer....*

---

cyclohexanol *(noun)*

A colorless oily alcohol that smells like camphor.

- *They discussed “cyclohexanol” during the group presentation.*
- *She wrote a short paragraph that included “cyclohexanol.”*

---

cyclohexanol phthalate *(noun)*

The cyclohexanol ester of phthalic acid.

- *Understanding “cyclohexanol phthalate” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “cyclohexanol phthalate.”*

---

cyclonal *(adjective)*

Of or relating to or characteristic of a violent tropical storm.

- *Her writing became clearer after she learned “cyclonal.”*
- *Students compared “cyclonal” with similar adjectives in the lesson.*

---

cyclonical *(adjective)*

Of or relating to or characteristic of a violent tropical storm.

- *Her writing became clearer after she learned “cyclonical.”*
- *The speaker chose “cyclonical” because it captured the feeling precisely.*

---

cyclosis *(noun)*

The circulation of cytoplasm within a cell.

- *The article explained what "cyclosis" means with a simple example.*
- *Understanding "cyclosis" helps you talk about this topic clearly.*

---

cyclostyle *(noun)*

A writing implement with a small toothed wheel that cuts small holes in a stencil.

- *She wrote a short paragraph that included "cyclostyle."*
- *They discussed "cyclostyle" during the group presentation.*

---

cylix *(noun)*

A shallow drinking cup with two handles; used in ancient Greece.

- *She wrote a short paragraph that included "cylix."*
- *He looked up "cylix" because he had never seen it before.*

---

cymatium *(noun)*

(architecture) a molding for a cornice; in profile it is shaped like an S (partly concave and partly convex).

- *The article explained what "cymatium" means with a simple example.*
- *Understanding "cymatium" helps you talk about this topic clearly.*

---

cyprinoid *(adjective)*

Of or relating to members of fish family Cyprinidae.

- *A "cyprinoid" approach may work better in this case.*
- *Would you call this situation "cyprinoid"? Explain why.*

---

cytoarchitectonic *(adjective)*

Of or relating to cytoarchitecture.

- *A "cytoarchitectonic" approach may work better in this case.*
- *It is useful to describe something as "cytoarchitectonic" when it is of or relating to cytoarchitecture.*

---

cytoarchitectural *(adjective)*

Of or relating to cytoarchitecture.

- *Students compared "cytoarchitectural" with similar adjectives in the lesson.*
- *Would you call this situation "cytoarchitectural"? Explain why.*

---

cytogenesis *(noun)*

The origin and development and variation of cells.

- *The article explained what "cytogenesis" means with a simple example.*
- *She wrote a short paragraph that included "cytogenesis."*

---

cytogenetical *(adjective)*

Of or relating to cytogenetics.

- *Her writing became clearer after she learned "cytogenetical."*
- *The speaker chose "cytogenetical" because it captured the feeling precisely.*

---

cytogeny *(noun)*

The origin and development and variation of cells.

- *In class, the teacher used "cytogeny" to mean the origin and development and variation of cells.*
- *He looked up "cytogeny" because he had never seen it before.*

---

cytokinetic *(adjective)*

Of or relating to the division of the cytoplasm of a cell following the division of the nucleus.

- *Would you call this situation "cytokinetic"? Explain why.*
- *It is useful to describe something as "cytokinetic" when it is of or relating to the division of the cytoplasm of....*

---

cytolysin *(noun)*

A substance that partly or completely destroys animal cells.

- *He looked up "cytolysin" because he had never seen it before.*
- *They discussed "cytolysin" during the group presentation.*

---

cytolysis *(noun)*

Pathological breakdown of cells by the destruction of their outer membrane.

- *The article explained what "cytolysis" means with a simple example.*
- *In class, the teacher used "cytolysis" to mean pathological breakdown of cells by the destruction....*

---

cytophotometer *(noun)*

A photometer that can be used to locate and identify chemical compounds in a cell by measuring the intensity of the light that passes through stained sections of the cytoplasm.

- *In class, the teacher used "cytophotometer" to mean a photometer that can be used to locate and....*
- *He looked up "cytophotometer" because he had never seen it before.*

---

cytophotometric *(adjective)*

Of or relating to the study of cells by means of a cytophotometer.

- *Her writing became clearer after she learned "cytophotometric."*
- *Students compared "cytophotometric" with similar adjectives in the lesson.*

---

cytoplasmatic *(adjective)*

Of or relating to cytoplasm.

- *Her writing became clearer after she learned "cytoplasmatic."*
- *Students compared "cytoplasmatic" with similar adjectives in the lesson.*

---

cytoplastic *(adjective)*

Of or relating to a cytoplast.

- *A "cytoplastic" approach may work better in this case.*
- *Her writing became clearer after she learned "cytoplastic."*

---

czaristic *(adjective)*

Of or relating to or characteristic of a czar.

- *It is useful to describe something as "czaristic" when it is of or relating to or characteristic of a czar.*
- *Students compared "czaristic" with similar adjectives in the lesson.*

---

daggerboard *(noun)*

A removable centerboard on a small sailboat that can be lowered into the water to serve as a keel.

- *He looked up "daggerboard" because he had never seen it before.*
- *She wrote a short paragraph that included "daggerboard."*

---

daishiki *(noun)*

A loose and brightly colored African shirt.

- *He looked up "daishiki" because he had never seen it before.*
- *She wrote a short paragraph that included "daishiki."*

---

daisylike *(adjective)*

Resembling a daisy.

- *A "daisylike" approach may work better in this case.*
- *Her writing became clearer after she learned "daisylike."*

---

daisywheel printer *(noun)*

A printer that uses a daisy print wheel.

- *The article explained what "daisywheel printer" means with a simple example.*
- *They discussed "daisywheel printer" during the group presentation.*

---

daminozide *(noun)*

A chemical sprayed on fruit trees to regulate their growth so the entire crop can be harvested at one time.

- *He looked up "daminozide" because he had never seen it before.*
- *She wrote a short paragraph that included "daminozide."*

dammar *(noun)*

Any of various hard resins from trees of the family Dipterocarpaceae and of the genus Agathis; especially the amboyna pine.

- *Understanding "dammar" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dammar."*

dammar resin *(noun)*

Any of various hard resins from trees of the family Dipterocarpaceae and of the genus Agathis; especially the amboyna pine.

- *The article explained what "dammar resin" means with a simple example.*
- *Understanding "dammar resin" helps you talk about this topic clearly.*

damourite *(noun)*

A variety of muscovite.

- *He looked up "damourite" because he had never seen it before.*
- *She wrote a short paragraph that included "damourite."*

dandle board *(noun)*

A plaything consisting of a board balanced on a fulcrum; the board is ridden up and down by children at either end.

- *He looked up "dandle board" because he had never seen it before.*
- *She wrote a short paragraph that included "dandle board."*

dantesque *(adjective)*

Of or relating to Dante Alighieri or his writings.

- *Students compared "dantesque" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "dantesque."*

darmstadtium *(noun)*

A radioactive transuranic element.

- *They discussed "darmstadtium" during the group presentation.*
- *The article explained what "darmstadtium" means with a simple example.*

dasymeter *(noun)*

Densimeter consisting of a thin glass globe that is weighed in a gas to determine its density.

- *Understanding "dasymeter" helps you talk about this topic clearly.*
- *He looked up "dasymeter" because he had never seen it before.*

de-iodinase *(noun)*

An enzyme that removes the iodine radical.

- *He looked up "de-iodinase" because he had never seen it before.*
- *She wrote a short paragraph that included "de-iodinase."*

de-iodinate *(verb)*

Remove iodine from.

- *De-iodinate the thyroxine.*
- *He did not know how to use "de-iodinate" until he saw an example.*

de-iodination *(noun)*

The removal of iodine atoms from organic compounds.

- *Understanding "de-iodination" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "de-iodination."*

de-ionate *(verb)*

Remove ions from.

- *The coach explained when to use "de-ionate" and when to wait.*
- *He did not know how to use "de-ionate" until he saw an example.*

de-stalinisation *(noun)*

Social process of neutralizing the influence of Joseph Stalin by revising his policies and removing monuments dedicated to him and renaming places named in his honor.

- *In class, the teacher used "de-stalinisation" to mean social process of neutralizing the influence of....*
- *The article explained what "de-stalinisation" means with a simple example.*

---

dealignment *(noun)*

A process whereby voters are moved toward nonpartisanship thus weakening the structure of political parties.

- *Understanding "dealignment" helps you talk about this topic clearly.*
- *In class, the teacher used "dealignment" to mean a process whereby voters are moved toward....*

---

deaminate *(verb)*

Remove the amino radical (usually by hydrolysis) from an amino compound; to perform deamination.

- *Learners should practice how to use "deaminate" in real sentences.*
- *In everyday English, people use "deaminate" when talking about this idea.*

---

deaminization *(noun)*

Removal of the amino radical from an amino acid or other amino compound.

- *Understanding "deaminization" helps you talk about this topic clearly.*
- *The article explained what "deaminization" means with a simple example.*

---

deaminize *(verb)*

Remove the amino radical (usually by hydrolysis) from an amino compound; to perform deamination.

- *She tried to use "deaminize" carefully so everyone would understand.*
- *Learners should practice how to use "deaminize" in real sentences.*

---

debouch *(verb)*

Pass out or emerge; especially of rivers.

- *The tributary debouched into the big river.*
- *The regiments debouched from the valley.*

---

decalcify *(verb)*

Remove calcium or lime from.

- *Decalcify the rock.*
- *She tried to use "decalcify" carefully so everyone would understand.*

---

decalescence *(noun)*

Phenomenon that occurs when a metal is being heated and there is a sudden slowing in the rate of temperature increase; slowing is caused by a change in the internal crystal structure of the metal.

- *She wrote a short paragraph that included "decalescence."*
- *Understanding "decalescence" helps you talk about this topic clearly.*

---

decanedioic acid *(noun)*

A dicarboxylic acid used to make resins.

- *She wrote a short paragraph that included "decanedioic acid."*
- *Understanding "decanedioic acid" helps you talk about this topic clearly.*

---

decanoic acid *(noun)*

A fatty acid found in animal oils and fats; has an unpleasant smell resembling goats.

- *She wrote a short paragraph that included "decanoic acid."*
- *He looked up "decanoic acid" because he had never seen it before.*

---

decarboxylate *(verb)*

Remove a carboxyl group from (a chemical compound).

- *The compound decarboxylated.*
- *In everyday English, people use "decarboxylate" when talking about this idea.*

---

decentalisation *(noun)*

The social process in which population and industry moves from urban centers to outlying districts.

- *She wrote a short paragraph that included "decentalisation."*

- *Understanding “decentalisation” helps you talk about this topic clearly.*

---

decimalise *(verb)*

Change to the decimal system.

- *She tried to use “decimalise” carefully so everyone would understand.*
- *Learners should practice how to use “decimalise” in real sentences.*

---

decimalize *(verb)*

Change to the decimal system.

- *The country decimalized the currency in 1975.*
- *Stock prices will be decimalized in the year 2000.*

---

declinometer *(noun)*

An instrument for measuring magnetic declination.

- *The article explained what “declinometer” means with a simple example.*
- *They discussed “declinometer” during the group presentation.*

---

declutch *(verb)*

Disengage the clutch of a car.

- *The coach explained when to use “declutch” and when to wait.*
- *She tried to use “declutch” carefully so everyone would understand.*

---

decoagulant *(noun)*

Medicine that prevents or retards the clotting of blood.

- *She wrote a short paragraph that included “decoagulant.”*
- *They discussed “decoagulant” during the group presentation.*

---

decoct *(verb)*

Be cooked until very little liquid is left.

- *She tried to use “decoct” carefully so everyone would understand.*
- *Can you use “decoct” in a sentence that fits this situation?*

---

decolor *(verb)*

Remove color from.

- *Learners should practice how to use “decolor” in real sentences.*
- *In everyday English, people use “decolor” when talking about this idea.*

---

decolorise *(verb)*

Remove color from.

- *In everyday English, people use “decolorise” when talking about this idea.*
- *He did not know how to use “decolorise” until he saw an example.*

---

decolorize *(verb)*

Remove color from.

- *The coach explained when to use “decolorize” and when to wait.*
- *Learners should practice how to use “decolorize” in real sentences.*

---

decolour *(verb)*

Remove color from.

- *In everyday English, people use “decolour” when talking about this idea.*
- *Learners should practice how to use “decolour” in real sentences.*

---

decolourise *(verb)*

Remove color from.

- *Learners should practice how to use “decolourise” in real sentences.*
- *The coach explained when to use “decolourise” and when to wait.*

---

decolourize *(verb)*

Remove color from.

- *Can you use "decolourize" in a sentence that fits this situation?*
- *He did not know how to use "decolourize" until he saw an example.*

deconcentrate *(verb)*

Make less central.

- *Can you use "deconcentrate" in a sentence that fits this situation?*
- *The coach explained when to use "deconcentrate" and when to wait.*

decrepitate *(verb)*

To roast or calcine so as to cause to crackle or until crackling stops.

- *Decrepitate salts.*
- *The salt decrepitated.*

dedifferentiate *(verb)*

Lose specialization in form or function.

- *He did not know how to use "dedifferentiate" until he saw an example.*
- *The coach explained when to use "dedifferentiate" and when to wait.*

deedbox *(noun)*

A strongly made box for holding money or valuables; can be locked.

- *They discussed "deedbox" during the group presentation.*
- *He looked up "deedbox" because he had never seen it before.*

defervesce *(verb)*

Experience an abatement of a fever.

- *She tried to use "defervesce" carefully so everyone would understand.*
- *He did not know how to use "defervesce" until he saw an example.*

defervescent *(adjective)*

Of or relating to the reduction of a fever.

- *It is useful to describe something as "defervescent" when it is of or relating to the reduction of a fever.*
- *A "defervescent" approach may work better in this case.*

deformational *(adjective)*

Relating to or causing change in either shape or size of a material body or geometric figure.

- *Her writing became clearer after she learned "deformational."*
- *Would you call this situation "deformational"? Explain why.*

degauss *(verb)*

Make nonmagnetic; take away the magnetic properties (of).

- *They degaussed the ship.*
- *The coach explained when to use "degauss" and when to wait.*

dehorn *(verb)*

Prevent the growth of horns of certain animals.

- *The coach explained when to use "dehorn" and when to wait.*
- *Can you use "dehorn" in a sentence that fits this situation?*

dehydrogenate *(verb)*

Remove hydrogen from.

- *He did not know how to use "dehydrogenate" until he saw an example.*
- *Can you use "dehydrogenate" in a sentence that fits this situation?*

dehydroretinol *(noun)*

A viscous alcohol that is less active in mammals than is vitamin A1.

- *He looked up “dehydroretinol” because he had never seen it before.*
- *They discussed “dehydroretinol” during the group presentation.*

---

deice *(verb)*

Make or become free of frost or ice.

- *She tried to use “deice” carefully so everyone would understand.*
- *Can you use “deice” in a sentence that fits this situation?*

---

deliquesce *(verb)*

Melt or become liquid by absorbing moisture from the air.

- *This type of salt deliquesces easily.*
- *The fungi eventually deliquesced.*

---

demagnetisation *(noun)*

The process of removing magnetization.

- *In class, the teacher used “demagnetisation” to mean the process of removing magnetization.*
- *The article explained what “demagnetisation” means with a simple example.*

---

demagnetise *(verb)*

Make nonmagnetic; take away the magnetic properties (of).

- *Learners should practice how to use “demagnetise” in real sentences.*
- *He did not know how to use “demagnetise” until he saw an example.*

---

demagogical *(adjective)*

Characteristic of or resembling a demagogue.

- *A “demagogical” approach may work better in this case.*
- *It is useful to describe something as “demagogical” when it is characteristic of or resembling a demagogue.*

---

demantoid *(noun)*

A green andradite used as a gemstone.

- *She wrote a short paragraph that included “demantoid.”*
- *They discussed “demantoid” during the group presentation.*

---

dematerialise *(verb)*

Become immaterial; disappear.

- *Can you use “dematerialise” in a sentence that fits this situation?*
- *He did not know how to use “dematerialise” until he saw an example.*

---

demineralisation *(noun)*

The removal of minerals and mineral salts from a liquid (especially from water).

- *In class, the teacher used “demineralisation” to mean the removal of minerals and mineral salts from a....*
- *The article explained what “demineralisation” means with a simple example.*

---

demineralise *(verb)*

Remove the minerals or salts from.

- *Learners should practice how to use “demineralise” in real sentences.*
- *In everyday English, people use “demineralise” when talking about this idea.*

---

demineralize *(verb)*

Remove the minerals or salts from.

- *Demineralize water.*
- *Can you use “demineralize” in a sentence that fits this situation?*

---

demist *(verb)*

Free from mist.

- *Demist the car windows.*
- *The coach explained when to use “demist” and when to wait.*

demonetise *(verb)*

Deprive of value for payment.

- *Can you use "demonetise" in a sentence that fits this situation?*
- *He did not know how to use "demonetise" until he saw an example.*

demosthenic *(adjective)*

Of or relating to Demosthenes or his oratory.

- *Her writing became clearer after she learned "demosthenic."*
- *Would you call this situation "demosthenic"? Explain why.*

demulsify *(verb)*

Break down into components.

- *Learners should practice how to use "demulsify" in real sentences.*
- *He did not know how to use "demulsify" until he saw an example.*

demythologise *(verb)*

Remove the mythical element from (writings).

- *Can you use "demythologise" in a sentence that fits this situation?*
- *The coach explained when to use "demythologise" and when to wait.*

demythologize *(verb)*

Remove the mythical element from (writings).

- *The Bible should be demythologized and examined for its historical value.*
- *She tried to use "demythologize" carefully so everyone would understand.*

denationalise *(verb)*

Put under private control or ownership.

- *She tried to use "denationalise" carefully so everyone would understand.*
- *Can you use "denationalise" in a sentence that fits this situation?*

denationalize *(verb)*

Put under private control or ownership.

- *The steel industry was denationalized.*
- *In everyday English, people use "denationalize" when talking about this idea.*

denaturalise *(verb)*

Strip of the rights and duties of citizenship.

- *In everyday English, people use "denaturalise" when talking about this idea.*
- *Learners should practice how to use "denaturalise" in real sentences.*

denaturalize *(verb)*

Strip of the rights and duties of citizenship.

- *The former Nazi was denaturalized.*
- *The coach explained when to use "denaturalize" and when to wait.*

denaturant *(noun)*

Any substance that serves as a denaturing agent.

- *He looked up "denaturant" because he had never seen it before.*
- *She wrote a short paragraph that included "denaturant."*

denazify *(verb)*

Free from Nazi ideology or detach from Nazi allegiance.

- *Learners should practice how to use "denazify" in real sentences.*
- *He did not know how to use "denazify" until he saw an example.*

denitrify *(verb)*

Remove nitrogen from.

- *Denitrify the soil.*
- *She tried to use "denitrify" carefully so everyone would understand.*

---

densimeter *(noun)*

A measuring instrument for determining density or specific gravity.

- *He looked up "densimeter" because he had never seen it before.*
- *In class, the teacher used "densimeter" to mean a measuring instrument for determining density or....*

---

deodourant *(noun)*

A toiletry applied to the skin in order to mask unpleasant odors.

- *The article explained what "deodourant" means with a simple example.*
- *She wrote a short paragraph that included "deodourant."*

---

deossification *(noun)*

The loss of the mineral content of bone tissue.

- *He looked up "deossification" because he had never seen it before.*
- *In class, the teacher used "deossification" to mean the loss of the mineral content of bone tissue.*

---

deoxidise *(verb)*

To remove oxygen from a compound, or cause to react with hydrogen or form a hydride, or to undergo an increase in the number of electrons.

- *The coach explained when to use "deoxidise" and when to wait.*
- *Can you use "deoxidise" in a sentence that fits this situation?*

---

deoxidize *(verb)*

To remove oxygen from a compound, or cause to react with hydrogen or form a hydride, or to undergo an increase in the number of electrons.

- *He did not know how to use "deoxidize" until he saw an example.*
- *In everyday English, people use "deoxidize" when talking about this idea.*

---

deoxythymidine *(noun)*

A nucleoside component of DNA; composed of thymine and deoxyribose.

- *In class, the teacher used "deoxythymidine" to mean a nucleoside component of dna; composed of thymine....*
- *The article explained what "deoxythymidine" means with a simple example.*

---

deoxythymidine monophosphate *(noun)*

One of the four nucleotides used in building DNA; all four nucleotides have a common phosphate group and a sugar (ribose).

- *They discussed "deoxythymidine monophosphate" during the group presentation.*
- *She wrote a short paragraph that included "deoxythymidine monophosphate."*

---

depersonalise *(verb)*

Make impersonal or present as an object.

- *The coach explained when to use "depersonalise" and when to wait.*
- *Can you use "depersonalise" in a sentence that fits this situation?*

---

depilator *(noun)*

A cosmetic for temporary removal of undesired hair.

- *He looked up "depilator" because he had never seen it before.*
- *Understanding "depilator" helps you talk about this topic clearly.*

---

depolarise *(verb)*

Eliminate the polarization of.

- *She tried to use "depolarise" carefully so everyone would understand.*
- *The coach explained when to use "depolarise" and when to wait.*

---

depressurise *(verb)*

Decrease the pressure of.

- *She tried to use "depressurise" carefully so everyone would understand.*

- *Learners should practice how to use “depressurise” in real sentences.*

dermic *(adjective)*

Of or relating to or located in the dermis.

- *Students compared “dermic” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “dermic.”*

derv *(noun)*

Diesel oil used in cars and lorries with diesel engines; from d(iesel) e(ngine) r(oad) v(ehicle).

- *She wrote a short paragraph that included “derv.”*
- *He looked up “derv” because he had never seen it before.*

desalinisation *(noun)*

The removal of salt (especially from sea water).

- *She wrote a short paragraph that included “desalinisation.”*
- *He looked up “desalinisation” because he had never seen it before.*

desalinise *(verb)*

Remove salt from.

- *Can you use “desalinise” in a sentence that fits this situation?*
- *In everyday English, people use “desalinise” when talking about this idea.*

desalinize *(verb)*

Remove salt from.

- *She tried to use “desalinize” carefully so everyone would understand.*
- *The coach explained when to use “desalinize” and when to wait.*

desalt *(verb)*

Remove salt from.

- *Can you use “desalt” in a sentence that fits this situation?*
- *In everyday English, people use “desalt” when talking about this idea.*

desertic soil *(noun)*

A type of soil that develops in arid climates.

- *Understanding “desertic soil” helps you talk about this topic clearly.*
- *They discussed “desertic soil” during the group presentation.*

desoxyribonucleic acid *(noun)*

(biochemistry) a long linear polymer found in the nucleus of a cell and formed from nucleotides and shaped like a double helix; associated with the transmission of genetic information.

- *In class, the teacher used “desoxyribonucleic acid” to mean (biochemistry) a long linear polymer found in the....*
- *They discussed “desoxyribonucleic acid” during the group presentation.*

despotical *(adjective)*

Belonging to or having the characteristics of a despot.

- *Would you call this situation “despotical”? Explain why.*
- *Students compared “despotical” with similar adjectives in the lesson.*

destalinisation *(noun)*

Social process of neutralizing the influence of Joseph Stalin by revising his policies and removing monuments dedicated to him and renaming places named in his honor.

- *The article explained what “destalinisation” means with a simple example.*
- *In class, the teacher used “destalinisation” to mean social process of neutralizing the influence of....*

destalinise *(verb)*

Counteract the effects and policies of Stalinism.

- *In everyday English, people use “destalinise” when talking about this idea.*
- *She tried to use “destalinise” carefully so everyone would understand.*

destalinization *(noun)*

Social process of neutralizing the influence of Joseph Stalin by revising his policies and removing monuments dedicated to him and renaming places named in his honor.

- *His statue was demolished as part of destalinization.*
- *He looked up "destalinization" because he had never seen it before.*

---

destalinize *(verb)*

Counteract the effects and policies of Stalinism.

- *Russia was slowly destalinized in the late 1950's.*
- *The coach explained when to use "destalinize" and when to wait.*

---

desynchronise *(verb)*

Cause to become desynchronized; cause to occur at unrelated times.

- *She tried to use "desynchronise" carefully so everyone would understand.*
- *Can you use "desynchronise" in a sentence that fits this situation?*

---

desynchronize *(verb)*

Cause to become desynchronized; cause to occur at unrelated times.

- *In everyday English, people use "desynchronize" when talking about this idea.*
- *She tried to use "desynchronize" carefully so everyone would understand.*

---

dethaw *(verb)*

Become or cause to become soft or liquid.

- *Dethaw the meat.*
- *Can you use "dethaw" in a sentence that fits this situation?*

---

detoxicate *(verb)*

Remove poison from.

- *The coach explained when to use "detoxicate" and when to wait.*
- *He did not know how to use "detoxicate" until he saw an example.*

---

detransitivise *(verb)*

Intransitivize.

- *Learners should practice how to use "detransitivise" in real sentences.*
- *He did not know how to use "detransitivise" until he saw an example.*

---

detransitivize *(verb)*

Intransitivize.

- *Can you use "detransitivize" in a sentence that fits this situation?*
- *The coach explained when to use "detransitivize" and when to wait.*

---

detribalise *(verb)*

Cause members of a tribe to lose their cultural identity.

- *She tried to use "detribalise" carefully so everyone would understand.*
- *Learners should practice how to use "detribalise" in real sentences.*

---

detribalize *(verb)*

Cause members of a tribe to lose their cultural identity.

- *In everyday English, people use "detribalize" when talking about this idea.*
- *Can you use "detribalize" in a sentence that fits this situation?*

---

detrition *(noun)*

The wearing down of rock particles by friction due to water or wind or ice.

- *In class, the teacher used "detrition" to mean the wearing down of rock particles by friction due....*
- *They discussed "detrition" during the group presentation.*

---

detumescence *(noun)*

Diminution of swelling; the subsidence of anything swollen.

- *The article explained what “detumescence” means with a simple example.*
- *In class, the teacher used “detumescence” to mean diminution of swelling; the subsidence of anything....*

---

detusk *(verb)*

Remove the tusks of animals.

- *She tried to use “detusk” carefully so everyone would understand.*
- *Can you use “detusk” in a sentence that fits this situation?*

---

devaluate *(verb)*

Remove the value from; deprive of its value.

- *Can you use “devaluate” in a sentence that fits this situation?*
- *The coach explained when to use “devaluate” and when to wait.*

---

devilise *(verb)*

Turn into a devil or make devilish.

- *Can you use “devilise” in a sentence that fits this situation?*
- *The coach explained when to use “devilise” and when to wait.*

---

devilize *(verb)*

Turn into a devil or make devilish.

- *Man devilized by war.*
- *She tried to use “devilize” carefully so everyone would understand.*

---

devitalise *(verb)*

Sap of life or energy.

- *The coach explained when to use “devitalise” and when to wait.*
- *He did not know how to use “devitalise” until he saw an example.*

---

devitalize *(verb)*

Sap of life or energy.

- *The recession devitalized the economy.*
- *He did not know how to use “devitalize” until he saw an example.*

---

devitrify *(verb)*

Make (glassy materials) brittle or opaque.

- *The coach explained when to use “devitrify” and when to wait.*
- *Learners should practice how to use “devitrify” in real sentences.*

---

deweyan *(adjective)*

Of or relating to John Dewey or his philosophy.

- *A “deweyan” approach may work better in this case.*
- *Her writing became clearer after she learned “deweyan.”*

---

dexamethasone intensol *(noun)*

A corticosteroid drug (trade names Decadron or Dexamethasone Intensol or Dexone or Hexadrol or Oradexon) used to treat allergies or inflammation.

- *He looked up “dexamethasone intensol” because he had never seen it before.*
- *She wrote a short paragraph that included “dexamethasone intensol.”*

---

dexone *(noun)*

A corticosteroid drug (trade names Decadron or Dexamethasone Intensol or Dexone or Hexadrol or Oradexon) used to treat allergies or inflammation.

- *She wrote a short paragraph that included “dexone.”*
- *He looked up “dexone” because he had never seen it before.*

---

dextroglucose *(noun)*

An isomer of glucose that is found in honey and sweet fruits.

- *In class, the teacher used “dextroglucose” to mean an isomer of glucose that is found in honey and....*
- *The article explained what “dextroglucose” means with a simple example.*

di-iodotyrosine *(noun)*

Tyrosine with two iodine atoms added.

- *He looked up "di-iodotyrosine" because he had never seen it before.*
- *She wrote a short paragraph that included "di-iodotyrosine."*

diabolise *(verb)*

Turn into a devil or make devilish.

- *The coach explained when to use "diabolise" and when to wait.*
- *Can you use "diabolise" in a sentence that fits this situation?*

diabolize *(verb)*

Turn into a devil or make devilish.

- *He did not know how to use "diabolize" until he saw an example.*
- *She tried to use "diabolize" carefully so everyone would understand.*

diagonalise *(verb)*

Transform a matrix to a diagonal matrix.

- *Learners should practice how to use "diagonalise" in real sentences.*
- *The coach explained when to use "diagonalise" and when to wait.*

diagonalizable *(adjective)*

Capable of being transformed into a diagonal matrix.

- *Students compared "diagonalizable" with similar adjectives in the lesson.*
- *It is useful to describe something as "diagonalizable" when it is capable of being transformed into a diagonal matrix.*

diagonalize *(verb)*

Transform a matrix to a diagonal matrix.

- *Can you use "diagonalize" in a sentence that fits this situation?*
- *He did not know how to use "diagonalize" until he saw an example.*

diakinesis *(noun)*

The final stage of the prophase of meiosis.

- *He looked up "diakinesis" because he had never seen it before.*
- *She wrote a short paragraph that included "diakinesis."*

dialyse *(verb)*

Separate by dialysis.

- *In everyday English, people use "dialyse" when talking about this idea.*
- *Can you use "dialyse" in a sentence that fits this situation?*

dialyze *(verb)*

Separate by dialysis.

- *The coach explained when to use "dialyze" and when to wait.*
- *She tried to use "dialyze" carefully so everyone would understand.*

diamagnet *(noun)*

A substance that exhibits diamagnetism.

- *Understanding "diamagnet" helps you talk about this topic clearly.*
- *The article explained what "diamagnet" means with a simple example.*

diamantine *(adjective)*

Consisting of diamonds or resembling diamonds.

- *It is useful to describe something as "diamantine" when it is consisting of diamonds or resembling diamonds.*
- *Would you call this situation "diamantine"? Explain why.*

diapedesis *(noun)*

Passage of blood cells (especially white blood cells) through intact capillary walls and into the surrounding tissue.

- *She wrote a short paragraph that included "diapedesis."*
- *Understanding "diapedesis" helps you talk about this topic clearly.*

---

diaphone *(noun)*

A foghorn that makes a signal consisting of two tones.

- *In class, the teacher used "diaphone" to mean a foghorn that makes a signal consisting of two tones.*
- *Understanding "diaphone" helps you talk about this topic clearly.*

---

diaphysial *(adjective)*

Relating to the diaphysis of a bone.

- *Would you call this situation "diaphysial"? Explain why.*
- *Students compared "diaphysial" with similar adjectives in the lesson.*

---

diastrophism *(noun)*

The process of deformation that produces continents and ocean basins in the earth's crust.

- *She wrote a short paragraph that included "diastrophism."*
- *He looked up "diastrophism" because he had never seen it before.*

---

diazotize *(verb)*

Convert (an amine) into a diazo compound.

- *Can you use "diazotize" in a sentence that fits this situation?*
- *He did not know how to use "diazotize" until he saw an example.*

---

dibucaine *(noun)*

A local anesthetic that is administered by injection.

- *Understanding "dibucaine" helps you talk about this topic clearly.*
- *They discussed "dibucaine" during the group presentation.*

---

dichlorodiphenyltrichloroethane *(noun)*

An insecticide that is also toxic to animals and humans; banned in the United States since 1972.

- *In class, the teacher used "dichlorodiphenyltrichloroethane" to mean an insecticide that is also toxic to animals and....*
- *The article explained what "dichlorodiphenyltrichloroethane" means with a simple example.*

---

dichloroethyl sulfide *(noun)*

A toxic war gas with sulfide based compounds that raises blisters and attacks the eyes and lungs; there is no known antidote.

- *He looked up "dichloroethyl sulfide" because he had never seen it before.*
- *In class, the teacher used "dichloroethyl sulfide" to mean a toxic war gas with sulfide based compounds that....*

---

dichromic acid *(noun)*

The hypothetical acid (H2Cr2O7) from which dichromates are derived; known only in solution and in the form of dichromate salts.

- *They discussed "dichromic acid" during the group presentation.*
- *She wrote a short paragraph that included "dichromic acid."*

---

dicoumarol *(noun)*

An anticoagulant drug that has now been largely replaced by warfarin.

- *The article explained what "dicoumarol" means with a simple example.*
- *In class, the teacher used "dicoumarol" to mean an anticoagulant drug that has now been largely....*

---

dictyopteran *(adjective)*

Of or relating to or belonging to the order Dictyoptera.

- *It is useful to describe something as "dictyopteran" when it is of or relating to or belonging to the order dictyoptera.*
- *Students compared "dictyopteran" with similar adjectives in the lesson.*

---

dicumarol *(noun)*

An anticoagulant drug that has now been largely replaced by warfarin.

- *In class, the teacher used "dicumarol" to mean an anticoagulant drug that has now been largely....*

- *Understanding "dicumarol" helps you talk about this topic clearly.*

dielectrolysis *(noun)*

The motion of charged particles in a colloid under the influence of an electric field; particles with a positive charge go to the cathode and negative to the anode.

- *She wrote a short paragraph that included "dielectrolysis."*
- *They discussed "dielectrolysis" during the group presentation.*

diestock *(noun)*

A device that holds the dies that cut external threads on metal cylinders.

- *Understanding "diestock" helps you talk about this topic clearly.*
- *He looked up "diestock" because he had never seen it before.*

dietetical *(adjective)*

Of or relating to the diet.

- *Students compared "dietetical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "dietetical."*

diethylaminoethyl cellulose *(noun)*

Used for chromatography.

- *They discussed "diethylaminoethyl cellulose" during the group presentation.*
- *Understanding "diethylaminoethyl cellulose" helps you talk about this topic clearly.*

diethylbarbituric acid *(noun)*

A barbiturate used as a hypnotic.

- *She wrote a short paragraph that included "diethylbarbituric acid."*
- *Understanding "diethylbarbituric acid" helps you talk about this topic clearly.*

diethylmalonylurea *(noun)*

A barbiturate used as a hypnotic.

- *He looked up "diethylmalonylurea" because he had never seen it before.*
- *She wrote a short paragraph that included "diethylmalonylurea."*

diethylstilbesterol *(noun)*

Synthetic nonsteroid with the properties of estrogen; formerly used to treat menstrual problems but was found to be associated with vaginal cancers in the daughters of women so treated during pregnancy.

- *They discussed "diethylstilbesterol" during the group presentation.*
- *In class, the teacher used "diethylstilbesterol" to mean synthetic nonsteroid with the properties of....*

diethylstilboestrol *(noun)*

A potent estrogen used in medicine and in feed for livestock and poultry.

- *The article explained what "diethylstilboestrol" means with a simple example.*
- *Understanding "diethylstilboestrol" helps you talk about this topic clearly.*

digenesis *(noun)*

Alternation of sexual and asexual generations.

- *She wrote a short paragraph that included "digenesis."*
- *He looked up "digenesis" because he had never seen it before.*

digitalin *(noun)*

A powerful cardiac stimulant obtained from foxglove.

- *She wrote a short paragraph that included "digitalin."*
- *They discussed "digitalin" during the group presentation.*

digitalise *(verb)*

Put into digital form, as for use in a computer.

- *He did not know how to use "digitalise" until he saw an example.*
- *In everyday English, people use "digitalise" when talking about this idea.*

dihydric alcohol *(noun)*

Any of a class of alcohols having 2 hydroxyl groups in each molecule.

- *He looked up "dihydric alcohol" because he had never seen it before.*
- *She wrote a short paragraph that included "dihydric alcohol."*

dihydroxyphenylalanine *(noun)*

Amino acid that is formed in the liver and converted into dopamine in the brain.

- *He looked up "dihydroxyphenylalanine" because he had never seen it before.*
- *She wrote a short paragraph that included "dihydroxyphenylalanine."*

dilater *(noun)*

A surgical instrument that is used to dilate or distend an opening or an organ.

- *The article explained what "dilater" means with a simple example.*
- *In class, the teacher used "dilater" to mean a surgical instrument that is used to dilate or....*

dilutant *(noun)*

A diluting agent.

- *They discussed "dilutant" during the group presentation.*
- *She wrote a short paragraph that included "dilutant."*

diluvian *(adjective)*

Of or connected with a deluge.

- *Would you call this situation "diluvian"? Explain why.*
- *It is useful to describe something as "diluvian" when it is of or connected with a deluge.*

dimethylglyoxime *(noun)*

A compound used in analysis as a precipitant for palladium or nickel.

- *Understanding "dimethylglyoxime" helps you talk about this topic clearly.*
- *They discussed "dimethylglyoxime" during the group presentation.*

dimorphous *(adjective)*

Occurring or existing in two different forms.

- *Dimorphous organisms.*
- *It is useful to describe something as "dimorphous" when it is occurring or existing in two different forms.*

diphenylbutyl piperidine *(noun)*

A group of antipsychotic drugs used mainly in the treatment of schizophrenia.

- *He looked up "diphenylbutyl piperidine" because he had never seen it before.*
- *She wrote a short paragraph that included "diphenylbutyl piperidine."*

diplotene *(noun)*

The fourth stage of the prophase of meiosis.

- *He looked up "diplotene" because he had never seen it before.*
- *Understanding "diplotene" helps you talk about this topic clearly.*

dipterous *(adjective)*

Of or relating to or belonging to the Diptera.

- *Her writing became clearer after she learned "dipterous."*
- *Would you call this situation "dipterous"? Explain why.*

disaccharidase *(noun)*

An enzyme that catalyzes the hydrolysis of disaccharides into monosaccharides.

- *Understanding "disaccharidase" helps you talk about this topic clearly.*
- *The article explained what "disaccharidase" means with a simple example.*

disafforest *(verb)*

Remove the trees from.

- *She tried to use "disafforest" carefully so everyone would understand.*
- *In everyday English, people use "disafforest" when talking about this idea.*

---

disbud *(verb)*

Destroy undeveloped horn buds (of cattle).

- *He did not know how to use "disbud" until he saw an example.*
- *In everyday English, people use "disbud" when talking about this idea.*

---

discolorise *(verb)*

Remove color from.

- *She tried to use "discolorise" carefully so everyone would understand.*
- *The coach explained when to use "discolorise" and when to wait.*

---

discolorize *(verb)*

Remove color from.

- *In everyday English, people use "discolorize" when talking about this idea.*
- *Learners should practice how to use "discolorize" in real sentences.*

---

discolourise *(verb)*

Remove color from.

- *He did not know how to use "discolourise" until he saw an example.*
- *The coach explained when to use "discolourise" and when to wait.*

---

discomycetous *(adjective)*

Relating to or characteristic of fungi of the subclass Discomycetes.

- *The speaker chose "discomycetous" because it captured the feeling precisely.*
- *It is useful to describe something as "discomycetous" when it is relating to or characteristic of fungi of the....*

---

disenable *(verb)*

Make unable to perform a certain action.

- *He did not know how to use "disenable" until he saw an example.*
- *In everyday English, people use "disenable" when talking about this idea.*

---

disforest *(verb)*

Remove the trees from.

- *Can you use "disforest" in a sentence that fits this situation?*
- *He did not know how to use "disforest" until he saw an example.*

---

disharmonize *(verb)*

Cause to sound harsh and unpleasant.

- *In everyday English, people use "disharmonize" when talking about this idea.*
- *She tried to use "disharmonize" carefully so everyone would understand.*

---

dissimilate *(verb)*

Become dissimilar by changing the sound qualities.

- *These consonants dissimilate.*
- *These two related tribes of people gradually dissimilated over time.*

---

dissolvent *(noun)*

A liquid substance capable of dissolving other substances.

- *She wrote a short paragraph that included "dissolvent."*
- *They discussed "dissolvent" during the group presentation.*

---

distillment *(noun)*

The process of purifying a liquid by boiling it and condensing its vapors.

- *They discussed "distillment" during the group presentation.*

- *In class, the teacher used "distillment" to mean the process of purifying a liquid by boiling it and....*

disunify *(verb)*

Break up or separate.

- *The country is disunifying.*
- *He did not know how to use "disunify" until he saw an example.*

divinyl ether *(noun)*

A colorless volatile highly inflammable liquid formerly used as an inhalation anesthetic.

- *The article explained what "divinyl ether" means with a simple example.*
- *They discussed "divinyl ether" during the group presentation.*

dizygous *(adjective)*

Derived from two separately fertilized eggs.

- *It is useful to describe something as "dizygous" when it is derived from two separately fertilized eggs.*
- *The speaker chose "dizygous" because it captured the feeling precisely.*

doctorial *(adjective)*

Of or relating to a doctor or doctorate.

- *Doctorial candidates.*
- *Her writing became clearer after she learned "doctorial."*

dodecanoic acid *(noun)*

A crystalline fatty acid occurring as glycerides in natural fats and oils (especially coconut oil and palm-kernel oil).

- *Understanding "dodecanoic acid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dodecanoic acid."*

dogcart *(noun)*

A cart drawn by a dog.

- *Understanding "dogcart" helps you talk about this topic clearly.*
- *In class, the teacher used "dogcart" to mean a cart drawn by a dog.*

dogstooth check *(noun)*

Textile with a pattern of small broken or jagged checks.

- *They discussed "dogstooth check" during the group presentation.*
- *She wrote a short paragraph that included "dogstooth check."*

dolophine hydrochloride *(noun)*

Synthetic narcotic drug similar to morphine but less habit-forming; used in narcotic detoxification and maintenance of heroin addiction.

- *He looked up "dolophine hydrochloride" because he had never seen it before.*
- *They discussed "dolophine hydrochloride" during the group presentation.*

domesticise *(verb)*

Overcome the wildness of; make docile and tractable.

- *Can you use "domesticise" in a sentence that fits this situation?*
- *In everyday English, people use "domesticise" when talking about this idea.*

domesticize *(verb)*

Overcome the wildness of; make docile and tractable.

- *She tried to use "domesticize" carefully so everyone would understand.*
- *The coach explained when to use "domesticize" and when to wait.*

domiciliation *(noun)*

Temporary living quarters.

- *She wrote a short paragraph that included "domiciliation."*
- *Understanding "domiciliation" helps you talk about this topic clearly.*

donnean *(adjective)*

Of or relating to or in the manner of John Donne.

- *Her writing became clearer after she learned "donnean."*
- *A "donnean" approach may work better in this case.*

---

donnian *(adjective)*

Of or relating to or in the manner of John Donne.

- *A "donnian" approach may work better in this case.*
- *It is useful to describe something as "donnian" when it is of or relating to or in the manner of john donne.*

---

doojigger *(noun)*

Something unspecified whose name is either forgotten or not known.

- *In class, the teacher used "doojigger" to mean something unspecified whose name is either....*
- *The article explained what "doojigger" means with a simple example.*

---

doorcase *(noun)*

The frame that supports a door.

- *Understanding "doorcase" helps you talk about this topic clearly.*
- *The article explained what "doorcase" means with a simple example.*

---

doorhandle *(noun)*

A knob used to release the catch when opening a door (often called 'doorhandle' in Great Britain).

- *In class, the teacher used "doorhandle" to mean a knob used to release the catch when opening a....*
- *The article explained what "doorhandle" means with a simple example.*

---

doorlock *(noun)*

A lock on an exterior door.

- *The article explained what "doorlock" means with a simple example.*
- *In class, the teacher used "doorlock" to mean a lock on an exterior door.*

---

doorplate *(noun)*

A nameplate fastened to a door; indicates the person who works or lives there.

- *He looked up "doorplate" because he had never seen it before.*
- *She wrote a short paragraph that included "doorplate."*

---

doorstopper *(noun)*

A stop that keeps open doors from moving.

- *They discussed "doorstopper" during the group presentation.*
- *Understanding "doorstopper" helps you talk about this topic clearly.*

---

dopastat *(noun)*

A monoamine neurotransmitter found in the brain and essential for the normal functioning of the central nervous system; as a drug (trade names Dopastat and Intropin) it is used to treat shock and hypotension.

- *In class, the teacher used "dopastat" to mean a monoamine neurotransmitter found in the brain and....*
- *The article explained what "dopastat" means with a simple example.*

---

dosemeter *(noun)*

A measuring instrument for measuring doses of ionizing radiation (X-rays or radioactivity).

- *Understanding "dosemeter" helps you talk about this topic clearly.*
- *The article explained what "dosemeter" means with a simple example.*

---

dosshouse *(noun)*

A cheap lodging house.

- *They discussed "dosshouse" during the group presentation.*
- *She wrote a short paragraph that included "dosshouse."*

---

dostoevskian *(adjective)*

Of or relating to or in the style of Feodor Dostoevski.

- *Students compared "dostoevskian" with similar adjectives in the lesson.*
- *A "dostoevskian" approach may work better in this case.*

---

dostoyevskian *(adjective)*

Of or relating to or in the style of Feodor Dostoevski.

- *A "dostoyevskian" approach may work better in this case.*
- *Would you call this situation "dostoyevskian"? Explain why.*

---

dottle *(noun)*

The residue of partially burnt tobacco left caked in the bowl of a pipe after smoking.

- *He looked up "dottle" because he had never seen it before.*
- *In class, the teacher used "dottle" to mean the residue of partially burnt tobacco left caked....*

---

doyly *(noun)*

A small round piece of linen placed under a dish or bowl.

- *The article explained what "doyly" means with a simple example.*
- *In class, the teacher used "doyly" to mean a small round piece of linen placed under a dish or....*

---

dragee *(noun)*

Pill that is a sugar-coated medicated candy.

- *He looked up "dragee" because he had never seen it before.*
- *They discussed "dragee" during the group presentation.*

---

draggle *(verb)*

Make wet and dirty, as from rain.

- *Learners should practice how to use "draggle" in real sentences.*
- *In everyday English, people use "draggle" when talking about this idea.*

---

drainboard *(noun)*

A board beside a kitchen sink and inclined to drain into the sink.

- *Understanding "drainboard" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "drainboard."*

---

drainplug *(noun)*

A removable plug for holding water in a tub or basin.

- *In class, the teacher used "drainplug" to mean a removable plug for holding water in a tub or basin.*
- *The article explained what "drainplug" means with a simple example.*

---

dramaturgic *(adjective)*

Relating to the technical aspects of drama.

- *Her writing became clearer after she learned "dramaturgic."*
- *Would you call this situation "dramaturgic"? Explain why.*

---

drawknife *(noun)*

A woodworker's knife to shave surfaces.

- *She wrote a short paragraph that included "drawknife."*
- *He looked up "drawknife" because he had never seen it before.*

---

drawshave *(noun)*

A woodworker's knife to shave surfaces.

- *They discussed "drawshave" during the group presentation.*
- *The article explained what "drawshave" means with a simple example.*

---

dressing sacque *(noun)*

A woman's loose jacket; worn while dressing.

- *She wrote a short paragraph that included "dressing sacque."*
- *The article explained what "dressing sacque" means with a simple example.*

droshky *(noun)*

An open horse-drawn carriage with four wheels; formerly used in Poland and Russia.

- *He looked up "droshky" because he had never seen it before.*
- *In class, the teacher used "droshky" to mean an open horse-drawn carriage with four wheels;....*

drosky *(noun)*

An open horse-drawn carriage with four wheels; formerly used in Poland and Russia.

- *Understanding "drosky" helps you talk about this topic clearly.*
- *The article explained what "drosky" means with a simple example.*

drugget *(noun)*

A rug made of a coarse fabric having a cotton warp and a wool filling.

- *He looked up "drugget" because he had never seen it before.*
- *Understanding "drugget" helps you talk about this topic clearly.*

drupaceous *(adjective)*

Of or related to a drupe.

- *The speaker chose "drupaceous" because it captured the feeling precisely.*
- *Would you call this situation "drupaceous"? Explain why.*

drygoods *(noun)*

Textiles or clothing and related merchandise.

- *They discussed "drygoods" during the group presentation.*
- *The article explained what "drygoods" means with a simple example.*

dscdna *(noun)*

Double-stranded cDNA.

- *The article explained what "dscdna" means with a simple example.*
- *In class, the teacher used "dscdna" to mean double-stranded cdna.*

dubnium *(noun)*

A transuranic element.

- *In class, the teacher used "dubnium" to mean a transuranic element.*
- *The article explained what "dubnium" means with a simple example.*

duckboard *(noun)*

A boardwalk laid across muddy ground.

- *She wrote a short paragraph that included "duckboard."*
- *He looked up "duckboard" because he had never seen it before.*

dudeen *(noun)*

A clay pipe with a short stem.

- *They discussed "dudeen" during the group presentation.*
- *She wrote a short paragraph that included "dudeen."*

dulciana *(noun)*

The organ stop having a tone of soft sweet string quality.

- *They discussed "dulciana" during the group presentation.*
- *In class, the teacher used "dulciana" to mean the organ stop having a tone of soft sweet string....*

dumpcart *(noun)*

A cart that can be tilted to empty contents without handling.

- *In class, the teacher used "dumpcart" to mean a cart that can be tilted to empty contents without....*
- *The article explained what "dumpcart" means with a simple example.*

dunce's cap *(noun)*

A cone-shaped paper hat formerly placed on the head of slow or lazy pupils.

- *She wrote a short paragraph that included "dunce's cap."*
- *Understanding "dunce's cap" helps you talk about this topic clearly.*

---

durabolin *(noun)*

An androgen (trade names Durabolin or Kabolin) that is used to treat testosterone deficiency or breast cancer or osteoporosis.

- *In class, the teacher used "durabolin" to mean an androgen (trade names durabolin or kabolin) that....*
- *Understanding "durabolin" helps you talk about this topic clearly.*

---

dustcart *(noun)*

A truck for collecting domestic refuse.

- *In Britain a garbage truck is called a dustcart.*
- *He looked up "dustcart" because he had never seen it before.*

---

dustcloth *(noun)*

A piece of cloth used for dusting.

- *Understanding "dustcloth" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dustcloth."*

---

dustmop *(noun)*

A dry swab for dusting floors.

- *In class, the teacher used "dustmop" to mean a dry swab for dusting floors.*
- *Understanding "dustmop" helps you talk about this topic clearly.*

---

dustrag *(noun)*

A piece of cloth used for dusting.

- *In class, the teacher used "dustrag" to mean a piece of cloth used for dusting.*
- *He looked up "dustrag" because he had never seen it before.*

---

dyewood *(noun)*

Any wood from which dye is obtained.

- *She wrote a short paragraph that included "dyewood."*
- *He looked up "dyewood" because he had never seen it before.*

---

dynamise *(verb)*

Make (a drug) effective.

- *Learners should practice how to use "dynamise" in real sentences.*
- *He did not know how to use "dynamise" until he saw an example.*

---

dynamize *(verb)*

Make (a drug) effective.

- *Dynamized medicine.*
- *She was dynamized by her desire to go to grad school.*

---

eardrop *(noun)*

An earring with a pendant ornament.

- *They discussed "eardrop" during the group presentation.*
- *She wrote a short paragraph that included "eardrop."*

---

earflap *(noun)*

One of two flaps attached to a cap to keep the ears warm.

- *They discussed "earflap" during the group presentation.*
- *He looked up "earflap" because he had never seen it before.*

---

earlap *(noun)*

One of two flaps attached to a cap to keep the ears warm.

- *They discussed "earlap" during the group presentation.*

- *She wrote a short paragraph that included "earlap."*

eau de javelle *(noun)*

An aqueous solution of sodium hypochlorite.

- *They discussed "eau de javelle" during the group presentation.*
- *She wrote a short paragraph that included "eau de javelle."*

ebonise *(verb)*

Stain black to make it look like ebony.

- *In everyday English, people use "ebonise" when talking about this idea.*
- *Learners should practice how to use "ebonise" in real sentences.*

ebonize *(verb)*

Stain black to make it look like ebony.

- *The coach explained when to use "ebonize" and when to wait.*
- *Can you use "ebonize" in a sentence that fits this situation?*

ebracteate *(adjective)*

Without bracts.

- *Would you call this situation "ebracteate"? Explain why.*
- *It is useful to describe something as "ebracteate" when it is without bracts.*

eburnation *(noun)*

A change that occurs in degenerative joint disease in which bone is converted into a dense smooth substance resembling ivory.

- *They discussed "eburnation" during the group presentation.*
- *She wrote a short paragraph that included "eburnation."*

ecesis *(noun)*

(ecology) the process by which a plant or animal becomes established in a new habitat.

- *In class, the teacher used "ecesis" to mean (ecology) the process by which a plant or animal....*
- *The article explained what "ecesis" means with a simple example.*

echocardiograph *(noun)*

A sonograph that creates an image of the heart and its abnormalities.

- *They discussed "echocardiograph" during the group presentation.*
- *He looked up "echocardiograph" because he had never seen it before.*

echoencephalograph *(noun)*

A sonograph that creates an image of the brain and its abnormalities.

- *He looked up "echoencephalograph" because he had never seen it before.*
- *She wrote a short paragraph that included "echoencephalograph."*

echogram *(noun)*

An image of a structure that is produced by ultrasonography (reflections of high-frequency sound waves); used to observe fetal growth or to study bodily organs.

- *He looked up "echogram" because he had never seen it before.*
- *She wrote a short paragraph that included "echogram."*

eclipsis *(noun)*

Omission or suppression of parts of words or sentences.

- *Understanding "eclipsis" helps you talk about this topic clearly.*
- *In class, the teacher used "eclipsis" to mean omission or suppression of parts of words or sentences.*

ectodermic *(adjective)*

Of or relating to the ectoderm.

- *A "ectodermic" approach may work better in this case.*
- *The speaker chose "ectodermic" because it captured the feeling precisely.*

effeminise *(verb)*

To give a (more) feminine, effeminate, or womanly quality or appearance to.

- *Can you use "effeminise" in a sentence that fits this situation?*
- *She tried to use "effeminise" carefully so everyone would understand.*

---

effeminize *(verb)*

To give a (more) feminine, effeminate, or womanly quality or appearance to.

- *She tried to use "effeminize" carefully so everyone would understand.*
- *In everyday English, people use "effeminize" when talking about this idea.*

---

effloresce *(verb)*

Come into or as if into flower.

- *These manifestations effloresced in the past.*
- *The coach explained when to use "effloresce" and when to wait.*

---

eggcup *(noun)*

Dishware consisting of a small cup for serving a boiled egg.

- *They discussed "eggcup" during the group presentation.*
- *The article explained what "eggcup" means with a simple example.*

---

eggwhisk *(noun)*

A mixer for beating eggs or whipping cream.

- *They discussed "eggwhisk" during the group presentation.*
- *Understanding "eggwhisk" helps you talk about this topic clearly.*

---

eightpenny nail *(noun)*

A nail 2.5 inches long.

- *They discussed "eightpenny nail" during the group presentation.*
- *The article explained what "eightpenny nail" means with a simple example.*

---

elaeostearic acid *(noun)*

A crystalline unsaturated fatty acid.

- *In class, the teacher used "elaeostearic acid" to mean a crystalline unsaturated fatty acid.*
- *They discussed "elaeostearic acid" during the group presentation.*

---

elaidic acid *(noun)*

A monounsaturated fatty acid that has the same structure as oleic acid except that it is a trans fatty acid; the major trans fatty acid in margarine and fried foods.

- *Understanding "elaidic acid" helps you talk about this topic clearly.*
- *The article explained what "elaidic acid" means with a simple example.*

---

elastance *(noun)*

The reciprocal of capacitance.

- *Understanding "elastance" helps you talk about this topic clearly.*
- *He looked up "elastance" because he had never seen it before.*

---

electrical elastance *(noun)*

The reciprocal of capacitance.

- *Understanding "electrical elastance" helps you talk about this topic clearly.*
- *He looked up "electrical elastance" because he had never seen it before.*

---

electrodynamometer *(noun)*

Measuring instrument that uses the interaction of the magnetic fields of two coils to measure current or voltage or power.

- *She wrote a short paragraph that included "electrodynamometer."*
- *They discussed "electrodynamometer" during the group presentation.*

---

electrograph *(noun)*

An apparatus for the electrical transmission of pictures.

- *Understanding "electrograph" helps you talk about this topic clearly.*
- *In class, the teacher used "electrograph" to mean an apparatus for the electrical transmission of....*

---

electrophorus *(noun)*

A simple electrostatic generator that generates repeated charges of static electricity.

- *She wrote a short paragraph that included "electrophorus."*
- *He looked up "electrophorus" because he had never seen it before.*

---

electrovalent bond *(noun)*

A chemical bond in which one atom loses an electron to form a positive ion and the other atom gains an electron to form a negative ion.

- *The article explained what "electrovalent bond" means with a simple example.*
- *In class, the teacher used "electrovalent bond" to mean a chemical bond in which one atom loses an electron....*

---

eleostearic acid *(noun)*

A crystalline unsaturated fatty acid.

- *They discussed "eleostearic acid" during the group presentation.*
- *He looked up "eleostearic acid" because he had never seen it before.*

---

elie metchnikov *(noun)*

Russian bacteriologist in France who formulated the theory of phagocytosis (1845-1916).

- *The article explained what "elie metchnikov" means with a simple example.*
- *She wrote a short paragraph that included "elie metchnikov."*

---

elinvar *(noun)*

Elinvar is a trademark for a kind of steel used for watch springs because its elasticity is constant over a wide range of temperatures.

- *The article explained what "elinvar" means with a simple example.*
- *Understanding "elinvar" helps you talk about this topic clearly.*

---

elixophyllin *(noun)*

A colorless crystalline alkaloid derived from tea leaves or made synthetically; used in medicine as a bronchial dilator.

- *They discussed "elixophyllin" during the group presentation.*
- *In class, the teacher used "elixophyllin" to mean a colorless crystalline alkaloid derived from tea....*

---

elocutionary *(adjective)*

Of or relating to elocution.

- *Elocutionary recitals.*
- *Would you call this situation "elocutionary"? Explain why.*

---

eluate *(noun)*

A liquid solution that results from elution.

- *He looked up "eluate" because he had never seen it before.*
- *She wrote a short paragraph that included "eluate."*

---

emaciate *(verb)*

Grow weak and thin or waste away physically.

- *She emaciated during the chemotherapy.*
- *The treatment emaciated him.*

---

embrangle *(verb)*

Make more complicated or confused through entanglements.

- *He did not know how to use "embrangle" until he saw an example.*
- *The coach explained when to use "embrangle" and when to wait.*

---

embrittle *(verb)*

Make brittle.

- *She tried to use "embrittle" carefully so everyone would understand.*
- *In everyday English, people use "embrittle" when talking about this idea.*

embrown *(verb)*

Make brown in color.

- *Learners should practice how to use "embrown" in real sentences.*
- *The coach explained when to use "embrown" and when to wait.*

empurple *(verb)*

Color purple.

- *The coach explained when to use "empurple" and when to wait.*
- *She tried to use "empurple" carefully so everyone would understand.*

enantiomorph *(noun)*

Either one of a pair of compounds (crystals or molecules) that are mirror images on each other but are not identical.

- *He looked up "enantiomorph" because he had never seen it before.*
- *She wrote a short paragraph that included "enantiomorph."*

enantiomorphism *(noun)*

The relation of opposition between crystals or molecules that are reflections of one another.

- *The article explained what "enantiomorphism" means with a simple example.*
- *In class, the teacher used "enantiomorphism" to mean the relation of opposition between crystals or....*

encrimson *(verb)*

Make crimson.

- *She tried to use "encrimson" carefully so everyone would understand.*
- *The coach explained when to use "encrimson" and when to wait.*

endermatic *(adjective)*

Acting by absorption through the skin.

- *Would you call this situation "endermatic"? Explain why.*
- *A "endermatic" approach may work better in this case.*

endermic *(adjective)*

Acting by absorption through the skin.

- *Endermic ointment.*
- *A "endermic" approach may work better in this case.*

endocrinal *(adjective)*

Of or belonging to endocrine glands or their secretions.

- *A "endocrinal" approach may work better in this case.*
- *The speaker chose "endocrinal" because it captured the feeling precisely.*

endoergic reaction *(noun)*

A nuclear reaction occurring with absorption of energy.

- *They discussed "endoergic reaction" during the group presentation.*
- *She wrote a short paragraph that included "endoergic reaction."*

endogeny *(noun)*

A geological phenomenon below the surface of the earth.

- *They discussed "endogeny" during the group presentation.*
- *Understanding "endogeny" helps you talk about this topic clearly.*

endoparasitic *(adjective)*

Of or relating to parasites that live in the internal organs of animals.

- *Would you call this situation "endoparasitic"? Explain why.*
- *A "endoparasitic" approach may work better in this case.*

endovenous *(adjective)*

Within or by means of a vein.

- *Would you call this situation "endovenous"? Explain why.*
- *Students compared "endovenous" with similar adjectives in the lesson.*

---

enginery *(noun)*

Machinery consisting of engines collectively.

- *She wrote a short paragraph that included "enginery."*
- *He looked up "enginery" because he had never seen it before.*

---

enolic *(adjective)*

Of or relating to or consisting of enol.

- *Students compared "enolic" with similar adjectives in the lesson.*
- *Would you call this situation "enolic"? Explain why.*

---

enterokinase *(noun)*

Enzyme in the intestinal juice that converts inactive trypsinogen into active trypsin.

- *He looked up "enterokinase" because he had never seen it before.*
- *She wrote a short paragraph that included "enterokinase."*

---

entomologic *(adjective)*

Of or relating to the biological science of entomology.

- *Entomological research.*
- *Would you call this situation "entomologic"? Explain why.*

---

enucleate *(verb)*

Remove (a tumor or eye) from an enveloping sac or cover.

- *She tried to use "enucleate" carefully so everyone would understand.*
- *Learners should practice how to use "enucleate" in real sentences.*

---

eolith *(noun)*

A crude stone artifact (as a chipped flint); possibly the earliest tools.

- *The article explained what "eolith" means with a simple example.*
- *They discussed "eolith" during the group presentation.*

---

eonian *(adjective)*

Of or relating to a geological eon (longer than an era).

- *Students compared "eonian" with similar adjectives in the lesson.*
- *Would you call this situation "eonian"? Explain why.*

---

eparchial *(adjective)*

Of or relating to an eparchy.

- *Her writing became clearer after she learned "eparchial."*
- *The speaker chose "eparchial" because it captured the feeling precisely.*

---

epauliere *(noun)*

Armor plate that protects the shoulder.

- *Understanding "epauliere" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "epauliere."*

---

epergne *(noun)*

A large table centerpiece with branching holders for fruit or sweets or flowers.

- *He looked up "epergne" because he had never seen it before.*
- *In class, the teacher used "epergne" to mean a large table centerpiece with branching holders....*

---

epicarpal *(adjective)*

Of or relating to the epicarp.

- *The speaker chose "epicarpal" because it captured the feeling precisely.*

- *A “epicarpal” approach may work better in this case.*

---

epicyclical *(adjective)*

Of or relating to an epicycle.

- *Would you call this situation “epicyclical”? Explain why.*
- *Students compared “epicyclical” with similar adjectives in the lesson.*

---

epidermic *(adjective)*

Of or relating to a cuticle or cuticula.

- *Students compared “epidermic” with similar adjectives in the lesson.*
- *A “epidermic” approach may work better in this case.*

---

epidiascope *(noun)*

An optical projector that gives images of both transparent and opaque objects.

- *In class, the teacher used “epidiascope” to mean an optical projector that gives images of both....*
- *They discussed “epidiascope” during the group presentation.*

---

epilating wax *(noun)*

A mixture of resins and waxes to remove cosmetically undesirable hair; mixture is applied hot to the surface and after cooling is pulled away taking the hairs with it.

- *They discussed “epilating wax” during the group presentation.*
- *The article explained what “epilating wax” means with a simple example.*

---

epilithic *(adjective)*

Growing on stone.

- *Epilithic mosses.*
- *Her writing became clearer after she learned “epilithic.”*

---

epiphysial *(adjective)*

Relating to the epiphysis of a bone.

- *It is useful to describe something as “epiphysial” when it is relating to the epiphysis of a bone.*
- *Would you call this situation “epiphysial”? Explain why.*

---

episome *(noun)*

DNA that is not incorporated into the genome but is replicated together with the genome (especially in bacterial cells).

- *He looked up “episome” because he had never seen it before.*
- *Understanding “episome” helps you talk about this topic clearly.*

---

epitheliod *(adjective)*

Resembling epithelium.

- *Her writing became clearer after she learned “epitheliod.”*
- *Students compared “epitheliod” with similar adjectives in the lesson.*

---

epitrochoidal engine *(noun)*

A rotary engine that is a four-stroke internal-combustion engine without reciprocating parts.

- *They discussed “epitrochoidal engine” during the group presentation.*
- *The article explained what “epitrochoidal engine” means with a simple example.*

---

eponymic *(adjective)*

Being or relating to or bearing the name of an eponym.

- *Students compared “eponymic” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “eponymic.”*

---

eponymy *(noun)*

The derivation of a general name from that of a famous person.

- *They discussed “eponymy” during the group presentation.*
- *The article explained what “eponymy” means with a simple example.*

---

erasmian *(adjective)*

Of or relating to or in the manner of Erasmus.

- *Would you call this situation "erasmian"? Explain why.*
- *The speaker chose "erasmian" because it captured the feeling precisely.*

---

eremitic *(adjective)*

Of or relating to or befitting eremites or their practices of hermitic living.

- *Eremitic austerities.*
- *Students compared "eremitic" with similar adjectives in the lesson.*

---

eremitical *(adjective)*

Of or relating to or befitting eremites or their practices of hermitic living.

- *A "eremitical" approach may work better in this case.*
- *The speaker chose "eremitical" because it captured the feeling precisely.*

---

ergonovine *(noun)*

An alkaloid derived from ergot (trade name Ergotrate Maleate) that is less toxic than ergot; induces muscular contraction of the uterus and is administered after childbirth or abortion.

- *He looked up "ergonovine" because he had never seen it before.*
- *Understanding "ergonovine" helps you talk about this topic clearly.*

---

ergotic *(adjective)*

Relating to or produced by ergot.

- *A "ergotic" approach may work better in this case.*
- *Her writing became clearer after she learned "ergotic."*

---

ergotrate maleate *(noun)*

An alkaloid derived from ergot (trade name Ergotrate Maleate) that is less toxic than ergot; induces muscular contraction of the uterus and is administered after childbirth or abortion.

- *In class, the teacher used "ergotrate maleate" to mean an alkaloid derived from ergot (trade name....*
- *The article explained what "ergotrate maleate" means with a simple example.*

---

ergotropic *(adjective)*

Of or relating to ergotropism.

- *It is useful to describe something as "ergotropic" when it is of or relating to ergotropism.*
- *The speaker chose "ergotropic" because it captured the feeling precisely.*

---

eroticize *(verb)*

Give erotic character to or make more interesting.

- *Eroticize the ads.*
- *She tried to use "eroticize" carefully so everyone would understand.*

---

erythrite *(noun)*

A reddish mineral consisting of hydrated cobalt arsenate in monoclinic crystalline form and used in coloring glass; usually found in veins bearing cobalt and arsenic.

- *Understanding "erythrite" helps you talk about this topic clearly.*
- *They discussed "erythrite" during the group presentation.*

---

erythrocytolysin *(noun)*

Any substance that can cause lysis (destruction) of erythrocytes (red blood cells) and the release of their hemoglobin.

- *They discussed "erythrocytolysin" during the group presentation.*
- *Understanding "erythrocytolysin" helps you talk about this topic clearly.*

---

erythrolysin *(noun)*

Any substance that can cause lysis (destruction) of erythrocytes (red blood cells) and the release of their hemoglobin.

- *Understanding "erythrolysin" helps you talk about this topic clearly.*
- *In class, the teacher used "erythrolysin" to mean any substance that can cause lysis (destruction) of....*

---

escarp *(noun)*

A steep artificial slope in front of a fortification.

- *Understanding “escarp” helps you talk about this topic clearly.*
- *The article explained what “escarp” means with a simple example.*

---

eskalith *(noun)*

A white powder (LiCO3) used in manufacturing glass and ceramics and as a drug; the drug (trade names Lithane or Lithonate or Eskalith) is used to treat some forms of depression and manic episodes of manic-depressive disorder.

- *She wrote a short paragraph that included “eskalith.”*
- *He looked up “eskalith” because he had never seen it before.*

---

esophagoscope *(noun)*

An optical instrument for examining the inside of the esophagus.

- *In class, the teacher used “esophagoscope” to mean an optical instrument for examining the inside of....*
- *He looked up “esophagoscope” because he had never seen it before.*

---

essonite *(noun)*

A garnet ranging in color from yellow to brown.

- *He looked up “essonite” because he had never seen it before.*
- *Understanding “essonite” helps you talk about this topic clearly.*

---

estaminet *(noun)*

A small (and usually shabby) cafe selling wine and beer and coffee.

- *He looked up “estaminet” because he had never seen it before.*
- *She wrote a short paragraph that included “estaminet.”*

---

esterify *(verb)*

Change (a compound) into an ester.

- *He did not know how to use “esterify” until he saw an example.*
- *In everyday English, people use “esterify” when talking about this idea.*

---

estronol *(noun)*

A naturally occurring weak estrogenic hormone secreted by the mammalian ovary; synthesized (trade name Estronol) and used to treat estrogen deficiency.

- *He looked up “estronol” because he had never seen it before.*
- *They discussed “estronol” during the group presentation.*

---

estuarial *(adjective)*

Of or relating to or found in estuaries.

- *Students compared “estuarial” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “estuarial.”*

---

etagere *(noun)*

A piece of furniture with open shelves for displaying small ornaments.

- *She wrote a short paragraph that included “etagere.”*
- *He looked up “etagere” because he had never seen it before.*

---

etamin *(noun)*

A soft cotton or worsted fabric with an open mesh; used for curtains or clothing etc.

- *Understanding “etamin” helps you talk about this topic clearly.*
- *The article explained what “etamin” means with a simple example.*

---

etamine *(noun)*

A soft cotton or worsted fabric with an open mesh; used for curtains or clothing etc.

- *She wrote a short paragraph that included “etamine.”*
- *They discussed “etamine” during the group presentation.*

---

eternalise *(verb)*

Make famous forever.

- *Learners should practice how to use “eternalise” in real sentences.*
- *He did not know how to use “eternalise” until he saw an example.*

eternise *(verb)*

Make famous forever.

- *He did not know how to use “eternise” until he saw an example.*
- *Learners should practice how to use “eternise” in real sentences.*

ethanal *(noun)*

A colorless volatile water-soluble liquid aldehyde used chiefly in the manufacture of acetic acid and perfumes and drugs.

- *She wrote a short paragraph that included “ethanal.”*
- *He looked up “ethanal” because he had never seen it before.*

ethanal trimer *(noun)*

A colorless liquid (a cyclic trimer of acetaldehyde) that is used as a sedative and a solvent.

- *Understanding “ethanal trimer” helps you talk about this topic clearly.*
- *He looked up “ethanal trimer” because he had never seen it before.*

ethanamide *(noun)*

A colorless solid amide of acetic acid used as a solvent and in the synthesis of organic compounds.

- *Understanding “ethanamide” helps you talk about this topic clearly.*
- *In class, the teacher used “ethanamide” to mean a colorless solid amide of acetic acid used as a....*

ethanedioic acid *(noun)*

A toxic colorless crystalline organic acid found in oxalis and other plants; used as a bleach and rust remover and in chemical analysis.

- *He looked up “ethanedioic acid” because he had never seen it before.*
- *In class, the teacher used “ethanedioic acid” to mean a toxic colorless crystalline organic acid found in....*

ethanediol *(noun)*

A sweet but poisonous syrupy liquid used as an antifreeze and solvent.

- *The article explained what “ethanediol” means with a simple example.*
- *Understanding “ethanediol” helps you talk about this topic clearly.*

ethanoate *(noun)*

A salt or ester of acetic acid.

- *They discussed “ethanoate” during the group presentation.*
- *In class, the teacher used “ethanoate” to mean a salt or ester of acetic acid.*

ethanoic acid *(noun)*

A colorless pungent liquid widely used in manufacturing plastics and pharmaceuticals.

- *He looked up “ethanoic acid” because he had never seen it before.*
- *They discussed “ethanoic acid” during the group presentation.*

ethanoyl chloride *(noun)*

Colorless liquid acyl chloride (CH3COCl) that has a pungent odor.

- *Understanding “ethanoyl chloride” helps you talk about this topic clearly.*
- *They discussed “ethanoyl chloride” during the group presentation.*

ethanoyl group *(noun)*

The organic group of acetic acid (CH3CO-).

- *They discussed “ethanoyl group” during the group presentation.*
- *Understanding “ethanoyl group” helps you talk about this topic clearly.*

ethanoyl radical *(noun)*

The organic group of acetic acid (CH3CO-).

- *In class, the teacher used “ethanoyl radical” to mean the organic group of acetic acid (ch3co-).*
- *Understanding “ethanoyl radical” helps you talk about this topic clearly.*

etherealize *(verb)*

Make ethereal.

- *Learners should practice how to use "etherealize" in real sentences.*
- *She tried to use "etherealize" carefully so everyone would understand.*

---

etherialise *(verb)*

Make ethereal.

- *In everyday English, people use "etherialise" when talking about this idea.*
- *Can you use "etherialise" in a sentence that fits this situation?*

---

etherify *(verb)*

Change into an ether.

- *Etherify an alcohol.*
- *Learners should practice how to use "etherify" in real sentences.*

---

ethnologic *(adjective)*

Of or relating to ethnology.

- *Ethnological field work.*
- *It is useful to describe something as "ethnologic" when it is of or relating to ethnology.*

---

ethoxyethane *(noun)*

A colorless volatile highly inflammable liquid formerly used as an inhalation anesthetic.

- *In class, the teacher used "ethoxyethane" to mean a colorless volatile highly inflammable liquid....*
- *He looked up "ethoxyethane" because he had never seen it before.*

---

ethyl aminobenzoate *(noun)*

A white crystalline ester used as a local anesthetic.

- *Understanding "ethyl aminobenzoate" helps you talk about this topic clearly.*
- *In class, the teacher used "ethyl aminobenzoate" to mean a white crystalline ester used as a local anesthetic.*

---

ethylenediaminetetraacetic acid *(noun)*

A complex molecule used medically to chelate metal ions in cases of lead or heavy metal poisoning.

- *The article explained what "ethylenediaminetetraacetic acid" means with a simple example.*
- *Understanding "ethylenediaminetetraacetic acid" helps you talk about this topic clearly.*

---

ethyne *(noun)*

A colorless flammable gas used chiefly in welding and in organic synthesis.

- *They discussed "ethyne" during the group presentation.*
- *In class, the teacher used "ethyne" to mean a colorless flammable gas used chiefly in welding....*

---

etiolate *(verb)*

Make weak by stunting the growth or development of.

- *Alcohol etiolates your skin.*
- *In everyday English, people use "etiolate" when talking about this idea.*

---

eucaryotic *(adjective)*

Having cells with 'good' or membrane-bound nuclei.

- *It is useful to describe something as "eucaryotic" when it is having cells with 'good' or membrane-bound nuclei.*
- *Would you call this situation "eucaryotic"? Explain why.*

---

eudaemonic *(adjective)*

Producing happiness and well-being.

- *It is useful to describe something as "eudaemonic" when it is producing happiness and well-being.*
- *Would you call this situation "eudaemonic"? Explain why.*

---

eudemonic *(adjective)*

Producing happiness and well-being.

- *A "eudemonic" approach may work better in this case.*

- *It is useful to describe something as "eudemonic" when it is producing happiness and well-being.*

---

eudiometer *(noun)*

Measuring instrument consisting of a graduated glass tube for measuring volume changes in chemical reactions between gases.

- *She wrote a short paragraph that included "eudiometer."*
- *He looked up "eudiometer" because he had never seen it before.*

---

euphonical *(adjective)*

Of or relating to or characterized by euphony.

- *Would you call this situation "euphonical"? Explain why.*
- *Students compared "euphonical" with similar adjectives in the lesson.*

---

euphorbium *(noun)*

An acrid brown gum resin now used mainly in veterinary medicine.

- *Understanding "euphorbium" helps you talk about this topic clearly.*
- *The article explained what "euphorbium" means with a simple example.*

---

euphoriant *(noun)*

A psychoactive drug that tends to produce elation and euphoria.

- *She wrote a short paragraph that included "euphoriant."*
- *The article explained what "euphoriant" means with a simple example.*

---

eurasiatic *(adjective)*

Relating to, or coming from, Europe and Asia.

- *Students compared "eurasiatic" with similar adjectives in the lesson.*
- *A "eurasiatic" approach may work better in this case.*

---

europeanise *(verb)*

Make (continental) European in customs, character, or ideas.

- *She tried to use "europeanise" carefully so everyone would understand.*
- *The coach explained when to use "europeanise" and when to wait.*

---

europeanize *(verb)*

Make (continental) European in customs, character, or ideas.

- *In everyday English, people use "europeanize" when talking about this idea.*
- *Learners should practice how to use "europeanize" in real sentences.*

---

europocentric *(adjective)*

Focussed on Europe and the Europeans.

- *It is useful to describe something as "europocentric" when it is focussed on europe and the europeans.*
- *Would you call this situation "europocentric"? Explain why.*

---

evaporometer *(noun)*

An instrument that measures rate of evaporation of water.

- *The article explained what "evaporometer" means with a simple example.*
- *They discussed "evaporometer" during the group presentation.*

---

excitant *(noun)*

A drug that temporarily quickens some vital process.

- *In class, the teacher used "excitant" to mean a drug that temporarily quickens some vital process.*
- *The article explained what "excitant" means with a simple example.*

---

excrescent *(adjective)*

Forming an outgrowth (usually an excessive outgrowth).

- *Would you call this situation "excrescent"? Explain why.*
- *Her writing became clearer after she learned "excrescent."*

---

exegetic *(adjective)*

Relating to exegesis.

- *It is useful to describe something as "exegetic" when it is relating to exegesis.*
- *The speaker chose "exegetic" because it captured the feeling precisely.*

---

exenterate *(verb)*

Remove the contents of (an organ).

- *In everyday English, people use "exenterate" when talking about this idea.*
- *Can you use "exenterate" in a sentence that fits this situation?*

---

exercycle *(noun)*

An exercise device resembling a stationary bike.

- *He looked up "exercycle" because he had never seen it before.*
- *Understanding "exercycle" helps you talk about this topic clearly.*

---

exodontic *(adjective)*

Of or relating to or involving exodontics.

- *Exodontic surgeon.*
- *Her writing became clearer after she learned "exodontic."*

---

exoergic reaction *(noun)*

A nuclear reaction accompanied by the evolution of energy.

- *They discussed "exoergic reaction" during the group presentation.*
- *She wrote a short paragraph that included "exoergic reaction."*

---

exotherm *(noun)*

A compound that gives off heat during its formation and absorbs heat during its decomposition.

- *In class, the teacher used "exotherm" to mean a compound that gives off heat during its formation....*
- *The article explained what "exotherm" means with a simple example.*

---

expiative *(adjective)*

Having power to atone for or offered by way of expiation or propitiation.

- *The speaker chose "expiative" because it captured the feeling precisely.*
- *A "expiative" approach may work better in this case.*

---

expurgate *(verb)*

Edit by omitting or modifying parts considered indelicate.

- *In everyday English, people use "expurgate" when talking about this idea.*
- *Learners should practice how to use "expurgate" in real sentences.*

---

exsiccate *(verb)*

Lose water or moisture.

- *He did not know how to use "exsiccate" until he saw an example.*
- *Learners should practice how to use "exsiccate" in real sentences.*

---

exteriorise *(verb)*

Make external or objective, or give reality to.

- *In everyday English, people use "exteriorise" when talking about this idea.*
- *She tried to use "exteriorise" carefully so everyone would understand.*

---

exteriorize *(verb)*

Make external or objective, or give reality to.

- *The coach explained when to use "exteriorize" and when to wait.*
- *Can you use "exteriorize" in a sentence that fits this situation?*

---

exteroceptive *(adjective)*

Of or relating to exteroception.

- *A "exteroceptive" approach may work better in this case.*
- *The speaker chose "exteroceptive" because it captured the feeling precisely.*

---

extralinguistic *(adjective)*

Not included within the realm of language.

- *A "extralinguistic" approach may work better in this case.*
- *Students compared "extralinguistic" with similar adjectives in the lesson.*

---

extrasystolic *(adjective)*

Of or relating to or happening during an extrasystole.

- *Students compared "extrasystolic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "extrasystolic."*

---

extravasate *(verb)*

Become active and spew forth lava and rocks.

- *The coach explained when to use "extravasate" and when to wait.*
- *Learners should practice how to use "extravasate" in real sentences.*

---

extropic *(adjective)*

Of or relating to extropy.

- *Would you call this situation "extropic"? Explain why.*
- *The speaker chose "extropic" because it captured the feeling precisely.*

---

exuvial *(adjective)*

Of or relating to the cast-off skins or cuticles of various animals.

- *Students compared "exuvial" with similar adjectives in the lesson.*
- *A "exuvial" approach may work better in this case.*

---

eyebath *(noun)*

A small vessel with a rim curved to fit the orbit of the eye; use to apply medicated or cleansing solution to the eyeball.

- *An eyecup is called an eyebath in Britain.*
- *In class, the teacher used "eyebath" to mean a small vessel with a rim curved to fit the orbit....*

---

eyecup *(noun)*

A small vessel with a rim curved to fit the orbit of the eye; use to apply medicated or cleansing solution to the eyeball.

- *An eyecup is called an eyebath in Britain.*
- *The article explained what "eyecup" means with a simple example.*

---

eyehole *(noun)*

A hole (in a door or an oven etc) through which you can peep.

- *The article explained what "eyehole" means with a simple example.*
- *She wrote a short paragraph that included "eyehole."*

---

facula *(noun)*

A large bright spot on the sun's photosphere occurring most frequently in the vicinity of sunspots.

- *Understanding "facula" helps you talk about this topic clearly.*
- *In class, the teacher used "facula" to mean a large bright spot on the sun's photosphere....*

---

faggoting *(noun)*

Embroidery in which groups of parallel threads are tied together with fagot stitches.

- *Understanding "faggoting" helps you talk about this topic clearly.*
- *In class, the teacher used "faggoting" to mean embroidery in which groups of parallel threads are....*

---

fagoting *(noun)*

Embroidery in which groups of parallel threads are tied together with fagot stitches.

- *She wrote a short paragraph that included "fagoting."*
- *The article explained what "fagoting" means with a simple example.*

falconine *(adjective)*

Relating to or resembling a falcon.

- *Her writing became clearer after she learned "falconine."*
- *Students compared "falconine" with similar adjectives in the lesson.*

fallal *(noun)*

Cheap showy jewelry or ornament on clothing.

- *Understanding "fallal" helps you talk about this topic clearly.*
- *In class, the teacher used "fallal" to mean cheap showy jewelry or ornament on clothing.*

fallboard *(noun)*

The hinged protective covering that protects the keyboard of a piano when it is not being played.

- *They discussed "fallboard" during the group presentation.*
- *The article explained what "fallboard" means with a simple example.*

falsie *(noun)*

Padding that is worn inside a brassiere.

- *He looked up "falsie" because he had never seen it before.*
- *She wrote a short paragraph that included "falsie."*

fancify *(verb)*

Make more beautiful.

- *The coach explained when to use "fancify" and when to wait.*
- *He did not know how to use "fancify" until he saw an example.*

fancywork *(noun)*

Decorative needlework.

- *Understanding "fancywork" helps you talk about this topic clearly.*
- *In class, the teacher used "fancywork" to mean decorative needlework.*

fanion *(noun)*

A small flag used by surveyors or soldiers to mark a position.

- *They discussed "fanion" during the group presentation.*
- *The article explained what "fanion" means with a simple example.*

fanjet *(noun)*

An airplane propelled by a fanjet engine.

- *Understanding "fanjet" helps you talk about this topic clearly.*
- *They discussed "fanjet" during the group presentation.*

fanjet engine *(noun)*

A jet engine in which a fan driven by a turbine provides extra air to the burner and gives extra thrust.

- *He looked up "fanjet engine" because he had never seen it before.*
- *Understanding "fanjet engine" helps you talk about this topic clearly.*

farmplace *(noun)*

A farm together with its buildings.

- *The article explained what "farmplace" means with a simple example.*
- *In class, the teacher used "farmplace" to mean a farm together with its buildings.*

faucal *(adjective)*

Of or relating to the fauces.

- *Would you call this situation "faucal"? Explain why.*
- *It is useful to describe something as "faucal" when it is of or relating to the fauces.*

fauld *(noun)*

A piece of armor plate below the breastplate.

- *Understanding "fauld" helps you talk about this topic clearly.*
- *He looked up "fauld" because he had never seen it before.*

---

featheredge *(noun)*

A thin tapering edge.

- *In class, the teacher used "featheredge" to mean a thin tapering edge.*
- *Understanding "featheredge" helps you talk about this topic clearly.*

---

fecula *(noun)*

Excreta (especially of insects).

- *In class, the teacher used "fecula" to mean excreta (especially of insects).*
- *The article explained what "fecula" means with a simple example.*

---

fecundate *(verb)*

Make fertile or productive.

- *Can you use "fecundate" in a sentence that fits this situation?*
- *The coach explained when to use "fecundate" and when to wait.*

---

federalise *(verb)*

Enter into a league for a common purpose.

- *Learners should practice how to use "federalise" in real sentences.*
- *In everyday English, people use "federalise" when talking about this idea.*

---

fehling's solution *(noun)*

A liquid solution of copper sulfate and potassium tartrate and sodium hydroxide that is used to test for sugar in the urine; solution turns reddish when sugar is present.

- *In class, the teacher used "fehling's solution" to mean a liquid solution of copper sulfate and potassium....*
- *He looked up "fehling's solution" because he had never seen it before.*

---

felloe *(noun)*

Rim (or part of the rim) into which spokes are inserted.

- *She wrote a short paragraph that included "felloe."*
- *Understanding "felloe" helps you talk about this topic clearly.*

---

felspar *(noun)*

Any of a group of hard crystalline minerals that consist of aluminum silicates of potassium or sodium or calcium or barium.

- *They discussed "felspar" during the group presentation.*
- *She wrote a short paragraph that included "felspar."*

---

feminise *(verb)*

To give a (more) feminine, effeminate, or womanly quality or appearance to.

- *She tried to use "feminise" carefully so everyone would understand.*
- *In everyday English, people use "feminise" when talking about this idea.*

---

A face mask made of fine mesh that is worn over a fencer's face.

- *They discussed "fencer's mask" during the group presentation.*
- *He looked up "fencer's mask" because he had never seen it before.*

---

fenestral *(adjective)*

Of or relating to windows.

- *Students compared "fenestral" with similar adjectives in the lesson.*
- *Would you call this situation "fenestral"? Explain why.*

---

fergusonite *(noun)*

A dark mineral consisting of oxides of yttrium and erbium and tantalum and other minerals.

- *She wrote a short paragraph that included "fergusonite."*

- *He looked up "fergusonite" because he had never seen it before.*

---

ferricyanic acid *(noun)*

A brown unstable acid formed from ferricyanide.

- *He looked up "ferricyanic acid" because he had never seen it before.*
- *She wrote a short paragraph that included "ferricyanic acid."*

---

ferrimagnetism *(noun)*

A phenomenon in ferrites where there can be incomplete cancellation of antiferromagnetic arranged spins giving a net magnetic moment.

- *She wrote a short paragraph that included "ferrimagnetism."*
- *Understanding "ferrimagnetism" helps you talk about this topic clearly.*

---

ferrocerium *(noun)*

A pyrophoric alloy of iron with cerium; used for lighter flints.

- *They discussed "ferrocerium" during the group presentation.*
- *Understanding "ferrocerium" helps you talk about this topic clearly.*

---

ferrocyanic acid *(noun)*

A white unstable acid formed from ferrocyanide salts.

- *He looked up "ferrocyanic acid" because he had never seen it before.*
- *They discussed "ferrocyanic acid" during the group presentation.*

---

festinate *(verb)*

Act or move at high speed.

- *In everyday English, people use "festinate" when talking about this idea.*
- *She tried to use "festinate" carefully so everyone would understand.*

---

festoonery *(noun)*

Flower chains suspended in curves between points as a decoration.

- *He looked up "festoonery" because he had never seen it before.*
- *In class, the teacher used "festoonery" to mean flower chains suspended in curves between points as....*

---

fetoscope *(noun)*

A stethoscope placed on the pregnant woman's abdomen to listen for the fetal heartbeat.

- *Understanding "fetoscope" helps you talk about this topic clearly.*
- *The article explained what "fetoscope" means with a simple example.*

---

feudalize *(verb)*

Bring (a country or people) under feudalism.

- *He did not know how to use "feudalize" until he saw an example.*
- *Learners should practice how to use "feudalize" in real sentences.*

---

fibrinase *(noun)*

In the clotting of blood thrombin catalyzes factor XIII into its active form (fibrinase) which causes fibrin to form a stable clot.

- *They discussed "fibrinase" during the group presentation.*
- *Understanding "fibrinase" helps you talk about this topic clearly.*

---

fibrinolysin *(noun)*

An enzyme that dissolves the fibrin of blood clots.

- *Understanding "fibrinolysin" helps you talk about this topic clearly.*
- *He looked up "fibrinolysin" because he had never seen it before.*

---

fibrinopeptide *(noun)*

Peptide released from the amino end of fibrinogen by the action of thrombin to form fibrin during clotting of the blood.

- *He looked up "fibrinopeptide" because he had never seen it before.*
- *In class, the teacher used "fibrinopeptide" to mean peptide released from the amino end of fibrinogen....*

---

fibrocalcific *(adjective)*

Involving or resulting from calcification of fibrous tissue.

- *It is useful to describe something as "fibrocalcific" when it is involving or resulting from calcification of....*
- *The speaker chose "fibrocalcific" because it captured the feeling precisely.*

---

fibrocartilaginous *(adjective)*

Of or relating to fibrocartilage.

- *Her writing became clearer after she learned "fibrocartilaginous."*
- *The speaker chose "fibrocartilaginous" because it captured the feeling precisely.*

---

fichu *(noun)*

A lightweight triangular scarf worn by a woman.

- *They discussed "fichu" during the group presentation.*
- *Understanding "fichu" helps you talk about this topic clearly.*

---

fictile *(adjective)*

Of or relating to the craft of pottery.

- *The fictile art.*
- *Fictile ware.*

---

fictionalise *(verb)*

Convert into the form or the style of a novel.

- *She tried to use "fictionalise" carefully so everyone would understand.*
- *The coach explained when to use "fictionalise" and when to wait.*

---

fiddlestick *(noun)*

A bow used in playing the violin.

- *In class, the teacher used "fiddlestick" to mean a bow used in playing the violin.*
- *They discussed "fiddlestick" during the group presentation.*

---

filariid *(adjective)*

Of or relating to or belonging to the family Filariidae.

- *Would you call this situation "filariid"? Explain why.*
- *Her writing became clearer after she learned "filariid."*

---

filature *(noun)*

A bobbin used in spinning silk into thread.

- *Understanding "filature" helps you talk about this topic clearly.*
- *In class, the teacher used "filature" to mean a bobbin used in spinning silk into thread.*

---

fillagree *(noun)*

Delicate and intricate ornamentation (usually in gold or silver or other fine twisted wire).

- *The article explained what "fillagree" means with a simple example.*
- *In class, the teacher used "fillagree" to mean delicate and intricate ornamentation (usually in....*

---

fingerstall *(noun)*

A sheath worn to protect a finger.

- *The article explained what "fingerstall" means with a simple example.*
- *In class, the teacher used "fingerstall" to mean a sheath worn to protect a finger.*

---

fipple *(noun)*

A wooden plug forming a flue pipe (as the mouthpiece of a recorder).

- *He looked up "fipple" because he had never seen it before.*
- *She wrote a short paragraph that included "fipple."*

---

fipple flute *(noun)*

A tubular wind instrument with 8 finger holes and a fipple mouthpiece.

- *He looked up “fipple flute” because he had never seen it before.*
- *They discussed “fipple flute” during the group presentation.*

---

fipple pipe *(noun)*

A tubular wind instrument with 8 finger holes and a fipple mouthpiece.

- *He looked up “fipple pipe” because he had never seen it before.*
- *In class, the teacher used “fipple pipe” to mean a tubular wind instrument with 8 finger holes and a....*

---

firedog *(noun)*

Metal supports for logs in a fireplace.

- *He looked up “firedog” because he had never seen it before.*
- *They discussed “firedog” during the group presentation.*

---

firelighter *(noun)*

(a piece of) a substance that burns easily and can be used to start a coal or coke fire.

- *The article explained what “firelighter” means with a simple example.*
- *Understanding “firelighter” helps you talk about this topic clearly.*

---

firelock *(noun)*

A muzzle loader that had a flintlock type of gunlock.

- *She wrote a short paragraph that included “firelock.”*
- *The article explained what “firelock” means with a simple example.*

---

fireroom *(noun)*

(nautical) chamber or compartment in which the furnaces of a ship are stoked or fired.

- *The article explained what “fireroom” means with a simple example.*
- *She wrote a short paragraph that included “fireroom.”*

---

firmamental *(adjective)*

Relating to the firmament or upper regions.

- *Students compared “firmamental” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “firmamental.”*

---

fishgig *(noun)*

An implement with a shaft and barbed point used for catching fish.

- *They discussed “fishgig” during the group presentation.*
- *Understanding “fishgig” helps you talk about this topic clearly.*

---

fishplate *(noun)*

Metal plate bolted along sides of two rails or beams.

- *In class, the teacher used “fishplate” to mean metal plate bolted along sides of two rails or beams.*
- *Understanding “fishplate” helps you talk about this topic clearly.*

---

fistulous *(adjective)*

Of or pertaining to or resembling a fistula.

- *Students compared “fistulous” with similar adjectives in the lesson.*
- *A “fistulous” approach may work better in this case.*

---

fizgig *(noun)*

An implement with a shaft and barbed point used for catching fish.

- *He looked up “fizgig” because he had never seen it before.*
- *She wrote a short paragraph that included “fizgig.”*

---

flaminian way *(noun)*

An ancient Roman road in Italy built by Gaius Flaminius in 220 BC; extends north from Rome to cisalpine Gaul.

- *He looked up “flaminian way” because he had never seen it before.*
- *In class, the teacher used “flaminian way” to mean an ancient roman road in italy built by gaius....*

flashboard *(noun)*

Boarding place along the top of a dam to increase its height.

- *Understanding "flashboard" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "flashboard."*

flashboarding *(noun)*

Boarding place along the top of a dam to increase its height.

- *Understanding "flashboarding" helps you talk about this topic clearly.*
- *He looked up "flashboarding" because he had never seen it before.*

flashflood *(noun)*

A sudden local flood of great volume and short duration.

- *Understanding "flashflood" helps you talk about this topic clearly.*
- *The article explained what "flashflood" means with a simple example.*

flatlet *(noun)*

A tiny flat.

- *He looked up "flatlet" because he had never seen it before.*
- *She wrote a short paragraph that included "flatlet."*

flatwork *(noun)*

Ironing that can be done mechanically.

- *He looked up "flatwork" because he had never seen it before.*
- *Understanding "flatwork" helps you talk about this topic clearly.*

flaxedil *(noun)*

Neuromuscular blocking agent (trade name Flaxedil) used as a muscle relaxant in the administration of anesthesia.

- *She wrote a short paragraph that included "flaxedil."*
- *Understanding "flaxedil" helps you talk about this topic clearly.*

flexible sigmoidoscope *(noun)*

An endoscope (a flexible fiberoptic probe) for examining the sigmoid colon.

- *He looked up "flexible sigmoidoscope" because he had never seen it before.*
- *In class, the teacher used "flexible sigmoidoscope" to mean an endoscope (a flexible fiberoptic probe) for....*

flexibleness *(noun)*

The quality of being adaptable or variable.

- *In class, the teacher used "flexibleness" to mean the quality of being adaptable or variable.*
- *The article explained what "flexibleness" means with a simple example.*

floccule *(noun)*

A small loosely aggregated mass of flocculent material suspended in or precipitated from a liquid.

- *They discussed "floccule" during the group presentation.*
- *The article explained what "floccule" means with a simple example.*

floodhead *(noun)*

A wall of water rushing ahead of the flood.

- *We were lucky to be safe when the floodheads hit.*
- *He looked up "floodhead" because he had never seen it before.*

floricultural *(adjective)*

Of or relating to or involving floriculture.

- *It is useful to describe something as "floricultural" when it is of or relating to or involving floriculture.*
- *The speaker chose "floricultural" because it captured the feeling precisely.*

floxuridine *(noun)*

Antineoplastic drug used to treat some cancers; can cause loss of hair.

- *They discussed "floxuridine" during the group presentation.*
- *In class, the teacher used "floxuridine" to mean antineoplastic drug used to treat some cancers; can....*

fluegelhorn *(noun)*

A brass instrument resembling a cornet but with a wider bore.

- *The article explained what "fluegelhorn" means with a simple example.*
- *In class, the teacher used "fluegelhorn" to mean a brass instrument resembling a cornet but with a....*

fluoridise *(verb)*

Subject to fluoridation; treat with fluoride.

- *The coach explained when to use "fluoridise" and when to wait.*
- *Can you use "fluoridise" in a sentence that fits this situation?*

fluoridize *(verb)*

Subject to fluoridation; treat with fluoride.

- *Fluoridized water.*
- *Fluoridize the teeth of children.*

fluoroboric acid *(noun)*

An acid of fluorine and boron.

- *The article explained what "fluoroboric acid" means with a simple example.*
- *Understanding "fluoroboric acid" helps you talk about this topic clearly.*

fluoroboride *(noun)*

A salt of fluoroboric acid.

- *Understanding "fluoroboride" helps you talk about this topic clearly.*
- *They discussed "fluoroboride" during the group presentation.*

fluoroform *(noun)*

Colorless gas haloform CHF3 (similar to chloroform).

- *She wrote a short paragraph that included "fluoroform."*
- *They discussed "fluoroform" during the group presentation.*

fluosilicate *(noun)*

Salt of fluosilicic acid.

- *In class, the teacher used "fluosilicate" to mean salt of fluosilicic acid.*
- *The article explained what "fluosilicate" means with a simple example.*

fluosilicic acid *(noun)*

An unstable poisonous corrosive acid known primarily in the form of its salts.

- *They discussed "fluosilicic acid" during the group presentation.*
- *Understanding "fluosilicic acid" helps you talk about this topic clearly.*

flushless toilet *(noun)*

A toilet that relies on bacteria to break down waste matter (instead of using water).

- *In class, the teacher used "flushless toilet" to mean a toilet that relies on bacteria to break down....*
- *The article explained what "flushless toilet" means with a simple example.*

fluxmeter *(noun)*

Meter that measures magnetic flux by the current it generates in a coil.

- *He looked up "fluxmeter" because he had never seen it before.*
- *She wrote a short paragraph that included "fluxmeter."*

flyswat *(noun)*

An implement with a flat part (of mesh or plastic) and a long handle; used to kill insects.

- *He looked up "flyswat" because he had never seen it before.*

- *She wrote a short paragraph that included "flyswat."*

---

focalisation *(noun)*

The confinement of an infection to a limited area.

- *He looked up "focalisation" because he had never seen it before.*
- *They discussed "focalisation" during the group presentation.*

---

focalization *(noun)*

The confinement of an infection to a limited area.

- *They discussed "focalization" during the group presentation.*
- *In class, the teacher used "focalization" to mean the confinement of an infection to a limited area.*

---

foetoprotein *(noun)*

Any of several antigens that occur naturally in the fetus and sometimes in adults with cancer.

- *Understanding "foetoprotein" helps you talk about this topic clearly.*
- *In class, the teacher used "foetoprotein" to mean any of several antigens that occur naturally in the....*

---

foetoscope *(noun)*

A stethoscope placed on the pregnant woman's abdomen to listen for the fetal heartbeat.

- *They discussed "foetoscope" during the group presentation.*
- *She wrote a short paragraph that included "foetoscope."*

---

fogbank *(noun)*

A large mass of fog on the sea (as seen from a distance).

- *Understanding "fogbank" helps you talk about this topic clearly.*
- *The article explained what "fogbank" means with a simple example.*

---

foglamp *(noun)*

Headlight that provides strong beam for use in foggy weather.

- *He looked up "foglamp" because he had never seen it before.*
- *In class, the teacher used "foglamp" to mean headlight that provides strong beam for use in....*

---

fohn *(noun)*

A warm dry wind that blows down the northern slopes of the Alps.

- *She wrote a short paragraph that included "fohn."*
- *The article explained what "fohn" means with a simple example.*

---

folacin *(noun)*

A B vitamin that is essential for cell growth and reproduction.

- *In class, the teacher used "folacin" to mean a b vitamin that is essential for cell growth and....*
- *He looked up "folacin" because he had never seen it before.*

---

fomentation *(noun)*

A substance used as a warm moist medicinal compress or poultice.

- *In class, the teacher used "fomentation" to mean a substance used as a warm moist medicinal compress....*
- *They discussed "fomentation" during the group presentation.*

---

footstall *(noun)*

An architectural support or base (as for a column or statue).

- *In class, the teacher used "footstall" to mean an architectural support or base (as for a column....*
- *The article explained what "footstall" means with a simple example.*

---

forcipate *(adjective)*

Shaped like a forceps; deeply forked.

- *The speaker chose "forcipate" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "forcipate."*

---

foredate *(verb)*

Establish something as being earlier relative to something else.

- *She tried to use "foredate" carefully so everyone would understand.*
- *He did not know how to use "foredate" until he saw an example.*

---

foredge *(noun)*

The part of a book that faces inward when the book is shelved; the part opposite the spine.

- *In class, the teacher used "foredge" to mean the part of a book that faces inward when the book....*
- *He looked up "foredge" because he had never seen it before.*

---

foreshorten *(verb)*

Reduce in scope while retaining essential elements.

- *He did not know how to use "foreshorten" until he saw an example.*
- *Can you use "foreshorten" in a sentence that fits this situation?*

---

forestage *(noun)*

The part of a modern theater stage between the curtain and the orchestra (i.e., in front of the curtain).

- *In class, the teacher used "forestage" to mean the part of a modern theater stage between the....*
- *Understanding "forestage" helps you talk about this topic clearly.*

---

formol *(noun)*

A 10% solution of formaldehyde in water; used as a disinfectant or to preserve biological specimens.

- *She wrote a short paragraph that included "formol."*
- *He looked up "formol" because he had never seen it before.*

---

forssman antibody *(noun)*

An antibody found in the blood of someone suffering from infectious mononucleosis.

- *They discussed "forssman antibody" during the group presentation.*
- *In class, the teacher used "forssman antibody" to mean an antibody found in the blood of someone suffering....*

---

foryml *(noun)*

(chemistry) the negative univalent acyl radical CHO that occurs in aldehydes.

- *They discussed "foryml" during the group presentation.*
- *The article explained what "foryml" means with a simple example.*

---

fossilise *(verb)*

Become mentally inflexible.

- *He did not know how to use "fossilise" until he saw an example.*
- *She tried to use "fossilise" carefully so everyone would understand.*

---

fots *(noun)*

A communication system using fiber optic cables.

- *In class, the teacher used "fots" to mean a communication system using fiber optic cables.*
- *The article explained what "fots" means with a simple example.*

---

fourhanded *(adjective)*

(of card games) involving or requiring four players.

