Pertaining to or characteristic of or in accordance with Platonism.

- *It is useful to describe something as "platonistic" when it is pertaining to or characteristic of or in accordance....*
- *The speaker chose "platonistic" because it captured the feeling precisely.*

---

plattensee *(noun)*

A large shallow lake in western Hungary.

- *The article explained what "plattensee" means with a simple example.*
- *She wrote a short paragraph that included "plattensee."*

---

platycephalidae *(noun)*

Scorpaenoid flatheads.

- *In class, the teacher used "platycephalidae" to mean scorpaenoid flatheads.*
- *They discussed "platycephalidae" during the group presentation.*

---

platycerium *(noun)*

Often epiphytic tropical Old World ferns.

- *They discussed "platycerium" during the group presentation.*
- *She wrote a short paragraph that included "platycerium."*

---

platycerium alcicorne *(noun)*

Commonly cultivated fern of Australia and southeastern Asia and Polynesia.

- *The article explained what "platycerium alcicorne" means with a simple example.*
- *They discussed "platycerium alcicorne" during the group presentation.*

---

platycerium andinum *(noun)*

Fern of Peru and Bolivia.

- *They discussed "platycerium andinum" during the group presentation.*

- *She wrote a short paragraph that included "platycerium andinum."*

platycerium bifurcatum *(noun)*

Commonly cultivated fern of Australia and southeastern Asia and Polynesia.

- *She wrote a short paragraph that included "platycerium bifurcatum."*
- *He looked up "platycerium bifurcatum" because he had never seen it before.*

platycladus orientalis *(noun)*

Asiatic shrub or small tree widely planted in United States and Europe; in some classifications assigned to its own genus.

- *In class, the teacher used "platycladus orientalis" to mean asiatic shrub or small tree widely planted in....*
- *The article explained what "platycladus orientalis" means with a simple example.*

platyctenea *(noun)*

An order of Tentaculata.

- *Understanding "platyctenea" helps you talk about this topic clearly.*
- *The article explained what "platyctenea" means with a simple example.*

platyctenean *(noun)*

Ctenophore have long tentacles and flattened body.

- *He looked up "platyctenean" because he had never seen it before.*
- *She wrote a short paragraph that included "platyctenean."*

platyhelminth *(noun)*

Parasitic or free-living worms having a flattened body.

- *She wrote a short paragraph that included "platyhelminth."*
- *Understanding "platyhelminth" helps you talk about this topic clearly.*

platylobium *(noun)*

Small genus of Australian evergreen leguminous shrubs or subshrubs.

- *Understanding "platylobium" helps you talk about this topic clearly.*
- *They discussed "platylobium" during the group presentation.*

platylobium formosum *(noun)*

Evergreen shrub having almost heart-shaped foliage and bright yellow pea-like flowers followed by flat pods with flat wings; Australia and Tasmania.

- *He looked up "platylobium formosum" because he had never seen it before.*
- *In class, the teacher used "platylobium formosum" to mean evergreen shrub having almost heart-shaped foliage....*

platymiscium *(noun)*

Genus of tropical American trees: quira.

- *They discussed "platymiscium" during the group presentation.*
- *In class, the teacher used "platymiscium" to mean genus of tropical american trees: quira.*

platymiscium pinnatum *(noun)*

Large erect shrub of Colombia having large odd-pinnate leaves with large leaflets and axillary racemes of fragrant yellow flowers.

- *She wrote a short paragraph that included "platymiscium pinnatum."*
- *Understanding "platymiscium pinnatum" helps you talk about this topic clearly.*

platymiscium trinitatis *(noun)*

Large tree of Trinidad and Guyana having odd-pinnate leaves and violet-scented axillary racemes of yellow flowers and long smooth pods; grown as a specimen in parks and large gardens.

- *Understanding "platymiscium trinitatis" helps you talk about this topic clearly.*
- *He looked up "platymiscium trinitatis" because he had never seen it before.*

platypoecilus maculatus *(noun)*

Small stocky Mexican fish; popular aquarium fish.

- *They discussed "platypoecilus maculatus" during the group presentation.*
- *She wrote a short paragraph that included "platypoecilus maculatus."*

platyrhine *(adjective)*

Of or related to New World monkeys having nostrils far apart or to people with broad noses.

- *Would you call this situation "platyrhine"? Explain why.*
- *The speaker chose "platyrhine" because it captured the feeling precisely.*

---

platyrhinian *(adjective)*

Of or related to New World monkeys having nostrils far apart or to people with broad noses.

- *The speaker chose "platyrhinian" because it captured the feeling precisely.*
- *It is useful to describe something as "platyrhinian" when it is of or related to new world monkeys having nostrils....*

---

platyrrhine *(adjective)*

Of or related to New World monkeys having nostrils far apart or to people with broad noses.

- *Would you call this situation "platyrrhine"? Explain why.*
- *A "platyrrhine" approach may work better in this case.*

---

platyrrhini *(noun)*

New World monkeys: capuchin; douroucouli; howler monkey; saki; spider monkey; squirrel monkey; titi; uakari; woolly monkey; marmoset; tamarin.

- *In class, the teacher used "platyrrhini" to mean new world monkeys: capuchin; douroucouli; howler....*
- *The article explained what "platyrrhini" means with a simple example.*

---

platyrrhinian *(adjective)*

Of or related to New World monkeys having nostrils far apart or to people with broad noses.

- *The speaker chose "platyrrhinian" because it captured the feeling precisely.*
- *Would you call this situation "platyrrhinian"? Explain why.*

---

platyrrhinic *(adjective)*

Of or related to New World monkeys having nostrils far apart or to people with broad noses.

- *The speaker chose "platyrrhinic" because it captured the feeling precisely.*
- *A "platyrrhinic" approach may work better in this case.*

---

platystemon *(noun)*

One species: creamcups.

- *He looked up "platystemon" because he had never seen it before.*
- *They discussed "platystemon" during the group presentation.*

---

platystemon californicus *(noun)*

California plant with small pale yellow flowers.

- *He looked up "platystemon californicus" because he had never seen it before.*
- *She wrote a short paragraph that included "platystemon californicus."*

---

plausibleness *(noun)*

Apparent validity.

- *He looked up "plausibleness" because he had never seen it before.*
- *In class, the teacher used "plausibleness" to mean apparent validity.*

---

playactor *(noun)*

An actor who travels around the country presenting plays.

- *The article explained what "playactor" means with a simple example.*
- *They discussed "playactor" during the group presentation.*

---

playfellow *(noun)*

A companion at play.

- *She wrote a short paragraph that included "playfellow."*
- *The article explained what "playfellow" means with a simple example.*

---

playgoer *(noun)*

Someone who attends the theater.

- *The article explained what "playgoer" means with a simple example.*
- *She wrote a short paragraph that included "playgoer."*

---

playlobium obtusangulum *(noun)*

Low spreading evergreen shrub of southern Australia having triangular to somewhat heart-shaped foliage and orange-yellow flowers followed by flat winged pods.

- *In class, the teacher used "playlobium obtusangulum" to mean low spreading evergreen shrub of southern australia....*
- *The article explained what "playlobium obtusangulum" means with a simple example.*

---

pleach *(verb)*

Form or weave into a braid or braids.

- *Pleach a hedge.*
- *In everyday English, people use "pleach" when talking about this idea.*

---

pleasingness *(noun)*

An agreeable beauty that gives pleasure or enjoyment; - T.N. Carver.

- *The liveliness and pleasingness of dark eyes.*
- *Understanding "pleasingness" helps you talk about this topic clearly.*

---

plecopteran *(noun)*

Primitive winged insect with a flattened body; used as bait by fishermen; aquatic gilled larvae are carnivorous and live beneath stones.

- *They discussed "plecopteran" during the group presentation.*
- *He looked up "plecopteran" because he had never seen it before.*

---

plecotus *(noun)*

A genus of Vespertilionidae.

- *The article explained what "plecotus" means with a simple example.*
- *In class, the teacher used "plecotus" to mean a genus of vespertilionidae.*

---

plecotus townsendi *(noun)*

Bat of western North America having extremely large ears.

- *Understanding "plecotus townsendi" helps you talk about this topic clearly.*
- *The article explained what "plecotus townsendi" means with a simple example.*

---

plectania *(noun)*

Genus of fungi in the family Pezizaceae closely related to and often included in genus Peziza.

- *The article explained what "plectania" means with a simple example.*
- *They discussed "plectania" during the group presentation.*

---

plectognath *(noun)*

Tropical marine fishes having the teeth fused into a beak and thick skin covered with bony plates or spines.

- *She wrote a short paragraph that included "plectognath."*
- *The article explained what "plectognath" means with a simple example.*

---

plectognath fish *(noun)*

Tropical marine fishes having the teeth fused into a beak and thick skin covered with bony plates or spines.

- *The article explained what "plectognath fish" means with a simple example.*
- *They discussed "plectognath fish" during the group presentation.*

---

plectognathi *(noun)*

Boxfishes; filefishes; globefishes; ocean sunfishes; triggerfishes; puffers.

- *He looked up "plectognathi" because he had never seen it before.*
- *In class, the teacher used "plectognathi" to mean boxfishes; filefishes; globefishes; ocean....*

---

plectomycetes *(noun)*

Class of fungi in which the fruiting body is a cleistothecium (it releases spores only on decay or disintegration).

- *They discussed "plectomycetes" during the group presentation.*
- *She wrote a short paragraph that included "plectomycetes."*

plectophera *(noun)*

In some former classifications: name for the Ephemeroptera.

- *They discussed "plectophera" during the group presentation.*
- *The article explained what "plectophera" means with a simple example.*

plectorrhiza *(noun)*

Small genus of Australian orchids.

- *She wrote a short paragraph that included "plectorrhiza."*
- *He looked up "plectorrhiza" because he had never seen it before.*

plectranthus amboinicus *(noun)*

An aromatic fleshy herb of India and Ceylon to South Africa; sometimes placed in genus Plectranthus.

- *She wrote a short paragraph that included "plectranthus amboinicus."*
- *The article explained what "plectranthus amboinicus" means with a simple example.*

plectron *(noun)*

A small thin device (of metal or plastic or ivory) used to pluck a stringed instrument.

- *She wrote a short paragraph that included "plectron."*
- *Understanding "plectron" helps you talk about this topic clearly.*

plectrophenax *(noun)*

Snow bunting.

- *She wrote a short paragraph that included "plectrophenax."*
- *He looked up "plectrophenax" because he had never seen it before.*

plectrophenax nivalis *(noun)*

White Arctic bunting.

- *They discussed "plectrophenax nivalis" during the group presentation.*
- *The article explained what "plectrophenax nivalis" means with a simple example.*

pleione *(noun)*

Small genus of dwarf orchids; India to Thailand and Taiwan.

- *He looked up "pleione" because he had never seen it before.*
- *She wrote a short paragraph that included "pleione."*

pleiospilos *(noun)*

Perennial succulents of South Africa.

- *The article explained what "pleiospilos" means with a simple example.*
- *Understanding "pleiospilos" helps you talk about this topic clearly.*

plenarily *(adverb)*

In a plenary manner.

- *An empire destined to enter the Commonwealth plenarily.*
- *Place "plenarily" carefully so the meaning stays clear.*

plenteously *(adverb)*

In a bountiful manner.

- *She spoke "plenteously," and the audience immediately understood her point.*
- *He answered "plenteously," which changed the tone of the conversation.*

plenteousness *(noun)*

A full supply.

- *He looked up "plenteousness" because he had never seen it before.*
- *In class, the teacher used "plenteousness" to mean a full supply.*

plentifulness *(noun)*

A full supply.

- *He looked up "plentifulness" because he had never seen it before.*
- *She wrote a short paragraph that included "plentifulness."*

---

pleochroic *(adjective)*

Of or relating to or having pleochroism.

- *Would you call this situation "pleochroic"? Explain why.*
- *Students compared "pleochroic" with similar adjectives in the lesson.*

---

pleonaste *(noun)*

A dark-colored spinel containing iron.

- *They discussed "pleonaste" during the group presentation.*
- *He looked up "pleonaste" because he had never seen it before.*

---

pleopod *(noun)*

One of the paired abdominal appendages of certain aquatic crustaceans that function primarily for carrying the eggs in females and are usually adapted for swimming.

- *They discussed "pleopod" during the group presentation.*
- *The article explained what "pleopod" means with a simple example.*

---

plesianthropus *(noun)*

Former name for the genus Australopithecus.

- *She wrote a short paragraph that included "plesianthropus."*
- *The article explained what "plesianthropus" means with a simple example.*

---

plesiosauria *(noun)*

Any of the plesiosaurs.

- *She wrote a short paragraph that included "plesiosauria."*
- *The article explained what "plesiosauria" means with a simple example.*

---

plessimeter *(noun)*

A small thin metal plate held against the body and struck with a plexor in percussive examinations.

- *The article explained what "plessimeter" means with a simple example.*
- *She wrote a short paragraph that included "plessimeter."*

---

plessor *(noun)*

(medicine) a small hammer with a rubber head used in percussive examinations of the chest and in testing reflexes.

- *Understanding "plessor" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "plessor."*

---

plethodon vehiculum *(noun)*

Salamander of the Pacific coast of North America.

- *The article explained what "plethodon vehiculum" means with a simple example.*
- *Understanding "plethodon vehiculum" helps you talk about this topic clearly.*

---

plethodont *(noun)*

Mostly terrestrial salamanders that breathe through their thin moist skin; lay eggs in moist places on land; rarely enter water.

- *The article explained what "plethodont" means with a simple example.*
- *In class, the teacher used "plethodont" to mean mostly terrestrial salamanders that breathe through....*

---

plethodontidae *(noun)*

Small mostly terrestrial New World salamanders having neither lungs nor gills as adults.

- *He looked up "plethodontidae" because he had never seen it before.*
- *In class, the teacher used "plethodontidae" to mean small mostly terrestrial new world salamanders....*

---

pleurobrachia *(noun)*

Sea gooseberries.

- *The article explained what "pleurobrachia" means with a simple example.*

- *She wrote a short paragraph that included “pleurobrachia.”*

pleurobrachiidae *(noun)*

Sea gooseberries.

- *The article explained what “pleurobrachiidae” means with a simple example.*
- *Understanding “pleurobrachiidae” helps you talk about this topic clearly.*

pleurocarp *(noun)*

A moss having the archegonium or antheridium on a short side branch rather than the main stalk.

- *They discussed “pleurocarp” during the group presentation.*
- *The article explained what “pleurocarp” means with a simple example.*

pleurocarpous *(adjective)*

(of mosses) having the archegonia on short lateral branches.

- *It is useful to describe something as “pleurocarpous” when it is (of mosses) having the archegonia on short lateral....*
- *A “pleurocarpous” approach may work better in this case.*

pleurocarpous moss *(noun)*

A moss having the archegonium or antheridium on a short side branch rather than the main stalk.

- *Understanding “pleurocarpous moss” helps you talk about this topic clearly.*
- *In class, the teacher used “pleurocarpous moss” to mean a moss having the archegonium or antheridium on a....*

pleurodont *(noun)*

An animal having teeth fused with the inner surface of the alveolar ridge without sockets.

- *Understanding “pleurodont” helps you talk about this topic clearly.*
- *In class, the teacher used “pleurodont” to mean an animal having teeth fused with the inner surface....*

pleuronectes *(noun)*

Type genus of the Pleuronectidae.

- *The article explained what “pleuronectes” means with a simple example.*
- *They discussed “pleuronectes” during the group presentation.*

pleuronectes platessa *(noun)*

Large European food fish.

- *Understanding “pleuronectes platessa” helps you talk about this topic clearly.*
- *The article explained what “pleuronectes platessa” means with a simple example.*

pleuronectidae *(noun)*

Righteye flounders.

- *He looked up “pleuronectidae” because he had never seen it before.*
- *In class, the teacher used “pleuronectidae” to mean righteye flounders.*

pleuropneumonialike organism *(noun)*

A mycoplasma resistant to antibiotics that causes a kind of pneumonia in humans.

- *In class, the teacher used “pleuropneumonialike organism” to mean a mycoplasma resistant to antibiotics that causes a....*
- *He looked up “pleuropneumonialike organism” because he had never seen it before.*

pleurosorus *(noun)*

Small genus comprising terrestrial ferns; found in Chile and Spain and Morocco and Australia and New Zealand.

- *They discussed “pleurosorus” during the group presentation.*
- *The article explained what “pleurosorus” means with a simple example.*

pleurothallis *(noun)*

Any of numerous small tufted orchids of the genus Pleurothallis having leathery to fleshy leaves and racemes of 1 to many small flowers.

- *In class, the teacher used “pleurothallis” to mean any of numerous small tufted orchids of the genus....*
- *The article explained what “pleurothallis” means with a simple example.*

pleurotus phosphoreus *(noun)*

Red luminescent mushroom of Europe.

- *The article explained what “pleurotus phosphoreus” means with a simple example.*
- *In class, the teacher used “pleurotus phosphoreus” to mean red luminescent mushroom of europe.*

pleximeter *(noun)*

A small thin metal plate held against the body and struck with a plexor in percussive examinations.

- *She wrote a short paragraph that included “pleximeter.”*
- *The article explained what “pleximeter” means with a simple example.*

pleximetry *(noun)*

Tapping a part of the body for diagnostic purposes.

- *The article explained what “pleximetry” means with a simple example.*
- *She wrote a short paragraph that included “pleximetry.”*

plexor *(noun)*

(medicine) a small hammer with a rubber head used in percussive examinations of the chest and in testing reflexes.

- *In class, the teacher used “plexor” to mean (medicine) a small hammer with a rubber head used....*
- *The article explained what “plexor” means with a simple example.*

plexus autonomici *(noun)*

A plexus of sympathetic and parasympathetic nerve fibers.

- *The article explained what “plexus autonomici” means with a simple example.*
- *They discussed “plexus autonomici” during the group presentation.*

plexus cardiacus *(noun)*

A plexus of nerves supplying the heart and nearby structures.

- *He looked up “plexus cardiacus” because he had never seen it before.*
- *She wrote a short paragraph that included “plexus cardiacus.”*

plexus caroticus *(noun)*

A plexus of nerves surrounding the internal carotid artery.

- *He looked up “plexus caroticus” because he had never seen it before.*
- *She wrote a short paragraph that included “plexus caroticus.”*

plexus celiacus *(noun)*

A large plexus of sympathetic nerves in the abdomen behind the stomach.

- *He looked up “plexus celiacus” because he had never seen it before.*
- *They discussed “plexus celiacus” during the group presentation.*

plexus cervicalis *(noun)*

A nerve plexus lying beneath the sternocleidomastoid muscle.

- *Understanding “plexus cervicalis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “plexus cervicalis.”*

plexus coccygeus *(noun)*

A small plexus formed by the fifth sacral and coccygeal nerves.

- *Understanding “plexus coccygeus” helps you talk about this topic clearly.*
- *In class, the teacher used “plexus coccygeus” to mean a small plexus formed by the fifth sacral and....*

plexus dentalis *(noun)*

A plexus of nerves serving the teeth.

- *The article explained what “plexus dentalis” means with a simple example.*
- *She wrote a short paragraph that included “plexus dentalis.”*

plexus hypogastricus *(noun)*

A plexus of nerves serving the pelvic viscera.

- *He looked up "plexus hypogastricus" because he had never seen it before.*
- *Understanding "plexus hypogastricus" helps you talk about this topic clearly.*

---

plexus lumbalis *(noun)*

A lymphatic plexus located along the lower portion of the aorta and iliac vessels.

- *Understanding "plexus lumbalis" helps you talk about this topic clearly.*
- *They discussed "plexus lumbalis" during the group presentation.*

---

plexus mesentericus *(noun)*

A plexus of autonomic nerves.

- *He looked up "plexus mesentericus" because he had never seen it before.*
- *She wrote a short paragraph that included "plexus mesentericus."*

---

plexus myentericus *(noun)*

A plexus of unmyelinated fibers and postganglionic autonomic cell bodies in the muscular coat of the esophagus and stomach and intestines.

- *They discussed "plexus myentericus" during the group presentation.*
- *In class, the teacher used "plexus myentericus" to mean a plexus of unmyelinated fibers and postganglionic....*

---

plexus periarterialis *(noun)*

An autonomic plexus that accompanies an artery.

- *She wrote a short paragraph that included "plexus periarterialis."*
- *They discussed "plexus periarterialis" during the group presentation.*

---

plexus pulmonalis *(noun)*

One of two autonomic nerve plexuses in each lung.

- *The article explained what "plexus pulmonalis" means with a simple example.*
- *She wrote a short paragraph that included "plexus pulmonalis."*

---

plexus sacralis *(noun)*

A nerve plexus formed by the 4th and 5th lumbar and 1st, 2nd, 3rd sacral nerves; supplies the pelvic region and lower limbs.

- *She wrote a short paragraph that included "plexus sacralis."*
- *He looked up "plexus sacralis" because he had never seen it before.*

---

pliantness *(noun)*

The property of being pliant and flexible.

- *The article explained what "pliantness" means with a simple example.*
- *In class, the teacher used "pliantness" to mean the property of being pliant and flexible.*

---

plica vocalis *(noun)*

Either of two pairs of folds of mucous membrane projecting into the larynx.

- *He looked up "plica vocalis" because he had never seen it before.*
- *They discussed "plica vocalis" during the group presentation.*

---

plicatoperipatus *(noun)*

A genus of Peripatidae.

- *The article explained what "plicatoperipatus" means with a simple example.*
- *She wrote a short paragraph that included "plicatoperipatus."*

---

plicatoperipatus jamaicensis *(noun)*

A kind of onychophoran.

- *In class, the teacher used "plicatoperipatus jamaicensis" to mean a kind of onychophoran.*
- *They discussed "plicatoperipatus jamaicensis" during the group presentation.*

---

ploceidae *(noun)*

Weaverbirds.

- *He looked up "ploceidae" because he had never seen it before.*
- *Understanding "ploceidae" helps you talk about this topic clearly.*

ploceus *(noun)*

Type genus of the Ploceidae.

- *She wrote a short paragraph that included "ploceus."*
- *He looked up "ploceus" because he had never seen it before.*

ploceus philippinus *(noun)*

Common Indian weaverbird.

- *Understanding "ploceus philippinus" helps you talk about this topic clearly.*
- *In class, the teacher used "ploceus philippinus" to mean common indian weaverbird.*

ploddingly *(adverb)*

In a plodding manner.

- *This writer ploddingly accumulates detail after detail.*
- *Place "ploddingly" carefully so the meaning stays clear.*

ploughland *(noun)*

Arable land that is worked by plowing and sowing and raising crops.

- *Understanding "ploughland" helps you talk about this topic clearly.*
- *In class, the teacher used "ploughland" to mean arable land that is worked by plowing and sowing....*

ploughwright *(noun)*

A workman who makes and repairs plows.

- *Understanding "ploughwright" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ploughwright."*

plower *(noun)*

A man who plows.

- *They discussed "plower" during the group presentation.*
- *The article explained what "plower" means with a simple example.*

plowland *(noun)*

Arable land that is worked by plowing and sowing and raising crops.

- *She wrote a short paragraph that included "plowland."*
- *He looked up "plowland" because he had never seen it before.*

plowwright *(noun)*

A workman who makes and repairs plows.

- *She wrote a short paragraph that included "plowwright."*
- *Understanding "plowwright" helps you talk about this topic clearly.*

pluckiness *(noun)*

The trait of showing courage and determination in spite of possible loss or injury.

- *The article explained what "pluckiness" means with a simple example.*
- *In class, the teacher used "pluckiness" to mean the trait of showing courage and determination in....*

plumbable *(adjective)*

(of depth) capable of being sounded or measured for depth.

- *It is useful to describe something as "plumbable" when it is (of depth) capable of being sounded or measured for....*
- *A "plumbable" approach may work better in this case.*

plumbaginaceae *(noun)*

Perennial herbs and shrubs and lianas; cosmopolitan especially in saltwater areas.

- *Understanding "plumbaginaceae" helps you talk about this topic clearly.*
- *He looked up "plumbaginaceae" because he had never seen it before.*

plumbaginaceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Plumbaginaceae.

- *The speaker chose “plumbaginaceous” because it captured the feeling precisely.*
- *It is useful to describe something as “plumbaginaceous” when it is of or pertaining to or characteristic of plants of....*

---

plumbaginales *(noun)*

Coextensive with the family Plumbaginaceae; usually included in order Primulales.

- *In class, the teacher used “plumbaginales” to mean coextensive with the family plumbaginaceae; usually....*
- *Understanding “plumbaginales” helps you talk about this topic clearly.*

---

plumbery *(noun)*

The occupation of a plumber (installing and repairing pipes and fixtures for water or gas or sewage in a building).

- *He looked up “plumbery” because he had never seen it before.*
- *She wrote a short paragraph that included “plumbery.”*

---

plumbic *(adjective)*

Relating to or consisting of lead.

- *Students compared “plumbic” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “plumbic.”*

---

plumbous *(adjective)*

Relating to or consisting of lead.

- *A “plumbous” approach may work better in this case.*
- *Would you call this situation “plumbous”? Explain why.*

---

plumcot *(noun)*

Hybrid produced by crossing Prunus domestica and Prunus armeniaca.

- *He looked up “plumcot” because he had never seen it before.*
- *In class, the teacher used “plumcot” to mean hybrid produced by crossing prunus domestica and....*

---

plumcot tree *(noun)*

Hybrid produced by crossing Prunus domestica and Prunus armeniaca.

- *In class, the teacher used “plumcot tree” to mean hybrid produced by crossing prunus domestica and....*
- *The article explained what “plumcot tree” means with a simple example.*

---

plumelike *(adjective)*

Resembling a plume.

- *Would you call this situation “plumelike”? Explain why.*
- *The speaker chose “plumelike” because it captured the feeling precisely.*

---

plumeria acutifolia *(noun)*

Frangipani of India having an erect habit and conical form; grown in temple gardens.

- *Understanding “plumeria acutifolia” helps you talk about this topic clearly.*
- *They discussed “plumeria acutifolia” during the group presentation.*

---

plumiera *(noun)*

Deciduous shrubs and trees of tropical America having branches like candelabra and fragrant white or pink flowers.

- *They discussed “plumiera” during the group presentation.*
- *In class, the teacher used “plumiera” to mean deciduous shrubs and trees of tropical america....*

---

plumlike *(adjective)*

Resembling a plum fruit.

- *The speaker chose “plumlike” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “plumlike.”*

---

plumule *(noun)*

Down feather of young birds; persists in some adult birds.

- *He looked up “plumule” because he had never seen it before.*

- *In class, the teacher used "plumule" to mean down feather of young birds; persists in some adult....*

---

plumy *(adjective)*

Having or covered with or abounding in plumes.

- *The dog's plumy tail.*
- *The speaker chose "plumy" because it captured the feeling precisely.*

---

plunderage *(noun)*

The act of plundering (especially the embezzlement of goods on shipboard).

- *She wrote a short paragraph that included "plunderage."*
- *He looked up "plunderage" because he had never seen it before.*

---

plunker *(noun)*

(baseball) hitting a baseball so that it drops suddenly.

- *She wrote a short paragraph that included "plunker."*
- *They discussed "plunker" during the group presentation.*

---

pluralisation *(noun)*

The act of pluralizing or attributing plurality to.

- *They discussed "pluralisation" during the group presentation.*
- *The article explained what "pluralisation" means with a simple example.*

---

pluteaceae *(noun)*

A family of fungi belonging to the order Agaricales.

- *They discussed "pluteaceae" during the group presentation.*
- *She wrote a short paragraph that included "pluteaceae."*

---

pluteus aurantiorugosus *(noun)*

An agaric with a brilliant scarlet cap and a slender stalk.

- *They discussed "pluteus aurantiorugosus" during the group presentation.*
- *Understanding "pluteus aurantiorugosus" helps you talk about this topic clearly.*

---

pluteus cervinus *(noun)*

A small edible agaric with a slender stalk; usually found on rotting hardwoods.

- *They discussed "pluteus cervinus" during the group presentation.*
- *Understanding "pluteus cervinus" helps you talk about this topic clearly.*

---

plutocratical *(adjective)*

Of or relating to or characteristic of a plutocrat.

- *Her writing became clearer after she learned "plutocratical."*
- *A "plutocratical" approach may work better in this case.*

---

pluvianus aegyptius *(noun)*

African courser that feeds on insect parasites on crocodiles.

- *Understanding "pluvianus aegyptius" helps you talk about this topic clearly.*
- *The article explained what "pluvianus aegyptius" means with a simple example.*

---

pluviometer *(noun)*

Gauge consisting of an instrument to measure the quantity of precipitation.

- *In class, the teacher used "pluviometer" to mean gauge consisting of an instrument to measure the....*
- *He looked up "pluviometer" because he had never seen it before.*

---

pluviose *(noun)*

Fifth month of the Revolutionary calendar (January and February); the rainy month.

- *They discussed "pluviose" during the group presentation.*
- *Understanding "pluviose" helps you talk about this topic clearly.*

---

plyboard *(noun)*

A laminate made of thin layers of wood.

- *The article explained what "plyboard" means with a simple example.*
- *In class, the teacher used "plyboard" to mean a laminate made of thin layers of wood.*

plyer *(noun)*

Someone who plies a trade.

- *He looked up "plyer" because he had never seen it before.*
- *They discussed "plyer" during the group presentation.*

pneumatophore *(noun)*

An air-filled root (submerged or exposed) that can function as a respiratory organ of a marsh or swamp plant.

- *They discussed "pneumatophore" during the group presentation.*
- *The article explained what "pneumatophore" means with a simple example.*

pneumoencephalogram *(noun)*

An X ray of the brain made by replacing spinal fluid with a gas (usually oxygen) to improve contrast.

- *He looked up "pneumoencephalogram" because he had never seen it before.*
- *They discussed "pneumoencephalogram" during the group presentation.*

pneumogastric *(noun)*

A mixed nerve that supplies the pharynx and larynx and lungs and heart and esophagus and stomach and most of the abdominal viscera.

- *They discussed "pneumogastric" during the group presentation.*
- *She wrote a short paragraph that included "pneumogastric."*

pneumogastric nerve *(noun)*

A mixed nerve that supplies the pharynx and larynx and lungs and heart and esophagus and stomach and most of the abdominal viscera.

- *They discussed "pneumogastric nerve" during the group presentation.*
- *The article explained what "pneumogastric nerve" means with a simple example.*

pneumovax *(noun)*

Vaccine (trade name Pneumovax) effective against the 23 most common strains of pneumococcus.

- *They discussed "pneumovax" during the group presentation.*
- *The article explained what "pneumovax" means with a simple example.*

pnom penh *(noun)*

The capital and largest city of Kampuchea.

- *She wrote a short paragraph that included "pnom penh."*
- *Understanding "pnom penh" helps you talk about this topic clearly.*

pocketcomb *(noun)*

A small comb suitable for carrying in a pocket.

- *She wrote a short paragraph that included "pocketcomb."*
- *He looked up "pocketcomb" because he had never seen it before.*

pocketed freetail bat *(noun)*

Small brown bat of California and northern Mexico.

- *Understanding "pocketed freetail bat" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pocketed freetail bat."*

podalyria *(noun)*

Genus of South African leguminous shrubs often placed in genus Sophora.

- *They discussed "podalyria" during the group presentation.*
- *The article explained what "podalyria" means with a simple example.*

podargus *(noun)*

Type genus of the Podargidae.

- *They discussed "podargus" during the group presentation.*
- *She wrote a short paragraph that included "podargus."*

---

podaxaceae *(noun)*

A variety of gastromycete.

- *The article explained what "podaxaceae" means with a simple example.*
- *They discussed "podaxaceae" during the group presentation.*

---

podetium *(noun)*

An organ or body resembling a stalk; especially the outgrowth of the thallus of certain lichens on which the ascocarp is borne.

- *She wrote a short paragraph that included "podetium."*
- *Understanding "podetium" helps you talk about this topic clearly.*

---

podiceps grisegena *(noun)*

Large stocky grebe of circumpolar regions having a dark neck.

- *In class, the teacher used "podiceps grisegena" to mean large stocky grebe of circumpolar regions having a....*
- *The article explained what "podiceps grisegena" means with a simple example.*

---

podiceps nigricollis *(noun)*

Small grebe with yellow ear tufts and a black neck; found in Eurasia and southern Africa as well as western United States.

- *In class, the teacher used "podiceps nigricollis" to mean small grebe with yellow ear tufts and a black neck;....*
- *Understanding "podiceps nigricollis" helps you talk about this topic clearly.*

---

podicipedidae *(noun)*

Coextensive with the order Podicipitiformes.

- *He looked up "podicipedidae" because he had never seen it before.*
- *She wrote a short paragraph that included "podicipedidae."*

---

podicipitiform seabird *(noun)*

Aquatic birds related to the loons.

- *In class, the teacher used "podicipitiform seabird" to mean aquatic birds related to the loons.*
- *They discussed "podicipitiform seabird" during the group presentation.*

---

podilymbus *(noun)*

A genus of Podicipedidae.

- *He looked up "podilymbus" because he had never seen it before.*
- *They discussed "podilymbus" during the group presentation.*

---

podilymbus podiceps *(noun)*

American grebe having a black-banded whitish bill.

- *The article explained what "podilymbus podiceps" means with a simple example.*
- *Understanding "podilymbus podiceps" helps you talk about this topic clearly.*

---

podlike *(adjective)*

Resembling a pod.

- *It is useful to describe something as "podlike" when it is resembling a pod.*
- *The speaker chose "podlike" because it captured the feeling precisely.*

---

podocarp *(noun)*

Any evergreen in the southern hemisphere of the genus Podocarpus having a pulpy fruit with one hard seed.

- *He looked up "podocarp" because he had never seen it before.*
- *They discussed "podocarp" during the group presentation.*

---

podocarpaceae *(noun)*

Gymnosperms with simple persistent needlelike or scalelike leaves.

- *She wrote a short paragraph that included "podocarpaceae."*
- *Understanding "podocarpaceae" helps you talk about this topic clearly.*

podocarpus coriaceus *(noun)*

West Indian evergreen with medium to long leaves.

- *Understanding "podocarpus coriaceus" helps you talk about this topic clearly.*
- *The article explained what "podocarpus coriaceus" means with a simple example.*

podocarpus dacrydioides *(noun)*

New Zealand evergreen valued for its light easily worked wood.

- *In class, the teacher used "podocarpus dacrydioides" to mean new zealand evergreen valued for its light easily....*
- *They discussed "podocarpus dacrydioides" during the group presentation.*

podocarpus latifolius *(noun)*

Erect or shrubby tree of Africa having ridged dark grey bark and rigid glossy medium to long leaves.

- *Understanding "podocarpus latifolius" helps you talk about this topic clearly.*
- *He looked up "podocarpus latifolius" because he had never seen it before.*

podophyllum *(noun)*

Perennial rhizomatous herbs.

- *She wrote a short paragraph that included "podophyllum."*
- *He looked up "podophyllum" because he had never seen it before.*

podophyllum peltatum *(noun)*

North American herb with poisonous root stock and edible though insipid fruit.

- *The article explained what "podophyllum peltatum" means with a simple example.*
- *In class, the teacher used "podophyllum peltatum" to mean north american herb with poisonous root stock and....*

podsol *(noun)*

A soil that develops in temperate to cold moist climates under coniferous or heath vegetation; an organic mat over a grey leached layer.

- *The article explained what "podsol" means with a simple example.*
- *She wrote a short paragraph that included "podsol."*

podsol soil *(noun)*

A soil that develops in temperate to cold moist climates under coniferous or heath vegetation; an organic mat over a grey leached layer.

- *In class, the teacher used "podsol soil" to mean a soil that develops in temperate to cold moist....*
- *They discussed "podsol soil" during the group presentation.*

podsolic soil *(noun)*

A soil that develops in temperate to cold moist climates under coniferous or heath vegetation; an organic mat over a grey leached layer.

- *In class, the teacher used "podsolic soil" to mean a soil that develops in temperate to cold moist....*
- *He looked up "podsolic soil" because he had never seen it before.*

poeciliid *(noun)*

Small usually brightly-colored viviparous surface-feeding fishes of fresh or brackish warm waters; often used in mosquito control.

- *He looked up "poeciliid" because he had never seen it before.*
- *They discussed "poeciliid" during the group presentation.*

poeciliid fish *(noun)*

Small usually brightly-colored viviparous surface-feeding fishes of fresh or brackish warm waters; often used in mosquito control.

- *In class, the teacher used "poeciliid fish" to mean small usually brightly-colored viviparous....*
- *The article explained what "poeciliid fish" means with a simple example.*

poecilocapsus *(noun)*

A genus of Miridae.

- *He looked up "poecilocapsus" because he had never seen it before.*
- *In class, the teacher used "poecilocapsus" to mean a genus of miridae.*

poecilocapsus lineatus *(noun)*

Yellow or orange leaf bug with four black stripes down the back; widespread in central and eastern North America.

- *They discussed "poecilocapsus lineatus" during the group presentation.*
- *In class, the teacher used "poecilocapsus lineatus" to mean yellow or orange leaf bug with four black stripes....*

---

poecilogale albinucha *(noun)*

Small slender burrowing muishond with white top of the head.

- *They discussed "poecilogale albinucha" during the group presentation.*
- *In class, the teacher used "poecilogale albinucha" to mean small slender burrowing muishond with white top of....*

---

poephila *(noun)*

Grassfinches.

- *He looked up "poephila" because he had never seen it before.*
- *She wrote a short paragraph that included "poephila."*

---

poephila castanotis *(noun)*

Small Australian weaverbird with markings like a zebra's.

- *She wrote a short paragraph that included "poephila castanotis."*
- *He looked up "poephila castanotis" because he had never seen it before.*

---

poetiser *(noun)*

A writer who composes rhymes; a maker of poor verses (usually used as terms of contempt for minor or inferior poets).

- *They discussed "poetiser" during the group presentation.*
- *The article explained what "poetiser" means with a simple example.*

---

poetizer *(noun)*

A writer who composes rhymes; a maker of poor verses (usually used as terms of contempt for minor or inferior poets).

- *In class, the teacher used "poetizer" to mean a writer who composes rhymes; a maker of poor....*
- *He looked up "poetizer" because he had never seen it before.*

---

pogey *(noun)*

Money received from the state.

- *Understanding "pogey" helps you talk about this topic clearly.*
- *The article explained what "pogey" means with a simple example.*

---

pogonia *(noun)*

Any hardy bog orchid of the genus Pogonia: terrestrial orchids having slender rootstocks and erect stems bearing one or a few leaves and a solitary terminal flower.

- *They discussed "pogonia" during the group presentation.*
- *She wrote a short paragraph that included "pogonia."*

---

pogonia divaricata *(noun)*

Orchid of northeastern United States with magenta-pink flowers having funnel-shaped lip; sometimes placed in genus Pogonia.

- *They discussed "pogonia divaricata" during the group presentation.*
- *She wrote a short paragraph that included "pogonia divaricata."*

---

pogonia rosea *(noun)*

Orchid of central and northern South America having 1- to 3-blossomed racemes of large showy rose-colored flowers; sometimes placed in genus Pogonia.

- *They discussed "pogonia rosea" during the group presentation.*
- *She wrote a short paragraph that included "pogonia rosea."*

---

pogonion *(noun)*

The craniometric point that is the most forward-projecting point on the anterior surface of the chin.

- *The article explained what "pogonion" means with a simple example.*
- *Understanding "pogonion" helps you talk about this topic clearly.*

---

pogonip *(noun)*

A dense winter fog containing ice particles.

- *Understanding "pogonip" helps you talk about this topic clearly.*

- *He looked up "pogonip" because he had never seen it before.*

---

pogonophora *(noun)*

Beard worms.

- *Understanding "pogonophora" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pogonophora."*

---

pogonophoran *(noun)*

Slender animal with tentacles and a tubelike outer covering; lives on the deep ocean bottom.

- *He looked up "pogonophoran" because he had never seen it before.*
- *They discussed "pogonophoran" during the group presentation.*

---

pogostemon *(noun)*

Genus of Asiatic shrubs or trees whose leaves yield a fragrant oil.

- *She wrote a short paragraph that included "pogostemon."*
- *They discussed "pogostemon" during the group presentation.*

---

pogostemon cablin *(noun)*

Small East Indian shrubby mint; fragrant oil from its leaves is used in perfumes.

- *Understanding "pogostemon cablin" helps you talk about this topic clearly.*
- *The article explained what "pogostemon cablin" means with a simple example.*

---

pogy *(noun)*

Money received from the state.

- *The article explained what "pogy" means with a simple example.*
- *She wrote a short paragraph that included "pogy."*

---

poikilotherm *(noun)*

An animal whose body temperature varies with the temperature of its surroundings; any animal except birds and mammals.

- *She wrote a short paragraph that included "poikilotherm."*
- *He looked up "poikilotherm" because he had never seen it before.*

---

poikilothermic *(adjective)*

Of animals except birds and mammals; having body temperature that varies with the environment.

- *Her writing became clearer after she learned "poikilothermic."*
- *The speaker chose "poikilothermic" because it captured the feeling precisely.*

---

poikilothermous *(adjective)*

Of animals except birds and mammals; having body temperature that varies with the environment.

- *Would you call this situation "poikilothermous"? Explain why.*
- *Her writing became clearer after she learned "poikilothermous."*

---

poinciana gilliesii *(noun)*

A tropical flowering shrub having bright orange or red flowers; sometimes placed in genus Poinciana.

- *She wrote a short paragraph that included "poinciana gilliesii."*
- *He looked up "poinciana gilliesii" because he had never seen it before.*

---

pointel *(noun)*

A tool used by an engraver.

- *She wrote a short paragraph that included "pointel."*
- *He looked up "pointel" because he had never seen it before.*

---

pointillistic *(adjective)*

Of or relating to pointillism.

- *A "pointillistic" approach may work better in this case.*
- *The speaker chose "pointillistic" because it captured the feeling precisely.*

---

pointrel *(noun)*

A tool used by an engraver.

- *She wrote a short paragraph that included "pointrel."*
- *The article explained what "pointrel" means with a simple example.*

---

pointsman *(noun)*

A policeman stationed at an intersection to direct traffic.

- *She wrote a short paragraph that included "pointsman."*
- *He looked up "pointsman" because he had never seen it before.*

---

poisonberry *(noun)*

Eurasian herb naturalized in America having white flowers and poisonous hairy foliage and bearing black berries that are sometimes poisonous but sometimes edible.

- *In class, the teacher used "poisonberry" to mean eurasian herb naturalized in america having white....*
- *He looked up "poisonberry" because he had never seen it before.*

---

poivrade *(noun)*

For venison: brown sauce with sauteed vegetables and trimmings and marinade and plenty of pepper.

- *In class, the teacher used "poivrade" to mean for venison: brown sauce with sauteed vegetables....*
- *They discussed "poivrade" during the group presentation.*

---

poker alumroot *(noun)*

Plant with leathery heart-shaped leaf blades clustered at base of long stalks with greenish-white flowers clustered along the upper part; western North America.

- *Understanding "poker alumroot" helps you talk about this topic clearly.*
- *In class, the teacher used "poker alumroot" to mean plant with leathery heart-shaped leaf blades....*

---

polanisia *(noun)*

Widely distributed herbs having palmate leaves and creamy white to or pink to magenta flowers with many stamens of unequal length.

- *In class, the teacher used "polanisia" to mean widely distributed herbs having palmate leaves and....*
- *Understanding "polanisia" helps you talk about this topic clearly.*

---

polanisia dodecandra *(noun)*

Strong-scented herb common in southern United States covered with intermixed gland and hairs.

- *They discussed "polanisia dodecandra" during the group presentation.*
- *He looked up "polanisia dodecandra" because he had never seen it before.*

---

polanisia graveolens *(noun)*

Strong-scented herb common in southern United States covered with intermixed gland and hairs.

- *In class, the teacher used "polanisia graveolens" to mean strong-scented herb common in southern united....*
- *Understanding "polanisia graveolens" helps you talk about this topic clearly.*

---

polariscope *(noun)*

An optical device used to measure the rotation of the plane of vibration of polarized light.

- *The article explained what "polariscope" means with a simple example.*
- *They discussed "polariscope" during the group presentation.*

---

polarographic *(adjective)*

Of or involving polarography.

- *Her writing became clearer after she learned "polarographic."*
- *The speaker chose "polarographic" because it captured the feeling precisely.*

---

polarography *(noun)*

An electrochemical method of chemical analysis.

- *Understanding "polarography" helps you talk about this topic clearly.*
- *He looked up "polarography" because he had never seen it before.*

---

poleax *(noun)*

An ax used to slaughter cattle; has a hammer opposite the blade.

- *She wrote a short paragraph that included “poleax.”*
- *They discussed “poleax” during the group presentation.*

---

polemist *(noun)*

A writer who argues in opposition to others (especially in theology).

- *She wrote a short paragraph that included “polemist.”*
- *The article explained what “polemist” means with a simple example.*

---

polemoniaceae *(noun)*

A widely distributed family of chiefly herbaceous plants of the order Polemoniales; often have showy flowers.

- *In class, the teacher used “polemoniaceae” to mean a widely distributed family of chiefly herbaceous....*
- *He looked up “polemoniaceae” because he had never seen it before.*

---

polemoniaceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Polemoniaceae.

- *Her writing became clearer after she learned “polemoniaceous.”*
- *The speaker chose “polemoniaceous” because it captured the feeling precisely.*

---

polemoniales *(noun)*

Polemoniaceae; Solanaceae; Boraginaceae; Labiatae; Lentibulariaceae; Pedaliaceae; in some classifications includes the order Scrophulariales.

- *He looked up “polemoniales” because he had never seen it before.*
- *She wrote a short paragraph that included “polemoniales.”*

---

polemonium *(noun)*

Any plant of the genus Polemonium; most are low-growing often foul-smelling plants of temperate to Arctic regions.

- *She wrote a short paragraph that included “polemonium.”*
- *He looked up “polemonium” because he had never seen it before.*

---

polemonium boreale *(noun)*

Perennial erect herb with white flowers; circumboreal.

- *She wrote a short paragraph that included “polemonium boreale.”*
- *He looked up “polemonium boreale” because he had never seen it before.*

---

polemonium caeruleum *(noun)*

Pinnate-leaved European perennial having bright blue or white flowers.

- *In class, the teacher used “polemonium caeruleum” to mean pinnate-leaved european perennial having bright....*
- *They discussed “polemonium caeruleum” during the group presentation.*

---

polemonium reptans *(noun)*

Erect or spreading perennial of the eastern United States.

- *In class, the teacher used “polemonium reptans” to mean erect or spreading perennial of the eastern united....*
- *Understanding “polemonium reptans” helps you talk about this topic clearly.*

---

polemonium van-bruntiae *(noun)*

Pinnate-leaved European perennial having bright blue or white flowers.

- *She wrote a short paragraph that included “polemonium van-bruntiae.”*
- *He looked up “polemonium van-bruntiae” because he had never seen it before.*

---

polemonium viscosum *(noun)*

Tall herb of the Rocky Mountains having sticky leaves and an offensive smell.

- *He looked up “polemonium viscosum” because he had never seen it before.*
- *Understanding “polemonium viscosum” helps you talk about this topic clearly.*

---

poler *(noun)*

A draft horse harnessed alongside the shaft or pole of a vehicle.

- *In class, the teacher used “poler” to mean a draft horse harnessed alongside the shaft or pole....*
- *The article explained what “poler” means with a simple example.*

polianthes *(noun)*

Genus of perennial tuberous herbs having lily-like flowers; Mexico; sometimes placed in family Amaryllidaceae.

- *They discussed "polianthes" during the group presentation.*
- *She wrote a short paragraph that included "polianthes."*

polianthes tuberosa *(noun)*

A tuberous Mexican herb having grasslike leaves and cultivated for its spikes of highly fragrant lily-like waxy white flowers.

- *In class, the teacher used "polianthes tuberosa" to mean a tuberous mexican herb having grasslike leaves and....*
- *Understanding "polianthes tuberosa" helps you talk about this topic clearly.*

polioptila *(noun)*

New World gnatcatchers.

- *They discussed "polioptila" during the group presentation.*
- *The article explained what "polioptila" means with a simple example.*

poliosis *(noun)*

Loss of color from the hair.

- *In class, the teacher used "poliosis" to mean loss of color from the hair.*
- *He looked up "poliosis" because he had never seen it before.*

pollachius pollachius *(noun)*

Important food and game fish of northern seas (especially the northern Atlantic); related to cod.

- *In class, the teacher used "pollachius pollachius" to mean important food and game fish of northern seas....*
- *The article explained what "pollachius pollachius" means with a simple example.*

pollenate *(verb)*

Fertilize by transfering pollen.

- *The coach explained when to use "pollenate" and when to wait.*
- *She tried to use "pollenate" carefully so everyone would understand.*

pollinium *(noun)*

A coherent mass of pollen grains (as in orchids).

- *She wrote a short paragraph that included "pollinium."*
- *He looked up "pollinium" because he had never seen it before.*

polliwog *(noun)*

A larval frog or toad.

- *She wrote a short paragraph that included "polliwog."*
- *The article explained what "polliwog" means with a simple example.*

pollucite *(noun)*

A rare mineral that is an important source of cesium.

- *They discussed "pollucite" during the group presentation.*
- *Understanding "pollucite" helps you talk about this topic clearly.*

pollyannaish *(adjective)*

Pleasantly (even unrealistically) optimistic.

- *Would you call this situation "pollyannaish"? Explain why.*
- *The speaker chose "pollyannaish" because it captured the feeling precisely.*

pollyfish *(noun)*

Gaudy tropical fishes with parrotlike beaks formed by fusion of teeth.

- *Understanding "pollyfish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pollyfish."*

poltroonery *(noun)*

Abject pusillanimity.

- *They discussed “poltroonery” during the group presentation.*
- *She wrote a short paragraph that included “poltroonery.”*

---

polyandrist *(noun)*

A woman with two or more husbands.

- *The article explained what “polyandrist” means with a simple example.*
- *In class, the teacher used “polyandrist” to mean a woman with two or more husbands.*

---

polyangiaceae *(noun)*

Bacteria living mostly in soils and on dung.

- *In class, the teacher used “polyangiaceae” to mean bacteria living mostly in soils and on dung.*
- *He looked up “polyangiaceae” because he had never seen it before.*

---

polyangium *(noun)*

Type genus of the family Polyangiaceae: myxobacteria with rounded fruiting bodies enclosed in a membrane.

- *She wrote a short paragraph that included “polyangium.”*
- *He looked up “polyangium” because he had never seen it before.*

---

polyborus *(noun)*

A genus of Falconidae.

- *They discussed “polyborus” during the group presentation.*
- *Understanding “polyborus” helps you talk about this topic clearly.*

---

polyborus cheriway audubonii *(noun)*

Widespread from southern United States to Central America; rusty black with black-and-white breast and tail.

- *They discussed “polyborus cheriway audubonii” during the group presentation.*
- *He looked up “polyborus cheriway audubonii” because he had never seen it before.*

---

polyborus plancus *(noun)*

South American caracara.

- *The article explained what “polyborus plancus” means with a simple example.*
- *She wrote a short paragraph that included “polyborus plancus.”*

---

polybotria *(noun)*

Tropical American ferns; usually terrestrial when young but scandent later.

- *She wrote a short paragraph that included “polybotria.”*
- *He looked up “polybotria” because he had never seen it before.*

---

polybotria cervina *(noun)*

Tropical American terrestrial fern with leathery lanceolate fronds; sometimes placed in genus Polybotrya.

- *The article explained what “polybotria cervina” means with a simple example.*
- *In class, the teacher used “polybotria cervina” to mean tropical american terrestrial fern with leathery....*

---

polybotrya *(noun)*

Tropical American ferns; usually terrestrial when young but scandent later.

- *They discussed “polybotrya” during the group presentation.*
- *She wrote a short paragraph that included “polybotrya.”*

---

polybotrya cervina *(noun)*

Tropical American terrestrial fern with leathery lanceolate fronds; sometimes placed in genus Polybotrya.

- *She wrote a short paragraph that included “polybotrya cervina.”*
- *He looked up “polybotrya cervina” because he had never seen it before.*

---

polybutene *(noun)*

A polymer of butylene; used in lubricants and synthetic rubber.

- *The article explained what “polybutene” means with a simple example.*

- *They discussed "polybutene" during the group presentation.*

---

polychete *(noun)*

Chiefly marine annelids possessing both sexes and having paired appendages (parapodia) bearing bristles.

- *She wrote a short paragraph that included "polychete."*
- *He looked up "polychete" because he had never seen it before.*

---

polychete worm *(noun)*

Chiefly marine annelids possessing both sexes and having paired appendages (parapodia) bearing bristles.

- *In class, the teacher used "polychete worm" to mean chiefly marine annelids possessing both sexes and....*
- *They discussed "polychete worm" during the group presentation.*

---

polychromic *(adjective)*

Having or exhibiting many colors.

- *A "polychromic" approach may work better in this case.*
- *It is useful to describe something as "polychromic" when it is having or exhibiting many colors.*

---

polychromise *(verb)*

Color with many colors; make polychrome.

- *She tried to use "polychromise" carefully so everyone would understand.*
- *Learners should practice how to use "polychromise" in real sentences.*

---

polychromize *(verb)*

Color with many colors; make polychrome.

- *In everyday English, people use "polychromize" when talking about this idea.*
- *Can you use "polychromize" in a sentence that fits this situation?*

---

polycillin *(noun)*

Semisynthetic penicillin (trade names Principen and Polycillin and SK-Ampicillin).

- *She wrote a short paragraph that included "polycillin."*
- *The article explained what "polycillin" means with a simple example.*

---

polycirrus *(noun)*

Genus of soft-bodied polychete marine worms.

- *In class, the teacher used "polycirrus" to mean genus of soft-bodied polychete marine worms.*
- *The article explained what "polycirrus" means with a simple example.*

---

polyconic projection *(noun)*

A conic projection of a map having distances between meridians equal to those distances on a globe.

- *They discussed "polyconic projection" during the group presentation.*
- *In class, the teacher used "polyconic projection" to mean a conic projection of a map having distances....*

---

polydactylous *(adjective)*

Of or relating to a person (or other vertebrate) having more than the normal number of digits.

- *Would you call this situation "polydactylous"? Explain why.*
- *Her writing became clearer after she learned "polydactylous."*

---

polydactylus *(noun)*

A genus of Polynemidae.

- *They discussed "polydactylus" during the group presentation.*
- *The article explained what "polydactylus" means with a simple example.*

---

polydactylus virginicus *(noun)*

Found along western Atlantic coast.

- *In class, the teacher used "polydactylus virginicus" to mean found along western atlantic coast.*
- *They discussed "polydactylus virginicus" during the group presentation.*

---

polyergus *(noun)*

Amazon ants.

- *In class, the teacher used “polyergus” to mean amazon ants.*
- *He looked up “polyergus” because he had never seen it before.*

polyergus rufescens *(noun)*

Small reddish slave-making ant species.

- *He looked up “polyergus rufescens” because he had never seen it before.*
- *She wrote a short paragraph that included “polyergus rufescens.”*

polyestrous *(adjective)*

Having more than one period of estrus per year.

- *A “polyestrous” approach may work better in this case.*
- *Students compared “polyestrous” with similar adjectives in the lesson.*

polygala paucifolia *(noun)*

Common trailing perennial milkwort of eastern North America having leaves like wintergreen and usually rosy-purple flowers with winged sepals.

- *He looked up “polygala paucifolia” because he had never seen it before.*
- *In class, the teacher used “polygala paucifolia” to mean common trailing perennial milkwort of eastern north....*

polygala senega *(noun)*

Eastern North American plant having a terminal cluster of small white flowers and medicinal roots.

- *He looked up “polygala senega” because he had never seen it before.*
- *They discussed “polygala senega” during the group presentation.*

polygalaceae *(noun)*

Trees, shrubs, and herbs widely distributed throughout both hemispheres.

- *She wrote a short paragraph that included “polygalaceae.”*
- *He looked up “polygalaceae” because he had never seen it before.*

polygene *(noun)*

A gene that by itself has little effect on the phenotype but which can act together with others to produce observable variations.

- *The article explained what “polygene” means with a simple example.*
- *She wrote a short paragraph that included “polygene.”*

polygonales *(noun)*

Coextensive with the family Polygonaceae,.

- *The article explained what “polygonales” means with a simple example.*
- *She wrote a short paragraph that included “polygonales.”*

polygonally *(adverb)*

In a polygonal manner.

- *Place “polygonally” carefully so the meaning stays clear.*
- *Try rewriting the sentence and include “polygonally” naturally.*

polygonatum *(noun)*

Sometimes placed in subfamily Convallariaceae.

- *The article explained what “polygonatum” means with a simple example.*
- *They discussed “polygonatum” during the group presentation.*

polygonatum biflorum *(noun)*

North American perennial herb with smooth foliage and drooping tubular greenish flowers.

- *They discussed “polygonatum biflorum” during the group presentation.*
- *He looked up “polygonatum biflorum” because he had never seen it before.*

polygonatum commutatum *(noun)*

North American perennial herb with smooth foliage and drooping tubular greenish flowers.

- *She wrote a short paragraph that included “polygonatum commutatum.”*
- *The article explained what “polygonatum commutatum” means with a simple example.*

---

polygonia *(noun)*

Comma butterflies.

- *In class, the teacher used “polygonia” to mean comma butterflies.*
- *They discussed “polygonia” during the group presentation.*

---

polygonia comma *(noun)*

Anglewing butterfly with a comma-shaped mark on the underside of each hind wing.

- *They discussed “polygonia comma” during the group presentation.*
- *The article explained what “polygonia comma” means with a simple example.*

---

polygonum aubertii *(noun)*

Twining perennial vine having racemes of fragrant greenish flowers; western China to Russia.

- *The article explained what “polygonum aubertii” means with a simple example.*
- *She wrote a short paragraph that included “polygonum aubertii.”*

---

polygonum fagopyrum *(noun)*

A member of the genus Fagopyrum; annual Asian plant with clusters of small pinkish white flowers and small edible triangular seeds which are used whole or ground into flour.

- *He looked up “polygonum fagopyrum” because he had never seen it before.*
- *She wrote a short paragraph that included “polygonum fagopyrum.”*

---

polygynist *(noun)*

A man with two or more wives.

- *In class, the teacher used “polygynist” to mean a man with two or more wives.*
- *He looked up “polygynist” because he had never seen it before.*

---

polyhidrosis *(noun)*

Excessive and profuse perspiration.

- *She wrote a short paragraph that included “polyhidrosis.”*
- *Understanding “polyhidrosis” helps you talk about this topic clearly.*

---

polymastigina *(noun)*

Small usually parasitic flagellates.

- *They discussed “polymastigina” during the group presentation.*
- *She wrote a short paragraph that included “polymastigina.”*

---

polymastigote *(noun)*

Flagellates with several flagella.

- *The article explained what “polymastigote” means with a simple example.*
- *They discussed “polymastigote” during the group presentation.*

---

polymerise *(verb)*

Cause (a compound) to polymerize.

- *He did not know how to use “polymerise” until he saw an example.*
- *She tried to use “polymerise” carefully so everyone would understand.*

---

polymonium caeruleum van-bruntiae *(noun)*

Pinnate-leaved European perennial having bright blue or white flowers.

- *Understanding “polymonium caeruleum van-bruntiae” helps you talk about this topic clearly.*
- *The article explained what “polymonium caeruleum van-bruntiae” means with a simple example.*

---

polymorphemic *(adjective)*

Consisting of two or more morphemes.

- *It is useful to describe something as “polymorphemic” when it is consisting of two or more morphemes.*
- *The speaker chose “polymorphemic” because it captured the feeling precisely.*

polymox *(noun)*

An antibiotic; a semisynthetic oral penicillin (trade names Amoxil and Larotid and Polymox and Trimox and Augmentin) used to treat bacterial infections.

- *In class, the teacher used "polymox" to mean an antibiotic; a semisynthetic oral penicillin....*
- *He looked up "polymox" because he had never seen it before.*

polyodon *(noun)*

Type genus of the Polyodontidae.

- *Understanding "polyodon" helps you talk about this topic clearly.*
- *He looked up "polyodon" because he had never seen it before.*

polyodon spathula *(noun)*

Primitive fish of the Mississippi valley having a long paddle-shaped snout.

- *In class, the teacher used "polyodon spathula" to mean primitive fish of the mississippi valley having a....*
- *He looked up "polyodon spathula" because he had never seen it before.*

polyodontidae *(noun)*

Paddlefishes.

- *They discussed "polyodontidae" during the group presentation.*
- *In class, the teacher used "polyodontidae" to mean paddlefishes.*

polyoestrous *(adjective)*

Having more than one period of estrus per year.

- *Would you call this situation "polyoestrous"? Explain why.*
- *A "polyoestrous" approach may work better in this case.*

polyoicous *(adjective)*

Having several forms of gametoecia on the same plant.

- *It is useful to describe something as "polyoicous" when it is having several forms of gametoecia on the same plant.*
- *Would you call this situation "polyoicous"? Explain why.*

polyoma *(noun)*

A virus the can initiate various kinds of tumors in mice.

- *She wrote a short paragraph that included "polyoma."*
- *They discussed "polyoma" during the group presentation.*

polyoma virus *(noun)*

A virus the can initiate various kinds of tumors in mice.

- *Understanding "polyoma virus" helps you talk about this topic clearly.*
- *In class, the teacher used "polyoma virus" to mean a virus the can initiate various kinds of tumors in....*

polyose *(noun)*

Any of a class of carbohydrates whose molecules contain chains of monosaccharide molecules.

- *They discussed "polyose" during the group presentation.*
- *She wrote a short paragraph that included "polyose."*

polypedates *(noun)*

Type genus of the Polypedatidae.

- *In class, the teacher used "polypedates" to mean type genus of the polypedatidae.*
- *The article explained what "polypedates" means with a simple example.*

polypedatidae *(noun)*

Old World tree frogs.

- *She wrote a short paragraph that included "polypedatidae."*
- *Understanding "polypedatidae" helps you talk about this topic clearly.*

polypetalous *(adjective)*

Having a corolla composed of many separated or distinct petals.

- *The speaker chose "polypetalous" because it captured the feeling precisely.*
- *It is useful to describe something as "polypetalous" when it is having a corolla composed of many separated or....*

---

polyphonically *(adverb)*

In a polyphonic manner.

- *Polyphonically composed.*
- *Using "polyphonically" can make your explanation more exact.*

---

polyphonous *(adjective)*

Of or relating to or characterized by polyphony.

- *Would you call this situation "polyphonous"? Explain why.*
- *A "polyphonous" approach may work better in this case.*

---

polyphosphoric acid *(noun)*

A series of oxyacids of phosphorus.

- *He looked up "polyphosphoric acid" because he had never seen it before.*
- *In class, the teacher used "polyphosphoric acid" to mean a series of oxyacids of phosphorus.*

---

polyplacophora *(noun)*

Small class of marine mollusks comprising the chitons; sometimes considered an order of the subclass Amphineura.

- *They discussed "polyplacophora" during the group presentation.*
- *Understanding "polyplacophora" helps you talk about this topic clearly.*

---

polyplacophore *(noun)*

Primitive elongated bilaterally symmetrical marine mollusk having a mantle covered with eight calcareous plates.

- *The article explained what "polyplacophore" means with a simple example.*
- *In class, the teacher used "polyplacophore" to mean primitive elongated bilaterally symmetrical marine....*

---

polypodiaceae *(noun)*

Ferns: a large family that in some classification systems has been subdivided into several families (including Aspleniaceae and Blechnaceae and Davalliaceae and Dennstaedtiaceae and Dryopteridaceae and Oleandraceae and Pteridaceae).

- *She wrote a short paragraph that included "polypodiaceae."*
- *He looked up "polypodiaceae" because he had never seen it before.*

---

polypodiales *(noun)*

True (leptosporangiate) ferns.

- *They discussed "polypodiales" during the group presentation.*
- *He looked up "polypodiales" because he had never seen it before.*

---

polypodium polypodioides *(noun)*

Fern growing on rocks or tree trunks and having fronds greyish and scurfy below; Americas and South Africa.

- *In class, the teacher used "polypodium polypodioides" to mean fern growing on rocks or tree trunks and having....*
- *Understanding "polypodium polypodioides" helps you talk about this topic clearly.*

---

polypodium scouleri *(noun)*

Stiff leathery-leaved fern of western North America having ovate fronds parted to the midrib.

- *He looked up "polypodium scouleri" because he had never seen it before.*
- *She wrote a short paragraph that included "polypodium scouleri."*

---

polypodium virgianum *(noun)*

Chiefly lithophytic or epiphytic fern of North America and east Asia.

- *He looked up "polypodium virgianum" because he had never seen it before.*
- *They discussed "polypodium virgianum" during the group presentation.*

---

polypody *(noun)*

Any of numerous ferns of the genus Polypodium.

- *Understanding "polypody" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “polypody.”*

---

polyporaceae *(noun)*

Fungi that become corky or woody with age, often forming shelflike growths on trees.

- *In class, the teacher used “polyporaceae” to mean fungi that become corky or woody with age, often....*
- *The article explained what “polyporaceae” means with a simple example.*

---

polyporus frondosus *(noun)*

Large greyish-brown edible fungus forming a mass of overlapping caps that somewhat resembles a hen at the base of trees.

- *Understanding “polyporus frondosus” helps you talk about this topic clearly.*
- *The article explained what “polyporus frondosus” means with a simple example.*

---

polyporus squamosus *(noun)*

A fungus with a lateral stalk (when there is a stalk) and a scaly cap that becomes nearly black in maturity; widely distributed in the northern hemisphere.

- *He looked up “polyporus squamosus” because he had never seen it before.*
- *In class, the teacher used “polyporus squamosus” to mean a fungus with a lateral stalk (when there is a....*

---

polyporus tenuiculus *(noun)*

A fungus with a whitish kidney-shaped cap and elongated pores; causes white rot in dead hardwoods.

- *He looked up “polyporus tenuiculus” because he had never seen it before.*
- *She wrote a short paragraph that included “polyporus tenuiculus.”*

---

polyprion americanus *(noun)*

Brown fish of the Atlantic and Mediterranean found around rocks and shipwrecks.

- *In class, the teacher used “polyprion americanus” to mean brown fish of the atlantic and mediterranean found....*
- *Understanding “polyprion americanus” helps you talk about this topic clearly.*

---

polypropene *(noun)*

A polymer of propylene used as a thermoplastic molding material.

- *She wrote a short paragraph that included “polypropene.”*
- *He looked up “polypropene” because he had never seen it before.*

---

polypropenonitrile *(noun)*

Acrylic resin used to make a strong soft crease-resistant fabric (trade name Acrilan).

- *Understanding “polypropenonitrile” helps you talk about this topic clearly.*
- *They discussed “polypropenonitrile” during the group presentation.*

---

polysemantic *(adjective)*

Of words; having many meanings.

- *Would you call this situation “polysemantic”? Explain why.*
- *Students compared “polysemantic” with similar adjectives in the lesson.*

---

polystichum acrostichoides *(noun)*

North American evergreen fern having pinnate leaves and dense clusters of lance-shaped fronds.

- *They discussed “polystichum acrostichoides” during the group presentation.*
- *He looked up “polystichum acrostichoides” because he had never seen it before.*

---

polystichum aculeatum *(noun)*

Tropical Old World fern having glossy fronds suggestive of holly; sometimes placed in genus Polystichum.

- *Understanding “polystichum aculeatum” helps you talk about this topic clearly.*
- *In class, the teacher used “polystichum aculeatum” to mean tropical old world fern having glossy fronds....*

---

polystichum adiantiformis *(noun)*

Widely distributed fern of tropical southern hemisphere having leathery pinnatifid fronds.

- *She wrote a short paragraph that included “polystichum adiantiformis.”*
- *He looked up “polystichum adiantiformis” because he had never seen it before.*

---

polystichum braunii *(noun)*

North American fern whose more or less evergreen leathery fronds are covered with pale brown chafflike scales.

- *The article explained what "polystichum braunii" means with a simple example.*
- *They discussed "polystichum braunii" during the group presentation.*

---

polystichum lonchitis *(noun)*

Evergreen European fern widely cultivated.

- *Understanding "polystichum lonchitis" helps you talk about this topic clearly.*
- *They discussed "polystichum lonchitis" during the group presentation.*

---

polystichum scopulinum *(noun)*

North American fern.

- *In class, the teacher used "polystichum scopulinum" to mean north american fern.*
- *He looked up "polystichum scopulinum" because he had never seen it before.*

---

polystichum setiferum *(noun)*

European shield fern cultivated in many varieties.

- *The article explained what "polystichum setiferum" means with a simple example.*
- *In class, the teacher used "polystichum setiferum" to mean european shield fern cultivated in many varieties.*

---

polysyllabically *(adverb)*

In a polysyllabic manner.

- *Using "polysyllabically" can make your explanation more exact.*
- *Try rewriting the sentence and include "polysyllabically" naturally.*

---

polytonal *(adjective)*

Using more than one key or tonality simultaneously.

- *Exciting rhythms and polytonal harmonies.*
- *Students compared "polytonal" with similar adjectives in the lesson.*

---

polyurethan *(noun)*

Any of various polymers containing the urethane radical; a wide variety of synthetic forms are made and used as adhesives or plastics or paints or rubber.

- *They discussed "polyurethan" during the group presentation.*
- *He looked up "polyurethan" because he had never seen it before.*

---

polyzoa *(noun)*

Marine or freshwater animals that form colonies of zooids.

- *Understanding "polyzoa" helps you talk about this topic clearly.*
- *They discussed "polyzoa" during the group presentation.*

---

polyzoan *(noun)*

Sessile aquatic animal forming mossy colonies of small polyps each having a curved or circular ridge bearing tentacles; attach to stones or seaweed and reproduce by budding.

- *He looked up "polyzoan" because he had never seen it before.*
- *In class, the teacher used "polyzoan" to mean sessile aquatic animal forming mossy colonies of....*

---

pomacanthus *(noun)*

Angelfishes.

- *They discussed "pomacanthus" during the group presentation.*
- *Understanding "pomacanthus" helps you talk about this topic clearly.*

---

pomacentridae *(noun)*

Damselfishes.

- *He looked up "pomacentridae" because he had never seen it before.*
- *In class, the teacher used "pomacentridae" to mean damselfishes.*

---

pomacentrus *(noun)*

Type genus of the Pomacentridae: damselfishes.

- *She wrote a short paragraph that included “pomacentrus.”*
- *Understanding “pomacentrus” helps you talk about this topic clearly.*

---

pomacentrus leucostictus *(noun)*

A blue and yellow damselfish of Bermuda and Florida and the West Indies.

- *Understanding “pomacentrus leucostictus” helps you talk about this topic clearly.*
- *They discussed “pomacentrus leucostictus” during the group presentation.*

---

pomaded *(adjective)*

(of hair) groomed with pomade.

- *Pomaded hair.*
- *Students compared “pomaded” with similar adjectives in the lesson.*

---

pomaderris *(noun)*

A genus of Australasian shrubs and trees.

- *He looked up “pomaderris” because he had never seen it before.*
- *She wrote a short paragraph that included “pomaderris.”*

---

pomaderris apetala *(noun)*

Australian tree grown especially for ornament and its fine-grained wood and bearing edible nuts.

- *Understanding “pomaderris apetala” helps you talk about this topic clearly.*
- *The article explained what “pomaderris apetala” means with a simple example.*

---

pomatomidae *(noun)*

Food and game fishes related to pompanos.

- *He looked up “pomatomidae” because he had never seen it before.*
- *She wrote a short paragraph that included “pomatomidae.”*

---

pomatomus *(noun)*

Type genus of the Pomatomidae.

- *She wrote a short paragraph that included “pomatomus.”*
- *The article explained what “pomatomus” means with a simple example.*

---

pomatomus saltatrix *(noun)*

Bluish warm-water marine food and game fish that follow schools of small fishes into shallow waters.

- *She wrote a short paragraph that included “pomatomus saltatrix.”*
- *The article explained what “pomatomus saltatrix” means with a simple example.*

---

pomatum *(noun)*

Hairdressing consisting of a perfumed oil or ointment.

- *The article explained what “pomatum” means with a simple example.*
- *In class, the teacher used “pomatum” to mean hairdressing consisting of a perfumed oil or ointment.*

---

pomolobus *(noun)*

Genus to which the alewife is sometimes assigned.

- *Understanding “pomolobus” helps you talk about this topic clearly.*
- *They discussed “pomolobus” during the group presentation.*

---

pomolobus pseudoharengus *(noun)*

Shad-like food fish that runs rivers to spawn; often salted or smoked; sometimes placed in genus Pomolobus.

- *The article explained what “pomolobus pseudoharengus” means with a simple example.*
- *In class, the teacher used “pomolobus pseudoharengus” to mean shad-like food fish that runs rivers to spawn;....*

---

pomologist *(noun)*

Someone versed in pomology or someone who cultivates fruit trees.

- *The article explained what “pomologist” means with a simple example.*
- *In class, the teacher used “pomologist” to mean someone versed in pomology or someone who....*

pomoxis annularis *(noun)*

A crappie that is white.

- *In class, the teacher used "pomoxis annularis" to mean a crappie that is white.*
- *They discussed "pomoxis annularis" during the group presentation.*

pomoxis nigromaculatus *(noun)*

A crappie that is black.

- *They discussed "pomoxis nigromaculatus" during the group presentation.*
- *In class, the teacher used "pomoxis nigromaculatus" to mean a crappie that is black.*

poncirus *(noun)*

One species: trifoliate orange.

- *She wrote a short paragraph that included "poncirus."*
- *He looked up "poncirus" because he had never seen it before.*

poncirus trifoliata *(noun)*

Small fast-growing spiny deciduous Chinese orange tree bearing sweetly scented flowers and decorative but inedible fruit: used as a stock in grafting and for hedges.

- *In class, the teacher used "poncirus trifoliata" to mean small fast-growing spiny deciduous chinese orange....*
- *The article explained what "poncirus trifoliata" means with a simple example.*

ponderer *(noun)*

A reflective thinker characterized by quiet contemplation.

- *They discussed "ponderer" during the group presentation.*
- *In class, the teacher used "ponderer" to mean a reflective thinker characterized by quiet....*

ponderosity *(noun)*

The property of being large in mass.

- *He looked up "ponderosity" because he had never seen it before.*
- *They discussed "ponderosity" during the group presentation.*

pongamia *(noun)*

One species: Indian beech.

- *He looked up "pongamia" because he had never seen it before.*
- *Understanding "pongamia" helps you talk about this topic clearly.*

pongamia glabra *(noun)*

Evergreen Asiatic tree having glossy pinnate leaves and racemose creamy-white scented flowers; used as a shade tree.

- *They discussed "pongamia glabra" during the group presentation.*
- *In class, the teacher used "pongamia glabra" to mean evergreen asiatic tree having glossy pinnate leaves....*

pongid *(noun)*

Any of the large anthropoid apes of the family Pongidae.

- *They discussed "pongid" during the group presentation.*
- *He looked up "pongid" because he had never seen it before.*

pongidae *(noun)*

Usually considered as comprising orangutans; gorillas; chimpanzees; and sometimes gibbons.

- *They discussed "pongidae" during the group presentation.*
- *She wrote a short paragraph that included "pongidae."*

ponka *(noun)*

A member of the Siouan people of the Missouri river valley in northeastern Nebraska.

- *The article explained what "ponka" means with a simple example.*
- *She wrote a short paragraph that included "ponka."*

pons varolii *(noun)*

A band of nerve fibers linking the medulla oblongata and the cerebellum with the midbrain.

- *Understanding "pons varolii" helps you talk about this topic clearly.*
- *The article explained what "pons varolii" means with a simple example.*

---

ponselle *(noun)*

United States soprano (1897-1981).

- *Understanding "ponselle" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ponselle."*

---

ponstel *(noun)*

A nonsteroidal anti-inflammatory and analgesic drug (trade name Ponstel) used to treat mild pain (especially menstrual cramps).

- *They discussed "ponstel" during the group presentation.*
- *In class, the teacher used "ponstel" to mean a nonsteroidal anti-inflammatory and analgesic drug....*

---

pontederia *(noun)*

Pickerelweed.

- *They discussed "pontederia" during the group presentation.*
- *Understanding "pontederia" helps you talk about this topic clearly.*

---

pontederia cordata *(noun)*

American plant having spikes of blue flowers and growing in shallow water of streams and ponds.

- *The article explained what "pontederia cordata" means with a simple example.*
- *Understanding "pontederia cordata" helps you talk about this topic clearly.*

---

pontederiaceae *(noun)*

Aquatic or bog plants.

- *She wrote a short paragraph that included "pontederiaceae."*
- *He looked up "pontederiaceae" because he had never seen it before.*

---

ponycart *(noun)*

A cart with an underslung axle and two seats.

- *He looked up "ponycart" because he had never seen it before.*
- *She wrote a short paragraph that included "ponycart."*

---

pooecetes *(noun)*

A genus of Fringillidae.

- *She wrote a short paragraph that included "pooecetes."*
- *The article explained what "pooecetes" means with a simple example.*

---

pooecetes gramineus *(noun)*

Common North American finch noted for its evening song.

- *Understanding "pooecetes gramineus" helps you talk about this topic clearly.*
- *In class, the teacher used "pooecetes gramineus" to mean common north american finch noted for its evening song.*

---

poor man's weatherglass *(noun)*

Herb with scarlet or white or purple blossoms that close at approach of rainy weather.

- *He looked up "poor man's weatherglass" because he had never seen it before.*
- *In class, the teacher used "poor man's weatherglass" to mean herb with scarlet or white or purple blossoms that....*

---

poorwill *(noun)*

Goatsucker of western North America.

- *In class, the teacher used "poorwill" to mean goatsucker of western north america.*
- *They discussed "poorwill" during the group presentation.*

---

poove *(noun)*

Offensive term for an openly homosexual man.

- *She wrote a short paragraph that included "poove."*

- *He looked up "poove" because he had never seen it before.*

---

popeyed *(adjective)*

With eyes or mouth open in surprise.

- *Would you call this situation "popeyed"? Explain why.*
- *The speaker chose "popeyed" because it captured the feeling precisely.*

---

popillia *(noun)*

A genus of Scarabaeidae.

- *In class, the teacher used "popillia" to mean a genus of scarabaeidae.*
- *They discussed "popillia" during the group presentation.*

---

popillia japonica *(noun)*

Small metallic green and brown beetle native to eastern Asia; serious plant pest in North America.

- *They discussed "popillia japonica" during the group presentation.*
- *Understanding "popillia japonica" helps you talk about this topic clearly.*

---

popishly *(adverb)*

Like the Pope; in a popish manner.

- *He answered "popishly," which changed the tone of the conversation.*
- *The narrator describes the scene "popishly" in the final chapter.*

---

populariser *(noun)*

Someone who makes attractive to the general public.

- *In class, the teacher used "populariser" to mean someone who makes attractive to the general public.*
- *The article explained what "populariser" means with a simple example.*

---

populus balsamifera *(noun)*

Poplar of northeastern North America with broad heart-shaped leaves.

- *They discussed "populus balsamifera" during the group presentation.*
- *Understanding "populus balsamifera" helps you talk about this topic clearly.*

---

populus grandidentata *(noun)*

Aspen with a narrow crown; eastern North America.

- *In class, the teacher used "populus grandidentata" to mean aspen with a narrow crown; eastern north america.*
- *Understanding "populus grandidentata" helps you talk about this topic clearly.*

---

porcelainize *(verb)*

Coat with porcelain or a porcelain-like surface.

- *Can you use "porcelainize" in a sentence that fits this situation?*
- *The coach explained when to use "porcelainize" and when to wait.*

---

porcellio *(noun)*

Old World genus of isopod crustaceans.

- *The article explained what "porcellio" means with a simple example.*
- *In class, the teacher used "porcellio" to mean old world genus of isopod crustaceans.*

---

porcupinefish *(noun)*

Spines become erect when the body is inflated; worldwide in warm waters.

- *The article explained what "porcupinefish" means with a simple example.*
- *She wrote a short paragraph that included "porcupinefish."*

---

poriferan *(noun)*

Primitive multicellular marine animal whose porous body is supported by a fibrous skeletal framework; usually occurs in sessile colonies.

- *In class, the teacher used "poriferan" to mean primitive multicellular marine animal whose porous....*
- *The article explained what "poriferan" means with a simple example.*

---

poriferous *(adjective)*

Full of pores or vessels or holes.

- *Students compared "poriferous" with similar adjectives in the lesson.*
- *It is useful to describe something as "poriferous" when it is full of pores or vessels or holes.*

porkfish *(noun)*

Black and gold grunt found from Bermuda to Caribbean to Brazil.

- *In class, the teacher used "porkfish" to mean black and gold grunt found from bermuda to....*
- *Understanding "porkfish" helps you talk about this topic clearly.*

porkholt *(noun)*

Made of lamb or pork.

- *She wrote a short paragraph that included "porkholt."*
- *He looked up "porkholt" because he had never seen it before.*

pornographically *(adverb)*

In a pornographic manner.

- *Place "pornographically" carefully so the meaning stays clear.*
- *The narrator describes the scene "pornographically" in the final chapter.*

poronotus *(noun)*

A genus of Stromateidae.

- *The article explained what "poronotus" means with a simple example.*
- *She wrote a short paragraph that included "poronotus."*

poronotus triacanthus *(noun)*

Small food fish of Atlantic coast.

- *She wrote a short paragraph that included "poronotus triacanthus."*
- *They discussed "poronotus triacanthus" during the group presentation.*

poroporo *(noun)*

Australian annual sometimes cultivated for its racemes of purple flowers and edible yellow egg-shaped fruit.

- *Understanding "poroporo" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "poroporo."*

porose *(adjective)*

Forming a continuous series of pores.

- *A porose hymenium.*
- *Students compared "porose" with similar adjectives in the lesson.*

porphyrio *(noun)*

Old World purple gallinules.

- *Understanding "porphyrio" helps you talk about this topic clearly.*
- *He looked up "porphyrio" because he had never seen it before.*

porphyrio porphyrio *(noun)*

Purple gallinule of southern Europe.

- *In class, the teacher used "porphyrio porphyrio" to mean purple gallinule of southern europe.*
- *Understanding "porphyrio porphyrio" helps you talk about this topic clearly.*

porphyrula *(noun)*

American purple gallinules.

- *In class, the teacher used "porphyrula" to mean american purple gallinules.*
- *Understanding "porphyrula" helps you talk about this topic clearly.*

- *In class, the teacher used “priggishness” to mean exaggerated and arrogant properness.*
- *He looked up “priggishness” because he had never seen it before.*

primaeval *(adjective)*

Having existed from the beginning; in an earliest or original stage or state.

- *Her writing became clearer after she learned “primaeval.”*
- *Would you call this situation “primaeval”? Explain why.*

primateship *(noun)*

The office of primate.

- *Understanding “primateship” helps you talk about this topic clearly.*
- *In class, the teacher used “primateship” to mean the office of primate.*

primaxin *(noun)*

Trade name for a parenteral antibiotic.

- *Understanding "primaxin" helps you talk about this topic clearly.*
- *They discussed "primaxin" during the group presentation.*

---

primigravida *(noun)*

(obstetrics) a woman who is pregnant for the first time.

- *She wrote a short paragraph that included "primigravida."*
- *They discussed "primigravida" during the group presentation.*

---

primipara *(noun)*

(obstetrics) woman who has been delivered of a child for the first time.

- *They discussed "primipara" during the group presentation.*
- *The article explained what "primipara" means with a simple example.*

---

primiparous *(adjective)*

Of or relating to a woman who has given birth only once.

- *A "primiparous" approach may work better in this case.*
- *Students compared "primiparous" with similar adjectives in the lesson.*

---

primness *(noun)*

Excessive or affected modesty.

- *They discussed "primness" during the group presentation.*
- *He looked up "primness" because he had never seen it before.*

---

primogenitor *(noun)*

An ancestor in the direct line.

- *The article explained what "primogenitor" means with a simple example.*
- *In class, the teacher used "primogenitor" to mean an ancestor in the direct line.*

---

primula polyantha *(noun)*

Florists' primroses; considered a complex hybrid derived from oxlip, cowslip, and common primrose.

- *In class, the teacher used "primula polyantha" to mean florists' primroses; considered a complex hybrid....*
- *Understanding "primula polyantha" helps you talk about this topic clearly.*

---

primulaceae *(noun)*

A dicotyledonous family of the order Primulales with a regular flower; widely distributed in the northern hemisphere.

- *Understanding "primulaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "primulaceae" to mean a dicotyledonous family of the order primulales....*

---

primulales *(noun)*

Primulaceae; Theophrastaceae; Myrsinaceae; and (in some classifications) Plumbaginaceae.

- *In class, the teacher used "primulales" to mean primulaceae; theophrastaceae; myrsinaceae; and (in....*
- *The article explained what "primulales" means with a simple example.*

---

prince fumimaro konoe *(noun)*

Japanese statesman who set Japan's expansionist policies and formed an alliance with Germany and Italy (1891-1945).

- *The article explained what "prince fumimaro konoe" means with a simple example.*
- *In class, the teacher used "prince fumimaro konoe" to mean japanese statesman who set japan's expansionist....*

---

prince fumimaro konoye *(noun)*

Japanese statesman who set Japan's expansionist policies and formed an alliance with Germany and Italy (1891-1945).

- *He looked up "prince fumimaro konoye" because he had never seen it before.*
- *She wrote a short paragraph that included "prince fumimaro konoye."*

---

princewood *(noun)*

Large tropical American tree of the genus Cordia grown for its abundant creamy white flowers and valuable wood.

- *Understanding "princewood" helps you talk about this topic clearly.*
- *They discussed "princewood" during the group presentation.*

---

principen *(noun)*

Semisynthetic penicillin (trade names Principen and Polycillin and SK-Ampicillin).

- *Understanding "principen" helps you talk about this topic clearly.*
- *The article explained what "principen" means with a simple example.*

---

prinia *(noun)*

A genus of Sylviidae.

- *She wrote a short paragraph that included "prinia."*
- *He looked up "prinia" because he had never seen it before.*

---

prinival *(noun)*

An ACE inhibiting drug (trade names Prinival or Zestril) administered as an antihypertensive and after heart attacks.

- *They discussed "prinival" during the group presentation.*
- *She wrote a short paragraph that included "prinival."*

---

priodontes *(noun)*

Solely the giant armadillo.

- *The article explained what "priodontes" means with a simple example.*
- *They discussed "priodontes" during the group presentation.*

---

priodontes giganteus *(noun)*

About three feet long exclusive of tail.

- *In class, the teacher used "priodontes giganteus" to mean about three feet long exclusive of tail.*
- *The article explained what "priodontes giganteus" means with a simple example.*

---

prionace *(noun)*

Blue sharks.

- *The article explained what "prionace" means with a simple example.*
- *In class, the teacher used "prionace" to mean blue sharks.*

---

prionace glauca *(noun)*

Slender cosmopolitan, pelagic shark; blue body shades to white belly; dangerous especially during maritime disasters.

- *Understanding "prionace glauca" helps you talk about this topic clearly.*
- *They discussed "prionace glauca" during the group presentation.*

---

prionotus *(noun)*

A genus of Triglidae.

- *The article explained what "prionotus" means with a simple example.*
- *In class, the teacher used "prionotus" to mean a genus of triglidae.*

---

prionotus carolinus *(noun)*

Large searobin; found from Nova Scotia to Florida.

- *The article explained what "prionotus carolinus" means with a simple example.*
- *In class, the teacher used "prionotus carolinus" to mean large searobin; found from nova scotia to florida.*

---

priorship *(noun)*

The office of prior.

- *Understanding "priorship" helps you talk about this topic clearly.*
- *They discussed "priorship" during the group presentation.*

---

priscoan *(noun)*

The earliest eon in the history of the Earth from the first accretion of planetary material (around 4,600 million years ago) until the date of the oldest known rocks (about 3,800 million years ago); no evidence of life.

- *They discussed "priscoan" during the group presentation.*
- *In class, the teacher used "priscoan" to mean the earliest eon in the history of the earth from....*

priscoan aeon *(noun)*

The earliest eon in the history of the Earth from the first accretion of planetary material (around 4,600 million years ago) until the date of the oldest known rocks (about 3,800 million years ago); no evidence of life.

- *In class, the teacher used "priscoan aeon" to mean the earliest eon in the history of the earth from....*
- *The article explained what "priscoan aeon" means with a simple example.*

priscoan eon *(noun)*

The earliest eon in the history of the Earth from the first accretion of planetary material (around 4,600 million years ago) until the date of the oldest known rocks (about 3,800 million years ago); no evidence of life.

- *They discussed "priscoan eon" during the group presentation.*
- *Understanding "priscoan eon" helps you talk about this topic clearly.*

prismatoid *(noun)*

A polyhedron whose vertices all lie in one or the other of two parallel planes; the faces that lie in those planes are the bases of the prismatoid.

- *He looked up "prismatoid" because he had never seen it before.*
- *Understanding "prismatoid" helps you talk about this topic clearly.*

prismoid *(noun)*

A prismatoid whose bases are polygons having the same number of sides and whose other faces are trapezoids or parallelograms.

- *She wrote a short paragraph that included "prismoid."*
- *Understanding "prismoid" helps you talk about this topic clearly.*

prisonbreak *(noun)*

An escape from jail.

- *Understanding "prisonbreak" helps you talk about this topic clearly.*
- *He looked up "prisonbreak" because he had never seen it before.*

prisonlike *(adjective)*

Resembling a prison.

- *Would you call this situation "prisonlike"? Explain why.*
- *The speaker chose "prisonlike" because it captured the feeling precisely.*

prissily *(adverb)*

In a prissy manner.

- *The new teacher alienates the children by behaving prissily.*
- *Try rewriting the sentence and include "prissily" naturally.*

pristidae *(noun)*

Large primitive rays with elongated snouts.

- *They discussed "pristidae" during the group presentation.*
- *The article explained what "pristidae" means with a simple example.*

pristis *(noun)*

Type genus of the Pristidae.

- *Understanding "pristis" helps you talk about this topic clearly.*
- *They discussed "pristis" during the group presentation.*

pristis pectinatus *(noun)*

Commonly found in tropical bays and estuaries; not aggressive.

- *In class, the teacher used "pristis pectinatus" to mean commonly found in tropical bays and estuaries; not....*
- *He looked up "pristis pectinatus" because he had never seen it before.*

pritzelago *(noun)*

Chamois cress.

- *The article explained what "pritzelago" means with a simple example.*
- *In class, the teacher used "pritzelago" to mean chamois cress.*

pritzelago alpina *(noun)*

Small tufted perennial herb of mountains of central and southern Europe having very small flowers of usually leafless stems; sometimes placed in genus Lepidium.

- *He looked up "pritzelago alpina" because he had never seen it before.*
- *She wrote a short paragraph that included "pritzelago alpina."*

privateersman *(noun)*

An officer or crew member of a privateer.

- *They discussed "privateersman" during the group presentation.*
- *She wrote a short paragraph that included "privateersman."*

privine *(noun)*

Vasoconstrictor (trade names Privine and Sudafed) used in nasal sprays to treat symptoms of nasal congestion and in eyedrops to treat eye irritation.

- *The article explained what "privine" means with a simple example.*
- *They discussed "privine" during the group presentation.*

proaccelerin *(noun)*

A coagulation factor.

- *They discussed "proaccelerin" during the group presentation.*
- *He looked up "proaccelerin" because he had never seen it before.*

probatory *(adjective)*

Tending to prove a particular proposition or to persuade you of the truth of an allegation.

- *Students compared "probatory" with similar adjectives in the lesson.*
- *Would you call this situation "probatory"? Explain why.*

proboscidea louisianica *(noun)*

Annual of southern United States to Mexico having large whitish or yellowish flowers mottled with purple and a long curving beak.

- *In class, the teacher used "proboscidea louisianica" to mean annual of southern united states to mexico having....*
- *The article explained what "proboscidea louisianica" means with a simple example.*

proboscidean *(noun)*

Massive herbivorous mammals having tusks and a long trunk.

- *She wrote a short paragraph that included "proboscidean."*
- *He looked up "proboscidean" because he had never seen it before.*

proboscidian *(noun)*

Massive herbivorous mammals having tusks and a long trunk.

- *They discussed "proboscidian" during the group presentation.*
- *Understanding "proboscidian" helps you talk about this topic clearly.*

procarbazine *(noun)*

An antineoplastic drug used to treat Hodgkin's disease.

- *Understanding "procarbazine" helps you talk about this topic clearly.*
- *In class, the teacher used "procarbazine" to mean an antineoplastic drug used to treat hodgkin's disease.*

procaryote *(noun)*

A unicellular organism having cells lacking membrane-bound nuclei; bacteria are the prime example but also included are blue-green algae and actinomycetes and mycoplasma.

- *He looked up "procaryote" because he had never seen it before.*
- *They discussed "procaryote" during the group presentation.*

procaryotic *(adjective)*

Having cells that lack membrane-bound nuclei.

- *A "procaryotic" approach may work better in this case.*
- *Her writing became clearer after she learned "procaryotic."*

procavia *(noun)*

Type genus of the Procaviidae.

- *She wrote a short paragraph that included "procavia."*
- *He looked up "procavia" because he had never seen it before.*

---

procavia capensis *(noun)*

Hyrax that lives in rocky areas.

- *They discussed "procavia capensis" during the group presentation.*
- *She wrote a short paragraph that included "procavia capensis."*

---

procaviidae *(noun)*

Includes all recent members of the order Hyracoidea.

- *She wrote a short paragraph that included "procaviidae."*
- *They discussed "procaviidae" during the group presentation.*

---

procellaria *(noun)*

Type genus of the Procellariidae.

- *Understanding "procellaria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "procellaria."*

---

procellaria aequinoctialis *(noun)*

Large black petrel of southern seas having a white mark on the chin.

- *The article explained what "procellaria aequinoctialis" means with a simple example.*
- *She wrote a short paragraph that included "procellaria aequinoctialis."*

---

procellariidae *(noun)*

Petrels; fulmars; shearwaters.

- *Understanding "procellariidae" helps you talk about this topic clearly.*
- *They discussed "procellariidae" during the group presentation.*

---

procellariiform seabird *(noun)*

Large long-winged bird with hooked bill and tubular nostrils that wanders the open seas.

- *Understanding "procellariiform seabird" helps you talk about this topic clearly.*
- *They discussed "procellariiform seabird" during the group presentation.*

---

procellariiformes *(noun)*

Petrels; albatrosses; shearwaters; diving petrels.

- *Understanding "procellariiformes" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "procellariiformes."*

---

processus coronoideus *(noun)*

A sharp triangular process projecting from a bone.