- *It is useful to describe something as "fourhanded" when it is (of card games) involving or requiring four players.*
- *The speaker chose "fourhanded" because it captured the feeling precisely.*

---

fragmentise *(verb)*

Break or cause to break into pieces.

- *In everyday English, people use "fragmentise" when talking about this idea.*
- *She tried to use "fragmentise" carefully so everyone would understand.*

---

fragmentize *(verb)*

Break or cause to break into pieces.

- *The coach explained when to use "fragmentize" and when to wait.*
- *Can you use "fragmentize" in a sentence that fits this situation?*

---

frenchify *(verb)*

Become French in appearance or character.

- *Let's Frenchify the restaurant and charge more money.*
- *The coach explained when to use "frenchify" and when to wait.*

---

fretsaw *(noun)*

Fine-toothed power saw with a narrow blade; used to cut curved outlines.

- *Understanding "fretsaw" helps you talk about this topic clearly.*
- *He looked up "fretsaw" because he had never seen it before.*

---

frontlet *(noun)*

An adornment worn on the forehead.

- *Understanding "frontlet" helps you talk about this topic clearly.*
- *The article explained what "frontlet" means with a simple example.*

---

frontstall *(noun)*

Medieval plate armor to protect a horse's head.

- *They discussed "frontstall" during the group presentation.*
- *Understanding "frontstall" helps you talk about this topic clearly.*

---

frostian *(adjective)*

Of or relating to or in the manner of Robert Frost.

- *It is useful to describe something as "frostian" when it is of or relating to or in the manner of robert frost.*
- *Would you call this situation "frostian"? Explain why.*

---

fruticose *(adjective)*

Of or relating to or resembling a shrub.

- *Would you call this situation "fruticose"? Explain why.*
- *It is useful to describe something as "fruticose" when it is of or relating to or resembling a shrub.*

---

fruticulose *(adjective)*

Of or relating to or resembling a shrub.

- *A "fruticulose" approach may work better in this case.*
- *The speaker chose "fruticulose" because it captured the feeling precisely.*

---

fulminic acid *(noun)*

(CNOH) an unstable acid occurring mainly in the form of explosive salts and esters that is isomeric with cyanic acid.

- *He looked up "fulminic acid" because he had never seen it before.*
- *She wrote a short paragraph that included "fulminic acid."*

---

fundamentalistic *(adjective)*

Of or relating to or tending toward fundamentalism.

- *The speaker chose "fundamentalistic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "fundamentalistic."*

---

fungous *(adjective)*

Of or relating to fungi.

- *Her writing became clearer after she learned "fungous."*
- *Students compared "fungous" with similar adjectives in the lesson.*

---

funguslike *(adjective)*

Resembling fungi.

- *A "funguslike" approach may work better in this case.*
- *The speaker chose "funguslike" because it captured the feeling precisely.*

furane *(noun)*

A colorless toxic flammable liquid used in the synthesis of nylon.

- *They discussed "furane" during the group presentation.*
- *He looked up "furane" because he had never seen it before.*

furbelow *(noun)*

A strip of pleated material used as a decoration or a trim.

- *In class, the teacher used "furbelow" to mean a strip of pleated material used as a decoration or....*
- *Understanding "furbelow" helps you talk about this topic clearly.*

furfuraldehyde *(noun)*

A liquid aldehyde with a penetrating odor; made from plant hulls and corncobs; used in making furan and as a solvent.

- *He looked up "furfuraldehyde" because he had never seen it before.*
- *She wrote a short paragraph that included "furfuraldehyde."*

furfuran *(noun)*

A colorless toxic flammable liquid used in the synthesis of nylon.

- *The article explained what "furfuran" means with a simple example.*
- *Understanding "furfuran" helps you talk about this topic clearly.*

futtock shroud *(noun)*

Shroud that is part of a ship's rigging.

- *The article explained what "futtock shroud" means with a simple example.*
- *In class, the teacher used "futtock shroud" to mean shroud that is part of a ship's rigging.*

fuzee *(noun)*

A colored flare used as a warning signal by trucks and trains.

- *The article explained what "fuzee" means with a simple example.*
- *Understanding "fuzee" helps you talk about this topic clearly.*

gadolinite *(noun)*

A mineral that is a source of rare earths; consists of silicates of iron and beryllium and cerium and yttrium and erbium.

- *In class, the teacher used "gadolinite" to mean a mineral that is a source of rare earths; consists....*
- *The article explained what "gadolinite" means with a simple example.*

gaffsail *(noun)*

A quadrilateral fore-and-aft sail suspended from a gaff.

- *She wrote a short paragraph that included "gaffsail."*
- *They discussed "gaffsail" during the group presentation.*

galactagogue *(noun)*

Agent that induces milk secretion.

- *He looked up "galactagogue" because he had never seen it before.*
- *In class, the teacher used "galactagogue" to mean agent that induces milk secretion.*

galactosis *(noun)*

The secretion of milk.

- *He looked up "galactosis" because he had never seen it before.*
- *They discussed "galactosis" during the group presentation.*

gallamine *(noun)*

Neuromuscular blocking agent (trade name Flaxedil) used as a muscle relaxant in the administration of anesthesia.

- *Understanding "gallamine" helps you talk about this topic clearly.*
- *The article explained what "gallamine" means with a simple example.*

gallous *(noun)*

Alternative terms for gallows.

- *The article explained what "gallous" means with a simple example.*
- *In class, the teacher used "gallous" to mean alternative terms for gallows.*

---

galosh *(noun)*

A waterproof overshoe that protects shoes from water or snow.

- *Understanding "galosh" helps you talk about this topic clearly.*
- *The article explained what "galosh" means with a simple example.*

---

galwegian *(adjective)*

Of or relating to or characteristic of the Scottish district of Galloway or its people.

- *Her writing became clearer after she learned "galwegian."*
- *Students compared "galwegian" with similar adjectives in the lesson.*

---

gamebag *(noun)*

A canvas or leather bag for carrying game (especially birds) killed by a hunter.

- *In class, the teacher used "gamebag" to mean a canvas or leather bag for carrying game....*
- *They discussed "gamebag" during the group presentation.*

---

gangboard *(noun)*

A temporary bridge for getting on and off a vessel at dockside.

- *The article explained what "gangboard" means with a simple example.*
- *Understanding "gangboard" helps you talk about this topic clearly.*

---

gangsaw *(noun)*

A power saw that has several parallel blades making simultaneous cuts.

- *In class, the teacher used "gangsaw" to mean a power saw that has several parallel blades making....*
- *The article explained what "gangsaw" means with a simple example.*

---

garboard *(noun)*

The first wale laid next to the keel of a wooden ship.

- *In class, the teacher used "garboard" to mean the first wale laid next to the keel of a wooden ship.*
- *The article explained what "garboard" means with a simple example.*

---

garboard plank *(noun)*

The first wale laid next to the keel of a wooden ship.

- *Understanding "garboard plank" helps you talk about this topic clearly.*
- *In class, the teacher used "garboard plank" to mean the first wale laid next to the keel of a wooden ship.*

---

garboard strake *(noun)*

The first wale laid next to the keel of a wooden ship.

- *He looked up "garboard strake" because he had never seen it before.*
- *They discussed "garboard strake" during the group presentation.*

---

garnierite *(noun)*

A green mineral consisting of hydrated nickel magnesium silicate; a source of nickel.

- *He looked up "garnierite" because he had never seen it before.*
- *They discussed "garnierite" during the group presentation.*

---

gasify *(verb)*

Turn into gas.

- *Can you use "gasify" in a sentence that fits this situation?*
- *The coach explained when to use "gasify" and when to wait.*

---

gastroduodenal *(adjective)*

Of or relating to the stomach and the duodenum.

- *It is useful to describe something as "gastroduodenal" when it is of or relating to the stomach and the duodenum.*

- *Would you call this situation "gastroduodenal"? Explain why.*

---

gastroscope *(noun)*

A type of endoscope for visually examining the stomach.

- *In class, the teacher used "gastroscope" to mean a type of endoscope for visually examining the stomach.*
- *The article explained what "gastroscope" means with a simple example.*

---

gateleg table *(noun)*

A drop-leaf table with the drop-leaves supported by hinged legs.

- *The article explained what "gateleg table" means with a simple example.*
- *In class, the teacher used "gateleg table" to mean a drop-leaf table with the drop-leaves supported by....*

---

gauguinesque *(adjective)*

In the manner of Paul Gauguin.

- *The speaker chose "gauguinesque" because it captured the feeling precisely.*
- *It is useful to describe something as "gauguinesque" when it is in the manner of paul gauguin.*

---

gauntry *(noun)*

A framework of steel bars raised on side supports to bridge over or around something; can display railway signals above several tracks or can support a traveling crane etc.

- *He looked up "gauntry" because he had never seen it before.*
- *She wrote a short paragraph that included "gauntry."*

---

gaussmeter *(noun)*

A meter to compare strengths of magnetic fields.

- *Understanding "gaussmeter" helps you talk about this topic clearly.*
- *The article explained what "gaussmeter" means with a simple example.*

---

geartrain *(noun)*

Wheelwork consisting of a connected set of rotating gears by which force is transmitted or motion or torque is changed.

- *The fool got his tie caught in the geartrain.*
- *The article explained what "geartrain" means with a simple example.*

---

gegenschein *(noun)*

A faint spot of light in the night sky that appears directly opposite the position of the sun; a reflection of sunlight by micrometeoric material in space.

- *In class, the teacher used "gegenschein" to mean a faint spot of light in the night sky that appears....*
- *He looked up "gegenschein" because he had never seen it before.*

---

gelatinise *(verb)*

Become gelatinous or change into a jelly.

- *He did not know how to use "gelatinise" until he saw an example.*
- *The coach explained when to use "gelatinise" and when to wait.*

---

gelatinize *(verb)*

Become gelatinous or change into a jelly.

- *The starch gelatinized when it was heated.*
- *Hot water will gelatinize starch.*

---

gemmation *(noun)*

Asexual reproduction in which a local growth on the surface or in the body of the parent becomes a separate individual.

- *She wrote a short paragraph that included "gemmation."*
- *Understanding "gemmation" helps you talk about this topic clearly.*

---

gemmiferous *(adjective)*

Bearing or reproducing by a gemma.

- *A "gemmiferous" approach may work better in this case.*
- *Would you call this situation "gemmiferous"? Explain why.*

---

genealogic *(adjective)*

Of or relating to genealogy.

- *Genealogical records.*
- *It is useful to describe something as "genealogic" when it is of or relating to genealogy.*

genotypical *(adjective)*

Of or relating to or constituting a genotype.

- *Genotypical pattern.*
- *Her writing became clearer after she learned "genotypical."*

genus xerobates *(noun)*

Possible new genus for desert and Texas tortoises based on recent research.

- *The article explained what "genus xerobates" means with a simple example.*
- *In class, the teacher used "genus xerobates" to mean possible new genus for desert and texas tortoises....*

geodesical *(adjective)*

Of or relating to or determined by geodesy.

- *Would you call this situation "geodesical"? Explain why.*
- *It is useful to describe something as "geodesical" when it is of or relating to or determined by geodesy.*

geophytic *(adjective)*

Of or relating to geophytes.

- *It is useful to describe something as "geophytic" when it is of or relating to geophytes.*
- *Students compared "geophytic" with similar adjectives in the lesson.*

geothermic *(adjective)*

Of or relating to the heat in the interior of the earth.

- *Her writing became clearer after she learned "geothermic."*
- *Students compared "geothermic" with similar adjectives in the lesson.*

germanite *(noun)*

A rare reddish-grey mineral consisting of a copper iron germanium sulfide.

- *Understanding "germanite" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "germanite."*

gerundial *(adjective)*

Relating to or like a gerund.

- *The gerundial suffix '-ing'.*
- *Her writing became clearer after she learned "gerundial."*

gewgaw *(noun)*

Cheap showy jewelry or ornament on clothing.

- *In class, the teacher used "gewgaw" to mean cheap showy jewelry or ornament on clothing.*
- *He looked up "gewgaw" because he had never seen it before.*

ghanese *(adjective)*

Of or relating to or characteristic of Ghana or its people or language.

- *A "ghanese" approach may work better in this case.*
- *Students compared "ghanese" with similar adjectives in the lesson.*

gharry *(noun)*

A horse-drawn carriage in India.

- *They discussed "gharry" during the group presentation.*
- *In class, the teacher used "gharry" to mean a horse-drawn carriage in india.*

ghatti *(noun)*

An Indian gum from the dhawa tree; used as a substitute for gum arabic.

- *They discussed “ghatti” during the group presentation.*
- *He looked up “ghatti” because he had never seen it before.*

---

ghatti gum *(noun)*

An Indian gum from the dhawa tree; used as a substitute for gum arabic.

- *In class, the teacher used “ghatti gum” to mean an indian gum from the dhawa tree; used as a....*
- *He looked up “ghatti gum” because he had never seen it before.*

---

ghedda wax *(noun)*

Wax from Indian and African bees.

- *She wrote a short paragraph that included “ghedda wax.”*
- *He looked up “ghedda wax” because he had never seen it before.*

---

ghettoise *(verb)*

Put in a ghetto.

- *Learners should practice how to use “ghettoise” in real sentences.*
- *The coach explained when to use “ghettoise” and when to wait.*

---

ghettoize *(verb)*

Put in a ghetto.

- *The Jews in Eastern Europe were ghettoized.*
- *Can you use “ghettoize” in a sentence that fits this situation?*

---

ghrf *(noun)*

A releasing factor that accelerates the secretion of growth hormone by the anterior pituitary body.

- *The article explained what “ghrf” means with a simple example.*
- *Understanding “ghrf” helps you talk about this topic clearly.*

---

gilbertian *(adjective)*

Of or pertaining to or characteristic of the style of William S. Gilbert.

- *Gilbertian libretti.*
- *Her writing became clearer after she learned “gilbertian.”*

---

gildhall *(noun)*

The meeting place of a medieval guild.

- *They discussed “gildhall” during the group presentation.*
- *In class, the teacher used “gildhall” to mean the meeting place of a medieval guild.*

---

gilgai soil *(noun)*

Soil in the melon holes of Australia.

- *In class, the teacher used “gilgai soil” to mean soil in the melon holes of australia.*
- *He looked up “gilgai soil” because he had never seen it before.*

---

gingerol *(noun)*

Derived from ginger; source of the hotness of ginger.

- *The article explained what “gingerol” means with a simple example.*
- *They discussed “gingerol” during the group presentation.*

---

ginmill *(noun)*

A room or establishment where alcoholic drinks are served over a counter.

- *He looked up “ginmill” because he had never seen it before.*
- *She wrote a short paragraph that included “ginmill.”*

---

girandola *(noun)*

An ornate candle holder; often with a mirror.

- *The article explained what “girandola” means with a simple example.*
- *They discussed “girandola” during the group presentation.*

girandole *(noun)*

An ornate candle holder; often with a mirror.

- *She wrote a short paragraph that included "girandole."*
- *They discussed "girandole" during the group presentation.*

gittern *(noun)*

A 16th century musical instrument resembling a guitar with a pear-shaped soundbox and wire strings.

- *The article explained what "gittern" means with a simple example.*
- *They discussed "gittern" during the group presentation.*

glamourise *(verb)*

Make glamorous and attractive.

- *Learners should practice how to use "glamourise" in real sentences.*
- *She tried to use "glamourise" carefully so everyone would understand.*

glamourize *(verb)*

Make glamorous and attractive.

- *Can you use "glamourize" in a sentence that fits this situation?*
- *In everyday English, people use "glamourize" when talking about this idea.*

glauber's salt *(noun)*

(Na2SO4.10H2O) a colorless salt used as a cathartic.

- *He looked up "glauber's salt" because he had never seen it before.*
- *She wrote a short paragraph that included "glauber's salt."*

glauber's salts *(noun)*

(Na2SO4.10H2O) a colorless salt used as a cathartic.

- *They discussed "glauber's salts" during the group presentation.*
- *The article explained what "glauber's salts" means with a simple example.*

globalise *(verb)*

Make world-wide in scope or application.

- *The coach explained when to use "globalise" and when to wait.*
- *He did not know how to use "globalise" until he saw an example.*

glottochronological *(adjective)*

Pertaining to the study of the evolution of languages from a common source.

- *Glottochronological studies.*
- *A "glottochronological" approach may work better in this case.*

glucinium *(noun)*

A light strong brittle grey toxic bivalent metallic element.

- *She wrote a short paragraph that included "glucinium."*
- *He looked up "glucinium" because he had never seen it before.*

glutamic oxalacetic transaminase *(noun)*

An enzyme involved in transamination.

- *They discussed "glutamic oxalacetic transaminase" during the group presentation.*
- *Understanding "glutamic oxalacetic transaminase" helps you talk about this topic clearly.*

glutamic oxaloacetic transaminase *(noun)*

An enzyme involved in transamination.

- *Understanding "glutamic oxaloacetic transaminase" helps you talk about this topic clearly.*
- *The article explained what "glutamic oxaloacetic transaminase" means with a simple example.*

glutaminic acid *(noun)*

An amino acid occurring in proteins; important in the nitrogen metabolism of plants; used in monosodium glutamate to enhance the flavor of meats.

- *Understanding "glutaminic acid" helps you talk about this topic clearly.*
- *They discussed "glutaminic acid" during the group presentation.*

---

glutelin *(noun)*

A simple protein found in the seeds of cereals.

- *He looked up "glutelin" because he had never seen it before.*
- *She wrote a short paragraph that included "glutelin."*

---

glyceric acid *(noun)*

A syrupy acid obtained by oxidation of glycerol or glyceraldehyde.

- *They discussed "glyceric acid" during the group presentation.*
- *In class, the teacher used "glyceric acid" to mean a syrupy acid obtained by oxidation of glycerol or....*

---

glyceric aldehyde *(noun)*

A sweet crystalline aldehyde formed by the breakdown of sugars.

- *He looked up "glyceric aldehyde" because he had never seen it before.*
- *Understanding "glyceric aldehyde" helps you talk about this topic clearly.*

---

glyceride *(noun)*

An ester of glycerol and fatty acids that occurs naturally as fats and fatty oils.

- *Fresh fats contain glycerides of fatty acids and very little free acid.*
- *He looked up "glyceride" because he had never seen it before.*

---

glycerinated gelatin *(noun)*

A gelatinous preparation made from gelatin and glycerin and water; used as a base for ointments and suppositories.

- *She wrote a short paragraph that included "glycerinated gelatin."*
- *The article explained what "glycerinated gelatin" means with a simple example.*

---

glycerite *(noun)*

A medicine made by mixing a substance in glycerin.

- *Understanding "glycerite" helps you talk about this topic clearly.*
- *The article explained what "glycerite" means with a simple example.*

---

glycerogel *(noun)*

A medicated skin preparation made from glycerin and glycerinated gelatin.

- *She wrote a short paragraph that included "glycerogel."*
- *They discussed "glycerogel" during the group presentation.*

---

glycerogelatin *(noun)*

A medicated skin preparation made from glycerin and glycerinated gelatin.

- *The article explained what "glycerogelatin" means with a simple example.*
- *She wrote a short paragraph that included "glycerogelatin."*

---

glycerol trimargarate *(noun)*

A glyceryl ester of margaric acid.

- *Understanding "glycerol trimargarate" helps you talk about this topic clearly.*
- *In class, the teacher used "glycerol trimargarate" to mean a glyceryl ester of margaric acid.*

---

glycerol tripalmitate *(noun)*

A triglyceride of palmitic acid.

- *The article explained what "glycerol tripalmitate" means with a simple example.*
- *Understanding "glycerol tripalmitate" helps you talk about this topic clearly.*

---

glycerol tristearate *(noun)*

A triglyceride of stearic acid.

- *She wrote a short paragraph that included "glycerol tristearate."*

- *They discussed "glycerol tristearate" during the group presentation.*

---

glycerole *(noun)*

A medicine made by mixing a substance in glycerin.

- *In class, the teacher used "glycerole" to mean a medicine made by mixing a substance in glycerin.*
- *The article explained what "glycerole" means with a simple example.*

---

glycogenesis *(noun)*

The formation in animals of glycogen from glucose.

- *Understanding "glycogenesis" helps you talk about this topic clearly.*
- *They discussed "glycogenesis" during the group presentation.*

---

glycogenic *(adjective)*

Of or relating to or involving glycogen.

- *Students compared "glycogenic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "glycogenic."*

---

glycollic acid *(noun)*

A translucent crystalline compound found in sugar cane and sugar beets and unripe grapes.

- *The article explained what "glycollic acid" means with a simple example.*
- *They discussed "glycollic acid" during the group presentation.*

---

glyoxaline *(noun)*

An organic base C3H4N2; a histamine inhibitor.

- *He looked up "glyoxaline" because he had never seen it before.*
- *Understanding "glyoxaline" helps you talk about this topic clearly.*

---

glyptic art *(noun)*

Carvings or engravings (especially on precious stones).

- *She wrote a short paragraph that included "glyptic art."*
- *He looked up "glyptic art" because he had never seen it before.*

---

glyptics *(noun)*

The art of engraving on precious stones.

- *The article explained what "glyptics" means with a simple example.*
- *In class, the teacher used "glyptics" to mean the art of engraving on precious stones.*

---

goethean *(adjective)*

Of or relating to or in the manner of Goethe.

- *The speaker chose "goethean" because it captured the feeling precisely.*
- *Would you call this situation "goethean"? Explain why.*

---

goethian *(adjective)*

Of or relating to or in the manner of Goethe.

- *Her writing became clearer after she learned "goethian."*
- *The speaker chose "goethian" because it captured the feeling precisely.*

---

goitrogen *(noun)*

Any substance (such as thiouracil) that induces the formation of a goiter.

- *Understanding "goitrogen" helps you talk about this topic clearly.*
- *He looked up "goitrogen" because he had never seen it before.*

---

goldbrick *(noun)*

A brick-shaped block that looks like gold but is not.

- *The article explained what "goldbrick" means with a simple example.*
- *They discussed "goldbrick" during the group presentation.*

---

golfcart *(noun)*

A small motor vehicle in which golfers can ride between shots.

- *He looked up "golfcart" because he had never seen it before.*
- *She wrote a short paragraph that included "golfcart."*

golliwogg *(noun)*

A grotesque black doll.

- *They discussed "golliwogg" during the group presentation.*
- *He looked up "golliwogg" because he had never seen it before.*

golosh *(noun)*

A waterproof overshoe that protects shoes from water or snow.

- *He looked up "golosh" because he had never seen it before.*
- *In class, the teacher used "golosh" to mean a waterproof overshoe that protects shoes from....*

gonadotrophic *(adjective)*

Of or relating to or involving gonadotropin.

- *Her writing became clearer after she learned "gonadotrophic."*
- *Students compared "gonadotrophic" with similar adjectives in the lesson.*

gondang wax *(noun)*

A hard cream-colored wax obtained from a Javanese fig tree.

- *He looked up "gondang wax" because he had never seen it before.*
- *In class, the teacher used "gondang wax" to mean a hard cream-colored wax obtained from a javanese....*

goofproof *(verb)*

Proof against human misuse or error.

- *He did not know how to use "goofproof" until he saw an example.*
- *She tried to use "goofproof" carefully so everyone would understand.*

gorgerin *(noun)*

The molding at the top of a column.

- *The article explained what "gorgerin" means with a simple example.*
- *In class, the teacher used "gorgerin" to mean the molding at the top of a column.*

gothite *(noun)*

A red or yellow or brown mineral; an oxide of iron that is a common constituent of rust.

- *In class, the teacher used "gothite" to mean a red or yellow or brown mineral; an oxide of iron....*
- *The article explained what "gothite" means with a simple example.*

graecophilic *(adjective)*

Characterized by a love of Greece and Grecian things.

- *Students compared "graecophilic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "graecophilic."*

grammatic *(adjective)*

Of or pertaining to grammar.

- *The grammatic structure of a sentence.*
- *Grammatical rules.*

graniteware *(noun)*

A kind of stone-grey enamelware.

- *She wrote a short paragraph that included "graniteware."*
- *The article explained what "graniteware" means with a simple example.*

granuliferous *(adjective)*

Producing or full of granules.

- *Students compared "granuliferous" with similar adjectives in the lesson.*
- *Would you call this situation "granuliferous"? Explain why.*

---

grapelike *(adjective)*

Resembling the fruit of a grape vine.

- *It is useful to describe something as "grapelike" when it is resembling the fruit of a grape vine.*
- *A "grapelike" approach may work better in this case.*

---

gravitative *(adjective)*

Of or relating to or caused by gravitation.

- *Would you call this situation "gravitative"? Explain why.*
- *It is useful to describe something as "gravitative" when it is of or relating to or caused by gravitation.*

---

greegree *(noun)*

An African amulet.

- *He looked up "greegree" because he had never seen it before.*
- *She wrote a short paragraph that included "greegree."*

---

greengrocery *(noun)*

A greengrocer's grocery store.

- *Understanding "greengrocery" helps you talk about this topic clearly.*
- *They discussed "greengrocery" during the group presentation.*

---

greenockite *(noun)*

Ore of cadmium; a rare yellowish mineral consisting of cadmium sulphide in crystalline form.

- *He looked up "greenockite" because he had never seen it before.*
- *She wrote a short paragraph that included "greenockite."*

---

greensick *(adjective)*

Of or pertaining to or suffering from chlorosis.

- *Her writing became clearer after she learned "greensick."*
- *Students compared "greensick" with similar adjectives in the lesson.*

---

grillroom *(noun)*

A restaurant where food is cooked on a grill.

- *They discussed "grillroom" during the group presentation.*
- *In class, the teacher used "grillroom" to mean a restaurant where food is cooked on a grill.*

---

gripsack *(noun)*

A small suitcase.

- *In class, the teacher used "gripsack" to mean a small suitcase.*
- *He looked up "gripsack" because he had never seen it before.*

---

gritrock *(noun)*

A hard coarse-grained siliceous sandstone.

- *They discussed "gritrock" during the group presentation.*
- *She wrote a short paragraph that included "gritrock."*

---

grogram *(noun)*

A coarse fabric of silk mixed with wool or mohair and often stiffened with gum.

- *She wrote a short paragraph that included "grogram."*
- *Understanding "grogram" helps you talk about this topic clearly.*

---

grummet *(noun)*

Fastener consisting of a metal ring for lining a small hole to permit the attachment of cords or lines.

- *She wrote a short paragraph that included "grummet."*
- *They discussed "grummet" during the group presentation.*

guarnerius *(noun)*

A violin made by a member of the Guarneri family.

- *She wrote a short paragraph that included "guarnerius."*
- *He looked up "guarnerius" because he had never seen it before.*

gueridon *(noun)*

A small round table.

- *The article explained what "gueridon" means with a simple example.*
- *In class, the teacher used "gueridon" to mean a small round table.*

guimpe *(noun)*

A piece of starched cloth covering the shoulders of a nun's habit.

- *They discussed "guimpe" during the group presentation.*
- *Understanding "guimpe" helps you talk about this topic clearly.*

gum accroides *(noun)*

An alcohol-soluble resin from Australian trees; used in varnishes and in manufacturing paper.

- *In class, the teacher used "gum accroides" to mean an alcohol-soluble resin from australian trees;....*
- *He looked up "gum accroides" because he had never seen it before.*

gum albanum *(noun)*

A bitter aromatic gum resin that resembles asafetida.

- *They discussed "gum albanum" during the group presentation.*
- *Understanding "gum albanum" helps you talk about this topic clearly.*

gum dammar *(noun)*

Any of various hard resins from trees of the family Dipterocarpaceae and of the genus Agathis; especially the amboyna pine.

- *The article explained what "gum dammar" means with a simple example.*
- *She wrote a short paragraph that included "gum dammar."*

gum eurphorbium *(noun)*

An acrid brown gum resin now used mainly in veterinary medicine.

- *The article explained what "gum eurphorbium" means with a simple example.*
- *Understanding "gum eurphorbium" helps you talk about this topic clearly.*

gum olibanum *(noun)*

An aromatic gum resin obtained from various Arabian or East African trees; formerly valued for worship and for embalming and fumigation.

- *He looked up "gum olibanum" because he had never seen it before.*
- *They discussed "gum olibanum" during the group presentation.*

gum sangapenum *(noun)*

A variety of gum.

- *He looked up "gum sangapenum" because he had never seen it before.*
- *In class, the teacher used "gum sangapenum" to mean a variety of gum.*

gum terpentine *(noun)*

Obtained from conifers (especially pines).

- *She wrote a short paragraph that included "gum terpentine."*
- *The article explained what "gum terpentine" means with a simple example.*

gummite *(noun)*

A gummy orange mixture of uranium oxides and silicates occurring naturally in the hydration and oxidation of pitchblende.

- *He looked up "gummite" because he had never seen it before.*
- *She wrote a short paragraph that included "gummite."*

gumshield *(noun)*

(especially boxing) equipment that protects an athlete's mouth.

- *Understanding "gumshield" helps you talk about this topic clearly.*
- *They discussed "gumshield" during the group presentation.*

---

gunlock *(noun)*

The action that ignites the charge in a firearm.

- *They discussed "gunlock" during the group presentation.*
- *The article explained what "gunlock" means with a simple example.*

---

gunnysack *(noun)*

A bag made of burlap.

- *She wrote a short paragraph that included "gunnysack."*
- *They discussed "gunnysack" during the group presentation.*

---

gustative *(adjective)*

Of or relating to gustation.

- *Students compared "gustative" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "gustative."*

---

gustatorial *(adjective)*

Of or relating to gustation.

- *A "gustatorial" approach may work better in this case.*
- *Her writing became clearer after she learned "gustatorial."*

---

gymnosophical *(adjective)*

Of or relating to gymnosophy.

- *Her writing became clearer after she learned "gymnosophical."*
- *Students compared "gymnosophical" with similar adjectives in the lesson.*

---

gymnospermous *(adjective)*

Relating to or characteristic of plants of the class Gymnospermae.

- *Would you call this situation "gymnospermous"? Explain why.*
- *The speaker chose "gymnospermous" because it captured the feeling precisely.*

---

gymslip *(noun)*

A sleeveless tunic worn by English girls as part of a school uniform.

- *They discussed "gymslip" during the group presentation.*
- *In class, the teacher used "gymslip" to mean a sleeveless tunic worn by english girls as part of....*

---

gynogenesis *(noun)*

Female parthenogenesis in which the embryo contains only maternal chromosomes due to the failure of the sperm to fuse with the egg nucleus.

- *She wrote a short paragraph that included "gynogenesis."*
- *He looked up "gynogenesis" because he had never seen it before.*

---

gyral *(adjective)*

Relating to or associated with or comprising a convolution of the brain.

- *The gyral sulcus.*
- *The speaker chose "gyral" because it captured the feeling precisely.*

---

gyrostabiliser *(noun)*

A stabilizer consisting of a heavy gyroscope that spins on a vertical axis; reduces side-to-side rolling of a ship or plane.

- *They discussed "gyrostabiliser" during the group presentation.*
- *In class, the teacher used "gyrostabiliser" to mean a stabilizer consisting of a heavy gyroscope that....*

---

gyrostabilizer *(noun)*

A stabilizer consisting of a heavy gyroscope that spins on a vertical axis; reduces side-to-side rolling of a ship or plane.

- *In class, the teacher used "gyrostabilizer" to mean a stabilizer consisting of a heavy gyroscope that....*

- *Understanding "gyrostabilizer" helps you talk about this topic clearly.*

---

habergeon *(noun)*

(Middle Ages) a light sleeveless coat of chain mail worn under the hauberk.

- *The article explained what "habergeon" means with a simple example.*
- *In class, the teacher used "habergeon" to mean (middle ages) a light sleeveless coat of chain mail....*

---

habiliment *(noun)*

A covering designed to be worn on a person's body.

- *The article explained what "habiliment" means with a simple example.*
- *Understanding "habiliment" helps you talk about this topic clearly.*

---

habilitate *(verb)*

Qualify for teaching at a university in Europe.

- *He habilitated after his sabbatical at a prestigious American university.*
- *In everyday English, people use "habilitate" when talking about this idea.*

---

hackbut *(noun)*

An obsolete firearm with a long barrel.

- *In class, the teacher used "hackbut" to mean an obsolete firearm with a long barrel.*
- *They discussed "hackbut" during the group presentation.*

---

haemagglutination *(noun)*

Agglutination of red blood cells.

- *The article explained what "haemagglutination" means with a simple example.*
- *In class, the teacher used "haemagglutination" to mean agglutination of red blood cells.*

---

haematal *(adjective)*

Relating to the blood vessels or blood.

- *Her writing became clearer after she learned "haematal."*
- *A "haematal" approach may work better in this case.*

---

haematic *(adjective)*

Relating to or containing or affecting blood.

- *It is useful to describe something as "haematic" when it is relating to or containing or affecting blood.*
- *A "haematic" approach may work better in this case.*

---

haematinic *(noun)*

A medicine that increases the hemoglobin content of the blood; used to treat iron-deficiency anemia.

- *They discussed "haematinic" during the group presentation.*
- *In class, the teacher used "haematinic" to mean a medicine that increases the hemoglobin content of....*

---

haematochezia *(noun)*

Passage of stools containing blood (as from diverticulosis or colon cancer or peptic ulcer).

- *She wrote a short paragraph that included "haematochezia."*
- *He looked up "haematochezia" because he had never seen it before.*

---

haematogenesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *The article explained what "haematogenesis" means with a simple example.*
- *They discussed "haematogenesis" during the group presentation.*

---

haematogenic *(adjective)*

Pertaining to the formation of blood or blood cells.

- *A "haematogenic" approach may work better in this case.*
- *It is useful to describe something as "haematogenic" when it is pertaining to the formation of blood or blood cells.*

---

haematohiston *(noun)*

A colorless protein obtained by removing heme from hemoglobin; the oxygen carrying compound in red blood cells.

- *He looked up "haematohiston" because he had never seen it before.*
- *They discussed "haematohiston" during the group presentation.*

---

haematoidin *(noun)*

An orange-yellow pigment in the bile that forms as a product of hemoglobin; excess amounts in the blood produce the yellow appearance observed in jaundice.

- *The article explained what "haematoidin" means with a simple example.*
- *They discussed "haematoidin" during the group presentation.*

---

haematolysis *(noun)*

Lysis of erythrocytes with the release of hemoglobin.

- *The article explained what "haematolysis" means with a simple example.*
- *In class, the teacher used "haematolysis" to mean lysis of erythrocytes with the release of hemoglobin.*

---

haematopoiesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *They discussed "haematopoiesis" during the group presentation.*
- *She wrote a short paragraph that included "haematopoiesis."*

---

haemic *(adjective)*

Relating to or containing or affecting blood.

- *The speaker chose "haemic" because it captured the feeling precisely.*
- *A "haemic" approach may work better in this case.*

---

haemitin *(noun)*

A complex red organic pigment containing iron and other atoms to which oxygen binds.

- *She wrote a short paragraph that included "haemitin."*
- *The article explained what "haemitin" means with a simple example.*

---

haemogenesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *In class, the teacher used "haemogenesis" to mean the formation of blood cells in the living body....*
- *He looked up "haemogenesis" because he had never seen it before.*

---

haemolysin *(noun)*

Any substance that can cause lysis (destruction) of erythrocytes (red blood cells) and the release of their hemoglobin.

- *She wrote a short paragraph that included "haemolysin."*
- *Understanding "haemolysin" helps you talk about this topic clearly.*

---

haemophilic *(adjective)*

Relating to or having hemophilia.

- *The speaker chose "haemophilic" because it captured the feeling precisely.*
- *A "haemophilic" approach may work better in this case.*

---

haemopoiesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *Understanding "haemopoiesis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "haemopoiesis."*

---

haemopoietic *(adjective)*

Pertaining to the formation of blood or blood cells.

- *A "haemopoietic" approach may work better in this case.*
- *Students compared "haemopoietic" with similar adjectives in the lesson.*

---

haemoprotein *(noun)*

A conjugated protein linked to a compound of iron and porphyrin.

- *She wrote a short paragraph that included "haemoprotein."*
- *Understanding "haemoprotein" helps you talk about this topic clearly.*

---

haemosiderin *(noun)*

A granular brown substance composed of ferric oxide; left from the breakdown of hemoglobin; can be a sign of disturbed iron metabolism.

- *In class, the teacher used "haemosiderin" to mean a granular brown substance composed of ferric....*
- *He looked up "haemosiderin" because he had never seen it before.*

---

haemostat *(noun)*

A surgical instrument that stops bleeding by clamping the blood vessel.

- *In class, the teacher used "haemostat" to mean a surgical instrument that stops bleeding by....*
- *The article explained what "haemostat" means with a simple example.*

---

hagbut *(noun)*

An obsolete firearm with a long barrel.

- *They discussed "hagbut" during the group presentation.*
- *The article explained what "hagbut" means with a simple example.*

---

hahnium *(noun)*

A transuranic element.

- *Understanding "hahnium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hahnium."*

---

haick *(noun)*

An outer garment consisting of a large piece of white cloth; worn by men and women in northern Africa.

- *Understanding "haick" helps you talk about this topic clearly.*
- *They discussed "haick" during the group presentation.*

---

haircloth *(noun)*

Cloth woven from horsehair or camelhair; used for upholstery or stiffening in garments.

- *He looked up "haircloth" because he had never seen it before.*
- *She wrote a short paragraph that included "haircloth."*

---

halitus *(noun)*

Exhaled breath.

- *In class, the teacher used "halitus" to mean exhaled breath.*
- *He looked up "halitus" because he had never seen it before.*

---

halliard *(noun)*

A rope for raising or lowering a sail or flag.

- *They discussed "halliard" during the group presentation.*
- *In class, the teacher used "halliard" to mean a rope for raising or lowering a sail or flag.*

---

hallstand *(noun)*

A piece of furniture where coats and hats and umbrellas can be hung; usually has a mirror.

- *She wrote a short paragraph that included "hallstand."*
- *He looked up "hallstand" because he had never seen it before.*

---

haloalkane *(noun)*

Organic compound in which halogen atoms have been substituted for hydrogen atoms in an alkane.

- *Understanding "haloalkane" helps you talk about this topic clearly.*
- *In class, the teacher used "haloalkane" to mean organic compound in which halogen atoms have been....*

---

haloform *(noun)*

Compounds with the formula CHX3, where X is a halogen atom.

- *He looked up "haloform" because he had never seen it before.*
- *They discussed "haloform" during the group presentation.*

handbarrow *(noun)*

A rectangular frame with handles at both ends; carried by two people.

- *Understanding "handbarrow" helps you talk about this topic clearly.*
- *He looked up "handbarrow" because he had never seen it before.*

handbow *(noun)*

A bow drawn by hand as distinguished from a crossbow.

- *She wrote a short paragraph that included "handbow."*
- *They discussed "handbow" during the group presentation.*

handcolor *(verb)*

Color by hand.

- *Some old photographs are handcolored.*
- *Learners should practice how to use "handcolor" in real sentences.*

handcolour *(verb)*

Color by hand.

- *In everyday English, people use "handcolour" when talking about this idea.*
- *Learners should practice how to use "handcolour" in real sentences.*

handelian *(adjective)*

Of or relating to or in the manner of George Frederick Handel.

- *Would you call this situation "handelian"? Explain why.*
- *A "handelian" approach may work better in this case.*

handlock *(noun)*

Shackle that consists of a metal loop that can be locked around the wrist; usually used in pairs.

- *Understanding "handlock" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "handlock."*

handrest *(noun)*

A support for the hand.

- *They discussed "handrest" during the group presentation.*
- *Understanding "handrest" helps you talk about this topic clearly.*

handspike *(noun)*

A metal bar (or length of pipe) used as a lever.

- *The article explained what "handspike" means with a simple example.*
- *In class, the teacher used "handspike" to mean a metal bar (or length of pipe) used as a lever.*

handstamp *(noun)*

A stamp (usually made of rubber) for imprinting a mark or design by hand.

- *In class, the teacher used "handstamp" to mean a stamp (usually made of rubber) for imprinting a....*
- *Understanding "handstamp" helps you talk about this topic clearly.*

handwear *(noun)*

Clothing for the hands.

- *Understanding "handwear" helps you talk about this topic clearly.*
- *They discussed "handwear" during the group presentation.*

harquebus *(noun)*

An obsolete firearm with a long barrel.

- *He looked up "harquebus" because he had never seen it before.*
- *They discussed "harquebus" during the group presentation.*

harshen *(verb)*

Make harsh or harsher.

- *Winter harshened the look of the city.*
- *Can you use "harshen" in a sentence that fits this situation?*

---

haschisch *(noun)*

Purified resinous extract of the hemp plant; used as a hallucinogen.

- *In class, the teacher used "haschisch" to mean purified resinous extract of the hemp plant; used....*
- *He looked up "haschisch" because he had never seen it before.*

---

hassium *(noun)*

A radioactive transuranic element.

- *In class, the teacher used "hassium" to mean a radioactive transuranic element.*
- *He looked up "hassium" because he had never seen it before.*

---

hatchel *(noun)*

A comb for separating flax fibers.

- *The article explained what "hatchel" means with a simple example.*
- *In class, the teacher used "hatchel" to mean a comb for separating flax fibers.*

---

hausmannite *(noun)*

A mineral consisting of manganese tetroxide; a source of manganese.

- *They discussed "hausmannite" during the group presentation.*
- *He looked up "hausmannite" because he had never seen it before.*

---

hautboy *(noun)*

A slender double-reed instrument; a woodwind with a conical bore and a double-reed mouthpiece.

- *Understanding "hautboy" helps you talk about this topic clearly.*
- *He looked up "hautboy" because he had never seen it before.*

---

hawsehole *(noun)*

The hole that an anchor rope passes through.

- *In class, the teacher used "hawsehole" to mean the hole that an anchor rope passes through.*
- *Understanding "hawsehole" helps you talk about this topic clearly.*

---

hawsepipe *(noun)*

The hole that an anchor rope passes through.

- *In class, the teacher used "hawsepipe" to mean the hole that an anchor rope passes through.*
- *The article explained what "hawsepipe" means with a simple example.*

---

hayrack *(noun)*

A rack that holds hay for feeding livestock.

- *She wrote a short paragraph that included "hayrack."*
- *They discussed "hayrack" during the group presentation.*

---

hayrig *(noun)*

A frame attached to a wagon to increase the amount of hay it can carry.

- *Understanding "hayrig" helps you talk about this topic clearly.*
- *He looked up "hayrig" because he had never seen it before.*

---

headfast *(noun)*

A mooring line that secures the bow of a boat or ship to a wharf.

- *He looked up "headfast" because he had never seen it before.*
- *In class, the teacher used "headfast" to mean a mooring line that secures the bow of a boat or....*

---

headpin *(noun)*

The front bowling pin in the triangular arrangement of ten pins.

- *The article explained what "headpin" means with a simple example.*

- *In class, the teacher used "headpin" to mean the front bowling pin in the triangular arrangement....*

---

headrace *(noun)*

A waterway that feeds water to a mill or water wheel or turbine.

- *The article explained what "headrace" means with a simple example.*
- *Understanding "headrace" helps you talk about this topic clearly.*

---

hearthrug *(noun)*

A rug spread out in front of a fireplace.

- *He looked up "hearthrug" because he had never seen it before.*
- *She wrote a short paragraph that included "hearthrug."*

---

heathlike *(adjective)*

Resembling heath.

- *Her writing became clearer after she learned "heathlike."*
- *Students compared "heathlike" with similar adjectives in the lesson.*

---

heaume *(noun)*

A large medieval helmet supported on the shoulders.

- *They discussed "heaume" during the group presentation.*
- *She wrote a short paragraph that included "heaume."*

---

hebraical *(adjective)*

Of or relating to the language of the Hebrews.

- *A "hebraical" approach may work better in this case.*
- *It is useful to describe something as "hebraical" when it is of or relating to the language of the hebrews.*

---

heckelphone *(noun)*

An oboe pitched an octave below the ordinary oboe.

- *In class, the teacher used "heckelphone" to mean an oboe pitched an octave below the ordinary oboe.*
- *They discussed "heckelphone" during the group presentation.*

---

heliac *(adjective)*

Pertaining to or near the sun; especially the first rising of a star after and last setting before its invisibility owing to its conjunction with the sun.

- *The heliacal rising of the Dog Star.*
- *The heliacal or Sothic year is determined by the heliacal rising of Sothis (the Egyptian name for the Dog Star).*

---

heliogravure *(noun)*

An intaglio print produced by gravure.

- *The article explained what "heliogravure" means with a simple example.*
- *Understanding "heliogravure" helps you talk about this topic clearly.*

---

heliometer *(noun)*

An instrument used to measure the angular separation of two stars that are too far apart to be included in the field of view of an ordinary telescope.

- *Understanding "heliometer" helps you talk about this topic clearly.*
- *In class, the teacher used "heliometer" to mean an instrument used to measure the angular....*

---

heliotype *(noun)*

Duplicator consisting of a gelatin plate from which ink can be taken to make a copy.

- *She wrote a short paragraph that included "heliotype."*
- *They discussed "heliotype" during the group presentation.*

---

hellenistical *(adjective)*

Relating to or characteristic of the classical Greek civilization.

- *The speaker chose "hellenistical" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "hellenistical."*

---

hematal *(adjective)*

Relating to the blood vessels or blood.

- *It is useful to describe something as "hematal" when it is relating to the blood vessels or blood.*
- *Students compared "hematal" with similar adjectives in the lesson.*

---

hematic *(adjective)*

Relating to or containing or affecting blood.

- *A hematic cyst.*
- *A hematic crisis.*

---

hematin *(noun)*

A complex red organic pigment containing iron and other atoms to which oxygen binds.

- *He looked up "hematin" because he had never seen it before.*
- *In class, the teacher used "hematin" to mean a complex red organic pigment containing iron and....*

---

hematinic *(noun)*

A medicine that increases the hemoglobin content of the blood; used to treat iron-deficiency anemia.

- *He looked up "hematinic" because he had never seen it before.*
- *They discussed "hematinic" during the group presentation.*

---

hematochezia *(noun)*

Passage of stools containing blood (as from diverticulosis or colon cancer or peptic ulcer).

- *In class, the teacher used "hematochezia" to mean passage of stools containing blood (as from....*
- *The article explained what "hematochezia" means with a simple example.*

---

hematochrome *(noun)*

A reddish coloring material found in some algae.

- *He looked up "hematochrome" because he had never seen it before.*
- *They discussed "hematochrome" during the group presentation.*

---

hematogenesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *Understanding "hematogenesis" helps you talk about this topic clearly.*
- *The article explained what "hematogenesis" means with a simple example.*

---

hematogenic *(adjective)*

Pertaining to the formation of blood or blood cells.

- *Students compared "hematogenic" with similar adjectives in the lesson.*
- *A "hematogenic" approach may work better in this case.*

---

hematohiston *(noun)*

A colorless protein obtained by removing heme from hemoglobin; the oxygen carrying compound in red blood cells.

- *The article explained what "hematohiston" means with a simple example.*
- *In class, the teacher used "hematohiston" to mean a colorless protein obtained by removing heme from....*

---

hematoidin *(noun)*

An orange-yellow pigment in the bile that forms as a product of hemoglobin; excess amounts in the blood produce the yellow appearance observed in jaundice.

- *Understanding "hematoidin" helps you talk about this topic clearly.*
- *The article explained what "hematoidin" means with a simple example.*

---

hematolysis *(noun)*

Lysis of erythrocytes with the release of hemoglobin.

- *Understanding "hematolysis" helps you talk about this topic clearly.*
- *They discussed "hematolysis" during the group presentation.*

---

hemic *(adjective)*

Relating to or containing or affecting blood.

- *Would you call this situation "hemic"? Explain why.*
- *The speaker chose "hemic" because it captured the feeling precisely.*

---

hemimetabolism *(noun)*

Incomplete or partial metamorphosis in insects.

- *In class, the teacher used "hemimetabolism" to mean incomplete or partial metamorphosis in insects.*
- *They discussed "hemimetabolism" during the group presentation.*

---

hemimetaboly *(noun)*

Incomplete or partial metamorphosis in insects.

- *Understanding "hemimetaboly" helps you talk about this topic clearly.*
- *In class, the teacher used "hemimetaboly" to mean incomplete or partial metamorphosis in insects.*

---

hemimetamorphosis *(noun)*

Incomplete or partial metamorphosis in insects.

- *Understanding "hemimetamorphosis" helps you talk about this topic clearly.*
- *The article explained what "hemimetamorphosis" means with a simple example.*

---

hemimorphite *(noun)*

A white mineral; a common ore of zinc.

- *She wrote a short paragraph that included "hemimorphite."*
- *Understanding "hemimorphite" helps you talk about this topic clearly.*

---

hemingwayesque *(adjective)*

In the manner of Ernest Hemingway.

- *Students compared "hemingwayesque" with similar adjectives in the lesson.*
- *A "hemingwayesque" approach may work better in this case.*

---

hemiparasitic *(adjective)*

Of or relating to plants that are hemiparasites.

- *A "hemiparasitic" approach may work better in this case.*
- *Her writing became clearer after she learned "hemiparasitic."*

---

hemodialyzer *(noun)*

A machine that uses dialysis to remove impurities and waste products from the bloodstream before returning the blood to the patient's body.

- *The article explained what "hemodialyzer" means with a simple example.*
- *Understanding "hemodialyzer" helps you talk about this topic clearly.*

---

hemofil *(noun)*

A coagulation factor (trade name Hemofil) whose absence is associated with hemophilia A.

- *Understanding "hemofil" helps you talk about this topic clearly.*
- *In class, the teacher used "hemofil" to mean a coagulation factor (trade name hemofil) whose....*

---

hemogenesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *They discussed "hemogenesis" during the group presentation.*
- *The article explained what "hemogenesis" means with a simple example.*

---

hemophilic *(adjective)*

Relating to or having hemophilia.

- *Would you call this situation "hemophilic"? Explain why.*
- *The speaker chose "hemophilic" because it captured the feeling precisely.*

---

hemopoiesis *(noun)*

The formation of blood cells in the living body (especially in the bone marrow).

- *She wrote a short paragraph that included "hemopoiesis."*
- *They discussed "hemopoiesis" during the group presentation.*

hemoprotein *(noun)*

A conjugated protein linked to a compound of iron and porphyrin.

- *In class, the teacher used "hemoprotein" to mean a conjugated protein linked to a compound of iron....*
- *The article explained what "hemoprotein" means with a simple example.*

hemstitch *(noun)*

A stitch in which parallel threads are drawn and exposed threads are caught together in groups.

- *The article explained what "hemstitch" means with a simple example.*
- *In class, the teacher used "hemstitch" to mean a stitch in which parallel threads are drawn and....*

hemstitching *(noun)*

A stitch in which parallel threads are drawn and exposed threads are caught together in groups.

- *The article explained what "hemstitching" means with a simple example.*
- *She wrote a short paragraph that included "hemstitching."*

hencoop *(noun)*

A farm building for housing poultry.

- *He looked up "hencoop" because he had never seen it before.*
- *She wrote a short paragraph that included "hencoop."*

henroost *(noun)*

A roost for hens at night.

- *In class, the teacher used "henroost" to mean a roost for hens at night.*
- *He looked up "henroost" because he had never seen it before.*

hepatoflavin *(noun)*

A B vitamin that prevents skin lesions and weight loss.

- *The article explained what "hepatoflavin" means with a simple example.*
- *In class, the teacher used "hepatoflavin" to mean a b vitamin that prevents skin lesions and weight loss.*

hepatotoxin *(noun)*

Any toxin that affects the liver.

- *The article explained what "hepatotoxin" means with a simple example.*
- *Understanding "hepatotoxin" helps you talk about this topic clearly.*

heptadecanoic acid *(noun)*

A colorless crystalline synthetic fatty acid.

- *The article explained what "heptadecanoic acid" means with a simple example.*
- *They discussed "heptadecanoic acid" during the group presentation.*

heraldist *(adjective)*

Of or relating to heraldry.

- *It is useful to describe something as "heraldist" when it is of or relating to heraldry.*
- *Would you call this situation "heraldist"? Explain why.*

herschelian telescope *(noun)*

A reflecting telescope with the mirror slightly tilted to throw the image to the side where it can be viewed.

- *In class, the teacher used "herschelian telescope" to mean a reflecting telescope with the mirror slightly....*
- *The article explained what "herschelian telescope" means with a simple example.*

hessonite *(noun)*

A garnet ranging in color from yellow to brown.

- *In class, the teacher used "hessonite" to mean a garnet ranging in color from yellow to brown.*
- *They discussed "hessonite" during the group presentation.*

heterogenesis *(noun)*

The alternation of two or more different forms in the life cycle of a plant or animal.

- *They discussed "heterogenesis" during the group presentation.*
- *Understanding "heterogenesis" helps you talk about this topic clearly.*

---

heterometabolism *(noun)*

Development of insects with incomplete metamorphosis in which no pupal stage precedes maturity.

- *In class, the teacher used "heterometabolism" to mean development of insects with incomplete....*
- *The article explained what "heterometabolism" means with a simple example.*

---

heterometaboly *(noun)*

Development of insects with incomplete metamorphosis in which no pupal stage precedes maturity.

- *Understanding "heterometaboly" helps you talk about this topic clearly.*
- *The article explained what "heterometaboly" means with a simple example.*

---

heterophil antibody *(noun)*

An antibody found in the blood of someone suffering from infectious mononucleosis.

- *He looked up "heterophil antibody" because he had never seen it before.*
- *They discussed "heterophil antibody" during the group presentation.*

---

heterophile antibody *(noun)*

An antibody found in the blood of someone suffering from infectious mononucleosis.

- *The article explained what "heterophile antibody" means with a simple example.*
- *She wrote a short paragraph that included "heterophile antibody."*

---

heterosporous *(adjective)*

Characterized by heterospory.

- *Would you call this situation "heterosporous"? Explain why.*
- *A "heterosporous" approach may work better in this case.*

---

heterospory *(noun)*

The development of both microspores and megaspores.

- *Understanding "heterospory" helps you talk about this topic clearly.*
- *In class, the teacher used "heterospory" to mean the development of both microspores and megaspores.*

---

heulandite *(noun)*

A group of minerals of the zeolite family consisting of a hydrous aluminum silicate of sodium and calcium.

- *The article explained what "heulandite" means with a simple example.*
- *In class, the teacher used "heulandite" to mean a group of minerals of the zeolite family....*

---

hexachlorophene *(noun)*

Antibacterial substance that is a water-soluble powder used in antiseptic soaps and toothpaste.

- *She wrote a short paragraph that included "hexachlorophene."*
- *The article explained what "hexachlorophene" means with a simple example.*

---

hexacosanoic acid *(noun)*

A white solid fatty acid found in waxes (such as beeswax).

- *He looked up "hexacosanoic acid" because he had never seen it before.*
- *In class, the teacher used "hexacosanoic acid" to mean a white solid fatty acid found in waxes (such as....*

---

hexadecanoic acid *(noun)*

A saturated fatty acid that is the major fat in meat and dairy products.

- *The article explained what "hexadecanoic acid" means with a simple example.*
- *She wrote a short paragraph that included "hexadecanoic acid."*

---

hexadrol *(noun)*

A corticosteroid drug (trade names Decadron or Dexamethasone Intensol or Dexone or Hexadrol or Oradexon) used to treat allergies or inflammation.

- *The article explained what "hexadrol" means with a simple example.*

- *They discussed "hexadrol" during the group presentation.*

---

hexanedioic acid *(noun)*

A carboxylic acid used in the manufacture of nylon.

- *Understanding "hexanedioic acid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hexanedioic acid."*

---

hexangular *(adjective)*

Having six sides or divided into hexagons.

- *The speaker chose "hexangular" because it captured the feeling precisely.*
- *It is useful to describe something as "hexangular" when it is having six sides or divided into hexagons.*

---

hexanoic acid *(noun)*

A fatty acid found in animal oils and fats or made synthetically; smells like goats.

- *Understanding "hexanoic acid" helps you talk about this topic clearly.*
- *In class, the teacher used "hexanoic acid" to mean a fatty acid found in animal oils and fats or made....*

---

hexestrol *(noun)*

Estrogen compound used to treat menstrual irregularities and menopausal symptoms and to prevent pregnancy.

- *In class, the teacher used "hexestrol" to mean estrogen compound used to treat menstrual....*
- *Understanding "hexestrol" helps you talk about this topic clearly.*

---

hiddenite *(noun)*

A green transparent form of the mineral spodumene used as a gemstone.

- *In class, the teacher used "hiddenite" to mean a green transparent form of the mineral spodumene....*
- *He looked up "hiddenite" because he had never seen it before.*

---

hidrosis *(noun)*

The process of the sweat glands of the skin secreting a salty fluid.

- *They discussed "hidrosis" during the group presentation.*
- *She wrote a short paragraph that included "hidrosis."*

---

hidrotic *(adjective)*

Of or relating to sweat.

- *Would you call this situation "hidrotic"? Explain why.*
- *Students compared "hidrotic" with similar adjectives in the lesson.*

---

hieratical *(adjective)*

Associated with the priesthood or priests.

- *Would you call this situation "hieratical"? Explain why.*
- *Her writing became clearer after she learned "hieratical."*

---

hieroglyphical *(adjective)*

Written in or belonging to a writing system using pictorial symbols.

- *Students compared "hieroglyphical" with similar adjectives in the lesson.*
- *It is useful to describe something as "hieroglyphical" when it is written in or belonging to a writing system using....*

---

highboard *(noun)*

A high diving board.

- *In class, the teacher used "highboard" to mean a high diving board.*
- *The article explained what "highboard" means with a simple example.*

---

hipflask *(noun)*

A flask that holds spirits.

- *He looked up "hipflask" because he had never seen it before.*
- *She wrote a short paragraph that included "hipflask."*

---

hiplength *(adjective)*

Extending to or just over the hips.

- *A hiplength jacket.*
- *The speaker chose "hiplength" because it captured the feeling precisely.*

---

hircine *(adjective)*

Of or pertaining to or suggestive of a goat (especially in strong odor).

- *It is useful to describe something as "hircine" when it is of or pertaining to or suggestive of a goat....*
- *A "hircine" approach may work better in this case.*

---

hispaniolan *(adjective)*

Of or relating to the West Indian island of Hispaniola.

- *Students compared "hispaniolan" with similar adjectives in the lesson.*
- *Would you call this situation "hispaniolan"? Explain why.*

---

histaminase *(noun)*

Enzyme that acts as a catalyst in converting histidine to histamine.

- *He looked up "histaminase" because he had never seen it before.*
- *Understanding "histaminase" helps you talk about this topic clearly.*

---

hitchrack *(noun)*

A fixed horizontal rail to which a horse can be hitched to prevent it from straying.

- *The article explained what "hitchrack" means with a simple example.*
- *They discussed "hitchrack" during the group presentation.*

---

hodometer *(noun)*

A meter that shows mileage traversed.

- *She wrote a short paragraph that included "hodometer."*
- *The article explained what "hodometer" means with a simple example.*

---

hodoscope *(noun)*

(physics) scientific instrument that traces the path of a charged particle.

- *He looked up "hodoscope" because he had never seen it before.*
- *Understanding "hodoscope" helps you talk about this topic clearly.*

---

holloware *(noun)*

Silverware serving dishes.

- *She wrote a short paragraph that included "holloware."*
- *He looked up "holloware" because he had never seen it before.*

---

hollowware *(noun)*

Silverware serving dishes.

- *In class, the teacher used "hollowware" to mean silverware serving dishes.*
- *He looked up "hollowware" because he had never seen it before.*

---

holographical *(adjective)*

Written entirely in one's own hand.

- *A "holographical" approach may work better in this case.*
- *It is useful to describe something as "holographical" when it is written entirely in one's own hand.*

---

holometabolism *(noun)*

Complete metamorphosis in insects.

- *The article explained what "holometabolism" means with a simple example.*
- *Understanding "holometabolism" helps you talk about this topic clearly.*

---

holometaboly *(noun)*

Complete metamorphosis in insects.

- *They discussed "holometaboly" during the group presentation.*
- *The article explained what "holometaboly" means with a simple example.*

---

homogentisic acid *(noun)*

An acid formed as an intermediate product of the metabolism of tyrosine and phenylalanine.

- *In class, the teacher used "homogentisic acid" to mean an acid formed as an intermediate product of the....*
- *He looked up "homogentisic acid" because he had never seen it before.*

---

homologise *(verb)*

Make homologous.

- *The coach explained when to use "homologise" and when to wait.*
- *Can you use "homologise" in a sentence that fits this situation?*

---

homolosine projection *(noun)*

An equal-area projection map of the globe; oceans are distorted in order to minimize the distortion of the continents.

- *In class, the teacher used "homolosine projection" to mean an equal-area projection map of the globe; oceans....*
- *He looked up "homolosine projection" because he had never seen it before.*

---

homonymic *(adjective)*

Of or related to or being homonyms.

- *Her writing became clearer after she learned "homonymic."*
- *A "homonymic" approach may work better in this case.*

---

homosporous *(adjective)*

Characterized by homospory.

- *It is useful to describe something as "homosporous" when it is characterized by homospory.*
- *Would you call this situation "homosporous"? Explain why.*

---

homospory *(noun)*

The development of a single kind of asexual spores.

- *In class, the teacher used "homospory" to mean the development of a single kind of asexual spores.*
- *They discussed "homospory" during the group presentation.*

---

homostyled *(adjective)*

(botany) having styles all of the same length.

- *Students compared "homostyled" with similar adjectives in the lesson.*
- *A "homostyled" approach may work better in this case.*

---

homostylic *(adjective)*

(botany) having styles all of the same length.

- *Her writing became clearer after she learned "homostylic."*
- *A "homostylic" approach may work better in this case.*

---

homostylous *(adjective)*

(botany) having styles all of the same length.

- *Would you call this situation "homostylous"? Explain why.*
- *The speaker chose "homostylous" because it captured the feeling precisely.*

---

hoodmold *(noun)*

A protective drip that is made of stone.

- *Understanding "hoodmold" helps you talk about this topic clearly.*
- *He looked up "hoodmold" because he had never seen it before.*

---

hoodmould *(noun)*

A protective drip that is made of stone.

- *They discussed "hoodmould" during the group presentation.*
- *He looked up "hoodmould" because he had never seen it before.*

hooflike *(adjective)*

Resembling a hoof; especially having the horny texture of a hoof.

- *Hooflike calluses.*
- *The speaker chose "hooflike" because it captured the feeling precisely.*

hoopskirt *(noun)*

A skirt stiffened with hoops.

- *They discussed "hoopskirt" during the group presentation.*
- *The article explained what "hoopskirt" means with a simple example.*

hoosgow *(noun)*

Slang for a jail.

- *In class, the teacher used "hoosgow" to mean slang for a jail.*
- *The article explained what "hoosgow" means with a simple example.*

hopsack *(noun)*

A loosely woven coarse fabric of cotton or linen; used in clothing.

- *She wrote a short paragraph that included "hopsack."*
- *He looked up "hopsack" because he had never seen it before.*

hopsacking *(noun)*

A loosely woven coarse fabric of cotton or linen; used in clothing.

- *She wrote a short paragraph that included "hopsacking."*
- *He looked up "hopsacking" because he had never seen it before.*

hornstone *(noun)*

A fine-grained metamorphic rock formed by the action of heat on clay rocks.

- *Understanding "hornstone" helps you talk about this topic clearly.*
- *They discussed "hornstone" during the group presentation.*

horologe *(noun)*

A measuring instrument or device for keeping time.

- *They discussed "horologe" during the group presentation.*
- *In class, the teacher used "horologe" to mean a measuring instrument or device for keeping time.*

horsecar *(noun)*

An early form of streetcar that was drawn by horses.

- *The article explained what "horsecar" means with a simple example.*
- *They discussed "horsecar" during the group presentation.*

horsecloth *(noun)*

A cloth for the trapping of a horse.

- *The article explained what "horsecloth" means with a simple example.*
- *Understanding "horsecloth" helps you talk about this topic clearly.*

houdah *(noun)*

A (usually canopied) seat for riding on the back of a camel or elephant.

- *The article explained what "houdah" means with a simple example.*
- *Understanding "houdah" helps you talk about this topic clearly.*

houselights *(noun)*

Lights that illuminate the audience's part of a theater or other auditorium.

- *They discussed "houselights" during the group presentation.*
- *She wrote a short paragraph that included "houselights."*

housepaint *(noun)*

Paint used to cover the exterior woodwork of a house.

- *Understanding "housepaint" helps you talk about this topic clearly.*
- *The article explained what "housepaint" means with a simple example.*

---

hubbly-bubbly *(noun)*

An oriental tobacco pipe with a long flexible tube connected to a container where the smoke is cooled by passing through water.

- *They discussed "hubbly-bubbly" during the group presentation.*
- *He looked up "hubbly-bubbly" because he had never seen it before.*

---

huckaback *(noun)*

Toweling consisting of coarse absorbent cotton or linen fabric.

- *She wrote a short paragraph that included "huckaback."*
- *He looked up "huckaback" because he had never seen it before.*

---

hugoesque *(adjective)*

In the manner of Victor Hugo.

- *Students compared "hugoesque" with similar adjectives in the lesson.*
- *It is useful to describe something as "hugoesque" when it is in the manner of victor hugo.*

---

humified *(adjective)*

Converted to humus.

- *Humified soil.*
- *The speaker chose "humified" because it captured the feeling precisely.*

---

humify *(verb)*

Convert (plant remains) into humus.

- *The coach explained when to use "humify" and when to wait.*
- *Can you use "humify" in a sentence that fits this situation?*

---

hutment *(noun)*

An encampment of huts (chiefly military).

- *They discussed "hutment" during the group presentation.*
- *In class, the teacher used "hutment" to mean an encampment of huts (chiefly military).*

---

huxleian *(adjective)*

Of or relating to Thomas Huxley.

- *Students compared "huxleian" with similar adjectives in the lesson.*
- *It is useful to describe something as "huxleian" when it is of or relating to thomas huxley.*

---

huxleyan *(adjective)*

Of or relating to Thomas Huxley.

- *Would you call this situation "huxleyan"? Explain why.*
- *The speaker chose "huxleyan" because it captured the feeling precisely.*

---

hyalin *(noun)*

A glassy translucent substance that occurs in hyaline cartilage or in certain skin conditions.

- *The article explained what "hyalin" means with a simple example.*
- *They discussed "hyalin" during the group presentation.*

---

hyaloplasmic *(adjective)*

Of or relating to hyaloplasm.

- *Would you call this situation "hyaloplasmic"? Explain why.*
- *Her writing became clearer after she learned "hyaloplasmic."*

---

hyazyme *(noun)*

An enzyme (trade name Hyazyme) that splits hyaluronic acid and so lowers its viscosity and increases the permeability of connective tissue and the absorption of fluids.

- *She wrote a short paragraph that included "hyazyme."*

- *He looked up "hyazyme" because he had never seen it before.*

hydrargyrum *(noun)*

A heavy silvery toxic univalent and bivalent metallic element; the only metal that is liquid at ordinary temperatures.

- *Understanding "hydrargyrum" helps you talk about this topic clearly.*
- *He looked up "hydrargyrum" because he had never seen it before.*

hydrazo group *(noun)*

The bivalent group -HNNH- derived from hydrazine.

- *Understanding "hydrazo group" helps you talk about this topic clearly.*
- *The article explained what "hydrazo group" means with a simple example.*

hydrazo radical *(noun)*

The bivalent group -HNNH- derived from hydrazine.

- *The article explained what "hydrazo radical" means with a simple example.*
- *In class, the teacher used "hydrazo radical" to mean the bivalent group -hnnh- derived from hydrazine.*

hydrazoic acid *(noun)*

A colorless explosive liquid that is volatile and poisonous and foul-smelling.

- *Understanding "hydrazoic acid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hydrazoic acid."*

hydrazoite *(noun)*

A salt of hydrazoic acid.

- *They discussed "hydrazoite" during the group presentation.*
- *He looked up "hydrazoite" because he had never seen it before.*

hydriodic acid *(noun)*

(HI) a colorless or yellow aqueous solution of hydrogen iodide.

- *Hydriodic acid is a strong acid.*
- *In class, the teacher used "hydriodic acid" to mean (hi) a colorless or yellow aqueous solution of....*

hydrocephalic *(adjective)*

Relating to or characterized by or evidencing hydrocephalus.

- *Her writing became clearer after she learned "hydrocephalic."*
- *Students compared "hydrocephalic" with similar adjectives in the lesson.*

hydrocortone *(noun)*

An adrenal-cortex hormone (trade names Hydrocortone or Cortef) that is active in carbohydrate and protein metabolism.

- *He looked up "hydrocortone" because he had never seen it before.*
- *In class, the teacher used "hydrocortone" to mean an adrenal-cortex hormone (trade names hydrocortone....*

hydroflumethiazide *(noun)*

Diuretic used to treat hypertension and edema.

- *They discussed "hydroflumethiazide" during the group presentation.*
- *Understanding "hydroflumethiazide" helps you talk about this topic clearly.*

hydrofluosilicic acid *(noun)*

An unstable poisonous corrosive acid known primarily in the form of its salts.

- *The article explained what "hydrofluosilicic acid" means with a simple example.*
- *She wrote a short paragraph that included "hydrofluosilicic acid."*

hydrogenate *(verb)*

Combine or treat with or expose to hydrogen; add hydrogen to the molecule of (an unsaturated organic compound).

- *She tried to use "hydrogenate" carefully so everyone would understand.*
- *In everyday English, people use "hydrogenate" when talking about this idea.*

hydroiodic acid *(noun)*

An acid formed by aqueous solution of hydrogen iodide.

- *The article explained what "hydroiodic acid" means with a simple example.*
- *Understanding "hydroiodic acid" helps you talk about this topic clearly.*

---

hydrolise *(verb)*

Make a compound react with water and undergo hydrolysis.

- *Can you use "hydrolise" in a sentence that fits this situation?*
- *He did not know how to use "hydrolise" until he saw an example.*

---

hydrolith *(noun)*

A saltlike binary compound (CaH2) used as a reducing agent and source of hydrogen.

- *They discussed "hydrolith" during the group presentation.*
- *In class, the teacher used "hydrolith" to mean a saltlike binary compound (cah2) used as a....*

---

hydrolize *(verb)*

Make a compound react with water and undergo hydrolysis.

- *She tried to use "hydrolize" carefully so everyone would understand.*
- *Can you use "hydrolize" in a sentence that fits this situation?*

---

hydroxyacetic acid *(noun)*

A translucent crystalline compound found in sugar cane and sugar beets and unripe grapes.

- *They discussed "hydroxyacetic acid" during the group presentation.*
- *He looked up "hydroxyacetic acid" because he had never seen it before.*

---

hydroxybenzene *(noun)*

A toxic white soluble crystalline acidic derivative of benzene; used in manufacturing and as a disinfectant and antiseptic; poisonous if taken internally.

- *He looked up "hydroxybenzene" because he had never seen it before.*
- *Understanding "hydroxybenzene" helps you talk about this topic clearly.*

---

hygrodeik *(noun)*

A wet and dry bulb hygrometer.

- *In class, the teacher used "hygrodeik" to mean a wet and dry bulb hygrometer.*
- *The article explained what "hygrodeik" means with a simple example.*

---

hygroscope *(noun)*

Hygrometer that shows variations in the relative humidity of the atmosphere.

- *They discussed "hygroscope" during the group presentation.*
- *He looked up "hygroscope" because he had never seen it before.*

---

hymenal *(adjective)*

Of or relating to the hymen.

- *It is useful to describe something as "hymenal" when it is of or relating to the hymen.*
- *Would you call this situation "hymenal"? Explain why.*

---

hymenopterous *(adjective)*

Of or relating to insects of the order Hymenoptera.

- *Would you call this situation "hymenopterous"? Explain why.*
- *A "hymenopterous" approach may work better in this case.*

---

hypercoaster *(noun)*

A roller coaster that goes up 200 feet or higher and can catapult riders from 0 to 70 mph in 4 seconds by motors originally designed to launch rockets.

- *The article explained what "hypercoaster" means with a simple example.*
- *They discussed "hypercoaster" during the group presentation.*

---

hyperidrosis *(noun)*

Excessive and profuse perspiration.

- *The article explained what "hyperidrosis" means with a simple example.*
- *She wrote a short paragraph that included "hyperidrosis."*

---

hypermenorrhea *(noun)*

Abnormally heavy or prolonged menstruation; can be a symptom of uterine tumors and can lead to anemia if prolonged.

- *She wrote a short paragraph that included "hypermenorrhea."*
- *He looked up "hypermenorrhea" because he had never seen it before.*

---

hyperthermal *(adjective)*

Of or relating to or affected by hyperthermia.

- *A "hyperthermal" approach may work better in this case.*
- *Students compared "hyperthermal" with similar adjectives in the lesson.*

---

hypnagogue *(noun)*

An agent that induces drowsiness or sleep.

- *They discussed "hypnagogue" during the group presentation.*
- *She wrote a short paragraph that included "hypnagogue."*

---

hypodermal *(adjective)*

Of or relating to the hypodermis.

- *The speaker chose "hypodermal" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "hypodermal."*

---

hyponitrous acid *(noun)*

An explosive white crystalline weak acid (H2N2O2).

- *She wrote a short paragraph that included "hyponitrous acid."*
- *They discussed "hyponitrous acid" during the group presentation.*

---

hypophosphoric acid *(noun)*

A crystalline tetrabasic acid (H4P2O6).

- *In class, the teacher used "hypophosphoric acid" to mean a crystalline tetrabasic acid (h4p2o6).*
- *They discussed "hypophosphoric acid" during the group presentation.*

---

hypophosphorous acid *(noun)*

A clear or yellow monobasic acid (H3PO2).

- *She wrote a short paragraph that included "hypophosphorous acid."*
- *The article explained what "hypophosphorous acid" means with a simple example.*

---

hypophyseal *(adjective)*

Of or relating to the hypophysis.

- *It is useful to describe something as "hypophyseal" when it is of or relating to the hypophysis.*
- *The speaker chose "hypophyseal" because it captured the feeling precisely.*

---

hypophysectomise *(verb)*

Remove the pituitary glands.

- *He did not know how to use "hypophysectomise" until he saw an example.*
- *She tried to use "hypophysectomise" carefully so everyone would understand.*

---

hypophysectomize *(verb)*

Remove the pituitary glands.

- *Learners should practice how to use "hypophysectomize" in real sentences.*
- *In everyday English, people use "hypophysectomize" when talking about this idea.*

---

hypophysial *(adjective)*

Of or relating to the hypophysis.

- *Students compared "hypophysial" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "hypophysial."*

hypovolaemic *(adjective)*

Of or relating to a decrease in the volume of circulating blood.

- *It is useful to describe something as "hypovolaemic" when it is of or relating to a decrease in the volume of....*
- *The speaker chose "hypovolaemic" because it captured the feeling precisely.*

hypsometer *(noun)*

An altimeter that uses the boiling point of water to determine land elevation.

- *In class, the teacher used "hypsometer" to mean an altimeter that uses the boiling point of water....*
- *The article explained what "hypsometer" means with a simple example.*

hysterosalpingogram *(noun)*

X ray of the uterus and Fallopian tubes; usually done in diagnosing infertility (to see if there any blockages).

- *Understanding "hysterosalpingogram" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hysterosalpingogram."*

ibsenian *(adjective)*

Of or relating to or in the manner of the playwright Henrik Ibsen.

- *Her writing became clearer after she learned "ibsenian."*
- *Would you call this situation "ibsenian"? Explain why.*

iceboat *(noun)*

A ship with a reinforced bow to break up ice and keep channels open for navigation.

- *She wrote a short paragraph that included "iceboat."*
- *The article explained what "iceboat" means with a simple example.*

icetray *(noun)*

A tray for making cubes of ice in a refrigerator.

- *The article explained what "icetray" means with a simple example.*
- *Understanding "icetray" helps you talk about this topic clearly.*

ichorous *(adjective)*

Of or resembling or characterized by ichor or sanies.

- *An ichorous discharge.*
- *It is useful to describe something as "ichorous" when it is of or resembling or characterized by ichor or sanies.*

icsh *(noun)*

A gonadotropic hormone that is secreted by the anterior pituitary; stimulates ovulation in female mammals and stimulates androgen release in male mammals.

- *The article explained what "icsh" means with a simple example.*
- *Understanding "icsh" helps you talk about this topic clearly.*

icterogenic *(adjective)*

Producing jaundice.

- *It is useful to describe something as "icterogenic" when it is producing jaundice.*
- *The speaker chose "icterogenic" because it captured the feeling precisely.*

ictic *(adjective)*

Of or relating to a seizure or convulsion.

- *Would you call this situation "ictic"? Explain why.*
- *Students compared "ictic" with similar adjectives in the lesson.*

idiomatical *(adjective)*

Of or relating to or conforming to idiom.

- *It is useful to describe something as "idiomatical" when it is of or relating to or conforming to idiom.*
- *Students compared "idiomatical" with similar adjectives in the lesson.*

idocrase *(noun)*

A green or yellow or brown mineral consisting of a hydrated silicate; it occurs as crystals in limestone and is used a gemstone.

- *Understanding "idocrase" helps you talk about this topic clearly.*
- *They discussed "idocrase" during the group presentation.*

---

ilya ilich metchnikov *(noun)*

Russian bacteriologist in France who formulated the theory of phagocytosis (1845-1916).

- *Understanding "ilya ilich metchnikov" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ilya ilich metchnikov."*

---

imaret *(noun)*

A hostel for pilgrims in Turkey.

- *In class, the teacher used "imaret" to mean a hostel for pilgrims in turkey.*
- *He looked up "imaret" because he had never seen it before.*

---

imbrication *(noun)*

Covering with a design in which one element covers a part of another (as with tiles or shingles).

- *They discussed "imbrication" during the group presentation.*
- *She wrote a short paragraph that included "imbrication."*

---

imbrue *(verb)*

Permeate or impregnate.

- *She tried to use "imbrue" carefully so everyone would understand.*
- *The coach explained when to use "imbrue" and when to wait.*

---

iminazole *(noun)*

An organic base C3H4N2; a histamine inhibitor.

- *Understanding "iminazole" helps you talk about this topic clearly.*
- *The article explained what "iminazole" means with a simple example.*

---

immaterialise *(verb)*

Render immaterial or incorporeal.

- *She tried to use "immaterialise" carefully so everyone would understand.*
- *He did not know how to use "immaterialise" until he saw an example.*

---

immaterialize *(verb)*

Render immaterial or incorporeal.

- *In everyday English, people use "immaterialize" when talking about this idea.*
- *Learners should practice how to use "immaterialize" in real sentences.*

---

immix *(verb)*

Mix together different elements.

- *She tried to use "immix" carefully so everyone would understand.*
- *In everyday English, people use "immix" when talking about this idea.*

---

immunoelectrophoresis *(noun)*

Electrophoresis to separate antigens and antibodies.

- *Understanding "immunoelectrophoresis" helps you talk about this topic clearly.*
- *The article explained what "immunoelectrophoresis" means with a simple example.*

---

impetiginous *(adjective)*

Of or relating to or having impetigo.

- *Her writing became clearer after she learned "impetiginous."*
- *A "impetiginous" approach may work better in this case.*

---

implicational *(adjective)*

Relating to or concerned with logical implication.

- *Implicational language universals.*

- *Would you call this situation "implicational"? Explain why.*

---

incandesce *(verb)*

Cause to become incandescent or glow.

- *The lamp was incandesced.*
- *He did not know how to use "incandesce" until he saw an example.*

---

incontinency *(noun)*

Involuntary urination or defecation.

- *She wrote a short paragraph that included "incontinency."*
- *The article explained what "incontinency" means with a simple example.*

---

indexless *(adjective)*

Lacking an index.

- *The speaker chose "indexless" because it captured the feeling precisely.*
- *A "indexless" approach may work better in this case.*

---

indigotin *(noun)*

A blue dye obtained from plants or made synthetically.

- *They discussed "indigotin" during the group presentation.*
- *The article explained what "indigotin" means with a simple example.*

---

indoleacetic acid *(noun)*

A plant hormone promoting elongation of stems and roots.

- *They discussed "indoleacetic acid" during the group presentation.*
- *The article explained what "indoleacetic acid" means with a simple example.*

---

indolebutyric acid *(noun)*

A synthetic plant hormone promoting elongation of stems and roots.

- *Understanding "indolebutyric acid" helps you talk about this topic clearly.*
- *The article explained what "indolebutyric acid" means with a simple example.*

---

indurate *(verb)*

Cause to accept or become hardened to; habituate.

- *Indurated customs.*
- *She tried to use "indurate" carefully so everyone would understand.*

---

indusial *(adjective)*

Of or relating to or being an indusium.

- *A "indusial" approach may work better in this case.*
- *Would you call this situation "indusial"? Explain why.*

---

inflater *(noun)*

An air pump operated by hand to inflate something (as a tire).

- *She wrote a short paragraph that included "inflater."*
- *He looked up "inflater" because he had never seen it before.*

---

infolding *(noun)*

The folding in of an outer layer so as to form a pocket in the surface.

- *In class, the teacher used "infolding" to mean the folding in of an outer layer so as to form a....*
- *The article explained what "infolding" means with a simple example.*

---

inframaxillary *(adjective)*

Relating to the lower jaw.

- *Her writing became clearer after she learned "inframaxillary."*
- *The speaker chose "inframaxillary" because it captured the feeling precisely.*

---

infrigidation *(noun)*

The process of cooling or freezing (e.g., food) for preservative purposes.

- *The article explained what "infrigidation" means with a simple example.*
- *Understanding "infrigidation" helps you talk about this topic clearly.*

infructescence *(noun)*

The fruiting stage of the inflorescence.

- *She wrote a short paragraph that included "infructescence."*
- *They discussed "infructescence" during the group presentation.*

infuscate *(verb)*

Darken with a brownish tinge, as of insect wings.

- *She tried to use "infuscate" carefully so everyone would understand.*
- *He did not know how to use "infuscate" until he saw an example.*

inhalator *(noun)*

A breathing device for administering long-term artificial respiration.

- *Understanding "inhalator" helps you talk about this topic clearly.*
- *They discussed "inhalator" during the group presentation.*

injectant *(noun)*

Any solution that is injected (as into the skin).

- *In class, the teacher used "injectant" to mean any solution that is injected (as into the skin).*
- *Understanding "injectant" helps you talk about this topic clearly.*

inkpad *(noun)*

A block of absorbent material saturated with ink; used to transfer ink evenly to a rubber stamp.

- *She wrote a short paragraph that included "inkpad."*
- *Understanding "inkpad" helps you talk about this topic clearly.*

innersole *(noun)*

The inner sole of a shoe or boot where the foot rests.

- *The article explained what "innersole" means with a simple example.*
- *They discussed "innersole" during the group presentation.*

inscriptive *(adjective)*

Of or relating to an inscription.

- *It is useful to describe something as "inscriptive" when it is of or relating to an inscription.*
- *Would you call this situation "inscriptive"? Explain why.*

insectan *(adjective)*

Of or relating to the class Insecta.

- *Her writing became clearer after she learned "insectan."*
- *Students compared "insectan" with similar adjectives in the lesson.*

insectifuge *(noun)*

A chemical substance that repels insects.

- *He looked up "insectifuge" because he had never seen it before.*
- *Understanding "insectifuge" helps you talk about this topic clearly.*

inspissate *(verb)*

Make viscous or dense.

- *Inspissate the tar so that it becomes pitch.*
- *The egg yolk will inspissate.*

inspissation *(noun)*

The process of thickening by dehydration.

- *Understanding "inspissation" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "inspissation."*

---

insulant *(noun)*

A material that reduces or prevents the transmission of heat or sound or electricity.

- *Understanding "insulant" helps you talk about this topic clearly.*
- *The article explained what "insulant" means with a simple example.*

---

integumental *(adjective)*

Of or relating to the integument.

- *The speaker chose "integumental" because it captured the feeling precisely.*
- *Would you call this situation "integumental"? Explain why.*

---

intellectualisation *(noun)*

(psychiatry) a defense mechanism that uses reasoning to block out emotional stress and conflict.

- *They discussed "intellectualisation" during the group presentation.*
- *The article explained what "intellectualisation" means with a simple example.*

---

interlard *(verb)*

Introduce one's writing or speech with certain expressions.

- *He did not know how to use "interlard" until he saw an example.*
- *In everyday English, people use "interlard" when talking about this idea.*

---

interlineal *(adjective)*

Written between lines of text.

- *A "interlineal" approach may work better in this case.*
- *The speaker chose "interlineal" because it captured the feeling precisely.*

---

interreflection *(noun)*

Reciprocal reflection between two reflecting surfaces.

- *There was interreflection between the two surfaces of the lens.*
- *They discussed "interreflection" during the group presentation.*

---

interstratify *(verb)*

Arrange rocks in alternating strata.

- *The coach explained when to use "interstratify" and when to wait.*
- *Learners should practice how to use "interstratify" in real sentences.*

---

intracutaneous *(adjective)*

Relating to areas between the layers of the skin.

- *Her writing became clearer after she learned "intracutaneous."*
- *Students compared "intracutaneous" with similar adjectives in the lesson.*

---

intradepartmental *(adjective)*

Within a department.

- *Intradepartmental memos.*
- *A "intradepartmental" approach may work better in this case.*

---

intradermic *(adjective)*

Relating to areas between the layers of the skin.

- *It is useful to describe something as "intradermic" when it is relating to areas between the layers of the skin.*
- *Would you call this situation "intradermic"? Explain why.*

---

intralinguistic *(adjective)*

Within a particular language.

- *Intralinguistic variation.*
- *A "intralinguistic" approach may work better in this case.*

intralobular *(adjective)*

Inside lobes or lobules.

- *A "intralobular" approach may work better in this case.*
- *The speaker chose "intralobular" because it captured the feeling precisely.*

intransitivise *(verb)*

Intransitivize.

- *She tried to use "intransitivise" carefully so everyone would understand.*
- *He did not know how to use "intransitivise" until he saw an example.*

intransitivize *(verb)*

Intransitivize.

- *Removing the object will intransitivize the verbs.*
- *In everyday English, people use "intransitivize" when talking about this idea.*

intrapulmonary *(adjective)*

Being or occurring within a lung.

- *A "intrapulmonary" approach may work better in this case.*
- *Students compared "intrapulmonary" with similar adjectives in the lesson.*

intrasentential *(adjective)*

Of or relating to constituents within a sentence.

- *Intrasentential co-occurrence.*
- *Her writing became clearer after she learned "intrasentential."*

intravenous pyelogram *(noun)*

X-ray picture of the kidneys and ureters after injection of a radiopaque dye.

- *Understanding "intravenous pyelogram" helps you talk about this topic clearly.*
- *They discussed "intravenous pyelogram" during the group presentation.*

intrenchment *(noun)*

An entrenched fortification; a position protected by trenches.

- *They discussed "intrenchment" during the group presentation.*
- *The article explained what "intrenchment" means with a simple example.*

introject *(verb)*

Incorporate (attitudes or ideas) into one's personality unconsciously.

- *Learners should practice how to use "introject" in real sentences.*
- *He did not know how to use "introject" until he saw an example.*

intropin *(noun)*

A monoamine neurotransmitter found in the brain and essential for the normal functioning of the central nervous system; as a drug (trade names Dopastat and Intropin) it is used to treat shock and hypotension.

- *She wrote a short paragraph that included "intropin."*
- *He looked up "intropin" because he had never seen it before.*

intumescence *(noun)*

The increase in volume of certain substances when they are heated (often accompanied by release of water).

- *They discussed "intumescence" during the group presentation.*
- *In class, the teacher used "intumescence" to mean the increase in volume of certain substances when....*

intumescency *(noun)*

The increase in volume of certain substances when they are heated (often accompanied by release of water).

- *She wrote a short paragraph that included "intumescency."*
- *He looked up "intumescency" because he had never seen it before.*

invariableness *(noun)*

The quality of being resistant to variation.

- *In class, the teacher used "invariableness" to mean the quality of being resistant to variation.*
- *The article explained what "invariableness" means with a simple example.*

---

involucrate *(adjective)*

Having an involucre.

- *Would you call this situation "involucrate"? Explain why.*
- *Her writing became clearer after she learned "involucrate."*

---

iodic acid *(noun)*

A soluble crystalline acid; used as a reagent and disinfectant.

- *They discussed "iodic acid" during the group presentation.*
- *In class, the teacher used "iodic acid" to mean a soluble crystalline acid; used as a reagent and....*

---

iodin *(noun)*

A nonmetallic element belonging to the halogens; used especially in medicine and photography and in dyes; occurs naturally only in combination in small quantities (as in sea water or rocks).

- *The article explained what "iodin" means with a simple example.*
- *In class, the teacher used "iodin" to mean a nonmetallic element belonging to the halogens;....*

---

iodinate *(verb)*

Cause to combine with iodine.

- *Iodinate thyroxine.*
- *He did not know how to use "iodinate" until he saw an example.*

---

iodination *(noun)*

The substitution or addition of iodine atoms in organic compounds.

- *Understanding "iodination" helps you talk about this topic clearly.*
- *In class, the teacher used "iodination" to mean the substitution or addition of iodine atoms in....*

---

iodoamino acid *(noun)*

An amino acid with iodine added.

- *In class, the teacher used "iodoamino acid" to mean an amino acid with iodine added.*
- *He looked up "iodoamino acid" because he had never seen it before.*

---

iodochlorhydroxyquin *(noun)*

Drug used to treat certain fungal infection (as athlete's foot).

- *The article explained what "iodochlorhydroxyquin" means with a simple example.*
- *In class, the teacher used "iodochlorhydroxyquin" to mean drug used to treat certain fungal infection (as....*

---

iodocompound *(noun)*

A compound containing the covalent iodine radical.

- *In class, the teacher used "iodocompound" to mean a compound containing the covalent iodine radical.*
- *The article explained what "iodocompound" means with a simple example.*

---

iodoprotein *(noun)*

A protein that contains iodine.

- *Understanding "iodoprotein" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "iodoprotein."*

---

iodopsin *(noun)*

A violet photopigment in the retinal cones of the eyes of most vertebrates; plays a role in daylight vision.

- *They discussed "iodopsin" during the group presentation.*
- *She wrote a short paragraph that included "iodopsin."*

---

iodothyronine *(noun)*

Thyronine with iodine added.

- *The article explained what "iodothyronine" means with a simple example.*
- *In class, the teacher used "iodothyronine" to mean thyronine with iodine added.*

---

iodotyrosine *(noun)*

Tyrosine with iodine added.

- *In class, the teacher used "iodotyrosine" to mean tyrosine with iodine added.*
- *Understanding "iodotyrosine" helps you talk about this topic clearly.*

---

ionate *(verb)*

Add ions to.

- *The coach explained when to use "ionate" and when to wait.*
- *Can you use "ionate" in a sentence that fits this situation?*

---

ionophoresis *(noun)*

The motion of charged particles in a colloid under the influence of an electric field; particles with a positive charge go to the cathode and negative to the anode.

- *In class, the teacher used "ionophoresis" to mean the motion of charged particles in a colloid under....*
- *The article explained what "ionophoresis" means with a simple example.*

---

iraki *(adjective)*

Of or relating to Iraq or its people or culture.

- *It is useful to describe something as "iraki" when it is of or relating to iraq or its people or culture.*
- *A "iraki" approach may work better in this case.*

---

iridaceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Iridaceae.

- *Would you call this situation "iridaceous"? Explain why.*
- *Students compared "iridaceous" with similar adjectives in the lesson.*

---

iridic *(adjective)*

Of or relating to the iris of the eye.

- *Students compared "iridic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "iridic."*

---

iridosmine *(noun)*

A hard and corrosion resistant mineral that is a natural alloy of osmium and iridium (usually containing small amounts of rhodium and platinum); used in needles and pen nibs etc.

- *She wrote a short paragraph that included "iridosmine."*
- *He looked up "iridosmine" because he had never seen it before.*

---

iritic *(adjective)*

Of or relating to located near the iris of the eye.

- *Would you call this situation "iritic"? Explain why.*
- *Students compared "iritic" with similar adjectives in the lesson.*

---

iron perchloride *(noun)*

A highly toxic chemical used to engrave metal plates and electronic circuits.

- *The article explained what "iron perchloride" means with a simple example.*
- *In class, the teacher used "iron perchloride" to mean a highly toxic chemical used to engrave metal....*

---

ironmonger's shop *(noun)*

A store selling hardware.

- *In Great Britain they used to call a hardware store an ironmonger's shop.*
- *In class, the teacher used "ironmonger's shop" to mean a store selling hardware.*

---

irrupt *(verb)*

Increase rapidly and in an uncontrolled manner.

- *The island's rodent population irrupted.*
- *She irrupted into our sitting room.*

isarithm *(noun)*

A line drawn on a map connecting points having the same numerical value of some variable.

- *She wrote a short paragraph that included "isarithm."*
- *He looked up "isarithm" because he had never seen it before.*

isoagglutination *(noun)*

Agglutination of an agglutinogen of one individual by a serum from another individual of the same species.

- *She wrote a short paragraph that included "isoagglutination."*
- *They discussed "isoagglutination" during the group presentation.*

isoagglutinin *(noun)*

An antibody produced by one individual that causes agglutination of red blood cells in other individuals of the same species.

- *She wrote a short paragraph that included "isoagglutinin."*
- *He looked up "isoagglutinin" because he had never seen it before.*

isoagglutinogen *(noun)*

An antigen capable of causing the production of (or reacting with) an isoagglutinin.

- *She wrote a short paragraph that included "isoagglutinogen."*
- *He looked up "isoagglutinogen" because he had never seen it before.*

isoantibody *(noun)*

An antibody that occurs naturally against foreign tissues from a person of the same species.

- *She wrote a short paragraph that included "isoantibody."*
- *They discussed "isoantibody" during the group presentation.*

isocyanic acid *(noun)*

An acid known only in the form of its esters.

- *The article explained what "isocyanic acid" means with a simple example.*
- *They discussed "isocyanic acid" during the group presentation.*

isogamy *(noun)*

(biology) reproduction by the union or fusion of gametes of the same size and structure.

- *They discussed "isogamy" during the group presentation.*
- *He looked up "isogamy" because he had never seen it before.*

isogram *(noun)*

A line drawn on a map connecting points having the same numerical value of some variable.

- *He looked up "isogram" because he had never seen it before.*
- *Understanding "isogram" helps you talk about this topic clearly.*

isolationistic *(adjective)*

Of or relating to isolationism.

- *It is useful to describe something as "isolationistic" when it is of or relating to isolationism.*
- *A "isolationistic" approach may work better in this case.*

isomerise *(verb)*

Cause to change into an isomer.

- *The coach explained when to use "isomerise" and when to wait.*
- *He did not know how to use "isomerise" until he saw an example.*

isopleth *(noun)*

A line drawn on a map connecting points having the same numerical value of some variable.

- *Understanding "isopleth" helps you talk about this topic clearly.*
- *They discussed "isopleth" during the group presentation.*

isopteran *(adjective)*

Relating to or characteristic of insects of the order Isoptera.

- *The speaker chose “isopteran” because it captured the feeling precisely.*
- *It is useful to describe something as “isopteran” when it is relating to or characteristic of insects of the....*

---

isosmotic solution *(noun)*

A solution having the same osmotic pressure as blood.

- *The article explained what “isosmotic solution” means with a simple example.*
- *In class, the teacher used “isosmotic solution” to mean a solution having the same osmotic pressure as blood.*

---

isothermic *(adjective)*

Of or relating to an isotherm.

- *A “isothermic” approach may work better in this case.*
- *Her writing became clearer after she learned “isothermic.”*

---

itaconic acid *(noun)*

A crystalline carboxylic acid; occurs in some fermentations of sugars.

- *The article explained what “itaconic acid” means with a simple example.*
- *They discussed “itaconic acid” during the group presentation.*

---

jacklight *(noun)*

A light used as a lure in hunting or fishing at night.

- *The article explained what “jacklight” means with a simple example.*
- *They discussed “jacklight” during the group presentation.*

---

jackstraw *(noun)*

A thin strip of wood used in playing the game of jackstraws.

- *He looked up “jackstraw” because he had never seen it before.*
- *She wrote a short paragraph that included “jackstraw.”*

---

jacobinic *(adjective)*

Of or relating to the Jacobins of the French Revolution.

- *Jacobinic terrorism.*
- *It is useful to describe something as “jacobinic” when it is of or relating to the jacobins of the french revolution.*

---

jacobinical *(adjective)*

Of or relating to the Jacobins of the French Revolution.

- *Her writing became clearer after she learned “jacobinical.”*
- *Students compared “jacobinical” with similar adjectives in the lesson.*

---

jaconet *(noun)*

A lightweight cotton cloth with a smooth and slightly stiff finish; used for clothing and bandages.

- *Understanding “jaconet” helps you talk about this topic clearly.*
- *In class, the teacher used “jaconet” to mean a lightweight cotton cloth with a smooth and....*

---

jadestone *(noun)*

A semiprecious gemstone that takes a high polish; is usually green but sometimes whitish; consists of jadeite or nephrite.

- *The article explained what “jadestone” means with a simple example.*
- *She wrote a short paragraph that included “jadestone.”*

---

jaggary *(noun)*

Unrefined brown sugar made from palm sap.

- *The article explained what “jaggary” means with a simple example.*
- *In class, the teacher used “jaggary” to mean unrefined brown sugar made from palm sap.*

---

jagghery *(noun)*

Unrefined brown sugar made from palm sap.

- *The article explained what “jagghery” means with a simple example.*

- *In class, the teacher used "jagghery" to mean unrefined brown sugar made from palm sap.*

---

jainist *(adjective)*

Relating to or characteristic of Jainism.

- *Students compared "jainist" with similar adjectives in the lesson.*
- *Would you call this situation "jainist"? Explain why.*

---

jambeau *(noun)*

Armor plate that protects legs below the knee.

- *They discussed "jambeau" during the group presentation.*
- *The article explained what "jambeau" means with a simple example.*

---

jamjar *(noun)*

A jar for holding jellies or preserves.

- *They discussed "jamjar" during the group presentation.*
- *She wrote a short paragraph that included "jamjar."*

---

jampan *(noun)*

A kind of sedan chair used in India.

- *She wrote a short paragraph that included "jampan."*
- *Understanding "jampan" helps you talk about this topic clearly.*

---

jampot *(noun)*

A jar for holding jellies or preserves.

- *The article explained what "jampot" means with a simple example.*
- *In class, the teacher used "jampot" to mean a jar for holding jellies or preserves.*

---

jargoon *(noun)*

A colorless (or pale yellow or smoky) variety of zircon.

- *Understanding "jargoon" helps you talk about this topic clearly.*
- *They discussed "jargoon" during the group presentation.*

---

javelle water *(noun)*

An aqueous solution of sodium hypochlorite.

- *He looked up "javelle water" because he had never seen it before.*
- *She wrote a short paragraph that included "javelle water."*

---

jellaba *(noun)*

A loose cloak with a hood; worn in the Middle East and northern Africa.

- *She wrote a short paragraph that included "jellaba."*
- *He looked up "jellaba" because he had never seen it before.*

---

jellify *(verb)*

Become jelly.

- *Jellify a liquid.*
- *Can you use "jellify" in a sentence that fits this situation?*

---

jesuitic *(adjective)*

Having qualities characteristic of Jesuits or Jesuitism.

- *Jesuitical education.*
- *It is useful to describe something as "jesuitic" when it is having qualities characteristic of jesuits or jesuitism.*

---

jibboom *(noun)*

A spar that extends the bowsprit.

- *In class, the teacher used "jibboom" to mean a spar that extends the bowsprit.*
- *They discussed "jibboom" during the group presentation.*

---

jiggermast *(noun)*

Any small mast on a sailing vessel; especially the mizzenmast of a yawl.

- *She wrote a short paragraph that included "jiggermast."*
- *They discussed "jiggermast" during the group presentation.*

---

jorum *(noun)*

A large drinking bowl.

- *They discussed "jorum" during the group presentation.*
- *Understanding "jorum" helps you talk about this topic clearly.*

---

judaical *(adjective)*

Of or relating to or characteristic of the Jews or their culture or religion.

- *Her writing became clearer after she learned "judaical."*
- *A "judaical" approach may work better in this case.*

---

jumbojet *(noun)*

A very large jet plane.

- *In class, the teacher used "jumbojet" to mean a very large jet plane.*
- *The article explained what "jumbojet" means with a simple example.*

---

jumentous *(adjective)*

Smelling strongly like a beast of burden.

- *Jumentous urine.*
- *It is useful to describe something as "jumentous" when it is smelling strongly like a beast of burden.*

---

juniperic acid *(noun)*

A crystalline acid found in the exudations of some conifers.

- *He looked up "juniperic acid" because he had never seen it before.*
- *In class, the teacher used "juniperic acid" to mean a crystalline acid found in the exudations of some....*

---

juridic *(adjective)*

Of or relating to the law or jurisprudence.

- *Juridical days.*
- *Would you call this situation "juridic"? Explain why.*

---

juvenescence *(noun)*

The process of growing into a youth.

- *In class, the teacher used "juvenescence" to mean the process of growing into a youth.*
- *They discussed "juvenescence" during the group presentation.*

---

kabolin *(noun)*

An androgen (trade names Durabolin or Kabolin) that is used to treat testosterone deficiency or breast cancer or osteoporosis.

- *He looked up "kabolin" because he had never seen it before.*
- *They discussed "kabolin" during the group presentation.*

---

kaffiyeh *(noun)*

An Arab headdress consisting of a square piece of cloth folded into a triangle and fastened over the crown by an agal.

- *They discussed "kaffiyeh" during the group presentation.*
- *She wrote a short paragraph that included "kaffiyeh."*

---

kainite *(noun)*

A white mineral consisting of magnesium sulphate and potassium chloride; a source of potassium salts; used as a fertilizer.

- *The article explained what "kainite" means with a simple example.*
- *In class, the teacher used "kainite" to mean a white mineral consisting of magnesium sulphate....*

---

kainogenesis *(noun)*

Introduction during embryonic development of characters or structure not present in the earlier evolutionary history of the strain or species (such as the addition of the placenta in mammalian evolution).

- *Understanding "kainogenesis" helps you talk about this topic clearly.*
- *In class, the teacher used "kainogenesis" to mean introduction during embryonic development of....*

---

kakemono *(noun)*

A Japanese (paper or silk) wall hanging; usually narrow with a picture or writing on it and a roller at the bottom.

- *She wrote a short paragraph that included "kakemono."*
- *He looked up "kakemono" because he had never seen it before.*

---

kalansuwa *(noun)*

A cap that is wrapped around by a turban and worn by Muslim religious elders.

- *She wrote a short paragraph that included "kalansuwa."*
- *The article explained what "kalansuwa" means with a simple example.*

---

kalpac *(noun)*

A high-crowned black cap (usually made of felt or sheepskin) worn by men in Turkey and Iran and the Caucasus.

- *Understanding "kalpac" helps you talk about this topic clearly.*
- *In class, the teacher used "kalpac" to mean a high-crowned black cap (usually made of felt or....*

---

kammon strait bridge *(noun)*

A suspension bridge between Kyushu and Honshu.

- *They discussed "kammon strait bridge" during the group presentation.*
- *He looked up "kammon strait bridge" because he had never seen it before.*

---

kanzu *(noun)*

(Swahili) a long garment (usually white) with long sleeves; worn by men in East Africa.

- *She wrote a short paragraph that included "kanzu."*
- *He looked up "kanzu" because he had never seen it before.*

---

kaochlor *(noun)*

Salt of potassium (KCl) (trade names K-Dur 20, Kaochlor and K-lor and Klorvess and K-lyte); taken in tablet form to treat potassium deficiency.

- *They discussed "kaochlor" during the group presentation.*
- *He looked up "kaochlor" because he had never seen it before.*

---

kaoline *(noun)*

A fine usually white clay formed by the weathering of aluminous minerals (as feldspar); used in ceramics and as an absorbent and as a filler (e.g., in paper).