- *They discussed "processus coronoideus" during the group presentation.*
- *The article explained what "processus coronoideus" means with a simple example.*

---

prociphilus *(noun)*

A genus of Aphididae.

- *Understanding "prociphilus" helps you talk about this topic clearly.*
- *They discussed "prociphilus" during the group presentation.*

---

prociphilus tessellatus *(noun)*

Attacks alders.

- *She wrote a short paragraph that included "prociphilus tessellatus."*
- *He looked up "prociphilus tessellatus" because he had never seen it before.*

---

proconsulate *(noun)*

The position of proconsul.

- *The article explained what "proconsulate" means with a simple example.*
- *In class, the teacher used "proconsulate" to mean the position of proconsul.*

proconsulship *(noun)*

The position of proconsul.

- *They discussed "proconsulship" during the group presentation.*
- *In class, the teacher used "proconsulship" to mean the position of proconsul.*

proconvertin *(noun)*

A coagulation factor formed in the kidney under the influence of vitamin K.

- *She wrote a short paragraph that included "proconvertin."*
- *Understanding "proconvertin" helps you talk about this topic clearly.*

proctoplasty *(noun)*

Reconstructive surgery of the anus or rectum.

- *In class, the teacher used "proctoplasty" to mean reconstructive surgery of the anus or rectum.*
- *He looked up "proctoplasty" because he had never seen it before.*

proctorship *(noun)*

The position of proctor.

- *She wrote a short paragraph that included "proctorship."*
- *He looked up "proctorship" because he had never seen it before.*

proctoscope *(noun)*

An endoscope for examining the rectum.

- *She wrote a short paragraph that included "proctoscope."*
- *Understanding "proctoscope" helps you talk about this topic clearly.*

proctoscopy *(noun)*

Visual examination of the rectum and the end of the colon by means of a proctoscope.

- *The article explained what "proctoscopy" means with a simple example.*
- *In class, the teacher used "proctoscopy" to mean visual examination of the rectum and the end of the....*

procural *(noun)*

The act of getting possession of something.

- *Understanding "procural" helps you talk about this topic clearly.*
- *They discussed "procural" during the group presentation.*

procurance *(noun)*

The act of getting possession of something.

- *In class, the teacher used "procurance" to mean the act of getting possession of something.*
- *The article explained what "procurance" means with a simple example.*

procyclidine *(noun)*

Drug (trade name Kemadrin) used to reduce tremors in Parkinsonism.

- *She wrote a short paragraph that included "procyclidine."*
- *He looked up "procyclidine" because he had never seen it before.*

procyon cancrivorus *(noun)*

A South American raccoon.

- *They discussed "procyon cancrivorus" during the group presentation.*
- *She wrote a short paragraph that included "procyon cancrivorus."*

procyonid *(noun)*

Plantigrade carnivorous mammals.

- *They discussed "procyonid" during the group presentation.*
- *In class, the teacher used "procyonid" to mean plantigrade carnivorous mammals.*

procyonidae *(noun)*

Raccoons; coatis; cacomistles; kinkajous; and sometimes pandas.

- *They discussed "procyonidae" during the group presentation.*
- *He looked up "procyonidae" because he had never seen it before.*

---

prodromic *(adjective)*

Symptomatic of the onset of an attack or a disease.

- *The speaker chose "prodromic" because it captured the feeling precisely.*
- *A "prodromic" approach may work better in this case.*

---

proenzyme *(noun)*

Any of a group of compounds that are inactive precursors of enzymes and require some change (such as the hydrolysis of a fragment that masks an active enzyme) to become active.

- *They discussed "proenzyme" during the group presentation.*
- *He looked up "proenzyme" because he had never seen it before.*

---

profanatory *(adjective)*

Profaning or tending to desecrate.

- *A "profanatory" approach may work better in this case.*
- *The speaker chose "profanatory" because it captured the feeling precisely.*

---

professorially *(adverb)*

In a professorial manner.

- *She behaved very professorially.*
- *Place "professorially" carefully so the meaning stays clear.*

---

profitlessly *(adverb)*

Without gain or profit.

- *She spoke "profitlessly," and the audience immediately understood her point.*
- *Using "profitlessly" can make your explanation more exact.*

---

In a dissolute way.

- *She spoke "profligately," and the audience immediately understood her point.*
- *Using "profligately" can make your explanation more exact.*

---

profuseness *(noun)*

The property of being extremely abundant.

- *She wrote a short paragraph that included "profuseness."*
- *He looked up "profuseness" because he had never seen it before.*

---

progestational *(adjective)*

Of or relating to progesterone (or to a drug with effects like those of progesterone).

- *Students compared "progestational" with similar adjectives in the lesson.*
- *A "progestational" approach may work better in this case.*

---

prognathic *(adjective)*

Having a projecting lower jaw.

- *The speaker chose "prognathic" because it captured the feeling precisely.*
- *It is useful to describe something as "prognathic" when it is having a projecting lower jaw.*

---

prognathous *(adjective)*

Having a projecting lower jaw.

- *Students compared "prognathous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "prognathous."*

---

progne *(noun)*

A genus of Hirundinidae.

- *The article explained what "progne" means with a simple example.*

- *In class, the teacher used "progne" to mean a genus of hirundinidae.*

progne subis *(noun)*

Large North American martin of which the male is blue-black.

- *The article explained what "progne subis" means with a simple example.*
- *Understanding "progne subis" helps you talk about this topic clearly.*

prognostication *(adjective)*

Of or relating to prediction; having value for making predictions.

- *Her writing became clearer after she learned "prognostication."*
- *Students compared "prognostication" with similar adjectives in the lesson.*

progymnosperm *(noun)*

An ancestral fossil type from which modern gymnosperms are thought to have derived.

- *Understanding "progymnosperm" helps you talk about this topic clearly.*
- *They discussed "progymnosperm" during the group presentation.*

prokayotae *(noun)*

Prokaryotic bacteria and blue-green algae and various primitive pathogens; because of lack of consensus on how to divide the organisms into phyla informal names are used for the major divisions.

- *She wrote a short paragraph that included "prokayotae."*
- *The article explained what "prokayotae" means with a simple example.*

prolamine *(noun)*

A simple protein found in plants.

- *She wrote a short paragraph that included "prolamine."*
- *The article explained what "prolamine" means with a simple example.*

prolonge *(noun)*

A rope fitted with a hook and used for towing a gun carriage.

- *In class, the teacher used "prolonge" to mean a rope fitted with a hook and used for towing a gun....*
- *Understanding "prolonge" helps you talk about this topic clearly.*

prolonge knot *(noun)*

A knot in the rope used to drag a gun carriage.

- *Understanding "prolonge knot" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "prolonge knot."*

prolusory *(adjective)*

Of or relating to or having the character of a prolusion.

- *The speaker chose "prolusory" because it captured the feeling precisely.*
- *Would you call this situation "prolusory"? Explain why.*

promiscuousness *(noun)*

Indulging in promiscuous (casual and indiscriminate) sexual relations.

- *He looked up "promiscuousness" because he had never seen it before.*
- *They discussed "promiscuousness" during the group presentation.*

promiser *(noun)*

A person who makes a promise.

- *They discussed "promiser" during the group presentation.*
- *He looked up "promiser" because he had never seen it before.*

A booth projecting above the floor in the front of a stage where the prompter sits; opens toward the performers on stage.

- *In class, the teacher used "prompter's box" to mean a booth projecting above the floor in the front of....*
- *The article explained what "prompter's box" means with a simple example.*

promulgator *(noun)*

(law) one who promulgates laws (announces a law as a way of putting it into execution).

- *In class, the teacher used "promulgator" to mean (law) one who promulgates laws (announces a law as....*
- *He looked up "promulgator" because he had never seen it before.*

---

promycelium *(noun)*

The basidium of various fungi.

- *In class, the teacher used "promycelium" to mean the basidium of various fungi.*
- *The article explained what "promycelium" means with a simple example.*

---

prongbuck *(noun)*

Fleet antelope-like ruminant of western North American plains with small branched horns.

- *They discussed "prongbuck" during the group presentation.*
- *He looked up "prongbuck" because he had never seen it before.*

---

prongy *(adjective)*

Resembling a fork; divided or separated into two branches.

- *Horseradish grown in poor soil may develop prongy roots.*
- *A "prongy" approach may work better in this case.*

---

pronucleus *(noun)*

The nucleus of the ovum or sperm after fertilization but before they fuse to form the nucleus of the zygote.

- *In class, the teacher used "pronucleus" to mean the nucleus of the ovum or sperm after....*
- *The article explained what "pronucleus" means with a simple example.*

---

propaedeutics *(noun)*

A course that provides an introduction to an art or science (or to more advanced study generally).

- *Understanding "propaedeutics" helps you talk about this topic clearly.*
- *In class, the teacher used "propaedeutics" to mean a course that provides an introduction to an art or....*

---

propagative *(adjective)*

Characterized by propagation or relating to propagation.

- *Students compared "propagative" with similar adjectives in the lesson.*
- *A "propagative" approach may work better in this case.*

---

propanal *(noun)*

A colorless liquid aldehyde.

- *The article explained what "propanal" means with a simple example.*
- *In class, the teacher used "propanal" to mean a colorless liquid aldehyde.*

---

propanamide *(noun)*

The amide of propionic acid (C2H5CONH2).

- *He looked up "propanamide" because he had never seen it before.*
- *She wrote a short paragraph that included "propanamide."*

---

propanoic acid *(noun)*

A liquid fatty acid found in milk and sweat and in fuel distillates.

- *In class, the teacher used "propanoic acid" to mean a liquid fatty acid found in milk and sweat and in....*
- *The article explained what "propanoic acid" means with a simple example.*

---

propanolol *(noun)*

The first beta blocker (trade name Inderal) used in treating hypertension and angina pectoris and essential tremor.

- *Understanding "propanolol" helps you talk about this topic clearly.*
- *He looked up "propanolol" because he had never seen it before.*

---

propanone *(noun)*

The simplest ketone; a highly inflammable liquid widely used as an organic solvent and as material for making plastics.

- *In class, the teacher used “propanone” to mean the simplest ketone; a highly inflammable liquid....*
- *They discussed “propanone” during the group presentation.*

---

propenal *(noun)*

A pungent colorless unsaturated liquid aldehyde made from propene.

- *She wrote a short paragraph that included “propenal.”*
- *He looked up “propenal” because he had never seen it before.*

---

propenoate *(noun)*

A salt or ester of propenoic acid.

- *They discussed “propenoate” during the group presentation.*
- *The article explained what “propenoate” means with a simple example.*

---

propenoic acid *(noun)*

An unsaturated liquid carboxylic acid used in the manufacture of acrylic resins.

- *He looked up “propenoic acid” because he had never seen it before.*
- *She wrote a short paragraph that included “propenoic acid.”*

---

propenonitrile *(noun)*

A colorless liquid unsaturated nitrile made from propene.

- *In class, the teacher used “propenonitrile” to mean a colorless liquid unsaturated nitrile made from....*
- *Understanding “propenonitrile” helps you talk about this topic clearly.*

---

propenyl alcohol *(noun)*

An unsaturated primary alcohol present in wood spirit; use to make resins and plasticizers and pharmaceuticals.

- *The article explained what “propenyl alcohol” means with a simple example.*
- *In class, the teacher used “propenyl alcohol” to mean an unsaturated primary alcohol present in wood....*

---

propertyless *(adjective)*

Of those who work for wages especially manual or industrial laborers; - G.B.Shaw.

- *Party of the propertyless proletariat.*
- *Would you call this situation “propertyless”? Explain why.*

---

prophesier *(noun)*

An authoritative person who divines the future.

- *The article explained what “prophesier” means with a simple example.*
- *In class, the teacher used “prophesier” to mean an authoritative person who divines the future.*

---

prophyll *(noun)*

A plant structure resembling a leaf.

- *Understanding “prophyll” helps you talk about this topic clearly.*
- *In class, the teacher used “prophyll” to mean a plant structure resembling a leaf.*

---

propionaldehyde *(noun)*

A colorless liquid aldehyde.

- *They discussed “propionaldehyde” during the group presentation.*
- *Understanding “propionaldehyde” helps you talk about this topic clearly.*

---

propitiative *(adjective)*

Intended to reconcile or appease.

- *Students compared “propitiative” with similar adjectives in the lesson.*
- *It is useful to describe something as “propitiative” when it is intended to reconcile or appease.*

---

propitiously *(adverb)*

In an auspicious manner.

- *Using “propitiously” can make your explanation more exact.*
- *Try rewriting the sentence and include “propitiously” naturally.*

propitiousness *(noun)*

The favorable quality of strongly indicating a successful result.

- *They discussed "propitiousness" during the group presentation.*
- *She wrote a short paragraph that included "propitiousness."*

propjet *(noun)*

An airplane with an external propeller that is driven by a turbojet engine.

- *He looked up "propjet" because he had never seen it before.*
- *In class, the teacher used "propjet" to mean an airplane with an external propeller that is....*

propman *(noun)*

Member of the stage crew in charge of properties.

- *The article explained what "propman" means with a simple example.*
- *They discussed "propman" during the group presentation.*

proportionable *(adjective)*

Proportionate.

- *Would you call this situation "proportionable"? Explain why.*
- *It is useful to describe something as "proportionable" when it is proportionate.*

proportionateness *(noun)*

The relation of corresponding in degree or size or amount.

- *They discussed "proportionateness" during the group presentation.*
- *He looked up "proportionateness" because he had never seen it before.*

proprioceptor *(noun)*

Special nerve endings in the muscles and tendons and other organs that respond to stimuli regarding the position and movement of the body.

- *He looked up "proprioceptor" because he had never seen it before.*
- *In class, the teacher used "proprioceptor" to mean special nerve endings in the muscles and tendons....*

proprionamide *(noun)*

The amide of propionic acid (C2H5CONH2).

- *The article explained what "proprionamide" means with a simple example.*
- *In class, the teacher used "proprionamide" to mean the amide of propionic acid (c2h5conh2).*

prosaicness *(noun)*

Commonplaceness as a consequence of being humdrum and not exciting.

- *In class, the teacher used "prosaicness" to mean commonplaceness as a consequence of being humdrum....*
- *The article explained what "prosaicness" means with a simple example.*

prosauropoda *(noun)*

The earliest known dinosaurs.

- *The article explained what "prosauropoda" means with a simple example.*
- *In class, the teacher used "prosauropoda" to mean the earliest known dinosaurs.*

prosencephalon *(noun)*

The anterior portion of the brain; the part of the brain that develops from the anterior part of the neural tube.

- *They discussed "prosencephalon" during the group presentation.*
- *The article explained what "prosencephalon" means with a simple example.*

prosily *(adverb)*

In a prosy manner.

- *Somewhat prosily and repetitively expounded.*
- *He answered "prosily," which changed the tone of the conversation.*

prosimian *(noun)*

Primitive primates having large ears and eyes and characterized by nocturnal habits.

- *In class, the teacher used "prosimian" to mean primitive primates having large ears and eyes and....*
- *They discussed "prosimian" during the group presentation.*

---

prosimii *(noun)*

Not used in all classifications; in some classifications considered coextensive with the Lemuroidea; in others includes both Lemuroidea and Tarsioidea.

- *In class, the teacher used "prosimii" to mean not used in all classifications; in some....*
- *The article explained what "prosimii" means with a simple example.*

---

prosiness *(noun)*

Commonplaceness as a consequence of being humdrum and not exciting.

- *Understanding "prosiness" helps you talk about this topic clearly.*
- *The article explained what "prosiness" means with a simple example.*

---

prosom *(noun)*

A frequently prescribed sleeping pill (trade name ProSom).

- *In class, the teacher used "prosom" to mean a frequently prescribed sleeping pill (trade name....*
- *He looked up "prosom" because he had never seen it before.*

---

prosopis juliiflora *(noun)*

Mesquite of Gulf Coast and Caribbean Islands from Mexico to Venezuela.

- *Understanding "prosopis juliiflora" helps you talk about this topic clearly.*
- *In class, the teacher used "prosopis juliiflora" to mean mesquite of gulf coast and caribbean islands from....*

---

prosopium *(noun)*

Whitefishes.

- *He looked up "prosopium" because he had never seen it before.*
- *They discussed "prosopium" during the group presentation.*

---

prosopium cylindraceum *(noun)*

A whitefish with a bronze back; of northern North America and Siberia.

- *Understanding "prosopium cylindraceum" helps you talk about this topic clearly.*
- *The article explained what "prosopium cylindraceum" means with a simple example.*

---

prosopium williamsonii *(noun)*

Whitefish of the western United States and Canada.

- *She wrote a short paragraph that included "prosopium williamsonii."*
- *He looked up "prosopium williamsonii" because he had never seen it before.*

---

prosper meniere *(noun)*

French otologist who first described a form of vertigo now known as Meniere's disease and identified the semicircular canals as the site of the lesion (1799-1862).

- *He looked up "prosper meniere" because he had never seen it before.*
- *In class, the teacher used "prosper meniere" to mean french otologist who first described a form of....*

---

prospicient *(adjective)*

Planning prudently for the future.

- *It is useful to describe something as "prospicient" when it is planning prudently for the future.*
- *Would you call this situation "prospicient"? Explain why.*

---

prostheon *(noun)*

Craniometric point that is the most anterior point in the midline on the alveolar process of the maxilla.

- *He looked up "prostheon" because he had never seen it before.*
- *Understanding "prostheon" helps you talk about this topic clearly.*

---

prosthion *(noun)*

Craniometric point that is the most anterior point in the midline on the alveolar process of the maxilla.

- *Understanding "prosthion" helps you talk about this topic clearly.*

- *The article explained what "prosthion" means with a simple example.*

---

prostigmin *(noun)*

A cholinergic drug (trade name Prostigmin) used to treat some ophthalmic conditions and to treat myasthenia gravis.

- *Understanding "prostigmin" helps you talk about this topic clearly.*
- *In class, the teacher used "prostigmin" to mean a cholinergic drug (trade name prostigmin) used to....*

---

protagonism *(noun)*

Active support of an idea or cause etc.; especially the act of pleading or arguing for something.

- *The article explained what "protagonism" means with a simple example.*
- *Understanding "protagonism" helps you talk about this topic clearly.*

---

protanopic *(adjective)*

Inability to see the color red or to distinguish red and bluish-green.

- *Her writing became clearer after she learned "protanopic."*
- *The speaker chose "protanopic" because it captured the feeling precisely.*

---

protea cynaroides *(noun)*

South African shrub whose flowers when open are cup-shaped resembling artichokes.

- *He looked up "protea cynaroides" because he had never seen it before.*
- *They discussed "protea cynaroides" during the group presentation.*

---

proteales *(noun)*

Coextensive with the family Proteaceae.

- *The article explained what "proteales" means with a simple example.*
- *They discussed "proteales" during the group presentation.*

---

protectorship *(noun)*

The position of protector.

- *Understanding "protectorship" helps you talk about this topic clearly.*
- *In class, the teacher used "protectorship" to mean the position of protector.*

---

proteidae *(noun)*

Mud puppies.

- *The article explained what "proteidae" means with a simple example.*
- *She wrote a short paragraph that included "proteidae."*

---

proteles cristata *(noun)*

Striped hyena of southeast Africa that feeds chiefly on insects.

- *They discussed "proteles cristata" during the group presentation.*
- *She wrote a short paragraph that included "proteles cristata."*

---

proteosome *(noun)*

A form of vaccine that can be administered by an inhaler.

- *The article explained what "proteosome" means with a simple example.*
- *In class, the teacher used "proteosome" to mean a form of vaccine that can be administered by an....*

---

proteosome vaccine *(noun)*

A form of vaccine that can be administered by an inhaler.

- *Understanding "proteosome vaccine" helps you talk about this topic clearly.*
- *They discussed "proteosome vaccine" during the group presentation.*

---

proterochampsa *(noun)*

Early archosaurian carnivore.

- *In class, the teacher used "proterochampsa" to mean early archosaurian carnivore.*
- *He looked up "proterochampsa" because he had never seen it before.*

---

proteus anguinus *(noun)*

European aquatic salamander with permanent external gills that lives in caves.

- *In class, the teacher used "proteus anguinus" to mean european aquatic salamander with permanent external....*
- *He looked up "proteus anguinus" because he had never seen it before.*

---

prothrombinase *(noun)*

Coagulation factor that is converted to an enzyme that converts prothrombin to thrombin in a reaction that depends on calcium ions and other coagulation factors.

- *They discussed "prothrombinase" during the group presentation.*
- *Understanding "prothrombinase" helps you talk about this topic clearly.*

---

protirelin *(noun)*

Hormone released by the hypothalamus that controls the release of thyroid-stimulating hormone from the anterior pituitary.

- *He looked up "protirelin" because he had never seen it before.*
- *They discussed "protirelin" during the group presentation.*

---

protistan *(noun)*

Free-living or colonial organisms with diverse nutritional and reproductive modes.

- *In class, the teacher used "protistan" to mean free-living or colonial organisms with diverse....*
- *The article explained what "protistan" means with a simple example.*

---

protium guianense *(noun)*

Tropical American tree.

- *They discussed "protium guianense" during the group presentation.*
- *The article explained what "protium guianense" means with a simple example.*

---

protium heptaphyllum *(noun)*

Tropical American tree.

- *She wrote a short paragraph that included "protium heptaphyllum."*
- *He looked up "protium heptaphyllum" because he had never seen it before.*

---

protoactinium *(noun)*

A short-lived radioactive metallic element formed from uranium and disintegrating into actinium and then into lead.

- *In class, the teacher used "protoactinium" to mean a short-lived radioactive metallic element formed....*
- *He looked up "protoactinium" because he had never seen it before.*

---

protoavis *(noun)*

Most primitive avian type known; extinct bird of the Triassic having bird-like jaw and hollow limbs and breastbone with dinosaur-like tail and hind limbs.

- *The article explained what "protoavis" means with a simple example.*
- *In class, the teacher used "protoavis" to mean most primitive avian type known; extinct bird of....*

---

protoctist *(noun)*

Any of the unicellular protists.

- *They discussed "protoctist" during the group presentation.*
- *The article explained what "protoctist" means with a simple example.*

---

protoctist family *(noun)*

Any of the families of Protoctista.

- *She wrote a short paragraph that included "protoctist family."*
- *They discussed "protoctist family" during the group presentation.*

---

protoctist genus *(noun)*

Any genus of Protoctista.

- *She wrote a short paragraph that included "protoctist genus."*
- *He looked up "protoctist genus" because he had never seen it before.*

---

protoctist order *(noun)*

The order of protoctists.

- *She wrote a short paragraph that included "protoctist order."*
- *The article explained what "protoctist order" means with a simple example.*

---

protogeometric *(adjective)*

Characteristic of the earliest phase of geometric art especially in Greece.

- *A "protogeometric" approach may work better in this case.*
- *It is useful to describe something as "protogeometric" when it is characteristic of the earliest phase of geometric....*

---

protoheme *(noun)*

A complex red organic pigment containing iron and other atoms to which oxygen binds.

- *She wrote a short paragraph that included "protoheme."*
- *They discussed "protoheme" during the group presentation.*

---

protohemin *(noun)*

A reddish-brown chloride of heme; produced from hemoglobin in laboratory tests for the presence of blood.

- *She wrote a short paragraph that included "protohemin."*
- *He looked up "protohemin" because he had never seen it before.*

---

protohippus *(noun)*

Pliocene horse approaching donkeys in size.

- *They discussed "protohippus" during the group presentation.*
- *She wrote a short paragraph that included "protohippus."*

---

protomammal *(noun)*

Probably warm-blooded; considered direct ancestor of mammals.

- *They discussed "protomammal" during the group presentation.*
- *In class, the teacher used "protomammal" to mean probably warm-blooded; considered direct ancestor....*

---

prototheria *(noun)*

Echidnas; platypus.

- *She wrote a short paragraph that included "prototheria."*
- *Understanding "prototheria" helps you talk about this topic clearly.*

---

prototherian *(noun)*

Primitive oviparous mammals found only in Australia and Tasmania and New Guinea.

- *The article explained what "prototherian" means with a simple example.*
- *In class, the teacher used "prototherian" to mean primitive oviparous mammals found only in australia....*

---

protozoic *(adjective)*

Of or relating to the Protozoa.

- *A "protozoic" approach may work better in this case.*
- *Students compared "protozoic" with similar adjectives in the lesson.*

---

protozoological *(adjective)*

Concerning the branch of zoology that studies protozoans.

- *Her writing became clearer after she learned "protozoological."*
- *A "protozoological" approach may work better in this case.*

---

protozoologist *(noun)*

A zoologist who studies protozoans.

- *In class, the teacher used "protozoologist" to mean a zoologist who studies protozoans.*
- *The article explained what "protozoologist" means with a simple example.*

---

protozoon *(noun)*

Any of diverse minute acellular or unicellular organisms usually nonphotosynthetic.

- *He looked up "protozoon" because he had never seen it before.*
- *She wrote a short paragraph that included "protozoon."*

protractedly *(adverb)*

In a slow, leisurely or prolonged way; -Rossetti.

- *Try rewriting the sentence and include "protractedly" naturally.*
- *The narrator describes the scene "protractedly" in the final chapter.*

protractible *(adjective)*

Able to be extended.

- *Her writing became clearer after she learned "protractible."*
- *Would you call this situation "protractible"? Explain why.*

protractile *(adjective)*

Able to be extended.

- *Protractile muscle.*
- *A "protractile" approach may work better in this case.*

protropin *(noun)*

Trade name of a synthetic human growth hormone given to children deficient in the hormone; use by athletes and weightlifters is banned.

- *The article explained what "protropin" means with a simple example.*
- *They discussed "protropin" during the group presentation.*

protrusible *(adjective)*

Capable of being thrust forward, as the tongue.

- *A "protrusible" approach may work better in this case.*
- *Students compared "protrusible" with similar adjectives in the lesson.*

protrusile *(adjective)*

Capable of being thrust forward, as the tongue.

- *The speaker chose "protrusile" because it captured the feeling precisely.*
- *Would you call this situation "protrusile"? Explain why.*

protuberate *(verb)*

Form a rounded prominence.

- *The starved child's belly protuberated.*
- *In everyday English, people use "protuberate" when talking about this idea.*

protura *(noun)*

Minute wingless arthropods: telsontails.

- *She wrote a short paragraph that included "protura."*
- *Understanding "protura" helps you talk about this topic clearly.*

proturan *(noun)*

Any of several minute primitive wingless and eyeless insects having a cone-shaped head; inhabit damp soil or decaying organic matter.

- *The article explained what "proturan" means with a simple example.*
- *In class, the teacher used "proturan" to mean any of several minute primitive wingless and....*

providently *(adverb)*

In a provident manner.

- *Providently, he had saved up some money for emergencies.*
- *Place "providently" carefully so the meaning stays clear.*

provisionary *(adjective)*

Under terms not final or fully worked out or agreed upon.

- *Her writing became clearer after she learned "provisionary."*
- *Students compared "provisionary" with similar adjectives in the lesson.*

provokingly *(adverb)*

In a provocative manner.

- *She spoke "provokingly," and the audience immediately understood her point.*
- *He answered "provokingly," which changed the tone of the conversation.*

---

prudishly *(adverb)*

In a prudish manner.

- *She acts prudishly, but I wonder whether she is really all that chaste.*
- *He answered "prudishly," which changed the tone of the conversation.*

---

prumnopitys *(noun)*

Mostly dioecious evergreen conifers; leaves are softer than in Podocarpus.

- *In class, the teacher used "prumnopitys" to mean mostly dioecious evergreen conifers; leaves are....*
- *He looked up "prumnopitys" because he had never seen it before.*

---

prumnopitys amara *(noun)*

A large fast-growing monoecious tropical evergreen tree having large glossy lanceolate leaves; of rain forests of Sumatra and Philippines to northern Queensland.

- *In class, the teacher used "prumnopitys amara" to mean a large fast-growing monoecious tropical evergreen....*
- *They discussed "prumnopitys amara" during the group presentation.*

---

prumnopitys andina *(noun)*

South American evergreen tree or shrub.

- *The article explained what "prumnopitys andina" means with a simple example.*
- *Understanding "prumnopitys andina" helps you talk about this topic clearly.*

---

prumnopitys elegans *(noun)*

South American evergreen tree or shrub.

- *They discussed "prumnopitys elegans" during the group presentation.*
- *She wrote a short paragraph that included "prumnopitys elegans."*

---

prumnopitys ferruginea *(noun)*

New Zealand conifer used for lumber; the dark wood is used for interior carpentry.

- *He looked up "prumnopitys ferruginea" because he had never seen it before.*
- *She wrote a short paragraph that included "prumnopitys ferruginea."*

---

prumnopitys taxifolia *(noun)*

Conifer of Australia and New Zealand.

- *The article explained what "prumnopitys taxifolia" means with a simple example.*
- *They discussed "prumnopitys taxifolia" during the group presentation.*

---

prunella modularis *(noun)*

Small brownish European songbird.

- *The article explained what "prunella modularis" means with a simple example.*
- *They discussed "prunella modularis" during the group presentation.*

---

prunellidae *(noun)*

Hedge sparrow.

- *The article explained what "prunellidae" means with a simple example.*
- *Understanding "prunellidae" helps you talk about this topic clearly.*

---

prunus alleghaniensis *(noun)*

Wild plum of northeastern United States having dark purple fruits with yellow flesh.

- *In class, the teacher used "prunus alleghaniensis" to mean wild plum of northeastern united states having dark....*
- *The article explained what "prunus alleghaniensis" means with a simple example.*

---

prunus capuli *(noun)*

Mexican black cherry tree having edible fruit.

- *They discussed "prunus capuli" during the group presentation.*

- *The article explained what “prunus capuli” means with a simple example.*

prunus cerasifera *(noun)*

Small Asiatic tree bearing edible red or yellow fruit.

- *He looked up “prunus cerasifera” because he had never seen it before.*
- *In class, the teacher used “prunus cerasifera” to mean small asiatic tree bearing edible red or yellow fruit.*

prunus cerasus austera *(noun)*

Any of several cultivated sour cherry trees bearing fruit with dark skin and juice.

- *Understanding “prunus cerasus austera” helps you talk about this topic clearly.*
- *He looked up “prunus cerasus austera” because he had never seen it before.*

prunus cerasus caproniana *(noun)*

Any of several cultivated sour cherry trees bearing pale red fruit with colorless juice.

- *The article explained what “prunus cerasus caproniana” means with a simple example.*
- *In class, the teacher used “prunus cerasus caproniana” to mean any of several cultivated sour cherry trees bearing....*

prunus cerasus marasca *(noun)*

Dalmatian bitter wild cherry tree bearing fruit whose juice is made into maraschino liqueur.

- *The article explained what “prunus cerasus marasca” means with a simple example.*
- *They discussed “prunus cerasus marasca” during the group presentation.*

prunus dasycarpa *(noun)*

Small hybrid apricot of Asia and Asia Minor having purplish twigs and white flowers following by inferior purple fruit.

- *She wrote a short paragraph that included “prunus dasycarpa.”*
- *They discussed “prunus dasycarpa” during the group presentation.*

prunus demissa *(noun)*

Chokecherry of western United States.

- *She wrote a short paragraph that included “prunus demissa.”*
- *They discussed “prunus demissa” during the group presentation.*

prunus domestica insititia *(noun)*

Plum tree long cultivated for its edible fruit.

- *In class, the teacher used “prunus domestica insititia” to mean plum tree long cultivated for its edible fruit.*
- *The article explained what “prunus domestica insititia” means with a simple example.*

prunus ilicifolia *(noun)*

California evergreen wild plum with spiny leathery leaves and white flowers.

- *He looked up “prunus ilicifolia” because he had never seen it before.*
- *In class, the teacher used “prunus ilicifolia” to mean california evergreen wild plum with spiny leathery....*

prunus insititia *(noun)*

Small wild or half-domesticated Eurasian plum bearing small ovoid fruit in clusters.

- *They discussed “prunus insititia” during the group presentation.*
- *He looked up “prunus insititia” because he had never seen it before.*

prunus laurocerasus *(noun)*

Frequently cultivated Eurasian evergreen shrub or small tree having showy clusters of white flowers and glossy foliage and yielding oil similar to bitter almond oil.

- *In class, the teacher used “prunus laurocerasus” to mean frequently cultivated eurasian evergreen shrub or....*
- *He looked up “prunus laurocerasus” because he had never seen it before.*

prunus lyonii *(noun)*

Evergreen shrub or small tree found on Catalina Island (California).

- *The article explained what “prunus lyonii” means with a simple example.*
- *She wrote a short paragraph that included “prunus lyonii.”*

prunus pensylvanica *(noun)*

Small shrubby North American wild cherry with small bright red acid fruit.

- *In class, the teacher used "prunus pensylvanica" to mean small shrubby north american wild cherry with small....*
- *Understanding "prunus pensylvanica" helps you talk about this topic clearly.*

prunus persica nectarina *(noun)*

Variety or mutation of the peach bearing fruit with smooth skin and (usually) yellow flesh.

- *They discussed "prunus persica nectarina" during the group presentation.*
- *He looked up "prunus persica nectarina" because he had never seen it before.*

prunus pumilla susquehanae *(noun)*

Small straggling American cherry growing on sandy soil and having minute scarcely edible purplish-black fruit.

- *He looked up "prunus pumilla susquehanae" because he had never seen it before.*
- *In class, the teacher used "prunus pumilla susquehanae" to mean small straggling american cherry growing on sandy....*

prunus salicina *(noun)*

Small tree of China and Japan bearing large yellow to red plums usually somewhat inferior to European plums in flavor.

- *They discussed "prunus salicina" during the group presentation.*
- *In class, the teacher used "prunus salicina" to mean small tree of china and japan bearing large yellow....*

prunus subcordata *(noun)*

Shrub of the Pacific coast of the United States bearing small red insipid fruit.

- *They discussed "prunus subcordata" during the group presentation.*
- *He looked up "prunus subcordata" because he had never seen it before.*

prunus susquehanae *(noun)*

Small straggling American cherry growing on sandy soil and having minute scarcely edible purplish-black fruit.

- *Understanding "prunus susquehanae" helps you talk about this topic clearly.*
- *He looked up "prunus susquehanae" because he had never seen it before.*

prunus virginiana demissa *(noun)*

Chokecherry of western United States.

- *They discussed "prunus virginiana demissa" during the group presentation.*
- *The article explained what "prunus virginiana demissa" means with a simple example.*

pruriently *(adverb)*

In a prurient manner.

- *She spoke "pruriently," and the audience immediately understood her point.*
- *Using "pruriently" can make your explanation more exact.*

pryingly *(adverb)*

In a curious and prying manner.

- *'Do you have a boyfriend,' she asked her prospective tenant pryingly.*
- *He answered "pryingly," which changed the tone of the conversation.*

przevalski's horse *(noun)*

Wild horse of central Asia that resembles an ass; now endangered.

- *In class, the teacher used "przevalski's horse" to mean wild horse of central asia that resembles an ass;....*
- *Understanding "przevalski's horse" helps you talk about this topic clearly.*

przewalski's horse *(noun)*

Wild horse of central Asia that resembles an ass; now endangered.

- *She wrote a short paragraph that included "przewalski's horse."*
- *Understanding "przewalski's horse" helps you talk about this topic clearly.*

psaltriparus *(noun)*

A genus of Paridae.

- *Understanding "psaltriparus" helps you talk about this topic clearly.*
- *They discussed "psaltriparus" during the group presentation.*

---

psenes *(noun)*

A genus of Stromateidae.

- *In class, the teacher used "psenes" to mean a genus of stromateidae.*
- *The article explained what "psenes" means with a simple example.*

---

psephurus *(noun)*

A genus of Polyodontidae.

- *They discussed "psephurus" during the group presentation.*
- *Understanding "psephurus" helps you talk about this topic clearly.*

---

psephurus gladis *(noun)*

Fish of larger rivers of China similar to the Mississippi paddlefish.

- *They discussed "psephurus gladis" during the group presentation.*
- *Understanding "psephurus gladis" helps you talk about this topic clearly.*

---

psetta *(noun)*

A genus of Bothidae.

- *The article explained what "psetta" means with a simple example.*
- *She wrote a short paragraph that included "psetta."*

---

psetta maxima *(noun)*

A large brownish European flatfish.

- *In class, the teacher used "psetta maxima" to mean a large brownish european flatfish.*
- *The article explained what "psetta maxima" means with a simple example.*

---

psettichthys *(noun)*

A genus of Soleidae.

- *He looked up "psettichthys" because he had never seen it before.*
- *Understanding "psettichthys" helps you talk about this topic clearly.*

---

psettichthys melanostichus *(noun)*

A common flatfish of the Pacific coast of North America.

- *The article explained what "psettichthys melanostichus" means with a simple example.*
- *Understanding "psettichthys melanostichus" helps you talk about this topic clearly.*

---

pseudacris *(noun)*

Chorus frogs.

- *She wrote a short paragraph that included "pseudacris."*
- *He looked up "pseudacris" because he had never seen it before.*

---

pseudaletia *(noun)*

Moths whose larvae are armyworms.

- *They discussed "pseudaletia" during the group presentation.*
- *She wrote a short paragraph that included "pseudaletia."*

---

pseudaletia unipuncta *(noun)*

Moth whose destructive larvae travel in multitudes.

- *In class, the teacher used "pseudaletia unipuncta" to mean moth whose destructive larvae travel in multitudes.*
- *The article explained what "pseudaletia unipuncta" means with a simple example.*

---

pseudechis *(noun)*

Venomous Australian blacksnakes.

- *She wrote a short paragraph that included "pseudechis."*
- *They discussed "pseudechis" during the group presentation.*

pseudechis porphyriacus *(noun)*

Large semiaquatic snake of Australia; black above with red belly.

- *He looked up "pseudechis porphyriacus" because he had never seen it before.*
- *In class, the teacher used "pseudechis porphyriacus" to mean large semiaquatic snake of australia; black above....*

pseudemys *(noun)*

Sliders; red-bellied terrapin.

- *She wrote a short paragraph that included "pseudemys."*
- *Understanding "pseudemys" helps you talk about this topic clearly.*

pseudemys concinna *(noun)*

Large river turtle of the southern United States and northern Mexico.

- *He looked up "pseudemys concinna" because he had never seen it before.*
- *Understanding "pseudemys concinna" helps you talk about this topic clearly.*

pseudemys rubriventris *(noun)*

Freshwater turtle of Chesapeake Bay tributaries having red markings on the lower shell.

- *He looked up "pseudemys rubriventris" because he had never seen it before.*
- *She wrote a short paragraph that included "pseudemys rubriventris."*

pseudemys scripta *(noun)*

Freshwater turtle of United States and South America; frequently raised commercially; some young sold as pets.

- *They discussed "pseudemys scripta" during the group presentation.*
- *He looked up "pseudemys scripta" because he had never seen it before.*

pseudobombax *(noun)*

Tropical American deciduous shrubs or small trees.

- *They discussed "pseudobombax" during the group presentation.*
- *She wrote a short paragraph that included "pseudobombax."*

pseudobombax ellipticum *(noun)*

Tree of Mexico to Guatemala having densely hairy flowers with long narrow petals clustered at ends of branches before leaves appear.

- *She wrote a short paragraph that included "pseudobombax ellipticum."*
- *Understanding "pseudobombax ellipticum" helps you talk about this topic clearly.*

pseudocarp *(noun)*

Fruit containing much fleshy tissue besides that of the ripened ovary; as apple or strawberry.

- *He looked up "pseudocarp" because he had never seen it before.*
- *She wrote a short paragraph that included "pseudocarp."*

pseudococcidae *(noun)*

Scalelike insects: mealybugs.

- *The article explained what "pseudococcidae" means with a simple example.*
- *She wrote a short paragraph that included "pseudococcidae."*

pseudococcus comstocki *(noun)*

Asiatic insect introduced accidentally into United States; pest on citrus and apple trees.

- *Understanding "pseudococcus comstocki" helps you talk about this topic clearly.*
- *In class, the teacher used "pseudococcus comstocki" to mean asiatic insect introduced accidentally into united....*

pseudocolus *(noun)*

A genus of fungi belonging to the family Clathraceae.

- *In class, the teacher used "pseudocolus" to mean a genus of fungi belonging to the family clathraceae.*
- *The article explained what "pseudocolus" means with a simple example.*

pseudocolus fusiformis *(noun)*

A stinkhorn of genus Pseudocolus; the fruiting body first resembles a small puffball that soon splits open to form a stalk with tapering arms that arch and taper to a common point.

- *They discussed "pseudocolus fusiformis" during the group presentation.*
- *In class, the teacher used "pseudocolus fusiformis" to mean a stinkhorn of genus pseudocolus; the fruiting body....*

---

pseudohermaphrodite *(noun)*

Someone having external genitalia of one sex and internal sex organs of the other sex; not a true hermaphrodite because there is no ambiguity in the sex of the external genitalia and hence no question about gender at birth.

- *He looked up "pseudohermaphrodite" because he had never seen it before.*
- *Understanding "pseudohermaphrodite" helps you talk about this topic clearly.*

---

pseudohermaphroditic *(adjective)*

Having internal reproductive organs of one sex and external sexual characteristics of the other sex.

- *A "pseudohermaphroditic" approach may work better in this case.*
- *Would you call this situation "pseudohermaphroditic"? Explain why.*

---

pseudolarix *(noun)*

One species: golden larch.

- *In class, the teacher used "pseudolarix" to mean one species: golden larch.*
- *Understanding "pseudolarix" helps you talk about this topic clearly.*

---

pseudolarix amabilis *(noun)*

Chinese deciduous conifer resembling a larch with golden yellow leaves.

- *Understanding "pseudolarix amabilis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pseudolarix amabilis."*

---

pseudomonad *(noun)*

Bacteria usually producing greenish fluorescent water-soluble pigment; some pathogenic for plants and animals.

- *She wrote a short paragraph that included "pseudomonad."*
- *He looked up "pseudomonad" because he had never seen it before.*

---

pseudomonadales *(noun)*

One of two usually recognized orders of true bacteria; Gram-negative spiral or spherical or rod-shaped bacteria usually motile by polar flagella; some contain photosynthetic pigments.

- *Understanding "pseudomonadales" helps you talk about this topic clearly.*
- *He looked up "pseudomonadales" because he had never seen it before.*

---

pseudomonas pyocanea *(noun)*

A species of aerobic bacteria.

- *Understanding "pseudomonas pyocanea" helps you talk about this topic clearly.*
- *The article explained what "pseudomonas pyocanea" means with a simple example.*

---

pseudomonodaceae *(noun)*

Rod-shaped Gram-negative bacteria; include important plant and animal pathogens.

- *In class, the teacher used "pseudomonodaceae" to mean rod-shaped gram-negative bacteria; include....*
- *He looked up "pseudomonodaceae" because he had never seen it before.*

---

pseudoperipteral *(adjective)*

Having columniation completely circling an area of the structure.

- *Would you call this situation "pseudoperipteral"? Explain why.*
- *Her writing became clearer after she learned "pseudoperipteral."*

---

pseudophloem *(noun)*

False phloem.

- *They discussed "pseudophloem" during the group presentation.*
- *He looked up "pseudophloem" because he had never seen it before.*

---

pseudopleuronectes *(noun)*

A genus of Pleuronectidae.

- *They discussed "pseudopleuronectes" during the group presentation.*

- *He looked up "pseudopleuronectes" because he had never seen it before.*

---

pseudopleuronectes americanus *(noun)*

Important American food fish in the winter.

- *The article explained what "pseudopleuronectes americanus" means with a simple example.*
- *She wrote a short paragraph that included "pseudopleuronectes americanus."*

---

pseudopodium *(noun)*

Temporary outgrowth used by some microorganisms as an organ of feeding or locomotion.

- *Understanding "pseudopodium" helps you talk about this topic clearly.*
- *In class, the teacher used "pseudopodium" to mean temporary outgrowth used by some microorganisms as....*

---

pseudoprostyle *(adjective)*

Marked by columniation having free columns in a portico only across the opening to the structure.

- *It is useful to describe something as "pseudoprostyle" when it is marked by columniation having free columns in a....*
- *The speaker chose "pseudoprostyle" because it captured the feeling precisely.*

---

pseudoryx *(noun)*

Species of large cow-like mammals of Vietnam discovered by scientists in 1992.

- *The article explained what "pseudoryx" means with a simple example.*
- *In class, the teacher used "pseudoryx" to mean species of large cow-like mammals of vietnam....*

---

pseudoryx nghetinhensis *(noun)*

Cow-like creature with the glossy coat of a horse and the agility of a goat and the long horns of an antelope; characterized as a cow that lives the life of a goat.

- *In class, the teacher used "pseudoryx nghetinhensis" to mean cow-like creature with the glossy coat of a horse....*
- *He looked up "pseudoryx nghetinhensis" because he had never seen it before.*

---

pseudoscorpion *(noun)*

Small nonvenomous arachnid resembling a tailless scorpion.

- *The article explained what "pseudoscorpion" means with a simple example.*
- *Understanding "pseudoscorpion" helps you talk about this topic clearly.*

---

pseudoscorpiones *(noun)*

False scorpions.

- *The article explained what "pseudoscorpiones" means with a simple example.*
- *In class, the teacher used "pseudoscorpiones" to mean false scorpions.*

---

pseudoscorpionida *(noun)*

False scorpions.

- *They discussed "pseudoscorpionida" during the group presentation.*
- *The article explained what "pseudoscorpionida" means with a simple example.*

---

pseudotaxus *(noun)*

One species.

- *The article explained what "pseudotaxus" means with a simple example.*
- *In class, the teacher used "pseudotaxus" to mean one species.*

---

pseudotaxus chienii *(noun)*

Yew of southeastern China, differing from the Old World yew in having white berries.

- *Understanding "pseudotaxus chienii" helps you talk about this topic clearly.*
- *They discussed "pseudotaxus chienii" during the group presentation.*

---

pseudowintera *(noun)*

Evergreen shrubs or small trees of Australia and New Zealand.

- *Understanding "pseudowintera" helps you talk about this topic clearly.*
- *The article explained what "pseudowintera" means with a simple example.*

---

pseudowintera colorata *(noun)*

Evergreen shrub or small tree whose foliage is conspicuously blotched with red and yellow and having small black fruits.

- *They discussed "pseudowintera colorata" during the group presentation.*
- *In class, the teacher used "pseudowintera colorata" to mean evergreen shrub or small tree whose foliage is....*

---

psidium cattleianum *(noun)*

Small tropical shrubby tree bearing deep red oval fruit.

- *Understanding "psidium cattleianum" helps you talk about this topic clearly.*
- *In class, the teacher used "psidium cattleianum" to mean small tropical shrubby tree bearing deep red oval fruit.*

---

psidium guajava *(noun)*

Small tropical American shrubby tree; widely cultivated in warm regions for its sweet globular yellow fruit.

- *In class, the teacher used "psidium guajava" to mean small tropical american shrubby tree; widely....*
- *Understanding "psidium guajava" helps you talk about this topic clearly.*

---

psidium guineense *(noun)*

South American tree having fruit similar to the true guava.

- *In class, the teacher used "psidium guineense" to mean south american tree having fruit similar to the....*
- *They discussed "psidium guineense" during the group presentation.*

---

psidium littorale *(noun)*

Small tropical shrubby tree bearing small yellowish fruit.

- *She wrote a short paragraph that included "psidium littorale."*
- *Understanding "psidium littorale" helps you talk about this topic clearly.*

---

psidium littorale longipes *(noun)*

Small tropical shrubby tree bearing deep red oval fruit.

- *He looked up "psidium littorale longipes" because he had never seen it before.*
- *She wrote a short paragraph that included "psidium littorale longipes."*

---

psilomelane *(noun)*

A mineral consisting of hydrated basic oxide of manganese and barium; a source of manganese.

- *She wrote a short paragraph that included "psilomelane."*
- *The article explained what "psilomelane" means with a simple example.*

---

psilophytaceae *(noun)*

Paleozoic plants.

- *They discussed "psilophytaceae" during the group presentation.*
- *She wrote a short paragraph that included "psilophytaceae."*

---

psilophytales *(noun)*

Paleozoic simple dichotomously branched plants of Europe and eastern Canada including the oldest known vascular land plants.

- *The article explained what "psilophytales" means with a simple example.*
- *They discussed "psilophytales" during the group presentation.*

---

psilophyte *(noun)*

Any plant of the order Psilophytales: a savannah plant.

- *She wrote a short paragraph that included "psilophyte."*
- *He looked up "psilophyte" because he had never seen it before.*

---

psilophyton *(noun)*

Any plant or fossil of the genus Psilophyton.

- *She wrote a short paragraph that included "psilophyton."*
- *He looked up "psilophyton" because he had never seen it before.*

---

psilopsida *(noun)*

Whisk ferns; comprising the family Psilotaceae or Psilotatae: vascular plants with no roots, partial if any leaf differentiation, and rudimentary spore sacs.

- *In class, the teacher used "psilopsida" to mean whisk ferns; comprising the family psilotaceae or....*
- *Understanding "psilopsida" helps you talk about this topic clearly.*

---

psilotaceae *(noun)*

Small family of lower ferns having nearly naked stems and minute scalelike leaves.

- *He looked up "psilotaceae" because he had never seen it before.*
- *In class, the teacher used "psilotaceae" to mean small family of lower ferns having nearly naked....*

---

psilotales *(noun)*

Lower vascular plants having dichotomously branched sporophyte divided into aerial shoot and rhizome and lacking true roots.

- *Understanding "psilotales" helps you talk about this topic clearly.*
- *The article explained what "psilotales" means with a simple example.*

---

psilotatae *(noun)*

Whisk ferns; comprising the family Psilotaceae or Psilotatae: vascular plants with no roots, partial if any leaf differentiation, and rudimentary spore sacs.

- *He looked up "psilotatae" because he had never seen it before.*
- *She wrote a short paragraph that included "psilotatae."*

---

psilotum *(noun)*

Type genus of the Psilotaceae.

- *They discussed "psilotum" during the group presentation.*
- *In class, the teacher used "psilotum" to mean type genus of the psilotaceae.*

---

psilotum nudum *(noun)*

Pantropical epiphytic or terrestrial whisk fern with usually dull yellow branches and minute leaves; America; Japan; Australia.

- *Understanding "psilotum nudum" helps you talk about this topic clearly.*
- *The article explained what "psilotum nudum" means with a simple example.*

---

psithyrus *(noun)*

A large bee that resembles the bumblebee but lacks pollen-collecting apparatus and a worker caste.

- *They discussed "psithyrus" during the group presentation.*
- *She wrote a short paragraph that included "psithyrus."*

---

psittacidae *(noun)*

Coextensive with the order Psittaciformes.

- *They discussed "psittacidae" during the group presentation.*
- *In class, the teacher used "psittacidae" to mean coextensive with the order psittaciformes.*

---

psittaciformes *(noun)*

An order of birds including parrots and amazons and cockatoos and lorikeets and lories and macaws and parakeets.

- *They discussed "psittaciformes" during the group presentation.*
- *Understanding "psittaciformes" helps you talk about this topic clearly.*

---

psittacosaur *(noun)*

Primitive dinosaur actually lacking horns and having only the beginning of a frill; long hind limbs and short forelimbs; may have been bipedal.

- *In class, the teacher used "psittacosaur" to mean primitive dinosaur actually lacking horns and....*
- *The article explained what "psittacosaur" means with a simple example.*

---

psittacosaurus *(noun)*

Primitive dinosaur actually lacking horns and having only the beginning of a frill; long hind limbs and short forelimbs; may have been bipedal.

- *He looked up "psittacosaurus" because he had never seen it before.*
- *They discussed "psittacosaurus" during the group presentation.*

---

psittacula *(noun)*

A genus of Psittacidae.

- *Understanding "psittacula" helps you talk about this topic clearly.*
- *They discussed "psittacula" during the group presentation.*

psittacula krameri *(noun)*

African parakeet.

- *She wrote a short paragraph that included "psittacula krameri."*
- *Understanding "psittacula krameri" helps you talk about this topic clearly.*

psittacus *(noun)*

Type genus of the Psittacidae: usually restricted to the African grey.

- *Understanding "psittacus" helps you talk about this topic clearly.*
- *They discussed "psittacus" during the group presentation.*

psittacus erithacus *(noun)*

Commonly domesticated grey parrot with red-and-black tail and white face; native to equatorial Africa.

- *In class, the teacher used "psittacus erithacus" to mean commonly domesticated grey parrot with....*
- *He looked up "psittacus erithacus" because he had never seen it before.*

psocid *(noun)*

Small winged insect living on the bark and leaves of trees and feeding on e.g. fungi and decaying plant matter.

- *In class, the teacher used "psocid" to mean small winged insect living on the bark and leaves....*
- *He looked up "psocid" because he had never seen it before.*

psocidae *(noun)*

A family of small soft-bodied insects that feed on decaying vegetation; related to booklice.

- *In class, the teacher used "psocidae" to mean a family of small soft-bodied insects that feed on....*
- *Understanding "psocidae" helps you talk about this topic clearly.*

psocoptera *(noun)*

An order of insects: includes booklice and bark-lice.

- *Understanding "psocoptera" helps you talk about this topic clearly.*
- *The article explained what "psocoptera" means with a simple example.*

psocopterous insect *(noun)*

Small soft-bodied insect with chewing mouthparts and either no wings or two pairs.

- *Understanding "psocopterous insect" helps you talk about this topic clearly.*
- *They discussed "psocopterous insect" during the group presentation.*

psophia *(noun)*

Type genus of the Psophiidae: trumpeters.

- *In class, the teacher used "psophia" to mean type genus of the psophiidae: trumpeters.*
- *The article explained what "psophia" means with a simple example.*

psophia crepitans *(noun)*

Trumpeter of Brazil and Guiana; often kept to protect poultry in Brazil.

- *They discussed "psophia crepitans" during the group presentation.*
- *Understanding "psophia crepitans" helps you talk about this topic clearly.*

psophocarpus *(noun)*

Species of tropical Asian and African climbing herbs.

- *They discussed "psophocarpus" during the group presentation.*
- *She wrote a short paragraph that included "psophocarpus."*

psophocarpus tetragonolobus *(noun)*

A tuberous twining annual vine bearing clusters of purplish flowers and pods with four jagged wings; Old World tropics.

- *They discussed "psophocarpus tetragonolobus" during the group presentation.*
- *She wrote a short paragraph that included "psophocarpus tetragonolobus."*

psoralea *(noun)*

Widely distributed genus of herbs or shrubs with glandular compound leaves and spicate or racemose purple or white flowers.

- *The article explained what "psoralea" means with a simple example.*
- *They discussed "psoralea" during the group presentation.*

---

psoralea esculenta *(noun)*

Densely hairy perennial of central North America having edible tuberous roots.

- *The article explained what "psoralea esculenta" means with a simple example.*
- *In class, the teacher used "psoralea esculenta" to mean densely hairy perennial of central north america....*

---

psychiatrical *(adjective)*

Relating to or used in or engaged in the practice of psychiatry.

- *It is useful to describe something as "psychiatrical" when it is relating to or used in or engaged in the practice....*
- *Students compared "psychiatrical" with similar adjectives in the lesson.*

---

psychodelic drug *(noun)*

A psychoactive drug that induces hallucinations or altered sensory experiences.

- *The article explained what "psychodelic drug" means with a simple example.*
- *In class, the teacher used "psychodelic drug" to mean a psychoactive drug that induces hallucinations or....*

---

psychodid *(noun)*

A fly of the family Psychodidae.

- *She wrote a short paragraph that included "psychodid."*
- *The article explained what "psychodid" means with a simple example.*

---

psychodidae *(noun)*

Very small two-winged flies with hairy wings that develop in moss and damp vegetable matter: sand flies.

- *She wrote a short paragraph that included "psychodidae."*
- *He looked up "psychodidae" because he had never seen it before.*

---

psychogalvanic response *(noun)*

A change in the electrical properties of the skin in response to stress or anxiety; can be measured either by recording the electrical resistance of the skin or by recording weak currents generated by the body.

- *He looked up "psychogalvanic response" because he had never seen it before.*
- *She wrote a short paragraph that included "psychogalvanic response."*

---

psychogenesis *(noun)*

A general term for the origin and development of almost any aspect of the mind.

- *Understanding "psychogenesis" helps you talk about this topic clearly.*
- *They discussed "psychogenesis" during the group presentation.*

---

psychogenetic *(adjective)*

Of or relating to the psychological cause of a disorder.

- *A "psychogenetic" approach may work better in this case.*
- *Would you call this situation "psychogenetic"? Explain why.*

---

psycholinguist *(noun)*

A person (usually a psychologist but sometimes a linguist) who studies the psychological basis of human language.

- *They discussed "psycholinguist" during the group presentation.*
- *He looked up "psycholinguist" because he had never seen it before.*

---

psychophysicist *(noun)*

A psychologist trained in psychophysics.

- *He looked up "psychophysicist" because he had never seen it before.*
- *Understanding "psychophysicist" helps you talk about this topic clearly.*

---

psychopsis *(noun)*

Epiphytic orchids of Central and South America formerly included in genus Oncidium.

- *They discussed "psychopsis" during the group presentation.*

- *She wrote a short paragraph that included "psychopsis."*

---

psychopsis krameriana *(noun)*

Orchid of South and Central America having flowers similar to but smaller than Psychopsis papilio; sometimes placed in genus Oncidium.

- *Understanding "psychopsis krameriana" helps you talk about this topic clearly.*
- *They discussed "psychopsis krameriana" during the group presentation.*

---

psychopsis papilio *(noun)*

Orchid of South America and Trinidad having large yellow and reddish-brown flowers; sometimes placed in genus Oncidium.

- *She wrote a short paragraph that included "psychopsis papilio."*
- *Understanding "psychopsis papilio" helps you talk about this topic clearly.*

---

psychrometer *(noun)*

A hygrometer consisting of a dry-bulb thermometer and a wet-bulb thermometer; their difference indicates the dryness of the surrounding air.

- *The article explained what "psychrometer" means with a simple example.*
- *She wrote a short paragraph that included "psychrometer."*

---

psyllidae *(noun)*

Jumping plant lice.

- *She wrote a short paragraph that included "psyllidae."*
- *The article explained what "psyllidae" means with a simple example.*

---

pteretis *(noun)*

Small genus sometimes included in genus Onoclea; in some classifications both genera are placed in Polypodiaceae.

- *He looked up "pteretis" because he had never seen it before.*
- *She wrote a short paragraph that included "pteretis."*

---

pteretis struthiopteris *(noun)*

Tall fern of northern temperate regions having graceful arched fronds and sporophylls resembling ostrich plumes.

- *She wrote a short paragraph that included "pteretis struthiopteris."*
- *He looked up "pteretis struthiopteris" because he had never seen it before.*

---

pteridaceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems; Pteridaceae is itself in turn sometimes further subdivided.

- *The article explained what "pteridaceae" means with a simple example.*
- *Understanding "pteridaceae" helps you talk about this topic clearly.*

---

pteridium aquilinum *(noun)*

Large coarse fern often several feet high; essentially weed ferns; cosmopolitan.

- *In class, the teacher used "pteridium aquilinum" to mean large coarse fern often several feet high;....*
- *He looked up "pteridium aquilinum" because he had never seen it before.*

---

pteridological *(adjective)*

Of or relating to the study of ferns.

- *Would you call this situation "pteridological"? Explain why.*
- *It is useful to describe something as "pteridological" when it is of or relating to the study of ferns.*

---

pteridologist *(noun)*

An expert in the study of ferns.

- *She wrote a short paragraph that included "pteridologist."*
- *The article explained what "pteridologist" means with a simple example.*

---

pteridophyte *(noun)*

Plants having vascular tissue and reproducing by spores.

- *They discussed "pteridophyte" during the group presentation.*
- *In class, the teacher used "pteridophyte" to mean plants having vascular tissue and reproducing by spores.*

---

pteridosperm *(noun)*

An extinct seed-producing fernlike plant of the order Cycadofilicales (or group Pteridospermae).

- *Understanding "pteridosperm" helps you talk about this topic clearly.*
- *In class, the teacher used "pteridosperm" to mean an extinct seed-producing fernlike plant of the....*

---

pteridospermae *(noun)*

Used in some classification systems: a group of extinct fossil gymnosperms coextensive with the order Cycadofilicales.

- *Understanding "pteridospermae" helps you talk about this topic clearly.*
- *The article explained what "pteridospermae" means with a simple example.*

---

pteridospermaphyta *(noun)*

Used in some classification systems: a group of extinct fossil gymnosperms coextensive with the order Cycadofilicales.

- *She wrote a short paragraph that included "pteridospermaphyta."*
- *The article explained what "pteridospermaphyta" means with a simple example.*

---

pteridospermopsida *(noun)*

Extinct gymnosperms most of Carboniferous to Jurassic: seed ferns and allies.

- *In class, the teacher used "pteridospermopsida" to mean extinct gymnosperms most of carboniferous to....*
- *Understanding "pteridospermopsida" helps you talk about this topic clearly.*

---

pteriidae *(noun)*

Pearl oysters.

- *The article explained what "pteriidae" means with a simple example.*
- *In class, the teacher used "pteriidae" to mean pearl oysters.*

---

pterion *(noun)*

The craniometric point in the region of the sphenoid fontanelle.

- *She wrote a short paragraph that included "pterion."*
- *They discussed "pterion" during the group presentation.*

---

pteris cretica *(noun)*

Cultivated in many varieties as houseplants.

- *He looked up "pteris cretica" because he had never seen it before.*
- *They discussed "pteris cretica" during the group presentation.*

---

pteris multifida *(noun)*

Asiatic fern introduced in America.

- *He looked up "pteris multifida" because he had never seen it before.*
- *Understanding "pteris multifida" helps you talk about this topic clearly.*

---

pternohyla *(noun)*

Burrowing tree frogs.

- *Understanding "pternohyla" helps you talk about this topic clearly.*
- *He looked up "pternohyla" because he had never seen it before.*

---

pternohyla fodiens *(noun)*

Terrestrial burrowing nocturnal frog of grassy terrain and scrub forests having very hard upper surface of head; of the United States southwest.

- *He looked up "pternohyla fodiens" because he had never seen it before.*
- *She wrote a short paragraph that included "pternohyla fodiens."*

---

pterocarpus angolensis *(noun)*

Deciduous South African tree having large odd-pinnate leaves and profuse fragrant orange-yellow flowers; yields a red juice and heavy strong durable wood.

- *They discussed "pterocarpus angolensis" during the group presentation.*
- *The article explained what "pterocarpus angolensis" means with a simple example.*

---

pterocarpus macrocarpus *(noun)*

Tree of India and Burma yielding a wood resembling mahogany.

- *In class, the teacher used "pterocarpus macrocarpus" to mean tree of india and burma yielding a wood resembling....*
- *The article explained what "pterocarpus macrocarpus" means with a simple example.*

---

pterocarpus santalinus *(noun)*

Tree of India and East Indies yielding a hard fragrant timber prized for cabinetwork and dark red heartwood used as a dyewood.

- *Understanding "pterocarpus santalinus" helps you talk about this topic clearly.*
- *In class, the teacher used "pterocarpus santalinus" to mean tree of india and east indies yielding a hard....*

---

pterocarya *(noun)*

Asiatic nut trees: wing nuts.

- *Understanding "pterocarya" helps you talk about this topic clearly.*
- *They discussed "pterocarya" during the group presentation.*

---

pterocarya fraxinifolia *(noun)*

Medium-sized Caucasian much-branched tree distinguished from other walnut trees by its winged fruit.

- *Understanding "pterocarya fraxinifolia" helps you talk about this topic clearly.*

---

pterocles *(noun)*

Type genus of the Pteroclididae.

- *They discussed "pterocles" during the group presentation.*
- *Understanding "pterocles" helps you talk about this topic clearly.*

---

pterocles alchata *(noun)*

Sandgrouse of Europe and Africa having elongated middle tail feathers.

- *They discussed "pterocles alchata" during the group presentation.*
- *Understanding "pterocles alchata" helps you talk about this topic clearly.*

---

pterocles indicus *(noun)*

Sandgrouse of India.

- *Understanding "pterocles indicus" helps you talk about this topic clearly.*
- *In class, the teacher used "pterocles indicus" to mean sandgrouse of india.*

---

pteroclididae *(noun)*

Sandgrouses.

- *She wrote a short paragraph that included "pteroclididae."*
- *They discussed "pteroclididae" during the group presentation.*

---

pterocnemia *(noun)*

A genus of birds of the family Rheidae.

- *They discussed "pterocnemia" during the group presentation.*
- *The article explained what "pterocnemia" means with a simple example.*

---

pterocnemia pennata *(noun)*

Smaller of two tall fast-running flightless birds similar to ostriches but three-toed; found from Peru to Strait of Magellan.

- *In class, the teacher used "pterocnemia pennata" to mean smaller of two tall fast-running flightless birds....*
- *Understanding "pterocnemia pennata" helps you talk about this topic clearly.*

---

pterodactylidae *(noun)*

A reptile family in the order Pterosauria.

- *Understanding "pterodactylidae" helps you talk about this topic clearly.*
- *The article explained what "pterodactylidae" means with a simple example.*

---

pterodactylus *(noun)*

A reptile genus of Pterodactylidae.

- *They discussed "pterodactylus" during the group presentation.*
- *Understanding "pterodactylus" helps you talk about this topic clearly.*

pteropogon *(noun)*

Southern Australian plant having feathery hairs surrounding the fruit.

- *The article explained what "pteropogon" means with a simple example.*
- *In class, the teacher used "pteropogon" to mean southern australian plant having feathery hairs....*

pteropogon humboltianum *(noun)*

Southern Australian plant having feathery hairs surrounding the fruit.

- *He looked up "pteropogon humboltianum" because he had never seen it before.*
- *Understanding "pteropogon humboltianum" helps you talk about this topic clearly.*

pteropsida *(noun)*

Used in former classifications to include all ferns and flowering plants and divided into the three classes Filicinae and Gymnospermae and Angiospermae.

- *The article explained what "pteropsida" means with a simple example.*
- *Understanding "pteropsida" helps you talk about this topic clearly.*

pteropus capestratus *(noun)*

A variety of fruit bat.

- *They discussed "pteropus capestratus" during the group presentation.*
- *She wrote a short paragraph that included "pteropus capestratus."*

pteropus hypomelanus *(noun)*

A variety of fruit bat.

- *They discussed "pteropus hypomelanus" during the group presentation.*
- *The article explained what "pteropus hypomelanus" means with a simple example.*

pterosauria *(noun)*

Extinct flying reptiles: pterosaurs.

- *They discussed "pterosauria" during the group presentation.*
- *She wrote a short paragraph that included "pterosauria."*

pterospermum *(noun)*

Genus of tropical Asian trees and shrubs.

- *They discussed "pterospermum" during the group presentation.*
- *He looked up "pterospermum" because he had never seen it before.*

pterostylis *(noun)*

Genus of terrestrial orchids of Australia and New Zealand and western Pacific.

- *He looked up "pterostylis" because he had never seen it before.*
- *Understanding "pterostylis" helps you talk about this topic clearly.*

pteroylglutamic acid *(noun)*

A B vitamin that is essential for cell growth and reproduction.

- *In class, the teacher used "pteroylglutamic acid" to mean a b vitamin that is essential for cell growth and....*
- *Understanding "pteroylglutamic acid" helps you talk about this topic clearly.*

pteroylmonoglutamic acid *(noun)*

A B vitamin that is essential for cell growth and reproduction.

- *The article explained what "pteroylmonoglutamic acid" means with a simple example.*
- *In class, the teacher used "pteroylmonoglutamic acid" to mean a b vitamin that is essential for cell growth and....*

ptilonorhynchus *(noun)*

Type genus of the Ptilonorhynchidae.

- *She wrote a short paragraph that included "ptilonorhynchus."*
- *The article explained what "ptilonorhynchus" means with a simple example.*

ptilonorhynchus violaceus *(noun)*

Of southeast Australia; male is glossy violet blue; female is light grey-green.

- *Understanding "ptilonorhynchus violaceus" helps you talk about this topic clearly.*
- *In class, the teacher used "ptilonorhynchus violaceus" to mean of southeast australia; male is glossy violet blue;....*

---

ptloris *(noun)*

A genus of Paradisaeidae.

- *She wrote a short paragraph that included "ptloris."*
- *Understanding "ptloris" helps you talk about this topic clearly.*

---

ptloris paradisea *(noun)*

Velvety black Australian bird of paradise with green and purple iridescence on head and tail.

- *They discussed "ptloris paradisea" during the group presentation.*
- *He looked up "ptloris paradisea" because he had never seen it before.*

---

- *A pyknic practical joke.*
- *It is useful to describe something as "pyknic" when it is having a squat and fleshy build.*

pyknic type *(noun)*

Round, fat, and heavy.

- *Understanding "pyknic type" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pyknic type."*

pyknotic *(adjective)*

Of or relating to or exhibiting pyknosis.

- *A "pyknotic" approach may work better in this case.*
- *Students compared "pyknotic" with similar adjectives in the lesson.*

pylodictus *(noun)*

Flathead catfishes.

- *In class, the teacher used "pylodictus" to mean flathead catfishes.*
- *The article explained what "pylodictus" means with a simple example.*

pylodictus olivaris *(noun)*

Large catfish of central United States having a flattened head and projecting jaw.

- *They discussed "pylodictus olivaris" during the group presentation.*
- *She wrote a short paragraph that included "pylodictus olivaris."*

pyocyanase *(noun)*

A yellow-green mixture of antibiotics obtained from the bacillus of green pus.

- *He looked up "pyocyanase" because he had never seen it before.*
- *Understanding "pyocyanase" helps you talk about this topic clearly.*

pyocyanin *(noun)*

A toxic blue crystalline antibiotic found in green pus.

- *Understanding "pyocyanin" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pyocyanin."*

---

pyracanth *(noun)*

Any of various thorny shrubs of the genus Pyracantha bearing small white flowers followed by hard red or orange-red berries.

- *He looked up "pyracanth" because he had never seen it before.*
- *She wrote a short paragraph that included "pyracanth."*

---

pyralid *(noun)*

Usually tropical slender-bodied long-legged moth whose larvae are crop pests.

- *She wrote a short paragraph that included "pyralid."*
- *The article explained what "pyralid" means with a simple example.*

---

pyralid moth *(noun)*

Usually tropical slender-bodied long-legged moth whose larvae are crop pests.

- *They discussed "pyralid moth" during the group presentation.*
- *She wrote a short paragraph that included "pyralid moth."*

---

pyralididae *(noun)*

Bee moths; corn borers; flour moths.

- *Understanding "pyralididae" helps you talk about this topic clearly.*
- *In class, the teacher used "pyralididae" to mean bee moths; corn borers; flour moths.*

---

pyralis *(noun)*

Type genus of the Pyralidae.

- *He looked up "pyralis" because he had never seen it before.*
- *In class, the teacher used "pyralis" to mean type genus of the pyralidae.*

---

pyramidic *(adjective)*

Resembling a pyramid.

- *Would you call this situation "pyramidic"? Explain why.*
- *A "pyramidic" approach may work better in this case.*

---

pyramidical *(adjective)*

Resembling a pyramid.

- *The speaker chose "pyramidical" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "pyramidical."*

---

pyramidically *(adverb)*

In a pyramidal manner or shape.

- *The bush was trimmed pyramidically.*
- *Place "pyramidically" carefully so the meaning stays clear.*

---

pyrausta *(noun)*

Moths whose larvae are corn borers.

- *She wrote a short paragraph that included "pyrausta."*
- *They discussed "pyrausta" during the group presentation.*

---

pyrausta nubilalis *(noun)*

Larva of the European corn borer moth; a serious pest of maize.

- *In class, the teacher used "pyrausta nubilalis" to mean larva of the european corn borer moth; a serious....*
- *The article explained what "pyrausta nubilalis" means with a simple example.*

---

pyrectic *(noun)*

Any substance that can cause a rise in body temperature.

- *The article explained what "pyrectic" means with a simple example.*

- *She wrote a short paragraph that included "pyrectic."*

pyrenomycetes *(noun)*

Class of fungi in which the fruiting body is a perithecium; includes powdery mildews and ergot and Neurospora.

- *The article explained what "pyrenomycetes" means with a simple example.*
- *In class, the teacher used "pyrenomycetes" to mean class of fungi in which the fruiting body is a....*

pyridoxamine *(noun)*

A B vitamin that is essential for metabolism of amino acids and starch.

- *The article explained what "pyridoxamine" means with a simple example.*
- *They discussed "pyridoxamine" during the group presentation.*

pyrilamine *(noun)*

Antihistamine used to treat rhinitis and pruritus.

- *Understanding "pyrilamine" helps you talk about this topic clearly.*
- *They discussed "pyrilamine" during the group presentation.*

pyrocellulose *(noun)*

Nitrocellulose containing less nitrogen than guncotton; used in making smokeless powder.

- *He looked up "pyrocellulose" because he had never seen it before.*
- *They discussed "pyrocellulose" during the group presentation.*

pyrocephalus *(noun)*

A genus of Tyrannidae.

- *The article explained what "pyrocephalus" means with a simple example.*
- *In class, the teacher used "pyrocephalus" to mean a genus of tyrannidae.*

pyrocephalus rubinus mexicanus *(noun)*

Tropical American flycatcher found as far north as southern Texas and Arizona; adult male has bright scarlet and black plumage.

- *He looked up "pyrocephalus rubinus mexicanus" because he had never seen it before.*
- *Understanding "pyrocephalus rubinus mexicanus" helps you talk about this topic clearly.*

pyrochemical *(adjective)*

Of or relating to or produced by chemical reactions at high temperatures.

- *Would you call this situation "pyrochemical"? Explain why.*
- *It is useful to describe something as "pyrochemical" when it is of or relating to or produced by chemical reactions....*

pyrochemical process *(noun)*

Processes for chemical reactions at high temperatures.

- *The article explained what "pyrochemical process" means with a simple example.*
- *In class, the teacher used "pyrochemical process" to mean processes for chemical reactions at high temperatures.*

pyrochemistry *(noun)*

Processes for chemical reactions at high temperatures.

- *Understanding "pyrochemistry" helps you talk about this topic clearly.*
- *They discussed "pyrochemistry" during the group presentation.*

pyroelectrical *(adjective)*

Relating to or exhibiting pyroelectricity.

- *It is useful to describe something as "pyroelectrical" when it is relating to or exhibiting pyroelectricity.*
- *The speaker chose "pyroelectrical" because it captured the feeling precisely.*

pyroelectricity *(noun)*

Generation of an electric charge on certain crystals (such as tourmaline) as a result of a change in temperature.

- *They discussed "pyroelectricity" during the group presentation.*
- *In class, the teacher used "pyroelectricity" to mean generation of an electric charge on certain....*

pyrogallic *(adjective)*

Of or relating to pyrogallol.

- *Students compared "pyrogallic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "pyrogallic."*

---

pyrogallic acid *(noun)*

A toxic white lustrous crystalline phenol used to treat certain skin diseases and as a photographic developer.

- *They discussed "pyrogallic acid" during the group presentation.*
- *He looked up "pyrogallic acid" because he had never seen it before.*

---

pyrogenetic *(adjective)*

Produced by or producing fever.

- *A "pyrogenetic" approach may work better in this case.*
- *It is useful to describe something as "pyrogenetic" when it is produced by or producing fever.*

---

pyrogenous *(adjective)*

Produced under conditions involving intense heat.

- *A "pyrogenous" approach may work better in this case.*
- *The speaker chose "pyrogenous" because it captured the feeling precisely.*

---

pyrograph *(noun)*

A design produced by pyrography.

- *He looked up "pyrograph" because he had never seen it before.*
- *She wrote a short paragraph that included "pyrograph."*

---

pyrographer *(noun)*

An artist who practices pyrography.

- *The article explained what "pyrographer" means with a simple example.*
- *Understanding "pyrographer" helps you talk about this topic clearly.*

---

pyrographic *(adjective)*

Of or relating to or produced by pyrography.

- *Students compared "pyrographic" with similar adjectives in the lesson.*
- *It is useful to describe something as "pyrographic" when it is of or relating to or produced by pyrography.*

---

pyrolaceae *(noun)*

Evergreen herbs of temperate regions: genera Pyrola, Chimaphila, Moneses, Orthilia.

- *They discussed "pyrolaceae" during the group presentation.*
- *He looked up "pyrolaceae" because he had never seen it before.*

---

pyrolatry *(noun)*

The worship of fire.

- *In class, the teacher used "pyrolatry" to mean the worship of fire.*
- *The article explained what "pyrolatry" means with a simple example.*

---

pyroligneous *(adjective)*

Of a substance produced by the effect of heat on wood, especially by destructive distillation.

- *Would you call this situation "pyroligneous"? Explain why.*
- *The speaker chose "pyroligneous" because it captured the feeling precisely.*

---

pyroligneous acid *(noun)*

A red-brown liquid formed in distillation of wood which contains acetic acid, methanol, acetone, wood oils, and tars.

- *The article explained what "pyroligneous acid" means with a simple example.*
- *In class, the teacher used "pyroligneous acid" to mean a red-brown liquid formed in distillation of wood....*

---

pyrolignic *(adjective)*

Of a substance produced by the effect of heat on wood, especially by destructive distillation.

- *Would you call this situation "pyrolignic"? Explain why.*
- *The speaker chose "pyrolignic" because it captured the feeling precisely.*

---

pyrolusite *(noun)*

A mineral consisting of manganese dioxide; an important source of manganese.

- *He looked up "pyrolusite" because he had never seen it before.*
- *She wrote a short paragraph that included "pyrolusite."*

---

pyrometric cone *(noun)*

A pyrometer consisting of a series of cones that melt at different temperatures.

- *She wrote a short paragraph that included "pyrometric cone."*
- *He looked up "pyrometric cone" because he had never seen it before.*

---

pyromorphite *(noun)*

A mineral consisting of lead chloride and phosphate; a minor source of lead.

- *He looked up "pyromorphite" because he had never seen it before.*
- *She wrote a short paragraph that included "pyromorphite."*

---

pyrophorus *(noun)*

Tropical click beetles.

- *The article explained what "pyrophorus" means with a simple example.*
- *In class, the teacher used "pyrophorus" to mean tropical click beetles.*

---

pyrophorus noctiluca *(noun)*

Tropical American click beetle having bright luminous spots.

- *She wrote a short paragraph that included "pyrophorus noctiluca."*
- *He looked up "pyrophorus noctiluca" because he had never seen it before.*

---

pyrophosphoric acid *(noun)*

A solid acid formed by reactions of orthophosphoric acid.

- *He looked up "pyrophosphoric acid" because he had never seen it before.*
- *She wrote a short paragraph that included "pyrophosphoric acid."*

---

pyroscope *(noun)*

A pyrometer that uses the color of the light emitted by a hot object.

- *In class, the teacher used "pyroscope" to mean a pyrometer that uses the color of the light....*
- *The article explained what "pyroscope" means with a simple example.*

---

pyrostat *(noun)*

A thermostat that operates at very high temperatures.

- *Understanding "pyrostat" helps you talk about this topic clearly.*
- *They discussed "pyrostat" during the group presentation.*

---

pyrotechny *(noun)*

The craft of making fireworks.

- *They discussed "pyrotechny" during the group presentation.*
- *She wrote a short paragraph that included "pyrotechny."*

---

pyroxylin *(noun)*

Highly flammable nitrocellulose used in making collodion and plastics and lacquers.

- *Understanding "pyroxylin" helps you talk about this topic clearly.*
- *They discussed "pyroxylin" during the group presentation.*

---

pyroxyline *(noun)*

Highly flammable nitrocellulose used in making collodion and plastics and lacquers.

- *She wrote a short paragraph that included "pyroxyline."*
- *He looked up "pyroxyline" because he had never seen it before.*

pyrrhotine *(noun)*

A brownish iron sulfide mineral (FeS) having weak magnetic properties.

- *He looked up "pyrrhotine" because he had never seen it before.*
- *She wrote a short paragraph that included "pyrrhotine."*

pyrrhula *(noun)*

Bullfinches.

- *They discussed "pyrrhula" during the group presentation.*
- *Understanding "pyrrhula" helps you talk about this topic clearly.*

pyrrhula pyrrhula *(noun)*

Common European finch mostly black and white with red throat and breast.

- *In class, the teacher used "pyrrhula pyrrhula" to mean common european finch mostly black and white with....*
- *The article explained what "pyrrhula pyrrhula" means with a simple example.*

pyrrhuloxia *(noun)*

Crested grey-and-red bird of southwest United States and Mexico.

- *They discussed "pyrrhuloxia" during the group presentation.*
- *In class, the teacher used "pyrrhuloxia" to mean crested grey-and-red bird of southwest united....*

pyrrhuloxia sinuata *(noun)*

Crested grey-and-red bird of southwest United States and Mexico.

- *Understanding "pyrrhuloxia sinuata" helps you talk about this topic clearly.*
- *They discussed "pyrrhuloxia sinuata" during the group presentation.*

pyrrophyta *(noun)*

A division of lower plants comprising unicellular and biflagellate algae that form starchy compounds.

- *In class, the teacher used "pyrrophyta" to mean a division of lower plants comprising unicellular....*
- *He looked up "pyrrophyta" because he had never seen it before.*

pyrrosia *(noun)*

Epiphytic or lithophytic or terrestrial ferns of tropical Old World.

- *She wrote a short paragraph that included "pyrrosia."*
- *They discussed "pyrrosia" during the group presentation.*

pyrrosia lingua *(noun)*

East Asian fern having fronds shaped like tongues; sometimes placed in genus Cyclophorus.

- *She wrote a short paragraph that included "pyrrosia lingua."*
- *Understanding "pyrrosia lingua" helps you talk about this topic clearly.*

pyrularia *(noun)*

Small genus of chiefly Asiatic parasitic shrubs.

- *She wrote a short paragraph that included "pyrularia."*
- *He looked up "pyrularia" because he had never seen it before.*

pyrularia pubera *(noun)*

Shrub of southeastern United States parasitic on roots of hemlocks having sparse spikes of greenish flowers and pulpy drupes.

- *In class, the teacher used "pyrularia pubera" to mean shrub of southeastern united states parasitic on....*
- *The article explained what "pyrularia pubera" means with a simple example.*

pythiaceae *(noun)*

Fungi having sporangia usually borne successively and singly at the tips of branching sporangiophores.

- *The article explained what "pythiaceae" means with a simple example.*
- *Understanding "pythiaceae" helps you talk about this topic clearly.*

pythium debaryanum *(noun)*

Fungus causing damping off disease in seedlings.

- *Understanding "pythium debaryanum" helps you talk about this topic clearly.*
- *In class, the teacher used "pythium debaryanum" to mean fungus causing damping off disease in seedlings.*

---

pythius *(noun)*

Epithet for Apollo; from the dragon Python which he killed.

- *He looked up "pythius" because he had never seen it before.*
- *She wrote a short paragraph that included "pythius."*

---

python molurus *(noun)*

Very large python of southeast Asia.

- *The article explained what "python molurus" means with a simple example.*
- *She wrote a short paragraph that included "python molurus."*

---

python sebae *(noun)*

Very large python of tropical and southern Africa.

- *In class, the teacher used "python sebae" to mean very large python of tropical and southern africa.*
- *They discussed "python sebae" during the group presentation.*

---

pythoness *(noun)*

A witch with powers of divination.

- *The article explained what "pythoness" means with a simple example.*
- *They discussed "pythoness" during the group presentation.*

---

pythonidae *(noun)*

In some classifications a family separate from Boidae comprising Old World boas.

- *The article explained what "pythonidae" means with a simple example.*
- *She wrote a short paragraph that included "pythonidae."*

---

pythoninae *(noun)*

Old World boas: pythons; in some classifications considered a separate family from Boidae.

- *She wrote a short paragraph that included "pythoninae."*
- *The article explained what "pythoninae" means with a simple example.*

---

pyxidanthera *(noun)*

One species: pyxie; the eastern United States.

- *She wrote a short paragraph that included "pyxidanthera."*
- *The article explained what "pyxidanthera" means with a simple example.*

---

pyxidanthera barbulata *(noun)*

Creeping evergreen shrub having narrow overlapping leaves and early white star-shaped flowers; of the pine barrens of New Jersey and the Carolinas.

- *The article explained what "pyxidanthera barbulata" means with a simple example.*
- *In class, the teacher used "pyxidanthera barbulata" to mean creeping evergreen shrub having narrow overlapping....*

---

pyxidium *(noun)*

Fruit of such plants as the plantain; a capsule whose upper part falls off when the seeds are released.

- *She wrote a short paragraph that included "pyxidium."*
- *They discussed "pyxidium" during the group presentation.*

---

pyxie *(noun)*

Creeping evergreen shrub having narrow overlapping leaves and early white star-shaped flowers; of the pine barrens of New Jersey and the Carolinas.

- *She wrote a short paragraph that included "pyxie."*
- *They discussed "pyxie" during the group presentation.*

---

qepiq *(noun)*

100 qepiq equal 1 manat in Azerbaijan.

- *He looked up "qepiq" because he had never seen it before.*

- *Understanding "qepiq" helps you talk about this topic clearly.*

qindarka *(noun)*

100 qindarka equal 1 lek in Albania.

- *The article explained what "qindarka" means with a simple example.*
- *Understanding "qindarka" helps you talk about this topic clearly.*

qintar *(noun)*

100 qindarka equal 1 lek in Albania.

- *She wrote a short paragraph that included "qintar."*
- *He looked up "qintar" because he had never seen it before.*

qizil qum *(noun)*

A desert in Uzbekistan to the southeast of the Aral Sea.

- *In class, the teacher used "qizil qum" to mean a desert in uzbekistan to the southeast of the aral sea.*
- *The article explained what "qizil qum" means with a simple example.*

quackgrass *(noun)*

European grass spreading rapidly by creeping rhizomes; naturalized in North America as a weed.

- *The article explained what "quackgrass" means with a simple example.*
- *She wrote a short paragraph that included "quackgrass."*

quadragesima *(noun)*

The first Sunday in Lent.

- *Understanding "quadragesima" helps you talk about this topic clearly.*
- *The article explained what "quadragesima" means with a simple example.*

quadraphony *(noun)*

A stereophonic sound recording or reproducing system using four separate channels.

- *Understanding "quadraphony" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "quadraphony."*

quadrasonic *(adjective)*

Of or relating to quadraphony.

- *Would you call this situation "quadrasonic"? Explain why.*
- *The speaker chose "quadrasonic" because it captured the feeling precisely.*

quadrennium *(noun)*

A period of four years.

- *They discussed "quadrennium" during the group presentation.*
- *In class, the teacher used "quadrennium" to mean a period of four years.*

quadrigesima sunday *(noun)*

The first Sunday in Lent.

- *In class, the teacher used "quadrigesima sunday" to mean the first sunday in lent.*
- *They discussed "quadrigesima sunday" during the group presentation.*

quadrillionth *(adjective)*

The ordinal number of one quadrillion in counting order.

- *Students compared "quadrillionth" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "quadrillionth."*

quadripara *(noun)*

(obstetrics) woman who has given birth to a viable infant in each of four pregnancies.

- *He looked up "quadripara" because he had never seen it before.*
- *They discussed "quadripara" during the group presentation.*

quadriphonic *(adjective)*

Of or relating to quadraphony.

- *The speaker chose "quadriphonic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "quadriphonic."*

quadriphonic system *(noun)*

A stereophonic sound recording or reproducing system using four separate channels.

- *He looked up "quadriphonic system" because he had never seen it before.*
- *They discussed "quadriphonic system" during the group presentation.*

quadrisonic *(adjective)*

Of or relating to quadraphony.

- *Students compared "quadrisonic" with similar adjectives in the lesson.*
- *A "quadrisonic" approach may work better in this case.*

quaffer *(noun)*

A person who drinks heartily.

- *Understanding "quaffer" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "quaffer."*

quaggy *(adjective)*

(of soil) soft and watery.

- *Quaggy terrain.*
- *It is useful to describe something as "quaggy" when it is (of soil) soft and watery.*

quahaug *(noun)*

An edible American clam; the heavy shells were used as money by some American Indians.

- *He looked up "quahaug" because he had never seen it before.*
- *She wrote a short paragraph that included "quahaug."*

quamash *(noun)*

Any of several plants of the genus Camassia; North and South America.

- *Understanding "quamash" helps you talk about this topic clearly.*
- *They discussed "quamash" during the group presentation.*

quamassia *(noun)*

Genus of scapose herbs of North and South America having large edible bulbs.

- *They discussed "quamassia" during the group presentation.*
- *The article explained what "quamassia" means with a simple example.*

quamoclit pennata *(noun)*

Tropical American annual climber having red (sometimes white) flowers and finely dissected leaves; naturalized in United States and elsewhere.

- *He looked up "quamoclit pennata" because he had never seen it before.*
- *She wrote a short paragraph that included "quamoclit pennata."*

quandang *(noun)*

Red Australian fruit; used for dessert or in jam.

- *She wrote a short paragraph that included "quandang."*
- *The article explained what "quandang" means with a simple example.*

quandong *(noun)*

The fruit of the Brisbane quandong tree.

- *The article explained what "quandong" means with a simple example.*
- *In class, the teacher used "quandong" to mean the fruit of the brisbane quandong tree.*

quandong nut *(noun)*

Edible nutlike seed of the quandong fruit.

- *In class, the teacher used "quandong nut" to mean edible nutlike seed of the quandong fruit.*
- *The article explained what "quandong nut" means with a simple example.*

---

quandong tree *(noun)*

Australian tree with edible flesh and edible nutlike seed.

- *They discussed "quandong tree" during the group presentation.*
- *The article explained what "quandong tree" means with a simple example.*

---

quantifiability *(noun)*

The quality of being measurable.

- *She wrote a short paragraph that included "quantifiability."*
- *He looked up "quantifiability" because he had never seen it before.*

---

quantong *(noun)*

Red Australian fruit; used for dessert or in jam.

- *She wrote a short paragraph that included "quantong."*
- *The article explained what "quantong" means with a simple example.*

---

quaoar *(noun)*

A planetoid discovered in 2002.

- *She wrote a short paragraph that included "quaoar."*
- *They discussed "quaoar" during the group presentation.*

---

quarreler *(noun)*

A disputant who quarrels.

- *She wrote a short paragraph that included "quarreler."*
- *They discussed "quarreler" during the group presentation.*

---

quarreller *(noun)*

A disputant who quarrels.

- *She wrote a short paragraph that included "quarreller."*
- *The article explained what "quarreller" means with a simple example.*

---

quarrelsomeness *(noun)*

An inclination to be quarrelsome and contentious.

- *The article explained what "quarrelsomeness" means with a simple example.*
- *In class, the teacher used "quarrelsomeness" to mean an inclination to be quarrelsome and contentious.*

---

quartern *(noun)*

One of four equal parts.

- *In class, the teacher used "quartern" to mean one of four equal parts.*
- *He looked up "quartern" because he had never seen it before.*

---

quartervine *(noun)*

Woody flowering vine of southern United States; stems show a cross in transverse section.

- *In class, the teacher used "quartervine" to mean woody flowering vine of southern united states;....*
- *The article explained what "quartervine" means with a simple example.*

---

quartzose *(adjective)*

Relating to or made of quartz.

- *Students compared "quartzose" with similar adjectives in the lesson.*
- *A "quartzose" approach may work better in this case.*

---

quatercentenary *(noun)*

The 400th anniversary (or the celebration of it).

- *She wrote a short paragraph that included "quatercentenary."*
- *The article explained what "quatercentenary" means with a simple example.*

quatercentennial *(noun)*

The 400th anniversary (or the celebration of it).

- *They discussed "quatercentennial" during the group presentation.*
- *The article explained what "quatercentennial" means with a simple example.*

quatern *(noun)*

The cardinal number that is the sum of three and one.

- *In class, the teacher used "quatern" to mean the cardinal number that is the sum of three and one.*
- *They discussed "quatern" during the group presentation.*

quaternate *(adjective)*

Consisting of or especially arranged in sets of four.

- *Quaternate leaves.*
- *Would you call this situation "quaternate"? Explain why.*

quaternity *(noun)*

The cardinal number that is the sum of three and one.

- *In class, the teacher used "quaternity" to mean the cardinal number that is the sum of three and one.*
- *Understanding "quaternity" helps you talk about this topic clearly.*

quaveringly *(adverb)*

In an unsteady quavering manner.

- *The man began quaveringly to question the soldier.*
- *Try rewriting the sentence and include "quaveringly" naturally.*

quayage *(noun)*

A fee charged for the use of a wharf or quay.

- *They discussed "quayage" during the group presentation.*
- *She wrote a short paragraph that included "quayage."*

queasily *(adverb)*

In a queasy manner.

- *'Do I have to remove the liver,' the medical student asked queasily.*
- *Try rewriting the sentence and include "queasily" naturally.*

queenfish *(noun)*

Silvery and bluish drumfish of shallow California coastal waters.

- *Understanding "queenfish" helps you talk about this topic clearly.*
- *The article explained what "queenfish" means with a simple example.*

queenlike *(adjective)*

Having the rank of or resembling or befitting a queen.

- *The speaker chose "queenlike" because it captured the feeling precisely.*
- *Would you call this situation "queenlike"? Explain why.*

queensland bottletree *(noun)*

Large tree of Queensland having cream-colored flowers blotched with red inside; sometimes placed in genus Sterculia.

- *Understanding "queensland bottletree" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "queensland bottletree."*

quellung *(noun)*

The swelling of the capsule surrounding a microorganism after reaction with an antibody; the basis of certain tests for identifying microorganisms.

- *Pneumococcus quellung.*
- *She wrote a short paragraph that included "quellung."*

quellung reaction *(noun)*

The swelling of the capsule surrounding a microorganism after reaction with an antibody; the basis of certain tests for identifying microorganisms.

- *Pneumococcus quellung.*
- *He looked up "quellung reaction" because he had never seen it before.*

---

quenchless *(adjective)*

Impossible to quench.

- *The speaker chose "quenchless" because it captured the feeling precisely.*
- *Would you call this situation "quenchless"? Explain why.*

---

quercitron *(noun)*

A yellow dye made from the bark of the quercitron oak tree.

- *Understanding "quercitron" helps you talk about this topic clearly.*
- *In class, the teacher used "quercitron" to mean a yellow dye made from the bark of the quercitron....*

---

quercitron oak *(noun)*

Medium to large deciduous timber tree of the eastern United States and southeastern Canada having dark outer bark and yellow inner bark used for tanning; broad five-lobed leaves are bristle-tipped.