- *She wrote a short paragraph that included "kaoline."*
- *They discussed "kaoline" during the group presentation.*

---

karaya gum *(noun)*

Exudate of an Asian tree; used for finishing textiles and to thicken foodstuffs and cosmetics.

- *He looked up "karaya gum" because he had never seen it before.*
- *Understanding "karaya gum" helps you talk about this topic clearly.*

---

karyokinesis *(noun)*

Organic process consisting of the division of the nucleus of a cell during mitosis or meiosis.

- *In class, the teacher used "karyokinesis" to mean organic process consisting of the division of the....*
- *They discussed "karyokinesis" during the group presentation.*

---

karyokinetic *(adjective)*

Of or relating to the division of the nucleus of a cell during mitosis or meiosis.

- *The speaker chose "karyokinetic" because it captured the feeling precisely.*
- *Would you call this situation "karyokinetic"? Explain why.*

---

karyolysis *(noun)*

Disintegration and dissolution of a cell nucleus when a cell dies.

- *He looked up "karyolysis" because he had never seen it before.*
- *Understanding "karyolysis" helps you talk about this topic clearly.*

katabolic *(adjective)*

Relating to or characterized by catabolism.

- *Would you call this situation "katabolic"? Explain why.*
- *The speaker chose "katabolic" because it captured the feeling precisely.*

katabolism *(noun)*

Breakdown in living organisms of more complex substances into simpler ones together with release of energy.

- *She wrote a short paragraph that included "katabolism."*
- *He looked up "katabolism" because he had never seen it before.*

katamorphism *(noun)*

Metamorphism that occurs at or near the earth's surface; breaks down complex minerals into simpler ones.

- *In class, the teacher used "katamorphism" to mean metamorphism that occurs at or near the earth's....*
- *The article explained what "katamorphism" means with a simple example.*

katharobic *(adjective)*

Of living being in an oxygenated environment lacking organic matter.

- *Students compared "katharobic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "katharobic."*

katharometer *(noun)*

Measures thermal conductivity.

- *The article explained what "katharometer" means with a simple example.*
- *She wrote a short paragraph that included "katharometer."*

kenogenesis *(noun)*

Introduction during embryonic development of characters or structure not present in the earlier evolutionary history of the strain or species (such as the addition of the placenta in mammalian evolution).

- *The article explained what "kenogenesis" means with a simple example.*
- *In class, the teacher used "kenogenesis" to mean introduction during embryonic development of....*

keratinisation *(noun)*

Organic process by which keratin is deposited in cells and the cells become horny (as in nails and hair).

- *The article explained what "keratinisation" means with a simple example.*
- *In class, the teacher used "keratinisation" to mean organic process by which keratin is deposited in....*

keratinise *(verb)*

Become horny and impregnated with keratin.

- *In everyday English, people use "keratinise" when talking about this idea.*
- *Learners should practice how to use "keratinise" in real sentences.*

keratinize *(verb)*

Become horny and impregnated with keratin.

- *The coach explained when to use "keratinize" and when to wait.*
- *Can you use "keratinize" in a sentence that fits this situation?*

keratohyalin *(noun)*

Hyaline in the large granules of the stratum granulosum.

- *She wrote a short paragraph that included "keratohyalin."*
- *Understanding "keratohyalin" helps you talk about this topic clearly.*

kerbstone *(noun)*

A paving stone forming part of a curb.

- *She wrote a short paragraph that included "kerbstone."*
- *He looked up "kerbstone" because he had never seen it before.*

kernite *(noun)*

A light soft mineral consisting of hydrated sodium borate in crystalline form; an important source of boron.

- *He looked up "kernite" because he had never seen it before.*
- *Understanding "kernite" helps you talk about this topic clearly.*

ketose *(noun)*

Any monosaccharide sugar that contains a ketone group or its hemiacetal.

- *The article explained what "ketose" means with a simple example.*
- *In class, the teacher used "ketose" to mean any monosaccharide sugar that contains a ketone....*

ketosteroid *(noun)*

A steroid containing a ketone group.

- *The article explained what "ketosteroid" means with a simple example.*
- *She wrote a short paragraph that included "ketosteroid."*

khaddar *(noun)*

A coarse homespun cotton cloth made in India.

- *They discussed "khaddar" during the group presentation.*
- *She wrote a short paragraph that included "khaddar."*

khimar *(noun)*

A headscarf worn by observant Muslim women that hangs down to just above the waist.

- *In class, the teacher used "khimar" to mean a headscarf worn by observant muslim women that....*
- *The article explained what "khimar" means with a simple example.*

khukuri *(noun)*

A curved steel knife with a razor-sharp edge used in combat by the Gurkhas; has cultural and religious significance in Nepal.

- *The article explained what "khukuri" means with a simple example.*
- *In class, the teacher used "khukuri" to mean a curved steel knife with a razor-sharp edge used....*

kicksorter *(noun)*

Scientific instrument consisting of an electronic circuit that permits only voltage pulses of predetermined height to pass.

- *The article explained what "kicksorter" means with a simple example.*
- *In class, the teacher used "kicksorter" to mean scientific instrument consisting of an electronic....*

kieselguhr *(noun)*

A light soil consisting of siliceous diatom remains and often used as a filtering material.

- *She wrote a short paragraph that included "kieselguhr."*
- *He looked up "kieselguhr" because he had never seen it before.*

kieserite *(noun)*

A white mineral consisting of hydrous magnesium sulfate often found in salt mines.

- *They discussed "kieserite" during the group presentation.*
- *The article explained what "kieserite" means with a simple example.*

kingbolt *(noun)*

Bolt that provides a steering joint in a motor vehicle.

- *In class, the teacher used "kingbolt" to mean bolt that provides a steering joint in a motor vehicle.*
- *They discussed "kingbolt" during the group presentation.*

kiplingesque *(adjective)*

In the manner of Rudyard Kipling.

- *Her writing became clearer after she learned "kiplingesque."*
- *The speaker chose "kiplingesque" because it captured the feeling precisely.*

kipp's apparatus *(noun)*

A laboratory apparatus for producing a gas (usually hydrogen sulfide) by the action of a liquid on a solid without heating.

- *The article explained what "kipp's apparatus" means with a simple example.*
- *In class, the teacher used "kipp's apparatus" to mean a laboratory apparatus for producing a gas (usually....*

---

klorvess *(noun)*

Salt of potassium (KCl) (trade names K-Dur 20, Kaochlor and K-lor and Klorvess and K-lyte); taken in tablet form to treat potassium deficiency.

- *She wrote a short paragraph that included "klorvess."*
- *They discussed "klorvess" during the group presentation.*

---

knickknackery *(noun)*

Miscellaneous curios.

- *He looked up "knickknackery" because he had never seen it before.*
- *Understanding "knickknackery" helps you talk about this topic clearly.*

---

knitwork *(noun)*

Needlework created by interlacing yarn in a series of connected loops using straight eyeless needles or by machine.

- *She wrote a short paragraph that included "knitwork."*
- *They discussed "knitwork" during the group presentation.*

---

knobble *(noun)*

A small knob.

- *She wrote a short paragraph that included "knobble."*
- *He looked up "knobble" because he had never seen it before.*

---

knobkerrie *(noun)*

A short wooden club with a heavy knob on one end; used by aborigines in southern Africa.

- *In class, the teacher used "knobkerrie" to mean a short wooden club with a heavy knob on one end;....*
- *They discussed "knobkerrie" during the group presentation.*

---

knobkerry *(noun)*

A short wooden club with a heavy knob on one end; used by aborigines in southern Africa.

- *They discussed "knobkerry" during the group presentation.*
- *In class, the teacher used "knobkerry" to mean a short wooden club with a heavy knob on one end;....*

---

kokoi venom *(noun)*

A potent neurotoxin found in a particular frog.

- *In class, the teacher used "kokoi venom" to mean a potent neurotoxin found in a particular frog.*
- *He looked up "kokoi venom" because he had never seen it before.*

---

krummhorn *(noun)*

A Renaissance woodwind with a double reed and a curving tube (crooked horn).

- *They discussed "krummhorn" during the group presentation.*
- *The article explained what "krummhorn" means with a simple example.*

---

kundt's tube *(noun)*

A measuring instrument used to measure the speed of sound.

- *He looked up "kundt's tube" because he had never seen it before.*
- *She wrote a short paragraph that included "kundt's tube."*

---

kwell *(noun)*

A preparation of lindane (trade name Kwell) that is used to kill lice and itch mites; available in cream or shampoo.

- *The article explained what "kwell" means with a simple example.*
- *Understanding "kwell" helps you talk about this topic clearly.*

---

lacertilian *(adjective)*

Of or relating to lizards.

- *Would you call this situation "lacertilian"? Explain why.*
- *It is useful to describe something as "lacertilian" when it is of or relating to lizards.*

lachrymation *(noun)*

Shedding tears.

- *She wrote a short paragraph that included "lachrymation."*
- *Understanding "lachrymation" helps you talk about this topic clearly.*

lachrymator *(noun)*

A gas that makes the eyes fill with tears but does not damage them; used in dispersing crowds.

- *Understanding "lachrymator" helps you talk about this topic clearly.*
- *In class, the teacher used "lachrymator" to mean a gas that makes the eyes fill with tears but does....*

lachrymatory *(adjective)*

Relating to or prompting tears.

- *The speaker chose "lachrymatory" because it captured the feeling precisely.*
- *It is useful to describe something as "lachrymatory" when it is relating to or prompting tears.*

lacrimator *(noun)*

A gas that makes the eyes fill with tears but does not damage them; used in dispersing crowds.

- *Understanding "lacrimator" helps you talk about this topic clearly.*
- *In class, the teacher used "lacrimator" to mean a gas that makes the eyes fill with tears but does....*

lacrimatory *(adjective)*

Relating to or prompting tears.

- *The speaker chose "lacrimatory" because it captured the feeling precisely.*
- *It is useful to describe something as "lacrimatory" when it is relating to or prompting tears.*

lacteal *(adjective)*

Relating to or consisting of or producing or resembling milk.

- *Lacteal fluids.*
- *Lacteal organs.*

lactifuge *(noun)*

Any agent that reduces milk secretion (as given to a woman who is not breast feeding).

- *In class, the teacher used "lactifuge" to mean any agent that reduces milk secretion (as given to....*
- *They discussed "lactifuge" during the group presentation.*

lactoflavin *(noun)*

A B vitamin that prevents skin lesions and weight loss.

- *She wrote a short paragraph that included "lactoflavin."*
- *Understanding "lactoflavin" helps you talk about this topic clearly.*

lactogen *(noun)*

Any agent that enhances milk production.

- *They discussed "lactogen" during the group presentation.*
- *The article explained what "lactogen" means with a simple example.*

lactogenic *(adjective)*

Inducing lactation.

- *A "lactogenic" approach may work better in this case.*
- *Her writing became clearer after she learned "lactogenic."*

lactogenic hormone *(noun)*

Gonadotropic hormone secreted by the anterior pituitary; in females it stimulates growth of the mammary glands and lactation after parturition.

- *They discussed "lactogenic hormone" during the group presentation.*
- *He looked up "lactogenic hormone" because he had never seen it before.*

laevulose *(noun)*

A simple sugar found in honey and in many ripe fruits.

- *He looked up "laevulose" because he had never seen it before.*
- *They discussed "laevulose" during the group presentation.*

---

lagend *(noun)*

Goods (or wreckage) on the sea bed that is attached to a buoy so that it can be recovered.

- *She wrote a short paragraph that included "lagend."*
- *They discussed "lagend" during the group presentation.*

---

lagerphone *(noun)*

An Australian percussion instrument used for playing bush music; a long stick with bottle caps nailed loosely to it; played by hitting it with a stick or banging it on the ground.

- *They discussed "lagerphone" during the group presentation.*
- *He looked up "lagerphone" because he had never seen it before.*

---

laicise *(verb)*

Reduce to lay status.

- *The coach explained when to use "laicise" and when to wait.*
- *Can you use "laicise" in a sentence that fits this situation?*

---

laicize *(verb)*

Reduce to lay status.

- *Laicize the parochial schools.*
- *He did not know how to use "laicize" until he saw an example.*

---

lambrequin *(noun)*

A scarf that covers a knight's helmet.

- *He looked up "lambrequin" because he had never seen it before.*
- *In class, the teacher used "lambrequin" to mean a scarf that covers a knight's helmet.*

---

lamphouse *(noun)*

Housing that holds a lamp (as in a movie projector).

- *Understanding "lamphouse" helps you talk about this topic clearly.*
- *He looked up "lamphouse" because he had never seen it before.*

---

langbeinite *(noun)*

A mineral consisting of potassium magnesium double sulphate; used as a fertilizer.

- *Understanding "langbeinite" helps you talk about this topic clearly.*
- *He looked up "langbeinite" because he had never seen it before.*

---

laniard *(noun)*

A cord worn around the neck to hold a knife or whistle.

- *They discussed "laniard" during the group presentation.*
- *He looked up "laniard" because he had never seen it before.*

---

laniary *(adjective)*

Of or relating to a pointed conical tooth.

- *Would you call this situation "laniary"? Explain why.*
- *A "laniary" approach may work better in this case.*

---

lanthanoid *(noun)*

Any element of the lanthanide series (atomic numbers 57 through 71).

- *Understanding "lanthanoid" helps you talk about this topic clearly.*
- *The article explained what "lanthanoid" means with a simple example.*

---

lanthanon *(noun)*

Any element of the lanthanide series (atomic numbers 57 through 71).

- *The article explained what "lanthanon" means with a simple example.*

- *Understanding "lanthanon" helps you talk about this topic clearly.*

lapboard *(noun)*

Writing board used on the lap as a table or desk.

- *The article explained what "lapboard" means with a simple example.*
- *She wrote a short paragraph that included "lapboard."*

lapidify *(verb)*

Change into stone.

- *The coach explained when to use "lapidify" and when to wait.*
- *Can you use "lapidify" in a sentence that fits this situation?*

larodopa *(noun)*

The levorotatory form of dopa (trade names Bendopa and Brocadopa and Larodopa); as a drug it is used to treat Parkinson's disease.

- *He looked up "larodopa" because he had never seen it before.*
- *She wrote a short paragraph that included "larodopa."*

larvacide *(noun)*

An insecticide that kills the larvae of insects.

- *The article explained what "larvacide" means with a simple example.*
- *In class, the teacher used "larvacide" to mean an insecticide that kills the larvae of insects.*

laryngopharyngeal *(adjective)*

Of or relating to the larynx and pharynx.

- *Her writing became clearer after she learned "laryngopharyngeal."*
- *Would you call this situation "laryngopharyngeal"? Explain why.*

lastex *(noun)*

Yarn that has an elastic core wound around with cotton or silk or nylon or rayon threads.

- *The article explained what "lastex" means with a simple example.*
- *She wrote a short paragraph that included "lastex."*

latchet *(noun)*

A leather strap or thong used to attach a sandal or shoe to the foot.

- *The article explained what "latchet" means with a simple example.*
- *In class, the teacher used "latchet" to mean a leather strap or thong used to attach a sandal or....*

latchstring *(noun)*

Opener consisting of a string that can be passed through a hole in a door for raising the latch from outside.

- *They discussed "latchstring" during the group presentation.*
- *Understanding "latchstring" helps you talk about this topic clearly.*

lathee *(noun)*

Club consisting of a heavy stick (often bamboo) bound with iron; used by police in India.

- *The article explained what "lathee" means with a simple example.*
- *She wrote a short paragraph that included "lathee."*

lathery *(adjective)*

Resembling lather or covered with lather.

- *A "lathery" approach may work better in this case.*
- *Students compared "lathery" with similar adjectives in the lesson.*

latten *(noun)*

Brass (or a yellow alloy resembling brass) that was hammered into thin sheets; formerly used for church utensils.

- *In class, the teacher used "latten" to mean brass (or a yellow alloy resembling brass) that was....*
- *They discussed "latten" during the group presentation.*

lavalava *(noun)*

A skirt consisting of a rectangle of calico or printed cotton; worn by Polynesians (especially Samoans).

- *In class, the teacher used "lavalava" to mean a skirt consisting of a rectangle of calico or....*
- *Understanding "lavalava" helps you talk about this topic clearly.*

---

lavalliere *(noun)*

Jeweled pendant worn on a chain around the neck.

- *She wrote a short paragraph that included "lavalliere."*
- *The article explained what "lavalliere" means with a simple example.*

---

laxation *(noun)*

The elimination of fecal waste through the anus.

- *In class, the teacher used "laxation" to mean the elimination of fecal waste through the anus.*
- *The article explained what "laxation" means with a simple example.*

---

leboyer method *(noun)*

A method of childbirth that tries to minimize the trauma for the newborn; delivery occurs in a quiet dimly lit room and the infant's head is not pulled and immediate bonding between mother and child is encouraged.

- *They discussed "leboyer method" during the group presentation.*
- *Understanding "leboyer method" helps you talk about this topic clearly.*

---

leboyer method of childbirth *(noun)*

A method of childbirth that tries to minimize the trauma for the newborn; delivery occurs in a quiet dimly lit room and the infant's head is not pulled and immediate bonding between mother and child is encouraged.

- *The article explained what "leboyer method of childbirth" means with a simple example.*
- *She wrote a short paragraph that included "leboyer method of childbirth."*

---

lechatelierite *(noun)*

Colorless glass made of almost pure silica.

- *In class, the teacher used "lechatelierite" to mean colorless glass made of almost pure silica.*
- *The article explained what "lechatelierite" means with a simple example.*

---

leclanche cell *(noun)*

Voltaic cell that produces approximately 1.5 volts.

- *She wrote a short paragraph that included "leclanche cell."*
- *He looked up "leclanche cell" because he had never seen it before.*

---

leging *(noun)*

A garment covering the leg (usually extending from the knee to the ankle).

- *In class, the teacher used "leging" to mean a garment covering the leg (usually extending from....*
- *Understanding "leging" helps you talk about this topic clearly.*

---

leibnitzian *(adjective)*

Of or relating to Gottfried Wilhelm Leibniz or to his mathematics or philosophy.

- *Her writing became clearer after she learned "leibnitzian."*
- *The speaker chose "leibnitzian" because it captured the feeling precisely.*

---

leonardesque *(adjective)*

In the manner of Leonardo da Vinci.

- *Students compared "leonardesque" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "leonardesque."*

---

lepidocrocite *(noun)*

A red to reddish brown mineral consisting of iron oxide hydroxide; often found in iron ores together with goethite.

- *Understanding "lepidocrocite" helps you talk about this topic clearly.*
- *They discussed "lepidocrocite" during the group presentation.*

---

lepidomelane *(noun)*

A mica that is a biotite containing iron.

- *The article explained what "lepidomelane" means with a simple example.*
- *Understanding "lepidomelane" helps you talk about this topic clearly.*

---

leptotene *(noun)*

The first stage of the prophase of meiosis.

- *He looked up "leptotene" because he had never seen it before.*
- *They discussed "leptotene" during the group presentation.*

---

levanter *(noun)*

An easterly wind in the western Mediterranean area.

- *She wrote a short paragraph that included "levanter."*
- *He looked up "levanter" because he had never seen it before.*

---

levulose *(noun)*

A simple sugar found in honey and in many ripe fruits.

- *The article explained what "levulose" means with a simple example.*
- *In class, the teacher used "levulose" to mean a simple sugar found in honey and in many ripe fruits.*

---

lexicalisation *(noun)*

The process of making a word to express a concept.

- *The article explained what "lexicalisation" means with a simple example.*
- *She wrote a short paragraph that included "lexicalisation."*

---

lexicalised *(adjective)*

Expressed by a word.

- *Her writing became clearer after she learned "lexicalised."*
- *A "lexicalised" approach may work better in this case.*

---

lexicalization *(noun)*

The process of making a word to express a concept.

- *He looked up "lexicalization" because he had never seen it before.*
- *Understanding "lexicalization" helps you talk about this topic clearly.*

---

lexicostatistic *(adjective)*

Pertaining to statistical methods used in studying the relations between languages.

- *Lexicostatistic techniques.*
- *Would you call this situation "lexicostatistic"? Explain why.*

---

lichgate *(noun)*

A roofed gate to a churchyard, formerly used as a temporary shelter for the bier during funerals.

- *They discussed "lichgate" during the group presentation.*
- *In class, the teacher used "lichgate" to mean a roofed gate to a churchyard, formerly used as a....*

---

liechtensteiner *(adjective)*

Of or relating to Liechtenstein or its inhabitants.

- *Liechtensteiner castles.*
- *Students compared "liechtensteiner" with similar adjectives in the lesson.*

---

lienal *(adjective)*

Of or relating to the spleen.

- *A "lienal" approach may work better in this case.*
- *Her writing became clearer after she learned "lienal."*

---

ligan *(noun)*

Goods (or wreckage) on the sea bed that is attached to a buoy so that it can be recovered.

- *She wrote a short paragraph that included "ligan."*

- *He looked up "ligan" because he had never seen it before.*

---

lignify *(verb)*

Convert into wood or cause to become woody.

- *The coach explained when to use "lignify" and when to wait.*
- *She tried to use "lignify" carefully so everyone would understand.*

---

liliaceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Liliaceae.

- *Students compared "liliaceous" with similar adjectives in the lesson.*
- *A "liliaceous" approach may work better in this case.*

---

limacine *(adjective)*

Of or resembling a slug.

- *It is useful to describe something as "limacine" when it is of or resembling a slug.*
- *The speaker chose "limacine" because it captured the feeling precisely.*

---

limacoid *(adjective)*

Of or resembling a slug.

- *It is useful to describe something as "limacoid" when it is of or resembling a slug.*
- *The speaker chose "limacoid" because it captured the feeling precisely.*

---

limewater *(noun)*

Solution of calcium hydroxide in water used as an antacid.

- *He looked up "limewater" because he had never seen it before.*
- *She wrote a short paragraph that included "limewater."*

---

lincolnesque *(adjective)*

Of or relating to or in the manner of Abraham Lincoln.

- *Would you call this situation "lincolnesque"? Explain why.*
- *The speaker chose "lincolnesque" because it captured the feeling precisely.*

---

lincolnian *(adjective)*

Of or relating to or in the manner of Abraham Lincoln.

- *Her writing became clearer after she learned "lincolnian."*
- *Students compared "lincolnian" with similar adjectives in the lesson.*

---

linearise *(verb)*

Make linear or get into a linear form.

- *She tried to use "linearise" carefully so everyone would understand.*
- *Can you use "linearise" in a sentence that fits this situation?*

---

linecut *(noun)*

A print obtained from a line drawing.

- *In class, the teacher used "linecut" to mean a print obtained from a line drawing.*
- *The article explained what "linecut" means with a simple example.*

---

linolic acid *(noun)*

A liquid polyunsaturated fatty acid abundant in plant fats and oils; a fatty acid essential for nutrition; used to make soap.

- *The article explained what "linolic acid" means with a simple example.*
- *In class, the teacher used "linolic acid" to mean a liquid polyunsaturated fatty acid abundant in....*

---

linstock *(noun)*

A stick about a meter long with a point on one end (to stick in the ground) and a forked head on the other end (to hold a lighted match); formerly used to fire cannons.

- *She wrote a short paragraph that included "linstock."*
- *Understanding "linstock" helps you talk about this topic clearly.*

---

linuron *(noun)*

A herbicide that kills weeds without harming vegetables.

- *She wrote a short paragraph that included "linuron."*
- *He looked up "linuron" because he had never seen it before.*

---

lipide *(noun)*

An oily organic compound insoluble in water but soluble in organic solvents; essential structural component of living cells (along with proteins and carbohydrates).

- *She wrote a short paragraph that included "lipide."*
- *Understanding "lipide" helps you talk about this topic clearly.*

---

liquidise *(verb)*

Make (a solid substance) liquid, as by heating.

- *In everyday English, people use "liquidise" when talking about this idea.*
- *Learners should practice how to use "liquidise" in real sentences.*

---

liquidiser *(noun)*

An electrically powered mixer with whirling blades that mix or chop or liquefy foods.

- *The article explained what "liquidiser" means with a simple example.*
- *Understanding "liquidiser" helps you talk about this topic clearly.*

---

liquidize *(verb)*

Make (a solid substance) liquid, as by heating.

- *The coach explained when to use "liquidize" and when to wait.*
- *He did not know how to use "liquidize" until he saw an example.*

---

liquidizer *(noun)*

An electrically powered mixer with whirling blades that mix or chop or liquefy foods.

- *He looked up "liquidizer" because he had never seen it before.*
- *She wrote a short paragraph that included "liquidizer."*

---

lithane *(noun)*

A white powder (LiCO3) used in manufacturing glass and ceramics and as a drug; the drug (trade names Lithane or Lithonate or Eskalith) is used to treat some forms of depression and manic episodes of manic-depressive disorder.

- *The article explained what "lithane" means with a simple example.*
- *In class, the teacher used "lithane" to mean a white powder (lico3) used in manufacturing glass....*

---

lithoglyptics *(noun)*

The art of engraving on precious stones.

- *She wrote a short paragraph that included "lithoglyptics."*
- *He looked up "lithoglyptics" because he had never seen it before.*

---

lithomantic *(adjective)*

Of or relating to lithomancy.

- *Students compared "lithomantic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "lithomantic."*

---

lithonate *(noun)*

A white powder (LiCO3) used in manufacturing glass and ceramics and as a drug; the drug (trade names Lithane or Lithonate or Eskalith) is used to treat some forms of depression and manic episodes of manic-depressive disorder.

- *Understanding "lithonate" helps you talk about this topic clearly.*
- *The article explained what "lithonate" means with a simple example.*

---

lithophytic *(adjective)*

Of or relating to lithophytes.

- *Her writing became clearer after she learned "lithophytic."*
- *Would you call this situation "lithophytic"? Explain why.*

---

lithuresis *(noun)*

Passing small stones with the urine.

- *Understanding "lithuresis" helps you talk about this topic clearly.*
- *In class, the teacher used "lithuresis" to mean passing small stones with the urine.*

---

litterbin *(noun)*

Bin (usually in or outside a public building) into which the public can put rubbish.

- *She wrote a short paragraph that included "litterbin."*
- *He looked up "litterbin" because he had never seen it before.*

---

lobated *(adjective)*

Having or resembling a lobe or lobes.

- *A "lobated" approach may work better in this case.*
- *Students compared "lobated" with similar adjectives in the lesson.*

---

lobeliaceous *(adjective)*

Belonging to the family Lobeliaceae.

- *A "lobeliaceous" approach may work better in this case.*
- *Students compared "lobeliaceous" with similar adjectives in the lesson.*

---

lockage *(noun)*

A system of locks in a canal or waterway.

- *In class, the teacher used "lockage" to mean a system of locks in a canal or waterway.*
- *The article explained what "lockage" means with a simple example.*

---

lockring *(noun)*

Washer that prevents a nut from loosening.

- *They discussed "lockring" during the group presentation.*
- *Understanding "lockring" helps you talk about this topic clearly.*

---

logogrammatic *(adjective)*

Of or relating to logograms or logographs.

- *Would you call this situation "logogrammatic"? Explain why.*
- *A "logogrammatic" approach may work better in this case.*

---

longbeard *(noun)*

A stoneware drinking jug with a long neck; decorated with a caricature of Cardinal Bellarmine (17th century).

- *In class, the teacher used "longbeard" to mean a stoneware drinking jug with a long neck;....*
- *He looked up "longbeard" because he had never seen it before.*

---

lorenz okenfuss *(noun)*

German naturalist whose speculations that plants and animals are made up of tiny living 'infusoria' led to the cell theory (1779-1851).

- *He looked up "lorenz okenfuss" because he had never seen it before.*
- *They discussed "lorenz okenfuss" during the group presentation.*

---

lubber's hole *(noun)*

Hole in a platform on a mast through which a sailor can climb without going out on the shrouds.

- *He looked up "lubber's hole" because he had never seen it before.*
- *They discussed "lubber's hole" during the group presentation.*

---

lucifugal *(adjective)*

Light-avoiding.

- *Would you call this situation "lucifugal"? Explain why.*
- *Her writing became clearer after she learned "lucifugal."*

---

lucifugous *(adjective)*

Light-avoiding.

- *Would you call this situation "lucifugous"? Explain why.*

- *Students compared "lucifugous" with similar adjectives in the lesson.*

---

lugsail *(noun)*

A sail with four corners that is hoisted from a yard that is oblique to the mast.

- *The article explained what "lugsail" means with a simple example.*
- *Understanding "lugsail" helps you talk about this topic clearly.*

---

lumbermill *(noun)*

A mill for dressing logs and lumber.

- *The article explained what "lumbermill" means with a simple example.*
- *She wrote a short paragraph that included "lumbermill."*

---

lungyi *(noun)*

A long piece of brightly colored cloth (cotton or silk) used as clothing (a skirt or loincloth or sash etc.) in India and Pakistan and Burma.

- *He looked up "lungyi" because he had never seen it before.*
- *Understanding "lungyi" helps you talk about this topic clearly.*

---

lusterware *(noun)*

Pottery with a metallic sheen produced by adding metallic oxides to the glaze.

- *He looked up "lusterware" because he had never seen it before.*
- *In class, the teacher used "lusterware" to mean pottery with a metallic sheen produced by adding....*

---

lustrate *(verb)*

Purify by means of a ritual; also used in post-Communist countries to refer to the political cleansing of former officials.

- *She tried to use "lustrate" carefully so everyone would understand.*
- *The coach explained when to use "lustrate" and when to wait.*

---

lutecium *(noun)*

A trivalent metallic element of the rare earth group; usually occurs in association with yttrium.

- *Understanding "lutecium" helps you talk about this topic clearly.*
- *They discussed "lutecium" during the group presentation.*

---

luteotropin *(noun)*

Gonadotropic hormone secreted by the anterior pituitary; in females it stimulates growth of the mammary glands and lactation after parturition.

- *The article explained what "luteotropin" means with a simple example.*
- *In class, the teacher used "luteotropin" to mean gonadotropic hormone secreted by the anterior....*

---

luxate *(verb)*

Move out of position.

- *The artificial hip joint luxated and had to be put back surgically.*
- *He did not know how to use "luxate" until he saw an example.*

---

luxembourgian *(adjective)*

Relating to or characteristic of Luxembourg.

- *Luxembourgian food.*
- *It is useful to describe something as "luxembourgian" when it is relating to or characteristic of luxembourg.*

---

lychgate *(noun)*

A roofed gate to a churchyard, formerly used as a temporary shelter for the bier during funerals.

- *The article explained what "lychgate" means with a simple example.*
- *In class, the teacher used "lychgate" to mean a roofed gate to a churchyard, formerly used as a....*

---

lymphangiogram *(noun)*

An angiogram of the lymph nodes and lymph vessels made after the injection of a radiopaque substance.

- *The article explained what "lymphangiogram" means with a simple example.*
- *Understanding "lymphangiogram" helps you talk about this topic clearly.*

---

lymphokine *(noun)*

A cytokine secreted by helper T cells in response to stimulation by antigens and that acts on other cells of the immune system (as by activating macrophages).

- *Understanding "lymphokine" helps you talk about this topic clearly.*
- *The article explained what "lymphokine" means with a simple example.*

---

lymphopoiesis *(noun)*

The formation of lymphocytes in the bone marrow and lymph nodes and thymus and spleen.

- *She wrote a short paragraph that included "lymphopoiesis."*
- *They discussed "lymphopoiesis" during the group presentation.*

---

lyophilisation *(noun)*

A method of drying food or blood plasma or pharmaceuticals or tissue without destroying their physical structure; material is frozen and then warmed in a vacuum so that the ice sublimes.

- *He looked up "lyophilisation" because he had never seen it before.*
- *She wrote a short paragraph that included "lyophilisation."*

---

lyophilise *(verb)*

To dry (blood, serum, or tissue) by freezing in a high vacuum.

- *The coach explained when to use "lyophilise" and when to wait.*
- *Can you use "lyophilise" in a sentence that fits this situation?*

---

lyophilize *(verb)*

To dry (blood, serum, or tissue) by freezing in a high vacuum.

- *He did not know how to use "lyophilize" until he saw an example.*
- *She tried to use "lyophilize" carefully so everyone would understand.*

---

lysogenisation *(noun)*

The process by which a bacterium acquires a phage that becomes integrated into its genome.

- *He looked up "lysogenisation" because he had never seen it before.*
- *She wrote a short paragraph that included "lysogenisation."*

---

lysogenization *(noun)*

The process by which a bacterium acquires a phage that becomes integrated into its genome.

- *They discussed "lysogenization" during the group presentation.*
- *The article explained what "lysogenization" means with a simple example.*

---

lysogenize *(verb)*

Become integrated into the genome of (a bacterium).

- *He did not know how to use "lysogenize" until he saw an example.*
- *She tried to use "lysogenize" carefully so everyone would understand.*

---

macerative *(adjective)*

Accompanied by or characterized by maceration.

- *Macerative degeneration of the liver.*
- *Her writing became clearer after she learned "macerative."*

---

machicolation *(noun)*

A projecting parapet supported by corbels on a medieval castle; has openings through which stones or boiling water could be dropped on an enemy.

- *The article explained what "machicolation" means with a simple example.*
- *In class, the teacher used "machicolation" to mean a projecting parapet supported by corbels on a....*

---

machmeter *(noun)*

Speedometer for measuring the speed of an aircraft relative to the speed of sound.

- *Understanding "machmeter" helps you talk about this topic clearly.*
- *In class, the teacher used "machmeter" to mean speedometer for measuring the speed of an aircraft....*

---

macrencephalic *(adjective)*

Having a large brain case.

- *The speaker chose “macrencephalic” because it captured the feeling precisely.*
- *A “macrencephalic” approach may work better in this case.*

---

macrencephalous *(adjective)*

Having a large brain case.

- *Students compared “macrencephalous” with similar adjectives in the lesson.*
- *Would you call this situation “macrencephalous”? Explain why.*

---

macrocephalic *(adjective)*

Having an exceptionally large head and brain.

- *A “macrocephalic” approach may work better in this case.*
- *The speaker chose “macrocephalic” because it captured the feeling precisely.*

---

macrocephalous *(adjective)*

Having an exceptionally large head and brain.

- *It is useful to describe something as “macrocephalous” when it is having an exceptionally large head and brain.*
- *The speaker chose “macrocephalous” because it captured the feeling precisely.*

---

magilp *(noun)*

A medium for oil-paints; linseed oil mixed with mastic varnish or turpentine.

- *He looked up “magilp” because he had never seen it before.*
- *Understanding “magilp” helps you talk about this topic clearly.*

---

magnetograph *(noun)*

A scientific instrument that registers magnetic variations (especially variations of the earth’s magnetic field).

- *They discussed “magnetograph” during the group presentation.*
- *Understanding “magnetograph” helps you talk about this topic clearly.*

---

mahlstick *(noun)*

A long stick that a painter uses to support the hand holding the brush.

- *In class, the teacher used “mahlstick” to mean a long stick that a painter uses to support the....*
- *Understanding “mahlstick” helps you talk about this topic clearly.*

---

maildrop *(noun)*

A drop where mail can be deposited.

- *He looked up “maildrop” because he had never seen it before.*
- *They discussed “maildrop” during the group presentation.*

---

mailsorter *(noun)*

A sorter for sorting mail according to the address.

- *He looked up “mailsorter” because he had never seen it before.*
- *She wrote a short paragraph that included “mailsorter.”*

---

maisonnette *(noun)*

A self-contained apartment (usually on two floors) in a larger house and with its own entrance from the outside.

- *The article explained what “maisonnette” means with a simple example.*
- *In class, the teacher used “maisonnette” to mean a self-contained apartment (usually on two floors)....*

---

malonylurea *(noun)*

A white crystalline acid derived from pyrimidine; used in preparing barbiturate drugs.

- *They discussed “malonylurea” during the group presentation.*
- *In class, the teacher used “malonylurea” to mean a white crystalline acid derived from pyrimidine;....*

---

maltha *(noun)*

A thick black tar intermediate between petroleum and asphalt.

- *She wrote a short paragraph that included “maltha.”*
- *Understanding “maltha” helps you talk about this topic clearly.*

mandibulate *(adjective)*

Having mandibles.

- *It is useful to describe something as "mandibulate" when it is having mandibles.*
- *A "mandibulate" approach may work better in this case.*

mandibulofacial *(adjective)*

Of or relating to the lower jaw and face.

- *The speaker chose "mandibulofacial" because it captured the feeling precisely.*
- *Would you call this situation "mandibulofacial"? Explain why.*

manganate *(noun)*

A salt of manganic acid containing manganese as its anion.

- *He looked up "manganate" because he had never seen it before.*
- *She wrote a short paragraph that included "manganate."*

manganic acid *(noun)*

A dibasic acid (H2MnO4) found only in solution and in manganate salts.

- *The article explained what "manganic acid" means with a simple example.*
- *Understanding "manganic acid" helps you talk about this topic clearly.*

manioca *(noun)*

A starch made by leaching and drying the root of the cassava plant; the source of tapioca; a staple food in the tropics.

- *Understanding "manioca" helps you talk about this topic clearly.*
- *The article explained what "manioca" means with a simple example.*

mantelet *(noun)*

Portable bulletproof shelter.

- *In class, the teacher used "mantelet" to mean portable bulletproof shelter.*
- *They discussed "mantelet" during the group presentation.*

marbleise *(verb)*

Make something look like marble.

- *Learners should practice how to use "marbleise" in real sentences.*
- *He did not know how to use "marbleise" until he saw an example.*

marbleize *(verb)*

Make something look like marble.

- *Marbleize the fireplace.*
- *Can you use "marbleize" in a sentence that fits this situation?*

margaric acid *(noun)*

A colorless crystalline synthetic fatty acid.

- *They discussed "margaric acid" during the group presentation.*
- *He looked up "margaric acid" because he had never seen it before.*

marlinespike *(noun)*

A pointed iron hand tool that is used to separate strands of a rope or cable (as in splicing).

- *In class, the teacher used "marlinespike" to mean a pointed iron hand tool that is used to separate....*
- *The article explained what "marlinespike" means with a simple example.*

marlingspike *(noun)*

A pointed iron hand tool that is used to separate strands of a rope or cable (as in splicing).

- *Understanding "marlingspike" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "marlingspike."*

marlite *(noun)*

Metamorphic rock with approximately the same composition as marl.

- *In class, the teacher used "marlite" to mean metamorphic rock with approximately the same....*
- *Understanding "marlite" helps you talk about this topic clearly.*

---

marlstone *(noun)*

Metamorphic rock with approximately the same composition as marl.

- *The article explained what "marlstone" means with a simple example.*
- *In class, the teacher used "marlstone" to mean metamorphic rock with approximately the same....*

---

marmorean *(adjective)*

Of or relating to or characteristic of marble.

- *Would you call this situation "marmorean"? Explain why.*
- *A "marmorean" approach may work better in this case.*

---

marqueterie *(noun)*

Inlaid veneers are fitted together to form a design or picture that is then used to ornament furniture.

- *In class, the teacher used "marqueterie" to mean inlaid veneers are fitted together to form a design....*
- *They discussed "marqueterie" during the group presentation.*

---

masculinisation *(noun)*

The abnormal development of male sexual characteristics in a female (usually as the result of hormone therapies or adrenal malfunction).

- *They discussed "masculinisation" during the group presentation.*
- *She wrote a short paragraph that included "masculinisation."*

---

masculinise *(verb)*

Produce virilism in or cause to assume masculine characteristics, as through a hormonal imbalance or hormone therapy.

- *He did not know how to use "masculinise" until he saw an example.*
- *The coach explained when to use "masculinise" and when to wait.*

---

massicot *(noun)*

The mineral form of lead monoxide; in the form of yellow powder it is used as a pigment.

- *The article explained what "massicot" means with a simple example.*
- *She wrote a short paragraph that included "massicot."*

---

massicotite *(noun)*

The mineral form of lead monoxide; in the form of yellow powder it is used as a pigment.

- *She wrote a short paragraph that included "massicotite."*
- *They discussed "massicotite" during the group presentation.*

---

mastabah *(noun)*

An ancient Egyptian mud-brick tomb with a rectangular base and sloping sides and flat roof.

- *They discussed "mastabah" during the group presentation.*
- *In class, the teacher used "mastabah" to mean an ancient egyptian mud-brick tomb with a....*

---

matchboard *(noun)*

A board that has a groove cut into one edge and a tongue cut into the other so they fit tightly together (as in a floor).

- *She wrote a short paragraph that included "matchboard."*
- *He looked up "matchboard" because he had never seen it before.*

---

matchet *(noun)*

A large heavy knife used in Central and South America as a weapon or for cutting vegetation.

- *He looked up "matchet" because he had never seen it before.*
- *In class, the teacher used "matchet" to mean a large heavy knife used in central and south....*

---

maturate *(verb)*

Develop and reach maturity; undergo maturation.

- *In everyday English, people use "maturate" when talking about this idea.*

- *Can you use "maturate" in a sentence that fits this situation?*

---

maturement *(noun)*

Coming to full development; becoming mature.

- *He looked up "maturement" because he had never seen it before.*
- *She wrote a short paragraph that included "maturement."*

---

matutinal *(adjective)*

Pertaining to or occurring in the morning.

- *Took his matutinal walk.*
- *The speaker chose "matutinal" because it captured the feeling precisely.*

---

maulstick *(noun)*

A long stick that a painter uses to support the hand holding the brush.

- *She wrote a short paragraph that included "maulstick."*
- *He looked up "maulstick" because he had never seen it before.*

---

mausoleum at halicarnasus *(noun)*

A white marble mausoleum 140 feet high built in 352 BC at Halicarnassus as a memorial to a king; destroyed in 1402.

- *She wrote a short paragraph that included "mausoleum at halicarnasus."*
- *They discussed "mausoleum at halicarnasus" during the group presentation.*

---

maxillodental *(adjective)*

Of or relating to the upper jaw and its associated teeth.

- *Students compared "maxillodental" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "maxillodental."*

---

maxillomandibular *(adjective)*

Relating to the upper and lower jaws.

- *Her writing became clearer after she learned "maxillomandibular."*
- *Students compared "maxillomandibular" with similar adjectives in the lesson.*

---

mecopterous *(adjective)*

Of or relating to mecopterans.

- *It is useful to describe something as "mecopterous" when it is of or relating to mecopterans.*
- *The speaker chose "mecopterous" because it captured the feeling precisely.*

---

mediatory *(adjective)*

Of or related to or directed toward mediation.

- *Would you call this situation "mediatory"? Explain why.*
- *Students compared "mediatory" with similar adjectives in the lesson.*

---

medullated *(adjective)*

(of neurons) covered with a layer of myelin.

- *Her writing became clearer after she learned "medullated."*
- *The speaker chose "medullated" because it captured the feeling precisely.*

---

megakaryocytic *(adjective)*

Of or pertaining to large bone marrow cells.

- *It is useful to describe something as "megakaryocytic" when it is of or pertaining to large bone marrow cells.*
- *Would you call this situation "megakaryocytic"? Explain why.*

---

megilp *(noun)*

A medium for oil-paints; linseed oil mixed with mastic varnish or turpentine.

- *Understanding "megilp" helps you talk about this topic clearly.*
- *The article explained what "megilp" means with a simple example.*

---

meitnerium *(noun)*

A radioactive transuranic element.

- *She wrote a short paragraph that included "meitnerium."*
- *The article explained what "meitnerium" means with a simple example.*

melaena *(noun)*

Abnormally dark tarry feces containing blood (usually from gastrointestinal bleeding).

- *The article explained what "melaena" means with a simple example.*
- *Understanding "melaena" helps you talk about this topic clearly.*

melanise *(verb)*

Convert into, or infiltrate with melanin.

- *Learners should practice how to use "melanise" in real sentences.*
- *In everyday English, people use "melanise" when talking about this idea.*

melanize *(verb)*

Convert into, or infiltrate with melanin.

- *Can you use "melanize" in a sentence that fits this situation?*
- *The coach explained when to use "melanize" and when to wait.*

membranophone *(noun)*

A musical percussion instrument; usually consists of a hollow cylinder with a membrane stretched across each end.

- *She wrote a short paragraph that included "membranophone."*
- *The article explained what "membranophone" means with a simple example.*

mensal *(adjective)*

The dining table.

- *Students compared "mensal" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "mensal."*

menstruum *(noun)*

The monthly discharge of blood from the uterus of nonpregnant women from puberty to menopause; ; –Hippocrates; –Aristotle.

- *In class, the teacher used "menstruum" to mean the monthly discharge of blood from the uterus of....*
- *They discussed "menstruum" during the group presentation.*

mercator's projection *(noun)*

A map projection of the earth onto a cylinder; areas appear greater the farther they are from the equator.

- *Understanding "mercator's projection" helps you talk about this topic clearly.*
- *They discussed "mercator's projection" during the group presentation.*

mercerise *(verb)*

Treat to strengthen and improve the luster.

- *He did not know how to use "mercerise" until he saw an example.*
- *Can you use "mercerise" in a sentence that fits this situation?*

mercerize *(verb)*

Treat to strengthen and improve the luster.

- *Mercerize cotton.*
- *Learners should practice how to use "mercerize" in real sentences.*

mercurous *(adjective)*

Of or containing mercury.

- *Her writing became clearer after she learned "mercurous."*
- *The speaker chose "mercurous" because it captured the feeling precisely.*

mercurous chloride *(noun)*

A tasteless colorless powder used medicinally as a cathartic.

- *They discussed "mercurous chloride" during the group presentation.*
- *He looked up "mercurous chloride" because he had never seen it before.*

---

mesoblastic *(adjective)*

Relating to or derived from the mesoderm.

- *Students compared "mesoblastic" with similar adjectives in the lesson.*
- *Would you call this situation "mesoblastic"? Explain why.*

---

mesonic *(adjective)*

Of or pertaining to a meson; - Lawrence Wilets.

- *It is useful to describe something as "mesonic" when it is of or pertaining to a meson; - lawrence wilets.*
- *Would you call this situation "mesonic"? Explain why.*

---

mestranol *(noun)*

A synthetic form of estrogen used in combination with a progestin in oral contraceptives.

- *The article explained what "mestranol" means with a simple example.*
- *In class, the teacher used "mestranol" to mean a synthetic form of estrogen used in combination....*

---

metagenesis *(noun)*

Alternation of sexual and asexual generations.

- *The article explained what "metagenesis" means with a simple example.*
- *Understanding "metagenesis" helps you talk about this topic clearly.*

---

metamorphous *(adjective)*

Of or relating to metamorphosis (especially of rocks).

- *Would you call this situation "metamorphous"? Explain why.*
- *Her writing became clearer after she learned "metamorphous."*

---

metaphosphoric acid *(noun)*

A glassy solid acid ([HPO3]n) often used as a dehydrating agent.

- *They discussed "metaphosphoric acid" during the group presentation.*
- *In class, the teacher used "metaphosphoric acid" to mean a glassy solid acid ([hpo3]n) often used as a....*

---

metchnikov *(noun)*

Russian bacteriologist in France who formulated the theory of phagocytosis (1845-1916).

- *In class, the teacher used "metchnikov" to mean russian bacteriologist in france who formulated the....*
- *Understanding "metchnikov" helps you talk about this topic clearly.*

---

meteoritical *(adjective)*

Of or relating to or caused by meteorites.

- *Students compared "meteoritical" with similar adjectives in the lesson.*
- *It is useful to describe something as "meteoritical" when it is of or relating to or caused by meteorites.*

---

meteorologic *(adjective)*

Of or pertaining to atmospheric phenomena, especially weather and weather conditions.

- *Meteorological factors.*
- *Meteorological chart.*

---

meterstick *(noun)*

A rule one meter long (usually marked off in centimeters and millimeters).

- *The article explained what "meterstick" means with a simple example.*
- *Understanding "meterstick" helps you talk about this topic clearly.*

---

methadon *(noun)*

Synthetic narcotic drug similar to morphine but less habit-forming; used in narcotic detoxification and maintenance of heroin addiction.

- *Understanding "methadon" helps you talk about this topic clearly.*
- *The article explained what "methadon" means with a simple example.*

methanal *(noun)*

A colorless poisonous gas; made by the oxidation of methanol.

- *Understanding "methanal" helps you talk about this topic clearly.*
- *They discussed "methanal" during the group presentation.*

methapyrilene *(noun)*

Antihistamine used to treat allergic responses (as rhinitis or dermatitis or pruritus).

- *She wrote a short paragraph that included "methapyrilene."*
- *They discussed "methapyrilene" during the group presentation.*

methylbenzene *(noun)*

A colorless flammable liquid obtained from petroleum or coal tar; used as a solvent for gums and lacquers and in high-octane fuels.

- *He looked up "methylbenzene" because he had never seen it before.*
- *In class, the teacher used "methylbenzene" to mean a colorless flammable liquid obtained from....*

methylthionine chloride *(noun)*

A dark green dye used as a stain, an antiseptic, a chemical indicator, and an antidote in cyanide poisoning.

- *She wrote a short paragraph that included "methylthionine chloride."*
- *He looked up "methylthionine chloride" because he had never seen it before.*

meticorten *(noun)*

A dehydrogenated analogue of cortisol (trade names Orasone or Deltasone or Liquid Pred or Meticorten); used as an anti-inflammatory drug in the treatment of arthritis and as an immunosuppressant.

- *Understanding "meticorten" helps you talk about this topic clearly.*
- *They discussed "meticorten" during the group presentation.*

metrestick *(noun)*

A rule one meter long (usually marked off in centimeters and millimeters).

- *The article explained what "metrestick" means with a simple example.*
- *Understanding "metrestick" helps you talk about this topic clearly.*

metricate *(verb)*

Convert from a non-metric to the metric system.

- *The coach explained when to use "metricate" and when to wait.*
- *Can you use "metricate" in a sentence that fits this situation?*

metricise *(verb)*

Convert from a non-metric to the metric system.

- *He did not know how to use "metricise" until he saw an example.*
- *In everyday English, people use "metricise" when talking about this idea.*

metricize *(verb)*

Convert from a non-metric to the metric system.

- *Learners should practice how to use "metricize" in real sentences.*
- *The coach explained when to use "metricize" and when to wait.*

metrify *(verb)*

Convert from a non-metric to the metric system.

- *Learners should practice how to use "metrify" in real sentences.*
- *He did not know how to use "metrify" until he saw an example.*

metycaine *(noun)*

A compound used in the form of its hydrochloride as a local or spinal anesthetic.

- *They discussed "metycaine" during the group presentation.*
- *She wrote a short paragraph that included "metycaine."*

mezzo-relievo *(noun)*

A sculptural relief between low relief and high relief.

- *In class, the teacher used "mezzo-relievo" to mean a sculptural relief between low relief and high relief.*
- *They discussed "mezzo-relievo" during the group presentation.*

---

michelangelesque *(adjective)*

In the manner of Michelangelo.

- *It is useful to describe something as "michelangelesque" when it is in the manner of michelangelo.*
- *Students compared "michelangelesque" with similar adjectives in the lesson.*

---

microbic *(adjective)*

Of or involving or caused by or being microbes.

- *It is useful to describe something as "microbic" when it is of or involving or caused by or being microbes.*
- *Would you call this situation "microbic"? Explain why.*

---

microcephalous *(adjective)*

Having an abnormally small head and underdeveloped brain.

- *Would you call this situation "microcephalous"? Explain why.*
- *A "microcephalous" approach may work better in this case.*

---

micrometeoric *(adjective)*

Of or relating to micrometeorites.

- *Would you call this situation "micrometeoric"? Explain why.*
- *Students compared "micrometeoric" with similar adjectives in the lesson.*

---

micrometeoritic *(adjective)*

Of or relating to micrometeorites.

- *Her writing became clearer after she learned "micrometeoritic."*
- *Students compared "micrometeoritic" with similar adjectives in the lesson.*

---

microphoning *(noun)*

The transduction of sound waves into electrical waves (by a microphone).

- *The article explained what "microphoning" means with a simple example.*
- *Understanding "microphoning" helps you talk about this topic clearly.*

---

microphotometer *(noun)*

Special kind of densitometer that measures density variations over a very small area.

- *She wrote a short paragraph that included "microphotometer."*
- *He looked up "microphotometer" because he had never seen it before.*

---

micropylar *(adjective)*

Of or relating to a micropyle.

- *Students compared "micropylar" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "micropylar."*

---

microtaggant *(noun)*

(trademark) a microscopic and traceable identification particle used to trace explosives or other hazardous materials or to prevent counterfeiting.

- *Understanding "microtaggant" helps you talk about this topic clearly.*
- *In class, the teacher used "microtaggant" to mean (trademark) a microscopic and traceable....*

---

middlebreaker *(noun)*

Moldboard plow with a double moldboard designed to move dirt to either side of a central furrow.

- *They discussed "middlebreaker" during the group presentation.*
- *The article explained what "middlebreaker" means with a simple example.*

---

midiron *(noun)*

Long iron with a nearly vertical face.

- *He looked up "midiron" because he had never seen it before.*
- *Understanding "midiron" helps you talk about this topic clearly.*

---

migrational *(adjective)*

Of or related to migration.

- *A "migrational" approach may work better in this case.*
- *The speaker chose "migrational" because it captured the feeling precisely.*

---

mileometer *(noun)*

A meter that shows mileage traversed.

- *She wrote a short paragraph that included "mileometer."*
- *He looked up "mileometer" because he had never seen it before.*

---

milkwagon *(noun)*

Wagon for delivering milk.

- *The article explained what "milkwagon" means with a simple example.*
- *In class, the teacher used "milkwagon" to mean wagon for delivering milk.*

---

millboard *(noun)*

Stout pasteboard used to bind books.

- *Understanding "millboard" helps you talk about this topic clearly.*
- *In class, the teacher used "millboard" to mean stout pasteboard used to bind books.*

---

milldam *(noun)*

Dam to make a millpond to provide power for a water mill.

- *He looked up "milldam" because he had never seen it before.*
- *They discussed "milldam" during the group presentation.*

---

millennian *(adjective)*

Relating to a millennium or span of a thousand years.

- *Her writing became clearer after she learned "millennian."*
- *Students compared "millennian" with similar adjectives in the lesson.*

---

milliammeter *(noun)*

A sensitive ammeter graduated in milliamperes.

- *He looked up "milliammeter" because he had never seen it before.*
- *In class, the teacher used "milliammeter" to mean a sensitive ammeter graduated in milliamperes.*

---

millivoltmeter *(noun)*

Sensitive voltmeter that can measure voltage in millivolts.

- *They discussed "millivoltmeter" during the group presentation.*
- *She wrote a short paragraph that included "millivoltmeter."*

---

millrun *(noun)*

A channel for the water current that turns a millwheel.

- *The article explained what "millrun" means with a simple example.*
- *In class, the teacher used "millrun" to mean a channel for the water current that turns a millwheel.*

---

millwheel *(noun)*

Water wheel that is used to drive machinery in a mill.

- *The article explained what "millwheel" means with a simple example.*
- *Understanding "millwheel" helps you talk about this topic clearly.*

---

milometer *(noun)*

A meter that shows mileage traversed.

- *Understanding "milometer" helps you talk about this topic clearly.*
- *He looked up "milometer" because he had never seen it before.*

miniaturise *(verb)*

Design or construct on a smaller scale.

- *Learners should practice how to use "miniaturise" in real sentences.*
- *In everyday English, people use "miniaturise" when talking about this idea.*

minisub *(noun)*

Submersible vessel for one or two persons; for naval operations or underwater exploration.

- *The article explained what "minisub" means with a simple example.*
- *In class, the teacher used "minisub" to mean submersible vessel for one or two persons; for....*

minisubmarine *(noun)*

Submersible vessel for one or two persons; for naval operations or underwater exploration.

- *The article explained what "minisubmarine" means with a simple example.*
- *They discussed "minisubmarine" during the group presentation.*

miotic *(adjective)*

Of or relating to or causing constriction of the pupil of the eye.

- *A miotic drug.*
- *The speaker chose "miotic" because it captured the feeling precisely.*

miotic drug *(noun)*

A drug that causes miosis (constriction of the pupil of the eye).

- *She wrote a short paragraph that included "miotic drug."*
- *Understanding "miotic drug" helps you talk about this topic clearly.*

mispickel *(noun)*

A silver-white or grey ore of arsenic.

- *She wrote a short paragraph that included "mispickel."*
- *Understanding "mispickel" helps you talk about this topic clearly.*

mithraistic *(adjective)*

Of or relating to Mithraism or its god.

- *The speaker chose "mithraistic" because it captured the feeling precisely.*
- *A "mithraistic" approach may work better in this case.*

mizenmast *(noun)*

Third mast from the bow in a vessel having three or more masts; the after and shorter mast of a yawl, ketch, or dandy.

- *In class, the teacher used "mizenmast" to mean third mast from the bow in a vessel having three or....*
- *The article explained what "mizenmast" means with a simple example.*

mnemotechnic *(adjective)*

Of or relating to or involved the practice of aiding the memory.

- *Would you call this situation "mnemotechnic"? Explain why.*
- *Students compared "mnemotechnic" with similar adjectives in the lesson.*

mnemotechnical *(adjective)*

Of or relating to or involved the practice of aiding the memory.

- *The speaker chose "mnemotechnical" because it captured the feeling precisely.*
- *It is useful to describe something as "mnemotechnical" when it is of or relating to or involved the practice of....*

mobcap *(noun)*

Large high frilly cap with a full crown; formerly worn indoors by women.

- *Understanding "mobcap" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "mobcap."*

mocassin *(noun)*

Soft leather shoe; originally worn by Native Americans.

- *The article explained what "mocassin" means with a simple example.*
- *In class, the teacher used "mocassin" to mean soft leather shoe; originally worn by native americans.*

---

moistener *(noun)*

A device that dampens or moistens something.

- *He looked up "moistener" because he had never seen it before.*
- *In class, the teacher used "moistener" to mean a device that dampens or moistens something.*

---

molal *(adjective)*

Designating a solution containing one mole of solute per kilogram of solvent.

- *A "molal" approach may work better in this case.*
- *It is useful to describe something as "molal" when it is designating a solution containing one mole of....*

---

molisch reaction *(noun)*

Biochemical indicator of the presence of carbohydrates in a solution; if carbohydrates are present a violet ring is formed by reaction with alpha-naphthol in the presence of sulfuric acid.

- *He looked up "molisch reaction" because he had never seen it before.*
- *They discussed "molisch reaction" during the group presentation.*

---

molisch test *(noun)*

Biochemical indicator of the presence of carbohydrates in a solution; if carbohydrates are present a violet ring is formed by reaction with alpha-naphthol in the presence of sulfuric acid.

- *She wrote a short paragraph that included "molisch test."*
- *Understanding "molisch test" helps you talk about this topic clearly.*

---

molisch's test *(noun)*

Biochemical indicator of the presence of carbohydrates in a solution; if carbohydrates are present a violet ring is formed by reaction with alpha-naphthol in the presence of sulfuric acid.

- *They discussed "molisch's test" during the group presentation.*
- *The article explained what "molisch's test" means with a simple example.*

---

mono-iodotyrosine *(noun)*

Tyrosine with one iodine atom added.

- *In class, the teacher used "mono-iodotyrosine" to mean tyrosine with one iodine atom added.*
- *The article explained what "mono-iodotyrosine" means with a simple example.*

---

monocarboxylic *(adjective)*

Containing one carboxyl group.

- *Her writing became clearer after she learned "monocarboxylic."*
- *Students compared "monocarboxylic" with similar adjectives in the lesson.*

---

monocycle *(noun)*

A vehicle with a single wheel that is driven by pedals.

- *The article explained what "monocycle" means with a simple example.*
- *In class, the teacher used "monocycle" to mean a vehicle with a single wheel that is driven by pedals.*

---

monofocal iol *(noun)*

A lens with a single focus that is used after cataract surgery to provide clear distance vision.

- *In class, the teacher used "monofocal iol" to mean a lens with a single focus that is used after....*
- *The article explained what "monofocal iol" means with a simple example.*

---

monofocal lens implant *(noun)*

A lens with a single focus that is used after cataract surgery to provide clear distance vision.

- *They discussed "monofocal lens implant" during the group presentation.*
- *In class, the teacher used "monofocal lens implant" to mean a lens with a single focus that is used after....*

---

monogenesis *(noun)*

Asexual reproduction by the production and release of spores.

- *The article explained what "monogenesis" means with a simple example.*

- *In class, the teacher used "monogenesis" to mean asexual reproduction by the production and release....*

---

monohybrid *(noun)*

A hybrid produced by crossing parents that are homozygous except for a single gene locus that has two alleles (as in Mendel's experiments with garden peas).

- *The article explained what "monohybrid" means with a simple example.*
- *Understanding "monohybrid" helps you talk about this topic clearly.*

---

monometallic *(adjective)*

Containing one atom of metal in the molecule.

- *Monometallic carbonyls.*
- *It is useful to describe something as "monometallic" when it is containing one atom of metal in the molecule.*

---

monomorphemic *(adjective)*

Consisting of only one morpheme.

- *'raise' is monomorphemic but 'rays' is not.*
- *Her writing became clearer after she learned "monomorphemic."*

---

monophysitic *(adjective)*

Of or relating to Monophysitism.

- *Students compared "monophysitic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "monophysitic."*

---

monosaccharose *(noun)*

A sugar (like sucrose or fructose) that does not hydrolyse to give other sugars; the simplest group of carbohydrates.

- *They discussed "monosaccharose" during the group presentation.*
- *In class, the teacher used "monosaccharose" to mean a sugar (like sucrose or fructose) that does not....*

---

montserratian *(adjective)*

Of or relating to Montserrat or the inhabitants of Montserrat.

- *Montserratian natives.*
- *A "montserratian" approach may work better in this case.*

---

mopboard *(noun)*

A molding covering the joint formed by a wall and the floor.

- *In class, the teacher used "mopboard" to mean a molding covering the joint formed by a wall and....*
- *He looked up "mopboard" because he had never seen it before.*

---

moraceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Moraceae.

- *Would you call this situation "moraceous"? Explain why.*
- *Students compared "moraceous" with similar adjectives in the lesson.*

---

morbilliform *(adjective)*

Of a rash that resembles that of measles.

- *Students compared "morbilliform" with similar adjectives in the lesson.*
- *Would you call this situation "morbilliform"? Explain why.*

---

morphallaxis *(noun)*

Regeneration on a reduced scale of a body part; observed especially in invertebrates such as certain lobsters.

- *He looked up "morphallaxis" because he had never seen it before.*
- *She wrote a short paragraph that included "morphallaxis."*

---

motorise *(verb)*

Equip with armed and armored motor vehicles.

- *Learners should practice how to use "motorise" in real sentences.*
- *The coach explained when to use "motorise" and when to wait.*

---

motorize *(verb)*

Equip with armed and armored motor vehicles.

- *The police around here are not motorized and patrol the streets on horseback.*
- *Motorized scooters are now the rage.*

---

motortruck *(noun)*

An automotive vehicle suitable for hauling.

- *He looked up "motortruck" because he had never seen it before.*
- *Understanding "motortruck" helps you talk about this topic clearly.*

---

mouldboard *(noun)*

Wedge formed by the curved part of a steel plow blade that turns the furrow.

- *The article explained what "mouldboard" means with a simple example.*
- *They discussed "mouldboard" during the group presentation.*

---

mouldboard plough *(noun)*

Plow that has a moldboard.

- *In class, the teacher used "mouldboard plough" to mean plow that has a moldboard.*
- *He looked up "mouldboard plough" because he had never seen it before.*

---

mozartean *(adjective)*

Of or relating to or in the manner of Wolfgang Amadeus Mozart.

- *A "mozartean" approach may work better in this case.*
- *Would you call this situation "mozartean"? Explain why.*

---

mucic acid *(noun)*

A solid acid (C6H10O8) found in milk or sugar.

- *Understanding "mucic acid" helps you talk about this topic clearly.*
- *They discussed "mucic acid" during the group presentation.*

---

muciferous *(adjective)*

Containing or secreting mucus.

- *Students compared "muciferous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "muciferous."*

---

mucinoid *(adjective)*

Resembling mucin.

- *Students compared "mucinoid" with similar adjectives in the lesson.*
- *A "mucinoid" approach may work better in this case.*

---

mucoidal *(adjective)*

Relating to or resembling mucus.

- *It is useful to describe something as "mucoidal" when it is relating to or resembling mucus.*
- *The speaker chose "mucoidal" because it captured the feeling precisely.*

---

mucopolysaccharide *(noun)*

Complex polysaccharides containing an amino group; occur chiefly as components of connective tissue.

- *They discussed "mucopolysaccharide" during the group presentation.*
- *She wrote a short paragraph that included "mucopolysaccharide."*

---

mucopurulent *(adjective)*

Containing or composed of mucus and pus.

- *A "mucopurulent" approach may work better in this case.*
- *Students compared "mucopurulent" with similar adjectives in the lesson.*

---

mucose *(adjective)*

Of or secreting or covered with or resembling mucus.

- *Students compared "mucose" with similar adjectives in the lesson.*
- *It is useful to describe something as "mucose" when it is of or secreting or covered with or resembling mucus.*

---

mudhif *(noun)*

A reed hut in the marshlands of Iraq; rare since the marshes were drained.

- *She wrote a short paragraph that included "mudhif."*
- *The article explained what "mudhif" means with a simple example.*

---

mukataa *(noun)*

An Arabic word for headquarters or administrative center.

- *Arafat was holed up in the mukataa of his West Bank compound.*
- *Understanding "mukataa" helps you talk about this topic clearly.*

---

muramidase *(noun)*

An enzyme found in saliva and sweat and tears that destroys the cell walls of certain bacteria.

- *Understanding "muramidase" helps you talk about this topic clearly.*
- *He looked up "muramidase" because he had never seen it before.*

---

musjid *(noun)*

(Islam) a Muslim place of worship.

- *He looked up "musjid" because he had never seen it before.*
- *In class, the teacher used "musjid" to mean (islam) a muslim place of worship.*

---

musnud *(noun)*

A seat with a cushion that is used as a throne by Indian princes.

- *Understanding "musnud" helps you talk about this topic clearly.*
- *The article explained what "musnud" means with a simple example.*

---

mutafacient *(adjective)*

Capable of inducing mutation (used mainly of intracellular agents).

- *A "mutafacient" approach may work better in this case.*
- *Her writing became clearer after she learned "mutafacient."*

---

muton *(noun)*

The smallest unit of DNA where a mutation can occur.

- *They discussed "muton" during the group presentation.*
- *In class, the teacher used "muton" to mean the smallest unit of dna where a mutation can occur.*

---

mycomycin *(noun)*

A highly unsaturated antibiotic acid obtained from an actinomycete.

- *In class, the teacher used "mycomycin" to mean a highly unsaturated antibiotic acid obtained from....*
- *The article explained what "mycomycin" means with a simple example.*

---

myelic *(adjective)*

Of or relating to the spinal cord.

- *Her writing became clearer after she learned "myelic."*
- *Students compared "myelic" with similar adjectives in the lesson.*

---

myeline *(noun)*

A white fatty substance that forms a medullary sheath around the axis cylinder of some nerve fibers.

- *They discussed "myeline" during the group presentation.*
- *The article explained what "myeline" means with a simple example.*

---

myelinic *(adjective)*

Of or relating to the substance that forms a sheath around the axon of some nerve fibers.

- *It is useful to describe something as "myelinic" when it is of or relating to the substance that forms a sheath....*
- *A "myelinic" approach may work better in this case.*

myelinisation *(noun)*

The development of a myelin sheath around a nerve fiber.

- *The article explained what "myelinisation" means with a simple example.*
- *Understanding "myelinisation" helps you talk about this topic clearly.*

myelinization *(noun)*

The development of a myelin sheath around a nerve fiber.

- *He looked up "myelinization" because he had never seen it before.*
- *She wrote a short paragraph that included "myelinization."*

mylodontid *(noun)*

A variety of extinct edentate.

- *They discussed "mylodontid" during the group presentation.*
- *He looked up "mylodontid" because he had never seen it before.*

mylodontidae *(noun)*

Extinct South American edentates.

- *They discussed "mylodontidae" during the group presentation.*
- *She wrote a short paragraph that included "mylodontidae."*

myocastor *(noun)*

A genus of Capromyidae.

- *The article explained what "myocastor" means with a simple example.*
- *Understanding "myocastor" helps you talk about this topic clearly.*

myocastor coypus *(noun)*

Aquatic South American rodent resembling a small beaver; bred for its fur.

- *Understanding "myocastor coypus" helps you talk about this topic clearly.*
- *In class, the teacher used "myocastor coypus" to mean aquatic south american rodent resembling a small....*

myofibril *(noun)*

One of many contractile filaments that make up a striated muscle fiber.

- *She wrote a short paragraph that included "myofibril."*
- *He looked up "myofibril" because he had never seen it before.*

myofibrilla *(noun)*

One of many contractile filaments that make up a striated muscle fiber.

- *Understanding "myofibrilla" helps you talk about this topic clearly.*
- *The article explained what "myofibrilla" means with a simple example.*

myoid *(adjective)*

Resembling muscle.

- *It is useful to describe something as "myoid" when it is resembling muscle.*
- *The speaker chose "myoid" because it captured the feeling precisely.*

myomorpha *(noun)*

True rats and mice and related rodents.

- *He looked up "myomorpha" because he had never seen it before.*
- *She wrote a short paragraph that included "myomorpha."*

myonecrosis *(noun)*

Localized death of muscle cell fibers.

- *They discussed "myonecrosis" during the group presentation.*
- *He looked up "myonecrosis" because he had never seen it before.*

myoneural junction *(noun)*

The junction between a nerve fiber and the muscle it supplies.

- *He looked up "myoneural junction" because he had never seen it before.*
- *Understanding "myoneural junction" helps you talk about this topic clearly.*

---

myope *(noun)*

A person with myopia; a nearsighted person.

- *Understanding "myope" helps you talk about this topic clearly.*
- *He looked up "myope" because he had never seen it before.*

---

myopus *(noun)*

A genus of Cricetidae.

- *She wrote a short paragraph that included "myopus."*
- *He looked up "myopus" because he had never seen it before.*

---

myosotis scorpiodes *(noun)*

Small perennial herb having bright blue or white flowers.

- *Understanding "myosotis scorpiodes" helps you talk about this topic clearly.*
- *The article explained what "myosotis scorpiodes" means with a simple example.*

---

myotic *(adjective)*

Of or relating to or causing constriction of the pupil of the eye.

- *Her writing became clearer after she learned "myotic."*
- *Would you call this situation "myotic"? Explain why.*

---

myotic drug *(noun)*

A drug that causes miosis (constriction of the pupil of the eye).

- *They discussed "myotic drug" during the group presentation.*
- *Understanding "myotic drug" helps you talk about this topic clearly.*

---

myotis leucifugus *(noun)*

The small common North American bat; widely distributed.

- *They discussed "myotis leucifugus" during the group presentation.*
- *In class, the teacher used "myotis leucifugus" to mean the small common north american bat; widely distributed.*

---

myotis velifer *(noun)*

Small bat of southwest United States that lives in caves etc.

- *In class, the teacher used "myotis velifer" to mean small bat of southwest united states that lives in....*
- *They discussed "myotis velifer" during the group presentation.*

---

myrcia *(noun)*

A genus of tropical American trees and shrubs of the myrtle family.

- *The article explained what "myrcia" means with a simple example.*
- *They discussed "myrcia" during the group presentation.*

---

myrciaria *(noun)*

A genus of tropical American trees and shrubs of the myrtle family.

- *She wrote a short paragraph that included "myrciaria."*
- *Understanding "myrciaria" helps you talk about this topic clearly.*

---

myrciaria cauliflora *(noun)*

Small evergreen tropical tree native to Brazil and West Indies but introduced into southern United States; grown in Brazil for its edible tough-skinned purple grapelike fruit that grows all along the branches.

- *They discussed "myrciaria cauliflora" during the group presentation.*
- *He looked up "myrciaria cauliflora" because he had never seen it before.*

---

myriagram *(noun)*

One ten thousandth of a centner.

- *The article explained what "myriagram" means with a simple example.*

- *In class, the teacher used "myriagram" to mean one ten thousandth of a centner.*

---

myriameter *(noun)*

A metric unit of length equal to 10,000 meters.

- *She wrote a short paragraph that included "myriameter."*
- *The article explained what "myriameter" means with a simple example.*

---

myriametre *(noun)*

A metric unit of length equal to 10,000 meters.

- *She wrote a short paragraph that included "myriametre."*
- *The article explained what "myriametre" means with a simple example.*

---

myrica cerifera *(noun)*

Evergreen aromatic shrubby tree of southeastern United States having small hard berries thickly coated with white wax used for candles.

- *He looked up "myrica cerifera" because he had never seen it before.*
- *She wrote a short paragraph that included "myrica cerifera."*

---

myrica pensylvanica *(noun)*

Deciduous aromatic shrub of eastern North America with grey-green wax-coated berries.

- *Understanding "myrica pensylvanica" helps you talk about this topic clearly.*
- *In class, the teacher used "myrica pensylvanica" to mean deciduous aromatic shrub of eastern north america....*

---

myricaceae *(noun)*

Constituting the order Myricales.

- *They discussed "myricaceae" during the group presentation.*
- *In class, the teacher used "myricaceae" to mean constituting the order myricales.*

---

myricales *(noun)*

Coextensive with the family Myricaceae.

- *The article explained what "myricales" means with a simple example.*
- *In class, the teacher used "myricales" to mean coextensive with the family myricaceae.*

---

myricaria *(noun)*

Small genus of deciduous shrubs or subshrubs of southern Europe to Siberia and China; tolerant of chalky soil.

- *She wrote a short paragraph that included "myricaria."*
- *Understanding "myricaria" helps you talk about this topic clearly.*

---

myricaria germanica *(noun)*

Eurasian shrub resembling the tamarisk.

- *Understanding "myricaria germanica" helps you talk about this topic clearly.*
- *The article explained what "myricaria germanica" means with a simple example.*

---

myringa *(noun)*

The membrane in the ear that vibrates to sound.

- *The article explained what "myringa" means with a simple example.*
- *In class, the teacher used "myringa" to mean the membrane in the ear that vibrates to sound.*

---

myristicaceae *(noun)*

Family of aromatic tropical trees with arillate seeds.

- *They discussed "myristicaceae" during the group presentation.*
- *She wrote a short paragraph that included "myristicaceae."*

---

myrmecia *(noun)*

Bulldog ants.

- *The article explained what "myrmecia" means with a simple example.*
- *They discussed "myrmecia" during the group presentation.*

---

myrmecobius *(noun)*

Banded anteater.

- *They discussed "myrmecobius" during the group presentation.*
- *She wrote a short paragraph that included "myrmecobius."*

---

myrmecobius fasciatus *(noun)*

Small Australian marsupial having long snout and strong claws for feeding on termites; nearly extinct.

- *He looked up "myrmecobius fasciatus" because he had never seen it before.*
- *Understanding "myrmecobius fasciatus" helps you talk about this topic clearly.*

---

myrmecophaga *(noun)*

Type genus of the Myrmecophagidae; South American ant bear.

- *They discussed "myrmecophaga" during the group presentation.*
- *Understanding "myrmecophaga" helps you talk about this topic clearly.*

---

myrmecophaga jubata *(noun)*

Large shaggy-haired toothless anteater with long tongue and powerful claws; of South America.

- *Understanding "myrmecophaga jubata" helps you talk about this topic clearly.*
- *In class, the teacher used "myrmecophaga jubata" to mean large shaggy-haired toothless anteater with long....*

---

myrmecophagidae *(noun)*

New World anteaters.

- *They discussed "myrmecophagidae" during the group presentation.*
- *In class, the teacher used "myrmecophagidae" to mean new world anteaters.*

---

myrmecophagous *(adjective)*

Feeding on ants.

- *Myrmecophagous squirrel.*
- *A "myrmecophagous" approach may work better in this case.*

---

myrmecophile *(noun)*

An organism such as an insect that habitually shares the nest of a species of ant.

- *He looked up "myrmecophile" because he had never seen it before.*
- *Understanding "myrmecophile" helps you talk about this topic clearly.*

---

myrmecophilous *(adjective)*

Living symbiotically with ants.

- *It is useful to describe something as "myrmecophilous" when it is living symbiotically with ants.*
- *The speaker chose "myrmecophilous" because it captured the feeling precisely.*

---

myrmecophyte *(noun)*

Plant that affords shelter or food to ants that live in symbiotic relations with it.

- *He looked up "myrmecophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "myrmecophyte."*

---

myrmecophytic *(adjective)*

Of or relating to myrmecophytes.

- *A "myrmecophytic" approach may work better in this case.*
- *Students compared "myrmecophytic" with similar adjectives in the lesson.*

---

myrmeleon *(noun)*

Type genus of the Myrmeleontidae: antlions.

- *In class, the teacher used "myrmeleon" to mean type genus of the myrmeleontidae: antlions.*
- *The article explained what "myrmeleon" means with a simple example.*

---

myrobalan *(noun)*

Small Asiatic tree bearing edible red or yellow fruit.

- *They discussed “myrobalan” during the group presentation.*
- *The article explained what “myrobalan” means with a simple example.*

---

myrobalan plum *(noun)*

Small Asiatic tree bearing edible red or yellow fruit.

- *The article explained what “myrobalan plum” means with a simple example.*
- *Understanding “myrobalan plum” helps you talk about this topic clearly.*

---

myroxylon *(noun)*

A genus of tropical American trees having pinnate leaves and white flowers.

- *They discussed “myroxylon” during the group presentation.*
- *The article explained what “myroxylon” means with a simple example.*

---

myroxylon balsamum *(noun)*

Medium-sized tropical American tree yielding tolu balsam and a fragrant hard wood used for high-grade furniture and cabinetwork.

- *They discussed “myroxylon balsamum” during the group presentation.*
- *Understanding “myroxylon balsamum” helps you talk about this topic clearly.*

---

myroxylon balsamum pereirae *(noun)*

Tree of South and Central America yielding an aromatic balsam.

- *In class, the teacher used “myroxylon balsamum pereirae” to mean tree of south and central america yielding an....*
- *The article explained what “myroxylon balsamum pereirae” means with a simple example.*

---

myroxylon pereirae *(noun)*

Tree of South and Central America yielding an aromatic balsam.

- *In class, the teacher used “myroxylon pereirae” to mean tree of south and central america yielding an....*
- *He looked up “myroxylon pereirae” because he had never seen it before.*

---

myroxylon toluiferum *(noun)*

Medium-sized tropical American tree yielding tolu balsam and a fragrant hard wood used for high-grade furniture and cabinetwork.

- *The article explained what “myroxylon toluiferum” means with a simple example.*
- *She wrote a short paragraph that included “myroxylon toluiferum.”*

---

myrrhis *(noun)*

European perennial herbs having pinnate leaves and umbels of white flowers.

- *Understanding “myrrhis” helps you talk about this topic clearly.*
- *They discussed “myrrhis” during the group presentation.*

---

myrrhis odorata *(noun)*

European herb with soft ferny leaves and white flowers.

- *In class, the teacher used “myrrhis odorata” to mean european herb with soft ferny leaves and white flowers.*
- *Understanding “myrrhis odorata” helps you talk about this topic clearly.*

---

myrsinaceae *(noun)*

Family of Old World tropical trees and shrubs; some in Florida.

- *They discussed “myrsinaceae” during the group presentation.*
- *She wrote a short paragraph that included “myrsinaceae.”*

---

myrsine *(noun)*

Evergreen trees and shrubs having aromatic foliage; Africa; Asia (New Zealand).

- *She wrote a short paragraph that included “myrsine.”*
- *He looked up “myrsine” because he had never seen it before.*

---

myrsine family *(noun)*

Family of Old World tropical trees and shrubs; some in Florida.

- *The article explained what “myrsine family” means with a simple example.*
- *In class, the teacher used “myrsine family” to mean family of old world tropical trees and shrubs; some....*

myrtaceous tree *(noun)*

Trees and shrubs.

- *He looked up "myrtaceous tree" because he had never seen it before.*
- *Understanding "myrtaceous tree" helps you talk about this topic clearly.*

myrtales *(noun)*

Myrtaceae; Combretaceae; Elaeagnaceae; Haloragidaceae; Melastomaceae; Lecythidaceae; Lythraceae; Rhizophoraceae; Onagraceae; Lecythidaceae; Punicaceae.

- *They discussed "myrtales" during the group presentation.*
- *He looked up "myrtales" because he had never seen it before.*

myrtillocactus *(noun)*

Small genus of arborescent cacti of Mexico and Central America.

- *They discussed "myrtillocactus" during the group presentation.*
- *The article explained what "myrtillocactus" means with a simple example.*

myrtillocactus geometrizans *(noun)*

Arborescent cactus of western Mexico bearing a small oblong edible berrylike fruit.

- *The article explained what "myrtillocactus geometrizans" means with a simple example.*
- *In class, the teacher used "myrtillocactus geometrizans" to mean arborescent cactus of western mexico bearing a....*

mysidacea *(noun)*

Opossum shrimp.

- *Understanding "mysidacea" helps you talk about this topic clearly.*
- *He looked up "mysidacea" because he had never seen it before.*

mysidae *(noun)*

Small shrimp-like crustaceans.

- *He looked up "mysidae" because he had never seen it before.*
- *She wrote a short paragraph that included "mysidae."*

mysoline *(noun)*

An anticonvulsant (trade name Mysoline) used to treat grand mal seizures and essential tremor.

- *He looked up "mysoline" because he had never seen it before.*
- *She wrote a short paragraph that included "mysoline."*

mysophobic *(adjective)*

Suffering from mysophobia; abnormally afraid of dirt or contamination.

- *A "mysophobic" approach may work better in this case.*
- *The speaker chose "mysophobic" because it captured the feeling precisely.*

mysticeti *(noun)*

Baleen whales: right whales; rorquals; blue whales; humpbacks.

- *The article explained what "mysticeti" means with a simple example.*
- *She wrote a short paragraph that included "mysticeti."*

mytilid *(noun)*

Marine bivalve mollusk having a dark elongated shell; live attached to solid objects especially in intertidal zones.

- *Understanding "mytilid" helps you talk about this topic clearly.*
- *He looked up "mytilid" because he had never seen it before.*

mytilidae *(noun)*

Marine mussels.

- *Understanding "mytilidae" helps you talk about this topic clearly.*
- *They discussed "mytilidae" during the group presentation.*

myxine *(noun)*

Type genus of the Myxinidae (typical hagfishes).

- *In class, the teacher used "myxine" to mean type genus of the myxinidae (typical hagfishes).*
- *The article explained what "myxine" means with a simple example.*

---

myxine glutinosa *(noun)*

Typical hagfish.

- *In class, the teacher used "myxine glutinosa" to mean typical hagfish.*
- *Understanding "myxine glutinosa" helps you talk about this topic clearly.*

---

myxinidae *(noun)*

Slime-producing marine animals: hagfishes.

- *Understanding "myxinidae" helps you talk about this topic clearly.*
- *The article explained what "myxinidae" means with a simple example.*

---

myxiniformes *(noun)*

Hagfishes as distinguished from lampreys.

- *Understanding "myxiniformes" helps you talk about this topic clearly.*
- *They discussed "myxiniformes" during the group presentation.*

---

myxinikela *(noun)*

Fossil hagfishes.

- *The article explained what "myxinikela" means with a simple example.*
- *Understanding "myxinikela" helps you talk about this topic clearly.*

---

myxinikela siroka *(noun)*

Fossil hagfish of the Pennsylvanian period (c. 300 million years ago) that resembled modern hagfishes.

- *In class, the teacher used "myxinikela siroka" to mean fossil hagfish of the pennsylvanian period (c. 300....*
- *The article explained what "myxinikela siroka" means with a simple example.*

---

myxinoidea *(noun)*

Hagfishes as distinguished from lampreys.

- *They discussed "myxinoidea" during the group presentation.*
- *She wrote a short paragraph that included "myxinoidea."*

---

myxinoidei *(noun)*

Hagfishes as distinguished from lampreys.

- *She wrote a short paragraph that included "myxinoidei."*
- *The article explained what "myxinoidei" means with a simple example.*

---

myxobacter *(noun)*

Bacteria that form colonies in self-produced slime; inhabit moist soils or decaying plant matter or animal waste.

- *In class, the teacher used "myxobacter" to mean bacteria that form colonies in self-produced slime;....*
- *The article explained what "myxobacter" means with a simple example.*

---

myxobacterales *(noun)*

An order of higher bacteria.

- *She wrote a short paragraph that included "myxobacterales."*
- *The article explained what "myxobacterales" means with a simple example.*

---

myxobacteria *(noun)*

Bacteria that form colonies in self-produced slime; inhabit moist soils or decaying plant matter or animal waste.

- *He looked up "myxobacteria" because he had never seen it before.*
- *She wrote a short paragraph that included "myxobacteria."*

---

myxobacteriaceae *(noun)*

Bacteria living mostly in soils and on dung.

- *In class, the teacher used "myxobacteriaceae" to mean bacteria living mostly in soils and on dung.*

- *The article explained what “myxobacteriaceae” means with a simple example.*

---

myxobacteriales *(noun)*

An order of higher bacteria.

- *He looked up “myxobacteriales” because he had never seen it before.*
- *In class, the teacher used “myxobacteriales” to mean an order of higher bacteria.*

---

myxobacterium *(noun)*

Bacteria that form colonies in self-produced slime; inhabit moist soils or decaying plant matter or animal waste.

- *She wrote a short paragraph that included “myxobacterium.”*
- *The article explained what “myxobacterium” means with a simple example.*

---

myxocephalus aenaeus *(noun)*

Small sculpin of the coast of New England.

- *Understanding “myxocephalus aenaeus” helps you talk about this topic clearly.*
- *He looked up “myxocephalus aenaeus” because he had never seen it before.*

---

myxomycete *(noun)*

A slime mold of the class Myxomycetes.

- *He looked up “myxomycete” because he had never seen it before.*
- *She wrote a short paragraph that included “myxomycete.”*

---

myxomycetes *(noun)*

The class of true slime molds; essentially equivalent to the division Myxomycota.

- *They discussed “myxomycetes” during the group presentation.*
- *In class, the teacher used “myxomycetes” to mean the class of true slime molds; essentially....*

---

myxomycota *(noun)*

Slime molds; organisms having a noncellular and multinucleate creeping vegetative phase and a propagative spore-producing stage: comprises Myxomycetes and Acrasiomycetes; in some classifications placed in the kingdom Protoctista.

- *He looked up “myxomycota” because he had never seen it before.*
- *Understanding “myxomycota” helps you talk about this topic clearly.*

---

myxophyceae *(noun)*

Former terms for Cyanophyceae.

- *Understanding “myxophyceae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “myxophyceae.”*

---

myxosporidia *(noun)*

An order in the subclass Cnidosporidia.

- *In class, the teacher used “myxosporidia” to mean an order in the subclass cnidosporidia.*
- *Understanding “myxosporidia” helps you talk about this topic clearly.*

---

myxosporidian *(noun)*

Mostly parasitic in fishes and including various serious pathogens.

- *Understanding “myxosporidian” helps you talk about this topic clearly.*
- *In class, the teacher used “myxosporidian” to mean mostly parasitic in fishes and including various....*

---

myxovirus *(noun)*

Any of a group of RNA viruses including those that cause influenza and mumps.

- *He looked up “myxovirus” because he had never seen it before.*
- *She wrote a short paragraph that included “myxovirus.”*

---

nabalus *(noun)*

Genus of North American and east Asian perennial herbs; sometimes included in genus Prenanthes.

- *He looked up “nabalus” because he had never seen it before.*
- *In class, the teacher used “nabalus” to mean genus of north american and east asian perennial....*

---

nabalus alba *(noun)*

Herb of northeastern North America having drooping clusters of yellowish-white flowers; sometimes placed in genus Prenanthes.

- *He looked up "nabalus alba" because he had never seen it before.*
- *Understanding "nabalus alba" helps you talk about this topic clearly.*

---

nabalus serpentarius *(noun)*

Common perennial herb widely distributed in the southern and eastern United States having drooping clusters of pinkish flowers and thick basal leaves suggesting a lion's foot in shape; sometimes placed in genus Prenanthes.

- *The article explained what "nabalus serpentarius" means with a simple example.*
- *In class, the teacher used "nabalus serpentarius" to mean common perennial herb widely distributed in the....*

---

naboom *(noun)*

Small tree of dry open parts of southern Africa having erect angled branches suggesting candelabra.

- *In class, the teacher used "naboom" to mean small tree of dry open parts of southern africa....*
- *The article explained what "naboom" means with a simple example.*

---

nabothian gland *(noun)*

One of many small glands of the uterine cervix that secrete mucus.

- *He looked up "nabothian gland" because he had never seen it before.*
- *She wrote a short paragraph that included "nabothian gland."*

---

nabumetone *(noun)*

A nonsteroidal anti-inflammatory drug (trade name Relafen).

- *Understanding "nabumetone" helps you talk about this topic clearly.*
- *In class, the teacher used "nabumetone" to mean a nonsteroidal anti-inflammatory drug (trade name....*

---

naemorhedus goral *(noun)*

Small goat antelope with small conical horns; of southern Asian mountains.

- *He looked up "naemorhedus goral" because he had never seen it before.*
- *Understanding "naemorhedus goral" helps you talk about this topic clearly.*

---

nafcil *(noun)*

A penicillinase-resistant form of penicillin (trade name Nafcil) used (usually in the form of its sodium salt) to treat infections caused by penicillin-resistant strains of staphylococci.

- *The article explained what "nafcil" means with a simple example.*
- *In class, the teacher used "nafcil" to mean a penicillinase-resistant form of penicillin (trade....*

---

nafcillin *(noun)*

A penicillinase-resistant form of penicillin (trade name Nafcil) used (usually in the form of its sodium salt) to treat infections caused by penicillin-resistant strains of staphylococci.

- *Understanding "nafcillin" helps you talk about this topic clearly.*
- *He looked up "nafcillin" because he had never seen it before.*

---

nafud *(noun)*

A desert in northern Saudi Arabia that is noted for its red sand and violent winds.

- *He looked up "nafud" because he had never seen it before.*
- *They discussed "nafud" during the group presentation.*

---

nagami *(noun)*

Shrub bearing oval-fruited kumquats.

- *The article explained what "nagami" means with a simple example.*
- *In class, the teacher used "nagami" to mean shrub bearing oval-fruited kumquats.*

---

nagami kumquat *(noun)*

Shrub bearing oval-fruited kumquats.

- *She wrote a short paragraph that included "nagami kumquat."*
- *They discussed "nagami kumquat" during the group presentation.*

---

nageia *(noun)*

Small genus of Asian evergreen trees having columnar crowns and distinguished by leaves lacking a midrib; eastern Asia including India and Philippines and New Guinea.

- *She wrote a short paragraph that included “nageia.”*
- *He looked up “nageia” because he had never seen it before.*

---

nageia nagi *(noun)*

Medium-sized tree having glossy lanceolate leaves; southern China to Taiwan and southern Japan.

- *He looked up “nageia nagi” because he had never seen it before.*
- *She wrote a short paragraph that included “nageia nagi.”*

---

naiadaceae *(noun)*

Monotypic family of aquatic plants having narrow leaves and small flowers.

- *Understanding “naiadaceae” helps you talk about this topic clearly.*
- *He looked up “naiadaceae” because he had never seen it before.*

---

naiadales *(noun)*

An order of aquatic monocotyledonous herbaceous plants.

- *In class, the teacher used “naiadales” to mean an order of aquatic monocotyledonous herbaceous plants.*
- *Understanding “naiadales” helps you talk about this topic clearly.*

---

naiant *(adjective)*

Applied to a fish depicted horizontally.

- *A “naiant” approach may work better in this case.*
- *The speaker chose “naiant” because it captured the feeling precisely.*

---

nailbrush *(noun)*

A brush used to clean a person’s fingernails.

- *Understanding “nailbrush” helps you talk about this topic clearly.*
- *The article explained what “nailbrush” means with a simple example.*

---

nailfile *(noun)*

A small flat file for shaping the nails.

- *Understanding “nailfile” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “nailfile.”*

---

nailrod *(noun)*

Tall marsh plant with cylindrical seed heads that explode when mature shedding large quantities of down; its long flat leaves are used for making mats and chair seats; of North America, Europe, Asia and North Africa.

- *She wrote a short paragraph that included “nailrod.”*
- *He looked up “nailrod” because he had never seen it before.*

---

nainsook *(noun)*

A soft lightweight muslin used especially for babies.

- *Understanding “nainsook” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “nainsook.”*

---

naiveness *(noun)*

Lack of sophistication or worldliness.

- *In class, the teacher used “naiveness” to mean lack of sophistication or worldliness.*
- *He looked up “naiveness” because he had never seen it before.*

---

naja haje *(noun)*

Cobra used by the Pharaohs as a symbol of their power over life and death.

- *He looked up “naja haje” because he had never seen it before.*
- *She wrote a short paragraph that included “naja haje.”*

---

naja nigricollis *(noun)*

Aggressive cobra widely distributed in Africa; rarely bites but spits venom that may cause blindness.

- *They discussed “naja nigricollis” during the group presentation.*
- *The article explained what “naja nigricollis” means with a simple example.*

- *In a stuperous narcotized state.*
- *Her writing became clearer after she learned "narcotized."*

narcotizing *(adjective)*

Inducing stupor or narcosis.

- *Students compared "narcotizing" with similar adjectives in the lesson.*
- *It is useful to describe something as "narcotizing" when it is inducing stupor or narcosis.*

nardoo *(noun)*

Australian clover fern.

- *She wrote a short paragraph that included "nardoo."*
- *He looked up "nardoo" because he had never seen it before.*

narghile *(noun)*

An oriental tobacco pipe with a long flexible tube connected to a container where the smoke is cooled by passing through water.

- *Understanding "narghile" helps you talk about this topic clearly.*
- *They discussed "narghile" during the group presentation.*

nargileh *(noun)*

An oriental tobacco pipe with a long flexible tube connected to a container where the smoke is cooled by passing through water.

- *Understanding "nargileh" helps you talk about this topic clearly.*
- *They discussed "nargileh" during the group presentation.*

narial *(adjective)*

Of or relating to or near the nares.

- *Her writing became clearer after she learned "narial."*
- *Would you call this situation "narial"? Explain why.*

narrow-leaved bottletree *(noun)*

Large tree of Queensland having cream-colored flowers blotched with red inside; sometimes placed in genus Sterculia.

- *She wrote a short paragraph that included "narrow-leaved bottletree."*
- *They discussed "narrow-leaved bottletree" during the group presentation.*

---

narrow-leaved reedmace *(noun)*

Reed maces of America, Europe, North Africa, Asia.

- *They discussed "narrow-leaved reedmace" during the group presentation.*
- *She wrote a short paragraph that included "narrow-leaved reedmace."*

---

narrow-leaved spleenwort *(noun)*

North American fern with narrow fronds on yellowish leafstalks.

- *Understanding "narrow-leaved spleenwort" helps you talk about this topic clearly.*
- *He looked up "narrow-leaved spleenwort" because he had never seen it before.*

---

narrowhead morel *(noun)*

A morel whose pitted fertile body is attached to the stalk with little free skirt around it; the fertile body is grey when young and black in old age.

- *He looked up "narrowhead morel" because he had never seen it before.*
- *In class, the teacher used "narrowhead morel" to mean a morel whose pitted fertile body is attached to....*

---

narthecium *(noun)*

Bog asphodels; sometimes placed in family Melanthiaceae.

- *He looked up "narthecium" because he had never seen it before.*
- *In class, the teacher used "narthecium" to mean bog asphodels; sometimes placed in family melanthiaceae.*

---

narthecium americanum *(noun)*

Of the eastern United States: New Jersey to South Carolina.

- *Understanding "narthecium americanum" helps you talk about this topic clearly.*
- *They discussed "narthecium americanum" during the group presentation.*

---

narthecium ossifragum *(noun)*

Of western Europe: Scandinavia to northern Spain and Portugal.

- *Understanding "narthecium ossifragum" helps you talk about this topic clearly.*
- *They discussed "narthecium ossifragum" during the group presentation.*

---

narwhale *(noun)*

Small Arctic whale the male having a long spiral ivory tusk.

- *He looked up "narwhale" because he had never seen it before.*
- *She wrote a short paragraph that included "narwhale."*

---

nasalis larvatus *(noun)*

Borneo monkey having a long bulbous nose.

- *They discussed "nasalis larvatus" during the group presentation.*
- *He looked up "nasalis larvatus" because he had never seen it before.*

---

nasion *(noun)*

The craniometric point at the bridge of the nose where the frontal and nasal bones of the skull meet.

- *In class, the teacher used "nasion" to mean the craniometric point at the bridge of the nose....*
- *They discussed "nasion" during the group presentation.*

---

nasotracheal tube *(noun)*

A tube inserted into the trachea through the nose and pharynx; used to deliver oxygen.

- *They discussed "nasotracheal tube" during the group presentation.*
- *In class, the teacher used "nasotracheal tube" to mean a tube inserted into the trachea through the nose....*

---

nasturtium amphibium *(noun)*

Perennial herb found on streams and riversides throughout Europe except extreme north and Mediterranean; sometimes placed in genus Nasturtium.

- *He looked up "nasturtium amphibium" because he had never seen it before.*

- *Understanding "nasturtium amphibium" helps you talk about this topic clearly.*

---

nasua narica *(noun)*

Omnivorous mammal of Central America and South America.

- *Understanding "nasua narica" helps you talk about this topic clearly.*
- *In class, the teacher used "nasua narica" to mean omnivorous mammal of central america and south america.*

---

natantia *(noun)*

Shrimp; prawns; etc.

- *Understanding "natantia" helps you talk about this topic clearly.*
- *The article explained what "natantia" means with a simple example.*

---

natator *(noun)*

A person who travels through the water by swimming.

- *They discussed "natator" during the group presentation.*
- *He looked up "natator" because he had never seen it before.*

---

- *The article explained what “nemophila” means with a simple example.*
- *She wrote a short paragraph that included “nemophila.”*

---

nemophila aurita *(noun)*

Straggling California annual herb with deep purple or violet flowers; sometimes placed in genus Nemophila.

- *The article explained what “nemophila aurita” means with a simple example.*
- *They discussed “nemophila aurita” during the group presentation.*

---

nemophila maculata *(noun)*

California annual having white flowers with a deep purple blotch on each petal.

- *They discussed “nemophila maculata” during the group presentation.*
- *She wrote a short paragraph that included “nemophila maculata.”*

---

nemophila menziesii *(noun)*

Delicate California annual having blue flowers marked with dark spots.

- *In class, the teacher used “nemophila menziesii” to mean delicate california annual having blue flowers....*
- *He looked up “nemophila menziesii” because he had never seen it before.*

---

neobiotic *(noun)*

An antibiotic obtained from an actinomycete and used (as a sulphate under the trade name Neobiotic) as an intestinal antiseptic in surgery.

- *Understanding "neobiotic" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "neobiotic."*

---

neoceratodus *(noun)*

Extant Australian lungfishes.

- *Understanding "neoceratodus" helps you talk about this topic clearly.*
- *They discussed "neoceratodus" during the group presentation.*

---

neoceratodus forsteri *(noun)*

An endangered species of lungfish found in rivers in Queensland.

- *In class, the teacher used "neoceratodus forsteri" to mean an endangered species of lungfish found in rivers....*
- *He looked up "neoceratodus forsteri" because he had never seen it before.*

---

neoclassicist *(noun)*

An advocate of neoclassicism.

- *He looked up "neoclassicist" because he had never seen it before.*
- *They discussed "neoclassicist" during the group presentation.*

---

neoclassicistic *(adjective)*

Relating to or advocating neoclassicism.

- *Students compared "neoclassicistic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "neoclassicistic."*

---

neoencephalon *(noun)*

The part of the brain having the most recent phylogenetic origin; the cerebral cortex and related parts.

- *She wrote a short paragraph that included "neoencephalon."*
- *He looked up "neoencephalon" because he had never seen it before.*

---

neofiber *(noun)*

Round-tailed muskrat.

- *Understanding "neofiber" helps you talk about this topic clearly.*
- *They discussed "neofiber" during the group presentation.*

---

neofiber alleni *(noun)*

Of Florida wetlands.

- *The article explained what "neofiber alleni" means with a simple example.*
- *Understanding "neofiber alleni" helps you talk about this topic clearly.*

---

neohygrophorus *(noun)*

A genus of fungi belonging to the family Hygrophoraceae.

- *In class, the teacher used "neohygrophorus" to mean a genus of fungi belonging to the family hygrophoraceae.*
- *They discussed "neohygrophorus" during the group presentation.*

---

neolentinus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *He looked up "neolentinus" because he had never seen it before.*
- *Understanding "neolentinus" helps you talk about this topic clearly.*

---

neolentinus ponderosus *(noun)*

A gilled polypore with a large cap (up to 15 inches in diameter) and a broad stalk; edible when young and tender.

- *Understanding "neolentinus ponderosus" helps you talk about this topic clearly.*
- *They discussed "neolentinus ponderosus" during the group presentation.*

---

neolith *(noun)*

A stone tool from the Neolithic Age.

- *They discussed "neolith" during the group presentation.*
- *The article explained what "neolith" means with a simple example.*

---

neomys *(noun)*

A genus of Soricidae.

- *She wrote a short paragraph that included "neomys."*
- *The article explained what "neomys" means with a simple example.*

---

neomys anomalus *(noun)*

A type of water shrew.

- *The article explained what "neomys anomalus" means with a simple example.*
- *Understanding "neomys anomalus" helps you talk about this topic clearly.*

---

neomys fodiens *(noun)*

Widely distributed Old World water shrew.

- *The article explained what "neomys fodiens" means with a simple example.*
- *Understanding "neomys fodiens" helps you talk about this topic clearly.*

---

neopallium *(noun)*

The cortical part of the neencephalon.

- *He looked up "neopallium" because he had never seen it before.*
- *She wrote a short paragraph that included "neopallium."*

---

neophron *(noun)*

A genus of Accipitridae.

- *The article explained what "neophron" means with a simple example.*
- *Understanding "neophron" helps you talk about this topic clearly.*

---

neophron percnopterus *(noun)*

Small mostly white vulture of Africa and southern Eurasia.

- *She wrote a short paragraph that included "neophron percnopterus."*
- *The article explained what "neophron percnopterus" means with a simple example.*

---

neotenic *(adjective)*

Of or relating to or characterized by neoteny.

- *Neotenic development.*
- *Her writing became clearer after she learned "neotenic."*

---

neotoma fuscipes *(noun)*

Host to Lyme disease tick (Ixodes pacificus) in northern California.

- *The article explained what "neotoma fuscipes" means with a simple example.*
- *Understanding "neotoma fuscipes" helps you talk about this topic clearly.*

---

nepenthaceae *(noun)*

Coextensive with the genus Nepenthes.

- *She wrote a short paragraph that included "nepenthaceae."*
- *They discussed "nepenthaceae" during the group presentation.*

---

nepeta cataria *(noun)*

Hairy aromatic perennial herb having whorls of small white purple-spotted flowers in a terminal spike; used in the past as a domestic remedy; strongly attractive to cats.

- *Understanding "nepeta cataria" helps you talk about this topic clearly.*
- *He looked up "nepeta cataria" because he had never seen it before.*

---

nepeta hederaceae *(noun)*

Trailing European aromatic plant of the mint family having rounded leaves and small purplish flowers often grown in hanging baskets; naturalized in North America; sometimes placed in genus Nepeta.

- *He looked up "nepeta hederaceae" because he had never seen it before.*
- *Understanding "nepeta hederaceae" helps you talk about this topic clearly.*

nephelinite *(noun)*

An igneous rock consisting of nepheline and pyroxene.

- *The article explained what "nephelinite" means with a simple example.*
- *Understanding "nephelinite" helps you talk about this topic clearly.*

nephelite *(noun)*

A whitish mineral consisting of sodium aluminum silicate or potassium aluminum silicate in crystalline form; used in the manufacture of ceramics and enamels.

- *He looked up "nephelite" because he had never seen it before.*
- *She wrote a short paragraph that included "nephelite."*

nephelium *(noun)*

A genus of dicotyledonous trees of the family Sapindaceae that are native to Asia and Australia.

- *She wrote a short paragraph that included "nephelium."*
- *The article explained what "nephelium" means with a simple example.*

nephelium lappaceum *(noun)*

Malayan tree bearing spiny red fruit.

- *She wrote a short paragraph that included "nephelium lappaceum."*
- *Understanding "nephelium lappaceum" helps you talk about this topic clearly.*

nephelium litchi *(noun)*

Chinese tree cultivated especially in Philippines and India for its edible fruit; sometimes placed in genus Nephelium.

- *He looked up "nephelium litchi" because he had never seen it before.*
- *They discussed "nephelium litchi" during the group presentation.*

nephelium longana *(noun)*

Tree of southeastern Asia to Australia grown primarily for its sweet edible fruit resembling litchi nuts; sometimes placed in genera Euphorbia or Nephelium.

- *She wrote a short paragraph that included "nephelium longana."*
- *He looked up "nephelium longana" because he had never seen it before.*

nephelium mutabile *(noun)*

East Indian fruit tree bearing fruit similar to but sweeter than that of the rambutan.

- *Understanding "nephelium mutabile" helps you talk about this topic clearly.*
- *In class, the teacher used "nephelium mutabile" to mean east indian fruit tree bearing fruit similar to but....*

nephoscope *(noun)*

A measuring instrument that uses a grid for measuring the altitude, direction, and velocity of movement of clouds.

- *Understanding "nephoscope" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nephoscope."*

nephrolepis *(noun)*

Small genus of tropical ferns; sometimes placed in Polypodiaceae.

- *They discussed "nephrolepis" during the group presentation.*
- *In class, the teacher used "nephrolepis" to mean small genus of tropical ferns; sometimes placed in....*

nephrolepis exaltata *(noun)*

A sword fern with arching or drooping pinnate fronds; a popular houseplant.

- *She wrote a short paragraph that included "nephrolepis exaltata."*
- *The article explained what "nephrolepis exaltata" means with a simple example.*

nephrolepis exaltata bostoniensis *(noun)*

A sword fern with arching or drooping pinnate fronds; a popular houseplant.

- *She wrote a short paragraph that included "nephrolepis exaltata bostoniensis."*
- *Understanding "nephrolepis exaltata bostoniensis" helps you talk about this topic clearly.*

nephrolepis pectinata *(noun)*

Tropical American fern cultivated for its finely divided greyish-green foliage; West Indies and southern Mexico to Peru and Brazil.

- *In class, the teacher used "nephrolepis pectinata" to mean tropical american fern cultivated for its finely....*
- *They discussed "nephrolepis pectinata" during the group presentation.*

---

nephrolith *(noun)*

A calculus formed in the kidney.

- *They discussed "nephrolith" during the group presentation.*
- *The article explained what "nephrolith" means with a simple example.*

---

nephropsidae *(noun)*

In some classifications coextensive with the Homaridae.

- *He looked up "nephropsidae" because he had never seen it before.*
- *In class, the teacher used "nephropsidae" to mean in some classifications coextensive with the homaridae.*

---

nephrotoxin *(noun)*

Any toxin that affects the kidneys.

- *Understanding "nephrotoxin" helps you talk about this topic clearly.*
- *He looked up "nephrotoxin" because he had never seen it before.*

---

nephthytis *(noun)*

Any plant of the genus Nephthytis.

- *In class, the teacher used "nephthytis" to mean any plant of the genus nephthytis.*
- *The article explained what "nephthytis" means with a simple example.*

---

nepidae *(noun)*

Water scorpions.

- *In class, the teacher used "nepidae" to mean water scorpions.*
- *The article explained what "nepidae" means with a simple example.*

---

nepotist *(noun)*

A powerful person who shows favoritism to relatives or close friends.

- *He looked up "nepotist" because he had never seen it before.*
- *They discussed "nepotist" during the group presentation.*

---

nerita peloronta *(noun)*

Gastropod having reddish toothlike projections around the shell opening; of the Caribbean area.

- *They discussed "nerita peloronta" during the group presentation.*
- *The article explained what "nerita peloronta" means with a simple example.*

---

neritid *(noun)*

Operculate seasnail of coastal waters with a short spiral shell.

- *She wrote a short paragraph that included "neritid."*
- *Understanding "neritid" helps you talk about this topic clearly.*

---

neritid gastropod *(noun)*

Operculate seasnail of coastal waters with a short spiral shell.

- *He looked up "neritid gastropod" because he had never seen it before.*
- *In class, the teacher used "neritid gastropod" to mean operculate seasnail of coastal waters with a short....*

---

neritina *(noun)*

Ornately marked and brightly colored snails of brackish waters.

- *In class, the teacher used "neritina" to mean ornately marked and brightly colored snails of....*
- *They discussed "neritina" during the group presentation.*

---

nerodia sipedon *(noun)*

In some classifications placed in the genus Nerodia; western United States snake that seldom ventures far from water.

- *In class, the teacher used "nerodia sipedon" to mean in some classifications placed in the genus....*

- *The article explained what “nerodia sipedon” means with a simple example.*

---

nerthus *(noun)*

The Teutonic goddess of fertility; later identified with Norse Njord.

- *The article explained what “nerthus” means with a simple example.*
- *She wrote a short paragraph that included “nerthus.”*

---

nervelessly *(adverb)*

In a composed and unconcerned manner.

- *He answered “nervelessly,” which changed the tone of the conversation.*
- *Place “nervelessly” carefully so the meaning stays clear.*

---

nervelessness *(noun)*

Fearless self-possession in the face of danger.

- *Understanding “nervelessness” helps you talk about this topic clearly.*
- *He looked up “nervelessness” because he had never seen it before.*

---

nerveroot *(noun)*

Once common rose pink woodland orchid of eastern North America.

- *In class, the teacher used “nerveroot” to mean once common rose pink woodland orchid of eastern....*
- *The article explained what “nerveroot” means with a simple example.*

---

nervii olfactorii *(noun)*

A collective term for numerous olfactory filaments in the nasal mucosa.

- *She wrote a short paragraph that included “nervii olfactorii.”*
- *He looked up “nervii olfactorii” because he had never seen it before.*

---

nervily *(adverb)*

In a brash cheeky manner.

- *Using “nervily” can make your explanation more exact.*
- *Try rewriting the sentence and include “nervily” naturally.*

---

nervus accessorius *(noun)*

Arises from two sets of roots (cranial and spinal) that unite to form the nerve.

- *They discussed “nervus accessorius” during the group presentation.*
- *The article explained what “nervus accessorius” means with a simple example.*

---

nervus coccygeus *(noun)*

The lowest pair of spinal nerves.

- *He looked up “nervus coccygeus” because he had never seen it before.*
- *In class, the teacher used “nervus coccygeus” to mean the lowest pair of spinal nerves.*

---

nervus facialis *(noun)*

Cranial nerve that supplies facial muscles.

- *They discussed “nervus facialis” during the group presentation.*
- *The article explained what “nervus facialis” means with a simple example.*

---

nervus glossopharyngeus *(noun)*

Sensory nerve to the pharynx and back of the tongue; motor fibers innervate muscles that elevate the pharynx and larynx; includes parasympathetic fibers to the otic ganglion.

- *He looked up “nervus glossopharyngeus” because he had never seen it before.*
- *Understanding “nervus glossopharyngeus” helps you talk about this topic clearly.*

---

nervus hypoglosus *(noun)*

Supplies intrinsic muscles of the tongue and other tongue muscles.

- *In class, the teacher used “nervus hypoglosus” to mean supplies intrinsic muscles of the tongue and other....*
- *The article explained what “nervus hypoglosus” means with a simple example.*

---

nervus ischiadicus *(noun)*

Arises from the sacral plexus and passes about halfway down the thigh where it divides into the common peroneal and tibial nerves.

- *Understanding "nervus ischiadicus" helps you talk about this topic clearly.*
- *The article explained what "nervus ischiadicus" means with a simple example.*

---

nervus oculomotorius *(noun)*

Supplies extrinsic muscles of the eye.

- *The article explained what "nervus oculomotorius" means with a simple example.*
- *In class, the teacher used "nervus oculomotorius" to mean supplies extrinsic muscles of the eye.*

---

nervus opticus *(noun)*

The cranial nerve that serves the retina.

- *In class, the teacher used "nervus opticus" to mean the cranial nerve that serves the retina.*
- *He looked up "nervus opticus" because he had never seen it before.*

---

nervus phrenicus *(noun)*

One of a pair of nerves that arises from cervical spinal roots and passes down the thorax to innervate the diaphragm and control breathing.

- *He looked up "nervus phrenicus" because he had never seen it before.*
- *Understanding "nervus phrenicus" helps you talk about this topic clearly.*

---

nervus trigeminus *(noun)*

The main sensory nerve of the face and motor nerve for the muscles of mastication.

- *Understanding "nervus trigeminus" helps you talk about this topic clearly.*
- *They discussed "nervus trigeminus" during the group presentation.*

---

nervus vestibulocochlearis *(noun)*

A composite sensory nerve supplying the hair cells of the vestibular organ and the hair cells of the cochlea.

- *She wrote a short paragraph that included "nervus vestibulocochlearis."*
- *They discussed "nervus vestibulocochlearis" during the group presentation.*

---

nescient *(adjective)*

Uneducated in general; lacking knowledge or sophistication.

- *Nescient of contemporary literature.*
- *A "nescient" approach may work better in this case.*

---

nesokia *(noun)*

Bandicoot rats.

- *Understanding "nesokia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nesokia."*

---

nestor notabilis *(noun)*

Large brownish-green New Zealand parrot.

- *Understanding "nestor notabilis" helps you talk about this topic clearly.*
- *He looked up "nestor notabilis" because he had never seen it before.*

---

netherlander *(noun)*

A native or inhabitant of Holland.

- *He looked up "netherlander" because he had never seen it before.*
- *They discussed "netherlander" during the group presentation.*

---

netkeeper *(noun)*

The soccer or hockey player assigned to protect the goal.

- *The article explained what "netkeeper" means with a simple example.*
- *Understanding "netkeeper" helps you talk about this topic clearly.*

---

netlike *(adjective)*

Having open interstices or resembling a web.

- *Students compared "netlike" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "netlike."*

---

nettleleaf goosefoot *(noun)*

European annual with coarsely dentate leaves; widespread in United States and southern Canada.

- *The article explained what "nettleleaf goosefoot" means with a simple example.*
- *Understanding "nettleleaf goosefoot" helps you talk about this topic clearly.*

---

networklike *(adjective)*

Having a network of veins or ribs.

- *A "networklike" approach may work better in this case.*
- *Her writing became clearer after she learned "networklike."*

---

neurilemma *(noun)*

Thin membranous sheath around a nerve fiber.

- *The article explained what "neurilemma" means with a simple example.*
- *In class, the teacher used "neurilemma" to mean thin membranous sheath around a nerve fiber.*

---

neuroanatomic *(adjective)*

Of or relating to neural tissue or the nervous system.

- *A "neuroanatomic" approach may work better in this case.*
- *Would you call this situation "neuroanatomic"? Explain why.*

---

neuroepithelium *(noun)*

Epithelium associated with special sense organs and containing sensory nerve endings.

- *They discussed "neuroepithelium" during the group presentation.*
- *He looked up "neuroepithelium" because he had never seen it before.*

---

neuroglia *(noun)*

Sustentacular tissue that surrounds and supports neurons in the central nervous system; glial and neural cells together compose the tissue of the central nervous system.

- *In class, the teacher used "neuroglia" to mean sustentacular tissue that surrounds and supports....*
- *The article explained what "neuroglia" means with a simple example.*

---

neurogliacyte *(noun)*

A cell of the neuroglia.

- *They discussed "neurogliacyte" during the group presentation.*
- *In class, the teacher used "neurogliacyte" to mean a cell of the neuroglia.*

---

neuroglial *(adjective)*

Relating to or consisting of neuroglia.

- *Neuroglial tissue.*
- *It is useful to describe something as "neuroglial" when it is relating to or consisting of neuroglia.*

---

neuroglial cell *(noun)*

A cell of the neuroglia.

- *He looked up "neuroglial cell" because he had never seen it before.*
- *In class, the teacher used "neuroglial cell" to mean a cell of the neuroglia.*

---

neurohypophysis *(noun)*

The posterior lobe of the pituitary body; primarily glandular in nature.

- *They discussed "neurohypophysis" during the group presentation.*
- *In class, the teacher used "neurohypophysis" to mean the posterior lobe of the pituitary body; primarily....*

---

neurolemma *(noun)*

Thin membranous sheath around a nerve fiber.

- *The article explained what "neurolemma" means with a simple example.*
- *She wrote a short paragraph that included "neurolemma."*

neurolinguist *(noun)*

Someone trained in neuroscience and linguistics who studies brain processes during language production and reception.

- *He looked up "neurolinguist" because he had never seen it before.*
- *In class, the teacher used "neurolinguist" to mean someone trained in neuroscience and linguistics who....*

neurolysin *(noun)*

Any toxin that affects neural tissues.

- *Understanding "neurolysin" helps you talk about this topic clearly.*
- *They discussed "neurolysin" during the group presentation.*

neuromatous *(adjective)*

Of or relating to or caused by neuromas.

- *It is useful to describe something as "neuromatous" when it is of or relating to or caused by neuromas.*
- *A "neuromatous" approach may work better in this case.*

neuronic *(adjective)*

Of or relating to neurons.

- *The speaker chose "neuronic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "neuronic."*

neuropile *(noun)*

The complex network of unmyelinated axones, dendrites, and glial branches that form the bulk of the central nervous system's grey matter and in which nerve cell bodies are embedded.

- *She wrote a short paragraph that included "neuropile."*
- *They discussed "neuropile" during the group presentation.*

neuropteran *(noun)*

Insect having biting mouthparts and four large membranous wings with netlike veins.

- *The article explained what "neuropteran" means with a simple example.*
- *Understanding "neuropteran" helps you talk about this topic clearly.*

neuropteron *(noun)*

Insect having biting mouthparts and four large membranous wings with netlike veins.

- *They discussed "neuropteron" during the group presentation.*
- *Understanding "neuropteron" helps you talk about this topic clearly.*

neuropterous insect *(noun)*

Insect having biting mouthparts and four large membranous wings with netlike veins.

- *She wrote a short paragraph that included "neuropterous insect."*
- *The article explained what "neuropterous insect" means with a simple example.*

neurotrichus *(noun)*

Shrew moles.

- *The article explained what "neurotrichus" means with a simple example.*
- *Understanding "neurotrichus" helps you talk about this topic clearly.*

neurotrichus gibbsii *(noun)*

Greyish-black shrew mole of the United States and Canada.

- *Understanding "neurotrichus gibbsii" helps you talk about this topic clearly.*
- *He looked up "neurotrichus gibbsii" because he had never seen it before.*

neutrophile *(noun)*

The chief phagocytic leukocyte; stains with either basic or acid dyes.

- *They discussed "neutrophile" during the group presentation.*
- *She wrote a short paragraph that included "neutrophile."*

nevus flammeus *(noun)*

A flat birthmark varying from pink to purple.

- *They discussed "nevus flammeus" during the group presentation.*
- *He looked up "nevus flammeus" because he had never seen it before.*

---

new hampshirite *(noun)*

A native or resident of New Hampshire.

- *Understanding "new hampshirite" helps you talk about this topic clearly.*
- *He looked up "new hampshirite" because he had never seen it before.*

---

new jerseyite *(noun)*

A native of resident of New Jersey.

- *He looked up "new jerseyite" because he had never seen it before.*
- *In class, the teacher used "new jerseyite" to mean a native of resident of new jersey.*

---

new zealand dacryberry *(noun)*

New Zealand evergreen valued for its light easily worked wood.

- *In class, the teacher used "new zealand dacryberry" to mean new zealand evergreen valued for its light easily....*
- *They discussed "new zealand dacryberry" during the group presentation.*

---

new zealand daisybush *(noun)*

Bushy New Zealand shrub cultivated for its fragrant white flower heads.

- *She wrote a short paragraph that included "new zealand daisybush."*
- *Understanding "new zealand daisybush" helps you talk about this topic clearly.*

---

newsless *(adjective)*

Not having or receiving news or information.

- *Would you call this situation "newsless"? Explain why.*
- *Students compared "newsless" with similar adjectives in the lesson.*

---

newsmonger *(noun)*

A person given to gossiping and divulging personal information about others.

- *She wrote a short paragraph that included "newsmonger."*
- *He looked up "newsmonger" because he had never seen it before.*

---

newsperson *(noun)*

A person who investigates and reports or edits news stories.

- *He looked up "newsperson" because he had never seen it before.*
- *She wrote a short paragraph that included "newsperson."*

---

ngultrum *(noun)*

The basic unit of money in Bhutan.

- *In class, the teacher used "ngultrum" to mean the basic unit of money in bhutan.*
- *The article explained what "ngultrum" means with a simple example.*

---

ngwee *(noun)*

100 ngwee equal 1 kwacha in Zambia.

- *In class, the teacher used "ngwee" to mean 100 ngwee equal 1 kwacha in zambia.*
- *The article explained what "ngwee" means with a simple example.*

---

nicaean *(adjective)*

Of or relating to the ancient city of Nicaea in Asia Minor.

- *A "nicaean" approach may work better in this case.*
- *Her writing became clearer after she learned "nicaean."*

---

nicandra *(noun)*

Sturdy annual of Peru.

- *He looked up "nicandra" because he had never seen it before.*
- *In class, the teacher used "nicandra" to mean sturdy annual of peru.*

nicandra physaloides *(noun)*

Coarse South American herb grown for its blue-and-white flowers followed by a bladderlike fruit enclosing a dry berry.

- *She wrote a short paragraph that included "nicandra physaloides."*
- *He looked up "nicandra physaloides" because he had never seen it before.*

nicknack *(noun)*

Miscellaneous curios.

- *In class, the teacher used "nicknack" to mean miscellaneous curios.*
- *The article explained what "nicknack" means with a simple example.*

nictate *(verb)*

Briefly shut the eyes.

- *Learners should practice how to use "nictate" in real sentences.*
- *In everyday English, people use "nictate" when talking about this idea.*

nictitate *(verb)*

Briefly shut the eyes.

- *He did not know how to use "nictitate" until he saw an example.*
- *In everyday English, people use "nictitate" when talking about this idea.*

nidation *(noun)*

(embryology) the organic process whereby a fertilized egg becomes implanted in the lining of the uterus of placental mammals.

- *Understanding "nidation" helps you talk about this topic clearly.*
- *He looked up "nidation" because he had never seen it before.*

nidicolous *(adjective)*

(of birds) remaining in the nest for a time after hatching.

- *Her writing became clearer after she learned "nidicolous."*
- *Would you call this situation "nidicolous"? Explain why.*

nidifugous *(adjective)*

(of birds) leaving the nest shortly after hatching.

- *A "nidifugous" approach may work better in this case.*
- *The speaker chose "nidifugous" because it captured the feeling precisely.*

nidularia *(noun)*

Type genus of the Nidulariaceae.

- *They discussed "nidularia" during the group presentation.*
- *In class, the teacher used "nidularia" to mean type genus of the nidulariaceae.*

nidulariaceae *(noun)*

Bird's-nest fungi.

- *She wrote a short paragraph that included "nidulariaceae."*
- *Understanding "nidulariaceae" helps you talk about this topic clearly.*

nidulariales *(noun)*

Small order of basidiomycetous fungi comprising families Nidulariaceae and Sphaerobolaceae.

- *They discussed "nidulariales" during the group presentation.*
- *Understanding "nidulariales" helps you talk about this topic clearly.*

nierembergia *(noun)*

Any of various plants of the genus Nierembergia having upturned bell-shaped flowers.

- *He looked up "nierembergia" because he had never seen it before.*
- *She wrote a short paragraph that included "nierembergia."*

nierembergia repens *(noun)*

Prostrate woody South American herb with white tubular flowers often tinged with blue or rose.

- *They discussed “nierembergia repens” during the group presentation.*
- *In class, the teacher used “nierembergia repens” to mean prostrate woody south american herb with white....*

nierembergia rivularis *(noun)*

Prostrate woody South American herb with white tubular flowers often tinged with blue or rose.

- *The article explained what “nierembergia rivularis” means with a simple example.*
- *Understanding “nierembergia rivularis” helps you talk about this topic clearly.*

niffy *(adjective)*

(British informal) malodorous.

- *It is useful to describe something as “niffy” when it is (british informal) malodorous.*
- *Would you call this situation “niffy”? Explain why.*

niggardliness *(noun)*

Extreme stinginess.

- *In class, the teacher used “niggardliness” to mean extreme stinginess.*
- *The article explained what “niggardliness” means with a simple example.*

niggardness *(noun)*

Extreme stinginess.

- *The article explained what “niggardness” means with a simple example.*
- *Understanding “niggardness” helps you talk about this topic clearly.*

niggler *(noun)*

Someone who constantly criticizes in a petty way.

- *In class, the teacher used “niggler” to mean someone who constantly criticizes in a petty way.*
- *The article explained what “niggler” means with a simple example.*

nigher *(adverb)*

(comparative of ‘near’ or ‘close’) within a shorter distance.

- *Try rewriting the sentence and include “nigher” naturally.*
- *Using “nigher” can make your explanation more exact.*

nighest *(adverb)*

(superlative of ‘near’ or ‘close’) within the shortest distance.

- *Place “nighest” carefully so the meaning stays clear.*
- *She spoke “nighest,” and the audience immediately understood her point.*

nighted *(adjective)*

Overtaken by night or darkness.

- *Benighted (or nighted) travelers hurrying toward home.*
- *Her writing became clearer after she learned “nighted.”*

nigrify *(verb)*

Make or become black.

- *The coach explained when to use “nigrify” and when to wait.*
- *Can you use “nigrify” in a sentence that fits this situation?*

nigroporus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *Understanding “nigroporus” helps you talk about this topic clearly.*
- *They discussed “nigroporus” during the group presentation.*

nigroporus vinosus *(noun)*

A woody pore fungus with a dark brown to red brown cap and spore surface and small pores.

- *The article explained what “nigroporus vinosus” means with a simple example.*

- *They discussed "nigroporus vinosus" during the group presentation.*

---

nihau *(noun)*

The most northwestern Hawaiian island (beyond Kauai).

- *They discussed "nihau" during the group presentation.*
- *In class, the teacher used "nihau" to mean the most northwestern hawaiian island (beyond kauai).*

---

nihau island *(noun)*

The most northwestern Hawaiian island (beyond Kauai).

- *In class, the teacher used "nihau island" to mean the most northwestern hawaiian island (beyond kauai).*
- *Understanding "nihau island" helps you talk about this topic clearly.*

---

nikolai andreyevich rimski-korsakov *(noun)*

Russian composer of operas and orchestral works; often used themes from folk music (1844-1908).

- *They discussed "nikolai andreyevich rimski-korsakov" during the group presentation.*
- *Understanding "nikolai andreyevich rimski-korsakov" helps you talk about this topic clearly.*

---

nimblewill *(noun)*

Slender branching American grass of some value for grazing in central United States.

- *The article explained what "nimblewill" means with a simple example.*
- *In class, the teacher used "nimblewill" to mean slender branching american grass of some value for....*

---

nimiety *(noun)*

A quantity much larger than is needed.

- *They discussed "nimiety" during the group presentation.*
- *Understanding "nimiety" helps you talk about this topic clearly.*

---

niminy-piminy *(adjective)*

Affectedly dainty or refined.

- *A "niminy-piminy" approach may work better in this case.*
- *Would you call this situation "niminy-piminy"? Explain why.*

---

nimravus *(noun)*

False sabertoothed tigers.

- *The article explained what "nimravus" means with a simple example.*
- *They discussed "nimravus" during the group presentation.*

---

ninepenny *(adjective)*

Used of nail size; 2 3/4 in or 7 cm long.

- *Would you call this situation "ninepenny"? Explain why.*
- *It is useful to describe something as "ninepenny" when it is used of nail size; 2 3/4 in or 7 cm long.*

---

ninepin *(noun)*

A bowling pin of the type used in playing ninepins or (in England) skittles.

- *The article explained what "ninepin" means with a simple example.*
- *Understanding "ninepin" helps you talk about this topic clearly.*

---

ninepin ball *(noun)*

Ball used to knock down ninepins.

- *Understanding "ninepin ball" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ninepin ball."*

---

ningal *(noun)*

(Akkadian) a goddess; wife of the Moon god Sin.

- *The article explained what "ningal" means with a simple example.*
- *Understanding "ningal" helps you talk about this topic clearly.*

---

ningirsu *(noun)*

Babylonian god in older pantheon: god of war and agriculture.

- *The article explained what "ningirsu" means with a simple example.*
- *In class, the teacher used "ningirsu" to mean babylonian god in older pantheon: god of war and....*

---

ningishzida *(noun)*

An underworld Babylonian deity; patron of medicine.

- *In class, the teacher used "ningishzida" to mean an underworld babylonian deity; patron of medicine.*
- *The article explained what "ningishzida" means with a simple example.*

---

ninhursag *(noun)*

The great mother goddess; worshipped also as Aruru and Mama and Nintu.

- *The article explained what "ninhursag" means with a simple example.*
- *They discussed "ninhursag" during the group presentation.*

---

ninib *(noun)*

A solar deity; firstborn of Bel and consort was Gula; god of war and the chase and agriculture; sometimes identified with biblical Nimrod.

- *In class, the teacher used "ninib" to mean a solar deity; firstborn of bel and consort was....*
- *They discussed "ninib" during the group presentation.*

---

ninigi *(noun)*

Grandson of Amaterasu and first ruler of Japan.

- *Understanding "ninigi" helps you talk about this topic clearly.*
- *The article explained what "ninigi" means with a simple example.*

---

ninigino-mikoto *(noun)*

Grandson of Amaterasu and first ruler of Japan.

- *The article explained what "ninigino-mikoto" means with a simple example.*
- *Understanding "ninigino-mikoto" helps you talk about this topic clearly.*

---

ninkharsag *(noun)*

The great mother goddess; worshipped also as Aruru and Mama and Nintu.

- *In class, the teacher used "ninkharsag" to mean the great mother goddess; worshipped also as aruru....*
- *He looked up "ninkharsag" because he had never seen it before.*

---

ninkhursag *(noun)*

The great mother goddess; worshipped also as Aruru and Mama and Nintu.

- *Understanding "ninkhursag" helps you talk about this topic clearly.*
- *They discussed "ninkhursag" during the group presentation.*

---

nintoo *(noun)*

A name under which Ninkhursag was worshipped.

- *The article explained what "nintoo" means with a simple example.*
- *Understanding "nintoo" helps you talk about this topic clearly.*

---

nintu *(noun)*

A name under which Ninkhursag was worshipped.

- *In class, the teacher used "nintu" to mean a name under which ninkhursag was worshipped.*
- *They discussed "nintu" during the group presentation.*

---

niobite *(noun)*

A black mineral that is an ore of niobium and tantalum.

- *Understanding "niobite" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "niobite."*

---

nipa fruticans *(noun)*

Any creeping semiaquatic feather palm of the genus Nipa found in mangrove swamps and tidal estuaries; its sap is used for a liquor; leaves are used for thatch; fruit has edible seeds.

- *The article explained what “nipa fruticans” means with a simple example.*
- *In class, the teacher used “nipa fruticans” to mean any creeping semiaquatic feather palm of the genus....*

---

nitid *(adjective)*

Bright with a steady but subdued shining.

- *Nereids beneath the nitid moon.*
- *Would you call this situation “nitid”? Explain why.*

---

nitramine *(noun)*

A yellow crystalline explosive solid that is used in detonators.

- *She wrote a short paragraph that included “nitramine.”*
- *The article explained what “nitramine” means with a simple example.*

---

nitrify *(verb)*

Treat with nitrogen or a nitrogen compound.

- *He did not know how to use “nitrify” until he saw an example.*
- *Learners should practice how to use “nitrify” in real sentences.*

---

nitril *(noun)*

Any of a class of organic compounds containing the cyano radical -CN.

- *He looked up “nitril” because he had never seen it before.*
- *She wrote a short paragraph that included “nitril.”*

---

nitrobacter *(noun)*

Rod-shaped soil bacteria.

- *They discussed “nitrobacter” during the group presentation.*
- *He looked up “nitrobacter” because he had never seen it before.*

---

nitrobacteria *(noun)*

Soil bacteria that convert nitrites to nitrates.

- *The article explained what “nitrobacteria” means with a simple example.*
- *Understanding “nitrobacteria” helps you talk about this topic clearly.*

---

nitrobacteriaceae *(noun)*

Usually rod-shaped bacteria that oxidize ammonia or nitrites: nitrobacteria.

- *They discussed “nitrobacteriaceae” during the group presentation.*
- *He looked up “nitrobacteriaceae” because he had never seen it before.*

---

nitrobacterium *(noun)*

Any of the bacteria in the soil that take part in the nitrogen cycle; they oxidize ammonium compounds into nitrites or oxidize nitrites into nitrates.

- *In class, the teacher used “nitrobacterium” to mean any of the bacteria in the soil that take part in....*
- *He looked up “nitrobacterium” because he had never seen it before.*

---

nitrocalcite *(noun)*

The mineral form of calcium nitrate.

- *The article explained what “nitrocalcite” means with a simple example.*
- *In class, the teacher used “nitrocalcite” to mean the mineral form of calcium nitrate.*

---

nitrochloroform *(noun)*

A heavy colorless insoluble liquid compound that causes tears and vomiting; used as a pesticide and as tear gas.

- *She wrote a short paragraph that included “nitrochloroform.”*
- *They discussed “nitrochloroform” during the group presentation.*

---

nitrochloromethane *(noun)*

Gaseous form of chloropicrin used as tear gas.

- *The article explained what “nitrochloromethane” means with a simple example.*
- *In class, the teacher used “nitrochloromethane” to mean gaseous form of chloropicrin used as tear gas.*

nitrocotton *(noun)*

A nitric acid ester; used in lacquers and explosives.

- *She wrote a short paragraph that included "nitrocotton."*
- *They discussed "nitrocotton" during the group presentation.*

nitrofuran *(noun)*

Derivative of furan used to inhibit bacterial growth.

- *He looked up "nitrofuran" because he had never seen it before.*
- *They discussed "nitrofuran" during the group presentation.*

nitrogenise *(verb)*

Treat with nitrogen or a nitrogen compound.

- *In everyday English, people use "nitrogenise" when talking about this idea.*
- *Learners should practice how to use "nitrogenise" in real sentences.*

nitrogenize *(verb)*

Treat with nitrogen or a nitrogen compound.

- *The coach explained when to use "nitrogenize" and when to wait.*
- *Can you use "nitrogenize" in a sentence that fits this situation?*

nitrohydrochloric acid *(noun)*

A yellow fuming corrosive mixture of nitric and hydrochloric acid that dissolves metals (including gold).

- *They discussed "nitrohydrochloric acid" during the group presentation.*
- *She wrote a short paragraph that included "nitrohydrochloric acid."*

nitrosobacteria *(noun)*

Soil bacteria that oxidize ammonia to nitrites.

- *She wrote a short paragraph that included "nitrosobacteria."*
- *They discussed "nitrosobacteria" during the group presentation.*

nitrospan *(noun)*

A heavy yellow poisonous oily explosive liquid obtained by nitrating glycerol; used in making explosives and medically as a vasodilator (trade names Nitrospan and Nitrostat).

- *In class, the teacher used "nitrospan" to mean a heavy yellow poisonous oily explosive liquid....*
- *Understanding "nitrospan" helps you talk about this topic clearly.*

nitrostat *(noun)*

A heavy yellow poisonous oily explosive liquid obtained by nitrating glycerol; used in making explosives and medically as a vasodilator (trade names Nitrospan and Nitrostat).

- *He looked up "nitrostat" because he had never seen it before.*
- *She wrote a short paragraph that included "nitrostat."*

nitweed *(noun)*

Annual wiry-stemmed North American weed with minute scalelike leaves and small yellow flowers.

- *Understanding "nitweed" helps you talk about this topic clearly.*
- *They discussed "nitweed" during the group presentation.*

nitwitted *(adjective)*

(of especially persons) lacking sense or understanding or judgment.

- *Students compared "nitwitted" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nitwitted."*

nivose *(noun)*

Fourth month of the Revolutionary calendar (December and January); the snowy month.

- *In class, the teacher used "nivose" to mean fourth month of the revolutionary calendar....*
- *Understanding "nivose" helps you talk about this topic clearly.*

njorth *(noun)*

(Norse mythology) chief of the Vanir; god of the sea and winds and prosperity; father of Frey and Freya; sometimes subsumes Teutonic Nerthus.

- *She wrote a short paragraph that included "njorth."*
- *Understanding "njorth" helps you talk about this topic clearly.*

---

nobelium *(noun)*

A radioactive transuranic element synthesized by bombarding curium with carbon ions; 7 isotopes are known.

- *She wrote a short paragraph that included "nobelium."*
- *They discussed "nobelium" during the group presentation.*

---

nocent *(adjective)*

Having a tendency to cause harm.

- *A "nocent" approach may work better in this case.*
- *Would you call this situation "nocent"? Explain why.*

---

noctambulist *(noun)*

Someone who walks about in their sleep.

- *They discussed "noctambulist" during the group presentation.*
- *He looked up "noctambulist" because he had never seen it before.*

---

noctiluca miliaris *(noun)*

Large bioluminescent marine protozoan.

- *He looked up "noctiluca miliaris" because he had never seen it before.*
- *In class, the teacher used "noctiluca miliaris" to mean large bioluminescent marine protozoan.*

---

nodulated *(adjective)*

Having nodules or occurring in the form of nodules.

- *It is useful to describe something as "nodulated" when it is having nodules or occurring in the form of nodules.*
- *Would you call this situation "nodulated"? Explain why.*

---

noduled *(adjective)*

Having nodules or occurring in the form of nodules.

- *The speaker chose "noduled" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "noduled."*

---

nogging *(noun)*

Rough brick masonry used to fill in the gaps in a wooden frame.

- *She wrote a short paragraph that included "nogging."*
- *He looked up "nogging" because he had never seen it before.*

---

noiselessness *(noun)*

The property of making no noise.

- *In class, the teacher used "noiselessness" to mean the property of making no noise.*
- *He looked up "noiselessness" because he had never seen it before.*

---

noisomeness *(noun)*

The quality of being noxious.

- *The article explained what "noisomeness" means with a simple example.*
- *Understanding "noisomeness" helps you talk about this topic clearly.*

---

nolina *(noun)*

Perennial plants resembling yucca; found in southern United States and Mexico.

- *They discussed "nolina" during the group presentation.*
- *He looked up "nolina" because he had never seen it before.*

---

nolina microcarpa *(noun)*

Stemless plant with tufts of grasslike leaves and erect panicle of minute creamy white flowers; southwestern United States and Mexico.

- *Understanding "nolina microcarpa" helps you talk about this topic clearly.*

- *In class, the teacher used "nolina microcarpa" to mean stemless plant with tufts of grasslike leaves and....*

---

nombril *(noun)*

The center point on a shield.

- *They discussed "nombril" during the group presentation.*
- *The article explained what "nombril" means with a simple example.*

---

nomia melanderi *(noun)*

A common solitary bee important for pollinating alfalfa in the western United States.

- *The article explained what "nomia melanderi" means with a simple example.*
- *In class, the teacher used "nomia melanderi" to mean a common solitary bee important for pollinating....*

---

nominalistic *(adjective)*

Of or relating to nominalism.

- *It is useful to describe something as "nominalistic" when it is of or relating to nominalism.*
- *Would you call this situation "nominalistic"? Explain why.*

---

nomograph *(noun)*

A graphic representation of numerical relations.

- *They discussed "nomograph" during the group presentation.*
- *He looked up "nomograph" because he had never seen it before.*

---

non-resiny *(adjective)*

Not having resin.

- *Students compared "non-resiny" with similar adjectives in the lesson.*
- *It is useful to describe something as "non-resiny" when it is not having resin.*

---

nonabsorbency *(noun)*

The property of not being absorbent.

- *The article explained what "nonabsorbency" means with a simple example.*
- *They discussed "nonabsorbency" during the group presentation.*

---

nonabsorbent *(adjective)*

Not capable of absorbing or soaking up (liquids).

- *Her writing became clearer after she learned "nonabsorbent."*
- *Would you call this situation "nonabsorbent"? Explain why.*

---

nonabsorptive *(adjective)*

Not capable of absorbing or soaking up (liquids).

- *Would you call this situation "nonabsorptive"? Explain why.*
- *The speaker chose "nonabsorptive" because it captured the feeling precisely.*

---

nonachiever *(noun)*

A student who does not perform as well as expected or as well as the IQ indicates.

- *In class, the teacher used "nonachiever" to mean a student who does not perform as well as expected....*
- *Understanding "nonachiever" helps you talk about this topic clearly.*

---

nonadaptive *(adjective)*

(of a trait or condition) failing to serve an adjustive purpose.

- *Her writing became clearer after she learned "nonadaptive."*
- *The speaker chose "nonadaptive" because it captured the feeling precisely.*

---

nonaddictive *(adjective)*

Not causing or characterized by addiction.

- *For years tobacco companies have contended that tobacco is nonaddictive.*
- *It is useful to describe something as "nonaddictive" when it is not causing or characterized by addiction.*

---

nonadhesive *(adjective)*

Not tending to adhere.

- *Would you call this situation "nonadhesive"? Explain why.*
- *A "nonadhesive" approach may work better in this case.*

---

nonadjacent *(adjective)*

Not adjacent; not next.

- *A "nonadjacent" approach may work better in this case.*
- *Would you call this situation "nonadjacent"? Explain why.*

---

nonadsorbent *(adjective)*

Lacking a capacity to adsorb or cause to accumulate on a surface.

- *The speaker chose "nonadsorbent" because it captured the feeling precisely.*
- *Would you call this situation "nonadsorbent"? Explain why.*

---

nonadsorptive *(adjective)*

Lacking a capacity to adsorb or cause to accumulate on a surface.

- *Students compared "nonadsorptive" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonadsorptive."*

---

nonage *(noun)*

Any age prior to the legal age.

- *Understanding "nonage" helps you talk about this topic clearly.*
- *They discussed "nonage" during the group presentation.*

---

nonaged *(adjective)*

Not of legal age.

- *It is useful to describe something as "nonaged" when it is not of legal age.*
- *Students compared "nonaged" with similar adjectives in the lesson.*

---

nonallele *(noun)*

Genes that are not competitors at the same locus.

- *In class, the teacher used "nonallele" to mean genes that are not competitors at the same locus.*
- *The article explained what "nonallele" means with a simple example.*

---

nonarbitrable *(adjective)*

Not appropriate for or subject to arbitration.

- *A "nonarbitrable" approach may work better in this case.*
- *Her writing became clearer after she learned "nonarbitrable."*

---

nonarbitrary *(adjective)*

Not subject to individual determination.

- *A "nonarbitrary" approach may work better in this case.*
- *Would you call this situation "nonarbitrary"? Explain why.*

---

nonarboreal *(adjective)*

Not inhabiting or frequenting trees.

- *Her writing became clearer after she learned "nonarboreal."*
- *Would you call this situation "nonarboreal"? Explain why.*

---

nonassertive *(adjective)*

Not aggressively self-assured, though not necessarily lacking in confidence.

- *She was quiet and nonassertive as she took control.*
- *A "nonassertive" approach may work better in this case.*

---

nonassociative *(adjective)*

Not associative.

- *Students compared "nonassociative" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonassociative."*

---

nonastringent *(adjective)*

Not astringent.

- *Would you call this situation "nonastringent"? Explain why.*
- *The speaker chose "nonastringent" because it captured the feeling precisely.*

---

nonattender *(noun)*

Someone who shirks duty.

- *He looked up "nonattender" because he had never seen it before.*
- *They discussed "nonattender" during the group presentation.*

---

nonautonomous *(adjective)*

(of peoples and political bodies) controlled by outside forces.

- *A "nonautonomous" approach may work better in this case.*
- *The speaker chose "nonautonomous" because it captured the feeling precisely.*

---

nonbearing *(adjective)*

(of a structural member) supporting no vertical weight other than its own.

- *They took out a nonbearing wall.*
- *The speaker chose "nonbearing" because it captured the feeling precisely.*

---

nonbelligerent *(adjective)*

Not directly at war.

- *Nonbelligerent nations.*
- *Would you call this situation "nonbelligerent"? Explain why.*

---

noncallable bond *(noun)*

A bond containing a provision that the holder cannot redeem the security before a specific date (usually at maturity).

- *Understanding "noncallable bond" helps you talk about this topic clearly.*
- *The article explained what "noncallable bond" means with a simple example.*

---

noncaloric *(adjective)*

Of food have no (or few) calories.

- *A noncaloric drink.*
- *Would you call this situation "noncaloric"? Explain why.*

---

noncandidate *(noun)*

Someone who has announced they are not a candidate; especially a politician who has announced that he or she is not a candidate for some political office.

- *Understanding "noncandidate" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "noncandidate."*

---

noncarbonated *(adjective)*

Not having carbonation.

- *It is useful to describe something as "noncarbonated" when it is not having carbonation.*
- *The speaker chose "noncarbonated" because it captured the feeling precisely.*

---

noncausal *(adjective)*

Not causative.

- *Students compared "noncausal" with similar adjectives in the lesson.*
- *Would you call this situation "noncausal"? Explain why.*

---

noncausative *(adjective)*

Not causative.

- *It is useful to describe something as "noncausative" when it is not causative.*
- *The speaker chose "noncausative" because it captured the feeling precisely.*

noncellular *(adjective)*

Not made up of or divided into cells.

- *Her writing became clearer after she learned "noncellular."*
- *Students compared "noncellular" with similar adjectives in the lesson.*

nonchristian *(adjective)*

Not believing in Christ.

- *It is useful to describe something as "nonchristian" when it is not believing in christ.*
- *The speaker chose "nonchristian" because it captured the feeling precisely.*

nonchurchgoing *(adjective)*

No longer active or practicing.

- *It is useful to describe something as "nonchurchgoing" when it is no longer active or practicing.*
- *Would you call this situation "nonchurchgoing"? Explain why.*

noncivilised *(adjective)*

Not having a high state of culture and social development.

- *The speaker chose "noncivilised" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "noncivilised."*

noncivilized *(adjective)*

Not having a high state of culture and social development.

- *Students compared "noncivilized" with similar adjectives in the lesson.*
- *Would you call this situation "noncivilized"? Explain why.*

noncollapsable *(adjective)*

Not capable of collapsing.

- *The speaker chose "noncollapsable" because it captured the feeling precisely.*
- *A "noncollapsable" approach may work better in this case.*

noncollapsible *(adjective)*

Not capable of collapsing.

- *A "noncollapsible" approach may work better in this case.*
- *It is useful to describe something as "noncollapsible" when it is not capable of collapsing.*

noncolumned *(adjective)*

Not having columns.

- *Students compared "noncolumned" with similar adjectives in the lesson.*
- *A "noncolumned" approach may work better in this case.*

noncombinative *(adjective)*

Not involving combination.

- *It is useful to describe something as "noncombinative" when it is not involving combination.*
- *Would you call this situation "noncombinative"? Explain why.*

noncombining *(adjective)*

Not able to combine.

- *The speaker chose "noncombining" because it captured the feeling precisely.*
- *It is useful to describe something as "noncombining" when it is not able to combine.*

noncompetitively *(adverb)*

In a noncompetitive manner.

- *The scholarships will be awarded noncompetitively.*
- *Try rewriting the sentence and include "noncompetitively" naturally.*

noncomprehensive *(adjective)*

Not comprehensive.

- *The speaker chose "noncomprehensive" because it captured the feeling precisely.*
- *It is useful to describe something as "noncomprehensive" when it is not comprehensive.*

---

noncomprehensively *(adverb)*

In a limited way.

- *Place "noncomprehensively" carefully so the meaning stays clear.*
- *Try rewriting the sentence and include "noncomprehensively" naturally.*

---

nonconcentric *(adjective)*

Not having a common center; not concentric.

- *The speaker chose "nonconcentric" because it captured the feeling precisely.*
- *A "nonconcentric" approach may work better in this case.*

---

nonconducting *(adjective)*

Not able to conduct heat or electricity or sound.

- *The speaker chose "nonconducting" because it captured the feeling precisely.*
- *It is useful to describe something as "nonconducting" when it is not able to conduct heat or electricity or sound.*

---

nonconductor *(noun)*

A material such as glass or porcelain with negligible electrical or thermal conductivity.

- *In class, the teacher used "nonconductor" to mean a material such as glass or porcelain with....*
- *They discussed "nonconductor" during the group presentation.*

---

noncontagious *(adjective)*

(of disease) not capable of being passed on.

- *A "noncontagious" approach may work better in this case.*
- *The speaker chose "noncontagious" because it captured the feeling precisely.*

---

noncontentious *(adjective)*

Of persons; not given to controversy.

- *It is useful to describe something as "noncontentious" when it is of persons; not given to controversy.*
- *Students compared "noncontentious" with similar adjectives in the lesson.*

---

noncontinuous *(adjective)*

Not continuing without interruption in time or space.

- *Would you call this situation "noncontinuous"? Explain why.*
- *A "noncontinuous" approach may work better in this case.*

---

nonconvergent *(adjective)*

(of lines, planes, or surfaces) never meeting or crossing.

- *Students compared "nonconvergent" with similar adjectives in the lesson.*
- *Would you call this situation "nonconvergent"? Explain why.*

---

noncrucial *(adjective)*

Of little importance; not decisive.

- *Would you call this situation "noncrucial"? Explain why.*
- *It is useful to describe something as "noncrucial" when it is of little importance; not decisive.*

---

noncrystalline *(adjective)*

Not crystalline.

- *Her writing became clearer after she learned "noncrystalline."*
- *Students compared "noncrystalline" with similar adjectives in the lesson.*

---

noncyclic *(adjective)*

Not having repeated cycles.

- *Would you call this situation "noncyclic"? Explain why.*

- *A "noncyclic" approach may work better in this case.*

---

nondevelopment *(noun)*

Failure of normal development to occur.

- *In class, the teacher used "nondevelopment" to mean failure of normal development to occur.*
- *They discussed "nondevelopment" during the group presentation.*

---

nondigestible *(adjective)*

Not digestible.

- *The speaker chose "nondigestible" because it captured the feeling precisely.*
- *Would you call this situation "nondigestible"? Explain why.*

---

nondirectional antenna *(noun)*

An antenna that sends or receives signals equally in all directions.

- *Understanding "nondirectional antenna" helps you talk about this topic clearly.*
- *In class, the teacher used "nondirectional antenna" to mean an antenna that sends or receives signals equally....*

---

nondiscretionary trust *(noun)*

An investment trust that can buy only those securities listed when the trust was organized.

- *The article explained what "nondiscretionary trust" means with a simple example.*
- *In class, the teacher used "nondiscretionary trust" to mean an investment trust that can buy only those....*

---

nondisposable *(adjective)*

Not designed to be thrown away after use.

- *Her writing became clearer after she learned "nondisposable."*
- *Students compared "nondisposable" with similar adjectives in the lesson.*

---

nondrinker *(noun)*

A person who refrains from drinking intoxicating beverages.

- *Understanding "nondrinker" helps you talk about this topic clearly.*
- *They discussed "nondrinker" during the group presentation.*

---

nondriver *(noun)*

A person who is not a driver.

- *They discussed "nondriver" during the group presentation.*
- *In class, the teacher used "nondriver" to mean a person who is not a driver.*

---

nonechoic *(adjective)*

Not echoic or imitative of sound.

- *Would you call this situation "nonechoic"? Explain why.*
- *It is useful to describe something as "nonechoic" when it is not echoic or imitative of sound.*

---

noneffervescent *(adjective)*

Not sparkling.

- *The speaker chose "noneffervescent" because it captured the feeling precisely.*
- *It is useful to describe something as "noneffervescent" when it is not sparkling.*

---

nonenterprising *(adjective)*

Lacking in enterprise; not bold or venturesome.

- *A "nonenterprising" approach may work better in this case.*
- *Would you call this situation "nonenterprising"? Explain why.*

---

nonenzymatic *(adjective)*

Not relating to or produced by enzymes.

- *Nonenzymatic systems.*
- *The speaker chose "nonenzymatic" because it captured the feeling precisely.*

---

nonequivalence *(noun)*

Not interchangeable.

- *She wrote a short paragraph that included "nonequivalence."*
- *Understanding "nonequivalence" helps you talk about this topic clearly.*

---

nonequivalent *(adjective)*

Not equal or interchangeable in value, quantity, or significance.

- *Her writing became clearer after she learned "nonequivalent."*
- *The speaker chose "nonequivalent" because it captured the feeling precisely.*

---

nonexplorative *(adjective)*

Not exploratory.

- *Students compared "nonexplorative" with similar adjectives in the lesson.*
- *Would you call this situation "nonexplorative"? Explain why.*

---

nonexploratory *(adjective)*

Not exploratory.

- *Would you call this situation "nonexploratory"? Explain why.*
- *Her writing became clearer after she learned "nonexploratory."*

---

nonexplosive *(adjective)*

Not explosive.

- *Nonexplosive gases.*
- *A nonexplosive fuel.*

---

nonextant *(adjective)*

No longer in existence; lost or especially having died out leaving no living representatives.

- *Her writing became clearer after she learned "nonextant."*
- *Would you call this situation "nonextant"? Explain why.*

---

nonextensile *(adjective)*

Not extensile.

- *It is useful to describe something as "nonextensile" when it is not extensile.*
- *A "nonextensile" approach may work better in this case.*

---

nonfigurative *(adjective)*

Not representing or imitating external reality or the objects of nature.

- *A "nonfigurative" approach may work better in this case.*
- *Her writing became clearer after she learned "nonfigurative."*

---

nonfissile *(adjective)*

Not fissile.

- *Would you call this situation "nonfissile"? Explain why.*
- *A "nonfissile" approach may work better in this case.*

---

nonfissionable *(adjective)*

Not capable of undergoing fission.

- *Students compared "nonfissionable" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonfissionable."*

---

nonflavored *(adjective)*

Without flavoring added.

- *It is useful to describe something as "nonflavored" when it is without flavoring added.*
- *Students compared "nonflavored" with similar adjectives in the lesson.*

---

nonflavoured *(adjective)*

Without flavoring added.

- *The speaker chose "nonflavoured" because it captured the feeling precisely.*
- *It is useful to describe something as "nonflavoured" when it is without flavoring added.*

---

nonflowering *(adjective)*

Without flower or bloom and not producing seeds.

- *Would you call this situation "nonflowering"? Explain why.*
- *Students compared "nonflowering" with similar adjectives in the lesson.*

---

nonflowering plant *(noun)*

Plants having vascular tissue and reproducing by spores.

- *She wrote a short paragraph that included "nonflowering plant."*
- *They discussed "nonflowering plant" during the group presentation.*

---

nonglutinous *(adjective)*

Not resembling glue in texture.

- *Her writing became clearer after she learned "nonglutinous."*
- *Students compared "nonglutinous" with similar adjectives in the lesson.*

---

nongranular *(adjective)*

Not having granules.

- *Clear nongranular cytoplasm.*
- *The speaker chose "nongranular" because it captured the feeling precisely.*

---

nongregarious *(adjective)*

Of plants and animals; not growing or living in groups or colonies.

- *Her writing became clearer after she learned "nongregarious."*
- *Would you call this situation "nongregarious"? Explain why.*

---

nonhairy *(adjective)*

Without hair.

- *Tinea corporis is a fungal infection of the nonhairy parts of the skin.*
- *Would you call this situation "nonhairy"? Explain why.*

---

nonharmonic *(adjective)*

Not harmonic.

- *A nonharmonic note.*
- *Students compared "nonharmonic" with similar adjectives in the lesson.*

---

nonhereditary *(adjective)*

Not acquirable by inheritance.

- *It is useful to describe something as "nonhereditary" when it is not acquirable by inheritance.*
- *The speaker chose "nonhereditary" because it captured the feeling precisely.*

---

nonheritable *(adjective)*

Not inheritable.

- *The speaker chose "nonheritable" because it captured the feeling precisely.*
- *A "nonheritable" approach may work better in this case.*

---

nonhierarchic *(adjective)*

Not classified hierarchically.

- *A "nonhierarchic" approach may work better in this case.*
- *It is useful to describe something as "nonhierarchic" when it is not classified hierarchically.*

---

nonhierarchical *(adjective)*

Not classified hierarchically.

- *It is useful to describe something as "nonhierarchical" when it is not classified hierarchically.*
- *A "nonhierarchical" approach may work better in this case.*

nonimitative *(adjective)*

Not marked by or given to imitation.

- *Her writing became clearer after she learned "nonimitative."*
- *Students compared "nonimitative" with similar adjectives in the lesson.*

nonimmune *(adjective)*

(often followed by 'to') likely to be affected with.

- *Students compared "nonimmune" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonimmune" when it is (often followed by 'to') likely to be affected with.*

- *A "nonindulgent" approach may work better in this case.*
- *Students compared "nonindulgent" with similar adjectives in the lesson.*

noninheritable *(adjective)*

Not inheritable.

- *Would you call this situation "noninheritable"? Explain why.*
- *It is useful to describe something as "noninheritable" when it is not inheritable.*

noninstitutional *(adjective)*

Not institutional.

- *Students compared "noninstitutional" with similar adjectives in the lesson.*
- *It is useful to describe something as "noninstitutional" when it is not institutional.*

noninstitutionalised *(adjective)*

Not committed to an institution.

- *A "noninstitutionalised" approach may work better in this case.*
- *It is useful to describe something as "noninstitutionalised" when it is not committed to an institution.*

nonintegrated *(adjective)*

Not integrated; not taken into or made a part of a whole.

- *Would you call this situation "nonintegrated"? Explain why.*
- *Students compared "nonintegrated" with similar adjectives in the lesson.*

nonintellectual *(adjective)*

Not intellectual.

- *The speaker chose "nonintellectual" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "nonintellectual."*

nonintersecting *(adjective)*

(of lines, planes, or surfaces) never meeting or crossing.

- *It is useful to describe something as "nonintersecting" when it is (of lines, planes, or surfaces) never meeting or....*
- *The speaker chose "nonintersecting" because it captured the feeling precisely.*

nonionised *(adjective)*

Not converted into ions.

- *Students compared "nonionised" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonionised."*

nonionized *(adjective)*

Not converted into ions.

- *A "nonionized" approach may work better in this case.*
- *The speaker chose "nonionized" because it captured the feeling precisely.*

---

nonkosher *(adjective)*

Not conforming to dietary laws.

- *A "nonkosher" approach may work better in this case.*
- *It is useful to describe something as "nonkosher" when it is not conforming to dietary laws.*

---

nonleaded *(adjective)*

(of gasoline) not containing tetraethyl lead.

- *Would you call this situation "nonleaded"? Explain why.*
- *The speaker chose "nonleaded" because it captured the feeling precisely.*

---

nonlexical *(adjective)*

Not relating to words.

- *Nonlexical morphemes.*
- *Her writing became clearer after she learned "nonlexical."*

---

nonlexically *(adverb)*

Without the use of words.

- *Expressed nonlexically.*
- *She spoke "nonlexically," and the audience immediately understood her point.*

---

nonlinguistic *(adjective)*

Not consisting of or related to language.

- *Depended on his nonlinguistic skills.*
- *Students compared "nonlinguistic" with similar adjectives in the lesson.*

---

nonliterate *(adjective)*

Used of a society that has not developed writing.

- *Her writing became clearer after she learned "nonliterate."*
- *A "nonliterate" approach may work better in this case.*

---

nonmandatory *(adjective)*

Not required by rule or law.

- *Students compared "nonmandatory" with similar adjectives in the lesson.*
- *A "nonmandatory" approach may work better in this case.*

---

nonmeaningful *(adjective)*

Having no meaning or direction or purpose.

- *Her writing became clearer after she learned "nonmeaningful."*
- *Students compared "nonmeaningful" with similar adjectives in the lesson.*

---

nonmechanical *(adjective)*

(of a person) lacking mechanical skills.

- *Students compared "nonmechanical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonmechanical."*

---

nonmechanistic *(adjective)*

Not mechanistic.

- *The speaker chose "nonmechanistic" because it captured the feeling precisely.*
- *It is useful to describe something as "nonmechanistic" when it is not mechanistic.*

---

nonmedicinal *(adjective)*

Not having a medicinal effect or not medically prescribed.

- *He took mind-altering drugs for nonmedicinal reasons.*

- *A "nonmedicinal" approach may work better in this case.*

---

nonmetamorphic *(adjective)*

Not metamorphic.

- *Would you call this situation "nonmetamorphic"? Explain why.*
- *The speaker chose "nonmetamorphic" because it captured the feeling precisely.*

---

nonmigratory *(adjective)*

Used of animals that do not migrate.

- *Her writing became clearer after she learned "nonmigratory."*
- *Would you call this situation "nonmigratory"? Explain why.*

---

nonmodern *(adjective)*

Not modern; of or characteristic of an earlier time.

- *Students compared "nonmodern" with similar adjectives in the lesson.*
- *A "nonmodern" approach may work better in this case.*

---

nonmonotonic *(adjective)*

Not monotonic.

- *A "nonmonotonic" approach may work better in this case.*
- *It is useful to describe something as "nonmonotonic" when it is not monotonic.*

---

nonnatural *(adjective)*

Existing outside of or not in accordance with nature; -Aldous Huxley.

- *Students compared "nonnatural" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonnatural."*

---

nonnomadic *(adjective)*

Not nomadic or wandering.

- *Nonnomadic people.*
- *It is useful to describe something as "nonnomadic" when it is not nomadic or wandering.*

---

nonnormative *(adjective)*

Not based on a norm.

- *Students compared "nonnormative" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonnormative" when it is not based on a norm.*

---

nonobjective *(adjective)*

Not representing or imitating external reality or the objects of nature.

- *Would you call this situation "nonobjective"? Explain why.*
- *Her writing became clearer after she learned "nonobjective."*

---

nonobligatory *(adjective)*

Not required by rule or law.

- *A "nonobligatory" approach may work better in this case.*
- *The speaker chose "nonobligatory" because it captured the feeling precisely.*

---

nonobservant *(adjective)*

Failing or refusing to observe religious customs.

- *The speaker chose "nonobservant" because it captured the feeling precisely.*
- *It is useful to describe something as "nonobservant" when it is failing or refusing to observe religious customs.*

---

nonopening *(adjective)*

Not open; not opening.

- *The speaker chose "nonopening" because it captured the feeling precisely.*
- *Would you call this situation "nonopening"? Explain why.*

---

nonoscillatory *(adjective)*

Not having periodic vibrations.

- *It is useful to describe something as "nonoscillatory" when it is not having periodic vibrations.*
- *The speaker chose "nonoscillatory" because it captured the feeling precisely.*

---

nonparallel *(adjective)*

Of or relating to the sequential performance of multiple operations.

- *It is useful to describe something as "nonparallel" when it is of or relating to the sequential performance of....*
- *The speaker chose "nonparallel" because it captured the feeling precisely.*

---

nonparasitic *(adjective)*

Not parasitic on another organism.

- *Her writing became clearer after she learned "nonparasitic."*
- *Would you call this situation "nonparasitic"? Explain why.*

---

nonparticipant *(noun)*

A person who does not participate.

- *Understanding "nonparticipant" helps you talk about this topic clearly.*
- *He looked up "nonparticipant" because he had never seen it before.*

---

nonparticulate *(adjective)*

Not composed of distinct particles.

- *Her writing became clearer after she learned "nonparticulate."*
- *Students compared "nonparticulate" with similar adjectives in the lesson.*

---

nonparticulate radiation *(noun)*

Radiation consisting of waves of energy associated with electric and magnetic fields resulting from the acceleration of an electric charge.

- *He looked up "nonparticulate radiation" because he had never seen it before.*
- *She wrote a short paragraph that included "nonparticulate radiation."*

---

nonpartizan *(noun)*

A person who is nonpartisan.

- *He looked up "nonpartizan" because he had never seen it before.*
- *Understanding "nonpartizan" helps you talk about this topic clearly.*

---

nonpasserine *(adjective)*

Relating to or characteristic of birds that are not perching birds.

- *A "nonpasserine" approach may work better in this case.*
- *Students compared "nonpasserine" with similar adjectives in the lesson.*

---

nonpasserine bird *(noun)*

Chiefly arboreal birds especially of the order Coraciiformes.

- *He looked up "nonpasserine bird" because he had never seen it before.*
- *She wrote a short paragraph that included "nonpasserine bird."*

---

nonperiodic *(adjective)*

Not recurring at regular intervals.

- *Would you call this situation "nonperiodic"? Explain why.*
- *The speaker chose "nonperiodic" because it captured the feeling precisely.*

---

- *Nonpersonal forces.*
- *A "nonpersonal" approach may work better in this case.*

---

nonphotosynthetic *(adjective)*

Not photosynthetic.

- *It is useful to describe something as "nonphotosynthetic" when it is not photosynthetic.*
- *Students compared "nonphotosynthetic" with similar adjectives in the lesson.*

---

nonpoisonous *(adjective)*

Not producing poison.

- *It is useful to describe something as "nonpoisonous" when it is not producing poison.*
- *A "nonpoisonous" approach may work better in this case.*

---

nonprehensile *(adjective)*

Not prehensile.

- *Students compared "nonprehensile" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonprehensile" when it is not prehensile.*

---

nonprognosticative *(adjective)*

Not offering prognostications.

- *Would you call this situation "nonprognosticative"? Explain why.*
- *Students compared "nonprognosticative" with similar adjectives in the lesson.*

---

nonprogressive *(adjective)*

Old-fashioned and out of date.

- *Students compared "nonprogressive" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonprogressive."*

---

nonprotractile *(adjective)*

Not extensile.

- *It is useful to describe something as "nonprotractile" when it is not extensile.*
- *The speaker chose "nonprotractile" because it captured the feeling precisely.*

---

nonpurulent *(adjective)*

Not containing pus.

- *Would you call this situation "nonpurulent"? Explain why.*
- *Her writing became clearer after she learned "nonpurulent."*

---

nonracist *(adjective)*

Unprejudiced about race.

- *A "nonracist" approach may work better in this case.*
- *Would you call this situation "nonracist"? Explain why.*

---

Obtained through intuition rather than from reasoning or observation.

- *There is a great deal that is nonrational in modern culture.*
- *Her writing became clearer after she learned "nonrational."*

---

nonreader *(noun)*

A student who is very slow in learning to read.

- *He looked up "nonreader" because he had never seen it before.*
- *She wrote a short paragraph that included "nonreader."*

---

nonreciprocating *(adjective)*

Not moving alternately forward and backward.

- *Her writing became clearer after she learned "nonreciprocating."*
- *The speaker chose "nonreciprocating" because it captured the feeling precisely.*

nonrecreational *(adjective)*

Involving gainful employment in something often done as a hobby.

- *Would you call this situation "nonrecreational"? Explain why.*
- *Students compared "nonrecreational" with similar adjectives in the lesson.*

nonreflecting *(adjective)*

Not capable of physical reflection.

- *Students compared "nonreflecting" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonreflecting."*

nonreflective *(adjective)*

Not capable of physical reflection.

- *Students compared "nonreflective" with similar adjectives in the lesson.*
- *A "nonreflective" approach may work better in this case.*

nonrepetitive *(adjective)*

Marked by the absence of repetition.

- *Nonrepetitive DNA sequence.*
- *Nonrepetitive dance movements.*

nonrepresentational *(adjective)*

Of or relating to a style of art in which objects do not resemble those known in physical nature.

- *Her writing became clearer after she learned "nonrepresentational."*
- *A "nonrepresentational" approach may work better in this case.*

nonrepresentative *(adjective)*

Not standing for something else.

- *Students compared "nonrepresentative" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonrepresentative" when it is not standing for something else.*

nonresilient *(adjective)*

Not resilient.

- *Students compared "nonresilient" with similar adjectives in the lesson.*
- *A "nonresilient" approach may work better in this case.*

nonresinous *(adjective)*

Not having resin.

- *Her writing became clearer after she learned "nonresinous."*
- *A "nonresinous" approach may work better in this case.*

nonresiny *(adjective)*

Not having resin.

- *Her writing became clearer after she learned "nonresiny."*
- *The speaker chose "nonresiny" because it captured the feeling precisely.*

nonresistant *(adjective)*

(often followed by 'to') likely to be affected with.

- *It is useful to describe something as "nonresistant" when it is (often followed by 'to') likely to be affected with.*
- *Would you call this situation "nonresistant"? Explain why.*

nonresonant *(adjective)*

Not reverberant; lacking a tendency to reverberate.

- *A "nonresonant" approach may work better in this case.*
- *The speaker chose "nonresonant" because it captured the feeling precisely.*

nonreticulate *(adjective)*

Not resembling or forming a network.

- *Her writing became clearer after she learned "nonreticulate."*
- *Students compared "nonreticulate" with similar adjectives in the lesson.*

---

nonretractable *(adjective)*

Not capable of being retracted.

- *Students compared "nonretractable" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonretractable" when it is not capable of being retracted.*

---

nonretractile *(adjective)*

Not capable of being retracted.

- *Students compared "nonretractile" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonretractile" when it is not capable of being retracted.*

---

nonreversible *(adjective)*

Not reversible or capable of having either side out.

- *Would you call this situation "nonreversible"? Explain why.*
- *Her writing became clearer after she learned "nonreversible."*

---

nonrhythmic *(adjective)*

Deliberately not rhythmic.

- *The speaker chose "nonrhythmic" because it captured the feeling precisely.*
- *Would you call this situation "nonrhythmic"? Explain why.*

---

nonruminant *(adjective)*

Not ruminant.

- *The speaker chose "nonruminant" because it captured the feeling precisely.*
- *It is useful to describe something as "nonruminant" when it is not ruminant.*

---

nonsegregated *(adjective)*

Rid of segregation; having had segregation ended.

- *Would you call this situation "nonsegregated"? Explain why.*
- *A "nonsegregated" approach may work better in this case.*

---

nonsensitive *(adjective)*

Never having had security classification.

- *The speaker chose "nonsensitive" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "nonsensitive."*

---

nonslippery *(adjective)*

Not slippery; not likely to slip or skid.

- *Her writing became clearer after she learned "nonslippery."*
- *A "nonslippery" approach may work better in this case.*

---

nonsocial *(adjective)*

Of plants and animals; not growing or living in groups or colonies.

- *It is useful to describe something as "nonsocial" when it is of plants and animals; not growing or living in....*
- *The speaker chose "nonsocial" because it captured the feeling precisely.*

---

nonsolid color *(noun)*

A color produced by a pattern of differently colored dots that together simulate the desired color.

- *They discussed "nonsolid color" during the group presentation.*
- *The article explained what "nonsolid color" means with a simple example.*

---

nonsolid colour *(noun)*

A color produced by a pattern of differently colored dots that together simulate the desired color.

- *Understanding "nonsolid colour" helps you talk about this topic clearly.*

- *They discussed "nonsolid colour" during the group presentation.*

---

nonsovereign *(adjective)*

(of peoples and political bodies) controlled by outside forces.

- *Her writing became clearer after she learned "nonsovereign."*
- *A "nonsovereign" approach may work better in this case.*

---

nonspatial *(adjective)*

Not spatial.

- *A nonspatial continuum.*
- *Her writing became clearer after she learned "nonspatial."*

---

nonspeaking *(adjective)*

Not capable of or especially not involving speech or spoken lines.

- *Had a nonspeaking role in the play.*
- *A "nonspeaking" approach may work better in this case.*

---

nonspecifically *(adverb)*

Without specificity.

- *Nonspecifically staining substances.*
- *Try rewriting the sentence and include "nonspecifically" naturally.*

---

nonspherical *(adjective)*

Not spherical.

- *Would you call this situation "nonspherical"? Explain why.*
- *Her writing became clearer after she learned "nonspherical."*

---

nonsteroid *(noun)*

An organic compound that does no contain a steroid.

- *She wrote a short paragraph that included "nonsteroid."*
- *He looked up "nonsteroid" because he had never seen it before.*

---

nonsubmergible *(adjective)*

Not submersible or submergible.

- *It is useful to describe something as "nonsubmergible" when it is not submersible or submergible.*
- *Would you call this situation "nonsubmergible"? Explain why.*

---

nonsubmersible *(adjective)*

Not submersible or submergible.

- *It is useful to describe something as "nonsubmersible" when it is not submersible or submergible.*
- *Students compared "nonsubmersible" with similar adjectives in the lesson.*

---

nonsuppurative *(adjective)*

Not suppurative.

- *Her writing became clearer after she learned "nonsuppurative."*
- *Students compared "nonsuppurative" with similar adjectives in the lesson.*

---

nonsweet *(adjective)*

Not containing sugar.

- *Her writing became clearer after she learned "nonsweet."*
- *Students compared "nonsweet" with similar adjectives in the lesson.*

---

nonsyllabic *(adjective)*

(of speech sounds) not forming or capable of forming the nucleus of a syllable.

- *Initial 'l' in 'little' is nonsyllabic.*
- *The nonsyllabic 'n' in 'botany' when it is pronounced 'botny'.*

---

nonsymbiotic *(adjective)*

Not parasitic on another organism.

- *Would you call this situation "nonsymbiotic"? Explain why.*
- *It is useful to describe something as "nonsymbiotic" when it is not parasitic on another organism.*

---

nonsynchronous *(adjective)*

Not occurring together.

- *Students compared "nonsynchronous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "nonsynchronous."*

---

nonsynthetic *(adjective)*

Involving or derived from living organisms; free from chemical treatments or additives.

- *Nonsynthetic fertilizer.*
- *Students compared "nonsynthetic" with similar adjectives in the lesson.*

---

nontelescopic *(adjective)*

Not telescopic.

- *It is useful to describe something as "nontelescopic" when it is not telescopic.*
- *A "nontelescopic" approach may work better in this case.*

---

nontelescoping *(adjective)*

Not telescopic.

- *It is useful to describe something as "nontelescoping" when it is not telescopic.*
- *Students compared "nontelescoping" with similar adjectives in the lesson.*

---

nonterritorial *(adjective)*

Not displaying territoriality.

- *A nonterritorial species.*
- *Would you call this situation "nonterritorial"? Explain why.*

---

nontranslational *(adjective)*

Of or relating to movement that is not uniform or not without rotation.

- *Her writing became clearer after she learned "nontranslational."*
- *Students compared "nontranslational" with similar adjectives in the lesson.*

---

nontransmissible *(adjective)*

(of disease) not capable of being passed on.

- *A "nontransmissible" approach may work better in this case.*
- *Her writing became clearer after she learned "nontransmissible."*

---

nonturbulent *(adjective)*

(of a liquid) not turbulent.

- *Nonturbulent flow.*
- *Would you call this situation "nonturbulent"? Explain why.*

---

nonuniformity *(noun)*

The quality of being diverse and interesting.

- *She wrote a short paragraph that included "nonuniformity."*
- *Understanding "nonuniformity" helps you talk about this topic clearly.*

---

nonunionised *(adjective)*

Not affiliated in a trade union.

- *The speaker chose "nonunionised" because it captured the feeling precisely.*
- *A "nonunionised" approach may work better in this case.*

---

nonunionized *(adjective)*

Not affiliated in a trade union.

- *Students compared "nonunionized" with similar adjectives in the lesson.*
- *It is useful to describe something as "nonunionized" when it is not affiliated in a trade union.*

---

nonuple *(adjective)*

Having nine units or components.

- *Her writing became clearer after she learned "nonuple."*
- *A "nonuple" approach may work better in this case.*

---

nonvascular organism *(noun)*

Organisms without vascular tissue: e.g. algae, lichens, fungi, mosses.

- *He looked up "nonvascular organism" because he had never seen it before.*
- *In class, the teacher used "nonvascular organism" to mean organisms without vascular tissue: e.g. algae,....*

---

nonvascular plant *(noun)*

Any of numerous plants of the division Bryophyta.

- *She wrote a short paragraph that included "nonvascular plant."*
- *Understanding "nonvascular plant" helps you talk about this topic clearly.*

---

nonviscid *(adjective)*

Not resembling glue in texture.

- *Her writing became clearer after she learned "nonviscid."*
- *Students compared "nonviscid" with similar adjectives in the lesson.*

---

nonvisual *(adjective)*

Not resulting in vision.

- *Nonvisual stimuli.*
- *Her writing became clearer after she learned "nonvisual."*

---

nonvolatilisable *(adjective)*

Not volatilizing readily.

- *Would you call this situation "nonvolatilisable"? Explain why.*
- *The speaker chose "nonvolatilisable" because it captured the feeling precisely.*

---

nonvolatilizable *(adjective)*

Not volatilizing readily.

- *The speaker chose "nonvolatilizable" because it captured the feeling precisely.*
- *A "nonvolatilizable" approach may work better in this case.*

---

nonvoluntary *(adjective)*

Not subject to the control of the will; ; ; ; - John F.Kennedy.

- *A "nonvoluntary" approach may work better in this case.*
- *It is useful to describe something as "nonvoluntary" when it is not subject to the control of the will; ; ; ; -....*

---

nonwashable *(adjective)*

Not washable.

- *It is useful to describe something as "nonwashable" when it is not washable.*
- *Would you call this situation "nonwashable"? Explain why.*

---

nonwoody *(adjective)*

Not woody; not consisting of or resembling wood.

- *A "nonwoody" approach may work better in this case.*
- *It is useful to describe something as "nonwoody" when it is not woody; not consisting of or resembling wood.*

---

nonworker *(noun)*

A person who does nothing.

- *She wrote a short paragraph that included "nonworker."*
- *The article explained what "nonworker" means with a simple example.*

nopalea *(noun)*

A genus of the cactus family with scarlet flowers.

- *He looked up "nopalea" because he had never seen it before.*
- *They discussed "nopalea" during the group presentation.*

noreaster *(noun)*

A storm blowing from the northeast.

- *She wrote a short paragraph that included "noreaster."*
- *They discussed "noreaster" during the group presentation.*

noreg *(noun)*

A constitutional monarchy in northern Europe on the western side of the Scandinavian Peninsula; achieved independence from Sweden in 1905.

- *They discussed "noreg" during the group presentation.*
- *She wrote a short paragraph that included "noreg."*

norethandrolone *(noun)*

A synthetic progestational hormone (trade name Norlutin) used in oral contraceptives and to treat endometriosis.

- *He looked up "norethandrolone" because he had never seen it before.*
- *She wrote a short paragraph that included "norethandrolone."*

norethynodrel *(noun)*

A progesterone derivative used in oral contraceptives and in the control of menstruation and the treatment of abnormal uterine bleeding.

- *They discussed "norethynodrel" during the group presentation.*
- *He looked up "norethynodrel" because he had never seen it before.*

norflex *(noun)*

A skeletal muscle relaxant (trade name Norflex) used to treat severe muscle strain and Parkinsonism.

- *He looked up "norflex" because he had never seen it before.*
- *They discussed "norflex" during the group presentation.*

norinyl *(noun)*

Trade name for an oral contraceptive containing norethindrone and mestranol.

- *They discussed "norinyl" during the group presentation.*
- *She wrote a short paragraph that included "norinyl."*

norlestrin *(noun)*

Trade name for an oral contraceptive containing estradiol and norethindrone.

- *In class, the teacher used "norlestrin" to mean trade name for an oral contraceptive containing....*
- *The article explained what "norlestrin" means with a simple example.*

norlutin *(noun)*

A synthetic progestational hormone (trade name Norlutin) used in oral contraceptives and to treat endometriosis.

- *The article explained what "norlutin" means with a simple example.*
- *In class, the teacher used "norlutin" to mean a synthetic progestational hormone (trade name....*

normaliser *(noun)*

A person who normalizes.

- *He looked up "normaliser" because he had never seen it before.*
- *Understanding "normaliser" helps you talk about this topic clearly.*

northeastwardly *(adverb)*

In a northeastward direction.

- *The narrator describes the scene "northeastwardly" in the final chapter.*
- *He answered "northeastwardly," which changed the tone of the conversation.*

northern woodsia *(noun)*

Taking place related or acquired under home healthcare.

- *Nosohusial infections.*
- *Her writing became clearer after she learned "nosohusial."*

---

nostocaceae *(noun)*

Blue-green algae.

- *They discussed "nostocaceae" during the group presentation.*
- *Understanding "nostocaceae" helps you talk about this topic clearly.*

---

notecase *(noun)*

A pocket-size case for holding papers and paper money.

- *He looked up "notecase" because he had never seen it before.*
- *She wrote a short paragraph that included "notecase."*

---

notechis *(noun)*

Tiger snakes.

- *The article explained what "notechis" means with a simple example.*

- *In class, the teacher used "notechis" to mean tiger snakes.*

---

notechis scutatus *(noun)*

Highly venomous brown-and-yellow snake of Australia and Tasmania.

- *The article explained what "notechis scutatus" means with a simple example.*
- *They discussed "notechis scutatus" during the group presentation.*

---

notemigonus *(noun)*

Golden shiners.

- *Understanding "notemigonus" helps you talk about this topic clearly.*
- *The article explained what "notemigonus" means with a simple example.*

---

notemigonus crysoleucas *(noun)*

Shiner of eastern North America having golden glints; sometimes also called 'bream'.

- *She wrote a short paragraph that included "notemigonus crysoleucas."*
- *The article explained what "notemigonus crysoleucas" means with a simple example.*

---

nothofagus cuninghamii *(noun)*

Large evergreen tree of Tasmania.

- *Understanding "nothofagus cuninghamii" helps you talk about this topic clearly.*
- *They discussed "nothofagus cuninghamii" during the group presentation.*

---

nothofagus dombeyi *(noun)*

Chilean evergreen whose leafy boughs are used for thatching.

- *The article explained what "nothofagus dombeyi" means with a simple example.*
- *Understanding "nothofagus dombeyi" helps you talk about this topic clearly.*

---

nothofagus solanderi *(noun)*

New Zealand forest tree.

- *The article explained what "nothofagus solanderi" means with a simple example.*
- *In class, the teacher used "nothofagus solanderi" to mean new zealand forest tree.*

---

nothosaur *(noun)*

Extinct marine reptile with longer more slender limbs than plesiosaurs and less completely modified for swimming.

- *They discussed "nothosaur" during the group presentation.*
- *The article explained what "nothosaur" means with a simple example.*

---

nothosauria *(noun)*

A suborder of Sauropterygia.

- *The article explained what "nothosauria" means with a simple example.*
- *She wrote a short paragraph that included "nothosauria."*

---

noticeability *(noun)*

The property of being easy to see and understand.

- *In class, the teacher used "noticeability" to mean the property of being easy to see and understand.*
- *He looked up "noticeability" because he had never seen it before.*

---

noticeableness *(noun)*

The property of being easy to see and understand.

- *They discussed "noticeableness" during the group presentation.*
- *Understanding "noticeableness" helps you talk about this topic clearly.*

---

noticer *(noun)*

Someone who takes notice.

- *A careful noticer of details.*
- *In class, the teacher used "noticer" to mean someone who takes notice.*

---

notomys *(noun)*

Jerboa rats.

- *She wrote a short paragraph that included "notomys."*
- *He looked up "notomys" because he had never seen it before.*

---

notonecta *(noun)*

Type genus of the Notonectidae: backswimmers.

- *They discussed "notonecta" during the group presentation.*
- *He looked up "notonecta" because he had never seen it before.*

---

notonecta undulata *(noun)*

Predaceous aquatic insect that swims on its back and may inflict painful bites.

- *They discussed "notonecta undulata" during the group presentation.*
- *The article explained what "notonecta undulata" means with a simple example.*

---

notonectidae *(noun)*

Aquatic carnivorous insects.

- *They discussed "notonectidae" during the group presentation.*
- *Understanding "notonectidae" helps you talk about this topic clearly.*

---

notornis *(noun)*

Flightless New Zealand birds similar to gallinules.

- *He looked up "notornis" because he had never seen it before.*
- *In class, the teacher used "notornis" to mean flightless new zealand birds similar to gallinules.*

---

notornis mantelli *(noun)*

Flightless New Zealand birds similar to gallinules.

- *Understanding "notornis mantelli" helps you talk about this topic clearly.*
- *The article explained what "notornis mantelli" means with a simple example.*

---

notoryctidae *(noun)*

Pouched moles.

- *They discussed "notoryctidae" during the group presentation.*
- *He looked up "notoryctidae" because he had never seen it before.*

---

notoryctus *(noun)*

Type genus of the family Notoryctidae: comprising solely the marsupial mole.

- *Understanding "notoryctus" helps you talk about this topic clearly.*
- *In class, the teacher used "notoryctus" to mean type genus of the family notoryctidae: comprising....*

---

notoryctus typhlops *(noun)*

Small burrowing Australian marsupial that resembles a mole.

- *The article explained what "notoryctus typhlops" means with a simple example.*
- *In class, the teacher used "notoryctus typhlops" to mean small burrowing australian marsupial that resembles....*

---

notostraca *(noun)*

Small freshwater crustaceans with a shield-shaped carapace.

- *In class, the teacher used "notostraca" to mean small freshwater crustaceans with a shield-shaped....*
- *The article explained what "notostraca" means with a simple example.*

---

notropis atherinoides *(noun)*

Small blunt-nosed fish of Great Lakes and Mississippi valley with a greenish luster.

- *The article explained what "notropis atherinoides" means with a simple example.*
- *They discussed "notropis atherinoides" during the group presentation.*

---

novelise *(verb)*

Convert into the form or the style of a novel.

- *He did not know how to use “novelise” until he saw an example.*
- *Can you use “novelise” in a sentence that fits this situation?*

---

(Persian) the new year holiday in Iran and Azerbaijan and Afghanistan and Pakistan and parts of India and among the Kurds; comes at the vernal equinox.

- *In class, the teacher used “nowrooz” to mean (persian) the new year holiday in iran and....*
- *They discussed “nowrooz” during the group presentation.*

---

noxiousness *(noun)*

The quality of being noxious.

- *In class, the teacher used “noxiousness” to mean the quality of being noxious.*
- *Understanding “noxiousness” helps you talk about this topic clearly.*

---

nrna *(noun)*

Ribonucleic acid found in the nucleolus of the cell.

- *They discussed “nrna” during the group presentation.*
- *He looked up “nrna” because he had never seen it before.*

---

nubbiness *(noun)*

Looseness or roughness in texture (as of cloth).

- *The article explained what “nubbiness” means with a simple example.*
- *In class, the teacher used “nubbiness” to mean looseness or roughness in texture (as of cloth).*

---

nubble *(noun)*

A small lump or protuberance.

- *Understanding “nubble” helps you talk about this topic clearly.*
- *They discussed “nubble” during the group presentation.*

---

nucellus *(noun)*

Central part of a plant ovule; contains the embryo sac.

- *They discussed “nucellus” during the group presentation.*
- *The article explained what “nucellus” means with a simple example.*

nucha *(noun)*

The back side of the neck.

- *They discussed "nucha" during the group presentation.*
- *Understanding "nucha" helps you talk about this topic clearly.*

nucifraga *(noun)*

Nutcrackers.

- *Understanding "nucifraga" helps you talk about this topic clearly.*
- *He looked up "nucifraga" because he had never seen it before.*

nucifraga caryocatactes *(noun)*

Old World nutcracker.

- *In class, the teacher used "nucifraga caryocatactes" to mean old world nutcracker.*
- *They discussed "nucifraga caryocatactes" during the group presentation.*

nucifraga columbiana *(noun)*

Nutcracker of the western United States.

- *They discussed "nucifraga columbiana" during the group presentation.*
- *Understanding "nucifraga columbiana" helps you talk about this topic clearly.*

nucleole *(noun)*

A small round body of protein in a cell nucleus; such organelles contain RNA and are involved in protein synthesis.

- *The article explained what "nucleole" means with a simple example.*
- *They discussed "nucleole" during the group presentation.*

nudger *(noun)*

Someone who nudges; someone who gives a gentle push.

- *He needs a regular nudger to keep him awake.*
- *The article explained what "nudger" means with a simple example.*

- *Understanding "nudibranchia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nudibranchia."*

nudnick *(noun)*

(Yiddish) someone who is a boring pest.

- *He looked up "nudnick" because he had never seen it before.*
- *She wrote a short paragraph that included "nudnick."*

nudnik *(noun)*

(Yiddish) someone who is a boring pest.

- *She wrote a short paragraph that included "nudnik."*
- *They discussed "nudnik" during the group presentation.*

nullipara *(noun)*

(obstetrics) a woman who has never give birth to a child.

- *Understanding "nullipara" helps you talk about this topic clearly.*
- *The article explained what "nullipara" means with a simple example.*

numbfish *(noun)*

Any sluggish bottom-dwelling ray of the order Torpediniformes having a rounded body and electric organs on each side of the head capable of emitting strong electric discharges.

- *Understanding "numbfish" helps you talk about this topic clearly.*
- *In class, the teacher used "numbfish" to mean any sluggish bottom-dwelling ray of the order....*

numdah *(noun)*

An embroidered rug made from a coarse Indian felt.

- *She wrote a short paragraph that included "numdah."*
- *The article explained what "numdah" means with a simple example.*

---

numdah rug *(noun)*

An embroidered rug made from a coarse Indian felt.

- *She wrote a short paragraph that included "numdah rug."*
- *He looked up "numdah rug" because he had never seen it before.*

---

numenius arquata *(noun)*

Common Eurasian curlew.

- *They discussed "numenius arquata" during the group presentation.*
- *Understanding "numenius arquata" helps you talk about this topic clearly.*

---

numerousness *(noun)*

A large number.

- *The article explained what "numerousness" means with a simple example.*
- *They discussed "numerousness" during the group presentation.*

---

numida *(noun)*

Guinea fowl.

- *Understanding "numida" helps you talk about this topic clearly.*
- *The article explained what "numida" means with a simple example.*

---

numida meleagris *(noun)*

A west African bird having dark plumage mottled with white; native to Africa but raised for food in many parts of the world.

- *The article explained what "numida meleagris" means with a simple example.*
- *Understanding "numida meleagris" helps you talk about this topic clearly.*

---

numididae *(noun)*

Guinea fowl and related birds of Africa and Madagascar.

- *Understanding "numididae" helps you talk about this topic clearly.*
- *He looked up "numididae" because he had never seen it before.*

---

numidinae *(noun)*

Guinea fowl and related birds of Africa and Madagascar.

- *In class, the teacher used "numidinae" to mean guinea fowl and related birds of africa and madagascar.*
- *The article explained what "numidinae" means with a simple example.*

---

numismatologist *(noun)*

A collector and student of money (and coins in particular).

- *The article explained what "numismatologist" means with a simple example.*
- *She wrote a short paragraph that included "numismatologist."*

---

nummulite *(noun)*

Large fossil protozoan of the Tertiary period.

- *Understanding "nummulite" helps you talk about this topic clearly.*
- *They discussed "nummulite" during the group presentation.*

---

nummulitidae *(noun)*

A family of fossil protoctists.

- *He looked up "nummulitidae" because he had never seen it before.*
- *Understanding "nummulitidae" helps you talk about this topic clearly.*

---

nuphar sagittifolium *(noun)*

Of flowing waters of the southeastern United States; may form obstructive mats in streams.

- *She wrote a short paragraph that included "nuphar sagittifolium."*

- *He looked up "nuphar sagittifolium" because he had never seen it before.*

---

nuprin *(noun)*

A nonsteroidal anti-inflammatory and analgesic medicine (trade names Advil and Motrin and Nuprin) used to relieve the pain of arthritis and as an antipyretic.

- *Understanding "nuprin" helps you talk about this topic clearly.*
- *The article explained what "nuprin" means with a simple example.*

---

nurseling *(noun)*

An infant considered in relation to its nurse.

- *They discussed "nurseling" during the group presentation.*
- *In class, the teacher used "nurseling" to mean an infant considered in relation to its nurse.*

---

nurtural *(adjective)*

Resulting from nurture.

- *A "nurtural" approach may work better in this case.*
- *It is useful to describe something as "nurtural" when it is resulting from nurture.*

---

nusku *(noun)*

God of fire and light; corresponds to Babylonian Girru.

- *Understanding "nusku" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nusku."*

---

nutate *(verb)*

Rock, sway, or nod; usually involuntarily.

- *In everyday English, people use "nutate" when talking about this idea.*
- *Can you use "nutate" in a sentence that fits this situation?*

---

nutgrass *(noun)*

A widely distributed perennial sedge having small edible nutlike tubers.

- *They discussed "nutgrass" during the group presentation.*
- *Understanding "nutgrass" helps you talk about this topic clearly.*

---

nutlet *(noun)*

A small nut.

- *Understanding "nutlet" helps you talk about this topic clearly.*
- *The article explained what "nutlet" means with a simple example.*

---

nutlike *(adjective)*

Having the flavor of nuts.

- *Would you call this situation "nutlike"? Explain why.*
- *Students compared "nutlike" with similar adjectives in the lesson.*

---

nutrify *(verb)*

Give nourishment to.

- *He did not know how to use "nutrify" until he saw an example.*
- *In everyday English, people use "nutrify" when talking about this idea.*

---

nutritionary *(adjective)*

Of or relating to or providing nutrition.

- *Students compared "nutritionary" with similar adjectives in the lesson.*
- *A "nutritionary" approach may work better in this case.*

---

nutritiousness *(noun)*

The quality of being nourishing and promoting healthy growth.

- *She wrote a short paragraph that included "nutritiousness."*
- *The article explained what "nutritiousness" means with a simple example.*

---

One species.

- *She wrote a short paragraph that included "nuytsia."*
- *Understanding "nuytsia" helps you talk about this topic clearly.*

---

nwbn *(noun)*

The compass point that is one point north of northwest.

- *They discussed "nwbn" during the group presentation.*
- *Understanding "nwbn" helps you talk about this topic clearly.*

---

nwbw *(noun)*

The compass point that is one point west of northwest.

- *Understanding "nwbw" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nwbw."*

---

nyamuragira *(noun)*

An active volcano in eastern Congo.

- *Understanding "nyamuragira" helps you talk about this topic clearly.*
- *He looked up "nyamuragira" because he had never seen it before.*

---

nybble *(noun)*

A small byte.

- *In class, the teacher used "nybble" to mean a small byte.*
- *The article explained what "nybble" means with a simple example.*

---

nyctaginaceae *(noun)*

A family of flowering plants of the order Caryophyllales.

- *In class, the teacher used "nyctaginaceae" to mean a family of flowering plants of the order....*
- *The article explained what "nyctaginaceae" means with a simple example.*

---

nyctaginia *(noun)*

A caryophyllaceous genus of the family Nyctaginaceae having only one species.

- *She wrote a short paragraph that included "nyctaginia."*
- *He looked up "nyctaginia" because he had never seen it before.*

---

nyctaginia capitata *(noun)*

Viscid branched perennial of the southwestern United States and northern Mexico having tuberous roots and deep red flowers.

- *Understanding "nyctaginia capitata" helps you talk about this topic clearly.*
- *He looked up "nyctaginia capitata" because he had never seen it before.*

---

nyctanassa *(noun)*

American night herons.

- *The article explained what "nyctanassa" means with a simple example.*
- *She wrote a short paragraph that included "nyctanassa."*

---

nyctanassa violacea *(noun)*

North American night heron.

- *She wrote a short paragraph that included "nyctanassa violacea."*
- *He looked up "nyctanassa violacea" because he had never seen it before.*

---

nyctereutes *(noun)*

Raccoon dogs.

- *They discussed "nyctereutes" during the group presentation.*
- *He looked up "nyctereutes" because he had never seen it before.*

---

nyctereutes procyonides *(noun)*

Small wild dog of eastern Asia having facial markings like those of a raccoon.

- *In class, the teacher used "nyctereutes procyonides" to mean small wild dog of eastern asia having facial....*
- *He looked up "nyctereutes procyonides" because he had never seen it before.*

---

nycticebus *(noun)*

A genus of Lorisidae.

- *She wrote a short paragraph that included "nycticebus."*
- *Understanding "nycticebus" helps you talk about this topic clearly.*

---

nycticebus pygmaeus *(noun)*

Stocky lemur of southeastern Asia.

- *Understanding "nycticebus pygmaeus" helps you talk about this topic clearly.*
- *The article explained what "nycticebus pygmaeus" means with a simple example.*

---

nycticebus tardigradua *(noun)*

Stocky lemur of southeastern Asia.

- *They discussed "nycticebus tardigradua" during the group presentation.*
- *In class, the teacher used "nycticebus tardigradua" to mean stocky lemur of southeastern asia.*

---

nycticorax *(noun)*

Old World night herons.

- *In class, the teacher used "nycticorax" to mean old world night herons.*
- *He looked up "nycticorax" because he had never seen it before.*

---

nycticorax nycticorax *(noun)*

Night heron of both Old and New Worlds.

- *Understanding "nycticorax nycticorax" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nycticorax nycticorax."*

---

nyctimene *(noun)*

East Indian fruit bats.

- *In class, the teacher used "nyctimene" to mean east indian fruit bats.*
- *He looked up "nyctimene" because he had never seen it before.*

---

nycturia *(noun)*

Excessive urination at night; especially common in older men.

- *The article explained what "nycturia" means with a simple example.*
- *In class, the teacher used "nycturia" to mean excessive urination at night; especially common in....*

---

nydrazid *(noun)*

Antibacterial drug (trade name Nydrazid) used to treat tuberculosis.

- *They discussed "nydrazid" during the group presentation.*
- *She wrote a short paragraph that included "nydrazid."*

---

nylghai *(noun)*

Large Indian antelope; male is blue-grey with white markings; female is brownish with no horns.

- *He looked up "nylghai" because he had never seen it before.*
- *She wrote a short paragraph that included "nylghai."*

nylghau *(noun)*

Large Indian antelope; male is blue-grey with white markings; female is brownish with no horns.

- *He looked up "nylghau" because he had never seen it before.*
- *She wrote a short paragraph that included "nylghau."*

nymphaeaceae *(noun)*

Dicot aquatic plants.

- *She wrote a short paragraph that included "nymphaeaceae."*
- *They discussed "nymphaeaceae" during the group presentation.*

nymphalid *(noun)*

Medium to large butterflies found worldwide typically having brightly colored wings and much-reduced nonfunctional forelegs carried folded on the breast.

- *In class, the teacher used "nymphalid" to mean medium to large butterflies found worldwide....*
- *The article explained what "nymphalid" means with a simple example.*

nymphalid butterfly *(noun)*

Medium to large butterflies found worldwide typically having brightly colored wings and much-reduced nonfunctional forelegs carried folded on the breast.

- *They discussed "nymphalid butterfly" during the group presentation.*
- *He looked up "nymphalid butterfly" because he had never seen it before.*

nymphalis *(noun)*

Type genus of the Nymphalidae: mourning cloak butterflies.

- *The article explained what "nymphalis" means with a simple example.*
- *In class, the teacher used "nymphalis" to mean type genus of the nymphalidae: mourning cloak....*

nymphalis antiopa *(noun)*

Of temperate regions; having dark purple wings with yellow borders.

- *The article explained what "nymphalis antiopa" means with a simple example.*
- *In class, the teacher used "nymphalis antiopa" to mean of temperate regions; having dark purple wings with....*

nymphicus *(noun)*

A genus of Psittacidae.

- *Understanding "nymphicus" helps you talk about this topic clearly.*
- *They discussed "nymphicus" during the group presentation.*

nymphicus hollandicus *(noun)*

Small grey Australian parrot with a yellow crested head.

- *Understanding "nymphicus hollandicus" helps you talk about this topic clearly.*
- *The article explained what "nymphicus hollandicus" means with a simple example.*

nympholept *(noun)*

A person seized by nympholepsy.

- *In class, the teacher used "nympholept" to mean a person seized by nympholepsy.*
- *The article explained what "nympholept" means with a simple example.*

Reduce the edge or violence of.

- *Obtunded reflexes.*
- *The coach explained when to use "obtund" and when to wait.*

---

obturate *(verb)*

Block passage through.

- *Learners should practice how to use "obturate" in real sentences.*
- *She tried to use "obturate" carefully so everyone would understand.*

---

occidentalise *(verb)*

Make western in character.

- *He did not know how to use "occidentalise" until he saw an example.*
- *She tried to use "occidentalise" carefully so everyone would understand.*

---

occidentalize *(verb)*

Make western in character.

- *Learners should practice how to use "occidentalize" in real sentences.*
- *In everyday English, people use "occidentalize" when talking about this idea.*

---

occipitomastoid suture *(noun)*

The suture between the occipital and the temporal bones; a continuation of the lamboid suture.

- *She wrote a short paragraph that included "occipitomastoid suture."*
- *He looked up "occipitomastoid suture" because he had never seen it before.*

---

oceanaut *(noun)*

A skilled worker who can live in underwater installations and participate in scientific research.

- *Understanding "oceanaut" helps you talk about this topic clearly.*
- *The article explained what "oceanaut" means with a simple example.*

---

oceanid *(noun)*

(Greek mythology) sea nymph who was a daughter of Oceanus and Tethys.

- *The article explained what "oceanid" means with a simple example.*
- *Understanding "oceanid" helps you talk about this topic clearly.*

---

oceanites *(noun)*

A genus of Hydrobatidae.

- *She wrote a short paragraph that included "oceanites."*
- *He looked up "oceanites" because he had never seen it before.*

---

oceanites oceanicus *(noun)*

Medium-sized storm petrel.

- *The article explained what "oceanites oceanicus" means with a simple example.*
- *In class, the teacher used "oceanites oceanicus" to mean medium-sized storm petrel.*

---

ochna *(noun)*

Type genus of Ochnaceae; evergreen trees and shrubs of Old World tropics.

- *They discussed "ochna" during the group presentation.*
- *He looked up "ochna" because he had never seen it before.*

---

ochna family *(noun)*

Family of tropical evergreen trees and shrubs with thick shining parallel-veined leaves.

- *She wrote a short paragraph that included "ochna family."*
- *He looked up "ochna family" because he had never seen it before.*

---

ochna serrulata *(noun)*

Shrub with narrow-elliptic glossy evergreen leaves and yellow flowers with leathery petaloid sepals.

- *Understanding "ochna serrulata" helps you talk about this topic clearly.*
- *They discussed "ochna serrulata" during the group presentation.*

---

ochnaceae *(noun)*

Family of tropical evergreen trees and shrubs with thick shining parallel-veined leaves.

- *She wrote a short paragraph that included "ochnaceae."*
- *They discussed "ochnaceae" during the group presentation.*

---

ochotona *(noun)*

Type genus of the Ochotonidae.

- *She wrote a short paragraph that included "ochotona."*
- *They discussed "ochotona" during the group presentation.*

---

ochotona collaris *(noun)*

Similar to little chief hare and may be same species.

- *Understanding "ochotona collaris" helps you talk about this topic clearly.*
- *The article explained what "ochotona collaris" means with a simple example.*

ochotona princeps *(noun)*

North American pika.

- *She wrote a short paragraph that included "ochotona princeps."*
- *They discussed "ochotona princeps" during the group presentation.*

ochotonidae *(noun)*

Pikas and extinct forms.

- *She wrote a short paragraph that included "ochotonidae."*
- *He looked up "ochotonidae" because he had never seen it before.*

ochroma *(noun)*

One species: balsa.

- *She wrote a short paragraph that included "ochroma."*
- *He looked up "ochroma" because he had never seen it before.*

ochroma lagopus *(noun)*

Forest tree of lowland Central America having a strong very light wood; used for making floats and rafts and in crafts.

- *He looked up "ochroma lagopus" because he had never seen it before.*
- *She wrote a short paragraph that included "ochroma lagopus."*

octad *(noun)*

The cardinal number that is the sum of seven and one.

- *She wrote a short paragraph that included "octad."*
- *He looked up "octad" because he had never seen it before.*

octadecanoic acid *(noun)*

A waxy saturated fatty acid; occurs widely as a glyceride in animal and vegetable fats.

- *He looked up "octadecanoic acid" because he had never seen it before.*
- *She wrote a short paragraph that included "octadecanoic acid."*

octanedioic acid *(noun)*

A dicarboxylic acid found in cork.

- *The article explained what "octanedioic acid" means with a simple example.*
- *She wrote a short paragraph that included "octanedioic acid."*

octangular *(adjective)*

Of or relating to or shaped like an octagon.

- *Students compared "octangular" with similar adjectives in the lesson.*
- *It is useful to describe something as "octangular" when it is of or relating to or shaped like an octagon.*

octans *(noun)*

The constellation that includes the southern celestial pole.

- *In class, the teacher used "octans" to mean the constellation that includes the southern....*
- *They discussed "octans" during the group presentation.*

octillion *(noun)*

The number that is represented as a one followed by 27 zeros.

- *She wrote a short paragraph that included "octillion."*
- *He looked up "octillion" because he had never seen it before.*

octonary *(noun)*

The cardinal number that is the sum of seven and one.

- *The article explained what "octonary" means with a simple example.*
- *In class, the teacher used "octonary" to mean the cardinal number that is the sum of seven and one.*

octopoda *(noun)*

Octopuses and paper nautilus.

- *They discussed "octopoda" during the group presentation.*
- *Understanding "octopoda" helps you talk about this topic clearly.*

---

octopodidae *(noun)*

A family of Octopoda.

- *They discussed "octopodidae" during the group presentation.*
- *In class, the teacher used "octopodidae" to mean a family of octopoda.*

---

ocyurus chrysurus *(noun)*

Superior food fish of the tropical Atlantic and Caribbean with broad yellow stripe along the sides and on the tail.

- *In class, the teacher used "ocyurus chrysurus" to mean superior food fish of the tropical atlantic and....*
- *He looked up "ocyurus chrysurus" because he had never seen it before.*

---

oddment *(noun)*

A piece of cloth that is left over after the rest has been used or sold.

- *The article explained what "oddment" means with a simple example.*
- *She wrote a short paragraph that included "oddment."*

---

odiousness *(noun)*

The quality of being offensive.

- *Understanding "odiousness" helps you talk about this topic clearly.*
- *In class, the teacher used "odiousness" to mean the quality of being offensive.*

---

odist *(noun)*

A poet who writes odes.

- *She wrote a short paragraph that included "odist."*
- *The article explained what "odist" means with a simple example.*

---

odo of lagery *(noun)*

French pope from 1088 to 1099 whose sermons called for the First Crusade (1042-1099).

- *She wrote a short paragraph that included "odo of lagery."*
- *He looked up "odo of lagery" because he had never seen it before.*

---

odobenidae *(noun)*

Walruses and extinct forms.

- *Understanding "odobenidae" helps you talk about this topic clearly.*
- *He looked up "odobenidae" because he had never seen it before.*

---

odobenus *(noun)*

Type genus of the Odobenidae: walruses.

- *They discussed "odobenus" during the group presentation.*
- *In class, the teacher used "odobenus" to mean type genus of the odobenidae: walruses.*

---

odobenus divergens *(noun)*

A walrus of the Bering Sea and northern Pacific.

- *Understanding "odobenus divergens" helps you talk about this topic clearly.*
- *They discussed "odobenus divergens" during the group presentation.*

---

odobenus rosmarus *(noun)*

A walrus of northern Atlantic and Arctic waters.

- *They discussed "odobenus rosmarus" during the group presentation.*
- *Understanding "odobenus rosmarus" helps you talk about this topic clearly.*

---

odonate *(noun)*

Large primitive predatory aquatic insect having two pairs of membranous wings.

- *Understanding "odonate" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “odonate.”*

---

odontaspididae *(noun)*

Sand sharks; in some classifications coextensive with family Carcharhinidae.

- *He looked up “odontaspididae” because he had never seen it before.*
- *She wrote a short paragraph that included “odontaspididae.”*

---

odontaspis *(noun)*

Type and sole genus of Carchariidae: sand sharks.