- *She wrote a short paragraph that included "quercitron oak."*
- *The article explained what "quercitron oak" means with a simple example.*

---

quercus agrifolia *(noun)*

Highly variable often shrubby evergreen oak of coastal zone of western North America having small thick usually spiny-toothed dark-green leaves.

- *He looked up "quercus agrifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "quercus agrifolia."*

---

quercus cerris *(noun)*

Large deciduous tree of central and southern Europe and Asia Minor having lanceolate leaves with spiked lobes.

- *He looked up "quercus cerris" because he had never seen it before.*
- *They discussed "quercus cerris" during the group presentation.*

---

quercus chrysolepis *(noun)*

Medium-sized evergreen of southwestern United States and northwestern Mexico with oblong leathery often spiny-edged leaves.

- *The article explained what "quercus chrysolepis" means with a simple example.*
- *Understanding "quercus chrysolepis" helps you talk about this topic clearly.*

---

quercus ellipsoidalis *(noun)*

Small to medium deciduous oak of east central North America; leaves have sharply pointed lobes.

- *Understanding "quercus ellipsoidalis" helps you talk about this topic clearly.*
- *The article explained what "quercus ellipsoidalis" means with a simple example.*

---

quercus garryana *(noun)*

Small deciduous tree of western North America with crooked branches and pale grey bark.

- *They discussed "quercus garryana" during the group presentation.*
- *He looked up "quercus garryana" because he had never seen it before.*

---

quercus grosseserrata *(noun)*

Oak with moderately light fine-grained wood; Japan.

- *She wrote a short paragraph that included "quercus grosseserrata."*
- *Understanding "quercus grosseserrata" helps you talk about this topic clearly.*

---

quercus ilicifolia *(noun)*

Shrubby oak of southeastern United States usually forming dense thickets.

- *They discussed "quercus ilicifolia" during the group presentation.*
- *In class, the teacher used "quercus ilicifolia" to mean shrubby oak of southeastern united states usually....*

---

quercus imbricaria *(noun)*

Small deciduous tree of eastern and central United States having leaves that shine like laurel; wood is used in western states for shingles.

- *The article explained what "quercus imbricaria" means with a simple example.*

- *In class, the teacher used "quercus imbricaria" to mean small deciduous tree of eastern and central united....*

---

quercus kelloggii *(noun)*

Large deciduous tree of the Pacific coast having deeply parted bristle-tipped leaves.

- *She wrote a short paragraph that included "quercus kelloggii."*
- *They discussed "quercus kelloggii" during the group presentation.*

---

quercus laurifolia *(noun)*

Large nearly semi-evergreen oak of southeastern United States; thrives in damp soil.

- *In class, the teacher used "quercus laurifolia" to mean large nearly semi-evergreen oak of southeastern....*
- *He looked up "quercus laurifolia" because he had never seen it before.*

---

quercus lyrata *(noun)*

Medium-large deciduous timber tree of central and southern United States; acorns deeply immersed in the cup and mature in first year.

- *The article explained what "quercus lyrata" means with a simple example.*
- *In class, the teacher used "quercus lyrata" to mean medium-large deciduous timber tree of central and....*

---

quercus marilandica *(noun)*

A common scrubby deciduous tree of central and southeastern United States having dark bark and broad three-lobed (club-shaped) leaves; tends to form dense thickets.

- *They discussed "quercus marilandica" during the group presentation.*
- *She wrote a short paragraph that included "quercus marilandica."*

---

quercus michauxii *(noun)*

Medium to large deciduous tree of moist areas of southeastern United States similar to the basket oak.

- *They discussed "quercus michauxii" during the group presentation.*
- *She wrote a short paragraph that included "quercus michauxii."*

---

quercus mongolica *(noun)*

Oak with moderately light fine-grained wood; Japan.

- *The article explained what "quercus mongolica" means with a simple example.*
- *In class, the teacher used "quercus mongolica" to mean oak with moderately light fine-grained wood; japan.*

---

quercus muehlenbergii *(noun)*

Medium-sized deciduous tree of the eastern United States that yields a strong durable wood.

- *In class, the teacher used "quercus muehlenbergii" to mean medium-sized deciduous tree of the eastern united....*
- *The article explained what "quercus muehlenbergii" means with a simple example.*

---

quercus myrtifolia *(noun)*

Small evergreen shrub or tree of southeastern United States; often forms almost impenetrable thickets in sandy coastal areas.

- *In class, the teacher used "quercus myrtifolia" to mean small evergreen shrub or tree of southeastern....*
- *The article explained what "quercus myrtifolia" means with a simple example.*

---

quercus nuttalli *(noun)*

Similar to the pin oak; grows in damp sites in Mississippi River basin.

- *They discussed "quercus nuttalli" during the group presentation.*
- *The article explained what "quercus nuttalli" means with a simple example.*

---

quercus phellos *(noun)*

Medium to large deciduous oak of the eastern United States having long lanceolate leaves and soft strong wood.

- *She wrote a short paragraph that included "quercus phellos."*
- *The article explained what "quercus phellos" means with a simple example.*

---

quercus prinoides *(noun)*

Deciduous shrubby tree of northeastern and central United States having a sweet edible nut and often forming dense thickets.

- *They discussed "quercus prinoides" during the group presentation.*
- *He looked up "quercus prinoides" because he had never seen it before.*

---

quercus prinus *(noun)*

Medium to large deciduous tree of the eastern United States; its durable wood is used as timber or split and woven into baskets or chair seats.

- *They discussed "quercus prinus" during the group presentation.*
- *He looked up "quercus prinus" because he had never seen it before.*

---

quercus sessiliflora *(noun)*

Deciduous European oak valued for its tough elastic wood.

- *He looked up "quercus sessiliflora" because he had never seen it before.*
- *Understanding "quercus sessiliflora" helps you talk about this topic clearly.*

---

quercus shumardii *(noun)*

Large deciduous red oak of southern and eastern United States having large seven-lobed to nine-lobed elliptical leaves, large acorns and medium hard coarse-grained wood.

- *He looked up "quercus shumardii" because he had never seen it before.*
- *Understanding "quercus shumardii" helps you talk about this topic clearly.*

---

quercus vaccinifolia *(noun)*

A low spreading or prostrate shrub of southwestern United States with small acorns and leaves resembling those of the huckleberry.

- *In class, the teacher used "quercus vaccinifolia" to mean a low spreading or prostrate shrub of southwestern....*
- *The article explained what "quercus vaccinifolia" means with a simple example.*

---

quercus wislizenii *(noun)*

A small shrubby evergreen tree of western North America similar to the coast live oak but occurring chiefly in foothills of mountain ranges removed from the coast; an important part of the chaparral.

- *She wrote a short paragraph that included "quercus wislizenii."*
- *He looked up "quercus wislizenii" because he had never seen it before.*

---

quercus wizlizenii *(noun)*

A small shrubby evergreen tree of western North America similar to the coast live oak but occurring chiefly in foothills of mountain ranges removed from the coast; an important part of the chaparral.

- *Understanding "quercus wizlizenii" helps you talk about this topic clearly.*
- *In class, the teacher used "quercus wizlizenii" to mean a small shrubby evergreen tree of western north....*

---

querier *(noun)*

Someone who asks a question.

- *The article explained what "querier" means with a simple example.*
- *They discussed "querier" during the group presentation.*

---

querulously *(adverb)*

In a peevish manner.

- *He answered "querulously," which changed the tone of the conversation.*

- *She wrote a short paragraph that included "quidnunc."*
- *Understanding "quidnunc" helps you talk about this topic clearly.*

---

quiesce *(verb)*

Become quiet or quieter.

- *Can you use "quiesce" in a sentence that fits this situation?*
- *She tried to use "quiesce" carefully so everyone would understand.*

---

quillwort *(noun)*

Any of several spore-bearing aquatic or marsh plants having short rhizomes and leaves resembling quills; worldwide except Polynesia.

- *The article explained what "quillwort" means with a simple example.*
- *In class, the teacher used "quillwort" to mean any of several spore-bearing aquatic or marsh....*

---

quillwort family *(noun)*

Quillworts; coextensive with the genus Isoetes.

- *They discussed "quillwort family" during the group presentation.*
- *The article explained what "quillwort family" means with a simple example.*

---

quinidex *(noun)*

Cardiac drug (trade names Quinidex and Quinora) used to treat certain heart arrhythmias.

- *She wrote a short paragraph that included "quinidex."*
- *Understanding "quinidex" helps you talk about this topic clearly.*

---

quinnat salmon *(noun)*

Large Pacific salmon valued as food; adults die after spawning.

- *He looked up "quinnat salmon" because he had never seen it before.*
- *She wrote a short paragraph that included "quinnat salmon."*

---

quinora *(noun)*

Cardiac drug (trade names Quinidex and Quinora) used to treat certain heart arrhythmias.

- *They discussed "quinora" during the group presentation.*
- *Understanding "quinora" helps you talk about this topic clearly.*

---

quinquagesima *(noun)*

The Sunday before Ash Wednesday (the beginning of Lent).

- *He looked up "quinquagesima" because he had never seen it before.*
- *In class, the teacher used "quinquagesima" to mean the sunday before ash wednesday (the beginning of lent).*

---

quinquagesima sunday *(noun)*

The Sunday before Ash Wednesday (the beginning of Lent).

- *In class, the teacher used "quinquagesima sunday" to mean the sunday before ash wednesday (the beginning of lent).*
- *The article explained what "quinquagesima sunday" means with a simple example.*

---

quinquefoliate *(adjective)*

(of a leaf shape) having five leaflets.

- *Students compared "quinquefoliate" with similar adjectives in the lesson.*
- *A "quinquefoliate" approach may work better in this case.*

---

quinquefoliate leaf *(noun)*

A compound leaf having five leaflets.

- *In class, the teacher used "quinquefoliate leaf" to mean a compound leaf having five leaflets.*
- *The article explained what "quinquefoliate leaf" means with a simple example.*

---

quinquennium *(noun)*

A period of five years.

- *She wrote a short paragraph that included "quinquennium."*

- *The article explained what "quinquennium" means with a simple example.*

quintillionth *(adjective)*

The ordinal number of one quintillion in counting order.

- *It is useful to describe something as "quintillionth" when it is the ordinal number of one quintillion in counting order.*
- *A "quintillionth" approach may work better in this case.*

quintipara *(noun)*

(obstetrics) woman who has given birth to a viable infant in each of five pregnancies.

- *In class, the teacher used "quintipara" to mean (obstetrics) woman who has given birth to a viable....*
- *The article explained what "quintipara" means with a simple example.*

quintus septimius florens tertullianus *(noun)*

Carthaginian theologian whose writing influenced early Christian theology (160-230).

- *The article explained what "quintus septimius florens tertullianus" means with a simple example.*
- *In class, the teacher used "quintus septimius florens tertullianus" to mean carthaginian theologian whose writing influenced....*

quira *(noun)*

Any of several tropical American trees some yielding economically important timber.

- *In class, the teacher used "quira" to mean any of several tropical american trees some....*
- *The article explained what "quira" means with a simple example.*

quiscalus quiscula *(noun)*

Eastern United States grackle.

- *They discussed "quiscalus quiscula" during the group presentation.*
- *She wrote a short paragraph that included "quiscalus quiscula."*

quislingism *(noun)*

Act of cooperating traitorously with an enemy that is occupying your country.

- *They discussed "quislingism" during the group presentation.*
- *The article explained what "quislingism" means with a simple example.*

quotability *(noun)*

The quality of being worthy of being quoted.

- *She wrote a short paragraph that included "quotability."*
- *The article explained what "quotability" means with a simple example.*

qurush *(noun)*

Shrub of southeastern United States grown commercially especially for canning industry.

- *The article explained what "rabbiteye" means with a simple example.*
- *In class, the teacher used "rabbiteye" to mean shrub of southeastern united states grown....*

rabbiteye blueberry *(noun)*

Shrub of southeastern United States grown commercially especially for canning industry.

- *They discussed "rabbiteye blueberry" during the group presentation.*
- *The article explained what "rabbiteye blueberry" means with a simple example.*

rabbitfish *(noun)*

Large European chimaera.

- *He looked up "rabbitfish" because he had never seen it before.*
- *Understanding "rabbitfish" helps you talk about this topic clearly.*

---

rabbitweed *(noun)*

Low-growing sticky subshrub of southwestern United States having narrow linear leaves on many slender branches and hundreds of tiny yellow flower heads.

- *They discussed "rabbitweed" during the group presentation.*
- *She wrote a short paragraph that included "rabbitweed."*

---

rabbitwood *(noun)*

Shrub of southeastern United States parasitic on roots of hemlocks having sparse spikes of greenish flowers and pulpy drupes.

- *She wrote a short paragraph that included "rabbitwood."*
- *They discussed "rabbitwood" during the group presentation.*

---

rabidity *(noun)*

Unrestrained excitement or enthusiasm.

- *He looked up "rabidity" because he had never seen it before.*
- *They discussed "rabidity" during the group presentation.*

---

rabidness *(noun)*

Unrestrained excitement or enthusiasm.

- *She wrote a short paragraph that included "rabidness."*
- *He looked up "rabidness" because he had never seen it before.*

---

raceabout *(noun)*

A small sloop having the keep of a knockabout but with finer lines and carrying more sail.

- *Understanding "raceabout" helps you talk about this topic clearly.*
- *In class, the teacher used "raceabout" to mean a small sloop having the keep of a knockabout but....*

---

racerunner *(noun)*

Very swift lizard of eastern and central United States.

- *The article explained what "racerunner" means with a simple example.*
- *She wrote a short paragraph that included "racerunner."*

---

rachitic *(adjective)*

Affected with, suffering from, or characteristic of rickets.

- *A rachitic patient.*
- *A "rachitic" approach may work better in this case.*

---

rachycentridae *(noun)*

Family of pelagic fishes containing solely the cobia.

- *Understanding "rachycentridae" helps you talk about this topic clearly.*
- *The article explained what "rachycentridae" means with a simple example.*

---

rachycentron *(noun)*

Genus and family are coextensive and comprise only the cobia.

- *In class, the teacher used "rachycentron" to mean genus and family are coextensive and comprise only....*
- *The article explained what "rachycentron" means with a simple example.*

---

rachycentron canadum *(noun)*

Large dark-striped tropical food and game fish related to remoras; found worldwide in coastal to open waters.

- *They discussed "rachycentron canadum" during the group presentation.*
- *Understanding "rachycentron canadum" helps you talk about this topic clearly.*

---

racily *(adverb)*

In a racy manner.

- *Racily vernacular language.*
- *She spoke "racily," and the audience immediately understood her point.*

---

A strong odor or taste property.

- *The raciness of the wine.*
- *He looked up "raciness" because he had never seen it before.*

---

racker *(noun)*

An attendant who puts pool or billiard balls into a rack.

- *Understanding "racker" helps you talk about this topic clearly.*
- *They discussed "racker" during the group presentation.*

---

racketiness *(noun)*

The auditory effect characterized by loud and constant noise.

- *He looked up "racketiness" because he had never seen it before.*
- *She wrote a short paragraph that included "racketiness."*

---

radial keratotomy *(noun)*

Radial pattern of incisions in the cornea that cause the cornea to bulge; performed to correct myopia.

- *He looked up "radial keratotomy" because he had never seen it before.*
- *They discussed "radial keratotomy" during the group presentation.*

---

radiancy *(noun)*

The quality of being bright and sending out rays of light.

- *The article explained what "radiancy" means with a simple example.*
- *Understanding "radiancy" helps you talk about this topic clearly.*

---

radiatio optica *(noun)*

A nerve pathway from the lateral geniculate body to the visual cortex.

- *They discussed "radiatio optica" during the group presentation.*
- *Understanding "radiatio optica" helps you talk about this topic clearly.*

---

radiigera *(noun)*

A genus of fungus belonging to the family Geastraceae.

- *In class, the teacher used "radiigera" to mean a genus of fungus belonging to the family geastraceae.*
- *The article explained what "radiigera" means with a simple example.*

---

radiigera fuscogleba *(noun)*

A fungus similar to an earthstar except that it does not open up; the spore mass is brown at maturity with a column of sterile tissue extending up into it.

- *The article explained what "radiigera fuscogleba" means with a simple example.*
- *In class, the teacher used "radiigera fuscogleba" to mean a fungus similar to an earthstar except that it....*

---

radiobiologist *(noun)*

A biologist who studies the effects of radiation on living organisms.

- *They discussed "radiobiologist" during the group presentation.*
- *She wrote a short paragraph that included "radiobiologist."*

---

radiocarpal joint *(noun)*

A joint between the distal end of the radius and the proximal row of carpal bones.

- *In class, the teacher used "radiocarpal joint" to mean a joint between the distal end of the radius and....*
- *The article explained what "radiocarpal joint" means with a simple example.*

---

radiochemist *(noun)*

A chemist who specializes in nuclear chemistry.

- *He looked up "radiochemist" because he had never seen it before.*
- *They discussed "radiochemist" during the group presentation.*

radiochlorine *(noun)*

A radioactive isotope of chlorine.

- *They discussed "radiochlorine" during the group presentation.*
- *She wrote a short paragraph that included "radiochlorine."*

radiolocate *(verb)*

Locate by means of radar.

- *The pilot managed to radiolocate the lost aircraft.*
- *Can you use "radiolocate" in a sentence that fits this situation?*

radiomicrometer *(noun)*

Radiometer that is extremely sensitive.

- *He looked up "radiomicrometer" because he had never seen it before.*
- *They discussed "radiomicrometer" during the group presentation.*

radiopacity *(noun)*

Opacity to X-rays or other radiation.

- *She wrote a short paragraph that included "radiopacity."*
- *The article explained what "radiopacity" means with a simple example.*

radiophoto *(noun)*

A photograph transmitted by radio waves.

- *She wrote a short paragraph that included "radiophoto."*
- *Understanding "radiophoto" helps you talk about this topic clearly.*

radiophotograph *(noun)*

A photograph transmitted by radio waves.

- *The article explained what "radiophotograph" means with a simple example.*
- *In class, the teacher used "radiophotograph" to mean a photograph transmitted by radio waves.*

radiophotography *(noun)*

Transmission of photographs by radio waves.

- *He looked up "radiophotography" because he had never seen it before.*
- *In class, the teacher used "radiophotography" to mean transmission of photographs by radio waves.*

radioscopy *(noun)*

(radiology) examination of the inner structure of opaque objects using X rays or other penetrating radiation.

- *They discussed "radioscopy" during the group presentation.*
- *The article explained what "radioscopy" means with a simple example.*

radiotelephonic *(adjective)*

Relating to or by means of radiotelephony.

- *Students compared "radiotelephonic" with similar adjectives in the lesson.*
- *Would you call this situation "radiotelephonic"? Explain why.*

radiotherapist *(noun)*

A medical specialist who uses radioactive substances and X-rays in the treatment of disease.

- *She wrote a short paragraph that included "radiotherapist."*
- *The article explained what "radiotherapist" means with a simple example.*

radiothorium *(noun)*

Radioactive isotope of thorium with mass number 228.

- *She wrote a short paragraph that included "radiothorium."*
- *He looked up "radiothorium" because he had never seen it before.*

radyera *(noun)*

Very small genus of shrubs of southern hemisphere: bush hibiscus.

- *In class, the teacher used "radyera" to mean very small genus of shrubs of southern hemisphere:....*
- *The article explained what "radyera" means with a simple example.*

---

radyera farragei *(noun)*

Southern and western Australian shrub with unlobed or shallowly lobed toothed leaves and purple flowers; sometimes placed in genus Hibiscus.

- *She wrote a short paragraph that included "radyera farragei."*
- *They discussed "radyera farragei" during the group presentation.*

---

raetam *(noun)*

Desert shrub of Syria and Arabia having small white flowers; constitutes the juniper of the Old Testament; sometimes placed in genus Genista.

- *He looked up "raetam" because he had never seen it before.*
- *Understanding "raetam" helps you talk about this topic clearly.*

---

raffia farinifera *(noun)*

A large feather palm of Africa and Madagascar having very long pinnatisect fronds yielding a strong commercially important fiber from its leafstalks.

- *He looked up "raffia farinifera" because he had never seen it before.*
- *They discussed "raffia farinifera" during the group presentation.*

---

raffia ruffia *(noun)*

A large feather palm of Africa and Madagascar having very long pinnatisect fronds yielding a strong commercially important fiber from its leafstalks.

- *Understanding "raffia ruffia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "raffia ruffia."*

---

raffia taedigera *(noun)*

A tall Brazilian feather palm with a terminal crown of very large leathery pinnatisect leaves rising from long strong stems used for structural purposes.

- *They discussed "raffia taedigera" during the group presentation.*
- *In class, the teacher used "raffia taedigera" to mean a tall brazilian feather palm with a terminal crown....*

---

raffishly *(adverb)*

In a rakish manner.

- *She spoke "raffishly," and the audience immediately understood her point.*
- *Using "raffishly" can make your explanation more exact.*

---

rafflesiaceae *(noun)*

A family of parasitic plants of the order Aristolochiales.

- *She wrote a short paragraph that included "rafflesiaceae."*
- *They discussed "rafflesiaceae" during the group presentation.*

---

raftered *(adjective)*

Having the rafters especially having them visible.

- *A raftered ceiling.*
- *A "raftered" approach may work better in this case.*

---

raftman *(noun)*

Someone who travels by raft.

- *She wrote a short paragraph that included "raftman."*
- *He looked up "raftman" because he had never seen it before.*

---

raftsman *(noun)*

Someone who travels by raft.

- *Understanding "raftsman" helps you talk about this topic clearly.*
- *In class, the teacher used "raftsman" to mean someone who travels by raft.*

---

ragee *(noun)*

East Indian cereal grass whose seed yield a somewhat bitter flour, a staple in the Orient.

- *In class, the teacher used "ragee" to mean east indian cereal grass whose seed yield a....*

- *The article explained what "ragee" means with a simple example.*

---

raggedness *(noun)*

A texture of a surface or edge that is not smooth but is irregular and uneven.

- *The article explained what "raggedness" means with a simple example.*
- *In class, the teacher used "raggedness" to mean a texture of a surface or edge that is not smooth....*

---

ragnar anton kittil frisch *(noun)*

Norwegian economist noted for his work in econometrics (1895-1973).

- *The article explained what "ragnar anton kittil frisch" means with a simple example.*
- *In class, the teacher used "ragnar anton kittil frisch" to mean norwegian economist noted for his work in....*

---

ragsorter *(noun)*

A worker who sorts rags and old clothing for new uses (as in papermaking).

- *She wrote a short paragraph that included "ragsorter."*
- *He looked up "ragsorter" because he had never seen it before.*

---

railbird *(noun)*

A fan of racing who watches races from the outer rail of the track.

- *She wrote a short paragraph that included "railbird."*
- *Understanding "railbird" helps you talk about this topic clearly.*

---

raimentless *(adjective)*

Possessing no clothing.

- *The speaker chose "raimentless" because it captured the feeling precisely.*
- *It is useful to describe something as "raimentless" when it is possessing no clothing.*

---

rainbow seaperch *(noun)*

Pacific coast fish.

- *The article explained what "rainbow seaperch" means with a simple example.*
- *In class, the teacher used "rainbow seaperch" to mean pacific coast fish.*

---

rainfly *(noun)*

Flap consisting of a piece of canvas that can be drawn back to provide entrance to a tent.

- *She wrote a short paragraph that included "rainfly."*
- *The article explained what "rainfly" means with a simple example.*

---

raininess *(noun)*

(of weather) the badness of the weather.

- *In class, the teacher used "raininess" to mean (of weather) the badness of the weather.*
- *He looked up "raininess" because he had never seen it before.*

---

raisable *(adjective)*

Capable of being raised.

- *The roadster had a raisable sunroof.*
- *Her writing became clearer after she learned "raisable."*

---

raiseable *(adjective)*

Capable of being raised.

- *It is useful to describe something as "raiseable" when it is capable of being raised.*
- *The speaker chose "raiseable" because it captured the feeling precisely.*

---

raja erinacea *(noun)*

Most plentiful skate in North American inshore waters in summer; to 21 inches.

- *He looked up "raja erinacea" because he had never seen it before.*
- *She wrote a short paragraph that included "raja erinacea."*

---

rajidae *(noun)*

Bottom-dwelling tropical rays: skates.

- *In class, the teacher used "rajidae" to mean bottom-dwelling tropical rays: skates.*
- *Understanding "rajidae" helps you talk about this topic clearly.*

---

rajiformes *(noun)*

Fish with dorsoventrally flattened bodies; includes: rays; skates; guitarfishes; sawfishes.

- *In class, the teacher used "rajiformes" to mean fish with dorsoventrally flattened bodies;...*
- *The article explained what "rajiformes" means with a simple example.*

---

rakaposhi *(noun)*

A mountain peak in the Karakoram Range in northern Kashmir (25,560 feet high).

- *Understanding "rakaposhi" helps you talk about this topic clearly.*
- *They discussed "rakaposhi" during the group presentation.*

---

rakehell *(noun)*

A dissolute man in fashionable society.

- *In class, the teacher used "rakehell" to mean a dissolute man in fashionable society.*
- *Understanding "rakehell" helps you talk about this topic clearly.*

---

rakishness *(noun)*

Stylishness as evidenced by a smart appearance.

- *The article explained what "rakishness" means with a simple example.*
- *Understanding "rakishness" helps you talk about this topic clearly.*

---

rallentando *(adjective)*

Gradually decreasing in tempo.

- *Would you call this situation "rallentando"? Explain why.*
- *A "rallentando" approach may work better in this case.*

---

rallidae *(noun)*

Rails; crakes; gallinules; coots.

- *Understanding "rallidae" helps you talk about this topic clearly.*
- *In class, the teacher used "rallidae" to mean rails; crakes; gallinules; coots.*

---

ramalina *(noun)*

Shrubby lichens of the family Usneaceae having a flattened thallus.

- *The article explained what "ramalina" means with a simple example.*
- *She wrote a short paragraph that included "ramalina."*

---

ramanavami *(noun)*

Hindu lunar holiday (on the 9th day of Caitra) to celebrate the birth of Rama.

- *The article explained what "ramanavami" means with a simple example.*
- *Understanding "ramanavami" helps you talk about this topic clearly.*

---

ramate *(adjective)*

Having branches.

- *Students compared "ramate" with similar adjectives in the lesson.*
- *Would you call this situation "ramate"? Explain why.*

---

ramblingly *(adverb)*

In a rambling manner.

- *The narrator describes the scene "ramblingly" in the final chapter.*
- *He answered "ramblingly," which changed the tone of the conversation.*

---

Mountain frog found near water; of United States Northwest to California.

- *She wrote a short paragraph that included "rana cascadae."*
- *He looked up "rana cascadae" because he had never seen it before.*

---

rana catesbeiana *(noun)*

Largest North American frog; highly aquatic with a deep-pitched voice.

- *Understanding "rana catesbeiana" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rana catesbeiana."*

---

rana clamitans *(noun)*

Similar to bullfrog; found in or near marshes and ponds; of United States and Canada.

- *Understanding "rana clamitans" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rana clamitans."*

---

rana tarahumarae *(noun)*

Mexican frog found within a jump or two of water.

- *They discussed "rana tarahumarae" during the group presentation.*
- *In class, the teacher used "rana tarahumarae" to mean mexican frog found within a jump or two of water.*

---

rana temporaria *(noun)*

A common semiterrestrial European frog.

- *Understanding "rana temporaria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rana temporaria."*

---

ranales *(noun)*

Herbs, shrubs and trees: includes families Ranunculaceae; Annonaceae; Berberidaceae; Magnoliaceae; Menispermaceae; Myristicaceae; Nymphaeaceae; Lardizabalaceae; Lauraceae; Calycanthaceae; Ceratophyllaceae; Cercidiphyllaceae.

- *He looked up "ranales" because he had never seen it before.*
- *In class, the teacher used "ranales" to mean herbs, shrubs and trees: includes families....*

ranatra *(noun)*

Elongate very slender water scorpions.

- *She wrote a short paragraph that included "ranatra."*
- *He looked up "ranatra" because he had never seen it before.*

rancidness *(noun)*

The property of being rancid.

- *He looked up "rancidness" because he had never seen it before.*
- *They discussed "rancidness" during the group presentation.*

ranid *(noun)*

Insectivorous usually semiaquatic web-footed amphibian with smooth moist skin and long hind legs.

- *He looked up "ranid" because he had never seen it before.*
- *They discussed "ranid" during the group presentation.*

ranidae *(noun)*

A family nearly cosmopolitan in distribution: true frogs.

- *He looked up "ranidae" because he had never seen it before.*
- *Understanding "ranidae" helps you talk about this topic clearly.*

rankness *(noun)*

The property of producing abundantly and sustaining vigorous and luxuriant growth.

- *Weeds lovely in their rankness.*
- *They discussed "rankness" during the group presentation.*

ranunculales *(noun)*

Herbs, shrubs and trees: includes families Ranunculaceae; Annonaceae; Berberidaceae; Magnoliaceae; Menispermaceae; Myristicaceae; Nymphaeaceae; Lardizabalaceae; Lauraceae; Calycanthaceae; Ceratophyllaceae; Cercidiphyllaceae.

- *The article explained what "ranunculales" means with a simple example.*
- *Understanding "ranunculales" helps you talk about this topic clearly.*

ranunculus bulbosus *(noun)*

Perennial Old World buttercup with golden to sulphur yellow flowers in late spring to early summer; naturalized in North America.

- *They discussed "ranunculus bulbosus" during the group presentation.*
- *The article explained what "ranunculus bulbosus" means with a simple example.*

ranunculus ficaria *(noun)*

Perennial herb native to Europe but naturalized elsewhere having heart-shaped leaves and yellow flowers resembling buttercups; its tuberous roots have been used as a poultice to relieve piles.

- *She wrote a short paragraph that included "ranunculus ficaria."*
- *He looked up "ranunculus ficaria" because he had never seen it before.*

ranunculus flammula *(noun)*

Semiaquatic Eurasian perennial crowfoot with leaves shaped like spears; naturalized in New Zealand.

- *The article explained what "ranunculus flammula" means with a simple example.*
- *Understanding "ranunculus flammula" helps you talk about this topic clearly.*

ranunculus glaberrimus *(noun)*

Small early-flowering buttercup with shiny yellow flowers of western North America.

- *She wrote a short paragraph that included "ranunculus glaberrimus."*
- *The article explained what "ranunculus glaberrimus" means with a simple example.*

ranunculus lyalii *(noun)*

Showy white-flowered perennial of New Zealand.

- *He looked up "ranunculus lyalii" because he had never seen it before.*
- *She wrote a short paragraph that included "ranunculus lyalii."*

ranunculus sceleratus *(noun)*

Annual herb growing in marshy places.

- *They discussed “ranunculus sceleratus” during the group presentation.*
- *She wrote a short paragraph that included “ranunculus sceleratus.”*

---

ranvier’s nodes *(noun)*

Small gaps in the myelin sheath of medullated axons.

- *In class, the teacher used “ranvier’s nodes” to mean small gaps in the myelin sheath of medullated axons.*
- *He looked up “ranvier’s nodes” because he had never seen it before.*

---

raoulia *(noun)*

Genus of low-growing mat-forming New Zealand plants; in some classifications includes species placed in genus Haastia.

- *They discussed “raoulia” during the group presentation.*
- *She wrote a short paragraph that included “raoulia.”*

---

raoulia australis *(noun)*

Perennial prostrate mat-forming herb with hoary woolly foliage.

- *She wrote a short paragraph that included “raoulia australis.”*
- *He looked up “raoulia australis” because he had never seen it before.*

---

raoulia lutescens *(noun)*

Perennial prostrate mat-forming herb with hoary woolly foliage.

- *They discussed “raoulia lutescens” during the group presentation.*
- *In class, the teacher used “raoulia lutescens” to mean perennial prostrate mat-forming herb with hoary....*

---

rapaciously *(adverb)*

In a rapacious manner.

- *She spoke “rapaciously,” and the audience immediately understood her point.*
- *Try rewriting the sentence and include “rapaciously” naturally.*

---

- *Understanding "rete malpighii" helps you talk about this topic clearly.*
- *They discussed "rete malpighii" during the group presentation.*

---

retem *(noun)*

Desert shrub of Syria and Arabia having small white flowers; constitutes the juniper of the Old Testament; sometimes placed in genus Genista.

- *She wrote a short paragraph that included "retem."*
- *Understanding "retem" helps you talk about this topic clearly.*

---

retentively *(adverb)*

In a retentive manner.

- *The narrator describes the scene "retentively" in the final chapter.*
- *Place "retentively" carefully so the meaning stays clear.*

---

reticently *(adverb)*

With reticence; in a reticent manner.

- *She answered the questions reticently.*
- *The narrator describes the scene "reticently" in the final chapter.*

---

reticulitermes *(noun)*

Includes species highly destructive to structures and living trees.

- *The article explained what "reticulitermes" means with a simple example.*
- *In class, the teacher used "reticulitermes" to mean includes species highly destructive to structures....*

---

reticulitermes flanipes *(noun)*

Destructive United States termite.

- *The article explained what "reticulitermes flanipes" means with a simple example.*

- *Understanding "reticulitermes flanipes" helps you talk about this topic clearly.*

---

reticulitermes lucifugus *(noun)*

Destructive European termite.

- *He looked up "reticulitermes lucifugus" because he had never seen it before.*
- *They discussed "reticulitermes lucifugus" during the group presentation.*

---

retinene *(noun)*

Either of two yellow to red retinal pigments formed from rhodopsin by the action of light.

- *In class, the teacher used "retinene" to mean either of two yellow to red retinal pigments formed....*
- *They discussed "retinene" during the group presentation.*

---

retral *(adjective)*

Moving or directed or tending in a backward direction or contrary to a previous direction.

- *Would you call this situation "retral"? Explain why.*
- *It is useful to describe something as "retral" when it is moving or directed or tending in a backward....*

---

retreatant *(noun)*

A participant in a religious retreat.

- *Understanding "retreatant" helps you talk about this topic clearly.*
- *They discussed "retreatant" during the group presentation.*

---

retributory *(adjective)*

Of or relating to or having the nature of retribution.

- *The speaker chose "retributory" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "retributory."*

---

retroflexed *(adjective)*

Bent or curved backward.

- *It is useful to describe something as "retroflexed" when it is bent or curved backward.*
- *A "retroflexed" approach may work better in this case.*

---

retrogress *(verb)*

Get worse or fall back to a previous condition.

- *Learners should practice how to use "retrogress" in real sentences.*
- *In everyday English, people use "retrogress" when talking about this idea.*

---

retromandibular vein *(noun)*

Posterior branch of the facial vein; formed by temporal veins in front of the ear.

- *She wrote a short paragraph that included "retromandibular vein."*
- *The article explained what "retromandibular vein" means with a simple example.*

---

retrophyllum *(noun)*

Small genus of tropical evergreen dioecious shrubs or trees of Oceania and tropical South America.

- *The article explained what "retrophyllum" means with a simple example.*
- *They discussed "retrophyllum" during the group presentation.*

---

retrorocket *(noun)*

A small rocket engine on a larger rocket or spacecraft that is fired to slow or alter its course.

- *He looked up "retrorocket" because he had never seen it before.*
- *Understanding "retrorocket" helps you talk about this topic clearly.*

---

retrorse *(adjective)*

Bent or curved backward or downward.

- *Leaves with retrorse barbs.*
- *Students compared "retrorse" with similar adjectives in the lesson.*

---

retrousse *(adjective)*

(used of noses) turned up at the end.

- *A retrousse nose.*
- *Would you call this situation "retrousse"? Explain why.*

---

retrovert *(verb)*

Go back to a previous state.

- *In everyday English, people use "retrovert" when talking about this idea.*
- *He did not know how to use "retrovert" until he saw an example.*

---

revengefully *(adverb)*

In a vindictive, revengeful manner.

- *She spoke "revengefully," and the audience immediately understood her point.*
- *Place "revengefully" carefully so the meaning stays clear.*

---

revenuer *(noun)*

A government agent responsible for collecting revenue (especially one responsible for stopping bootlegging).

- *In class, the teacher used "revenuer" to mean a government agent responsible for collecting....*
- *The article explained what "revenuer" means with a simple example.*

---

reverberance *(noun)*

Having the character of a loud deep sound; the quality of being resonant.

- *Understanding "reverberance" helps you talk about this topic clearly.*
- *The article explained what "reverberance" means with a simple example.*

---

reverberative *(adjective)*

Characterized by resonance.

- *It is useful to describe something as "reverberative" when it is characterized by resonance.*
- *A "reverberative" approach may work better in this case.*

---

reversioner *(noun)*

(law) a party who is entitled to an estate in reversion.

- *He looked up "reversioner" because he had never seen it before.*
- *Understanding "reversioner" helps you talk about this topic clearly.*

---

reversive *(adjective)*

Tending to be turned back.

- *The speaker chose "reversive" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "reversive."*

---

revertible *(adjective)*

To be returned to the former owner or that owner's heirs.

- *Would you call this situation "revertible"? Explain why.*
- *Her writing became clearer after she learned "revertible."*

---

revet *(verb)*

Face with a layer of stone or concrete or other supporting material so as to retain.

- *The coach explained when to use "revet" and when to wait.*
- *Can you use "revet" in a sentence that fits this situation?*

---

revetement *(noun)*

A facing (usually masonry) that supports an embankment.

- *She wrote a short paragraph that included "revetement."*
- *The article explained what "revetement" means with a simple example.*

---

revivalistic *(adjective)*

Of or relating to or characterizing revivalism.

- *A "revivalistic" approach may work better in this case.*
- *Students compared "revivalistic" with similar adjectives in the lesson.*

---

revokable *(adjective)*

Capable of being revoked or annulled.

- *Her writing became clearer after she learned "revokable."*
- *Students compared "revokable" with similar adjectives in the lesson.*

---

rewardful *(adjective)*

Offering or productive of reward.

- *Rewardful pursuits.*
- *It is useful to describe something as "rewardful" when it is offering or productive of reward.*

---

rewardingly *(adverb)*

In a rewarding manner.

- *Place "rewardingly" carefully so the meaning stays clear.*
- *He answered "rewardingly," which changed the tone of the conversation.*

---

rhabdomancer *(noun)*

Someone who uses a divining rod to find underground water.

- *In class, the teacher used "rhabdomancer" to mean someone who uses a divining rod to find underground....*
- *The article explained what "rhabdomancer" means with a simple example.*

---

rhabdoviridae *(noun)*

A family of arborviruses carried by arthropods.

- *Understanding "rhabdoviridae" helps you talk about this topic clearly.*
- *He looked up "rhabdoviridae" because he had never seen it before.*

---

rhabdovirus *(noun)*

Any of a group of arboviruses including those causing rabies.

- *They discussed "rhabdovirus" during the group presentation.*
- *In class, the teacher used "rhabdovirus" to mean any of a group of arboviruses including those....*

---

rhamnaceae *(noun)*

Trees and shrubs usually thorny bearing drupaceous fruit many having medicinal value.

- *The article explained what "rhamnaceae" means with a simple example.*
- *In class, the teacher used "rhamnaceae" to mean trees and shrubs usually thorny bearing drupaceous....*

---

rhamnales *(noun)*

An order of dicotyledonous plants.

- *She wrote a short paragraph that included "rhamnales."*
- *He looked up "rhamnales" because he had never seen it before.*

---

rhamnus carolinianus *(noun)*

Deciduous shrub of eastern and central United States having black berrylike fruit; golden-yellow in autumn.

- *He looked up "rhamnus carolinianus" because he had never seen it before.*
- *They discussed "rhamnus carolinianus" during the group presentation.*

---

rhamnus croceus *(noun)*

Small spiny evergreen shrub of western United States and Mexico with minute flowers and bright red berries.

- *In class, the teacher used "rhamnus croceus" to mean small spiny evergreen shrub of western united....*
- *The article explained what "rhamnus croceus" means with a simple example.*

---

rhamnus frangula *(noun)*

Small tree common in Europe.

- *Understanding "rhamnus frangula" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rhamnus frangula."*

rhamnus purshianus *(noun)*

Shrubby tree of the Pacific coast of the United States; yields cascara sagrada.

- *Understanding "rhamnus purshianus" helps you talk about this topic clearly.*
- *He looked up "rhamnus purshianus" because he had never seen it before.*

rhaphe *(noun)*

A ridge that forms a seam between two parts.

- *Understanding "rhaphe" helps you talk about this topic clearly.*
- *They discussed "rhaphe" during the group presentation.*

rhapis *(noun)*

Genus of small clump-forming fan palms of China and Japan.

- *They discussed "rhapis" during the group presentation.*
- *Understanding "rhapis" helps you talk about this topic clearly.*

rhapis excelsa *(noun)*

Small graceful palm with reedlike stems and leaf bases clothed with loose coarse fibers.

- *He looked up "rhapis excelsa" because he had never seen it before.*
- *She wrote a short paragraph that included "rhapis excelsa."*

rhapis humilis *(noun)*

Chinese lady palm with more slender stems and finer sheath fibers than Rhapis excelsa.

- *Understanding "rhapis humilis" helps you talk about this topic clearly.*
- *They discussed "rhapis humilis" during the group presentation.*

rhapsodically *(adverb)*

In an ecstatic manner.

- *The narrator describes the scene "rhapsodically" in the final chapter.*
- *Place "rhapsodically" carefully so the meaning stays clear.*

rheidae *(noun)*

A family of birds coextensive with the order Rheiformes.

- *Understanding "rheidae" helps you talk about this topic clearly.*
- *They discussed "rheidae" during the group presentation.*

rheologic *(adjective)*

Of or relating to rheology.

- *Would you call this situation "rheologic"? Explain why.*
- *Her writing became clearer after she learned "rheologic."*

rheum cultorum *(noun)*

Long cultivated hybrid of Rheum palmatum; stems often cooked in pies or as sauce or preserves.

- *He looked up "rheum cultorum" because he had never seen it before.*
- *She wrote a short paragraph that included "rheum cultorum."*

rheum emodi *(noun)*

Asian herb (Himalayas).

- *They discussed "rheum emodi" during the group presentation.*
- *In class, the teacher used "rheum emodi" to mean asian herb (himalayas).*

rheum rhabarbarum *(noun)*

Long cultivated hybrid of Rheum palmatum; stems often cooked in pies or as sauce or preserves.

- *Understanding "rheum rhabarbarum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rheum rhabarbarum."*

rheum rhaponticum *(noun)*

Long cultivated hybrid of Rheum palmatum; stems often cooked in pies or as sauce or preserves.

- *She wrote a short paragraph that included "rheum rhaponticum."*
- *Understanding "rheum rhaponticum" helps you talk about this topic clearly.*

---

rhibhus *(noun)*

One of three artisans of the Hindu gods.

- *She wrote a short paragraph that included "rhibhus."*
- *The article explained what "rhibhus" means with a simple example.*

---

rhinal *(adjective)*

Of or in or relating to the nose.

- *Would you call this situation "rhinal"? Explain why.*
- *The speaker chose "rhinal" because it captured the feeling precisely.*

---

rhincodon *(noun)*

Whale sharks.

- *He looked up "rhincodon" because he had never seen it before.*
- *Understanding "rhincodon" helps you talk about this topic clearly.*

---

rhincodon typus *(noun)*

Large spotted shark of warm surface waters worldwide; resembles a whale and feeds chiefly on plankton.

- *They discussed "rhincodon typus" during the group presentation.*
- *Understanding "rhincodon typus" helps you talk about this topic clearly.*

---

rhincodontidae *(noun)*

Small-toothed sharks comprising only one species.

- *She wrote a short paragraph that included "rhincodontidae."*
- *He looked up "rhincodontidae" because he had never seen it before.*

---

rhinion *(noun)*

The anterior tip at the end of the suture of the nasal bones.

- *The article explained what "rhinion" means with a simple example.*
- *In class, the teacher used "rhinion" to mean the anterior tip at the end of the suture of the....*

---

rhinobatidae *(noun)*

Primitive rays with guitar-shaped bodies.

- *He looked up "rhinobatidae" because he had never seen it before.*
- *She wrote a short paragraph that included "rhinobatidae."*

---

rhinoceros antiquitatis *(noun)*

Extinct thick-haired species of Arctic regions.

- *He looked up "rhinoceros antiquitatis" because he had never seen it before.*
- *She wrote a short paragraph that included "rhinoceros antiquitatis."*

---

rhinocerotidae *(noun)*

Rhinoceroses.

- *In class, the teacher used "rhinocerotidae" to mean rhinoceroses.*
- *They discussed "rhinocerotidae" during the group presentation.*

---

rhinolaryngologist *(noun)*

A specialist in the disorders of the ear or nose or throat.

- *He looked up "rhinolaryngologist" because he had never seen it before.*
- *They discussed "rhinolaryngologist" during the group presentation.*

---

rhinolophidae *(noun)*

Old World leaf-nosed bats.

- *Understanding "rhinolophidae" helps you talk about this topic clearly.*

- *They discussed "rhinolophidae" during the group presentation.*

---

rhinonicteris *(noun)*

Orange horseshoe bats.

- *They discussed "rhinonicteris" during the group presentation.*
- *She wrote a short paragraph that included "rhinonicteris."*

---

rhinonicteris aurantius *(noun)*

A common bat of northwestern Australia having orange or yellow fur.

- *They discussed "rhinonicteris aurantius" during the group presentation.*
- *She wrote a short paragraph that included "rhinonicteris aurantius."*

---

rhinoptera *(noun)*

A genus of Myliobatidae.

- *He looked up "rhinoptera" because he had never seen it before.*
- *Understanding "rhinoptera" helps you talk about this topic clearly.*

---

rhinoptera bonasus *(noun)*

Large ray found along eastern coast of North America.

- *She wrote a short paragraph that included "rhinoptera bonasus."*
- *They discussed "rhinoptera bonasus" during the group presentation.*

---

rhinoscope *(noun)*

Medical instrument consisting of a mirror mounted at an angle on a rod; used to examine the nasal passages (through the nasopharynx).

- *Understanding "rhinoscope" helps you talk about this topic clearly.*
- *They discussed "rhinoscope" during the group presentation.*

---

rhinoscopy *(noun)*

Examination of the nasal passages (either through the anterior nares or with a rhinoscope through the nasopharynx).

- *He looked up "rhinoscopy" because he had never seen it before.*
- *In class, the teacher used "rhinoscopy" to mean examination of the nasal passages (either through....*

---

rhinotermitidae *(noun)*

Large widely distributed family of termites of temperate to tropical regions.

- *In class, the teacher used "rhinotermitidae" to mean large widely distributed family of termites of....*
- *They discussed "rhinotermitidae" during the group presentation.*

---

rhinotomy *(noun)*

Surgical procedure in which an incision is made in the nose to drain accumulated pus.

- *They discussed "rhinotomy" during the group presentation.*
- *He looked up "rhinotomy" because he had never seen it before.*

---

rhipsalis *(noun)*

Large genus of epiphytic or lithophytic unarmed cacti with usually segmented stems and pendulous branches; flowers are small followed by berrylike fruits.

- *The article explained what "rhipsalis" means with a simple example.*
- *They discussed "rhipsalis" during the group presentation.*

---

rhiptoglossa *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *The article explained what "rhiptoglossa" means with a simple example.*
- *In class, the teacher used "rhiptoglossa" to mean old world chameleons; in some classifications they....*

---

rhizobiaceae *(noun)*

A small family of rod-shaped bacteria.

- *In class, the teacher used "rhizobiaceae" to mean a small family of rod-shaped bacteria.*
- *The article explained what "rhizobiaceae" means with a simple example.*

---

rhizoctinia *(noun)*

Any fungus now or formerly belonging to the form genus Rhizoctinia.

- *In class, the teacher used "rhizoctinia" to mean any fungus now or formerly belonging to the form....*
- *They discussed "rhizoctinia" during the group presentation.*

rhizoctinia solani *(noun)*

Fungus causing a disease in potatoes characterized by black scurfy spots on the tubers.

- *In class, the teacher used "rhizoctinia solani" to mean fungus causing a disease in potatoes characterized....*
- *The article explained what "rhizoctinia solani" means with a simple example.*

rhizoid *(noun)*

Any of various slender filaments that function as roots in mosses and ferns and fungi etc.

- *They discussed "rhizoid" during the group presentation.*
- *He looked up "rhizoid" because he had never seen it before.*

rhizoidal *(adjective)*

Of or relating to a rhizoid.

- *It is useful to describe something as "rhizoidal" when it is of or relating to a rhizoid.*
- *The speaker chose "rhizoidal" because it captured the feeling precisely.*

rhizomorph *(noun)*

A dense mass of hyphae forming a root-like structure characteristic of many fungi.

- *Understanding "rhizomorph" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rhizomorph."*

rhizophoraceae *(noun)*

Trees and shrubs that usually form dense jungles along tropical seacoasts.

- *He looked up "rhizophoraceae" because he had never seen it before.*
- *In class, the teacher used "rhizophoraceae" to mean trees and shrubs that usually form dense jungles....*

rhizopod *(noun)*

Protozoa characterized by a pseudopod.

- *The article explained what "rhizopod" means with a simple example.*
- *In class, the teacher used "rhizopod" to mean protozoa characterized by a pseudopod.*

rhizopoda *(noun)*

Creeping protozoans: amoebas and foraminifers.

- *He looked up "rhizopoda" because he had never seen it before.*
- *They discussed "rhizopoda" during the group presentation.*

rhizopodan *(noun)*

Protozoa characterized by a pseudopod.

- *In class, the teacher used "rhizopodan" to mean protozoa characterized by a pseudopod.*
- *The article explained what "rhizopodan" means with a simple example.*

rhizopogon *(noun)*

A genus of fungi having subterranean sporophores resembling tubers.

- *They discussed "rhizopogon" during the group presentation.*
- *In class, the teacher used "rhizopogon" to mean a genus of fungi having subterranean sporophores....*

rhizopogon idahoensis *(noun)*

A large whitish Rhizopogon that becomes greyish brown in maturity.

- *Understanding "rhizopogon idahoensis" helps you talk about this topic clearly.*
- *The article explained what "rhizopogon idahoensis" means with a simple example.*

rhizopogonaceae *(noun)*

A family of fungi of order Hymenogastrales having round subterranean sporophores.

- *Understanding "rhizopogonaceae" helps you talk about this topic clearly.*
- *The article explained what "rhizopogonaceae" means with a simple example.*

---

rhizopus stolonifer *(noun)*

Fungus causing soft watery rot in fruits and vegetables and rings of dry rot around roots of sweet potatoes.

- *The article explained what "rhizopus stolonifer" means with a simple example.*
- *They discussed "rhizopus stolonifer" during the group presentation.*

---

rhodanthe *(noun)*

Australian annual everlasting having light pink nodding flower heads; sometimes placed in genus Helipterum.

- *The article explained what "rhodanthe" means with a simple example.*
- *She wrote a short paragraph that included "rhodanthe."*

---

rhodanthe manglesii *(noun)*

Australian annual everlasting having light pink nodding flower heads; sometimes placed in genus Helipterum.

- *He looked up "rhodanthe manglesii" because he had never seen it before.*
- *In class, the teacher used "rhodanthe manglesii" to mean australian annual everlasting having light pink....*

---

rhododendron viscosum *(noun)*

Shrub growing in swamps throughout the eastern United States and having small white to pinkish flowers resembling honeysuckle.

- *They discussed "rhododendron viscosum" during the group presentation.*
- *Understanding "rhododendron viscosum" helps you talk about this topic clearly.*

---

rhodolite *(noun)*

A red or pink variety of garnet used as a gemstone.

- *He looked up "rhodolite" because he had never seen it before.*
- *She wrote a short paragraph that included "rhodolite."*

---

rhodophyceae *(noun)*

Coextensive with the Rhodophyta: red algae.

- *The article explained what "rhodophyceae" means with a simple example.*
- *They discussed "rhodophyceae" during the group presentation.*

---

rhodosphaera *(noun)*

One species; an Australian evergreen sumac.

- *Understanding "rhodosphaera" helps you talk about this topic clearly.*
- *In class, the teacher used "rhodosphaera" to mean one species; an australian evergreen sumac.*

---

rhodosphaera rhodanthema *(noun)*

Evergreen of Australia yielding a dark yellow wood.

- *The article explained what "rhodosphaera rhodanthema" means with a simple example.*
- *They discussed "rhodosphaera rhodanthema" during the group presentation.*

---

rhodymenia *(noun)*

Type genus of the family Rhodymeniaceae.

- *He looked up "rhodymenia" because he had never seen it before.*
- *In class, the teacher used "rhodymenia" to mean type genus of the family rhodymeniaceae.*

---

rhodymenia palmata *(noun)*

Coarse edible red seaweed.

- *He looked up "rhodymenia palmata" because he had never seen it before.*
- *She wrote a short paragraph that included "rhodymenia palmata."*

---

rhodymeniaceae *(noun)*

A family of protoctist.

- *In class, the teacher used "rhodymeniaceae" to mean a family of protoctist.*
- *Understanding "rhodymeniaceae" helps you talk about this topic clearly.*

rhoeadales *(noun)*

An order of dicotyledonous plants.

- *He looked up "rhoeadales" because he had never seen it before.*
- *She wrote a short paragraph that included "rhoeadales."*

rhombohedron *(noun)*

A parallelepiped bounded by six similar faces (either rhombuses or parallelograms).

- *The article explained what "rhombohedron" means with a simple example.*
- *She wrote a short paragraph that included "rhombohedron."*

rhomboideus major muscle *(noun)*

Rhomboid muscle that draws the scapula toward the spinal column.

- *They discussed "rhomboideus major muscle" during the group presentation.*
- *The article explained what "rhomboideus major muscle" means with a simple example.*

rhus copallina *(noun)*

Common nonpoisonous shrub of eastern North America with compound leaves and green paniculate flowers followed by red berries.

- *She wrote a short paragraph that included "rhus copallina."*
- *They discussed "rhus copallina" during the group presentation.*

rhus diversiloba *(noun)*

Poisonous shrub of the Pacific coast of North America that causes a rash on contact.

- *He looked up "rhus diversiloba" because he had never seen it before.*
- *Understanding "rhus diversiloba" helps you talk about this topic clearly.*

rhus quercifolia *(noun)*

Poisonous shrub of southeastern United States causing a rash on contact.

- *He looked up "rhus quercifolia" because he had never seen it before.*
- *Understanding "rhus quercifolia" helps you talk about this topic clearly.*

rhus rhodanthema *(noun)*

Evergreen of Australia yielding a dark yellow wood.

- *She wrote a short paragraph that included "rhus rhodanthema."*
- *He looked up "rhus rhodanthema" because he had never seen it before.*

rhus toxicodenedron *(noun)*

Poisonous shrub of southeastern United States causing a rash on contact.

- *They discussed "rhus toxicodenedron" during the group presentation.*
- *He looked up "rhus toxicodenedron" because he had never seen it before.*

rhus trilobata *(noun)*

Deciduous shrub of California with unpleasantly scented usually trifoliate leaves and edible fruit.

- *He looked up "rhus trilobata" because he had never seen it before.*
- *Understanding "rhus trilobata" helps you talk about this topic clearly.*

rhus typhina *(noun)*

Deciduous shrubby tree or eastern North America with compound leaves that turn brilliant red in fall and dense panicles of greenish yellow flowers followed by crimson acidic berries.

- *They discussed "rhus typhina" during the group presentation.*
- *Understanding "rhus typhina" helps you talk about this topic clearly.*

rhus verniciflua *(noun)*

Small Asiatic tree yielding a toxic exudate from which lacquer is obtained.

- *Understanding "rhus verniciflua" helps you talk about this topic clearly.*
- *The article explained what "rhus verniciflua" means with a simple example.*

rhyacotriton *(noun)*

Olympic salamanders.

- *He looked up "rhyacotriton" because he had never seen it before.*
- *She wrote a short paragraph that included "rhyacotriton."*

---

rhyacotriton olympicus *(noun)*

Small large-eyed semiaquatic salamander of the United States Northwest.

- *She wrote a short paragraph that included "rhyacotriton olympicus."*
- *The article explained what "rhyacotriton olympicus" means with a simple example.*

---

rhymeless *(adjective)*

Not having rhyme.

- *Students compared "rhymeless" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "rhymeless."*

---

rhynchocephalia *(noun)*

Tuataras; extinct forms from middle Triassic.

- *Understanding "rhynchocephalia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rhynchocephalia."*

---

rhynchoelaps *(noun)*

Australian coral snakes.

- *In class, the teacher used "rhynchoelaps" to mean australian coral snakes.*
- *The article explained what "rhynchoelaps" means with a simple example.*

---

rhynchoelaps australis *(noun)*

Small venomous but harmless snake marked with black-and-white on red.

- *Understanding "rhynchoelaps australis" helps you talk about this topic clearly.*
- *They discussed "rhynchoelaps australis" during the group presentation.*

---

rhyncostylis *(noun)*

Genus of epiphytic orchids of tropical Asia.

- *She wrote a short paragraph that included "rhyncostylis."*
- *They discussed "rhyncostylis" during the group presentation.*

---

rhynia *(noun)*

Type genus of the Rhyniaceae; small leafless dichotomously branching fossil plants with terminal sporangia and smooth branching rhizomes.

- *The article explained what "rhynia" means with a simple example.*
- *In class, the teacher used "rhynia" to mean type genus of the rhyniaceae; small leafless....*

---

rhyniaceae *(noun)*

Primitive plants of the Paleozoic.

- *They discussed "rhyniaceae" during the group presentation.*
- *She wrote a short paragraph that included "rhyniaceae."*

---

rhytidectomy *(noun)*

Plastic surgery to remove wrinkles and other signs of aging from your face; an incision is made near the hair line and skin is pulled back and excess tissue is excised.

- *The article explained what "rhytidectomy" means with a simple example.*
- *She wrote a short paragraph that included "rhytidectomy."*

---

rhytidoplasty *(noun)*

Plastic surgery to remove wrinkles and other signs of aging from your face; an incision is made near the hair line and skin is pulled back and excess tissue is excised.

- *In class, the teacher used "rhytidoplasty" to mean plastic surgery to remove wrinkles and other signs....*
- *Understanding "rhytidoplasty" helps you talk about this topic clearly.*

---

ribbonlike *(adjective)*

Long and thin; resembling a ribbon.

- *Ribbonlike noodles.*

- *Her writing became clearer after she learned “ribbonlike.”*

ribbonwood *(noun)*

Deciduous New Zealand tree whose inner bark yields a strong fiber that resembles flax and is called New Zealand cotton.

- *The article explained what “ribbonwood” means with a simple example.*
- *She wrote a short paragraph that included “ribbonwood.”*

ribbony *(adjective)*

Long and thin; resembling a ribbon.

- *Her writing became clearer after she learned “ribbony.”*
- *The speaker chose “ribbony” because it captured the feeling precisely.*

ribes grossularia *(noun)*

Spiny Eurasian shrub having greenish purple-tinged flowers and ovoid yellow-green or red-purple berries.

- *The article explained what “ribes grossularia” means with a simple example.*
- *In class, the teacher used “ribes grossularia” to mean spiny eurasian shrub having greenish purple-tinged....*

ribes sanguineum *(noun)*

A flowering shrub.

- *They discussed “ribes sanguineum” during the group presentation.*
- *She wrote a short paragraph that included “ribes sanguineum.”*

ribgrass *(noun)*

An Old World plantain with long narrow ribbed leaves widely established in temperate regions.

- *The article explained what “ribgrass” means with a simple example.*
- *In class, the teacher used “ribgrass” to mean an old world plantain with long narrow ribbed....*

ribhus *(noun)*

One of three artisans of the Hindu gods.

- *They discussed “ribhus” during the group presentation.*

---

rupestral *(adjective)*

Composed of or inscribed on rock.

- *Rupestral drawings in the caves of Northern Spain.*
- *Students compared "rupestral" with similar adjectives in the lesson.*

---

rupestral plant *(noun)*

Plants growing among rocks.

- *The article explained what "rupestral plant" means with a simple example.*
- *In class, the teacher used "rupestral plant" to mean plants growing among rocks.*

---

rupestrine plant *(noun)*

Plants growing among rocks.

- *In class, the teacher used "rupestrine plant" to mean plants growing among rocks.*
- *Understanding "rupestrine plant" helps you talk about this topic clearly.*

---

rupicapra rupicapra *(noun)*

Hoofed mammal of mountains of Eurasia having upright horns with backward-hooked tips.

- *He looked up "rupicapra rupicapra" because he had never seen it before.*
- *They discussed "rupicapra rupicapra" during the group presentation.*

---

rupicola *(noun)*

Cock of the rocks.

- *They discussed "rupicola" during the group presentation.*
- *In class, the teacher used "rupicola" to mean cock of the rocks.*

---

rupicola peruviana *(noun)*

Bird of the Andes similar to Rupicola rupicola.

- *In class, the teacher used "rupicola peruviana" to mean bird of the andes similar to rupicola rupicola.*
- *The article explained what "rupicola peruviana" means with a simple example.*

---

rupicola rupicola *(noun)*

Tropical bird of northern South America the male having brilliant red or orange plumage and an erectile disklike crest.

- *In class, the teacher used "rupicola rupicola" to mean tropical bird of northern south america the male....*
- *They discussed "rupicola rupicola" during the group presentation.*

---

rupicolous *(adjective)*

Composed of or inscribed on rock.

- *A "rupicolous" approach may work better in this case.*
- *Her writing became clearer after she learned "rupicolous."*

---

rupicolous plant *(noun)*

Plants growing among rocks.

- *He looked up "rupicolous plant" because he had never seen it before.*
- *Understanding "rupicolous plant" helps you talk about this topic clearly.*

---

ruptiliocarpon *(noun)*

New (1993) genus of trees of Central America now recognized as similar to those of genus Lepidobotrys.

- *She wrote a short paragraph that included "ruptiliocarpon."*
- *Understanding "ruptiliocarpon" helps you talk about this topic clearly.*

---

ruptiliocarpon caracolito *(noun)*

Large Costa Rican tree having light-colored wood suitable for cabinetry; similar to the African lepidobotrys in wood structure as well as in fruit and flowers and leaves and seeds; often classified in other families.

- *He looked up "ruptiliocarpon caracolito" because he had never seen it before.*
- *She wrote a short paragraph that included "ruptiliocarpon caracolito."*

---

rupturewort *(noun)*

Common prostrate Old World herb often used as a ground cover; formerly reputed to cure ruptures.

- *The article explained what "rupturewort" means with a simple example.*
- *In class, the teacher used "rupturewort" to mean common prostrate old world herb often used as a....*

---

ruralism *(noun)*

A rural characteristic or trait.

- *The article explained what "ruralism" means with a simple example.*
- *In class, the teacher used "ruralism" to mean a rural characteristic or trait.*

---

ruscaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *He looked up "ruscaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "ruscaceae."*

---

rushlike *(adjective)*

Resembling rush or sedge.

- *Her writing became clearer after she learned "rushlike."*
- *Would you call this situation "rushlike"? Explain why.*

---

russulaceae *(noun)*

Used in some classification systems for the genus Russula.

- *They discussed "russulaceae" during the group presentation.*
- *He looked up "russulaceae" because he had never seen it before.*

---

rustless *(adjective)*

Without rust.

- *Her writing became clearer after she learned "rustless."*
- *Would you call this situation "rustless"? Explain why.*

rustproofed *(adjective)*

Treated against rusting.

- *Her writing became clearer after she learned "rustproofed."*
- *Students compared "rustproofed" with similar adjectives in the lesson.*

rusty woodsia *(noun)*

A common rock-inhabiting fern of northern temperate regions having rusty-brown stipes and lanceolate pinnate fronds.

- *They discussed "rusty woodsia" during the group presentation.*
- *In class, the teacher used "rusty woodsia" to mean a common rock-inhabiting fern of northern temperate....*

rutherfordium *(noun)*

A radioactive transuranic element which has been synthesized.

- *Understanding "rutherfordium" helps you talk about this topic clearly.*
- *He looked up "rutherfordium" because he had never seen it before.*

ruttish *(adjective)*

Feeling great sexual desire.

- *Her writing became clearer after she learned "ruttish."*
- *The speaker chose "ruttish" because it captured the feeling precisely.*

ruvettus pretiosus *(noun)*

Very large deep-water snake mackerel.

- *Understanding "ruvettus pretiosus" helps you talk about this topic clearly.*
- *They discussed "ruvettus pretiosus" during the group presentation.*

rydberg's penstemon *(noun)*

Plant with whorls of small dark blue-violet flowers; Washington to Wyoming and south to California and Colorado.

- *Understanding "rydberg's penstemon" helps you talk about this topic clearly.*
- *They discussed "rydberg's penstemon" during the group presentation.*

rynchopidae *(noun)*

Coextensive with the genus Rynchops: skimmers.

- *He looked up "rynchopidae" because he had never seen it before.*
- *Understanding "rynchopidae" helps you talk about this topic clearly.*

rynchops *(noun)*

Type genus of the Rynchopidae: skimmers.

- *He looked up "rynchops" because he had never seen it before.*
- *They discussed "rynchops" during the group presentation.*

rypticus *(noun)*

A genus of fish of the family Serranidae, including soapfishes.

- *They discussed "rypticus" during the group presentation.*
- *She wrote a short paragraph that included "rypticus."*

sabbatia *(noun)*

Any of various plants of the genus Sabbatia having usually pink cymose flowers; occur from acid bogs to brackish marshes.

- *She wrote a short paragraph that included "sabbatia."*
- *He looked up "sabbatia" because he had never seen it before.*

sabbatia angularis *(noun)*

Any of several pink-flowered marsh plant of the eastern United States resembling a true centaury.

- *The article explained what "sabbatia angularis" means with a simple example.*
- *In class, the teacher used "sabbatia angularis" to mean any of several pink-flowered marsh plant of the....*

sabbatia campestris *(noun)*

Prairie herb with solitary lilac-colored flowers.

- *In class, the teacher used "sabbatia campestris" to mean prairie herb with solitary lilac-colored flowers.*
- *They discussed "sabbatia campestris" during the group presentation.*

---

sabbatia stellaris *(noun)*

Any of several pink-flowered marsh plant of the eastern United States resembling a true centaury.

- *He looked up "sabbatia stellaris" because he had never seen it before.*
- *Understanding "sabbatia stellaris" helps you talk about this topic clearly.*

---

sabbatic *(adjective)*

Of or relating to the Sabbath.

- *Friday is a sabbatical day for Muslims.*
- *The speaker chose "sabbatic" because it captured the feeling precisely.*

---

Having teeth that resemble sabers.

- *It is useful to describe something as "sabertoothed" when it is having teeth that resemble sabers.*
- *The speaker chose "sabertoothed" because it captured the feeling precisely.*

---

sabicu *(noun)*

The wood of the sabicu which resembles mahogany.

- *She wrote a short paragraph that included "sabicu."*
- *Understanding "sabicu" helps you talk about this topic clearly.*

---

sabicu wood *(noun)*

The wood of the sabicu which resembles mahogany.

- *In class, the teacher used "sabicu wood" to mean the wood of the sabicu which resembles mahogany.*
- *The article explained what "sabicu wood" means with a simple example.*

---

sabinea *(noun)*

Small genus of deciduous West Indian trees or shrubs: carib wood.

- *The article explained what "sabinea" means with a simple example.*
- *Understanding "sabinea" helps you talk about this topic clearly.*

---

sabinea carinalis *(noun)*

Small Dominican tree bearing masses of large crimson flowers before the fine pinnate foliage emerges.

- *She wrote a short paragraph that included "sabinea carinalis."*
- *He looked up "sabinea carinalis" because he had never seen it before.*

---

saccharase *(noun)*

An enzyme that catalyzes the hydrolysis of sucrose into glucose and fructose.

- *In class, the teacher used "saccharase" to mean an enzyme that catalyzes the hydrolysis of sucrose....*
- *They discussed "saccharase" during the group presentation.*

---

saccharic acid *(noun)*

A white dicarboxylic acid formed from oxidation of sugar or starch.

- *In class, the teacher used "saccharic acid" to mean a white dicarboxylic acid formed from oxidation of....*
- *He looked up "saccharic acid" because he had never seen it before.*

---

saccharify *(verb)*

Convert into a simple soluble fermentable sugar by hydrolyzing a sugar derivative or complex carbohydrate.

- *In everyday English, people use "saccharify" when talking about this idea.*

- *She tried to use "saccharify" carefully so everyone would understand.*

---

saccharinity *(noun)*

The excessive sweetness of saccharin.

- *He looked up "saccharinity" because he had never seen it before.*
- *In class, the teacher used "saccharinity" to mean the excessive sweetness of saccharin.*

---

saccharomyces ellipsoides *(noun)*

Used in making wine.

- *Understanding "saccharomyces ellipsoides" helps you talk about this topic clearly.*
- *He looked up "saccharomyces ellipsoides" because he had never seen it before.*

---

saccharomycetaceae *(noun)*

Family of fungi comprising the typical yeasts: reproduce by budding and ferment carbohydrates.

- *They discussed "saccharomycetaceae" during the group presentation.*
- *Understanding "saccharomycetaceae" helps you talk about this topic clearly.*

---

saccharose *(noun)*

A complex carbohydrate found in many plants and used as a sweetening agent.

- *Understanding "saccharose" helps you talk about this topic clearly.*
- *They discussed "saccharose" during the group presentation.*

---

saccharum bengalense *(noun)*

Tough Asiatic grass whose culms are used for ropes and baskets.

- *They discussed "saccharum bengalense" during the group presentation.*
- *Understanding "saccharum bengalense" helps you talk about this topic clearly.*

---

saccharum munja *(noun)*

Tough Asiatic grass whose culms are used for ropes and baskets.

- *He looked up "saccharum munja" because he had never seen it before.*
- *In class, the teacher used "saccharum munja" to mean tough asiatic grass whose culms are used for ropes....*

---

sacculate *(adjective)*

Formed with or having saclike expansions.

- *The alimentary tract is partially sacculated.*
- *Her writing became clearer after she learned "sacculate."*

---

sacculated *(adjective)*

Formed with or having saclike expansions.

- *The alimentary tract is partially sacculated.*
- *A "sacculated" approach may work better in this case.*

---

saclike *(adjective)*

Shaped like a pouch.

- *It is useful to describe something as "saclike" when it is shaped like a pouch.*
- *Students compared "saclike" with similar adjectives in the lesson.*

---

sacque *(noun)*

A woman's full loose hiplength jacket.

- *In class, the teacher used "sacque" to mean a woman's full loose hiplength jacket.*
- *He looked up "sacque" because he had never seen it before.*

---

sacramental manduction *(noun)*

The act of participating in the celebration of the Eucharist.

- *She wrote a short paragraph that included "sacramental manduction."*
- *They discussed "sacramental manduction" during the group presentation.*

The trait of behaving in an obscene manner.

- *In class, the teacher used "salacity" to mean the trait of behaving in an obscene manner.*
- *They discussed "salacity" during the group presentation.*

---

salamandridae *(noun)*

Salamanders.

- *In class, the teacher used "salamandridae" to mean salamanders.*
- *Understanding "salamandridae" helps you talk about this topic clearly.*

---

salamandriform *(adjective)*

Shaped like a salamander.

- *It is useful to describe something as "salamandriform" when it is shaped like a salamander.*
- *A "salamandriform" approach may work better in this case.*

---

saleratus *(noun)*

A white soluble compound (NaHCO3) used in effervescent drinks and in baking powders and as an antacid.

- *Understanding "saleratus" helps you talk about this topic clearly.*
- *In class, the teacher used "saleratus" to mean a white soluble compound (nahco3) used in....*

---

salicaceae *(noun)*

Two genera of trees or shrubs having hairy catkins: Salix; Populus.

- *They discussed "salicaceae" during the group presentation.*
- *She wrote a short paragraph that included "salicaceae."*

---

salicales *(noun)*

Coextensive with the family Salicaceae.

- *The article explained what "salicales" means with a simple example.*
- *They discussed "salicales" during the group presentation.*

---

salientia *(noun)*

Frogs, toads, tree toads.

- *In class, the teacher used "salientia" to mean frogs, toads, tree toads.*
- *The article explained what "salientia" means with a simple example.*

---

salientian *(noun)*

Any of various tailless stout-bodied amphibians with long hind limbs for leaping; semiaquatic and terrestrial species.

- *Understanding "salientian" helps you talk about this topic clearly.*

- *He looked up "salientian" because he had never seen it before.*

---

saliferous *(adjective)*

Containing or yielding salt.

- *Saliferous formations.*
- *A "saliferous" approach may work better in this case.*

---

salinate *(verb)*

Add salt to.

- *Salinated solution.*
- *In everyday English, people use "salinate" when talking about this idea.*

---

salinometer *(noun)*

A hydrometer that determines the concentration of salt solutions by measuring their density.

- *They discussed "salinometer" during the group presentation.*
- *Understanding "salinometer" helps you talk about this topic clearly.*

---

salix alba vitellina *(noun)*

European willow having greyish leaves and yellow-orange twigs used in basketry.

- *The article explained what "salix alba vitellina" means with a simple example.*
- *She wrote a short paragraph that included "salix alba vitellina."*

---

salix amygdalina *(noun)*

Old World willow with light green leaves cultivated for use in basketry.

- *He looked up "salix amygdalina" because he had never seen it before.*
- *Understanding "salix amygdalina" helps you talk about this topic clearly.*

---

salix amygdaloides *(noun)*

Willow of the western United States with leaves like those of peach or almond trees.

- *Understanding "salix amygdaloides" helps you talk about this topic clearly.*
- *He looked up "salix amygdaloides" because he had never seen it before.*

---

salix caprea *(noun)*

Much-branched Old World willow having large catkins and relatively large broad leaves.

- *The article explained what "salix caprea" means with a simple example.*
- *She wrote a short paragraph that included "salix caprea."*

---

salix lasiolepis *(noun)*

Shrubby willow of the western United States.

- *He looked up "salix lasiolepis" because he had never seen it before.*
- *Understanding "salix lasiolepis" helps you talk about this topic clearly.*

---

salix pendulina *(noun)*

Hybrid willow usually not strongly weeping in habit.

- *She wrote a short paragraph that included "salix pendulina."*
- *The article explained what "salix pendulina" means with a simple example.*

---

salix pendulina blanda *(noun)*

Hybrid willow usually not strongly weeping in habit.

- *She wrote a short paragraph that included "salix pendulina blanda."*
- *They discussed "salix pendulina blanda" during the group presentation.*

---

salix pentandra *(noun)*

European willow tree with shining leathery leaves; widely naturalized in the eastern United States.

- *He looked up "salix pentandra" because he had never seen it before.*
- *Understanding "salix pentandra" helps you talk about this topic clearly.*

---

salix pyrifolia *(noun)*

Small shrubby tree of eastern North America having leaves exuding an odor of balsam when crushed.

- *He looked up "salix pyrifolia" because he had never seen it before.*
- *In class, the teacher used "salix pyrifolia" to mean small shrubby tree of eastern north america having....*

---

salix triandra *(noun)*

Old World willow with light green leaves cultivated for use in basketry.

- *Understanding "salix triandra" helps you talk about this topic clearly.*
- *In class, the teacher used "salix triandra" to mean old world willow with light green leaves cultivated....*

---

salix vitellina *(noun)*

European willow having greyish leaves and yellow-orange twigs used in basketry.

- *The article explained what "salix vitellina" means with a simple example.*
- *They discussed "salix vitellina" during the group presentation.*

---

sallowness *(noun)*

A sickly yellowish skin color.

- *She wrote a short paragraph that included "sallowness."*
- *They discussed "sallowness" during the group presentation.*

---

salmacis *(noun)*

Nymph who merged with Hermaphroditus to form one body.

- *They discussed "salmacis" during the group presentation.*
- *The article explained what "salmacis" means with a simple example.*

---

salmo gairdneri *(noun)*

Found in Pacific coastal waters and streams from lower California to Alaska.

- *The article explained what "salmo gairdneri" means with a simple example.*
- *In class, the teacher used "salmo gairdneri" to mean found in pacific coastal waters and streams from....*

---

salmonella typhosa *(noun)*

A form of salmonella that causes typhoid fever.

- *In class, the teacher used "salmonella typhosa" to mean a form of salmonella that causes typhoid fever.*
- *He looked up "salmonella typhosa" because he had never seen it before.*

---

salmwood *(noun)*

Large tropical American tree of the genus Cordia grown for its abundant creamy white flowers and valuable wood.

- *In class, the teacher used "salmwood" to mean large tropical american tree of the genus cordia....*
- *Understanding "salmwood" helps you talk about this topic clearly.*

---

salol *(noun)*

A white powder with a pleasant taste and odor; used to absorb light in sun tan lotions or as a preservative or an antiseptic or a coating for pills in which the medicine is intended for enteric release.

- *They discussed "salol" during the group presentation.*
- *She wrote a short paragraph that included "salol."*

---

salpichroa *(noun)*

Herbs of temperate North and South America: cock's eggs.

- *In class, the teacher used "salpichroa" to mean herbs of temperate north and south america: cock's eggs.*
- *He looked up "salpichroa" because he had never seen it before.*

---

salpichroa organifolia *(noun)*

Weedy vine of Argentina having solitary white flowers followed by egg-shaped white or yellow fruit.

- *She wrote a short paragraph that included "salpichroa organifolia."*
- *The article explained what "salpichroa organifolia" means with a simple example.*

---

salpichroa rhomboidea *(noun)*

Weedy vine of Argentina having solitary white flowers followed by egg-shaped white or yellow fruit.

- *Understanding “salpichroa rhomboidea” helps you talk about this topic clearly.*
- *He looked up “salpichroa rhomboidea” because he had never seen it before.*

---

salpidae *(noun)*

A small family of tunicates in the class Thaliacea.

- *She wrote a short paragraph that included “salpidae.”*
- *He looked up “salpidae” because he had never seen it before.*

---

salpiglossis *(noun)*

Any plant of the genus Salpiglossis.

- *She wrote a short paragraph that included “salpiglossis.”*
- *They discussed “salpiglossis” during the group presentation.*

---

salpiglossis sinuata *(noun)*

Chilean herb having velvety funnel-shaped yellowish or violet flowers with long tonguelike styles at the corolla throat.

- *He looked up “salpiglossis sinuata” because he had never seen it before.*
- *She wrote a short paragraph that included “salpiglossis sinuata.”*

---

salpinctes *(noun)*

A genus of Troglodytidae.

- *He looked up “salpinctes” because he had never seen it before.*
- *She wrote a short paragraph that included “salpinctes.”*

---

salpinctes obsoletus *(noun)*

Wren inhabiting badlands and mesa country of western United States and Mexico.

- *Understanding “salpinctes obsoletus” helps you talk about this topic clearly.*
- *They discussed “salpinctes obsoletus” during the group presentation.*

---

salpinx *(noun)*

A tube in the uterus or the ear.

- *They discussed “salpinx” during the group presentation.*
- *Understanding “salpinx” helps you talk about this topic clearly.*

---

salsilla *(noun)*

Tropical vine having umbels of small purple flowers and edible roots sometimes boiled as a potato substitute; Colombia.

- *She wrote a short paragraph that included “salsilla.”*
- *He looked up “salsilla” because he had never seen it before.*

---

saltate *(verb)*

Leap or skip, often in dancing.

- *The sand grains are saltated by the wind.*
- *Learners should practice how to use “saltate” in real sentences.*

---

saltcellar *(noun)*

A small container for holding salt at the dining table.

- *She wrote a short paragraph that included “saltcellar.”*
- *He looked up “saltcellar” because he had never seen it before.*

---

saltish *(adjective)*

Somewhat salty.

- *Students compared “saltish” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “saltish.”*

---

saltlike *(adjective)*

Resembling a compound formed by replacing hydrogen in an acid by a metal.

- *A “saltlike” approach may work better in this case.*
- *Would you call this situation “saltlike”? Explain why.*

Feeds on pines in northern United States.

- *They discussed "saratoga spittlebug" during the group presentation.*
- *In class, the teacher used "saratoga spittlebug" to mean feeds on pines in northern united states.*

---

sarcenet *(noun)*

A fine soft silk fabric often used for linings.

- *She wrote a short paragraph that included "sarcenet."*
- *He looked up "sarcenet" because he had never seen it before.*

---

sarcobatus *(noun)*

One species: greasewood.

- *They discussed "sarcobatus" during the group presentation.*
- *She wrote a short paragraph that included "sarcobatus."*

sarcobatus vermiculatus *(noun)*

Low hardy much-branched spiny shrub common in alkaline soils of western America.

- *The article explained what "sarcobatus vermiculatus" means with a simple example.*
- *She wrote a short paragraph that included "sarcobatus vermiculatus."*

sarcocephalus *(noun)*

Genus of tropical African trees and shrubs.

- *The article explained what "sarcocephalus" means with a simple example.*
- *In class, the teacher used "sarcocephalus" to mean genus of tropical african trees and shrubs.*

sarcocephalus diderrichii *(noun)*

Large African forest tree yielding a strong hard yellow to golden brown lumber; sometimes placed in genus Sarcocephalus.

- *They discussed "sarcocephalus diderrichii" during the group presentation.*
- *In class, the teacher used "sarcocephalus diderrichii" to mean large african forest tree yielding a strong hard....*

sarcocephalus esculentus *(noun)*

A stout spreading or semi-climbing tropical shrub with round brownish-red warty fruit; Africa.

- *In class, the teacher used "sarcocephalus esculentus" to mean a stout spreading or semi-climbing tropical shrub....*
- *Understanding "sarcocephalus esculentus" helps you talk about this topic clearly.*

sarcocephalus latifolius *(noun)*

A stout spreading or semi-climbing tropical shrub with round brownish-red warty fruit; Africa.

- *The article explained what "sarcocephalus latifolius" means with a simple example.*
- *They discussed "sarcocephalus latifolius" during the group presentation.*

sarcochilus *(noun)*

Diminutive epiphytic or lithophytic orchids with clumped short-stemmed foliage and arching racemes of colorful flowers; Australia and Polynesia to southeastern Asia.

- *Understanding "sarcochilus" helps you talk about this topic clearly.*
- *He looked up "sarcochilus" because he had never seen it before.*

sarcochilus falcatus *(noun)*

Diminutive Australian orchid with loose racemes of fragrant white flowers with purple and orange markings on the lip.

- *The article explained what "sarcochilus falcatus" means with a simple example.*
- *She wrote a short paragraph that included "sarcochilus falcatus."*

sarcocystidean *(noun)*

Parasite of the muscles of vertebrates.

- *In class, the teacher used "sarcocystidean" to mean parasite of the muscles of vertebrates.*
- *Understanding "sarcocystidean" helps you talk about this topic clearly.*

sarcocystieian *(noun)*

Parasite of the muscles of vertebrates.

- *They discussed "sarcocystieian" during the group presentation.*
- *The article explained what "sarcocystieian" means with a simple example.*

sarcodes *(noun)*

Snow plant; in some classifications placed in family Pyrolaceae.

- *In class, the teacher used "sarcodes" to mean snow plant; in some classifications placed in....*
- *He looked up "sarcodes" because he had never seen it before.*

sarcodes sanguinea *(noun)*

A fleshy bright red saprophytic plant of the mountains of western North America that appears in early spring while snow is on the ground.

- *The article explained what "sarcodes sanguinea" means with a simple example.*
- *In class, the teacher used "sarcodes sanguinea" to mean a fleshy bright red saprophytic plant of the....*

sarcodina *(noun)*

Characterized by the formation of pseudopods for locomotion and taking food: Actinopoda; Rhizopoda.

- *In class, the teacher used "sarcodina" to mean characterized by the formation of pseudopods for....*
- *They discussed "sarcodina" during the group presentation.*

---

sarcodine *(noun)*

Protozoa that move and capture food by forming pseudopods.

- *He looked up "sarcodine" because he had never seen it before.*
- *In class, the teacher used "sarcodine" to mean protozoa that move and capture food by forming....*

---

sarcodinian *(noun)*

Protozoa that move and capture food by forming pseudopods.

- *They discussed "sarcodinian" during the group presentation.*
- *In class, the teacher used "sarcodinian" to mean protozoa that move and capture food by forming....*

---

sarcolemmal *(adjective)*

Of or relating to the sarcolemma.

- *Students compared "sarcolemmal" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "sarcolemmal."*

---

sarcolemmic *(adjective)*

Of or relating to sarcolemma.

- *The speaker chose "sarcolemmic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "sarcolemmic."*

---

sarcolemnous *(adjective)*

Of or relating to sarcolemma.

- *A "sarcolemnous" approach may work better in this case.*
- *Would you call this situation "sarcolemnous"? Explain why.*

---

sarcophaga carnaria *(noun)*

Fly whose larvae feed on carrion or the flesh of living animals.

- *In class, the teacher used "sarcophaga carnaria" to mean fly whose larvae feed on carrion or the flesh of....*
- *The article explained what "sarcophaga carnaria" means with a simple example.*

---

sarcophilus *(noun)*

Tasmanian devil.

- *The article explained what "sarcophilus" means with a simple example.*
- *She wrote a short paragraph that included "sarcophilus."*

---

sarcophilus hariisi *(noun)*

Small ferocious carnivorous marsupial having a mostly black coat and long tail.

- *In class, the teacher used "sarcophilus hariisi" to mean small ferocious carnivorous marsupial having a....*
- *The article explained what "sarcophilus hariisi" means with a simple example.*

---

sarcoplasm *(noun)*

The cytoplasm of a striated muscle fiber.

- *The article explained what "sarcoplasm" means with a simple example.*
- *She wrote a short paragraph that included "sarcoplasm."*

---

sarcoptid *(noun)*

Whitish mites that attack the skin of humans and other animals.

- *The article explained what "sarcoptid" means with a simple example.*
- *In class, the teacher used "sarcoptid" to mean whitish mites that attack the skin of humans and....*

---

sarcoptidae *(noun)*

Small whitish mites.

- *The article explained what "sarcoptidae" means with a simple example.*

- *She wrote a short paragraph that included "sarcoptidae."*

---

sarcorhamphus *(noun)*

Usually containing only the king vulture.

- *He looked up "sarcorhamphus" because he had never seen it before.*
- *She wrote a short paragraph that included "sarcorhamphus."*

---

sarcorhamphus papa *(noun)*

Large black-and-white vulture of South America and Central America; have colorful wattles and wartlike protuberances on head and neck.

- *He looked up "sarcorhamphus papa" because he had never seen it before.*
- *She wrote a short paragraph that included "sarcorhamphus papa."*

---

sarcoscypha coccinea *(noun)*

A discomycete that is a harbinger of spring; the fruiting body is thin and tough and saucer-shaped (about the size of quarter to a half dollar) with a deep bright red upper surface and a whitish exterior.

- *The article explained what "sarcoscypha coccinea" means with a simple example.*
- *She wrote a short paragraph that included "sarcoscypha coccinea."*

---

sarcoscyphaceae *(noun)*

Family of fungi belonging to the order Pezizales.

- *He looked up "sarcoscyphaceae" because he had never seen it before.*
- *In class, the teacher used "sarcoscyphaceae" to mean family of fungi belonging to the order pezizales.*

---

sarcosomal *(adjective)*

Of or relating to sarcosomes.

- *Would you call this situation "sarcosomal"? Explain why.*
- *Her writing became clearer after she learned "sarcosomal."*

---

sarcosomataceae *(noun)*

A type of ascomycetous fungus.

- *She wrote a short paragraph that included "sarcosomataceae."*
- *They discussed "sarcosomataceae" during the group presentation.*

---

sarcosome *(noun)*

A large mitochondrion in a striated muscle fiber.

- *In class, the teacher used "sarcosome" to mean a large mitochondrion in a striated muscle fiber.*
- *He looked up "sarcosome" because he had never seen it before.*

---

sarcosporidia *(noun)*

Imperfectly known parasites of the muscles of vertebrates.

- *The article explained what "sarcosporidia" means with a simple example.*
- *They discussed "sarcosporidia" during the group presentation.*

---

sarcosporidian *(noun)*

Parasite of the muscles of vertebrates.

- *They discussed "sarcosporidian" during the group presentation.*
- *The article explained what "sarcosporidian" means with a simple example.*

---

sarcostemma *(noun)*

Succulent subshrubs or vines; tropical and subtropical India and Africa and Malaysia.

- *She wrote a short paragraph that included "sarcostemma."*
- *He looked up "sarcostemma" because he had never seen it before.*

---

sarcostemma acidum *(noun)*

Leafless East Indian vine; its sour milky juice formerly used to make an intoxicating drink.

- *In class, the teacher used "sarcostemma acidum" to mean leafless east indian vine; its sour milky juice....*
- *He looked up "sarcostemma acidum" because he had never seen it before.*

---

sarcostyle *(noun)*

One of many contractile filaments that make up a striated muscle fiber.

- *They discussed "sarcostyle" during the group presentation.*
- *Understanding "sarcostyle" helps you talk about this topic clearly.*

---

sarda chiliensis *(noun)*

Common bonito of Pacific coast of the Americas; its dark oily flesh cans well.

- *Understanding "sarda chiliensis" helps you talk about this topic clearly.*
- *They discussed "sarda chiliensis" during the group presentation.*

---

sardina pilchardus *(noun)*

Small fishes found in great schools along coasts of Europe; smaller and rounder than herring.

- *They discussed "sardina pilchardus" during the group presentation.*
- *He looked up "sardina pilchardus" because he had never seen it before.*

---

sardinops caerulea *(noun)*

Small pilchards common off the pacific coast of North America.

- *The article explained what "sardinops caerulea" means with a simple example.*
- *They discussed "sardinops caerulea" during the group presentation.*

---

sardius *(noun)*

A deep orange-red variety of chalcedony.

- *She wrote a short paragraph that included "sardius."*
- *He looked up "sardius" because he had never seen it before.*

---

sargassum bacciferum *(noun)*

Brown algae with rounded bladders forming dense floating masses in tropical Atlantic waters as in the Sargasso Sea.

- *The article explained what "sargassum bacciferum" means with a simple example.*
- *They discussed "sargassum bacciferum" during the group presentation.*

---

sarpanitu *(noun)*

Consort of Marduk.

- *They discussed "sarpanitu" during the group presentation.*
- *In class, the teacher used "sarpanitu" to mean consort of marduk.*

---

sarraceniaceae *(noun)*

Insectivorous plants.

- *She wrote a short paragraph that included "sarraceniaceae."*
- *The article explained what "sarraceniaceae" means with a simple example.*

---

sarraceniales *(noun)*

Plants that are variously modified to serve as insect traps: families Sarraceniaceae; Nepenthaceae; Droseraceae.

- *They discussed "sarraceniales" during the group presentation.*
- *In class, the teacher used "sarraceniales" to mean plants that are variously modified to serve as....*

---

sarsenet *(noun)*

A fine soft silk fabric often used for linings.

- *They discussed "sarsenet" during the group presentation.*
- *She wrote a short paragraph that included "sarsenet."*

---

sassaby *(noun)*

A large South African antelope; considered the swiftest hoofed mammal.

- *Understanding "sassaby" helps you talk about this topic clearly.*
- *The article explained what "sassaby" means with a simple example.*

---

sassafras albidum *(noun)*

Yellowwood tree with brittle wood and aromatic leaves and bark; source of sassafras oil; widely distributed in eastern North America.

- *They discussed "sassafras albidum" during the group presentation.*
- *In class, the teacher used "sassafras albidum" to mean yellowwood tree with brittle wood and aromatic....*

---

satang *(noun)*

100 satangs equal 1 baht in Thailand.

- *Understanding "satang" helps you talk about this topic clearly.*
- *The article explained what "satang" means with a simple example.*

---

satiable *(adjective)*

Capable of being sated.

- *A satiable thirst.*
- *A satiable appetite.*

---

satinet *(noun)*

A fabric with a finish resembling satin but made partly or wholly from cotton or synthetic fiber.

- *He looked up "satinet" because he had never seen it before.*
- *She wrote a short paragraph that included "satinet."*

---

satinette *(noun)*

A fabric with a finish resembling satin but made partly or wholly from cotton or synthetic fiber.

- *They discussed "satinette" during the group presentation.*
- *Understanding "satinette" helps you talk about this topic clearly.*

---

satinleaf *(noun)*

Tropical American timber tree with dark hard heavy wood and small plumlike purple fruit.

- *The article explained what "satinleaf" means with a simple example.*
- *In class, the teacher used "satinleaf" to mean tropical american timber tree with dark hard heavy....*

---

satinpod *(noun)*

Southeastern European plant cultivated for its fragrant purplish flowers and round flat papery silver-white seedpods that are used for indoor decoration.

- *Understanding "satinpod" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "satinpod."*

---

satisfactoriness *(noun)*

The quality of giving satisfaction sufficient to meet a demand or requirement.

- *They discussed "satisfactoriness" during the group presentation.*
- *In class, the teacher used "satisfactoriness" to mean the quality of giving satisfaction sufficient to....*

---

satisfier *(noun)*

Any agent capable of producing satisfaction.

- *He looked up "satisfier" because he had never seen it before.*
- *She wrote a short paragraph that included "satisfier."*

---

satureia hortensis *(noun)*

Erect annual herb with oval leaves and pink flowers; used to flavor e.g. meats or soups or salads; southeastern Europe and naturalized elsewhere.

- *She wrote a short paragraph that included "satureia hortensis."*
- *He looked up "satureia hortensis" because he had never seen it before.*

---

satureia montana *(noun)*

Erect perennial subshrub having pink or white flowers and leathery leaves with a flavor of thyme; southern Europe.

- *In class, the teacher used "satureia montana" to mean erect perennial subshrub having pink or white....*
- *The article explained what "satureia montana" means with a simple example.*

---

satureja acinos *(noun)*

Fragrant European mint having clusters of small violet-and-white flowers; naturalized especially in eastern North America.

- *Understanding "satureja acinos" helps you talk about this topic clearly.*
- *They discussed "satureja acinos" during the group presentation.*

satureja calamintha glandulosa *(noun)*

Low-growing strongly aromatic perennial herb of southern Europe to Great Britain; naturalized in United States.

- *They discussed "satureja calamintha glandulosa" during the group presentation.*
- *The article explained what "satureja calamintha glandulosa" means with a simple example.*

satureja calamintha officinalis *(noun)*

Mint-scented perennial of central and southern Europe.

- *Understanding "satureja calamintha officinalis" helps you talk about this topic clearly.*
- *The article explained what "satureja calamintha officinalis" means with a simple example.*

satureja douglasii *(noun)*

Trailing perennial evergreen herb of northwestern United States with small white flowers; used medicinally.

- *Understanding "satureja douglasii" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "satureja douglasii."*

satureja grandiflora *(noun)*

Aromatic herb with large pink flowers; southern and southeastern Europe; Anatolia; northern Iran.