- *In class, the teacher used “odontaspis” to mean type and sole genus of carchariidae: sand sharks.*
- *He looked up “odontaspis” because he had never seen it before.*

---

odontaspis taurus *(noun)*

Shallow-water shark with sharp jagged teeth found on both sides of Atlantic; sometimes dangerous to swimmers.

- *In class, the teacher used “odontaspis taurus” to mean shallow-water shark with sharp jagged teeth found....*
- *Understanding “odontaspis taurus” helps you talk about this topic clearly.*

---

odontiasis *(noun)*

The eruption through the gums of baby teeth.

- *They discussed “odontiasis” during the group presentation.*
- *The article explained what “odontiasis” means with a simple example.*

---

odontoceti *(noun)*

Toothed whales: dolphins; porpoises; sperm whales; beaked whales.

- *In class, the teacher used “odontoceti” to mean toothed whales: dolphins; porpoises; sperm whales;....*
- *Understanding “odontoceti” helps you talk about this topic clearly.*

---

odontophorus *(noun)*

Genus of Central and South American crested partridges resembling quails; sometimes placed in a distinct subfamily or isolated in a distinct family.

- *In class, the teacher used “odontophorus” to mean genus of central and south american crested....*
- *He looked up “odontophorus” because he had never seen it before.*

---

odorize *(verb)*

Cause to smell or be smelly.

- *She tried to use “odorize” carefully so everyone would understand.*
- *The coach explained when to use “odorize” and when to wait.*

---

odourise *(verb)*

Cause to smell or be smelly.

- *The coach explained when to use “odourise” and when to wait.*
- *She tried to use “odourise” carefully so everyone would understand.*

---

odovacar *(noun)*

Germanic barbarian leader who ended the Western Roman Empire in 476 and became the first barbarian ruler of Italy (434-493).

- *She wrote a short paragraph that included “odovacar.”*
- *The article explained what “odovacar” means with a simple example.*

---

odovakar *(noun)*

Germanic barbarian leader who ended the Western Roman Empire in 476 and became the first barbarian ruler of Italy (434-493).

- *The article explained what “odovakar” means with a simple example.*
- *They discussed “odovakar” during the group presentation.*

---

oecanthus *(noun)*

Tree crickets.

- *He looked up “oecanthus” because he had never seen it before.*
- *She wrote a short paragraph that included “oecanthus.”*

---

oecanthus fultoni *(noun)*

Pale yellowish tree cricket widely distributed in North America.

- *She wrote a short paragraph that included "oecanthus fultoni."*
- *Understanding "oecanthus fultoni" helps you talk about this topic clearly.*

---

oecumenic *(adjective)*

Concerned with promoting unity among churches or religions.

- *Students compared "oecumenic" with similar adjectives in the lesson.*
- *It is useful to describe something as "oecumenic" when it is concerned with promoting unity among churches or....*

---

oedogoniaceae *(noun)*

Filamentous green algae.

- *The article explained what "oedogoniaceae" means with a simple example.*
- *She wrote a short paragraph that included "oedogoniaceae."*

---

oedogoniales *(noun)*

Simple or branched filamentous freshwater green algae.

- *She wrote a short paragraph that included "oedogoniales."*
- *He looked up "oedogoniales" because he had never seen it before.*

---

oedogonium *(noun)*

Type genus of Oedogoniaceae; freshwater green algae having long unbranched filaments; usually free-floating when mature.

- *He looked up "oedogonium" because he had never seen it before.*
- *She wrote a short paragraph that included "oedogonium."*

---

oenanthe crocata *(noun)*

European poisonous herb having tuberous roots, yellow juice that stains the skin, yellow flowers and foliage resembling celery; all parts extremely poisonous.

- *She wrote a short paragraph that included "oenanthe crocata."*
- *He looked up "oenanthe crocata" because he had never seen it before.*

---

oengus *(noun)*

Celtic god of love and beauty; patron deity of young men and women.

- *The article explained what "oengus" means with a simple example.*
- *She wrote a short paragraph that included "oengus."*

---

oenomel *(noun)*

Wine mixed with honey.

- *She wrote a short paragraph that included "oenomel."*
- *Understanding "oenomel" helps you talk about this topic clearly.*

---

oesophagogastric junction *(noun)*

The junction between the esophagus and the stomach epithelium.

- *He looked up "oesophagogastric junction" because he had never seen it before.*
- *She wrote a short paragraph that included "oesophagogastric junction."*

---

oesophagoscope *(noun)*

An optical instrument for examining the inside of the esophagus.

- *The article explained what "oesophagoscope" means with a simple example.*
- *Understanding "oesophagoscope" helps you talk about this topic clearly.*

---

oestriol *(noun)*

A naturally occurring estrogenic hormone; a synthetic form is used to treat estrogen deficiency.

- *They discussed "oestriol" during the group presentation.*
- *He looked up "oestriol" because he had never seen it before.*

---

oestrone *(noun)*

A naturally occurring weak estrogenic hormone secreted by the mammalian ovary; synthesized (trade name Estronol) and used to treat estrogen deficiency.

- *The article explained what "oestrone" means with a simple example.*
- *In class, the teacher used "oestrone" to mean a naturally occurring weak estrogenic hormone....*

---

offenceless *(adjective)*

Incapable of offending or attacking.

- *Her writing became clearer after she learned "offenceless."*
- *Students compared "offenceless" with similar adjectives in the lesson.*

---

offenseless *(adjective)*

Incapable of offending or attacking.

- *A "offenseless" approach may work better in this case.*
- *Students compared "offenseless" with similar adjectives in the lesson.*

---

officialise *(verb)*

Make official.

- *The coach explained when to use "officialise" and when to wait.*
- *Can you use "officialise" in a sentence that fits this situation?*

---

officialize *(verb)*

Make official.

- *We officialized our relationship.*
- *He did not know how to use "officialize" until he saw an example.*

---

officiousness *(noun)*

Aggressiveness as evidenced by intruding; by advancing yourself or your ideas without invitation.

- *He looked up "officiousness" because he had never seen it before.*
- *She wrote a short paragraph that included "officiousness."*

---

Remove the saddle from.

- *Learners should practice how to use "offsaddle" in real sentences.*
- *In everyday English, people use "offsaddle" when talking about this idea.*

---

oftenness *(noun)*

The number of occurrences within a given time period.

- *The article explained what "oftenness" means with a simple example.*
- *In class, the teacher used "oftenness" to mean the number of occurrences within a given time period.*

---

ogalala *(noun)*

A member of the Siouan people who constituted a division of the Teton Sioux and who formerly inhabited the Black Hills of western South Dakota.

- *She wrote a short paragraph that included "ogalala."*
- *Understanding "ogalala" helps you talk about this topic clearly.*

---

ogcocephalidae *(noun)*

Batfishes: sluggish bottom-dwelling spiny fishes.

- *Understanding "ogcocephalidae" helps you talk about this topic clearly.*
- *The article explained what "ogcocephalidae" means with a simple example.*

---

ogler *(noun)*

A viewer who gives a flirtatious or lewd look at another person.

- *The article explained what "ogler" means with a simple example.*
- *She wrote a short paragraph that included "ogler."*

---

ohmage *(noun)*

The ohmic resistance of a conductor.

- *She wrote a short paragraph that included "ohmage."*
- *He looked up "ohmage" because he had never seen it before.*

oilbird *(noun)*

Nocturnal fruit-eating bird of South America that has fatty young yielding an oil that is used instead of butter.

- *The article explained what "oilbird" means with a simple example.*
- *In class, the teacher used "oilbird" to mean nocturnal fruit-eating bird of south america that....*

oilcan *(noun)*

A can with a long nozzle to apply oil to machinery.

- *In class, the teacher used "oilcan" to mean a can with a long nozzle to apply oil to machinery.*
- *Understanding "oilcan" helps you talk about this topic clearly.*

oilfish *(noun)*

Very large deep-water snake mackerel.

- *In class, the teacher used "oilfish" to mean very large deep-water snake mackerel.*
- *Understanding "oilfish" helps you talk about this topic clearly.*

oilpaper *(noun)*

Paper that has been made translucent and waterproof by soaking in oil.

- *Understanding "oilpaper" helps you talk about this topic clearly.*
- *In class, the teacher used "oilpaper" to mean paper that has been made translucent and waterproof....*

oilrig *(noun)*

Rig used in drilling for oil or gas.

- *He looked up "oilrig" because he had never seen it before.*
- *They discussed "oilrig" during the group presentation.*

oilstone *(noun)*

A whetstone for use with oil.

- *She wrote a short paragraph that included "oilstone."*
- *The article explained what "oilstone" means with a simple example.*

oilstove *(noun)*

Heater that burns oil (as kerosine) for heating or cooking.

- *The article explained what "oilstove" means with a simple example.*
- *They discussed "oilstove" during the group presentation.*

okapia johnstoni *(noun)*

Similar to the giraffe but smaller with much shorter neck and stripe on the legs.

- *They discussed "okapia johnstoni" during the group presentation.*
- *She wrote a short paragraph that included "okapia johnstoni."*

okenfuss *(noun)*

German naturalist whose speculations that plants and animals are made up of tiny living 'infusoria' led to the cell theory (1779-1851).

- *Understanding "okenfuss" helps you talk about this topic clearly.*
- *The article explained what "okenfuss" means with a simple example.*

old witchgrass *(noun)*

North American grass with slender brushy panicles; often a weed on cultivated land.

- *He looked up "old witchgrass" because he had never seen it before.*
- *She wrote a short paragraph that included "old witchgrass."*

old-fashionedness *(noun)*

The property of being no longer fashionable.

- *He looked up "old-fashionedness" because he had never seen it before.*
- *She wrote a short paragraph that included "old-fashionedness."*

old-maidish *(adjective)*

Primly fastidious.

- *Her writing became clearer after she learned "old-maidish."*
- *A "old-maidish" approach may work better in this case.*

---

oldwench *(noun)*

Tropical Atlantic fish.

- *In class, the teacher used "oldwench" to mean tropical atlantic fish.*
- *He looked up "oldwench" because he had never seen it before.*

---

oldwife *(noun)*

A common long-tailed sea duck of the northern parts of the United States.

- *Understanding "oldwife" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "oldwife."*

---

oleaceae *(noun)*

Trees and shrubs having berries or drupes or capsules as fruits; sometimes placed in the order Oleales: olive; ash; jasmine; privet; lilac.

- *They discussed "oleaceae" during the group presentation.*
- *The article explained what "oleaceae" means with a simple example.*

---

- *The article explained what "oleales" means with a simple example.*
- *In class, the teacher used "oleales" to mean coextensive with the family oleaceae; in some....*

---

oleandra mollis *(noun)*

Tropical fern having leathery fronds resembling oleander; found from Asia to Polynesia.

- *Understanding "oleandra mollis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "oleandra mollis."*

---

oleandra neriiformis *(noun)*

Tropical fern having leathery fronds resembling oleander; found from Asia to Polynesia.

- *The article explained what "oleandra neriiformis" means with a simple example.*
- *In class, the teacher used "oleandra neriiformis" to mean tropical fern having leathery fronds resembling....*

---

oleandraceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems.

- *In class, the teacher used "oleandraceae" to mean one of a number of families into which....*
- *The article explained what "oleandraceae" means with a simple example.*

---

olearia argophylla *(noun)*

Musk-scented shrub or tree of southern and southeastern Australia having creamy-yellow flower heads.

- *He looked up "olearia argophylla" because he had never seen it before.*
- *She wrote a short paragraph that included "olearia argophylla."*

---

olearia haastii *(noun)*

Bushy New Zealand shrub cultivated for its fragrant white flower heads.

- *He looked up "olearia haastii" because he had never seen it before.*

- *Understanding "olearia haastii" helps you talk about this topic clearly.*

---

oleaster *(noun)*

Any of several shrubs of the genus Elaeagnus having silver-white twigs and yellow flowers followed by olivelike fruits.

- *They discussed "oleaster" during the group presentation.*
- *In class, the teacher used "oleaster" to mean any of several shrubs of the genus elaeagnus having....*

---

oleaster family *(noun)*

Shrubs or small trees often armed.

- *She wrote a short paragraph that included "oleaster family."*
- *The article explained what "oleaster family" means with a simple example.*

---

olefine *(noun)*

Any unsaturated aliphatic hydrocarbon.

- *In class, the teacher used "olefine" to mean any unsaturated aliphatic hydrocarbon.*
- *They discussed "olefine" during the group presentation.*

---

oleophilic *(adjective)*

Having a strong affinity for oils rather than water.

- *Would you call this situation "oleophilic"? Explain why.*
- *Students compared "oleophilic" with similar adjectives in the lesson.*

---

oleoresin capiscum *(noun)*

An oleoresin extracted from the capsicum pepper plant.

- *She wrote a short paragraph that included "oleoresin capiscum."*
- *Understanding "oleoresin capiscum" helps you talk about this topic clearly.*

---

olfactive *(adjective)*

Of or relating to olfaction.

- *The speaker chose "olfactive" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "olfactive."*

---

olfersia *(noun)*

Genus of fern having only one species.

- *She wrote a short paragraph that included "olfersia."*
- *He looked up "olfersia" because he had never seen it before.*

---

olibanum *(noun)*

An aromatic gum resin obtained from various Arabian or East African trees; formerly valued for worship and for embalming and fumigation.

- *The article explained what "olibanum" means with a simple example.*
- *They discussed "olibanum" during the group presentation.*

---

oligoclase *(noun)*

Any of a series of triclinic feldspars that form rocks.

- *Understanding "oligoclase" helps you talk about this topic clearly.*
- *The article explained what "oligoclase" means with a simple example.*

---

oligodendria *(noun)*

Tissue consisting of glial cells with sheetlike processes that form the myelin sheath of nerve fibers.

- *They discussed "oligodendria" during the group presentation.*
- *The article explained what "oligodendria" means with a simple example.*

---

oligodendroglia *(noun)*

Tissue consisting of glial cells with sheetlike processes that form the myelin sheath of nerve fibers.

- *The article explained what "oligodendroglia" means with a simple example.*
- *She wrote a short paragraph that included "oligodendroglia."*

---

oligomenorrhea *(noun)*

Abnormally light or infrequent menstruation.

- *They discussed "oligomenorrhea" during the group presentation.*
- *She wrote a short paragraph that included "oligomenorrhea."*

---

oligoplites *(noun)*

Leatherjackets.

- *She wrote a short paragraph that included "oligoplites."*
- *He looked up "oligoplites" because he had never seen it before.*

---

oligoporus *(noun)*

A genus of fungi belonging to the family Polyporaceae.

- *The article explained what "oligoporus" means with a simple example.*
- *She wrote a short paragraph that included "oligoporus."*

---

oligoporus leucospongia *(noun)*

A pore fungus with a whitish cottony soft cap found on conifer logs in forests at high elevation in the western United States and adjacent Canada.

- *He looked up "oligoporus leucospongia" because he had never seen it before.*
- *She wrote a short paragraph that included "oligoporus leucospongia."*

---

olimbos *(noun)*

A mountain peak in northeast Greece near the Aegean coast; believed by ancient Greeks to be the dwelling place of the gods (9,570 feet high).

- *She wrote a short paragraph that included "olimbos."*
- *The article explained what "olimbos" means with a simple example.*

---

olivelike *(adjective)*

Resembling an olive.

- *Students compared "olivelike" with similar adjectives in the lesson.*
- *Would you call this situation "olivelike"? Explain why.*

---

olivenite *(noun)*

Rare green to black mineral consisting of hydrated copper arsenate that is found in copper deposits.

- *The article explained what "olivenite" means with a simple example.*
- *They discussed "olivenite" during the group presentation.*

---

olla podrida *(noun)*

Spanish version of burgoo.

- *She wrote a short paragraph that included "olla podrida."*
- *He looked up "olla podrida" because he had never seen it before.*

---

omasum *(noun)*

The third compartment of the stomach of a ruminant.

- *He looked up "omasum" because he had never seen it before.*
- *She wrote a short paragraph that included "omasum."*

---

ombu *(noun)*

Fast-growing herbaceous evergreen tree of South America having a broad trunk with high water content and dark green oval leaves.

- *The article explained what "ombu" means with a simple example.*
- *They discussed "ombu" during the group presentation.*

---

omissible *(adjective)*

Capable of being left out.

- *Her writing became clearer after she learned "omissible."*
- *The speaker chose "omissible" because it captured the feeling precisely.*

---

omissive *(adjective)*

Characterized by omissions.

- *Omissive crimes.*
- *The speaker chose "omissive" because it captured the feeling precisely.*

---

ommastrephes *(noun)*

Extremely active cylindrical squid with short strong arms and large rhombic terminal fins.

- *Understanding "ommastrephes" helps you talk about this topic clearly.*
- *He looked up "ommastrephes" because he had never seen it before.*

---

ommatidium *(noun)*

Any of the numerous small cone-shaped eyes that make up the compound eyes of some arthropods.

- *He looked up "ommatidium" because he had never seen it before.*
- *She wrote a short paragraph that included "ommatidium."*

---

omnifarious *(adjective)*

Of all varieties or forms or kinds.

- *Omnifarious reading.*
- *Would you call this situation "omnifarious"? Explain why.*

---

omnirange *(noun)*

A navigational system consisting of a network of radio beacons that provide aircraft with information about exact position and bearing.

- *In class, the teacher used "omnirange" to mean a navigational system consisting of a network of....*
- *Understanding "omnirange" helps you talk about this topic clearly.*

---

omphalotus illudens *(noun)*

A large poisonous agaric with orange caps and narrow clustered stalks; the gills are luminescent.

- *He looked up "omphalotus illudens" because he had never seen it before.*
- *They discussed "omphalotus illudens" during the group presentation.*

---

omphalus *(noun)*

A scar where the umbilical cord was attached.

- *The article explained what "omphalus" means with a simple example.*
- *Understanding "omphalus" helps you talk about this topic clearly.*

---

onagraceae *(noun)*

A large and widely distributed family of plants of the order Myrtales.

- *He looked up "onagraceae" because he had never seen it before.*
- *She wrote a short paragraph that included "onagraceae."*

---

onanist *(noun)*

A person who practices masturbation.

- *Understanding "onanist" helps you talk about this topic clearly.*
- *He looked up "onanist" because he had never seen it before.*

---

oncidium papilio kramerianum *(noun)*

Orchid of South and Central America having flowers similar to but smaller than Psychopsis papilio; sometimes placed in genus Oncidium.

- *In class, the teacher used "oncidium papilio kramerianum" to mean orchid of south and central america having flowers....*
- *Understanding "oncidium papilio kramerianum" helps you talk about this topic clearly.*

---

oncorhynchus tshawytscha *(noun)*

Large Pacific salmon valued as food; adults die after spawning.

- *In class, the teacher used "oncorhynchus tshawytscha" to mean large pacific salmon valued as food; adults die....*
- *Understanding "oncorhynchus tshawytscha" helps you talk about this topic clearly.*

---

oncovin *(noun)*

Periwinkle plant derivative used as an antineoplastic drug (trade name Oncovin); used to treat cancer of the lymphatic system.

- *Understanding "oncovin" helps you talk about this topic clearly.*
- *He looked up "oncovin" because he had never seen it before.*

one-quadrillionth *(noun)*

One part in a quadrillion equal parts.

- *They discussed "one-quadrillionth" during the group presentation.*
- *The article explained what "one-quadrillionth" means with a simple example.*

one-quintillionth *(noun)*

One part in a quintillion equal parts.

- *She wrote a short paragraph that included "one-quintillionth."*
- *He looked up "one-quintillionth" because he had never seen it before.*

oneiromancer *(noun)*

Someone who divines through the interpretation of dreams.

- *He looked up "oneiromancer" because he had never seen it before.*
- *In class, the teacher used "oneiromancer" to mean someone who divines through the interpretation of....*

onerously *(adverb)*

In an onerous manner.

- *He answered "onerously," which changed the tone of the conversation.*
- *The narrator describes the scene "onerously" in the final chapter.*

onerousness *(noun)*

Unwelcome burdensome difficulty.

- *Understanding "onerousness" helps you talk about this topic clearly.*
- *In class, the teacher used "onerousness" to mean unwelcome burdensome difficulty.*

oniscidae *(noun)*

A family of Isopoda.

- *She wrote a short paragraph that included "oniscidae."*
- *He looked up "oniscidae" because he had never seen it before.*

oniscus *(noun)*

Type genus of the Oniscidae; woodlice that cannot roll into a ball.

- *He looked up "oniscus" because he had never seen it before.*
- *In class, the teacher used "oniscus" to mean type genus of the oniscidae; woodlice that cannot....*

onobrychis *(noun)*

Genus of Old World herbs having pinnate leaves and pink or whites racemose flowers followed by flat unjointed pods.

- *Understanding "onobrychis" helps you talk about this topic clearly.*
- *The article explained what "onobrychis" means with a simple example.*

onobrychis viciaefolia *(noun)*

Eurasian perennial herb having pale pink flowers and curved pods; naturalized in Britain and North America grasslands on calcareous soils; important forage crop and source of honey in Britain.

- *In class, the teacher used "onobrychis viciaefolia" to mean eurasian perennial herb having pale pink flowers....*
- *They discussed "onobrychis viciaefolia" during the group presentation.*

onobrychis viciifolia *(noun)*

Eurasian perennial herb having pale pink flowers and curved pods; naturalized in Britain and North America grasslands on calcareous soils; important forage crop and source of honey in Britain.

- *The article explained what "onobrychis viciifolia" means with a simple example.*
- *They discussed "onobrychis viciifolia" during the group presentation.*

onoclea *(noun)*

One species: sensitive fern; in some classifications included in Polypodiaceae.

- *They discussed "onoclea" during the group presentation.*
- *Understanding "onoclea" helps you talk about this topic clearly.*

onoclea sensibilis *(noun)*

Beautiful spreading fern of eastern North America and eastern Asia naturalized in western Europe; pinnately divided fronds show a slight tendency to fold when touched; pinnules enclose groups of sori in beadlike lobes.

- *He looked up "onoclea sensibilis" because he had never seen it before.*
- *They discussed "onoclea sensibilis" during the group presentation.*

---

onoclea struthiopteris *(noun)*

Tall fern of northern temperate regions having graceful arched fronds and sporophylls resembling ostrich plumes.

- *Understanding "onoclea struthiopteris" helps you talk about this topic clearly.*
- *In class, the teacher used "onoclea struthiopteris" to mean tall fern of northern temperate regions having....*

---

onomancer *(noun)*

One who practices onomancy.

- *Understanding "onomancer" helps you talk about this topic clearly.*
- *They discussed "onomancer" during the group presentation.*

---

onomatomania *(noun)*

Obsession with a particular word which the person uses repeatedly or which intrudes into consciousness.

- *They discussed "onomatomania" during the group presentation.*
- *In class, the teacher used "onomatomania" to mean obsession with a particular word which the person....*

---

onomatopoeical *(adjective)*

(of words) formed in imitation of a natural sound; ; - Harry Hoijer.

- *Students compared "onomatopoeical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "onomatopoeical."*

---

ononis *(noun)*

Genus of European subshrubs or herbs having pink or purple or yellow solitary or clustered flowers: restharrow.

- *Understanding "ononis" helps you talk about this topic clearly.*
- *They discussed "ononis" during the group presentation.*

---

ononis repens *(noun)*

European woody plant having pink flowers and unifoliate leaves and long tough roots; spreads by underground runners.

- *The article explained what "ononis repens" means with a simple example.*
- *She wrote a short paragraph that included "ononis repens."*

---

ononis spinosa *(noun)*

Eurasian plant having loose racemes of pink or purple flowers and spiny stems and tough roots.

- *She wrote a short paragraph that included "ononis spinosa."*
- *They discussed "ononis spinosa" during the group presentation.*

---

onopordon *(noun)*

A genus of Eurasian herbs of the family Compositae with prickly foliage and large purplish flowers.

- *In class, the teacher used "onopordon" to mean a genus of eurasian herbs of the family compositae....*
- *Understanding "onopordon" helps you talk about this topic clearly.*

---

onopordon acanthium *(noun)*

Biennial Eurasian white hairy thistle having pale purple flowers; naturalized in North America.

- *Understanding "onopordon acanthium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "onopordon acanthium."*

---

onopordum *(noun)*

A genus of Eurasian herbs of the family Compositae with prickly foliage and large purplish flowers.

- *They discussed "onopordum" during the group presentation.*
- *The article explained what "onopordum" means with a simple example.*

---

onopordum acanthium *(noun)*

Biennial Eurasian white hairy thistle having pale purple flowers; naturalized in North America.

- *She wrote a short paragraph that included "onopordum acanthium."*

- *Understanding "onopordum acanthium" helps you talk about this topic clearly.*

---

onosmodium *(noun)*

A genus of North American perennial herbs of the family Boraginaceae.

- *In class, the teacher used "onosmodium" to mean a genus of north american perennial herbs of the....*
- *They discussed "onosmodium" during the group presentation.*

---

onychogalea *(noun)*

A genus of Macropodidae.

- *He looked up "onychogalea" because he had never seen it before.*
- *In class, the teacher used "onychogalea" to mean a genus of macropodidae.*

---

onychomys *(noun)*

Grasshopper mice.

- *They discussed "onychomys" during the group presentation.*
- *He looked up "onychomys" because he had never seen it before.*

---

onychophoran *(noun)*

Any of numerous velvety-skinned wormlike carnivorous animals common in tropical forests having characteristics of both arthropods and annelid worms.

- *Understanding "onychophoran" helps you talk about this topic clearly.*
- *He looked up "onychophoran" because he had never seen it before.*

---

onymous *(adjective)*

Bearing a name.

- *Articles in magazines are usually onymous.*
- *Would you call this situation "onymous"? Explain why.*

---

onyxis *(noun)*

Toenail having its free tip or edges embedded in the surrounding flesh.

- *He looked up "onyxis" because he had never seen it before.*
- *In class, the teacher used "onyxis" to mean toenail having its free tip or edges embedded in....*

---

oomycetes *(noun)*

Nonphotosynthetic fungi that resemble algae and that reproduce by forming oospores; sometimes classified as protoctists.

- *In class, the teacher used "oomycetes" to mean nonphotosynthetic fungi that resemble algae and....*
- *The article explained what "oomycetes" means with a simple example.*

---

oosphere *(noun)*

A gamete; used especially of lower plants.

- *They discussed "oosphere" during the group presentation.*
- *She wrote a short paragraph that included "oosphere."*

---

oospore *(noun)*

A thick-walled sexual spore that develops from a fertilized oosphere in some algae and fungi.

- *She wrote a short paragraph that included "oospore."*
- *He looked up "oospore" because he had never seen it before.*

---

ootid *(noun)*

Mature ovum after penetration by sperm but before the formation of a zygote.

- *The article explained what "ootid" means with a simple example.*
- *Understanding "ootid" helps you talk about this topic clearly.*

---

opacify *(verb)*

Make opaque.

- *The tissue in the eye's cornea may opacify and the patient may go blind.*
- *In everyday English, people use "opacify" when talking about this idea.*

---

opalesce *(verb)*

Exhibit a play of colors like that of an opal.

- *This nitrate opalesces under certain conditions.*
- *Distant clouds opalesce like pale brocade.*

---

opalise *(verb)*

Replace or convert into opal.

- *He did not know how to use "opalise" until he saw an example.*
- *Can you use "opalise" in a sentence that fits this situation?*

---

opalize *(verb)*

Replace or convert into opal.

- *Opalized tree trunks.*
- *Learners should practice how to use "opalize" in real sentences.*

---

openbill *(noun)*

Stork with a grooved bill whose upper and lower parts touch only at the base and tip.

- *She wrote a short paragraph that included "openbill."*
- *He looked up "openbill" because he had never seen it before.*

---

opencut *(adjective)*

(of mines and mining) worked from the exposed surface.

- *An opencut iron mine.*
- *Students compared "opencut" with similar adjectives in the lesson.*

---

openhanded *(adjective)*

Given or giving freely.

- *Her fond and openhanded grandfather.*
- *Would you call this situation "openhanded"? Explain why.*

---

openhandedness *(noun)*

Liberality in bestowing gifts; extremely liberal and generous of spirit.

- *They discussed "openhandedness" during the group presentation.*
- *Understanding "openhandedness" helps you talk about this topic clearly.*

---

openmouthed *(adjective)*

With eyes or mouth open in surprise.

- *Students compared "openmouthed" with similar adjectives in the lesson.*
- *It is useful to describe something as "openmouthed" when it is with eyes or mouth open in surprise.*

---

opepe *(noun)*

Large African forest tree yielding a strong hard yellow to golden brown lumber; sometimes placed in genus Sarcocephalus.

- *The article explained what "opepe" means with a simple example.*
- *She wrote a short paragraph that included "opepe."*

---

operagoer *(noun)*

A patron of the opera.

- *He looked up "operagoer" because he had never seen it before.*
- *Understanding "operagoer" helps you talk about this topic clearly.*

---

operationalist *(adjective)*

Of or relating to or espousing operationalism.

- *Operationalist doctrine.*
- *It is useful to describe something as "operationalist" when it is of or relating to or espousing operationalism.*

---

operculated *(adjective)*

Having an operculum.

- *It is useful to describe something as "operculated" when it is having an operculum.*
- *The speaker chose "operculated" because it captured the feeling precisely.*

---

operose *(adjective)*

Characterized by effort to the point of exhaustion; especially physical effort.

- *The speaker chose "operose" because it captured the feeling precisely.*
- *A "operose" approach may work better in this case.*

---

operoseness *(noun)*

The quality of requiring extended effort.

- *In class, the teacher used "operoseness" to mean the quality of requiring extended effort.*
- *The article explained what "operoseness" means with a simple example.*

---

opheodrys *(noun)*

North American green snakes.

- *They discussed "opheodrys" during the group presentation.*
- *She wrote a short paragraph that included "opheodrys."*

---

opheodrys aestivus *(noun)*

Of southern and eastern United States.

- *The article explained what "opheodrys aestivus" means with a simple example.*
- *They discussed "opheodrys aestivus" during the group presentation.*

---

opheodrys vernalis *(noun)*

Of western and central United States.

- *They discussed "opheodrys vernalis" during the group presentation.*
- *She wrote a short paragraph that included "opheodrys vernalis."*

---

ophidiidae *(noun)*

Eellike marine fishes.

- *Understanding "ophidiidae" helps you talk about this topic clearly.*
- *In class, the teacher used "ophidiidae" to mean eellike marine fishes.*

---

ophiodon *(noun)*

A genus of Ophiodontidae.

- *In class, the teacher used "ophiodon" to mean a genus of ophiodontidae.*
- *The article explained what "ophiodon" means with a simple example.*

---

ophiodon elongatus *(noun)*

Food fish of the northern Pacific related to greenlings.

- *Understanding "ophiodon elongatus" helps you talk about this topic clearly.*
- *He looked up "ophiodon elongatus" because he had never seen it before.*

---

ophiodontidae *(noun)*

Fishes closely related to greenlings.

- *The article explained what "ophiodontidae" means with a simple example.*
- *Understanding "ophiodontidae" helps you talk about this topic clearly.*

---

ophioglossaceae *(noun)*

A family of succulent ferns of order Ophioglossales; cosmopolitan in distribution.

- *In class, the teacher used "ophioglossaceae" to mean a family of succulent ferns of order....*
- *Understanding "ophioglossaceae" helps you talk about this topic clearly.*

---

ophioglossales *(noun)*

Coextensive with the family Ophioglossaceae.

- *He looked up "ophioglossales" because he had never seen it before.*
- *They discussed "ophioglossales" during the group presentation.*

ophioglossum *(noun)*

The type genus of the fern family Ophioglossaceae.

- *She wrote a short paragraph that included "ophioglossum."*
- *Understanding "ophioglossum" helps you talk about this topic clearly.*

ophioglossum pendulum *(noun)*

Epiphytic fern with straplike usually twisted fronds of tropical Asia and Polynesia and America.

- *She wrote a short paragraph that included "ophioglossum pendulum."*
- *The article explained what "ophioglossum pendulum" means with a simple example.*

ophiophagus hannah *(noun)*

Large cobra of southeastern Asia and the East Indies; the largest venomous snake; sometimes placed in genus Naja.

- *The article explained what "ophiophagus hannah" means with a simple example.*
- *They discussed "ophiophagus hannah" during the group presentation.*

ophisaurus *(noun)*

Glass lizards.

- *The article explained what "ophisaurus" means with a simple example.*
- *She wrote a short paragraph that included "ophisaurus."*

ophiurida *(noun)*

Brittle stars.

- *They discussed "ophiurida" during the group presentation.*
- *The article explained what "ophiurida" means with a simple example.*

ophiuroidea *(noun)*

Brittle stars and basket stars.

- *She wrote a short paragraph that included "ophiuroidea."*
- *The article explained what "ophiuroidea" means with a simple example.*

ophrys apifera *(noun)*

European orchid whose flowers resemble bumble bees in shape and color.

- *The article explained what "ophrys apifera" means with a simple example.*
- *She wrote a short paragraph that included "ophrys apifera."*

ophrys insectifera *(noun)*

European orchid whose flowers resemble flies.

- *Understanding "ophrys insectifera" helps you talk about this topic clearly.*
- *He looked up "ophrys insectifera" because he had never seen it before.*

ophrys muscifera *(noun)*

European orchid whose flowers resemble flies.

- *In class, the teacher used "ophrys muscifera" to mean european orchid whose flowers resemble flies.*
- *They discussed "ophrys muscifera" during the group presentation.*

ophrys sphegodes *(noun)*

Spring-blooming spider orchid having a flower with yellow or green or pink sepals and a broad brown velvety lip.

- *The article explained what "ophrys sphegodes" means with a simple example.*
- *In class, the teacher used "ophrys sphegodes" to mean spring-blooming spider orchid having a flower with....*

opinionative *(adjective)*

Obstinate in your opinions.

- *A "opinionative" approach may work better in this case.*
- *Students compared "opinionative" with similar adjectives in the lesson.*

opisthobranchia *(noun)*

Gastropods having the gills when present posterior to the heart and having no operculum: includes sea slugs; sea butterflies; sea hares.

- *Understanding "opisthobranchia" helps you talk about this topic clearly.*
- *The article explained what "opisthobranchia" means with a simple example.*

---

opisthocomidae *(noun)*

Comprising the hoatzins.

- *Understanding "opisthocomidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "opisthocomidae."*

---

opisthocomus *(noun)*

Type genus of the Opisthocomidae: hoatzins.

- *They discussed "opisthocomus" during the group presentation.*
- *The article explained what "opisthocomus" means with a simple example.*

---

opisthocomus hoazin *(noun)*

Crested ill-smelling South American bird whose young have claws on the first and second digits of the wings.

- *Understanding "opisthocomus hoazin" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "opisthocomus hoazin."*

---

opisthognathous *(adjective)*

Having receding jaws.

- *The speaker chose "opisthognathous" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "opisthognathous."*

---

opopanax *(noun)*

An odorous gum resin formerly used in medicines.

- *In class, the teacher used "opopanax" to mean an odorous gum resin formerly used in medicines.*
- *Understanding "opopanax" helps you talk about this topic clearly.*

---

opportuneness *(noun)*

Timely convenience.

- *They discussed "opportuneness" during the group presentation.*
- *The article explained what "opportuneness" means with a simple example.*

---

oppositeness *(noun)*

The relation between opposed entities.

- *He looked up "oppositeness" because he had never seen it before.*
- *Understanding "oppositeness" helps you talk about this topic clearly.*

---

opsanus tau *(noun)*

Bottom-dwelling fish having scaleless slimy skin and a broad thick head with a wide mouth.

- *They discussed "opsanus tau" during the group presentation.*
- *She wrote a short paragraph that included "opsanus tau."*

---

opsonin *(noun)*

An antibody in blood serum that attaches to invading microorganisms and other antigens to make them more susceptible to the action of phagocytes.

- *In class, the teacher used "opsonin" to mean an antibody in blood serum that attaches to....*
- *The article explained what "opsonin" means with a simple example.*

---

opsonisation *(noun)*

Process whereby opsonins make an invading microorganism more susceptible to phagocytosis.

- *He looked up "opsonisation" because he had never seen it before.*
- *She wrote a short paragraph that included "opsonisation."*

---

opsonization *(noun)*

Process whereby opsonins make an invading microorganism more susceptible to phagocytosis.

- *They discussed "opsonization" during the group presentation.*

- *The article explained what "opsonization" means with a simple example.*

---

opsonize *(verb)*

Make (cells) more susceptible to the action of phagocytes.

- *He did not know how to use "opsonize" until he saw an example.*
- *She tried to use "opsonize" carefully so everyone would understand.*

---

opthalmic *(adjective)*

Of or relating to or resembling the eye.

- *Her writing became clearer after she learned "opthalmic."*
- *Would you call this situation "opthalmic"? Explain why.*

---

opuntia lindheimeri *(noun)*

Cactus having yellow flowers and purple fruits.

- *In class, the teacher used "opuntia lindheimeri" to mean cactus having yellow flowers and purple fruits.*
- *He looked up "opuntia lindheimeri" because he had never seen it before.*

---

opuntiales *(noun)*

Coextensive with the family Cactaceae: cactuses.

- *In class, the teacher used "opuntiales" to mean coextensive with the family cactaceae: cactuses.*
- *He looked up "opuntiales" because he had never seen it before.*

---

orache *(noun)*

Any of various herbaceous plants of the genus Atriplex that thrive in deserts and salt marshes.

- *Understanding "orache" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "orache."*

---

orad *(adverb)*

Toward the mouth or oral region.

- *She spoke "orad," and the audience immediately understood her point.*
- *The narrator describes the scene "orad" in the final chapter.*

---

oradexon *(noun)*

A corticosteroid drug (trade names Decadron or Dexamethasone Intensol or Dexone or Hexadrol or Oradexon) used to treat allergies or inflammation.

- *In class, the teacher used "oradexon" to mean a corticosteroid drug (trade names decadron or....*
- *The article explained what "oradexon" means with a simple example.*

---

orange milkwort *(noun)*

Bog plant of pine barrens of southeastern United States having spikes of irregular yellow-orange flowers.

- *The article explained what "orange milkwort" means with a simple example.*
- *She wrote a short paragraph that included "orange milkwort."*

---

orange sneezeweed *(noun)*

Stout perennial herb of western United States having flower heads with drooping orange-yellow rays; causes spewing sickness in sheep.

- *They discussed "orange sneezeweed" during the group presentation.*
- *She wrote a short paragraph that included "orange sneezeweed."*

---

orangeness *(noun)*

Orange color or pigment; any of a range of colors between red and yellow.

- *The article explained what "orangeness" means with a simple example.*
- *She wrote a short paragraph that included "orangeness."*

---

orangutang *(noun)*

Large long-armed ape of Borneo and Sumatra having arboreal habits.

- *He looked up "orangutang" because he had never seen it before.*
- *She wrote a short paragraph that included "orangutang."*

---

orasone *(noun)*

A dehydrogenated analogue of cortisol (trade names Orasone or Deltasone or Liquid Pred or Meticorten); used as an anti-inflammatory drug in the treatment of arthritis and as an immunosuppressant.

- *The article explained what "orasone" means with a simple example.*
- *In class, the teacher used "orasone" to mean a dehydrogenated analogue of cortisol (trade names....*

---

orbiculate *(adjective)*

Circular or nearly circular.

- *Students compared "orbiculate" with similar adjectives in the lesson.*
- *A "orbiculate" approach may work better in this case.*

---

orbiculate leaf *(noun)*

Circular or nearly circular leaf.

- *In class, the teacher used "orbiculate leaf" to mean circular or nearly circular leaf.*
- *The article explained what "orbiculate leaf" means with a simple example.*

---

orbignya *(noun)*

Palms of southern Mexico to northern South America: babassu palm.

- *She wrote a short paragraph that included "orbignya."*
- *They discussed "orbignya" during the group presentation.*

---

orbignya cohune *(noun)*

Tropical American feather palm whose large nuts yield valuable oil and a kind of vegetable ivory.

- *The article explained what "orbignya cohune" means with a simple example.*
- *Understanding "orbignya cohune" helps you talk about this topic clearly.*

---

orbignya martiana *(noun)*

Tall feather palm of northern Brazil with hard-shelled nuts yielding valuable oil and a kind of vegetable ivory.

- *Understanding "orbignya martiana" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "orbignya martiana."*

---

orbignya phalerata *(noun)*

Tall feather palm of northern Brazil with hard-shelled nuts yielding valuable oil and a kind of vegetable ivory.

- *She wrote a short paragraph that included "orbignya phalerata."*
- *The article explained what "orbignya phalerata" means with a simple example.*

---

orbignya spesiosa *(noun)*

Tall feather palm of northern Brazil with hard-shelled nuts yielding valuable oil and a kind of vegetable ivory.

- *He looked up "orbignya spesiosa" because he had never seen it before.*
- *In class, the teacher used "orbignya spesiosa" to mean tall feather palm of northern brazil with....*

---

orbitale *(noun)*

The craniometric point at the lowest point on the lower edge of the orbit.

- *He looked up "orbitale" because he had never seen it before.*
- *She wrote a short paragraph that included "orbitale."*

---

orbitual *(adjective)*

Describing a circle; moving in a circle.

- *Would you call this situation "orbitual"? Explain why.*
- *Her writing became clearer after she learned "orbitual."*

---

orchestia *(noun)*

Type genus of the family Orchestiidae.

- *Understanding "orchestia" helps you talk about this topic clearly.*
- *They discussed "orchestia" during the group presentation.*

---

orchestiidae *(noun)*

Beach fleas.

- *Understanding “orchestiidae” helps you talk about this topic clearly.*
- *The article explained what “orchestiidae” means with a simple example.*

---

orchidales *(noun)*

Order of plants with irregular flowers having minute seeds: Orchidaceae; Burmanniaceae.

- *He looked up “orchidales” because he had never seen it before.*
- *Understanding “orchidales” helps you talk about this topic clearly.*

---

orchil *(noun)*

A purplish dye obtained from orchil lichens.

- *They discussed “orchil” during the group presentation.*
- *He looked up “orchil” because he had never seen it before.*

---

orchis mascula *(noun)*

Eurasian orchid with showy pink or purple flowers in a loose spike.

- *In class, the teacher used “orchis mascula” to mean eurasian orchid with showy pink or purple flowers....*
- *He looked up “orchis mascula” because he had never seen it before.*

---

orchis papilionaceae *(noun)*

Mediterranean orchid having usually purple flowers with a fan-shaped spotted or striped rose-red lip.

- *She wrote a short paragraph that included “orchis papilionaceae.”*
- *He looked up “orchis papilionaceae” because he had never seen it before.*

---

ordainer *(noun)*

A cleric who ordains; a cleric who admits someone to holy orders.

- *In class, the teacher used “ordainer” to mean a cleric who ordains; a cleric who admits someone....*
- *He looked up “ordainer” because he had never seen it before.*

---

order accipitriformes *(noun)*

In some classifications an alternative name for the Falconiformes.

- *He looked up “order accipitriformes” because he had never seen it before.*
- *They discussed “order accipitriformes” during the group presentation.*

---

order actinaria *(noun)*

Sea anemones.

- *In class, the teacher used “order actinaria” to mean sea anemones.*
- *He looked up “order actinaria” because he had never seen it before.*

---

order actiniaria *(noun)*

Sea anemones.

- *The article explained what “order actiniaria” means with a simple example.*
- *She wrote a short paragraph that included “order actiniaria.”*

---

order actinomycetales *(noun)*

Filamentous or rod-shaped bacteria.

- *They discussed “order actinomycetales” during the group presentation.*
- *Understanding “order actinomycetales” helps you talk about this topic clearly.*

---

order actinomyxidia *(noun)*

Parasites of worms.

- *They discussed “order actinomyxidia” during the group presentation.*
- *Understanding “order actinomyxidia” helps you talk about this topic clearly.*

---

order aepyorniformes *(noun)*

Huge extinct flightless birds: elephant birds.

- *She wrote a short paragraph that included “order aepyorniformes.”*
- *He looked up “order aepyorniformes” because he had never seen it before.*

order agaricales *(noun)*

Typical gilled mushrooms belonging to the subdivision Basidiomycota.

- *In class, the teacher used "order agaricales" to mean typical gilled mushrooms belonging to the....*
- *They discussed "order agaricales" during the group presentation.*

order alcyonaria *(noun)*

Corals and sea anemones having eight branches.

- *They discussed "order alcyonaria" during the group presentation.*
- *He looked up "order alcyonaria" because he had never seen it before.*

order alismales *(noun)*

An order of aquatic monocotyledonous herbaceous plants.

- *The article explained what "order alismales" means with a simple example.*
- *She wrote a short paragraph that included "order alismales."*

order amoebida *(noun)*

The animal order including amoebas.

- *He looked up "order amoebida" because he had never seen it before.*
- *She wrote a short paragraph that included "order amoebida."*

order amoebina *(noun)*

The animal order including amoebas.

- *Understanding "order amoebina" helps you talk about this topic clearly.*
- *In class, the teacher used "order amoebina" to mean the animal order including amoebas.*

order anacanthini *(noun)*

At least partially equivalent to the order Gadiformes in some classifications.

- *In class, the teacher used "order anacanthini" to mean at least partially equivalent to the order....*
- *He looked up "order anacanthini" because he had never seen it before.*

order anaspida *(noun)*

Extinct order of jawless vertebrates.

- *She wrote a short paragraph that included "order anaspida."*
- *He looked up "order anaspida" because he had never seen it before.*

order andreaeales *(noun)*

Comprises a single genus: Andreaea.

- *The article explained what "order andreaeales" means with a simple example.*
- *Understanding "order andreaeales" helps you talk about this topic clearly.*

order anguilliformes *(noun)*

Elongate fishes with pelvic fins and girdle absent or reduced.

- *She wrote a short paragraph that included "order anguilliformes."*
- *The article explained what "order anguilliformes" means with a simple example.*

order anoplura *(noun)*

Sucking lice.

- *He looked up "order anoplura" because he had never seen it before.*
- *She wrote a short paragraph that included "order anoplura."*

order anostraca *(noun)*

Small aquatic crustaceans lacking a carapace: fairy shrimps; brine shrimps.

- *He looked up "order anostraca" because he had never seen it before.*
- *She wrote a short paragraph that included "order anostraca."*

order anseriformes *(noun)*

Ducks; geese; swans; screamers.

- *In class, the teacher used "order anseriformes" to mean ducks; geese; swans; screamers.*
- *The article explained what "order anseriformes" means with a simple example.*

---

order anthocerotales *(noun)*

Hornworts; liverworts having a thalloid gametophyte; in some classification systems included in the class Hepaticopsida.

- *Understanding "order anthocerotales" helps you talk about this topic clearly.*
- *They discussed "order anthocerotales" during the group presentation.*

---

order aphyllophorales *(noun)*

Includes chiefly saprophytic fungi typically with shelflike bodies; sometimes placed in class Hymenomycetes or included in Agaricales.

- *They discussed "order aphyllophorales" during the group presentation.*
- *The article explained what "order aphyllophorales" means with a simple example.*

---

order aplacophora *(noun)*

An order of Amphineura.

- *In class, the teacher used "order aplacophora" to mean an order of amphineura.*
- *The article explained what "order aplacophora" means with a simple example.*

---

order apodes *(noun)*

Elongate fishes with pelvic fins and girdle absent or reduced.

- *Understanding "order apodes" helps you talk about this topic clearly.*
- *The article explained what "order apodes" means with a simple example.*

---

order apodiformes *(noun)*

Swifts; hummingbirds.

- *The article explained what "order apodiformes" means with a simple example.*
- *In class, the teacher used "order apodiformes" to mean swifts; hummingbirds.*

---

order apterygiformes *(noun)*

A ratite bird order: flightless ground birds having vestigial wings and long bills and small eyes: kiwis.

- *They discussed "order apterygiformes" during the group presentation.*
- *In class, the teacher used "order apterygiformes" to mean a ratite bird order: flightless ground birds having....*

---

order arales *(noun)*

Araceae; Lemnaceae.

- *He looked up "order arales" because he had never seen it before.*
- *Understanding "order arales" helps you talk about this topic clearly.*

---

order aristolochiales *(noun)*

Order of plants distinguished by tubular petaloid perianth and inferior ovary.

- *In class, the teacher used "order aristolochiales" to mean order of plants distinguished by tubular petaloid....*
- *They discussed "order aristolochiales" during the group presentation.*

---

order aspergillales *(noun)*

Order of fungi having a closed ascocarp (cleistothecium) with the asci scattered rather than gathered in a hymenium.

- *In class, the teacher used "order aspergillales" to mean order of fungi having a closed ascocarp....*
- *The article explained what "order aspergillales" means with a simple example.*

---

order auriculariales *(noun)*

Coextensive with the family Auriculariaceae; sometimes included in the order Tremellales.

- *Understanding "order auriculariales" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "order auriculariales."*

---

order batoidei *(noun)*

Fish with dorsoventrally flattened bodies; includes: rays; skates; guitarfishes; sawfishes.

- *She wrote a short paragraph that included "order batoidei."*

- *He looked up "order batoidei" because he had never seen it before.*

---

order belemnoidea *(noun)*

Order of extinct dibranchiate cephalopods related to the surviving spirulas.

- *The article explained what "order belemnoidea" means with a simple example.*
- *Understanding "order belemnoidea" helps you talk about this topic clearly.*

---

order bennettitales *(noun)*

Fossil gymnospermous plants of the Carboniferous.

- *He looked up "order bennettitales" because he had never seen it before.*
- *They discussed "order bennettitales" during the group presentation.*

---

order berycomorphi *(noun)*

An order of spiny-finned fish in the superorder Acanthopterygii.

- *They discussed "order berycomorphi" during the group presentation.*
- *He looked up "order berycomorphi" because he had never seen it before.*

---

order blastocladiales *(noun)*

Fungi that carry out asexual reproduction by thick-walled resting spores that produce zoospores upon germination; sometimes placed in class Oomycetes.

- *They discussed "order blastocladiales" during the group presentation.*
- *Understanding "order blastocladiales" helps you talk about this topic clearly.*

---

order branchiura *(noun)*

Copepods with suctorial mouthparts; parasitic on fishes.

- *She wrote a short paragraph that included "order branchiura."*
- *The article explained what "order branchiura" means with a simple example.*

---

order bryales *(noun)*

Category used in some classification systems for mosses having the spore case separated from the capsule wall by a hollow intercellular space.

- *In class, the teacher used "order bryales" to mean category used in some classification systems for....*
- *The article explained what "order bryales" means with a simple example.*

---

order campanulales *(noun)*

An order of plants of the subclass Asteridae including: Campanulaceae; Lobeliaceae; Cucurbitaceae; Goodeniaceae; Compositae.

- *In class, the teacher used "order campanulales" to mean an order of plants of the subclass asteridae....*
- *He looked up "order campanulales" because he had never seen it before.*

---

order caprimulgiformes *(noun)*

Goatsuckers; frogmouths; oilbirds.

- *She wrote a short paragraph that included "order caprimulgiformes."*
- *He looked up "order caprimulgiformes" because he had never seen it before.*

---

order caryophyllales *(noun)*

Corresponds approximately to the older group Centrospermae.

- *In class, the teacher used "order caryophyllales" to mean corresponds approximately to the older group....*
- *They discussed "order caryophyllales" during the group presentation.*

---

order casuariiformes *(noun)*

A ratite bird order: cassowaries and emus.

- *The article explained what "order casuariiformes" means with a simple example.*
- *Understanding "order casuariiformes" helps you talk about this topic clearly.*

---

order casuarinales *(noun)*

Order of chiefly Australian trees and shrubs comprising the casuarinas; 1 family: Casuarinaceae.

- *They discussed "order casuarinales" during the group presentation.*
- *Understanding "order casuarinales" helps you talk about this topic clearly.*

---

order cestida *(noun)*

Ctenophore having short tentacles; one family.

- *The article explained what "order cestida" means with a simple example.*
- *They discussed "order cestida" during the group presentation.*

order charadriiformes *(noun)*

Large diverse order of aquatic birds found along seacoasts and inland waters: shorebirds and coastal diving birds; most feed on anima life.

- *They discussed "order charadriiformes" during the group presentation.*
- *She wrote a short paragraph that included "order charadriiformes."*

order charales *(noun)*

Small order of macroscopic fresh and brackish water algae with a distinct axis: stoneworts.

- *The article explained what "order charales" means with a simple example.*
- *She wrote a short paragraph that included "order charales."*

order chelonethida *(noun)*

False scorpions.

- *He looked up "order chelonethida" because he had never seen it before.*
- *She wrote a short paragraph that included "order chelonethida."*

order chlorococcales *(noun)*

Unicellular green algae that reproduce by spores.

- *Understanding "order chlorococcales" helps you talk about this topic clearly.*
- *The article explained what "order chlorococcales" means with a simple example.*

order chytridiales *(noun)*

Simple aquatic fungi mostly saprophytic but some parasitic on higher plants or animals or fresh water fungi; sometimes placed in class Oomycetes.

- *The article explained what "order chytridiales" means with a simple example.*
- *She wrote a short paragraph that included "order chytridiales."*

order ciconiiformes *(noun)*

Order of chiefly tropical marsh-dwelling fish-eating wading birds with long legs and bills and (except for flamingos) unwebbed feet: herons; storks; spoonbills; flamingos; ibises.

- *Understanding "order ciconiiformes" helps you talk about this topic clearly.*
- *The article explained what "order ciconiiformes" means with a simple example.*

order cilioflagellata *(noun)*

In some classifications considered a phylum of the kingdom Protista; in others included in the plant phylum Pyrrophyta.

- *She wrote a short paragraph that included "order cilioflagellata."*
- *The article explained what "order cilioflagellata" means with a simple example.*

order columbiformes *(noun)*

Sand grouse; pigeons; doves; extinct dodos and solitaires.

- *The article explained what "order columbiformes" means with a simple example.*
- *In class, the teacher used "order columbiformes" to mean sand grouse; pigeons; doves; extinct dodos and....*

order commelinales *(noun)*

An order of monocotyledonous herbs.

- *The article explained what "order commelinales" means with a simple example.*
- *They discussed "order commelinales" during the group presentation.*

order coniferales *(noun)*

Profusely branching and chiefly evergreen trees and some shrubs having narrow or needlelike leaves.

- *She wrote a short paragraph that included "order coniferales."*
- *He looked up "order coniferales" because he had never seen it before.*

order conodonta *(noun)*

Extinct order of primitive vertebrates; the precise taxonomy is not clear; in some classifications considered a separate phylum.

- *She wrote a short paragraph that included "order conodonta."*
- *The article explained what "order conodonta" means with a simple example.*

---

order conodontophorida *(noun)*

Extinct order of primitive vertebrates; the precise taxonomy is not clear; in some classifications considered a separate phylum.

- *Understanding "order conodontophorida" helps you talk about this topic clearly.*
- *He looked up "order conodontophorida" because he had never seen it before.*

---

order coraciiformes *(noun)*

Rollers; kingfishers; hornbills; hoopoes; motmots; bee eaters; todies.

- *He looked up "order coraciiformes" because he had never seen it before.*
- *Understanding "order coraciiformes" helps you talk about this topic clearly.*

---

order cordaitales *(noun)*

Extinct plants having tall arborescent trunks comparable to or more advanced than cycads; known from the Pennsylvanian period; probably extinct since the Mesozoic era.

- *She wrote a short paragraph that included "order cordaitales."*
- *He looked up "order cordaitales" because he had never seen it before.*

---

order corrodentia *(noun)*

An order of insects: includes booklice and bark-lice.

- *He looked up "order corrodentia" because he had never seen it before.*
- *She wrote a short paragraph that included "order corrodentia."*

---

order crocodilia *(noun)*

Crocodiles; alligators; caimans; gavials.

- *She wrote a short paragraph that included "order crocodilia."*
- *Understanding "order crocodilia" helps you talk about this topic clearly.*

---

order crocodylia *(noun)*

Crocodiles; alligators; caimans; gavials.

- *They discussed "order crocodylia" during the group presentation.*
- *Understanding "order crocodylia" helps you talk about this topic clearly.*

---

order cuculiformes *(noun)*

Cuckoos; touracos; etc.

- *The article explained what "order cuculiformes" means with a simple example.*
- *In class, the teacher used "order cuculiformes" to mean cuckoos; touracos; etc.*

---

order cycadales *(noun)*

Primitive tropical gymnosperms abundant in the Mesozoic, now reduced to a few scattered tropical forms.

- *The article explained what "order cycadales" means with a simple example.*
- *In class, the teacher used "order cycadales" to mean primitive tropical gymnosperms abundant in the....*

---

order cycadofilicales *(noun)*

Fossil gymnospermous trees or climbing plants from the Devonian: seed ferns.

- *The article explained what "order cycadofilicales" means with a simple example.*
- *In class, the teacher used "order cycadofilicales" to mean fossil gymnospermous trees or climbing plants from....*

---

order cyclostomata *(noun)*

Primitive jawless aquatic vertebrate: lampreys; hagfishes.

- *They discussed "order cyclostomata" during the group presentation.*
- *He looked up "order cyclostomata" because he had never seen it before.*

---

order cydippea *(noun)*

Ctenophores having two long pinnate tentacles.

- *The article explained what "order cydippea" means with a simple example.*
- *In class, the teacher used "order cydippea" to mean ctenophores having two long pinnate tentacles.*

order cydippida *(noun)*

Ctenophores having two long pinnate tentacles.

- *They discussed "order cydippida" during the group presentation.*
- *In class, the teacher used "order cydippida" to mean ctenophores having two long pinnate tentacles.*

order cydippidea *(noun)*

Ctenophores having two long pinnate tentacles.

- *He looked up "order cydippidea" because he had never seen it before.*
- *Understanding "order cydippidea" helps you talk about this topic clearly.*

order cypriniformes *(noun)*

An order of animals including almost entirely freshwater fishes: characins; loaches; carp; suckers; sometimes classified as a suborder of Ostariophysi.

- *He looked up "order cypriniformes" because he had never seen it before.*
- *She wrote a short paragraph that included "order cypriniformes."*

order dermoptera *(noun)*

Flying lemurs.

- *The article explained what "order dermoptera" means with a simple example.*
- *She wrote a short paragraph that included "order dermoptera."*

order diapensiales *(noun)*

Used in some classifications: coextensive with family Diapensiaceae.

- *Understanding "order diapensiales" helps you talk about this topic clearly.*
- *The article explained what "order diapensiales" means with a simple example.*

order dicranales *(noun)*

Widely distributed order of mosses with erect gametophores and sporophytes at the tips of stems.

- *He looked up "order dicranales" because he had never seen it before.*
- *She wrote a short paragraph that included "order dicranales."*

order dictyoptera *(noun)*

In some classifications replaced by the orders (here suborders) Blattodea (cockroaches) and Manteodea (mantids); in former classifications often subsumed under a much broader order Orthoptera.

- *In class, the teacher used "order dictyoptera" to mean in some classifications replaced by the orders....*
- *The article explained what "order dictyoptera" means with a simple example.*

order dinocerata *(noun)*

Small order of primitive ungulates of the Paleocene and Eocene.

- *Understanding "order dinocerata" helps you talk about this topic clearly.*
- *They discussed "order dinocerata" during the group presentation.*

order dinoflagellata *(noun)*

In some classifications considered a phylum of the kingdom Protista; in others included in the plant phylum Pyrrophyta.

- *She wrote a short paragraph that included "order dinoflagellata."*
- *He looked up "order dinoflagellata" because he had never seen it before.*

order dinornithiformes *(noun)*

A ratite bird order: recently extinct flightless birds of New Zealand.

- *In class, the teacher used "order dinornithiformes" to mean a ratite bird order: recently extinct flightless....*
- *The article explained what "order dinornithiformes" means with a simple example.*

order discocephali *(noun)*

Small order of fishes comprising the remoras.

- *He looked up "order discocephali" because he had never seen it before.*
- *She wrote a short paragraph that included "order discocephali."*

order ebenales *(noun)*

Trees or shrubs of the families Ebenaceae or Sapotaceae or Styracaceae or Symplocaceae.

- *They discussed "order ebenales" during the group presentation.*
- *In class, the teacher used "order ebenales" to mean trees or shrubs of the families ebenaceae or....*

---

order edentata *(noun)*

Order of mammals having few or no teeth including: New World anteaters; sloths; armadillos.

- *In class, the teacher used "order edentata" to mean order of mammals having few or no teeth including:....*
- *Understanding "order edentata" helps you talk about this topic clearly.*

---

order embiodea *(noun)*

Web spinners.

- *Understanding "order embiodea" helps you talk about this topic clearly.*
- *He looked up "order embiodea" because he had never seen it before.*

---

order embioptera *(noun)*

Web spinners.

- *He looked up "order embioptera" because he had never seen it before.*
- *They discussed "order embioptera" during the group presentation.*

---

order endomycetales *(noun)*

Fungi having a zygote or a single cell developing directly into an ascus.

- *They discussed "order endomycetales" during the group presentation.*
- *He looked up "order endomycetales" because he had never seen it before.*

---

order entomophthorales *(noun)*

Coextensive with the family Entomophthoraceae.

- *Understanding "order entomophthorales" helps you talk about this topic clearly.*
- *They discussed "order entomophthorales" during the group presentation.*

---

order equisetales *(noun)*

Lower tracheophytes in existence since the Devonian.

- *The article explained what "order equisetales" means with a simple example.*
- *In class, the teacher used "order equisetales" to mean lower tracheophytes in existence since the devonian.*

---

order ericales *(noun)*

Ericaceae; Clethraceae; Diapensiaceae; Epacridaceae; Lennoaceae; Pyrolaceae; Monotropaceae.

- *Understanding "order ericales" helps you talk about this topic clearly.*
- *They discussed "order ericales" during the group presentation.*

---

order erysiphales *(noun)*

Saprophytic and parasitic fungi that live on plants.

- *She wrote a short paragraph that included "order erysiphales."*
- *He looked up "order erysiphales" because he had never seen it before.*

---

order eubacteriales *(noun)*

One of two usually recognized orders of true bacteria; Gram-positive spherical or rod-shaped forms; some are motile; in some classifications considered an order of Schizomycetes.

- *The article explained what "order eubacteriales" means with a simple example.*
- *In class, the teacher used "order eubacteriales" to mean one of two usually recognized orders of true....*

---

order eubryales *(noun)*

Mosses with perennial erect gametophores and stems with rows of leaves and drooping capsules.

- *Understanding "order eubryales" helps you talk about this topic clearly.*
- *He looked up "order eubryales" because he had never seen it before.*

---

order euphausiacea *(noun)*

Small commonly luminescent crustaceans; important element of marine plankton: krill.

- *He looked up "order euphausiacea" because he had never seen it before.*

- *Understanding "order euphausiacea" helps you talk about this topic clearly.*

---

order eurotiales *(noun)*

Order of fungi having a closed ascocarp (cleistothecium) with the asci scattered rather than gathered in a hymenium.

- *She wrote a short paragraph that included "order eurotiales."*
- *The article explained what "order eurotiales" means with a simple example.*

---

order eurypterida *(noun)*

Extinct aquatic arthropods of the Paleozoic.

- *In class, the teacher used "order eurypterida" to mean extinct aquatic arthropods of the paleozoic.*
- *Understanding "order eurypterida" helps you talk about this topic clearly.*

---

order exocycloida *(noun)*

Flat sea urchins.

- *He looked up "order exocycloida" because he had never seen it before.*
- *Understanding "order exocycloida" helps you talk about this topic clearly.*

---

order fagales *(noun)*

An order of dicotyledonous trees of the subclass Hamamelidae.

- *They discussed "order fagales" during the group presentation.*
- *The article explained what "order fagales" means with a simple example.*

---

order falconiformes *(noun)*

Chiefly diurnal carnivorous birds having hooked beaks and long talons with opposable hind toe: falcons; hawks; eagles; ospreys; caracaras; vultures.

- *In class, the teacher used "order falconiformes" to mean chiefly diurnal carnivorous birds having hooked....*
- *The article explained what "order falconiformes" means with a simple example.*

---

order filicales *(noun)*

True (leptosporangiate) ferns.

- *In class, the teacher used "order filicales" to mean true (leptosporangiate) ferns.*
- *He looked up "order filicales" because he had never seen it before.*

---

order fucales *(noun)*

Coextensive with the family Fucaceae.

- *The article explained what "order fucales" means with a simple example.*
- *In class, the teacher used "order fucales" to mean coextensive with the family fucaceae.*

---

order gadiformes *(noun)*

Cods, haddocks, grenadiers; in some classifications considered equivalent to the order Anacanthini.

- *The article explained what "order gadiformes" means with a simple example.*
- *In class, the teacher used "order gadiformes" to mean cods, haddocks, grenadiers; in some classifications....*

---

order galliformes *(noun)*

Pheasants; turkeys; grouse; partridges; quails; chickens; brush turkeys; curassows; hoatzins.

- *They discussed "order galliformes" during the group presentation.*
- *The article explained what "order galliformes" means with a simple example.*

---

order ganoidei *(noun)*

A group of mostly extinct primitive bony fishes characterized by armor-like bony scales.

- *In class, the teacher used "order ganoidei" to mean a group of mostly extinct primitive bony fishes....*
- *The article explained what "order ganoidei" means with a simple example.*

---

order gaviiformes *(noun)*

Large aquatic birds: loons and some extinct forms.

- *In class, the teacher used "order gaviiformes" to mean large aquatic birds: loons and some extinct forms.*
- *He looked up "order gaviiformes" because he had never seen it before.*

---

order gentianales *(noun)*

An order of dicotyledonous plants having gamopetalous flowers; Gentianaceae; Apocynaceae; Asclepiadaceae; Loganiaceae; Oleaceae; Salvadoraceae.

- *She wrote a short paragraph that included "order gentianales."*
- *He looked up "order gentianales" because he had never seen it before.*

---

order geophilomorpha *(noun)*

Small elongate centipedes living in soil and under stones and having more than 30 pairs of legs.

- *He looked up "order geophilomorpha" because he had never seen it before.*
- *Understanding "order geophilomorpha" helps you talk about this topic clearly.*

---

order geraniales *(noun)*

An order of plants of subclass Rosidae including geraniums and many other plants; see Euphorbiaceae; Geraniaceae; Rutaceae; Malpighiaceae; Simaroubaceae; Meliaceae; Zygophyllaceae; Tropaeolaceae.

- *The article explained what "order geraniales" means with a simple example.*
- *Understanding "order geraniales" helps you talk about this topic clearly.*

---

order ginkgoales *(noun)*

Coextensive with the family Ginkgoaceae: plants that first appeared in the Permian and now represented by a single surviving species; often included in Coniferales.

- *In class, the teacher used "order ginkgoales" to mean coextensive with the family ginkgoaceae: plants....*
- *He looked up "order ginkgoales" because he had never seen it before.*

---

order gnetales *(noun)*

Chiefly tropical or xerophytic woody plants; practically unknown as fossils but considered close to the ancestral line of angiosperms.

- *She wrote a short paragraph that included "order gnetales."*
- *He looked up "order gnetales" because he had never seen it before.*

---

order graminales *(noun)*

Grasses; sedges; rushes.

- *They discussed "order graminales" during the group presentation.*
- *He looked up "order graminales" because he had never seen it before.*

---

order gregarinida *(noun)*

An order in the subclass Telosporidia.

- *They discussed "order gregarinida" during the group presentation.*
- *He looked up "order gregarinida" because he had never seen it before.*

---

order gruiformes *(noun)*

Inland marsh-dwelling birds with long legs and necks and bills that wade in water in search of food: cranes; rails; bustards.

- *She wrote a short paragraph that included "order gruiformes."*
- *He looked up "order gruiformes" because he had never seen it before.*

---

order guttiferales *(noun)*

Used in some classifications; coextensive with Parietales.

- *She wrote a short paragraph that included "order guttiferales."*
- *The article explained what "order guttiferales" means with a simple example.*

---

order gymnophiona *(noun)*

An order of amphibians including caecilians.

- *She wrote a short paragraph that included "order gymnophiona."*
- *He looked up "order gymnophiona" because he had never seen it before.*

---

order haemosporidia *(noun)*

An order in the subclass Telosporidia.

- *The article explained what "order haemosporidia" means with a simple example.*
- *Understanding "order haemosporidia" helps you talk about this topic clearly.*

---

order haplosporidia *(noun)*

An order in the subclass Acnidosporidia.

- *She wrote a short paragraph that included "order haplosporidia."*
- *He looked up "order haplosporidia" because he had never seen it before.*

---

order heliozoa *(noun)*

Mostly freshwater protozoa.

- *The article explained what "order heliozoa" means with a simple example.*
- *In class, the teacher used "order heliozoa" to mean mostly freshwater protozoa.*

---

order helotiales *(noun)*

Order of fungi having asci in a disk-shaped to goblet-shaped apothecium.

- *In class, the teacher used "order helotiales" to mean order of fungi having asci in a disk-shaped to....*
- *They discussed "order helotiales" during the group presentation.*

---

order heterosomata *(noun)*

Flatfishes: halibut; sole; flounder; plaice; turbot; tonguefishes.

- *He looked up "order heterosomata" because he had never seen it before.*
- *Understanding "order heterosomata" helps you talk about this topic clearly.*

---

order heterotrichales *(noun)*

Yellow-green algae with simple or branching filaments; comprising the single family Tribonemaceae.

- *In class, the teacher used "order heterotrichales" to mean yellow-green algae with simple or branching....*
- *They discussed "order heterotrichales" during the group presentation.*

---

order hymenogastrales *(noun)*

An order of fungi belonging to the class Gasteromycetes; has a distinct basidiocarp with a fleshy or waxy gleba (sometimes placed in subclass Homobasidiomycetes).

- *He looked up "order hymenogastrales" because he had never seen it before.*
- *Understanding "order hymenogastrales" helps you talk about this topic clearly.*

---

order hypericales *(noun)*

A large order of dicotyledonous plants of subclass Dilleniidae.

- *The article explained what "order hypericales" means with a simple example.*
- *In class, the teacher used "order hypericales" to mean a large order of dicotyledonous plants of subclass....*

---

order hypermastigina *(noun)*

Cellulose-producing flagellates.

- *They discussed "order hypermastigina" during the group presentation.*
- *He looked up "order hypermastigina" because he had never seen it before.*

---

order hypocreales *(noun)*

Used in some classifications for the family Hypocreaceae.

- *The article explained what "order hypocreales" means with a simple example.*
- *They discussed "order hypocreales" during the group presentation.*

---

order hyracoidea *(noun)*

Hyraxes and some extinct animals.

- *She wrote a short paragraph that included "order hyracoidea."*
- *Understanding "order hyracoidea" helps you talk about this topic clearly.*

---

order ichthyosauria *(noun)*

Extinct marine reptiles: ichthyosaurs.

- *The article explained what "order ichthyosauria" means with a simple example.*
- *She wrote a short paragraph that included "order ichthyosauria."*

---

order ictodosauria *(noun)*

Extinct reptiles of the later Triassic period.

- *They discussed "order ictodosauria" during the group presentation.*
- *She wrote a short paragraph that included "order ictodosauria."*

order insectivora *(noun)*

Shrews; moles; hedgehogs; tenrecs.

- *They discussed "order insectivora" during the group presentation.*
- *In class, the teacher used "order insectivora" to mean shrews; moles; hedgehogs; tenrecs.*

order insessores *(noun)*

A bird with feet adapted for perching (as on tree branches); this order is now generally abandoned by taxonomists.

- *In class, the teacher used "order insessores" to mean a bird with feet adapted for perching (as on tree....*
- *The article explained what "order insessores" means with a simple example.*

order isoetales *(noun)*

Aquatic or marsh-growing fern allies; known to have existed since the Cenozoic; sometimes included in Lycopodiales.

- *They discussed "order isoetales" during the group presentation.*
- *He looked up "order isoetales" because he had never seen it before.*

order isospondyli *(noun)*

Most primitive teleost fishes; all are soft-finned: salmon; trout; herring; shad; sardines; anchovies; whitefish; smelts; tarpon.

- *The article explained what "order isospondyli" means with a simple example.*
- *They discussed "order isospondyli" during the group presentation.*

order juglandales *(noun)*

Coextensive with the family Juglandaceae.

- *In class, the teacher used "order juglandales" to mean coextensive with the family juglandaceae.*
- *The article explained what "order juglandales" means with a simple example.*

order jungermanniales *(noun)*

Large order of chiefly tropical liverworts.

- *The article explained what "order jungermanniales" means with a simple example.*
- *They discussed "order jungermanniales" during the group presentation.*

order lagomorpha *(noun)*

Rabbits; hares; pikas; formerly considered the suborder Duplicidentata of the order Rodentia.

- *In class, the teacher used "order lagomorpha" to mean rabbits; hares; pikas; formerly considered the....*
- *They discussed "order lagomorpha" during the group presentation.*

order laminariales *(noun)*

In some classifications coextensive with family Laminariaceae: marine brown algae of cold or polar seas.

- *Understanding "order laminariales" helps you talk about this topic clearly.*
- *The article explained what "order laminariales" means with a simple example.*

order lechanorales *(noun)*

Category used in some classification systems for all lichens that produce apothecia.

- *She wrote a short paragraph that included "order lechanorales."*
- *The article explained what "order lechanorales" means with a simple example.*

order lepidodendrales *(noun)*

Fossil arborescent plants arising during the early Devonian and conspicuous throughout the Carboniferous.

- *She wrote a short paragraph that included "order lepidodendrales."*
- *He looked up "order lepidodendrales" because he had never seen it before.*

order lichenales *(noun)*

Category used especially in former classifications for organisms now constituting the division Lichenes.

- *In class, the teacher used "order lichenales" to mean category used especially in former classifications....*
- *Understanding "order lichenales" helps you talk about this topic clearly.*

order liliales *(noun)*

An order of monocotyledonous plants including Amaryllidaceae and Liliaceae and Iridaceae.

- *The article explained what "order liliales" means with a simple example.*
- *In class, the teacher used "order liliales" to mean an order of monocotyledonous plants including....*

---

order loricata *(noun)*

Former name for the order Crocodylia.

- *The article explained what "order loricata" means with a simple example.*
- *In class, the teacher used "order loricata" to mean former name for the order crocodylia.*

---

order lycoperdales *(noun)*

Small order of basidiomycetous fungi having fleshy often globose fruiting bodies; includes puffballs and earthstars.

- *They discussed "order lycoperdales" during the group presentation.*
- *She wrote a short paragraph that included "order lycoperdales."*

---

order lycopodiales *(noun)*

Lower vascular plants coextensive with the family Lycopodiaceae; in some classifications includes the Selaginellaceae and Isoetaceae.

- *In class, the teacher used "order lycopodiales" to mean lower vascular plants coextensive with the family....*
- *Understanding "order lycopodiales" helps you talk about this topic clearly.*

---

order lyginopteridales *(noun)*

Fossil gymnospermous trees or climbing plants from the Devonian: seed ferns.

- *She wrote a short paragraph that included "order lyginopteridales."*
- *They discussed "order lyginopteridales" during the group presentation.*

---

order madreporaria *(noun)*

Stony corals.

- *She wrote a short paragraph that included "order madreporaria."*
- *He looked up "order madreporaria" because he had never seen it before.*

---

order mallophaga *(noun)*

Biting lice.

- *He looked up "order mallophaga" because he had never seen it before.*
- *She wrote a short paragraph that included "order mallophaga."*

---

order malvales *(noun)*

Malvaceae; Bombacaceae; Elaeocarpaceae; Sterculiaceae; Tiliaceae.

- *The article explained what "order malvales" means with a simple example.*
- *They discussed "order malvales" during the group presentation.*

---

order mantophasmatodea *(noun)*

An order of insect identified in 2002 in a 45 million year old piece of amber from the Baltic region.

- *In class, the teacher used "order mantophasmatodea" to mean an order of insect identified in 2002 in a 45....*
- *The article explained what "order mantophasmatodea" means with a simple example.*

---

order marattiales *(noun)*

Lower ferns coextensive with the family Marattiaceae.

- *She wrote a short paragraph that included "order marattiales."*
- *The article explained what "order marattiales" means with a simple example.*

---

order marchantiales *(noun)*

Liverworts with gametophyte differentiated internally.

- *In class, the teacher used "order marchantiales" to mean liverworts with gametophyte differentiated internally.*
- *The article explained what "order marchantiales" means with a simple example.*

---

order marsupialia *(noun)*

Coextensive with the subclass Metatheria.

- *Understanding "order marsupialia" helps you talk about this topic clearly.*

- *The article explained what "order marsupialia" means with a simple example.*

---

order mecoptera *(noun)*

An order of carnivorous insects usually having long membranous wings and long beaklike heads with chewing mouths at the tip.

- *Understanding "order mecoptera" helps you talk about this topic clearly.*
- *They discussed "order mecoptera" during the group presentation.*

---

order moniliales *(noun)*

Order of imperfect fungi lacking conidiophores of having conidiophores that are superficial and not enclosed in a pycnidium.

- *The article explained what "order moniliales" means with a simple example.*
- *In class, the teacher used "order moniliales" to mean order of imperfect fungi lacking conidiophores of....*

---

order monotremata *(noun)*

Coextensive with the subclass Prototheria.

- *They discussed "order monotremata" during the group presentation.*
- *In class, the teacher used "order monotremata" to mean coextensive with the subclass prototheria.*

---

order mucorales *(noun)*

An order of mostly saprophytic fungi.

- *She wrote a short paragraph that included "order mucorales."*
- *He looked up "order mucorales" because he had never seen it before.*

---

order musales *(noun)*

Tropical plants.

- *Understanding "order musales" helps you talk about this topic clearly.*
- *He looked up "order musales" because he had never seen it before.*

---

order mycelia sterilia *(noun)*

Order of imperfect fungi having no known spore stage.

- *The article explained what "order mycelia sterilia" means with a simple example.*
- *They discussed "order mycelia sterilia" during the group presentation.*

---

order mycoplasmatales *(noun)*

Coextensive with the family Mycoplasmataceae.

- *The article explained what "order mycoplasmatales" means with a simple example.*
- *She wrote a short paragraph that included "order mycoplasmatales."*

---

order mycrosporidia *(noun)*

An order in the subclass Cnidosporidia.

- *They discussed "order mycrosporidia" during the group presentation.*
- *The article explained what "order mycrosporidia" means with a simple example.*

---

order myricales *(noun)*

Coextensive with the family Myricaceae.

- *They discussed "order myricales" during the group presentation.*
- *He looked up "order myricales" because he had never seen it before.*

---

order myrtales *(noun)*

Myrtaceae; Combretaceae; Elaeagnaceae; Haloragidaceae; Melastomaceae; Lecythidaceae; Lythraceae; Rhizophoraceae; Onagraceae; Lecythidaceae; Punicaceae.

- *She wrote a short paragraph that included "order myrtales."*
- *He looked up "order myrtales" because he had never seen it before.*

---

order mysidacea *(noun)*

Opossum shrimp.

- *He looked up "order mysidacea" because he had never seen it before.*
- *They discussed "order mysidacea" during the group presentation.*

---

order myxobacterales *(noun)*

An order of higher bacteria.

- *The article explained what “order myxobacterales” means with a simple example.*
- *In class, the teacher used “order myxobacterales” to mean an order of higher bacteria.*

order myxobacteria *(noun)*

An order of higher bacteria.

- *In class, the teacher used “order myxobacteria” to mean an order of higher bacteria.*
- *Understanding “order myxobacteria” helps you talk about this topic clearly.*

order myxobacteriales *(noun)*

An order of higher bacteria.

- *In class, the teacher used “order myxobacteriales” to mean an order of higher bacteria.*
- *The article explained what “order myxobacteriales” means with a simple example.*

order myxosporidia *(noun)*

An order in the subclass Cnidosporidia.

- *Understanding “order myxosporidia” helps you talk about this topic clearly.*
- *They discussed “order myxosporidia” during the group presentation.*

order naiadales *(noun)*

An order of aquatic monocotyledonous herbaceous plants.

- *Understanding “order naiadales” helps you talk about this topic clearly.*
- *They discussed “order naiadales” during the group presentation.*

order nidulariales *(noun)*

Small order of basidiomycetous fungi comprising families Nidulariaceae and Sphaerobolaceae.

- *She wrote a short paragraph that included “order nidulariales.”*
- *They discussed “order nidulariales” during the group presentation.*

order notostraca *(noun)*

Small freshwater crustaceans with a shield-shaped carapace.

- *Understanding “order notostraca” helps you talk about this topic clearly.*
- *The article explained what “order notostraca” means with a simple example.*

order nudibranchia *(noun)*

Comprising numerous marine gastropod mollusks lacking a shell in the adult state and usually having a body like a slug.

- *He looked up “order nudibranchia” because he had never seen it before.*
- *She wrote a short paragraph that included “order nudibranchia.”*

order octopoda *(noun)*

Octopuses and paper nautilus.

- *She wrote a short paragraph that included “order octopoda.”*
- *They discussed “order octopoda” during the group presentation.*

order oedogoniales *(noun)*

Simple or branched filamentous freshwater green algae.

- *The article explained what “order oedogoniales” means with a simple example.*
- *They discussed “order oedogoniales” during the group presentation.*

order oleales *(noun)*

Coextensive with the family Oleaceae; in some classifications included in the order Gentianales.

- *They discussed “order oleales” during the group presentation.*
- *In class, the teacher used “order oleales” to mean coextensive with the family oleaceae; in some....*

order ophioglossales *(noun)*

Coextensive with the family Ophioglossaceae.

- *In class, the teacher used "order ophioglossales" to mean coextensive with the family ophioglossaceae.*
- *They discussed "order ophioglossales" during the group presentation.*

---

order opuntiales *(noun)*

Coextensive with the family Cactaceae: cactuses.

- *Understanding "order opuntiales" helps you talk about this topic clearly.*
- *He looked up "order opuntiales" because he had never seen it before.*

---

order orchidales *(noun)*

Order of plants with irregular flowers having minute seeds: Orchidaceae; Burmanniaceae.

- *In class, the teacher used "order orchidales" to mean order of plants with irregular flowers having....*
- *The article explained what "order orchidales" means with a simple example.*

---

order ostariophysi *(noun)*

In some classifications considered a superorder comprising the Cypriniformes and the Siluriformes.

- *Understanding "order ostariophysi" helps you talk about this topic clearly.*
- *The article explained what "order ostariophysi" means with a simple example.*

---

order osteoglossiformes *(noun)*

Teleost fish with bony tongues.

- *They discussed "order osteoglossiformes" during the group presentation.*
- *The article explained what "order osteoglossiformes" means with a simple example.*

---

order ostracodermi *(noun)*

Extinct group of armored jawless vertebrates; taxonomy is not clear.

- *He looked up "order ostracodermi" because he had never seen it before.*
- *Understanding "order ostracodermi" helps you talk about this topic clearly.*

---

order palmales *(noun)*

Coextensive with the family Palmae: palms.

- *The article explained what "order palmales" means with a simple example.*
- *In class, the teacher used "order palmales" to mean coextensive with the family palmae: palms.*

---

order pandanales *(noun)*

Families Typhaceae; Sparganiaceae; Pandanaceae.

- *They discussed "order pandanales" during the group presentation.*
- *She wrote a short paragraph that included "order pandanales."*

---

order papaverales *(noun)*

An order of dicotyledonous plants.

- *He looked up "order papaverales" because he had never seen it before.*
- *Understanding "order papaverales" helps you talk about this topic clearly.*

---

order parietales *(noun)*

A large order of dicotyledonous plants of subclass Dilleniidae.

- *In class, the teacher used "order parietales" to mean a large order of dicotyledonous plants of subclass....*
- *They discussed "order parietales" during the group presentation.*

---

order pectinibranchia *(noun)*

Large order of gastropods comprising univalve mollusks that have a single gill resembling a comb.

- *Understanding "order pectinibranchia" helps you talk about this topic clearly.*
- *He looked up "order pectinibranchia" because he had never seen it before.*

---

order pediculati *(noun)*

Anglers and batfishes; spiny-finned marine fishes having pectoral fins at the ends of armlike processes and a long movable spine on the dorsal fin to lure prey to the large mouth.

- *In class, the teacher used "order pediculati" to mean anglers and batfishes; spiny-finned marine fishes....*
- *He looked up "order pediculati" because he had never seen it before.*

order pedipalpi *(noun)*

Whip scorpions.

- *In class, the teacher used "order pedipalpi" to mean whip scorpions.*
- *The article explained what "order pedipalpi" means with a simple example.*

order pelecaniformes *(noun)*

Pelicans; frigate birds; gannets; cormorants.

- *They discussed "order pelecaniformes" during the group presentation.*
- *Understanding "order pelecaniformes" helps you talk about this topic clearly.*

order pelycosauria *(noun)*

Edaphosaurus; dimetrodon.

- *The article explained what "order pelycosauria" means with a simple example.*
- *In class, the teacher used "order pelycosauria" to mean edaphosaurus; dimetrodon.*

order perciformes *(noun)*

One of the largest natural groups of fishes of both marine and fresh water: true perches; basses; tuna.

- *The article explained what "order perciformes" means with a simple example.*
- *They discussed "order perciformes" during the group presentation.*

order percomorphi *(noun)*

One of the largest natural groups of fishes of both marine and fresh water: true perches; basses; tuna.

- *In class, the teacher used "order percomorphi" to mean one of the largest natural groups of fishes of both....*
- *The article explained what "order percomorphi" means with a simple example.*

order peronosporales *(noun)*

Order of chiefly parasitic lower fungi: Albuginaceae and Peronosporaceae and Pythiaceae.

- *He looked up "order peronosporales" because he had never seen it before.*
- *Understanding "order peronosporales" helps you talk about this topic clearly.*

order pezizales *(noun)*

Order of mostly saprophytic fungi having cup-shaped ascocarps.

- *She wrote a short paragraph that included "order pezizales."*
- *He looked up "order pezizales" because he had never seen it before.*

order phallales *(noun)*

Order of fungi comprising the stinkhorns and related forms whose mature hymenium is slimy and fetid; sometimes placed in subclass Homobasidiomycetes.

- *He looked up "order phallales" because he had never seen it before.*
- *In class, the teacher used "order phallales" to mean order of fungi comprising the stinkhorns and....*

order phasmatodea *(noun)*

In some classifications considered a suborder of Orthoptera: stick insects; leaf insects.

- *The article explained what "order phasmatodea" means with a simple example.*
- *In class, the teacher used "order phasmatodea" to mean in some classifications considered a suborder of....*

order phasmida *(noun)*

In some classifications considered a suborder of Orthoptera: stick insects; leaf insects.

- *She wrote a short paragraph that included "order phasmida."*
- *Understanding "order phasmida" helps you talk about this topic clearly.*

order pholidota *(noun)*

Pangolins; in some former classifications included in the order Edentata.

- *In class, the teacher used "order pholidota" to mean pangolins; in some former classifications included....*
- *The article explained what "order pholidota" means with a simple example.*

order picariae *(noun)*

Term used in some classifications as nearly equivalent to the order Coraciiformes.

- *He looked up "order picariae" because he had never seen it before.*
- *In class, the teacher used "order picariae" to mean term used in some classifications as nearly....*

---

order piciformes *(noun)*

Woodpeckers; jacamars; puffbirds; barbets; honey guides; toucans.

- *She wrote a short paragraph that included "order piciformes."*
- *He looked up "order piciformes" because he had never seen it before.*

---

order piperales *(noun)*

Piperaceae; Saururaceae; Chloranthaceae.

- *She wrote a short paragraph that included "order piperales."*
- *The article explained what "order piperales" means with a simple example.*

---

order plantaginales *(noun)*

Coextensive with the family Plantaginaceae.

- *She wrote a short paragraph that included "order plantaginales."*
- *Understanding "order plantaginales" helps you talk about this topic clearly.*

---

order platyctenea *(noun)*

An order of Tentaculata.

- *He looked up "order platyctenea" because he had never seen it before.*
- *She wrote a short paragraph that included "order platyctenea."*

---

order plectognathi *(noun)*

Boxfishes; filefishes; globefishes; ocean sunfishes; triggerfishes; puffers.

- *In class, the teacher used "order plectognathi" to mean boxfishes; filefishes; globefishes; ocean....*
- *The article explained what "order plectognathi" means with a simple example.*

---

order pleuronectiformes *(noun)*

Flatfishes: halibut; sole; flounder; plaice; turbot; tonguefishes.

- *In class, the teacher used "order pleuronectiformes" to mean flatfishes: halibut; sole; flounder; plaice;....*
- *They discussed "order pleuronectiformes" during the group presentation.*

---

order plumbaginales *(noun)*

Coextensive with the family Plumbaginaceae; usually included in order Primulales.

- *Understanding "order plumbaginales" helps you talk about this topic clearly.*
- *They discussed "order plumbaginales" during the group presentation.*

---

order polemoniales *(noun)*

Polemoniaceae; Solanaceae; Boraginaceae; Labiatae; Lentibulariaceae; Pedaliaceae; in some classifications includes the order Scrophulariales.

- *In class, the teacher used "order polemoniales" to mean polemoniaceae; solanaceae; boraginaceae; labiatae;....*
- *Understanding "order polemoniales" helps you talk about this topic clearly.*

---

order polygonales *(noun)*

Coextensive with the family Polygonaceae,.

- *They discussed "order polygonales" during the group presentation.*
- *She wrote a short paragraph that included "order polygonales."*

---

order polymastigina *(noun)*

Small usually parasitic flagellates.

- *She wrote a short paragraph that included "order polymastigina."*
- *Understanding "order polymastigina" helps you talk about this topic clearly.*

---

order polypodiales *(noun)*

True (leptosporangiate) ferns.

- *She wrote a short paragraph that included "order polypodiales."*

- *He looked up “order polypodiales” because he had never seen it before.*

---

order primulales *(noun)*

Primulaceae; Theophrastaceae; Myrsinaceae; and (in some classifications) Plumbaginaceae.

- *Understanding “order primulales” helps you talk about this topic clearly.*
- *The article explained what “order primulales” means with a simple example.*

---

order procellariiformes *(noun)*

Petrels; albatrosses; shearwaters; diving petrels.

- *He looked up “order procellariiformes” because he had never seen it before.*
- *She wrote a short paragraph that included “order procellariiformes.”*

---

order proteales *(noun)*

Coextensive with the family Proteaceae.

- *They discussed “order proteales” during the group presentation.*
- *Understanding “order proteales” helps you talk about this topic clearly.*

---

order protura *(noun)*

Minute wingless arthropods: telsontails.

- *The article explained what “order protura” means with a simple example.*
- *Understanding “order protura” helps you talk about this topic clearly.*

---

order pseudomonadales *(noun)*

One of two usually recognized orders of true bacteria; Gram-negative spiral or spherical or rod-shaped bacteria usually motile by polar flagella; some contain photosynthetic pigments.

- *He looked up “order pseudomonadales” because he had never seen it before.*
- *They discussed “order pseudomonadales” during the group presentation.*

---

order pseudoscorpiones *(noun)*

False scorpions.

- *They discussed “order pseudoscorpiones” during the group presentation.*
- *He looked up “order pseudoscorpiones” because he had never seen it before.*

---

order pseudoscorpionida *(noun)*

False scorpions.

- *She wrote a short paragraph that included “order pseudoscorpionida.”*
- *The article explained what “order pseudoscorpionida” means with a simple example.*

---

order psilophytales *(noun)*

Paleozoic simple dichotomously branched plants of Europe and eastern Canada including the oldest known vascular land plants.

- *They discussed “order psilophytales” during the group presentation.*
- *Understanding “order psilophytales” helps you talk about this topic clearly.*

---

order psilotales *(noun)*

Lower vascular plants having dichotomously branched sporophyte divided into aerial shoot and rhizome and lacking true roots.

- *He looked up “order psilotales” because he had never seen it before.*
- *She wrote a short paragraph that included “order psilotales.”*

---

order psittaciformes *(noun)*

An order of birds including parrots and amazons and cockatoos and lorikeets and lories and macaws and parakeets.

- *She wrote a short paragraph that included “order psittaciformes.”*
- *They discussed “order psittaciformes” during the group presentation.*

---

order psocoptera *(noun)*

An order of insects: includes booklice and bark-lice.

- *He looked up “order psocoptera” because he had never seen it before.*
- *She wrote a short paragraph that included “order psocoptera.”*

---

order pterosauria *(noun)*

Extinct flying reptiles: pterosaurs.

- *She wrote a short paragraph that included "order pterosauria."*
- *Understanding "order pterosauria" helps you talk about this topic clearly.*

---

order pycnogonida *(noun)*

Sea spiders.

- *They discussed "order pycnogonida" during the group presentation.*
- *He looked up "order pycnogonida" because he had never seen it before.*

---

order rajiformes *(noun)*

Fish with dorsoventrally flattened bodies; includes: rays; skates; guitarfishes; sawfishes.

- *Understanding "order rajiformes" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "order rajiformes."*

---

order ranales *(noun)*

Herbs, shrubs and trees: includes families Ranunculaceae; Annonaceae; Berberidaceae; Magnoliaceae; Menispermaceae; Myristicaceae; Nymphaeaceae; Lardizabalaceae; Lauraceae; Calycanthaceae; Ceratophyllaceae; Cercidiphyllaceae.

- *In class, the teacher used "order ranales" to mean herbs, shrubs and trees: includes families....*
- *The article explained what "order ranales" means with a simple example.*

---

order ranunculales *(noun)*

Herbs, shrubs and trees: includes families Ranunculaceae; Annonaceae; Berberidaceae; Magnoliaceae; Menispermaceae; Myristicaceae; Nymphaeaceae; Lardizabalaceae; Lauraceae; Calycanthaceae; Ceratophyllaceae; Cercidiphyllaceae.

- *They discussed "order ranunculales" during the group presentation.*
- *The article explained what "order ranunculales" means with a simple example.*

---

order raptores *(noun)*

Term used in former classifications; erroneously grouped together birds of the orders Falconiformes and Strigiformes.

- *In class, the teacher used "order raptores" to mean term used in former classifications; erroneously....*
- *He looked up "order raptores" because he had never seen it before.*

---

order rhamnales *(noun)*

An order of dicotyledonous plants.

- *The article explained what "order rhamnales" means with a simple example.*
- *She wrote a short paragraph that included "order rhamnales."*

---

order rhoeadales *(noun)*

An order of dicotyledonous plants.

- *In class, the teacher used "order rhoeadales" to mean an order of dicotyledonous plants.*
- *Understanding "order rhoeadales" helps you talk about this topic clearly.*

---

order rhynchocephalia *(noun)*

Tuataras; extinct forms from middle Triassic.

- *He looked up "order rhynchocephalia" because he had never seen it before.*
- *She wrote a short paragraph that included "order rhynchocephalia."*

---

order rickettsiales *(noun)*

Pleomorphic Gram-negative microorganisms.

- *The article explained what "order rickettsiales" means with a simple example.*
- *In class, the teacher used "order rickettsiales" to mean pleomorphic gram-negative microorganisms.*

---

order salicales *(noun)*

Coextensive with the family Salicaceae.

- *They discussed "order salicales" during the group presentation.*
- *Understanding "order salicales" helps you talk about this topic clearly.*

---

order salientia *(noun)*

Frogs, toads, tree toads.

- *Understanding "order salientia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "order salientia."*

order santalales *(noun)*

Order of plants distinguished by having a one-celled inferior ovary; many are parasitic or partly parasitic usually on roots.

- *He looked up "order santalales" because he had never seen it before.*
- *They discussed "order santalales" during the group presentation.*

order sapindales *(noun)*

An order of dicotyledonous plants.

- *In class, the teacher used "order sapindales" to mean an order of dicotyledonous plants.*
- *He looked up "order sapindales" because he had never seen it before.*

order saprolegniales *(noun)*

Order of chiefly aquatic fungi.

- *They discussed "order saprolegniales" during the group presentation.*
- *She wrote a short paragraph that included "order saprolegniales."*

order sarcosporidia *(noun)*

Imperfectly known parasites of the muscles of vertebrates.

- *They discussed "order sarcosporidia" during the group presentation.*
- *Understanding "order sarcosporidia" helps you talk about this topic clearly.*

order sarraceniales *(noun)*

Plants that are variously modified to serve as insect traps: families Sarraceniaceae; Nepenthaceae; Droseraceae.

- *She wrote a short paragraph that included "order sarraceniales."*
- *He looked up "order sarraceniales" because he had never seen it before.*

order sauropterygia *(noun)*

Extinct marine reptiles: plesiosaurs; nothosaurs.

- *The article explained what "order sauropterygia" means with a simple example.*
- *They discussed "order sauropterygia" during the group presentation.*

order scandentia *(noun)*

A small order comprising only the tree shrews: in some classifications tree shrews are considered either primates (and included in the suborder Prosimii) or true insectivores (and included in the order Insectivora).

- *Understanding "order scandentia" helps you talk about this topic clearly.*
- *They discussed "order scandentia" during the group presentation.*

order sclerodermatales *(noun)*

An order of fungi having a peridium surrounding a gleba (sometimes placed in subclass Homobasidiomycetes).

- *He looked up "order sclerodermatales" because he had never seen it before.*
- *She wrote a short paragraph that included "order sclerodermatales."*

order scleroparei *(noun)*

Scorpionfishes; sculpins; gurnards; greenlings; flying gurnards.

- *The article explained what "order scleroparei" means with a simple example.*
- *In class, the teacher used "order scleroparei" to mean scorpionfishes; sculpins; gurnards; greenlings;....*

order scorpionida *(noun)*

True scorpions.

- *They discussed "order scorpionida" during the group presentation.*
- *He looked up "order scorpionida" because he had never seen it before.*

order scrophulariales *(noun)*

Used in some classification systems; often included in the order Polemoniales.

- *They discussed "order scrophulariales" during the group presentation.*

- *She wrote a short paragraph that included "order scrophulariales."*

---

order secotiales *(noun)*

An order of fungi belonging to the class Gasteromycetes.

- *Understanding "order secotiales" helps you talk about this topic clearly.*
- *In class, the teacher used "order secotiales" to mean an order of fungi belonging to the class gasteromycetes.*

---

order selaginellales *(noun)*

In some classifications included in Lycopodiales.

- *The article explained what "order selaginellales" means with a simple example.*
- *In class, the teacher used "order selaginellales" to mean in some classifications included in lycopodiales.*

---

order siluriformes *(noun)*

An order of fish belonging to the superorder Malacopterygii including catfishes.

- *He looked up "order siluriformes" because he had never seen it before.*
- *She wrote a short paragraph that included "order siluriformes."*

---

order siphonophora *(noun)*

Marine colonial hydrozoans.

- *In class, the teacher used "order siphonophora" to mean marine colonial hydrozoans.*
- *They discussed "order siphonophora" during the group presentation.*

---

order solenichthyes *(noun)*

Bellows fishes; shrimpfishes; cornetfishes; pipefishes; small order of chiefly tropical marine fishes of varied and bizarre form all having a small mouth at the end of a drawn-out tubular snout.

- *Understanding "order solenichthyes" helps you talk about this topic clearly.*
- *They discussed "order solenichthyes" during the group presentation.*

---

order solenogastres *(noun)*

An order of Amphineura.

- *The article explained what "order solenogastres" means with a simple example.*
- *In class, the teacher used "order solenogastres" to mean an order of amphineura.*

---

order spatangoida *(noun)*

Heart-shaped sea urchins.

- *She wrote a short paragraph that included "order spatangoida."*
- *He looked up "order spatangoida" because he had never seen it before.*

---

order sphaeriales *(noun)*

Large order of ascomycetous fungi usually having a dark hard perithecia with definite ostioles; in more recent classifications often divided among several orders.

- *She wrote a short paragraph that included "order sphaeriales."*
- *Understanding "order sphaeriales" helps you talk about this topic clearly.*

---

order sphaerocarpales *(noun)*

Small order sometimes included in the order Jungermanniales.

- *The article explained what "order sphaerocarpales" means with a simple example.*
- *In class, the teacher used "order sphaerocarpales" to mean small order sometimes included in the order....*

---

order sphagnales *(noun)*

Coextensive with the genus Sphagnum; in some classifications isolated in a separate subclass.

- *Understanding "order sphagnales" helps you talk about this topic clearly.*
- *He looked up "order sphagnales" because he had never seen it before.*

---

order spirochaetales *(noun)*

Higher bacteria; slender spiral rodlike forms.

- *The article explained what "order spirochaetales" means with a simple example.*
- *She wrote a short paragraph that included "order spirochaetales."*

---

order stegocephalia *(noun)*

In former classifications a division of class Amphibia comprising all pre-Jurassic and some later extinct large salamandriform amphibia.

- *The article explained what "order stegocephalia" means with a simple example.*
- *In class, the teacher used "order stegocephalia" to mean in former classifications a division of class....*

order stereospondyli *(noun)*

Formerly a suborder of Stegocephalia; amphibia having vertebrae whose component elements are fused into a single piece.

- *In class, the teacher used "order stereospondyli" to mean formerly a suborder of stegocephalia; amphibia....*
- *He looked up "order stereospondyli" because he had never seen it before.*

order stomatopoda *(noun)*

Mantis shrimps.

- *The article explained what "order stomatopoda" means with a simple example.*
- *She wrote a short paragraph that included "order stomatopoda."*

order struthioniformes *(noun)*

A ratite bird order: ostriches and related extinct birds; known from the Pleistocene onward.

- *The article explained what "order struthioniformes" means with a simple example.*
- *She wrote a short paragraph that included "order struthioniformes."*

order synentognathi *(noun)*

Order of fishes having spineless fins; needlefishes; sauries; flying fishes; halfbeaks.

- *They discussed "order synentognathi" during the group presentation.*
- *He looked up "order synentognathi" because he had never seen it before.*

order taxales *(noun)*

Coextensive with the family Taxaceae: yews.

- *In class, the teacher used "order taxales" to mean coextensive with the family taxaceae: yews.*
- *The article explained what "order taxales" means with a simple example.*

order temnospondyli *(noun)*

Formerly a suborder of Stegocephalia; large Carboniferous and Permian amphibians having vertebrae in which some elements remain separate.

- *The article explained what "order temnospondyli" means with a simple example.*
- *In class, the teacher used "order temnospondyli" to mean formerly a suborder of stegocephalia; large....*

order testudinata *(noun)*

Tortoises and turtles.

- *He looked up "order testudinata" because he had never seen it before.*
- *In class, the teacher used "order testudinata" to mean tortoises and turtles.*

order testudines *(noun)*

Tortoises and turtles.

- *In class, the teacher used "order testudines" to mean tortoises and turtles.*
- *They discussed "order testudines" during the group presentation.*

order tetraodontiformes *(noun)*

Boxfishes; filefishes; globefishes; ocean sunfishes; triggerfishes; puffers.

- *The article explained what "order tetraodontiformes" means with a simple example.*
- *In class, the teacher used "order tetraodontiformes" to mean boxfishes; filefishes; globefishes; ocean....*

order therapsida *(noun)*

Extinct mammal-like reptiles found inhabiting all continents from the mid Permian to late Triassic.

- *She wrote a short paragraph that included "order therapsida."*
- *He looked up "order therapsida" because he had never seen it before.*

order thymelaeales *(noun)*

Myrtaceae; Combretaceae; Elaeagnaceae; Haloragidaceae; Melastomaceae; Lecythidaceae; Lythraceae; Rhizophoraceae; Onagraceae; Lecythidaceae; Punicaceae.

- *Understanding "order thymelaeales" helps you talk about this topic clearly.*
- *In class, the teacher used "order thymelaeales" to mean myrtaceae; combretaceae; elaeagnaceae;....*

---

order thysanura *(noun)*

Firebrats; silverfish; machilids.

- *The article explained what "order thysanura" means with a simple example.*
- *Understanding "order thysanura" helps you talk about this topic clearly.*

---

order tinamiformes *(noun)*

Coextensive with the family Tinamidae.