- *He looked up "satureja grandiflora" because he had never seen it before.*
- *They discussed "satureja grandiflora" during the group presentation.*

satureja hortensis *(noun)*

Erect annual herb with oval leaves and pink flowers; used to flavor e.g. meats or soups or salads; southeastern Europe and naturalized elsewhere.

- *Understanding "satureja hortensis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "satureja hortensis."*

satureja montana *(noun)*

Erect perennial subshrub having pink or white flowers and leathery leaves with a flavor of thyme; southern Europe.

- *She wrote a short paragraph that included "satureja montana."*
- *He looked up "satureja montana" because he had never seen it before.*

satureja nepeta *(noun)*

Low-growing strongly aromatic perennial herb of southern Europe to Great Britain; naturalized in United States.

- *Understanding "satureja nepeta" helps you talk about this topic clearly.*
- *They discussed "satureja nepeta" during the group presentation.*

satureja vulgaris *(noun)*

Aromatic herb having heads of small pink or whitish flowers; widely distributed in United States, Europe and Asia.

- *Understanding "satureja vulgaris" helps you talk about this topic clearly.*
- *They discussed "satureja vulgaris" during the group presentation.*

saturniid *(noun)*

Large brightly colored and usually tropical moth; larvae spin silken cocoons.

- *She wrote a short paragraph that included "saturniid."*
- *They discussed "saturniid" during the group presentation.*

saturniid moth *(noun)*

Large brightly colored and usually tropical moth; larvae spin silken cocoons.

- *They discussed "saturniid moth" during the group presentation.*
- *He looked up "saturniid moth" because he had never seen it before.*

saturniidae *(noun)*

Important and widely distributed family of moths including some of the largest insects known.

- *She wrote a short paragraph that included "saturniidae."*
- *The article explained what "saturniidae" means with a simple example.*

satyric *(adjective)*

Of or relating to or having the characteristics of a satyr.

- *This satyric old man pursues young girls.*
- *A "satyric" approach may work better in this case.*

---

satyridae *(noun)*

A widely distributed family of butterflies common near the edges of woods.

- *In class, the teacher used "satyridae" to mean a widely distributed family of butterflies common....*
- *The article explained what "satyridae" means with a simple example.*

---

sauce chausseur *(noun)*

Brown sauce and tomato puree with onions and mushrooms and dry white wine.

- *He looked up "sauce chausseur" because he had never seen it before.*
- *She wrote a short paragraph that included "sauce chausseur."*

---

sauceboat *(noun)*

A dish (often boat-shaped) for serving gravy or sauce.

- *The article explained what "sauceboat" means with a simple example.*
- *In class, the teacher used "sauceboat" to mean a dish (often boat-shaped) for serving gravy or sauce.*

---

saucepot *(noun)*

A cooking pot that has handles on either side and tight fitting lid; used for stewing or boiling.

- *He looked up "saucepot" because he had never seen it before.*
- *She wrote a short paragraph that included "saucepot."*

---

saunterer *(noun)*

Someone who walks at a leisurely pace.

- *She wrote a short paragraph that included "saunterer."*
- *He looked up "saunterer" because he had never seen it before.*

---

saurischia *(noun)*

Extinct terrestrial reptiles: theropods (carnivorous); sauropods (herbivorous).

- *In class, the teacher used "saurischia" to mean extinct terrestrial reptiles: theropods....*
- *They discussed "saurischia" during the group presentation.*

---

saurischian *(noun)*

Herbivorous or carnivorous dinosaur having a three-pronged pelvis like that of a crocodile.

- *Understanding "saurischian" helps you talk about this topic clearly.*
- *The article explained what "saurischian" means with a simple example.*

---

saurischian dinosaur *(noun)*

Herbivorous or carnivorous dinosaur having a three-pronged pelvis like that of a crocodile.

- *The article explained what "saurischian dinosaur" means with a simple example.*
- *In class, the teacher used "saurischian dinosaur" to mean herbivorous or carnivorous dinosaur having a....*

---

sauromalus *(noun)*

Chuckwallas.

- *Understanding "sauromalus" helps you talk about this topic clearly.*
- *In class, the teacher used "sauromalus" to mean chuckwallas.*

---

sauromalus obesus *(noun)*

A herbivorous lizard that lives among rocks in the arid parts of southwestern United States and Mexico.

- *She wrote a short paragraph that included "sauromalus obesus."*
- *They discussed "sauromalus obesus" during the group presentation.*

---

sauropoda *(noun)*

Any of the sauropod dinosaurs.

- *Understanding "sauropoda" helps you talk about this topic clearly.*

- *He looked up "sauropoda" because he had never seen it before.*

---

sauropodomorpha *(noun)*

Gigantic herbivorous dinosaurs having huge bodies with long necks and small heads: Prosauropoda and Sauropoda (apatosaurus, diplodocus and titanosaurs).

- *The article explained what "sauropodomorpha" means with a simple example.*
- *They discussed "sauropodomorpha" during the group presentation.*

---

sauropterygia *(noun)*

Extinct marine reptiles: plesiosaurs; nothosaurs.

- *She wrote a short paragraph that included "sauropterygia."*
- *He looked up "sauropterygia" because he had never seen it before.*

---

saurosuchus *(noun)*

Early archosaurian carnivore.

- *The article explained what "saurosuchus" means with a simple example.*
- *In class, the teacher used "saurosuchus" to mean early archosaurian carnivore.*

---

saururaceae *(noun)*

Family of perennial aromatic herbs: genera Saururus, Anemopsis, Houttuynia.

- *They discussed "saururaceae" during the group presentation.*
- *She wrote a short paragraph that included "saururaceae."*

---

saururus *(noun)*

Type genus of the Saururaceae: lizard's-tails.

- *In class, the teacher used "saururus" to mean type genus of the saururaceae: lizard's-tails.*
- *The article explained what "saururus" means with a simple example.*

---

saururus cernuus *(noun)*

North American herbaceous perennial of wet places having slender curled racemes of small white flowers.

- *She wrote a short paragraph that included "saururus cernuus."*
- *Understanding "saururus cernuus" helps you talk about this topic clearly.*

---

saussurea *(noun)*

Genus of herbs of temperate and cool regions of Eurasia.

- *He looked up "saussurea" because he had never seen it before.*
- *She wrote a short paragraph that included "saussurea."*

---

saussurea costus *(noun)*

Annual herb of the eastern Himalayas (Kashmir) having purple florets and a fragrant root that yields a volatile oil used in perfumery and for preserving furs.

- *She wrote a short paragraph that included "saussurea costus."*
- *He looked up "saussurea costus" because he had never seen it before.*

---

saussurea lappa *(noun)*

Annual herb of the eastern Himalayas (Kashmir) having purple florets and a fragrant root that yields a volatile oil used in perfumery and for preserving furs.

- *He looked up "saussurea lappa" because he had never seen it before.*
- *They discussed "saussurea lappa" during the group presentation.*

---

savinien cyrano de bergerac *(noun)*

A French soldier and dramatist remembered chiefly for fighting many duels (often over the size of his nose); was immortalized in 1897 in a play by Edmond Rostand (1619-1655).

- *The article explained what "savinien cyrano de bergerac" means with a simple example.*
- *She wrote a short paragraph that included "savinien cyrano de bergerac."*

---

savoriness *(noun)*

Having an appetizing flavor.

- *The article explained what "savoriness" means with a simple example.*
- *In class, the teacher used "savoriness" to mean having an appetizing flavor.*

---

savorless *(adjective)*

Lacking taste or flavor or tang.

- *Students compared "savorless" with similar adjectives in the lesson.*
- *Would you call this situation "savorless"? Explain why.*

---

savorlessness *(noun)*

The property of having no flavor.

- *She wrote a short paragraph that included "savorlessness."*
- *He looked up "savorlessness" because he had never seen it before.*

---

savourless *(adjective)*

Lacking taste or flavor or tang.

- *Her writing became clearer after she learned "savourless."*
- *Would you call this situation "savourless"? Explain why.*

---

savourlessness *(noun)*

The property of having no flavor.

- *He looked up "savourlessness" because he had never seen it before.*
- *In class, the teacher used "savourlessness" to mean the property of having no flavor.*

---

sawbill *(noun)*

Large crested fish-eating diving duck having a slender hooked bill with serrated edges.

- *In class, the teacher used "sawbill" to mean large crested fish-eating diving duck having a....*
- *Understanding "sawbill" helps you talk about this topic clearly.*

---

sawpit *(noun)*

A pit over which lumber is positioned to be sawed by two men with a long two-handed saw.

- *He looked up "sawpit" because he had never seen it before.*
- *Understanding "sawpit" helps you talk about this topic clearly.*

---

sawtoothed-edged *(adjective)*

(of leaves) having an edged resembling a sawtooth.

- *Would you call this situation "sawtoothed-edged"? Explain why.*
- *It is useful to describe something as "sawtoothed-edged" when it is (of leaves) having an edged resembling a sawtooth.*

---

sawwort *(noun)*

European perennial whose serrate leaves yield a yellow dye.

- *They discussed "sawwort" during the group presentation.*
- *He looked up "sawwort" because he had never seen it before.*

---

saxatile *(adjective)*

Growing on or living among rocks.

- *Her writing became clearer after she learned "saxatile."*
- *A "saxatile" approach may work better in this case.*

---

saxe-gothea *(noun)*

One species: Prince Albert's yew.

- *In class, the teacher used "saxe-gothea" to mean one species: prince albert's yew.*
- *Understanding "saxe-gothea" helps you talk about this topic clearly.*

---

saxegothea *(noun)*

One species: Prince Albert's yew.

- *The article explained what "saxegothea" means with a simple example.*
- *They discussed "saxegothea" during the group presentation.*

---

saxhorn *(noun)*

Any of a family of brass wind instruments that resemble a bugle with valves.

- *The article explained what "saxhorn" means with a simple example.*
- *In class, the teacher used "saxhorn" to mean any of a family of brass wind instruments that....*

---

saxicola *(noun)*

Old World chats.

- *In class, the teacher used "saxicola" to mean old world chats.*
- *He looked up "saxicola" because he had never seen it before.*

---

saxicola rubetra *(noun)*

Brown-and-buff European songbird of grassy meadows.

- *The article explained what "saxicola rubetra" means with a simple example.*
- *In class, the teacher used "saxicola rubetra" to mean brown-and-buff european songbird of grassy meadows.*

---

saxicola torquata *(noun)*

Common European chat with black plumage and a reddish-brown breast.

- *She wrote a short paragraph that included "saxicola torquata."*
- *He looked up "saxicola torquata" because he had never seen it before.*

---

saxicoline *(adjective)*

Growing on or living among rocks.

- *The speaker chose "saxicoline" because it captured the feeling precisely.*
- *It is useful to describe something as "saxicoline" when it is growing on or living among rocks.*

---

saxicolous *(adjective)*

Growing on or living among rocks.

- *It is useful to describe something as "saxicolous" when it is growing on or living among rocks.*
- *A "saxicolous" approach may work better in this case.*

---

saxicolous plant *(noun)*

Plants growing among rocks.

- *They discussed "saxicolous plant" during the group presentation.*
- *In class, the teacher used "saxicolous plant" to mean plants growing among rocks.*

---

saxifraga aizoides *(noun)*

Tufted evergreen perennial having ciliate leaves and yellow corymbose flowers often spotted orange.

- *Understanding "saxifraga aizoides" helps you talk about this topic clearly.*
- *The article explained what "saxifraga aizoides" means with a simple example.*

---

saxifraga hypnoides *(noun)*

Tufted or mat-forming perennial of mountains of Europe; cultivated for its white flowers.

- *They discussed "saxifraga hypnoides" during the group presentation.*
- *He looked up "saxifraga hypnoides" because he had never seen it before.*

---

saxifraga oppositifolia *(noun)*

Plants forming dense cushions with bright reddish-lavender flowers; rocky areas of Europe and Asia and western North America.

- *He looked up "saxifraga oppositifolia" because he had never seen it before.*
- *In class, the teacher used "saxifraga oppositifolia" to mean plants forming dense cushions with bright....*

---

saxifraga sarmentosam *(noun)*

Eastern Asiatic saxifrage with racemes of small red-and-white flowers; spreads by numerous creeping stolons.

- *He looked up "saxifraga sarmentosam" because he had never seen it before.*
- *They discussed "saxifraga sarmentosam" during the group presentation.*

---

saxifragaceae *(noun)*

A large and diverse family of evergreen or deciduous herbs; widely distributed in northern temperate and cold regions; sometimes includes genera of the family Hydrangeaceae.

- *He looked up "saxifragaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "saxifragaceae."*

saxist *(noun)*

A musician who plays the saxophone.

- *Understanding "saxist" helps you talk about this topic clearly.*
- *The article explained what "saxist" means with a simple example.*

sayornis phoebe *(noun)*

Small dun-colored North American flycatcher.

- *They discussed "sayornis phoebe" during the group presentation.*
- *Understanding "sayornis phoebe" helps you talk about this topic clearly.*

scabicide *(noun)*

A drug that destroys the itch mite that causes scabies.

- *She wrote a short paragraph that included "scabicide."*
- *They discussed "scabicide" during the group presentation.*

scalage *(noun)*

The act of scaling in weight or quantity or dimension.

- *In class, the teacher used "scalage" to mean the act of scaling in weight or quantity or dimension.*
- *Understanding "scalage" helps you talk about this topic clearly.*

scalenus *(noun)*

Any of four pairs of muscles extending from the cervical vertebrae to the second rib; involved in moving the neck and in breathing.

- *He looked up "scalenus" because he had never seen it before.*
- *In class, the teacher used "scalenus" to mean any of four pairs of muscles extending from the....*

scalic *(adjective)*

Of or related to a musical scale.

- *Scalic patterns.*
- *A "scalic" approach may work better in this case.*

scaliness *(noun)*

The property of being scaly.

- *They discussed "scaliness" during the group presentation.*
- *The article explained what "scaliness" means with a simple example.*

scallopine *(noun)*

Sauteed cutlets (usually veal or poultry) that have been pounded thin and coated with flour.

- *He looked up "scallopine" because he had never seen it before.*
- *They discussed "scallopine" during the group presentation.*

scaly pholiota *(noun)*

A gilled fungus with a cap and stalk that are conspicuously scaly with upright scales; gills develop a greenish tinge with age.

- *Understanding "scaly pholiota" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "scaly pholiota."*

scammony *(noun)*

Resin from the root of Convolvulus scammonia.

- *She wrote a short paragraph that included "scammony."*
- *Understanding "scammony" helps you talk about this topic clearly.*

scammonyroot *(noun)*

Tropical American prostrate or climbing herbaceous perennial having an enormous starchy root; sometimes held to be source of the sweet potato.

- *The article explained what "scammonyroot" means with a simple example.*
- *Understanding "scammonyroot" helps you talk about this topic clearly.*

scampo *(noun)*

Caught in European waters; slenderer than American lobster.

- *She wrote a short paragraph that included "scampo."*
- *He looked up "scampo" because he had never seen it before.*

---

scandalmonger *(noun)*

A person who spreads malicious gossip.

- *In class, the teacher used "scandalmonger" to mean a person who spreads malicious gossip.*
- *The article explained what "scandalmonger" means with a simple example.*

---

scandent *(adjective)*

Used especially of plants; having a tendency to climb.

- *Plants of a creeping or scandent nature.*
- *Would you call this situation "scandent"? Explain why.*

---

scandentia *(noun)*

A small order comprising only the tree shrews: in some classifications tree shrews are considered either primates (and included in the suborder Prosimii) or true insectivores (and included in the order Insectivora).

- *In class, the teacher used "scandentia" to mean a small order comprising only the tree shrews: in....*
- *Understanding "scandentia" helps you talk about this topic clearly.*

---

scantness *(noun)*

The quality of being meager; -George Eliot.

- *In class, the teacher used "scantness" to mean the quality of being meager; -george eliot.*
- *They discussed "scantness" during the group presentation.*

---

scaphiopus *(noun)*

New World spadefoot toads.

- *She wrote a short paragraph that included "scaphiopus."*
- *The article explained what "scaphiopus" means with a simple example.*

---

scaphiopus bombifrons *(noun)*

This spadefoot toad lives in plains and hills and river bottoms in areas of low rainfall east of the Rocky Mountains.

- *Understanding "scaphiopus bombifrons" helps you talk about this topic clearly.*
- *They discussed "scaphiopus bombifrons" during the group presentation.*

---

scaphiopus hammondii *(noun)*

This spadefoot toad live in California.

- *They discussed "scaphiopus hammondii" during the group presentation.*
- *She wrote a short paragraph that included "scaphiopus hammondii."*

---

scaphiopus multiplicatus *(noun)*

This spadefoot toad lives in the southwestern United States.

- *They discussed "scaphiopus multiplicatus" during the group presentation.*
- *In class, the teacher used "scaphiopus multiplicatus" to mean this spadefoot toad lives in the southwestern....*

---

scaphopod *(noun)*

Burrowing marine mollusk.

- *She wrote a short paragraph that included "scaphopod."*
- *Understanding "scaphopod" helps you talk about this topic clearly.*

---

scaphopoda *(noun)*

Small class of bilaterally symmetrical marine forms comprising the tooth shells.

- *Understanding "scaphopoda" helps you talk about this topic clearly.*
- *The article explained what "scaphopoda" means with a simple example.*

---

Parrotfishes.

- *In class, the teacher used "scaridae" to mean parrotfishes.*
- *They discussed "scaridae" during the group presentation.*

---

scarlet hamelia *(noun)*

Handsome shrub with showy orange to scarlet or crimson flowers; Florida and West Indies to Mexico and Brazil.

- *The article explained what "scarlet hamelia" means with a simple example.*
- *Understanding "scarlet hamelia" helps you talk about this topic clearly.*

---

scartella *(noun)*

A genus of Blenniidae.

- *She wrote a short paragraph that included "scartella."*
- *He looked up "scartella" because he had never seen it before.*

---

scartella cristata *(noun)*

Inhabits both coasts of tropical Atlantic.

- *He looked up "scartella cristata" because he had never seen it before.*
- *They discussed "scartella cristata" during the group presentation.*

---

scatophagy *(noun)*

The eating of excrement or other filth.

- *She wrote a short paragraph that included "scatophagy."*
- *He looked up "scatophagy" because he had never seen it before.*

---

scauper *(noun)*

A graver used to scoop out broad areas when engraving wood or metal.

- *They discussed "scauper" during the group presentation.*
- *The article explained what "scauper" means with a simple example.*

---

sceliphron *(noun)*

Mud daubers.

- *They discussed "sceliphron" during the group presentation.*
- *She wrote a short paragraph that included "sceliphron."*

---

sceloglaux *(noun)*

A genus of Strigidae.

- *They discussed "sceloglaux" during the group presentation.*
- *She wrote a short paragraph that included "sceloglaux."*

---

sceloglaux albifacies *(noun)*

Almost extinct owl of New Zealand.

- *Understanding "sceloglaux albifacies" helps you talk about this topic clearly.*
- *The article explained what "sceloglaux albifacies" means with a simple example.*

---

sceloporus graciosus *(noun)*

A ground dweller that prefers open ground and scattered low bushes; of United States west between Rocky and Sierra Nevada Mountains.

- *They discussed "sceloporus graciosus" during the group presentation.*
- *He looked up "sceloporus graciosus" because he had never seen it before.*

---

scend *(verb)*

Rise or heave upward under the influence of a natural force such as a wave.

- *In everyday English, people use "scend" when talking about this idea.*
- *He did not know how to use "scend" until he saw an example.*

---

sceneshifter *(noun)*

A stagehand responsible for moving scenery.

- *They discussed "sceneshifter" during the group presentation.*
- *In class, the teacher used "sceneshifter" to mean a stagehand responsible for moving scenery.*

---

scentless hayweed *(noun)*

Ubiquitous European annual weed with white flowers and finely divided leaves naturalized and sometimes cultivated in eastern North America; sometimes included in genus Matricaria.

- *The article explained what “scentless hayweed” means with a simple example.*
- *They discussed “scentless hayweed” during the group presentation.*

---

scentless mayweed *(noun)*

Ubiquitous European annual weed with white flowers and finely divided leaves naturalized and sometimes cultivated in eastern North America; sometimes included in genus Matricaria.

- *In class, the teacher used "schistosomatidae" to mean a family of trematoda.*
- *The article explained what "schistosomatidae" means with a simple example.*

schizachyrium *(noun)*

Overlaps the genus Andropogon.

- *She wrote a short paragraph that included "schizachyrium."*
- *Understanding "schizachyrium" helps you talk about this topic clearly.*

schizachyrium scoparium *(noun)*

Handsome hardy North American grass with foliage turning pale bronze in autumn.

- *He looked up "schizachyrium scoparium" because he had never seen it before.*
- *In class, the teacher used "schizachyrium scoparium" to mean handsome hardy north american grass with foliage....*

schizaea *(noun)*

Type genus of the Schizaeaceae cosmopolitan especially in tropics; small leptosporangiate ferns: curly grass fern.

- *In class, the teacher used "schizaea" to mean type genus of the schizaeaceae cosmopolitan....*
- *Understanding "schizaea" helps you talk about this topic clearly.*

schizaea pusilla *(noun)*

Rare small fern of northeastern North America having numerous slender spiraling fronds and forming dense tufts.

- *Understanding "schizaea pusilla" helps you talk about this topic clearly.*
- *He looked up "schizaea pusilla" because he had never seen it before.*

schizaeaceae *(noun)*

Small family of mainly tropical ferns.

- *Understanding "schizaeaceae" helps you talk about this topic clearly.*
- *The article explained what "schizaeaceae" means with a simple example.*

schizanthus *(noun)*

Any plant of the genus Schizanthus having finely divided leaves and showy variegated flowers.

- *He looked up "schizanthus" because he had never seen it before.*
- *Understanding "schizanthus" helps you talk about this topic clearly.*

---

schizocarp *(noun)*

A dry dehiscent fruit that at maturity splits into two or more parts each with a single seed.

- *He looked up "schizocarp" because he had never seen it before.*
- *She wrote a short paragraph that included "schizocarp."*

---

schizogony *(noun)*

Asexual reproduction by multiple fission; characteristic of many sporozoan protozoans.

- *The article explained what "schizogony" means with a simple example.*
- *In class, the teacher used "schizogony" to mean asexual reproduction by multiple fission;....*

---

schizomycetes *(noun)*

A former classification.

- *Understanding "schizomycetes" helps you talk about this topic clearly.*
- *The article explained what "schizomycetes" means with a simple example.*

---

schizopetalon *(noun)*

A dainty South American annual having deeply pinnatifid leaves and racemes of fringed almond-scented purple-white flowers.

- *She wrote a short paragraph that included "schizopetalon."*
- *Understanding "schizopetalon" helps you talk about this topic clearly.*

---

schizopetalon walkeri *(noun)*

A dainty South American annual having deeply pinnatifid leaves and racemes of fringed almond-scented purple-white flowers.

- *He looked up "schizopetalon walkeri" because he had never seen it before.*
- *Understanding "schizopetalon walkeri" helps you talk about this topic clearly.*

---

schizophragma *(noun)*

Small genus of deciduous climbing and creeping shrubs with white flowers in flat clusters; sometimes placed in family Saxifragaceae.

- *In class, the teacher used "schizophragma" to mean small genus of deciduous climbing and creeping....*
- *He looked up "schizophragma" because he had never seen it before.*

---

schizophragma hydrangeoides *(noun)*

Climbing shrub with adhesive aerial roots having opposite leaves and small white flowers in terminal cymes; Himalayas to Taiwan and Japan.

- *He looked up "schizophragma hydrangeoides" because he had never seen it before.*
- *They discussed "schizophragma hydrangeoides" during the group presentation.*

---

schizophyceae *(noun)*

Former terms for Cyanophyceae.

- *They discussed "schizophyceae" during the group presentation.*
- *He looked up "schizophyceae" because he had never seen it before.*

---

schizophyta *(noun)*

Former term for the Cyanophyta.

- *In class, the teacher used "schizophyta" to mean former term for the cyanophyta.*
- *The article explained what "schizophyta" means with a simple example.*

---

schizopoda *(noun)*

In former classifications a division of Malacostraca; superseded by the orders Mysidacea and Euphausiacea.

- *Understanding "schizopoda" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "schizopoda."*

---

schizosaccharomycetaceae *(noun)*

A family of fungi belonging to order Endomycetales.

- *She wrote a short paragraph that included "schizosaccharomycetaceae."*

- *He looked up "schizosaccharomycetaceae" because he had never seen it before.*

---

schlemm's canal *(noun)*

A circular canal in the eye that drains aqueous humor from the anterior chamber of the eye into the anterior ciliary veins.

- *Understanding "schlemm's canal" helps you talk about this topic clearly.*
- *They discussed "schlemm's canal" during the group presentation.*

---

schlepper *(noun)*

(Yiddish) an awkward and stupid person.

- *In class, the teacher used "schlepper" to mean (yiddish) an awkward and stupid person.*
- *The article explained what "schlepper" means with a simple example.*

Large important food fish of Australia; almost indistinguishable from the maigre.

- *In class, the teacher used "sciaena antarctica" to mean large important food fish of australia; almost....*
- *The article explained what "sciaena antarctica" means with a simple example.*

sciaena aquila *(noun)*

Large European marine food fish.

- *She wrote a short paragraph that included "sciaena aquila."*
- *He looked up "sciaena aquila" because he had never seen it before.*

sciaenid *(noun)*

Widely distributed family of carnivorous percoid fishes having a large air bladder used to produce sound.

- *He looked up "sciaenid" because he had never seen it before.*
- *In class, the teacher used "sciaenid" to mean widely distributed family of carnivorous percoid....*

sciaenid fish *(noun)*

Widely distributed family of carnivorous percoid fishes having a large air bladder used to produce sound.

- *In class, the teacher used "sciaenid fish" to mean widely distributed family of carnivorous percoid....*
- *Understanding "sciaenid fish" helps you talk about this topic clearly.*

sciaenidae *(noun)*

Warm-water marine fishes including the drums and grunts and croakers and sea trout.

- *He looked up "sciaenidae" because he had never seen it before.*
- *She wrote a short paragraph that included "sciaenidae."*

sciaenops *(noun)*

A genus of Sciaenidae.

- *They discussed "sciaenops" during the group presentation.*
- *The article explained what "sciaenops" means with a simple example.*

sciaenops ocellatus *(noun)*

Large edible fish found off coast of United States from Massachusetts to Mexico.

- *She wrote a short paragraph that included "sciaenops ocellatus."*
- *They discussed "sciaenops ocellatus" during the group presentation.*

sciarid *(noun)*

Minute blackish gregarious flies destructive to mushrooms and seedlings.

- *The article explained what "sciarid" means with a simple example.*
- *They discussed "sciarid" during the group presentation.*

sciaridae *(noun)*

Fungus gnats.

- *The article explained what "sciaridae" means with a simple example.*
- *Understanding "sciaridae" helps you talk about this topic clearly.*

scilla nonscripta *(noun)*

Sometimes placed in genus Scilla.

- *She wrote a short paragraph that included "scilla nonscripta."*
- *He looked up "scilla nonscripta" because he had never seen it before.*

---

scincella *(noun)*

A reptile genus of Scincidae.

- *In class, the teacher used "scincella" to mean a reptile genus of scincidae.*
- *He looked up "scincella" because he had never seen it before.*

---

scincid *(noun)*

Alert agile lizard with reduced limbs and an elongated body covered with shiny scales; more dependent on moisture than most lizards; found in tropical regions worldwide.

- *She wrote a short paragraph that included "scincid."*
- *He looked up "scincid" because he had never seen it before.*

---

scincid lizard *(noun)*

Alert agile lizard with reduced limbs and an elongated body covered with shiny scales; more dependent on moisture than most lizards; found in tropical regions worldwide.

- *She wrote a short paragraph that included "scincid lizard."*
- *Understanding "scincid lizard" helps you talk about this topic clearly.*

---

scincus *(noun)*

Type genus of Scincidae.

- *He looked up "scincus" because he had never seen it before.*
- *She wrote a short paragraph that included "scincus."*

---

scindapsus *(noun)*

Evergreen climbers with adhesive adventitious roots; southeastern Asia and Brazil.

- *They discussed "scindapsus" during the group presentation.*
- *The article explained what "scindapsus" means with a simple example.*

---

scindapsus aureus *(noun)*

Evergreen liana widely cultivated for its variegated foliage.

- *Understanding "scindapsus aureus" helps you talk about this topic clearly.*
- *The article explained what "scindapsus aureus" means with a simple example.*

---

scintillant *(adjective)*

Having brief brilliant points or flashes of light.

- *Scintillant mica.*
- *Her writing became clearer after she learned "scintillant."*

---

sciolism *(noun)*

Sedge of eastern North America having numerous clustered woolly spikelets.

- *The article explained what "scirpus cyperinus" means with a simple example.*

- *Understanding "scirpus cyperinus" helps you talk about this topic clearly.*

---

scissortail *(noun)*

Grey flycatcher of the southwestern United States and Mexico and Central America having a long forked tail and white breast and salmon and scarlet markings.

- *In class, the teacher used "scissortail" to mean grey flycatcher of the southwestern united states....*
- *Understanding "scissortail" helps you talk about this topic clearly.*

---

scissortailed flycatcher *(noun)*

Grey flycatcher of the southwestern United States and Mexico and Central America having a long forked tail and white breast and salmon and scarlet markings.

- *He looked up "scissortailed flycatcher" because he had never seen it before.*
- *Understanding "scissortailed flycatcher" helps you talk about this topic clearly.*

---

scissure *(noun)*

A long narrow opening.

- *They discussed "scissure" during the group presentation.*
- *He looked up "scissure" because he had never seen it before.*

---

sciuridae *(noun)*

A mammal family of true squirrels including: ground squirrels; marmots; chipmunks; flying squirrels; spermophiles.

- *They discussed "sciuridae" during the group presentation.*
- *In class, the teacher used "sciuridae" to mean a mammal family of true squirrels including: ground....*

---

sciuromorpha *(noun)*

Large more or less primitive rodents: squirrels; marmots; gophers; beavers; etc.

- *In class, the teacher used "sciuromorpha" to mean large more or less primitive rodents: squirrels;....*
- *They discussed "sciuromorpha" during the group presentation.*

---

sciurus hudsonicus *(noun)*

Of northern United States and Canada.

- *They discussed "sciurus hudsonicus" during the group presentation.*
- *Understanding "sciurus hudsonicus" helps you talk about this topic clearly.*

---

sclaff *(noun)*

A poor golf stroke in which the club head hits the ground before hitting the ball.

- *They discussed "sclaff" during the group presentation.*
- *In class, the teacher used "sclaff" to mean a poor golf stroke in which the club head hits the....*

---

scleranthus *(noun)*

Small genus of Old World weedy prostrate annuals: knawel.

- *Understanding "scleranthus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "scleranthus."*

---

scleranthus annuus *(noun)*

Widely distributed low-growing Eurasian herb having narrow leaves and inconspicuous green flowers.

- *He looked up "scleranthus annuus" because he had never seen it before.*
- *Understanding "scleranthus annuus" helps you talk about this topic clearly.*

---

scleroderma bovista *(noun)*

An earthball with a peridium that is firm dry and smooth when young but developing cracks when mature; pale orange-yellow when young and reddish brown at maturity.

- *They discussed "scleroderma bovista" during the group presentation.*
- *He looked up "scleroderma bovista" because he had never seen it before.*

---

scleroderma citrinum *(noun)*

An earthball fungus that is a dingy brownish yellow and a dark purplish interior; the peridium is covered with a pattern of small warts.

- *In class, the teacher used "scleroderma citrinum" to mean an earthball fungus that is a dingy brownish yellow....*
- *The article explained what "scleroderma citrinum" means with a simple example.*

---

scleroderma flavidium *(noun)*

An earthball with a smooth upper surface that is at first buried in sand; the top of the fruiting body opens up to form segments like the ray of an umbel.

- *Understanding "scleroderma flavidium" helps you talk about this topic clearly.*
- *They discussed "scleroderma flavidium" during the group presentation.*

---

sclerodermataceae *(noun)*

A family of fungi or order Sclerodermatales with a single-layered peridium; includes earthballs.

- *He looked up "sclerodermataceae" because he had never seen it before.*
- *She wrote a short paragraph that included "sclerodermataceae."*

---

sclerodermatales *(noun)*

An order of fungi having a peridium surrounding a gleba (sometimes placed in subclass Homobasidiomycetes).

- *Understanding "sclerodermatales" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sclerodermatales."*

---

sclerometer *(noun)*

A measuring instrument that measures the hardness of materials by penetrating them with a stylus that has a diamond point.

- *She wrote a short paragraph that included "sclerometer."*
- *They discussed "sclerometer" during the group presentation.*

---

scleropages *(noun)*

A genus of large freshwater fishes of Australia and Borneo.

- *In class, the teacher used "scleropages" to mean a genus of large freshwater fishes of australia and....*
- *The article explained what "scleropages" means with a simple example.*

---

scleropages jardinii *(noun)*

A species of large fish found in Australian rivers.

- *He looked up "scleropages jardinii" because he had never seen it before.*
- *She wrote a short paragraph that included "scleropages jardinii."*

---

scleropages leichardti *(noun)*

A species of large fish found in Australian rivers.

- *She wrote a short paragraph that included "scleropages leichardti."*
- *The article explained what "scleropages leichardti" means with a simple example.*

---

scleroparei *(noun)*

Scorpionfishes; sculpins; gurnards; greenlings; flying gurnards.

- *She wrote a short paragraph that included "scleroparei."*
- *The article explained what "scleroparei" means with a simple example.*

---

scleroprotein *(noun)*

A simple protein found in horny and cartilaginous tissues and in the lens of the eye.

- *She wrote a short paragraph that included "scleroprotein."*
- *The article explained what "scleroprotein" means with a simple example.*

---

sclerosed *(adjective)*

Relating to or having sclerosis; hardened.

- *Students compared "sclerosed" with similar adjectives in the lesson.*
- *Would you call this situation "sclerosed"? Explain why.*

---

sclerotiniaceae *(noun)*

A fungus family of order Helotiales.

- *She wrote a short paragraph that included "sclerotiniaceae."*
- *They discussed "sclerotiniaceae" during the group presentation.*

---

sclerotomy *(noun)*

Surgical incision of the sclerotic coat of the eye.

- *She wrote a short paragraph that included "sclerotomy."*
- *He looked up "sclerotomy" because he had never seen it before.*

---

sclk *(noun)*

The clock time given by a clock carried on board a spacecraft.

- *The article explained what "sclk" means with a simple example.*
- *In class, the teacher used "sclk" to mean the clock time given by a clock carried on board a....*

---

scoffingly *(adverb)*

In a disrespectful and mocking manner.

- *She spoke "scoffingly," and the audience immediately understood her point.*
- *Try rewriting the sentence and include "scoffingly" naturally.*

---

scoinson arch *(noun)*

An arch that supports part of the wall.

- *Understanding "scoinson arch" helps you talk about this topic clearly.*
- *They discussed "scoinson arch" during the group presentation.*

---

scoke *(noun)*

Tall coarse perennial American herb having small white flowers followed by blackish-red berries on long drooping racemes; young fleshy stems are edible; berries and root are poisonous.

- *They discussed "scoke" during the group presentation.*
- *In class, the teacher used "scoke" to mean tall coarse perennial american herb having small....*

---

scolder *(noun)*

Someone (especially a woman) who annoys people by constantly finding fault.

- *He looked up "scolder" because he had never seen it before.*
- *She wrote a short paragraph that included "scolder."*

---

scollop *(noun)*

Thin slice of meat (especially veal) usually fried or broiled.

- *Understanding "scollop" helps you talk about this topic clearly.*
- *He looked up "scollop" because he had never seen it before.*

---

scolopacidae *(noun)*

Sandpiper family: sandpipers; woodcocks; snipes; tattlers; curlews; godwits; dowitchers.

- *She wrote a short paragraph that included "scolopacidae."*
- *He looked up "scolopacidae" because he had never seen it before.*

---

scolopax *(noun)*

Type of the Scolopacidae: Old World woodcocks.

- *The article explained what "scolopax" means with a simple example.*
- *Understanding "scolopax" helps you talk about this topic clearly.*

---

scolopax rusticola *(noun)*

Short-legged long-billed migratory Old World woodcock.

- *The article explained what "scolopax rusticola" means with a simple example.*
- *She wrote a short paragraph that included "scolopax rusticola."*

---

scolopendrium *(noun)*

A fern thought to resemble a millipede.

- *Understanding "scolopendrium" helps you talk about this topic clearly.*
- *They discussed "scolopendrium" during the group presentation.*

---

scolopendrium nigripes *(noun)*

A fern of the genus Schaffneria.

- *They discussed "scolopendrium nigripes" during the group presentation.*
- *She wrote a short paragraph that included "scolopendrium nigripes."*

scolymus *(noun)*

Small genus of thistlelike herbs of the Mediterranean region.

- *She wrote a short paragraph that included "scolymus."*
- *He looked up "scolymus" because he had never seen it before.*

scolymus hispanicus *(noun)*

A golden thistle of southwestern Europe cultivated for its edible sweet roots and edible leaves and stalks; its yellow flowers are used as a substitute for saffron.

- *Understanding "scolymus hispanicus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "scolymus hispanicus."*

scolytidae *(noun)*

Large family of bark-boring or wood-boring short-beaked beetles; very destructive to forest and fruit trees.

- *They discussed "scolytidae" during the group presentation.*
- *In class, the teacher used "scolytidae" to mean large family of bark-boring or wood-boring....*

scolytus multistriatus *(noun)*

A vector of the fungus causing Dutch elm disease.

- *Understanding "scolytus multistriatus" helps you talk about this topic clearly.*
- *He looked up "scolytus multistriatus" because he had never seen it before.*

scomber scombrus *(noun)*

Important food fish of the northern Atlantic and Mediterranean; its body is greenish-blue with dark bars and small if any scales.

- *She wrote a short paragraph that included "scomber scombrus."*
- *The article explained what "scomber scombrus" means with a simple example.*

scomberesocidae *(noun)*

Only sauries.

- *He looked up "scomberesocidae" because he had never seen it before.*
- *They discussed "scomberesocidae" during the group presentation.*

scomberesox *(noun)*

A genus of Scomberesocidae.

- *In class, the teacher used "scomberesox" to mean a genus of scomberesocidae.*
- *The article explained what "scomberesox" means with a simple example.*

scomberesox saurus *(noun)*

Slender long-beaked fish of temperate Atlantic waters.

- *They discussed "scomberesox saurus" during the group presentation.*
- *He looked up "scomberesox saurus" because he had never seen it before.*

scomberomorus *(noun)*

Spanish mackerels.

- *Understanding "scomberomorus" helps you talk about this topic clearly.*
- *He looked up "scomberomorus" because he had never seen it before.*

scomberomorus cavalla *(noun)*

Large mackerel with long pointed snout; important food and game fish of the eastern Atlantic coast southward to Brazil.

- *Understanding "scomberomorus cavalla" helps you talk about this topic clearly.*
- *In class, the teacher used "scomberomorus cavalla" to mean large mackerel with long pointed snout; important....*

scomberomorus maculatus *(noun)*

A large commercially important mackerel of the Atlantic coastal waters of North America.

- *She wrote a short paragraph that included "scomberomorus maculatus."*
- *Understanding "scomberomorus maculatus" helps you talk about this topic clearly.*

scomberomorus regalis *(noun)*

Large edible mackerel of temperate United States coastal Atlantic waters.

- *The article explained what "scomberomorus regalis" means with a simple example.*
- *In class, the teacher used "scomberomorus regalis" to mean large edible mackerel of temperate united states....*

---

scomberomorus sierra *(noun)*

A Spanish mackerel of western North America.

- *Understanding "scomberomorus sierra" helps you talk about this topic clearly.*
- *They discussed "scomberomorus sierra" during the group presentation.*

---

scombresocidae *(noun)*

Only sauries.

- *They discussed "scombresocidae" during the group presentation.*
- *The article explained what "scombresocidae" means with a simple example.*

---

scombresox *(noun)*

A genus of Scomberesocidae.

- *She wrote a short paragraph that included "scombresox."*
- *He looked up "scombresox" because he had never seen it before.*

---

scombridae *(noun)*

Marine food fishes: mackerels; chub mackerels; tuna.

- *They discussed "scombridae" during the group presentation.*
- *She wrote a short paragraph that included "scombridae."*

---

scombroidea *(noun)*

Mackerels; tunas; albacores; bonitos; swordfishes; sailfishes.

- *Understanding "scombroidea" helps you talk about this topic clearly.*
- *In class, the teacher used "scombroidea" to mean mackerels; tunas; albacores; bonitos; swordfishes;....*

---

sconcheon arch *(noun)*

An arch that supports part of the wall.

- *Understanding "sconcheon arch" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sconcheon arch."*

---

scoopful *(noun)*

The quantity a scoop will hold.

- *They discussed "scoopful" during the group presentation.*
- *The article explained what "scoopful" means with a simple example.*

---

scopal *(adjective)*

Of or relating to scope.

- *Scopal dependency.*
- *It is useful to describe something as "scopal" when it is of or relating to scope.*

---

scophthalmus *(noun)*

A genus of Bothidae.

- *They discussed "scophthalmus" during the group presentation.*
- *Understanding "scophthalmus" helps you talk about this topic clearly.*

---

scophthalmus aquosus *(noun)*

Very thin translucent flounder of the Atlantic coast of North America.

- *In class, the teacher used "scophthalmus aquosus" to mean very thin translucent flounder of the atlantic....*
- *The article explained what "scophthalmus aquosus" means with a simple example.*

---

scophthalmus rhombus *(noun)*

European food fish.

- *She wrote a short paragraph that included "scophthalmus rhombus."*

- *The article explained what "scophthalmus rhombus" means with a simple example.*

---

scopolia *(noun)*

Genus of European perennial herbs yielding medicinal alkaloids.

- *In class, the teacher used "scopolia" to mean genus of european perennial herbs yielding....*
- *They discussed "scopolia" during the group presentation.*

---

scopolia carniolica *(noun)*

Herb that is a source of scopolamine.

- *The article explained what "scopolia carniolica" means with a simple example.*
- *They discussed "scopolia carniolica" during the group presentation.*

---

scorbutic *(adjective)*

Of or relating to or having or resembling scurvy.

- *Scorbutic symptoms.*
- *Would you call this situation "scorbutic"? Explain why.*

---

scorpaena *(noun)*

Type genus of the Scorpaenidae: scorpionfishes.

- *Understanding "scorpaena" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "scorpaena."*

---

scorpaena grandicornis *(noun)*

A kind of scorpionfish.

- *The article explained what "scorpaena grandicornis" means with a simple example.*
- *In class, the teacher used "scorpaena grandicornis" to mean a kind of scorpionfish.*

---

scorpaenid *(noun)*

Any of numerous carnivorous usually bottom-dwelling warm-water marine fishes found worldwide but most abundant in the Pacific.

- *Understanding "scorpaenid" helps you talk about this topic clearly.*
- *He looked up "scorpaenid" because he had never seen it before.*

---

scorpaenid fish *(noun)*

Any of numerous carnivorous usually bottom-dwelling warm-water marine fishes found worldwide but most abundant in the Pacific.

- *He looked up "scorpaenid fish" because he had never seen it before.*
- *In class, the teacher used "scorpaenid fish" to mean any of numerous carnivorous usually bottom-dwelling....*

---

scorpaenidae *(noun)*

Scorpionfishes; rockfishes; lionfishes.

- *Understanding "scorpaenidae" helps you talk about this topic clearly.*
- *They discussed "scorpaenidae" during the group presentation.*

---

scorpaenoid *(noun)*

Fishes having the head armored with bony plates.

- *They discussed "scorpaenoid" during the group presentation.*
- *The article explained what "scorpaenoid" means with a simple example.*

---

scorpaenoid fish *(noun)*

Fishes having the head armored with bony plates.

- *She wrote a short paragraph that included "scorpaenoid fish."*
- *He looked up "scorpaenoid fish" because he had never seen it before.*

---

scorpaenoidea *(noun)*

Mail-cheeked fishes: scorpionfishes; gurnards.

- *They discussed "scorpaenoidea" during the group presentation.*
- *In class, the teacher used "scorpaenoidea" to mean mail-cheeked fishes: scorpionfishes; gurnards.*

---

scorper *(noun)*

A graver used to scoop out broad areas when engraving wood or metal.

- *He looked up "scorper" because he had never seen it before.*
- *They discussed "scorper" during the group presentation.*

---

scorpioid cyme *(noun)*

A cyme with flowers or branches alternating in opposite ranks.

- *In class, the teacher used "scorpioid cyme" to mean a cyme with flowers or branches alternating in....*
- *The article explained what "scorpioid cyme" means with a simple example.*

---

scorpionida *(noun)*

True scorpions.

- *The article explained what "scorpionida" means with a simple example.*
- *In class, the teacher used "scorpionida" to mean true scorpions.*

---

scorpionweed *(noun)*

Any plant of the genus Phacelia.

- *Understanding "scorpionweed" helps you talk about this topic clearly.*
- *The article explained what "scorpionweed" means with a simple example.*

---

scorzonera *(noun)*

Perennial south European herb having narrow entire leaves and solitary yellow flower heads and long black edible roots shaped like carrots.

- *Understanding "scorzonera" helps you talk about this topic clearly.*
- *He looked up "scorzonera" because he had never seen it before.*

---

scorzonera hispanica *(noun)*

Perennial south European herb having narrow entire leaves and solitary yellow flower heads and long black edible roots shaped like carrots.

- *In class, the teacher used "scorzonera hispanica" to mean perennial south european herb having narrow entire....*
- *Understanding "scorzonera hispanica" helps you talk about this topic clearly.*

---

scotchwoman *(noun)*

A woman who is a Scot.

- *Understanding "scotchwoman" helps you talk about this topic clearly.*
- *In class, the teacher used "scotchwoman" to mean a woman who is a scot.*

---

scotomatous *(adjective)*

Relating to scotoma.

- *A "scotomatous" approach may work better in this case.*
- *Would you call this situation "scotomatous"? Explain why.*

---

scott's spleenwort *(noun)*

Common North American fern with polished black stripes.

- *Understanding "scott's spleenwort" helps you talk about this topic clearly.*
- *In class, the teacher used "scott's spleenwort" to mean common north american fern with polished black stripes.*

---

scourger *(noun)*

A torturer who flogs or scourges (especially an official whose duty is to whip offenders).

- *He looked up "scourger" because he had never seen it before.*
- *Understanding "scourger" helps you talk about this topic clearly.*

An American mint that yields a resinous exudate used especially formerly as an antispasmodic.

- *In class, the teacher used "scutellaria lateriflora" to mean an american mint that yields a resinous exudate....*
- *He looked up "scutellaria lateriflora" because he had never seen it before.*

---

scutigera *(noun)*

A genus of Scutigeridae.

- *She wrote a short paragraph that included "scutigera."*
- *The article explained what "scutigera" means with a simple example.*

---

scutigera coleoptrata *(noun)*

Long-legged centipede common in damp places as e.g. cellars.

- *The article explained what "scutigera coleoptrata" means with a simple example.*
- *In class, the teacher used "scutigera coleoptrata" to mean long-legged centipede common in damp places as e.g.....*

---

scutigerella *(noun)*

Garden centipedes.

- *In class, the teacher used "scutigerella" to mean garden centipedes.*
- *The article explained what "scutigerella" means with a simple example.*

scutigerella immaculata *(noun)*

Minute arthropod often infesting the underground parts of truck-garden and greenhouse crops.

- *In class, the teacher used "scutigerella immaculata" to mean minute arthropod often infesting the underground....*
- *Understanding "scutigerella immaculata" helps you talk about this topic clearly.*

scutigeridae *(noun)*

A family of Chilopoda.

- *She wrote a short paragraph that included "scutigeridae."*
- *He looked up "scutigeridae" because he had never seen it before.*

scyliorhinidae *(noun)*

Small bottom-dwelling sharks.

- *She wrote a short paragraph that included "scyliorhinidae."*
- *He looked up "scyliorhinidae" because he had never seen it before.*

scyphozoan *(noun)*

Any of various usually free-swimming marine coelenterates having a gelatinous medusoid stage as the dominant phase of its life cycle.

- *He looked up "scyphozoan" because he had never seen it before.*
- *In class, the teacher used "scyphozoan" to mean any of various usually free-swimming marine....*

scyphus *(noun)*

An ancient Greek drinking cup; two handles and footed base.

- *The article explained what "scyphus" means with a simple example.*
- *Understanding "scyphus" helps you talk about this topic clearly.*

sea milkwort *(noun)*

A small fleshy herb common along North American seashores and in brackish marshes having pink or white flowers.

- *He looked up "sea milkwort" because he had never seen it before.*
- *Understanding "sea milkwort" helps you talk about this topic clearly.*

sea of azof *(noun)*

A bay of the Black Sea between Russia and the Ukraine.

- *Understanding "sea of azof" helps you talk about this topic clearly.*
- *They discussed "sea of azof" during the group presentation.*

sea spurry *(noun)*

Prostrate weedy herb with tiny pink flowers; widespread throughout Europe and Asia on sand dunes and heath and coastal cliffs; naturalized in eastern North America.

- *In class, the teacher used "sea spurry" to mean prostrate weedy herb with tiny pink flowers;....*
- *They discussed "sea spurry" during the group presentation.*

sea starwort *(noun)*

A common European aster that grows in salt marshes.

- *They discussed "sea starwort" during the group presentation.*
- *Understanding "sea starwort" helps you talk about this topic clearly.*

sea trifoly *(noun)*

A small fleshy herb common along North American seashores and in brackish marshes having pink or white flowers.

- *In class, the teacher used "sea trifoly" to mean a small fleshy herb common along north american....*
- *He looked up "sea trifoly" because he had never seen it before.*

seabag *(noun)*

A cylindrical drawstring bag used by sailors to hold their clothing and other gear.

- *They discussed "seabag" during the group presentation.*
- *He looked up "seabag" because he had never seen it before.*

seabeach sandwort *(noun)*

Perennial succulent herb with small solitary axillary or terminal flowers.

- *He looked up "seabeach sandwort" because he had never seen it before.*
- *They discussed "seabeach sandwort" during the group presentation.*

---

seafowl *(noun)*

A bird that frequents coastal waters and the open ocean: gulls; pelicans; gannets; cormorants; albatrosses; petrels; etc.

- *The article explained what "seafowl" means with a simple example.*
- *Understanding "seafowl" helps you talk about this topic clearly.*

---

seagirt *(adjective)*

Surrounded or enclosed by the sea.

- *Her writing became clearer after she learned "seagirt."*
- *Would you call this situation "seagirt"? Explain why.*

---

sealyham *(noun)*

A wire-haired terrier with short legs that was first bred in Sealyham.

- *In class, the teacher used "sealyham" to mean a wire-haired terrier with short legs that was....*
- *He looked up "sealyham" because he had never seen it before.*

---

sealyham terrier *(noun)*

A wire-haired terrier with short legs that was first bred in Sealyham.

- *They discussed "sealyham terrier" during the group presentation.*
- *She wrote a short paragraph that included "sealyham terrier."*

---

seamanlike *(adjective)*

Characteristic of or befitting a seaman; indicating competent seamanship.

- *It is useful to describe something as "seamanlike" when it is characteristic of or befitting a seaman; indicating....*
- *Would you call this situation "seamanlike"? Explain why.*

---

seamanly *(adjective)*

Characteristic of or befitting a seaman; indicating competent seamanship.

- *It is useful to describe something as "seamanly" when it is characteristic of or befitting a seaman; indicating....*
- *A "seamanly" approach may work better in this case.*

---

searobin *(noun)*

American gurnard; mostly found in bays and estuaries.

- *They discussed "searobin" during the group presentation.*
- *He looked up "searobin" because he had never seen it before.*

---

seasnail *(noun)*

Small tadpole-shaped cold-water fishes with pelvic fins forming a sucker; related to lumpfish.

- *Understanding "seasnail" helps you talk about this topic clearly.*
- *The article explained what "seasnail" means with a simple example.*

---

seasonableness *(noun)*

Being at the right time.

- *In class, the teacher used "seasonableness" to mean being at the right time.*
- *The article explained what "seasonableness" means with a simple example.*

---

seasoner *(noun)*

A cook who uses seasonings.

- *The cook is a light seasoner.*
- *In class, the teacher used "seasoner" to mean a cook who uses seasonings.*

---

sebacic acid *(noun)*

A dicarboxylic acid used to make resins.

- *She wrote a short paragraph that included "sebacic acid."*

- *The article explained what "sebacic acid" means with a simple example.*

---

sebastiana *(noun)*

Mexican spurges.

- *She wrote a short paragraph that included "sebastiana."*
- *Understanding "sebastiana" helps you talk about this topic clearly.*

---

sebastodes caurinus *(noun)*

A rockfish of the Pacific coastal waters of North America.

- *She wrote a short paragraph that included "sebastodes caurinus."*
- *He looked up "sebastodes caurinus" because he had never seen it before.*

---

sebastodes marinus *(noun)*

Large fish of northern Atlantic coasts of America and Europe.

- *Understanding "sebastodes marinus" helps you talk about this topic clearly.*
- *The article explained what "sebastodes marinus" means with a simple example.*

---

sebastodes miniatus *(noun)*

A commercially important fish of the Pacific coast of North America.

- *She wrote a short paragraph that included "sebastodes miniatus."*
- *He looked up "sebastodes miniatus" because he had never seen it before.*

---

sebastodes ruberrimus *(noun)*

A large fish of the Pacific coast of North America.

- *The article explained what "sebastodes ruberrimus" means with a simple example.*
- *They discussed "sebastodes ruberrimus" during the group presentation.*

---

secernment *(noun)*

The organic process of synthesizing and releasing some substance.

- *Understanding "secernment" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "secernment."*

---

secotiaceae *(noun)*

A family of fungi that have a stalk and cap and a wrinkled mass of tissue (the gleba) where spores are produced; are often dismissed as misshapen forms of other fungi.

- *Understanding "secotiaceae" helps you talk about this topic clearly.*
- *They discussed "secotiaceae" during the group presentation.*

---

secotiales *(noun)*

An order of fungi belonging to the class Gasteromycetes.

- *In class, the teacher used "secotiales" to mean an order of fungi belonging to the class gasteromycetes.*
- *They discussed "secotiales" during the group presentation.*

---

secpar *(noun)*

A unit of astronomical length based on the distance from Earth at which stellar parallax is 1 second of arc; equivalent to 3.262 light years.

- *Understanding "secpar" helps you talk about this topic clearly.*
- *The article explained what "secpar" means with a simple example.*

---

secreter *(noun)*

Any of various organs that synthesize substances needed by the body and release it through ducts or directly into the bloodstream.

- *The article explained what "secreter" means with a simple example.*
- *In class, the teacher used "secreter" to mean any of various organs that synthesize substances....*

---

sectarist *(noun)*

A member of a sect.

- *In class, the teacher used "sectarist" to mean a member of a sect.*
- *They discussed "sectarist" during the group presentation.*

---

sectionalisation *(noun)*

The act of dividing or partitioning; separation by the creation of a boundary that divides or keeps apart.

- *They discussed "sectionalisation" during the group presentation.*
- *He looked up "sectionalisation" because he had never seen it before.*

---

sectionalization *(noun)*

The act of dividing or partitioning; separation by the creation of a boundary that divides or keeps apart.

- *In class, the teacher used "sectionalization" to mean the act of dividing or partitioning; separation by....*
- *They discussed "sectionalization" during the group presentation.*

---

sectral *(noun)*

An oral beta blocker (trade name Sectral) used in treating hypertension.

- *In class, the teacher used "sectral" to mean an oral beta blocker (trade name sectral) used in....*
- *Understanding "sectral" helps you talk about this topic clearly.*

---

secularise *(verb)*

Make secular and draw away from a religious orientation.

- *The coach explained when to use "secularise" and when to wait.*
- *Learners should practice how to use "secularise" in real sentences.*

---

secundigravida *(noun)*

A woman who is pregnant for the second time.

- *They discussed "secundigravida" during the group presentation.*
- *He looked up "secundigravida" because he had never seen it before.*

---

securer *(noun)*

Someone who obtains or acquires.

- *They discussed "securer" during the group presentation.*
- *He looked up "securer" because he had never seen it before.*

---

sedateness *(noun)*

A trait of dignified seriousness.

- *The article explained what "sedateness" means with a simple example.*
- *In class, the teacher used "sedateness" to mean a trait of dignified seriousness.*

---

sedgelike *(adjective)*

Resembling rush or sedge.

- *A "sedgelike" approach may work better in this case.*
- *Students compared "sedgelike" with similar adjectives in the lesson.*

---

sedgy *(adjective)*

Covered with sedges (grasslike marsh plants).

- *It is useful to describe something as "sedgy" when it is covered with sedges (grasslike marsh plants).*
- *Would you call this situation "sedgy"? Explain why.*

---

sedulity *(noun)*

The quality of being constantly diligent and attentive.

- *She wrote a short paragraph that included "sedulity."*
- *He looked up "sedulity" because he had never seen it before.*

---

sedulous *(adjective)*

Marked by care and persistent effort.

- *Sedulous pursuit of legal and moral principles.*
- *Would you call this situation "sedulous"? Explain why.*

---

sedulousness *(noun)*

The quality of being constantly diligent and attentive.

- *They discussed "sedulousness" during the group presentation.*
- *The article explained what "sedulousness" means with a simple example.*

---

sedum telephium *(noun)*

Perennial northern temperate plant with toothed leaves and heads of small purplish-white flowers.

- *They discussed "sedum telephium" during the group presentation.*
- *Understanding "sedum telephium" helps you talk about this topic clearly.*

---

seedcake *(noun)*

A sweet cake flavored with sesame or caraway seeds and lemon.

- *They discussed "seedcake" during the group presentation.*
- *He looked up "seedcake" because he had never seen it before.*

---

seedcase *(noun)*

The vessel that contains the seeds of a plant (not the seeds themselves).

- *She wrote a short paragraph that included "seedcase."*
- *They discussed "seedcase" during the group presentation.*

---

seedman *(noun)*

A dealer in seeds.

- *She wrote a short paragraph that included "seedman."*
- *He looked up "seedman" because he had never seen it before.*

---

seemliness *(noun)*

A sense of propriety and consideration for others.

- *In class, the teacher used "seemliness" to mean a sense of propriety and consideration for others.*
- *Understanding "seemliness" helps you talk about this topic clearly.*

---

segregator *(noun)*

Someone who believes the races should be kept apart.

- *She wrote a short paragraph that included "segregator."*
- *He looked up "segregator" because he had never seen it before.*

---

seigneury *(noun)*

The position and authority of a feudal lord.

- *The article explained what "seigneury" means with a simple example.*
- *She wrote a short paragraph that included "seigneury."*

---

seignior *(noun)*

A man of rank in the ancient regime.

- *In class, the teacher used "seignior" to mean a man of rank in the ancient regime.*
- *The article explained what "seignior" means with a simple example.*

---

seismal *(adjective)*

Subject to or caused by an earthquake or earth vibration.

- *It is useful to describe something as "seismal" when it is subject to or caused by an earthquake or earth....*
- *Would you call this situation "seismal"? Explain why.*

---

seismogram *(noun)*

The graphical record of an earth tremor made by using a seismograph.

- *They discussed "seismogram" during the group presentation.*
- *She wrote a short paragraph that included "seismogram."*

---

seismography *(noun)*

The measurement of tremors and shocks and undulatory movements of earthquakes.

- *They discussed "seismography" during the group presentation.*
- *Understanding "seismography" helps you talk about this topic clearly.*

seismologic *(adjective)*

Of or concerned with seismology.

- *It is useful to describe something as "seismologic" when it is of or concerned with seismology.*
- *Students compared "seismologic" with similar adjectives in the lesson.*

seismosaur *(noun)*

Huge herbivorous dinosaur of the Cretaceous found in western North America.

- *She wrote a short paragraph that included "seismosaur."*
- *They discussed "seismosaur" during the group presentation.*

seismosaurus *(noun)*

Genus of large herbivorous dinosaurs of Cretaceous found in western North America.

- *They discussed "seismosaurus" during the group presentation.*
- *He looked up "seismosaurus" because he had never seen it before.*

seiurus *(noun)*

Ovenbirds and water thrushes.

- *He looked up "seiurus" because he had never seen it before.*
- *Understanding "seiurus" helps you talk about this topic clearly.*

seiurus aurocapillus *(noun)*

American warbler; builds a dome-shaped nest on the ground.

- *He looked up "seiurus aurocapillus" because he had never seen it before.*
- *They discussed "seiurus aurocapillus" during the group presentation.*

seizer *(noun)*

A kidnapper who drugs men and takes them for compulsory service aboard a ship.

- *He looked up "seizer" because he had never seen it before.*
- *She wrote a short paragraph that included "seizer."*

sekhet *(noun)*

A lion-headed Egyptian goddess; typifies life-destroying power of the sun.

- *Understanding "sekhet" helps you talk about this topic clearly.*
- *He looked up "sekhet" because he had never seen it before.*

selachian *(noun)*

Any of numerous fishes of the class Chondrichthyes characterized by a cartilaginous skeleton and placoid scales: sharks; rays; skates.

- *In class, the teacher used "selachian" to mean any of numerous fishes of the class chondrichthyes....*
- *The article explained what "selachian" means with a simple example.*

selachii *(noun)*

Sharks; rays; dogfishes; skates.

- *In class, the teacher used "selachii" to mean sharks; rays; dogfishes; skates.*
- *The article explained what "selachii" means with a simple example.*

selaginella apoda *(noun)*

Spikemoss forming dense mats; eastern North America.

- *He looked up "selaginella apoda" because he had never seen it before.*
- *In class, the teacher used "selaginella apoda" to mean spikemoss forming dense mats; eastern north america.*

selaginella eatonii *(noun)*

Occurs widely in Florida.

- *He looked up "selaginella eatonii" because he had never seen it before.*
- *She wrote a short paragraph that included "selaginella eatonii."*

selaginella eremophila *(noun)*

Prostrate spikemoss; California.

- *The article explained what "selaginella eremophila" means with a simple example.*
- *She wrote a short paragraph that included "selaginella eremophila."*

---

selaginella lepidophylla *(noun)*

Densely tufted fern ally of southwestern United States to Peru; curls up in a tight ball when dry and expands and grows under moist conditions.

- *In class, the teacher used "selaginella lepidophylla" to mean densely tufted fern ally of southwestern united....*
- *He looked up "selaginella lepidophylla" because he had never seen it before.*

---

selaginellaceae *(noun)*

Lesser club mosses: terrestrial chiefly tropical plants resembling mosses.

- *The article explained what "selaginellaceae" means with a simple example.*
- *In class, the teacher used "selaginellaceae" to mean lesser club mosses: terrestrial chiefly tropical....*

---

selaginellales *(noun)*

In some classifications included in Lycopodiales.

- *She wrote a short paragraph that included "selaginellales."*
- *The article explained what "selaginellales" means with a simple example.*

---

selar crumenophthalmus *(noun)*

Of Atlantic coastal waters; commonly used for bait.

- *In class, the teacher used "selar crumenophthalmus" to mean of atlantic coastal waters; commonly used for bait.*
- *Understanding "selar crumenophthalmus" helps you talk about this topic clearly.*

---

selcraig *(noun)*

Scottish sailor who was put ashore on a deserted island off the coast of Chile for five years (providing the basis for Daniel Defoe's novel about Robinson Crusoe) (1676-1721).

- *Understanding "selcraig" helps you talk about this topic clearly.*
- *They discussed "selcraig" during the group presentation.*

---

selective lipectomy *(noun)*

Plastic surgery involving the breakdown and removal of fatty tissue.

- *He looked up "selective lipectomy" because he had never seen it before.*
- *She wrote a short paragraph that included "selective lipectomy."*

---

selectwoman *(noun)*

An elected member of a board of officials who run New England towns.

- *He looked up "selectwoman" because he had never seen it before.*
- *They discussed "selectwoman" during the group presentation.*

---

selenarctos *(noun)*

Asiatic black bears; in some classifications not a separate genus from Ursus.

- *They discussed "selenarctos" during the group presentation.*
- *Understanding "selenarctos" helps you talk about this topic clearly.*

---

selenarctos thibetanus *(noun)*

Bear with a black coat living in central and eastern Asia.

- *In class, the teacher used "selenarctos thibetanus" to mean bear with a black coat living in central and....*
- *They discussed "selenarctos thibetanus" during the group presentation.*

---

selene setapinnis *(noun)*

Any of several silvery marine fishes with very flat bodies.

- *Understanding "selene setapinnis" helps you talk about this topic clearly.*
- *He looked up "selene setapinnis" because he had never seen it before.*

---

selenic acid *(noun)*

A strong acid (H2SeO4) analogous to sulfuric acid.

- *Understanding "selenic acid" helps you talk about this topic clearly.*

- *They discussed “selenic acid” during the group presentation.*

---

selenicereus *(noun)*

Mostly epiphytic climbing cacti that bloom at night.

- *The article explained what “selenicereus” means with a simple example.*
- *She wrote a short paragraph that included “selenicereus.”*

---

selenicereus grandiflorus *(noun)*

Tropical American climbing cactus having triangular branches; often cultivated for its large showy night-blooming flowers followed by yellow red-streaked fruits.

- *They discussed “selenicereus grandiflorus” during the group presentation.*
- *The article explained what “selenicereus grandiflorus” means with a simple example.*

---

selenipedium *(noun)*

Genus of tall reedlike tropical American orchids; includes species with pods used locally as a substitute for vanilla.

- *In class, the teacher used “selenipedium” to mean genus of tall reedlike tropical american orchids;....*
- *The article explained what “selenipedium” means with a simple example.*

---

selenolatry *(noun)*

The worship of the moon.

- *Understanding “selenolatry” helps you talk about this topic clearly.*
- *They discussed “selenolatry” during the group presentation.*

---

self-conceitedly *(adverb)*

With conceit; in a conceited manner.

- *Place “self-conceitedly” carefully so the meaning stays clear.*
- *He answered “self-conceitedly,” which changed the tone of the conversation.*

---

selfsameness *(noun)*

The quality of being identical with itself.

- *They discussed “selfsameness” during the group presentation.*
- *She wrote a short paragraph that included “selfsameness.”*

---

selsyn *(noun)*

A system consisting of a generator and a motor so connected that the motor will assume the same relative position as the generator; the generator and the motor are synchronized.

- *He looked up “selsyn” because he had never seen it before.*
- *She wrote a short paragraph that included “selsyn.”*

---

semanticist *(noun)*

A specialist in the study of meaning.

- *In class, the teacher used “semanticist” to mean a specialist in the study of meaning.*
- *They discussed “semanticist” during the group presentation.*

---

semestral *(adjective)*

Occurring every six months or during every period of six months.

- *Students compared “semestral” with similar adjectives in the lesson.*
- *A “semestral” approach may work better in this case.*

---

semestrial *(adjective)*

Occurring every six months or during every period of six months.

- *Her writing became clearer after she learned “semestrial.”*
- *Would you call this situation “semestrial”? Explain why.*

---

semi-automatise *(verb)*

Make semiautomatic.

- *He did not know how to use “semi-automatise” until he saw an example.*
- *Can you use “semi-automatise” in a sentence that fits this situation?*

---

semi-automatize *(verb)*

Make semiautomatic.

- *Can we semi-automatize the semantic tagging process?*
- *Learners should practice how to use "semi-automatize" in real sentences.*

---

semiabstract *(adjective)*

Characterized by stylized but recognizable subject matter.

- *Students compared "semiabstract" with similar adjectives in the lesson.*
- *It is useful to describe something as "semiabstract" when it is characterized by stylized but recognizable subject....*

---

semicentenary *(noun)*

The 50th anniversary (or the celebration of it).

- *She wrote a short paragraph that included "semicentenary."*
- *They discussed "semicentenary" during the group presentation.*

---

semicentennial *(noun)*

The 50th anniversary (or the celebration of it).

- *They discussed "semicentennial" during the group presentation.*
- *Understanding "semicentennial" helps you talk about this topic clearly.*

---

semicomatose *(adjective)*

In a state of partial coma.

- *A "semicomatose" approach may work better in this case.*
- *Her writing became clearer after she learned "semicomatose."*

---

semidark *(adjective)*

Partially devoid of light or brightness.

- *Semidark room.*
- *Would you call this situation "semidark"? Explain why.*

---

semidiameter *(noun)*

The apparent radius of a celestial body when viewed as a disc from the earth.

- *She wrote a short paragraph that included "semidiameter."*
- *He looked up "semidiameter" because he had never seen it before.*

---

semiepiphyte *(noun)*

A plant that is an epiphyte for part of its life.

- *In class, the teacher used "semiepiphyte" to mean a plant that is an epiphyte for part of its life.*
- *He looked up "semiepiphyte" because he had never seen it before.*

---

semifluidity *(noun)*

A property midway between a solid and a liquid.

- *Understanding "semifluidity" helps you talk about this topic clearly.*
- *He looked up "semifluidity" because he had never seen it before.*

---

semigloss *(noun)*

A paint that dries with a finish between glossy and flat.

- *He looked up "semigloss" because he had never seen it before.*
- *In class, the teacher used "semigloss" to mean a paint that dries with a finish between glossy and....*

---

semihard *(adjective)*

Somewhat hard.

- *A "semihard" approach may work better in this case.*
- *The speaker chose "semihard" because it captured the feeling precisely.*

---

semiliquid *(adjective)*

Somewhat liquid.

- *Students compared "semiliquid" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "semiliquid."*

---

semiliterate *(adjective)*

Barely able to read and write.

- *An semiliterate scrawl.*
- *Students compared "semiliterate" with similar adjectives in the lesson.*

---

seminarist *(noun)*

A student at a seminary (especially a Roman Catholic seminary).

- *She wrote a short paragraph that included "seminarist."*
- *The article explained what "seminarist" means with a simple example.*

---

seminude *(adjective)*

Partially clothed.

- *It is useful to describe something as "seminude" when it is partially clothed.*
- *A "seminude" approach may work better in this case.*

---

semiopaque *(adjective)*

Partially opaque.

- *Her writing became clearer after she learned "semiopaque."*
- *Would you call this situation "semiopaque"? Explain why.*

---

semiotical *(adjective)*

Of or relating to semiotics.

- *Students compared "semiotical" with similar adjectives in the lesson.*
- *A "semiotical" approach may work better in this case.*

---

semiotician *(noun)*

A specialist in the study of meaning.

- *The article explained what "semiotician" means with a simple example.*
- *Understanding "semiotician" helps you talk about this topic clearly.*

---

semiparasite *(noun)*

A parasitic plant that contains some chlorophyll and therefore is capable of photosynthesis.

- *The article explained what "semiparasite" means with a simple example.*
- *She wrote a short paragraph that included "semiparasite."*

---

semiparasitic *(adjective)*

Of or relating to plants that are semiparasites.

- *Students compared "semiparasitic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "semiparasitic."*

---

semipolitical *(adjective)*

Political in some (but not all) aspects.

- *A "semipolitical" approach may work better in this case.*
- *Students compared "semipolitical" with similar adjectives in the lesson.*

---

semipublic *(adjective)*

Having some of the features of public institution.

- *Her writing became clearer after she learned "semipublic."*
- *A "semipublic" approach may work better in this case.*

---

semisoft *(adjective)*

Somewhat soft.

- *Students compared "semisoft" with similar adjectives in the lesson.*
- *Would you call this situation "semisoft"? Explain why.*

semiterrestrial *(adjective)*

Chiefly but not exclusively terrestrial.

- *A "semiterrestrial" approach may work better in this case.*
- *Students compared "semiterrestrial" with similar adjectives in the lesson.*

semitransparency *(noun)*

The quality of allowing light to pass diffusely.

- *Understanding "semitransparency" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "semitransparency."*

semitropic *(adjective)*

Of or relating to or characteristic of conditions in the subtropics.

- *Her writing became clearer after she learned "semitropic."*
- *The speaker chose "semitropic" because it captured the feeling precisely.*

semitropics *(noun)*

Regions adjacent to the tropics.

- *Understanding "semitropics" helps you talk about this topic clearly.*
- *They discussed "semitropics" during the group presentation.*

semnopithecus entellus *(noun)*

Langur of southern Asia; regarded as sacred in India.

- *She wrote a short paragraph that included "semnopithecus entellus."*
- *He looked up "semnopithecus entellus" because he had never seen it before.*

sempatch *(noun)*

The Swiss Confederation escaped Hapsburg domination by their victory in 1386.

- *She wrote a short paragraph that included "sempatch."*
- *He looked up "sempatch" because he had never seen it before.*

sempiternity *(noun)*

The property of being perpetual (seemingly ceaseless).

- *They discussed "sempiternity" during the group presentation.*
- *The article explained what "sempiternity" means with a simple example.*

sempstress *(noun)*

Someone who makes or mends dresses.

- *The article explained what "sempstress" means with a simple example.*
- *Understanding "sempstress" helps you talk about this topic clearly.*

senatorship *(noun)*

The office of senator.

- *In class, the teacher used "senatorship" to mean the office of senator.*
- *Understanding "senatorship" helps you talk about this topic clearly.*

sendee *(noun)*

The intended recipient of a message.

- *He looked up "sendee" because he had never seen it before.*
- *She wrote a short paragraph that included "sendee."*

senecio bigelovii *(noun)*

Plant with erect leafy stems bearing clusters of rayless yellow flower heads on bent individual stalks; moist regions of southwestern United States.

- *In class, the teacher used "senecio bigelovii" to mean plant with erect leafy stems bearing clusters of....*
- *They discussed "senecio bigelovii" during the group presentation.*

senecio cruentus *(noun)*

Herb of Canary Islands widely cultivated for its blue or purple or red or variegated daisylike flowers.

- *She wrote a short paragraph that included "senecio cruentus."*
- *He looked up "senecio cruentus" because he had never seen it before.*

---

senecio doublasii *(noun)*

Bluish-green bushy leafy plant covered with close white wool and bearing branched clusters of yellow flower heads; southwestern United States; toxic to range livestock.

- *Understanding "senecio doublasii" helps you talk about this topic clearly.*
- *In class, the teacher used "senecio doublasii" to mean bluish-green bushy leafy plant covered with close....*

---

senecio glabellus *(noun)*

American ragwort with yellow flowers.

- *She wrote a short paragraph that included "senecio glabellus."*
- *They discussed "senecio glabellus" during the group presentation.*

---

senecio jacobaea *(noun)*

Widespread European weed having yellow daisylike flowers; sometimes an obnoxious weed and toxic to cattle if consumed in quantity.

- *Understanding "senecio jacobaea" helps you talk about this topic clearly.*
- *In class, the teacher used "senecio jacobaea" to mean widespread european weed having yellow daisylike....*

---

senecio milkanioides *(noun)*

South African succulent evergreen twining climber with yellow flowers grown primarily as a houseplant for its foliage; sometimes placed in genus Senecio.

- *She wrote a short paragraph that included "senecio milkanioides."*
- *The article explained what "senecio milkanioides" means with a simple example.*

---

senefelder *(noun)*

German printer who invented lithography (1771-1834).

- *The article explained what "senefelder" means with a simple example.*
- *Understanding "senefelder" helps you talk about this topic clearly.*

---

senega *(noun)*

Dried root of two plants of the genus Polygala containing an irritating saponin.

- *The article explained what "senega" means with a simple example.*
- *She wrote a short paragraph that included "senega."*

---

senega root *(noun)*

Eastern North American plant having a terminal cluster of small white flowers and medicinal roots.

- *She wrote a short paragraph that included "senega root."*
- *Understanding "senega root" helps you talk about this topic clearly.*

---

senega snakeroot *(noun)*

Eastern North American plant having a terminal cluster of small white flowers and medicinal roots.

- *The article explained what "senega snakeroot" means with a simple example.*
- *In class, the teacher used "senega snakeroot" to mean eastern north american plant having a terminal....*

---

seneka snakeroot *(noun)*

Eastern North American plant having a terminal cluster of small white flowers and medicinal roots.

- *She wrote a short paragraph that included "seneka snakeroot."*
- *He looked up "seneka snakeroot" because he had never seen it before.*

---

senesce *(verb)*

Grow old or older.

- *Young men senesce.*
- *The coach explained when to use "senesce" and when to wait.*

---

seniti *(noun)*

100 seniti equal 1 pa'anga in Tonga.

- *He looked up "seniti" because he had never seen it before.*

- *The city closed its schools during the flu epidemic.*
- *Experts describe childhood obesity as a growing epidemic in many countries.*

diagnosis *(noun)*

The identification of an illness or problem by examining its signs and symptoms.

- *Early diagnosis can improve the chance of recovery.*
- *The doctor confirmed the diagnosis with a blood test.*

chronic *(adjective)*

Lasting for a long time or constantly returning, especially of illness or problems.

- *He suffers from chronic back pain.*
- *Chronic stress can harm both body and mind.*

acute *(adjective)*

Severe and sudden in onset, especially of illness or pain; also, very serious or sharp.

- *She was admitted with acute appendicitis.*
- *There is an acute shortage of nurses in the region.*

immunity *(noun)*

The body's ability to resist a disease; also, protection from legal action in some contexts.

- *Vaccination helps build immunity against measles.*
- *Survivors often gain natural immunity to the virus.*

pathogen *(noun)*

A bacterium, virus, or other microorganism that can cause disease.

- *Hand washing removes many pathogens.*
- *Researchers identified a new pathogen in the water supply.*

remedy *(noun)*

A treatment or medicine that cures or reduces a problem; also, a way of solving a difficulty.

- *Honey and lemon is a traditional remedy for a sore throat.*
- *The new law offers a remedy for unfair working conditions.*

contagious *(adjective)*

Able to be passed from one person to another by contact or closeness.

- *Chickenpox is highly contagious among children.*
- *Laughter can be contagious in a crowded room.*

---

dosage *(noun)*

The amount of a medicine that should be taken at one time or over a period.

- *Follow the dosage instructions on the label carefully.*
- *The doctor reduced the dosage after side effects appeared.*

---

trauma *(noun)*

Serious physical injury; also, deep emotional shock following a distressing event.

- *The accident caused severe trauma to his legs.*
- *She received counseling for emotional trauma.*

---

antibiotic *(noun)*

A medicine that kills or slows the growth of bacteria.

- *The doctor prescribed antibiotics for the infection.*
- *Overuse of antibiotics can make bacteria resistant.*

---

centrarchidae *(noun)*

Sunfish family.

- *She wrote a short paragraph that included "centrarchidae."*
- *The article explained what "centrarchidae" means with a simple example.*

---

centrifugate *(verb)*

Rotate at very high speed in order to separate the liquids from the solids.

- *In everyday English, people use "centrifugate" when talking about this idea.*
- *Learners should practice how to use "centrifugate" in real sentences.*

---

centriscidae *(noun)*

Shrimpfishes.

- *Understanding "centriscidae" helps you talk about this topic clearly.*
- *They discussed "centriscidae" during the group presentation.*

---

centrocercus *(noun)*

Sage grouse.

- *In class, the teacher used "centrocercus" to mean sage grouse.*
- *The article explained what "centrocercus" means with a simple example.*

---

centrocercus urophasianus *(noun)*

Large grouse of sagebrush regions of North America.

- *Understanding "centrocercus urophasianus" helps you talk about this topic clearly.*
- *They discussed "centrocercus urophasianus" during the group presentation.*

---

centropistes striata *(noun)*

Bluish black-striped sea bass of the Atlantic coast of the United States.

- *She wrote a short paragraph that included "centropistes striata."*
- *The article explained what "centropistes striata" means with a simple example.*

---

centropomidae *(noun)*

A family of fish or the order Perciformes including robalos.

- *In class, the teacher used "centropomidae" to mean a family of fish or the order perciformes including....*
- *The article explained what "centropomidae" means with a simple example.*

---

centropomus *(noun)*

Type genus of the Centropomidae: snooks.

- *The article explained what “centropomus” means with a simple example.*
- *They discussed “centropomus” during the group presentation.*

---

centropristis philadelphica *(noun)*

A kind of sea bass.

- *The article explained what “centropristis philadelphica” means with a simple example.*
- *She wrote a short paragraph that included “centropristis philadelphica.”*

---

centropus *(noun)*

A genus of Cuculidae.

- *They discussed “centropus” during the group presentation.*
- *The article explained what “centropus” means with a simple example.*

---

centropus phasianinus *(noun)*

Australian bird with a tail like a pheasant.

- *In class, the teacher used “centropus phasianinus” to mean australian bird with a tail like a pheasant.*
- *The article explained what “centropus phasianinus” means with a simple example.*

---

centropus sinensis *(noun)*

Common coucal of India and China.

- *She wrote a short paragraph that included “centropus sinensis.”*
- *He looked up “centropus sinensis” because he had never seen it before.*

---

cephalalgia *(noun)*

Pain in the head caused by dilation of cerebral arteries or muscle contractions or a reaction to drugs.

- *The article explained what “cephalalgia” means with a simple example.*
- *In class, the teacher used “cephalalgia” to mean pain in the head caused by dilation of cerebral....*

---

cephalaspid *(noun)*

Extinct jawless fish of the Devonian with armored head.

- *He looked up “cephalaspid” because he had never seen it before.*
- *She wrote a short paragraph that included “cephalaspid.”*

---

cephalaspida *(noun)*

Extinct group of armored fish-like vertebrates; taxonomy is not clear.

- *They discussed “cephalaspida” during the group presentation.*
- *Understanding “cephalaspida” helps you talk about this topic clearly.*

---

cephalhematoma *(noun)*

A collection of blood under the scalp of a newborn; caused by pressure during birth.

- *She wrote a short paragraph that included “cephalhematoma.”*
- *He looked up “cephalhematoma” because he had never seen it before.*

---

cephalitis *(noun)*

Inflammation of the brain usually caused by a virus; symptoms include headache and neck pain and drowsiness and nausea and fever (‘phrenitis’ is no longer in scientific use).

- *In class, the teacher used “cephalitis” to mean inflammation of the brain usually caused by a....*
- *He looked up “cephalitis” because he had never seen it before.*

---

cephalobidae *(noun)*

A family of Nematoda.

- *The article explained what “cephalobidae” means with a simple example.*
- *Understanding “cephalobidae” helps you talk about this topic clearly.*

---

cephalochordate *(noun)*

Fish-like animals having a notochord rather than a true spinal column.

- *Understanding “cephalochordate” helps you talk about this topic clearly.*
- *He looked up “cephalochordate” because he had never seen it before.*

cephaloglycin *(noun)*

Antibiotic related to cephalosporin but no longer in common use.

- *He looked up "cephaloglycin" because he had never seen it before.*
- *She wrote a short paragraph that included "cephaloglycin."*

cephalohematoma *(noun)*

A collection of blood under the scalp of a newborn; caused by pressure during birth.

- *He looked up "cephalohematoma" because he had never seen it before.*
- *They discussed "cephalohematoma" during the group presentation.*

cephalopterus *(noun)*

A genus of Cotingidae.

- *The article explained what "cephalopterus" means with a simple example.*
- *She wrote a short paragraph that included "cephalopterus."*

cephalopterus ornatus *(noun)*

Black tropical American bird having a large overhanging crest and long feathered wattle.

- *They discussed "cephalopterus ornatus" during the group presentation.*
- *She wrote a short paragraph that included "cephalopterus ornatus."*

cephaloridine *(noun)*

A broad spectrum semisynthetic antibiotic produced by modifying cephalosporin.

- *They discussed "cephaloridine" during the group presentation.*
- *Understanding "cephaloridine" helps you talk about this topic clearly.*

cepphus *(noun)*

A genus of birds including: guillemots.

- *He looked up "cepphus" because he had never seen it before.*
- *She wrote a short paragraph that included "cepphus."*

cepphus columba *(noun)*

Northern Pacific guillemot.

- *She wrote a short paragraph that included "cepphus columba."*
- *Understanding "cepphus columba" helps you talk about this topic clearly.*

cepphus grylle *(noun)*

Northern Atlantic guillemot.

- *She wrote a short paragraph that included "cepphus grylle."*
- *The article explained what "cepphus grylle" means with a simple example.*

cerapteryx *(noun)*

Antler moths.

- *The article explained what "cerapteryx" means with a simple example.*
- *They discussed "cerapteryx" during the group presentation.*

cerapteryx graminis *(noun)*

European moth with white antler-like markings on the forewings; the larvae damage pastures and grasslands.

- *They discussed "cerapteryx graminis" during the group presentation.*
- *The article explained what "cerapteryx graminis" means with a simple example.*

ceras *(noun)*

One of the often brightly colored and branching hornlike structures on the back of the nudibranch (and other related mollusks) that serve as gills.

- *He looked up "ceras" because he had never seen it before.*
- *They discussed "ceras" during the group presentation.*

ceratodontidae *(noun)*

Lungfishes having hornlike ridges on the teeth.

- *Understanding "ceratodontidae" helps you talk about this topic clearly.*
- *The article explained what "ceratodontidae" means with a simple example.*

---

ceratodus *(noun)*

Extinct lungfish.

- *He looked up "ceratodus" because he had never seen it before.*
- *She wrote a short paragraph that included "ceratodus."*

---

ceratopogon *(noun)*

Type genus of the Ceratopogonidae.

- *The article explained what "ceratopogon" means with a simple example.*
- *They discussed "ceratopogon" during the group presentation.*

---

ceratopsia *(noun)*

Horned dinosaurs.

- *They discussed "ceratopsia" during the group presentation.*
- *Understanding "ceratopsia" helps you talk about this topic clearly.*

---

ceratopsidae *(noun)*

American ceratopsian dinosaurs.

- *Understanding "ceratopsidae" helps you talk about this topic clearly.*
- *The article explained what "ceratopsidae" means with a simple example.*

---

ceratosaur *(noun)*

Primitive medium-sized theropod; swift-running bipedal carnivorous dinosaur having grasping hands with sharp claws and a short horn between the nostrils; Jurassic in North America.

- *She wrote a short paragraph that included "ceratosaur."*
- *Understanding "ceratosaur" helps you talk about this topic clearly.*

---

ceratosaurus *(noun)*

Primitive medium-sized theropod; swift-running bipedal carnivorous dinosaur having grasping hands with sharp claws and a short horn between the nostrils; Jurassic in North America.

- *They discussed "ceratosaurus" during the group presentation.*
- *In class, the teacher used "ceratosaurus" to mean primitive medium-sized theropod; swift-running....*

---

ceratotherium *(noun)*

African genus.

- *In class, the teacher used "ceratotherium" to mean african genus.*
- *The article explained what "ceratotherium" means with a simple example.*

---

ceratotherium simum *(noun)*

Large light-grey African rhinoceros having two horns; endangered; sometimes placed in genus Diceros.

- *They discussed "ceratotherium simum" during the group presentation.*
- *He looked up "ceratotherium simum" because he had never seen it before.*

---

cercaria *(noun)*

Tadpole-shaped parasitic larva of a trematode worm; tail disappears in adult stage.

- *He looked up "cercaria" because he had never seen it before.*
- *They discussed "cercaria" during the group presentation.*

---

cercopidae *(noun)*

Froghoppers or spittlebugs.

- *She wrote a short paragraph that included "cercopidae."*
- *They discussed "cercopidae" during the group presentation.*

---

cercopithecidae *(noun)*

Old World monkeys: guenon; baboon; colobus monkey; langur; macaque; mandrill; mangabey; patas; proboscis monkey.

- *He looked up "cercopithecidae" because he had never seen it before.*

- *Understanding "cercopithecidae" helps you talk about this topic clearly.*

---

cercopithecus aethiops pygerythrus *(noun)*

South African monkey with black face and hands.

- *He looked up "cercopithecus aethiops pygerythrus" because he had never seen it before.*
- *They discussed "cercopithecus aethiops pygerythrus" during the group presentation.*

---

cercopithecus aethiops sabaeus *(noun)*

Common savannah monkey with greenish-grey back and yellow tail.

- *He looked up "cercopithecus aethiops sabaeus" because he had never seen it before.*
- *She wrote a short paragraph that included "cercopithecus aethiops sabaeus."*

---

cercopithecus talapoin *(noun)*

Smallest guenon monkey; of swampy central and west African forests.

- *She wrote a short paragraph that included "cercopithecus talapoin."*
- *Understanding "cercopithecus talapoin" helps you talk about this topic clearly.*

---

cerebromeningitis *(noun)*

Inflammation of the brain and spinal cord and their meninges.

- *They discussed "cerebromeningitis" during the group presentation.*
- *Understanding "cerebromeningitis" helps you talk about this topic clearly.*

---

certhia *(noun)*

Type genus of the Certhiidae.

- *He looked up "certhia" because he had never seen it before.*
- *They discussed "certhia" during the group presentation.*

---

certhia americana *(noun)*

A common creeper in North America with a down-curved bill.

- *They discussed "certhia americana" during the group presentation.*
- *Understanding "certhia americana" helps you talk about this topic clearly.*

---

certhia familiaris *(noun)*

Common European brown-and-buff tree creeper with down-curved bill.

- *She wrote a short paragraph that included "certhia familiaris."*
- *He looked up "certhia familiaris" because he had never seen it before.*

---

cervicofacial actinomycosis *(noun)*

The commonest and least severe form of actinomycosis; affects the face and neck regions.

- *He looked up "cervicofacial actinomycosis" because he had never seen it before.*
- *She wrote a short paragraph that included "cervicofacial actinomycosis."*

---

ceryle *(noun)*

A genus of birds of the family Alcedinidae.

- *Understanding "ceryle" helps you talk about this topic clearly.*
- *He looked up "ceryle" because he had never seen it before.*

---

ceryle alcyon *(noun)*

Greyish-blue North American kingfisher with a chestnut band on its chest.

- *Understanding "ceryle alcyon" helps you talk about this topic clearly.*
- *They discussed "ceryle alcyon" during the group presentation.*

---

cestida *(noun)*

Ctenophore having short tentacles; one family.

- *She wrote a short paragraph that included "cestida."*
- *He looked up "cestida" because he had never seen it before.*

---

cestidae *(noun)*

Coextensive with the order Cestida; ctenophores having a greatly flattened and elongated body.

- *In class, the teacher used "cestidae" to mean coextensive with the order cestida; ctenophores....*
- *The article explained what "cestidae" means with a simple example.*

---

cestum *(noun)*

Venus's girdle.

- *The article explained what "cestum" means with a simple example.*
- *She wrote a short paragraph that included "cestum."*

---

cestum veneris *(noun)*

Ctenophore having a ribbon-shaped iridescent gelatinous body.

- *She wrote a short paragraph that included "cestum veneris."*
- *He looked up "cestum veneris" because he had never seen it before.*

---

cetonia *(noun)*

A genus of Cetoniidae.

- *She wrote a short paragraph that included "cetonia."*
- *They discussed "cetonia" during the group presentation.*

---

cetonia aurata *(noun)*

A common metallic green European beetle: larvae feed on plant roots and adults on leaves and flowers of e.g. roses.

- *They discussed "cetonia aurata" during the group presentation.*
- *She wrote a short paragraph that included "cetonia aurata."*

---

cetoniidae *(noun)*

Considered a separate family in some classification systems.

- *She wrote a short paragraph that included "cetoniidae."*
- *He looked up "cetoniidae" because he had never seen it before.*

---

cetorhinidae *(noun)*

In some older classifications considered the family of the basking sharks.

- *The article explained what "cetorhinidae" means with a simple example.*
- *Understanding "cetorhinidae" helps you talk about this topic clearly.*

---

cetorhinus *(noun)*

Comprising only the basking sharks; in some classifications considered the type genus of a separate family Cetorhinidae.

- *In class, the teacher used "cetorhinus" to mean comprising only the basking sharks; in some....*
- *He looked up "cetorhinus" because he had never seen it before.*

---

cetorhinus maximus *(noun)*

Large harmless plankton-eating northern shark; often swims slowly or floats at the sea surface.

- *In class, the teacher used "cetorhinus maximus" to mean large harmless plankton-eating northern shark;....*
- *The article explained what "cetorhinus maximus" means with a simple example.*

---

chachalaca *(noun)*

Slender arboreal guan resembling a wild turkey; native to Central America and Mexico; highly regarded as game birds.

- *They discussed "chachalaca" during the group presentation.*
- *He looked up "chachalaca" because he had never seen it before.*

---

chaenopsis *(noun)*

A genus of fish of the family Clinidae including pikeblennies.

- *She wrote a short paragraph that included "chaenopsis."*
- *They discussed "chaenopsis" during the group presentation.*

---

chaenopsis ocellata *(noun)*

Found from Florida to Cuba.

- *In class, the teacher used "chaenopsis ocellata" to mean found from florida to cuba.*
- *They discussed "chaenopsis ocellata" during the group presentation.*

---

chaeta *(noun)*

A stiff chitinous seta or bristle especially of an annelid worm.

- *Understanding "chaeta" helps you talk about this topic clearly.*
- *He looked up "chaeta" because he had never seen it before.*

---

chaetodipterus *(noun)*

A genus of Ephippidae.

- *Understanding "chaetodipterus" helps you talk about this topic clearly.*
- *The article explained what "chaetodipterus" means with a simple example.*

---

chaetodipterus faber *(noun)*

Deep-bodied disk-shaped food fish of warmer western Atlantic coastal waters.

- *In class, the teacher used "chaetodipterus faber" to mean deep-bodied disk-shaped food fish of warmer western....*
- *He looked up "chaetodipterus faber" because he had never seen it before.*

---

chaetodontidae *(noun)*

Butterfly fishes.

- *He looked up "chaetodontidae" because he had never seen it before.*
- *She wrote a short paragraph that included "chaetodontidae."*

---

chaetognath *(noun)*

Any worm of the Chaetognatha; transparent marine worm with horizontal lateral and caudal fins and a row of movable curved spines at each side of the mouth.

- *In class, the teacher used "chaetognath" to mean any worm of the chaetognatha; transparent marine....*
- *They discussed "chaetognath" during the group presentation.*

---

chaetognatha *(noun)*

Arrowworms: a group of small active transparent marine worms.

- *She wrote a short paragraph that included "chaetognatha."*
- *He looked up "chaetognatha" because he had never seen it before.*

---

chaja *(noun)*

Largest crested screamer; native to southern Brazil and Argentina.

- *They discussed "chaja" during the group presentation.*
- *In class, the teacher used "chaja" to mean largest crested screamer; native to southern brazil....*

---

chalcidae *(noun)*

An arthropod family including: chalcidflies.

- *He looked up "chalcidae" because he had never seen it before.*
- *She wrote a short paragraph that included "chalcidae."*

---

chalcidfly *(noun)*

Any of various tiny insects whose larvae are parasites on eggs and larvae of other insects; many are beneficial in destroying injurious insects.

- *They discussed "chalcidfly" during the group presentation.*
- *In class, the teacher used "chalcidfly" to mean any of various tiny insects whose larvae are....*

---

chalcididae *(noun)*

An arthropod family including: chalcidflies.

- *They discussed "chalcididae" during the group presentation.*
- *The article explained what "chalcididae" means with a simple example.*

---

chamaea *(noun)*

A genus of Paridae.

- *Understanding "chamaea" helps you talk about this topic clearly.*
- *He looked up "chamaea" because he had never seen it before.*

chamaea fasciata *(noun)*

Small brown bird of California resembling a wren.

- *He looked up "chamaea fasciata" because he had never seen it before.*
- *Understanding "chamaea fasciata" helps you talk about this topic clearly.*

chamaeleo *(noun)*

Type genus of the Chamaeleontidae.

- *The article explained what "chamaeleo" means with a simple example.*
- *She wrote a short paragraph that included "chamaeleo."*

chamaeleo chamaeleon *(noun)*

A chameleon found in Africa.

- *He looked up "chamaeleo chamaeleon" because he had never seen it before.*
- *They discussed "chamaeleo chamaeleon" during the group presentation.*

chamaeleo oweni *(noun)*

A kind of chameleon.

- *They discussed "chamaeleo oweni" during the group presentation.*
- *The article explained what "chamaeleo oweni" means with a simple example.*

chamaeleonidae *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *In class, the teacher used "chamaeleonidae" to mean old world chameleons; in some classifications they....*
- *Understanding "chamaeleonidae" helps you talk about this topic clearly.*

chamaeleontidae *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *Understanding "chamaeleontidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chamaeleontidae."*

characeae *(noun)*

Green algae superficially resembling horsetail ferns: stoneworts.

- *The article explained what "characeae" means with a simple example.*
- *In class, the teacher used "characeae" to mean green algae superficially resembling horsetail....*

characid *(noun)*

Any freshwater fish of the family Characinidae.

- *They discussed "characid" during the group presentation.*
- *The article explained what "characid" means with a simple example.*

characidae *(noun)*

Tropical freshwater fishes of Africa and South America and Central America.

- *They discussed "characidae" during the group presentation.*
- *In class, the teacher used "characidae" to mean tropical freshwater fishes of africa and south....*

characin *(noun)*

Any freshwater fish of the family Characinidae.

- *The article explained what "characin" means with a simple example.*
- *They discussed "characin" during the group presentation.*

characin fish *(noun)*

Any freshwater fish of the family Characinidae.

- *They discussed "characin fish" during the group presentation.*
- *In class, the teacher used "characin fish" to mean any freshwater fish of the family characinidae.*

characinidae *(noun)*

Former name of the Characidae.

- *He looked up "characinidae" because he had never seen it before.*
- *She wrote a short paragraph that included "characinidae."*

---

charadrii *(noun)*

Shorebirds: plovers; sandpipers; avocets; phalaropes; coursers; stone curlews.

- *They discussed "charadrii" during the group presentation.*
- *The article explained what "charadrii" means with a simple example.*

---

charadriidae *(noun)*

Plover family.

- *The article explained what "charadriidae" means with a simple example.*
- *Understanding "charadriidae" helps you talk about this topic clearly.*

---

charadriiformes *(noun)*

Large diverse order of aquatic birds found along seacoasts and inland waters: shorebirds and coastal diving birds; most feed on anima life.

- *The article explained what "charadriiformes" means with a simple example.*
- *She wrote a short paragraph that included "charadriiformes."*

---

charadrius melodus *(noun)*

Small plover of eastern North America.

- *She wrote a short paragraph that included "charadrius melodus."*
- *He looked up "charadrius melodus" because he had never seen it before.*

---

charadrius morinellus *(noun)*

Rare plover of upland areas of Eurasia.

- *Understanding "charadrius morinellus" helps you talk about this topic clearly.*
- *They discussed "charadrius morinellus" during the group presentation.*

---

charadrius vociferus *(noun)*

American plover of inland waters and fields having a distinctive cry.

- *In class, the teacher used "charadrius vociferus" to mean american plover of inland waters and fields having....*
- *The article explained what "charadrius vociferus" means with a simple example.*

---

charales *(noun)*

Small order of macroscopic fresh and brackish water algae with a distinct axis: stoneworts.

- *She wrote a short paragraph that included "charales."*
- *He looked up "charales" because he had never seen it before.*

---

charina *(noun)*

Boas of western North America.

- *In class, the teacher used "charina" to mean boas of western north america.*
- *The article explained what "charina" means with a simple example.*

---

charina bottae *(noun)*

Boa of grasslands and woodlands of western North America; looks and feels like rubber with tail and head of similar shape.

- *They discussed "charina bottae" during the group presentation.*
- *Understanding "charina bottae" helps you talk about this topic clearly.*

---

charophyceae *(noun)*

In some classifications: contains only the order Charales.

- *In class, the teacher used "charophyceae" to mean in some classifications: contains only the order....*
- *Understanding "charophyceae" helps you talk about this topic clearly.*

---

charronia *(noun)*

A genus of Mustelidae.

- *The article explained what "charronia" means with a simple example.*

- *In class, the teacher used "charronia" to mean a genus of mustelidae.*

---

charronia flavigula *(noun)*

Large yellow and black marten of southern China and Burma.

- *In class, the teacher used "charronia flavigula" to mean large yellow and black marten of southern china and....*
- *They discussed "charronia flavigula" during the group presentation.*

---

chateura *(noun)*

A genus of Apodidae.

- *They discussed "chateura" during the group presentation.*
- *The article explained what "chateura" means with a simple example.*

---

chateura pelagica *(noun)*

American swift that nests in e.g. unused chimneys.

- *She wrote a short paragraph that included "chateura pelagica."*
- *They discussed "chateura pelagica" during the group presentation.*

---

chauna *(noun)*

Crested screamers.

- *In class, the teacher used "chauna" to mean crested screamers.*
- *The article explained what "chauna" means with a simple example.*

---

chauna torquata *(noun)*

Largest crested screamer; native to southern Brazil and Argentina.

- *She wrote a short paragraph that included "chauna torquata."*
- *The article explained what "chauna torquata" means with a simple example.*

---

cheewink *(noun)*

Common towhee of eastern North America.

- *In class, the teacher used "cheewink" to mean common towhee of eastern north america.*
- *The article explained what "cheewink" means with a simple example.*

---

cheiloschisis *(noun)*

A congenital cleft in the middle of the upper lip.

- *In class, the teacher used "cheiloschisis" to mean a congenital cleft in the middle of the upper lip.*
- *The article explained what "cheiloschisis" means with a simple example.*

---

cheilosis *(noun)*

A disorder of the lips marked by scaling and fissures at the corners of the mouth; caused by a deficiency of riboflavin.

- *The article explained what "cheilosis" means with a simple example.*
- *Understanding "cheilosis" helps you talk about this topic clearly.*

---

chelicera *(noun)*

Either of the first pair of fang-like appendages near the mouth of an arachnid; often modified for grasping and piercing.

- *He looked up "chelicera" because he had never seen it before.*
- *She wrote a short paragraph that included "chelicera."*

---

chelicerata *(noun)*

Spiders; scorpions; horseshoe crabs.

- *She wrote a short paragraph that included "chelicerata."*
- *Understanding "chelicerata" helps you talk about this topic clearly.*

---

chelifer *(noun)*

A genus of Chelonethida.

- *In class, the teacher used "chelifer" to mean a genus of chelonethida.*
- *The article explained what "chelifer" means with a simple example.*

---

chelifer cancroides *(noun)*

Minute arachnid sometimes found in old papers.

- *The article explained what "chelifer cancroides" means with a simple example.*
- *She wrote a short paragraph that included "chelifer cancroides."*

cheloid *(noun)*

Raised pinkish scar tissue at the site of an injury; results from excessive tissue repair.

- *Understanding "cheloid" helps you talk about this topic clearly.*
- *The article explained what "cheloid" means with a simple example.*

chelonethida *(noun)*

False scorpions.

- *Understanding "chelonethida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chelonethida."*

chelonidae *(noun)*

Green turtles; hawksbills.

- *He looked up "chelonidae" because he had never seen it before.*
- *They discussed "chelonidae" during the group presentation.*

cheloniidae *(noun)*

Green turtles; hawksbills.

- *She wrote a short paragraph that included "cheloniidae."*
- *Understanding "cheloniidae" helps you talk about this topic clearly.*

chelydra *(noun)*

Snapping turtles.

- *He looked up "chelydra" because he had never seen it before.*
- *Understanding "chelydra" helps you talk about this topic clearly.*

chelydra serpentina *(noun)*

Large-headed turtle with powerful hooked jaws found in or near water; prone to bite.

- *She wrote a short paragraph that included "chelydra serpentina."*
- *The article explained what "chelydra serpentina" means with a simple example.*

chelydridae *(noun)*

Snapping turtles.

- *He looked up "chelydridae" because he had never seen it before.*
- *She wrote a short paragraph that included "chelydridae."*

chemosis *(noun)*

Edema of the mucous membrane of the eyeball and eyelid lining.

- *She wrote a short paragraph that included "chemosis."*
- *They discussed "chemosis" during the group presentation.*

chenfish *(noun)*

Small silvery marine food fish found off California.

- *In class, the teacher used "chenfish" to mean small silvery marine food fish found off california.*
- *Understanding "chenfish" helps you talk about this topic clearly.*

chermidae *(noun)*

Jumping plant lice.

- *In class, the teacher used "chermidae" to mean jumping plant lice.*
- *Understanding "chermidae" helps you talk about this topic clearly.*

chetah *(noun)*

Long-legged spotted cat of Africa and southwestern Asia having nonretractile claws; the swiftest mammal; can be trained to run down game.

- *The article explained what "chetah" means with a simple example.*
- *In class, the teacher used "chetah" to mean long-legged spotted cat of africa and southwestern....*

---

chevrotain *(noun)*

Very small hornless deer-like ruminant of tropical Asia and west Africa.

- *She wrote a short paragraph that included "chevrotain."*
- *He looked up "chevrotain" because he had never seen it before.*

---

chewink *(noun)*

Common towhee of eastern North America.

- *She wrote a short paragraph that included "chewink."*
- *He looked up "chewink" because he had never seen it before.*

---

chiacoan peccary *(noun)*

A recently discovered large wild pig of Paraguay.

- *She wrote a short paragraph that included "chiacoan peccary."*
- *The article explained what "chiacoan peccary" means with a simple example.*

---

chiasma opticum *(noun)*

The crossing of the optic nerves from the two eyes at the base of the brain.

- *The article explained what "chiasma opticum" means with a simple example.*
- *She wrote a short paragraph that included "chiasma opticum."*

---

chickeree *(noun)*

Far western United States counterpart of the red squirrel.

- *She wrote a short paragraph that included "chickeree."*
- *Understanding "chickeree" helps you talk about this topic clearly.*

---

chigetai *(noun)*

Mongolian wild ass.

- *Understanding "chigetai" helps you talk about this topic clearly.*
- *In class, the teacher used "chigetai" to mean mongolian wild ass.*

---

chigoe *(noun)*

Small tropical flea; the fertile female burrows under the skin of the host including humans.

- *They discussed "chigoe" during the group presentation.*
- *In class, the teacher used "chigoe" to mean small tropical flea; the fertile female burrows....*

---

chigoe flea *(noun)*

Small tropical flea; the fertile female burrows under the skin of the host including humans.

- *She wrote a short paragraph that included "chigoe flea."*
- *He looked up "chigoe flea" because he had never seen it before.*

---

chilblain *(noun)*

Inflammation of the hands and feet caused by exposure to cold and moisture.

- *He looked up "chilblain" because he had never seen it before.*
- *Understanding "chilblain" helps you talk about this topic clearly.*

---

chilomastix *(noun)*

Flagellates parasitic in intestines of vertebrates including humans.

- *She wrote a short paragraph that included "chilomastix."*
- *They discussed "chilomastix" during the group presentation.*

---

chilomeniscus *(noun)*

Sand snakes.

- *In class, the teacher used "chilomeniscus" to mean sand snakes.*
- *They discussed "chilomeniscus" during the group presentation.*

chilomeniscus cinctus *(noun)*

A sand snake of southwestern United States; lives in fine to coarse sand or loamy soil in which it 'swims'; banding resembles that of coral snakes.

- *She wrote a short paragraph that included "chilomeniscus cinctus."*
- *Understanding "chilomeniscus cinctus" helps you talk about this topic clearly.*

chilopoda *(noun)*

Arthropods having the trunk composed of numerous somites each bearing one pair of legs: centipedes.

- *They discussed "chilopoda" during the group presentation.*
- *Understanding "chilopoda" helps you talk about this topic clearly.*

chimaera monstrosa *(noun)*

Large European chimaera.

- *Understanding "chimaera monstrosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chimaera monstrosa."*

chimaeridae *(noun)*

A family of Holocephali.

- *He looked up "chimaeridae" because he had never seen it before.*
- *In class, the teacher used "chimaeridae" to mean a family of holocephali.*

chinchilla laniger *(noun)*

Small rodent with soft pearly grey fur; native to the Andes but bred in captivity for fur.

- *The article explained what "chinchilla laniger" means with a simple example.*
- *In class, the teacher used "chinchilla laniger" to mean small rodent with soft pearly grey fur; native to....*

chinchillidae *(noun)*

Small bushy-tailed South American burrowing rodents.

- *She wrote a short paragraph that included "chinchillidae."*
- *He looked up "chinchillidae" because he had never seen it before.*

chinchillon *(noun)*

Gregarious burrowing rodent larger than the chinchillas.

- *They discussed "chinchillon" during the group presentation.*
- *In class, the teacher used "chinchillon" to mean gregarious burrowing rodent larger than the chinchillas.*

chiralgia *(noun)*

A pain in the hand that is not traumatic.

- *Understanding "chiralgia" helps you talk about this topic clearly.*
- *They discussed "chiralgia" during the group presentation.*

chirocephalus *(noun)*

Fairy shrimp; brine shrimp.

- *In class, the teacher used "chirocephalus" to mean fairy shrimp; brine shrimp.*
- *The article explained what "chirocephalus" means with a simple example.*

chlamydera *(noun)*

A genus of Ptilonorhynchidae.

- *In class, the teacher used "chlamydera" to mean a genus of ptilonorhynchidae.*
- *Understanding "chlamydera" helps you talk about this topic clearly.*

chlamydera nuchalis *(noun)*

Large bowerbird of northern Australia.

- *They discussed "chlamydera nuchalis" during the group presentation.*
- *Understanding "chlamydera nuchalis" helps you talk about this topic clearly.*

chlamydia psittaci *(noun)*

Bacteria responsible for the sexually transmitted disease chlamydia.

- *She wrote a short paragraph that included "chlamydia psittaci."*
- *The article explained what "chlamydia psittaci" means with a simple example.*

---

chlamydiaceae *(noun)*

Gram-negative parasites in warm-blooded vertebrates.

- *In class, the teacher used "chlamydiaceae" to mean gram-negative parasites in warm-blooded vertebrates.*
- *They discussed "chlamydiaceae" during the group presentation.*

---

chlamydomonadaceae *(noun)*

Green algae some of which are colored red by hematochrome.

- *They discussed "chlamydomonadaceae" during the group presentation.*
- *He looked up "chlamydomonadaceae" because he had never seen it before.*

---

chlamydosaurus *(noun)*

Frilled lizards.

- *In class, the teacher used "chlamydosaurus" to mean frilled lizards.*
- *The article explained what "chlamydosaurus" means with a simple example.*

---

chlamydosaurus kingi *(noun)*

Large arboreal insectivorous Australian lizard with a ruff of skin around the neck.

- *He looked up "chlamydosaurus kingi" because he had never seen it before.*
- *They discussed "chlamydosaurus kingi" during the group presentation.*

---

chlamyphore *(noun)*

Very small Argentine armadillo with pale silky hair and pink plates on head and neck.

- *He looked up "chlamyphore" because he had never seen it before.*
- *She wrote a short paragraph that included "chlamyphore."*

---

chlamyphorus truncatus *(noun)*

Very small Argentine armadillo with pale silky hair and pink plates on head and neck.

- *He looked up "chlamyphorus truncatus" because he had never seen it before.*
- *Understanding "chlamyphorus truncatus" helps you talk about this topic clearly.*

---

chloasma *(noun)*

A tan discoloration of a woman's face that is associated with pregnancy or with the use of oral contraceptives.

- *In class, the teacher used "chloasma" to mean a tan discoloration of a woman's face that is....*
- *Understanding "chloasma" helps you talk about this topic clearly.*

---

chlorococcales *(noun)*

Unicellular green algae that reproduce by spores.

- *In class, the teacher used "chlorococcales" to mean unicellular green algae that reproduce by spores.*
- *The article explained what "chlorococcales" means with a simple example.*

---

chlorococcum *(noun)*

Type genus of Chlorococcales; unicellular green algae occurring singly or in a layer on soil or damp rock.

- *The article explained what "chlorococcum" means with a simple example.*
- *In class, the teacher used "chlorococcum" to mean type genus of chlorococcales; unicellular green....*

---

chlorofucin *(noun)*

The chlorophyll present in brown algae, diatoms, and flagellates.

- *He looked up "chlorofucin" because he had never seen it before.*
- *She wrote a short paragraph that included "chlorofucin."*

---

chlorophis *(noun)*

African green snakes.

- *The article explained what "chlorophis" means with a simple example.*

- *Understanding "chlorophis" helps you talk about this topic clearly.*

---

chlorophoneus *(noun)*

A genus of Malaconotinae.

- *She wrote a short paragraph that included "chlorophoneus."*
- *The article explained what "chlorophoneus" means with a simple example.*

---

chlorophoneus nigrifrons *(noun)*

A kind of bush shrike.

- *In class, the teacher used "chlorophoneus nigrifrons" to mean a kind of bush shrike.*
- *They discussed "chlorophoneus nigrifrons" during the group presentation.*

---

chlorophthalmidae *(noun)*

Small family of soft-finned bottom-dwellers with large eyes; relatives of lizardfishes.

- *In class, the teacher used "chlorophthalmidae" to mean small family of soft-finned bottom-dwellers with....*
- *Understanding "chlorophthalmidae" helps you talk about this topic clearly.*

---

chlorophyl *(noun)*

Any of a group of green pigments found in photosynthetic organisms; there are four naturally occurring forms.

- *In class, the teacher used "chlorophyl" to mean any of a group of green pigments found in....*
- *He looked up "chlorophyl" because he had never seen it before.*

---

chlorophyte *(noun)*

Algae that are clear green in color; often growing on wet ricks or damp wood or the surface of stagnant water.

- *She wrote a short paragraph that included "chlorophyte."*
- *Understanding "chlorophyte" helps you talk about this topic clearly.*

---

chlorura chlorura *(noun)*

Towhee of the Rocky Mountains.

- *Understanding "chlorura chlorura" helps you talk about this topic clearly.*
- *In class, the teacher used "chlorura chlorura" to mean towhee of the rocky mountains.*

---

choanocyte *(noun)*

Any of the flagellated cells in sponges having a collar of cytoplasm around the flagellum; they maintain a flow of water through the body.

- *She wrote a short paragraph that included "choanocyte."*
- *They discussed "choanocyte" during the group presentation.*

---

choeronycteris *(noun)*

A genus of Phyllostomatidae.

- *The article explained what "choeronycteris" means with a simple example.*
- *In class, the teacher used "choeronycteris" to mean a genus of phyllostomatidae.*

---

choeronycteris mexicana *(noun)*

Small-eared Mexican bat with a long slender nose.

- *The article explained what "choeronycteris mexicana" means with a simple example.*
- *In class, the teacher used "choeronycteris mexicana" to mean small-eared mexican bat with a long slender nose.*

---

cholesterosis cutis *(noun)*

Widespread xanthomas (especially on elbows and knees); often associated with a disorder of lipid metabolism.

- *She wrote a short paragraph that included "cholesterosis cutis."*
- *They discussed "cholesterosis cutis" during the group presentation.*

---

choloepus *(noun)*

A genus of Megalonychidae consisting of the two-toed sloth.

- *In class, the teacher used "choloepus" to mean a genus of megalonychidae consisting of the....*
- *They discussed "choloepus" during the group presentation.*

---

choloepus didactylus *(noun)*

Relatively small fast-moving sloth with two long claws on each front foot.

- *In class, the teacher used "choloepus didactylus" to mean relatively small fast-moving sloth with two long....*
- *They discussed "choloepus didactylus" during the group presentation.*

choloepus hoffmanni *(noun)*

A sloth of Central America that has two long claws on each forefoot and three long claws on each hindfoot.

- *He looked up "choloepus hoffmanni" because he had never seen it before.*
- *She wrote a short paragraph that included "choloepus hoffmanni."*

chondrichthian *(noun)*

Fishes in which the skeleton may be calcified but not ossified.

- *Understanding "chondrichthian" helps you talk about this topic clearly.*
- *The article explained what "chondrichthian" means with a simple example.*

chondriosome *(noun)*

An organelle containing enzymes responsible for producing energy.

- *In class, the teacher used "chondriosome" to mean an organelle containing enzymes responsible for....*
- *Understanding "chondriosome" helps you talk about this topic clearly.*

chondrodystrophy *(noun)*

An inherited skeletal disorder beginning before birth; cartilage is converted to bone resulting in dwarfism.

- *They discussed "chondrodystrophy" during the group presentation.*
- *In class, the teacher used "chondrodystrophy" to mean an inherited skeletal disorder beginning before....*

chondroma *(noun)*

A common benign tumor of cartilage cells.

- *She wrote a short paragraph that included "chondroma."*
- *He looked up "chondroma" because he had never seen it before.*

chondrus *(noun)*

A genus of protoctist.

- *In class, the teacher used "chondrus" to mean a genus of protoctist.*
- *Understanding "chondrus" helps you talk about this topic clearly.*

chondrus crispus *(noun)*

Dark purple edible seaweed of the Atlantic coasts of Europe and North America.

- *They discussed "chondrus crispus" during the group presentation.*
- *She wrote a short paragraph that included "chondrus crispus."*

chordamesoderm *(noun)*

The area of mesoderm that forms the notochord.

- *The article explained what "chordamesoderm" means with a simple example.*
- *They discussed "chordamesoderm" during the group presentation.*

chordeiles *(noun)*

A genus of Caprimulgidae.

- *Understanding "chordeiles" helps you talk about this topic clearly.*
- *The article explained what "chordeiles" means with a simple example.*

chorditis *(noun)*

Inflammation of the vocal cords.

- *The article explained what "chorditis" means with a simple example.*
- *In class, the teacher used "chorditis" to mean inflammation of the vocal cords.*

chordomesoderm *(noun)*

The area of mesoderm that forms the notochord.

- *They discussed "chordomesoderm" during the group presentation.*
- *She wrote a short paragraph that included "chordomesoderm."*

---

choreic abasia *(noun)*

Abasia related to abnormal movements of the legs.

- *In class, the teacher used "choreic abasia" to mean abasia related to abnormal movements of the legs.*
- *The article explained what "choreic abasia" means with a simple example.*

---

chorioallantoic membrane *(noun)*

The very vascular fetal membrane composed of the fused chorion and adjacent wall of the allantois.

- *In class, the teacher used "chorioallantoic membrane" to mean the very vascular fetal membrane composed of the....*
- *The article explained what "chorioallantoic membrane" means with a simple example.*

---

chorioallantois *(noun)*

The very vascular fetal membrane composed of the fused chorion and adjacent wall of the allantois.

- *The article explained what "chorioallantois" means with a simple example.*
- *In class, the teacher used "chorioallantois" to mean the very vascular fetal membrane composed of the....*

---

choriomeningitis *(noun)*

A cerebral meningitis with cellular infiltration of the meninges.

- *She wrote a short paragraph that included "choriomeningitis."*
- *He looked up "choriomeningitis" because he had never seen it before.*

---

chorioretinitis *(noun)*

Inflammation of the choroid layer behind the retina.

- *They discussed "chorioretinitis" during the group presentation.*
- *He looked up "chorioretinitis" because he had never seen it before.*

---

choriotis *(noun)*

Australian bustard.

- *Understanding "choriotis" helps you talk about this topic clearly.*
- *In class, the teacher used "choriotis" to mean australian bustard.*

---

choriotis australis *(noun)*

Popular Australian game bird.

- *He looked up "choriotis australis" because he had never seen it before.*
- *They discussed "choriotis australis" during the group presentation.*

---

chorizagrotis *(noun)*

Moths whose larvae are army cutworms.

- *In class, the teacher used "chorizagrotis" to mean moths whose larvae are army cutworms.*
- *The article explained what "chorizagrotis" means with a simple example.*

---

chorizagrotis auxiliaris *(noun)*

Larvae (of a noctuid moth) that travel in large groups and destroy grains and alfalfa in the midwestern states.

- *They discussed "chorizagrotis auxiliaris" during the group presentation.*
- *He looked up "chorizagrotis auxiliaris" because he had never seen it before.*

---

chromoblastomycosis *(noun)*

A fungal infection characterized by itchy warty nodules on the skin.

- *He looked up "chromoblastomycosis" because he had never seen it before.*
- *She wrote a short paragraph that included "chromoblastomycosis."*

---

chronic myelocytic leukemia *(noun)*

Chronic leukemia characterized by granular leukocytes; more common in older people.

- *They discussed "chronic myelocytic leukemia" during the group presentation.*
- *He looked up "chronic myelocytic leukemia" because he had never seen it before.*

chronoperates *(noun)*

A reptile genus of Therapsida.

- *She wrote a short paragraph that included "chronoperates."*
- *He looked up "chronoperates" because he had never seen it before.*

chronoperates paradoxus *(noun)*

Shrew-sized protomammal from the Alberta region of Canada; from about 55 million years ago (much more recent than other mammal-like reptiles).

- *Understanding "chronoperates paradoxus" helps you talk about this topic clearly.*
- *In class, the teacher used "chronoperates paradoxus" to mean shrew-sized protomammal from the alberta region of....*

chrysaora *(noun)*

A genus of Scyphozoa.

- *In class, the teacher used "chrysaora" to mean a genus of scyphozoa.*
- *He looked up "chrysaora" because he had never seen it before.*

chrysaora quinquecirrha *(noun)*

A type of jellyfish.

- *She wrote a short paragraph that included "chrysaora quinquecirrha."*
- *He looked up "chrysaora quinquecirrha" because he had never seen it before.*

chrysemys *(noun)*

Painted turtles.

- *The article explained what "chrysemys" means with a simple example.*
- *In class, the teacher used "chrysemys" to mean painted turtles.*

chrysemys picta *(noun)*

Freshwater turtles having bright yellow and red markings; common in the eastern United States.

- *In class, the teacher used "chrysemys picta" to mean freshwater turtles having bright yellow and red....*
- *Understanding "chrysemys picta" helps you talk about this topic clearly.*

chrysochloridae *(noun)*

Golden moles.

- *She wrote a short paragraph that included "chrysochloridae."*
- *He looked up "chrysochloridae" because he had never seen it before.*

chrysochloris *(noun)*

Type genus of the Chrysochloridae.

- *He looked up "chrysochloris" because he had never seen it before.*
- *She wrote a short paragraph that included "chrysochloris."*

chrysolophus *(noun)*

Golden pheasants.

- *They discussed "chrysolophus" during the group presentation.*
- *He looked up "chrysolophus" because he had never seen it before.*

chrysolophus pictus *(noun)*

Brightly colored crested pheasant of mountains of western and central Asia.

- *They discussed "chrysolophus pictus" during the group presentation.*
- *Understanding "chrysolophus pictus" helps you talk about this topic clearly.*

chrysomelid *(noun)*

Brightly colored beetle that feeds on plant leaves; larvae infest roots and stems.

- *They discussed "chrysomelid" during the group presentation.*
- *Understanding "chrysomelid" helps you talk about this topic clearly.*

chrysophrys *(noun)*

Australian snapper.

- *In class, the teacher used "chrysophrys" to mean australian snapper.*
- *Understanding "chrysophrys" helps you talk about this topic clearly.*

---

chrysophrys auratus *(noun)*

Australian food fish having a pinkish body with blue spots.

- *She wrote a short paragraph that included "chrysophrys auratus."*
- *He looked up "chrysophrys auratus" because he had never seen it before.*

---

chrysophrys australis *(noun)*

Important dark-colored edible food and game fish of Australia.

- *Understanding "chrysophrys australis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "chrysophrys australis."*

---

chrysophyceae *(noun)*

All the yellow-green algae having flagella of unequal length.

- *She wrote a short paragraph that included "chrysophyceae."*
- *They discussed "chrysophyceae" during the group presentation.*

---

chrysopid *(noun)*

Pale green unpleasant-smelling lacewing fly having carnivorous larvae.

- *The article explained what "chrysopid" means with a simple example.*
- *In class, the teacher used "chrysopid" to mean pale green unpleasant-smelling lacewing fly having....*

---

chrysopidae *(noun)*

Green lacewings.

- *The article explained what "chrysopidae" means with a simple example.*
- *In class, the teacher used "chrysopidae" to mean green lacewings.*

---

chunga burmeisteri *(noun)*

Argentinian Cariama.

- *The article explained what "chunga burmeisteri" means with a simple example.*
- *She wrote a short paragraph that included "chunga burmeisteri."*

---

chyloderma *(noun)*

Swelling of the scrotum resulting from chronic lymphatic obstruction.

- *Understanding "chyloderma" helps you talk about this topic clearly.*
- *He looked up "chyloderma" because he had never seen it before.*

---

cicatrice *(noun)*

A mark left (usually on the skin) by the healing of injured tissue.

- *They discussed "cicatrice" during the group presentation.*
- *The article explained what "cicatrice" means with a simple example.*

---

cicindelidae *(noun)*

Tiger beetles.

- *In class, the teacher used "cicindelidae" to mean tiger beetles.*
- *Understanding "cicindelidae" helps you talk about this topic clearly.*

---

ciconiiformes *(noun)*

Order of chiefly tropical marsh-dwelling fish-eating wading birds with long legs and bills and (except for flamingos) unwebbed feet: herons; storks; spoonbills; flamingos; ibises.

- *In class, the teacher used "ciconiiformes" to mean order of chiefly tropical marsh-dwelling....*
- *The article explained what "ciconiiformes" means with a simple example.*

---

cigarfish *(noun)*

Small fusiform fish of western Atlantic.

- *Understanding "cigarfish" helps you talk about this topic clearly.*

- *He looked up “cigarfish” because he had never seen it before.*

---

cilioflagellata *(noun)*

In some classifications considered a phylum of the kingdom Protista; in others included in the plant phylum Pyrrophyta.

- *They discussed “cilioflagellata” during the group presentation.*
- *The article explained what “cilioflagellata” means with a simple example.*

---

ciliophora *(noun)*

Class of protozoa having cilia or hairlike appendages on part or all of the surface during some part of the life cycle.

- *He looked up “ciliophora” because he had never seen it before.*
- *They discussed “ciliophora” during the group presentation.*

---

ciliophoran *(noun)*

A protozoan with a microscopic appendage extending from the surface of the cell.

- *In class, the teacher used “ciliophoran” to mean a protozoan with a microscopic appendage extending....*
- *The article explained what “ciliophoran” means with a simple example.*

---

cimicidae *(noun)*

Wingless flat-bodied bloodsucking insects.

- *Understanding “cimicidae” helps you talk about this topic clearly.*
- *In class, the teacher used “cimicidae” to mean wingless flat-bodied bloodsucking insects.*

---

cinclidae *(noun)*

Water ouzels.

- *In class, the teacher used “cinclidae” to mean water ouzels.*
- *The article explained what “cinclidae” means with a simple example.*

---

cinclus *(noun)*

Type genus of the family Cinclidae.

- *The article explained what “cinclus” means with a simple example.*
- *Understanding “cinclus” helps you talk about this topic clearly.*

---

cinclus aquaticus *(noun)*

A water ouzel of Europe.

- *The article explained what “cinclus aquaticus” means with a simple example.*
- *In class, the teacher used “cinclus aquaticus” to mean a water ouzel of europe.*

---

cinclus mexicanus *(noun)*

A water ouzel of western North America.

- *In class, the teacher used “cinclus mexicanus” to mean a water ouzel of western north america.*
- *They discussed “cinclus mexicanus” during the group presentation.*

---

circaetus *(noun)*

Harrier eagles.

- *The article explained what “circaetus” means with a simple example.*
- *Understanding “circaetus” helps you talk about this topic clearly.*

---

circumfuse *(verb)*

Spread something around something.

- *The coach explained when to use “circumfuse” and when to wait.*
- *Can you use “circumfuse” in a sentence that fits this situation?*

---

circumvolve *(verb)*

Cause to turn on an axis or center.

- *He did not know how to use “circumvolve” until he saw an example.*
- *Can you use “circumvolve” in a sentence that fits this situation?*

---

circus aeruginosus *(noun)*

Old World harrier frequenting marshy regions.

- *Understanding "circus aeruginosus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "circus aeruginosus."*

circus cyaneus *(noun)*

Common harrier of North America and Europe; nests in marshes and open land.

- *She wrote a short paragraph that included "circus cyaneus."*
- *Understanding "circus cyaneus" helps you talk about this topic clearly.*

circus pygargus *(noun)*

Brownish European harrier.

- *The article explained what "circus pygargus" means with a simple example.*
- *Understanding "circus pygargus" helps you talk about this topic clearly.*

cirriped *(noun)*

Marine crustaceans with feathery food-catching appendages; free-swimming as larvae; as adults form a hard shell and live attached to submerged surfaces.

- *He looked up "cirriped" because he had never seen it before.*
- *She wrote a short paragraph that included "cirriped."*

cirripede *(noun)*

Marine crustaceans with feathery food-catching appendages; free-swimming as larvae; as adults form a hard shell and live attached to submerged surfaces.

- *The article explained what "cirripede" means with a simple example.*
- *In class, the teacher used "cirripede" to mean marine crustaceans with feathery food-catching....*

cistothorus *(noun)*

Marsh wrens.

- *They discussed "cistothorus" during the group presentation.*
- *In class, the teacher used "cistothorus" to mean marsh wrens.*

cistothorus palustris *(noun)*

American wren that inhabits tall reed beds.

- *He looked up "cistothorus palustris" because he had never seen it before.*
- *Understanding "cistothorus palustris" helps you talk about this topic clearly.*

cistothorus platensis *(noun)*

Small American wren inhabiting wet sedgy meadows.

- *Understanding "cistothorus platensis" helps you talk about this topic clearly.*
- *He looked up "cistothorus platensis" because he had never seen it before.*

cistron *(noun)*

(genetics) a segment of DNA that is involved in producing a polypeptide chain; it can include regions preceding and following the coding DNA as well as introns between the exons; it is considered a unit of heredity.

- *Understanding "cistron" helps you talk about this topic clearly.*
- *In class, the teacher used "cistron" to mean (genetics) a segment of dna that is involved in....*

citellus *(noun)*

Typical ground squirrels.

- *They discussed "citellus" during the group presentation.*
- *She wrote a short paragraph that included "citellus."*

citellus citellus *(noun)*

Rather large central Eurasian ground squirrel.

- *In class, the teacher used "citellus citellus" to mean rather large central eurasian ground squirrel.*
- *Understanding "citellus citellus" helps you talk about this topic clearly.*

citellus lateralis *(noun)*

Common black-striped reddish-brown ground squirrel of western North America; resembles a large chipmunk.

- *Understanding "citellus lateralis" helps you talk about this topic clearly.*
- *They discussed "citellus lateralis" during the group presentation.*

---

citellus leucurus *(noun)*

Small ground squirrel of western United States.

- *She wrote a short paragraph that included "citellus leucurus."*
- *They discussed "citellus leucurus" during the group presentation.*

---

citellus parryi *(noun)*

Large ground squirrel of the North American far north.

- *He looked up "citellus parryi" because he had never seen it before.*
- *Understanding "citellus parryi" helps you talk about this topic clearly.*

---

citellus richardsoni *(noun)*

Of sagebrush and grassland areas of western United States and Canada.

- *They discussed "citellus richardsoni" during the group presentation.*
- *The article explained what "citellus richardsoni" means with a simple example.*

---

citellus variegatus *(noun)*

Large grey ground squirrel of rocky areas of the southwestern United States.

- *He looked up "citellus variegatus" because he had never seen it before.*
- *Understanding "citellus variegatus" helps you talk about this topic clearly.*

---

citharichthys *(noun)*

A genus of Bothidae.

- *She wrote a short paragraph that included "citharichthys."*
- *They discussed "citharichthys" during the group presentation.*

---

citharichthys cornutus *(noun)*

A whiff found in waters from the Bahamas and northern Gulf of Mexico to Brazil.

- *Understanding "citharichthys cornutus" helps you talk about this topic clearly.*
- *In class, the teacher used "citharichthys cornutus" to mean a whiff found in waters from the bahamas and....*

---

citrophilous mealybug *(noun)*

Destructive especially to citrus.

- *She wrote a short paragraph that included "citrophilous mealybug."*
- *He looked up "citrophilous mealybug" because he had never seen it before.*

---

citrophilus mealybug *(noun)*

Destructive especially to citrus.

- *He looked up "citrophilus mealybug" because he had never seen it before.*
- *In class, the teacher used "citrophilus mealybug" to mean destructive especially to citrus.*

---

cladorhyncus *(noun)*

One of two genera of stilts; similar to avocets but with straight bills.

- *They discussed "cladorhyncus" during the group presentation.*
- *The article explained what "cladorhyncus" means with a simple example.*

---

cladorhyncus leucocephalum *(noun)*

Web-footed Australian stilt with reddish-brown pectoral markings.

- *He looked up "cladorhyncus leucocephalum" because he had never seen it before.*
- *She wrote a short paragraph that included "cladorhyncus leucocephalum."*

---

clamatores *(noun)*

Used in some classification systems; a suborder or superfamily nearly coextensive with suborder Tyranni; Passeriformes having relatively simple vocal organs and little power of song; clamatorial birds.

- *They discussed "clamatores" during the group presentation.*
- *Understanding "clamatores" helps you talk about this topic clearly.*

clamminess *(noun)*

Unpleasant wetness.

- *In class, the teacher used "clamminess" to mean unpleasant wetness.*
- *They discussed "clamminess" during the group presentation.*

clangula *(noun)*

A genus of ducks.

- *They discussed "clangula" during the group presentation.*
- *She wrote a short paragraph that included "clangula."*

clangula hyemalis *(noun)*

A common long-tailed sea duck of the northern parts of the United States.

- *The article explained what "clangula hyemalis" means with a simple example.*
- *In class, the teacher used "clangula hyemalis" to mean a common long-tailed sea duck of the northern parts....*

class aphasmidia *(noun)*

One of two subgroups of Nematoda used in some classification systems.

- *They discussed "class aphasmidia" during the group presentation.*
- *Understanding "class aphasmidia" helps you talk about this topic clearly.*

class archiannelida *(noun)*

A class of Annelida.

- *They discussed "class archiannelida" during the group presentation.*
- *In class, the teacher used "class archiannelida" to mean a class of annelida.*

class ascidiaceae *(noun)*

Sometimes classified as an order: sea squirts.

- *Understanding "class ascidiaceae" helps you talk about this topic clearly.*
- *They discussed "class ascidiaceae" during the group presentation.*

class bacillariophyceae *(noun)*

Marine and freshwater eukaryotic algae: diatoms.

- *The article explained what "class bacillariophyceae" means with a simple example.*
- *Understanding "class bacillariophyceae" helps you talk about this topic clearly.*

class charophyceae *(noun)*

In some classifications: contains only the order Charales.

- *Understanding "class charophyceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "class charophyceae."*

class chilopoda *(noun)*

Arthropods having the trunk composed of numerous somites each bearing one pair of legs: centipedes.

- *She wrote a short paragraph that included "class chilopoda."*
- *He looked up "class chilopoda" because he had never seen it before.*

class chrysophyceae *(noun)*

All the yellow-green algae having flagella of unequal length.

- *The article explained what "class chrysophyceae" means with a simple example.*
- *They discussed "class chrysophyceae" during the group presentation.*

class ciliophora *(noun)*

Class of protozoa having cilia or hairlike appendages on part or all of the surface during some part of the life cycle.

- *In class, the teacher used "class ciliophora" to mean class of protozoa having cilia or hairlike....*
- *He looked up "class ciliophora" because he had never seen it before.*

class cryptophyceae *(noun)*

Motile usually brownish-green protozoa-like algae.

- *In class, the teacher used "class cryptophyceae" to mean motile usually brownish-green protozoa-like algae.*
- *The article explained what "class cryptophyceae" means with a simple example.*

---

class cyanophyceae *(noun)*

Photosynthetic bacteria found in fresh and salt water, having chlorophyll a and phycobilins; once thought to be algae: blue-green algae.

- *The article explained what "class cyanophyceae" means with a simple example.*
- *In class, the teacher used "class cyanophyceae" to mean photosynthetic bacteria found in fresh and salt....*

---

class cyclosporeae *(noun)*

In more recent classifications superseded by the order Fucales.

- *She wrote a short paragraph that included "class cyclosporeae."*
- *He looked up "class cyclosporeae" because he had never seen it before.*

---

class diatomophyceae *(noun)*

Marine and freshwater eukaryotic algae: diatoms.

- *He looked up "class diatomophyceae" because he had never seen it before.*
- *She wrote a short paragraph that included "class diatomophyceae."*

---

class diplopoda *(noun)*

Arthropods having the body composed of numerous double somites each with two pairs of legs: millipedes.

- *He looked up "class diplopoda" because he had never seen it before.*
- *In class, the teacher used "class diplopoda" to mean arthropods having the body composed of numerous....*

---

class euglenophyceae *(noun)*

Coextensive with the division Euglenophyta.

- *In class, the teacher used "class euglenophyceae" to mean coextensive with the division euglenophyta.*
- *He looked up "class euglenophyceae" because he had never seen it before.*

---

class flagellata *(noun)*

Protozoa having flagella.

- *She wrote a short paragraph that included "class flagellata."*
- *He looked up "class flagellata" because he had never seen it before.*

---

class gasteropoda *(noun)*

Snails and slugs and their relatives.

- *The article explained what "class gasteropoda" means with a simple example.*
- *Understanding "class gasteropoda" helps you talk about this topic clearly.*

---

class heterokontae *(noun)*

All the yellow-green algae having flagella of unequal length.

- *She wrote a short paragraph that included "class heterokontae."*
- *He looked up "class heterokontae" because he had never seen it before.*

---

class hexapoda *(noun)*

Insects; about five-sixths of all known animal species.

- *He looked up "class hexapoda" because he had never seen it before.*
- *She wrote a short paragraph that included "class hexapoda."*

---

class holothuroidea *(noun)*

Class of echinoderms including the sea cucumbers.

- *The article explained what "class holothuroidea" means with a simple example.*
- *They discussed "class holothuroidea" during the group presentation.*

---

class hyalospongiae *(noun)*

Sponges with siliceous spicules that have six rays; choanocytes are restricted to finger-shaped chambers.

- *They discussed "class hyalospongiae" during the group presentation.*

- *He looked up “class hyalospongiae” because he had never seen it before.*

class lamellibranchia *(noun)*

Oysters; clams; scallops; mussels.

- *Understanding “class lamellibranchia” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “class lamellibranchia.”*

class larvacea *(noun)*

Small free-swimming tunicates; sometimes classified as an order.

- *They discussed “class larvacea” during the group presentation.*
- *Understanding “class larvacea” helps you talk about this topic clearly.*

class mastigophora *(noun)*

Protozoa having flagella.

- *In class, the teacher used “class mastigophora” to mean protozoa having flagella.*
- *Understanding “class mastigophora” helps you talk about this topic clearly.*

class merostomata *(noun)*

Used in some classifications; includes the orders Xiphosura and Eurypterida.

- *He looked up “class merostomata” because he had never seen it before.*
- *In class, the teacher used “class merostomata” to mean used in some classifications; includes the orders....*

class ophiuroidea *(noun)*

Brittle stars and basket stars.

- *The article explained what “class ophiuroidea” means with a simple example.*
- *Understanding “class ophiuroidea” helps you talk about this topic clearly.*

class pauropoda *(noun)*

An obscure class of minute arthropods with branched antennae and 8 to 10 pairs of legs.

- *She wrote a short paragraph that included “class pauropoda.”*
- *The article explained what “class pauropoda” means with a simple example.*

class pelecypoda *(noun)*

Oysters; clams; scallops; mussels.

- *Understanding “class pelecypoda” helps you talk about this topic clearly.*
- *The article explained what “class pelecypoda” means with a simple example.*

class phaeophyceae *(noun)*

Brown algae; mostly marine and littoral eukaryotic algae.

- *Understanding “class phaeophyceae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “class phaeophyceae.”*

class phasmidia *(noun)*

One of two subgroups of Nematoda used in some classification systems.

- *He looked up “class phasmidia” because he had never seen it before.*
- *She wrote a short paragraph that included “class phasmidia.”*

class placodermi *(noun)*

Extinct group of bony-plated fishes with primitive jaws.

- *Understanding “class placodermi” helps you talk about this topic clearly.*
- *They discussed “class placodermi” during the group presentation.*

class polyplacophora *(noun)*

Small class of marine mollusks comprising the chitons; sometimes considered an order of the subclass Amphineura.

- *She wrote a short paragraph that included “class polyplacophora.”*
- *He looked up “class polyplacophora” because he had never seen it before.*

class rhodophyceae *(noun)*

Coextensive with the Rhodophyta: red algae.

- *They discussed "class rhodophyceae" during the group presentation.*
- *He looked up "class rhodophyceae" because he had never seen it before.*

---

class sarcodina *(noun)*

Characterized by the formation of pseudopods for locomotion and taking food: Actinopoda; Rhizopoda.

- *Understanding "class sarcodina" helps you talk about this topic clearly.*
- *He looked up "class sarcodina" because he had never seen it before.*

---

class scaphopoda *(noun)*

Small class of bilaterally symmetrical marine forms comprising the tooth shells.

- *He looked up "class scaphopoda" because he had never seen it before.*
- *Understanding "class scaphopoda" helps you talk about this topic clearly.*

---

class schizomycetes *(noun)*

A former classification.

- *He looked up "class schizomycetes" because he had never seen it before.*
- *Understanding "class schizomycetes" helps you talk about this topic clearly.*

---

class sporozoa *(noun)*

Strictly parasitic protozoans that are usually immobile; includes plasmodia and coccidia and piroplasms and malaria parasites.

- *She wrote a short paragraph that included "class sporozoa."*
- *They discussed "class sporozoa" during the group presentation.*

---

class symphyla *(noun)*

Small class of minute arthropods; unimportant except for the garden centipede.

- *She wrote a short paragraph that included "class symphyla."*
- *He looked up "class symphyla" because he had never seen it before.*

---

class tardigrada *(noun)*

In some classifications considered a separate phylum: microscopic arachnid-like invertebrates living in water or damp moss having 4 pairs of legs and instead of a mouth a pair of stylets or needlelike piercing organs connected with the pharynx.

- *She wrote a short paragraph that included "class tardigrada."*
- *They discussed "class tardigrada" during the group presentation.*

---

class tentaculata *(noun)*

Ctenophores have retractile tentacles.

- *In class, the teacher used "class tentaculata" to mean ctenophores have retractile tentacles.*
- *Understanding "class tentaculata" helps you talk about this topic clearly.*

---

class thaliacea *(noun)*

Small class of free-swimming tunicates; sometimes classified as an order.

- *Understanding "class thaliacea" helps you talk about this topic clearly.*
- *In class, the teacher used "class thaliacea" to mean small class of free-swimming tunicates; sometimes....*

---

class ulvophyceae *(noun)*

Alternative name for the class Chlorophyceae in some classifications.

- *The article explained what "class ulvophyceae" means with a simple example.*
- *They discussed "class ulvophyceae" during the group presentation.*

---

class xanthophyceae *(noun)*

Yellow-green algae.

- *The article explained what "class xanthophyceae" means with a simple example.*
- *In class, the teacher used "class xanthophyceae" to mean yellow-green algae.*

---

clerid *(noun)*

Predacious on other insects; usually brightly colored or metallic.

- *The article explained what "clerid" means with a simple example.*
- *She wrote a short paragraph that included "clerid."*

---

clerid beetle *(noun)*

Predacious on other insects; usually brightly colored or metallic.

- *In class, the teacher used "clerid beetle" to mean predacious on other insects; usually brightly....*
- *The article explained what "clerid beetle" means with a simple example.*

---

cleridae *(noun)*

Beetles that prey on other insects.

- *The article explained what "cleridae" means with a simple example.*
- *They discussed "cleridae" during the group presentation.*

---

clingfish *(noun)*

Very small (to 3 inches) flattened marine fish with a sucking disc on the abdomen for clinging to rocks etc.

- *The article explained what "clingfish" means with a simple example.*
- *In class, the teacher used "clingfish" to mean very small (to 3 inches) flattened marine fish with....*

---

clinid *(noun)*

Mostly small blennioid fishes of coral reefs and seagrass beds.

- *The article explained what "clinid" means with a simple example.*
- *She wrote a short paragraph that included "clinid."*

---

clinid fish *(noun)*

Mostly small blennioid fishes of coral reefs and seagrass beds.

- *They discussed "clinid fish" during the group presentation.*
- *The article explained what "clinid fish" means with a simple example.*

---

clinidae *(noun)*

Viviparous blennies of temperate and tropical seas.

- *The article explained what "clinidae" means with a simple example.*
- *They discussed "clinidae" during the group presentation.*

---

clinocephalism *(noun)*

A congenital defect in which the top of the head is depressed (concave instead of convex).

- *She wrote a short paragraph that included "clinocephalism."*
- *He looked up "clinocephalism" because he had never seen it before.*

---

clinocephaly *(noun)*

A congenital defect in which the top of the head is depressed (concave instead of convex).

- *The article explained what "clinocephaly" means with a simple example.*
- *They discussed "clinocephaly" during the group presentation.*

---

clinodactyly *(noun)*

A congenital defect in which one or more toes or fingers are abnormally positioned.

- *They discussed "clinodactyly" during the group presentation.*
- *The article explained what "clinodactyly" means with a simple example.*

---

clostridial myonecrosis *(noun)*

(pathology) a deadly form of gangrene usually caused by clostridium bacteria that produce toxins that cause tissue death; can be used as a bioweapon.

- *The article explained what "clostridial myonecrosis" means with a simple example.*
- *In class, the teacher used "clostridial myonecrosis" to mean (pathology) a deadly form of gangrene usually....*

---

clupea harangus *(noun)*

Commercially important food fish of northern waters of both Atlantic and Pacific.

- *They discussed "clupea harangus" during the group presentation.*
- *In class, the teacher used "clupea harangus" to mean commercially important food fish of northern waters....*

clupea harengus harengus *(noun)*

Important food fish; found in enormous shoals in the northern Atlantic.

- *Understanding "clupea harengus harengus" helps you talk about this topic clearly.*
- *In class, the teacher used "clupea harengus harengus" to mean important food fish; found in enormous shoals in....*

clupea harengus pallasii *(noun)*

Important food fish of the northern Pacific.

- *In class, the teacher used "clupea harengus pallasii" to mean important food fish of the northern pacific.*
- *The article explained what "clupea harengus pallasii" means with a simple example.*

clupea sprattus *(noun)*

Small herring processed like a sardine.

- *Understanding "clupea sprattus" helps you talk about this topic clearly.*
- *The article explained what "clupea sprattus" means with a simple example.*

clupeid *(noun)*

Any of numerous soft-finned schooling food fishes of shallow waters of northern seas.

- *He looked up "clupeid" because he had never seen it before.*
- *In class, the teacher used "clupeid" to mean any of numerous soft-finned schooling food fishes....*

clupeid fish *(noun)*

Any of numerous soft-finned schooling food fishes of shallow waters of northern seas.

- *In class, the teacher used "clupeid fish" to mean any of numerous soft-finned schooling food fishes....*
- *Understanding "clupeid fish" helps you talk about this topic clearly.*

clupeidae *(noun)*

Herrings; shad; sardines; etc.

- *He looked up "clupeidae" because he had never seen it before.*
- *She wrote a short paragraph that included "clupeidae."*

cnemidophorus exsanguis *(noun)*

Having longitudinal stripes overlaid with light spots; upland lizard of United States southwest and Mexico.

- *They discussed "cnemidophorus exsanguis" during the group presentation.*
- *In class, the teacher used "cnemidophorus exsanguis" to mean having longitudinal stripes overlaid with light....*

cnemidophorus sexlineatus *(noun)*

Very swift lizard of eastern and central United States.

- *They discussed "cnemidophorus sexlineatus" during the group presentation.*
- *The article explained what "cnemidophorus sexlineatus" means with a simple example.*

cnemidophorus tesselatus *(noun)*

Markings are darker and more marked than in western whiptail; from southeastern Colorado to eastern Chihuahua.

- *The article explained what "cnemidophorus tesselatus" means with a simple example.*
- *In class, the teacher used "cnemidophorus tesselatus" to mean markings are darker and more marked than in western....*

cnidosporidia *(noun)*

Single-host parasites of lower vertebrates and invertebrates.

- *He looked up "cnidosporidia" because he had never seen it before.*
- *Understanding "cnidosporidia" helps you talk about this topic clearly.*

coachwhip *(noun)*

A whipsnake of southern United States and Mexico; tail resembles a braided whip.

- *Understanding "coachwhip" helps you talk about this topic clearly.*
- *In class, the teacher used "coachwhip" to mean a whipsnake of southern united states and mexico;....*

coachwhip snake *(noun)*

A whipsnake of southern United States and Mexico; tail resembles a braided whip.

- *In class, the teacher used "coachwhip snake" to mean a whipsnake of southern united states and mexico;...*
- *He looked up "coachwhip snake" because he had never seen it before.*

---

coagulum *(noun)*

A lump of material formed from the content of a liquid.

- *The article explained what "coagulum" means with a simple example.*
- *In class, the teacher used "coagulum" to mean a lump of material formed from the content of a liquid.*

---

cocainise *(verb)*

Anesthetize with cocaine.

- *Learners should practice how to use "cocainise" in real sentences.*
- *The coach explained when to use "cocainise" and when to wait.*

---

cocainize *(verb)*

Anesthetize with cocaine.

- *Can you use "cocainize" in a sentence that fits this situation?*
- *He did not know how to use "cocainize" until he saw an example.*

---

coccid insect *(noun)*

Scale insects and mealybugs.

- *She wrote a short paragraph that included "coccid insect."*
- *Understanding "coccid insect" helps you talk about this topic clearly.*

---

coccidae *(noun)*

Scale insects.

- *She wrote a short paragraph that included "coccidae."*
- *Understanding "coccidae" helps you talk about this topic clearly.*

---

coccidiomycosis *(noun)*

An infection of the lungs and skin characterized by excessive sputum and nodules.

- *Understanding "coccidiomycosis" helps you talk about this topic clearly.*
- *He looked up "coccidiomycosis" because he had never seen it before.*

---

coccidium *(noun)*

Parasitic on the digestive epithelium of vertebrates and higher invertebrates.

- *Understanding "coccidium" helps you talk about this topic clearly.*
- *He looked up "coccidium" because he had never seen it before.*

---

coccoidea *(noun)*

Scale insects and mealybugs.

- *He looked up "coccoidea" because he had never seen it before.*
- *In class, the teacher used "coccoidea" to mean scale insects and mealybugs.*

---

coccothraustes *(noun)*

Large finches.

- *Understanding "coccothraustes" helps you talk about this topic clearly.*
- *He looked up "coccothraustes" because he had never seen it before.*

---

coccothraustes coccothraustes *(noun)*

A common large finch of Eurasia.

- *In class, the teacher used "coccothraustes coccothraustes" to mean a common large finch of eurasia.*
- *Understanding "coccothraustes coccothraustes" helps you talk about this topic clearly.*

---

coccus hesperidum *(noun)*

Pest on citrus trees.

- *He looked up "coccus hesperidum" because he had never seen it before.*

- *She wrote a short paragraph that included “coccus hesperidum.”*

---

coccyzus *(noun)*

A genus of Cuculidae.

- *She wrote a short paragraph that included “coccyzus.”*
- *He looked up “coccyzus” because he had never seen it before.*

---

coccyzus erythropthalmus *(noun)*

North American cuckoo; builds a nest and rears its own young.

- *In class, the teacher used “coccyzus erythropthalmus” to mean north american cuckoo; builds a nest and rears its....*
- *The article explained what “coccyzus erythropthalmus” means with a simple example.*

---

cochlearius cochlearius *(noun)*

Tropical American heron related to night herons.

- *Understanding “cochlearius cochlearius” helps you talk about this topic clearly.*
- *They discussed “cochlearius cochlearius” during the group presentation.*

---

cockateel *(noun)*

Small grey Australian parrot with a yellow crested head.

- *The article explained what “cockateel” means with a simple example.*
- *In class, the teacher used “cockateel” to mean small grey australian parrot with a yellow crested head.*

---

codlin moth *(noun)*

A small grey moth whose larvae live in apples and English walnuts.

- *She wrote a short paragraph that included “codlin moth.”*
- *He looked up “codlin moth” because he had never seen it before.*

---

coelenterate *(noun)*

Radially symmetrical animals having saclike bodies with only one opening and tentacles with stinging structures; they occur in polyp and medusa forms.

- *The article explained what “coelenterate” means with a simple example.*
- *They discussed “coelenterate” during the group presentation.*

---

coelenterate family *(noun)*

A family of coelenterates.

- *They discussed “coelenterate family” during the group presentation.*
- *She wrote a short paragraph that included “coelenterate family.”*

---

coelenterate genus *(noun)*

A genus of coelenterates.

- *They discussed “coelenterate genus” during the group presentation.*
- *In class, the teacher used “coelenterate genus” to mean a genus of coelenterates.*

---

coelenteron *(noun)*

The saclike body cavity of a coelenterate.

- *In class, the teacher used “coelenteron” to mean the saclike body cavity of a coelenterate.*
- *He looked up “coelenteron” because he had never seen it before.*

---

coereba *(noun)*

Type genus of the Coerebidae.

- *She wrote a short paragraph that included “coereba.”*
- *Understanding “coereba” helps you talk about this topic clearly.*

---

coerebidae *(noun)*

The honeycreepers.

- *She wrote a short paragraph that included “coerebidae.”*
- *The article explained what “coerebidae” means with a simple example.*

---

coggle *(verb)*

Walk unsteadily.

- *Can you use “coggle” in a sentence that fits this situation?*
- *The coach explained when to use “coggle” and when to wait.*

---

cohoe *(noun)*

Small salmon of northern Pacific coasts and the Great Lakes.

- *He looked up “cohoe” because he had never seen it before.*
- *They discussed “cohoe” during the group presentation.*

---

coiffe *(verb)*

Arrange attractively.

- *She tried to use “coiffe” carefully so everyone would understand.*
- *Learners should practice how to use “coiffe” in real sentences.*

---

colaptes *(noun)*

A genus of Picidae.

- *She wrote a short paragraph that included “colaptes.”*
- *They discussed “colaptes” during the group presentation.*

---

colaptes auratus *(noun)*

Large flicker of eastern North America with a red neck and yellow undersurface to wings and tail.

- *Understanding “colaptes auratus” helps you talk about this topic clearly.*
- *He looked up “colaptes auratus” because he had never seen it before.*

---

colaptes caper collaris *(noun)*

Western United States bird with red undersurface to wings and tail.

- *They discussed “colaptes caper collaris” during the group presentation.*
- *In class, the teacher used “colaptes caper collaris” to mean western united states bird with red undersurface to....*

---

colaptes chrysoides *(noun)*

Southwestern United States bird like the yellow-shafted flicker but lacking the red neck.

- *Understanding “colaptes chrysoides” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “colaptes chrysoides.”*

---

coleonyx *(noun)*

Banded geckos.

- *They discussed “coleonyx” during the group presentation.*
- *He looked up “coleonyx” because he had never seen it before.*

---

colinus *(noun)*

New World quail: the bobwhites.

- *The article explained what “colinus” means with a simple example.*
- *They discussed “colinus” during the group presentation.*

---

colinus virginianus *(noun)*

A favorite game bird of eastern and central United States.

- *He looked up “colinus virginianus” because he had never seen it before.*
- *They discussed “colinus virginianus” during the group presentation.*

---

coliphage *(noun)*

A bacteriophage that infects the bacterium Escherichia coli.

- *He looked up “coliphage” because he had never seen it before.*
- *She wrote a short paragraph that included “coliphage.”*

---

collembolan *(noun)*

Any of numerous minute wingless primitive insects possessing a special abdominal appendage that allows the characteristic nearly perpetual springing pattern; found in soil rich in organic debris or on the surface of snow or water.

- *Understanding "collembolan" helps you talk about this topic clearly.*
- *In class, the teacher used "collembolan" to mean any of numerous minute wingless primitive insects....*

---

collocalia *(noun)*

A genus of Apodidae.

- *They discussed "collocalia" during the group presentation.*
- *In class, the teacher used "collocalia" to mean a genus of apodidae.*

---

collocalia inexpectata *(noun)*

Swift of eastern Asia; produces the edible bird's nest.

- *They discussed "collocalia inexpectata" during the group presentation.*
- *She wrote a short paragraph that included "collocalia inexpectata."*

---

colobus guereza *(noun)*

A colobus monkey with a reddish brown coat and white silky fringes down both sides of the body.

- *He looked up "colobus guereza" because he had never seen it before.*
- *They discussed "colobus guereza" during the group presentation.*

---

colpitis *(noun)*

Inflammation of the vagina.

- *She wrote a short paragraph that included "colpitis."*
- *Understanding "colpitis" helps you talk about this topic clearly.*

---

colpocele *(noun)*

Hernia projecting into the vagina.

- *Understanding "colpocele" helps you talk about this topic clearly.*
- *In class, the teacher used "colpocele" to mean hernia projecting into the vagina.*

---

colpocystitis *(noun)*

Inflammation of the vagina and bladder.

- *They discussed "colpocystitis" during the group presentation.*
- *In class, the teacher used "colpocystitis" to mean inflammation of the vagina and bladder.*

---

colpocystocele *(noun)*

Hernia in which the urinary bladder protrudes through the wall of the vagina; sometimes occurs after childbirth.

- *In class, the teacher used "colpocystocele" to mean hernia in which the urinary bladder protrudes....*
- *He looked up "colpocystocele" because he had never seen it before.*

---

colpoxerosis *(noun)*

A condition in which the vagina is unusually dry.

- *Understanding "colpoxerosis" helps you talk about this topic clearly.*
- *They discussed "colpoxerosis" during the group presentation.*

---

coluber constrictor flaviventris *(noun)*

Bluish-green blacksnake found from Ohio to Texas.

- *She wrote a short paragraph that included "coluber constrictor flaviventris."*
- *Understanding "coluber constrictor flaviventris" helps you talk about this topic clearly.*

---

coluber hippocrepis *(noun)*

Slender fast-moving Eurasian snake.

- *Understanding "coluber hippocrepis" helps you talk about this topic clearly.*
- *In class, the teacher used "coluber hippocrepis" to mean slender fast-moving eurasian snake.*

---

colubridae *(noun)*

Nonvenomous snakes; about two-thirds of all living species.

- *In class, the teacher used "colubridae" to mean nonvenomous snakes; about two-thirds of all living....*
- *Understanding "colubridae" helps you talk about this topic clearly.*

colugo *(noun)*

Arboreal nocturnal mammal of southeast Asia and the Philippines resembling a lemur and having a fold of skin on each side from neck to tail that is used for long gliding leaps.

- *She wrote a short paragraph that included "colugo."*
- *They discussed "colugo" during the group presentation.*

columba palumbus *(noun)*

Eurasian pigeon with white patches on wings and neck.

- *In class, the teacher used "columba palumbus" to mean eurasian pigeon with white patches on wings and neck.*
- *The article explained what "columba palumbus" means with a simple example.*

columbidae *(noun)*

Doves and pigeons.

- *She wrote a short paragraph that included "columbidae."*
- *He looked up "columbidae" because he had never seen it before.*

columbiform bird *(noun)*

A cosmopolitan order of land birds having small heads and short legs with four unwebbed toes.

- *In class, the teacher used "columbiform bird" to mean a cosmopolitan order of land birds having small....*
- *He looked up "columbiform bird" because he had never seen it before.*

columbiformes *(noun)*

Sand grouse; pigeons; doves; extinct dodos and solitaires.

- *She wrote a short paragraph that included "columbiformes."*
- *They discussed "columbiformes" during the group presentation.*

comatula *(noun)*

Former usage synonymous with Antedon.

- *Understanding "comatula" helps you talk about this topic clearly.*
- *He looked up "comatula" because he had never seen it before.*

comatulid *(noun)*

Free-swimming stalkless crinoid with ten feathery arms; found on muddy sea bottoms.

- *Understanding "comatulid" helps you talk about this topic clearly.*
- *They discussed "comatulid" during the group presentation.*

comatulidae *(noun)*

Former usage synonymous with Antedonidae.

- *Understanding "comatulidae" helps you talk about this topic clearly.*
- *In class, the teacher used "comatulidae" to mean former usage synonymous with antedonidae.*

combtooth blenny *(noun)*

Small usually scaleless fishes with comb-like teeth living about rocky shores; are territorial and live in holes between rocks.

- *They discussed "combtooth blenny" during the group presentation.*
- *The article explained what "combtooth blenny" means with a simple example.*

common booklouse *(noun)*

A variety of booklouse.

- *He looked up "common booklouse" because he had never seen it before.*
- *She wrote a short paragraph that included "common booklouse."*

compsognathus *(noun)*

Very small bipedal carnivorous dinosaur of the late Jurassic in Bavaria.

- *The article explained what "compsognathus" means with a simple example.*
- *In class, the teacher used "compsognathus" to mean very small bipedal carnivorous dinosaur of the late....*

conceivableness *(noun)*

The state of being conceivable.

- *He looked up "conceivableness" because he had never seen it before.*
- *She wrote a short paragraph that included "conceivableness."*

---

conchfish *(noun)*

Found in West Indies; lives in mantle cavity of a living conch.

- *She wrote a short paragraph that included "conchfish."*
- *They discussed "conchfish" during the group presentation.*

---

condylion *(noun)*

The craniometric point at the tip of the mandibular condyle.

- *The article explained what "condylion" means with a simple example.*
- *They discussed "condylion" during the group presentation.*

---

condyloid process *(noun)*

The condyle of the ramus of the mandible that articulates with the skull.

- *In class, the teacher used "condyloid process" to mean the condyle of the ramus of the mandible that....*
- *The article explained what "condyloid process" means with a simple example.*

---

condyloma acuminatum *(noun)*

A small benign wart on or around the genitals and anus.

- *He looked up "condyloma acuminatum" because he had never seen it before.*
- *Understanding "condyloma acuminatum" helps you talk about this topic clearly.*

---

condylura *(noun)*

Star-nosed moles.

- *They discussed "condylura" during the group presentation.*
- *Understanding "condylura" helps you talk about this topic clearly.*

---

condylura cristata *(noun)*

Amphibious mole of eastern North America having pink fleshy tentacles around the nose.

- *Understanding "condylura cristata" helps you talk about this topic clearly.*
- *The article explained what "condylura cristata" means with a simple example.*

---

conenose *(noun)*

Large bloodsucking bug.

- *In class, the teacher used "conenose" to mean large bloodsucking bug.*
- *They discussed "conenose" during the group presentation.*

---

conenose bug *(noun)*

Large bloodsucking bug.

- *Understanding "conenose bug" helps you talk about this topic clearly.*
- *The article explained what "conenose bug" means with a simple example.*

---

conepatus *(noun)*

A genus of Mustelidae.

- *In class, the teacher used "conepatus" to mean a genus of mustelidae.*
- *They discussed "conepatus" during the group presentation.*

---

conepatus leuconotus *(noun)*

Large naked-muzzled skunk with white back and tail; of southwestern North America and Mexico.

- *The article explained what "conepatus leuconotus" means with a simple example.*
- *They discussed "conepatus leuconotus" during the group presentation.*

---

conferva *(noun)*

Any of various algae of the genus Tribonema; algae with branching filaments that form scum in still or stagnant fresh water.

- *In class, the teacher used "conferva" to mean any of various algae of the genus tribonema; algae....*

- *He looked up “conferva” because he had never seen it before.*

confervoid algae *(noun)*

Algae resembling confervae especially in having branching filaments.

- *She wrote a short paragraph that included “confervoid algae.”*
- *They discussed “confervoid algae” during the group presentation.*

congenator *(noun)*

An animal or plant that bears a relationship to another (as related by common descent or by membership in the same genus).

- *He looked up “congenator” because he had never seen it before.*
- *In class, the teacher used “congenator” to mean an animal or plant that bears a relationship to....*

congenital afibrinogenemia *(noun)*

A rare congenital disorder of blood coagulation in which no fibrinogen is found in the blood plasma.

- *Understanding “congenital afibrinogenemia” helps you talk about this topic clearly.*
- *In class, the teacher used “congenital afibrinogenemia” to mean a rare congenital disorder of blood coagulation in....*

congridae *(noun)*

Marine eels.

- *He looked up “congridae” because he had never seen it before.*
- *She wrote a short paragraph that included “congridae.”*

conilurus *(noun)*

Jerboa rats.

- *In class, the teacher used “conilurus” to mean jerboa rats.*
- *The article explained what “conilurus” means with a simple example.*

connochaetes *(noun)*

African antelopes: gnus.

- *Understanding “connochaetes” helps you talk about this topic clearly.*
- *He looked up “connochaetes” because he had never seen it before.*

conodonta *(noun)*

Extinct order of primitive vertebrates; the precise taxonomy is not clear; in some classifications considered a separate phylum.

- *They discussed “conodonta” during the group presentation.*
- *The article explained what “conodonta” means with a simple example.*

conodontophorida *(noun)*

Extinct order of primitive vertebrates; the precise taxonomy is not clear; in some classifications considered a separate phylum.

- *In class, the teacher used “conodontophorida” to mean extinct order of primitive vertebrates; the precise....*
- *He looked up “conodontophorida” because he had never seen it before.*

contopus sordidulus *(noun)*

Small flycatcher of western North America.

- *The article explained what “contopus sordidulus” means with a simple example.*
- *They discussed “contopus sordidulus” during the group presentation.*

contopus virens *(noun)*

Small olive-colored woodland flycatchers of eastern North America.

- *Understanding “contopus virens” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “contopus virens.”*

conuropsis *(noun)*

A genus of Psittacidae.

- *They discussed “conuropsis” during the group presentation.*
- *She wrote a short paragraph that included “conuropsis.”*

conuropsis carolinensis *(noun)*

Extinct parakeet whose range extended far into the United States.

- *She wrote a short paragraph that included "conuropsis carolinensis."*
- *Understanding "conuropsis carolinensis" helps you talk about this topic clearly.*

---

convect *(verb)*

Circulate hot air by convection.

- *The coach explained when to use "convect" and when to wait.*
- *She tried to use "convect" carefully so everyone would understand.*

---

convictfish *(noun)*

Greenling with whitish body marked with black bands.

- *Understanding "convictfish" helps you talk about this topic clearly.*
- *He looked up "convictfish" because he had never seen it before.*

---

coondog *(noun)*

Any dog trained to hunt raccoons.

- *She wrote a short paragraph that included "coondog."*
- *He looked up "coondog" because he had never seen it before.*

---

copepoda *(noun)*

Minute planktonic or parasitic crustaceans.

- *The article explained what "copepoda" means with a simple example.*
- *Understanding "copepoda" helps you talk about this topic clearly.*

---

coracias *(noun)*

Type genus of the Coraciidae.

- *The article explained what "coracias" means with a simple example.*
- *She wrote a short paragraph that included "coracias."*

---

coracias garrulus *(noun)*

Common European blue-and-green roller with a reddish-brown back.

- *Understanding "coracias garrulus" helps you talk about this topic clearly.*
- *He looked up "coracias garrulus" because he had never seen it before.*

---

coraciiform bird *(noun)*

Chiefly short-legged arboreal nonpasserine birds that nest in holes.

- *She wrote a short paragraph that included "coraciiform bird."*
- *He looked up "coraciiform bird" because he had never seen it before.*

---

coraciiformes *(noun)*

Rollers; kingfishers; hornbills; hoopoes; motmots; bee eaters; todies.

- *Understanding "coraciiformes" helps you talk about this topic clearly.*
- *They discussed "coraciiformes" during the group presentation.*

---

coragyps *(noun)*

A genus of Cathartidae.

- *Understanding "coragyps" helps you talk about this topic clearly.*
- *They discussed "coragyps" during the group presentation.*

---

coragyps atratus *(noun)*

American vulture smaller than the turkey buzzard.

- *Understanding "coragyps atratus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "coragyps atratus."*

---

corbina *(noun)*

Bluish-grey whiting of California coast.

- *Understanding "corbina" helps you talk about this topic clearly.*
- *He looked up "corbina" because he had never seen it before.*

---

corditis *(noun)*

Inflammation of the spermatic cord.

- *She wrote a short paragraph that included "corditis."*
- *He looked up "corditis" because he had never seen it before.*

---

cordylidae *(noun)*

Small family of spiny ovoviviparous African lizards.

- *In class, the teacher used "cordylidae" to mean small family of spiny ovoviviparous african lizards.*
- *The article explained what "cordylidae" means with a simple example.*

---

cordylus *(noun)*

Type genus of the Cordylidae; spiny lizards somewhat resembling tiny crocodiles.

- *The article explained what "cordylus" means with a simple example.*
- *They discussed "cordylus" during the group presentation.*

---

coregonidae *(noun)*

Soft-finned fishes comprising the freshwater whitefishes; formerly included in the family Salmonidae.

- *In class, the teacher used "coregonidae" to mean soft-finned fishes comprising the freshwater....*
- *He looked up "coregonidae" because he had never seen it before.*

---

coregonus artedi *(noun)*

Important food fish of cold deep lakes of North America.

- *Understanding "coregonus artedi" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "coregonus artedi."*

---

coregonus clupeaformis *(noun)*

Found in the Great Lakes and north to Alaska.

- *They discussed "coregonus clupeaformis" during the group presentation.*
- *In class, the teacher used "coregonus clupeaformis" to mean found in the great lakes and north to alaska.*

---

coreidae *(noun)*

Squash bugs and leaf-footed bugs.

- *In class, the teacher used "coreidae" to mean squash bugs and leaf-footed bugs.*
- *They discussed "coreidae" during the group presentation.*

---

corixa *(noun)*

Type genus of the Corixidae: boat bugs.

- *He looked up "corixa" because he had never seen it before.*
- *They discussed "corixa" during the group presentation.*

---

cornetfish *(noun)*

Slender tropical fish with a long tubular snout and bony plates instead of scales.

- *The article explained what "cornetfish" means with a simple example.*
- *She wrote a short paragraph that included "cornetfish."*

---

coronion *(noun)*

The craniometric point at the tip of the coronoid process of the mandible.

- *She wrote a short paragraph that included "coronion."*
- *Understanding "coronion" helps you talk about this topic clearly.*

---

corpus geniculatum laterale *(noun)*

A neural structure that serves as a processing station on the way from the retina to the occipital lobe of the cerebral cortex.

- *Understanding "corpus geniculatum laterale" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "corpus geniculatum laterale."*

corpus geniculatum mediale *(noun)*

A neural structure that serves as the last of a series of processing centers along the auditory pathway from the cochlea to the temporal lobe of the cerebral cortex.

- *She wrote a short paragraph that included "corpus geniculatum mediale."*
- *He looked up "corpus geniculatum mediale" because he had never seen it before.*

corpus mamillare *(noun)*

One of two small round structures on the undersurface of the brain that form the terminals of the anterior arches of the fornix.

- *He looked up "corpus mamillare" because he had never seen it before.*
- *She wrote a short paragraph that included "corpus mamillare."*

corrodentia *(noun)*

An order of insects: includes booklice and bark-lice.

- *Understanding "corrodentia" helps you talk about this topic clearly.*
- *The article explained what "corrodentia" means with a simple example.*

corticotrophin *(noun)*

A hormone produced by the anterior pituitary gland that stimulates the adrenal cortex.

- *The article explained what "corticotrophin" means with a simple example.*
- *She wrote a short paragraph that included "corticotrophin."*

corvine bird *(noun)*

Birds of the crow family.

- *She wrote a short paragraph that included "corvine bird."*
- *The article explained what "corvine bird" means with a simple example.*

corvus brachyrhyncos *(noun)*

Common crow of North America.

- *She wrote a short paragraph that included "corvus brachyrhyncos."*
- *He looked up "corvus brachyrhyncos" because he had never seen it before.*

corvus frugilegus *(noun)*

Common gregarious Old World bird about the size and color of the American crow.

- *The article explained what "corvus frugilegus" means with a simple example.*
- *In class, the teacher used "corvus frugilegus" to mean common gregarious old world bird about the size and....*

corvus monedula *(noun)*

Common black-and-grey Eurasian bird noted for thievery.

- *They discussed "corvus monedula" during the group presentation.*
- *She wrote a short paragraph that included "corvus monedula."*

corydalus *(noun)*

Type genus of the Corydalidae.

- *He looked up "corydalus" because he had never seen it before.*
- *In class, the teacher used "corydalus" to mean type genus of the corydalidae.*

corydalus cornutus *(noun)*

Large soft-bodied insect having long slender mandibles in the male; aquatic larvae often used as bait.

- *They discussed "corydalus cornutus" during the group presentation.*
- *In class, the teacher used "corydalus cornutus" to mean large soft-bodied insect having long slender....*

corynebacteriaceae *(noun)*

A large family of mostly Gram-positive and aerobic and nonmotile rod-shaped bacteria of the order Eubacteriales.

- *The article explained what "corynebacteriaceae" means with a simple example.*
- *In class, the teacher used "corynebacteriaceae" to mean a large family of mostly gram-positive and aerobic....*

corynebacterium diphtheriae *(noun)*

A species of bacterium that causes diphtheria.

- *She wrote a short paragraph that included "corynebacterium diphtheriae."*
- *He looked up "corynebacterium diphtheriae" because he had never seen it before.*

---

coryphaena equisetis *(noun)*

A kind of dolphinfish.

- *He looked up "coryphaena equisetis" because he had never seen it before.*
- *They discussed "coryphaena equisetis" during the group presentation.*

---

coryphaena hippurus *(noun)*

The more common dolphinfish valued as food; about six feet long.

- *Understanding "coryphaena hippurus" helps you talk about this topic clearly.*
- *He looked up "coryphaena hippurus" because he had never seen it before.*

---

coryphaenidae *(noun)*

Large active pelagic percoid fish.

- *He looked up "coryphaenidae" because he had never seen it before.*
- *In class, the teacher used "coryphaenidae" to mean large active pelagic percoid fish.*

---

corythosaur *(noun)*

Duck-billed dinosaur with nasal passages that expand into a crest like a hollow helmet.

- *She wrote a short paragraph that included "corythosaur."*
- *They discussed "corythosaur" during the group presentation.*

---

corythosaurus *(noun)*

Duck-billed dinosaur with nasal passages that expand into a crest like a hollow helmet.

- *They discussed "corythosaurus" during the group presentation.*
- *He looked up "corythosaurus" because he had never seen it before.*

---

cosmocampus *(noun)*

A genus of fish in the family Syngnathidae.

- *In class, the teacher used "cosmocampus" to mean a genus of fish in the family syngnathidae.*
- *The article explained what "cosmocampus" means with a simple example.*

---

cosmocampus profundus *(noun)*

A fish 8 inches long; found from eastern Florida to western Caribbean.

- *He looked up "cosmocampus profundus" because he had never seen it before.*
- *Understanding "cosmocampus profundus" helps you talk about this topic clearly.*

---

costalgia *(noun)*

Pain in the chest caused by inflammation of the muscles between the ribs.

- *The article explained what "costalgia" means with a simple example.*
- *In class, the teacher used "costalgia" to mean pain in the chest caused by inflammation of the....*

---

costia *(noun)*

A flagellate that is the cause of the frequently fatal fish disease costiasis.

- *She wrote a short paragraph that included "costia."*
- *He looked up "costia" because he had never seen it before.*

---

costia necatrix *(noun)*

A flagellate that is the cause of the frequently fatal fish disease costiasis.

- *She wrote a short paragraph that included "costia necatrix."*
- *The article explained what "costia necatrix" means with a simple example.*

---

costiasis *(noun)*

A fatal disease of freshwater fish caused by a flagellated protozoan invading the skin.

- *In class, the teacher used "costiasis" to mean a fatal disease of freshwater fish caused by a....*

- *They discussed "costiasis" during the group presentation.*

---

costoaxillary vein *(noun)*

One of several veins connecting intercostal veins with the lateral thoracic vein or the thoracoepigastric vein.

- *He looked up "costoaxillary vein" because he had never seen it before.*
- *She wrote a short paragraph that included "costoaxillary vein."*

---

cotingidae *(noun)*

Cotingas; umbrella birds.

- *The article explained what "cotingidae" means with a simple example.*
- *She wrote a short paragraph that included "cotingidae."*

---

cottonwick *(noun)*

Of warm Atlantic waters.

- *She wrote a short paragraph that included "cottonwick."*
- *He looked up "cottonwick" because he had never seen it before.*

---

cotyloid cavity *(noun)*

The cup-shaped hollow in the hipbone into which the head of the femur fits to form a ball-and-socket joint.

- *They discussed "cotyloid cavity" during the group presentation.*
- *She wrote a short paragraph that included "cotyloid cavity."*

---

cotyloid joint *(noun)*

A freely moving joint in which a sphere on the head of one bone fits into a rounded cavity in the other bone.

- *They discussed "cotyloid joint" during the group presentation.*
- *He looked up "cotyloid joint" because he had never seen it before.*

---

coucal *(noun)*

Old World ground-living cuckoo having a long dagger-like hind claw.

- *She wrote a short paragraph that included "coucal."*
- *Understanding "coucal" helps you talk about this topic clearly.*

---

countercheck *(noun)*

A check that restrains another check.

- *In class, the teacher used "countercheck" to mean a check that restrains another check.*
- *They discussed "countercheck" during the group presentation.*

---

counterpoison *(noun)*

A remedy that stops or controls the effects of a poison.

- *He looked up "counterpoison" because he had never seen it before.*
- *In class, the teacher used "counterpoison" to mean a remedy that stops or controls the effects of a poison.*

---

counterreformation *(noun)*

A reformation intended to counter the results of a prior reformation.

- *Understanding "counterreformation" helps you talk about this topic clearly.*
- *The article explained what "counterreformation" means with a simple example.*

---

courlan *(noun)*

Wading bird of South America and Central America.

- *In class, the teacher used "courlan" to mean wading bird of south america and central america.*
- *The article explained what "courlan" means with a simple example.*

---

covertness *(noun)*

The state of being covert and hidden.

- *Understanding "covertness" helps you talk about this topic clearly.*
- *In class, the teacher used "covertness" to mean the state of being covert and hidden.*

---

cownose ray *(noun)*

Large ray found along eastern coast of North America.

- *Understanding "cownose ray" helps you talk about this topic clearly.*
- *In class, the teacher used "cownose ray" to mean large ray found along eastern coast of north america.*

---

coydog *(noun)*

Offspring of a coyote and a dog.

- *The article explained what "coydog" means with a simple example.*
- *They discussed "coydog" during the group presentation.*

---

cracidae *(noun)*

Curassows; guans; chachalacas.

- *Understanding "cracidae" helps you talk about this topic clearly.*
- *They discussed "cracidae" during the group presentation.*

---

cracticidae *(noun)*

Australian birds formerly included in the family Laniidae.

- *He looked up "cracticidae" because he had never seen it before.*
- *In class, the teacher used "cracticidae" to mean australian birds formerly included in the family....*

---

cracticus *(noun)*

Type genus of the Cracticidae: Australian butcherbirds.

- *She wrote a short paragraph that included "cracticus."*
- *Understanding "cracticus" helps you talk about this topic clearly.*

---

crampfish *(noun)*

Any sluggish bottom-dwelling ray of the order Torpediniformes having a rounded body and electric organs on each side of the head capable of emitting strong electric discharges.

- *The article explained what "crampfish" means with a simple example.*
- *She wrote a short paragraph that included "crampfish."*

---

craniata *(noun)*

Fishes; amphibians; reptiles; birds; mammals.

- *She wrote a short paragraph that included "craniata."*
- *He looked up "craniata" because he had never seen it before.*

---

craniate *(noun)*

Animals having a bony or cartilaginous skeleton with a segmented spinal column and a large brain enclosed in a skull or cranium.

- *They discussed "craniate" during the group presentation.*
- *She wrote a short paragraph that included "craniate."*

---

craniometric point *(noun)*

A landmark on the skull from which craniometric measurements can be taken.

- *In class, the teacher used "craniometric point" to mean a landmark on the skull from which craniometric....*
- *The article explained what "craniometric point" means with a simple example.*

---

crapaud *(noun)*

Large toothed frog of South America and Central America resembling the bullfrog.

- *He looked up "crapaud" because he had never seen it before.*
- *They discussed "crapaud" during the group presentation.*

---

crax *(noun)*

Type genus of the Cracidae: curassows.

- *He looked up "crax" because he had never seen it before.*
- *She wrote a short paragraph that included "crax."*

---

crested cariama *(noun)*

Brazilian Cariama; sole representative of the genus Cariama.

- *Understanding "crested cariama" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "crested cariama."*

---

cricetidae *(noun)*

Mostly small New World rodents including New World mice and lemmings and voles and hamsters.

- *They discussed "cricetidae" during the group presentation.*
- *Understanding "cricetidae" helps you talk about this topic clearly.*

---

cricetus *(noun)*

Type genus of the Cricetidae: Old World hamsters.

- *Understanding "cricetus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cricetus."*

---

cricetus cricetus *(noun)*

A variety of hamster common to Europe and Asia.

- *In class, the teacher used "cricetus cricetus" to mean a variety of hamster common to europe and asia.*
- *The article explained what "cricetus cricetus" means with a simple example.*

---

criminalism *(noun)*

The state of being a criminal.

- *In class, the teacher used "criminalism" to mean the state of being a criminal.*
- *The article explained what "criminalism" means with a simple example.*

---

criminalness *(noun)*

The state of being a criminal.

- *He looked up "criminalness" because he had never seen it before.*
- *She wrote a short paragraph that included "criminalness."*

---

criticalness *(noun)*

A state of critical urgency.

- *In class, the teacher used "criticalness" to mean a state of critical urgency.*
- *The article explained what "criticalness" means with a simple example.*

---

crocethia *(noun)*

A genus of Scolopacidae.

- *He looked up "crocethia" because he had never seen it before.*
- *They discussed "crocethia" during the group presentation.*

---

crocethia alba *(noun)*

Small sandpiper that breeds in the Arctic and migrates southward along sandy coasts in most of world.

- *He looked up "crocethia alba" because he had never seen it before.*
- *She wrote a short paragraph that included "crocethia alba."*

---

crocodilia *(noun)*

Crocodiles; alligators; caimans; gavials.

- *They discussed "crocodilia" during the group presentation.*
- *She wrote a short paragraph that included "crocodilia."*

---

crocodilus *(noun)*

Type genus of the Crocodylidae.

- *They discussed "crocodilus" during the group presentation.*
- *She wrote a short paragraph that included "crocodilus."*

---

crocodylia *(noun)*

Crocodiles; alligators; caimans; gavials.

- *The article explained what "crocodylia" means with a simple example.*
- *They discussed "crocodylia" during the group presentation.*

crocodylidae *(noun)*

True crocodiles.

- *In class, the teacher used "crocodylidae" to mean true crocodiles.*
- *The article explained what "crocodylidae" means with a simple example.*

crossopterygian *(noun)*

Any fish of the order Crossopterygii; most known only in fossil form.

- *In class, the teacher used "crossopterygian" to mean any fish of the order crossopterygii; most known....*
- *The article explained what "crossopterygian" means with a simple example.*

crossopterygii *(noun)*

Fishes having paired fins resembling limbs and regarded as ancestral to amphibians.

- *In class, the teacher used "crossopterygii" to mean fishes having paired fins resembling limbs and....*
- *He looked up "crossopterygii" because he had never seen it before.*

crotalidae *(noun)*

New World vipers: pit vipers.

- *He looked up "crotalidae" because he had never seen it before.*
- *She wrote a short paragraph that included "crotalidae."*

crotalus adamanteus *(noun)*

Large deadly rattlesnake with diamond-shaped markings.

- *In class, the teacher used "crotalus adamanteus" to mean large deadly rattlesnake with diamond-shaped markings.*
- *They discussed "crotalus adamanteus" during the group presentation.*

crotalus horridus atricaudatus *(noun)*

Southern variety.

- *The article explained what "crotalus horridus atricaudatus" means with a simple example.*
- *In class, the teacher used "crotalus horridus atricaudatus" to mean southern variety.*

crotalus mitchellii *(noun)*

Markings vary but usually harmonize with background; of southwestern Arizona and Baja California.

- *She wrote a short paragraph that included "crotalus mitchellii."*
- *They discussed "crotalus mitchellii" during the group presentation.*

crotalus scutulatus *(noun)*

Extremely dangerous; most common in areas of scattered scrubby growth; from Mojave Desert to western Texas and into Mexico.

- *He looked up "crotalus scutulatus" because he had never seen it before.*
- *They discussed "crotalus scutulatus" during the group presentation.*

crotaphion *(noun)*

The tip of the greater wing of the sphenoid bone.

- *They discussed "crotaphion" during the group presentation.*
- *She wrote a short paragraph that included "crotaphion."*

crotaphytus *(noun)*

Collared lizards.

- *He looked up "crotaphytus" because he had never seen it before.*
- *In class, the teacher used "crotaphytus" to mean collared lizards.*

crotonbug *(noun)*

Small light-brown cockroach brought to United States from Europe; a common household pest.

- *She wrote a short paragraph that included "crotonbug."*
- *They discussed "crotonbug" during the group presentation.*

croupe *(noun)*

The part of an animal that corresponds to the human buttocks.

- *In class, the teacher used "croupe" to mean the part of an animal that corresponds to the human....*
- *The article explained what "croupe" means with a simple example.*

---

crowbait *(noun)*

An emaciated horse likely soon to become carrion and so attractive to crows.

- *She wrote a short paragraph that included "crowbait."*
- *They discussed "crowbait" during the group presentation.*

---

cruciality *(noun)*

A state of critical urgency.

- *She wrote a short paragraph that included "cruciality."*
- *Understanding "cruciality" helps you talk about this topic clearly.*

---

cryaesthesia *(noun)*

Hypersensitivity to cold.

- *She wrote a short paragraph that included "cryaesthesia."*
- *He looked up "cryaesthesia" because he had never seen it before.*

---

cryesthesia *(noun)*

Hypersensitivity to cold.

- *In class, the teacher used "cryesthesia" to mean hypersensitivity to cold.*
- *They discussed "cryesthesia" during the group presentation.*

---

cryoanaesthesia *(noun)*

Insensibility resulting from cold.

- *She wrote a short paragraph that included "cryoanaesthesia."*
- *He looked up "cryoanaesthesia" because he had never seen it before.*

---

cryoanesthesia *(noun)*

Insensibility resulting from cold.

- *In class, the teacher used "cryoanesthesia" to mean insensibility resulting from cold.*
- *The article explained what "cryoanesthesia" means with a simple example.*

---

cryopathy *(noun)*

Destruction of tissue by freezing and characterized by tingling, blistering and possibly gangrene.

- *They discussed "cryopathy" during the group presentation.*
- *The article explained what "cryopathy" means with a simple example.*

---

cryophobia *(noun)*

A morbid fear of freezing.

- *He looked up "cryophobia" because he had never seen it before.*
- *In class, the teacher used "cryophobia" to mean a morbid fear of freezing.*

---

cryptacanthodes *(noun)*

A genus of Stichaeidae.

- *He looked up "cryptacanthodes" because he had never seen it before.*
- *In class, the teacher used "cryptacanthodes" to mean a genus of stichaeidae.*

---

cryptacanthodes maculatus *(noun)*

Eellike Atlantic bottom fish with large almost vertical mouth.

- *The article explained what "cryptacanthodes maculatus" means with a simple example.*
- *In class, the teacher used "cryptacanthodes maculatus" to mean eellike atlantic bottom fish with large almost....*

---

cryptobiosis *(noun)*

A state in which an animal's metabolic activities come to a reversible standstill.

- *Understanding "cryptobiosis" helps you talk about this topic clearly.*

- *They discussed “cryptobiosis” during the group presentation.*

---

cryptobranchidae *(noun)*

Large aquatic salamanders: hellbenders; giant salamanders.

- *In class, the teacher used “cryptobranchidae” to mean large aquatic salamanders: hellbenders; giant....*
- *They discussed “cryptobranchidae” during the group presentation.*

---

cryptobranchus *(noun)*

Type genus of the Cryptobranchidae.

- *The article explained what “cryptobranchus” means with a simple example.*
- *She wrote a short paragraph that included “cryptobranchus.”*

---

cryptobranchus alleganiensis *(noun)*

Large salamander of North American rivers and streams.

- *In class, the teacher used “cryptobranchus alleganiensis” to mean large salamander of north american rivers and streams.*
- *The article explained what “cryptobranchus alleganiensis” means with a simple example.*

---

cryptocercidae *(noun)*

A family of Blattodea.

- *She wrote a short paragraph that included “cryptocercidae.”*
- *They discussed “cryptocercidae” during the group presentation.*

---

cryptocercus *(noun)*

Cockroaches.

- *He looked up “cryptocercus” because he had never seen it before.*
- *She wrote a short paragraph that included “cryptocercus.”*

---

cryptomonad *(noun)*

Common in fresh and salt water appearing along the shore as algal blooms.

- *In class, the teacher used “cryptomonad” to mean common in fresh and salt water appearing along the....*
- *Understanding “cryptomonad” helps you talk about this topic clearly.*

---

cryptophyceae *(noun)*

Motile usually brownish-green protozoa-like algae.

- *He looked up “cryptophyceae” because he had never seen it before.*
- *She wrote a short paragraph that included “cryptophyceae.”*

---

cryptophyta *(noun)*

A phylum in the kingdom Protoctista.

- *They discussed “cryptophyta” during the group presentation.*
- *In class, the teacher used “cryptophyta” to mean a phylum in the kingdom protoctista.*

---

cryptophyte *(noun)*

Common in fresh and salt water appearing along the shore as algal blooms.

- *The article explained what “cryptophyte” means with a simple example.*
- *She wrote a short paragraph that included “cryptophyte.”*

---

cryptoprocta *(noun)*

Large primitive cat-like carnivores inhabiting forests of Madagascar.