- *In class, the teacher used "order tinamiformes" to mean coextensive with the family tinamidae.*
- *The article explained what "order tinamiformes" means with a simple example.*

---

order torpediniformes *(noun)*

Rays with bodies shaped like torpedoes.

- *Understanding "order torpediniformes" helps you talk about this topic clearly.*
- *The article explained what "order torpediniformes" means with a simple example.*

---

order tremellales *(noun)*

Fungi varying from gelatinous to waxy or even horny in texture; most are saprophytic.

- *He looked up "order tremellales" because he had never seen it before.*
- *She wrote a short paragraph that included "order tremellales."*

---

order tuberales *(noun)*

Small order of fungi belonging to the subdivision Ascomycota having closed underground ascocarps.

- *The article explained what "order tuberales" means with a simple example.*
- *In class, the teacher used "order tuberales" to mean small order of fungi belonging to the subdivision....*

---

order tubulidentata *(noun)*

An order of Eutheria.

- *Understanding "order tubulidentata" helps you talk about this topic clearly.*
- *In class, the teacher used "order tubulidentata" to mean an order of eutheria.*

---

order tulostomatales *(noun)*

An order of fungi belonging to the class Gasteromycetes.

- *The article explained what "order tulostomatales" means with a simple example.*
- *In class, the teacher used "order tulostomatales" to mean an order of fungi belonging to the class gasteromycetes.*

---

order ulvales *(noun)*

An order of protoctist.

- *He looked up "order ulvales" because he had never seen it before.*
- *They discussed "order ulvales" during the group presentation.*

---

order umbellales *(noun)*

Plants having umbels or corymbs of uniovulate flowers; includes the Umbelliferae (chiefly herbs) and Cornaceae (chiefly trees or shrubs).

- *Understanding "order umbellales" helps you talk about this topic clearly.*
- *He looked up "order umbellales" because he had never seen it before.*

---

order uredinales *(noun)*

Rust fungi: parasitic fungi causing rust in plants; sometimes placed in.

- *Understanding "order uredinales" helps you talk about this topic clearly.*
- *In class, the teacher used "order uredinales" to mean rust fungi: parasitic fungi causing rust in plants;....*

---

order urodella *(noun)*

Salamanders; newts; congo snakes.

- *In class, the teacher used "order urodella" to mean salamanders; newts; congo snakes.*
- *They discussed "order urodella" during the group presentation.*

order uropygi *(noun)*

Whip scorpions.

- *They discussed "order uropygi" during the group presentation.*
- *The article explained what "order uropygi" means with a simple example.*

order urticales *(noun)*

An order of dicotyledonous plants including Moraceae and Urticaceae and Ulmaceae.

- *Understanding "order urticales" helps you talk about this topic clearly.*
- *He looked up "order urticales" because he had never seen it before.*

order ustilaginales *(noun)*

Parasitic fungi causing smuts; sometimes placed in class Tiliomycetes.

- *She wrote a short paragraph that included "order ustilaginales."*
- *They discussed "order ustilaginales" during the group presentation.*

order volvocales *(noun)*

Chiefly freshwater green algae; solitary or colonial.

- *Understanding "order volvocales" helps you talk about this topic clearly.*
- *The article explained what "order volvocales" means with a simple example.*

order xiphosura *(noun)*

Horseshoe crabs and extinct forms.

- *She wrote a short paragraph that included "order xiphosura."*
- *The article explained what "order xiphosura" means with a simple example.*

order xyridales *(noun)*

An order of monocotyledonous herbs.

- *They discussed "order xyridales" during the group presentation.*
- *In class, the teacher used "order xyridales" to mean an order of monocotyledonous herbs.*

order zygnemales *(noun)*

Pond scums; desmids.

- *The article explained what "order zygnemales" means with a simple example.*
- *In class, the teacher used "order zygnemales" to mean pond scums; desmids.*

order zygnematales *(noun)*

Pond scums; desmids.

- *In class, the teacher used "order zygnematales" to mean pond scums; desmids.*
- *He looked up "order zygnematales" because he had never seen it before.*

order-chenopodiales *(noun)*

Corresponds approximately to the older group Centrospermae.

- *The article explained what "order-chenopodiales" means with a simple example.*
- *In class, the teacher used "order-chenopodiales" to mean corresponds approximately to the older group....*

ordinand *(noun)*

A person being ordained.

- *She wrote a short paragraph that included "ordinand."*
- *The article explained what "ordinand" means with a simple example.*

oreamnos *(noun)*

Mountain goats.

- *He looked up "oreamnos" because he had never seen it before.*
- *She wrote a short paragraph that included "oreamnos."*

oreamnos americanus *(noun)*

Sure-footed mammal of mountainous northwestern North America.

- *Understanding "oreamnos americanus" helps you talk about this topic clearly.*
- *He looked up "oreamnos americanus" because he had never seen it before.*

---

orectolobidae *(noun)*

Nurse sharks and carpet sharks.

- *He looked up "orectolobidae" because he had never seen it before.*
- *In class, the teacher used "orectolobidae" to mean nurse sharks and carpet sharks.*

---

orectolobus *(noun)*

Carpet sharks.

- *She wrote a short paragraph that included "orectolobus."*
- *Understanding "orectolobus" helps you talk about this topic clearly.*

---

orectolobus barbatus *(noun)*

Shark of the western Pacific with flattened body and mottled skin.

- *The article explained what "orectolobus barbatus" means with a simple example.*
- *They discussed "orectolobus barbatus" during the group presentation.*

---

oreide *(noun)*

Alloy of copper and tin and zinc; used in imitation gold jewelry.

- *Understanding "oreide" helps you talk about this topic clearly.*
- *They discussed "oreide" during the group presentation.*

---

oreopteris *(noun)*

3 species of ferns formerly included in genus Dryopteris or Thelypteris.

- *Understanding "oreopteris" helps you talk about this topic clearly.*
- *In class, the teacher used "oreopteris" to mean 3 species of ferns formerly included in genus....*

---

oreopteris limbosperma *(noun)*

Common European mountain fern having fragrant lemon or balsam scented fronds.

- *She wrote a short paragraph that included "oreopteris limbosperma."*
- *Understanding "oreopteris limbosperma" helps you talk about this topic clearly.*

---

oreortyx *(noun)*

Mountain quail of western United States.

- *Understanding "oreortyx" helps you talk about this topic clearly.*
- *The article explained what "oreortyx" means with a simple example.*

---

oreortyx picta palmeri *(noun)*

California partridge; slightly larger than the California quail.

- *The article explained what "oreortyx picta palmeri" means with a simple example.*
- *She wrote a short paragraph that included "oreortyx picta palmeri."*

---

organdie *(noun)*

A sheer stiff muslin.

- *She wrote a short paragraph that included "organdie."*
- *Understanding "organdie" helps you talk about this topic clearly.*

---

organicistic *(adjective)*

Relating to or tending toward organicism.

- *Her writing became clearer after she learned "organicistic."*
- *A "organicistic" approach may work better in this case.*

---

organification *(noun)*

The process of organ formation.

- *The article explained what "organification" means with a simple example.*

- *They discussed "organification" during the group presentation.*

orientalise *(verb)*

Make oriental in character.

- *Can you use "orientalise" in a sentence that fits this situation?*
- *The coach explained when to use "orientalise" and when to wait.*

orientalize *(verb)*

Make oriental in character.

- *Orientalize your garden.*
- *She tried to use "orientalize" carefully so everyone would understand.*

origanum dictamnus *(noun)*

Dwarf aromatic shrub of Crete.

- *In class, the teacher used "origanum dictamnus" to mean dwarf aromatic shrub of crete.*
- *The article explained what "origanum dictamnus" means with a simple example.*

orinase *(noun)*

Sulfonylurea; an oral antidiabetic drug (trade name Orinase) used in the treatment of adult-onset diabetes mellitus.

- *The article explained what "orinase" means with a simple example.*
- *Understanding "orinase" helps you talk about this topic clearly.*

oriolidae *(noun)*

Old World orioles.

- *He looked up "oriolidae" because he had never seen it before.*
- *In class, the teacher used "oriolidae" to mean old world orioles.*

oriolus *(noun)*

Type genus of the Oriolidae.

- *She wrote a short paragraph that included "oriolus."*
- *Understanding "oriolus" helps you talk about this topic clearly.*

oriolus oriolus *(noun)*

Bright yellow songbird with black wings.

- *He looked up "oriolus oriolus" because he had never seen it before.*
- *Understanding "oriolus oriolus" helps you talk about this topic clearly.*

orites *(noun)*

Small genus of Australian shrubs or trees.

- *Understanding "orites" helps you talk about this topic clearly.*
- *They discussed "orites" during the group presentation.*

orites excelsa *(noun)*

Australian tree having alternate simple leaves (when young they are pinnate with prickly toothed margins) and slender axillary spikes of white flowers.

- *She wrote a short paragraph that included "orites excelsa."*
- *He looked up "orites excelsa" because he had never seen it before.*

orleanais *(noun)*

A former province of north central France; centered around Orleans.

- *He looked up "orleanais" because he had never seen it before.*
- *She wrote a short paragraph that included "orleanais."*

orleanist *(noun)*

A supporter of the Orleans branch of the Bourbons that was descended from a younger brother of Louis XIV.

- *They discussed "orleanist" during the group presentation.*
- *Understanding "orleanist" helps you talk about this topic clearly.*

ormazd *(noun)*

Chief deity of Zoroastrianism; source of light and embodiment of good.

- *They discussed "ormazd" during the group presentation.*
- *In class, the teacher used "ormazd" to mean chief deity of zoroastrianism; source of light and....*

---

ormosia *(noun)*

Genus of tropical shrubs and trees having usually odd-pinnate leaves with large leaflets and pink to reddish wood.

- *In class, the teacher used "ormosia" to mean genus of tropical shrubs and trees having usually....*
- *He looked up "ormosia" because he had never seen it before.*

---

ormosia coarctata *(noun)*

West Indian tree similar to Ormosia monosperma but larger and having smaller leaflets and smaller seeds.

- *In class, the teacher used "ormosia coarctata" to mean west indian tree similar to ormosia monosperma but....*
- *Understanding "ormosia coarctata" helps you talk about this topic clearly.*

---

ormosia monosperma *(noun)*

Small tree of West Indies and northeastern Venezuela having large oblong pointed leaflets and panicles of purple flowers; seeds are black or scarlet with black spots.

- *They discussed "ormosia monosperma" during the group presentation.*
- *In class, the teacher used "ormosia monosperma" to mean small tree of west indies and northeastern....*

---

ormuzd *(noun)*

Chief deity of Zoroastrianism; source of light and embodiment of good.

- *She wrote a short paragraph that included "ormuzd."*
- *He looked up "ormuzd" because he had never seen it before.*

---

orneriness *(noun)*

Meanspirited disagreeable contrariness.

- *He looked up "orneriness" because he had never seen it before.*
- *They discussed "orneriness" during the group presentation.*

---

ornithogalum *(noun)*

Sometimes placed in family Hyacinthaceae.

- *The article explained what "ornithogalum" means with a simple example.*
- *They discussed "ornithogalum" during the group presentation.*

---

ornithogalum pyrenaicum *(noun)*

Old World star of Bethlehem having edible young shoots.

- *He looked up "ornithogalum pyrenaicum" because he had never seen it before.*
- *In class, the teacher used "ornithogalum pyrenaicum" to mean old world star of bethlehem having edible young shoots.*

---

ornithogalum thyrsoides *(noun)*

South African perennial with long-lasting spikes of white blossoms that are shipped in to Europe and America for use as winter cut flowers.

- *The article explained what "ornithogalum thyrsoides" means with a simple example.*
- *In class, the teacher used "ornithogalum thyrsoides" to mean south african perennial with long-lasting spikes of....*

---

ornithogalum umbellatum *(noun)*

Common Old World herb having grasslike leaves and clusters of star-shaped white flowers with green stripes; naturalized in the eastern United States.

- *They discussed "ornithogalum umbellatum" during the group presentation.*
- *Understanding "ornithogalum umbellatum" helps you talk about this topic clearly.*

---

ornithomimid *(noun)*

Lightly built medium-sized dinosaur having extremely long limbs and necks with small heads and big brains and large eyes.

- *The article explained what "ornithomimid" means with a simple example.*
- *In class, the teacher used "ornithomimid" to mean lightly built medium-sized dinosaur having....*

---

ornithomimida *(noun)*

Lightly built medium-size theropods.

- *He looked up "ornithomimida" because he had never seen it before.*
- *They discussed "ornithomimida" during the group presentation.*

---

ornithopod *(noun)*

Bipedal herbivorous dinosaur.

- *Understanding "ornithopod" helps you talk about this topic clearly.*
- *He looked up "ornithopod" because he had never seen it before.*

---

ornithopod dinosaur *(noun)*

Bipedal herbivorous dinosaur.

- *The article explained what "ornithopod dinosaur" means with a simple example.*
- *They discussed "ornithopod dinosaur" during the group presentation.*

---

ornithopoda *(noun)*

Widespread group including duck-billed dinosaurs and their early relatives (hadrosaurs, trachodon and iguanodon).

- *The article explained what "ornithopoda" means with a simple example.*
- *In class, the teacher used "ornithopoda" to mean widespread group including duck-billed dinosaurs....*

---

ornithorhynchus anatinus *(noun)*

Small densely furred aquatic monotreme of Australia and Tasmania having a broad bill and tail and webbed feet; only species in the family Ornithorhynchidae.

- *He looked up "ornithorhynchus anatinus" because he had never seen it before.*
- *Understanding "ornithorhynchus anatinus" helps you talk about this topic clearly.*

---

orobanchaceae *(noun)*

Brown or yellow leafless herbs; sometimes placed in the order Scrophulariales.

- *She wrote a short paragraph that included "orobanchaceae."*
- *They discussed "orobanchaceae" during the group presentation.*

---

oroide *(noun)*

Alloy of copper and tin and zinc; used in imitation gold jewelry.

- *In class, the teacher used "oroide" to mean alloy of copper and tin and zinc; used in imitation....*
- *He looked up "oroide" because he had never seen it before.*

---

orontium *(noun)*

One species of aquatic plant: golden club.

- *They discussed "orontium" during the group presentation.*
- *In class, the teacher used "orontium" to mean one species of aquatic plant: golden club.*

---

orontium aquaticum *(noun)*

Aquatic plant of the southeastern United States having blue-green leaves and a spadix resembling a club covered with tiny yellow flowers.

- *They discussed "orontium aquaticum" during the group presentation.*
- *The article explained what "orontium aquaticum" means with a simple example.*

---

orphenadrine *(noun)*

A skeletal muscle relaxant (trade name Norflex) used to treat severe muscle strain and Parkinsonism.

- *She wrote a short paragraph that included "orphenadrine."*
- *They discussed "orphenadrine" during the group presentation.*

---

orphrey *(noun)*

A richly embroidered edging on an ecclesiastical vestment.

- *The article explained what "orphrey" means with a simple example.*
- *She wrote a short paragraph that included "orphrey."*

---

orpin *(noun)*

Perennial northern temperate plant with toothed leaves and heads of small purplish-white flowers.

- *In class, the teacher used "orpin" to mean perennial northern temperate plant with toothed....*
- *He looked up "orpin" because he had never seen it before.*

orpine *(noun)*

Perennial northern temperate plant with toothed leaves and heads of small purplish-white flowers.

- *They discussed "orpine" during the group presentation.*
- *In class, the teacher used "orpine" to mean perennial northern temperate plant with toothed....*

orrisroot *(noun)*

Fragrant rootstock of various irises especially Florentine iris; used in perfumes and medicines.

- *The article explained what "orrisroot" means with a simple example.*
- *In class, the teacher used "orrisroot" to mean fragrant rootstock of various irises especially....*

ortalis *(noun)*

Chachalacas.

- *He looked up "ortalis" because he had never seen it before.*
- *They discussed "ortalis" during the group presentation.*

orthilia *(noun)*

A shrubby perennial rhizomatous evergreen herb; grows in damp coniferous woodlands in northern temperate regions.

- *Understanding "orthilia" helps you talk about this topic clearly.*
- *In class, the teacher used "orthilia" to mean a shrubby perennial rhizomatous evergreen herb;....*

orthoboric acid *(noun)*

A white or colorless slightly acid solid that is soluble in water and ethanol; used in the manufacture of glass and paper and adhesives and in detergents and as a flux in welding; also used as an antiseptic and food preservative.

- *He looked up "orthoboric acid" because he had never seen it before.*
- *They discussed "orthoboric acid" during the group presentation.*

orthoepist *(noun)*

A practitioner of orthoepy (especially one of the 17th or 18th century scholars who proposed to reform English spelling so it would reflect pronunciation more closely).

- *She wrote a short paragraph that included "orthoepist."*
- *He looked up "orthoepist" because he had never seen it before.*

orthomorphic projection *(noun)*

A map projection in which a small area is rendered in its true shape.

- *The article explained what "orthomorphic projection" means with a simple example.*
- *She wrote a short paragraph that included "orthomorphic projection."*

orthomyxovirus *(noun)*

A group of viruses including those causing influenza.

- *Understanding "orthomyxovirus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "orthomyxovirus."*

orthopaedist *(noun)*

A specialist in correcting deformities of the skeletal system (especially in children).

- *In class, the teacher used "orthopaedist" to mean a specialist in correcting deformities of the....*
- *He looked up "orthopaedist" because he had never seen it before.*

orthopedical *(adjective)*

Of or relating to orthopedics.

- *It is useful to describe something as "orthopedical" when it is of or relating to orthopedics.*
- *A "orthopedical" approach may work better in this case.*

orthophosphorous acid *(noun)*

A clear or yellow monobasic acid (H3PO2).

- *She wrote a short paragraph that included "orthophosphorous acid."*
- *He looked up "orthophosphorous acid" because he had never seen it before.*

orthopristis *(noun)*

A genus of Haemulidae.

- *In class, the teacher used "orthopristis" to mean a genus of haemulidae.*
- *They discussed "orthopristis" during the group presentation.*

orthopristis chrysopterus *(noun)*

Found from Long Island southward.

- *The article explained what "orthopristis chrysopterus" means with a simple example.*
- *In class, the teacher used "orthopristis chrysopterus" to mean found from long island southward.*

orthopter *(noun)*

Heavier-than-air craft that is propelled by the flapping of wings.

- *The article explained what "orthopter" means with a simple example.*
- *In class, the teacher used "orthopter" to mean heavier-than-air craft that is propelled by the....*

orthopteran *(noun)*

Any of various insects having leathery forewings and membranous hind wings and chewing mouthparts.

- *In class, the teacher used "orthopteran" to mean any of various insects having leathery forewings....*
- *The article explained what "orthopteran" means with a simple example.*

orthopteron *(noun)*

Any of various insects having leathery forewings and membranous hind wings and chewing mouthparts.

- *Understanding "orthopteron" helps you talk about this topic clearly.*
- *In class, the teacher used "orthopteron" to mean any of various insects having leathery forewings....*

orthopterous insect *(noun)*

Any of various insects having leathery forewings and membranous hind wings and chewing mouthparts.

- *He looked up "orthopterous insect" because he had never seen it before.*
- *She wrote a short paragraph that included "orthopterous insect."*

orthoptist *(noun)*

A specialist in orthoptics.

- *He looked up "orthoptist" because he had never seen it before.*
- *She wrote a short paragraph that included "orthoptist."*

orthoscope *(noun)*

An ophthalmoscope with a layer of water to neutralize the refraction of the cornea.

- *Understanding "orthoscope" helps you talk about this topic clearly.*
- *He looked up "orthoscope" because he had never seen it before.*

orthotomus *(noun)*

Tailorbirds.

- *Understanding "orthotomus" helps you talk about this topic clearly.*
- *He looked up "orthotomus" because he had never seen it before.*

orthotomus sutorius *(noun)*

Tropical Asian warbler that stitches leaves together to form and conceal its nest.

- *Understanding "orthotomus sutorius" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "orthotomus sutorius."*

orthotropous *(adjective)*

(of a plant ovule) completely straight with the micropyle at the apex.

- *Would you call this situation "orthotropous"? Explain why.*
- *A "orthotropous" approach may work better in this case.*

orthotropous ovule *(noun)*

A completely straight ovule with the micropyle at the apex.

- *She wrote a short paragraph that included "orthotropous ovule."*
- *They discussed "orthotropous ovule" during the group presentation.*

---

ortilis vetula macalli *(noun)*

Of Mexico and Texas.

- *He looked up "ortilis vetula macalli" because he had never seen it before.*
- *She wrote a short paragraph that included "ortilis vetula macalli."*

---

ortygan *(noun)*

Any of several East Indian birds.

- *He looked up "ortygan" because he had never seen it before.*
- *In class, the teacher used "ortygan" to mean any of several east indian birds.*

---

orudis *(noun)*

Nonsteroidal anti-inflammatory drug (trade names Orudis or Orudis KT or Oruvail).

- *Understanding "orudis" helps you talk about this topic clearly.*
- *They discussed "orudis" during the group presentation.*

---

orudis kt *(noun)*

Nonsteroidal anti-inflammatory drug (trade names Orudis or Orudis KT or Oruvail).

- *They discussed "orudis kt" during the group presentation.*
- *Understanding "orudis kt" helps you talk about this topic clearly.*

---

orumiyeh *(noun)*

A city on the western side of Lake Urmia in northwestern Iran.

- *In class, the teacher used "orumiyeh" to mean a city on the western side of lake urmia in....*
- *He looked up "orumiyeh" because he had never seen it before.*

---

oruvail *(noun)*

Nonsteroidal anti-inflammatory drug (trade names Orudis or Orudis KT or Oruvail).

- *Understanding "oruvail" helps you talk about this topic clearly.*
- *In class, the teacher used "oruvail" to mean nonsteroidal anti-inflammatory drug (trade names....*

---

orycteropus *(noun)*

Coextensive with the family Orycteropodidae.

- *She wrote a short paragraph that included "orycteropus."*
- *Understanding "orycteropus" helps you talk about this topic clearly.*

---

orycteropus afer *(noun)*

Nocturnal burrowing mammal of the grasslands of Africa that feeds on termites; sole extant representative of the order Tubulidentata.

- *The article explained what "orycteropus afer" means with a simple example.*
- *She wrote a short paragraph that included "orycteropus afer."*

---

oryzomys palustris *(noun)*

Hardy agile rat of grassy marshes of Mexico and the southeastern United States.

- *They discussed "oryzomys palustris" during the group presentation.*
- *The article explained what "oryzomys palustris" means with a simple example.*

---

oryzopsis hymenoides *(noun)*

Valuable forage grass of dry upland areas and plains of western North America to northern Mexico.

- *They discussed "oryzopsis hymenoides" during the group presentation.*
- *The article explained what "oryzopsis hymenoides" means with a simple example.*

---

oryzopsis miliacea *(noun)*

Perennial mountain rice native to Mediterranean region and introduced into North America.

- *She wrote a short paragraph that included "oryzopsis miliacea."*
- *They discussed "oryzopsis miliacea" during the group presentation.*

os capitatum *(noun)*

The wrist bone with a rounded head shape that articulates with the 3rd metacarpus.

- *Understanding "os capitatum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "os capitatum."*

os hamatum *(noun)*

The wrist bone in line with the 4th and 5th fingers.

- *They discussed "os hamatum" during the group presentation.*
- *Understanding "os hamatum" helps you talk about this topic clearly.*

os hyoideum *(noun)*

A U-shaped bone at the base of the tongue that supports the tongue muscles.

- *He looked up "os hyoideum" because he had never seen it before.*
- *They discussed "os hyoideum" during the group presentation.*

os ischii *(noun)*

One of the three sections of the hipbone; situated below the ilium.

- *The article explained what "os ischii" means with a simple example.*
- *In class, the teacher used "os ischii" to mean one of the three sections of the hipbone; situated....*

os lunatum *(noun)*

One of the eight small wrist bones.

- *In class, the teacher used "os lunatum" to mean one of the eight small wrist bones.*
- *He looked up "os lunatum" because he had never seen it before.*

os nasale *(noun)*

An elongated rectangular bone that forms the bridge of the nose.

- *He looked up "os nasale" because he had never seen it before.*
- *They discussed "os nasale" during the group presentation.*

os palatinum *(noun)*

Either of two irregularly shaped bones that form the back of the hard palate and helps to form the nasal cavity and the floor of the orbits.

- *They discussed "os palatinum" during the group presentation.*
- *She wrote a short paragraph that included "os palatinum."*

os pisiforme *(noun)*

A small wrist bone that articulates only with the triquetral.

- *Understanding "os pisiforme" helps you talk about this topic clearly.*
- *They discussed "os pisiforme" during the group presentation.*

os scaphoideum *(noun)*

The largest wrist bone on the thumb side.

- *In class, the teacher used "os scaphoideum" to mean the largest wrist bone on the thumb side.*
- *They discussed "os scaphoideum" during the group presentation.*

os sesamoideum *(noun)*

Any of several small round bones formed in a tendon where it passes over a joint.

- *He looked up "os sesamoideum" because he had never seen it before.*
- *She wrote a short paragraph that included "os sesamoideum."*

os sphenoidale *(noun)*

Butterfly-shaped bone at the base of the skull.

- *In class, the teacher used "os sphenoidale" to mean butterfly-shaped bone at the base of the skull.*
- *He looked up "os sphenoidale" because he had never seen it before.*

os tarsi fibulare *(noun)*

The largest tarsal bone; forms the human heel.

- *They discussed "os tarsi fibulare" during the group presentation.*
- *She wrote a short paragraph that included "os tarsi fibulare."*

---

os trapezoideum *(noun)*

The wrist bone between the trapezium and the capitate bones.

- *The article explained what "os trapezoideum" means with a simple example.*
- *Understanding "os trapezoideum" helps you talk about this topic clearly.*

---

os zygomaticum *(noun)*

The arch of bone beneath the eye that forms the prominence of the cheek.

- *The article explained what "os zygomaticum" means with a simple example.*
- *She wrote a short paragraph that included "os zygomaticum."*

---

oscar fingal o'flahertie wills wilde *(noun)*

Irish writer and wit (1854-1900).

- *She wrote a short paragraph that included "oscar fingal o'flahertie wills wilde."*
- *He looked up "oscar fingal o'flahertie wills wilde" because he had never seen it before.*

---

oscillatoriaceae *(noun)*

Blue green algae.

- *He looked up "oscillatoriaceae" because he had never seen it before.*
- *Understanding "oscillatoriaceae" helps you talk about this topic clearly.*

---

oscillogram *(noun)*

The recording produced by an oscillograph.

- *He looked up "oscillogram" because he had never seen it before.*
- *She wrote a short paragraph that included "oscillogram."*

---

oscillograph *(noun)*

A device for making a record of the wave forms of fluctuating voltages or currents.

- *The article explained what "oscillograph" means with a simple example.*
- *She wrote a short paragraph that included "oscillograph."*

---

oscine *(noun)*

Passerine bird having specialized vocal apparatus.

- *They discussed "oscine" during the group presentation.*
- *He looked up "oscine" because he had never seen it before.*

---

oscine bird *(noun)*

Passerine bird having specialized vocal apparatus.

- *He looked up "oscine bird" because he had never seen it before.*
- *She wrote a short paragraph that included "oscine bird."*

---

oscines *(noun)*

Two names for the suborder of typical songbirds.

- *In class, the teacher used "oscines" to mean two names for the suborder of typical songbirds.*
- *The article explained what "oscines" means with a simple example.*

---

oscitant *(adjective)*

Showing lack of attention or boredom.

- *A "oscitant" approach may work better in this case.*
- *Her writing became clearer after she learned "oscitant."*

---

Have at least three points in common with.

- *One curve osculates the other.*

- *These two surfaces osculate.*

---

osculator *(noun)*

Someone who kisses.

- *He looked up "osculator" because he had never seen it before.*
- *She wrote a short paragraph that included "osculator."*

---

osip emilevich mandelstam *(noun)*

Russian poet who died in a prison camp (1891-1938).

- *They discussed "osip emilevich mandelstam" during the group presentation.*
- *She wrote a short paragraph that included "osip emilevich mandelstam."*

---

osmerus *(noun)*

Type genus of the Osmeridae.

- *Understanding "osmerus" helps you talk about this topic clearly.*
- *They discussed "osmerus" during the group presentation.*

---

osmerus eperlanus *(noun)*

The common smelt of Europe.

- *She wrote a short paragraph that included "osmerus eperlanus."*
- *They discussed "osmerus eperlanus" during the group presentation.*

---

osmerus mordax *(noun)*

Important marine and landlocked food fish of eastern North America and Alaska.

- *She wrote a short paragraph that included "osmerus mordax."*
- *He looked up "osmerus mordax" because he had never seen it before.*

---

osmiridium *(noun)*

A hard and corrosion resistant mineral that is a natural alloy of osmium and iridium (usually containing small amounts of rhodium and platinum); used in needles and pen nibs etc.

- *He looked up "osmiridium" because he had never seen it before.*
- *She wrote a short paragraph that included "osmiridium."*

---

osmitrol *(noun)*

A diuretic (trade name Osmitrol) used to promote the excretion of urine.

- *She wrote a short paragraph that included "osmitrol."*
- *They discussed "osmitrol" during the group presentation.*

---

osmunda cinnamonea *(noun)*

New World fern having woolly cinnamon-colored spore-bearing fronds in early spring later surrounded by green fronds; the early uncurling fronds are edible.

- *He looked up "osmunda cinnamonea" because he had never seen it before.*
- *She wrote a short paragraph that included "osmunda cinnamonea."*

---

osmunda clatonia *(noun)*

North American fern having tall erect pinnate fronds and a few sporogenous pinnae at or near the center of the fertile fronds.

- *Understanding "osmunda clatonia" helps you talk about this topic clearly.*
- *He looked up "osmunda clatonia" because he had never seen it before.*

---

osmundaceae *(noun)*

Large family of ferns widely distributed in temperate and tropical areas.

- *They discussed "osmundaceae" during the group presentation.*
- *Understanding "osmundaceae" helps you talk about this topic clearly.*

---

ossicle *(noun)*

A small bone; especially one in the middle ear.

- *He looked up "ossicle" because he had never seen it before.*
- *Understanding "ossicle" helps you talk about this topic clearly.*

---

ossicular *(adjective)*

Pertaining to the ossicles in the middle ear.

- *The speaker chose "ossicular" because it captured the feeling precisely.*
- *It is useful to describe something as "ossicular" when it is pertaining to the ossicles in the middle ear.*

---

ossiculate *(adjective)*

Pertaining to the ossicles in the middle ear.

- *Students compared "ossiculate" with similar adjectives in the lesson.*
- *Would you call this situation "ossiculate"? Explain why.*

---

ossiculum *(noun)*

A small bone; especially one in the middle ear.

- *In class, the teacher used "ossiculum" to mean a small bone; especially one in the middle ear.*
- *The article explained what "ossiculum" means with a simple example.*

---

ossiferous *(adjective)*

Containing bones (especially fossil bones).

- *Ossiferous caves.*
- *Would you call this situation "ossiferous"? Explain why.*

---

ostariophysi *(noun)*

In some classifications considered a superorder comprising the Cypriniformes and the Siluriformes.

- *In class, the teacher used "ostariophysi" to mean in some classifications considered a superorder....*
- *The article explained what "ostariophysi" means with a simple example.*

---

osteal *(adjective)*

Composed of or containing bone.

- *It is useful to describe something as "osteal" when it is composed of or containing bone.*
- *A "osteal" approach may work better in this case.*

---

ostensorium *(noun)*

(Roman Catholic Church) a vessel (usually of gold or silver) in which the consecrated Host is exposed for adoration.

- *In class, the teacher used "ostensorium" to mean (roman catholic church) a vessel (usually of gold....*

Mature bone cell.

- *She wrote a short paragraph that included "osteocyte."*
- *Understanding "osteocyte" helps you talk about this topic clearly.*

---

osteoglossidae *(noun)*

A family of large fishes that live in freshwater; includes bandfish and bonytongues.

- *The article explained what "osteoglossidae" means with a simple example.*
- *In class, the teacher used "osteoglossidae" to mean a family of large fishes that live in freshwater;....*

---

osteoglossiformes *(noun)*

Teleost fish with bony tongues.

- *The article explained what "osteoglossiformes" means with a simple example.*
- *Understanding "osteoglossiformes" helps you talk about this topic clearly.*

---

osteologer *(noun)*

An anatomist who is skilled is osteology.

- *They discussed "osteologer" during the group presentation.*
- *He looked up "osteologer" because he had never seen it before.*

---

osteologist *(noun)*

An anatomist who is skilled is osteology.

- *In class, the teacher used "osteologist" to mean an anatomist who is skilled is osteology.*
- *He looked up "osteologist" because he had never seen it before.*

---

osteopathist *(noun)*

A therapist who manipulates the skeleton and muscles.

- *They discussed "osteopathist" during the group presentation.*
- *She wrote a short paragraph that included "osteopathist."*

---

osteophyte *(noun)*

Small abnormal bony outgrowth.

- *He looked up "osteophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "osteophyte."*

---

osteostracan *(noun)*

Extinct jawless fish of the Devonian with armored head.

- *In class, the teacher used "osteostracan" to mean extinct jawless fish of the devonian with armored head.*
- *He looked up "osteostracan" because he had never seen it before.*

---

osteostraci *(noun)*

Extinct group of armored fish-like vertebrates; taxonomy is not clear.

- *In class, the teacher used "osteostraci" to mean extinct group of armored fish-like vertebrates;....*
- *Understanding "osteostraci" helps you talk about this topic clearly.*

---

ostiole *(noun)*

A small pore especially one in the reproductive bodies of certain algae and fungi through which spores pass.

- *They discussed "ostiole" during the group presentation.*
- *Understanding "ostiole" helps you talk about this topic clearly.*

---

ostracoderm *(noun)*

Extinct fish-like jawless vertebrate having a heavily armored body; of the Paleozoic.

- *They discussed "ostracoderm" during the group presentation.*
- *Understanding "ostracoderm" helps you talk about this topic clearly.*

---

ostracodermi *(noun)*

Extinct group of armored jawless vertebrates; taxonomy is not clear.

- *Understanding "ostracodermi" helps you talk about this topic clearly.*
- *They discussed "ostracodermi" during the group presentation.*

---

ostrya carpinifolia *(noun)*

Medium-sized hop hornbeam of southern Europe and Asia Minor.

- *The article explained what "ostrya carpinifolia" means with a simple example.*
- *In class, the teacher used "ostrya carpinifolia" to mean medium-sized hop hornbeam of southern europe and....*

---

ostryopsis *(noun)*

Deciduous monoecious shrubs of China and Mongolia resembling trees of the genus Ostrya; sometimes placed in subfamily or family Carpinaceae.

- *She wrote a short paragraph that included "ostryopsis."*
- *He looked up "ostryopsis" because he had never seen it before.*

ostwald's theory of indicators *(noun)*

(chemistry) the theory that all indicators are either weak acids or weak bases in which the color of the ionized form is different from the color before dissociation.

- *He looked up "ostwald's theory of indicators" because he had never seen it before.*
- *She wrote a short paragraph that included "ostwald's theory of indicators."*

otaheite arrowroot *(noun)*

A starch obtained from the root of the pia.

- *In class, the teacher used "otaheite arrowroot" to mean a starch obtained from the root of the pia.*
- *Understanding "otaheite arrowroot" helps you talk about this topic clearly.*

otaheite arrowroot starch *(noun)*

A starch obtained from the root of the pia.

- *They discussed "otaheite arrowroot starch" during the group presentation.*
- *Understanding "otaheite arrowroot starch" helps you talk about this topic clearly.*

otaria *(noun)*

Type genus of the Otariidae.

- *He looked up "otaria" because he had never seen it before.*
- *She wrote a short paragraph that included "otaria."*

otaria byronia *(noun)*

Of the southern coast of South America.

- *In class, the teacher used "otaria byronia" to mean of the southern coast of south america.*
- *They discussed "otaria byronia" during the group presentation.*

otariidae *(noun)*

Eared seals: sea lions and fur seals.

- *He looked up "otariidae" because he had never seen it before.*
- *They discussed "otariidae" during the group presentation.*

otho of lagery *(noun)*

French pope from 1088 to 1099 whose sermons called for the First Crusade (1042-1099).

- *She wrote a short paragraph that included "otho of lagery."*
- *He looked up "otho of lagery" because he had never seen it before.*

othonna *(noun)*

A South African plant of the genus Othonna having smooth often fleshy leaves and heads of yellow flowers.

- *The article explained what "othonna" means with a simple example.*
- *In class, the teacher used "othonna" to mean a south african plant of the genus othonna having....*

otoganglion *(noun)*

An autonomic ganglion whose postganglionic fibers are distributed to the parotid gland.

- *The article explained what "otoganglion" means with a simple example.*
- *They discussed "otoganglion" during the group presentation.*

otologist *(noun)*

A physician who specializes in the ear and its diseases.

- *In class, the teacher used "otologist" to mean a physician who specializes in the ear and its diseases.*
- *The article explained what "otologist" means with a simple example.*

otorhinolaryngologist *(noun)*

A specialist in the disorders of the ear or nose or throat.

- *In class, the teacher used "otorhinolaryngologist" to mean a specialist in the disorders of the ear or nose or....*
- *The article explained what "otorhinolaryngologist" means with a simple example.*

otterhound *(noun)*

Hardy British hound having long pendulous ears and a thick coarse shaggy coat with an oily undercoat; bred for hunting otters.

- *Understanding "otterhound" helps you talk about this topic clearly.*
- *In class, the teacher used "otterhound" to mean hardy british hound having long pendulous ears and....*

---

ottorino respighi *(noun)*

Italian composer remembered for his symphonic poems (1879-1936).

- *The article explained what "ottorino respighi" means with a simple example.*
- *They discussed "ottorino respighi" during the group presentation.*

---

otus sunia *(noun)*

Asian scops owl.

- *The article explained what "otus sunia" means with a simple example.*
- *They discussed "otus sunia" during the group presentation.*

---

ouguiya *(noun)*

The basic unit of money in Mauritania.

- *The article explained what "ouguiya" means with a simple example.*
- *In class, the teacher used "ouguiya" to mean the basic unit of money in mauritania.*

---

ouranopithecus *(noun)*

A genus of Hominidae.

- *They discussed "ouranopithecus" during the group presentation.*
- *She wrote a short paragraph that included "ouranopithecus."*

---

ousel *(noun)*

Common black European thrush.

- *In class, the teacher used "ousel" to mean common black european thrush.*
- *He looked up "ousel" because he had never seen it before.*

---

outbalance *(verb)*

Weigh more heavily.

- *The coach explained when to use "outbalance" and when to wait.*
- *She tried to use "outbalance" carefully so everyone would understand.*

---

- *Learners should practice how to use "overweary" in real sentences.*
- *In everyday English, people use "overweary" when talking about this idea.*

---

ovibos *(noun)*

Consisting of the musk-ox.

- *He looked up "ovibos" because he had never seen it before.*
- *She wrote a short paragraph that included "ovibos."*

---

oviform *(adjective)*

Rounded like an egg.

- *Would you call this situation "oviform"? Explain why.*
- *It is useful to describe something as "oviform" when it is rounded like an egg.*

---

oviraptorid *(noun)*

Advanced carnivorous theropod.

- *The article explained what "oviraptorid" means with a simple example.*
- *Understanding "oviraptorid" helps you talk about this topic clearly.*

---

ovis musimon *(noun)*

Wild mountain sheep of Corsica and Sardinia.

- *The article explained what "ovis musimon" means with a simple example.*
- *She wrote a short paragraph that included "ovis musimon."*

---

ovis vignei *(noun)*

Bearded reddish sheep of southern Asia.

- *She wrote a short paragraph that included "ovis vignei."*
- *He looked up "ovis vignei" because he had never seen it before.*

---

ovocon *(noun)*

Trade name for an oral contraceptive containing estradiol and norethindrone.

- *In class, the teacher used "ovocon" to mean trade name for an oral contraceptive containing....*
- *Understanding "ovocon" helps you talk about this topic clearly.*

---

ovoflavin *(noun)*

A B vitamin that prevents skin lesions and weight loss.

- *Understanding "ovoflavin" helps you talk about this topic clearly.*
- *In class, the teacher used "ovoflavin" to mean a b vitamin that prevents skin lesions and weight loss.*

---

ovral *(noun)*

Trade name for an oral contraceptive containing estradiol and norgestrel.

- *Understanding "ovral" helps you talk about this topic clearly.*
- *The article explained what "ovral" means with a simple example.*

---

ovrette *(noun)*

Trade name for an oral contraceptive containing norgestrel.

- *The article explained what "ovrette" means with a simple example.*
- *She wrote a short paragraph that included "ovrette."*

---

ovulen *(noun)*

Trade name for an oral contraceptive containing mestranol and a progestin compound.

- *They discussed "ovulen" during the group presentation.*
- *The article explained what "ovulen" means with a simple example.*

---

owlclaws *(noun)*

Stout perennial herb of western United States having flower heads with drooping orange-yellow rays; causes spewing sickness in sheep.

- *In class, the teacher used "owlclaws" to mean stout perennial herb of western united states....*
- *The article explained what "owlclaws" means with a simple example.*

---

owlishly *(adverb)*

In an owlish manner.

- *The gentle-looking barrister peered owlishly around him.*
- *Using "owlishly" can make your explanation more exact.*

---

The elapsed time it takes for light (or radio signals) to travel between the Earth and a celestial object.

- *He looked up "owlt" because he had never seen it before.*
- *Understanding "owlt" helps you talk about this topic clearly.*

---

oxalacetate *(noun)*

A salt or ester of oxalacetic acid.

- *They discussed "oxalacetate" during the group presentation.*
- *In class, the teacher used "oxalacetate" to mean a salt or ester of oxalacetic acid.*

---

oxalacetic acid *(noun)*

An acid formed by oxidation of maleic acid (as in metabolism of fats and carbohydrates).

- *He looked up "oxalacetic acid" because he had never seen it before.*
- *They discussed "oxalacetic acid" during the group presentation.*

---

oxalidaceae *(noun)*

A family of widely distributed herbs of the order Geraniales; have compound leaves and pentamerous flowers.

- *Understanding "oxalidaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "oxalidaceae."*

---

oxalis caprina *(noun)*

Short-stemmed South African plant with bluish flowers.

- *In class, the teacher used "oxalis caprina" to mean short-stemmed south african plant with bluish flowers.*
- *He looked up "oxalis caprina" because he had never seen it before.*

---

oxalis cernua *(noun)*

South African bulbous wood sorrel with showy yellow flowers.

- *In class, the teacher used "oxalis cernua" to mean south african bulbous wood sorrel with showy yellow....*
- *The article explained what "oxalis cernua" means with a simple example.*

---

oxalis corniculata *(noun)*

Creeping much-branched mat-forming weed; cosmopolitan.

- *She wrote a short paragraph that included "oxalis corniculata."*
- *Understanding "oxalis corniculata" helps you talk about this topic clearly.*

---

oxalis pes-caprae *(noun)*

South African bulbous wood sorrel with showy yellow flowers.

- *She wrote a short paragraph that included "oxalis pes-caprae."*
- *Understanding "oxalis pes-caprae" helps you talk about this topic clearly.*

---

oxaloacetic acid *(noun)*

An acid formed by oxidation of maleic acid (as in metabolism of fats and carbohydrates).

- *She wrote a short paragraph that included "oxaloacetic acid."*
- *The article explained what "oxaloacetic acid" means with a simple example.*

---

oxandra *(noun)*

Genus of tropical trees.

- *They discussed "oxandra" during the group presentation.*
- *She wrote a short paragraph that included "oxandra."*

---

oxandra lanceolata *(noun)*

Source of most of the lancewood of commerce.

- *She wrote a short paragraph that included "oxandra lanceolata."*
- *He looked up "oxandra lanceolata" because he had never seen it before.*

oxaprozin *(noun)*

A nonsteroidal anti-inflammatory drug (trade name Daypro).

- *In class, the teacher used "oxaprozin" to mean a nonsteroidal anti-inflammatory drug (trade name....*
- *He looked up "oxaprozin" because he had never seen it before.*

oxeye *(noun)*

An oval or round dormer window.

- *Understanding "oxeye" helps you talk about this topic clearly.*
- *He looked up "oxeye" because he had never seen it before.*

oxeye daisy *(noun)*

Tall leafy-stemmed Eurasian perennial with white flowers; widely naturalized; often placed in genus Chrysanthemum.

- *Understanding "oxeye daisy" helps you talk about this topic clearly.*
- *He looked up "oxeye daisy" because he had never seen it before.*

oxheart *(noun)*

Large heart-shaped sweet cherry with soft flesh.

- *She wrote a short paragraph that included "oxheart."*
- *He looked up "oxheart" because he had never seen it before.*

oxheart cherry *(noun)*

Large heart-shaped sweet cherry with soft flesh.

- *Understanding "oxheart cherry" helps you talk about this topic clearly.*
- *The article explained what "oxheart cherry" means with a simple example.*

oxidate *(verb)*

Enter into a combination with oxygen or become converted into an oxide.

- *Learners should practice how to use "oxidate" in real sentences.*
- *She tried to use "oxidate" carefully so everyone would understand.*

oxidoreduction *(noun)*

A reversible chemical reaction in which one reaction is an oxidation and the reverse is a reduction.

- *Understanding "oxidoreduction" helps you talk about this topic clearly.*
- *In class, the teacher used "oxidoreduction" to mean a reversible chemical reaction in which one....*

oxlip *(noun)*

Eurasian primrose with yellow flowers clustered in a one-sided umbel.

- *He looked up "oxlip" because he had never seen it before.*
- *They discussed "oxlip" during the group presentation.*

oxtant *(noun)*

A unit of angular distance equal to half a quadrant.

- *He looked up "oxtant" because he had never seen it before.*
- *She wrote a short paragraph that included "oxtant."*

oxtongue *(noun)*

Widespread European weed with spiny tongue-shaped leaves and yellow flowers; naturalized in United States.

- *She wrote a short paragraph that included "oxtongue."*
- *They discussed "oxtongue" during the group presentation.*

oxyacid *(noun)*

Any acid that contains oxygen.

- *The article explained what "oxyacid" means with a simple example.*
- *Understanding "oxyacid" helps you talk about this topic clearly.*

oxybelis *(noun)*

Vine snakes.

- *The article explained what "oxybelis" means with a simple example.*
- *In class, the teacher used "oxybelis" to mean vine snakes.*

---

oxybenzene *(noun)*

A toxic white soluble crystalline acidic derivative of benzene; used in manufacturing and as a disinfectant and antiseptic; poisonous if taken internally.

- *The article explained what "oxybenzene" means with a simple example.*
- *They discussed "oxybenzene" during the group presentation.*

---

oxybutyric acid *(noun)*

Hydroxy derivative of butyric acid.

- *She wrote a short paragraph that included "oxybutyric acid."*
- *He looked up "oxybutyric acid" because he had never seen it before.*

---

oxydendrum arboreum *(noun)*

Deciduous shrubby tree of eastern North America having deeply fissured bark and sprays of small fragrant white flowers and sour-tasting leaves.

- *He looked up "oxydendrum arboreum" because he had never seen it before.*
- *They discussed "oxydendrum arboreum" during the group presentation.*

---

oxygenise *(verb)*

Impregnate, combine, or supply with oxygen.

- *In everyday English, people use "oxygenise" when talking about this idea.*
- *Can you use "oxygenise" in a sentence that fits this situation?*

---

oxygenize *(verb)*

Impregnate, combine, or supply with oxygen.

- *The coach explained when to use "oxygenize" and when to wait.*
- *She tried to use "oxygenize" carefully so everyone would understand.*

---

oxyhaemoglobin *(noun)*

The bright red hemoglobin that is a combination of hemoglobin and oxygen from the lungs.

- *The article explained what "oxyhaemoglobin" means with a simple example.*
- *In class, the teacher used "oxyhaemoglobin" to mean the bright red hemoglobin that is a combination of....*

---

oxylebius *(noun)*

A genus of Hexagrammidae.

- *In class, the teacher used "oxylebius" to mean a genus of hexagrammidae.*
- *The article explained what "oxylebius" means with a simple example.*

---

oxylebius pictus *(noun)*

Greenling with whitish body marked with black bands.

- *In class, the teacher used "oxylebius pictus" to mean greenling with whitish body marked with black bands.*
- *He looked up "oxylebius pictus" because he had never seen it before.*

---

oxyphenbutazone *(noun)*

An anti-inflammatory drug (trade name Tandearil) used to treat arthritis and bursitis.

- *She wrote a short paragraph that included "oxyphenbutazone."*
- *Understanding "oxyphenbutazone" helps you talk about this topic clearly.*

---

oxyphencyclimine *(noun)*

An anticholinergic drug (trade name Daricon) used in treating peptic ulcers.

- *Understanding "oxyphencyclimine" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "oxyphencyclimine."*

---

oxytropis *(noun)*

Large widely-distributed genus of evergreen shrubs or subshrubs having odd-pinnate leaves and racemose or spicate flowers each having a pea-like corolla with a clawed petal.

- *They discussed "oxytropis" during the group presentation.*

- *The article explained what "oxytropis" means with a simple example.*

oxytropis lambertii *(noun)*

Tufted locoweed of southwestern United States having purple or pink to white flowers.

- *In class, the teacher used "oxytropis lambertii" to mean tufted locoweed of southwestern united states....*
- *Understanding "oxytropis lambertii" helps you talk about this topic clearly.*

oxyura jamaicensis *(noun)*

Reddish-brown stiff-tailed duck of North America and northern South America.

- *They discussed "oxyura jamaicensis" during the group presentation.*
- *He looked up "oxyura jamaicensis" because he had never seen it before.*

oxyuranus scutellatus *(noun)*

Large highly venomous snake of northeastern Australia.

- *She wrote a short paragraph that included "oxyuranus scutellatus."*
- *He looked up "oxyuranus scutellatus" because he had never seen it before.*

oysterfish *(noun)*

A variety of toadfish.

- *In class, the teacher used "oysterfish" to mean a variety of toadfish.*
- *The article explained what "oysterfish" means with a simple example.*

ozark chinkapin *(noun)*

Shrubby tree closely related to the Allegheny chinkapin but with larger leaves; southern midwestern United States.

- *Understanding "ozark chinkapin" helps you talk about this topic clearly.*
- *They discussed "ozark chinkapin" during the group presentation.*

ozark sundrops *(noun)*

Evening-opening primrose of south central United States.

- *She wrote a short paragraph that included "ozark sundrops."*
- *The article explained what "ozark sundrops" means with a simple example.*

ozocerite *(noun)*

A waxy mineral that is a mixture of hydrocarbons and occurs in association with petroleum; some varieties are used in making ceresin and candles.

- *Understanding "ozocerite" helps you talk about this topic clearly.*
- *In class, the teacher used "ozocerite" to mean a waxy mineral that is a mixture of hydrocarbons....*

ozokerite *(noun)*

A waxy mineral that is a mixture of hydrocarbons and occurs in association with petroleum; some varieties are used in making ceresin and candles.

- *He looked up "ozokerite" because he had never seen it before.*
- *She wrote a short paragraph that included "ozokerite."*

ozonide *(noun)*

Any of a class of unstable chemical compounds resulting from the addition of ozone to a double bond in an unsaturated compound.

- *He looked up "ozonide" because he had never seen it before.*
- *She wrote a short paragraph that included "ozonide."*

ozonise *(verb)*

Convert (oxygen) into ozone.

- *Can you use "ozonise" in a sentence that fits this situation?*
- *The coach explained when to use "ozonise" and when to wait.*

ozonium *(noun)*

Form genus of imperfect fungi.

- *They discussed "ozonium" during the group presentation.*
- *The article explained what "ozonium" means with a simple example.*

ozonize *(verb)*

Convert (oxygen) into ozone.

- *She tried to use "ozonize" carefully so everyone would understand.*
- *He did not know how to use "ozonize" until he saw an example.*

---

ozonosphere *(noun)*

A layer in the stratosphere (at approximately 20 miles) that contains a concentration of ozone sufficient to block most ultraviolet radiation from the sun.

- *In class, the teacher used "ozonosphere" to mean a layer in the stratosphere (at approximately 20....*
- *He looked up "ozonosphere" because he had never seen it before.*

---

ozothamnus *(noun)*

Genus of Australian shrubs and perennial herbs; sometimes included in genus Helichrysum.

- *Understanding "ozothamnus" helps you talk about this topic clearly.*
- *They discussed "ozothamnus" during the group presentation.*

---

ozothamnus secundiflorus *(noun)*

Shrub with white woolly branches and woolly leaves having fragrant flowers forming long sprays; flowers suitable for drying; sometimes placed in genus Helichrysum.

- *Understanding "ozothamnus secundiflorus" helps you talk about this topic clearly.*
- *The article explained what "ozothamnus secundiflorus" means with a simple example.*

---

pachouli *(noun)*

A heavy perfume made from the patchouli plant.

- *She wrote a short paragraph that included "pachouli."*
- *He looked up "pachouli" because he had never seen it before.*

---

pachycephala *(noun)*

Arboreal insectivorous birds.

- *The article explained what "pachycephala" means with a simple example.*
- *In class, the teacher used "pachycephala" to mean arboreal insectivorous birds.*

---

pachycephalosaur *(noun)*

Bipedal herbivore having 10 inches of bone atop its head; largest boneheaded dinosaur ever found.

- *He looked up "pachycephalosaur" because he had never seen it before.*
- *She wrote a short paragraph that included "pachycephalosaur."*

---

pachycephalosaurus *(noun)*

Bipedal herbivore having 10 inches of bone atop its head; largest boneheaded dinosaur ever found.

- *Understanding "pachycephalosaurus" helps you talk about this topic clearly.*
- *In class, the teacher used "pachycephalosaurus" to mean bipedal herbivore having 10 inches of bone atop its....*

---

pachydermal *(adjective)*

Of or relating to or characteristic of pachyderms.

- *Students compared "pachydermal" with similar adjectives in the lesson.*
- *It is useful to describe something as "pachydermal" when it is of or relating to or characteristic of pachyderms.*

---

pachydermatous *(adjective)*

Of or relating to or characteristic of pachyderms.

- *Her writing became clearer after she learned "pachydermatous."*
- *Students compared "pachydermatous" with similar adjectives in the lesson.*

---

pachydermic *(adjective)*

Of or relating to or characteristic of pachyderms.

- *The speaker chose "pachydermic" because it captured the feeling precisely.*
- *It is useful to describe something as "pachydermic" when it is of or relating to or characteristic of pachyderms.*

---

pachydermous *(adjective)*

Of or relating to or characteristic of pachyderms.

- *Students compared "pachydermous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "pachydermous."*

---

pachyrhizus *(noun)*

Small genus of tropical vines having tuberous roots.

- *He looked up "pachyrhizus" because he had never seen it before.*
- *She wrote a short paragraph that included "pachyrhizus."*

---

pachyrhizus erosus *(noun)*

Central American twining plant with edible roots and pods; large tubers are eaten raw or cooked especially when young and young pods must be thoroughly cooked; pods and seeds also yield rotenone and oils.

- *She wrote a short paragraph that included "pachyrhizus erosus."*
- *He looked up "pachyrhizus erosus" because he had never seen it before.*

---

pachyrhizus tuberosus *(noun)*

Twining plant of Amazon basin having large edible roots.

- *Understanding "pachyrhizus tuberosus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pachyrhizus tuberosus."*

---

pachysandra *(noun)*

Any plant of the genus Pachysandra; low-growing evergreen herbs or subshrubs having dentate leaves and used as ground cover.

- *Understanding "pachysandra" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pachysandra."*

---

pachysandra procumbens *(noun)*

Low semi-evergreen perennial herb having small spikes of white or pinkish flowers; native to southern United States but grown elsewhere.

- *He looked up "pachysandra procumbens" because he had never seen it before.*
- *Understanding "pachysandra procumbens" helps you talk about this topic clearly.*

---

pachysandra terminalis *(noun)*

Slow-growing Japanese evergreen subshrub having terminal spikes of white flowers; grown as a ground cover.

- *He looked up "pachysandra terminalis" because he had never seen it before.*
- *She wrote a short paragraph that included "pachysandra terminalis."*

---

pachytene *(noun)*

The third stage of the prophase of meiosis.

- *She wrote a short paragraph that included "pachytene."*
- *Understanding "pachytene" helps you talk about this topic clearly.*

---

pacific tripletail *(noun)*

Tripletail found in the Pacific.

- *The article explained what "pacific tripletail" means with a simple example.*
- *Understanding "pacific tripletail" helps you talk about this topic clearly.*

---

pacificist *(noun)*

Someone opposed to violence as a means of settling disputes.

- *They discussed "pacificist" during the group presentation.*
- *The article explained what "pacificist" means with a simple example.*

---

pacifistically *(adverb)*

In a pacifistic manner.

- *The pacifistically inclined liberals.*
- *Try rewriting the sentence and include "pacifistically" naturally.*

---

pacinian corpuscle *(noun)*

A specialized bulblike nerve ending located in the subcutaneous tissue of the skin; occurs abundantly in the skin of palms and soles and joints and genitals.

- *She wrote a short paragraph that included "pacinian corpuscle."*
- *He looked up "pacinian corpuscle" because he had never seen it before.*

packera *(noun)*

Genus of American of east Asian perennial herbs with yellow to orange or red flower rays; sometimes included in genus Senecio.

- *She wrote a short paragraph that included "packera."*
- *The article explained what "packera" means with a simple example.*

packera aurea *(noun)*

Weedy herb of the eastern United States to Texas having golden-yellow flowers; sometimes becomes invasive; sometimes placed in genus Senecio.

- *She wrote a short paragraph that included "packera aurea."*
- *He looked up "packera aurea" because he had never seen it before.*

packsack *(noun)*

A bag carried by a strap on your back or shoulder.

- *They discussed "packsack" during the group presentation.*
- *In class, the teacher used "packsack" to mean a bag carried by a strap on your back or shoulder.*

packsaddle *(noun)*

A saddle for pack animals to which loads can be attached.

- *He looked up "packsaddle" because he had never seen it before.*
- *They discussed "packsaddle" during the group presentation.*

packthread *(noun)*

A strong three-ply twine used to sew or tie packages.

- *The article explained what "packthread" means with a simple example.*
- *She wrote a short paragraph that included "packthread."*

padda *(noun)*

A genus of Ploceidae.

- *Understanding "padda" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "padda."*

padda oryzivora *(noun)*

Small finch-like Indonesian weaverbird that frequents rice fields.

- *The article explained what "padda oryzivora" means with a simple example.*
- *In class, the teacher used "padda oryzivora" to mean small finch-like indonesian weaverbird that....*

paddymelon *(noun)*

Small reddish-brown wallabies of scrubby areas of Australia and New Guinea.

- *She wrote a short paragraph that included "paddymelon."*
- *They discussed "paddymelon" during the group presentation.*

pademelon *(noun)*

Small reddish-brown wallabies of scrubby areas of Australia and New Guinea.

- *She wrote a short paragraph that included "pademelon."*
- *They discussed "pademelon" during the group presentation.*

padouk *(noun)*

Tree native to southeastern Asia having reddish wood with a mottled or striped black grain.

- *Understanding "padouk" helps you talk about this topic clearly.*
- *He looked up "padouk" because he had never seen it before.*

paederast *(noun)*

A man who has sex (usually sodomy) with a boy as the passive partner.

- *They discussed "paederast" during the group presentation.*
- *In class, the teacher used "paederast" to mean a man who has sex (usually sodomy) with a boy as....*

paederastic *(adjective)*

Of homosexuality between a man and a boy.

- *A "paederastic" approach may work better in this case.*
- *Would you call this situation "paederastic"? Explain why.*

---

Perennial rhizomatous herbs and shrubs; of temperate Europe and North America.

- *The article explained what "paeoniaceae" means with a simple example.*
- *In class, the teacher used "paeoniaceae" to mean perennial rhizomatous herbs and shrubs; of....*

---

paeony *(noun)*

Any of numerous plants widely cultivated for their showy single or double red or pink or white flowers.

- *He looked up "paeony" because he had never seen it before.*
- *In class, the teacher used "paeony" to mean any of numerous plants widely cultivated for their....*

---

paganise *(verb)*

Make pagan in character.

- *Learners should practice how to use "paganise" in real sentences.*
- *She tried to use "paganise" carefully so everyone would understand.*

---

paganize *(verb)*

Make pagan in character.

- *The Church paganized Christianity.*
- *Can you use "paganize" in a sentence that fits this situation?*

---

pagellus centrodontus *(noun)*

Food fish of European coastal waters.

- *They discussed "pagellus centrodontus" during the group presentation.*
- *In class, the teacher used "pagellus centrodontus" to mean food fish of european coastal waters.*

---

pagophila *(noun)*

A genus of Laridae.

- *She wrote a short paragraph that included "pagophila."*
- *They discussed "pagophila" during the group presentation.*

---

pagophila eburnea *(noun)*

White Arctic gull; migrates as far south as England and New Brunswick.

- *The article explained what "pagophila eburnea" means with a simple example.*
- *In class, the teacher used "pagophila eburnea" to mean white arctic gull; migrates as far south as england....*

---

pagophilus groenlandicus *(noun)*

Common Arctic seal; the young are all white.

- *He looked up "pagophilus groenlandicus" because he had never seen it before.*
- *They discussed "pagophilus groenlandicus" during the group presentation.*

---

pagrus *(noun)*

A genus of Sparidae.

- *He looked up "pagrus" because he had never seen it before.*
- *She wrote a short paragraph that included "pagrus."*

---

pagrus pagrus *(noun)*

Food fish of the Mediterranean and Atlantic coasts of Europe and America.

- *He looked up "pagrus pagrus" because he had never seen it before.*
- *She wrote a short paragraph that included "pagrus pagrus."*

---

paguridae *(noun)*

Hermit crabs.

- *He looked up "paguridae" because he had never seen it before.*
- *They discussed "paguridae" during the group presentation.*

pahautea *(noun)*

Evergreen tree of New Zealand resembling the kawaka.

- *She wrote a short paragraph that included "pahautea."*
- *Understanding "pahautea" helps you talk about this topic clearly.*

paigle *(noun)*

Eurasian primrose with yellow flowers clustered in a one-sided umbel.

- *Understanding "paigle" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "paigle."*

pailful *(noun)*

The quantity contained in a pail.

- *They discussed "pailful" during the group presentation.*
- *She wrote a short paragraph that included "pailful."*

paillasse *(noun)*

Mattress consisting of a thin pad filled with straw or sawdust.

- *He looked up "paillasse" because he had never seen it before.*
- *She wrote a short paragraph that included "paillasse."*

painstakingness *(noun)*

The trait of being painstaking and careful.

- *He looked up "painstakingness" because he had never seen it before.*
- *She wrote a short paragraph that included "painstakingness."*

painted greenling *(noun)*

Greenling with whitish body marked with black bands.

- *In class, the teacher used "painted greenling" to mean greenling with whitish body marked with black bands.*
- *They discussed "painted greenling" during the group presentation.*

pakchoi *(noun)*

Asiatic plant grown for its cluster of edible white stalks with dark green leaves.

- *The article explained what "pakchoi" means with a simple example.*
- *They discussed "pakchoi" during the group presentation.*

palaeencephalon *(noun)*

The more primitive parts of the brain phylogenetically; most structures other than the cerebral cortex.

- *Understanding "palaeencephalon" helps you talk about this topic clearly.*
- *The article explained what "palaeencephalon" means with a simple example.*

palankeen *(noun)*

A closed litter carried on the shoulders of four bearers.

- *She wrote a short paragraph that included "palankeen."*
- *He looked up "palankeen" because he had never seen it before.*

palaquium *(noun)*

Large genus of Malaysian trees with milky juice and leathery leaves.

- *The article explained what "palaquium" means with a simple example.*
- *They discussed "palaquium" during the group presentation.*

palaquium gutta *(noun)*

One of several East Indian trees yielding gutta-percha.

- *Understanding "palaquium gutta" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "palaquium gutta."*

palatableness *(noun)*

The property of being acceptable to the mouth.

- *She wrote a short paragraph that included "palatableness."*
- *He looked up "palatableness" because he had never seen it before.*

---

Produced with the front of the tongue near or touching the hard palate (as 'y') or with the blade of the tongue near the hard palate (as 'ch' in 'chin' or 'j' in 'gin').

- *Students compared "palatalised" with similar adjectives in the lesson.*
- *A "palatalised" approach may work better in this case.*

---

palatoglossal *(adjective)*

Relating to the palate and tongue.

- *It is useful to describe something as "palatoglossal" when it is relating to the palate and tongue.*
- *A "palatoglossal" approach may work better in this case.*

---

paleacrita *(noun)*

Geometrid moths.

- *Understanding "paleacrita" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "paleacrita."*

---

paleacrita vernata *(noun)*

Moth whose larvae are spring cankerworms.

- *She wrote a short paragraph that included "paleacrita vernata."*
- *Understanding "paleacrita vernata" helps you talk about this topic clearly.*

---

paleencephalon *(noun)*

The more primitive parts of the brain phylogenetically; most structures other than the cerebral cortex.

- *She wrote a short paragraph that included "paleencephalon."*
- *Understanding "paleencephalon" helps you talk about this topic clearly.*

---

paleoanthropological *(adjective)*

Of or concerned with the scientific study of human fossils.

- *A "paleoanthropological" approach may work better in this case.*
- *The speaker chose "paleoanthropological" because it captured the feeling precisely.*

---

paleocerebellum *(noun)*

The anterior lobe of the cerebellum which was one of the earliest parts of the hindbrain to develop in mammals.

- *She wrote a short paragraph that included "paleocerebellum."*
- *He looked up "paleocerebellum" because he had never seen it before.*

---

paleocortex *(noun)*

The olfactory cortex of the cerebrum.

- *Understanding "paleocortex" helps you talk about this topic clearly.*
- *In class, the teacher used "paleocortex" to mean the olfactory cortex of the cerebrum.*

---

paleocortical *(adjective)*

Of or relating to the olfactory cortex of the cerebrum.

- *Students compared "paleocortical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "paleocortical."*

---

paleoencephalon *(noun)*

The more primitive parts of the brain phylogenetically; most structures other than the cerebral cortex.

- *He looked up "paleoencephalon" because he had never seen it before.*

- *In class, the teacher used "paleoencephalon" to mean the more primitive parts of the brain....*

---

paleographer *(noun)*

An archeologist skilled in paleography.

- *Understanding "paleographer" helps you talk about this topic clearly.*
- *He looked up "paleographer" because he had never seen it before.*

---

paleographist *(noun)*

An archeologist skilled in paleography.

- *The article explained what "paleographist" means with a simple example.*
- *They discussed "paleographist" during the group presentation.*

---

paleolith *(noun)*

A stone tool from the Paleolithic age.

- *Understanding "paleolith" helps you talk about this topic clearly.*
- *They discussed "paleolith" during the group presentation.*

---

paleostriatum *(noun)*

The inner pale yellow part of the lenticular nucleus.

- *Understanding "paleostriatum" helps you talk about this topic clearly.*
- *The article explained what "paleostriatum" means with a simple example.*

---

palingenesis *(noun)*

Emergence during embryonic development of various characters or structures that appeared during the evolutionary history of the strain or species.

- *He looked up "palingenesis" because he had never seen it before.*
- *In class, the teacher used "palingenesis" to mean emergence during embryonic development of various....*

---

palingenetic *(adjective)*

Of or relating to palingenesis.

- *Her writing became clearer after she learned "palingenetic."*
- *The speaker chose "palingenetic" because it captured the feeling precisely.*

---

palinuridae *(noun)*

Spiny lobsters.

- *Understanding "palinuridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "palinuridae."*

---

palish *(adjective)*

Slightly pale.

- *A "palish" approach may work better in this case.*
- *Students compared "palish" with similar adjectives in the lesson.*

---

paliurus *(noun)*

Thorny Eurasian shrubs.

- *The article explained what "paliurus" means with a simple example.*
- *They discussed "paliurus" during the group presentation.*

---

paliurus spina-christi *(noun)*

Thorny Eurasian shrub with dry woody winged fruit.

- *The article explained what "paliurus spina-christi" means with a simple example.*
- *In class, the teacher used "paliurus spina-christi" to mean thorny eurasian shrub with dry woody winged fruit.*

---

pallas's cat *(noun)*

Small wildcat of the mountains of Siberia and Tibet and Mongolia.

- *She wrote a short paragraph that included "pallas's cat."*
- *He looked up "pallas's cat" because he had never seen it before.*

---

pallas's sandgrouse *(noun)*

Eurasiatic sandgrouse with a black patch on the belly.

- *He looked up "pallas's sandgrouse" because he had never seen it before.*
- *They discussed "pallas's sandgrouse" during the group presentation.*

pallasite *(noun)*

A meteorite composed principally of olivine and metallic iron.

- *They discussed "pallasite" during the group presentation.*
- *She wrote a short paragraph that included "pallasite."*

palliasse *(noun)*

Mattress consisting of a thin pad filled with straw or sawdust.

- *He looked up "palliasse" because he had never seen it before.*
- *She wrote a short paragraph that included "palliasse."*

pallidity *(noun)*

Being deficient in color.

- *In class, the teacher used "pallidity" to mean being deficient in color.*
- *He looked up "pallidity" because he had never seen it before.*

pallidly *(adverb)*

In a manner lacking interest or vitality.

- *Try rewriting the sentence and include "pallidly" naturally.*
- *The narrator describes the scene "pallidly" in the final chapter.*

(of a leaf shape) having rounded ends and a contracted center.

- *The speaker chose "panduriform" because it captured the feeling precisely.*
- *It is useful to describe something as "panduriform" when it is (of a leaf shape) having rounded ends and a....*

---

panduriform leaf *(noun)*

A fiddle-shaped leaf.

- *They discussed "panduriform leaf" during the group presentation.*
- *He looked up "panduriform leaf" because he had never seen it before.*

---

panegyrist *(noun)*

An orator who delivers eulogies or panegyrics.

- *Understanding "panegyrist" helps you talk about this topic clearly.*
- *He looked up "panegyrist" because he had never seen it before.*

---

panetela *(noun)*

A long slender cigar.

- *Understanding "panetela" helps you talk about this topic clearly.*

- *They discussed "panetela" during the group presentation.*

---

panetella *(noun)*

A long slender cigar.

- *Understanding "panetella" helps you talk about this topic clearly.*
- *In class, the teacher used "panetella" to mean a long slender cigar.*

---

panicled *(adjective)*

Having panicles; occurring in panicles.

- *A panicled inflorescence.*
- *Students compared "panicled" with similar adjectives in the lesson.*

---

panicled aster *(noun)*

A variety of aster.

- *The article explained what "panicled aster" means with a simple example.*
- *She wrote a short paragraph that included "panicled aster."*

---

panicum capillare *(noun)*

North American grass with slender brushy panicles; often a weed on cultivated land.

- *In class, the teacher used "panicum capillare" to mean north american grass with slender brushy panicles;....*
- *He looked up "panicum capillare" because he had never seen it before.*

---

panicum miliaceum *(noun)*

Extensively cultivated in Europe and Asia for its grain and in United States sometimes for forage.

- *The article explained what "panicum miliaceum" means with a simple example.*
- *In class, the teacher used "panicum miliaceum" to mean extensively cultivated in europe and asia for its....*

---

panicum texanum *(noun)*

Annual weedy grass used for hay.

- *The article explained what "panicum texanum" means with a simple example.*
- *In class, the teacher used "panicum texanum" to mean annual weedy grass used for hay.*

---

pannikin *(noun)*

A small pan or cup (usually of tin).

- *He looked up "pannikin" because he had never seen it before.*
- *They discussed "pannikin" during the group presentation.*

---

panonychus *(noun)*

A genus of Tetranychidae.

- *He looked up "panonychus" because he had never seen it before.*
- *They discussed "panonychus" during the group presentation.*

---

panonychus ulmi *(noun)*

Small web-spinning mite; a serious orchard pest.

- *She wrote a short paragraph that included "panonychus ulmi."*
- *The article explained what "panonychus ulmi" means with a simple example.*

---

- *He looked up "paola caliari" because he had never seen it before.*
- *In class, the teacher used "paola caliari" to mean italian painter of the venetian school (1528-1588).*

---

papaia *(noun)*

Tropical American shrub or small tree having huge deeply palmately cleft leaves and large oblong yellow fruit.

- *Understanding "papaia" helps you talk about this topic clearly.*
- *In class, the teacher used "papaia" to mean tropical american shrub or small tree having huge....*

---

papaver heterophyllum *(noun)*

California wild poppy with bright red flowers.

- *She wrote a short paragraph that included “papaver heterophyllum.”*
- *They discussed “papaver heterophyllum” during the group presentation.*

---

papaver nudicaule *(noun)*

Subarctic perennial poppy of both hemispheres having fragrant white or yellow to orange or peach flowers.

- *The article explained what “papaver nudicaule” means with a simple example.*
- *She wrote a short paragraph that included “papaver nudicaule.”*

---

papaver rhoeas *(noun)*

Annual European poppy common in grain fields and often cultivated.

- *The article explained what “papaver rhoeas” means with a simple example.*
- *They discussed “papaver rhoeas” during the group presentation.*

---

papaveraceae *(noun)*

Herbs or shrubs having milky and often colored juices and capsular fruits.

- *He looked up “papaveraceae” because he had never seen it before.*
- *They discussed “papaveraceae” during the group presentation.*

---

papaverales *(noun)*

An order of dicotyledonous plants.

- *Understanding “papaverales” helps you talk about this topic clearly.*
- *They discussed “papaverales” during the group presentation.*

---

paperbacked *(adjective)*

(of books) having a flexible binding.

- *Students compared “paperbacked” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “paperbacked.”*

---

paperer *(noun)*

One whose occupation is decorating walls with wallpaper.

- *She wrote a short paragraph that included “paperer.”*
- *Understanding “paperer” helps you talk about this topic clearly.*

---

paperknife *(noun)*

Dull knife used to cut open the envelopes in which letters are mailed or to slit uncut pages of books.

- *They discussed “paperknife” during the group presentation.*
- *He looked up “paperknife” because he had never seen it before.*

---

paperlike *(adjective)*

Of or like paper.

- *The speaker chose “paperlike” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “paperlike.”*

---

papilionaceae *(noun)*

Leguminous plants whose flowers have butterfly-shaped corollas; commonly included in the family Leguminosae.

- *They discussed “papilionaceae” during the group presentation.*
- *The article explained what “papilionaceae” means with a simple example.*

---

papilionoideae *(noun)*

Alternative name used in some classification systems for the family Papilionaceae.

- *They discussed “papilionoideae” during the group presentation.*
- *The article explained what “papilionoideae” means with a simple example.*

---

papilliform *(adjective)*

Shaped like a papilla.

- *Her writing became clearer after she learned “papilliform.”*
- *Students compared “papilliform” with similar adjectives in the lesson.*

papistic *(adjective)*

Of or relating to or supporting Romanism.

- *The speaker chose "papistic" because it captured the feeling precisely.*
- *It is useful to describe something as "papistic" when it is of or relating to or supporting romanism.*

papistical *(adjective)*

Of or relating to or supporting Romanism.

- *Students compared "papistical" with similar adjectives in the lesson.*
- *A "papistical" approach may work better in this case.*

papooseroot *(noun)*

Tall herb of eastern North America and Asia having blue berrylike fruit and a thick knotty rootstock formerly used medicinally.

- *They discussed "papooseroot" during the group presentation.*
- *He looked up "papooseroot" because he had never seen it before.*

papovavirus *(noun)*

Any of a group of animal viruses associated with or causing papillomas or polyomas.

- *He looked up "papovavirus" because he had never seen it before.*
- *They discussed "papovavirus" during the group presentation.*

pappoose *(noun)*

An American Indian infant.

- *She wrote a short paragraph that included "pappoose."*
- *Understanding "pappoose" helps you talk about this topic clearly.*

pappose *(adjective)*

(of plants such as dandelions and thistles) having pappi or tufts of featherlike hairs or delicate bristles.

- *Students compared "pappose" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "pappose."*

paprilus *(noun)*

A genus of Stromateidae.

- *He looked up "paprilus" because he had never seen it before.*
- *She wrote a short paragraph that included "paprilus."*

paprilus alepidotus *(noun)*

Butterfish up to a foot long of Atlantic waters from Chesapeake Bay to Argentina.

- *Understanding "paprilus alepidotus" helps you talk about this topic clearly.*
- *He looked up "paprilus alepidotus" because he had never seen it before.*

parabolical *(adjective)*

Resembling or expressed by parables.

- *It is useful to describe something as "parabolical" when it is resembling or expressed by parables.*
- *The speaker chose "parabolical" because it captured the feeling precisely.*

paraboloidal *(adjective)*

Having the shape of a paraboloid.

- *Students compared "paraboloidal" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "paraboloidal."*

paracheirodon *(noun)*

A genus of Characidae.

- *She wrote a short paragraph that included "paracheirodon."*
- *He looked up "paracheirodon" because he had never seen it before.*

paracheirodon axelrodi *(noun)*

Small bright red and blue aquarium fish from streams in Brazil and Colombia.

- *She wrote a short paragraph that included "paracheirodon axelrodi."*
- *He looked up "paracheirodon axelrodi" because he had never seen it before.*

---

parachuter *(noun)*

A person who jumps from aircraft using a parachute.

- *The article explained what "parachuter" means with a simple example.*
- *In class, the teacher used "parachuter" to mean a person who jumps from aircraft using a parachute.*

---

parader *(noun)*

Walks with regular or stately step.

- *The article explained what "parader" means with a simple example.*
- *They discussed "parader" during the group presentation.*

---

paradisaeidae *(noun)*

Birds of paradise.

- *The article explained what "paradisaeidae" means with a simple example.*
- *In class, the teacher used "paradisaeidae" to mean birds of paradise.*

---

paradisaic *(adjective)*

Relating to or befitting Paradise.

- *The speaker chose "paradisaic" because it captured the feeling precisely.*
- *It is useful to describe something as "paradisaic" when it is relating to or befitting paradise.*

---

paradisaical *(adjective)*

Relating to or befitting Paradise.

- *Students compared "paradisaical" with similar adjectives in the lesson.*
- *A "paradisaical" approach may work better in this case.*

---

paradisal *(adjective)*

Relating to or befitting Paradise.

- *Together in that paradisal place.*
- *The speaker chose "paradisal" because it captured the feeling precisely.*

---

paradisea liliastrum *(noun)*

A variety of spiderwort.

- *In class, the teacher used "paradisea liliastrum" to mean a variety of spiderwort.*
- *The article explained what "paradisea liliastrum" means with a simple example.*

---

paradisiac *(adjective)*

Relating to or befitting Paradise.

- *Paradisiacal innocence.*
- *The speaker chose "paradisiac" because it captured the feeling precisely.*

---

paradoxurus *(noun)*

Palm civets.

- *Understanding "paradoxurus" helps you talk about this topic clearly.*
- *He looked up "paradoxurus" because he had never seen it before.*

---

paraduodenal smear *(noun)*

Alimentary tract smear of material obtained from the duodenum.

- *Understanding "paraduodenal smear" helps you talk about this topic clearly.*
- *They discussed "paraduodenal smear" during the group presentation.*

---

paragonite *(noun)*

A colorless or pale brown mica with sodium.

- *He looked up "paragonite" because he had never seen it before.*

- *They discussed "paragonite" during the group presentation.*

---

paralichthys *(noun)*

A genus of Bothidae.

- *Understanding "paralichthys" helps you talk about this topic clearly.*
- *They discussed "paralichthys" during the group presentation.*

---

paralichthys dentatus *(noun)*

Flounder of eastern coast of North America.

- *In class, the teacher used "paralichthys dentatus" to mean flounder of eastern coast of north america.*
- *The article explained what "paralichthys dentatus" means with a simple example.*

---

paralichthys lethostigmus *(noun)*

Flounder of southern United States.

- *He looked up "paralichthys lethostigmus" because he had never seen it before.*
- *Understanding "paralichthys lethostigmus" helps you talk about this topic clearly.*

---

paralithodes *(noun)*

A genus of Lithodidae.

- *Understanding "paralithodes" helps you talk about this topic clearly.*
- *In class, the teacher used "paralithodes" to mean a genus of lithodidae.*

---

paralithodes camtschatica *(noun)*

Large edible crab of northern Pacific waters especially along the coasts of Alaska and Japan.

- *The article explained what "paralithodes camtschatica" means with a simple example.*
- *They discussed "paralithodes camtschatica" during the group presentation.*

---

parallelepipedon *(noun)*

A prism whose bases are parallelograms.

- *They discussed "parallelepipedon" during the group presentation.*
- *Understanding "parallelepipedon" helps you talk about this topic clearly.*

---

parallelopiped *(noun)*

A prism whose bases are parallelograms.

- *He looked up "parallelopiped" because he had never seen it before.*
- *They discussed "parallelopiped" during the group presentation.*

---

parallelopipedon *(noun)*

A prism whose bases are parallelograms.

- *The article explained what "parallelopipedon" means with a simple example.*
- *She wrote a short paragraph that included "parallelopipedon."*

---

paralytical *(adjective)*

Relating to or of the nature of paralysis.

- *Students compared "paralytical" with similar adjectives in the lesson.*
- *Would you call this situation "paralytical"? Explain why.*

---

paramagnet *(noun)*

Magnet made of a substance whose magnetization is proportional to the strength of the magnetic field applied to it.

- *In class, the teacher used "paramagnet" to mean magnet made of a substance whose magnetization is....*
- *The article explained what "paramagnet" means with a simple example.*

---

paranthias *(noun)*

A genus of Serranidae.

- *They discussed "paranthias" during the group presentation.*
- *Understanding "paranthias" helps you talk about this topic clearly.*

---

paranthias furcifer *(noun)*

Deep-sea fish of tropical Atlantic.

- *The article explained what "paranthias furcifer" means with a simple example.*
- *Understanding "paranthias furcifer" helps you talk about this topic clearly.*

---

paraphrastic *(adjective)*

Altered by paraphrasing.

- *Students compared "paraphrastic" with similar adjectives in the lesson.*
- *It is useful to describe something as "paraphrastic" when it is altered by paraphrasing.*

---

paraphysis *(noun)*

A sterile simple or branched filament or hair borne among sporangia; may be pointed or clubbed.

- *In class, the teacher used "paraphysis" to mean a sterile simple or branched filament or hair borne....*
- *He looked up "paraphysis" because he had never seen it before.*

---

parapodium *(noun)*

One of a pair of fleshy appendages of a polychete annelid that functions in locomotion and breathing.

- *In class, the teacher used "parapodium" to mean one of a pair of fleshy appendages of a polychete....*
- *The article explained what "parapodium" means with a simple example.*

---

paraquet *(noun)*

Any of numerous small slender long-tailed parrots.

- *The article explained what "paraquet" means with a simple example.*
- *She wrote a short paragraph that included "paraquet."*

---

parascalops *(noun)*

Brewer's moles.

- *She wrote a short paragraph that included "parascalops."*
- *The article explained what "parascalops" means with a simple example.*

---

parascalops breweri *(noun)*

Mole of eastern North America.

- *They discussed "parascalops breweri" during the group presentation.*
- *He looked up "parascalops breweri" because he had never seen it before.*

---

parasitaxus *(noun)*

One species: parasite yew.

- *They discussed "parasitaxus" during the group presentation.*
- *The article explained what "parasitaxus" means with a simple example.*

---

parasitaxus ustus *(noun)*

Rare and endangered monoecious parasitic conifer of New Caledonia; parasitic on Falcatifolium taxoides.

- *They discussed "parasitaxus ustus" during the group presentation.*
- *Understanding "parasitaxus ustus" helps you talk about this topic clearly.*

---

parasiticidal *(adjective)*

Capable of expelling or destroying parasitic worms.

- *Would you call this situation "parasiticidal"? Explain why.*
- *It is useful to describe something as "parasiticidal" when it is capable of expelling or destroying parasitic worms.*

---

parasympathomimetic *(adjective)*

Having an effect similar to that resulting from stimulation of the parasympathetic nervous system.

- *Parasympathomimetic drugs slow the heart rate.*
- *The speaker chose "parasympathomimetic" because it captured the feeling precisely.*

---

parathelypteris novae-boracensis *(noun)*

Slender shield fern of moist woods of eastern North America; sometimes placed in genus Dryopteris.

- *In class, the teacher used "parathelypteris novae-boracensis" to mean slender shield fern of moist woods of eastern north....*
- *He looked up "parathelypteris novae-boracensis" because he had never seen it before.*

---

parathelypteris simulata *(noun)*

Delicate feathery shield fern of the eastern United States; sometimes placed in genus Thelypteris.

- *The article explained what "parathelypteris simulata" means with a simple example.*
- *In class, the teacher used "parathelypteris simulata" to mean delicate feathery shield fern of the eastern united....*

---

parathormone *(noun)*

Hormone synthesized and released into the blood stream by the parathyroid glands; regulates phosphorus and calcium in the body and functions in neuromuscular excitation and blood clotting.

- *In class, the teacher used "parathormone" to mean hormone synthesized and released into the blood....*
- *The article explained what "parathormone" means with a simple example.*

---

paraumbilical vein *(noun)*

Small veins arising in skin around the navel; terminate as accessory portal veins.

- *Understanding "paraumbilical vein" helps you talk about this topic clearly.*
- *They discussed "paraumbilical vein" during the group presentation.*

---

parazoa *(noun)*

Multicellular organisms having less-specialized cells than in the Metazoa; comprises the single phylum Porifera.

- *In class, the teacher used "parazoa" to mean multicellular organisms having less-specialized....*
- *Understanding "parazoa" helps you talk about this topic clearly.*

---

parazoan *(noun)*

Primitive multicellular marine animal whose porous body is supported by a fibrous skeletal framework; usually occurs in sessile colonies.

- *Understanding "parazoan" helps you talk about this topic clearly.*
- *In class, the teacher used "parazoan" to mean primitive multicellular marine animal whose porous....*

---

parcae *(noun)*

Any of the three Roman goddesses of fate or destiny; identified with the Greek Moirai and similar to the Norse Norns.

- *Understanding "parcae" helps you talk about this topic clearly.*
- *In class, the teacher used "parcae" to mean any of the three roman goddesses of fate or....*

---

pardonably *(adverb)*

In an excusable manner or to an excusable degree.

- *He answered "pardonably," which changed the tone of the conversation.*
- *The narrator describes the scene "pardonably" in the final chapter.*

---

parenthetic *(adjective)*

Qualifying or explaining; placed or as if placed in parentheses.

- *Parenthetical remarks.*
- *A "parenthetic" approach may work better in this case.*

---

parget *(noun)*

Plaster used to coat outer walls and line chimneys.

- *She wrote a short paragraph that included "parget."*
- *He looked up "parget" because he had never seen it before.*

---

pargeting *(noun)*

Plaster used to coat outer walls and line chimneys.

- *She wrote a short paragraph that included "pargeting."*
- *Understanding "pargeting" helps you talk about this topic clearly.*

---

pargetting *(noun)*

Plaster used to coat outer walls and line chimneys.

- *The article explained what "pargetting" means with a simple example.*
- *She wrote a short paragraph that included "pargetting."*

parheliacal *(adjective)*

Relating to or resembling a parhelion.

- *Would you call this situation "parheliacal"? Explain why.*
- *A "parheliacal" approach may work better in this case.*

parhelic *(adjective)*

Relating to or resembling a parhelion.

- *It is useful to describe something as "parhelic" when it is relating to or resembling a parhelion.*
- *Would you call this situation "parhelic"? Explain why.*

parhelic circle *(noun)*

A luminous halo parallel to the horizon at the altitude of the sun; caused by ice crystals in the atmosphere.

- *He looked up "parhelic circle" because he had never seen it before.*
- *She wrote a short paragraph that included "parhelic circle."*

parhelic ring *(noun)*

A luminous halo parallel to the horizon at the altitude of the sun; caused by ice crystals in the atmosphere.

- *Understanding "parhelic ring" helps you talk about this topic clearly.*
- *He looked up "parhelic ring" because he had never seen it before.*

parhelion *(noun)*

A bright spot on the parhelic circle; caused by diffraction by ice crystals.

- *Understanding "parhelion" helps you talk about this topic clearly.*
- *They discussed "parhelion" during the group presentation.*

paridae *(noun)*

Titmice and chickadees.

- *In class, the teacher used "paridae" to mean titmice and chickadees.*
- *The article explained what "paridae" means with a simple example.*

paries *(noun)*

(anatomy) a layer (a lining or membrane) that encloses a structure.

- *Understanding "paries" helps you talk about this topic clearly.*
- *He looked up "paries" because he had never seen it before.*

parietales *(noun)*

A large order of dicotyledonous plants of subclass Dilleniidae.

- *He looked up "parietales" because he had never seen it before.*
- *They discussed "parietales" during the group presentation.*

parietaria *(noun)*

Small genus of stingless herbs.

- *Understanding "parietaria" helps you talk about this topic clearly.*
- *The article explained what "parietaria" means with a simple example.*

parietaria difussa *(noun)*

Herb that grows in crevices having long narrow leaves and small pink apetalous flowers.

- *They discussed "parietaria difussa" during the group presentation.*
- *He looked up "parietaria difussa" because he had never seen it before.*

parietomastoid suture *(noun)*

The suture between the parietal and the temporal bones.

- *She wrote a short paragraph that included "parietomastoid suture."*
- *Understanding "parietomastoid suture" helps you talk about this topic clearly.*

paripinnate *(adjective)*

(of a leaf shape) pinnate with a pair of leaflets at the apex.

- *The speaker chose "paripinnate" because it captured the feeling precisely.*
- *It is useful to describe something as "paripinnate" when it is (of a leaf shape) pinnate with a pair of leaflets....*

---

paris quadrifolia *(noun)*

European herb with yellow-green flowers resembling and closely related to the trilliums; reputed to be poisonous.

- *He looked up "paris quadrifolia" because he had never seen it before.*
- *Understanding "paris quadrifolia" helps you talk about this topic clearly.*

---

parjanya *(noun)*

Hindu god of rain; sometimes identified with Indra.

- *Understanding "parjanya" helps you talk about this topic clearly.*
- *He looked up "parjanya" because he had never seen it before.*

---

parkeriaceae *(noun)*

Coextensive with the genus Ceratopteris; sometimes included in family Polypodiaceae.

- *The article explained what "parkeriaceae" means with a simple example.*
- *They discussed "parkeriaceae" during the group presentation.*

---

parkia *(noun)*

Genus of tropical Old World trees: nitta trees.

- *Understanding "parkia" helps you talk about this topic clearly.*
- *They discussed "parkia" during the group presentation.*

---

parkinsonia *(noun)*

Small genus of spiny shrubs or small trees.

- *She wrote a short paragraph that included "parkinsonia."*
- *He looked up "parkinsonia" because he had never seen it before.*

---

parkinsonia florida *(noun)*

Densely branched spiny tree of southwestern United States having showy yellow flowers and blue-green bark; sometimes placed in genus Cercidium.

- *Understanding "parkinsonia florida" helps you talk about this topic clearly.*
- *They discussed "parkinsonia florida" during the group presentation.*

---

parlormaid *(noun)*

A maid in a private home whose duties are to care for the parlor and the table and to answer the door.

- *They discussed "parlormaid" during the group presentation.*
- *Understanding "parlormaid" helps you talk about this topic clearly.*

---

parlourmaid *(noun)*

A maid in a private home whose duties are to care for the parlor and the table and to answer the door.

- *Understanding "parlourmaid" helps you talk about this topic clearly.*
- *He looked up "parlourmaid" because he had never seen it before.*

---

parmeliaceae *(noun)*

A family of lichens.

- *They discussed "parmeliaceae" during the group presentation.*
- *He looked up "parmeliaceae" because he had never seen it before.*

---

parnahiba *(noun)*

A river in northeastern Brazil that flows generally northward to the Atlantic Ocean.

- *He looked up "parnahiba" because he had never seen it before.*
- *Understanding "parnahiba" helps you talk about this topic clearly.*

---

parnaiba *(noun)*

A river in northeastern Brazil that flows generally northward to the Atlantic Ocean.

- *Understanding "parnaiba" helps you talk about this topic clearly.*

- *In class, the teacher used "parnaiba" to mean a river in northeastern brazil that flows generally....*

---

parnassia *(noun)*

Any of various usually evergreen bog plants of the genus Parnassia having broad smooth basal leaves and a single pale flower resembling a buttercup.

- *Understanding "parnassia" helps you talk about this topic clearly.*
- *They discussed "parnassia" during the group presentation.*

---

parnassia fimbriata *(noun)*

Bog plant with broadly heart-shaped basal leaves and cream-colored or white saucer-shaped flowers with fringed petals; west of Rocky Mountains from Alaska to New Mexico.

- *They discussed "parnassia fimbriata" during the group presentation.*
- *Understanding "parnassia fimbriata" helps you talk about this topic clearly.*

---

parnassia palustris *(noun)*

Plant having ovate leaves in a basal rosette and white starlike flowers netted with green.

- *She wrote a short paragraph that included "parnassia palustris."*
- *He looked up "parnassia palustris" because he had never seen it before.*

---

parochetus *(noun)*

One species: shamrock pea.

- *In class, the teacher used "parochetus" to mean one species: shamrock pea.*
- *The article explained what "parochetus" means with a simple example.*

---

parochetus communis *(noun)*

Trailing trifoliate Asiatic and African herb having cobalt blue flowers.

- *She wrote a short paragraph that included "parochetus communis."*
- *He looked up "parochetus communis" because he had never seen it before.*

---

paroicous *(adjective)*

Having male and female reproductive organs separate in a single gametoecium.

- *The speaker chose "paroicous" because it captured the feeling precisely.*
- *It is useful to describe something as "paroicous" when it is having male and female reproductive organs separate....*

---

parophrys *(noun)*

A genus of Soleidae.

- *He looked up "parophrys" because he had never seen it before.*
- *She wrote a short paragraph that included "parophrys."*

---

parophrys vitulus *(noun)*

Popular pale brown food flatfish of the Pacific coast of North America.

- *He looked up "parophrys vitulus" because he had never seen it before.*
- *She wrote a short paragraph that included "parophrys vitulus."*

---

paroquet *(noun)*

Any of numerous small slender long-tailed parrots.

- *They discussed "paroquet" during the group presentation.*
- *He looked up "paroquet" because he had never seen it before.*

---

parous *(adjective)*

Having given birth to one or more viable children.

- *It is useful to describe something as "parous" when it is having given birth to one or more viable children.*
- *The speaker chose "parous" because it captured the feeling precisely.*

---

parqueterie *(noun)*

A patterned wood inlay used to cover a floor.

- *The article explained what "parqueterie" means with a simple example.*
- *In class, the teacher used "parqueterie" to mean a patterned wood inlay used to cover a floor.*

---

parrakeet *(noun)*

Any of numerous small slender long-tailed parrots.

- *They discussed "parrakeet" during the group presentation.*
- *She wrote a short paragraph that included "parrakeet."*

---

parroket *(noun)*

Any of numerous small slender long-tailed parrots.

- *Understanding "parroket" helps you talk about this topic clearly.*
- *They discussed "parroket" during the group presentation.*

---

parroquet *(noun)*

Any of numerous small slender long-tailed parrots.

- *They discussed "parroquet" during the group presentation.*
- *The article explained what "parroquet" means with a simple example.*

---

parrotia *(noun)*

One species: iron tree.

- *Understanding "parrotia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "parrotia."*

---

parrotiopsis *(noun)*

One species: deciduous tree of the Himalaya Mountains.

- *She wrote a short paragraph that included "parrotiopsis."*
- *The article explained what "parrotiopsis" means with a simple example.*

---

parrotlike *(adjective)*

Mechanically imitated or repeated without thought or understanding.

- *A mere parrotlike word-calling process.*
- *A voice quality sounding parrotlike.*

---

pars distilis *(noun)*

The anterior part of the anterior pituitary.

- *She wrote a short paragraph that included "pars distilis."*
- *They discussed "pars distilis" during the group presentation.*

---

parsimoniousness *(noun)*

Extreme care in spending money; reluctance to spend money unnecessarily.

- *He looked up "parsimoniousness" because he had never seen it before.*
- *In class, the teacher used "parsimoniousness" to mean extreme care in spending money; reluctance to spend....*

---

parthenium argentatum *(noun)*

Much-branched subshrub with silvery leaves and small white flowers of Texas and northern Mexico; cultivated as a source of rubber.

- *She wrote a short paragraph that included "parthenium argentatum."*
- *The article explained what "parthenium argentatum" means with a simple example.*

---

parthenium hysterophorus *(noun)*

Tropical American annual weed with small radiate heads of white flowers; adventive in southern United States.

- *He looked up "parthenium hysterophorus" because he had never seen it before.*
- *In class, the teacher used "parthenium hysterophorus" to mean tropical american annual weed with small radiate....*

---

parthenium integrifolium *(noun)*

Stout perennial herb of the eastern United States with whitish flowers; leaves traditionally used by Catawba Indians to treat burns.

- *The article explained what "parthenium integrifolium" means with a simple example.*
- *Understanding "parthenium integrifolium" helps you talk about this topic clearly.*

---

parthenocarpy *(noun)*

(botany) the development of a fruit without fertilization or seeds.

- *He looked up "parthenocarpy" because he had never seen it before.*
- *She wrote a short paragraph that included "parthenocarpy."*

---

parthenocissus *(noun)*

Woody vines having disklike tips on the tendrils.

- *She wrote a short paragraph that included "parthenocissus."*
- *Understanding "parthenocissus" helps you talk about this topic clearly.*

---

parthenocissus quinquefolia *(noun)*

Common North American vine with compound leaves and bluish-black berrylike fruit.

- *In class, the teacher used "parthenocissus quinquefolia" to mean common north american vine with compound leaves and....*
- *He looked up "parthenocissus quinquefolia" because he had never seen it before.*

---

parthenocissus tricuspidata *(noun)*

Asiatic vine with three-lobed leaves and purple berries.

- *In class, the teacher used "parthenocissus tricuspidata" to mean asiatic vine with three-lobed leaves and purple berries.*
- *The article explained what "parthenocissus tricuspidata" means with a simple example.*

---

parthenogeny *(noun)*

Human conception without fertilization by a man.

- *He looked up "parthenogeny" because he had never seen it before.*
- *She wrote a short paragraph that included "parthenogeny."*

---

parthenote *(noun)*

A cell resulting from parthenogenesis.

- *Understanding "parthenote" helps you talk about this topic clearly.*
- *They discussed "parthenote" during the group presentation.*

---

particolored *(adjective)*

Having sections or patches colored differently and usually brightly.

- *A particolored dress.*
- *Students compared "particolored" with similar adjectives in the lesson.*

---

particolored buckeye *(noun)*

A buckeye marked by different colors or tints.

- *In class, the teacher used "particolored buckeye" to mean a buckeye marked by different colors or tints.*
- *The article explained what "particolored buckeye" means with a simple example.*

---

particoloured *(adjective)*

Having sections or patches colored differently and usually brightly.

- *Her writing became clearer after she learned "particoloured."*
- *Students compared "particoloured" with similar adjectives in the lesson.*

---

particularised *(adjective)*

Directed toward a specific object.

- *It is useful to describe something as "particularised" when it is directed toward a specific object.*
- *Would you call this situation "particularised"? Explain why.*

---

partitionist *(noun)*

An advocate of partitioning a country.

- *Understanding "partitionist" helps you talk about this topic clearly.*
- *They discussed "partitionist" during the group presentation.*

---

partridgeberry *(noun)*

Creeping woody plant of eastern North America with shiny evergreen leaves and scarlet berries.

- *He looked up "partridgeberry" because he had never seen it before.*
- *She wrote a short paragraph that included "partridgeberry."*

parulidae *(noun)*

New World warblers.

- *The article explained what “parulidae” means with a simple example.*
- *In class, the teacher used “parulidae” to mean new world warblers.*

parus atricapillus *(noun)*

Chickadee having a dark crown.

- *Understanding “parus atricapillus” helps you talk about this topic clearly.*
- *In class, the teacher used “parus atricapillus” to mean chickadee having a dark crown.*

parvenue *(adjective)*

Of or characteristic of a parvenu.

- *It is useful to describe something as “parvenue” when it is of or characteristic of a parvenu.*
- *Would you call this situation “parvenue”? Explain why.*

paspalum dilatatum *(noun)*

Tall tufted perennial tropical American grass naturalized as pasture and forage grass in southern United States.

- *He looked up “paspalum dilatatum” because he had never seen it before.*
- *Understanding “paspalum dilatatum” helps you talk about this topic clearly.*

paspalum notatum *(noun)*

Perennial tropical American grass used as pasture grass in arid areas of the Gulf States.

- *She wrote a short paragraph that included “paspalum notatum.”*
- *He looked up “paspalum notatum” because he had never seen it before.*

pasqueflower *(noun)*

Any plant of the genus Pulsatilla; sometimes included in genus Anemone.

- *Understanding “pasqueflower” helps you talk about this topic clearly.*
- *In class, the teacher used “pasqueflower” to mean any plant of the genus pulsatilla; sometimes....*

passamaquody *(noun)*

A member of the Algonquian people related to the Malecite and living in northeastern Maine and New Brunswick.

- *Understanding “passamaquody” helps you talk about this topic clearly.*
- *He looked up “passamaquody” because he had never seen it before.*

passee *(adjective)*

Out of fashion.

- *A “passee” approach may work better in this case.*
- *Students compared “passee” with similar adjectives in the lesson.*

passeres *(noun)*

Two names for the suborder of typical songbirds.

- *In class, the teacher used “passeres” to mean two names for the suborder of typical songbirds.*
- *Understanding “passeres” helps you talk about this topic clearly.*

passeridae *(noun)*

True sparrows: Old world birds formerly considered weaverbirds.

- *She wrote a short paragraph that included “passeridae.”*
- *The article explained what “passeridae” means with a simple example.*

passeriform bird *(noun)*

Perching birds mostly small and living near the ground with feet having 4 toes arranged to allow for gripping the perch; most are songbirds; hatchlings are helpless.

- *In class, the teacher used “passeriform bird” to mean perching birds mostly small and living near the....*
- *The article explained what “passeriform bird” means with a simple example.*

passerina *(noun)*

A genus of small North American finches including the New World buntings.

- *In class, the teacher used "passerina" to mean a genus of small north american finches including....*
- *The article explained what "passerina" means with a simple example.*

---

passerina cyanea *(noun)*

Small deep blue North American bunting.

- *The article explained what "passerina cyanea" means with a simple example.*
- *Understanding "passerina cyanea" helps you talk about this topic clearly.*

---

passiflora laurifolia *(noun)*

West Indian passionflower; cultivated for its yellow edible fruit.

- *In class, the teacher used "passiflora laurifolia" to mean west indian passionflower; cultivated for its....*
- *He looked up "passiflora laurifolia" because he had never seen it before.*

---

passiflora ligularis *(noun)*

Considered best for fruit.

- *He looked up "passiflora ligularis" because he had never seen it before.*
- *She wrote a short paragraph that included "passiflora ligularis."*

---

passiflora maliformis *(noun)*

West Indian passionflower with edible apple-sized fruit.

- *They discussed "passiflora maliformis" during the group presentation.*
- *In class, the teacher used "passiflora maliformis" to mean west indian passionflower with edible apple-sized fruit.*

---

passifloraceae *(noun)*

Tropical woody tendril-climbing vines.

- *He looked up "passifloraceae" because he had never seen it before.*
- *Understanding "passifloraceae" helps you talk about this topic clearly.*

---

pastelike *(adjective)*

Resembling paste in color; pallid.

- *A complexion that had been pastelike was now chalky white.*
- *Would you call this situation "pastelike"? Explain why.*

---

pasteurian *(adjective)*

Of or relating to Louis Pasteur or his experiments.

- *Students compared "pasteurian" with similar adjectives in the lesson.*
- *Would you call this situation "pasteurian"? Explain why.*

---

pasteurise *(verb)*

Heat food in order to kill harmful microorganisms.