- *Understanding “cryptoprocta” helps you talk about this topic clearly.*
- *They discussed “cryptoprocta” during the group presentation.*

---

cryptorchidy *(noun)*

Failure of one or both testes to move into the scrotum as the male fetus develops.

- *Understanding “cryptorchidy” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “cryptorchidy.”*

---

cryptorchism *(noun)*

Failure of one or both testes to move into the scrotum as the male fetus develops.

- *They discussed "cryptorchism" during the group presentation.*
- *She wrote a short paragraph that included "cryptorchism."*

---

cryptotermes *(noun)*

Genus of dry wood termites; cosmopolitan in distribution; sometimes considered a subgenus of Kalotermes.

- *The article explained what "cryptotermes" means with a simple example.*
- *In class, the teacher used "cryptotermes" to mean genus of dry wood termites; cosmopolitan in....*

---

cryptotermes brevis *(noun)*

Extremely destructive dry-wood termite of warm regions.

- *Understanding "cryptotermes brevis" helps you talk about this topic clearly.*
- *They discussed "cryptotermes brevis" during the group presentation.*

---

cryptotis *(noun)*

Least shrews.

- *She wrote a short paragraph that included "cryptotis."*
- *They discussed "cryptotis" during the group presentation.*

---

cryptotis parva *(noun)*

Small brown shrew of grassy regions of eastern United States.

- *She wrote a short paragraph that included "cryptotis parva."*
- *They discussed "cryptotis parva" during the group presentation.*

---

ctene *(noun)*

A locomotor organ consisting of a row of strong cilia whose bases are fused.

- *They discussed "ctene" during the group presentation.*
- *Understanding "ctene" helps you talk about this topic clearly.*

---

ctenidium *(noun)*

Comb-like respiratory structure serving as the gill of certain mollusks.

- *Understanding "ctenidium" helps you talk about this topic clearly.*
- *They discussed "ctenidium" during the group presentation.*

---

ctenizidae *(noun)*

Large burrowing spiders.

- *In class, the teacher used "ctenizidae" to mean large burrowing spiders.*
- *The article explained what "ctenizidae" means with a simple example.*

---

ctenocephalides *(noun)*

An arthropod genus of fleas.

- *She wrote a short paragraph that included "ctenocephalides."*
- *They discussed "ctenocephalides" during the group presentation.*

---

ctenocephalides canis *(noun)*

Flea that attacks dogs and cats.

- *She wrote a short paragraph that included "ctenocephalides canis."*
- *The article explained what "ctenocephalides canis" means with a simple example.*

---

ctenocephalides felis *(noun)*

Flea that breeds chiefly on cats and dogs and rats.

- *In class, the teacher used "ctenocephalides felis" to mean flea that breeds chiefly on cats and dogs and rats.*
- *He looked up "ctenocephalides felis" because he had never seen it before.*

---

ctenocephalus *(noun)*

A former usage synonymous with Ctenocephalides.

- *He looked up "ctenocephalus" because he had never seen it before.*
- *She wrote a short paragraph that included "ctenocephalus."*

---

cuckoldom *(noun)*

The state of a husband whose wife has committed adultery.

- *She wrote a short paragraph that included "cuckoldom."*
- *Understanding "cuckoldom" helps you talk about this topic clearly.*

---

cuculidae *(noun)*

Includes cuckoo; ani; roadrunner.

- *She wrote a short paragraph that included "cuculidae."*
- *He looked up "cuculidae" because he had never seen it before.*

---

cuculiform bird *(noun)*

Birds having zygodactyl feet (except for the touracos).

- *In class, the teacher used "cuculiform bird" to mean birds having zygodactyl feet (except for the touracos).*
- *Understanding "cuculiform bird" helps you talk about this topic clearly.*

---

cuculiformes *(noun)*

Cuckoos; touracos; etc.

- *She wrote a short paragraph that included "cuculiformes."*
- *The article explained what "cuculiformes" means with a simple example.*

---

cuculus *(noun)*

Type genus of the Cuculidae.

- *He looked up "cuculus" because he had never seen it before.*
- *In class, the teacher used "cuculus" to mean type genus of the cuculidae.*

---

cuculus canorus *(noun)*

Common cuckoo of Europe having a distinctive two-note call; lays eggs in the nests of other birds.

- *She wrote a short paragraph that included "cuculus canorus."*
- *The article explained what "cuculus canorus" means with a simple example.*

---

culex fatigans *(noun)*

Widespread tropical mosquito that transmits filarial worms.

- *In class, the teacher used "culex fatigans" to mean widespread tropical mosquito that transmits....*
- *He looked up "culex fatigans" because he had never seen it before.*

---

culpableness *(noun)*

A state of guilt.

- *The article explained what "culpableness" means with a simple example.*
- *In class, the teacher used "culpableness" to mean a state of guilt.*

---

cunner *(noun)*

Common in north Atlantic coastal waters of the United States.

- *The article explained what "cunner" means with a simple example.*
- *In class, the teacher used "cunner" to mean common in north atlantic coastal waters of the....*

---

curassow *(noun)*

Large crested arboreal game bird of warm parts of the Americas having long legs and tails; highly esteemed as game and food.

- *They discussed "curassow" during the group presentation.*
- *Understanding "curassow" helps you talk about this topic clearly.*

---

cursorius cursor *(noun)*

Courser of desert and semidesert regions of the Old World.

- *They discussed "cursorius cursor" during the group presentation.*
- *She wrote a short paragraph that included "cursorius cursor."*

cushat *(noun)*

Eurasian pigeon with white patches on wings and neck.

- *In class, the teacher used "cushat" to mean eurasian pigeon with white patches on wings and neck.*
- *They discussed "cushat" during the group presentation.*

cuterebra *(noun)*

Type genus of the Cuterebridae.

- *The article explained what "cuterebra" means with a simple example.*
- *She wrote a short paragraph that included "cuterebra."*

cuterebridae *(noun)*

New World botflies.

- *The article explained what "cuterebridae" means with a simple example.*
- *Understanding "cuterebridae" helps you talk about this topic clearly.*

cuticula *(noun)*

The outer body wall of an insect.

- *In class, the teacher used "cuticula" to mean the outer body wall of an insect.*
- *They discussed "cuticula" during the group presentation.*

cutlassfish *(noun)*

Long-bodied marine fishes having a long whiplike scaleless body and sharp teeth; closely related to snake mackerel.

- *They discussed "cutlassfish" during the group presentation.*
- *In class, the teacher used "cutlassfish" to mean long-bodied marine fishes having a long whiplike....*

cyanocitta *(noun)*

New World jays.

- *The article explained what "cyanocitta" means with a simple example.*
- *In class, the teacher used "cyanocitta" to mean new world jays.*

cyanocitta cristata *(noun)*

Common jay of eastern North America; bright blue with grey breast.

- *In class, the teacher used "cyanocitta cristata" to mean common jay of eastern north america; bright blue....*
- *He looked up "cyanocitta cristata" because he had never seen it before.*

cyanophyceae *(noun)*

Photosynthetic bacteria found in fresh and salt water, having chlorophyll a and phycobilins; once thought to be algae: blue-green algae.

- *She wrote a short paragraph that included "cyanophyceae."*
- *He looked up "cyanophyceae" because he had never seen it before.*

cyanophyta *(noun)*

Prokaryotic organisms sometimes considered a class or phylum or subkingdom; coextensive with the Cyanophyceae: cyanobacteria (blue-green algae).

- *Understanding "cyanophyta" helps you talk about this topic clearly.*
- *The article explained what "cyanophyta" means with a simple example.*

cyberphobia *(noun)*

Irrational fear of computers or technology.

- *Understanding "cyberphobia" helps you talk about this topic clearly.*
- *In class, the teacher used "cyberphobia" to mean irrational fear of computers or technology.*

cycliophora *(noun)*

Tiny marine organisms each the size of a period found in great numbers on lobsters' lips; identified tentatively in 1995 as a new phylum or as possible link between Entoprocta and Ectoprocta.

- *They discussed "cycliophora" during the group presentation.*
- *He looked up "cycliophora" because he had never seen it before.*

cyclodestructive surgery *(noun)*

An eye operation that treats glaucoma by destroying the ciliary body with a laser.

- *She wrote a short paragraph that included "cyclodestructive surgery."*
- *The article explained what "cyclodestructive surgery" means with a simple example.*

---

cyclopes didactylus *(noun)*

Squirrel-sized South American toothless anteater with long silky golden fur.

- *Understanding "cyclopes didactylus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cyclopes didactylus."*

---

cyclopterus *(noun)*

Type genus of the Cyclopteridae: lumpfishes.

- *She wrote a short paragraph that included "cyclopterus."*
- *He looked up "cyclopterus" because he had never seen it before.*

---

cyclopterus lumpus *(noun)*

Clumsy soft thick-bodied northern Atlantic fish with pelvic fins fused into a sucker; edible roe used for caviar.

- *The article explained what "cyclopterus lumpus" means with a simple example.*
- *Understanding "cyclopterus lumpus" helps you talk about this topic clearly.*

---

cyclosporeae *(noun)*

In more recent classifications superseded by the order Fucales.

- *They discussed "cyclosporeae" during the group presentation.*
- *She wrote a short paragraph that included "cyclosporeae."*

---

cyclostomata *(noun)*

Primitive jawless aquatic vertebrate: lampreys; hagfishes.

- *The article explained what "cyclostomata" means with a simple example.*
- *In class, the teacher used "cyclostomata" to mean primitive jawless aquatic vertebrate: lampreys;....*

---

cyclostome *(noun)*

Primitive aquatic vertebrate.

- *He looked up "cyclostome" because he had never seen it before.*
- *She wrote a short paragraph that included "cyclostome."*

---

cydippea *(noun)*

Ctenophores having two long pinnate tentacles.

- *She wrote a short paragraph that included "cydippea."*
- *The article explained what "cydippea" means with a simple example.*

---

cydippida *(noun)*

Ctenophores having two long pinnate tentacles.

- *The article explained what "cydippida" means with a simple example.*
- *In class, the teacher used "cydippida" to mean ctenophores having two long pinnate tentacles.*

---

cydippidea *(noun)*

Ctenophores having two long pinnate tentacles.

- *Understanding "cydippidea" helps you talk about this topic clearly.*
- *They discussed "cydippidea" during the group presentation.*

---

cygnus atratus *(noun)*

Large Australian swan having black plumage and a red bill.

- *They discussed "cygnus atratus" during the group presentation.*
- *She wrote a short paragraph that included "cygnus atratus."*

---

cygnus columbianus bewickii *(noun)*

Eurasian subspecies of tundra swan; smaller than the whooper.

- *In class, the teacher used "cygnus columbianus bewickii" to mean eurasian subspecies of tundra swan; smaller than....*

- *The article explained what “cygnus columbianus bewickii” means with a simple example.*

---

cynipid gall wasp *(noun)*

Small solitary wasp that produces galls on oaks and other plants.

- *She wrote a short paragraph that included “cynipid gall wasp.”*
- *He looked up “cynipid gall wasp” because he had never seen it before.*

---

cynipid wasp *(noun)*

Small solitary wasp that produces galls on oaks and other plants.

- *The article explained what “cynipid wasp” means with a simple example.*
- *She wrote a short paragraph that included “cynipid wasp.”*

---

cynipidae *(noun)*

A family of Hymenoptera.

- *Understanding “cynipidae” helps you talk about this topic clearly.*
- *In class, the teacher used “cynipidae” to mean a family of hymenoptera.*

---

cynips *(noun)*

Type genus of the Cynipidae: gall wasps.

- *Understanding “cynips” helps you talk about this topic clearly.*
- *They discussed “cynips” during the group presentation.*

---

cynocephalidae *(noun)*

A family of Dermoptera.

- *She wrote a short paragraph that included “cynocephalidae.”*
- *He looked up “cynocephalidae” because he had never seen it before.*

---

cynodont *(noun)*

Small carnivorous reptiles.

- *Understanding “cynodont” helps you talk about this topic clearly.*
- *The article explained what “cynodont” means with a simple example.*

---

cynodontia *(noun)*

A division of the order Therapsida from the Triassic period comprising small carnivorous tetrapod reptiles often with mammal-like teeth.

- *In class, the teacher used “cynodontia” to mean a division of the order therapsida from the....*
- *Understanding “cynodontia” helps you talk about this topic clearly.*

---

cynoglossidae *(noun)*

Tonguefishes.

- *He looked up “cynoglossidae” because he had never seen it before.*
- *They discussed “cynoglossidae” during the group presentation.*

---

cynomys *(noun)*

Prairie dogs.

- *In class, the teacher used “cynomys” to mean prairie dogs.*
- *The article explained what “cynomys” means with a simple example.*

---

cynomys gunnisoni *(noun)*

Tail is white tipped.

- *He looked up “cynomys gunnisoni” because he had never seen it before.*
- *Understanding “cynomys gunnisoni” helps you talk about this topic clearly.*

---

cynomys ludovicianus *(noun)*

Tail is black tipped.

- *Understanding “cynomys ludovicianus” helps you talk about this topic clearly.*
- *In class, the teacher used “cynomys ludovicianus” to mean tail is black tipped.*

---

cynophobia *(noun)*

A morbid fear of dogs.

- *In class, the teacher used "cynophobia" to mean a morbid fear of dogs.*
- *They discussed "cynophobia" during the group presentation.*

---

cynopterus *(noun)*

A genus of Megachiroptera.

- *In class, the teacher used "cynopterus" to mean a genus of megachiroptera.*
- *The article explained what "cynopterus" means with a simple example.*

---

cynopterus sphinx *(noun)*

A variety of fruit eating bat.

- *Understanding "cynopterus sphinx" helps you talk about this topic clearly.*
- *He looked up "cynopterus sphinx" because he had never seen it before.*

---

cynoscion nebulosus *(noun)*

Weakfish of southern Atlantic and Gulf Coasts of United States.

- *She wrote a short paragraph that included "cynoscion nebulosus."*
- *He looked up "cynoscion nebulosus" because he had never seen it before.*

---

cynoscion regalis *(noun)*

Food and game fish of North American coastal waters with a mouth from which hooks easily tear out.

- *He looked up "cynoscion regalis" because he had never seen it before.*
- *They discussed "cynoscion regalis" during the group presentation.*

---

cypraeidae *(noun)*

Family of marine gastropods comprising the cowries.

- *The article explained what "cypraeidae" means with a simple example.*
- *She wrote a short paragraph that included "cypraeidae."*

---

cypriniform fish *(noun)*

A soft-finned fish of the order Cypriniformes.

- *He looked up "cypriniform fish" because he had never seen it before.*
- *She wrote a short paragraph that included "cypriniform fish."*

---

cypriniformes *(noun)*

An order of animals including almost entirely freshwater fishes: characins; loaches; carp; suckers; sometimes classified as a suborder of Ostariophysi.

- *Understanding "cypriniformes" helps you talk about this topic clearly.*
- *The article explained what "cypriniformes" means with a simple example.*

---

cyprinodont *(noun)*

Any member of the family Cyprinodontidae.

- *The article explained what "cyprinodont" means with a simple example.*
- *In class, the teacher used "cyprinodont" to mean any member of the family cyprinodontidae.*

---

cyprinodontidae *(noun)*

Large family of small soft-finned fishes; killifishes; flagfishes; swordtails; guppies.

- *He looked up "cyprinodontidae" because he had never seen it before.*
- *In class, the teacher used "cyprinodontidae" to mean large family of small soft-finned fishes;....*

---

cystoparalysis *(noun)*

Paralysis of the urinary bladder.

- *He looked up "cystoparalysis" because he had never seen it before.*
- *They discussed "cystoparalysis" during the group presentation.*

---

cystophora *(noun)*

Hooded seals.

- *Understanding "cystophora" helps you talk about this topic clearly.*
- *In class, the teacher used "cystophora" to mean hooded seals.*

---

cystophora cristata *(noun)*

Medium-sized blackish-grey seal with large inflatable sac on the head; of Arctic and northern Atlantic waters.

- *They discussed "cystophora cristata" during the group presentation.*
- *He looked up "cystophora cristata" because he had never seen it before.*

---

cystoplegia *(noun)*

Paralysis of the urinary bladder.

- *In class, the teacher used "cystoplegia" to mean paralysis of the urinary bladder.*
- *They discussed "cystoplegia" during the group presentation.*

---

cytol *(noun)*

The protoplasm of a cell excluding the nucleus; is full of proteins that control cell metabolism.

- *The article explained what "cytol" means with a simple example.*
- *They discussed "cytol" during the group presentation.*

---

cytomembrane *(noun)*

A thin membrane (a double layer of lipids) enclosing the cytoplasm of a cell; proteins in the membrane control passage of ions (like sodium or potassium or calcium) in and out of the cell.

- *Understanding "cytomembrane" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cytomembrane."*

---

cytopathogenic *(adjective)*

Of or relating to or causing pathological changes in cells.

- *A "cytopathogenic" approach may work better in this case.*
- *The speaker chose "cytopathogenic" because it captured the feeling precisely.*

---

cytopenia *(noun)*

A deficiency of some cellular element of the blood.

- *In class, the teacher used "cytopenia" to mean a deficiency of some cellular element of the blood.*
- *He looked up "cytopenia" because he had never seen it before.*

---

cytoplast *(noun)*

The intact cytoplasmic content of a cell.

- *They discussed "cytoplast" during the group presentation.*
- *The article explained what "cytoplast" means with a simple example.*

---

cytosmear *(noun)*

A thin tissue or blood sample spread on a glass slide and stained for cytologic examination and diagnosis under a microscope.

- *They discussed "cytosmear" during the group presentation.*
- *In class, the teacher used "cytosmear" to mean a thin tissue or blood sample spread on a glass....*

---

cytostome *(noun)*

Mouth of a protozoan.

- *The article explained what "cytostome" means with a simple example.*
- *In class, the teacher used "cytostome" to mean mouth of a protozoan.*

---

dabchick *(noun)*

Small European grebe.

- *They discussed "dabchick" during the group presentation.*
- *She wrote a short paragraph that included "dabchick."*

---

dacelo *(noun)*

Australasian kingfishers.

- *He looked up "dacelo" because he had never seen it before.*
- *They discussed "dacelo" during the group presentation.*

dacelo gigas *(noun)*

Australian kingfisher having a loud cackling cry.

- *She wrote a short paragraph that included "dacelo gigas."*
- *Understanding "dacelo gigas" helps you talk about this topic clearly.*

dachsie *(noun)*

Small long-bodied short-legged German breed of dog having a short sleek coat and long drooping ears; suited for following game into burrows.

- *She wrote a short paragraph that included "dachsie."*
- *Understanding "dachsie" helps you talk about this topic clearly.*

dacninae *(noun)*

The honeycreepers.

- *The article explained what "dacninae" means with a simple example.*
- *In class, the teacher used "dacninae" to mean the honeycreepers.*

dacryocyst *(noun)*

Either of the two dilated ends of the lacrimal ducts at the nasal ends of the eyes that fill with tears secreted by the lacrimal glands.

- *She wrote a short paragraph that included "dacryocyst."*
- *He looked up "dacryocyst" because he had never seen it before.*

dacryocystitis *(noun)*

Inflammation of the lacrimal sac causing obstruction of the tube draining tears into the nose.

- *He looked up "dacryocystitis" because he had never seen it before.*
- *Understanding "dacryocystitis" helps you talk about this topic clearly.*

dacryon *(noun)*

The craniometric point at the junction of the anterior border of the lacrimal bone with the frontal bone.

- *Understanding "dacryon" helps you talk about this topic clearly.*
- *They discussed "dacryon" during the group presentation.*

dactylomegaly *(noun)*

Abnormally large fingers or toes.

- *They discussed "dactylomegaly" during the group presentation.*
- *He looked up "dactylomegaly" because he had never seen it before.*

dactylopiidae *(noun)*

Cochineal insects.

- *He looked up "dactylopiidae" because he had never seen it before.*
- *In class, the teacher used "dactylopiidae" to mean cochineal insects.*

dactylopius *(noun)*

Type genus of the Dactylopiidae.

- *She wrote a short paragraph that included "dactylopius."*
- *Understanding "dactylopius" helps you talk about this topic clearly.*

dactylopius coccus *(noun)*

Mexican red scale insect that feeds on cacti; the source of a red dye.

- *She wrote a short paragraph that included "dactylopius coccus."*
- *He looked up "dactylopius coccus" because he had never seen it before.*

dactylopteridae *(noun)*

Flying gurnards.

- *Understanding "dactylopteridae" helps you talk about this topic clearly.*
- *The article explained what "dactylopteridae" means with a simple example.*

dactylopterus *(noun)*

A genus of Dactylopteridae.

- *They discussed “dactylopterus” during the group presentation.*
- *Understanding “dactylopterus” helps you talk about this topic clearly.*

dactyloscopidae *(noun)*

Sand stargazers.

- *Understanding “dactyloscopidae” helps you talk about this topic clearly.*
- *They discussed “dactyloscopidae” during the group presentation.*

dall’s sheep *(noun)*

Large white wild sheep of northwestern Canada and Alaska.

- *He looked up “dall’s sheep” because he had never seen it before.*
- *In class, the teacher used “dall’s sheep” to mean large white wild sheep of northwestern canada and....*

daltonism *(noun)*

Dichromacy characterized by a lowered sensitivity to green light resulting in an inability to distinguish green and purplish-red.

- *They discussed “daltonism” during the group presentation.*
- *He looked up “daltonism” because he had never seen it before.*

damaliscus *(noun)*

African antelopes: sassabies.

- *In class, the teacher used “damaliscus” to mean african antelopes: sassabies.*
- *He looked up “damaliscus” because he had never seen it before.*

damaliscus lunatus *(noun)*

A large South African antelope; considered the swiftest hoofed mammal.

- *Understanding “damaliscus lunatus” helps you talk about this topic clearly.*
- *He looked up “damaliscus lunatus” because he had never seen it before.*

danaid *(noun)*

Large tropical butterfly with degenerate forelegs and an unpleasant taste.

- *The article explained what “danaid” means with a simple example.*
- *In class, the teacher used “danaid” to mean large tropical butterfly with degenerate forelegs....*

danaid butterfly *(noun)*

Large tropical butterfly with degenerate forelegs and an unpleasant taste.

- *Understanding “danaid butterfly” helps you talk about this topic clearly.*
- *He looked up “danaid butterfly” because he had never seen it before.*

danaidae *(noun)*

Small family of usually tropical butterflies: monarch butterflies.

- *The article explained what “danaidae” means with a simple example.*
- *She wrote a short paragraph that included “danaidae.”*

dandify *(verb)*

Dress like a dandy.

- *In everyday English, people use “dandify” when talking about this idea.*
- *He did not know how to use “dandify” until he saw an example.*

dandle *(verb)*

Move (a baby) up and down in one’s arms or on one’s knees.

- *The grandfather dandled the small child.*
- *The coach explained when to use “dandle” and when to wait.*

darier’s disease *(noun)*

A rare hereditary condition marked by dark crusted patches (sometimes containing pus).

- *The article explained what “darier’s disease” means with a simple example.*

- *In class, the teacher used “darier’s disease” to mean a rare hereditary condition marked by dark crusted....*

---

dassie *(noun)*

Any of several small ungulate mammals of Africa and Asia with rodent-like incisors and feet with hooflike toes.

- *The article explained what “dassie” means with a simple example.*
- *Understanding “dassie” helps you talk about this topic clearly.*

---

dasyatis *(noun)*

Type genus of the Dasyatidae.

- *Understanding “dasyatis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “dasyatis.”*

---

dasyatis centroura *(noun)*

One of the largest stingrays; found from Cape Cod to Cape Hatteras.

- *They discussed “dasyatis centroura” during the group presentation.*
- *Understanding “dasyatis centroura” helps you talk about this topic clearly.*

---

dasyprocta *(noun)*

Type genus of the Dasyproctidae: agoutis.

- *Understanding “dasyprocta” helps you talk about this topic clearly.*
- *They discussed “dasyprocta” during the group presentation.*

---

dasyprocta aguti *(noun)*

Agile long-legged rabbit-sized rodent of Central America and South America and the West Indies; valued as food.

- *Understanding “dasyprocta aguti” helps you talk about this topic clearly.*
- *They discussed “dasyprocta aguti” during the group presentation.*

---

dasyproctidae *(noun)*

Agoutis and pacas.

- *Understanding “dasyproctidae” helps you talk about this topic clearly.*
- *The article explained what “dasyproctidae” means with a simple example.*

---

dasypus *(noun)*

Type genus of the Dasypodidae.

- *The article explained what “dasypus” means with a simple example.*
- *She wrote a short paragraph that included “dasypus.”*

---

dasypus novemcinctus *(noun)*

Having nine hinged bands of bony plates; ranges from Texas to Paraguay.

- *She wrote a short paragraph that included “dasypus novemcinctus.”*
- *They discussed “dasypus novemcinctus” during the group presentation.*

---

dasyure *(noun)*

Any of several more or less arboreal marsupials somewhat resembling martens.

- *The article explained what “dasyure” means with a simple example.*
- *They discussed “dasyure” during the group presentation.*

---

dasyurid *(noun)*

Small carnivorous nocturnal marsupials of Australia and Tasmania.

- *They discussed “dasyurid” during the group presentation.*
- *She wrote a short paragraph that included “dasyurid.”*

---

dasyurid marsupial *(noun)*

Small carnivorous nocturnal marsupials of Australia and Tasmania.

- *The article explained what “dasyurid marsupial” means with a simple example.*
- *They discussed “dasyurid marsupial” during the group presentation.*

---

dasyuridae *(noun)*

Dasyures; native cats; pouched mice; banded anteaters; Tasmanian devils.

- *They discussed "dasyuridae" during the group presentation.*
- *Understanding "dasyuridae" helps you talk about this topic clearly.*

dasyurus *(noun)*

Type genus of the family Dasyuridae: native cats.

- *Understanding "dasyurus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "dasyurus."*

dasyurus quoll *(noun)*

A variety of dasyure.

- *The article explained what "dasyurus quoll" means with a simple example.*
- *They discussed "dasyurus quoll" during the group presentation.*

dasyurus viverrinus *(noun)*

Carnivorous arboreal cat-like marsupials of Australia and Tasmania.

- *They discussed "dasyurus viverrinus" during the group presentation.*
- *The article explained what "dasyurus viverrinus" means with a simple example.*

daubentonia *(noun)*

Type genus; coextensive with the family Daubentoniidae.

- *He looked up "daubentonia" because he had never seen it before.*
- *In class, the teacher used "daubentonia" to mean type genus; coextensive with the family daubentoniidae.*

daubentonia madagascariensis *(noun)*

Nocturnal lemur with long bony fingers and rodent-like incisor teeth closely related to the lemurs.

- *They discussed "daubentonia madagascariensis" during the group presentation.*
- *In class, the teacher used "daubentonia madagascariensis" to mean nocturnal lemur with long bony fingers and....*

daubentoniidae *(noun)*

Comprising solely the aye-aye.

- *He looked up "daubentoniidae" because he had never seen it before.*
- *She wrote a short paragraph that included "daubentoniidae."*

dealfish *(noun)*

Deep-sea ribbonfish.

- *He looked up "dealfish" because he had never seen it before.*
- *In class, the teacher used "dealfish" to mean deep-sea ribbonfish.*

decapterus *(noun)*

Scads especially mackerel scad; cosmopolitan in distribution.

- *He looked up "decapterus" because he had never seen it before.*
- *In class, the teacher used "decapterus" to mean scads especially mackerel scad; cosmopolitan in....*

decapterus macarellus *(noun)*

Small silvery fish; Nova Scotia to Brazil.

- *The article explained what "decapterus macarellus" means with a simple example.*
- *In class, the teacher used "decapterus macarellus" to mean small silvery fish; nova scotia to brazil.*

decapterus punctatus *(noun)*

Small fusiform fish of western Atlantic.

- *The article explained what "decapterus punctatus" means with a simple example.*
- *Understanding "decapterus punctatus" helps you talk about this topic clearly.*

deepwater squirrelfish *(noun)*

A squirrelfish found from South Carolina to Bermuda and Gulf of Mexico.

- *Understanding “deepwater squirrelfish” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “deepwater squirrelfish.”*

---

defeminise *(verb)*

Remove the ovaries of (female mammals such as cats).

- *He did not know how to use “defeminise” until he saw an example.*
- *Can you use “defeminise” in a sentence that fits this situation?*

---

defeminize *(verb)*

Remove the ovaries of (female mammals such as cats).

- *Learners should practice how to use “defeminize” in real sentences.*
- *In everyday English, people use “defeminize” when talking about this idea.*

---

defoliator *(noun)*

An insect that strips the leaves from plants.

- *The article explained what “defoliator” means with a simple example.*
- *They discussed “defoliator” during the group presentation.*

---

defunctness *(noun)*

No longer in existence.

- *He looked up “defunctness” because he had never seen it before.*
- *They discussed “defunctness” during the group presentation.*

---

deglycerolise *(verb)*

Remove from glycerol.

- *Can you use “deglycerolise” in a sentence that fits this situation?*
- *In everyday English, people use “deglycerolise” when talking about this idea.*

---

deglycerolize *(verb)*

Remove from glycerol.

- *She tried to use “deglycerolize” carefully so everyone would understand.*
- *The coach explained when to use “deglycerolize” and when to wait.*

---

delichon *(noun)*

A genus of Hirundinidae.

- *He looked up “delichon” because he had never seen it before.*
- *She wrote a short paragraph that included “delichon.”*

---

delichon urbica *(noun)*

Common small European martin that builds nests under the eaves of houses.

- *In class, the teacher used “delichon urbica” to mean common small european martin that builds nests....*
- *Understanding “delichon urbica” helps you talk about this topic clearly.*

---

delphinapterus *(noun)*

White whale.

- *In class, the teacher used “delphinapterus” to mean white whale.*
- *He looked up “delphinapterus” because he had never seen it before.*

---

delphinapterus leucas *(noun)*

Small northern whale that is white when adult.

- *The article explained what “delphinapterus leucas” means with a simple example.*
- *In class, the teacher used “delphinapterus leucas” to mean small northern whale that is white when adult.*

---

demasculinise *(verb)*

Remove the testicles of a male animal.

- *She tried to use “demasculinise” carefully so everyone would understand.*
- *He did not know how to use “demasculinise” until he saw an example.*

demasculinize *(verb)*

Remove the testicles of a male animal.

- *In everyday English, people use "demasculinize" when talking about this idea.*
- *Learners should practice how to use "demasculinize" in real sentences.*

dendroaspis augusticeps *(noun)*

A highly venomous southern African mamba dreaded because of its quickness and readiness to bite.

- *The article explained what "dendroaspis augusticeps" means with a simple example.*
- *In class, the teacher used "dendroaspis augusticeps" to mean a highly venomous southern african mamba dreaded....*

dendrocolaptes *(noun)*

Type genus of the Dendrocolaptidae.

- *She wrote a short paragraph that included "dendrocolaptes."*
- *He looked up "dendrocolaptes" because he had never seen it before.*

dendrocolaptidae *(noun)*

Woodhewers or woodcreepers.

- *Understanding "dendrocolaptidae" helps you talk about this topic clearly.*
- *They discussed "dendrocolaptidae" during the group presentation.*

dendroctonus rufipennis *(noun)*

Small beetle that likes to bore through the bark of spruce trees and eat the cambium which eventually kills the tree.

- *The article explained what "dendroctonus rufipennis" means with a simple example.*
- *She wrote a short paragraph that included "dendroctonus rufipennis."*

dendroica auduboni *(noun)*

Common warbler of western North America.

- *In class, the teacher used "dendroica auduboni" to mean common warbler of western north america.*
- *The article explained what "dendroica auduboni" means with a simple example.*

dendrolagus *(noun)*

Tree wallabies.

- *In class, the teacher used "dendrolagus" to mean tree wallabies.*
- *The article explained what "dendrolagus" means with a simple example.*

denisonia *(noun)*

Copperheads.

- *In class, the teacher used "denisonia" to mean copperheads.*
- *The article explained what "denisonia" means with a simple example.*

denisonia superba *(noun)*

Venomous but sluggish reddish-brown snake of Australia.

- *In class, the teacher used "denisonia superba" to mean venomous but sluggish reddish-brown snake of australia.*
- *Understanding "denisonia superba" helps you talk about this topic clearly.*

depilate *(verb)*

Remove body hair.

- *Learners should practice how to use "depilate" in real sentences.*
- *She tried to use "depilate" carefully so everyone would understand.*

dermatobia *(noun)*

Larvae live under the skin of domestic mammals and humans.

- *He looked up "dermatobia" because he had never seen it before.*
- *She wrote a short paragraph that included "dermatobia."*

dermatobia hominis *(noun)*

Large tropical American fly; parasitic on humans and other mammals.

- *The article explained what “dermatobia hominis” means with a simple example.*
- *In class, the teacher used “dermatobia hominis” to mean large tropical american fly; parasitic on humans....*

---

dermatomycosis *(noun)*

Fungal infection of the skin (especially of moist parts covered by clothing).

- *They discussed “dermatomycosis” during the group presentation.*
- *In class, the teacher used “dermatomycosis” to mean fungal infection of the skin (especially of moist....*

---

dermatosclerosis *(noun)*

An autoimmune disease that affects the blood vessels and connective tissue; fibrous connective tissue is deposited in the skin.

- *The article explained what “dermatosclerosis” means with a simple example.*
- *In class, the teacher used “dermatosclerosis” to mean an autoimmune disease that affects the blood....*

---

dermestidae *(noun)*

Carpet beetles.

- *She wrote a short paragraph that included “dermestidae.”*
- *They discussed “dermestidae” during the group presentation.*

---

dermochelyidae *(noun)*

Sea turtles.

- *She wrote a short paragraph that included “dermochelyidae.”*
- *Understanding “dermochelyidae” helps you talk about this topic clearly.*

---

dermochelys *(noun)*

Type genus of the Dermochelyidae: leatherback turtles.

- *She wrote a short paragraph that included “dermochelys.”*
- *He looked up “dermochelys” because he had never seen it before.*

---

dermochelys coriacea *(noun)*

Wide-ranging marine turtle with flexible leathery carapace; largest living turtle.

- *He looked up “dermochelys coriacea” because he had never seen it before.*
- *She wrote a short paragraph that included “dermochelys coriacea.”*

---

dermoptera *(noun)*

Flying lemurs.

- *She wrote a short paragraph that included “dermoptera.”*
- *He looked up “dermoptera” because he had never seen it before.*

---

descensus *(noun)*

The slipping or falling out of place of an organ (as the uterus).

- *She wrote a short paragraph that included “descensus.”*
- *He looked up “descensus” because he had never seen it before.*

---

descensus uteri *(noun)*

Prolapse of the uterus.

- *He looked up “descensus uteri” because he had never seen it before.*
- *She wrote a short paragraph that included “descensus uteri.”*

---

desex *(verb)*

Make infertile.

- *In everyday English, people use “desex” when talking about this idea.*
- *Can you use “desex” in a sentence that fits this situation?*

---

desexualise *(verb)*

Direct one’s libidinous urges into another direction.

- *The coach explained when to use “desexualise” and when to wait.*

- *Can you use “desexualise” in a sentence that fits this situation?*

---

desexualize *(verb)*

Direct one’s libidinous urges into another direction.

- *He did not know how to use “desexualize” until he saw an example.*
- *She tried to use “desexualize” carefully so everyone would understand.*

---

deshabille *(noun)*

The state of being carelessly or partially dressed.

- *They discussed “deshabille” during the group presentation.*
- *Understanding “deshabille” helps you talk about this topic clearly.*

---

desmid *(noun)*

Freshwater green algae.

- *In class, the teacher used “desmid” to mean freshwater green algae.*
- *Understanding “desmid” helps you talk about this topic clearly.*

---

desmidiaceae *(noun)*

Unicellular algae.

- *In class, the teacher used “desmidiaceae” to mean unicellular algae.*
- *Understanding “desmidiaceae” helps you talk about this topic clearly.*

---

desmidium *(noun)*

A genus of protoctist.

- *She wrote a short paragraph that included “desmidium.”*
- *Understanding “desmidium” helps you talk about this topic clearly.*

---

desmodontidae *(noun)*

True vampire bats.

- *Understanding “desmodontidae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “desmodontidae.”*

---

desmodus *(noun)*

Type genus of the Desmodontidae: vampire bats.

- *He looked up “desmodus” because he had never seen it before.*
- *She wrote a short paragraph that included “desmodus.”*

---

desmodus rotundus *(noun)*

Mouse-sized bat of tropical Central America and South America having sharp incisor and canine teeth; feeds on the blood of birds and mammals.

- *In class, the teacher used “desmodus rotundus” to mean mouse-sized bat of tropical central america and....*
- *Understanding “desmodus rotundus” helps you talk about this topic clearly.*

---

desmograthus *(noun)*

An amphibian genus of Plethodontidae.

- *In class, the teacher used “desmograthus” to mean an amphibian genus of plethodontidae.*
- *He looked up “desmograthus” because he had never seen it before.*

---

desquamate *(verb)*

Peel off in scales.

- *Dry skin desquamates.*
- *The coach explained when to use “desquamate” and when to wait.*

---

deterge *(verb)*

Wipe away; to wash off or out, cleanse; chiefly in medical use: to clear away foul matter from the body.

- *This drug is powerful enough to deterge.*
- *The coach explained when to use “deterge” and when to wait.*

---

deuteranopia *(noun)*

Dichromacy characterized by a lowered sensitivity to green light resulting in an inability to distinguish green and purplish-red.

- *The article explained what "deuteranopia" means with a simple example.*
- *In class, the teacher used "deuteranopia" to mean dichromacy characterized by a lowered sensitivity....*

diadophis *(noun)*

A genus of reptiles of the family Colubridae including ringneck snakes.

- *She wrote a short paragraph that included "diadophis."*
- *They discussed "diadophis" during the group presentation.*

dialeurodes *(noun)*

A genus of Aleyrodidae.

- *They discussed "dialeurodes" during the group presentation.*
- *She wrote a short paragraph that included "dialeurodes."*

dialeurodes citri *(noun)*

Whitefly that attacks citrus trees.

- *In class, the teacher used "dialeurodes citri" to mean whitefly that attacks citrus trees.*
- *Understanding "dialeurodes citri" helps you talk about this topic clearly.*

diapheromera *(noun)*

A variety of stick insect.

- *They discussed "diapheromera" during the group presentation.*
- *The article explained what "diapheromera" means with a simple example.*

diapheromera femorata *(noun)*

A variety of stick insect.

- *Understanding "diapheromera femorata" helps you talk about this topic clearly.*
- *He looked up "diapheromera femorata" because he had never seen it before.*

diapsid *(noun)*

Reptile having a pair of openings in the skull behind each eye.

- *Understanding "diapsid" helps you talk about this topic clearly.*
- *He looked up "diapsid" because he had never seen it before.*

diapsid reptile *(noun)*

Reptile having a pair of openings in the skull behind each eye.

- *They discussed "diapsid reptile" during the group presentation.*
- *In class, the teacher used "diapsid reptile" to mean reptile having a pair of openings in the skull....*

diapsida *(noun)*

Used in former classifications to include all living reptiles except turtles; superseded by the two subclasses Lepidosauria and Archosauria.

- *The article explained what "diapsida" means with a simple example.*
- *In class, the teacher used "diapsida" to mean used in former classifications to include all....*

diarthrosis *(noun)*

A joint so articulated as to move freely.

- *Understanding "diarthrosis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "diarthrosis."*

diaspididae *(noun)*

Armored scales.

- *The article explained what "diaspididae" means with a simple example.*
- *She wrote a short paragraph that included "diaspididae."*

diatomophyceae *(noun)*

Marine and freshwater eukaryotic algae: diatoms.

- *Understanding "diatomophyceae" helps you talk about this topic clearly.*
- *He looked up "diatomophyceae" because he had never seen it before.*

---

dibranch *(noun)*

Cephalopods having two gills.

- *They discussed "dibranch" during the group presentation.*
- *Understanding "dibranch" helps you talk about this topic clearly.*

---

dibranchia *(noun)*

Comprising all living cephalopods except the family Nautilidae: the orders Octopoda (octopuses) and Decapoda (squids and cuttlefish).

- *The article explained what "dibranchia" means with a simple example.*
- *In class, the teacher used "dibranchia" to mean comprising all living cephalopods except the family....*

---

dibranchiata *(noun)*

Comprising all living cephalopods except the family Nautilidae: the orders Octopoda (octopuses) and Decapoda (squids and cuttlefish).

- *In class, the teacher used "dibranchiata" to mean comprising all living cephalopods except the family....*
- *He looked up "dibranchiata" because he had never seen it before.*

---

dibranchiate *(noun)*

Cephalopods having two gills.

- *He looked up "dibranchiate" because he had never seen it before.*
- *They discussed "dibranchiate" during the group presentation.*

---

dibranchiate mollusk *(noun)*

Cephalopods having two gills.

- *She wrote a short paragraph that included "dibranchiate mollusk."*
- *He looked up "dibranchiate mollusk" because he had never seen it before.*

---

dicamptodon *(noun)*

Salamanders found near cold streams throughout the year.

- *In class, the teacher used "dicamptodon" to mean salamanders found near cold streams throughout the year.*
- *Understanding "dicamptodon" helps you talk about this topic clearly.*

---

dicamptodon ensatus *(noun)*

Large (to 7 inches) salamander of western North America.

- *They discussed "dicamptodon ensatus" during the group presentation.*
- *In class, the teacher used "dicamptodon ensatus" to mean large (to 7 inches) salamander of western north america.*

---

dicamptodontid *(noun)*

Salamanders found near cold streams throughout the year.

- *The article explained what "dicamptodontid" means with a simple example.*
- *In class, the teacher used "dicamptodontid" to mean salamanders found near cold streams throughout the year.*

---

dicamptodontidae *(noun)*

Large and small highly aquatic salamanders.

- *The article explained what "dicamptodontidae" means with a simple example.*
- *In class, the teacher used "dicamptodontidae" to mean large and small highly aquatic salamanders.*

---

diceros *(noun)*

Most common species in Africa.

- *She wrote a short paragraph that included "diceros."*
- *He looked up "diceros" because he had never seen it before.*

---

diceros bicornis *(noun)*

African rhino; in danger of extinction.

- *Understanding "diceros bicornis" helps you talk about this topic clearly.*
- *He looked up "diceros bicornis" because he had never seen it before.*

diceros simus *(noun)*

Large light-grey African rhinoceros having two horns; endangered; sometimes placed in genus Diceros.

- *In class, the teacher used "diceros simus" to mean large light-grey african rhinoceros having two....*
- *They discussed "diceros simus" during the group presentation.*

dichromacy *(noun)*

A deficiency of color vision in which the person can match any given hue by mixing only two other wavelengths of light (as opposed to the three wavelengths needed by people with normal color vision).

- *The article explained what "dichromacy" means with a simple example.*
- *In class, the teacher used "dichromacy" to mean a deficiency of color vision in which the person....*

dichromasy *(noun)*

A deficiency of color vision in which the person can match any given hue by mixing only two other wavelengths of light (as opposed to the three wavelengths needed by people with normal color vision).

- *She wrote a short paragraph that included "dichromasy."*
- *He looked up "dichromasy" because he had never seen it before.*

dichromatism *(noun)*

A deficiency of color vision in which the person can match any given hue by mixing only two other wavelengths of light (as opposed to the three wavelengths needed by people with normal color vision).

- *In class, the teacher used "dichromatism" to mean a deficiency of color vision in which the person....*
- *The article explained what "dichromatism" means with a simple example.*

dichromatopsia *(noun)*

A deficiency of color vision in which the person can match any given hue by mixing only two other wavelengths of light (as opposed to the three wavelengths needed by people with normal color vision).

- *She wrote a short paragraph that included "dichromatopsia."*
- *He looked up "dichromatopsia" because he had never seen it before.*

dichromia *(noun)*

A deficiency of color vision in which the person can match any given hue by mixing only two other wavelengths of light (as opposed to the three wavelengths needed by people with normal color vision).

- *Understanding "dichromia" helps you talk about this topic clearly.*
- *He looked up "dichromia" because he had never seen it before.*

dickeybird *(noun)*

Small bird; adults talking to children sometimes use these words to refer to small birds.

- *In class, the teacher used "dickeybird" to mean small bird; adults talking to children sometimes....*
- *Understanding "dickeybird" helps you talk about this topic clearly.*

dickybird *(noun)*

Small bird; adults talking to children sometimes use these words to refer to small birds.

- *She wrote a short paragraph that included "dickybird."*
- *They discussed "dickybird" during the group presentation.*

dicrostonyx *(noun)*

Pied lemmings.

- *He looked up "dicrostonyx" because he had never seen it before.*
- *In class, the teacher used "dicrostonyx" to mean pied lemmings.*

dicrostonyx hudsonius *(noun)*

Of northern Canada.

- *He looked up "dicrostonyx hudsonius" because he had never seen it before.*
- *She wrote a short paragraph that included "dicrostonyx hudsonius."*

dictyoptera *(noun)*

In some classifications replaced by the orders (here suborders) Blattodea (cockroaches) and Manteodea (mantids); in former classifications often subsumed under a much broader order Orthoptera.

- *He looked up "dictyoptera" because he had never seen it before.*
- *In class, the teacher used "dictyoptera" to mean in some classifications replaced by the orders....*

dictyopterous insect *(noun)*

Cockroaches and mantids.

- *He looked up "dictyopterous insect" because he had never seen it before.*
- *They discussed "dictyopterous insect" during the group presentation.*

dictyosome *(noun)*

A netlike structure in the cytoplasm of animal cells (especially in those cells that produce secretions).

- *Understanding "dictyosome" helps you talk about this topic clearly.*
- *The article explained what "dictyosome" means with a simple example.*

dicynodont *(noun)*

A kind of therapsid.

- *The article explained what "dicynodont" means with a simple example.*
- *Understanding "dicynodont" helps you talk about this topic clearly.*

dicynodontia *(noun)*

A division of Therapsida.

- *She wrote a short paragraph that included "dicynodontia."*
- *He looked up "dicynodontia" because he had never seen it before.*

didder *(verb)*

Move with or as if with a tremor.

- *She tried to use "didder" carefully so everyone would understand.*
- *Learners should practice how to use "didder" in real sentences.*

didelphis marsupialis *(noun)*

Omnivorous opossum of the eastern United States; noted for feigning death when in danger; esteemed as food in some areas; considered same species as the crab-eating opossum of South America.

- *He looked up "didelphis marsupialis" because he had never seen it before.*
- *They discussed "didelphis marsupialis" during the group presentation.*

diestrum *(noun)*

(of animals having several estrous cycles in one breeding season) a state or interval of sexual inactivity or quiescence between periods of activity.

- *She wrote a short paragraph that included "diestrum."*
- *The article explained what "diestrum" means with a simple example.*

diestrus *(noun)*

(of animals having several estrous cycles in one breeding season) a state or interval of sexual inactivity or quiescence between periods of activity.

- *She wrote a short paragraph that included "diestrus."*
- *He looked up "diestrus" because he had never seen it before.*

difflugia *(noun)*

A protozoan with an ovoid shell of cemented sand grains.

- *The article explained what "difflugia" means with a simple example.*
- *In class, the teacher used "difflugia" to mean a protozoan with an ovoid shell of cemented sand grains.*

dihybrid *(noun)*

A hybrid produced by parents that differ only at two gene loci that have two alleles each.

- *She wrote a short paragraph that included "dihybrid."*
- *The article explained what "dihybrid" means with a simple example.*

dihydrostreptomycin *(noun)*

Antibiotic consisting of a hydrogenated form of streptomycin; used against tuberculosis and tularemia and Gram-negative organisms.

- *Understanding "dihydrostreptomycin" helps you talk about this topic clearly.*
- *He looked up "dihydrostreptomycin" because he had never seen it before.*

dimout *(noun)*

Darkness resulting from the extinction of lights (as in a city invisible to enemy aircraft).

- *He looked up "dimout" because he had never seen it before.*
- *She wrote a short paragraph that included "dimout."*

dinginess *(noun)*

Discoloration due to dirtiness.

- *He looked up "dinginess" because he had never seen it before.*
- *Understanding "dinginess" helps you talk about this topic clearly.*

dinoceras *(noun)*

A variety of dinocerate.

- *He looked up "dinoceras" because he had never seen it before.*
- *In class, the teacher used "dinoceras" to mean a variety of dinocerate.*

dinocerata *(noun)*

Small order of primitive ungulates of the Paleocene and Eocene.

- *In class, the teacher used "dinocerata" to mean small order of primitive ungulates of the paleocene....*
- *Understanding "dinocerata" helps you talk about this topic clearly.*

dinocerate *(noun)*

An extinct ungulate.

- *He looked up "dinocerate" because he had never seen it before.*
- *Understanding "dinocerate" helps you talk about this topic clearly.*

dinoflagellata *(noun)*

In some classifications considered a phylum of the kingdom Protista; in others included in the plant phylum Pyrrophyta.

- *They discussed "dinoflagellata" during the group presentation.*
- *In class, the teacher used "dinoflagellata" to mean in some classifications considered a phylum of the....*

dinornis *(noun)*

Type genus of the Dinornithidae: large moas.

- *In class, the teacher used "dinornis" to mean type genus of the dinornithidae: large moas.*
- *Understanding "dinornis" helps you talk about this topic clearly.*

dinornis giganteus *(noun)*

The largest moa; about 12 feet high.

- *The article explained what "dinornis giganteus" means with a simple example.*
- *In class, the teacher used "dinornis giganteus" to mean the largest moa; about 12 feet high.*

dinornithiformes *(noun)*

A ratite bird order: recently extinct flightless birds of New Zealand.

- *He looked up "dinornithiformes" because he had never seen it before.*
- *In class, the teacher used "dinornithiformes" to mean a ratite bird order: recently extinct flightless....*

diodon *(noun)*

Type genus of the Diodontidae.

- *She wrote a short paragraph that included "diodon."*
- *The article explained what "diodon" means with a simple example.*

diodon holocanthus *(noun)*

Similar to but smaller than porcupinefish.

- *She wrote a short paragraph that included "diodon holocanthus."*
- *Understanding "diodon holocanthus" helps you talk about this topic clearly.*

diodon hystrix *(noun)*

Spines become erect when the body is inflated; worldwide in warm waters.

- *In class, the teacher used "diodon hystrix" to mean spines become erect when the body is inflated;....*

- *The article explained what “diodon hystrix” means with a simple example.*

---

diodontidae *(noun)*

Spiny puffers.

- *He looked up “diodontidae” because he had never seen it before.*
- *They discussed “diodontidae” during the group presentation.*

---

diodora apertura *(noun)*

Marine limpet having a conical shell with an opening at the apex.

- *In class, the teacher used “diodora apertura” to mean marine limpet having a conical shell with an....*
- *They discussed “diodora apertura” during the group presentation.*

---

diomedea exulans *(noun)*

Very large albatross; white with wide black wings.

- *He looked up “diomedea exulans” because he had never seen it before.*
- *Understanding “diomedea exulans” helps you talk about this topic clearly.*

---

diomedeidae *(noun)*

Albatrosses.

- *Understanding “diomedeidae” helps you talk about this topic clearly.*
- *In class, the teacher used “diomedeidae” to mean albatrosses.*

---

diphylla *(noun)*

Vampire bats.

- *The article explained what “diphylla” means with a simple example.*
- *They discussed “diphylla” during the group presentation.*

---

diphylla ecaudata *(noun)*

Similar in size and habits to Desmodus rotundus; of tropical America including southern California and Texas.

- *She wrote a short paragraph that included “diphylla ecaudata.”*
- *Understanding “diphylla ecaudata” helps you talk about this topic clearly.*

---

diplococcus *(noun)*

Gram-positive bacteria usually occurring in pairs.

- *In class, the teacher used “diplococcus” to mean gram-positive bacteria usually occurring in pairs.*
- *The article explained what “diplococcus” means with a simple example.*

---

diplococcus pneumoniae *(noun)*

Bacterium causing pneumonia in mice and humans.

- *She wrote a short paragraph that included “diplococcus pneumoniae.”*
- *Understanding “diplococcus pneumoniae” helps you talk about this topic clearly.*

---

diploic vein *(noun)*

One of the veins serving the spongy part of the cranial bones.

- *In class, the teacher used “diploic vein” to mean one of the veins serving the spongy part of the....*
- *The article explained what “diploic vein” means with a simple example.*

---

diploidy *(noun)*

The condition of being diploid.

- *He looked up “diploidy” because he had never seen it before.*
- *In class, the teacher used “diploidy” to mean the condition of being diploid.*

---

diplopoda *(noun)*

Arthropods having the body composed of numerous double somites each with two pairs of legs: millipedes.

- *Understanding “diplopoda” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “diplopoda.”*

---

dipnoi *(noun)*

Bony fishes of the southern hemisphere that breathe by a modified air bladder as well as gills; sometimes classified as an order of Crossopterygii.

- *She wrote a short paragraph that included "dipnoi."*
- *He looked up "dipnoi" because he had never seen it before.*

---

dipodidae *(noun)*

Old World jerboas.

- *She wrote a short paragraph that included "dipodidae."*
- *Understanding "dipodidae" helps you talk about this topic clearly.*

---

dipodomys phillipsii *(noun)*

Any of various leaping rodents of desert regions of North America and Mexico; largest members of the family Heteromyidae.

- *She wrote a short paragraph that included "dipodomys phillipsii."*
- *He looked up "dipodomys phillipsii" because he had never seen it before.*

---

dipsosaurus *(noun)*

Desert iguanas.

- *In class, the teacher used "dipsosaurus" to mean desert iguanas.*
- *They discussed "dipsosaurus" during the group presentation.*

---

dipsosaurus dorsalis *(noun)*

Small long-tailed lizard of arid areas of southwestern United States and northwestern Mexico.

- *The article explained what "dipsosaurus dorsalis" means with a simple example.*
- *They discussed "dipsosaurus dorsalis" during the group presentation.*

---

dipteron *(noun)*

Insects having usually a single pair of functional wings (anterior pair) with the posterior pair reduced to small knobbed structures and mouth parts adapted for sucking or lapping or piercing.

- *They discussed "dipteron" during the group presentation.*
- *She wrote a short paragraph that included "dipteron."*

---

dipterous insect *(noun)*

Insects having usually a single pair of functional wings (anterior pair) with the posterior pair reduced to small knobbed structures and mouth parts adapted for sucking or lapping or piercing.

- *She wrote a short paragraph that included "dipterous insect."*
- *They discussed "dipterous insect" during the group presentation.*

---

dipus *(noun)*

Type genus of the Dipodidae; typical jerboas having three toes on each hind foot.

- *The article explained what "dipus" means with a simple example.*
- *In class, the teacher used "dipus" to mean type genus of the dipodidae; typical jerboas having....*

---

disarrangement *(noun)*

A condition in which an orderly system has been disrupted.

- *He looked up "disarrangement" because he had never seen it before.*
- *In class, the teacher used "disarrangement" to mean a condition in which an orderly system has been....*

---

discase *(verb)*

Get undressed.

- *Learners should practice how to use "discase" in real sentences.*
- *The coach explained when to use "discase" and when to wait.*

---

discocephali *(noun)*

Small order of fishes comprising the remoras.

- *Understanding "discocephali" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "discocephali."*

---

discoglossidae *(noun)*

Family of Old World toads having a fixed disklike tongue.

- *The article explained what "discoglossidae" means with a simple example.*
- *They discussed "discoglossidae" during the group presentation.*

---

disesteem *(noun)*

The state in which esteem has been lost.

- *The article explained what "disesteem" means with a simple example.*
- *Understanding "disesteem" helps you talk about this topic clearly.*

---

dishabille *(noun)*

The state of being carelessly or partially dressed.

- *The article explained what "dishabille" means with a simple example.*
- *In class, the teacher used "dishabille" to mean the state of being carelessly or partially dressed.*

---

disorderliness *(noun)*

A condition in which things are not in their expected places.

- *Understanding "disorderliness" helps you talk about this topic clearly.*
- *He looked up "disorderliness" because he had never seen it before.*

---

dispread *(verb)*

Spread abroad or out.

- *The sun dispread its beams.*
- *The coach explained when to use "dispread" and when to wait.*

---

distomatosis *(noun)*

A disease of the liver (especially in sheep and cattle) caused by liver flukes and their by-products.

- *She wrote a short paragraph that included "distomatosis."*
- *He looked up "distomatosis" because he had never seen it before.*

---

division cyanophyta *(noun)*

Prokaryotic organisms sometimes considered a class or phylum or subkingdom; coextensive with the Cyanophyceae: cyanobacteria (blue-green algae).

- *The article explained what "division cyanophyta" means with a simple example.*
- *In class, the teacher used "division cyanophyta" to mean prokaryotic organisms sometimes considered a class....*

---

division cynodontia *(noun)*

A division of the order Therapsida from the Triassic period comprising small carnivorous tetrapod reptiles often with mammal-like teeth.

- *She wrote a short paragraph that included "division cynodontia."*
- *Understanding "division cynodontia" helps you talk about this topic clearly.*

---

division dicynodontia *(noun)*

A division of Therapsida.

- *Understanding "division dicynodontia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "division dicynodontia."*

---

division euglenophyta *(noun)*

Free-swimming flagellate algae.

- *In class, the teacher used "division euglenophyta" to mean free-swimming flagellate algae.*
- *He looked up "division euglenophyta" because he had never seen it before.*

---

division heterokontophyta *(noun)*

Algae having chlorophyll a and usually c, and flagella of unequal lengths; terminology supersedes Chrysophyta in some classifications.

- *She wrote a short paragraph that included "division heterokontophyta."*
- *He looked up "division heterokontophyta" because he had never seen it before.*

---

division phaeophyta *(noun)*

Coextensive with class Phaeophyceae; in some classifications subsumed in the division Heterokontophyta.

- *Understanding "division phaeophyta" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "division phaeophyta."*

division schizophyta *(noun)*

Former term for the Cyanophyta.

- *She wrote a short paragraph that included "division schizophyta."*
- *The article explained what "division schizophyta" means with a simple example.*

dizen *(verb)*

Dress up garishly and tastelessly.

- *The coach explained when to use "dizen" and when to wait.*
- *Can you use "dizen" in a sentence that fits this situation?*

dobsonfly *(noun)*

Large soft-bodied insect having long slender mandibles in the male; aquatic larvae often used as bait.

- *He looked up "dobsonfly" because he had never seen it before.*
- *They discussed "dobsonfly" during the group presentation.*

doctorfish *(noun)*

Surgeon fish of the West Indies.

- *The article explained what "doctorfish" means with a simple example.*
- *She wrote a short paragraph that included "doctorfish."*

dogy *(noun)*

Motherless calf in a range herd of cattle.

- *The article explained what "dogy" means with a simple example.*
- *They discussed "dogy" during the group presentation.*

dolichonyx oryzivorus *(noun)*

Migratory American songbird.

- *She wrote a short paragraph that included "dolichonyx oryzivorus."*
- *They discussed "dolichonyx oryzivorus" during the group presentation.*

dolichotis patagonum *(noun)*

Hare-like rodent of the pampas of Argentina.

- *Understanding "dolichotis patagonum" helps you talk about this topic clearly.*
- *The article explained what "dolichotis patagonum" means with a simple example.*

doliolidae *(noun)*

Oceanic tunicates.

- *Understanding "doliolidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "doliolidae."*

doliolum *(noun)*

Free-swimming oceanic tunicate with a barrel-shaped transparent body.

- *They discussed "doliolum" during the group presentation.*
- *She wrote a short paragraph that included "doliolum."*

dollarfish *(noun)*

Any of several silvery marine fishes with very flat bodies.

- *Understanding "dollarfish" helps you talk about this topic clearly.*
- *He looked up "dollarfish" because he had never seen it before.*

dorbeetle *(noun)*

Old World dung beetle that flies with a droning sound.

- *Understanding "dorbeetle" helps you talk about this topic clearly.*
- *In class, the teacher used "dorbeetle" to mean old world dung beetle that flies with a droning sound.*

dotrel *(noun)*

Rare plover of upland areas of Eurasia.

- *Understanding "dotrel" helps you talk about this topic clearly.*
- *In class, the teacher used "dotrel" to mean rare plover of upland areas of eurasia.*

---

douroucouli *(noun)*

Nocturnal monkey of Central America and South America with large eyes and thick fur.

- *He looked up "douroucouli" because he had never seen it before.*
- *She wrote a short paragraph that included "douroucouli."*

---

dovekie *(noun)*

Small short-billed auk abundant in Arctic regions.

- *They discussed "dovekie" during the group presentation.*
- *In class, the teacher used "dovekie" to mean small short-billed auk abundant in arctic regions.*

---

dracunculiasis *(noun)*

A painful and debilitating infestation contracted by drinking stagnant water contaminated with Guinea worm larvae that can mature inside a human's abdomen until the worm emerges through a painful blister in the person's skin.

- *He looked up "dracunculiasis" because he had never seen it before.*
- *She wrote a short paragraph that included "dracunculiasis."*

---

dracunculidae *(noun)*

Greatly elongated roundworm.

- *Understanding "dracunculidae" helps you talk about this topic clearly.*
- *He looked up "dracunculidae" because he had never seen it before.*

---

dracunculus medinensis *(noun)*

Parasitic roundworm of India and Africa that lives in the abdomen or beneath the skin of humans and other vertebrates.

- *He looked up "dracunculus medinensis" because he had never seen it before.*
- *They discussed "dracunculus medinensis" during the group presentation.*

---

drayhorse *(noun)*

Draft horse kept for pulling carts.

- *They discussed "drayhorse" during the group presentation.*
- *Understanding "drayhorse" helps you talk about this topic clearly.*

---

drepanididae *(noun)*

Hawaiian honeycreepers.

- *In class, the teacher used "drepanididae" to mean hawaiian honeycreepers.*
- *He looked up "drepanididae" because he had never seen it before.*

---

drepanis *(noun)*

A genus of Drepanididae.

- *Understanding "drepanis" helps you talk about this topic clearly.*
- *He looked up "drepanis" because he had never seen it before.*

---

drepanocytic anaemia *(noun)*

A congenital form of anemia occurring mostly in blacks; characterized by abnormal blood cells having a crescent shape.

- *They discussed "drepanocytic anaemia" during the group presentation.*
- *In class, the teacher used "drepanocytic anaemia" to mean a congenital form of anemia occurring mostly in....*

---

drepanocytic anemia *(noun)*

A congenital form of anemia occurring mostly in blacks; characterized by abnormal blood cells having a crescent shape.

- *He looked up "drepanocytic anemia" because he had never seen it before.*
- *They discussed "drepanocytic anemia" during the group presentation.*

---

driftfish *(noun)*

Small (6 inches) tropical butterfishes found worldwide.

- *The article explained what "driftfish" means with a simple example.*

- *Understanding "driftfish" helps you talk about this topic clearly.*

---

dromaeosaur *(noun)*

A kind of maniraptor.

- *He looked up "dromaeosaur" because he had never seen it before.*
- *They discussed "dromaeosaur" during the group presentation.*

---

dromaeosauridae *(noun)*

Swift-running bipedal dinosaurs.

- *They discussed "dromaeosauridae" during the group presentation.*
- *She wrote a short paragraph that included "dromaeosauridae."*

---

dromaius *(noun)*

A genus of birds in the order Casuariiformes.

- *He looked up "dromaius" because he had never seen it before.*
- *She wrote a short paragraph that included "dromaius."*

---

dromaius novaehollandiae *(noun)*

Large Australian flightless bird similar to the ostrich but smaller.

- *In class, the teacher used "dromaius novaehollandiae" to mean large australian flightless bird similar to the....*
- *They discussed "dromaius novaehollandiae" during the group presentation.*

---

drosophilidae *(noun)*

Fruit flies.

- *The article explained what "drosophilidae" means with a simple example.*
- *Understanding "drosophilidae" helps you talk about this topic clearly.*

---

drumfish *(noun)*

Small to medium-sized bottom-dwelling food and game fishes of shallow coastal and fresh waters that make a drumming noise.

- *Understanding "drumfish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "drumfish."*

---

drymarchon *(noun)*

A genus of Colubridae.

- *They discussed "drymarchon" during the group presentation.*
- *She wrote a short paragraph that included "drymarchon."*

---

drymarchon corais *(noun)*

Large dark-blue nonvenomous snake that invades burrows; found in southern North America and Mexico.

- *In class, the teacher used "drymarchon corais" to mean large dark-blue nonvenomous snake that invades....*
- *He looked up "drymarchon corais" because he had never seen it before.*

---

drymarchon corais couperi *(noun)*

A variety of indigo snake.

- *They discussed "drymarchon corais couperi" during the group presentation.*
- *In class, the teacher used "drymarchon corais couperi" to mean a variety of indigo snake.*

---

dryopithecine *(noun)*

Considered a possible ancestor to both anthropoid apes and humans.

- *She wrote a short paragraph that included "dryopithecine."*
- *They discussed "dryopithecine" during the group presentation.*

---

dryopithecus *(noun)*

Genus of Old World hominoids; Miocene and Pliocene.

- *She wrote a short paragraph that included "dryopithecus."*
- *He looked up "dryopithecus" because he had never seen it before.*

---

dryopithecus rudapithecus hungaricus *(noun)*

Fossil hominoids from northern central Hungary; late Miocene.

- *She wrote a short paragraph that included "dryopithecus rudapithecus hungaricus."*
- *The article explained what "dryopithecus rudapithecus hungaricus" means with a simple example.*

duchenne's muscular dystrophy *(noun)*

The most common form of muscular dystrophy; inheritance is X-linked recessive (carried by females but affecting only males).

- *He looked up "duchenne's muscular dystrophy" because he had never seen it before.*
- *She wrote a short paragraph that included "duchenne's muscular dystrophy."*

duckbilled platypus *(noun)*

Small densely furred aquatic monotreme of Australia and Tasmania having a broad bill and tail and webbed feet; only species in the family Ornithorhynchidae.

- *They discussed "duckbilled platypus" during the group presentation.*
- *In class, the teacher used "duckbilled platypus" to mean small densely furred aquatic monotreme of australia....*

ductule *(noun)*

A very small duct.

- *Understanding "ductule" helps you talk about this topic clearly.*
- *The article explained what "ductule" means with a simple example.*

ductulus *(noun)*

A very small duct.

- *She wrote a short paragraph that included "ductulus."*
- *They discussed "ductulus" during the group presentation.*

dugong dugon *(noun)*

Sirenian tusked mammal found from eastern Africa to Australia; the flat tail is bilobate.

- *They discussed "dugong dugon" during the group presentation.*
- *Understanding "dugong dugon" helps you talk about this topic clearly.*

dugongidae *(noun)*

A family of mammals of order Sirenia including dugongs and Steller's sea cow.

- *The article explained what "dugongidae" means with a simple example.*
- *She wrote a short paragraph that included "dugongidae."*

dumetella carolinensis *(noun)*

North American songbird whose call resembles a cat's mewing.

- *They discussed "dumetella carolinensis" during the group presentation.*
- *She wrote a short paragraph that included "dumetella carolinensis."*

duplicidentata *(noun)*

In former classifications considered a suborder of Rodentia coextensive with the order Lagomorpha: gnawing animals.

- *She wrote a short paragraph that included "duplicidentata."*
- *He looked up "duplicidentata" because he had never seen it before.*

dusicyon *(noun)*

Crab-eating dog.

- *Understanding "dusicyon" helps you talk about this topic clearly.*
- *The article explained what "dusicyon" means with a simple example.*

dusicyon cancrivorus *(noun)*

Wild dog of northern South America.

- *The article explained what "dusicyon cancrivorus" means with a simple example.*
- *In class, the teacher used "dusicyon cancrivorus" to mean wild dog of northern south america.*

duskiness *(noun)*

The state of being poorly illuminated.

- *She wrote a short paragraph that included “duskiness.”*
- *He looked up “duskiness” because he had never seen it before.*

---

dustiness *(noun)*

The state of being covered with dust.

- *He looked up “dustiness” because he had never seen it before.*
- *Understanding “dustiness” helps you talk about this topic clearly.*

---

dysaphia *(noun)*

A disorder in the sense of touch.

- *They discussed “dysaphia” during the group presentation.*
- *He looked up “dysaphia” because he had never seen it before.*

---

dyschezia *(noun)*

Difficulty in defecating (usually as a consequence of long continued voluntary suppression of the urge to defecate).

- *He looked up “dyschezia” because he had never seen it before.*
- *Understanding “dyschezia” helps you talk about this topic clearly.*

---

dysdercus *(noun)*

A genus of slender long-legged bugs that feed on the developing seeds of cotton and stain it.

- *He looked up “dysdercus” because he had never seen it before.*
- *In class, the teacher used “dysdercus” to mean a genus of slender long-legged bugs that feed on....*

---

dyslogia *(noun)*

Impaired ability to express ideas verbally; usually resulting from difficulties of reasoning (as in feeblemindedness or certain psychoses).

- *Understanding “dyslogia” helps you talk about this topic clearly.*
- *In class, the teacher used “dyslogia” to mean impaired ability to express ideas verbally; usually....*

---

dysomia *(noun)*

Impairment of the sense of smell.

- *Understanding “dysomia” helps you talk about this topic clearly.*
- *The article explained what “dysomia” means with a simple example.*

---

dysosmia *(noun)*

A disorder in the sense of smell.

- *The article explained what “dysosmia” means with a simple example.*
- *Understanding “dysosmia” helps you talk about this topic clearly.*

---

dyssynergia *(noun)*

Inability to coordinate voluntary muscle movements; unsteady movements and staggering gait.

- *Understanding “dyssynergia” helps you talk about this topic clearly.*
- *They discussed “dyssynergia” during the group presentation.*

---

dziggetai *(noun)*

Mongolian wild ass.

- *He looked up “dziggetai” because he had never seen it before.*
- *In class, the teacher used “dziggetai” to mean mongolian wild ass.*

---

eacles *(noun)*

Imperial moths.

- *The article explained what “eacles” means with a simple example.*
- *In class, the teacher used “eacles” to mean imperial moths.*

---

eacles imperialis *(noun)*

Large American moth having yellow wings with purplish or brownish markings; larvae feed on e.g. maple and pine trees.

- *Understanding “eacles imperialis” helps you talk about this topic clearly.*
- *He looked up “eacles imperialis” because he had never seen it before.*

eastern dasyure *(noun)*

A variety of dasyure.

- *The article explained what "eastern dasyure" means with a simple example.*
- *In class, the teacher used "eastern dasyure" to mean a variety of dasyure.*

eastern pipistrel *(noun)*

One of the smallest bats of eastern North America.

- *He looked up "eastern pipistrel" because he had never seen it before.*
- *Understanding "eastern pipistrel" helps you talk about this topic clearly.*

eccyesis *(noun)*

Pregnancy resulting from gestation elsewhere than in the uterus.

- *He looked up "eccyesis" because he had never seen it before.*
- *They discussed "eccyesis" during the group presentation.*

echeneididae *(noun)*

Fishes having a sucking disk on the head for clinging to other fishes and to ships.

- *In class, the teacher used "echeneididae" to mean fishes having a sucking disk on the head for....*
- *The article explained what "echeneididae" means with a simple example.*

echeneis *(noun)*

Type genus of the Echeneididae: typical remoras.

- *Understanding "echeneis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "echeneis."*

echeneis naucrates *(noun)*

Remoras found attached to sharks.

- *He looked up "echeneis naucrates" because he had never seen it before.*
- *Understanding "echeneis naucrates" helps you talk about this topic clearly.*

echidnophaga *(noun)*

A genus of Siphonaptera.

- *She wrote a short paragraph that included "echidnophaga."*
- *He looked up "echidnophaga" because he had never seen it before.*

echidnophaga gallinacea *(noun)*

Parasitic on especially the heads of chickens.

- *Understanding "echidnophaga gallinacea" helps you talk about this topic clearly.*
- *In class, the teacher used "echidnophaga gallinacea" to mean parasitic on especially the heads of chickens.*

ectasis *(noun)*

Dilatation or distension of a hollow organ.

- *He looked up "ectasis" because he had never seen it before.*
- *She wrote a short paragraph that included "ectasis."*

ectoblast *(noun)*

The outer germ layer that develops into skin and nervous tissue.

- *She wrote a short paragraph that included "ectoblast."*
- *Understanding "ectoblast" helps you talk about this topic clearly.*

ectopistes *(noun)*

A genus of Columbidae.

- *They discussed "ectopistes" during the group presentation.*
- *He looked up "ectopistes" because he had never seen it before.*

ectopistes migratorius *(noun)*

Gregarious North American migratory pigeon now extinct.

- *She wrote a short paragraph that included "ectopistes migratorius."*
- *They discussed "ectopistes migratorius" during the group presentation.*

---

ectoproct *(noun)*

Sessile mossy aquatic animal having the anus of the polyp outside the crown of tentacles.

- *She wrote a short paragraph that included "ectoproct."*
- *They discussed "ectoproct" during the group presentation.*

---

ectoprocta *(noun)*

Coextensive with or a subphylum of Bryozoa.

- *Understanding "ectoprocta" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ectoprocta."*

---

ectotherm *(noun)*

An animal whose body temperature varies with the temperature of its surroundings; any animal except birds and mammals.

- *They discussed "ectotherm" during the group presentation.*
- *He looked up "ectotherm" because he had never seen it before.*

---

ectozoan *(noun)*

Any external parasitic organism (as fleas).

- *The article explained what "ectozoan" means with a simple example.*
- *She wrote a short paragraph that included "ectozoan."*

---

ectozoon *(noun)*

Any external parasitic organism (as fleas).

- *They discussed "ectozoon" during the group presentation.*
- *He looked up "ectozoon" because he had never seen it before.*

---

ectrodactyly *(noun)*

Congenital abnormality involving the absence of some fingers or toes.

- *She wrote a short paragraph that included "ectrodactyly."*
- *He looked up "ectrodactyly" because he had never seen it before.*

---

eczema herpeticum *(noun)*

Eczema characterized by a feverish condition and widespread eruption of vesicles; most common in children.

- *They discussed "eczema herpeticum" during the group presentation.*
- *She wrote a short paragraph that included "eczema herpeticum."*

---

eczema hypertrophicum *(noun)*

Eczema characterized by thickening of the skin with accentuated skin lines.

- *He looked up "eczema hypertrophicum" because he had never seen it before.*
- *She wrote a short paragraph that included "eczema hypertrophicum."*

---

eczema vaccinatum *(noun)*

A now rare complication of vaccinia superimposed on atopic dermatitis with high fever and generalized vesicles and papulovesicles.

- *In class, the teacher used "eczema vaccinatum" to mean a now rare complication of vaccinia superimposed on....*
- *They discussed "eczema vaccinatum" during the group presentation.*

---

edacity *(noun)*

Excessive desire to eat.

- *She wrote a short paragraph that included "edacity."*
- *They discussed "edacity" during the group presentation.*

---

edaphosauridae *(noun)*

A family of reptiles of the order Pelycosauria.

- *She wrote a short paragraph that included "edaphosauridae."*

- *Understanding "edaphosauridae" helps you talk about this topic clearly.*

---

edaphosaurus *(noun)*

Heavy-bodied reptile with a dorsal sail or crest; of the late Paleozoic.

- *He looked up "edaphosaurus" because he had never seen it before.*
- *She wrote a short paragraph that included "edaphosaurus."*

---

edentata *(noun)*

Order of mammals having few or no teeth including: New World anteaters; sloths; armadillos.

- *He looked up "edentata" because he had never seen it before.*
- *She wrote a short paragraph that included "edentata."*

---

edmontonia *(noun)*

Heavily armored and highly spiked dinosaur with semi-upright posture.

- *Understanding "edmontonia" helps you talk about this topic clearly.*
- *In class, the teacher used "edmontonia" to mean heavily armored and highly spiked dinosaur with....*

---

eelblenny *(noun)*

Eellike fishes found in subarctic coastal waters.

- *He looked up "eelblenny" because he had never seen it before.*
- *She wrote a short paragraph that included "eelblenny."*

---

eelworm *(noun)*

Any of various small free-living plant-parasitic roundworms.

- *She wrote a short paragraph that included "eelworm."*
- *He looked up "eelworm" because he had never seen it before.*

---

egality *(noun)*

Social and political equality.

- *Egality represents an extreme leveling of society.*
- *She wrote a short paragraph that included "egality."*

---

egest *(verb)*

Eliminate from the body.

- *She tried to use "egest" carefully so everyone would understand.*
- *Can you use "egest" in a sentence that fits this situation?*

---

egretta *(noun)*

Small Old and New World herons.

- *He looked up "egretta" because he had never seen it before.*
- *She wrote a short paragraph that included "egretta."*

---

egretta albus *(noun)*

A common egret of the genus Egretta found in America; it is a variety of the Old World white egret Casmerodius albus.

- *She wrote a short paragraph that included "egretta albus."*
- *He looked up "egretta albus" because he had never seen it before.*

---

egretta caerulea *(noun)*

Small bluish-grey heron of the western hemisphere.

- *In class, the teacher used "egretta caerulea" to mean small bluish-grey heron of the western hemisphere.*
- *The article explained what "egretta caerulea" means with a simple example.*

---

egretta garzetta *(noun)*

Old World egret.

- *Understanding "egretta garzetta" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "egretta garzetta."*

---

egretta thula *(noun)*

Small New World egret.

- *Understanding "egretta thula" helps you talk about this topic clearly.*
- *They discussed "egretta thula" during the group presentation.*

eimeriidae *(noun)*

A family of protoctist in the order Coccidia.

- *In class, the teacher used "eimeriidae" to mean a family of protoctist in the order coccidia.*
- *They discussed "eimeriidae" during the group presentation.*

ekbom syndrome *(noun)*

Feeling of uneasiness and restlessness in the legs after going to bed (sometimes causing insomnia); may be relieved temporarily by walking or moving the legs.

- *They discussed "ekbom syndrome" during the group presentation.*
- *She wrote a short paragraph that included "ekbom syndrome."*

elagatis *(noun)*

A genus of Carangidae.

- *Understanding "elagatis" helps you talk about this topic clearly.*
- *They discussed "elagatis" during the group presentation.*

elagatis bipinnulata *(noun)*

Streamlined cigar-shaped jack; good game fish.

- *The article explained what "elagatis bipinnulata" means with a simple example.*
- *In class, the teacher used "elagatis bipinnulata" to mean streamlined cigar-shaped jack; good game fish.*

elanoides *(noun)*

A genus of kites.

- *In class, the teacher used "elanoides" to mean a genus of kites.*
- *They discussed "elanoides" during the group presentation.*

elanoides forficatus *(noun)*

Graceful North American black-and-white kite.

- *In class, the teacher used "elanoides forficatus" to mean graceful north american black-and-white kite.*
- *They discussed "elanoides forficatus" during the group presentation.*

elanus *(noun)*

A genus of small kites of both Old and New Worlds.

- *In class, the teacher used "elanus" to mean a genus of small kites of both old and new worlds.*
- *They discussed "elanus" during the group presentation.*

elanus leucurus *(noun)*

Grey-and-white American kite of warm and tropical regions.

- *Understanding "elanus leucurus" helps you talk about this topic clearly.*
- *The article explained what "elanus leucurus" means with a simple example.*

elaphure *(noun)*

Large Chinese deer surviving only in domesticated herds.

- *Understanding "elaphure" helps you talk about this topic clearly.*
- *He looked up "elaphure" because he had never seen it before.*

elaphurus *(noun)*

A genus of Cervidae.

- *She wrote a short paragraph that included "elaphurus."*
- *He looked up "elaphurus" because he had never seen it before.*

elaphurus davidianus *(noun)*

Large Chinese deer surviving only in domesticated herds.

- *They discussed “elaphurus davidianus” during the group presentation.*
- *He looked up “elaphurus davidianus” because he had never seen it before.*

---

elapid *(noun)*

Any of numerous venomous fanged snakes of warmer parts of both hemispheres.

- *They discussed “elapid” during the group presentation.*
- *In class, the teacher used “elapid” to mean any of numerous venomous fanged snakes of warmer....*

---

elapid snake *(noun)*

Any of numerous venomous fanged snakes of warmer parts of both hemispheres.

- *The article explained what “elapid snake” means with a simple example.*
- *They discussed “elapid snake” during the group presentation.*

---

elapidae *(noun)*

Cobras; kraits; mambas; coral snakes; Australian taipan and tiger snakes.

- *They discussed “elapidae” during the group presentation.*
- *He looked up “elapidae” because he had never seen it before.*

---

elasmobranchii *(noun)*

Sharks; rays; dogfishes; skates.

- *The article explained what “elasmobranchii” means with a simple example.*
- *Understanding “elasmobranchii” helps you talk about this topic clearly.*

---

elastosis *(noun)*

Breakdown of elastic tissue (as the loss of elasticity in the skin of elderly people that results from degeneration of connective tissue).

- *They discussed “elastosis” during the group presentation.*
- *In class, the teacher used “elastosis” to mean breakdown of elastic tissue (as the loss of....*

---

elater *(noun)*

Any of various widely distributed beetles.

- *She wrote a short paragraph that included “elater.”*
- *The article explained what “elater” means with a simple example.*

---

elaterid *(noun)*

Any of various widely distributed beetles.

- *Understanding “elaterid” helps you talk about this topic clearly.*
- *They discussed “elaterid” during the group presentation.*

---

elaterid beetle *(noun)*

Any of various widely distributed beetles.

- *They discussed “elaterid beetle” during the group presentation.*
- *She wrote a short paragraph that included “elaterid beetle.”*

---

elateridae *(noun)*

Click beetles and certain fireflies.

- *Understanding “elateridae” helps you talk about this topic clearly.*
- *In class, the teacher used “elateridae” to mean click beetles and certain fireflies.*

---

electromyograph *(noun)*

A medical instrument that records the electrical waves associated with the activity of skeletal muscles.

- *She wrote a short paragraph that included “electromyograph.”*
- *Understanding “electromyograph” helps you talk about this topic clearly.*

---

electrophoridae *(noun)*

Small family comprising the electric eels.

- *He looked up “electrophoridae” because he had never seen it before.*
- *Understanding “electrophoridae” helps you talk about this topic clearly.*

electrophorus electric *(noun)*

Eel-shaped freshwater fish of South America having electric organs in its body.

- *In class, the teacher used "electrophorus electric" to mean eel-shaped freshwater fish of south america having....*
- *They discussed "electrophorus electric" during the group presentation.*

elephantiasis neuromatosa *(noun)*

Hypertrophy of a limb.

- *In class, the teacher used "elephantiasis neuromatosa" to mean hypertrophy of a limb.*
- *The article explained what "elephantiasis neuromatosa" means with a simple example.*

elephantiasis scroti *(noun)*

Swelling of the scrotum resulting from chronic lymphatic obstruction.

- *Understanding "elephantiasis scroti" helps you talk about this topic clearly.*
- *The article explained what "elephantiasis scroti" means with a simple example.*

elopidae *(noun)*

Tarpons and ladyfishes.

- *She wrote a short paragraph that included "elopidae."*
- *He looked up "elopidae" because he had never seen it before.*

elops *(noun)*

Type genus of the Elopidae: tenpounder.

- *She wrote a short paragraph that included "elops."*
- *The article explained what "elops" means with a simple example.*

elops saurus *(noun)*

Game fish resembling the tarpon but smaller.

- *In class, the teacher used "elops saurus" to mean game fish resembling the tarpon but smaller.*
- *The article explained what "elops saurus" means with a simple example.*

emberiza citrinella *(noun)*

European bunting the male being bright yellow.

- *He looked up "emberiza citrinella" because he had never seen it before.*
- *In class, the teacher used "emberiza citrinella" to mean european bunting the male being bright yellow.*

emberiza hortulana *(noun)*

Brownish Old World bunting often eaten as a delicacy.

- *They discussed "emberiza hortulana" during the group presentation.*
- *In class, the teacher used "emberiza hortulana" to mean brownish old world bunting often eaten as a delicacy.*

emberiza schoeniclus *(noun)*

European bunting inhabiting marshy areas.

- *They discussed "emberiza schoeniclus" during the group presentation.*
- *In class, the teacher used "emberiza schoeniclus" to mean european bunting inhabiting marshy areas.*

emberizidae *(noun)*

Buntings and some New World sparrows.

- *She wrote a short paragraph that included "emberizidae."*
- *He looked up "emberizidae" because he had never seen it before.*

embiodea *(noun)*

Web spinners.

- *In class, the teacher used "embiodea" to mean web spinners.*
- *He looked up "embiodea" because he had never seen it before.*

embioptera *(noun)*

Web spinners.

- *Understanding "embioptera" helps you talk about this topic clearly.*
- *He looked up "embioptera" because he had never seen it before.*

---

embiotocidae *(noun)*

Viviparous percoid fishes comprising the surf fishes.

- *They discussed "embiotocidae" during the group presentation.*
- *In class, the teacher used "embiotocidae" to mean viviparous percoid fishes comprising the surf fishes.*

---

embitterment *(noun)*

The state of being embittered.

- *The embitterment that resulted from the loss of his job never left him.*
- *In class, the teacher used "embitterment" to mean the state of being embittered.*

---

embrocate *(verb)*

Administer an oil or ointment to ; often in a religious ceremony of blessing.

- *The coach explained when to use "embrocate" and when to wait.*
- *He did not know how to use "embrocate" until he saw an example.*

---

embroilment *(noun)*

An intricate and confusing interpersonal or political situation.

- *In class, the teacher used "embroilment" to mean an intricate and confusing interpersonal or....*
- *He looked up "embroilment" because he had never seen it before.*

---

embryoma of the kidney *(noun)*

Malignant renal tumor of young children characterized by hypertension and blood in the urine and the presence of a palpable mass.

- *He looked up "embryoma of the kidney" because he had never seen it before.*
- *Understanding "embryoma of the kidney" helps you talk about this topic clearly.*

---

embryonal carcinosarcoma *(noun)*

A tumor composed of immature undifferentiated cells.

- *In class, the teacher used "embryonal carcinosarcoma" to mean a tumor composed of immature undifferentiated cells.*
- *They discussed "embryonal carcinosarcoma" during the group presentation.*

---

embryonal rhabdosarcoma *(noun)*

Form of rhabdomyosarcoma occurring mainly in infants and children.

- *The article explained what "embryonal rhabdosarcoma" means with a simple example.*
- *She wrote a short paragraph that included "embryonal rhabdosarcoma."*

---

emmetropia *(noun)*

(ophthalmology) the normal refractive condition of the eye in which there is clear focus of light on the retina.

- *She wrote a short paragraph that included "emmetropia."*
- *He looked up "emmetropia" because he had never seen it before.*

---

emphysematous phlegmon *(noun)*

(pathology) a deadly form of gangrene usually caused by clostridium bacteria that produce toxins that cause tissue death; can be used as a bioweapon.

- *Understanding "emphysematous phlegmon" helps you talk about this topic clearly.*
- *The article explained what "emphysematous phlegmon" means with a simple example.*

---

emplane *(verb)*

Board a plane.

- *Learners should practice how to use "emplane" in real sentences.*
- *He did not know how to use "emplane" until he saw an example.*

---

emu novaehollandiae *(noun)*

Large Australian flightless bird similar to the ostrich but smaller.

- *They discussed "emu novaehollandiae" during the group presentation.*

- *Understanding "emu novaehollandiae" helps you talk about this topic clearly.*

---

emydidae *(noun)*

Box and water turtles.

- *In class, the teacher used "emydidae" to mean box and water turtles.*
- *The article explained what "emydidae" means with a simple example.*

---

enanthem *(noun)*

Eruption on a mucous membrane (as the inside of the mouth) occurring as a symptom of a disease.

- *Understanding "enanthem" helps you talk about this topic clearly.*
- *The article explained what "enanthem" means with a simple example.*

---

enanthema *(noun)*

Eruption on a mucous membrane (as the inside of the mouth) occurring as a symptom of a disease.

- *The article explained what "enanthema" means with a simple example.*
- *They discussed "enanthema" during the group presentation.*

---

enarthrodial joint *(noun)*

A freely moving joint in which a sphere on the head of one bone fits into a rounded cavity in the other bone.

- *The article explained what "enarthrodial joint" means with a simple example.*
- *She wrote a short paragraph that included "enarthrodial joint."*

---

enarthrosis *(noun)*

A freely moving joint in which a sphere on the head of one bone fits into a rounded cavity in the other bone.

- *Understanding "enarthrosis" helps you talk about this topic clearly.*
- *They discussed "enarthrosis" during the group presentation.*

---

encephalomeningitis *(noun)*

Inflammation of the brain and spinal cord and their meninges.

- *In class, the teacher used "encephalomeningitis" to mean inflammation of the brain and spinal cord and their....*
- *He looked up "encephalomeningitis" because he had never seen it before.*

---

encephalon *(noun)*

That part of the central nervous system that includes all the higher nervous centers; enclosed within the skull; continuous with the spinal cord.

- *The article explained what "encephalon" means with a simple example.*
- *Understanding "encephalon" helps you talk about this topic clearly.*

---

enchondroma *(noun)*

Benign slow-growing tumor of cartilaginous cells at the ends of tubular bones (especially in the hands and feet).

- *Understanding "enchondroma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "enchondroma."*

---

enclothe *(verb)*

Provide with clothes or put clothes on.

- *The coach explained when to use "enclothe" and when to wait.*
- *Can you use "enclothe" in a sentence that fits this situation?*

---

encolure *(noun)*

The mane of a horse.

- *The article explained what "encolure" means with a simple example.*
- *In class, the teacher used "encolure" to mean the mane of a horse.*

---

encompassment *(noun)*

Including entirely.

- *She wrote a short paragraph that included "encompassment."*
- *He looked up "encompassment" because he had never seen it before.*

---

endameba *(noun)*

Any ameba of the genus Endamoeba.

- *The article explained what “endameba” means with a simple example.*
- *Understanding “endameba” helps you talk about this topic clearly.*

endamoeba *(noun)*

The type genus of the family Endamoebidae.

- *In class, the teacher used “endamoeba” to mean the type genus of the family endamoebidae.*
- *The article explained what “endamoeba” means with a simple example.*

endamoeba histolytica *(noun)*

The parasitic ameba that causes amebic dysentery in human beings.

- *They discussed “endamoeba histolytica” during the group presentation.*
- *In class, the teacher used “endamoeba histolytica” to mean the parasitic ameba that causes amebic dysentery in....*

endamoebidae *(noun)*

A large family of endoparasitic amebas that invade the digestive tract.

- *In class, the teacher used “endamoebidae” to mean a large family of endoparasitic amebas that invade....*
- *Understanding “endamoebidae” helps you talk about this topic clearly.*

endarteritis *(noun)*

Inflammation of the inner lining of an artery.

- *He looked up “endarteritis” because he had never seen it before.*
- *Understanding “endarteritis” helps you talk about this topic clearly.*

endoblast *(noun)*

The inner germ layer that develops into the lining of the digestive and respiratory systems.

- *Understanding “endoblast” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “endoblast.”*

endocervicitis *(noun)*

Inflammation of the mucous lining of the uterine cervix.

- *They discussed “endocervicitis” during the group presentation.*
- *She wrote a short paragraph that included “endocervicitis.”*

endocranium *(noun)*

Membrane lining the inside of the skull.

- *The article explained what “endocranium” means with a simple example.*
- *Understanding “endocranium” helps you talk about this topic clearly.*

endoneurium *(noun)*

Delicate connective tissue around individual nerve fibers in nerve.

- *She wrote a short paragraph that included “endoneurium.”*
- *He looked up “endoneurium” because he had never seen it before.*

endoparasite *(noun)*

Any of various parasites that live in the internal organs of animals (especially intestinal worms).

- *She wrote a short paragraph that included “endoparasite.”*
- *They discussed “endoparasite” during the group presentation.*

endoplasm *(noun)*

The inner portion of the cytoplasm of a cell.

- *The article explained what “endoplasm” means with a simple example.*
- *Understanding “endoplasm” helps you talk about this topic clearly.*

endoprocta *(noun)*

Sometimes considered a subphylum of Bryozoa.

- *The article explained what "endoprocta" means with a simple example.*
- *In class, the teacher used "endoprocta" to mean sometimes considered a subphylum of bryozoa.*

---

endosteum *(noun)*

Vascular membrane that lines the inner surface of long bones.

- *Understanding "endosteum" helps you talk about this topic clearly.*
- *In class, the teacher used "endosteum" to mean vascular membrane that lines the inner surface of....*

---

endozoan *(noun)*

Any of various parasites that live in the internal organs of animals (especially intestinal worms).

- *He looked up "endozoan" because he had never seen it before.*
- *In class, the teacher used "endozoan" to mean any of various parasites that live in the internal....*

---

energid *(noun)*

A biological unit consisting of a nucleus and the body of cytoplasm with which it interacts.

- *Understanding "energid" helps you talk about this topic clearly.*
- *He looked up "energid" because he had never seen it before.*

---

engraulis *(noun)*

Type genus of the family Engraulidae.

- *He looked up "engraulis" because he had never seen it before.*
- *She wrote a short paragraph that included "engraulis."*

---

engraulis encrasicholus *(noun)*

Esteemed for its flavor; usually preserved or used for sauces and relishes.

- *The article explained what "engraulis encrasicholus" means with a simple example.*
- *She wrote a short paragraph that included "engraulis encrasicholus."*

---

enhydra lutris *(noun)*

Large marine otter of northern Pacific coasts having very thick dark brown fur.

- *Understanding "enhydra lutris" helps you talk about this topic clearly.*
- *He looked up "enhydra lutris" because he had never seen it before.*

---

enplane *(verb)*

Board a plane.

- *Can you use "enplane" in a sentence that fits this situation?*
- *He did not know how to use "enplane" until he saw an example.*

---

entellus *(noun)*

Langur of southern Asia; regarded as sacred in India.

- *In class, the teacher used "entellus" to mean langur of southern asia; regarded as sacred in india.*
- *The article explained what "entellus" means with a simple example.*

---

enterics *(noun)*

Rod-shaped Gram-negative bacteria; most occur normally or pathogenically in intestines of humans and other animals.

- *The article explained what "enterics" means with a simple example.*
- *In class, the teacher used "enterics" to mean rod-shaped gram-negative bacteria; most occur....*

---

enterobius vermicularis *(noun)*

Small threadlike worm infesting human intestines and rectum especially in children.

- *He looked up "enterobius vermicularis" because he had never seen it before.*
- *In class, the teacher used "enterobius vermicularis" to mean small threadlike worm infesting human intestines....*

---

enteroceptor *(noun)*

Any receptor that responds to stimuli inside the body.

- *He looked up "enteroceptor" because he had never seen it before.*
- *They discussed "enteroceptor" during the group presentation.*

enterolithiasis *(noun)*

The presence of calculi in the intestines.