- *Can you use "pasteurise" in a sentence that fits this situation?*
- *The coach explained when to use "pasteurise" and when to wait.*

---

pastil *(noun)*

A medicated lozenge used to soothe the throat.

- *They discussed "pastil" during the group presentation.*
- *In class, the teacher used "pastil" to mean a medicated lozenge used to soothe the throat.*

---

pastinaca *(noun)*

A rosid dicot genus of the family Umbelliferae; includes parsnips.

- *In class, the teacher used "pastinaca" to mean a rosid dicot genus of the family umbelliferae;....*
- *They discussed "pastinaca" during the group presentation.*

---

pastinaca sativa *(noun)*

A strong-scented plant cultivated for its edible root.

- *Understanding "pastinaca sativa" helps you talk about this topic clearly.*

- *The article explained what “pastinaca sativa” means with a simple example.*

---

pastness *(noun)*

The quality of being past.

- *They discussed “pastness” during the group presentation.*
- *He looked up “pastness” because he had never seen it before.*

---

pataca *(noun)*

The basic unit of money in Macao.

- *In class, the teacher used “pataca” to mean the basic unit of money in macao.*
- *They discussed “pataca” during the group presentation.*

---

patavium *(noun)*

A city in Veneto.

- *She wrote a short paragraph that included “patavium.”*
- *Understanding “patavium” helps you talk about this topic clearly.*

---

patchboard *(noun)*

Telephone central where circuits are completed with patchcords.

- *He looked up “patchboard” because he had never seen it before.*
- *She wrote a short paragraph that included “patchboard.”*

---

patchcord *(noun)*

A length of wire that has a plug at each end; used to make connections at a patchboard.

- *He looked up “patchcord” because he had never seen it before.*
- *In class, the teacher used “patchcord” to mean a length of wire that has a plug at each end; used....*

---

patchouly *(noun)*

A heavy perfume made from the patchouli plant.

- *She wrote a short paragraph that included “patchouly.”*
- *He looked up “patchouly” because he had never seen it before.*

---

pate feuillete *(noun)*

Dough used for very light flaky rich pastries.

- *She wrote a short paragraph that included “pate feuillete.”*
- *The article explained what “pate feuillete” means with a simple example.*

---

patellidae *(noun)*

Marine limpets.

- *She wrote a short paragraph that included “patellidae.”*
- *He looked up “patellidae” because he had never seen it before.*

---

patelliform *(adjective)*

Shaped like a dish or pan.

- *Her writing became clearer after she learned “patelliform.”*
- *Students compared “patelliform” with similar adjectives in the lesson.*

---

pathogenically *(adverb)*

In a pathogenic manner.

- *Place “pathogenically” carefully so the meaning stays clear.*
- *He answered “pathogenically,” which changed the tone of the conversation.*

---

patinate *(verb)*

Coat with a patina.

- *She tried to use “patinate” carefully so everyone would understand.*
- *The coach explained when to use “patinate” and when to wait.*

---

patinise *(verb)*

Coat with a patina.

- *In everyday English, people use “patinise” when talking about this idea.*
- *Learners should practice how to use “patinise” in real sentences.*

---

patinize *(verb)*

Coat with a patina.

A list of employees and their salaries.

- *The article explained what "paysheet" means with a simple example.*
- *She wrote a short paragraph that included "paysheet."*

pbit *(noun)*

A unit of information equal to 1000 terabits or 10^15 bits.

- *They discussed "pbit" during the group presentation.*
- *He looked up "pbit" because he had never seen it before.*

peachick *(noun)*

A young peafowl.

- *Understanding "peachick" helps you talk about this topic clearly.*
- *He looked up "peachick" because he had never seen it before.*

peachleaf willow *(noun)*

Willow of the western United States with leaves like those of peach or almond trees.

- *The article explained what "peachleaf willow" means with a simple example.*
- *Understanding "peachleaf willow" helps you talk about this topic clearly.*

peachwood *(noun)*

Tropical tree with prickly trunk; its heavy red wood yields a red dye and is used for cabinetry.

- *In class, the teacher used "peachwood" to mean tropical tree with prickly trunk; its heavy red....*
- *The article explained what "peachwood" means with a simple example.*

---

peag *(noun)*

Small cylindrical beads made from polished shells and fashioned into strings or belts; used by certain Native American peoples as jewelry or currency.

- *They discussed "peag" during the group presentation.*
- *In class, the teacher used "peag" to mean small cylindrical beads made from polished shells....*

---

pearl sydenstricker buck *(noun)*

United States author whose novels drew on her experiences as a missionary in China (1892-1973).

- *They discussed "pearl sydenstricker buck" during the group presentation.*
- *The article explained what "pearl sydenstricker buck" means with a simple example.*

---

pearlfish *(noun)*

Found living within the alimentary canals of e.g. sea cucumbers or between the shells of pearl oysters in or near shallow seagrass beds.

- *He looked up "pearlfish" because he had never seen it before.*
- *She wrote a short paragraph that included "pearlfish."*

---

pearlweed *(noun)*

Any of various low-growing plants of the genus Sagina having small spherical flowers resembling pearls.

- *They discussed "pearlweed" during the group presentation.*
- *In class, the teacher used "pearlweed" to mean any of various low-growing plants of the genus....*

---

pearlwort *(noun)*

Any of various low-growing plants of the genus Sagina having small spherical flowers resembling pearls.

- *Understanding "pearlwort" helps you talk about this topic clearly.*
- *They discussed "pearlwort" during the group presentation.*

---

peasecod *(noun)*

Husk of a pea; edible in some garden peas.

- *Understanding "peasecod" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "peasecod."*

---

pebibit *(noun)*

A unit of information equal to 1024 tebibits or 2^50 bits.

- *The article explained what "pebibit" means with a simple example.*
- *They discussed "pebibit" during the group presentation.*

---

pebibyte *(noun)*

A unit of information equal to 1024 tebibytes or 2^50 bytes.

- *In class, the teacher used "pebibyte" to mean a unit of information equal to 1024 tebibytes or....*
- *He looked up "pebibyte" because he had never seen it before.*

---

peccable *(adjective)*

Liable to sin; - Sir Walter Scott.

- *A frail and peccable mortal.*
- *A "peccable" approach may work better in this case.*

---

peccant *(adjective)*

Liable to sin; - Sir Walter Scott.

- *Would you call this situation "peccant"? Explain why.*
- *Students compared "peccant" with similar adjectives in the lesson.*

---

peccari angulatus *(noun)*

Dark grey peccary with an indistinct white collar; of semi desert areas of Mexico and southwestern United States.

- *They discussed "peccari angulatus" during the group presentation.*

- *She wrote a short paragraph that included "peccari angulatus."*

---

pecopteris *(noun)*

Carboniferous fossil fern characterized by a regular arrangement of the leaflets resembling a comb.

- *In class, the teacher used "pecopteris" to mean carboniferous fossil fern characterized by a....*
- *The article explained what "pecopteris" means with a simple example.*

---

pecten irradians *(noun)*

A small scallop inhabiting shallow waters and mud flats of the Atlantic coast of North America.

- *Understanding "pecten irradians" helps you talk about this topic clearly.*
- *The article explained what "pecten irradians" means with a simple example.*

---

pecten magellanicus *(noun)*

A large scallop inhabiting deep waters of the Atlantic coast of North America.

- *Understanding "pecten magellanicus" helps you talk about this topic clearly.*
- *In class, the teacher used "pecten magellanicus" to mean a large scallop inhabiting deep waters of the....*

---

pectineal *(adjective)*

Of or relating to the pubis.

- *Her writing became clearer after she learned "pectineal."*
- *A "pectineal" approach may work better in this case.*

---

pectinibranchia *(noun)*

Large order of gastropods comprising univalve mollusks that have a single gill resembling a comb.

- *In class, the teacher used "pectinibranchia" to mean large order of gastropods comprising univalve....*
- *He looked up "pectinibranchia" because he had never seen it before.*

---

peculate *(verb)*

Appropriate (as property entrusted to one's care) fraudulently to one's own use.

- *He did not know how to use "peculate" until he saw an example.*
- *The coach explained when to use "peculate" and when to wait.*

---

peculator *(noun)*

Someone who violates a trust by taking (money) for his own use.

- *The article explained what "peculator" means with a simple example.*
- *They discussed "peculator" during the group presentation.*

---

pedagog *(noun)*

Someone who educates young people.

- *She wrote a short paragraph that included "pedagog."*
- *The article explained what "pedagog" means with a simple example.*

---

pedaler *(noun)*

A person who rides a pedal-driven vehicle (as a bicycle).

- *She wrote a short paragraph that included "pedaler."*
- *He looked up "pedaler" because he had never seen it before.*

---

pedaliaceae *(noun)*

The family of plants of order Polemoniales.

- *Understanding "pedaliaceae" helps you talk about this topic clearly.*
- *The article explained what "pedaliaceae" means with a simple example.*

---

pedaller *(noun)*

A person who rides a pedal-driven vehicle (as a bicycle).

- *She wrote a short paragraph that included "pedaller."*
- *Understanding "pedaller" helps you talk about this topic clearly.*

---

pedate *(adjective)*

Of a leaf shape; having radiating lobes, each deeply cleft or divided.

- *The speaker chose "pedate" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "pedate."*

---

pedate leaf *(noun)*

A leaf having the radiating lobes each deeply cleft or divided.

- *They discussed "pedate leaf" during the group presentation.*
- *Understanding "pedate leaf" helps you talk about this topic clearly.*

---

pederastic *(adjective)*

Of homosexuality between a man and a boy.

- *Students compared "pederastic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "pederastic."*

---

pedesis *(noun)*

The random motion of small particles suspended in a gas or liquid.

- *They discussed "pedesis" during the group presentation.*
- *She wrote a short paragraph that included "pedesis."*

---

pediamycin *(noun)*

An antibiotic (trade name Erythrocin or E-Mycin or Ethril or Ilosone or Pediamycin) obtained from the actinomycete Streptomyces erythreus; effective against many Gram-positive bacteria and some Gram-negative.

- *The article explained what "pediamycin" means with a simple example.*
- *In class, the teacher used "pediamycin" to mean an antibiotic (trade name erythrocin or e-mycin or....*

---

pediapred *(noun)*

A glucocorticoid (trade names Pediapred or Prelone) used to treat inflammatory conditions.

- *In class, the teacher used "pediapred" to mean a glucocorticoid (trade names pediapred or prelone)....*
- *He looked up "pediapred" because he had never seen it before.*

---

pediatrist *(noun)*

A specialist in the care of babies.

- *She wrote a short paragraph that included "pediatrist."*
- *Understanding "pediatrist" helps you talk about this topic clearly.*

---

pediculati *(noun)*

Anglers and batfishes; spiny-finned marine fishes having pectoral fins at the ends of armlike processes and a long movable spine on the dorsal fin to lure prey to the large mouth.

- *He looked up "pediculati" because he had never seen it before.*
- *She wrote a short paragraph that included "pediculati."*

---

pediculicide *(noun)*

A chemical agent that kills lice.

- *He looked up "pediculicide" because he had never seen it before.*
- *In class, the teacher used "pediculicide" to mean a chemical agent that kills lice.*

---

pediculidae *(noun)*

True lice: human lice and related forms.

- *They discussed "pediculidae" during the group presentation.*
- *The article explained what "pediculidae" means with a simple example.*

---

pedilanthus *(noun)*

Tropical American succulent shrubs.

- *The article explained what "pedilanthus" means with a simple example.*
- *They discussed "pedilanthus" during the group presentation.*

---

pedilanthus bracteatus *(noun)*

Wax-coated Mexican shrub related to Euphorbia antisyphilitica.

- *She wrote a short paragraph that included “pedilanthus bracteatus.”*
- *The article explained what “pedilanthus bracteatus” means with a simple example.*

---

pedilanthus pavonis *(noun)*

Wax-coated Mexican shrub related to Euphorbia antisyphilitica.

- *They discussed “pedilanthus pavonis” during the group presentation.*
- *The article explained what “pedilanthus pavonis” means with a simple example.*

---

pedilanthus tithymaloides *(noun)*

Low tropical American shrub having powerful emetic properties.

- *The article explained what “pedilanthus tithymaloides” means with a simple example.*
- *They discussed “pedilanthus tithymaloides” during the group presentation.*

---

pediocactus *(noun)*

Low-growing cacti of the Great Plains of North America.

- *Understanding “pediocactus” helps you talk about this topic clearly.*
- *They discussed “pediocactus” during the group presentation.*

---

pediocactus knowltonii *(noun)*

Small clustering cactus of southwestern United States; a threatened species.

- *Understanding “pediocactus knowltonii” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “pediocactus knowltonii.”*

---

pedioecetes *(noun)*

Sharp-tailed grouse.

- *He looked up “pedioecetes” because he had never seen it before.*
- *In class, the teacher used “pedioecetes” to mean sharp-tailed grouse.*

---

pedioecetes phasianellus *(noun)*

Large grouse of prairies and open forests of western North America.

- *They discussed “pedioecetes phasianellus” during the group presentation.*
- *In class, the teacher used “pedioecetes phasianellus” to mean large grouse of prairies and open forests of....*

---

pedionomus *(noun)*

Plain wanderer.

- *They discussed “pedionomus” during the group presentation.*
- *He looked up “pedionomus” because he had never seen it before.*

---

pedionomus torquatus *(noun)*

Small Australian bird related to the button quail; classified as wading bird but inhabits plains.

- *The article explained what “pedionomus torquatus” means with a simple example.*
- *In class, the teacher used “pedionomus torquatus” to mean small australian bird related to the button quail;....*

---

pedipalpi *(noun)*

Whip scorpions.

- *He looked up “pedipalpi” because he had never seen it before.*
- *In class, the teacher used “pedipalpi” to mean whip scorpions.*

---

pedodontist *(noun)*

A dentist who specializes in the care of children’s teeth.

- *The article explained what “pedodontist” means with a simple example.*
- *She wrote a short paragraph that included “pedodontist.”*

---

pedwood *(noun)*

European deciduous shrub turning red in autumn having dull white flowers.

- *He looked up “pedwood” because he had never seen it before.*
- *Understanding “pedwood” helps you talk about this topic clearly.*

peewit *(noun)*

Large crested Old World plover having wattles and spurs.

- *In class, the teacher used "peewit" to mean large crested old world plover having wattles and spurs.*
- *The article explained what "peewit" means with a simple example.*

peireskia *(noun)*

Genus of tropical American shrubby trees and woody climbers having slender branches with broad flat leaves and large panicles of flowers.

- *The article explained what "peireskia" means with a simple example.*
- *She wrote a short paragraph that included "peireskia."*

pelargonium hortorum *(noun)*

An upright geranium having scalloped leaves with a broad color zone inside the margin and white or pink or red flowers.

- *The article explained what "pelargonium hortorum" means with a simple example.*
- *They discussed "pelargonium hortorum" during the group presentation.*

pelargonium limoneum *(noun)*

A common garden geranium with lemon-scented foliage.

- *She wrote a short paragraph that included "pelargonium limoneum."*
- *They discussed "pelargonium limoneum" during the group presentation.*

pelargonium odoratissimum *(noun)*

Geranium with round fragrant leaves and small white flowers.

- *The article explained what "pelargonium odoratissimum" means with a simple example.*
- *Understanding "pelargonium odoratissimum" helps you talk about this topic clearly.*

pelargonium peltatum *(noun)*

A commonly cultivated trailing South American plant with peltate leaves and rosy flowers.

- *She wrote a short paragraph that included "pelargonium peltatum."*
- *He looked up "pelargonium peltatum" because he had never seen it before.*

pelecaniform seabird *(noun)*

Large fish-eating seabird with four-toed webbed feet.

- *The article explained what "pelecaniform seabird" means with a simple example.*
- *In class, the teacher used "pelecaniform seabird" to mean large fish-eating seabird with four-toed webbed feet.*

pelecaniformes *(noun)*

Pelicans; frigate birds; gannets; cormorants.

- *The article explained what "pelecaniformes" means with a simple example.*
- *They discussed "pelecaniformes" during the group presentation.*

pelecanoididae *(noun)*

Diving petrels.

- *She wrote a short paragraph that included "pelecanoididae."*
- *The article explained what "pelecanoididae" means with a simple example.*

pelecanus erythrorhynchos *(noun)*

Large American pelican; white with black wing feathers.

- *They discussed "pelecanus erythrorhynchos" during the group presentation.*
- *He looked up "pelecanus erythrorhynchos" because he had never seen it before.*

pelecanus onocrotalus *(noun)*

Similar to American white pelican.

- *They discussed "pelecanus onocrotalus" during the group presentation.*
- *He looked up "pelecanus onocrotalus" because he had never seen it before.*

pelecypod *(noun)*

Marine or freshwater mollusks having a soft body with platelike gills enclosed within two shells hinged together.

- *They discussed "pelecypod" during the group presentation.*
- *The article explained what "pelecypod" means with a simple example.*

---

pelew *(noun)*

A chain of more than 200 islands about 400 miles long in the western central Pacific Ocean.

- *She wrote a short paragraph that included "pelew."*
- *Understanding "pelew" helps you talk about this topic clearly.*

---

pellaea *(noun)*

Genus of chiefly small rock-loving ferns; in some classification systems it is placed in the family Polypodiaceae or Adiantaceae.

- *He looked up "pellaea" because he had never seen it before.*
- *Understanding "pellaea" helps you talk about this topic clearly.*

---

pellaea andromedifolia *(noun)*

Evergreen fern of California and Baja California.

- *In class, the teacher used "pellaea andromedifolia" to mean evergreen fern of california and baja california.*
- *The article explained what "pellaea andromedifolia" means with a simple example.*

---

pellaea atropurpurea *(noun)*

Very short shallowly creeping North American fern usually growing on cliffs or walls and having dark glossy leaf axes.

- *Understanding "pellaea atropurpurea" helps you talk about this topic clearly.*
- *The article explained what "pellaea atropurpurea" means with a simple example.*

---

pellaea mucronata *(noun)*

Cliff brake of California and Baja California having purple-brown leafstalks.

- *He looked up "pellaea mucronata" because he had never seen it before.*
- *They discussed "pellaea mucronata" during the group presentation.*

---

pellaea ornithopus *(noun)*

Cliff brake of California and Baja California having purple-brown leafstalks.

- *They discussed "pellaea ornithopus" during the group presentation.*
- *He looked up "pellaea ornithopus" because he had never seen it before.*

---

pellaea rotundifolia *(noun)*

Fern of New Zealand and Australia having trailing fronds with dark green buttonlike leaflets.

- *In class, the teacher used "pellaea rotundifolia" to mean fern of new zealand and australia having trailing....*
- *He looked up "pellaea rotundifolia" because he had never seen it before.*

---

pellicularia *(noun)*

Genus of fungi having the hymenium in the form of a crust; some species formerly placed in form genus Rhizoctinia.

- *They discussed "pellicularia" during the group presentation.*
- *He looked up "pellicularia" because he had never seen it before.*

---

pellicularia filamentosa *(noun)*

Fungus causing a disease in potatoes characterized by black scurfy spots on the tubers.

- *Understanding "pellicularia filamentosa" helps you talk about this topic clearly.*
- *He looked up "pellicularia filamentosa" because he had never seen it before.*

---

pellicularia koleroga *(noun)*

Fungus causing a disease in coffee and some other tropical plants.

- *She wrote a short paragraph that included "pellicularia koleroga."*
- *He looked up "pellicularia koleroga" because he had never seen it before.*

---

pellitory *(noun)*

A small Mediterranean plant containing a volatile oil once used to relieve toothache.

- *In class, the teacher used "pellitory" to mean a small mediterranean plant containing a volatile....*

- *The article explained what “pellitory” means with a simple example.*

---

pellitory-of-spain *(noun)*

A small Mediterranean plant containing a volatile oil once used to relieve toothache.

- *Understanding “pellitory-of-spain” helps you talk about this topic clearly.*
- *The article explained what “pellitory-of-spain” means with a simple example.*

---

pellitory-of-the-wall *(noun)*

Herb that grows in crevices having long narrow leaves and small pink apetalous flowers.

- *The article explained what “pellitory-of-the-wall” means with a simple example.*
- *She wrote a short paragraph that included “pellitory-of-the-wall.”*

---

pellucidity *(noun)*

Passing light without diffusion or distortion.

- *He looked up “pellucidity” because he had never seen it before.*
- *In class, the teacher used “pellucidity” to mean passing light without diffusion or distortion.*

---

pellucidly *(adverb)*

In a clear and lucid manner.

- *The narrator describes the scene “pellucidly” in the final chapter.*
- *Try rewriting the sentence and include “pellucidly” naturally.*

---

pellucidness *(noun)*

Passing light without diffusion or distortion.

- *She wrote a short paragraph that included “pellucidness.”*
- *Understanding “pellucidness” helps you talk about this topic clearly.*

---

pelobatidae *(noun)*

The amphibian family of spadefoot toads.

- *In class, the teacher used “pelobatidae” to mean the amphibian family of spadefoot toads.*
- *The article explained what “pelobatidae” means with a simple example.*

---

peltandra *(noun)*

Small genus of North American marsh or aquatic herbs.

- *She wrote a short paragraph that included “peltandra.”*
- *He looked up “peltandra” because he had never seen it before.*

---

peltandra virginica *(noun)*

Perennial herb of the eastern United States having arrowhead-shaped leaves and an elongate pointed spathe and green berries.

- *They discussed “peltandra virginica” during the group presentation.*
- *In class, the teacher used “peltandra virginica” to mean perennial herb of the eastern united states having....*

---

peltiphyllum *(noun)*

One species.

- *She wrote a short paragraph that included “peltiphyllum.”*
- *Understanding “peltiphyllum” helps you talk about this topic clearly.*

---

peltiphyllum peltatum *(noun)*

Rhizomatous perennial herb with large dramatic peltate leaves and white to bright pink flowers in round heads on leafless stems; colonizes stream banks in the Sierra Nevada in California.

- *The article explained what “peltiphyllum peltatum” means with a simple example.*
- *In class, the teacher used “peltiphyllum peltatum” to mean rhizomatous perennial herb with large dramatic....*

---

peludo *(noun)*

Argentine armadillo with six movable bands and hairy underparts.

- *She wrote a short paragraph that included “peludo.”*
- *They discussed “peludo” during the group presentation.*

---

pelvimeter *(noun)*

Measuring instrument for performing pelvimetry.

- *They discussed "pelvimeter" during the group presentation.*
- *The article explained what "pelvimeter" means with a simple example.*

pelycosaur *(noun)*

Large primitive reptile having a tall spinal sail; of the Permian or late Paleozoic in Europe and North America.

- *The article explained what "pelycosaur" means with a simple example.*
- *They discussed "pelycosaur" during the group presentation.*

pelycosauria *(noun)*

Edaphosaurus; dimetrodon.

- *She wrote a short paragraph that included "pelycosauria."*
- *The article explained what "pelycosauria" means with a simple example.*

pemican *(noun)*

Lean dried meat pounded fine and mixed with melted fat; used especially by North American Indians.

- *She wrote a short paragraph that included "pemican."*
- *He looked up "pemican" because he had never seen it before.*

pemphigous *(adjective)*

Of or relating to or manifesting pemphigus.

- *The speaker chose "pemphigous" because it captured the feeling precisely.*
- *It is useful to describe something as "pemphigous" when it is of or relating to or manifesting pemphigus.*

peneidae *(noun)*

Tropical prawns.

- *They discussed "peneidae" during the group presentation.*
- *Understanding "peneidae" helps you talk about this topic clearly.*

peneplane *(noun)*

A more or less level land surface representing an advanced stage of erosion undisturbed by crustal movements.

- *He looked up "peneplane" because he had never seen it before.*
- *In class, the teacher used "peneplane" to mean a more or less level land surface representing an....*

penetrability *(noun)*

The quality of being penetrable (by people or light or missiles etc.).

- *In class, the teacher used "penetrability" to mean the quality of being penetrable (by people or light....*
- *The article explained what "penetrability" means with a simple example.*

penetralia *(noun)*

The innermost parts.

- *They discussed "penetralia" during the group presentation.*
- *He looked up "penetralia" because he had never seen it before.*

penetratively *(adverb)*

With ability to see into deeply.

- *Place "penetratively" carefully so the meaning stays clear.*
- *Try rewriting the sentence and include "penetratively" naturally.*

penicillinase *(noun)*

Enzyme produced by certain bacteria that inactivates penicillin and results in resistance to that antibiotic.

- *Understanding "penicillinase" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "penicillinase."*

penicillinase-resistant antibiotic *(noun)*

A form of penicillin that is not rendered inactive by penicillinase.

- *In class, the teacher used "penicillinase-resistant antibiotic" to mean a form of penicillin that is not rendered inactive....*
- *The article explained what "penicillinase-resistant antibiotic" means with a simple example.*

---

penitentially *(adverb)*

Showing remorse.

- *He answered "penitentially," which changed the tone of the conversation.*
- *She spoke "penitentially," and the audience immediately understood her point.*

---

penn'orth *(noun)*

The amount that can be bought for a penny.

- *They discussed "penn'orth" during the group presentation.*
- *Understanding "penn'orth" helps you talk about this topic clearly.*

---

pennate *(adjective)*

Having feathered wings.

- *The speaker chose "pennate" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "pennate."*

---

pennatula *(noun)*

Type genus of the family Pennatulidae: sea pens.

- *Understanding "pennatula" helps you talk about this topic clearly.*
- *The article explained what "pennatula" means with a simple example.*

---

pennisetum cenchroides *(noun)*

Erect tussock-forming perennial bur grass used particularly in South Africa and Australia for pasture and forage.

- *She wrote a short paragraph that included "pennisetum cenchroides."*
- *The article explained what "pennisetum cenchroides" means with a simple example.*

---

pennistum villosum *(noun)*

Northeastern tropical African plant having feathery panicles.

- *He looked up "pennistum villosum" because he had never seen it before.*
- *She wrote a short paragraph that included "pennistum villosum."*

---

pennoncel *(noun)*

A small pennant borne on a lance.

- *Understanding "pennoncel" helps you talk about this topic clearly.*
- *They discussed "pennoncel" during the group presentation.*

---

pennoncelle *(noun)*

A small pennant borne on a lance.

- *She wrote a short paragraph that included "pennoncelle."*
- *Understanding "pennoncelle" helps you talk about this topic clearly.*

---

pennycress *(noun)*

Any of several plants of the genus Thlaspi.

- *In class, the teacher used "pennycress" to mean any of several plants of the genus thlaspi.*
- *They discussed "pennycress" during the group presentation.*

---

pennywhistle *(noun)*

An inexpensive fipple flute.

- *Understanding "pennywhistle" helps you talk about this topic clearly.*
- *They discussed "pennywhistle" during the group presentation.*

---

penoche *(noun)*

Fudge made with brown sugar and butter and milk and nuts.

- *In class, the teacher used "penoche" to mean fudge made with brown sugar and butter and milk and....*
- *They discussed "penoche" during the group presentation.*

penoncel *(noun)*

A small pennant borne on a lance.

- *In class, the teacher used "penoncel" to mean a small pennant borne on a lance.*
- *He looked up "penoncel" because he had never seen it before.*

penpusher *(noun)*

A clerk who does boring paperwork.

- *Understanding "penpusher" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "penpusher."*

penstemon centranthifolius *(noun)*

Plant with bright red tubular flowers in long narrow clusters near tips of erect stems; coastal ranges from central California southward.

- *They discussed "penstemon centranthifolius" during the group presentation.*
- *Understanding "penstemon centranthifolius" helps you talk about this topic clearly.*

penstemon cyananthus *(noun)*

Erect plant with blue-violet flowers in rings near tips of stems; Idaho to Utah and Wyoming.

- *The article explained what "penstemon cyananthus" means with a simple example.*
- *Understanding "penstemon cyananthus" helps you talk about this topic clearly.*

penstemon davidsonii *(noun)*

Mat-forming plant with blue and lavender flowers clustered on short erect stems; British Columbia to northern California.

- *She wrote a short paragraph that included "penstemon davidsonii."*
- *He looked up "penstemon davidsonii" because he had never seen it before.*

penstemon deustus *(noun)*

Stems in clumps with cream-colored flowers; found from Washington to Wyoming and southward to California and Utah.

- *He looked up "penstemon deustus" because he had never seen it before.*
- *She wrote a short paragraph that included "penstemon deustus."*

penstemon dolius *(noun)*

Low plant with light blue and violet flowers in short clusters near tips of stems; Nevada to Utah.

- *They discussed "penstemon dolius" during the group presentation.*
- *In class, the teacher used "penstemon dolius" to mean low plant with light blue and violet flowers in....*

penstemon fruticosus *(noun)*

Low bushy plant with large showy pale lavender or blue-violet flowers in narrow clusters at ends of stems.

- *He looked up "penstemon fruticosus" because he had never seen it before.*
- *She wrote a short paragraph that included "penstemon fruticosus."*

penstemon linarioides *(noun)*

Plant having small narrow leaves and blue-violet flowers in long open clusters; Utah and Colorado to New Mexico and Arizona.

- *He looked up "penstemon linarioides" because he had never seen it before.*
- *She wrote a short paragraph that included "penstemon linarioides."*

penstemon newberryi *(noun)*

Mat-forming plant with deep pink flowers on short erect leafy stems; rocky places at high elevations from Oregon to California.

- *Understanding "penstemon newberryi" helps you talk about this topic clearly.*
- *In class, the teacher used "penstemon newberryi" to mean mat-forming plant with deep pink flowers on short....*

penstemon parryi *(noun)*

Erect stems with pinkish-lavender flowers in long interrupted clusters; Arizona.

- *In class, the teacher used "penstemon parryi" to mean erect stems with pinkish-lavender flowers in long....*
- *Understanding "penstemon parryi" helps you talk about this topic clearly.*

penstemon rupicola *(noun)*

One of the West's most beautiful wildflowers; large brilliant pink or rose flowers in many racemes above thick mats of stems and leaves; ledges and cliffs from Washington to California.

- *Understanding "penstemon rupicola" helps you talk about this topic clearly.*
- *In class, the teacher used "penstemon rupicola" to mean one of the west's most beautiful wildflowers; large....*

---

penstemon rydbergii *(noun)*

Plant with whorls of small dark blue-violet flowers; Washington to Wyoming and south to California and Colorado.

- *He looked up "penstemon rydbergii" because he had never seen it before.*
- *She wrote a short paragraph that included "penstemon rydbergii."*

---

penstemon serrulatus *(noun)*

Whorls of deep blue to dark purple flowers at tips of erect leafy stems; moist places from British Columbia to Oregon.

- *She wrote a short paragraph that included "penstemon serrulatus."*
- *Understanding "penstemon serrulatus" helps you talk about this topic clearly.*

---

penstemon whippleanus *(noun)*

Wine and lavender to purple and black flowers in several clusters on the upper half of leafy stems; Montana south through the Rocky Mountains to Arizona and New Mexico.

- *The article explained what "penstemon whippleanus" means with a simple example.*
- *She wrote a short paragraph that included "penstemon whippleanus."*

---

pentahedron *(noun)*

Any polyhedron having five plane faces.

- *In class, the teacher used "pentahedron" to mean any polyhedron having five plane faces.*
- *The article explained what "pentahedron" means with a simple example.*

---

pentail *(noun)*

Brown tree shrew having a naked tail bilaterally fringed with long stiff hairs on the distal third; of Malaysia.

- *They discussed "pentail" during the group presentation.*
- *She wrote a short paragraph that included "pentail."*

---

pentamethylenetetrazol *(noun)*

A drug used as a circulatory and respiratory stimulant; larger doses cause convulsions in shock therapy; Metrazol is a trademark.

- *He looked up "pentamethylenetetrazol" because he had never seen it before.*
- *In class, the teacher used "pentamethylenetetrazol" to mean a drug used as a circulatory and respiratory....*

---

pentangular *(adjective)*

Of or relating to or shaped like a pentagon.

- *The speaker chose "pentangular" because it captured the feeling precisely.*
- *A "pentangular" approach may work better in this case.*

---

pentanoic acid *(noun)*

A clear liquid carboxylic acid used in perfumes and drugs.

- *Understanding "pentanoic acid" helps you talk about this topic clearly.*
- *He looked up "pentanoic acid" because he had never seen it before.*

---

pentastomid *(noun)*

Wormlike arthropod having two pairs of hooks at the sides of the mouth; parasitic in nasal sinuses of mammals.

- *He looked up "pentastomid" because he had never seen it before.*
- *In class, the teacher used "pentastomid" to mean wormlike arthropod having two pairs of hooks at the....*

---

pentastomida *(noun)*

Tongue worms.

- *They discussed "pentastomida" during the group presentation.*
- *She wrote a short paragraph that included "pentastomida."*

---

pentasyllabic *(adjective)*

Having or characterized by or consisting of five syllables.

- *Her writing became clearer after she learned "pentasyllabic."*

- *The speaker chose “pentasyllabic” because it captured the feeling precisely.*

---

pentecostalist *(noun)*

Any member of a Pentecostal religious body.

- *He looked up “pentecostalist” because he had never seen it before.*
- *In class, the teacher used “pentecostalist” to mean any member of a pentecostal religious body.*

---

pentylenetetrazol *(noun)*

A drug used as a circulatory and respiratory stimulant; larger doses cause convulsions in shock therapy; Metrazol is a trademark.

- *They discussed “pentylenetetrazol” during the group presentation.*
- *The article explained what “pentylenetetrazol” means with a simple example.*

---

penuche *(noun)*

Fudge made with brown sugar and butter and milk and nuts.

- *In class, the teacher used “penuche” to mean fudge made with brown sugar and butter and milk and....*
- *The article explained what “penuche” means with a simple example.*

---

penuriously *(adverb)*

In a penurious manner.

- *They lived penuriously.*
- *Try rewriting the sentence and include “penuriously” naturally.*

---

penuriousness *(noun)*

A disposition to be niggardly with money.

- *The article explained what “penuriousness” means with a simple example.*
- *Understanding “penuriousness” helps you talk about this topic clearly.*

---

peperomia argyreia *(noun)*

Grown as a houseplant for its silvery striped fleshy foliage; South America.

- *He looked up “peperomia argyreia” because he had never seen it before.*
- *They discussed “peperomia argyreia” during the group presentation.*

---

peperomia sandersii *(noun)*

Grown as a houseplant for its silvery striped fleshy foliage; South America.

- *In class, the teacher used “peperomia sandersii” to mean grown as a houseplant for its silvery striped....*
- *The article explained what “peperomia sandersii” means with a simple example.*

---

peplus *(noun)*

A garment worn by women in ancient Greece; cloth caught at the shoulders and draped in folds to the waist.

- *They discussed “peplus” during the group presentation.*
- *The article explained what “peplus” means with a simple example.*

---

pepperiness *(noun)*

A hot spiciness.

- *He looked up “pepperiness” because he had never seen it before.*
- *She wrote a short paragraph that included “pepperiness.”*

---

pepperwort *(noun)*

Annual herb used as salad green and garnish.

- *Understanding “pepperwort” helps you talk about this topic clearly.*
- *They discussed “pepperwort” during the group presentation.*

---

peppiness *(noun)*

Liveliness and energy.

- *They discussed “peppiness” during the group presentation.*
- *In class, the teacher used “peppiness” to mean liveliness and energy.*

---

peptisation *(noun)*

The process of converting to a sol; bringing to a colloidal solution.

- *In class, the teacher used "peptisation" to mean the process of converting to a sol; bringing to a....*
- *Understanding "peptisation" helps you talk about this topic clearly.*

peptise *(verb)*

Disperse in a medium into a colloidal state.

- *Learners should practice how to use "peptise" in real sentences.*
- *The coach explained when to use "peptise" and when to wait.*

peptization *(noun)*

The process of converting to a sol; bringing to a colloidal solution.

- *She wrote a short paragraph that included "peptization."*
- *The article explained what "peptization" means with a simple example.*

peptize *(verb)*

Disperse in a medium into a colloidal state.

- *Can you use "peptize" in a sentence that fits this situation?*
- *He did not know how to use "peptize" until he saw an example.*

perboric acid *(noun)*

A form of boric acid.

- *The article explained what "perboric acid" means with a simple example.*
- *She wrote a short paragraph that included "perboric acid."*

perceptibility *(noun)*

The property of being perceptible by the mind or the senses.

- *She wrote a short paragraph that included "perceptibility."*
- *He looked up "perceptibility" because he had never seen it before.*

percher *(noun)*

A bird with feet adapted for perching (as on tree branches); this order is now generally abandoned by taxonomists.

- *She wrote a short paragraph that included "percher."*
- *He looked up "percher" because he had never seen it before.*

perchloride *(noun)*

A chloride containing an unusually high proportion of chlorine.

- *They discussed "perchloride" during the group presentation.*
- *She wrote a short paragraph that included "perchloride."*

perchloromethane *(noun)*

A colorless nonflammable liquid used as a solvent for fats and oils; because of its toxicity its use as a cleaning fluid or fire extinguisher has declined.

- *Understanding "perchloromethane" helps you talk about this topic clearly.*
- *They discussed "perchloromethane" during the group presentation.*

percidae *(noun)*

Active freshwater fishes; true perches and pike perches.

- *She wrote a short paragraph that included "percidae."*
- *They discussed "percidae" during the group presentation.*

perciformes *(noun)*

One of the largest natural groups of fishes of both marine and fresh water: true perches; basses; tuna.

- *She wrote a short paragraph that included "perciformes."*
- *He looked up "perciformes" because he had never seen it before.*

percina *(noun)*

A genus of Percidae.

- *In class, the teacher used "percina" to mean a genus of percidae.*
- *They discussed "percina" during the group presentation.*

---

percina tanasi *(noun)*

A small snail-eating perch of the Tennessee River.

- *In class, the teacher used "percina tanasi" to mean a small snail-eating perch of the tennessee river.*
- *Understanding "percina tanasi" helps you talk about this topic clearly.*

---

percoid *(noun)*

Any of numerous spiny-finned fishes of the order Perciformes.

- *He looked up "percoid" because he had never seen it before.*
- *In class, the teacher used "percoid" to mean any of numerous spiny-finned fishes of the order....*

---

percoid fish *(noun)*

Any of numerous spiny-finned fishes of the order Perciformes.

- *In class, the teacher used "percoid fish" to mean any of numerous spiny-finned fishes of the order....*
- *Understanding "percoid fish" helps you talk about this topic clearly.*

---

percoidea *(noun)*

In some classifications nearly or exactly equivalent to the Perciformes which are considered a suborder.

- *He looked up "percoidea" because he had never seen it before.*
- *She wrote a short paragraph that included "percoidea."*

---

percoidean *(noun)*

Any of numerous spiny-finned fishes of the order Perciformes.

- *In class, the teacher used "percoidean" to mean any of numerous spiny-finned fishes of the order....*
- *Understanding "percoidean" helps you talk about this topic clearly.*

---

percomorphi *(noun)*

One of the largest natural groups of fishes of both marine and fresh water: true perches; basses; tuna.

- *He looked up "percomorphi" because he had never seen it before.*
- *In class, the teacher used "percomorphi" to mean one of the largest natural groups of fishes of both....*

---

percophidae *(noun)*

Percoid flatheads.

- *He looked up "percophidae" because he had never seen it before.*
- *They discussed "percophidae" during the group presentation.*

---

percuss *(verb)*

Strike or tap firmly.

- *The doctor percussed his chest and back.*
- *He did not know how to use "percuss" until he saw an example.*

---

percussor *(noun)*

(medicine) a small hammer with a rubber head used in percussive examinations of the chest and in testing reflexes.

- *Understanding "percussor" helps you talk about this topic clearly.*
- *The article explained what "percussor" means with a simple example.*

---

perdicidae *(noun)*

Old World partridges.

- *Understanding "perdicidae" helps you talk about this topic clearly.*
- *He looked up "perdicidae" because he had never seen it before.*

---

perdicinae *(noun)*

Old World partridges.

- *In class, the teacher used "perdicinae" to mean old world partridges.*
- *The article explained what "perdicinae" means with a simple example.*

perdurability *(noun)*

The property of being extremely durable.

- *He looked up "perdurability" because he had never seen it before.*
- *She wrote a short paragraph that included "perdurability."*

perdurable *(adjective)*

Very long lasting.

- *The perdurable granite of the ancient Appalachian spine of the continent.*
- *It is useful to describe something as "perdurable" when it is very long lasting.*

peregrinate *(verb)*

Travel around, through, or over, especially on foot.

- *Peregrinate the bridge.*
- *The coach explained when to use "peregrinate" and when to wait.*

perejil *(noun)*

A small uninhabited Mediterranean islet claimed by both Morocco and Spain.

- *The article explained what "perejil" means with a simple example.*
- *She wrote a short paragraph that included "perejil."*

perennate *(verb)*

Survive from season to season, of plants.

- *She tried to use "perennate" carefully so everyone would understand.*
- *He did not know how to use "perennate" until he saw an example.*

perennation *(noun)*

The process of living through a number of years (as a perennial plant).

- *They discussed "perennation" during the group presentation.*
- *Understanding "perennation" helps you talk about this topic clearly.*

pereskia *(noun)*

Genus of tropical American shrubby trees and woody climbers having slender branches with broad flat leaves and large panicles of flowers.

- *In class, the teacher used "pereskia" to mean genus of tropical american shrubby trees and woody....*
- *He looked up "pereskia" because he had never seen it before.*

pereskia aculeata *(noun)*

West Indian woody climber with spiny stems and numerous fragrant white flowers in panicles followed by small yellow to orange fruits.

- *In class, the teacher used "pereskia aculeata" to mean west indian woody climber with spiny stems and....*
- *The article explained what "pereskia aculeata" means with a simple example.*

perfervid *(adjective)*

Characterized by intense emotion.

- *Her writing became clearer after she learned "perfervid."*
- *The speaker chose "perfervid" because it captured the feeling precisely.*

perfidiousness *(noun)*

Betrayal of a trust.

- *They discussed "perfidiousness" during the group presentation.*
- *In class, the teacher used "perfidiousness" to mean betrayal of a trust.*

perfoliate *(adjective)*

(of a leaf) having the base united around (and apparently pierced by) the stem.

- *A "perfoliate" approach may work better in this case.*
- *Would you call this situation "perfoliate"? Explain why.*

perfoliate leaf *(noun)*

A leaf with the base united around–and apparently pierced by–the stem.

- *She wrote a short paragraph that included "perfoliate leaf."*
- *The article explained what "perfoliate leaf" means with a simple example.*

---

periarterial plexus *(noun)*

An autonomic plexus that accompanies an artery.

- *The article explained what "periarterial plexus" means with a simple example.*
- *In class, the teacher used "periarterial plexus" to mean an autonomic plexus that accompanies an artery.*

---

pericallis cruenta *(noun)*

Herb of Canary Islands widely cultivated for its blue or purple or red or variegated daisylike flowers.

- *Understanding "pericallis cruenta" helps you talk about this topic clearly.*
- *In class, the teacher used "pericallis cruenta" to mean herb of canary islands widely cultivated for its....*

---

pericallis hybrida *(noun)*

Herb derived from Pericallis cruenta and widely cultivated in a variety of profusely flowering forms with florets from white to pink to red or purple or violet or blue.

- *They discussed "pericallis hybrida" during the group presentation.*
- *The article explained what "pericallis hybrida" means with a simple example.*

---

pericardiac *(adjective)*

Located around the heart or relating to or affecting the pericardium.

- *The speaker chose "pericardiac" because it captured the feeling precisely.*
- *Would you call this situation "pericardiac"? Explain why.*

---

periclase *(noun)*

A white solid mineral that occurs naturally as periclase; a source of magnesium.

- *He looked up "periclase" because he had never seen it before.*
- *In class, the teacher used "periclase" to mean a white solid mineral that occurs naturally as....*

---

peridinian *(noun)*

Flagellate with a thick test composed of plates.

- *The article explained what "peridinian" means with a simple example.*
- *In class, the teacher used "peridinian" to mean flagellate with a thick test composed of plates.*

---

peridiniidae *(noun)*

Marine and freshwater dinoflagellates.

- *She wrote a short paragraph that included "peridiniidae."*
- *He looked up "peridiniidae" because he had never seen it before.*

---

perigon *(noun)*

An angle of 360 degrees.

- *In class, the teacher used "perigon" to mean an angle of 360 degrees.*
- *The article explained what "perigon" means with a simple example.*

---

perigonal *(adjective)*

Of or relating to a perigone.

- *Her writing became clearer after she learned "perigonal."*
- *Would you call this situation "perigonal"? Explain why.*

---

perigone *(noun)*

Collective term for the outer parts of a flower consisting of the calyx and corolla and enclosing the stamens and pistils.

- *They discussed "perigone" during the group presentation.*
- *Understanding "perigone" helps you talk about this topic clearly.*

---

perigonium *(noun)*

Collective term for the outer parts of a flower consisting of the calyx and corolla and enclosing the stamens and pistils.

- *She wrote a short paragraph that included "perigonium."*

- *The article explained what "perigonium" means with a simple example.*

---

perijove *(noun)*

Periapsis in orbit around Jupiter.

- *He looked up "perijove" because he had never seen it before.*
- *She wrote a short paragraph that included "perijove."*

---

perilune *(noun)*

Periapsis in orbit around the moon.

- *He looked up "perilune" because he had never seen it before.*
- *She wrote a short paragraph that included "perilune."*

---

perimysium *(noun)*

The sheath of connective tissue that covers a bundle of muscle fibers.

- *He looked up "perimysium" because he had never seen it before.*
- *She wrote a short paragraph that included "perimysium."*

---

perinasal *(adjective)*

Near the nose.

- *A "perinasal" approach may work better in this case.*
- *Her writing became clearer after she learned "perinasal."*

---

perinatologist *(noun)*

An obstetrician specializing in perinatology.

- *In class, the teacher used "perinatologist" to mean an obstetrician specializing in perinatology.*
- *The article explained what "perinatologist" means with a simple example.*

---

perineurium *(noun)*

The sheath of connective tissue that covers a bundle of nerve fibers.

- *They discussed "perineurium" during the group presentation.*
- *The article explained what "perineurium" means with a simple example.*

---

periodontic *(adjective)*

Of or relating to or involving or practicing periodontics.

- *Would you call this situation "periodontic"? Explain why.*
- *Students compared "periodontic" with similar adjectives in the lesson.*

---

periophthalmus *(noun)*

A genus of Gobiidae.

- *She wrote a short paragraph that included "periophthalmus."*
- *He looked up "periophthalmus" because he had never seen it before.*

---

peripatidae *(noun)*

A family of Onychophora.

- *Understanding "peripatidae" helps you talk about this topic clearly.*
- *In class, the teacher used "peripatidae" to mean a family of onychophora.*

---

peripatopsidae *(noun)*

A family of Onychophora.

- *He looked up "peripatopsidae" because he had never seen it before.*
- *She wrote a short paragraph that included "peripatopsidae."*

---

peripatopsis *(noun)*

Type genus of Peripatopsidae; onychophorans of chiefly Asiatic and African tropical regions.

- *She wrote a short paragraph that included "peripatopsis."*
- *He looked up "peripatopsis" because he had never seen it before.*

---

peripatus *(noun)*

Any of numerous velvety-skinned wormlike carnivorous animals common in tropical forests having characteristics of both arthropods and annelid worms.

- *They discussed "peripatus" during the group presentation.*
- *She wrote a short paragraph that included "peripatus."*

---

periplaneta australasiae *(noun)*

Widely distributed in warm countries.

- *In class, the teacher used "periplaneta australasiae" to mean widely distributed in warm countries.*
- *The article explained what "periplaneta australasiae" means with a simple example.*

---

periploca *(noun)*

Genus of woody vines of warm regions of the Old World.

- *They discussed "periploca" during the group presentation.*
- *She wrote a short paragraph that included "periploca."*

---

periploca graeca *(noun)*

Deciduous climber for arches and fences having ill-scented but interesting flowers and poisonous yellow fruits; cultivated for its dark shining foliage; southeastern Europe to Asia Minor.

- *In class, the teacher used "periploca graeca" to mean deciduous climber for arches and fences having....*
- *He looked up "periploca graeca" because he had never seen it before.*

---

peripteral *(adjective)*

Having columns on all sides.

- *It is useful to describe something as "peripteral" when it is having columns on all sides.*
- *Would you call this situation "peripteral"? Explain why.*

---

periselene *(noun)*

Periapsis in orbit around the moon.

- *In class, the teacher used "periselene" to mean periapsis in orbit around the moon.*
- *They discussed "periselene" during the group presentation.*

---

perisoreus *(noun)*

Canada jays.

- *She wrote a short paragraph that included "perisoreus."*
- *He looked up "perisoreus" because he had never seen it before.*

---

perisoreus canadensis *(noun)*

A jay of northern North America with black-capped head and no crest; noted for boldness in thievery.

- *Understanding "perisoreus canadensis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "perisoreus canadensis."*

---

perisoreus canadensis capitalis *(noun)*

A Canada jay with a white head; widely distributed from Montana to Arizona.

- *He looked up "perisoreus canadensis capitalis" because he had never seen it before.*
- *In class, the teacher used "perisoreus canadensis capitalis" to mean a canada jay with a white head; widely distributed....*

---

perisperm *(noun)*

The nutritive tissue outside the sac containing the embryo in some seeds.

- *They discussed "perisperm" during the group presentation.*
- *In class, the teacher used "perisperm" to mean the nutritive tissue outside the sac containing the....*

---

perissodactyl *(noun)*

Placental mammals having hooves with an odd number of toes on each foot.

- *He looked up "perissodactyl" because he had never seen it before.*
- *Understanding "perissodactyl" helps you talk about this topic clearly.*

---

perissodactyl mammal *(noun)*

Placental mammals having hooves with an odd number of toes on each foot.

- *They discussed "perissodactyl mammal" during the group presentation.*
- *The article explained what "perissodactyl mammal" means with a simple example.*

---

peristediinae *(noun)*

In some classifications considered a subfamily of Triglidae comprising the armored searobins.

- *Understanding "peristediinae" helps you talk about this topic clearly.*
- *They discussed "peristediinae" during the group presentation.*

---

peristedion *(noun)*

In some classifications the type genus of the subfamily Peristediinae: armored sea robins.

- *Understanding "peristedion" helps you talk about this topic clearly.*
- *In class, the teacher used "peristedion" to mean in some classifications the type genus of the....*

---

peristedion miniatum *(noun)*

Sea robins having bony scutes on the body and barbels on the chin; found mostly on the continental slope.

- *Understanding "peristedion miniatum" helps you talk about this topic clearly.*
- *In class, the teacher used "peristedion miniatum" to mean sea robins having bony scutes on the body and....*

---

peristylar *(adjective)*

Having columniation completely circling an area of the structure.

- *A "peristylar" approach may work better in this case.*
- *It is useful to describe something as "peristylar" when it is having columniation completely circling an area of....*

---

perithecium *(noun)*

Flask-shaped ascocarp.

- *She wrote a short paragraph that included "perithecium."*
- *He looked up "perithecium" because he had never seen it before.*

---

perithelial *(adjective)*

Of or relating to the tissue layer around small blood vessels.

- *Her writing became clearer after she learned "perithelial."*
- *Would you call this situation "perithelial"? Explain why.*

---

perithelium *(noun)*

Tissue layer around small blood vessels.

- *He looked up "perithelium" because he had never seen it before.*
- *In class, the teacher used "perithelium" to mean tissue layer around small blood vessels.*

---

peritrate *(noun)*

A coronary vasodilator (trade name Peritrate) used to treat angina pectoris.

- *He looked up "peritrate" because he had never seen it before.*
- *They discussed "peritrate" during the group presentation.*

- *In class, the teacher used "electronic simulative deception" to mean actions to represent friendly notional or actual....*
- *The article explained what "electronic simulative deception" means with a simple example.*

eleutherodactylus *(noun)*

Completely terrestrial robber frogs.

- *He looked up "eleutherodactylus" because he had never seen it before.*
- *They discussed "eleutherodactylus" during the group presentation.*

embalmment *(noun)*

Preservation (of a dead body) by treating with balsams and drugs and other chemicals.

- *Understanding "embalmment" helps you talk about this topic clearly.*
- *The article explained what "embalmment" means with a simple example.*

embarkment *(noun)*

The act of passengers and crew getting aboard a ship or aircraft.

- *In class, the teacher used "embarkment" to mean the act of passengers and crew getting aboard a....*
- *He looked up "embarkment" because he had never seen it before.*

emda *(noun)*

Therapy that uses a local electric current to introduce the ions of a medicine into the tissues.

- *They discussed "emda" during the group presentation.*
- *Understanding "emda" helps you talk about this topic clearly.*

encephalography *(noun)*

Roentgenography of the brain after spinal fluid has been replaced by a gas (usually oxygen); produces an encephalogram.

- *He looked up "encephalography" because he had never seen it before.*
- *Understanding "encephalography" helps you talk about this topic clearly.*

enterostomy *(noun)*

Surgical operation that creates a permanent opening through the abdominal wall into the intestine.

- *She wrote a short paragraph that included "enterostomy."*
- *He looked up "enterostomy" because he had never seen it before.*

---

enterotomy *(noun)*

Surgical operation that creates a permanent opening through the abdominal wall into the intestine.

- *In class, the teacher used "enterotomy" to mean surgical operation that creates a permanent opening....*
- *Understanding "enterotomy" helps you talk about this topic clearly.*

---

epikeratophakia *(noun)*

Using a piece of donated corneal tissue to repair the eye of someone who has had a cataract removed.

- *Epikeratophakia gave her a living contact lens.*
- *Understanding "epikeratophakia" helps you talk about this topic clearly.*

---

ergotropism *(noun)*

An affinity for work.

- *They discussed "ergotropism" during the group presentation.*
- *He looked up "ergotropism" because he had never seen it before.*

---

eructation *(noun)*

A reflex that expels gas noisily from the stomach through the mouth.

- *In class, the teacher used "eructation" to mean a reflex that expels gas noisily from the stomach....*
- *The article explained what "eructation" means with a simple example.*

---

espial *(noun)*

The act of detecting something; catching sight of something.

- *Understanding "espial" helps you talk about this topic clearly.*
- *The article explained what "espial" means with a simple example.*

---

estraterrestrial body *(noun)*

A natural object existing outside the earth and outside the earth's atmosphere.

- *He looked up "estraterrestrial body" because he had never seen it before.*
- *They discussed "estraterrestrial body" during the group presentation.*

---

eupnea *(noun)*

Normal relaxed breathing.

- *Understanding "eupnea" helps you talk about this topic clearly.*
- *The article explained what "eupnea" means with a simple example.*

---

eupnoea *(noun)*

Normal relaxed breathing.

- *They discussed "eupnoea" during the group presentation.*
- *She wrote a short paragraph that included "eupnoea."*

---

eurhythmics *(noun)*

The interpretation in harmonious bodily movements of the rhythm of musical compositions; used to teach musical understanding.

- *They discussed "eurhythmics" during the group presentation.*
- *The article explained what "eurhythmics" means with a simple example.*

---

eurhythmy *(noun)*

The interpretation in harmonious bodily movements of the rhythm of musical compositions; used to teach musical understanding.

- *They discussed "eurhythmy" during the group presentation.*
- *Understanding "eurhythmy" helps you talk about this topic clearly.*

---

eutamius asiaticus *(noun)*

Terrestrial Siberian squirrel.

- *The article explained what "eutamius asiaticus" means with a simple example.*

- *They discussed "eutamius asiaticus" during the group presentation.*

eutamius sibiricus *(noun)*

Terrestrial Siberian squirrel.

- *He looked up "eutamius sibiricus" because he had never seen it before.*
- *In class, the teacher used "eutamius sibiricus" to mean terrestrial siberian squirrel.*

everting *(noun)*

The act of turning inside out.

- *He looked up "everting" because he had never seen it before.*
- *She wrote a short paragraph that included "everting."*

excruciation *(noun)*

The infliction of extremely painful punishment or suffering.

- *He looked up "excruciation" because he had never seen it before.*
- *Understanding "excruciation" helps you talk about this topic clearly.*

expressage *(noun)*

Rapid transport of goods.

- *They discussed "expressage" during the group presentation.*
- *She wrote a short paragraph that included "expressage."*

expunction *(noun)*

Deletion by an act of expunging or erasing.

- *The article explained what "expunction" means with a simple example.*
- *In class, the teacher used "expunction" to mean deletion by an act of expunging or erasing.*

expurgation *(noun)*

The deletion of objectionable parts from a literary work.

- *In class, the teacher used "expurgation" to mean the deletion of objectionable parts from a literary....*
- *The article explained what "expurgation" means with a simple example.*

extemporisation *(noun)*

A performance given extempore without planning or preparation.

- *They discussed "extemporisation" during the group presentation.*
- *In class, the teacher used "extemporisation" to mean a performance given extempore without planning or....*

extemporization *(noun)*

A performance given extempore without planning or preparation.

- *In class, the teacher used "extemporization" to mean a performance given extempore without planning or....*
- *Understanding "extemporization" helps you talk about this topic clearly.*

exteriorisation *(noun)*

Embodying in an outward form.

- *The article explained what "exteriorisation" means with a simple example.*
- *In class, the teacher used "exteriorisation" to mean embodying in an outward form.*

exterritorial *(adjective)*

Outside territorial limits or jurisdiction.

- *Enjoying exterritorial privileges and rights.*
- *It is useful to describe something as "exterritorial" when it is outside territorial limits or jurisdiction.*

eyedrop *(noun)*

A method of irrigating the eye used by ophthalmologists.

- *He looked up "eyedrop" because he had never seen it before.*
- *She wrote a short paragraph that included "eyedrop."*

family plethodontidae *(noun)*

- *In class, the teacher used "family plethodontidae" to mean small mostly terrestrial new world salamanders....*
- *The article explained what "family plethodontidae" means with a simple example.*

---

family struthionidae *(noun)*

Tall terrestrial birds: ostriches.

- *The article explained what "family struthionidae" means with a simple example.*
- *They discussed "family struthionidae" during the group presentation.*

---

fatism *(noun)*

Discrimination against people who are overweight.

- *Understanding "fatism" helps you talk about this topic clearly.*
- *He looked up "fatism" because he had never seen it before.*

---

fattism *(noun)*

Discrimination against people who are overweight.

- *He looked up "fattism" because he had never seen it before.*
- *She wrote a short paragraph that included "fattism."*

---

fellation *(noun)*

Oral stimulation of the penis.

- *He looked up "fellation" because he had never seen it before.*
- *She wrote a short paragraph that included "fellation."*

---

fetich *(noun)*

Excessive or irrational devotion to some activity.

- *The article explained what "fetich" means with a simple example.*
- *She wrote a short paragraph that included "fetich."*

---

fetometry *(noun)*

Measurement of a fetus (especially the diameter of the head).

- *She wrote a short paragraph that included "fetometry."*
- *Understanding "fetometry" helps you talk about this topic clearly.*

---

fetoscopy *(noun)*

Prenatal diagnosis that allows direct observation of a fetus in the uterus and the withdrawal of fetal blood.

- *He looked up "fetoscopy" because he had never seen it before.*
- *She wrote a short paragraph that included "fetoscopy."*

---

fishworm *(noun)*

Terrestrial worm that burrows into and helps aerate soil; often surfaces when the ground is cool or wet; used as bait by anglers.

- *The article explained what "fishworm" means with a simple example.*
- *In class, the teacher used "fishworm" to mean terrestrial worm that burrows into and helps aerate....*

---

fissiped *(noun)*

Terrestrial carnivores; having toes separated to the base: dogs; cats; bears; badgers; raccoons.

- *The article explained what "fissiped" means with a simple example.*
- *They discussed "fissiped" during the group presentation.*

---

fissiped mammal *(noun)*

Terrestrial carnivores; having toes separated to the base: dogs; cats; bears; badgers; raccoons.

- *He looked up "fissiped mammal" because he had never seen it before.*
- *They discussed "fissiped mammal" during the group presentation.*

---

floorshow *(noun)*

A series of acts at a night club.

- *They discussed "floorshow" during the group presentation.*
- *The article explained what "floorshow" means with a simple example.*

---

fluoridisation *(noun)*

The addition of a fluoride to the water supply (to prevent dental decay).

- *He looked up "fluoridisation" because he had never seen it before.*
- *They discussed "fluoridisation" during the group presentation.*

---

fluoridization *(noun)*

The addition of a fluoride to the water supply (to prevent dental decay).

- *They discussed "fluoridization" during the group presentation.*
- *In class, the teacher used "fluoridization" to mean the addition of a fluoride to the water supply (to....*

---

foetometry *(noun)*

Measurement of a fetus (especially the diameter of the head).

- *He looked up "foetometry" because he had never seen it before.*
- *In class, the teacher used "foetometry" to mean measurement of a fetus (especially the diameter of....*

---

foetoscopy *(noun)*

Prenatal diagnosis that allows direct observation of a fetus in the uterus and the withdrawal of fetal blood.

- *She wrote a short paragraph that included "foetoscopy."*
- *They discussed "foetoscopy" during the group presentation.*

---

footfault *(noun)*

A fault that occurs when the server in tennis fails to keep both feet behind the baseline.

- *Understanding "footfault" helps you talk about this topic clearly.*
- *In class, the teacher used "footfault" to mean a fault that occurs when the server in tennis fails....*

---

forbiddance *(noun)*

The action of prohibiting or inhibiting or forbidding (or an instance thereof).

- *He ignored his parents' forbiddance.*
- *The article explained what "forbiddance" means with a simple example.*

---

foremanship *(noun)*

The position of foreman.

- *He looked up "foremanship" because he had never seen it before.*
- *She wrote a short paragraph that included "foremanship."*

---

funambulism *(noun)*

Walking on a tightrope or slack rope.

- *They discussed "funambulism" during the group presentation.*
- *Understanding "funambulism" helps you talk about this topic clearly.*

---

galvanisation *(noun)*

Stimulation that arouses a person to lively action.

- *In class, the teacher used "galvanisation" to mean stimulation that arouses a person to lively action.*
- *He looked up "galvanisation" because he had never seen it before.*

---

gaolbreak *(noun)*

An escape from jail.

- *In class, the teacher used "gaolbreak" to mean an escape from jail.*
- *The article explained what "gaolbreak" means with a simple example.*

---

gastroenterostomy *(noun)*

Surgical creation of an opening between the stomach wall and the small intestines; performed when the normal opening has been eliminated.

- *The article explained what "gastroenterostomy" means with a simple example.*
- *In class, the teacher used "gastroenterostomy" to mean surgical creation of an opening between the stomach....*

gastrogavage *(noun)*

Feeding a nutrient solution into the stomach through a tube through a surgically created opening.

- *The article explained what "gastrogavage" means with a simple example.*
- *They discussed "gastrogavage" during the group presentation.*

gastromy *(noun)*

Surgical incision into the stomach.

- *He looked up "gastromy" because he had never seen it before.*
- *They discussed "gastromy" during the group presentation.*

gaucherie *(noun)*

A socially awkward or tactless act.

- *They discussed "gaucherie" during the group presentation.*
- *He looked up "gaucherie" because he had never seen it before.*

generalcy *(noun)*

The office and authority of a general.

- *In class, the teacher used "generalcy" to mean the office and authority of a general.*
- *The article explained what "generalcy" means with a simple example.*

genus eleutherodactylus *(noun)*

Completely terrestrial robber frogs.

- *In class, the teacher used "genus eleutherodactylus" to mean completely terrestrial robber frogs.*
- *The article explained what "genus eleutherodactylus" means with a simple example.*

genus trialeurodes *(noun)*

A genus of Aleyrodidae.

- *They discussed "genus trialeurodes" during the group presentation.*
- *Understanding "genus trialeurodes" helps you talk about this topic clearly.*

geococcyx californianus *(noun)*

Speedy largely terrestrial bird found from California and Mexico to Texas.

- *He looked up "geococcyx californianus" because he had never seen it before.*
- *They discussed "geococcyx californianus" during the group presentation.*

geophagia *(noun)*

Eating earth, clay, chalk; occurs in some primitive tribes, sometimes in cases of nutritional deficiency or obsessive behavior.

- *The article explained what "geophagia" means with a simple example.*
- *Understanding "geophagia" helps you talk about this topic clearly.*

geophagy *(noun)*

Eating earth, clay, chalk; occurs in some primitive tribes, sometimes in cases of nutritional deficiency or obsessive behavior.

- *In class, the teacher used "geophagy" to mean eating earth, clay, chalk; occurs in some primitive....*
- *He looked up "geophagy" because he had never seen it before.*

geotropism *(noun)*

An orienting response to gravity.

- *They discussed "geotropism" during the group presentation.*
- *Understanding "geotropism" helps you talk about this topic clearly.*

glamorisation *(noun)*

The act of glamorizing; making something or someone more beautiful (often in a superficial way).

- *The article explained what "glamorisation" means with a simple example.*

- *She wrote a short paragraph that included "grigori efimovich rasputin."*
- *They discussed "grigori efimovich rasputin" during the group presentation.*

---

gujerat *(noun)*

An industrialized state in western India that includes parts of Bombay.

- *He looked up "gujerat" because he had never seen it before.*
- *Understanding "gujerat" helps you talk about this topic clearly.*

---

gynaeolatry *(noun)*

The worship of women.

- *They discussed "gynaeolatry" during the group presentation.*
- *She wrote a short paragraph that included "gynaeolatry."*

---

gyneolatry *(noun)*

The worship of women.

- *He looked up "gyneolatry" because he had never seen it before.*
- *In class, the teacher used "gyneolatry" to mean the worship of women.*

---

hackee *(noun)*

Small striped semiterrestrial eastern American squirrel with cheek pouches.

- *The article explained what "hackee" means with a simple example.*

- *In class, the teacher used "hackee" to mean small striped semiterrestrial eastern american....*

---

hackwork *(noun)*

Professional work done according to formula.

- *In class, the teacher used "hackwork" to mean professional work done according to formula.*
- *They discussed "hackwork" during the group presentation.*

---

haematemesis *(noun)*

Vomiting blood.

- *He looked up "haematemesis" because he had never seen it before.*
- *She wrote a short paragraph that included "haematemesis."*

---

haemorrhoidectomy *(noun)*

Surgical procedure for tying hemorrhoids and excising them.

- *The article explained what "haemorrhoidectomy" means with a simple example.*
- *She wrote a short paragraph that included "haemorrhoidectomy."*

---

haemostasia *(noun)*

Surgical procedure of stopping the flow of blood (as with a hemostat).

- *The article explained what "haemostasia" means with a simple example.*
- *She wrote a short paragraph that included "haemostasia."*

---

hagiolatry *(noun)*

The worship of saints.

- *Understanding "hagiolatry" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hagiolatry."*

---

hairweaving *(noun)*

- *The article explained what "hairweaving" means with a simple example.*
- *Understanding "hairweaving" helps you talk about this topic clearly.*

---

harikari *(noun)*

Ritual suicide by self-disembowelment on a sword; practiced by samurai in the traditional Japanese society.

- *The article explained what "harikari" means with a simple example.*
- *Understanding "harikari" helps you talk about this topic clearly.*

---

headmastership *(noun)*

The position of headmaster.

- *Understanding "headmastership" helps you talk about this topic clearly.*
- *In class, the teacher used "headmastership" to mean the position of headmaster.*

---

headmistressship *(noun)*

The position of headmistress.

- *In class, the teacher used "headmistressship" to mean the position of headmistress.*
- *They discussed "headmistressship" during the group presentation.*

---

headshaking *(noun)*

The act of turning your head left and right to signify denial or disbelief or bemusement.

- *The article explained what "headshaking" means with a simple example.*
- *Understanding "headshaking" helps you talk about this topic clearly.*

---

heimlich manoeuvere *(noun)*

An emergency procedure to help someone who is choking because food is lodged in the trachea.

- *Understanding "heimlich manoeuvere" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "heimlich manoeuvere."*

---

heliolatry *(noun)*

The worship of the sun.

- *They discussed "heliolatry" during the group presentation.*
- *The article explained what "heliolatry" means with a simple example.*

---

heliotherapy *(noun)*

Therapeutic exposure to sunlight.

- *He looked up "heliotherapy" because he had never seen it before.*
- *Understanding "heliotherapy" helps you talk about this topic clearly.*

---

heliotropism *(noun)*

An orienting response to the sun.

- *The article explained what "heliotropism" means with a simple example.*
- *In class, the teacher used "heliotropism" to mean an orienting response to the sun.*

---

hemipode *(noun)*

Small quail-like terrestrial bird of southern Eurasia and northern Africa that lacks a hind toe; classified with wading birds but inhabits grassy plains.

- *The article explained what "hemipode" means with a simple example.*
- *Understanding "hemipode" helps you talk about this topic clearly.*

---

hemostasia *(noun)*

Surgical procedure of stopping the flow of blood (as with a hemostat).

- *Understanding "hemostasia" helps you talk about this topic clearly.*
- *In class, the teacher used "hemostasia" to mean surgical procedure of stopping the flow of blood....*

---

heterosexualism *(noun)*

A sexual attraction to (or sexual relations with) persons of the opposite sex.

- *Understanding "heterosexualism" helps you talk about this topic clearly.*
- *He looked up "heterosexualism" because he had never seen it before.*

---

hierolatry *(noun)*

The worship of saints.

- *They discussed "hierolatry" during the group presentation.*
- *He looked up "hierolatry" because he had never seen it before.*

---

hirudinea *(noun)*

Hermaphroditic aquatic or terrestrial or parasitic annelids.

- *They discussed "hirudinea" during the group presentation.*
- *In class, the teacher used "hirudinea" to mean hermaphroditic aquatic or terrestrial or parasitic....*

---

hirudinean *(noun)*

Carnivorous or bloodsucking aquatic or terrestrial worms typically having a sucker at each end.

- *She wrote a short paragraph that included "hirudinean."*
- *He looked up "hirudinean" because he had never seen it before.*

---

hobbyism *(noun)*

A devotion to hobbies.

- *The article explained what "hobbyism" means with a simple example.*
- *In class, the teacher used "hobbyism" to mean a devotion to hobbies.*

---

---

humanisation *(noun)*

The act of making more human.

- *In class, the teacher used "humanisation" to mean the act of making more human.*
- *The article explained what "humanisation" means with a simple example.*

---

hydrometry *(noun)*

The measurement of specific gravity.

- *She wrote a short paragraph that included "hydrometry."*
- *Understanding "hydrometry" helps you talk about this topic clearly.*

---

hylocichla guttata *(noun)*

North American thrush noted for its complex and appealing song.

- *Understanding "hylocichla guttata" helps you talk about this topic clearly.*
- *In class, the teacher used "hylocichla guttata" to mean north american thrush noted for its complex and....*

---

hyperalimentation *(noun)*

Administration of a nutritionally adequate solution through a catheter into the vena cava; used in cases of long-term coma or severe burns or severe gastrointestinal syndromes.

- *She wrote a short paragraph that included "hyperalimentation."*
- *The article explained what "hyperalimentation" means with a simple example.*

---

hyperpnea *(noun)*

Energetic (deep and rapid) respiration that occurs normally after exercise or abnormally with fever or various disorders.

- *In class, the teacher used "hyperpnea" to mean energetic (deep and rapid) respiration that occurs....*
- *He looked up "hyperpnea" because he had never seen it before.*

---

hypnoanalysis *(noun)*

The use of hypnosis in conjunction with psychoanalysis.

- *He looked up "hypnoanalysis" because he had never seen it before.*
- *They discussed "hypnoanalysis" during the group presentation.*

hypnogenesis *(noun)*

The induction of sleep or hypnosis.

- *In class, the teacher used "hypnogenesis" to mean the induction of sleep or hypnosis.*
- *They discussed "hypnogenesis" during the group presentation.*

hypnopedia *(noun)*

Teaching during sleep (as by using recordings to teach a foreign language to someone who is asleep).

- *They discussed "hypnopedia" during the group presentation.*
- *In class, the teacher used "hypnopedia" to mean teaching during sleep (as by using recordings to....*

hypophysectomy *(noun)*

Surgical removal of the pituitary gland.

- *The article explained what "hypophysectomy" means with a simple example.*
- *She wrote a short paragraph that included "hypophysectomy."*

hypostatisation *(noun)*

Regarding something abstract as a material thing.

- *She wrote a short paragraph that included "hypostatisation."*
- *Understanding "hypostatisation" helps you talk about this topic clearly.*

hypostatization *(noun)*

Regarding something abstract as a material thing.

- *Understanding "hypostatization" helps you talk about this topic clearly.*
- *The article explained what "hypostatization" means with a simple example.*

hypsometry *(noun)*

Measurement of the elevation of land above sea level.

- *Understanding "hypsometry" helps you talk about this topic clearly.*
- *He looked up "hypsometry" because he had never seen it before.*

hysterotomy *(noun)*

Surgical incision into the uterus (as in cesarean section).

- *The article explained what "hysterotomy" means with a simple example.*
- *In class, the teacher used "hysterotomy" to mean surgical incision into the uterus (as in cesarean....*

ichthyolatry *(noun)*

The worship of fish.

- *Understanding "ichthyolatry" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ichthyolatry."*

iconolatry *(noun)*

The worship of sacred images.

- *In class, the teacher used "iconolatry" to mean the worship of sacred images.*
- *He looked up "iconolatry" because he had never seen it before.*

idiolatry *(noun)*

The worship of yourself.

- *They discussed "idiolatry" during the group presentation.*
- *Understanding "idiolatry" helps you talk about this topic clearly.*

idolisation *(noun)*

The act of worshiping blindly and to excess.

- *She wrote a short paragraph that included "idolisation."*
- *He looked up "idolisation" because he had never seen it before.*

incasement *(noun)*

The act of enclosing something in a case.

- *She wrote a short paragraph that included "incasement."*
- *He looked up "incasement" because he had never seen it before.*

---

incendiarism *(noun)*

Malicious burning to destroy property.

- *He looked up "incendiarism" because he had never seen it before.*
- *She wrote a short paragraph that included "incendiarism."*

---

incitation *(noun)*

An act of urging on or spurring on or rousing to action or instigating.

- *In class, the teacher used "incitation" to mean an act of urging on or spurring on or rousing to....*
- *The article explained what "incitation" means with a simple example.*

---

indecorum *(noun)*

An act of undue intimacy.

- *In class, the teacher used "indecorum" to mean an act of undue intimacy.*
- *The article explained what "indecorum" means with a simple example.*

---

ingraining *(noun)*

Teaching or impressing upon the mind by frequent instruction or repetition.

- *In class, the teacher used "ingraining" to mean teaching or impressing upon the mind by frequent....*
- *He looked up "ingraining" because he had never seen it before.*

---

inhabitancy *(noun)*

The act of dwelling in or living permanently in a place (said of both animals and men).

- *He looked up "inhabitancy" because he had never seen it before.*
- *In class, the teacher used "inhabitancy" to mean the act of dwelling in or living permanently in a....*

---

inspectorship *(noun)*

The office of inspector.

- *The article explained what "inspectorship" means with a simple example.*
- *In class, the teacher used "inspectorship" to mean the office of inspector.*

---

instillment *(noun)*

The introduction of a liquid (by pouring or injection) drop by drop.

- *The article explained what "instillment" means with a simple example.*
- *Understanding "instillment" helps you talk about this topic clearly.*

---

instilment *(noun)*

The introduction of a liquid (by pouring or injection) drop by drop.

- *The article explained what "instilment" means with a simple example.*
- *They discussed "instilment" during the group presentation.*

---

instructorship *(noun)*

The position of instructor.

- *They discussed "instructorship" during the group presentation.*
- *In class, the teacher used "instructorship" to mean the position of instructor.*

---

intemperateness *(noun)*

- *In class, the teacher used "metaurus river" to mean a battle during the second punic war (207 bc);....*
- *Understanding "metaurus river" helps you talk about this topic clearly.*

---

meteortropism *(noun)*

An effect of climate on biological processes (as the effect on joint pains etc.).

- *In class, the teacher used "meteortropism" to mean an effect of climate on biological processes (as....*
- *The article explained what "meteortropism" means with a simple example.*

---

metrazol shock *(noun)*

The administration of sufficient Metrazol to induce convulsions and coma.

- *In class, the teacher used "metrazol shock" to mean the administration of sufficient metrazol to induce....*
- *The article explained what "metrazol shock" means with a simple example.*

---

metrazol shock therapy *(noun)*

The administration of sufficient Metrazol to induce convulsions and coma.

- *They discussed "metrazol shock therapy" during the group presentation.*
- *In class, the teacher used "metrazol shock therapy" to mean the administration of sufficient metrazol to induce....*

---

metrazol shock treatment *(noun)*

The administration of sufficient Metrazol to induce convulsions and coma.

- *He looked up "metrazol shock treatment" because he had never seen it before.*
- *She wrote a short paragraph that included "metrazol shock treatment."*

---

metrification *(noun)*

The act of changing from imperial units of measurement to metric units: meters, grams, seconds.

- *He looked up "metrification" because he had never seen it before.*
- *She wrote a short paragraph that included "metrification."*

---

micrometry *(noun)*

Measuring with a micrometer.

- *She wrote a short paragraph that included "micrometry."*
- *They discussed "micrometry" during the group presentation.*

---

militainment *(noun)*

Entertainment with military themes in which the Department of Defense is celebrated.

- *She wrote a short paragraph that included "militainment."*
- *Understanding "militainment" helps you talk about this topic clearly.*

---

miotic eyedrop *(noun)*

A treatment for glaucoma; the eyedrops increase the outflow of aqueous humor by constricting the pupil.

- *The article explained what "miotic eyedrop" means with a simple example.*
- *She wrote a short paragraph that included "miotic eyedrop."*

misestimation *(noun)*

A mistake in calculating.

- *He looked up "misestimation" because he had never seen it before.*
- *Understanding "misestimation" helps you talk about this topic clearly.*

mishegaas *(noun)*

(Yiddish) craziness; senseless behavior or activity.

- *He looked up "mishegaas" because he had never seen it before.*
- *They discussed "mishegaas" during the group presentation.*

mishegoss *(noun)*

(Yiddish) craziness; senseless behavior or activity.

- *In class, the teacher used "mishegoss" to mean (yiddish) craziness; senseless behavior or activity.*
- *They discussed "mishegoss" during the group presentation.*

misreckoning *(noun)*

A mistake in calculating.

- *They discussed "misreckoning" during the group presentation.*
- *She wrote a short paragraph that included "misreckoning."*

moderatorship *(noun)*

The position of moderator.

- *They discussed "moderatorship" during the group presentation.*
- *She wrote a short paragraph that included "moderatorship."*

mohria *(noun)*

African terrestrial ferns.

- *He looked up "mohria" because he had never seen it before.*
- *She wrote a short paragraph that included "mohria."*

mollification *(noun)*

The act of appeasing someone or causing someone to be more favorably inclined.

- *His unsuccessful mollification of the mob.*
- *In class, the teacher used "mollification" to mean the act of appeasing someone or causing someone to....*

momism *(noun)*

Excessive protection.

- *He looked up "momism" because he had never seen it before.*
- *She wrote a short paragraph that included "momism."*

monohybrid cross *(noun)*

Hybridization using a single trait with two alleles (as in Mendel's experiments with garden peas).

- *She wrote a short paragraph that included "monohybrid cross."*
- *They discussed "monohybrid cross" during the group presentation.*

monolatry *(noun)*

The worship of a single god but without claiming that it is the only god.

- *She wrote a short paragraph that included "monolatry."*
- *The article explained what "monolatry" means with a simple example.*

moralisation *(noun)*

The act of making moral (or more moral).

- *Understanding "moralisation" helps you talk about this topic clearly.*
- *The article explained what "moralisation" means with a simple example.*

mumblety-peg *(noun)*

A game in which players throw or flip a jackknife in various ways so that the knife sticks in the ground.

- *He looked up "mumblety-peg" because he had never seen it before.*
- *She wrote a short paragraph that included "mumblety-peg."*

---

muntingia *(noun)*

One species: Jamaican cherry; sometimes placed in family Flacourtiaceae.

- *In class, the teacher used "muntingia" to mean one species: jamaican cherry; sometimes placed in....*
- *He looked up "muntingia" because he had never seen it before.*

---

musclebuilding *(noun)*

Exercise that builds muscles through tension.

- *She wrote a short paragraph that included "musclebuilding."*
- *He looked up "musclebuilding" because he had never seen it before.*

---

mycophagy *(noun)*

The practice of eating fungi (especially mushrooms collected in the wild).

- *They discussed "mycophagy" during the group presentation.*
- *Understanding "mycophagy" helps you talk about this topic clearly.*

---

myotactic reflex *(noun)*

Reflex contraction of a muscle when an attached tendon is pulled; important in maintaining erect posture.

- *She wrote a short paragraph that included "myotactic reflex."*
- *Understanding "myotactic reflex" helps you talk about this topic clearly.*

---

myringectomy *(noun)*

Surgical removal of the eardrum.

- *They discussed "myringectomy" during the group presentation.*
- *She wrote a short paragraph that included "myringectomy."*

---

myringoplasty *(noun)*

Surgical repair of a perforated eardrum with a tissue graft.

- *Understanding "myringoplasty" helps you talk about this topic clearly.*
- *They discussed "myringoplasty" during the group presentation.*

---

myringotomy *(noun)*

Surgical incision into the eardrum (to relieve pressure or release pus from the middle ear).

- *In class, the teacher used "myringotomy" to mean surgical incision into the eardrum (to relieve....*
- *Understanding "myringotomy" helps you talk about this topic clearly.*

---

naprapathy *(noun)*

A drugless method of treatment based on the belief that disease symptoms arise from problems with ligaments and connective tissues.

- *In class, the teacher used "naprapathy" to mean a drugless method of treatment based on the belief....*
- *Understanding "naprapathy" helps you talk about this topic clearly.*

---

narcoterrorism *(noun)*

The financing of terrorist activities by participation in the drug trade.

- *In class, the teacher used "narcoterrorism" to mean the financing of terrorist activities by....*
- *Understanding "narcoterrorism" helps you talk about this topic clearly.*

---

narcotraffic *(noun)*

Traffic in illegal drugs.

- *In class, the teacher used "narcotraffic" to mean traffic in illegal drugs.*
- *The article explained what "narcotraffic" means with a simple example.*

---

nauch *(noun)*

An intricate traditional dance in India performed by professional dancing girls.

- *They discussed "nauch" during the group presentation.*

- *Understanding "nauch" helps you talk about this topic clearly.*

---

necrophagia *(noun)*

Feeding on corpses or carrion.

- *She wrote a short paragraph that included "necrophagia."*
- *He looked up "necrophagia" because he had never seen it before.*

---

necrophagy *(noun)*

Feeding on corpses or carrion.

- *He looked up "necrophagy" because he had never seen it before.*
- *In class, the teacher used "necrophagy" to mean feeding on corpses or carrion.*

---

nephrotomy *(noun)*

Incision into a kidney (usually to remove a kidney stone).

- *They discussed "nephrotomy" during the group presentation.*
- *She wrote a short paragraph that included "nephrotomy."*

---

neurectomy *(noun)*

Surgical removal of all or part of a nerve.

- *She wrote a short paragraph that included "neurectomy."*
- *They discussed "neurectomy" during the group presentation.*

---

neuroplasty *(noun)*

Plastic surgery of the nerves.

- *He looked up "neuroplasty" because he had never seen it before.*
- *In class, the teacher used "neuroplasty" to mean plastic surgery of the nerves.*

---

neurotropism *(noun)*

An affinity for neural tissues.

- *The article explained what "neurotropism" means with a simple example.*
- *They discussed "neurotropism" during the group presentation.*

---

nictation *(noun)*

A reflex that closes and opens the eyes rapidly.

- *The article explained what "nictation" means with a simple example.*
- *In class, the teacher used "nictation" to mean a reflex that closes and opens the eyes rapidly.*

---

nictitation *(noun)*

A reflex that closes and opens the eyes rapidly.

- *Understanding "nictitation" helps you talk about this topic clearly.*
- *In class, the teacher used "nictitation" to mean a reflex that closes and opens the eyes rapidly.*

---

nizhnyi novgorod *(noun)*

An industrial city in the European part of Russia; birthplace of Maksim Gorky.

- *She wrote a short paragraph that included "nizhnyi novgorod."*
- *The article explained what "nizhnyi novgorod" means with a simple example.*

---

A judgment entered in favor of the defendant when the plaintiff has not continued his action (e.g., has not appeared in court).

- *Understanding "non prosequitur" helps you talk about this topic clearly.*
- *The article explained what "non prosequitur" means with a simple example.*

---

nonacceptance *(noun)*

The act of refusing an offer.

- *In class, the teacher used "nonacceptance" to mean the act of refusing an offer.*
- *He looked up "nonacceptance" because he had never seen it before.*

---

nonaccomplishment *(noun)*

An act that does not achieve its intended goal.

- *Understanding "nonaccomplishment" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "nonaccomplishment."*

---

nonachievement *(noun)*

An act that does not achieve its intended goal.

- *He looked up "nonachievement" because he had never seen it before.*
- *In class, the teacher used "nonachievement" to mean an act that does not achieve its intended goal.*

---

nonappearance *(noun)*

Failure to appear (especially as at court).

- *The article explained what "nonappearance" means with a simple example.*
- *In class, the teacher used "nonappearance" to mean failure to appear (especially as at court).*

---

nonindustrial *(adjective)*

Not having highly developed manufacturing enterprises.

- *A nonindustrial society.*
- *Would you call this situation "nonindustrial"? Explain why.*

---

nonobservance *(noun)*

A lack of conformity with law or custom or practice etc.

- *The article explained what "nonobservance" means with a simple example.*
- *They discussed "nonobservance" during the group presentation.*

---

nosecount *(noun)*

A periodic count of the population.

- *In class, the teacher used "nosecount" to mean a periodic count of the population.*
- *Understanding "nosecount" helps you talk about this topic clearly.*

---

notophthalmus viridescens *(noun)*

Red terrestrial form of a common North American newt.

- *They discussed "notophthalmus viridescens" during the group presentation.*
- *The article explained what "notophthalmus viridescens" means with a simple example.*

---

numismatology *(noun)*

The collection and study of money (and coins in particular).

- *He looked up "numismatology" because he had never seen it before.*
- *In class, the teacher used "numismatology" to mean the collection and study of money (and coins in....*

---

nuytsia floribunda *(noun)*

A terrestrial evergreen shrub or small tree of western Australia having brilliant yellow-orange flowers; parasitic on roots of grasses.

- *The article explained what "nuytsia floribunda" means with a simple example.*
- *They discussed "nuytsia floribunda" during the group presentation.*

---

obtention *(noun)*

The act of obtaining.

- *In class, the teacher used "obtention" to mean the act of obtaining.*
- *They discussed "obtention" during the group presentation.*

---

obviation *(noun)*

Or family Polypodiaceae: tropical epiphytic or terrestrial ferns.

- *He looked up "oleandra" because he had never seen it before.*
- *She wrote a short paragraph that included "oleandra."*

---

olfersia cervina *(noun)*

Tropical American terrestrial fern with leathery lanceolate fronds; sometimes placed in genus Polybotrya.

- *The article explained what "olfersia cervina" means with a simple example.*
- *In class, the teacher used "olfersia cervina" to mean tropical american terrestrial fern with leathery....*

---

omophagia *(noun)*

The eating of raw food.

- *She wrote a short paragraph that included "omophagia."*
- *They discussed "omophagia" during the group presentation.*

---

onychium *(noun)*

Small terrestrial ferns of Old World tropics and subtropics: clawed ferns; sometimes placed in family Cryptogrammataceae.

- *In class, the teacher used "onychium" to mean small terrestrial ferns of old world tropics and....*
- *The article explained what "onychium" means with a simple example.*

---

onychophora *(noun)*

Enigmatic small elongated wormlike terrestrial invertebrates of damp dark habitats in warm regions; distinct from the phylum Annelida; resemble slugs with legs and are sometimes described as the missing link between arthropods and annelids.

- *In class, the teacher used "onychophora" to mean enigmatic small elongated wormlike terrestrial....*
- *The article explained what "onychophora" means with a simple example.*

---

oophorosalpingectomy *(noun)*

Surgical removal of one or both ovaries and the corresponding Fallopian tubes.

- *The article explained what "oophorosalpingectomy" means with a simple example.*
- *In class, the teacher used "oophorosalpingectomy" to mean surgical removal of one or both ovaries and the....*

---

ophiolatry *(noun)*

The worship of snakes.

- *She wrote a short paragraph that included "ophiolatry."*
- *They discussed "ophiolatry" during the group presentation.*

---

ophthalmectomy *(noun)*

Surgical removal of an eye.

- *In class, the teacher used "ophthalmectomy" to mean surgical removal of an eye.*
- *They discussed "ophthalmectomy" during the group presentation.*

orchidectomy *(noun)*

Surgical removal of one or both testicles.

- *In class, the teacher used "orchidectomy" to mean surgical removal of one or both testicles.*
- *Understanding "orchidectomy" helps you talk about this topic clearly.*

orchiopexy *(noun)*

Operation to bring an undescended testicle into the scrotum.

- *In class, the teacher used "orchiopexy" to mean operation to bring an undescended testicle into the....*
- *They discussed "orchiopexy" during the group presentation.*

orchotomy *(noun)*

Surgical incision into the testis to obtain material for analysis (as in cases of abnormally low sperm count).

- *In class, the teacher used "orchotomy" to mean surgical incision into the testis to obtain....*
- *The article explained what "orchotomy" means with a simple example.*

order ornithischia *(noun)*

Extinct terrestrial reptiles having bird-like pelvises: armored dinosaurs (thyreophorans); boneheaded and horned dinosaurs (marginocephalians); duck-billed dinosaurs (euronithopods).

- *The article explained what "order ornithischia" means with a simple example.*
- *She wrote a short paragraph that included "order ornithischia."*

order saurischia *(noun)*

Extinct terrestrial reptiles: theropods (carnivorous); sauropods (herbivorous).

- *Understanding "order saurischia" helps you talk about this topic clearly.*
- *In class, the teacher used "order saurischia" to mean extinct terrestrial reptiles: theropods....*

order thecodontia *(noun)*

Extinct terrestrial reptiles having teeth set in sockets; of the late Permian to Triassic.

- *Understanding "order thecodontia" helps you talk about this topic clearly.*
- *They discussed "order thecodontia" during the group presentation.*

ornamentalism *(noun)*

The practice of ornamental display.

- *He looked up "ornamentalism" because he had never seen it before.*
- *In class, the teacher used "ornamentalism" to mean the practice of ornamental display.*

ornithischia *(noun)*

Extinct terrestrial reptiles having bird-like pelvises: armored dinosaurs (thyreophorans); boneheaded and horned dinosaurs (marginocephalians); duck-billed dinosaurs (euronithopods).

- *She wrote a short paragraph that included "ornithischia."*
- *He looked up "ornithischia" because he had never seen it before.*

orthoptics *(noun)*

Treatment of defects of binocular vision (such as strabismus and amblyopia) by nonsurgical measures (especially by exercises to strengthen the eye muscles).

- *They discussed "orthoptics" during the group presentation.*
- *In class, the teacher used "orthoptics" to mean treatment of defects of binocular vision (such as....*

oscitance *(noun)*

An involuntary intake of breath through a wide open mouth; usually triggered by fatigue or boredom.

- *They discussed "oscitance" during the group presentation.*

Sexual relations between a man and a boy (usually anal intercourse with the boy as a passive partner).

- *In class, the teacher used "paederasty" to mean sexual relations between a man and a boy (usually....*
- *The article explained what "paederasty" means with a simple example.*

---

palatopharyngoplasty *(noun)*

Surgical resection of unnecessary palatal and oropharyngeal tissue to open the airway; intended to cure extreme cases of snoring (with or without sleep apnea).

- *He looked up "palatopharyngoplasty" because he had never seen it before.*

- *In class, the teacher used "palatopharyngoplasty" to mean surgical resection of unnecessary palatal and....*

---

palpebration *(noun)*

Repeated blinking or winking (especially if uncontrolled and persistent).

- *The article explained what "palpebration" means with a simple example.*
- *In class, the teacher used "palpebration" to mean repeated blinking or winking (especially if....*

---

paltering *(noun)*

A trivial act of lying or being deliberately unclear.

- *In class, the teacher used "paltering" to mean a trivial act of lying or being deliberately unclear.*
- *The article explained what "paltering" means with a simple example.*

---

pandiculation *(noun)*

Yawning and stretching (as when first waking up).

- *She wrote a short paragraph that included "pandiculation."*
- *The article explained what "pandiculation" means with a simple example.*

---

panhysterectomy *(noun)*

Surgical removal of the uterus and the ovaries and oviducts and cervix and related lymph nodes.

- *The article explained what "panhysterectomy" means with a simple example.*
- *She wrote a short paragraph that included "panhysterectomy."*

---

paperhanging *(noun)*

The application of wallpaper.

- *Understanding "paperhanging" helps you talk about this topic clearly.*
- *The article explained what "paperhanging" means with a simple example.*

---

parapraxis *(noun)*

A minor inadvertent mistake usually observed in speech or writing or in small accidents or memory lapses etc.

- *The article explained what "parapraxis" means with a simple example.*
- *Understanding "parapraxis" helps you talk about this topic clearly.*

---

parathelypteris *(noun)*

Terrestrial ferns of warm and tropical Asia and North America.

- *She wrote a short paragraph that included "parathelypteris."*
- *He looked up "parathelypteris" because he had never seen it before.*

---

parcellation *(noun)*

The division into parcels.

- *The increasing parcellation of land with every generation.*
- *In class, the teacher used "parcellation" to mean the division into parcels.*

---

parchesi *(noun)*

An ancient board game resembling backgammon; played on a cross-shaped board.

- *She wrote a short paragraph that included "parchesi."*
- *The article explained what "parchesi" means with a simple example.*

---

parchisi *(noun)*

An ancient board game resembling backgammon; played on a cross-shaped board.

- *They discussed "parchisi" during the group presentation.*
- *He looked up "parchisi" because he had never seen it before.*

---

pastorship *(noun)*

The position of pastor.

- *The article explained what "pastorship" means with a simple example.*
- *In class, the teacher used "pastorship" to mean the position of pastor.*

---

patrial *(noun)*

A person who has the right to be considered legally a British citizen (by virtue of the birth of a parent or grandparent).

- *They discussed "patrial" during the group presentation.*
- *She wrote a short paragraph that included "patrial."*

---

pauperisation *(noun)*

The act of making someone poor.

- *Understanding "pauperisation" helps you talk about this topic clearly.*
- *They discussed "pauperisation" during the group presentation.*

---

pavage *(noun)*

The act of applying paving materials to an area.

- *He looked up "pavage" because he had never seen it before.*
- *She wrote a short paragraph that included "pavage."*

---

- *They discussed "petasites" during the group presentation.*

petasites fragrans *(noun)*

European herb with vanilla-scented white-pink flowers.

- *Understanding "petasites fragrans" helps you talk about this topic clearly.*
- *They discussed "petasites fragrans" during the group presentation.*

petasites hybridus *(noun)*

Small Eurasian herb having broad leaves and lilac-pink rayless flowers; found in moist areas.

- *In class, the teacher used "petasites hybridus" to mean small eurasian herb having broad leaves and....*
- *The article explained what "petasites hybridus" means with a simple example.*

---

petasites sagitattus *(noun)*

American sweet-scented herb.

- *She wrote a short paragraph that included "petasites sagitattus."*
- *The article explained what "petasites sagitattus" means with a simple example.*

---

petasites vulgaris *(noun)*

Small Eurasian herb having broad leaves and lilac-pink rayless flowers; found in moist areas.

- *The article explained what "petasites vulgaris" means with a simple example.*
- *She wrote a short paragraph that included "petasites vulgaris."*

---

petaurista *(noun)*

Very large Asiatic flying squirrels.

- *He looked up "petaurista" because he had never seen it before.*
- *She wrote a short paragraph that included "petaurista."*

---

petaurista petaurista *(noun)*

East Indian flying squirrel.

- *He looked up "petaurista petaurista" because he had never seen it before.*
- *In class, the teacher used "petaurista petaurista" to mean east indian flying squirrel.*

---

petauristidae *(noun)*

Old World flying squirrels.

- *He looked up "petauristidae" because he had never seen it before.*
- *They discussed "petauristidae" during the group presentation.*

---

petaurus *(noun)*

A genus of Phalangeridae.

- *She wrote a short paragraph that included "petaurus."*
- *They discussed "petaurus" during the group presentation.*

---

petchary *(noun)*

A kingbird that breeds in the southeastern United States and winters in tropical America; similar to but larger than the eastern kingbird.

- *In class, the teacher used "petchary" to mean a kingbird that breeds in the southeastern united....*
- *The article explained what "petchary" means with a simple example.*

---

peter minnewit *(noun)*

Dutch colonist who bought Manhattan from the Native Americans for the equivalent of $24 (1580-1638).

- *They discussed "peter minnewit" during the group presentation.*
- *He looked up "peter minnewit" because he had never seen it before.*

---

petiolule *(noun)*

The stalk of a leaflet.

- *She wrote a short paragraph that included "petiolule."*
- *They discussed "petiolule" during the group presentation.*

---

petiteness *(noun)*

The property of being very small in size.

- *In class, the teacher used "petiteness" to mean the property of being very small in size.*
- *He looked up "petiteness" because he had never seen it before.*

---

petrissage *(noun)*

Massage of the skin which is gently lifted and squeezed.

- *They discussed "petrissage" during the group presentation.*

- *She wrote a short paragraph that included "petrissage."*

petrocoptis *(noun)*

Perennial tussock-forming rock plants; of Pyrenees and mountains of northern Spain; similar to and sometimes placed in genus Lychnis.

- *In class, the teacher used "petrocoptis" to mean perennial tussock-forming rock plants; of pyrenees....*
- *He looked up "petrocoptis" because he had never seen it before.*

petrogale *(noun)*

Rock wallabies.

- *The article explained what "petrogale" means with a simple example.*
- *Understanding "petrogale" helps you talk about this topic clearly.*

petromyzon *(noun)*

Typical lampreys.

- *They discussed "petromyzon" during the group presentation.*
- *Understanding "petromyzon" helps you talk about this topic clearly.*

petromyzon marinus *(noun)*

Large anadromous lamprey sometimes used as food; destructive of native fish fauna in the Great Lakes.

- *In class, the teacher used "petromyzon marinus" to mean large anadromous lamprey sometimes used as food;....*
- *The article explained what "petromyzon marinus" means with a simple example.*

petromyzoniformes *(noun)*

Lampreys as distinguished from hagfishes.

- *In class, the teacher used "petromyzoniformes" to mean lampreys as distinguished from hagfishes.*
- *The article explained what "petromyzoniformes" means with a simple example.*

petroselinum crispum *(noun)*

Annual or perennial herb with aromatic leaves.

- *He looked up "petroselinum crispum" because he had never seen it before.*
- *In class, the teacher used "petroselinum crispum" to mean annual or perennial herb with aromatic leaves.*

petroselinum crispum neapolitanum *(noun)*

A variety of parsley having flat leaves.

- *The article explained what "petroselinum crispum neapolitanum" means with a simple example.*
- *She wrote a short paragraph that included "petroselinum crispum neapolitanum."*

petroselinum crispum tuberosum *(noun)*

Parsley with smooth leaves and enlarged edible taproot resembling a savory parsnip.

- *Understanding "petroselinum crispum tuberosum" helps you talk about this topic clearly.*
- *They discussed "petroselinum crispum tuberosum" during the group presentation.*

petteria *(noun)*

One species: Dalmatian laburnum.

- *He looked up "petteria" because he had never seen it before.*
- *In class, the teacher used "petteria" to mean one species: dalmatian laburnum.*

petteria ramentacea *(noun)*

Erect shrub having large trifoliate leaves and dense clusters of yellow flowers followed by poisonous seeds; Yugoslavia; sometimes placed in genus Cytisus.

- *The article explained what "petteria ramentacea" means with a simple example.*
- *They discussed "petteria ramentacea" during the group presentation.*

petticoated *(adjective)*

Wearing or furnished with a petticoat.

- *Petticoated ladies.*
- *A petticoated table.*

pettifogger *(noun)*

A disputant who quibbles; someone who raises annoying petty objections.

- *Understanding "pettifogger" helps you talk about this topic clearly.*
- *He looked up "pettifogger" because he had never seen it before.*

Large crested Old World plover having wattles and spurs.

- *She wrote a short paragraph that included "pewit."*
- *He looked up "pewit" because he had never seen it before.*

---

pewit gull *(noun)*

Small black-headed European gull.

- *She wrote a short paragraph that included "pewit gull."*
- *Understanding "pewit gull" helps you talk about this topic clearly.*

---

peziza domicilina *(noun)*

A discomycetous fungus of the genus Peziza; the fragile fruiting body is a ghostly white but stains yellow when broken; favors strongly alkaline habitats.

- *In class, the teacher used "peziza domicilina" to mean a discomycetous fungus of the genus peziza; the....*
- *Understanding "peziza domicilina" helps you talk about this topic clearly.*

---

pezizaceae *(noun)*

Large family comprising many typical cup fungi.

- *She wrote a short paragraph that included "pezizaceae."*
- *The article explained what "pezizaceae" means with a simple example.*

---

pezizales *(noun)*

Order of mostly saprophytic fungi having cup-shaped ascocarps.

- *They discussed "pezizales" during the group presentation.*
- *In class, the teacher used "pezizales" to mean order of mostly saprophytic fungi having cup-shaped....*

---

pezophaps *(noun)*

Constituted by the extinct solitaire.

- *Understanding "pezophaps" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pezophaps."*

---

pezophaps solitaria *(noun)*

Extinct flightless bird related to the dodo.

- *In class, the teacher used "pezophaps solitaria" to mean extinct flightless bird related to the dodo.*
- *The article explained what "pezophaps solitaria" means with a simple example.*

---

pfannkuchen *(noun)*

Puffy mildly sweet lemon-flavored egg mixture sprinkled with confectioners' sugar and served with jam or a wine or fruit sauce.

- *They discussed "pfannkuchen" during the group presentation.*
- *She wrote a short paragraph that included "pfannkuchen."*

---

phacelia campanularia *(noun)*

Annual of southern California with intricately branched stems and lax cymes of aromatic deep blue bell-shaped flowers.

- *They discussed "phacelia campanularia" during the group presentation.*
- *Understanding "phacelia campanularia" helps you talk about this topic clearly.*

---

phacelia tanacetifolia *(noun)*

Hairy annual of California to Mexico with crowded cymes of small blue to lilac or mauve flowers.

- *They discussed "phacelia tanacetifolia" during the group presentation.*
- *She wrote a short paragraph that included "phacelia tanacetifolia."*

---

phacelia whitlavia *(noun)*

Desert plant of southern California with blue or violet tubular flowers in terminal racemes.

- *In class, the teacher used "phacelia whitlavia" to mean desert plant of southern california with blue or....*
- *The article explained what "phacelia whitlavia" means with a simple example.*

---

phaeophyceae *(noun)*

Brown algae; mostly marine and littoral eukaryotic algae.

- *In class, the teacher used "phaeophyceae" to mean brown algae; mostly marine and littoral eukaryotic....*
- *Understanding "phaeophyceae" helps you talk about this topic clearly.*

---

phaeophyta *(noun)*

Coextensive with class Phaeophyceae; in some classifications subsumed in the division Heterokontophyta.

- *She wrote a short paragraph that included "phaeophyta."*
- *He looked up "phaeophyta" because he had never seen it before.*

---

phaethontidae *(noun)*

Tropicbirds.

- *In class, the teacher used "phaethontidae" to mean tropicbirds.*
- *The article explained what "phaethontidae" means with a simple example.*

---

phagun *(noun)*

The twelfth month of the Hindu calendar.

- *She wrote a short paragraph that included "phagun."*
- *He looked up "phagun" because he had never seen it before.*

---

phaius *(noun)*

An orchid of the genus Phaius having large plicate leaves and racemes of showy flowers.