- *The article explained what "enterolithiasis" means with a simple example.*
- *Understanding "enterolithiasis" helps you talk about this topic clearly.*

enteron *(noun)*

The alimentary canal (especially of an embryo or a coelenterate).

- *She wrote a short paragraph that included "enteron."*
- *He looked up "enteron" because he had never seen it before.*

enteroptosis *(noun)*

An abnormally downward position of the intestines in the abdominal cavity.

- *She wrote a short paragraph that included "enteroptosis."*
- *The article explained what "enteroptosis" means with a simple example.*

enterostenosis *(noun)*

Abnormal narrowing of the intestine.

- *They discussed "enterostenosis" during the group presentation.*
- *He looked up "enterostenosis" because he had never seen it before.*

enterotoxemia *(noun)*

A disease of cattle and sheep that is attributed to toxins absorbed from the intestines.

- *Understanding "enterotoxemia" helps you talk about this topic clearly.*
- *They discussed "enterotoxemia" during the group presentation.*

entireness *(noun)*

The state of being total and complete.

- *Understanding "entireness" helps you talk about this topic clearly.*
- *The article explained what "entireness" means with a simple example.*

entlebucher *(noun)*

The smallest of the Sennenhunde.

- *They discussed "entlebucher" during the group presentation.*
- *She wrote a short paragraph that included "entlebucher."*

entoblast *(noun)*

The inner germ layer that develops into the lining of the digestive and respiratory systems.

- *In class, the teacher used "entoblast" to mean the inner germ layer that develops into the lining....*
- *He looked up "entoblast" because he had never seen it before.*

entoderm *(noun)*

The inner germ layer that develops into the lining of the digestive and respiratory systems.

- *He looked up "entoderm" because he had never seen it before.*
- *In class, the teacher used "entoderm" to mean the inner germ layer that develops into the lining....*

entomion *(noun)*

The craniometric point at the tip of the angular part of the parietal bone that articulates with the temporal bone.

- *The article explained what "entomion" means with a simple example.*
- *Understanding "entomion" helps you talk about this topic clearly.*

entomophobia *(noun)*

A morbid fear of insects.

- *She wrote a short paragraph that included "entomophobia."*
- *He looked up "entomophobia" because he had never seen it before.*

entomostraca *(noun)*

In some older classifications includes the Branchiopoda and Copepoda and Ostracoda and Cirripedia; no longer in technical use.

- *In class, the teacher used "entomostraca" to mean in some older classifications includes the....*
- *The article explained what "entomostraca" means with a simple example.*

---

entoparasite *(noun)*

Any of various parasites that live in the internal organs of animals (especially intestinal worms).

- *They discussed "entoparasite" during the group presentation.*
- *The article explained what "entoparasite" means with a simple example.*

---

entopic pregnancy *(noun)*

Pregnancy resulting from normal gestation in the uterus.

- *She wrote a short paragraph that included "entopic pregnancy."*
- *He looked up "entopic pregnancy" because he had never seen it before.*

---

entoproct *(noun)*

Any of various moss-like aquatic animals usually forming branching colonies; each polyp having a both mouth and anus within a closed ring of tentacles.

- *In class, the teacher used "entoproct" to mean any of various moss-like aquatic animals usually....*
- *Understanding "entoproct" helps you talk about this topic clearly.*

---

entoprocta *(noun)*

Sometimes considered a subphylum of Bryozoa.

- *She wrote a short paragraph that included "entoprocta."*
- *The article explained what "entoprocta" means with a simple example.*

---

entozoon *(noun)*

Any of various parasites that live in the internal organs of animals (especially intestinal worms).

- *He looked up "entozoon" because he had never seen it before.*
- *In class, the teacher used "entozoon" to mean any of various parasites that live in the internal....*

---

entric *(noun)*

Rod-shaped Gram-negative bacteria; most occur normally or pathogenically in intestines of humans and other animals.

- *The article explained what "entric" means with a simple example.*
- *They discussed "entric" during the group presentation.*

---

eoraptor *(noun)*

A theropod dinosaur of the genus Eoraptor.

- *In class, the teacher used "eoraptor" to mean a theropod dinosaur of the genus eoraptor.*
- *The article explained what "eoraptor" means with a simple example.*

---

eosinopenia *(noun)*

A decrease in the number of eosinophils in the blood.

- *Understanding "eosinopenia" helps you talk about this topic clearly.*
- *The article explained what "eosinopenia" means with a simple example.*

---

eosinophile *(noun)*

A leukocyte readily stained with eosin.

- *She wrote a short paragraph that included "eosinophile."*
- *He looked up "eosinophile" because he had never seen it before.*

---

ependyma *(noun)*

Thin epithelial membrane lining the ventricles of the brain and the spinal cord canal.

- *They discussed "ependyma" during the group presentation.*
- *He looked up "ependyma" because he had never seen it before.*

---

ephemerid *(noun)*

Short-lived insect.

- *They discussed "ephemerid" during the group presentation.*

- *Understanding "ephemerid" helps you talk about this topic clearly.*

---

ephemeron *(noun)*

Anything short-lived, as an insect that lives only for a day in its winged form.

- *The article explained what "ephemeron" means with a simple example.*
- *Understanding "ephemeron" helps you talk about this topic clearly.*

---

ephemeropteran *(noun)*

Short-lived insect.

- *The article explained what "ephemeropteran" means with a simple example.*
- *Understanding "ephemeropteran" helps you talk about this topic clearly.*

---

ephestia elutella *(noun)*

Small moth whose larvae feed on tobacco and other dried plant products.

- *They discussed "ephestia elutella" during the group presentation.*
- *She wrote a short paragraph that included "ephestia elutella."*

---

ephippidae *(noun)*

Small family comprising the spadefishes.

- *They discussed "ephippidae" during the group presentation.*
- *She wrote a short paragraph that included "ephippidae."*

---

ephippiorhynchus *(noun)*

Saddlebills.

- *In class, the teacher used "ephippiorhynchus" to mean saddlebills.*
- *The article explained what "ephippiorhynchus" means with a simple example.*

---

ephippiorhynchus senegalensis *(noun)*

Large black-and-white stork of tropical Africa; its red bill has a black band around the middle.

- *They discussed "ephippiorhynchus senegalensis" during the group presentation.*
- *She wrote a short paragraph that included "ephippiorhynchus senegalensis."*

---

epicanthus *(noun)*

A vertical fold of skin over the nasal canthus; normal for Mongolian peoples; sometimes occurs in Down's syndrome.

- *Understanding "epicanthus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "epicanthus."*

---

epicardia *(noun)*

The short part of the esophagus extending downward from the diaphragm to the stomach.

- *In class, the teacher used "epicardia" to mean the short part of the esophagus extending downward....*
- *Understanding "epicardia" helps you talk about this topic clearly.*

---

epicranium *(noun)*

The muscle and aponeurosis and skin covering the cranium.

- *She wrote a short paragraph that included "epicranium."*
- *They discussed "epicranium" during the group presentation.*

---

epidemic hysertia *(noun)*

A condition in which a large group of people exhibit the same state of violent mental agitation.

- *The article explained what "epidemic hysertia" means with a simple example.*
- *She wrote a short paragraph that included "epidemic hysertia."*

---

epidemic pleurodynia *(noun)*

An acute infectious disease occurring in epidemic form and featuring paroxysms of pain (usually in the chest).

- *Understanding "epidemic pleurodynia" helps you talk about this topic clearly.*
- *In class, the teacher used "epidemic pleurodynia" to mean an acute infectious disease occurring in epidemic....*

---

epigastrium *(noun)*

The region lying on or over the stomach (just below the sternum).

- *In class, the teacher used "epigastrium" to mean the region lying on or over the stomach (just below....*
- *The article explained what "epigastrium" means with a simple example.*

---

epilachna *(noun)*

Genus of ladybugs native to Mexico and Central America; both larvae and adults feed on plants.

- *The article explained what "epilachna" means with a simple example.*
- *Understanding "epilachna" helps you talk about this topic clearly.*

---

epilachna varivestis *(noun)*

Introduced into the United States from Mexico; feeds on the foliage of the bean plant.

- *They discussed "epilachna varivestis" during the group presentation.*
- *She wrote a short paragraph that included "epilachna varivestis."*

---

epilate *(verb)*

Remove body hair.

- *Epilate her legs.*
- *She tried to use "epilate" carefully so everyone would understand.*

---

epinephelus adscensionis *(noun)*

Found around rocky coasts or on reefs.

- *They discussed "epinephelus adscensionis" during the group presentation.*
- *He looked up "epinephelus adscensionis" because he had never seen it before.*

---

epinephrin *(noun)*

A catecholamine secreted by the adrenal medulla in response to stress (trade name Adrenalin); stimulates autonomic nerve action.

- *In class, the teacher used "epinephrin" to mean a catecholamine secreted by the adrenal medulla in....*
- *The article explained what "epinephrin" means with a simple example.*

---

epiphytotic *(adjective)*

(of plants) epidemic among plants of a single kind especially over a wide area.

- *An epiphytotic blight of potatoes.*
- *Epiphytotic conditions associated with a single-plant agriculture.*

---

episcleral veins *(noun)*

Small veins in the sclera near the corneal margin; empty into the anterior ciliary veins.

- *The article explained what "episcleral veins" means with a simple example.*
- *In class, the teacher used "episcleral veins" to mean small veins in the sclera near the corneal margin;....*

---

epispadias *(noun)*

A congenital abnormality in males in which the urethra is on the upper surface of the penis.

- *The article explained what "epispadias" means with a simple example.*
- *In class, the teacher used "epispadias" to mean a congenital abnormality in males in which the....*

---

epithelioma *(noun)*

A malignant tumor of the epithelial tissue.

- *They discussed "epithelioma" during the group presentation.*
- *She wrote a short paragraph that included "epithelioma."*

---

epizoan *(noun)*

Any external parasitic organism (as fleas).

- *Understanding "epizoan" helps you talk about this topic clearly.*
- *The article explained what "epizoan" means with a simple example.*

---

epizoon *(noun)*

Any external parasitic organism (as fleas).

- *He looked up "epizoon" because he had never seen it before.*
- *In class, the teacher used "epizoon" to mean any external parasitic organism (as fleas).*

---

eptatretus *(noun)*

A fossil hagfish of the genus Eptatretus.

- *She wrote a short paragraph that included "eptatretus."*
- *He looked up "eptatretus" because he had never seen it before.*

---

eptesicus serotinus *(noun)*

Common brown bat of Europe.

- *She wrote a short paragraph that included "eptesicus serotinus."*
- *The article explained what "eptesicus serotinus" means with a simple example.*

---

equetus lanceolatus *(noun)*

Black-and-white drumfish with an erect elongated dorsal fin.

- *They discussed "equetus lanceolatus" during the group presentation.*
- *He looked up "equetus lanceolatus" because he had never seen it before.*

---

equetus pulcher *(noun)*

A kind of drumfish.

- *She wrote a short paragraph that included "equetus pulcher."*
- *The article explained what "equetus pulcher" means with a simple example.*

---

equus burchelli *(noun)*

Of the plains of central and eastern Africa.

- *She wrote a short paragraph that included "equus burchelli."*
- *They discussed "equus burchelli" during the group presentation.*

---

equus caballus gomelini *(noun)*

European wild horse extinct since the early 20th century.

- *Understanding "equus caballus gomelini" helps you talk about this topic clearly.*
- *The article explained what "equus caballus gomelini" means with a simple example.*

---

equus caballus przevalskii *(noun)*

Wild horse of central Asia that resembles an ass; now endangered.

- *In class, the teacher used "equus caballus przevalskii" to mean wild horse of central asia that resembles an ass;....*
- *Understanding "equus caballus przevalskii" helps you talk about this topic clearly.*

---

equus caballus przewalskii *(noun)*

Wild horse of central Asia that resembles an ass; now endangered.

- *She wrote a short paragraph that included "equus caballus przewalskii."*
- *Understanding "equus caballus przewalskii" helps you talk about this topic clearly.*

---

equus grevyi *(noun)*

Zebra with less continuous stripes.

- *The article explained what "equus grevyi" means with a simple example.*
- *She wrote a short paragraph that included "equus grevyi."*

---

erethism *(noun)*

An abnormally high degree of irritability or sensitivity to stimulation of an organ or body part.

- *She wrote a short paragraph that included "erethism."*
- *He looked up "erethism" because he had never seen it before.*

---

erethizon *(noun)*

A genus of Erethizontidae.

- *In class, the teacher used "erethizon" to mean a genus of erethizontidae.*
- *The article explained what "erethizon" means with a simple example.*

erethizon dorsatum *(noun)*

Porcupine of northeastern North America with barbed spines concealed in the coarse fur; often gnaws buildings for salt and grease.

- *They discussed "erethizon dorsatum" during the group presentation.*
- *The article explained what "erethizon dorsatum" means with a simple example.*

erethizontidae *(noun)*

New World arboreal porcupines.

- *The article explained what "erethizontidae" means with a simple example.*
- *Understanding "erethizontidae" helps you talk about this topic clearly.*

eretmochelys imbricata *(noun)*

Pugnacious tropical sea turtle with a hawk-like beak; source of food and the best tortoiseshell.

- *He looked up "eretmochelys imbricata" because he had never seen it before.*
- *In class, the teacher used "eretmochelys imbricata" to mean pugnacious tropical sea turtle with a hawk-like....*

erignathus *(noun)*

Bearded seals.

- *Understanding "erignathus" helps you talk about this topic clearly.*
- *They discussed "erignathus" during the group presentation.*

erignathus barbatus *(noun)*

Medium-sized greyish to yellow seal with bristles each side of muzzle; of the Arctic Ocean.

- *He looked up "erignathus barbatus" because he had never seen it before.*
- *They discussed "erignathus barbatus" during the group presentation.*

erinaceidae *(noun)*

True hedgehogs.

- *Understanding "erinaceidae" helps you talk about this topic clearly.*
- *In class, the teacher used "erinaceidae" to mean true hedgehogs.*

erinaceus europeaeus *(noun)*

Small nocturnal Old World mammal covered with both hair and protective spines.

- *She wrote a short paragraph that included "erinaceus europeaeus."*
- *The article explained what "erinaceus europeaeus" means with a simple example.*

eriosoma *(noun)*

Woolly aphids.

- *They discussed "eriosoma" during the group presentation.*
- *In class, the teacher used "eriosoma" to mean woolly aphids.*

eriosoma lanigerum *(noun)*

Primarily a bark feeder on aerial parts and roots of apple and other trees.

- *They discussed "eriosoma lanigerum" during the group presentation.*
- *She wrote a short paragraph that included "eriosoma lanigerum."*

erithacus *(noun)*

Old World thrushes.

- *Understanding "erithacus" helps you talk about this topic clearly.*
- *The article explained what "erithacus" means with a simple example.*

erithacus rubecola *(noun)*

Small Old World songbird with a reddish breast.

- *The article explained what "erithacus rubecola" means with a simple example.*
- *They discussed "erithacus rubecola" during the group presentation.*

erithacus svecicus *(noun)*

Songbird of northern Europe and Asia.

- *The article explained what "erithacus svecicus" means with a simple example.*
- *In class, the teacher used "erithacus svecicus" to mean songbird of northern europe and asia.*

---

erolia *(noun)*

A genus of Scolopacidae.

- *In class, the teacher used "erolia" to mean a genus of scolopacidae.*
- *The article explained what "erolia" means with a simple example.*

---

erolia alpina *(noun)*

Small common sandpiper that breeds in northern or Arctic regions and winters in southern United States or Mediterranean regions.

- *She wrote a short paragraph that included "erolia alpina."*
- *The article explained what "erolia alpina" means with a simple example.*

---

erolia minutilla *(noun)*

Smallest American sandpiper.

- *They discussed "erolia minutilla" during the group presentation.*
- *In class, the teacher used "erolia minutilla" to mean smallest american sandpiper.*

---

eruct *(verb)*

Eject or send out in large quantities, also metaphorical.

- *Can you use "eruct" in a sentence that fits this situation?*
- *In everyday English, people use "eruct" when talking about this idea.*

---

erythema nodosum leprosum *(noun)*

An inflammatory complication of leprosy that results in painful skin lesions on the arms and legs and face.

- *She wrote a short paragraph that included "erythema nodosum leprosum."*
- *The article explained what "erythema nodosum leprosum" means with a simple example.*

---

erythroblast *(noun)*

A nucleated cell in bone marrow from which red blood cells develop.

- *She wrote a short paragraph that included "erythroblast."*
- *He looked up "erythroblast" because he had never seen it before.*

---

erythroblastosis *(noun)*

A blood disease characterized by the abnormal presence of erythroblasts in the blood.

- *The article explained what "erythroblastosis" means with a simple example.*
- *In class, the teacher used "erythroblastosis" to mean a blood disease characterized by the abnormal....*

---

erythroblastosis fetalis *(noun)*

Severe anemia in newborn babies; the result of Rh incompatibility between maternal and fetal blood; typically occurs when the child of an Rh-negative mother inherits Rh-positive blood from the father; can be diagnosed before birth by amniocentesis.

- *They discussed "erythroblastosis fetalis" during the group presentation.*
- *Understanding "erythroblastosis fetalis" helps you talk about this topic clearly.*

---

erythrocebus patas *(noun)*

Reddish long-tailed monkey of west Africa.

- *Understanding "erythrocebus patas" helps you talk about this topic clearly.*
- *In class, the teacher used "erythrocebus patas" to mean reddish long-tailed monkey of west africa.*

---

eschrichtiidae *(noun)*

Comprising only the grey whales.

- *She wrote a short paragraph that included "eschrichtiidae."*
- *He looked up "eschrichtiidae" because he had never seen it before.*

---

eschrichtius *(noun)*

Type and sole genus of the Eschrichtiidae.

- *He looked up "eschrichtius" because he had never seen it before.*

- *Understanding “eschrichtius” helps you talk about this topic clearly.*

---

eschrichtius gibbosus *(noun)*

Medium-sized greyish-black whale of the northern Pacific.

- *He looked up “eschrichtius gibbosus” because he had never seen it before.*
- *She wrote a short paragraph that included “eschrichtius gibbosus.”*

---

eschrichtius robustus *(noun)*

Medium-sized greyish-black whale of the northern Pacific.

- *The article explained what “eschrichtius robustus” means with a simple example.*
- *In class, the teacher used “eschrichtius robustus” to mean medium-sized greyish-black whale of the northern....*

---

esocidae *(noun)*

Pikes; pickerels; muskellunges.

- *She wrote a short paragraph that included “esocidae.”*
- *They discussed “esocidae” during the group presentation.*

---

esophagogastric junction *(noun)*

The junction between the esophagus and the stomach epithelium.

- *She wrote a short paragraph that included “esophagogastric junction.”*
- *They discussed “esophagogastric junction” during the group presentation.*

---

esox masquinongy *(noun)*

Large (60 to 80 pounds) sport fish of North America.

- *He looked up “esox masquinongy” because he had never seen it before.*
- *She wrote a short paragraph that included “esox masquinongy.”*

---

estivate *(verb)*

Sleep during summer.

- *Certain animals estivate.*
- *He did not know how to use “estivate” until he saw an example.*

---

esurience *(noun)*

Excessive desire to eat.

- *The article explained what “esurience” means with a simple example.*
- *Understanding “esurience” helps you talk about this topic clearly.*

---

etherise *(verb)*

Anesthetize with ether.

- *He did not know how to use “etherise” until he saw an example.*
- *She tried to use “etherise” carefully so everyone would understand.*

---

etherize *(verb)*

Anesthetize with ether.

- *Learners should practice how to use “etherize” in real sentences.*
- *In everyday English, people use “etherize” when talking about this idea.*

---

etropus *(noun)*

A genus of Bothidae.

- *In class, the teacher used “etropus” to mean a genus of bothidae.*
- *The article explained what “etropus” means with a simple example.*

---

etropus rimosus *(noun)*

Flounder found from North Carolina to Florida and the eastern Gulf of Mexico.

- *Understanding “etropus rimosus” helps you talk about this topic clearly.*
- *He looked up “etropus rimosus” because he had never seen it before.*

---

euarctos *(noun)*

American black bears; in some classifications not a separate genus from Ursus.

- *In class, the teacher used "euarctos" to mean american black bears; in some classifications not a....*
- *Understanding "euarctos" helps you talk about this topic clearly.*

---

euarctos americanus *(noun)*

Brown to black North American bear; smaller and less ferocious than the brown bear.

- *He looked up "euarctos americanus" because he had never seen it before.*
- *They discussed "euarctos americanus" during the group presentation.*

---

eubacteriales *(noun)*

One of two usually recognized orders of true bacteria; Gram-positive spherical or rod-shaped forms; some are motile; in some classifications considered an order of Schizomycetes.

- *She wrote a short paragraph that included "eubacteriales."*
- *They discussed "eubacteriales" during the group presentation.*

---

eubacterium *(noun)*

A large group of bacteria having rigid cell walls; motile types have flagella.

- *He looked up "eubacterium" because he had never seen it before.*
- *Understanding "eubacterium" helps you talk about this topic clearly.*

---

eucaryote *(noun)*

An organism with cells characteristic of all life forms except primitive microorganisms such as bacteria; i.e. an organism with 'good' or membrane-bound nuclei in its cells.

- *They discussed "eucaryote" during the group presentation.*
- *Understanding "eucaryote" helps you talk about this topic clearly.*

---

eucinostomus *(noun)*

A genus of Gerreidae.

- *In class, the teacher used "eucinostomus" to mean a genus of gerreidae.*
- *The article explained what "eucinostomus" means with a simple example.*

---

eucinostomus gula *(noun)*

Silvery mojarra found along sandy shores of the western Atlantic.

- *She wrote a short paragraph that included "eucinostomus gula."*
- *He looked up "eucinostomus gula" because he had never seen it before.*

---

eudaemonia *(noun)*

A contented state of being happy and healthy and prosperous.

- *He looked up "eudaemonia" because he had never seen it before.*
- *She wrote a short paragraph that included "eudaemonia."*

---

euderma *(noun)*

A genus of Vespertilionidae.

- *She wrote a short paragraph that included "euderma."*
- *They discussed "euderma" during the group presentation.*

---

euderma maculata *(noun)*

A large bat of the southwestern United States having spots and enormous ears.

- *The article explained what "euderma maculata" means with a simple example.*
- *In class, the teacher used "euderma maculata" to mean a large bat of the southwestern united states....*

---

eudromias morinellus *(noun)*

Rare plover of upland areas of Eurasia.

- *They discussed "eudromias morinellus" during the group presentation.*
- *She wrote a short paragraph that included "eudromias morinellus."*

---

eudyptes *(noun)*

Rock hoppers.

- *She wrote a short paragraph that included "eudyptes."*
- *He looked up "eudyptes" because he had never seen it before.*

---

euglenaceae *(noun)*

Considered green algae.

- *She wrote a short paragraph that included "euglenaceae."*
- *He looked up "euglenaceae" because he had never seen it before.*

---

euglenid *(noun)*

Marine and freshwater green or colorless flagellate organism.

- *They discussed "euglenid" during the group presentation.*
- *The article explained what "euglenid" means with a simple example.*

---

euglenoid *(noun)*

Marine and freshwater green or colorless flagellate organism.

- *Understanding "euglenoid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "euglenoid."*

---

euglenophyceae *(noun)*

Coextensive with the division Euglenophyta.

- *He looked up "euglenophyceae" because he had never seen it before.*
- *They discussed "euglenophyceae" during the group presentation.*

---

euglenophyta *(noun)*

Free-swimming flagellate algae.

- *They discussed "euglenophyta" during the group presentation.*
- *He looked up "euglenophyta" because he had never seen it before.*

---

euglenophyte *(noun)*

Marine and freshwater green or colorless flagellate organism.

- *The article explained what "euglenophyte" means with a simple example.*
- *They discussed "euglenophyte" during the group presentation.*

---

eumeces *(noun)*

New World skinks.

- *They discussed "eumeces" during the group presentation.*
- *In class, the teacher used "eumeces" to mean new world skinks.*

---

eumeces callicephalus *(noun)*

Frequents oak and pine habitats in rocky mountainous areas of United States southwest and Mexico.

- *The article explained what "eumeces callicephalus" means with a simple example.*
- *They discussed "eumeces callicephalus" during the group presentation.*

---

eumeces skiltonianus *(noun)*

Found in western North American grasslands and open woodlands.

- *The article explained what "eumeces skiltonianus" means with a simple example.*
- *In class, the teacher used "eumeces skiltonianus" to mean found in western north american grasslands and open....*

---

eumetopias jubatus *(noun)*

Largest sea lion; of the northern Pacific.

- *He looked up "eumetopias jubatus" because he had never seen it before.*
- *In class, the teacher used "eumetopias jubatus" to mean largest sea lion; of the northern pacific.*

---

eumops *(noun)*

Mastiff bats.

- *They discussed "eumops" during the group presentation.*
- *The article explained what "eumops" means with a simple example.*

eunectes murinus *(noun)*

Large arboreal boa of tropical South America.

- *They discussed "eunectes murinus" during the group presentation.*
- *She wrote a short paragraph that included "eunectes murinus."*

eunuchoidism *(noun)*

The state of being a eunuch (either because of lacking testicles or because they failed to develop).

- *The article explained what "eunuchoidism" means with a simple example.*
- *Understanding "eunuchoidism" helps you talk about this topic clearly.*

euopean hoopoe *(noun)*

Pinkish-brown hoopoe with black-and-white wings.

- *The article explained what "euopean hoopoe" means with a simple example.*
- *In class, the teacher used "euopean hoopoe" to mean pinkish-brown hoopoe with black-and-white wings.*

euphagus *(noun)*

A genus of Icteridae.

- *Understanding "euphagus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "euphagus."*

euphagus carilonus *(noun)*

North American blackbird whose bluish-black plumage is rusty-edged in the fall.

- *Understanding "euphagus carilonus" helps you talk about this topic clearly.*
- *He looked up "euphagus carilonus" because he had never seen it before.*

euphausiacea *(noun)*

Small commonly luminescent crustaceans; important element of marine plankton: krill.

- *Understanding "euphausiacea" helps you talk about this topic clearly.*
- *They discussed "euphausiacea" during the group presentation.*

euphractus *(noun)*

A genus of Dasypodidae.

- *In class, the teacher used "euphractus" to mean a genus of dasypodidae.*
- *He looked up "euphractus" because he had never seen it before.*

euphractus sexcinctus *(noun)*

Argentine armadillo with six movable bands and hairy underparts.

- *She wrote a short paragraph that included "euphractus sexcinctus."*
- *Understanding "euphractus sexcinctus" helps you talk about this topic clearly.*

euplectella *(noun)*

A genus of Hyalospongiae.

- *He looked up "euplectella" because he had never seen it before.*
- *She wrote a short paragraph that included "euplectella."*

euproctis *(noun)*

A genus of Lymantriidae.

- *In class, the teacher used "euproctis" to mean a genus of lymantriidae.*
- *Understanding "euproctis" helps you talk about this topic clearly.*

euproctis chrysorrhoea *(noun)*

White furry-bodied European moth with a yellow tail tuft.

- *They discussed "euproctis chrysorrhoea" during the group presentation.*
- *Understanding "euproctis chrysorrhoea" helps you talk about this topic clearly.*

euproctis phaeorrhoea *(noun)*

Small brown and white European moth introduced into eastern United States; pest of various shade and fruit trees.

- *He looked up "euproctis phaeorrhoea" because he had never seen it before.*
- *She wrote a short paragraph that included "euproctis phaeorrhoea."*

---

euronithopod *(noun)*

Widespread group including duck-billed dinosaurs and their early relatives (hadrosaurs, trachodon and iguanodon).

- *He looked up "euronithopod" because he had never seen it before.*
- *In class, the teacher used "euronithopod" to mean widespread group including duck-billed dinosaurs....*

---

euronithopoda *(noun)*

Widespread group including duck-billed dinosaurs and their early relatives (hadrosaurs, trachodon and iguanodon).

- *They discussed "euronithopoda" during the group presentation.*
- *She wrote a short paragraph that included "euronithopoda."*

---

european goatsucker *(noun)*

Old World goatsucker.

- *She wrote a short paragraph that included "european goatsucker."*
- *He looked up "european goatsucker" because he had never seen it before.*

---

euryalida *(noun)*

Basket stars.

- *In class, the teacher used "euryalida" to mean basket stars.*
- *Understanding "euryalida" helps you talk about this topic clearly.*

---

eurylaimidae *(noun)*

Coextensive with the suborder Eurylaimi.

- *The article explained what "eurylaimidae" means with a simple example.*
- *They discussed "eurylaimidae" during the group presentation.*

---

eurypterid *(noun)*

Large extinct scorpion-like arthropod considered related to horseshoe crabs.

- *The article explained what "eurypterid" means with a simple example.*
- *In class, the teacher used "eurypterid" to mean large extinct scorpion-like arthropod considered....*

---

eurypterida *(noun)*

Extinct aquatic arthropods of the Paleozoic.

- *He looked up "eurypterida" because he had never seen it before.*
- *She wrote a short paragraph that included "eurypterida."*

---

eutamias *(noun)*

Chipmunks of western America and Asia.

- *They discussed "eutamias" during the group presentation.*
- *Understanding "eutamias" helps you talk about this topic clearly.*

---

eutheria *(noun)*

All mammals except monotremes and marsupials.

- *The article explained what "eutheria" means with a simple example.*
- *They discussed "eutheria" during the group presentation.*

---

euthynnus *(noun)*

A genus of Scombridae.

- *The article explained what "euthynnus" means with a simple example.*
- *In class, the teacher used "euthynnus" to mean a genus of scombridae.*

---

euthynnus pelamis *(noun)*

Oceanic schooling tuna of considerable value in Pacific but less in Atlantic; reaches 75 pounds; very similar to if not the same as oceanic bonito.

- *Understanding "euthynnus pelamis" helps you talk about this topic clearly.*

- *In class, the teacher used "euthynnus pelamis" to mean oceanic schooling tuna of considerable value in....*

---

eventration *(noun)*

Protrusion of the intestine through the abdominal wall.

- *They discussed "eventration" during the group presentation.*
- *She wrote a short paragraph that included "eventration."*

---

exaeretodon *(noun)*

A genus of reptiles of the division Cynodontia.

- *In class, the teacher used "exaeretodon" to mean a genus of reptiles of the division cynodontia.*
- *He looked up "exaeretodon" because he had never seen it before.*

---

exanthem *(noun)*

Eruption on the skin occurring as a symptom of a disease.

- *In class, the teacher used "exanthem" to mean eruption on the skin occurring as a symptom of a....*
- *They discussed "exanthem" during the group presentation.*

---

exanthema *(noun)*

Eruption on the skin occurring as a symptom of a disease.

- *She wrote a short paragraph that included "exanthema."*
- *He looked up "exanthema" because he had never seen it before.*

---

exanthema subitum *(noun)*

A viral disease of infants and young children; characterized by abrupt high fever and mild sore throat; a few days later there is a faint pinkish rash that lasts for a few hours to a few days.

- *In class, the teacher used "exanthema subitum" to mean a viral disease of infants and young children;....*
- *The article explained what "exanthema subitum" means with a simple example.*

---

exocoetidae *(noun)*

Flying fishes; closely related to the halfbeaks.

- *He looked up "exocoetidae" because he had never seen it before.*
- *In class, the teacher used "exocoetidae" to mean flying fishes; closely related to the halfbeaks.*

---

exocycloida *(noun)*

Flat sea urchins.

- *Understanding "exocycloida" helps you talk about this topic clearly.*
- *They discussed "exocycloida" during the group presentation.*

---

exoderm *(noun)*

The outer germ layer that develops into skin and nervous tissue.

- *In class, the teacher used "exoderm" to mean the outer germ layer that develops into skin and....*
- *The article explained what "exoderm" means with a simple example.*

---

exomphalos *(noun)*

An umbilical hernia at birth in which some abdominal organs push into the umbilical cord.

- *Understanding "exomphalos" helps you talk about this topic clearly.*
- *The article explained what "exomphalos" means with a simple example.*

---

exophthalmic goiter *(noun)*

Exophthalmos occurring in association with goiter; hyperthyroidism with protrusion of the eyeballs.

- *In class, the teacher used "exophthalmic goiter" to mean exophthalmos occurring in association with goiter;....*
- *They discussed "exophthalmic goiter" during the group presentation.*

---

exopterygota *(noun)*

Subclass of insects characterized by gradual and usually incomplete metamorphosis.

- *The article explained what "exopterygota" means with a simple example.*
- *Understanding "exopterygota" helps you talk about this topic clearly.*

---

expectedness *(noun)*

The state of being that is commonly observed.

- *She wrote a short paragraph that included "expectedness."*
- *Understanding "expectedness" helps you talk about this topic clearly.*

exsert *(verb)*

Thrust or extend out.

- *The bee exserted its sting.*
- *Can you use "exsert" in a sentence that fits this situation?*

exteroceptor *(noun)*

Any receptor that responds to stimuli outside the body.

- *Understanding "exteroceptor" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "exteroceptor."*

extrauterine gestation *(noun)*

Pregnancy resulting from gestation elsewhere than in the uterus.

- *Understanding "extrauterine gestation" helps you talk about this topic clearly.*
- *The article explained what "extrauterine gestation" means with a simple example.*

extrauterine pregnancy *(noun)*

Pregnancy resulting from gestation elsewhere than in the uterus.

- *She wrote a short paragraph that included "extrauterine pregnancy."*
- *Understanding "extrauterine pregnancy" helps you talk about this topic clearly.*

exuviate *(verb)*

Cast off hair, skin, horn, or feathers.

- *He did not know how to use "exuviate" until he saw an example.*
- *In everyday English, people use "exuviate" when talking about this idea.*

eyas *(noun)*

An unfledged or nestling hawk.

- *Understanding "eyas" helps you talk about this topic clearly.*
- *He looked up "eyas" because he had never seen it before.*

eyelessness *(noun)*

Blindness due to loss of the eyes.

- *The article explained what "eyelessness" means with a simple example.*
- *Understanding "eyelessness" helps you talk about this topic clearly.*

eyetooth *(noun)*

One of the four pointed conical teeth (two in each jaw) located between the incisors and the premolars.

- *They discussed "eyetooth" during the group presentation.*
- *He looked up "eyetooth" because he had never seen it before.*

eyra *(noun)*

Long-bodied long-tailed tropical American wildcat.

- *She wrote a short paragraph that included "eyra."*
- *He looked up "eyra" because he had never seen it before.*

falco columbarius *(noun)*

Small falcon of Europe and America having dark plumage with black-barred tail; used in falconry.

- *They discussed "falco columbarius" during the group presentation.*
- *She wrote a short paragraph that included "falco columbarius."*

falco rusticolus *(noun)*

Large and rare Arctic falcon having white and dark color phases.

- *He looked up "falco rusticolus" because he had never seen it before.*
- *They discussed "falco rusticolus" during the group presentation.*

---

falco sparverius *(noun)*

Small North American falcon.

- *She wrote a short paragraph that included "falco sparverius."*
- *The article explained what "falco sparverius" means with a simple example.*

---

falco tinnunculus *(noun)*

Small Old World falcon that hovers in the air against a wind.

- *The article explained what "falco tinnunculus" means with a simple example.*
- *Understanding "falco tinnunculus" helps you talk about this topic clearly.*

---

falconidae *(noun)*

A family of birds of the order Falconiformes.

- *He looked up "falconidae" because he had never seen it before.*
- *She wrote a short paragraph that included "falconidae."*

---

falconiformes *(noun)*

Chiefly diurnal carnivorous birds having hooked beaks and long talons with opposable hind toe: falcons; hawks; eagles; ospreys; caracaras; vultures.

- *He looked up "falconiformes" because he had never seen it before.*
- *Understanding "falconiformes" helps you talk about this topic clearly.*

---

fall cankerworm *(noun)*

Green or brown white-striped looper; larva of Alsophila pometaria.

- *He looked up "fall cankerworm" because he had never seen it before.*
- *She wrote a short paragraph that included "fall cankerworm."*

---

fallot's syndrome *(noun)*

A congenital heart defect producing cyanosis; characterized by four symptoms: pulmonary stenosis and ventricular septal defect and malposition of the aorta over both ventricles and hypertrophy of the right ventricle.

- *They discussed "fallot's syndrome" during the group presentation.*
- *She wrote a short paragraph that included "fallot's syndrome."*

---

fallot's tetralogy *(noun)*

A congenital heart defect producing cyanosis; characterized by four symptoms: pulmonary stenosis and ventricular septal defect and malposition of the aorta over both ventricles and hypertrophy of the right ventricle.

- *The article explained what "fallot's tetralogy" means with a simple example.*
- *They discussed "fallot's tetralogy" during the group presentation.*

---

false gavial *(noun)*

Crocodile of southeast Asia similar to but smaller than the gavial.

- *She wrote a short paragraph that included "false gavial."*
- *He looked up "false gavial" because he had never seen it before.*

---

family acanthisittidae *(noun)*

Alternative names for the family comprising the New Zealand wrens.

- *She wrote a short paragraph that included "family acanthisittidae."*
- *The article explained what "family acanthisittidae" means with a simple example.*

---

family acanthuridae *(noun)*

Surgeonfishes.

- *They discussed "family acanthuridae" during the group presentation.*
- *He looked up "family acanthuridae" because he had never seen it before.*

---

family accipitridae *(noun)*

Hawks; Old World vultures; kites; harriers; eagles.

- *He looked up "family accipitridae" because he had never seen it before.*

- *Understanding "family accipitridae" helps you talk about this topic clearly.*

family actinomycetaceae *(noun)*

Filamentous anaerobic bacteria.

- *She wrote a short paragraph that included "family actinomycetaceae."*
- *He looked up "family actinomycetaceae" because he had never seen it before.*

family aegypiidae *(noun)*

In some classifications considered the family comprising the Old World vultures which are more often included in the family Accipitridae.

- *In class, the teacher used "family aegypiidae" to mean in some classifications considered the family....*
- *The article explained what "family aegypiidae" means with a simple example.*

family aepyornidae *(noun)*

Coextensive with the order Aepyorniformes.

- *She wrote a short paragraph that included "family aepyornidae."*
- *He looked up "family aepyornidae" because he had never seen it before.*

family agamidae *(noun)*

An Old World reptile family of Sauria.

- *She wrote a short paragraph that included "family agamidae."*
- *He looked up "family agamidae" because he had never seen it before.*

family ailuropodidae *(noun)*

In some classifications considered the family comprising the giant pandas.

- *In class, the teacher used "family ailuropodidae" to mean in some classifications considered the family....*
- *He looked up "family ailuropodidae" because he had never seen it before.*

family akeridae *(noun)*

Bubble shells.

- *Understanding "family akeridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family akeridae."*

family alcedinidae *(noun)*

Kingfishers.

- *The article explained what "family alcedinidae" means with a simple example.*
- *She wrote a short paragraph that included "family alcedinidae."*

family alcidae *(noun)*

Web-footed diving seabirds of northern seas: auks; puffins; guillemots; murres; etc.

- *She wrote a short paragraph that included "family alcidae."*
- *Understanding "family alcidae" helps you talk about this topic clearly.*

family alligatoridae *(noun)*

Alligators; caimans.

- *Understanding "family alligatoridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family alligatoridae."*

family alopiidae *(noun)*

Thresher sharks.

- *Understanding "family alopiidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family alopiidae" to mean thresher sharks.*

family ambystomatidae *(noun)*

New World salamanders.

- *In class, the teacher used "family ambystomatidae" to mean new world salamanders.*
- *The article explained what "family ambystomatidae" means with a simple example.*

family ameiuridae *(noun)*

North American catfishes.

- *He looked up "family ameiuridae" because he had never seen it before.*
- *She wrote a short paragraph that included "family ameiuridae."*

family amiidae *(noun)*

Only the bowfins.

- *Understanding "family amiidae" helps you talk about this topic clearly.*
- *The article explained what "family amiidae" means with a simple example.*

family ammodytidae *(noun)*

Sand lances.

- *He looked up "family ammodytidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family ammodytidae."*

family amphisbaenidae *(noun)*

Worm lizards.

- *She wrote a short paragraph that included "family amphisbaenidae."*
- *He looked up "family amphisbaenidae" because he had never seen it before.*

family amphiumidae *(noun)*

Congo snakes.

- *In class, the teacher used "family amphiumidae" to mean congo snakes.*
- *Understanding "family amphiumidae" helps you talk about this topic clearly.*

family anabantidae *(noun)*

Small freshwater spiny-finned fishes of Africa and southern Asia.

- *Understanding "family anabantidae" helps you talk about this topic clearly.*
- *They discussed "family anabantidae" during the group presentation.*

family ancylidae *(noun)*

Freshwater gastropod.

- *He looked up "family ancylidae" because he had never seen it before.*
- *In class, the teacher used "family ancylidae" to mean freshwater gastropod.*

family andrenidae *(noun)*

A large family of solitary short-tongued bees most of which burrow in the ground.

- *They discussed "family andrenidae" during the group presentation.*
- *She wrote a short paragraph that included "family andrenidae."*

family anguidae *(noun)*

Alligator lizards.

- *He looked up "family anguidae" because he had never seen it before.*
- *Understanding "family anguidae" helps you talk about this topic clearly.*

family anguillidae *(noun)*

Eels that live in fresh water as adults but return to the sea to spawn.

- *She wrote a short paragraph that included "family anguillidae."*
- *He looked up "family anguillidae" because he had never seen it before.*

family anniellidae *(noun)*

Legless lizards.

- *He looked up "family anniellidae" because he had never seen it before.*
- *They discussed "family anniellidae" during the group presentation.*

family anobiidae *(noun)*

Deathwatch beetles.

- *Understanding "family anobiidae" helps you talk about this topic clearly.*
- *The article explained what "family anobiidae" means with a simple example.*

---

family anomalopidae *(noun)*

A family of fish including: flashlight fishes.

- *In class, the teacher used "family anomalopidae" to mean a family of fish including: flashlight fishes.*
- *He looked up "family anomalopidae" because he had never seen it before.*

---

family anomiidae *(noun)*

Saddle oysters.

- *She wrote a short paragraph that included "family anomiidae."*
- *They discussed "family anomiidae" during the group presentation.*

---

family antedonidae *(noun)*

Feather stars.

- *He looked up "family antedonidae" because he had never seen it before.*
- *In class, the teacher used "family antedonidae" to mean feather stars.*

---

family antennariidae *(noun)*

Frogfishes; tropical spiny-finned marine fishes having large nearly vertical mouths; related to toadfishes and anglers.

- *The article explained what "family antennariidae" means with a simple example.*
- *She wrote a short paragraph that included "family antennariidae."*

---

family antilocapridae *(noun)*

Comprising only the pronghorns.

- *He looked up "family antilocapridae" because he had never seen it before.*
- *They discussed "family antilocapridae" during the group presentation.*

---

family aplodontiidae *(noun)*

Mountain beavers.

- *She wrote a short paragraph that included "family aplodontiidae."*
- *The article explained what "family aplodontiidae" means with a simple example.*

---

family apodidae *(noun)*

Swifts; in former classifications included in the order Coraciiformes.

- *The article explained what "family apodidae" means with a simple example.*
- *She wrote a short paragraph that included "family apodidae."*

---

family apogonidae *(noun)*

Bright-colored marine fishes that incubate eggs in the mouth.

- *They discussed "family apogonidae" during the group presentation.*
- *He looked up "family apogonidae" because he had never seen it before.*

---

family apterygidae *(noun)*

Coextensive with the order Apterygiformes.

- *They discussed "family apterygidae" during the group presentation.*
- *He looked up "family apterygidae" because he had never seen it before.*

---

family arcellidae *(noun)*

Soil and freshwater protozoa; cosmopolitan in distribution.

- *In class, the teacher used "family arcellidae" to mean soil and freshwater protozoa; cosmopolitan in....*
- *The article explained what "family arcellidae" means with a simple example.*

---

family arctiidae *(noun)*

Tiger moths.

- *In class, the teacher used "family arctiidae" to mean tiger moths.*
- *They discussed "family arctiidae" during the group presentation.*

family ardeidae *(noun)*

Herons; egrets; night herons; bitterns.

- *She wrote a short paragraph that included "family ardeidae."*
- *They discussed "family ardeidae" during the group presentation.*

family argentinidae *(noun)*

Small marine soft-finned fishes with long silvery bodies; related to salmons and trouts.

- *She wrote a short paragraph that included "family argentinidae."*
- *He looked up "family argentinidae" because he had never seen it before.*

family argiopidae *(noun)*

Spiders that spin orb webs; cosmopolitan in distribution.

- *The article explained what "family argiopidae" means with a simple example.*
- *In class, the teacher used "family argiopidae" to mean spiders that spin orb webs; cosmopolitan in....*

family argonautidae *(noun)*

Represented solely by the genus Argonauta.

- *He looked up "family argonautidae" because he had never seen it before.*
- *In class, the teacher used "family argonautidae" to mean represented solely by the genus argonauta.*

family ariidae *(noun)*

Sea catfishes.

- *She wrote a short paragraph that included "family ariidae."*
- *He looked up "family ariidae" because he had never seen it before.*

family artamidae *(noun)*

Wood swallows.

- *Understanding "family artamidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family artamidae" to mean wood swallows.*

family ascaphidae *(noun)*

Family of one species of frog: tailed frog.

- *The article explained what "family ascaphidae" means with a simple example.*
- *In class, the teacher used "family ascaphidae" to mean family of one species of frog: tailed frog.*

family ascaridae *(noun)*

Large roundworms parasitic in intestines of vertebrates.

- *The article explained what "family ascaridae" means with a simple example.*
- *In class, the teacher used "family ascaridae" to mean large roundworms parasitic in intestines of vertebrates.*

family asilidae *(noun)*

Robber flies.

- *Understanding "family asilidae" helps you talk about this topic clearly.*
- *They discussed "family asilidae" during the group presentation.*

family atherinidae *(noun)*

Small spiny-finned fishes of both salt and fresh water.

- *In class, the teacher used "family atherinidae" to mean small spiny-finned fishes of both salt and fresh water.*
- *The article explained what "family atherinidae" means with a simple example.*

family athiorhodaceae *(noun)*

Small motile sulphur bacteria.

- *She wrote a short paragraph that included "family athiorhodaceae."*
- *Understanding "family athiorhodaceae" helps you talk about this topic clearly.*

family aulostomidae *(noun)*

Trumpetfishes.

- *They discussed "family aulostomidae" during the group presentation.*
- *He looked up "family aulostomidae" because he had never seen it before.*

---

family babesiidae *(noun)*

Piroplasms and cattle pathogens.

- *They discussed "family babesiidae" during the group presentation.*
- *He looked up "family babesiidae" because he had never seen it before.*

---

family bacillaceae *(noun)*

Typically rod-shaped usually Gram-positive bacteria that produce endospores.

- *Understanding "family bacillaceae" helps you talk about this topic clearly.*
- *He looked up "family bacillaceae" because he had never seen it before.*

---

family bacteroidaceae *(noun)*

Family of bacteria living usually in the alimentary canal or on mucous surfaces of warm-blooded animals; sometimes associated with acute infective processes.

- *He looked up "family bacteroidaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family bacteroidaceae."*

---

family balaenidae *(noun)*

Right whales.

- *Understanding "family balaenidae" helps you talk about this topic clearly.*
- *The article explained what "family balaenidae" means with a simple example.*

---

family balaenopteridae *(noun)*

Rorquals; blue whales.

- *He looked up "family balaenopteridae" because he had never seen it before.*
- *In class, the teacher used "family balaenopteridae" to mean rorquals; blue whales.*

---

family balanidae *(noun)*

Stalkless barnacles.

- *The article explained what "family balanidae" means with a simple example.*
- *She wrote a short paragraph that included "family balanidae."*

---

family balistidae *(noun)*

Triggerfishes.

- *In class, the teacher used "family balistidae" to mean triggerfishes.*
- *The article explained what "family balistidae" means with a simple example.*

---

family bangiaceae *(noun)*

A family of protoctist.

- *Understanding "family bangiaceae" helps you talk about this topic clearly.*
- *They discussed "family bangiaceae" during the group presentation.*

---

family bathyergidae *(noun)*

Mole rats; sand rats.

- *They discussed "family bathyergidae" during the group presentation.*
- *He looked up "family bathyergidae" because he had never seen it before.*

---

family batrachoididae *(noun)*

Toadfishes; related to anglers and batfishes.

- *In class, the teacher used "family batrachoididae" to mean toadfishes; related to anglers and batfishes.*
- *They discussed "family batrachoididae" during the group presentation.*

---

family belemnitidae *(noun)*

Family of extinct Mesozoic cephalopods.

- *They discussed "family belemnitidae" during the group presentation.*

- *The article explained what “family belemnitidae” means with a simple example.*

family belonidae *(noun)*

Ferocious fishes of warm regions resembling but unrelated to the freshwater gars.

- *The article explained what “family belonidae” means with a simple example.*
- *They discussed “family belonidae” during the group presentation.*

family bittacidae *(noun)*

A family of predacious tropical insects of the order Mecoptera.

- *He looked up “family bittacidae” because he had never seen it before.*
- *She wrote a short paragraph that included “family bittacidae.”*

family blattidae *(noun)*

Domestic cockroaches.

- *He looked up “family blattidae” because he had never seen it before.*
- *In class, the teacher used “family blattidae” to mean domestic cockroaches.*

family blenniidae *(noun)*

A family of fish including: combtooth blennies.

- *They discussed “family blenniidae” during the group presentation.*
- *She wrote a short paragraph that included “family blenniidae.”*

family boidae *(noun)*

Boas and pythons.

- *Understanding “family boidae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “family boidae.”*

family bombycidae *(noun)*

Chinese silkworm moth.

- *The article explained what “family bombycidae” means with a simple example.*
- *Understanding “family bombycidae” helps you talk about this topic clearly.*

family bombycillidae *(noun)*

A family of birds of the suborder Oscines.

- *In class, the teacher used “family bombycillidae” to mean a family of birds of the suborder oscines.*
- *The article explained what “family bombycillidae” means with a simple example.*

family bothidae *(noun)*

A family of fish of the order Heterosomata.

- *In class, the teacher used “family bothidae” to mean a family of fish of the order heterosomata.*
- *The article explained what “family bothidae” means with a simple example.*

family bradypodidae *(noun)*

A family of edentates comprising the true sloths.

- *He looked up “family bradypodidae” because he had never seen it before.*
- *She wrote a short paragraph that included “family bradypodidae.”*

family bramidae *(noun)*

Deep-bodied percoid fishes of the open seas.

- *She wrote a short paragraph that included “family bramidae.”*
- *He looked up “family bramidae” because he had never seen it before.*

family branchiobdellidae *(noun)*

Small annelid worms with the posterior end modified into an adhesive sucker; especially formerly regarded as modified leeches.

- *In class, the teacher used “family branchiobdellidae” to mean small annelid worms with the posterior end modified....*
- *Understanding “family branchiobdellidae” helps you talk about this topic clearly.*

family branchiostegidae *(noun)*

Small family of marine fishes having covered gills.

- *He looked up "family branchiostegidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family branchiostegidae."*

family brevicipitidae *(noun)*

Narrow-mouthed toads and sheep frogs; some burrow and some are arboreal; found worldwide.

- *Understanding "family brevicipitidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family brevicipitidae" to mean narrow-mouthed toads and sheep frogs; some burrow....*

family brotulidae *(noun)*

Chiefly deep-sea fishes related to the Ophidiidae.

- *She wrote a short paragraph that included "family brotulidae."*
- *Understanding "family brotulidae" helps you talk about this topic clearly.*

family bruchidae *(noun)*

Seed beetles.

- *She wrote a short paragraph that included "family bruchidae."*
- *They discussed "family bruchidae" during the group presentation.*

family burhinidae *(noun)*

Large wading birds resembling the plovers: stone curlews.

- *The article explained what "family burhinidae" means with a simple example.*
- *They discussed "family burhinidae" during the group presentation.*

family caeciliadae *(noun)*

Coextensive with the order Gymnophiona: legless amphibians.

- *She wrote a short paragraph that included "family caeciliadae."*
- *He looked up "family caeciliadae" because he had never seen it before.*

family caeciliidae *(noun)*

Coextensive with the order Gymnophiona: legless amphibians.

- *The article explained what "family caeciliidae" means with a simple example.*
- *In class, the teacher used "family caeciliidae" to mean coextensive with the order gymnophiona: legless....*

family caenolestidae *(noun)*

Small marsupials of southern South America.

- *She wrote a short paragraph that included "family caenolestidae."*
- *He looked up "family caenolestidae" because he had never seen it before.*

family camelidae *(noun)*

Camels and llamas and vicunas.

- *She wrote a short paragraph that included "family camelidae."*
- *Understanding "family camelidae" helps you talk about this topic clearly.*

family cancridae *(noun)*

Many of the best known edible crabs.

- *In class, the teacher used "family cancridae" to mean many of the best known edible crabs.*
- *The article explained what "family cancridae" means with a simple example.*

family caprimulgidae *(noun)*

Goatsuckers.

- *She wrote a short paragraph that included "family caprimulgidae."*
- *Understanding "family caprimulgidae" helps you talk about this topic clearly.*

family carangidae *(noun)*

Large family of narrow-bodied marine food fishes with widely forked tails; chiefly of warm seas.

- *They discussed "family carangidae" during the group presentation.*
- *Understanding "family carangidae" helps you talk about this topic clearly.*

---

family carapidae *(noun)*

Pearlfishes: related to the Brotulidae.

- *In class, the teacher used "family carapidae" to mean pearlfishes: related to the brotulidae.*
- *The article explained what "family carapidae" means with a simple example.*

---

family carcharhinidae *(noun)*

Largest family of living sharks; found worldwide especially in tropical waters; dorsal fin lacks spines: requiem sharks including tiger sharks and soupfin sharks.

- *Understanding "family carcharhinidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family carcharhinidae" to mean largest family of living sharks; found worldwide....*

---

family carchariidae *(noun)*

Sand sharks; in some classifications coextensive with family Carcharhinidae.

- *He looked up "family carchariidae" because he had never seen it before.*
- *They discussed "family carchariidae" during the group presentation.*

---

family cardiidae *(noun)*

Somewhat heart-shaped sand-burrowing bivalve mollusks.

- *Understanding "family cardiidae" helps you talk about this topic clearly.*
- *They discussed "family cardiidae" during the group presentation.*

---

family cariamidae *(noun)*

Crane-like South American wading birds.

- *In class, the teacher used "family cariamidae" to mean crane-like south american wading birds.*
- *They discussed "family cariamidae" during the group presentation.*

---

family casuaridae *(noun)*

A family of large ostrich-like birds including cassowaries.

- *In class, the teacher used "family casuaridae" to mean a family of large ostrich-like birds including....*
- *The article explained what "family casuaridae" means with a simple example.*

---

family cathartidae *(noun)*

Condors; turkey buzzards; king vultures.

- *Understanding "family cathartidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family cathartidae" to mean condors; turkey buzzards; king vultures.*

---

family catostomidae *(noun)*

Suckers; closely related to the family Cyprinidae.

- *She wrote a short paragraph that included "family catostomidae."*
- *Understanding "family catostomidae" helps you talk about this topic clearly.*

---

family caviidae *(noun)*

A family of Hystricomorpha.

- *Understanding "family caviidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family caviidae."*

---

family cebidae *(noun)*

All the New World monkeys except marmosets and tamarins.

- *She wrote a short paragraph that included "family cebidae."*
- *He looked up "family cebidae" because he had never seen it before.*

---

family cecidomyidae *(noun)*

Gall midges.

- *Understanding "family cecidomyidae" helps you talk about this topic clearly.*
- *They discussed "family cecidomyidae" during the group presentation.*

family centrarchidae *(noun)*

Sunfish family.

- *The article explained what "family centrarchidae" means with a simple example.*
- *In class, the teacher used "family centrarchidae" to mean sunfish family.*

family centriscidae *(noun)*

Shrimpfishes.

- *He looked up "family centriscidae" because he had never seen it before.*
- *They discussed "family centriscidae" during the group presentation.*

family centropomidae *(noun)*

A family of fish or the order Perciformes including robalos.

- *Understanding "family centropomidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family centropomidae" to mean a family of fish or the order perciformes including....*

family cephalobidae *(noun)*

A family of Nematoda.

- *They discussed "family cephalobidae" during the group presentation.*
- *Understanding "family cephalobidae" helps you talk about this topic clearly.*

family ceratodontidae *(noun)*

Lungfishes having hornlike ridges on the teeth.

- *He looked up "family ceratodontidae" because he had never seen it before.*
- *In class, the teacher used "family ceratodontidae" to mean lungfishes having hornlike ridges on the teeth.*

family ceratopsidae *(noun)*

American ceratopsian dinosaurs.

- *He looked up "family ceratopsidae" because he had never seen it before.*
- *In class, the teacher used "family ceratopsidae" to mean american ceratopsian dinosaurs.*

family cercopidae *(noun)*

Froghoppers or spittlebugs.

- *The article explained what "family cercopidae" means with a simple example.*
- *Understanding "family cercopidae" helps you talk about this topic clearly.*

family cercopithecidae *(noun)*

Old World monkeys: guenon; baboon; colobus monkey; langur; macaque; mandrill; mangabey; patas; proboscis monkey.

- *In class, the teacher used "family cercopithecidae" to mean old world monkeys: guenon; baboon; colobus monkey;....*
- *They discussed "family cercopithecidae" during the group presentation.*

family cestidae *(noun)*

Coextensive with the order Cestida; ctenophores having a greatly flattened and elongated body.

- *Understanding "family cestidae" helps you talk about this topic clearly.*
- *The article explained what "family cestidae" means with a simple example.*

family cetorhinidae *(noun)*

In some older classifications considered the family of the basking sharks.

- *They discussed "family cetorhinidae" during the group presentation.*
- *Understanding "family cetorhinidae" helps you talk about this topic clearly.*

family chaetodontidae *(noun)*

Butterfly fishes.

- *In class, the teacher used "family chaetodontidae" to mean butterfly fishes.*
- *He looked up "family chaetodontidae" because he had never seen it before.*

family chalcidae *(noun)*

An arthropod family including: chalcidflies.

- *In class, the teacher used "family chalcidae" to mean an arthropod family including: chalcidflies.*
- *The article explained what "family chalcidae" means with a simple example.*

---

family chalcididae *(noun)*

An arthropod family including: chalcidflies.

- *She wrote a short paragraph that included "family chalcididae."*
- *They discussed "family chalcididae" during the group presentation.*

---

family chamaeleonidae *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *Understanding "family chamaeleonidae" helps you talk about this topic clearly.*
- *He looked up "family chamaeleonidae" because he had never seen it before.*

---

family chamaeleontidae *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *He looked up "family chamaeleontidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family chamaeleontidae."*

---

family characeae *(noun)*

Green algae superficially resembling horsetail ferns: stoneworts.

- *They discussed "family characeae" during the group presentation.*
- *In class, the teacher used "family characeae" to mean green algae superficially resembling horsetail....*

---

family characidae *(noun)*

Tropical freshwater fishes of Africa and South America and Central America.

- *She wrote a short paragraph that included "family characidae."*
- *The article explained what "family characidae" means with a simple example.*

---

family characinidae *(noun)*

Former name of the Characidae.

- *In class, the teacher used "family characinidae" to mean former name of the characidae.*
- *He looked up "family characinidae" because he had never seen it before.*

---

family charadriidae *(noun)*

Plover family.

- *They discussed "family charadriidae" during the group presentation.*
- *Understanding "family charadriidae" helps you talk about this topic clearly.*

---

family chelonidae *(noun)*

Green turtles; hawksbills.

- *In class, the teacher used "family chelonidae" to mean green turtles; hawksbills.*
- *Understanding "family chelonidae" helps you talk about this topic clearly.*

---

family cheloniidae *(noun)*

Green turtles; hawksbills.

- *The article explained what "family cheloniidae" means with a simple example.*
- *They discussed "family cheloniidae" during the group presentation.*

---

family chelydridae *(noun)*

Snapping turtles.

- *In class, the teacher used "family chelydridae" to mean snapping turtles.*
- *The article explained what "family chelydridae" means with a simple example.*

---

family chermidae *(noun)*

Jumping plant lice.

- *Understanding "family chermidae" helps you talk about this topic clearly.*

- *He looked up “family chermidae” because he had never seen it before.*

family chimaeridae *(noun)*

A family of Holocephali.

- *In class, the teacher used “family chimaeridae” to mean a family of holocephali.*
- *The article explained what “family chimaeridae” means with a simple example.*

family chinchillidae *(noun)*

Small bushy-tailed South American burrowing rodents.

- *The article explained what “family chinchillidae” means with a simple example.*
- *In class, the teacher used “family chinchillidae” to mean small bushy-tailed south american burrowing rodents.*

family chlamydiaceae *(noun)*

Gram-negative parasites in warm-blooded vertebrates.

- *Understanding “family chlamydiaceae” helps you talk about this topic clearly.*
- *They discussed “family chlamydiaceae” during the group presentation.*

family chlamydomonadaceae *(noun)*

Green algae some of which are colored red by hematochrome.

- *She wrote a short paragraph that included “family chlamydomonadaceae.”*
- *He looked up “family chlamydomonadaceae” because he had never seen it before.*

family chlorophthalmidae *(noun)*

Small family of soft-finned bottom-dwellers with large eyes; relatives of lizardfishes.

- *Understanding “family chlorophthalmidae” helps you talk about this topic clearly.*
- *He looked up “family chlorophthalmidae” because he had never seen it before.*

family chrysochloridae *(noun)*

Golden moles.

- *The article explained what “family chrysochloridae” means with a simple example.*
- *She wrote a short paragraph that included “family chrysochloridae.”*

family chrysopidae *(noun)*

Green lacewings.

- *They discussed “family chrysopidae” during the group presentation.*
- *In class, the teacher used “family chrysopidae” to mean green lacewings.*

family cicindelidae *(noun)*

Tiger beetles.

- *Understanding “family cicindelidae” helps you talk about this topic clearly.*
- *He looked up “family cicindelidae” because he had never seen it before.*

family cimicidae *(noun)*

Wingless flat-bodied bloodsucking insects.

- *He looked up “family cimicidae” because he had never seen it before.*
- *Understanding “family cimicidae” helps you talk about this topic clearly.*

family cinclidae *(noun)*

Water ouzels.

- *Understanding “family cinclidae” helps you talk about this topic clearly.*
- *The article explained what “family cinclidae” means with a simple example.*

family cleridae *(noun)*

Beetles that prey on other insects.

- *They discussed “family cleridae” during the group presentation.*
- *She wrote a short paragraph that included “family cleridae.”*

family clinidae *(noun)*

Viviparous blennies of temperate and tropical seas.

- *They discussed "family clinidae" during the group presentation.*
- *She wrote a short paragraph that included "family clinidae."*

family clupeidae *(noun)*

Herrings; shad; sardines; etc.

- *In class, the teacher used "family clupeidae" to mean herrings; shad; sardines; etc.*
- *The article explained what "family clupeidae" means with a simple example.*

family coccidae *(noun)*

Scale insects.

- *The article explained what "family coccidae" means with a simple example.*
- *They discussed "family coccidae" during the group presentation.*

family coerebidae *(noun)*

The honeycreepers.

- *The article explained what "family coerebidae" means with a simple example.*
- *In class, the teacher used "family coerebidae" to mean the honeycreepers.*

family colubridae *(noun)*

Nonvenomous snakes; about two-thirds of all living species.

- *Understanding "family colubridae" helps you talk about this topic clearly.*
- *He looked up "family colubridae" because he had never seen it before.*

family columbidae *(noun)*

Doves and pigeons.

- *The article explained what "family columbidae" means with a simple example.*
- *In class, the teacher used "family columbidae" to mean doves and pigeons.*

family comatulidae *(noun)*

Former usage synonymous with Antedonidae.

- *He looked up "family comatulidae" because he had never seen it before.*
- *Understanding "family comatulidae" helps you talk about this topic clearly.*

family congridae *(noun)*

Marine eels.

- *In class, the teacher used "family congridae" to mean marine eels.*
- *The article explained what "family congridae" means with a simple example.*

family cordylidae *(noun)*

Small family of spiny ovoviviparous African lizards.

- *Understanding "family cordylidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family cordylidae" to mean small family of spiny ovoviviparous african lizards.*

family coregonidae *(noun)*

Soft-finned fishes comprising the freshwater whitefishes; formerly included in the family Salmonidae.

- *Understanding "family coregonidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family coregonidae."*

family coreidae *(noun)*

Squash bugs and leaf-footed bugs.

- *Understanding "family coreidae" helps you talk about this topic clearly.*
- *They discussed "family coreidae" during the group presentation.*

family corynebacteriaceae *(noun)*

A large family of mostly Gram-positive and aerobic and nonmotile rod-shaped bacteria of the order Eubacteriales.

- *They discussed "family corynebacteriaceae" during the group presentation.*
- *The article explained what "family corynebacteriaceae" means with a simple example.*

---

family coryphaenidae *(noun)*

Large active pelagic percoid fish.

- *In class, the teacher used "family coryphaenidae" to mean large active pelagic percoid fish.*
- *The article explained what "family coryphaenidae" means with a simple example.*

---

family cotingidae *(noun)*

Cotingas; umbrella birds.

- *They discussed "family cotingidae" during the group presentation.*
- *He looked up "family cotingidae" because he had never seen it before.*

---

family cracidae *(noun)*

Curassows; guans; chachalacas.

- *He looked up "family cracidae" because he had never seen it before.*
- *They discussed "family cracidae" during the group presentation.*

---

family cracticidae *(noun)*

Australian birds formerly included in the family Laniidae.

- *In class, the teacher used "family cracticidae" to mean australian birds formerly included in the family....*
- *The article explained what "family cracticidae" means with a simple example.*

---

family cricetidae *(noun)*

Mostly small New World rodents including New World mice and lemmings and voles and hamsters.

- *She wrote a short paragraph that included "family cricetidae."*
- *Understanding "family cricetidae" helps you talk about this topic clearly.*

---

family crocodylidae *(noun)*

True crocodiles.

- *Understanding "family crocodylidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family crocodylidae" to mean true crocodiles.*

---

family crotalidae *(noun)*

New World vipers: pit vipers.

- *In class, the teacher used "family crotalidae" to mean new world vipers: pit vipers.*
- *He looked up "family crotalidae" because he had never seen it before.*

---

family cryptobranchidae *(noun)*

Large aquatic salamanders: hellbenders; giant salamanders.

- *Understanding "family cryptobranchidae" helps you talk about this topic clearly.*
- *They discussed "family cryptobranchidae" during the group presentation.*

---

family cryptocercidae *(noun)*

A family of Blattodea.

- *The article explained what "family cryptocercidae" means with a simple example.*
- *Understanding "family cryptocercidae" helps you talk about this topic clearly.*

---

family ctenizidae *(noun)*

Large burrowing spiders.

- *Understanding "family ctenizidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family ctenizidae" to mean large burrowing spiders.*

---

family cuculidae *(noun)*

Includes cuckoo; ani; roadrunner.

- *The article explained what "family cuculidae" means with a simple example.*
- *She wrote a short paragraph that included "family cuculidae."*

family cuterebridae *(noun)*

New World botflies.

- *They discussed "family cuterebridae" during the group presentation.*
- *Understanding "family cuterebridae" helps you talk about this topic clearly.*

family cynipidae *(noun)*

A family of Hymenoptera.

- *He looked up "family cynipidae" because he had never seen it before.*
- *Understanding "family cynipidae" helps you talk about this topic clearly.*

family cynocephalidae *(noun)*

A family of Dermoptera.

- *The article explained what "family cynocephalidae" means with a simple example.*
- *In class, the teacher used "family cynocephalidae" to mean a family of dermoptera.*

family cynoglossidae *(noun)*

Tonguefishes.

- *In class, the teacher used "family cynoglossidae" to mean tonguefishes.*
- *Understanding "family cynoglossidae" helps you talk about this topic clearly.*

family cypraeidae *(noun)*

Family of marine gastropods comprising the cowries.

- *They discussed "family cypraeidae" during the group presentation.*
- *He looked up "family cypraeidae" because he had never seen it before.*

family cyprinodontidae *(noun)*

Large family of small soft-finned fishes; killifishes; flagfishes; swordtails; guppies.

- *In class, the teacher used "family cyprinodontidae" to mean large family of small soft-finned fishes;....*
- *The article explained what "family cyprinodontidae" means with a simple example.*

family dacninae *(noun)*

The honeycreepers.

- *They discussed "family dacninae" during the group presentation.*
- *In class, the teacher used "family dacninae" to mean the honeycreepers.*

family dactylopiidae *(noun)*

Cochineal insects.

- *In class, the teacher used "family dactylopiidae" to mean cochineal insects.*
- *The article explained what "family dactylopiidae" means with a simple example.*

family dactylopteridae *(noun)*

Flying gurnards.

- *He looked up "family dactylopteridae" because he had never seen it before.*
- *In class, the teacher used "family dactylopteridae" to mean flying gurnards.*

family dactyloscopidae *(noun)*

Sand stargazers.

- *He looked up "family dactyloscopidae" because he had never seen it before.*
- *They discussed "family dactyloscopidae" during the group presentation.*

family danaidae *(noun)*

Small family of usually tropical butterflies: monarch butterflies.

- *They discussed "family danaidae" during the group presentation.*
- *He looked up "family danaidae" because he had never seen it before.*

family dasyproctidae *(noun)*

Agoutis and pacas.

- *He looked up "family dasyproctidae" because he had never seen it before.*
- *In class, the teacher used "family dasyproctidae" to mean agoutis and pacas.*

---

family dasyuridae *(noun)*

Dasyures; native cats; pouched mice; banded anteaters; Tasmanian devils.

- *She wrote a short paragraph that included "family dasyuridae."*
- *Understanding "family dasyuridae" helps you talk about this topic clearly.*

---

family dasyurinae *(noun)*

Dasyures; native cats; pouched mice; banded anteaters; Tasmanian devils.

- *They discussed "family dasyurinae" during the group presentation.*
- *He looked up "family dasyurinae" because he had never seen it before.*

---

family daubentoniidae *(noun)*

Comprising solely the aye-aye.

- *In class, the teacher used "family daubentoniidae" to mean comprising solely the aye-aye.*
- *He looked up "family daubentoniidae" because he had never seen it before.*

---

family dendrocolaptidae *(noun)*

Woodhewers or woodcreepers.

- *He looked up "family dendrocolaptidae" because he had never seen it before.*
- *They discussed "family dendrocolaptidae" during the group presentation.*

---

family dermestidae *(noun)*

Carpet beetles.

- *The article explained what "family dermestidae" means with a simple example.*
- *Understanding "family dermestidae" helps you talk about this topic clearly.*

---

family dermochelyidae *(noun)*

Sea turtles.

- *The article explained what "family dermochelyidae" means with a simple example.*
- *They discussed "family dermochelyidae" during the group presentation.*

---

family desmidiaceae *(noun)*

Unicellular algae.

- *Understanding "family desmidiaceae" helps you talk about this topic clearly.*
- *He looked up "family desmidiaceae" because he had never seen it before.*

---

family desmodontidae *(noun)*

True vampire bats.

- *He looked up "family desmodontidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family desmodontidae."*

---

family diaspididae *(noun)*

Armored scales.

- *They discussed "family diaspididae" during the group presentation.*
- *He looked up "family diaspididae" because he had never seen it before.*

---

family dicamptodontidae *(noun)*

Large and small highly aquatic salamanders.

- *They discussed "family dicamptodontidae" during the group presentation.*
- *In class, the teacher used "family dicamptodontidae" to mean large and small highly aquatic salamanders.*

---

family diodontidae *(noun)*

Spiny puffers.

- *In class, the teacher used "family diodontidae" to mean spiny puffers.*

- *Understanding "family diodontidae" helps you talk about this topic clearly.*

family diomedeidae *(noun)*

Albatrosses.

- *He looked up "family diomedeidae" because he had never seen it before.*
- *Understanding "family diomedeidae" helps you talk about this topic clearly.*

family dipodidae *(noun)*

Old World jerboas.

- *The article explained what "family dipodidae" means with a simple example.*
- *They discussed "family dipodidae" during the group presentation.*

family discoglossidae *(noun)*

Family of Old World toads having a fixed disklike tongue.

- *They discussed "family discoglossidae" during the group presentation.*
- *She wrote a short paragraph that included "family discoglossidae."*

family doliolidae *(noun)*

Oceanic tunicates.

- *He looked up "family doliolidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family doliolidae."*

family dracunculidae *(noun)*

Greatly elongated roundworm.

- *He looked up "family dracunculidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family dracunculidae."*

family drepanididae *(noun)*

Hawaiian honeycreepers.

- *Understanding "family drepanididae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family drepanididae."*

family dromaeosauridae *(noun)*

Swift-running bipedal dinosaurs.

- *She wrote a short paragraph that included "family dromaeosauridae."*
- *He looked up "family dromaeosauridae" because he had never seen it before.*

family drosophilidae *(noun)*

Fruit flies.

- *They discussed "family drosophilidae" during the group presentation.*
- *Understanding "family drosophilidae" helps you talk about this topic clearly.*

family dugongidae *(noun)*

A family of mammals of order Sirenia including dugongs and Steller's sea cow.

- *They discussed "family dugongidae" during the group presentation.*
- *He looked up "family dugongidae" because he had never seen it before.*

family echeneidae *(noun)*

Fishes having a sucking disk on the head for clinging to other fishes and to ships.

- *She wrote a short paragraph that included "family echeneidae."*
- *He looked up "family echeneidae" because he had never seen it before.*

family echeneididae *(noun)*

Fishes having a sucking disk on the head for clinging to other fishes and to ships.

- *Understanding "family echeneididae" helps you talk about this topic clearly.*
- *The article explained what "family echeneididae" means with a simple example.*

family edaphosauridae *(noun)*

A family of reptiles of the order Pelycosauria.

- *The article explained what "family edaphosauridae" means with a simple example.*
- *They discussed "family edaphosauridae" during the group presentation.*

family eimeriidae *(noun)*

A family of protoctist in the order Coccidia.

- *Understanding "family eimeriidae" helps you talk about this topic clearly.*
- *They discussed "family eimeriidae" during the group presentation.*

family elapidae *(noun)*

Cobras; kraits; mambas; coral snakes; Australian taipan and tiger snakes.

- *She wrote a short paragraph that included "family elapidae."*
- *He looked up "family elapidae" because he had never seen it before.*

family elateridae *(noun)*

Click beetles and certain fireflies.

- *He looked up "family elateridae" because he had never seen it before.*
- *Understanding "family elateridae" helps you talk about this topic clearly.*

family electrophoridae *(noun)*

Small family comprising the electric eels.

- *In class, the teacher used "family electrophoridae" to mean small family comprising the electric eels.*
- *They discussed "family electrophoridae" during the group presentation.*

family elopidae *(noun)*

Tarpons and ladyfishes.

- *The article explained what "family elopidae" means with a simple example.*
- *In class, the teacher used "family elopidae" to mean tarpons and ladyfishes.*

family embiotocidae *(noun)*

Viviparous percoid fishes comprising the surf fishes.

- *She wrote a short paragraph that included "family embiotocidae."*
- *The article explained what "family embiotocidae" means with a simple example.*

family emydidae *(noun)*

Box and water turtles.

- *Understanding "family emydidae" helps you talk about this topic clearly.*
- *The article explained what "family emydidae" means with a simple example.*

family endamoebidae *(noun)*

A large family of endoparasitic amebas that invade the digestive tract.

- *Understanding "family endamoebidae" helps you talk about this topic clearly.*
- *He looked up "family endamoebidae" because he had never seen it before.*

family ephippidae *(noun)*

Small family comprising the spadefishes.

- *She wrote a short paragraph that included "family ephippidae."*
- *He looked up "family ephippidae" because he had never seen it before.*

family erethizontidae *(noun)*

New World arboreal porcupines.

- *They discussed "family erethizontidae" during the group presentation.*
- *Understanding "family erethizontidae" helps you talk about this topic clearly.*

family erinaceidae *(noun)*

True hedgehogs.

- *He looked up “family erinaceidae” because he had never seen it before.*
- *Understanding “family erinaceidae” helps you talk about this topic clearly.*

---

family eschrichtiidae *(noun)*

Comprising only the grey whales.

- *The article explained what “family eschrichtiidae” means with a simple example.*
- *In class, the teacher used “family eschrichtiidae” to mean comprising only the grey whales.*

---

family esocidae *(noun)*

Pikes; pickerels; muskellunges.

- *The article explained what “family esocidae” means with a simple example.*
- *Understanding “family esocidae” helps you talk about this topic clearly.*

---

family euglenaceae *(noun)*

Considered green algae.

- *The article explained what “family euglenaceae” means with a simple example.*
- *In class, the teacher used “family euglenaceae” to mean considered green algae.*

---

family eurylaimidae *(noun)*

Coextensive with the suborder Eurylaimi.

- *They discussed “family eurylaimidae” during the group presentation.*
- *She wrote a short paragraph that included “family eurylaimidae.”*

---

family exocoetidae *(noun)*

Flying fishes; closely related to the halfbeaks.

- *In class, the teacher used “family exocoetidae” to mean flying fishes; closely related to the halfbeaks.*
- *The article explained what “family exocoetidae” means with a simple example.*

---

family falconidae *(noun)*

A family of birds of the order Falconiformes.

- *In class, the teacher used “family falconidae” to mean a family of birds of the order falconiformes.*
- *The article explained what “family falconidae” means with a simple example.*

---

family fasciolidae *(noun)*

A family of Trematoda.

- *Understanding “family fasciolidae” helps you talk about this topic clearly.*
- *He looked up “family fasciolidae” because he had never seen it before.*

---

family filariidae *(noun)*

Threadlike roundworms.

- *He looked up “family filariidae” because he had never seen it before.*
- *She wrote a short paragraph that included “family filariidae.”*

---

family fissurellidae *(noun)*

Marine limpets.

- *He looked up “family fissurellidae” because he had never seen it before.*
- *In class, the teacher used “family fissurellidae” to mean marine limpets.*

---

family fistulariidae *(noun)*

Cornetfishes.

- *He looked up “family fistulariidae” because he had never seen it before.*
- *They discussed “family fistulariidae” during the group presentation.*

---

family forficulidae *(noun)*

Typical earwigs.

- *The article explained what “family forficulidae” means with a simple example.*
- *They discussed “family forficulidae” during the group presentation.*

family fregatidae *(noun)*

Frigate birds.

- *In class, the teacher used "family fregatidae" to mean frigate birds.*
- *Understanding "family fregatidae" helps you talk about this topic clearly.*

family fringillidae *(noun)*

Finches: goldfinches; bullfinches; chaffinches; siskins; canaries; cardinals; grosbeaks; crossbills; linnets; buntings.

- *In class, the teacher used "family fringillidae" to mean finches: goldfinches; bullfinches; chaffinches;....*
- *He looked up "family fringillidae" because he had never seen it before.*

family fucaceae *(noun)*

Small family of brown algae: gulfweeds; rockweeds.

- *They discussed "family fucaceae" during the group presentation.*
- *Understanding "family fucaceae" helps you talk about this topic clearly.*

family fulgoridae *(noun)*

Plant hoppers: lantern flies.

- *He looked up "family fulgoridae" because he had never seen it before.*
- *In class, the teacher used "family fulgoridae" to mean plant hoppers: lantern flies.*

family furnariidae *(noun)*

E.g. ovenbirds.

- *In class, the teacher used "family furnariidae" to mean e.g. ovenbirds.*
- *The article explained what "family furnariidae" means with a simple example.*

family gadidae *(noun)*

Large family of important mostly marine food fishes.

- *The article explained what "family gadidae" means with a simple example.*
- *She wrote a short paragraph that included "family gadidae."*

family gasterophilidae *(noun)*

Horse botflies.

- *She wrote a short paragraph that included "family gasterophilidae."*
- *He looked up "family gasterophilidae" because he had never seen it before.*

family gasterosteidae *(noun)*

Sticklebacks.

- *In class, the teacher used "family gasterosteidae" to mean sticklebacks.*
- *The article explained what "family gasterosteidae" means with a simple example.*

family gavidae *(noun)*

Loon family.

- *The article explained what "family gavidae" means with a simple example.*
- *They discussed "family gavidae" during the group presentation.*

family gelechiidae *(noun)*

Important economic pests.

- *He looked up "family gelechiidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family gelechiidae."*

family gempylidae *(noun)*

Snake mackerels.

- *The article explained what "family gempylidae" means with a simple example.*
- *In class, the teacher used "family gempylidae" to mean snake mackerels.*

family geomyidae *(noun)*

North American pocket gophers.

- *Understanding "family geomyidae" helps you talk about this topic clearly.*
- *They discussed "family geomyidae" during the group presentation.*

---

family geophilidae *(noun)*

Small extremely elongate centipedes that live in earth.

- *The article explained what "family geophilidae" means with a simple example.*
- *In class, the teacher used "family geophilidae" to mean small extremely elongate centipedes that live in earth.*

---

family gerridae *(noun)*

An arthropod family that includes water striders.

- *The article explained what "family gerridae" means with a simple example.*
- *In class, the teacher used "family gerridae" to mean an arthropod family that includes water striders.*

---

family gerrididae *(noun)*

An arthropod family that includes water striders.

- *He looked up "family gerrididae" because he had never seen it before.*
- *Understanding "family gerrididae" helps you talk about this topic clearly.*

---

family gigartinaceae *(noun)*

A family of protoctist.

- *In class, the teacher used "family gigartinaceae" to mean a family of protoctist.*
- *He looked up "family gigartinaceae" because he had never seen it before.*

---

family glareolidae *(noun)*

Old World shorebirds: pratincoles and coursers.

- *She wrote a short paragraph that included "family glareolidae."*
- *They discussed "family glareolidae" during the group presentation.*

---

family gliridae *(noun)*

Dormice and other Old World forms.

- *She wrote a short paragraph that included "family gliridae."*
- *The article explained what "family gliridae" means with a simple example.*

---

family globigerinidae *(noun)*

A family of protoctists.

- *They discussed "family globigerinidae" during the group presentation.*
- *The article explained what "family globigerinidae" means with a simple example.*

---

family glossinidae *(noun)*

Flies closely related to the Muscidae: tsetse flies.

- *Understanding "family glossinidae" helps you talk about this topic clearly.*
- *He looked up "family glossinidae" because he had never seen it before.*

---

family gobiesocidae *(noun)*

Clingfishes.

- *In class, the teacher used "family gobiesocidae" to mean clingfishes.*
- *Understanding "family gobiesocidae" helps you talk about this topic clearly.*

---

family gomphotheriidae *(noun)*

Elephants extinct since the Pleistocene.

- *They discussed "family gomphotheriidae" during the group presentation.*
- *Understanding "family gomphotheriidae" helps you talk about this topic clearly.*

---

family gonorhynchidae *(noun)*

Coextensive with the genus Gonorhynchus.

- *He looked up "family gonorhynchidae" because he had never seen it before.*

- *Understanding "family gonorhynchidae" helps you talk about this topic clearly.*

family gracilariidae *(noun)*

Leaf miners.

- *The article explained what "family gracilariidae" means with a simple example.*
- *In class, the teacher used "family gracilariidae" to mean leaf miners.*

family gyrinidae *(noun)*

Whirligig beetles.

- *He looked up "family gyrinidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family gyrinidae."*

family hadrosauridae *(noun)*

Duck-billed dinosaurs; upper Cretaceous.

- *In class, the teacher used "family hadrosauridae" to mean duck-billed dinosaurs; upper cretaceous.*
- *The article explained what "family hadrosauridae" means with a simple example.*

family haematopodidae *(noun)*

Oystercatchers.

- *They discussed "family haematopodidae" during the group presentation.*
- *The article explained what "family haematopodidae" means with a simple example.*

family haemoproteidae *(noun)*

Bird parasites.

- *They discussed "family haemoproteidae" during the group presentation.*
- *In class, the teacher used "family haemoproteidae" to mean bird parasites.*

family halictidae *(noun)*

A family of small solitary bees; many are valuable pollinators for agriculture.

- *Understanding "family halictidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family halictidae."*

family helicidae *(noun)*

Land snails including the common edible snail and some pests.

- *He looked up "family helicidae" because he had never seen it before.*
- *Understanding "family helicidae" helps you talk about this topic clearly.*

family helodermatidae *(noun)*

Only known venomous lizards.

- *Understanding "family helodermatidae" helps you talk about this topic clearly.*
- *The article explained what "family helodermatidae" means with a simple example.*

family hemerobiidae *(noun)*

Brown lacewings.

- *In class, the teacher used "family hemerobiidae" to mean brown lacewings.*
- *Understanding "family hemerobiidae" helps you talk about this topic clearly.*

family hemiprocnidae *(noun)*

Tree swifts.

- *Understanding "family hemiprocnidae" helps you talk about this topic clearly.*
- *They discussed "family hemiprocnidae" during the group presentation.*

family hemiramphidae *(noun)*

Halfbeaks; marine and freshwater fishes closely related to the flying fishes but not able to glide.

- *He looked up "family hemiramphidae" because he had never seen it before.*
- *In class, the teacher used "family hemiramphidae" to mean halfbeaks; marine and freshwater fishes closely....*

family heteromyidae *(noun)*

Small New World burrowing mouselike rodents with fur-lined cheek pouches and hind limbs and tail adapted to leaping; adapted to desert conditions: pocket mice; kangaroo mice; kangaroo rats.

- *He looked up "family heteromyidae" because he had never seen it before.*
- *Understanding "family heteromyidae" helps you talk about this topic clearly.*

family hexanchidae *(noun)*

Primitive sharks.

- *In class, the teacher used "family hexanchidae" to mean primitive sharks.*
- *He looked up "family hexanchidae" because he had never seen it before.*

family hippoboscidae *(noun)*

Winged or wingless dipterans: louse flies.

- *He looked up "family hippoboscidae" because he had never seen it before.*
- *Understanding "family hippoboscidae" helps you talk about this topic clearly.*

family hippopotamidae *(noun)*

Hippopotami.

- *In class, the teacher used "family hippopotamidae" to mean hippopotami.*
- *The article explained what "family hippopotamidae" means with a simple example.*

family hipposideridae *(noun)*

Old World leafnose bats.

- *Understanding "family hipposideridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family hipposideridae."*

family hirudinidae *(noun)*

A family of Hirudinea.

- *Understanding "family hirudinidae" helps you talk about this topic clearly.*
- *They discussed "family hirudinidae" during the group presentation.*

family hirundinidae *(noun)*

Swallows and martins.

- *He looked up "family hirundinidae" because he had never seen it before.*
- *In class, the teacher used "family hirundinidae" to mean swallows and martins.*

family holocentridae *(noun)*

Squirrelfishes and soldierfishes.

- *They discussed "family holocentridae" during the group presentation.*
- *He looked up "family holocentridae" because he had never seen it before.*

family holothuridae *(noun)*

A family of Holothuroidea.

- *In class, the teacher used "family holothuridae" to mean a family of holothuroidea.*
- *He looked up "family holothuridae" because he had never seen it before.*

family homaridae *(noun)*

Large-clawed lobsters.

- *He looked up "family homaridae" because he had never seen it before.*
- *In class, the teacher used "family homaridae" to mean large-clawed lobsters.*

family hydrobatidae *(noun)*

Storm petrels.

- *In class, the teacher used "family hydrobatidae" to mean storm petrels.*
- *They discussed "family hydrobatidae" during the group presentation.*

family hylidae *(noun)*

The amphibian family of tree frogs.

- *In class, the teacher used "family hylidae" to mean the amphibian family of tree frogs.*
- *Understanding "family hylidae" helps you talk about this topic clearly.*

---

family hylobatidae *(noun)*

Used in some classifications for the lesser apes (gibbons and siamangs); sometimes considered a subfamily of Pongidae.

- *Understanding "family hylobatidae" helps you talk about this topic clearly.*
- *They discussed "family hylobatidae" during the group presentation.*

---

family hyperodontidae *(noun)*

Beaked whales; in some especially former classifications included in the family Physeteridae.

- *They discussed "family hyperodontidae" during the group presentation.*
- *Understanding "family hyperodontidae" helps you talk about this topic clearly.*

---

family hypodermatidae *(noun)*

Warble flies.

- *Understanding "family hypodermatidae" helps you talk about this topic clearly.*
- *They discussed "family hypodermatidae" during the group presentation.*

---

family hystricidae *(noun)*

Old World porcupines.

- *The article explained what "family hystricidae" means with a simple example.*
- *In class, the teacher used "family hystricidae" to mean old world porcupines.*

---

family ichthyosauridae *(noun)*

Later ichthyosaurs of the Jurassic and Cretaceous; widely distributed in both hemispheres.

- *In class, the teacher used "family ichthyosauridae" to mean later ichthyosaurs of the jurassic and cretaceous;....*
- *Understanding "family ichthyosauridae" helps you talk about this topic clearly.*

---

family icteridae *(noun)*

American orioles; American blackbirds; bobolinks; meadowlarks.

- *He looked up "family icteridae" because he had never seen it before.*
- *In class, the teacher used "family icteridae" to mean american orioles; american blackbirds; bobolinks;....*

---

family iguania *(noun)*

New World lizards.

- *He looked up "family iguania" because he had never seen it before.*
- *She wrote a short paragraph that included "family iguania."*

---

family iguanidae *(noun)*

New World lizards.

- *She wrote a short paragraph that included "family iguanidae."*
- *They discussed "family iguanidae" during the group presentation.*

---

family indicatoridae *(noun)*

Honey guides.

- *In class, the teacher used "family indicatoridae" to mean honey guides.*
- *The article explained what "family indicatoridae" means with a simple example.*

---

family indriidae *(noun)*

A family of Lemuroidea.

- *The article explained what "family indriidae" means with a simple example.*
- *In class, the teacher used "family indriidae" to mean a family of lemuroidea.*

---

family ipidae *(noun)*

Large family of bark-boring or wood-boring short-beaked beetles; very destructive to forest and fruit trees.

- *He looked up "family ipidae" because he had never seen it before.*
- *Understanding "family ipidae" helps you talk about this topic clearly.*

family irenidae *(noun)*

A family of birds of the suborder Oscines.

- *She wrote a short paragraph that included "family irenidae."*
- *The article explained what "family irenidae" means with a simple example.*

family istiophoridae *(noun)*

Sailfishes; spearfishes; marlins.

- *In class, the teacher used "family istiophoridae" to mean sailfishes; spearfishes; marlins.*
- *Understanding "family istiophoridae" helps you talk about this topic clearly.*

family isuridae *(noun)*

In some classifications another name for the family Lamnidae.

- *He looked up "family isuridae" because he had never seen it before.*
- *She wrote a short paragraph that included "family isuridae."*

family jassidae *(noun)*

Family of small leafhoppers coextensive with the Cicadellidae and not distinguished from it in some classifications.

- *He looked up "family jassidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family jassidae."*

family kalotermitidae *(noun)*

Primitive termites of warm regions.

- *She wrote a short paragraph that included "family kalotermitidae."*
- *Understanding "family kalotermitidae" helps you talk about this topic clearly.*

family kasuwonidae *(noun)*

In some classifications considered a separate family comprising the oceanic bonitos.

- *They discussed "family kasuwonidae" during the group presentation.*
- *In class, the teacher used "family kasuwonidae" to mean in some classifications considered a separate....*

family kinosternidae *(noun)*

Mud turtles; musk turtles.

- *Understanding "family kinosternidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family kinosternidae."*

family lacertidae *(noun)*

Old World lizards.

- *Understanding "family lacertidae" helps you talk about this topic clearly.*
- *They discussed "family lacertidae" during the group presentation.*

family lactobacillaceae *(noun)*

Lactic acid bacteria and important pathogens; bacteria that ferment carbohydrates chiefly into lactic acid.

- *They discussed "family lactobacillaceae" during the group presentation.*
- *The article explained what "family lactobacillaceae" means with a simple example.*

family lactobacteriaceae *(noun)*

Lactic acid bacteria and important pathogens; bacteria that ferment carbohydrates chiefly into lactic acid.

- *In class, the teacher used "family lactobacteriaceae" to mean lactic acid bacteria and important pathogens;....*
- *Understanding "family lactobacteriaceae" helps you talk about this topic clearly.*

family laminariaceae *(noun)*

Large family of marine brown algae including many economically important large kelps chiefly of northern waters.

- *He looked up "family laminariaceae" because he had never seen it before.*
- *Understanding "family laminariaceae" helps you talk about this topic clearly.*

family lamnidae *(noun)*

Oceanic sharks.

- *She wrote a short paragraph that included "family lamnidae."*
- *Understanding "family lamnidae" helps you talk about this topic clearly.*

---

family lanthanotidae *(noun)*

Stout-bodied lizards.

- *In class, the teacher used "family lanthanotidae" to mean stout-bodied lizards.*
- *The article explained what "family lanthanotidae" means with a simple example.*

---

family laricariidae *(noun)*

Armored catfish.

- *Understanding "family laricariidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family laricariidae."*

---

family laridae *(noun)*

Gull family: gulls and terns.

- *He looked up "family laridae" because he had never seen it before.*
- *They discussed "family laridae" during the group presentation.*

---

family lasiocampidae *(noun)*

Tent caterpillars; eggars; lappet moths.

- *Understanding "family lasiocampidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family lasiocampidae" to mean tent caterpillars; eggars; lappet moths.*

---

family latimeridae *(noun)*

Extinct except for the coelacanth.

- *The article explained what "family latimeridae" means with a simple example.*
- *She wrote a short paragraph that included "family latimeridae."*

---

family leiopelmatidae *(noun)*

Primitive New Zealand frogs.

- *The article explained what "family leiopelmatidae" means with a simple example.*
- *They discussed "family leiopelmatidae" during the group presentation.*

---

family lemuridae *(noun)*

Typical lemurs; of Madagascar.

- *In class, the teacher used "family lemuridae" to mean typical lemurs; of madagascar.*
- *The article explained what "family lemuridae" means with a simple example.*

---

family lepadidae *(noun)*

Goose barnacles.

- *They discussed "family lepadidae" during the group presentation.*
- *The article explained what "family lepadidae" means with a simple example.*

---

family lepisosteidae *(noun)*

Comprises the genus Lepisosteus.

- *The article explained what "family lepisosteidae" means with a simple example.*
- *In class, the teacher used "family lepisosteidae" to mean comprises the genus lepisosteus.*

---

family leporidae *(noun)*

Hares and rabbits.

- *The article explained what "family leporidae" means with a simple example.*
- *Understanding "family leporidae" helps you talk about this topic clearly.*

---

family leptodactylidae *(noun)*

New World frogs; in some classifications essentially coextensive with the family Bufonidae.