- *Understanding "phaius" helps you talk about this topic clearly.*
- *In class, the teacher used "phaius" to mean an orchid of the genus phaius having large plicate....*

---

phalaenoptilus *(noun)*

A genus of Caprimulgidae.

- *She wrote a short paragraph that included "phalaenoptilus."*
- *He looked up "phalaenoptilus" because he had never seen it before.*

---

phalaenoptilus nuttallii *(noun)*

Goatsucker of western North America.

- *She wrote a short paragraph that included "phalaenoptilus nuttallii."*
- *The article explained what "phalaenoptilus nuttallii" means with a simple example.*

phalanger *(noun)*

Small furry Australian arboreal marsupials having long usually prehensile tails.

- *He looked up "phalanger" because he had never seen it before.*
- *They discussed "phalanger" during the group presentation.*

phalangeridae *(noun)*

Phalangers; koalas.

- *They discussed "phalangeridae" during the group presentation.*
- *She wrote a short paragraph that included "phalangeridae."*

phalangiidae *(noun)*

A family of Phalangida.

- *The article explained what "phalangiidae" means with a simple example.*
- *In class, the teacher used "phalangiidae" to mean a family of phalangida.*

phalangium *(noun)*

Type genus of the family Phalangiidae.

- *In class, the teacher used "phalangium" to mean type genus of the family phalangiidae.*
- *He looked up "phalangium" because he had never seen it before.*

phalangium opilio *(noun)*

Spiderlike arachnid with a small rounded body and very long thin legs.

- *In class, the teacher used "phalangium opilio" to mean spiderlike arachnid with a small rounded body and....*
- *The article explained what "phalangium opilio" means with a simple example.*

phalaropus *(noun)*

Type genus of the Phalaropidae: phalaropes.

- *She wrote a short paragraph that included "phalaropus."*
- *The article explained what "phalaropus" means with a simple example.*

phalaropus fulicarius *(noun)*

Phalarope of northern oceans and lakes.

- *Understanding "phalaropus fulicarius" helps you talk about this topic clearly.*
- *The article explained what "phalaropus fulicarius" means with a simple example.*

phalguna *(noun)*

The twelfth month of the Hindu calendar.

- *Understanding "phalguna" helps you talk about this topic clearly.*
- *The article explained what "phalguna" means with a simple example.*

phallaceae *(noun)*

A family of fungi belonging to the order Phallales and comprising the true stinkhorns.

- *He looked up "phallaceae" because he had never seen it before.*
- *Understanding "phallaceae" helps you talk about this topic clearly.*

phallales *(noun)*

Order of fungi comprising the stinkhorns and related forms whose mature hymenium is slimy and fetid; sometimes placed in subclass Homobasidiomycetes.

- *Understanding "phallales" helps you talk about this topic clearly.*
- *In class, the teacher used "phallales" to mean order of fungi comprising the stinkhorns and....*

phallus impudicus *(noun)*

A common fungus formerly used in preparing a salve for rheumatism.

- *Understanding "phallus impudicus" helps you talk about this topic clearly.*
- *They discussed "phallus impudicus" during the group presentation.*

phallus ravenelii *(noun)*

This stinkhorn has a cap with a granulose surface at the apex and smells like decaying flesh.

- *In class, the teacher used "phallus ravenelii" to mean this stinkhorn has a cap with a granulose surface....*
- *He looked up "phallus ravenelii" because he had never seen it before.*

---

phalsa *(noun)*

Drought-resistant Asiatic treelike shrub bearing pleasantly acid small red edible fruits commonly used in sherbets.

- *The article explained what "phalsa" means with a simple example.*
- *Understanding "phalsa" helps you talk about this topic clearly.*

---

phanerogam *(noun)*

Plant that reproduces by means of seeds not spores.

- *Understanding "phanerogam" helps you talk about this topic clearly.*
- *The article explained what "phanerogam" means with a simple example.*

---

phanerogamae *(noun)*

In former classification systems: one of two major plant divisions, including all seed-bearing plants; superseded by the division Spermatophyta.

- *Understanding "phanerogamae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "phanerogamae."*

---

phaneromania *(noun)*

An irresistible desire to pick at superficial body parts (as in obsessive nail-biting).

- *She wrote a short paragraph that included "phaneromania."*
- *The article explained what "phaneromania" means with a simple example.*

---

pharmaceutic *(adjective)*

Of or relating to pharmacy or pharmacists.

- *The pharmaceutical industry.*
- *Students compared "pharmaceutic" with similar adjectives in the lesson.*

---

pharomacrus *(noun)*

A genus of Trogonidae.

- *She wrote a short paragraph that included "pharomacrus."*
- *They discussed "pharomacrus" during the group presentation.*

---

pharomacrus mocino *(noun)*

Very rare Central American bird; the national bird of Guatemala.

- *In class, the teacher used "pharomacrus mocino" to mean very rare central american bird; the national bird....*
- *The article explained what "pharomacrus mocino" means with a simple example.*

---

phascogale *(noun)*

Pouched mice.

- *The article explained what "phascogale" means with a simple example.*
- *She wrote a short paragraph that included "phascogale."*

---

phascolarctos cinereus *(noun)*

Sluggish tailless Australian arboreal marsupial with grey furry ears and coat; feeds on eucalyptus leaves and bark.

- *In class, the teacher used "phascolarctos cinereus" to mean sluggish tailless australian arboreal marsupial....*
- *He looked up "phascolarctos cinereus" because he had never seen it before.*

---

phaseolus aconitifolius *(noun)*

East Indian legume having hairy foliage and small yellow flowers followed by cylindrical pods; used especially in India for food and forage and as a soil conditioner; sometimes placed in genus Phaseolus.

- *She wrote a short paragraph that included "phaseolus aconitifolius."*
- *He looked up "phaseolus aconitifolius" because he had never seen it before.*

---

phaseolus acutifolius latifolius *(noun)*

Twining plant of southwestern United States and Mexico having roundish white or yellow or brown or black beans.

- *Understanding "phaseolus acutifolius latifolius" helps you talk about this topic clearly.*

- *In class, the teacher used “phaseolus acutifolius latifolius” to mean twining plant of southwestern united states and....*

phaseolus coccineus *(noun)*

Tropical American bean with red flowers and mottled black beans similar to Phaseolus vulgaris but perennial; a preferred food bean in Great Britain.

- *In class, the teacher used “phaseolus coccineus” to mean tropical american bean with red flowers and mottled....*
- *They discussed “phaseolus coccineus” during the group presentation.*

phaseolus limensis *(noun)*

Bush or tall-growing bean plant having large flat edible seeds.

- *Understanding “phaseolus limensis” helps you talk about this topic clearly.*
- *In class, the teacher used “phaseolus limensis” to mean bush or tall-growing bean plant having large flat....*

phaseolus multiflorus *(noun)*

Tropical American bean with red flowers and mottled black beans similar to Phaseolus vulgaris but perennial; a preferred food bean in Great Britain.

- *Understanding “phaseolus multiflorus” helps you talk about this topic clearly.*
- *He looked up “phaseolus multiflorus” because he had never seen it before.*

phasianid *(noun)*

A kind of game bird in the family Phasianidae.

- *The article explained what “phasianid” means with a simple example.*
- *They discussed “phasianid” during the group presentation.*

phasianidae *(noun)*

Pheasants; quails; partridges.

- *The article explained what “phasianidae” means with a simple example.*
- *Understanding “phasianidae” helps you talk about this topic clearly.*

phasianus *(noun)*

Type genus of the Phasianidae: the typical pheasants.

- *In class, the teacher used “phasianus” to mean type genus of the phasianidae: the typical pheasants.*
- *He looked up “phasianus” because he had never seen it before.*

phasianus colchicus *(noun)*

Common pheasant having bright plumage and a white neck ring.

- *They discussed “phasianus colchicus” during the group presentation.*
- *He looked up “phasianus colchicus” because he had never seen it before.*

phasmatidae *(noun)*

Stick insects.

- *She wrote a short paragraph that included “phasmatidae.”*
- *He looked up “phasmatidae” because he had never seen it before.*

phasmatodea *(noun)*

In some classifications considered a suborder of Orthoptera: stick insects; leaf insects.

- *She wrote a short paragraph that included “phasmatodea.”*
- *They discussed “phasmatodea” during the group presentation.*

phasmida *(noun)*

In some classifications considered a suborder of Orthoptera: stick insects; leaf insects.

- *They discussed “phasmida” during the group presentation.*
- *She wrote a short paragraph that included “phasmida.”*

phasmidae *(noun)*

Stick insects.

- *He looked up “phasmidae” because he had never seen it before.*
- *She wrote a short paragraph that included “phasmidae.”*

phasmidia *(noun)*

One of two subgroups of Nematoda used in some classification systems.

- *Understanding "phasmidia" helps you talk about this topic clearly.*
- *He looked up "phasmidia" because he had never seen it before.*

---

pheasant coucal *(noun)*

Australian bird with a tail like a pheasant.

- *The article explained what "pheasant coucal" means with a simple example.*
- *They discussed "pheasant coucal" during the group presentation.*

---

phegopteris *(noun)*

Beech ferns: genus is variously classified: considered alternative name for genus Dryopteris or included in genus Thelypteris.

- *In class, the teacher used "phegopteris" to mean beech ferns: genus is variously classified:....*
- *The article explained what "phegopteris" means with a simple example.*

---

phegopteris connectilis *(noun)*

Beech fern of North America and Eurasia.

- *They discussed "phegopteris connectilis" during the group presentation.*
- *The article explained what "phegopteris connectilis" means with a simple example.*

---

phegopteris hexagonoptera *(noun)*

Beech fern of North American woodlands having straw-colored stripes.

- *She wrote a short paragraph that included "phegopteris hexagonoptera."*
- *He looked up "phegopteris hexagonoptera" because he had never seen it before.*

---

pheidias *(noun)*

Ancient Greek sculptor (circa 500-432 BC).

- *They discussed "pheidias" during the group presentation.*
- *She wrote a short paragraph that included "pheidias."*

---

phellem *(noun)*

(botany) outer tissue of bark; a protective layer of dead cells.

- *They discussed "phellem" during the group presentation.*
- *In class, the teacher used "phellem" to mean (botany) outer tissue of bark; a protective layer....*

---

phellodendron *(noun)*

Small genus of aromatic deciduous trees of east Asia often having thick corky bark.

- *He looked up "phellodendron" because he had never seen it before.*
- *She wrote a short paragraph that included "phellodendron."*

---

phellodendron amurense *(noun)*

Deciduous tree of China and Manchuria having a turpentine aroma and handsome compound leaves turning yellow in autumn and deeply fissured corky bark.

- *In class, the teacher used "phellodendron amurense" to mean deciduous tree of china and manchuria having a....*
- *The article explained what "phellodendron amurense" means with a simple example.*

---

phenacomys *(noun)*

Any of several vole-like terrestrial or arboreal rodents of cold forested regions of Canada and western United States.

- *They discussed "phenacomys" during the group presentation.*
- *She wrote a short paragraph that included "phenacomys."*

---

phenaphen *(noun)*

An analgesic for mild pain but not for inflammation; also used as an antipyretic; (Datril, Tylenol, Panadol, Phenaphen, Tempra, and Anacin III are trademarks of brands of acetaminophen tablets).

- *The article explained what "phenaphen" means with a simple example.*
- *In class, the teacher used "phenaphen" to mean an analgesic for mild pain but not for....*

---

phenicia *(noun)*

An ancient maritime country (a collection of city states) at eastern end of the Mediterranean.

- *They discussed "phenicia" during the group presentation.*
- *In class, the teacher used "phenicia" to mean an ancient maritime country (a collection of city....*

---

pheniramine *(noun)*

An antihistamine used in preparations to treat allergies and respiratory infections; used to treat rhinitis and skin rashes and pruritus.

- *He looked up "pheniramine" because he had never seen it before.*
- *She wrote a short paragraph that included "pheniramine."*

---

pheno-safranine *(noun)*

A purplish red water-soluble dye used in microscopy.

- *He looked up "pheno-safranine" because he had never seen it before.*
- *Understanding "pheno-safranine" helps you talk about this topic clearly.*

---

phenoplast *(noun)*

A thermosetting resin.

- *In class, the teacher used "phenoplast" to mean a thermosetting resin.*
- *The article explained what "phenoplast" means with a simple example.*

---

phenoxymethyl penicillin *(noun)*

A crystalline penicillin similar in action to penicillin G but more resistant to the action of gastric acids.

- *She wrote a short paragraph that included "phenoxymethyl penicillin."*
- *He looked up "phenoxymethyl penicillin" because he had never seen it before.*

---

phensuximide *(noun)*

Anticonvulsant (trade name Milontin) used to treat petit mal.

- *The article explained what "phensuximide" means with a simple example.*
- *In class, the teacher used "phensuximide" to mean anticonvulsant (trade name milontin) used to treat....*

---

phenylacetamide *(noun)*

A white crystalline compound used as an analgesic and also as an antipyretic.

- *The article explained what "phenylacetamide" means with a simple example.*
- *In class, the teacher used "phenylacetamide" to mean a white crystalline compound used as an analgesic....*

---

phenylamine *(noun)*

Oily poisonous liquid amine obtained from nitrobenzene and used to make dyes and plastics and medicines.

- *Understanding "phenylamine" helps you talk about this topic clearly.*
- *The article explained what "phenylamine" means with a simple example.*

---

phenylethylene *(noun)*

A colorless oily liquid; the monomer for polystyrene.

- *In class, the teacher used "phenylethylene" to mean a colorless oily liquid; the monomer for polystyrene.*
- *They discussed "phenylethylene" during the group presentation.*

---

phenylic acid *(noun)*

A toxic white soluble crystalline acidic derivative of benzene; used in manufacturing and as a disinfectant and antiseptic; poisonous if taken internally.

- *The article explained what "phenylic acid" means with a simple example.*
- *Understanding "phenylic acid" helps you talk about this topic clearly.*

---

phenyltoloxamine *(noun)*

Antihistamine included in some preparations used to treat coughing and nasal congestion.

- *He looked up "phenyltoloxamine" because he had never seen it before.*
- *Understanding "phenyltoloxamine" helps you talk about this topic clearly.*

---

pheresis *(noun)*

A procedure in which blood is drawn and separated into its components by dialysis; some are retained and the rest are returned to the donor by transfusion.

- *The article explained what "pheresis" means with a simple example.*
- *She wrote a short paragraph that included "pheresis."*

philadelphaceae *(noun)*

One genus; usually included in family Hydrangeaceae.

- *He looked up "philadelphaceae" because he had never seen it before.*
- *They discussed "philadelphaceae" during the group presentation.*

philadelphus coronarius *(noun)*

Large hardy shrub with showy and strongly fragrant creamy-white flowers in short terminal racemes.

- *Understanding "philadelphus coronarius" helps you talk about this topic clearly.*
- *The article explained what "philadelphus coronarius" means with a simple example.*

philaenus *(noun)*

A genus of Cercopidae.

- *The article explained what "philaenus" means with a simple example.*
- *In class, the teacher used "philaenus" to mean a genus of cercopidae.*

philaenus spumarius *(noun)*

North American insect that severely damages grasses.

- *He looked up "philaenus spumarius" because he had never seen it before.*
- *In class, the teacher used "philaenus spumarius" to mean north american insect that severely damages grasses.*

philatelical *(adjective)*

Of or relating to philately or of interest to philatelists.

- *It is useful to describe something as "philatelical" when it is of or relating to philately or of interest to....*
- *Would you call this situation "philatelical"? Explain why.*

philatelically *(adverb)*

In a philatelic manner.

- *The Post Office honors great Americans philatelically.*
- *Try rewriting the sentence and include "philatelically" naturally.*

philhellene *(noun)*

An admirer of Greece and everything Greek.

- *He looked up "philhellene" because he had never seen it before.*
- *In class, the teacher used "philhellene" to mean an admirer of greece and everything greek.*

philhellenic *(adjective)*

Characterized by a love of Greece and Grecian things.

- *The Philhellenic Society.*
- *A "philhellenic" approach may work better in this case.*

philhellenist *(noun)*

An admirer of Greece and everything Greek.

- *They discussed "philhellenist" during the group presentation.*
- *Understanding "philhellenist" helps you talk about this topic clearly.*

philipp schwarzerd *(noun)*

German theologian and Luther's successor as leader of the Reformation in Germany (1497-1560).

- *The article explained what "philipp schwarzerd" means with a simple example.*
- *They discussed "philipp schwarzerd" during the group presentation.*

philippus aureolus paracelsus *(noun)*

Swiss physician who introduced treatments of particular illnesses based on his observation and experience; he saw illness as having an external cause (rather than an imbalance of humors) and replaced traditional remedies with chemical remedies (1493-1541).

- *The article explained what "philippus aureolus paracelsus" means with a simple example.*
- *In class, the teacher used "philippus aureolus paracelsus" to mean swiss physician who introduced treatments of....*

phillidae *(noun)*

Leaf insects.

- *He looked up "phillidae" because he had never seen it before.*
- *She wrote a short paragraph that included "phillidae."*

phillipsite *(noun)*

A group of white or reddish crystalline minerals of the zeolite family consisting of a hydrous silicate of calcium and potassium and aluminum.

- *The article explained what "phillipsite" means with a simple example.*
- *In class, the teacher used "phillipsite" to mean a group of white or reddish crystalline minerals of....*

phillyrea *(noun)*

Small genus of evergreen shrubs of the Mediterranean region.

- *He looked up "phillyrea" because he had never seen it before.*
- *She wrote a short paragraph that included "phillyrea."*

philohela *(noun)*

American woodcocks.

- *Understanding "philohela" helps you talk about this topic clearly.*
- *In class, the teacher used "philohela" to mean american woodcocks.*

philohela minor *(noun)*

Small long-billed woodcock; prized as a game bird.

- *She wrote a short paragraph that included "philohela minor."*
- *Understanding "philohela minor" helps you talk about this topic clearly.*

philologue *(noun)*

A humanist specializing in classical scholarship.

- *In class, the teacher used "philologue" to mean a humanist specializing in classical scholarship.*
- *Understanding "philologue" helps you talk about this topic clearly.*

philomachus pugnax *(noun)*

Common Eurasian sandpiper; the male has an erectile neck ruff in breeding season.

- *In class, the teacher used "philomachus pugnax" to mean common eurasian sandpiper; the male has an erectile....*
- *He looked up "philomachus pugnax" because he had never seen it before.*

philophylla *(noun)*

Leaf miners.

- *Understanding "philophylla" helps you talk about this topic clearly.*
- *In class, the teacher used "philophylla" to mean leaf miners.*

philosophiser *(noun)*

Someone who considers situations from a philosophical point of view.

- *She wrote a short paragraph that included "philosophiser."*
- *The article explained what "philosophiser" means with a simple example.*

philosophizer *(noun)*

Someone who considers situations from a philosophical point of view.

- *Understanding "philosophizer" helps you talk about this topic clearly.*
- *He looked up "philosophizer" because he had never seen it before.*

phlebectomy *(noun)*

Surgical removal or all or part of a vein; sometimes done in cases of severe varicose veins.

- *He looked up "phlebectomy" because he had never seen it before.*
- *She wrote a short paragraph that included "phlebectomy."*

phlebodium *(noun)*

Chiefly epiphytic tropical ferns with free veins bearing sori.

- *The article explained what "phlebodium" means with a simple example.*
- *They discussed "phlebodium" during the group presentation.*

---

phlebodium aureum *(noun)*

Tropical American fern with brown scaly rhizomes cultivated for its large deeply lobed deep bluish-green fronds; sometimes placed in genus Polypodium.

- *In class, the teacher used "phlebodium aureum" to mean tropical american fern with brown scaly rhizomes....*
- *He looked up "phlebodium aureum" because he had never seen it before.*

---

phlebogram *(noun)*

An X ray of a vein injected with a radiopaque contrast medium.

- *She wrote a short paragraph that included "phlebogram."*
- *The article explained what "phlebogram" means with a simple example.*

---

phlebotomus papatasii *(noun)*

Any of various small dipterous flies; bloodsucking females can transmit sandfly fever and leishmaniasis.

- *In class, the teacher used "phlebotomus papatasii" to mean any of various small dipterous flies; bloodsucking....*
- *Understanding "phlebotomus papatasii" helps you talk about this topic clearly.*

---

phlegmatical *(adjective)*

Showing little emotion.

- *A "phlegmatical" approach may work better in this case.*
- *Her writing became clearer after she learned "phlegmatical."*

---

phlegmatically *(adverb)*

In a phlegmatic manner.

- *He accepted the decision phlegmatically.*
- *He answered "phlegmatically," which changed the tone of the conversation.*

---

phleum *(noun)*

Grasses native to temperate regions.

- *The article explained what "phleum" means with a simple example.*
- *In class, the teacher used "phleum" to mean grasses native to temperate regions.*

---

phleum pratense *(noun)*

Grass with long cylindrical spikes grown in northern United States and Europe for hay.

- *She wrote a short paragraph that included "phleum pratense."*
- *They discussed "phleum pratense" during the group presentation.*

---

phlomis *(noun)*

Any of various plants of the genus Phlomis; grown primarily for their dense whorls of lipped flowers and attractive foliage.

- *Understanding "phlomis" helps you talk about this topic clearly.*
- *He looked up "phlomis" because he had never seen it before.*

---

phlomis fruticosa *(noun)*

A spreading subshrub of Mediterranean regions cultivated for dense axillary whorls of purple or yellow flowers.

- *Understanding "phlomis fruticosa" helps you talk about this topic clearly.*
- *They discussed "phlomis fruticosa" during the group presentation.*

---

phoca vitulina *(noun)*

Small spotted seal of coastal waters of the northern hemisphere.

- *The article explained what "phoca vitulina" means with a simple example.*
- *In class, the teacher used "phoca vitulina" to mean small spotted seal of coastal waters of the....*

---

phocidae *(noun)*

Earless seals.

- *She wrote a short paragraph that included "phocidae."*
- *They discussed "phocidae" during the group presentation.*

phocine *(adjective)*

Of or relating to seals.

- *Students compared "phocine" with similar adjectives in the lesson.*
- *It is useful to describe something as "phocine" when it is of or relating to seals.*

phoenicophorium *(noun)*

Latanier palm.

- *They discussed "phoenicophorium" during the group presentation.*
- *The article explained what "phoenicophorium" means with a simple example.*

phoeniculidae *(noun)*

Wood hoopoes.

- *Understanding "phoeniculidae" helps you talk about this topic clearly.*
- *In class, the teacher used "phoeniculidae" to mean wood hoopoes.*

phoeniculus *(noun)*

Type and only genus of the family Phoeniculidae.

- *They discussed "phoeniculus" during the group presentation.*
- *She wrote a short paragraph that included "phoeniculus."*

phoenicurus *(noun)*

Old World thrushes.

- *They discussed "phoenicurus" during the group presentation.*
- *The article explained what "phoenicurus" means with a simple example.*

phoenix dactylifera *(noun)*

Tall tropical feather palm tree native to Syria bearing sweet edible fruit.

- *They discussed "phoenix dactylifera" during the group presentation.*
- *The article explained what "phoenix dactylifera" means with a simple example.*

pholadidae *(noun)*

A family of Bivalvia.

- *The article explained what "pholadidae" means with a simple example.*
- *They discussed "pholadidae" during the group presentation.*

pholas *(noun)*

Type genus of the family Pholadidae: piddocks.

- *They discussed "pholas" during the group presentation.*
- *Understanding "pholas" helps you talk about this topic clearly.*

pholidae *(noun)*

A family of fish of suborder Blennioidea.

- *He looked up "pholidae" because he had never seen it before.*
- *She wrote a short paragraph that included "pholidae."*

pholidota *(noun)*

Genus of mostly epiphytic orchids of Indonesia and the western Pacific.

- *He looked up "pholidota" because he had never seen it before.*
- *Understanding "pholidota" helps you talk about this topic clearly.*

pholiota *(noun)*

Genus of gilled agarics of Europe and North America having brown spores and an annulus; grows on open ground or decaying wood.

- *In class, the teacher used "pholiota" to mean genus of gilled agarics of europe and north america....*
- *The article explained what "pholiota" means with a simple example.*

pholiota astragalina *(noun)*

A fungus with a smooth orange cap and yellow gills and pale yellow stalk.

- *The article explained what "pholiota astragalina" means with a simple example.*
- *They discussed "pholiota astragalina" during the group presentation.*

---

pholiota aurea *(noun)*

A beautiful yellow gilled fungus found from Alaska south along the coast.

- *In class, the teacher used "pholiota aurea" to mean a beautiful yellow gilled fungus found from alaska....*
- *He looked up "pholiota aurea" because he had never seen it before.*

---

pholiota destruens *(noun)*

A large fungus with whitish scales on the cap and remnants of the veil hanging from the cap; the stalk is thick and hard.

- *She wrote a short paragraph that included "pholiota destruens."*
- *He looked up "pholiota destruens" because he had never seen it before.*

---

pholiota flammans *(noun)*

A fungus with a yellow cap covered with fine scales as is the stalk.

- *The article explained what "pholiota flammans" means with a simple example.*
- *Understanding "pholiota flammans" helps you talk about this topic clearly.*

---

pholiota flavida *(noun)*

A fungus that grows in clusters on the ground; cap is brownish orange with a surface that is smooth and slightly sticky; whitish gills and a cylindrical brown stalk.

- *The article explained what "pholiota flavida" means with a simple example.*
- *Understanding "pholiota flavida" helps you talk about this topic clearly.*

---

pholiota nameko *(noun)*

One of the most important fungi cultivated in Japan.

- *She wrote a short paragraph that included "pholiota nameko."*
- *Understanding "pholiota nameko" helps you talk about this topic clearly.*

---

pholiota squarrosa *(noun)*

A gilled fungus with a cap and stalk that are conspicuously scaly with upright scales; gills develop a greenish tinge with age.

- *They discussed "pholiota squarrosa" during the group presentation.*
- *She wrote a short paragraph that included "pholiota squarrosa."*

---

pholiota squarrosa-adiposa *(noun)*

A gilled fungus having yellow slimy caps with conspicuous tawny scales on the caps and stalks.

- *She wrote a short paragraph that included "pholiota squarrosa-adiposa."*
- *Understanding "pholiota squarrosa-adiposa" helps you talk about this topic clearly.*

---

pholiota squarrosoides *(noun)*

A pale buff fungus with tawny scales.

- *Understanding "pholiota squarrosoides" helps you talk about this topic clearly.*
- *He looked up "pholiota squarrosoides" because he had never seen it before.*

---

pholis *(noun)*

Type genus of the Pholidae: gunnels.

- *She wrote a short paragraph that included "pholis."*
- *He looked up "pholis" because he had never seen it before.*

---

pholis gunnellus *(noun)*

Slippery scaleless food fish of the northern Atlantic coastal waters.

- *Understanding "pholis gunnellus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pholis gunnellus."*

---

pholistoma *(noun)*

Straggling herbs of southwestern United States.

- *Understanding "pholistoma" helps you talk about this topic clearly.*

- *The article explained what "pholistoma" means with a simple example.*

pholistoma auritum *(noun)*

Straggling California annual herb with deep purple or violet flowers; sometimes placed in genus Nemophila.

- *They discussed "pholistoma auritum" during the group presentation.*
- *The article explained what "pholistoma auritum" means with a simple example.*

phonetician *(noun)*

A specialist in phonetics.

- *In class, the teacher used "phonetician" to mean a specialist in phonetics.*
- *Understanding "phonetician" helps you talk about this topic clearly.*

phonogramic *(adjective)*

Of or relating to a phonogram.

- *A "phonogramic" approach may work better in this case.*
- *The speaker chose "phonogramic" because it captured the feeling precisely.*

phonologic *(adjective)*

Of or relating to phonology.

- *The phonological component of language.*
- *It is useful to describe something as "phonologic" when it is of or relating to phonology.*

phonologist *(noun)*

A specialist in phonology.

- *In class, the teacher used "phonologist" to mean a specialist in phonology.*
- *The article explained what "phonologist" means with a simple example.*

phoradendron *(noun)*

Any of various American parasitic plants similar to Old World mistletoe: false mistletoe.

- *In class, the teacher used "phoradendron" to mean any of various american parasitic plants similar to....*
- *The article explained what "phoradendron" means with a simple example.*

phoradendron flavescens *(noun)*

The traditional mistletoe of Christmas in America: grows on deciduous trees and can severely weaken the host plant.

- *In class, the teacher used "phoradendron flavescens" to mean the traditional mistletoe of christmas in america:....*
- *He looked up "phoradendron flavescens" because he had never seen it before.*

phoradendron serotinum *(noun)*

The traditional mistletoe of Christmas in America: grows on deciduous trees and can severely weaken the host plant.

- *He looked up "phoradendron serotinum" because he had never seen it before.*
- *Understanding "phoradendron serotinum" helps you talk about this topic clearly.*

phoronid *(noun)*

Hermaphrodite wormlike animal living in mud of the sea bottom.

- *The article explained what "phoronid" means with a simple example.*
- *She wrote a short paragraph that included "phoronid."*

phoronida *(noun)*

Small phylum of wormlike marine animals.

- *He looked up "phoronida" because he had never seen it before.*
- *Understanding "phoronida" helps you talk about this topic clearly.*

phoronidea *(noun)*

Small phylum of wormlike marine animals.

- *The article explained what "phoronidea" means with a simple example.*
- *They discussed "phoronidea" during the group presentation.*

phosphoresce *(verb)*

To exhibit phosphorescence.

- *In everyday English, people use "phosphoresce" when talking about this idea.*
- *Learners should practice how to use "phosphoresce" in real sentences.*

---

photoblepharon *(noun)*

A genus of fish in the family Anomalopidae.

- *The article explained what "photoblepharon" means with a simple example.*
- *In class, the teacher used "photoblepharon" to mean a genus of fish in the family anomalopidae.*

---

photoblepharon palpebratus *(noun)*

Fish of deep dark waters having a light organ below each eye.

- *He looked up "photoblepharon palpebratus" because he had never seen it before.*
- *She wrote a short paragraph that included "photoblepharon palpebratus."*

---

photocoagulator *(noun)*

Surgical instrument containing a laser for use in photocoagulation.

- *She wrote a short paragraph that included "photocoagulator."*
- *The article explained what "photocoagulator" means with a simple example.*

---

photoconduction *(noun)*

Change in the electrical conductivity of a substance as a result of absorbing electromagnetic radiation.

- *In class, the teacher used "photoconduction" to mean change in the electrical conductivity of a....*
- *He looked up "photoconduction" because he had never seen it before.*

---

photoelectrical *(adjective)*

Of or pertaining to photoelectricity.

- *It is useful to describe something as "photoelectrical" when it is of or pertaining to photoelectricity.*
- *Students compared "photoelectrical" with similar adjectives in the lesson.*

---

photoelectrically *(adverb)*

By photoelectric means.

- *They measured it photoelectrically.*
- *Try rewriting the sentence and include "photoelectrically" naturally.*

---

photoelectricity *(noun)*

Electricity generated by light or affected by light.

- *They discussed "photoelectricity" during the group presentation.*
- *She wrote a short paragraph that included "photoelectricity."*

---

photoemissive *(adjective)*

Of or relating to photoemission.

- *Her writing became clearer after she learned "photoemissive."*
- *Students compared "photoemissive" with similar adjectives in the lesson.*

---

photoflash *(noun)*

A lamp for providing momentary light to take a photograph.

- *In class, the teacher used "photoflash" to mean a lamp for providing momentary light to take a....*
- *Understanding "photoflash" helps you talk about this topic clearly.*

---

photoflood *(noun)*

Light that is a source of artificial illumination having a broad beam; used in photography.

- *In class, the teacher used "photoflood" to mean light that is a source of artificial illumination....*
- *The article explained what "photoflood" means with a simple example.*

---

photolithograph *(noun)*

A lithograph produced by photographically produced plates.

- *Understanding "photolithograph" helps you talk about this topic clearly.*
- *The article explained what "photolithograph" means with a simple example.*

---

photomechanics *(noun)*

The process whereby printing surfaces (plates or cylinders) are produced by photographic methods.

- *Photomechanics revolutionized the practice of printing.*
- *They discussed "photomechanics" during the group presentation.*

---

photometrical *(adjective)*

Of or relating to photometry.

- *A "photometrical" approach may work better in this case.*
- *It is useful to describe something as "photometrical" when it is of or relating to photometry.*

---

photometrically *(adverb)*

By photometric means.

- *Photometrically measured.*
- *He answered "photometrically," which changed the tone of the conversation.*

---

photometrician *(noun)*

Someone who practices photometry.

- *He looked up "photometrician" because he had never seen it before.*
- *She wrote a short paragraph that included "photometrician."*

---

photometrist *(noun)*

Someone who practices photometry.

- *He looked up "photometrist" because he had never seen it before.*
- *She wrote a short paragraph that included "photometrist."*

---

photomosaic *(noun)*

Arrangement of aerial photographs forming a composite picture.

- *Understanding "photomosaic" helps you talk about this topic clearly.*
- *In class, the teacher used "photomosaic" to mean arrangement of aerial photographs forming a....*

---

photopigment *(noun)*

A special pigment found in the rods and cones of the retina.

- *Understanding "photopigment" helps you talk about this topic clearly.*
- *In class, the teacher used "photopigment" to mean a special pigment found in the rods and cones of....*

---

photoplate making *(noun)*

The process whereby printing surfaces (plates or cylinders) are produced by photographic methods.

- *They discussed "photoplate making" during the group presentation.*
- *He looked up "photoplate making" because he had never seen it before.*

---

photosensitise *(verb)*

Make (an organism or substance) sensitive to the influence of radiant energy and especially light.

- *Can you use "photosensitise" in a sentence that fits this situation?*
- *In everyday English, people use "photosensitise" when talking about this idea.*

---

photosensitize *(verb)*

Make (an organism or substance) sensitive to the influence of radiant energy and especially light.

- *She tried to use "photosensitize" carefully so everyone would understand.*
- *The coach explained when to use "photosensitize" and when to wait.*

---

phoxinus phoxinus *(noun)*

Very small European freshwater fish common in gravelly streams.

- *Understanding "phoxinus phoxinus" helps you talk about this topic clearly.*
- *In class, the teacher used "phoxinus phoxinus" to mean very small european freshwater fish common in....*

phragmacone *(noun)*

The thin conical chambered internal shell (either straight or curved) of a belemnite.

- *They discussed "phragmacone" during the group presentation.*
- *Understanding "phragmacone" helps you talk about this topic clearly.*

phragmipedium *(noun)*

Genus of tropical American orchid species often included in genus Cypripedium or Paphiopedilum and Selenipedium: lady slippers.

- *Understanding "phragmipedium" helps you talk about this topic clearly.*
- *The article explained what "phragmipedium" means with a simple example.*

phragmocone *(noun)*

The thin conical chambered internal shell (either straight or curved) of a belemnite.

- *She wrote a short paragraph that included "phragmocone."*
- *Understanding "phragmocone" helps you talk about this topic clearly.*

phrenetic *(adjective)*

Excessively agitated; distraught with fear or other violent emotion.

- *Would you call this situation "phrenetic"? Explain why.*
- *A "phrenetic" approach may work better in this case.*

phrontistery *(noun)*

An establishment for study and learning (sometimes including modern universities).

- *She wrote a short paragraph that included "phrontistery."*
- *They discussed "phrontistery" during the group presentation.*

phrynosoma *(noun)*

Horned lizards.

- *In class, the teacher used "phrynosoma" to mean horned lizards.*
- *The article explained what "phrynosoma" means with a simple example.*

phrynosoma cornutum *(noun)*

Of arid and semiarid open country.

- *She wrote a short paragraph that included "phrynosoma cornutum."*
- *They discussed "phrynosoma cornutum" during the group presentation.*

phthirius *(noun)*

True lice: crab lice.

- *Understanding "phthirius" helps you talk about this topic clearly.*
- *They discussed "phthirius" during the group presentation.*

phthirius pubis *(noun)*

A louse that infests the pubic region of the human body.

- *They discussed "phthirius pubis" during the group presentation.*
- *He looked up "phthirius pubis" because he had never seen it before.*

phthirus *(noun)*

True lice: crab lice.

- *They discussed "phthirus" during the group presentation.*
- *Understanding "phthirus" helps you talk about this topic clearly.*

phthorimaea *(noun)*

Potato moths.

- *In class, the teacher used "phthorimaea" to mean potato moths.*
- *Understanding "phthorimaea" helps you talk about this topic clearly.*

phthorimaea operculella *(noun)*

Greyish-brown moth whose larva is the potato tuberworm.

- *Understanding "phthorimaea operculella" helps you talk about this topic clearly.*
- *The article explained what "phthorimaea operculella" means with a simple example.*

---

phycobilin *(noun)*

Water-soluble proteinaceous pigments found in red algae and cyanobacteria.

- *They discussed "phycobilin" during the group presentation.*
- *In class, the teacher used "phycobilin" to mean water-soluble proteinaceous pigments found in red....*

---

phycomycetes *(noun)*

A large and probably unnatural group of fungi and funguslike organisms comprising the Mastigomycota (including the Oomycetes) and Zygomycota subdivisions of the division Eumycota; a category not used in all systems.

- *She wrote a short paragraph that included "phycomycetes."*
- *They discussed "phycomycetes" during the group presentation.*

---

phycomycetes group *(noun)*

A large and probably unnatural group of fungi and funguslike organisms comprising the Mastigomycota (including the Oomycetes) and Zygomycota subdivisions of the division Eumycota; a category not used in all systems.

- *Understanding "phycomycetes group" helps you talk about this topic clearly.*
- *The article explained what "phycomycetes group" means with a simple example.*

---

phyllidae *(noun)*

Leaf insects.

- *Understanding "phyllidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "phyllidae."*

---

phylliform *(adjective)*

Having the shape of a leaf.

- *Would you call this situation "phylliform"? Explain why.*
- *Students compared "phylliform" with similar adjectives in the lesson.*

---

phyllitis *(noun)*

A genus of ferns belonging to the family Polypodiaceae (in some classification systems included in genus Asplenium).

- *He looked up "phyllitis" because he had never seen it before.*
- *Understanding "phyllitis" helps you talk about this topic clearly.*

---

phyllitis scolopendrium *(noun)*

Eurasian fern with simple lanceolate fronds.

- *Understanding "phyllitis scolopendrium" helps you talk about this topic clearly.*
- *The article explained what "phyllitis scolopendrium" means with a simple example.*

---

phyllium *(noun)*

Type genus of the Phyllidae.

- *Understanding "phyllium" helps you talk about this topic clearly.*
- *He looked up "phyllium" because he had never seen it before.*

---

phylloclad *(noun)*

A flattened stem resembling and functioning as a leaf.

- *In class, the teacher used "phylloclad" to mean a flattened stem resembling and functioning as a leaf.*
- *They discussed "phylloclad" during the group presentation.*

---

phyllocladaceae *(noun)*

A family of Phyllocladaceae.

- *The article explained what "phyllocladaceae" means with a simple example.*
- *Understanding "phyllocladaceae" helps you talk about this topic clearly.*

---

phylloclade *(noun)*

A flattened stem resembling and functioning as a leaf.

- *They discussed "phylloclade" during the group presentation.*
- *She wrote a short paragraph that included "phylloclade."*

---

phyllocladus *(noun)*

Celery pine.

- *He looked up "phyllocladus" because he had never seen it before.*
- *She wrote a short paragraph that included "phyllocladus."*

---

phyllocladus alpinus *(noun)*

Small shrubby celery pine of New Zealand.

- *Understanding "phyllocladus alpinus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "phyllocladus alpinus."*

---

phyllocladus asplenifolius *(noun)*

Medium tall celery pine of Tasmania.

- *Understanding "phyllocladus asplenifolius" helps you talk about this topic clearly.*
- *The article explained what "phyllocladus asplenifolius" means with a simple example.*

---

phyllocladus trichomanoides *(noun)*

Medium tall celery pine of New Zealand.

- *The article explained what "phyllocladus trichomanoides" means with a simple example.*
- *In class, the teacher used "phyllocladus trichomanoides" to mean medium tall celery pine of new zealand.*

---

phyllode *(noun)*

An expanded petiole taking on the function of a leaf blade.

- *She wrote a short paragraph that included "phyllode."*
- *He looked up "phyllode" because he had never seen it before.*

---

phyllodial *(adjective)*

Having a phyllode.

- *It is useful to describe something as "phyllodial" when it is having a phyllode.*
- *The speaker chose "phyllodial" because it captured the feeling precisely.*

---

phyllodoce *(noun)*

Small genus of evergreen Arctic and alpine shrubs.

- *She wrote a short paragraph that included "phyllodoce."*
- *He looked up "phyllodoce" because he had never seen it before.*

---

phyllodoce breweri *(noun)*

Semi-prostrate evergreen herb of western United States.

- *They discussed "phyllodoce breweri" during the group presentation.*
- *She wrote a short paragraph that included "phyllodoce breweri."*

---

phyllodoce caerulea *(noun)*

Small shrub with tiny evergreen leaves and pink or purple flowers; Alpine summits and high ground in Asia and Europe and United States.

- *The article explained what "phyllodoce caerulea" means with a simple example.*
- *In class, the teacher used "phyllodoce caerulea" to mean small shrub with tiny evergreen leaves and pink or....*

---

phylloporus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *The article explained what "phylloporus" means with a simple example.*
- *Understanding "phylloporus" helps you talk about this topic clearly.*

---

phylloporus boletinoides *(noun)*

A fungus with a broadly convex brown cap and pores that extend part way down the stalk.

- *Understanding "phylloporus boletinoides" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "phylloporus boletinoides."*

phylloquinone *(noun)*

A form of vitamin K.

- *The article explained what "phylloquinone" means with a simple example.*
- *In class, the teacher used "phylloquinone" to mean a form of vitamin k.*

phyllorhynchus *(noun)*

Leaf-nosed snakes.

- *In class, the teacher used "phyllorhynchus" to mean leaf-nosed snakes.*
- *They discussed "phyllorhynchus" during the group presentation.*

phylloscopus sibilatrix *(noun)*

European woodland warbler with dull yellow plumage.

- *In class, the teacher used "phylloscopus sibilatrix" to mean european woodland warbler with dull yellow plumage.*
- *They discussed "phylloscopus sibilatrix" during the group presentation.*

phyllostachys bambusoides *(noun)*

Large bamboo having thick-walled culms; native of China and perhaps Japan; widely grown elsewhere.

- *She wrote a short paragraph that included "phyllostachys bambusoides."*
- *They discussed "phyllostachys bambusoides" during the group presentation.*

phyllostomatidae *(noun)*

New World leaf-nosed bats.

- *The article explained what "phyllostomatidae" means with a simple example.*
- *In class, the teacher used "phyllostomatidae" to mean new world leaf-nosed bats.*

phyllostomidae *(noun)*

New World leaf-nosed bats.

- *In class, the teacher used "phyllostomidae" to mean new world leaf-nosed bats.*
- *They discussed "phyllostomidae" during the group presentation.*

phyllostomus *(noun)*

Type genus of the family Phyllostomatidae.

- *The article explained what "phyllostomus" means with a simple example.*
- *She wrote a short paragraph that included "phyllostomus."*

phyllostomus hastatus *(noun)*

A variety of leaf-nosed bat.

- *In class, the teacher used "phyllostomus hastatus" to mean a variety of leaf-nosed bat.*
- *The article explained what "phyllostomus hastatus" means with a simple example.*

phylloxera vitifoleae *(noun)*

Destructive to various grape plants.

- *Understanding "phylloxera vitifoleae" helps you talk about this topic clearly.*
- *They discussed "phylloxera vitifoleae" during the group presentation.*

phylogenesis *(noun)*

(biology) the sequence of events involved in the evolutionary development of a species or taxonomic group of organisms.

- *He looked up "phylogenesis" because he had never seen it before.*
- *They discussed "phylogenesis" during the group presentation.*

phylum aschelminthes *(noun)*

Unsegmented worms: roundworms; threadworms; eelworms.

- *They discussed "phylum aschelminthes" during the group presentation.*
- *Understanding "phylum aschelminthes" helps you talk about this topic clearly.*

phylum chaetognatha *(noun)*

Arrowworms: a group of small active transparent marine worms.

- *Understanding "phylum chaetognatha" helps you talk about this topic clearly.*
- *The article explained what "phylum chaetognatha" means with a simple example.*

---

phylum cryptophyta *(noun)*

A phylum in the kingdom Protoctista.

- *In class, the teacher used "phylum cryptophyta" to mean a phylum in the kingdom protoctista.*
- *The article explained what "phylum cryptophyta" means with a simple example.*

---

phylum cycliophora *(noun)*

Tiny marine organisms each the size of a period found in great numbers on lobsters' lips; identified tentatively in 1995 as a new phylum or as possible link between Entoprocta and Ectoprocta.

- *In class, the teacher used "phylum cycliophora" to mean tiny marine organisms each the size of a period....*
- *The article explained what "phylum cycliophora" means with a simple example.*

---

phylum ectoprocta *(noun)*

Coextensive with or a subphylum of Bryozoa.

- *The article explained what "phylum ectoprocta" means with a simple example.*
- *In class, the teacher used "phylum ectoprocta" to mean coextensive with or a subphylum of bryozoa.*

---

phylum entoprocta *(noun)*

Sometimes considered a subphylum of Bryozoa.

- *Understanding "phylum entoprocta" helps you talk about this topic clearly.*
- *In class, the teacher used "phylum entoprocta" to mean sometimes considered a subphylum of bryozoa.*

---

phylum nemertea *(noun)*

Proboscis worms.

- *He looked up "phylum nemertea" because he had never seen it before.*
- *In class, the teacher used "phylum nemertea" to mean proboscis worms.*

---

phylum nemertina *(noun)*

Proboscis worms.

- *He looked up "phylum nemertina" because he had never seen it before.*
- *They discussed "phylum nemertina" during the group presentation.*

---

phylum phoronida *(noun)*

Small phylum of wormlike marine animals.

- *They discussed "phylum phoronida" during the group presentation.*
- *Understanding "phylum phoronida" helps you talk about this topic clearly.*

---

phylum pogonophora *(noun)*

Beard worms.

- *The article explained what "phylum pogonophora" means with a simple example.*
- *In class, the teacher used "phylum pogonophora" to mean beard worms.*

---

phylum pyrrophyta *(noun)*

A division of lower plants comprising unicellular and biflagellate algae that form starchy compounds.

- *She wrote a short paragraph that included "phylum pyrrophyta."*
- *He looked up "phylum pyrrophyta" because he had never seen it before.*

---

phylum rotifera *(noun)*

A phylum including: rotifers.

- *The article explained what "phylum rotifera" means with a simple example.*
- *Understanding "phylum rotifera" helps you talk about this topic clearly.*

---

phylum sipuncula *(noun)*

Peanut worms.

- *The article explained what "phylum sipuncula" means with a simple example.*

- *Understanding "phylum sipuncula" helps you talk about this topic clearly.*

---

physalia *(noun)*

Portuguese man-of-war.

- *She wrote a short paragraph that included "physalia."*
- *They discussed "physalia" during the group presentation.*

---

physalis ixocarpa *(noun)*

Annual of Mexico and southern United States having edible purplish viscid fruit resembling small tomatoes.

- *In class, the teacher used "physalis ixocarpa" to mean annual of mexico and southern united states having....*
- *The article explained what "physalis ixocarpa" means with a simple example.*

---

physalis philadelphica *(noun)*

Mexican annual naturalized in eastern North America having yellow to purple edible fruit resembling small tomatoes.

- *They discussed "physalis philadelphica" during the group presentation.*
- *He looked up "physalis philadelphica" because he had never seen it before.*

---

physalis pruinosa *(noun)*

Stout hairy annual of eastern North America with sweet yellow fruits.

- *Understanding "physalis pruinosa" helps you talk about this topic clearly.*
- *In class, the teacher used "physalis pruinosa" to mean stout hairy annual of eastern north america with....*

---

physaria *(noun)*

Small genus of western North American herbs similar to Lesquerella: bladderpods.

- *She wrote a short paragraph that included "physaria."*
- *He looked up "physaria" because he had never seen it before.*

---

physeter catodon *(noun)*

Large whale with a large cavity in the head containing spermaceti and oil; also a source of ambergris.

- *He looked up "physeter catodon" because he had never seen it before.*
- *She wrote a short paragraph that included "physeter catodon."*

---

physeteridae *(noun)*

Sperm whales.

- *The article explained what "physeteridae" means with a simple example.*
- *She wrote a short paragraph that included "physeteridae."*

---

physiatrics *(noun)*

Therapy that uses physical agents: exercise and massage and other modalities.

- *The article explained what "physiatrics" means with a simple example.*
- *Understanding "physiatrics" helps you talk about this topic clearly.*

---

physicalness *(noun)*

The quality of being physical; consisting of matter.

- *In class, the teacher used "physicalness" to mean the quality of being physical; consisting of matter.*
- *He looked up "physicalness" because he had never seen it before.*

---

physidae *(noun)*

Freshwater snails.

- *The article explained what "physidae" means with a simple example.*
- *They discussed "physidae" during the group presentation.*

---

physiotherapeutic *(adjective)*

Of or relating to or used in physical therapy.

- *Would you call this situation "physiotherapeutic"? Explain why.*
- *It is useful to describe something as "physiotherapeutic" when it is of or relating to or used in physical therapy.*

---

physostegia *(noun)*

Any of various plants of the genus Physostegia having sessile linear to oblong leaves and showy white or rose or lavender flowers.

- *In class, the teacher used "physostegia" to mean any of various plants of the genus physostegia....*
- *Understanding "physostegia" helps you talk about this topic clearly.*

---

physostegia virginiana *(noun)*

North American plant having a spike of two-lipped pink or white flowers.

- *He looked up "physostegia virginiana" because he had never seen it before.*
- *They discussed "physostegia virginiana" during the group presentation.*

---

physostigma *(noun)*

African woody vines: calabar beans.

- *Understanding "physostigma" helps you talk about this topic clearly.*
- *The article explained what "physostigma" means with a simple example.*

---

physostigma venenosum *(noun)*

Tropical African woody vine yielding calabar beans.

- *In class, the teacher used "physostigma venenosum" to mean tropical african woody vine yielding calabar beans.*
- *He looked up "physostigma venenosum" because he had never seen it before.*

---

phytelephas *(noun)*

Small genus of South American feather palms.

- *The article explained what "phytelephas" means with a simple example.*
- *In class, the teacher used "phytelephas" to mean small genus of south american feather palms.*

---

phytelephas macrocarpa *(noun)*

A stemless palm tree of Brazil and Peru bearing ivory nuts.

- *He looked up "phytelephas macrocarpa" because he had never seen it before.*
- *In class, the teacher used "phytelephas macrocarpa" to mean a stemless palm tree of brazil and peru bearing....*

---

phytochemist *(noun)*

A chemist who specializes in the chemistry of plants.

- *They discussed "phytochemist" during the group presentation.*
- *In class, the teacher used "phytochemist" to mean a chemist who specializes in the chemistry of plants.*

---

phytolacca acinosa *(noun)*

Pokeweed of southeastern Asia and China.

- *In class, the teacher used "phytolacca acinosa" to mean pokeweed of southeastern asia and china.*
- *Understanding "phytolacca acinosa" helps you talk about this topic clearly.*

---

phytolaccaceae *(noun)*

Chiefly tropical herbaceous plants (including shrubs and trees) with racemose flowers: genera Phytolacca, Agdestis, Ercilla, Rivina, Trichostigma.

- *He looked up "phytolaccaceae" because he had never seen it before.*
- *In class, the teacher used "phytolaccaceae" to mean chiefly tropical herbaceous plants (including....*

---

phytomastigina *(noun)*

Plantlike flagellates containing chlorophyll; often considered unicellular algae.

- *The article explained what "phytomastigina" means with a simple example.*
- *In class, the teacher used "phytomastigina" to mean plantlike flagellates containing chlorophyll; often....*

---

phytonadione *(noun)*

A form of vitamin K.

- *Understanding "phytonadione" helps you talk about this topic clearly.*
- *The article explained what "phytonadione" means with a simple example.*

---

phytophagic *(adjective)*

(of animals) feeding on plants.

- *Would you call this situation "phytophagic"? Explain why.*
- *Students compared "phytophagic" with similar adjectives in the lesson.*

---

phytophilous *(adjective)*

(of animals) feeding on plants.

- *Students compared "phytophilous" with similar adjectives in the lesson.*
- *A "phytophilous" approach may work better in this case.*

---

phytophthora citrophthora *(noun)*

Causes brown rot gummosis in citrus fruits.

- *They discussed "phytophthora citrophthora" during the group presentation.*
- *Understanding "phytophthora citrophthora" helps you talk about this topic clearly.*

---

phytotoxin *(noun)*

Any substance produced by plants that is similar in its properties to extracellular bacterial toxin.

- *He looked up "phytotoxin" because he had never seen it before.*
- *They discussed "phytotoxin" during the group presentation.*

---

piaffe *(noun)*

A cadenced trot executed by the horse in one spot.

- *She wrote a short paragraph that included "piaffe."*
- *They discussed "piaffe" during the group presentation.*

---

piassava palm *(noun)*

Brazilian palm yielding fibers used in making ropes, mats, and brushes.

- *In class, the teacher used "piassava palm" to mean brazilian palm yielding fibers used in making....*
- *The article explained what "piassava palm" means with a simple example.*

---

piaster *(noun)*

A fractional monetary unit in Egypt and Lebanon and Sudan and Syria.

- *He looked up "piaster" because he had never seen it before.*
- *She wrote a short paragraph that included "piaster."*

---

pibgorn *(noun)*

An ancient (now obsolete) single-reed woodwind; usually made of bone.

- *The article explained what "pibgorn" means with a simple example.*
- *Understanding "pibgorn" helps you talk about this topic clearly.*

---

pibit *(noun)*

A unit of information equal to 1024 tebibits or 2^50 bits.

- *Understanding "pibit" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pibit."*

---

pica pica hudsonia *(noun)*

A magpie of Rocky Mountains in North America.

- *The article explained what "pica pica hudsonia" means with a simple example.*
- *In class, the teacher used "pica pica hudsonia" to mean a magpie of rocky mountains in north america.*

---

picaninny *(noun)*

(ethnic slur) offensive term for a Black child.

- *The article explained what "picaninny" means with a simple example.*
- *In class, the teacher used "picaninny" to mean (ethnic slur) offensive term for a black child.*

---

picariae *(noun)*

Term used in some classifications as nearly equivalent to the order Coraciiformes.

- *Understanding "picariae" helps you talk about this topic clearly.*
- *In class, the teacher used "picariae" to mean term used in some classifications as nearly....*

piccaninny *(noun)*

(ethnic slur) offensive term for a Black child.

- *In class, the teacher used "piccaninny" to mean (ethnic slur) offensive term for a black child.*
- *They discussed "piccaninny" during the group presentation.*

picea breweriana *(noun)*

Medium-sized spruce of California and Oregon having pendulous branches.

- *In class, the teacher used "picea breweriana" to mean medium-sized spruce of california and oregon having....*
- *He looked up "picea breweriana" because he had never seen it before.*

pichiciago *(noun)*

Very small Argentine armadillo with pale silky hair and pink plates on head and neck.

- *Understanding "pichiciago" helps you talk about this topic clearly.*
- *In class, the teacher used "pichiciago" to mean very small argentine armadillo with pale silky hair....*

pichiciego *(noun)*

Very small Argentine armadillo with pale silky hair and pink plates on head and neck.

- *In class, the teacher used "pichiciego" to mean very small argentine armadillo with pale silky hair....*
- *The article explained what "pichiciego" means with a simple example.*

picidae *(noun)*

Woodpeckers.

- *They discussed "picidae" during the group presentation.*
- *She wrote a short paragraph that included "picidae."*

piciform bird *(noun)*

Any of numerous nonpasserine insectivorous climbing birds usually having strong bills for boring wood.

- *He looked up "piciform bird" because he had never seen it before.*
- *They discussed "piciform bird" during the group presentation.*

piciformes *(noun)*

Woodpeckers; jacamars; puffbirds; barbets; honey guides; toucans.

- *They discussed "piciformes" during the group presentation.*
- *In class, the teacher used "piciformes" to mean woodpeckers; jacamars; puffbirds; barbets; honey....*

pickaback *(adverb)*

On the back or shoulder or astraddle on the hip.

- *Using "pickaback" can make your explanation more exact.*
- *He answered "pickaback," which changed the tone of the conversation.*

pickaback plant *(noun)*

Vigorous perennial herb with flowers in erect racemes and having young plants develop at the junction of a leaf blade and the leafstalk.

- *Understanding "pickaback plant" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pickaback plant."*

pickerelweed *(noun)*

American plant having spikes of blue flowers and growing in shallow water of streams and ponds.

- *Understanding "pickerelweed" helps you talk about this topic clearly.*
- *The article explained what "pickerelweed" means with a simple example.*

pickerelweed family *(noun)*

Aquatic or bog plants.

- *He looked up "pickerelweed family" because he had never seen it before.*
- *In class, the teacher used "pickerelweed family" to mean aquatic or bog plants.*

pickeringia *(noun)*

One species: chaparral pea.

- *In class, the teacher used "pickeringia" to mean one species: chaparral pea.*
- *They discussed "pickeringia" during the group presentation.*

---

pickeringia montana *(noun)*

Spiny evergreen xerophytic shrub having showy rose and purple flowers and forming dense thickets; of dry rocky mountain slopes of California.

- *Understanding "pickeringia montana" helps you talk about this topic clearly.*
- *In class, the teacher used "pickeringia montana" to mean spiny evergreen xerophytic shrub having showy rose....*

---

picknicker *(noun)*

A person who is picnicking.

- *The article explained what "picknicker" means with a simple example.*
- *In class, the teacher used "picknicker" to mean a person who is picnicking.*

---

picnicker *(noun)*

A person who is picnicking.

- *He looked up "picnicker" because he had never seen it before.*
- *In class, the teacher used "picnicker" to mean a person who is picnicking.*

---

picofarad *(noun)*

A unit of capacitance equal to one trillionth of a farad.

- *She wrote a short paragraph that included "picofarad."*
- *The article explained what "picofarad" means with a simple example.*

---

picoides *(noun)*

A genus of Picidae.

- *Understanding "picoides" helps you talk about this topic clearly.*
- *The article explained what "picoides" means with a simple example.*

---

picometer *(noun)*

A metric unit of length equal to one trillionth of a meter.

- *Understanding "picometer" helps you talk about this topic clearly.*
- *The article explained what "picometer" means with a simple example.*

---

picometre *(noun)*

A metric unit of length equal to one trillionth of a meter.

- *Understanding "picometre" helps you talk about this topic clearly.*
- *The article explained what "picometre" means with a simple example.*

---

picovolt *(noun)*

A unit of potential equal to one trillionth of a volt.

- *He looked up "picovolt" because he had never seen it before.*
- *She wrote a short paragraph that included "picovolt."*

---

picrasma *(noun)*

Small genus of deciduous trees of tropical America and Asia.

- *Understanding "picrasma" helps you talk about this topic clearly.*
- *The article explained what "picrasma" means with a simple example.*

---

picrasma excelsa *(noun)*

West Indian tree yielding the drug Jamaica quassia.

- *She wrote a short paragraph that included "picrasma excelsa."*
- *Understanding "picrasma excelsa" helps you talk about this topic clearly.*

---

picrasma excelsum *(noun)*

West Indian tree yielding the drug Jamaica quassia.

- *He looked up "picrasma excelsum" because he had never seen it before.*

- *She wrote a short paragraph that included "picrasma excelsum."*

---

picris *(noun)*

Genus of weedy Old World yellow-flowered herbs usually containing a bitter-tasting substance: bitterweed.

- *Understanding "picris" helps you talk about this topic clearly.*
- *In class, the teacher used "picris" to mean genus of weedy old world yellow-flowered herbs....*

---

picris echioides *(noun)*

Widespread European weed with spiny tongue-shaped leaves and yellow flowers; naturalized in United States.

- *The article explained what "picris echioides" means with a simple example.*
- *Understanding "picris echioides" helps you talk about this topic clearly.*

---

pictural *(adjective)*

Pertaining to or consisting of pictures.

- *Students compared "pictural" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "pictural."*

---

picul *(noun)*

A unit of weight used in some parts of Asia; approximately equal to 133 pounds (the load a grown man can carry).

- *She wrote a short paragraph that included "picul."*
- *Understanding "picul" helps you talk about this topic clearly.*

---

piculet *(noun)*

Small woodpeckers of South America and Africa and East Indies having soft rounded tail feathers.

- *Understanding "piculet" helps you talk about this topic clearly.*
- *The article explained what "piculet" means with a simple example.*

---

picumnus *(noun)*

A genus of Picidae.

- *Understanding "picumnus" helps you talk about this topic clearly.*
- *He looked up "picumnus" because he had never seen it before.*

---

pieplant *(noun)*

Long pinkish sour leafstalks usually eaten cooked and sweetened.

- *The article explained what "pieplant" means with a simple example.*
- *In class, the teacher used "pieplant" to mean long pinkish sour leafstalks usually eaten cooked....*

---

pierid *(noun)*

Any of numerous pale-colored butterflies having three pairs of well-developed legs.

- *She wrote a short paragraph that included "pierid."*
- *The article explained what "pierid" means with a simple example.*

---

pierid butterfly *(noun)*

Any of numerous pale-colored butterflies having three pairs of well-developed legs.

- *In class, the teacher used "pierid butterfly" to mean any of numerous pale-colored butterflies having....*
- *He looked up "pierid butterfly" because he had never seen it before.*

---

pieridae *(noun)*

Arthropod family including cabbage butterflies; sulphur butterflies.

- *She wrote a short paragraph that included "pieridae."*
- *He looked up "pieridae" because he had never seen it before.*

---

pieris protodice *(noun)*

Common North American form of cabbage butterfly.

- *The article explained what "pieris protodice" means with a simple example.*
- *Understanding "pieris protodice" helps you talk about this topic clearly.*

---

pierre de terrail *(noun)*

French soldier said to be fearless and chivalrous (1473-1524).

- *They discussed "pierre de terrail" during the group presentation.*
- *Understanding "pierre de terrail" helps you talk about this topic clearly.*

pierre terrail *(noun)*

French soldier said to be fearless and chivalrous (1473-1524).

- *In class, the teacher used "pierre terrail" to mean french soldier said to be fearless and chivalrous....*
- *The article explained what "pierre terrail" means with a simple example.*

pietistical *(adjective)*

Of or relating to Pietism.

- *The speaker chose "pietistical" because it captured the feeling precisely.*
- *It is useful to describe something as "pietistical" when it is of or relating to pietism.*

pigboat *(noun)*

A submersible warship usually armed with torpedoes.

- *He looked up "pigboat" because he had never seen it before.*
- *In class, the teacher used "pigboat" to mean a submersible warship usually armed with torpedoes.*

pigfish *(noun)*

Found from Long Island southward.

- *Understanding "pigfish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pigfish."*

piggishly *(adverb)*

In a piggish manner.

- *Piggishly, he took two pieces of cake.*
- *Place "piggishly" carefully so the meaning stays clear.*

piggishness *(noun)*

An excessive desire for food.

- *In class, the teacher used "piggishness" to mean an excessive desire for food.*
- *They discussed "piggishness" during the group presentation.*

pigheadedness *(noun)*

Resolute adherence to your own ideas or desires.

- *Understanding "pigheadedness" helps you talk about this topic clearly.*
- *He looked up "pigheadedness" because he had never seen it before.*

pigmy talinum *(noun)*

Low plant with crowded narrow succulent leaves and fairly large deep pink axillary flowers that seem to sit on the ground; southwestern United States.

- *In class, the teacher used "pigmy talinum" to mean low plant with crowded narrow succulent leaves and....*
- *The article explained what "pigmy talinum" means with a simple example.*

pignolia *(noun)*

Edible seed of any of several nut pines especially some pinons of southwestern North America.

- *They discussed "pignolia" during the group presentation.*
- *He looked up "pignolia" because he had never seen it before.*

pigsticking *(noun)*

The sport of hunting wild boar with spears.

- *He looked up "pigsticking" because he had never seen it before.*
- *She wrote a short paragraph that included "pigsticking."*

pigswill *(noun)*

Wet feed (especially for pigs) consisting of mostly kitchen waste mixed with water or skimmed or sour milk.

- *They discussed “pigswill” during the group presentation.*
- *The article explained what “pigswill” means with a simple example.*

---

pigwash *(noun)*

Wet feed (especially for pigs) consisting of mostly kitchen waste mixed with water or skimmed or sour milk.

- *They discussed “pigwash” during the group presentation.*
- *The article explained what “pigwash” means with a simple example.*

---

pikeblenny *(noun)*

Tropical American fishes; males are aggressively defensive of their territory.

- *They discussed “pikeblenny” during the group presentation.*
- *In class, the teacher used “pikeblenny” to mean tropical american fishes; males are aggressively....*

---

pilaff *(noun)*

Rice cooked in well-seasoned broth with onions or celery and usually poultry or game or shellfish and sometimes tomatoes.

- *Understanding “pilaff” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “pilaff.”*

---

pilary *(adjective)*

Covered with hairs especially fine soft ones.

- *The speaker chose “pilary” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “pilary.”*

---

pilaw *(noun)*

Rice cooked in well-seasoned broth with onions or celery and usually poultry or game or shellfish and sometimes tomatoes.

- *She wrote a short paragraph that included “pilaw.”*
- *Understanding “pilaw” helps you talk about this topic clearly.*

---

pilea involucrata *(noun)*

Low stingless nettle of Central and South America having velvety brownish-green toothed leaves and clusters of small green flowers.

- *She wrote a short paragraph that included “pilea involucrata.”*
- *The article explained what “pilea involucrata” means with a simple example.*

---

pilea pumilla *(noun)*

A plants of the genus Pilea having drooping green flower clusters and smooth translucent stems and leaves.

- *The article explained what “pilea pumilla” means with a simple example.*
- *In class, the teacher used “pilea pumilla” to mean a plants of the genus pilea having drooping green....*

---

pilewort *(noun)*

Perennial herb native to Europe but naturalized elsewhere having heart-shaped leaves and yellow flowers resembling buttercups; its tuberous roots have been used as a poultice to relieve piles.

- *He looked up “pilewort” because he had never seen it before.*
- *They discussed “pilewort” during the group presentation.*

---

pillwort *(noun)*

European water fern found around margins of bodies of water or in wet acid soil having small globose sporocarps.

- *They discussed “pillwort” during the group presentation.*
- *In class, the teacher used “pillwort” to mean european water fern found around margins of bodies....*

---

pilomotor reflex *(noun)*

Reflex erection of hairs of the skin in response to cold or emotional stress or skin irritation.

- *She wrote a short paragraph that included “pilomotor reflex.”*
- *He looked up “pilomotor reflex” because he had never seen it before.*

---

pilosebaceous *(adjective)*

Of or relating to a hair follicle and its sebaceous gland.

- *Students compared “pilosebaceous” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “pilosebaceous.”*

pilosity *(noun)*

The quality of having hair.

- *They discussed "pilosity" during the group presentation.*
- *In class, the teacher used "pilosity" to mean the quality of having hair.*

pilotfish *(noun)*

Small pelagic fish often accompanying sharks or mantas.

- *In class, the teacher used "pilotfish" to mean small pelagic fish often accompanying sharks or mantas.*
- *They discussed "pilotfish" during the group presentation.*

pilous *(adjective)*

Covered with hairs especially fine soft ones.

- *Would you call this situation "pilous"? Explain why.*
- *The speaker chose "pilous" because it captured the feeling precisely.*

pilularia globulifera *(noun)*

European water fern found around margins of bodies of water or in wet acid soil having small globose sporocarps.

- *They discussed "pilularia globulifera" during the group presentation.*
- *She wrote a short paragraph that included "pilularia globulifera."*

pimpinella anisum *(noun)*

Native to Egypt but cultivated widely for its aromatic seeds and the oil from them used medicinally and as a flavoring in cookery.

- *In class, the teacher used "pimpinella anisum" to mean native to egypt but cultivated widely for its....*
- *He looked up "pimpinella anisum" because he had never seen it before.*

pinchgut *(noun)*

A niggardly person who starves himself (and others).

- *Understanding "pinchgut" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pinchgut."*

pinckneya *(noun)*

Small genus of shrubs or small trees of southeastern United States and northern South America.

- *Understanding "pinckneya" helps you talk about this topic clearly.*
- *They discussed "pinckneya" during the group presentation.*

pincurl clip *(noun)*

A variety of clip for holding pin curls.

- *The article explained what "pincurl clip" means with a simple example.*
- *In class, the teacher used "pincurl clip" to mean a variety of clip for holding pin curls.*

pindolol *(noun)*

An oral beta blocker (trade name Visken) used in treating hypertension.

- *She wrote a short paragraph that included "pindolol."*
- *He looked up "pindolol" because he had never seen it before.*

pine spittlebug *(noun)*

North American insect that attacks pines.

- *The article explained what "pine spittlebug" means with a simple example.*
- *In class, the teacher used "pine spittlebug" to mean north american insect that attacks pines.*

pine-barren sandwort *(noun)*

Deep-rooted perennial of southeastern United States.

- *They discussed "pine-barren sandwort" during the group presentation.*
- *He looked up "pine-barren sandwort" because he had never seen it before.*

pinesap *(noun)*

Fleshy tawny or reddish saprophytic herb resembling the Indian pipe and growing in woodland humus of eastern North America; in some classifications placed in a separate genus Hypopitys.

- *Understanding "pinesap" helps you talk about this topic clearly.*
- *They discussed "pinesap" during the group presentation.*

---

pineus *(noun)*

A genus of Adelgidae.

- *In class, the teacher used "pineus" to mean a genus of adelgidae.*
- *Understanding "pineus" helps you talk about this topic clearly.*

---

pineus pinifoliae *(noun)*

A variety of adelgid.

- *Understanding "pineus pinifoliae" helps you talk about this topic clearly.*
- *The article explained what "pineus pinifoliae" means with a simple example.*

---

pineweed *(noun)*

Annual wiry-stemmed North American weed with minute scalelike leaves and small yellow flowers.

- *The article explained what "pineweed" means with a simple example.*
- *In class, the teacher used "pineweed" to mean annual wiry-stemmed north american weed with minute....*

---

pinfish *(noun)*

Similar to sea bream; small spiny-finned fish found in bays along the southeastern coast of the United States.

- *The article explained what "pinfish" means with a simple example.*
- *Understanding "pinfish" helps you talk about this topic clearly.*

---

pinguecula *(noun)*

A slightly elevated elastic tissue deposit in the conjunctiva that may extend to the cornea but does not cover it.

- *She wrote a short paragraph that included "pinguecula."*
- *They discussed "pinguecula" during the group presentation.*

---

pinguinus impennis *(noun)*

Large flightless auk of rocky islands off northern Atlantic coasts; extinct.

- *The article explained what "pinguinus impennis" means with a simple example.*
- *Understanding "pinguinus impennis" helps you talk about this topic clearly.*

---

pinicola *(noun)*

A genus of Fringillidae.

- *She wrote a short paragraph that included "pinicola."*
- *The article explained what "pinicola" means with a simple example.*

---

pinicola enucleator *(noun)*

Large grosbeak of coniferous forests of Old and New Worlds.

- *The article explained what "pinicola enucleator" means with a simple example.*
- *Understanding "pinicola enucleator" helps you talk about this topic clearly.*

---

pinite *(noun)*

Grey or green or brown mineral similar to mica and containing aluminum and potassium sulphates.

- *She wrote a short paragraph that included "pinite."*
- *They discussed "pinite" during the group presentation.*

---

pink fivecorner *(noun)*

Heathlike shrub of southwestern Australia grown for its sharply scented foliage and pink flowers followed by pentagonal fruit.

- *They discussed "pink fivecorner" during the group presentation.*
- *He looked up "pink fivecorner" because he had never seen it before.*

---

pinnated *(adjective)*

(of a leaf shape) featherlike; having leaflets on each side of a common axis.

- *A "pinnated" approach may work better in this case.*

- *Students compared “pinnated” with similar adjectives in the lesson.*

pinnatiped *(noun)*

Aquatic carnivorous mammal having a streamlined body specialized for swimming with limbs modified as flippers.

- *In class, the teacher used “pinnatiped” to mean aquatic carnivorous mammal having a streamlined....*
- *They discussed “pinnatiped” during the group presentation.*

pinnatisect *(adjective)*

(of a leaf shape) cleft nearly to the midrib in narrow divisions not separated into distinct leaflets.

- *Students compared “pinnatisect” with similar adjectives in the lesson.*
- *A “pinnatisect” approach may work better in this case.*

pinnipedia *(noun)*

Seals; sea lions; walruses.

- *She wrote a short paragraph that included “pinnipedia.”*
- *The article explained what “pinnipedia” means with a simple example.*

pinnotheres *(noun)*

Type genus of the family Pinnotheridae: pea crabs.

- *They discussed “pinnotheres” during the group presentation.*
- *She wrote a short paragraph that included “pinnotheres.”*

pinnotheres ostreum *(noun)*

Tiny soft-bodied crab living within the mantle cavity of oysters.

- *He looked up “pinnotheres ostreum” because he had never seen it before.*
- *Understanding “pinnotheres ostreum” helps you talk about this topic clearly.*

pinnotheridae *(noun)*

Tiny soft-bodied crabs.

- *In class, the teacher used “pinnotheridae” to mean tiny soft-bodied crabs.*
- *The article explained what “pinnotheridae” means with a simple example.*

pinocle *(noun)*

A card game played with a pack of forty-eight cards (two of each suit for high cards); play resembles whist.

- *Understanding “pinocle” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “pinocle.”*

pinophytina *(noun)*

Most conifers: in some systems classified as a class (Pinopsida) and in others as a subdivision (Pinophytina); used in some classifications for one of five subdivisions of Gymnospermophyta.

- *The article explained what “pinophytina” means with a simple example.*
- *Understanding “pinophytina” helps you talk about this topic clearly.*

pinopsida *(noun)*

Most conifers: in some systems classified as a class (Pinopsida) and in others as a subdivision (Pinophytina); used in some classifications for one of five subdivisions of Gymnospermophyta.

- *She wrote a short paragraph that included “pinopsida.”*
- *The article explained what “pinopsida” means with a simple example.*

pinus albicaulis *(noun)*

Small pine of western North America; having smooth grey-white bark and soft brittle wood; similar to limber pine.

- *Understanding “pinus albicaulis” helps you talk about this topic clearly.*
- *In class, the teacher used “pinus albicaulis” to mean small pine of western north america; having smooth....*

pinus californiarum *(noun)*

Very small tree similar to Rocky mountain pinon but having a single needle per fascicle; similar to Parry’s pinyon in range.

- *They discussed “pinus californiarum” during the group presentation.*
- *She wrote a short paragraph that included “pinus californiarum.”*

pinus cembra *(noun)*

Large five-needled European pine; yields cembra nuts and a resinous exudate.

- *The article explained what “pinus cembra” means with a simple example.*
- *In class, the teacher used “pinus cembra” to mean large five-needled european pine; yields cembra....*

---

pinus cembroides *(noun)*

A small two-needled or three-needled pinon of Mexico and southern Texas.

- *In class, the teacher used “pinus cembroides” to mean a small two-needled or three-needled pinon of....*
- *The article explained what “pinus cembroides” means with a simple example.*

---

pinus contorta murrayana *(noun)*

Tall subspecies of lodgepole pine.

- *She wrote a short paragraph that included “pinus contorta murrayana.”*
- *He looked up “pinus contorta murrayana” because he had never seen it before.*

---

pinus flexilis *(noun)*

Western North American pine with long needles and very flexible limbs and dark-grey furrowed bark.

- *The article explained what “pinus flexilis” means with a simple example.*
- *They discussed “pinus flexilis” during the group presentation.*

---

pinus jeffreyi *(noun)*

Tall symmetrical pine of western North America having long blue-green needles in bunches of 3 and elongated cones on spreading somewhat pendulous branches; sometimes classified as a variety of ponderosa pine.

- *The article explained what “pinus jeffreyi” means with a simple example.*
- *Understanding “pinus jeffreyi” helps you talk about this topic clearly.*

---

pinus monophylla *(noun)*

Pinon of southwestern United States having solitary needles and often many stems; important as a nut pine.

- *Understanding “pinus monophylla” helps you talk about this topic clearly.*
- *They discussed “pinus monophylla” during the group presentation.*

---

pinus parryana *(noun)*

Five-needled pinon of southern California and northern Baja California having (sometimes three-needled or four-needled showing hybridization from Pinus californiarum).

- *She wrote a short paragraph that included “pinus parryana.”*
- *He looked up “pinus parryana” because he had never seen it before.*

---

pinus quadrifolia *(noun)*

Five-needled pinon of southern California and northern Baja California having (sometimes three-needled or four-needled showing hybridization from Pinus californiarum).

- *Understanding “pinus quadrifolia” helps you talk about this topic clearly.*
- *In class, the teacher used “pinus quadrifolia” to mean five-needled pinon of southern california and....*

---

pinus strobiformis *(noun)*

Medium-size pine of northwestern Mexico; bark is dark brown and furrowed when mature.

- *He looked up “pinus strobiformis” because he had never seen it before.*
- *They discussed “pinus strobiformis” during the group presentation.*

---

pinus torreyana *(noun)*

Medium-sized five-needled pine of southwestern California having long cylindrical cones.

- *In class, the teacher used “pinus torreyana” to mean medium-sized five-needled pine of southwestern....*
- *He looked up “pinus torreyana” because he had never seen it before.*

---

pipage *(noun)*

A long tube made of metal or plastic that is used to carry water or oil or gas etc.

- *In class, the teacher used “pipage” to mean a long tube made of metal or plastic that is used....*
- *Understanding “pipage” helps you talk about this topic clearly.*

---

pipeful *(noun)*

The quantity of tobacco that can be smoked in a pipe at one time.

- *She wrote a short paragraph that included "pipeful."*
- *The article explained what "pipeful" means with a simple example.*

---

piper cubeba *(noun)*

Tropical southeast Asian shrubby vine bearing spicy berrylike fruits.

- *He looked up "piper cubeba" because he had never seen it before.*
- *They discussed "piper cubeba" during the group presentation.*

---

piperaceae *(noun)*

Tropical woody vines and herbaceous plants having aromatic herbage and minute flowers in spikelets.

- *She wrote a short paragraph that included "piperaceae."*
- *They discussed "piperaceae" during the group presentation.*

---

piperales *(noun)*

Piperaceae; Saururaceae; Chloranthaceae.

- *They discussed "piperales" during the group presentation.*
- *The article explained what "piperales" means with a simple example.*

---

piperin *(noun)*

Derived from pepper (especially black pepper); source of the hotness of black and white pepper.

- *The article explained what "piperin" means with a simple example.*
- *In class, the teacher used "piperin" to mean derived from pepper (especially black pepper);....*

---

piperocaine *(noun)*

A compound used in the form of its hydrochloride as a local or spinal anesthetic.

- *The article explained what "piperocaine" means with a simple example.*
- *She wrote a short paragraph that included "piperocaine."*

---

piperocaine hydrochloride *(noun)*

A compound used in the form of its hydrochloride as a local or spinal anesthetic.

- *They discussed "piperocaine hydrochloride" during the group presentation.*
- *He looked up "piperocaine hydrochloride" because he had never seen it before.*

---

pipewort *(noun)*

Aquatic perennial of North America and Ireland and Hebrides having translucent green leaves in a basal spiral and dense buttonlike racemes of minute white flowers.

- *Understanding "pipewort" helps you talk about this topic clearly.*
- *In class, the teacher used "pipewort" to mean aquatic perennial of north america and ireland and....*

---

pipewort family *(noun)*

Chiefly tropical aquatic or bog herbs: pipeworts.

- *He looked up "pipewort family" because he had never seen it before.*
- *Understanding "pipewort family" helps you talk about this topic clearly.*

---

pipidae *(noun)*

Tongueless frogs.

- *In class, the teacher used "pipidae" to mean tongueless frogs.*
- *He looked up "pipidae" because he had never seen it before.*

---

pipile *(noun)*

Genus of large crested guans (the piping guans).

- *She wrote a short paragraph that included "pipile."*
- *He looked up "pipile" because he had never seen it before.*

---

pipilo erythrophthalmus *(noun)*

Common towhee of eastern North America.

- *In class, the teacher used "pipilo erythrophthalmus" to mean common towhee of eastern north america.*
- *They discussed "pipilo erythrophthalmus" during the group presentation.*

pipistrel *(noun)*

Small European brown bat.

- *He looked up "pipistrel" because he had never seen it before.*
- *She wrote a short paragraph that included "pipistrel."*

pipistrellus subflavus *(noun)*

One of the smallest bats of eastern North America.

- *She wrote a short paragraph that included "pipistrellus subflavus."*
- *The article explained what "pipistrellus subflavus" means with a simple example.*

pipra *(noun)*

Type genus of the Pipridae containing the typical manakins.

- *In class, the teacher used "pipra" to mean type genus of the pipridae containing the typical....*
- *Understanding "pipra" helps you talk about this topic clearly.*

pipracil *(noun)*

A synthetic type of penicillin antibiotic (trade name Pipracil) used for moderate to severe infections.

- *In class, the teacher used "pipracil" to mean a synthetic type of penicillin antibiotic (trade....*
- *He looked up "pipracil" because he had never seen it before.*

pipsissewa *(noun)*

Any of several plants of the genus Chimaphila.

- *He looked up "pipsissewa" because he had never seen it before.*
- *They discussed "pipsissewa" during the group presentation.*

piptadenia *(noun)*

Tropical American trees and shrubs; often placed in other genera.

- *They discussed "piptadenia" during the group presentation.*
- *The article explained what "piptadenia" means with a simple example.*

piptadenia macrocarpa *(noun)*

Brazilian shrub having twice-pinnate leaves and small spicate flowers followed by flat or irregularly torulose pods; sometimes placed in genus Piptadenia.

- *In class, the teacher used "piptadenia macrocarpa" to mean brazilian shrub having twice-pinnate leaves and....*
- *The article explained what "piptadenia macrocarpa" means with a simple example.*

pipturus *(noun)*

An Australian genus of woody plants of the family Urticaceae.

- *Understanding "pipturus" helps you talk about this topic clearly.*
- *The article explained what "pipturus" means with a simple example.*

pipturus albidus *(noun)*

Hawaiian tree of genus Pipturus having a bark (tapa) from which tapa cloth is made.

- *In class, the teacher used "pipturus albidus" to mean hawaiian tree of genus pipturus having a bark....*
- *Understanding "pipturus albidus" helps you talk about this topic clearly.*

pipturus argenteus *(noun)*

Australian plant of genus Pipturus whose fiber is used in making cloth.

- *In class, the teacher used "pipturus argenteus" to mean australian plant of genus pipturus whose fiber is....*
- *The article explained what "pipturus argenteus" means with a simple example.*

pipul *(noun)*

Fig tree of India noted for great size and longevity; lacks the prop roots of the banyan; regarded as sacred by Buddhists.

- *Understanding "pipul" helps you talk about this topic clearly.*
- *He looked up "pipul" because he had never seen it before.*

piquantly *(adverb)*

With strong spices; in a spicy manner.

- *Using "piquantly" can make your explanation more exact.*
- *He answered "piquantly," which changed the tone of the conversation.*

---

piqueria *(noun)*

Small genus of tropical American perennial herbs or subshrubs with white to pale yellow flowers; often included in genus Stevia.

- *In class, the teacher used "piqueria" to mean small genus of tropical american perennial herbs or....*
- *The article explained what "piqueria" means with a simple example.*

---

pirana *(noun)*

Small voraciously carnivorous freshwater fishes of South America that attack and destroy living animals.

- *They discussed "pirana" during the group presentation.*
- *The article explained what "pirana" means with a simple example.*

---

piranga *(noun)*

A genus of Thraupidae.

- *In class, the teacher used "piranga" to mean a genus of thraupidae.*
- *They discussed "piranga" during the group presentation.*

---

piranga flava hepatica *(noun)*

Common tanager of southwestern United States and Mexico.

- *She wrote a short paragraph that included "piranga flava hepatica."*
- *He looked up "piranga flava hepatica" because he had never seen it before.*

---

piranga ludoviciana *(noun)*

Of western North America; male is black and yellow and orange-red.

- *They discussed "piranga ludoviciana" during the group presentation.*
- *Understanding "piranga ludoviciana" helps you talk about this topic clearly.*

---

piranga olivacea *(noun)*

The male is bright red with black wings and tail.

- *He looked up "piranga olivacea" because he had never seen it before.*
- *They discussed "piranga olivacea" during the group presentation.*

---

piranga rubra *(noun)*

Of middle and southern United States; male is deep rose-red the female mostly yellow.

- *Understanding "piranga rubra" helps you talk about this topic clearly.*
- *In class, the teacher used "piranga rubra" to mean of middle and southern united states; male is deep....*

---

piratically *(adverb)*

In a piratical manner.

- *The piratically published edition of his book.*
- *He answered "piratically," which changed the tone of the conversation.*

---

pirogi *(noun)*

Small fruit or meat turnover baked or fried.

- *Understanding "pirogi" helps you talk about this topic clearly.*
- *In class, the teacher used "pirogi" to mean small fruit or meat turnover baked or fried.*

---

piroplasm *(noun)*

Minute parasite of red blood cells of mammals transmitted by a tick and causing diseases of domestic animals.

- *They discussed "piroplasm" during the group presentation.*
- *In class, the teacher used "piroplasm" to mean minute parasite of red blood cells of mammals....*

---

piroshki *(noun)*

Small fruit or meat turnover baked or fried.

- *The article explained what "piroshki" means with a simple example.*

- *Understanding "piroshki" helps you talk about this topic clearly.*

---

pisanosaur *(noun)*

Primitive dinosaur found in Argentina.

- *She wrote a short paragraph that included "pisanosaur."*
- *He looked up "pisanosaur" because he had never seen it before.*

---

pisanosaurus *(noun)*

Primitive dinosaur found in Argentina.

- *They discussed "pisanosaurus" during the group presentation.*
- *The article explained what "pisanosaurus" means with a simple example.*

---

piscary *(noun)*

A workplace where fish are caught and processed and sold.

- *She wrote a short paragraph that included "piscary."*
- *He looked up "piscary" because he had never seen it before.*

---

piscatory *(adjective)*

Relating to or characteristic of the activity of fishing.

- *A piscatory life.*
- *It is useful to describe something as "piscatory" when it is relating to or characteristic of the activity of....*

---

piscidia *(noun)*

Genus of shrubs or small trees having indehiscent pods with black seeds; roots and bark yield fish poisons.

- *He looked up "piscidia" because he had never seen it before.*
- *She wrote a short paragraph that included "piscidia."*

---

piscidia erythrina *(noun)*

Small tree of West Indies and Florida having large odd-pinnate leaves and panicles of red-striped purple to white flowers followed by decorative curly winged seedpods; yields fish poisons.

- *He looked up "piscidia erythrina" because he had never seen it before.*
- *In class, the teacher used "piscidia erythrina" to mean small tree of west indies and florida having large....*

---

piscidia piscipula *(noun)*

Small tree of West Indies and Florida having large odd-pinnate leaves and panicles of red-striped purple to white flowers followed by decorative curly winged seedpods; yields fish poisons.

- *He looked up "piscidia piscipula" because he had never seen it before.*
- *She wrote a short paragraph that included "piscidia piscipula."*

---

pismire *(noun)*

Social insect living in organized colonies; characteristically the males and fertile queen have wings during breeding season; wingless sterile females are the workers.

- *They discussed "pismire" during the group presentation.*
- *He looked up "pismire" because he had never seen it before.*

---

pissaba palm *(noun)*

Brazilian palm yielding fibers used in making ropes, mats, and brushes.

- *The article explained what "pissaba palm" means with a simple example.*
- *She wrote a short paragraph that included "pissaba palm."*

---

pissis *(noun)*

A mountain in the Andes in Argentina (22,241 feet high).

- *She wrote a short paragraph that included "pissis."*
- *The article explained what "pissis" means with a simple example.*

---

pistacia lentiscus *(noun)*

An evergreen shrub of the Mediterranean region that is cultivated for its resin.

- *He looked up "pistacia lentiscus" because he had never seen it before.*
- *Understanding "pistacia lentiscus" helps you talk about this topic clearly.*

---

pistacia terebinthus *(noun)*

A Mediterranean tree yielding Chian turpentine.

- *They discussed "pistacia terebinthus" during the group presentation.*
- *The article explained what "pistacia terebinthus" means with a simple example.*

---

pistia *(noun)*

Pantropical floating plant forming a rosette of wedge-shaped leaves; a widespread weed in rivers and lakes.

- *Understanding "pistia" helps you talk about this topic clearly.*
- *In class, the teacher used "pistia" to mean pantropical floating plant forming a rosette of....*

---

pistia stratiotes *(noun)*

Pantropical floating plant forming a rosette of wedge-shaped leaves; a widespread weed in rivers and lakes.

- *In class, the teacher used "pistia stratiotes" to mean pantropical floating plant forming a rosette of....*
- *They discussed "pistia stratiotes" during the group presentation.*

---

pistia stratoites *(noun)*

Pantropical floating plant forming a rosette of wedge-shaped leaves; a widespread weed in rivers and lakes.

- *In class, the teacher used "pistia stratoites" to mean pantropical floating plant forming a rosette of....*
- *They discussed "pistia stratoites" during the group presentation.*

---

pistillode *(noun)*

A sterile vestigial pistil remaining in a staminate flower.

- *She wrote a short paragraph that included "pistillode."*
- *Understanding "pistillode" helps you talk about this topic clearly.*

---

pistoleer *(noun)*

Someone armed with a pistol (especially a soldier so armed).

- *They discussed "pistoleer" during the group presentation.*
- *In class, the teacher used "pistoleer" to mean someone armed with a pistol (especially a soldier....*

---

pisum sativum macrocarpon *(noun)*

A variety of pea plant producing peas having soft thick edible pods lacking the fibrous inner lining of the common pea.

- *He looked up "pisum sativum macrocarpon" because he had never seen it before.*
- *In class, the teacher used "pisum sativum macrocarpon" to mean a variety of pea plant producing peas having soft....*

---

pitcherful *(noun)*

The quantity contained in a pitcher.

- *He looked up "pitcherful" because he had never seen it before.*
- *She wrote a short paragraph that included "pitcherful."*

---

pitchstone *(noun)*

Dark acid granitic glass.

- *The article explained what "pitchstone" means with a simple example.*
- *In class, the teacher used "pitchstone" to mean dark acid granitic glass.*

---

pithecellobium *(noun)*

Thorny shrubs and trees of tropical and subtropical America and Asia.

- *In class, the teacher used "pithecellobium" to mean thorny shrubs and trees of tropical and subtropical....*
- *The article explained what "pithecellobium" means with a simple example.*

---

pithecellobium dulce *(noun)*

Common thorny tropical American tree having terminal racemes of yellow flowers followed by sickle-shaped or circinate edible pods and yielding good timber and a yellow dye and mucilaginous gum.

- *They discussed "pithecellobium dulce" during the group presentation.*
- *He looked up "pithecellobium dulce" because he had never seen it before.*

---

pithecellodium unguis-cati *(noun)*

Erect shrub with small if any spines having racemes of white to yellow flowers followed by curved pointed pods and black shiny seeds; West Indies and Florida.

- *They discussed "pithecellodium unguis-cati" during the group presentation.*
- *Understanding "pithecellodium unguis-cati" helps you talk about this topic clearly.*

---

pithecolobium *(noun)*

Thorny shrubs and trees of tropical and subtropical America and Asia.

- *He looked up "pithecolobium" because he had never seen it before.*
- *They discussed "pithecolobium" during the group presentation.*

---

pitiably *(adverb)*

In a manner arousing sympathy and compassion.

- *Place "pitiably" carefully so the meaning stays clear.*
- *He answered "pitiably," which changed the tone of the conversation.*

---

- *He looked up "pitilessness" because he had never seen it before.*
- *She wrote a short paragraph that included "pitilessness."*

---

pitprop *(noun)*

A wooden prop used to support the roof of a mine.

- *Understanding "pitprop" helps you talk about this topic clearly.*
- *They discussed "pitprop" during the group presentation.*

---

pitsaw *(noun)*

A large two-handed saw formerly used to cut logs into planks; one man stood above the log and the other in a pit below.

- *He looked up "pitsaw" because he had never seen it before.*
- *Understanding "pitsaw" helps you talk about this topic clearly.*

---

pituophis *(noun)*

Bull snakes.

- *She wrote a short paragraph that included "pituophis."*
- *The article explained what "pituophis" means with a simple example.*

---

pituophis melanoleucus *(noun)*

Bull snake of western North America that invades rodent burrows.

- *In class, the teacher used "pituophis melanoleucus" to mean bull snake of western north america that invades....*
- *He looked up "pituophis melanoleucus" because he had never seen it before.*

---

pitymys pinetorum *(noun)*

Short-tailed glossy-furred burrowing vole of the eastern United States.

- *Understanding "pitymys pinetorum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pitymys pinetorum."*

---

pityrogramma *(noun)*

Terrestrial tropical ferns having fronds with powdery yellowish or white undersides; sometimes placed in family Polypodiaceae or Adiantaceae.

- *In class, the teacher used "pityrogramma" to mean terrestrial tropical ferns having fronds with....*
- *They discussed "pityrogramma" during the group presentation.*

---

pityrogramma argentea *(noun)*

Fern of southern tropical Africa having fronds with white undersides.

- *She wrote a short paragraph that included "pityrogramma argentea."*
- *They discussed "pityrogramma argentea" during the group presentation.*

---

pityrogramma calomelanos *(noun)*

Tropical American fern having fronds with white undersides.

- *He looked up "pityrogramma calomelanos" because he had never seen it before.*
- *They discussed "pityrogramma calomelanos" during the group presentation.*

pityrogramma calomelanos aureoflava *(noun)*

Tropical American fern having fronds with light golden undersides.

- *In class, the teacher used "pityrogramma calomelanos aureoflava" to mean tropical american fern having fronds with light....*
- *Understanding "pityrogramma calomelanos aureoflava" helps you talk about this topic clearly.*

pityrogramma chrysophylla *(noun)*

Fern of West Indies and South America having fronds with bright golden-yellow undersides.

- *Understanding "pityrogramma chrysophylla" helps you talk about this topic clearly.*
- *He looked up "pityrogramma chrysophylla" because he had never seen it before.*

placable *(adjective)*

Easily calmed or pacified.

- *Students compared "placable" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "placable."*

placatingly *(adverb)*

In a placating manner.

- *Jenny smiled placatingly.*
- *He answered "placatingly," which changed the tone of the conversation.*

placative *(adjective)*

Intended to pacify by acceding to demands or granting concessions.

- *Placating (or placative) gestures.*
- *A "placative" approach may work better in this case.*

placeman *(noun)*

A disparaging term for an appointee.

- *They discussed "placeman" during the group presentation.*
- *In class, the teacher used "placeman" to mean a disparaging term for an appointee.*

placeseeker *(noun)*

A disparaging term for an appointee.

- *He looked up "placeseeker" because he had never seen it before.*
- *They discussed "placeseeker" during the group presentation.*

placidyl *(noun)*

A mild sedative-hypnotic drug (trade name Placidyl).

- *He looked up "placidyl" because he had never seen it before.*
- *She wrote a short paragraph that included "placidyl."*

placoderm *(noun)*

Fish-like vertebrate with bony plates on head and upper body; dominant in seas and rivers during the Devonian; considered the earliest vertebrate with jaws.

- *The article explained what "placoderm" means with a simple example.*
- *In class, the teacher used "placoderm" to mean fish-like vertebrate with bony plates on head and....*

placodermi *(noun)*

Extinct group of bony-plated fishes with primitive jaws.

- *In class, the teacher used "placodermi" to mean extinct group of bony-plated fishes with primitive jaws.*
- *The article explained what "placodermi" means with a simple example.*

placuna *(noun)*

Windowpane oysters.

- *Understanding "placuna" helps you talk about this topic clearly.*
- *In class, the teacher used "placuna" to mean windowpane oysters.*

placuna placenta *(noun)*

Marine bivalve common in Philippine coastal waters characterized by a large thin flat translucent shell.

- *He looked up "placuna placenta" because he had never seen it before.*
- *In class, the teacher used "placuna placenta" to mean marine bivalve common in philippine coastal waters....*

---

plagianthus *(noun)*

Small genus of shrubs and trees of Australia and New Zealand.

- *Understanding "plagianthus" helps you talk about this topic clearly.*
- *He looked up "plagianthus" because he had never seen it before.*

---

plagianthus betulinus *(noun)*

Deciduous New Zealand tree whose inner bark yields a strong fiber that resembles flax and is called New Zealand cotton.

- *She wrote a short paragraph that included "plagianthus betulinus."*
- *He looked up "plagianthus betulinus" because he had never seen it before.*

---

plagianthus regius *(noun)*

Deciduous New Zealand tree whose inner bark yields a strong fiber that resembles flax and is called New Zealand cotton.

- *They discussed "plagianthus regius" during the group presentation.*
- *He looked up "plagianthus regius" because he had never seen it before.*

---

plagiarisation *(noun)*

The act of plagiarizing; taking someone's words or ideas as if they were your own.

- *She wrote a short paragraph that included "plagiarisation."*
- *He looked up "plagiarisation" because he had never seen it before.*

---

- *The speaker chose "planetal" because it captured the feeling precisely.*
- *It is useful to describe something as "planetal" when it is of or relating to or resembling the physical or....*

---

plangency *(noun)*

Having the character of a loud deep sound; the quality of being resonant.

- *She wrote a short paragraph that included "plangency."*
- *Understanding "plangency" helps you talk about this topic clearly.*

---

planimeter *(noun)*

A measuring instrument for measuring the area of an irregular plane figure.

- *They discussed "planimeter" during the group presentation.*
- *In class, the teacher used "planimeter" to mean a measuring instrument for measuring the area of an....*

---

planless *(adjective)*

Aimlessly drifting.

- *Would you call this situation "planless"? Explain why.*
- *Her writing became clearer after she learned "planless."*

---

planococcus *(noun)*

A genus of Pseudococcidae.

- *Understanding "planococcus" helps you talk about this topic clearly.*
- *The article explained what "planococcus" means with a simple example.*

---

planococcus citri *(noun)*

Feeds on a wide variety of cultivated plants but especially destructive to citrus.

- *The article explained what "planococcus citri" means with a simple example.*
- *In class, the teacher used "planococcus citri" to mean feeds on a wide variety of cultivated plants but....*

---

planoconcave *(adjective)*

Flat on one side and concave on the other.

- *Her writing became clearer after she learned "planoconcave."*
- *Students compared "planoconcave" with similar adjectives in the lesson.*

---

planoconvex *(adjective)*

Flat on one side and convex on the other.

- *The speaker chose "planoconvex" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "planoconvex."*

---

planographic *(adjective)*

Of or relating to or involving planography.

- *It is useful to describe something as "planographic" when it is of or relating to or involving planography.*
- *Students compared "planographic" with similar adjectives in the lesson.*

---

plantaginaceae *(noun)*

Cosmopolitan family of small herbs and a few shrubs; most are troublesome weeds.

- *She wrote a short paragraph that included "plantaginaceae."*
- *He looked up "plantaginaceae" because he had never seen it before.*

---

plantaginales *(noun)*

Coextensive with the family Plantaginaceae.

- *They discussed "plantaginales" during the group presentation.*
- *She wrote a short paragraph that included "plantaginales."*

---

plantago rugelii *(noun)*

North American plantain having reddish leafstalks and broad leaves.

- *She wrote a short paragraph that included "plantago rugelii."*
- *They discussed "plantago rugelii" during the group presentation.*

---

plantain-leaved pussytoes *(noun)*

A variety of pussytoes.

- *In class, the teacher used "plantain-leaved pussytoes" to mean a variety of pussytoes.*
- *Understanding "plantain-leaved pussytoes" helps you talk about this topic clearly.*

---

plantal *(adjective)*

Of or relating to plants.

- *Students compared "plantal" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "plantal."*

---

plantlet *(noun)*

A young plant or a small plant.

- *He looked up "plantlet" because he had never seen it before.*
- *She wrote a short paragraph that included "plantlet."*

---

plantlike flagellate *(noun)*

Unicellular organisms having many characteristics of typical algae.

- *The article explained what "plantlike flagellate" means with a simple example.*
- *She wrote a short paragraph that included "plantlike flagellate."*

---

planula *(noun)*

The flat ciliated free-swimming larva of hydrozoan coelenterates.

- *They discussed "planula" during the group presentation.*
- *She wrote a short paragraph that included "planula."*

---

plasmablast *(noun)*

The precursor of a plasma cell.

- *Understanding “plasmablast” helps you talk about this topic clearly.*
- *They discussed “plasmablast” during the group presentation.*

---

plasmacyte *(noun)*

A cell that develops from a B lymphocyte in reaction to a specific antigen; found in bone marrow and sometimes in the blood.

- *She wrote a short paragraph that included “plasmacyte.”*
- *He looked up “plasmacyte” because he had never seen it before.*

---

plasmodiidae *(noun)*

Malaria parasites.

- *In class, the teacher used “plasmodiidae” to mean malaria parasites.*
- *Understanding “plasmodiidae” helps you talk about this topic clearly.*

---

plasmodiophora *(noun)*

Type genus of Plasmodiophoraceae comprising minute plant parasitic fungi similar to and sometimes included among the slime molds.

- *In class, the teacher used “plasmodiophora” to mean type genus of plasmodiophoraceae comprising minute....*
- *The article explained what “plasmodiophora” means with a simple example.*

---

plasmodiophora brassicae *(noun)*

A fungus resembling slime mold that causes swellings or distortions of the roots of cabbages and related plants.

- *She wrote a short paragraph that included “plasmodiophora brassicae.”*
- *They discussed “plasmodiophora brassicae” during the group presentation.*

---

plasmodiophoraceae *(noun)*

Family of fungi often causing hypertrophy in seed plants.

- *Understanding “plasmodiophoraceae” helps you talk about this topic clearly.*
- *He looked up “plasmodiophoraceae” because he had never seen it before.*

---

plasterer’s float *(noun)*

A hand tool with a flat face used for smoothing and finishing the surface of plaster or cement or stucco.

- *In class, the teacher used “plasterer’s float” to mean a hand tool with a flat face used for smoothing and....*
- *They discussed “plasterer’s float” during the group presentation.*

---

plasticise *(verb)*

Make plastic, as by the addition of a plasticizer.

- *He did not know how to use “plasticise” until he saw an example.*
- *Learners should practice how to use “plasticise” in real sentences.*

---

plasticiser *(noun)*

A substance added to plastics or other materials to make them more pliable.

- *They discussed “plasticiser” during the group presentation.*
- *Understanding “plasticiser” helps you talk about this topic clearly.*

---

plasticize *(verb)*

Make plastic, as by the addition of a plasticizer.

- *Plasticized PVC.*
- *Learners should practice how to use “plasticize” in real sentences.*

---

plastinate *(verb)*

Preserve (tissue) with plastics, as for teaching and research purposes.

- *The doctor plastinates bodies to teach anatomy to his students.*
- *In everyday English, people use “plastinate” when talking about this idea.*

---

platalea *(noun)*

Type genus of the Plataleidae.

- *Understanding “platalea” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “platalea.”*

platalea leucorodia *(noun)*

Pure white crested spoonbill of southern Eurasia and northeastern Africa.

- *They discussed "platalea leucorodia" during the group presentation.*
- *He looked up "platalea leucorodia" because he had never seen it before.*

platan *(noun)*

Any of several trees of the genus Platanus having thin pale bark that scales off in small plates and lobed leaves and ball-shaped heads of fruits.

- *He looked up "platan" because he had never seen it before.*