- *He looked up "family leptodactylidae" because he had never seen it before.*

- *They discussed "family leptodactylidae" during the group presentation.*

family leptotyphlopidae *(noun)*

Blind snakes.

- *The article explained what "family leptotyphlopidae" means with a simple example.*
- *In class, the teacher used "family leptotyphlopidae" to mean blind snakes.*

family limulidae *(noun)*

Horseshoe crabs.

- *He looked up "family limulidae" because he had never seen it before.*
- *Understanding "family limulidae" helps you talk about this topic clearly.*

family liopelmidae *(noun)*

Primitive New Zealand frogs.

- *She wrote a short paragraph that included "family liopelmidae."*
- *Understanding "family liopelmidae" helps you talk about this topic clearly.*

family liparidae *(noun)*

Snailfishes.

- *They discussed "family liparidae" during the group presentation.*
- *In class, the teacher used "family liparidae" to mean snailfishes.*

family liparididae *(noun)*

Snailfishes.

- *In class, the teacher used "family liparididae" to mean snailfishes.*
- *They discussed "family liparididae" during the group presentation.*

family lithodidae *(noun)*

Deep-sea crabs of cold waters.

- *They discussed "family lithodidae" during the group presentation.*
- *He looked up "family lithodidae" because he had never seen it before.*

family littorinidae *(noun)*

Periwinkles.

- *In class, the teacher used "family littorinidae" to mean periwinkles.*
- *He looked up "family littorinidae" because he had never seen it before.*

family lobotidae *(noun)*

Tripletails.

- *She wrote a short paragraph that included "family lobotidae."*
- *Understanding "family lobotidae" helps you talk about this topic clearly.*

family locustidae *(noun)*

Short-horned grasshoppers; true locusts.

- *The article explained what "family locustidae" means with a simple example.*
- *Understanding "family locustidae" helps you talk about this topic clearly.*

family lophiidae *(noun)*

Large-headed marine fishes comprising the anglers.

- *The article explained what "family lophiidae" means with a simple example.*
- *She wrote a short paragraph that included "family lophiidae."*

family lorisidae *(noun)*

Slow-moving omnivorous nocturnal primates of tropical Asia; usually tailless.

- *He looked up "family lorisidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family lorisidae."*

family lucanidae *(noun)*

Stag beetles.

- *In class, the teacher used "family lucanidae" to mean stag beetles.*
- *They discussed "family lucanidae" during the group presentation.*

family lygaeidae *(noun)*

Lygaeid bugs.

- *They discussed "family lygaeidae" during the group presentation.*
- *Understanding "family lygaeidae" helps you talk about this topic clearly.*

family lymantriidae *(noun)*

Tussock moths.

- *She wrote a short paragraph that included "family lymantriidae."*
- *The article explained what "family lymantriidae" means with a simple example.*

family machilidae *(noun)*

Jumping bristletails.

- *She wrote a short paragraph that included "family machilidae."*
- *They discussed "family machilidae" during the group presentation.*

family macropodidae *(noun)*

Kangaroos; wallabies.

- *He looked up "family macropodidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family macropodidae."*

family macrorhamphosidae *(noun)*

Bellows fishes.

- *She wrote a short paragraph that included "family macrorhamphosidae."*
- *He looked up "family macrorhamphosidae" because he had never seen it before.*

family majidae *(noun)*

Spider crabs.

- *The article explained what "family majidae" means with a simple example.*
- *In class, the teacher used "family majidae" to mean spider crabs.*

family malacanthidae *(noun)*

Short-headed marine fishes; often brightly colored.

- *He looked up "family malacanthidae" because he had never seen it before.*
- *Understanding "family malacanthidae" helps you talk about this topic clearly.*

family mammutidae *(noun)*

Extinct family: mastodons.

- *In class, the teacher used "family mammutidae" to mean extinct family: mastodons.*
- *The article explained what "family mammutidae" means with a simple example.*

family manidae *(noun)*

Coextensive with the order Pholidota.

- *She wrote a short paragraph that included "family manidae."*
- *He looked up "family manidae" because he had never seen it before.*

family mastodontidae *(noun)*

Extinct family: mastodons.

- *He looked up "family mastodontidae" because he had never seen it before.*
- *In class, the teacher used "family mastodontidae" to mean extinct family: mastodons.*

family mastotermitidae *(noun)*

Primitive termites.

- *In class, the teacher used "family mastotermitidae" to mean primitive termites.*
- *The article explained what "family mastotermitidae" means with a simple example.*

---

family megachilidae *(noun)*

Leaf-cutting and mason bees.

- *She wrote a short paragraph that included "family megachilidae."*
- *He looked up "family megachilidae" because he had never seen it before.*

---

family megadermatidae *(noun)*

Old World false vampire bats.

- *In class, the teacher used "family megadermatidae" to mean old world false vampire bats.*
- *The article explained what "family megadermatidae" means with a simple example.*

---

family megalonychidae *(noun)*

Mammal family consisting of the two-toed sloths.

- *He looked up "family megalonychidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family megalonychidae."*

---

family megalosauridae *(noun)*

Megalosaurs.

- *She wrote a short paragraph that included "family megalosauridae."*
- *They discussed "family megalosauridae" during the group presentation.*

---

family megatheriidae *(noun)*

Extinct ground sloths.

- *They discussed "family megatheriidae" during the group presentation.*
- *Understanding "family megatheriidae" helps you talk about this topic clearly.*

---

family meleagrididae *(noun)*

Turkeys and some extinct forms.

- *They discussed "family meleagrididae" during the group presentation.*
- *The article explained what "family meleagrididae" means with a simple example.*

---

family meliphagidae *(noun)*

Honey eaters.

- *Understanding "family meliphagidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family meliphagidae."*

---

family meloidae *(noun)*

Blister beetles.

- *In class, the teacher used "family meloidae" to mean blister beetles.*
- *The article explained what "family meloidae" means with a simple example.*

---

family membracidae *(noun)*

Plant hoppers: treehoppers.

- *He looked up "family membracidae" because he had never seen it before.*
- *Understanding "family membracidae" helps you talk about this topic clearly.*

---

family micrococcaceae *(noun)*

Spherical or elliptical usually aerobic eubacteria that produce yellow or orange or red pigment; includes toxin-producing forms as well as harmless commensals and saprophytes.

- *The article explained what "family micrococcaceae" means with a simple example.*
- *They discussed "family micrococcaceae" during the group presentation.*

---

family microhylidae *(noun)*

Narrow-mouthed toads and sheep frogs; some burrow and some are arboreal; found worldwide.

- *He looked up "family microhylidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family microhylidae."*

family mimidae *(noun)*

Sometimes considered a subfamily of Troglodytidae: mockingbirds; catbirds; thrashers.

- *Understanding "family mimidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family mimidae" to mean sometimes considered a subfamily of troglodytidae:....*

family mobulidae *(noun)*

Large rays lacking venomous spines: mantas.

- *In class, the teacher used "family mobulidae" to mean large rays lacking venomous spines: mantas.*
- *Understanding "family mobulidae" helps you talk about this topic clearly.*

family molidae *(noun)*

Ocean sunfishes.

- *She wrote a short paragraph that included "family molidae."*
- *He looked up "family molidae" because he had never seen it before.*

family molossidae *(noun)*

Mastiff bats; freetail bats.

- *In class, the teacher used "family molossidae" to mean mastiff bats; freetail bats.*
- *The article explained what "family molossidae" means with a simple example.*

family momotidae *(noun)*

A family of birds of the order Coraciiformes.

- *She wrote a short paragraph that included "family momotidae."*
- *He looked up "family momotidae" because he had never seen it before.*

family motacillidae *(noun)*

Pipits and wagtails.

- *He looked up "family motacillidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family motacillidae."*

family mugilidae *(noun)*

Grey mullets.

- *They discussed "family mugilidae" during the group presentation.*
- *She wrote a short paragraph that included "family mugilidae."*

family mullidae *(noun)*

Goatfishes or red mullets.

- *She wrote a short paragraph that included "family mullidae."*
- *They discussed "family mullidae" during the group presentation.*

family muraenidae *(noun)*

Marine eels.

- *The article explained what "family muraenidae" means with a simple example.*
- *They discussed "family muraenidae" during the group presentation.*

family muscicapidae *(noun)*

Old World (true) flycatchers.

- *He looked up "family muscicapidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family muscicapidae."*

family mutillidae *(noun)*

A family of wasps.

- *In class, the teacher used "family mutillidae" to mean a family of wasps.*
- *Understanding "family mutillidae" helps you talk about this topic clearly.*

family myacidae *(noun)*

Soft-shell clams.

- *The article explained what "family myacidae" means with a simple example.*
- *Understanding "family myacidae" helps you talk about this topic clearly.*

---

family mycetophylidae *(noun)*

Fungus gnats.

- *She wrote a short paragraph that included "family mycetophylidae."*
- *They discussed "family mycetophylidae" during the group presentation.*

---

family mycobacteriaceae *(noun)*

A family of bacteria.

- *They discussed "family mycobacteriaceae" during the group presentation.*
- *She wrote a short paragraph that included "family mycobacteriaceae."*

---

family mycoplasmataceae *(noun)*

Pleomorphic Gram-negative nonmotile microorganism similar to both viruses and bacteria; parasitic in mammals.

- *They discussed "family mycoplasmataceae" during the group presentation.*
- *In class, the teacher used "family mycoplasmataceae" to mean pleomorphic gram-negative nonmotile microorganism....*

---

family myctophidae *(noun)*

Deep-sea fishes comprising the lantern fishes.

- *She wrote a short paragraph that included "family myctophidae."*
- *They discussed "family myctophidae" during the group presentation.*

---

family mylodontidae *(noun)*

Extinct South American edentates.

- *She wrote a short paragraph that included "family mylodontidae."*
- *He looked up "family mylodontidae" because he had never seen it before.*

---

family myrmecophagidae *(noun)*

New World anteaters.

- *She wrote a short paragraph that included "family myrmecophagidae."*
- *The article explained what "family myrmecophagidae" means with a simple example.*

---

family mysidae *(noun)*

Small shrimp-like crustaceans.

- *In class, the teacher used "family mysidae" to mean small shrimp-like crustaceans.*
- *He looked up "family mysidae" because he had never seen it before.*

---

family mytilidae *(noun)*

Marine mussels.

- *He looked up "family mytilidae" because he had never seen it before.*
- *They discussed "family mytilidae" during the group presentation.*

---

family myxinidae *(noun)*

Slime-producing marine animals: hagfishes.

- *He looked up "family myxinidae" because he had never seen it before.*
- *In class, the teacher used "family myxinidae" to mean slime-producing marine animals: hagfishes.*

---

family myxobacteriaceae *(noun)*

Bacteria living mostly in soils and on dung.

- *Understanding "family myxobacteriaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "family myxobacteriaceae" to mean bacteria living mostly in soils and on dung.*

---

family myxophyceae *(noun)*

Former terms for Cyanophyceae.

- *He looked up "family myxophyceae" because he had never seen it before.*

- *She wrote a short paragraph that included "family myxophyceae."*

family nautilidae *(noun)*

Spiral-shelled cephalopods.

- *Understanding "family nautilidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family nautilidae" to mean spiral-shelled cephalopods.*

family nephropsidae *(noun)*

In some classifications coextensive with the Homaridae.

- *In class, the teacher used "family nephropsidae" to mean in some classifications coextensive with the homaridae.*
- *The article explained what "family nephropsidae" means with a simple example.*

family nepidae *(noun)*

Water scorpions.

- *Understanding "family nepidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family nepidae" to mean water scorpions.*

family nitrobacteriaceae *(noun)*

Usually rod-shaped bacteria that oxidize ammonia or nitrites: nitrobacteria.

- *She wrote a short paragraph that included "family nitrobacteriaceae."*
- *He looked up "family nitrobacteriaceae" because he had never seen it before.*

family nostocaceae *(noun)*

Blue-green algae.

- *She wrote a short paragraph that included "family nostocaceae."*
- *Understanding "family nostocaceae" helps you talk about this topic clearly.*

family notonectidae *(noun)*

Aquatic carnivorous insects.

- *She wrote a short paragraph that included "family notonectidae."*
- *Understanding "family notonectidae" helps you talk about this topic clearly.*

family notoryctidae *(noun)*

Pouched moles.

- *She wrote a short paragraph that included "family notoryctidae."*
- *He looked up "family notoryctidae" because he had never seen it before.*

family nummulitidae *(noun)*

A family of fossil protoctists.

- *In class, the teacher used "family nummulitidae" to mean a family of fossil protoctists.*
- *They discussed "family nummulitidae" during the group presentation.*

family ochotonidae *(noun)*

Pikas and extinct forms.

- *The article explained what "family ochotonidae" means with a simple example.*
- *In class, the teacher used "family ochotonidae" to mean pikas and extinct forms.*

family octopodidae *(noun)*

A family of Octopoda.

- *She wrote a short paragraph that included "family octopodidae."*
- *The article explained what "family octopodidae" means with a simple example.*

family odobenidae *(noun)*

Walruses and extinct forms.

- *He looked up "family odobenidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family odobenidae."*

family odontaspididae *(noun)*

Sand sharks; in some classifications coextensive with family Carcharhinidae.

- *In class, the teacher used "family odontaspididae" to mean sand sharks; in some classifications coextensive....*
- *The article explained what "family odontaspididae" means with a simple example.*

family oedogoniaceae *(noun)*

Filamentous green algae.

- *They discussed "family oedogoniaceae" during the group presentation.*
- *He looked up "family oedogoniaceae" because he had never seen it before.*

family ogcocephalidae *(noun)*

Batfishes: sluggish bottom-dwelling spiny fishes.

- *He looked up "family ogcocephalidae" because he had never seen it before.*
- *In class, the teacher used "family ogcocephalidae" to mean batfishes: sluggish bottom-dwelling spiny fishes.*

family oniscidae *(noun)*

A family of Isopoda.

- *The article explained what "family oniscidae" means with a simple example.*
- *She wrote a short paragraph that included "family oniscidae."*

family ophidiidae *(noun)*

Eellike marine fishes.

- *He looked up "family ophidiidae" because he had never seen it before.*
- *Understanding "family ophidiidae" helps you talk about this topic clearly.*

family ophiodontidae *(noun)*

Fishes closely related to greenlings.

- *They discussed "family ophiodontidae" during the group presentation.*
- *Understanding "family ophiodontidae" helps you talk about this topic clearly.*

family opisthocomidae *(noun)*

Comprising the hoatzins.

- *He looked up "family opisthocomidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family opisthocomidae."*

family orchestiidae *(noun)*

Beach fleas.

- *He looked up "family orchestiidae" because he had never seen it before.*
- *In class, the teacher used "family orchestiidae" to mean beach fleas.*

family orectolobidae *(noun)*

Nurse sharks and carpet sharks.

- *In class, the teacher used "family orectolobidae" to mean nurse sharks and carpet sharks.*
- *The article explained what "family orectolobidae" means with a simple example.*

family oriolidae *(noun)*

Old World orioles.

- *In class, the teacher used "family oriolidae" to mean old world orioles.*
- *The article explained what "family oriolidae" means with a simple example.*

family oscillatoriaceae *(noun)*

Blue green algae.

- *In class, the teacher used "family oscillatoriaceae" to mean blue green algae.*
- *They discussed "family oscillatoriaceae" during the group presentation.*

family osteoglossidae *(noun)*

A family of large fishes that live in freshwater; includes bandfish and bonytongues.

- *They discussed "family osteoglossidae" during the group presentation.*
- *In class, the teacher used "family osteoglossidae" to mean a family of large fishes that live in freshwater;....*

---

family otariidae *(noun)*

Eared seals: sea lions and fur seals.

- *In class, the teacher used "family otariidae" to mean eared seals: sea lions and fur seals.*
- *Understanding "family otariidae" helps you talk about this topic clearly.*

---

family paguridae *(noun)*

Hermit crabs.

- *In class, the teacher used "family paguridae" to mean hermit crabs.*
- *Understanding "family paguridae" helps you talk about this topic clearly.*

---

family palinuridae *(noun)*

Spiny lobsters.

- *He looked up "family palinuridae" because he had never seen it before.*
- *She wrote a short paragraph that included "family palinuridae."*

---

family panorpidae *(noun)*

A family of insects of the order Mecoptera.

- *They discussed "family panorpidae" during the group presentation.*
- *In class, the teacher used "family panorpidae" to mean a family of insects of the order mecoptera.*

---

family paradisaeidae *(noun)*

Birds of paradise.

- *They discussed "family paradisaeidae" during the group presentation.*
- *The article explained what "family paradisaeidae" means with a simple example.*

---

family paridae *(noun)*

Titmice and chickadees.

- *Understanding "family paridae" helps you talk about this topic clearly.*
- *In class, the teacher used "family paridae" to mean titmice and chickadees.*

---

family parulidae *(noun)*

New World warblers.

- *They discussed "family parulidae" during the group presentation.*
- *The article explained what "family parulidae" means with a simple example.*

---

family passeridae *(noun)*

True sparrows: Old world birds formerly considered weaverbirds.

- *The article explained what "family passeridae" means with a simple example.*
- *In class, the teacher used "family passeridae" to mean true sparrows: old world birds formerly considered....*

---

family patellidae *(noun)*

Marine limpets.

- *The article explained what "family patellidae" means with a simple example.*
- *In class, the teacher used "family patellidae" to mean marine limpets.*

---

family pediculidae *(noun)*

True lice: human lice and related forms.

- *She wrote a short paragraph that included "family pediculidae."*
- *They discussed "family pediculidae" during the group presentation.*

---

family pelecanoididae *(noun)*

Diving petrels.

- *The article explained what "family pelecanoididae" means with a simple example.*
- *In class, the teacher used "family pelecanoididae" to mean diving petrels.*

family pelobatidae *(noun)*

The amphibian family of spadefoot toads.

- *Understanding "family pelobatidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family pelobatidae" to mean the amphibian family of spadefoot toads.*

family peneidae *(noun)*

Tropical prawns.

- *She wrote a short paragraph that included "family peneidae."*
- *Understanding "family peneidae" helps you talk about this topic clearly.*

family percidae *(noun)*

Active freshwater fishes; true perches and pike perches.

- *The article explained what "family percidae" means with a simple example.*
- *Understanding "family percidae" helps you talk about this topic clearly.*

family percophidae *(noun)*

Percoid flatheads.

- *In class, the teacher used "family percophidae" to mean percoid flatheads.*
- *Understanding "family percophidae" helps you talk about this topic clearly.*

family peridiniidae *(noun)*

Marine and freshwater dinoflagellates.

- *The article explained what "family peridiniidae" means with a simple example.*
- *In class, the teacher used "family peridiniidae" to mean marine and freshwater dinoflagellates.*

family peripatidae *(noun)*

A family of Onychophora.

- *He looked up "family peripatidae" because he had never seen it before.*
- *Understanding "family peripatidae" helps you talk about this topic clearly.*

family peripatopsidae *(noun)*

A family of Onychophora.

- *In class, the teacher used "family peripatopsidae" to mean a family of onychophora.*
- *He looked up "family peripatopsidae" because he had never seen it before.*

family phaethontidae *(noun)*

Tropicbirds.

- *Understanding "family phaethontidae" helps you talk about this topic clearly.*
- *The article explained what "family phaethontidae" means with a simple example.*

family phalangeridae *(noun)*

Phalangers; koalas.

- *She wrote a short paragraph that included "family phalangeridae."*
- *He looked up "family phalangeridae" because he had never seen it before.*

family phalangiidae *(noun)*

A family of Phalangida.

- *They discussed "family phalangiidae" during the group presentation.*
- *In class, the teacher used "family phalangiidae" to mean a family of phalangida.*

family phasianidae *(noun)*

Pheasants; quails; partridges.

- *They discussed "family phasianidae" during the group presentation.*
- *Understanding "family phasianidae" helps you talk about this topic clearly.*

family phasmatidae *(noun)*

Stick insects.

- *The article explained what "family phasmatidae" means with a simple example.*
- *She wrote a short paragraph that included "family phasmatidae."*

---

family phasmidae *(noun)*

Stick insects.

- *In class, the teacher used "family phasmidae" to mean stick insects.*
- *The article explained what "family phasmidae" means with a simple example.*

---

family phillidae *(noun)*

Leaf insects.

- *In class, the teacher used "family phillidae" to mean leaf insects.*
- *The article explained what "family phillidae" means with a simple example.*

---

family phocidae *(noun)*

Earless seals.

- *The article explained what "family phocidae" means with a simple example.*
- *Understanding "family phocidae" helps you talk about this topic clearly.*

---

family phoeniculidae *(noun)*

Wood hoopoes.

- *He looked up "family phoeniculidae" because he had never seen it before.*
- *Understanding "family phoeniculidae" helps you talk about this topic clearly.*

---

family pholadidae *(noun)*

A family of Bivalvia.

- *They discussed "family pholadidae" during the group presentation.*
- *She wrote a short paragraph that included "family pholadidae."*

---

family pholidae *(noun)*

A family of fish of suborder Blennioidea.

- *In class, the teacher used "family pholidae" to mean a family of fish of suborder blennioidea.*
- *He looked up "family pholidae" because he had never seen it before.*

---

family pholididae *(noun)*

A family of fish of suborder Blennioidea.

- *She wrote a short paragraph that included "family pholididae."*
- *The article explained what "family pholididae" means with a simple example.*

---

family phyllidae *(noun)*

Leaf insects.

- *He looked up "family phyllidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family phyllidae."*

---

family phyllostomatidae *(noun)*

New World leaf-nosed bats.

- *They discussed "family phyllostomatidae" during the group presentation.*
- *The article explained what "family phyllostomatidae" means with a simple example.*

---

family phyllostomidae *(noun)*

New World leaf-nosed bats.

- *Understanding "family phyllostomidae" helps you talk about this topic clearly.*
- *They discussed "family phyllostomidae" during the group presentation.*

---

family physeteridae *(noun)*

Sperm whales.

- *They discussed "family physeteridae" during the group presentation.*

- *He looked up "family physeteridae" because he had never seen it before.*

family physidae *(noun)*

Freshwater snails.

- *They discussed "family physidae" during the group presentation.*
- *She wrote a short paragraph that included "family physidae."*

family picidae *(noun)*

Woodpeckers.

- *She wrote a short paragraph that included "family picidae."*
- *He looked up "family picidae" because he had never seen it before.*

family pieridae *(noun)*

Arthropod family including cabbage butterflies; sulphur butterflies.

- *The article explained what "family pieridae" means with a simple example.*
- *In class, the teacher used "family pieridae" to mean arthropod family including cabbage butterflies;....*

family pinnotheridae *(noun)*

Tiny soft-bodied crabs.

- *Understanding "family pinnotheridae" helps you talk about this topic clearly.*
- *In class, the teacher used "family pinnotheridae" to mean tiny soft-bodied crabs.*

family pipidae *(noun)*

Tongueless frogs.

- *Understanding "family pipidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family pipidae."*

family plasmodiidae *(noun)*

Malaria parasites.

- *Understanding "family plasmodiidae" helps you talk about this topic clearly.*
- *He looked up "family plasmodiidae" because he had never seen it before.*

family platanistidae *(noun)*

River dolphins.

- *She wrote a short paragraph that included "family platanistidae."*
- *He looked up "family platanistidae" because he had never seen it before.*

family platycephalidae *(noun)*

Scorpaenoid flatheads.

- *Understanding "family platycephalidae" helps you talk about this topic clearly.*
- *They discussed "family platycephalidae" during the group presentation.*

family pleurobrachiidae *(noun)*

Sea gooseberries.

- *They discussed "family pleurobrachiidae" during the group presentation.*
- *Understanding "family pleurobrachiidae" helps you talk about this topic clearly.*

family pleuronectidae *(noun)*

Righteye flounders.

- *In class, the teacher used "family pleuronectidae" to mean righteye flounders.*
- *The article explained what "family pleuronectidae" means with a simple example.*

family ploceidae *(noun)*

Weaverbirds.

- *In class, the teacher used "family ploceidae" to mean weaverbirds.*
- *They discussed "family ploceidae" during the group presentation.*

family podicipedidae *(noun)*

Coextensive with the order Podicipitiformes.

- *In class, the teacher used "family podicipedidae" to mean coextensive with the order podicipitiformes.*
- *He looked up "family podicipedidae" because he had never seen it before.*

family polyangiaceae *(noun)*

Bacteria living mostly in soils and on dung.

- *Understanding "family polyangiaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family polyangiaceae."*

family polyodontidae *(noun)*

Paddlefishes.

- *She wrote a short paragraph that included "family polyodontidae."*
- *The article explained what "family polyodontidae" means with a simple example.*

family polypedatidae *(noun)*

Old World tree frogs.

- *The article explained what "family polypedatidae" means with a simple example.*
- *They discussed "family polypedatidae" during the group presentation.*

family pomacentridae *(noun)*

Damselfishes.

- *In class, the teacher used "family pomacentridae" to mean damselfishes.*
- *The article explained what "family pomacentridae" means with a simple example.*

family pomatomidae *(noun)*

Food and game fishes related to pompanos.

- *In class, the teacher used "family pomatomidae" to mean food and game fishes related to pompanos.*
- *He looked up "family pomatomidae" because he had never seen it before.*

family pongidae *(noun)*

Usually considered as comprising orangutans; gorillas; chimpanzees; and sometimes gibbons.

- *She wrote a short paragraph that included "family pongidae."*
- *He looked up "family pongidae" because he had never seen it before.*

family portunidae *(noun)*

Swimming crabs.

- *They discussed "family portunidae" during the group presentation.*
- *Understanding "family portunidae" helps you talk about this topic clearly.*

family potamogalidae *(noun)*

Otter shrews.

- *She wrote a short paragraph that included "family potamogalidae."*
- *Understanding "family potamogalidae" helps you talk about this topic clearly.*

family priacanthidae *(noun)*

Small carnivorous percoid fishes found worldwide in tropical seas.

- *The article explained what "family priacanthidae" means with a simple example.*
- *In class, the teacher used "family priacanthidae" to mean small carnivorous percoid fishes found worldwide in....*

family pristidae *(noun)*

Large primitive rays with elongated snouts.

- *She wrote a short paragraph that included "family pristidae."*
- *They discussed "family pristidae" during the group presentation.*

family procaviidae *(noun)*

Includes all recent members of the order Hyracoidea.

- *The article explained what "family procaviidae" means with a simple example.*
- *Understanding "family procaviidae" helps you talk about this topic clearly.*

---

family procellariidae *(noun)*

Petrels; fulmars; shearwaters.

- *He looked up "family procellariidae" because he had never seen it before.*
- *They discussed "family procellariidae" during the group presentation.*

---

family procyonidae *(noun)*

Raccoons; coatis; cacomistles; kinkajous; and sometimes pandas.

- *She wrote a short paragraph that included "family procyonidae."*
- *He looked up "family procyonidae" because he had never seen it before.*

---

family proteidae *(noun)*

Mud puppies.

- *They discussed "family proteidae" during the group presentation.*
- *He looked up "family proteidae" because he had never seen it before.*

---

family prunellidae *(noun)*

Hedge sparrow.

- *They discussed "family prunellidae" during the group presentation.*
- *Understanding "family prunellidae" helps you talk about this topic clearly.*

---

family pseudococcidae *(noun)*

Scalelike insects: mealybugs.

- *They discussed "family pseudococcidae" during the group presentation.*
- *He looked up "family pseudococcidae" because he had never seen it before.*

---

family pseudomonodaceae *(noun)*

Rod-shaped Gram-negative bacteria; include important plant and animal pathogens.

- *Understanding "family pseudomonodaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family pseudomonodaceae."*

---

family psittacidae *(noun)*

Coextensive with the order Psittaciformes.

- *She wrote a short paragraph that included "family psittacidae."*
- *The article explained what "family psittacidae" means with a simple example.*

---

family psocidae *(noun)*

A family of small soft-bodied insects that feed on decaying vegetation; related to booklice.

- *Understanding "family psocidae" helps you talk about this topic clearly.*
- *He looked up "family psocidae" because he had never seen it before.*

---

family psychodidae *(noun)*

Very small two-winged flies with hairy wings that develop in moss and damp vegetable matter: sand flies.

- *The article explained what "family psychodidae" means with a simple example.*
- *In class, the teacher used "family psychodidae" to mean very small two-winged flies with hairy wings that....*

---

family psyllidae *(noun)*

Jumping plant lice.

- *The article explained what "family psyllidae" means with a simple example.*
- *In class, the teacher used "family psyllidae" to mean jumping plant lice.*

---

family pteriidae *(noun)*

Pearl oysters.

- *They discussed "family pteriidae" during the group presentation.*
- *The article explained what "family pteriidae" means with a simple example.*

family pteroclididae *(noun)*

Sandgrouses.

- *The article explained what “family pteroclididae” means with a simple example.*
- *Understanding “family pteroclididae” helps you talk about this topic clearly.*

family pterodactylidae *(noun)*

A reptile family in the order Pterosauria.

- *He looked up “family pterodactylidae” because he had never seen it before.*
- *In class, the teacher used “family pterodactylidae” to mean a reptile family in the order pterosauria.*

family pulicidae *(noun)*

Many common fleas attacking humans and domestic animals.

- *He looked up “family pulicidae” because he had never seen it before.*
- *She wrote a short paragraph that included “family pulicidae.”*

family pygopodidae *(noun)*

Australian and Tasmanian lizards.

- *They discussed “family pygopodidae” during the group presentation.*
- *Understanding “family pygopodidae” helps you talk about this topic clearly.*

family pyralididae *(noun)*

Bee moths; corn borers; flour moths.

- *He looked up “family pyralididae” because he had never seen it before.*
- *Understanding “family pyralididae” helps you talk about this topic clearly.*

family pythonidae *(noun)*

In some classifications a family separate from Boidae comprising Old World boas.

- *They discussed “family pythonidae” during the group presentation.*
- *He looked up “family pythonidae” because he had never seen it before.*

family rachycentridae *(noun)*

Family of pelagic fishes containing solely the cobia.

- *He looked up “family rachycentridae” because he had never seen it before.*
- *In class, the teacher used “family rachycentridae” to mean family of pelagic fishes containing solely the cobia.*

family rajidae *(noun)*

Bottom-dwelling tropical rays: skates.

- *Understanding “family rajidae” helps you talk about this topic clearly.*
- *He looked up “family rajidae” because he had never seen it before.*

family rallidae *(noun)*

Rails; crakes; gallinules; coots.

- *He looked up “family rallidae” because he had never seen it before.*
- *Understanding “family rallidae” helps you talk about this topic clearly.*

family ranidae *(noun)*

A family nearly cosmopolitan in distribution: true frogs.

- *In class, the teacher used “family ranidae” to mean a family nearly cosmopolitan in distribution: true....*
- *They discussed “family ranidae” during the group presentation.*

family raphidae *(noun)*

Extinct dodos and solitaires.

- *He looked up “family raphidae” because he had never seen it before.*
- *Understanding “family raphidae” helps you talk about this topic clearly.*

family raphidiidae *(noun)*

A family of arthropods of the suborder Megaloptera, including snakeflies.

- *Understanding "family raphidiidae" helps you talk about this topic clearly.*
- *He looked up "family raphidiidae" because he had never seen it before.*

family recurvirostridae *(noun)*

Long-legged shorebirds.

- *The article explained what "family recurvirostridae" means with a simple example.*
- *They discussed "family recurvirostridae" during the group presentation.*

family reduviidae *(noun)*

Assassin bugs.

- *He looked up "family reduviidae" because he had never seen it before.*
- *In class, the teacher used "family reduviidae" to mean assassin bugs.*

family regalecidae *(noun)*

Ribbonfishes.

- *In class, the teacher used "family regalecidae" to mean ribbonfishes.*
- *Understanding "family regalecidae" helps you talk about this topic clearly.*

family rheidae *(noun)*

A family of birds coextensive with the order Rheiformes.

- *He looked up "family rheidae" because he had never seen it before.*
- *They discussed "family rheidae" during the group presentation.*

family rhincodontidae *(noun)*

Small-toothed sharks comprising only one species.

- *The article explained what "family rhincodontidae" means with a simple example.*
- *She wrote a short paragraph that included "family rhincodontidae."*

family rhinobatidae *(noun)*

Primitive rays with guitar-shaped bodies.

- *In class, the teacher used "family rhinobatidae" to mean primitive rays with guitar-shaped bodies.*
- *He looked up "family rhinobatidae" because he had never seen it before.*

family rhinocerotidae *(noun)*

Rhinoceroses.

- *Understanding "family rhinocerotidae" helps you talk about this topic clearly.*
- *They discussed "family rhinocerotidae" during the group presentation.*

family rhinolophidae *(noun)*

Old World leaf-nosed bats.

- *He looked up "family rhinolophidae" because he had never seen it before.*
- *They discussed "family rhinolophidae" during the group presentation.*

family rhinotermitidae *(noun)*

Large widely distributed family of termites of temperate to tropical regions.

- *Understanding "family rhinotermitidae" helps you talk about this topic clearly.*
- *They discussed "family rhinotermitidae" during the group presentation.*

family rhiptoglossa *(noun)*

Old World chameleons; in some classifications they are considered a superfamily of Sauria.

- *They discussed "family rhiptoglossa" during the group presentation.*
- *The article explained what "family rhiptoglossa" means with a simple example.*

family rhizobiaceae *(noun)*

A small family of rod-shaped bacteria.

- *Understanding "family rhizobiaceae" helps you talk about this topic clearly.*

- *The article explained what "family rhizobiaceae" means with a simple example.*

family rhodymeniaceae *(noun)*

A family of protoctist.

- *Understanding "family rhodymeniaceae" helps you talk about this topic clearly.*
- *He looked up "family rhodymeniaceae" because he had never seen it before.*

family rickettsiaceae *(noun)*

Microorganism resembling bacteria inhabiting arthropod tissues but capable of causing disease in vertebrates.

- *They discussed "family rickettsiaceae" during the group presentation.*
- *Understanding "family rickettsiaceae" helps you talk about this topic clearly.*

family rynchopidae *(noun)*

Coextensive with the genus Rynchops: skimmers.

- *In class, the teacher used "family rynchopidae" to mean coextensive with the genus rynchops: skimmers.*
- *They discussed "family rynchopidae" during the group presentation.*

family sagittariidae *(noun)*

Secretary birds.

- *They discussed "family sagittariidae" during the group presentation.*
- *The article explained what "family sagittariidae" means with a simple example.*

family salamandridae *(noun)*

Salamanders.

- *Understanding "family salamandridae" helps you talk about this topic clearly.*
- *He looked up "family salamandridae" because he had never seen it before.*

family salpidae *(noun)*

A small family of tunicates in the class Thaliacea.

- *The article explained what "family salpidae" means with a simple example.*
- *In class, the teacher used "family salpidae" to mean a small family of tunicates in the class thaliacea.*

family sarcoptidae *(noun)*

Small whitish mites.

- *They discussed "family sarcoptidae" during the group presentation.*
- *He looked up "family sarcoptidae" because he had never seen it before.*

family saturniidae *(noun)*

Important and widely distributed family of moths including some of the largest insects known.

- *The article explained what "family saturniidae" means with a simple example.*
- *In class, the teacher used "family saturniidae" to mean important and widely distributed family of moths....*

family satyridae *(noun)*

A widely distributed family of butterflies common near the edges of woods.

- *Understanding "family satyridae" helps you talk about this topic clearly.*
- *In class, the teacher used "family satyridae" to mean a widely distributed family of butterflies common....*

family scaridae *(noun)*

Parrotfishes.

- *Understanding "family scaridae" helps you talk about this topic clearly.*
- *They discussed "family scaridae" during the group presentation.*

family schistosomatidae *(noun)*

A family of Trematoda.

- *Understanding "family schistosomatidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family schistosomatidae" to mean a family of trematoda.*

family schizophyceae *(noun)*

Former terms for Cyanophyceae.

- *She wrote a short paragraph that included "family schizophyceae."*
- *He looked up "family schizophyceae" because he had never seen it before.*

---

family sciaenidae *(noun)*

Warm-water marine fishes including the drums and grunts and croakers and sea trout.

- *In class, the teacher used "family sciaenidae" to mean warm-water marine fishes including the drums and....*
- *The article explained what "family sciaenidae" means with a simple example.*

---

family sciaridae *(noun)*

Fungus gnats.

- *They discussed "family sciaridae" during the group presentation.*
- *Understanding "family sciaridae" helps you talk about this topic clearly.*

---

family sciuridae *(noun)*

A mammal family of true squirrels including: ground squirrels; marmots; chipmunks; flying squirrels; spermophiles.

- *She wrote a short paragraph that included "family sciuridae."*
- *The article explained what "family sciuridae" means with a simple example.*

---

family scolopacidae *(noun)*

Sandpiper family: sandpipers; woodcocks; snipes; tattlers; curlews; godwits; dowitchers.

- *The article explained what "family scolopacidae" means with a simple example.*
- *In class, the teacher used "family scolopacidae" to mean sandpiper family: sandpipers; woodcocks; snipes;....*

---

family scolytidae *(noun)*

Large family of bark-boring or wood-boring short-beaked beetles; very destructive to forest and fruit trees.

- *She wrote a short paragraph that included "family scolytidae."*
- *The article explained what "family scolytidae" means with a simple example.*

---

family scomberesocidae *(noun)*

Only sauries.

- *In class, the teacher used "family scomberesocidae" to mean only sauries.*
- *Understanding "family scomberesocidae" helps you talk about this topic clearly.*

---

family scombresocidae *(noun)*

Only sauries.

- *She wrote a short paragraph that included "family scombresocidae."*
- *They discussed "family scombresocidae" during the group presentation.*

---

family scombridae *(noun)*

Marine food fishes: mackerels; chub mackerels; tuna.

- *She wrote a short paragraph that included "family scombridae."*
- *He looked up "family scombridae" because he had never seen it before.*

---

family scorpaenidae *(noun)*

Scorpionfishes; rockfishes; lionfishes.

- *He looked up "family scorpaenidae" because he had never seen it before.*
- *They discussed "family scorpaenidae" during the group presentation.*

---

family scutigeridae *(noun)*

A family of Chilopoda.

- *The article explained what "family scutigeridae" means with a simple example.*
- *She wrote a short paragraph that included "family scutigeridae."*

---

family scyliorhinidae *(noun)*

Small bottom-dwelling sharks.

- *The article explained what "family scyliorhinidae" means with a simple example.*
- *In class, the teacher used "family scyliorhinidae" to mean small bottom-dwelling sharks.*

---

family sepiidae *(noun)*

True cuttlefishes.

- *He looked up "family sepiidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family sepiidae."*

---

family serranidae *(noun)*

Marine fishes: sea basses; sea perches; groupers; jewfish.

- *In class, the teacher used "family serranidae" to mean marine fishes: sea basses; sea perches; groupers;....*
- *They discussed "family serranidae" during the group presentation.*

---

family sialidae *(noun)*

An arthropod family including: alderflies.

- *Understanding "family sialidae" helps you talk about this topic clearly.*
- *They discussed "family sialidae" during the group presentation.*

---

family sillaginidae *(noun)*

Small family of small food fishes in shallow waters of the Pacific around Indonesia.

- *Understanding "family sillaginidae" helps you talk about this topic clearly.*
- *The article explained what "family sillaginidae" means with a simple example.*

---

family siluridae *(noun)*

Old World catfishes.

- *He looked up "family siluridae" because he had never seen it before.*
- *They discussed "family siluridae" during the group presentation.*

---

family simuliidae *(noun)*

Blackflies and sand flies.

- *Understanding "family simuliidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family simuliidae."*

---

family sisyridae *(noun)*

An arthropod family of the order Neuroptera that includes spongeflies.

- *The article explained what "family sisyridae" means with a simple example.*
- *She wrote a short paragraph that included "family sisyridae."*

---

family solenidae *(noun)*

Razor clams.

- *Understanding "family solenidae" helps you talk about this topic clearly.*
- *They discussed "family solenidae" during the group presentation.*

---

family sparidae *(noun)*

Porgies; scups.

- *The article explained what "family sparidae" means with a simple example.*
- *They discussed "family sparidae" during the group presentation.*

---

family sphecidae *(noun)*

Mud daubers; some digger wasps.

- *In class, the teacher used "family sphecidae" to mean mud daubers; some digger wasps.*
- *They discussed "family sphecidae" during the group presentation.*

---

family spheniscidae *(noun)*

Comprising all existing penguins.

- *In class, the teacher used "family spheniscidae" to mean comprising all existing penguins.*
- *They discussed "family spheniscidae" during the group presentation.*

family sphyraenidae *(noun)*

Monotypic family of large active fishes of tropical and subtropical waters: barracuda.

- *She wrote a short paragraph that included "family sphyraenidae."*
- *Understanding "family sphyraenidae" helps you talk about this topic clearly.*

family sphyrnidae *(noun)*

Hammerhead sharks; bonnethead sharks.

- *She wrote a short paragraph that included "family sphyrnidae."*
- *He looked up "family sphyrnidae" because he had never seen it before.*

family spirillaceae *(noun)*

Rigid spirally curved elongate bacteria.

- *He looked up "family spirillaceae" because he had never seen it before.*
- *They discussed "family spirillaceae" during the group presentation.*

family spirochaetaceae *(noun)*

Large coarsely spiral bacteria; free-living in fresh or salt water or commensal in bodies of oysters.

- *They discussed "family spirochaetaceae" during the group presentation.*
- *In class, the teacher used "family spirochaetaceae" to mean large coarsely spiral bacteria; free-living in....*

family spirulidae *(noun)*

Coextensive with the genus Spirula; included in the order Belemnoidea in some older classifications.

- *Understanding "family spirulidae" helps you talk about this topic clearly.*
- *The article explained what "family spirulidae" means with a simple example.*

family squalidae *(noun)*

Dogfishes having a spine in each dorsal fin.

- *She wrote a short paragraph that included "family squalidae."*
- *The article explained what "family squalidae" means with a simple example.*

family squatinidae *(noun)*

Bottom-dwelling ray-like sharks.

- *Understanding "family squatinidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family squatinidae" to mean bottom-dwelling ray-like sharks.*

family squillidae *(noun)*

Crustaceans that burrow in mud or under stones in shallow water along the seashore.

- *The article explained what "family squillidae" means with a simple example.*
- *Understanding "family squillidae" helps you talk about this topic clearly.*

family stenopelmatidae *(noun)*

Long-horned grasshoppers.

- *They discussed "family stenopelmatidae" during the group presentation.*
- *In class, the teacher used "family stenopelmatidae" to mean long-horned grasshoppers.*

family stercorariidae *(noun)*

Jaegers and skuas:.

- *The article explained what "family stercorariidae" means with a simple example.*
- *Understanding "family stercorariidae" helps you talk about this topic clearly.*

family stichaeidae *(noun)*

Pricklebacks.

- *Understanding "family stichaeidae" helps you talk about this topic clearly.*
- *He looked up "family stichaeidae" because he had never seen it before.*

family stizidae *(noun)*

Cicada killers.

- *They discussed "family stizidae" during the group presentation.*
- *The article explained what "family stizidae" means with a simple example.*

---

family streptomycetaceae *(noun)*

Higher bacteria typically aerobic soil saprophytes.

- *He looked up "family streptomycetaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "family streptomycetaceae."*

---

family strigidae *(noun)*

A family of nocturnal birds of the order Strigiformes.

- *He looked up "family strigidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family strigidae."*

---

family stromateidae *(noun)*

Butterfishes: harvest fishes; dollar fishes.

- *In class, the teacher used "family stromateidae" to mean butterfishes: harvest fishes; dollar fishes.*
- *The article explained what "family stromateidae" means with a simple example.*

---

family strombidae *(noun)*

The family of conchs.

- *In class, the teacher used "family strombidae" to mean the family of conchs.*
- *Understanding "family strombidae" helps you talk about this topic clearly.*

---

family sturnidae *(noun)*

Old World starlings.

- *They discussed "family sturnidae" during the group presentation.*
- *She wrote a short paragraph that included "family sturnidae."*

---

family suidae *(noun)*

Pigs; hogs; boars.

- *She wrote a short paragraph that included "family suidae."*
- *They discussed "family suidae" during the group presentation.*

---

family sulidae *(noun)*

Gannets and boobies.

- *She wrote a short paragraph that included "family sulidae."*
- *The article explained what "family sulidae" means with a simple example.*

---

family sylviidae *(noun)*

In some classifications considered a subfamily (Sylviinae) of the family Muscicapidae: Old World (true) warblers; American kinglets and gnatcatchers.

- *In class, the teacher used "family sylviidae" to mean in some classifications considered a subfamily....*
- *The article explained what "family sylviidae" means with a simple example.*

---

family synodontidae *(noun)*

Soft-finned bottom-dwelling fishes.

- *The article explained what "family synodontidae" means with a simple example.*
- *In class, the teacher used "family synodontidae" to mean soft-finned bottom-dwelling fishes.*

---

family taeniidae *(noun)*

A family of Cestoda.

- *He looked up "family taeniidae" because he had never seen it before.*
- *They discussed "family taeniidae" during the group presentation.*

---

family tapiridae *(noun)*

Tapirs and extinct related forms.

- *She wrote a short paragraph that included "family tapiridae."*

- *Understanding "family tapiridae" helps you talk about this topic clearly.*

family tarsiidae *(noun)*

Coextensive with the genus Tarsius: tarsiers.

- *He looked up "family tarsiidae" because he had never seen it before.*
- *Understanding "family tarsiidae" helps you talk about this topic clearly.*

family teiidae *(noun)*

Whiptails; etc.

- *She wrote a short paragraph that included "family teiidae."*
- *They discussed "family teiidae" during the group presentation.*

family tenrecidae *(noun)*

Tenrecs and extinct related forms.

- *Understanding "family tenrecidae" helps you talk about this topic clearly.*
- *The article explained what "family tenrecidae" means with a simple example.*

family terebellidae *(noun)*

Marine burrowing or tube-forming polychete worms usually having long thick bodies.

- *He looked up "family terebellidae" because he had never seen it before.*
- *Understanding "family terebellidae" helps you talk about this topic clearly.*

family testudinidae *(noun)*

Land tortoises.

- *She wrote a short paragraph that included "family testudinidae."*
- *The article explained what "family testudinidae" means with a simple example.*

family tetranychidae *(noun)*

Plant-feeding mites.

- *The article explained what "family tetranychidae" means with a simple example.*
- *They discussed "family tetranychidae" during the group presentation.*

family tettigoniidae *(noun)*

Long-horned grasshoppers; katydids.

- *Understanding "family tettigoniidae" helps you talk about this topic clearly.*
- *In class, the teacher used "family tettigoniidae" to mean long-horned grasshoppers; katydids.*

family theraphosidae *(noun)*

Large tropical spiders; tarantulas.

- *They discussed "family theraphosidae" during the group presentation.*
- *He looked up "family theraphosidae" because he had never seen it before.*

family theridiidae *(noun)*

A family of comb-footed spiders.

- *He looked up "family theridiidae" because he had never seen it before.*
- *In class, the teacher used "family theridiidae" to mean a family of comb-footed spiders.*

family thiobacteriaceae *(noun)*

Free-living coccoid to rod-shaped bacteria that derive energy from oxidizing sulfur or sulfur compounds.

- *She wrote a short paragraph that included "family thiobacteriaceae."*
- *He looked up "family thiobacteriaceae" because he had never seen it before.*

family tinamidae *(noun)*

Comprising the tinamous.

- *In class, the teacher used "family tinamidae" to mean comprising the tinamous.*
- *The article explained what "family tinamidae" means with a simple example.*

family tineidae *(noun)*

Clothes moths.

- *The article explained what "family tineidae" means with a simple example.*
- *In class, the teacher used "family tineidae" to mean clothes moths.*

family titanosauridae *(noun)*

Herbivorous dinosaurs of the Cretaceous.

- *The article explained what "family titanosauridae" means with a simple example.*
- *They discussed "family titanosauridae" during the group presentation.*

family todidae *(noun)*

A family of birds of the order Coraciiformes.

- *In class, the teacher used "family todidae" to mean a family of birds of the order coraciiformes.*
- *The article explained what "family todidae" means with a simple example.*

family torpedinidae *(noun)*

Electric rays.

- *Understanding "family torpedinidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family torpedinidae."*

family toxotidae *(noun)*

Archerfishes.

- *She wrote a short paragraph that included "family toxotidae."*
- *Understanding "family toxotidae" helps you talk about this topic clearly.*

family trachipteridae *(noun)*

Ribbonfishes.

- *She wrote a short paragraph that included "family trachipteridae."*
- *He looked up "family trachipteridae" because he had never seen it before.*

family tragulidae *(noun)*

Chevrotains.

- *He looked up "family tragulidae" because he had never seen it before.*
- *In class, the teacher used "family tragulidae" to mean chevrotains.*

family trephritidae *(noun)*

Fruit flies; some leaf miners.

- *The article explained what "family trephritidae" means with a simple example.*
- *In class, the teacher used "family trephritidae" to mean fruit flies; some leaf miners.*

family treponemataceae *(noun)*

Small spirochetes some parasitic or pathogenic.

- *In class, the teacher used "family treponemataceae" to mean small spirochetes some parasitic or pathogenic.*
- *The article explained what "family treponemataceae" means with a simple example.*

family triakidae *(noun)*

Small sharks with smooth skins and lacking spines on their dorsal fins.

- *Understanding "family triakidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family triakidae."*

family tribonemaceae *(noun)*

Simple filamentous freshwater yellow-green algae.

- *They discussed "family tribonemaceae" during the group presentation.*
- *In class, the teacher used "family tribonemaceae" to mean simple filamentous freshwater yellow-green algae.*

family trichechidae *(noun)*

Comprising only the manatees.

- *They discussed "family trichechidae" during the group presentation.*
- *She wrote a short paragraph that included "family trichechidae."*

---

family trichiuridae *(noun)*

Cutlassfishes.

- *She wrote a short paragraph that included "family trichiuridae."*
- *Understanding "family trichiuridae" helps you talk about this topic clearly.*

---

family tridacnidae *(noun)*

Large marine hard-shell clams.

- *In class, the teacher used "family tridacnidae" to mean large marine hard-shell clams.*
- *They discussed "family tridacnidae" during the group presentation.*

---

family triglidae *(noun)*

In some classifications restricted to the gurnards and subdivided into the subfamilies Triglinae (true sea robins) and Peristediinae (armored sea robins).

- *The article explained what "family triglidae" means with a simple example.*
- *Understanding "family triglidae" helps you talk about this topic clearly.*

---

family trionychidae *(noun)*

Soft-shelled turtles.

- *She wrote a short paragraph that included "family trionychidae."*
- *The article explained what "family trionychidae" means with a simple example.*

---

family triopidae *(noun)*

A family of Notostraca.

- *The article explained what "family triopidae" means with a simple example.*
- *They discussed "family triopidae" during the group presentation.*

---

family trochilidae *(noun)*

Hummingbirds.

- *He looked up "family trochilidae" because he had never seen it before.*
- *Understanding "family trochilidae" helps you talk about this topic clearly.*

---

family trogonidae *(noun)*

Coextensive with the order Trogoniformes.

- *Understanding "family trogonidae" helps you talk about this topic clearly.*
- *They discussed "family trogonidae" during the group presentation.*

---

family trypetidae *(noun)*

Fruit flies; some leaf miners.

- *They discussed "family trypetidae" during the group presentation.*
- *Understanding "family trypetidae" helps you talk about this topic clearly.*

---

family tupaiidae *(noun)*

Tree shrews; in some classifications tree shrews are considered prosimian primates.

- *He looked up "family tupaiidae" because he had never seen it before.*
- *Understanding "family tupaiidae" helps you talk about this topic clearly.*

---

family turdidae *(noun)*

Thrushes; in some classifications considered a subfamily (Turdinae) of the family Muscicapidae.

- *In class, the teacher used "family turdidae" to mean thrushes; in some classifications considered a....*
- *The article explained what "family turdidae" means with a simple example.*

---

family turnicidae *(noun)*

Small Old World birds resembling but not related to true quail.

- *He looked up "family turnicidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family turnicidae."*

family tylenchidae *(noun)*

A family of Nematoda.

- *In class, the teacher used "family tylenchidae" to mean a family of nematoda.*
- *The article explained what "family tylenchidae" means with a simple example.*

family typhlopidae *(noun)*

Blind snakes.

- *She wrote a short paragraph that included "family typhlopidae."*
- *Understanding "family typhlopidae" helps you talk about this topic clearly.*

family tytonidae *(noun)*

Comprising only the barn owls.

- *She wrote a short paragraph that included "family tytonidae."*
- *Understanding "family tytonidae" helps you talk about this topic clearly.*

family uintatheriidae *(noun)*

An extinct family of Dinocerata.

- *Understanding "family uintatheriidae" helps you talk about this topic clearly.*
- *They discussed "family uintatheriidae" during the group presentation.*

family ulvaceae *(noun)*

Thin flat or tubular green algae.

- *In class, the teacher used "family ulvaceae" to mean thin flat or tubular green algae.*
- *He looked up "family ulvaceae" because he had never seen it before.*

family ursidae *(noun)*

Bears and extinct related forms.

- *She wrote a short paragraph that included "family ursidae."*
- *He looked up "family ursidae" because he had never seen it before.*

family varanidae *(noun)*

Monitor lizards.

- *They discussed "family varanidae" during the group presentation.*
- *In class, the teacher used "family varanidae" to mean monitor lizards.*

family veneridae *(noun)*

Hard-shell clams.

- *She wrote a short paragraph that included "family veneridae."*
- *Understanding "family veneridae" helps you talk about this topic clearly.*

family vespertilionidae *(noun)*

The majority of common bats of temperate regions of the world.

- *They discussed "family vespertilionidae" during the group presentation.*
- *In class, the teacher used "family vespertilionidae" to mean the majority of common bats of temperate regions of....*

family viperidae *(noun)*

Old World vipers.

- *She wrote a short paragraph that included "family viperidae."*
- *The article explained what "family viperidae" means with a simple example.*

family vireonidae *(noun)*

Small insectivorous American songbirds.

- *Understanding "family vireonidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "family vireonidae."*

family viverridae *(noun)*

Genets; civets; mongooses.

- *She wrote a short paragraph that included "family viverridae."*
- *The article explained what "family viverridae" means with a simple example.*

---

family viverrinae *(noun)*

Genets; civets; mongooses.

- *They discussed "family viverrinae" during the group presentation.*
- *Understanding "family viverrinae" helps you talk about this topic clearly.*

---

family volvocaceae *(noun)*

Unicellular or colonial biflagellate free-swimming flagellates.

- *He looked up "family volvocaceae" because he had never seen it before.*
- *Understanding "family volvocaceae" helps you talk about this topic clearly.*

---

family xantusiidae *(noun)*

Night lizards.

- *The article explained what "family xantusiidae" means with a simple example.*
- *She wrote a short paragraph that included "family xantusiidae."*

---

family xenicidae *(noun)*

Alternative names for the family comprising the New Zealand wrens.

- *He looked up "family xenicidae" because he had never seen it before.*
- *In class, the teacher used "family xenicidae" to mean alternative names for the family comprising the new....*

---

family xenopodidae *(noun)*

In some classifications the family of the genus Xenopus which is otherwise included in the family Pipidae.

- *In class, the teacher used "family xenopodidae" to mean in some classifications the family of the genus....*
- *He looked up "family xenopodidae" because he had never seen it before.*

---

family xenosauridae *(noun)*

Monotypic family of Mexican lizards.

- *In class, the teacher used "family xenosauridae" to mean monotypic family of mexican lizards.*
- *He looked up "family xenosauridae" because he had never seen it before.*

---

family xiphiidae *(noun)*

Comprising the common swordfishes.

- *The article explained what "family xiphiidae" means with a simple example.*
- *Understanding "family xiphiidae" helps you talk about this topic clearly.*

---

family zapodidae *(noun)*

Jumping mice.

- *They discussed "family zapodidae" during the group presentation.*
- *She wrote a short paragraph that included "family zapodidae."*

---

family zeidae *(noun)*

A family of fish in the order Zeomorphi.

- *He looked up "family zeidae" because he had never seen it before.*
- *She wrote a short paragraph that included "family zeidae."*

---

family ziphiidae *(noun)*

Beaked whales; in some especially former classifications included in the family Physeteridae.

- *They discussed "family ziphiidae" during the group presentation.*
- *The article explained what "family ziphiidae" means with a simple example.*

---

family zygnemataceae *(noun)*

Pond scums: common freshwater algae forming green slimy masses.

- *Understanding "family zygnemataceae" helps you talk about this topic clearly.*

- *The article explained what “family zygnemataceae” means with a simple example.*

---

famishment *(noun)*

A state of extreme hunger resulting from lack of essential nutrients over a prolonged period.

- *In class, the teacher used “famishment” to mean a state of extreme hunger resulting from lack of....*
- *They discussed “famishment” during the group presentation.*

---

fanaloka *(noun)*

Civet of Madagascar.

- *She wrote a short paragraph that included “fanaloka.”*
- *They discussed “fanaloka” during the group presentation.*

---

fanconi’s anaemia *(noun)*

A rare congenital anemia characterized by pancytopenia and hypoplasia of the bone marrow.

- *He looked up “fanconi’s anaemia” because he had never seen it before.*
- *They discussed “fanconi’s anaemia” during the group presentation.*

---

fanconi’s anemia *(noun)*

A rare congenital anemia characterized by pancytopenia and hypoplasia of the bone marrow.

- *The article explained what “fanconi’s anemia” means with a simple example.*
- *In class, the teacher used “fanconi’s anemia” to mean a rare congenital anemia characterized by....*

---

fantods *(noun)*

An ill-defined state of irritability and distress.

- *She wrote a short paragraph that included “fantods.”*
- *Understanding “fantods” helps you talk about this topic clearly.*

---

fascioliasis *(noun)*

Infestation with the liver fluke Fasciola hepatica; liver damage sometimes occurs; related to liver rot.

- *Understanding “fascioliasis” helps you talk about this topic clearly.*
- *He looked up “fascioliasis” because he had never seen it before.*

---

fasciolidae *(noun)*

A family of Trematoda.

- *In class, the teacher used “fasciolidae” to mean a family of trematoda.*
- *Understanding “fasciolidae” helps you talk about this topic clearly.*

---

fasciolopsiasis *(noun)*

Infestation with the large intestinal fluke Fasciolopsis buski; common in eastern Asia.

- *He looked up “fasciolopsiasis” because he had never seen it before.*
- *In class, the teacher used “fasciolopsiasis” to mean infestation with the large intestinal fluke....*

---

fasciolopsis *(noun)*

A genus of Fasciolidae.

- *They discussed “fasciolopsis” during the group presentation.*
- *The article explained what “fasciolopsis” means with a simple example.*

---

fasciolopsis buski *(noun)*

Fluke that is parasitic on humans and swine; common in eastern Asia.

- *The article explained what “fasciolopsis buski” means with a simple example.*
- *In class, the teacher used “fasciolopsis buski” to mean fluke that is parasitic on humans and swine; common....*

---

fasciolosis *(noun)*

Infestation with the liver fluke Fasciola hepatica; liver damage sometimes occurs; related to liver rot.

- *She wrote a short paragraph that included “fasciolosis.”*
- *He looked up “fasciolosis” because he had never seen it before.*

---

fatherliness *(noun)*

The benignity and protectiveness of or befitting a father.

- *The gentleness and fatherliness of the strange old man eased her fears.*
- *He looked up "fatherliness" because he had never seen it before.*

faucial tonsil *(noun)*

Either of two masses of lymphatic tissue one on each side of the oral pharynx.

- *In class, the teacher used "faucial tonsil" to mean either of two masses of lymphatic tissue one on....*
- *He looked up "faucial tonsil" because he had never seen it before.*

faultiness *(noun)*

The state of being defective.

- *In class, the teacher used "faultiness" to mean the state of being defective.*
- *The article explained what "faultiness" means with a simple example.*

favism *(noun)*

Anemia resulting from eating fava beans; victims have an inherited blood abnormality and enzyme deficiency.

- *He looked up "favism" because he had never seen it before.*
- *They discussed "favism" during the group presentation.*

favus *(noun)*

A contagious fungal infection of the scalp; occurs mainly in Africa and the Middle East.

- *The article explained what "favus" means with a simple example.*
- *In class, the teacher used "favus" to mean a contagious fungal infection of the scalp; occurs....*

febricity *(noun)*

A rise in the temperature of the body; frequently a symptom of infection.

- *She wrote a short paragraph that included "febricity."*
- *Understanding "febricity" helps you talk about this topic clearly.*

febrility *(noun)*

A rise in the temperature of the body; frequently a symptom of infection.

- *He looked up "febrility" because he had never seen it before.*
- *She wrote a short paragraph that included "febrility."*

feculence *(noun)*

Something that is feculent.

- *Understanding "feculence" helps you talk about this topic clearly.*
- *The article explained what "feculence" means with a simple example.*

felis manul *(noun)*

Small wildcat of the mountains of Siberia and Tibet and Mongolia.

- *In class, the teacher used "felis manul" to mean small wildcat of the mountains of siberia and tibet....*
- *The article explained what "felis manul" means with a simple example.*

felis ocreata *(noun)*

Widely distributed wildcat of Africa and Asia Minor.

- *Understanding "felis ocreata" helps you talk about this topic clearly.*
- *The article explained what "felis ocreata" means with a simple example.*

felis wiedi *(noun)*

Small spotted wildcat found from Texas to Brazil.

- *She wrote a short paragraph that included "felis wiedi."*
- *He looked up "felis wiedi" because he had never seen it before.*

felis yagouaroundi *(noun)*

Long-bodied long-tailed tropical American wildcat.

- *In class, the teacher used "felis yagouaroundi" to mean long-bodied long-tailed tropical american wildcat.*
- *The article explained what "felis yagouaroundi" means with a simple example.*

---

fenestra cochleae *(noun)*

Fenestra leading into the cochlea.

- *He looked up "fenestra cochleae" because he had never seen it before.*
- *She wrote a short paragraph that included "fenestra cochleae."*

---

fenestra vestibuli *(noun)*

Fenestra that has the base of the stapes attached to it.

- *They discussed "fenestra vestibuli" during the group presentation.*
- *He looked up "fenestra vestibuli" because he had never seen it before.*

---

fenusa *(noun)*

Birch leaf miner.

- *In class, the teacher used "fenusa" to mean birch leaf miner.*
- *He looked up "fenusa" because he had never seen it before.*

---

fenusa pusilla *(noun)*

Small black sawfly native to Europe but established in eastern United States; larvae mine the leaves of birches causing serious defoliation.

- *Understanding "fenusa pusilla" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "fenusa pusilla."*

---

festination *(noun)*

Involuntary shortening of stride and quickening of gait that occurs in some diseases (e.g., Parkinson's disease).

- *In class, the teacher used "festination" to mean involuntary shortening of stride and quickening of....*
- *They discussed "festination" during the group presentation.*

---

feverishness *(noun)*

A rise in the temperature of the body; frequently a symptom of infection.

- *They discussed "feverishness" during the group presentation.*
- *He looked up "feverishness" because he had never seen it before.*

---

fiberscope *(noun)*

A flexible medical instrument involving fiber optics that is used to examine internal organs.

- *Understanding "fiberscope" helps you talk about this topic clearly.*
- *The article explained what "fiberscope" means with a simple example.*

---

fibrillate *(verb)*

Make fine, irregular, rapid twitching movements.

- *His heart fibrillated and he died.*
- *The coach explained when to use "fibrillate" and when to wait.*

---

fibromyositis *(noun)*

Local inflammation of muscle and connective tissue.

- *They discussed "fibromyositis" during the group presentation.*
- *Understanding "fibromyositis" helps you talk about this topic clearly.*

---

fibrositis *(noun)*

Inflammation of white fibrous tissues (especially muscle sheaths).

- *In class, the teacher used "fibrositis" to mean inflammation of white fibrous tissues (especially....*
- *The article explained what "fibrositis" means with a simple example.*

---

figeater *(noun)*

Large greenish June beetle of southern United States.

- *They discussed "figeater" during the group presentation.*
- *She wrote a short paragraph that included "figeater."*

filariidae *(noun)*

Threadlike roundworms.

- *Understanding "filariidae" helps you talk about this topic clearly.*
- *He looked up "filariidae" because he had never seen it before.*

filefish *(noun)*

Narrow flattened warm-water fishes with leathery skin and a long file-like dorsal spine.

- *Understanding "filefish" helps you talk about this topic clearly.*
- *They discussed "filefish" during the group presentation.*

filoviridae *(noun)*

A family of threadlike RNA viruses that cause diseases in humans and nonhuman primates (monkeys and chimpanzees).

- *Understanding "filoviridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "filoviridae."*

filovirus *(noun)*

Animal viruses belonging to the family Filoviridae.

- *They discussed "filovirus" during the group presentation.*
- *The article explained what "filovirus" means with a simple example.*

firebrat *(noun)*

Lives in warm moist areas e.g. around furnaces.

- *She wrote a short paragraph that included "firebrat."*
- *The article explained what "firebrat" means with a simple example.*

fissipedia *(noun)*

In some classifications considered a suborder of Carnivora.

- *She wrote a short paragraph that included "fissipedia."*
- *The article explained what "fissipedia" means with a simple example.*

fissurella *(noun)*

Type genus of the family Fissurellidae: keyhole limpets.

- *Understanding "fissurella" helps you talk about this topic clearly.*
- *They discussed "fissurella" during the group presentation.*

fissurella apertura *(noun)*

Marine limpet having a conical shell with an opening at the apex.

- *Understanding "fissurella apertura" helps you talk about this topic clearly.*
- *They discussed "fissurella apertura" during the group presentation.*

fissurellidae *(noun)*

Marine limpets.

- *Understanding "fissurellidae" helps you talk about this topic clearly.*
- *The article explained what "fissurellidae" means with a simple example.*

fistularia *(noun)*

Type genus of the family Fistulariidae.

- *Understanding "fistularia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "fistularia."*

fistulariidae *(noun)*

Cornetfishes.

- *Understanding "fistulariidae" helps you talk about this topic clearly.*
- *They discussed "fistulariidae" during the group presentation.*

fistulous withers *(noun)*

A chronic inflammation of the withers of a horse.

- *In class, the teacher used "fistulous withers" to mean a chronic inflammation of the withers of a horse.*
- *He looked up "fistulous withers" because he had never seen it before.*

---

flagellata *(noun)*

Protozoa having flagella.

- *They discussed "flagellata" during the group presentation.*
- *Understanding "flagellata" helps you talk about this topic clearly.*

---

flagfish *(noun)*

A fish with a dark-blue back and whitish sides with red stripes; found in swamps and streams of Florida.

- *Understanding "flagfish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "flagfish."*

---

flamefish *(noun)*

A cardinalfish found in tropical Atlantic coastal waters.

- *She wrote a short paragraph that included "flamefish."*
- *He looked up "flamefish" because he had never seen it before.*

---

flatulency *(noun)*

A state of excessive gas in the alimentary canal.

- *They discussed "flatulency" during the group presentation.*
- *She wrote a short paragraph that included "flatulency."*

---

flaviviridae *(noun)*

A family of arboviruses carried by arthropods.

- *He looked up "flaviviridae" because he had never seen it before.*
- *She wrote a short paragraph that included "flaviviridae."*

---

flection *(noun)*

The state of being flexed (as of a joint).

- *In class, the teacher used "flection" to mean the state of being flexed (as of a joint).*
- *He looked up "flection" because he had never seen it before.*

---

flickertail *(noun)*

Of sagebrush and grassland areas of western United States and Canada.

- *He looked up "flickertail" because he had never seen it before.*
- *In class, the teacher used "flickertail" to mean of sagebrush and grassland areas of western united....*

---

flinthead *(noun)*

An American stork that resembles the true ibises in having a downward-curved bill; inhabits wooded swamps of New World tropics.

- *She wrote a short paragraph that included "flinthead."*
- *He looked up "flinthead" because he had never seen it before.*

---

florida smoothhound *(noun)*

Found from the northern Gulf of Mexico to Brazil.

- *The article explained what "florida smoothhound" means with a simple example.*
- *She wrote a short paragraph that included "florida smoothhound."*

---

flycatching warbler *(noun)*

Any of numerous American wood warblers that feed on insects caught on the wing.

- *The article explained what "flycatching warbler" means with a simple example.*
- *She wrote a short paragraph that included "flycatching warbler."*

---

flying phalanger *(noun)*

Nocturnal phalangers that move with gliding leaps using parachute-like folds of skin along the sides of the body.

- *She wrote a short paragraph that included "flying phalanger."*

- *The article explained what "flying phalanger" means with a simple example.*

---

footslog *(verb)*

Walk heavily and firmly, as when weary, or through mud.

- *Can you use "footslog" in a sentence that fits this situation?*
- *In everyday English, people use "footslog" when talking about this idea.*

---

foraminifer *(noun)*

Marine microorganism having a calcareous shell with openings where pseudopods protrude.

- *In class, the teacher used "foraminifer" to mean marine microorganism having a calcareous shell with....*
- *Understanding "foraminifer" helps you talk about this topic clearly.*

---

foremilk *(noun)*

Milky fluid secreted for the first day or two after parturition.

- *They discussed "foremilk" during the group presentation.*
- *Understanding "foremilk" helps you talk about this topic clearly.*

---

forficula *(noun)*

Type genus of Forficulidae.

- *She wrote a short paragraph that included "forficula."*
- *He looked up "forficula" because he had never seen it before.*

---

forficula auricularia *(noun)*

Sometimes destructive to cultivated bulbs.

- *The article explained what "forficula auricularia" means with a simple example.*
- *She wrote a short paragraph that included "forficula auricularia."*

---

forficulidae *(noun)*

Typical earwigs.

- *She wrote a short paragraph that included "forficulidae."*
- *Understanding "forficulidae" helps you talk about this topic clearly.*

---

formicarius *(noun)*

Type genus of the Formicariidae.

- *In class, the teacher used "formicarius" to mean type genus of the formicariidae.*
- *They discussed "formicarius" during the group presentation.*

---

formicate *(verb)*

Crawl about like ants.

- *Learners should practice how to use "formicate" in real sentences.*
- *In everyday English, people use "formicate" when talking about this idea.*

---

formication *(noun)*

Hallucinated sensation that insects or snakes are crawling over the skin; a common side-effect of extensive use of cocaine or amphetamines.

- *The article explained what "formication" means with a simple example.*
- *In class, the teacher used "formication" to mean hallucinated sensation that insects or snakes are....*

---

forthcomingness *(noun)*

The state of being imminent and liable to happen soon.

- *They discussed "forthcomingness" during the group presentation.*
- *The article explained what "forthcomingness" means with a simple example.*

---

foulmart *(noun)*

Dark brown mustelid of woodlands of Eurasia that gives off an unpleasant odor when threatened.

- *He looked up "foulmart" because he had never seen it before.*
- *Understanding "foulmart" helps you talk about this topic clearly.*

---

foumart *(noun)*

Dark brown mustelid of woodlands of Eurasia that gives off an unpleasant odor when threatened.

- *He looked up "foumart" because he had never seen it before.*
- *They discussed "foumart" during the group presentation.*

---

fradicin *(noun)*

An antibiotic obtained from an actinomycete and used (as a sulphate under the trade name Neobiotic) as an intestinal antiseptic in surgery.

- *He looked up "fradicin" because he had never seen it before.*
- *In class, the teacher used "fradicin" to mean an antibiotic obtained from an actinomycete and....*

---

frailness *(noun)*

The state of being weak in health or body (especially from old age).

- *She wrote a short paragraph that included "frailness."*
- *The article explained what "frailness" means with a simple example.*

---

frambesia *(noun)*

An infectious tropical disease resembling syphilis in its early stages; marked by red skin eruptions and ulcerating lesions.

- *Understanding "frambesia" helps you talk about this topic clearly.*
- *The article explained what "frambesia" means with a simple example.*

---

framboesia *(noun)*

An infectious tropical disease resembling syphilis in its early stages; marked by red skin eruptions and ulcerating lesions.

- *They discussed "framboesia" during the group presentation.*
- *She wrote a short paragraph that included "framboesia."*

---

frankliniella *(noun)*

Tobacco thrips.

- *He looked up "frankliniella" because he had never seen it before.*
- *In class, the teacher used "frankliniella" to mean tobacco thrips.*

---

frankliniella fusca *(noun)*

Injurious to growing tobacco and peanuts.

- *Understanding "frankliniella fusca" helps you talk about this topic clearly.*
- *He looked up "frankliniella fusca" because he had never seen it before.*

---

fratercula arctica *(noun)*

Common puffin of the northern Atlantic.

- *In class, the teacher used "fratercula arctica" to mean common puffin of the northern atlantic.*
- *The article explained what "fratercula arctica" means with a simple example.*

---

fratercula corniculata *(noun)*

Northern Pacific puffin.

- *Understanding "fratercula corniculata" helps you talk about this topic clearly.*
- *In class, the teacher used "fratercula corniculata" to mean northern pacific puffin.*

---

freetail *(noun)*

Small swift insectivorous bat with leathery ears and a long tail; common in warm regions.

- *He looked up "freetail" because he had never seen it before.*
- *Understanding "freetail" helps you talk about this topic clearly.*

---

freetailed bat *(noun)*

Small swift insectivorous bat with leathery ears and a long tail; common in warm regions.

- *Understanding "freetailed bat" helps you talk about this topic clearly.*
- *The article explained what "freetailed bat" means with a simple example.*

---

fregata *(noun)*

Type genus of the Fregatidae.

- *He looked up "fregata" because he had never seen it before.*
- *She wrote a short paragraph that included "fregata."*

---

fregatidae *(noun)*

Frigate birds.

- *He looked up "fregatidae" because he had never seen it before.*
- *They discussed "fregatidae" during the group presentation.*

---

fringilla coelebs *(noun)*

Small European finch with a cheerful song.

- *She wrote a short paragraph that included "fringilla coelebs."*
- *The article explained what "fringilla coelebs" means with a simple example.*

---

fringilla montifringilla *(noun)*

Eurasian finch.

- *The article explained what "fringilla montifringilla" means with a simple example.*
- *She wrote a short paragraph that included "fringilla montifringilla."*

---

fringillidae *(noun)*

Finches: goldfinches; bullfinches; chaffinches; siskins; canaries; cardinals; grosbeaks; crossbills; linnets; buntings.

- *He looked up "fringillidae" because he had never seen it before.*
- *She wrote a short paragraph that included "fringillidae."*

---

froghopper *(noun)*

A variety of spittlebug.

- *He looked up "froghopper" because he had never seen it before.*
- *Understanding "froghopper" helps you talk about this topic clearly.*

---

frogmarch *(verb)*

March a person against his will by any method.

- *He did not know how to use "frogmarch" until he saw an example.*
- *Learners should practice how to use "frogmarch" in real sentences.*

---

fructosuria *(noun)*

The presence of levulose is the urine.

- *Fructosuria is a harmless condition.*
- *She wrote a short paragraph that included "fructosuria."*

---

fucaceae *(noun)*

Small family of brown algae: gulfweeds; rockweeds.

- *The article explained what "fucaceae" means with a simple example.*
- *Understanding "fucaceae" helps you talk about this topic clearly.*

---

fucales *(noun)*

Coextensive with the family Fucaceae.

- *She wrote a short paragraph that included "fucales."*
- *They discussed "fucales" during the group presentation.*

---

fucoid algae *(noun)*

Any of various algae of the family Fucaceae.

- *Understanding "fucoid algae" helps you talk about this topic clearly.*
- *They discussed "fucoid algae" during the group presentation.*

---

fucus vesiculosus *(noun)*

A common rockweed used in preparing kelp and as manure.

- *The article explained what "fucus vesiculosus" means with a simple example.*
- *Understanding "fucus vesiculosus" helps you talk about this topic clearly.*

fulgoridae *(noun)*

Plant hoppers: lantern flies.

- *Understanding "fulgoridae" helps you talk about this topic clearly.*
- *The article explained what "fulgoridae" means with a simple example.*

fulmarus glacialis *(noun)*

Heavy short-tailed oceanic bird of polar regions.

- *In class, the teacher used "fulmarus glacialis" to mean heavy short-tailed oceanic bird of polar regions.*
- *They discussed "fulmarus glacialis" during the group presentation.*

fundulus heteroclitus *(noun)*

Silver-and-black killifish of saltwater marshes along the Atlantic coast of the United States.

- *They discussed "fundulus heteroclitus" during the group presentation.*
- *The article explained what "fundulus heteroclitus" means with a simple example.*

fungia *(noun)*

A genus comprising the usual mushroom corals.

- *He looked up "fungia" because he had never seen it before.*
- *Understanding "fungia" helps you talk about this topic clearly.*

funiculitis *(noun)*

Inflammation of a funiculus (especially an inflammation of the spermatic cord).

- *They discussed "funiculitis" during the group presentation.*
- *She wrote a short paragraph that included "funiculitis."*

furnariidae *(noun)*

E.g. ovenbirds.

- *He looked up "furnariidae" because he had never seen it before.*
- *In class, the teacher used "furnariidae" to mean e.g. ovenbirds.*

furnarius *(noun)*

Type genus of the family Furnariidae: ovenbirds.

- *She wrote a short paragraph that included "furnarius."*
- *Understanding "furnarius" helps you talk about this topic clearly.*

furuncle *(noun)*

A painful sore with a hard core filled with pus.

- *He looked up "furuncle" because he had never seen it before.*
- *She wrote a short paragraph that included "furuncle."*

gadidae *(noun)*

Large family of important mostly marine food fishes.

- *She wrote a short paragraph that included "gadidae."*
- *He looked up "gadidae" because he had never seen it before.*

gadiformes *(noun)*

Cods, haddocks, grenadiers; in some classifications considered equivalent to the order Anacanthini.

- *She wrote a short paragraph that included "gadiformes."*
- *The article explained what "gadiformes" means with a simple example.*

gadoid *(noun)*

A soft-finned fish of the family Gadidae.

- *He looked up "gadoid" because he had never seen it before.*
- *They discussed "gadoid" during the group presentation.*

gadoid fish *(noun)*

A soft-finned fish of the family Gadidae.

- *In class, the teacher used "gadoid fish" to mean a soft-finned fish of the family gadidae.*
- *The article explained what "gadoid fish" means with a simple example.*

---

gadus merlangus *(noun)*

A food fish of the Atlantic waters of Europe resembling the cod; sometimes placed in genus Gadus.

- *Understanding "gadus merlangus" helps you talk about this topic clearly.*
- *The article explained what "gadus merlangus" means with a simple example.*

---

gadus morhua *(noun)*

One of the world's most important commercial fishes.

- *He looked up "gadus morhua" because he had never seen it before.*
- *They discussed "gadus morhua" during the group presentation.*

---

galactocele *(noun)*

A cystic tumor containing milk or a milky substance (especially in the mammary glands).

- *In class, the teacher used "galactocele" to mean a cystic tumor containing milk or a milky substance....*
- *Understanding "galactocele" helps you talk about this topic clearly.*

---

galeocerdo *(noun)*

Tiger sharks.

- *She wrote a short paragraph that included "galeocerdo."*
- *He looked up "galeocerdo" because he had never seen it before.*

---

galeocerdo cuvieri *(noun)*

Large dangerous warm-water shark with striped or spotted body.

- *In class, the teacher used "galeocerdo cuvieri" to mean large dangerous warm-water shark with striped or....*
- *The article explained what "galeocerdo cuvieri" means with a simple example.*

---

galeorhinus *(noun)*

A genus of Carcharhinidae.

- *The article explained what "galeorhinus" means with a simple example.*
- *They discussed "galeorhinus" during the group presentation.*

---

galeorhinus zyopterus *(noun)*

Pacific shark valued for its fins (used by Chinese in soup) and liver (rich in vitamin A).

- *Understanding "galeorhinus zyopterus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "galeorhinus zyopterus."*

---

galictis vittatus *(noun)*

Carnivore of Central America and South America resembling a weasel with a greyish-white back and dark underparts.

- *He looked up "galictis vittatus" because he had never seen it before.*
- *She wrote a short paragraph that included "galictis vittatus."*

---

gallfly *(noun)*

Fragile mosquito-like flies that produce galls on plants.

- *The article explained what "gallfly" means with a simple example.*
- *She wrote a short paragraph that included "gallfly."*

---

galliformes *(noun)*

Pheasants; turkeys; grouse; partridges; quails; chickens; brush turkeys; curassows; hoatzins.

- *The article explained what "galliformes" means with a simple example.*
- *Understanding "galliformes" helps you talk about this topic clearly.*

---

gallinacean *(noun)*

Heavy-bodied largely ground-feeding domestic or game birds.

- *She wrote a short paragraph that included "gallinacean."*

- *He looked up “gallinacean” because he had never seen it before.*

---

gallinago gallinago *(noun)*

Common snipe of Eurasia and Africa.

- *Understanding “gallinago gallinago” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “gallinago gallinago.”*

---

gallinago gallinago delicata *(noun)*

American snipe.

- *They discussed “gallinago gallinago delicata” during the group presentation.*
- *He looked up “gallinago gallinago delicata” because he had never seen it before.*

---

gallinula chloropus *(noun)*

Black gallinule that inhabits ponds and lakes.

- *Understanding “gallinula chloropus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “gallinula chloropus.”*

---

gallinula chloropus cachinnans *(noun)*

North American dark bluish-grey gallinule.

- *In class, the teacher used “gallinula chloropus cachinnans” to mean north american dark bluish-grey gallinule.*
- *The article explained what “gallinula chloropus cachinnans” means with a simple example.*

---

gallirallus *(noun)*

Rails of New Zealand.

- *He looked up “gallirallus” because he had never seen it before.*
- *She wrote a short paragraph that included “gallirallus.”*

---

galumph *(verb)*

Move around heavily and clumsily.

- *The giant tortoises galumphed around in their pen.*
- *Learners should practice how to use “galumph” in real sentences.*

---

gambelia *(noun)*

Leopard lizards.

- *Understanding “gambelia” helps you talk about this topic clearly.*
- *The article explained what “gambelia” means with a simple example.*

---

gametocyte *(noun)*

An immature animal or plant cell that develops into a gamete by meiosis.

- *In class, the teacher used “gametocyte” to mean an immature animal or plant cell that develops into....*
- *The article explained what “gametocyte” means with a simple example.*

---

gangliocyte *(noun)*

A nerve cell whose body is outside the central nervous system.

- *He looked up “gangliocyte” because he had never seen it before.*
- *Understanding “gangliocyte” helps you talk about this topic clearly.*

---

ganoidei *(noun)*

A group of mostly extinct primitive bony fishes characterized by armor-like bony scales.

- *He looked up “ganoidei” because he had never seen it before.*
- *In class, the teacher used “ganoidei” to mean a group of mostly extinct primitive bony fishes....*

---

ganoin *(noun)*

Shiny substance that resemble enamel and is secreted by the corium of certain fishes (especially ganoid fishes) and composes the outer layer of their scales.

- *In class, the teacher used “ganoin” to mean shiny substance that resemble enamel and is....*
- *The article explained what “ganoin” means with a simple example.*

---

ganoine *(noun)*

Shiny substance that resemble enamel and is secreted by the corium of certain fishes (especially ganoid fishes) and composes the outer layer of their scales.

- *They discussed "ganoine" during the group presentation.*
- *Understanding "ganoine" helps you talk about this topic clearly.*

garboil *(noun)*

A state of commotion and noise and confusion.

- *He looked up "garboil" because he had never seen it before.*
- *They discussed "garboil" during the group presentation.*

garpike *(noun)*

Primitive predaceous North American fish covered with hard scales and having long jaws with needlelike teeth.

- *She wrote a short paragraph that included "garpike."*
- *They discussed "garpike" during the group presentation.*

garrulinae *(noun)*

Subfamily of the crow family: jays.

- *He looked up "garrulinae" because he had never seen it before.*
- *They discussed "garrulinae" during the group presentation.*

garrulus *(noun)*

Type genus of the Garrulinae: Old World jays.

- *The article explained what "garrulus" means with a simple example.*
- *They discussed "garrulus" during the group presentation.*

garullus garullus *(noun)*

Fawn-colored jay with black-and-white crest and blue-and-black wings.

- *Understanding "garullus garullus" helps you talk about this topic clearly.*
- *In class, the teacher used "garullus garullus" to mean fawn-colored jay with black-and-white crest and....*

gas phlegmon *(noun)*

(pathology) a deadly form of gangrene usually caused by clostridium bacteria that produce toxins that cause tissue death; can be used as a bioweapon.

- *They discussed "gas phlegmon" during the group presentation.*
- *The article explained what "gas phlegmon" means with a simple example.*

gasterophilidae *(noun)*

Horse botflies.

- *They discussed "gasterophilidae" during the group presentation.*
- *She wrote a short paragraph that included "gasterophilidae."*

gasterophilus *(noun)*

Type genus of the Gasterophilidae: horse botflies.

- *Understanding "gasterophilus" helps you talk about this topic clearly.*
- *The article explained what "gasterophilus" means with a simple example.*

gasterophilus intestinalis *(noun)*

Parasitic chiefly on horses.

- *They discussed "gasterophilus intestinalis" during the group presentation.*
- *In class, the teacher used "gasterophilus intestinalis" to mean parasitic chiefly on horses.*

gasteropoda *(noun)*

Snails and slugs and their relatives.

- *She wrote a short paragraph that included "gasteropoda."*
- *The article explained what "gasteropoda" means with a simple example.*

gasterosteidae *(noun)*

Sticklebacks.

- *He looked up "gasterosteidae" because he had never seen it before.*
- *In class, the teacher used "gasterosteidae" to mean sticklebacks.*

---

gasterosteus pungitius *(noun)*

Confined to rivers.

- *She wrote a short paragraph that included "gasterosteus pungitius."*
- *He looked up "gasterosteus pungitius" because he had never seen it before.*

---

gastralgia *(noun)*

An ache localized in the stomach or abdominal region.

- *They discussed "gastralgia" during the group presentation.*
- *The article explained what "gastralgia" means with a simple example.*

---

gastrocolic omentum *(noun)*

Part of the peritoneum attached to the stomach and to the colon and covering the intestines.

- *The article explained what "gastrocolic omentum" means with a simple example.*
- *Understanding "gastrocolic omentum" helps you talk about this topic clearly.*

---

gastroepiploic vein *(noun)*

One of two veins serving the great curvature of the stomach.

- *She wrote a short paragraph that included "gastroepiploic vein."*
- *He looked up "gastroepiploic vein" because he had never seen it before.*

---

gastroomental vein *(noun)*

One of two veins serving the great curvature of the stomach.

- *Understanding "gastroomental vein" helps you talk about this topic clearly.*
- *He looked up "gastroomental vein" because he had never seen it before.*

---

gastrophryne *(noun)*

Primarily tropical narrow-mouthed toads.

- *He looked up "gastrophryne" because he had never seen it before.*
- *She wrote a short paragraph that included "gastrophryne."*

---

gastrophryne carolinensis *(noun)*

Small toad of southeastern United States.

- *In class, the teacher used "gastrophryne carolinensis" to mean small toad of southeastern united states.*
- *Understanding "gastrophryne carolinensis" helps you talk about this topic clearly.*

---

gastrophryne olivacea *(noun)*

Small secretive toad with smooth tough skin of central and western North America.

- *Understanding "gastrophryne olivacea" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gastrophryne olivacea."*

---

gavial *(noun)*

Large fish-eating Indian crocodilian with a long slender snout.

- *He looked up "gavial" because he had never seen it before.*
- *She wrote a short paragraph that included "gavial."*

---

gavialis *(noun)*

Type genus of the Gavialidae.

- *Understanding "gavialis" helps you talk about this topic clearly.*
- *The article explained what "gavialis" means with a simple example.*

---

gavialis gangeticus *(noun)*

Large fish-eating Indian crocodilian with a long slender snout.

- *Understanding "gavialis gangeticus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gavialis gangeticus."*

gavidae *(noun)*

Loon family.

- *She wrote a short paragraph that included "gavidae."*
- *Understanding "gavidae" helps you talk about this topic clearly.*

gaviiform seabird *(noun)*

Seabirds of the order Gaviiformes.

- *He looked up "gaviiform seabird" because he had never seen it before.*
- *They discussed "gaviiform seabird" during the group presentation.*

gaviiformes *(noun)*

Large aquatic birds: loons and some extinct forms.

- *He looked up "gaviiformes" because he had never seen it before.*
- *She wrote a short paragraph that included "gaviiformes."*

gayal *(noun)*

Ox of southeast Asia sometimes considered a domesticated breed of the gaur.

- *He looked up "gayal" because he had never seen it before.*
- *They discussed "gayal" during the group presentation.*

gazella subgutturosa *(noun)*

A kind of gazelle.

- *He looked up "gazella subgutturosa" because he had never seen it before.*
- *Understanding "gazella subgutturosa" helps you talk about this topic clearly.*

gazella thomsoni *(noun)*

East African gazelle; the smallest gazelle.

- *They discussed "gazella thomsoni" during the group presentation.*
- *She wrote a short paragraph that included "gazella thomsoni."*

gelechia *(noun)*

Type genus of the Gelechiidae: pink bollworms.

- *Understanding "gelechia" helps you talk about this topic clearly.*
- *The article explained what "gelechia" means with a simple example.*

gelechia gossypiella *(noun)*

Small brown moth whose larvae bore into flowers and bolls of cotton.

- *In class, the teacher used "gelechia gossypiella" to mean small brown moth whose larvae bore into flowers and....*
- *The article explained what "gelechia gossypiella" means with a simple example.*

gelechiid *(noun)*

Small slender-winged moths whose larvae are agricultural pests.

- *Understanding "gelechiid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gelechiid."*

gelechiid moth *(noun)*

Small slender-winged moths whose larvae are agricultural pests.

- *In class, the teacher used "gelechiid moth" to mean small slender-winged moths whose larvae are....*
- *They discussed "gelechiid moth" during the group presentation.*

gelechiidae *(noun)*

Important economic pests.

- *Understanding "gelechiidae" helps you talk about this topic clearly.*
- *He looked up "gelechiidae" because he had never seen it before.*

gempylid *(noun)*

Snake mackerels; elongated marine fishes with oily flesh; resembles mackerels; found worldwide.

- *She wrote a short paragraph that included "gempylid."*
- *They discussed "gempylid" during the group presentation.*

---

gempylidae *(noun)*

Snake mackerels.

- *She wrote a short paragraph that included "gempylidae."*
- *The article explained what "gempylidae" means with a simple example.*

---

gempylus *(noun)*

Type genus of the Gempylidae.

- *He looked up "gempylus" because he had never seen it before.*
- *They discussed "gempylus" during the group presentation.*

---

gempylus serpens *(noun)*

Predatory tropical fishes with jutting jaws and strong teeth.

- *In class, the teacher used "gempylus serpens" to mean predatory tropical fishes with jutting jaws and....*
- *The article explained what "gempylus serpens" means with a simple example.*

---

gemsbuck *(noun)*

Large South African oryx with a broad black band along its flanks.

- *The article explained what "gemsbuck" means with a simple example.*
- *In class, the teacher used "gemsbuck" to mean large south african oryx with a broad black band....*

---

genetta genetta *(noun)*

Agile Old World viverrine having a spotted coat and long ringed tail.

- *Understanding "genetta genetta" helps you talk about this topic clearly.*
- *In class, the teacher used "genetta genetta" to mean agile old world viverrine having a spotted coat and....*

---

genicular vein *(noun)*

Veins that drain blood from structures around the knee; empty into the popliteal vein.

- *He looked up "genicular vein" because he had never seen it before.*
- *She wrote a short paragraph that included "genicular vein."*

---

genu valgum *(noun)*

An inward slant of the thigh.

- *They discussed "genu valgum" during the group presentation.*
- *The article explained what "genu valgum" means with a simple example.*

---

genus abramis *(noun)*

European fishes.

- *They discussed "genus abramis" during the group presentation.*
- *In class, the teacher used "genus abramis" to mean european fishes.*

---

genus abudefduf *(noun)*

Damsel fishes.

- *In class, the teacher used "genus abudefduf" to mean damsel fishes.*
- *He looked up "genus abudefduf" because he had never seen it before.*

---

genus acanthisitta *(noun)*

A genus of Xenicidae.

- *She wrote a short paragraph that included "genus acanthisitta."*
- *He looked up "genus acanthisitta" because he had never seen it before.*

---

genus acanthophis *(noun)*

Australian elapid snakes.

- *Understanding "genus acanthophis" helps you talk about this topic clearly.*

- *The article explained what “genus acanthophis” means with a simple example.*

genus acanthoscelides *(noun)*

A genus of Bruchidae.

- *Understanding “genus acanthoscelides” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus acanthoscelides.”*

genus acanthurus *(noun)*

Type genus of the Acanthuridae: doctorfishes.

- *Understanding “genus acanthurus” helps you talk about this topic clearly.*
- *He looked up “genus acanthurus” because he had never seen it before.*

genus acarus *(noun)*

Any of several mites of the order Acarina.

- *They discussed “genus acarus” during the group presentation.*
- *Understanding “genus acarus” helps you talk about this topic clearly.*

genus acherontia *(noun)*

Death’s-head moth.

- *In class, the teacher used “genus acherontia” to mean death’s-head moth.*
- *He looked up “genus acherontia” because he had never seen it before.*

genus acheta *(noun)*

Common house and field crickets.

- *He looked up “genus acheta” because he had never seen it before.*
- *In class, the teacher used “genus acheta” to mean common house and field crickets.*

genus achoerodus *(noun)*

A genus of Labridae.

- *The article explained what “genus achoerodus” means with a simple example.*
- *She wrote a short paragraph that included “genus achoerodus.”*

genus acrobates *(noun)*

A genus of Phalangeridae.

- *Understanding “genus acrobates” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus acrobates.”*

genus acrocephalus *(noun)*

A genus of Sylviidae.

- *He looked up “genus acrocephalus” because he had never seen it before.*
- *In class, the teacher used “genus acrocephalus” to mean a genus of sylviidae.*

genus actitis *(noun)*

A genus of Scolopacidae.

- *They discussed “genus actitis” during the group presentation.*
- *He looked up “genus actitis” because he had never seen it before.*

genus adelges *(noun)*

Type genus of the Adelgidae: plant lice.

- *She wrote a short paragraph that included “genus adelges.”*
- *He looked up “genus adelges” because he had never seen it before.*

genus adenota *(noun)*

African antelopes: puku.

- *Understanding “genus adenota” helps you talk about this topic clearly.*
- *In class, the teacher used “genus adenota” to mean african antelopes: puku.*

genus aegypius *(noun)*

A genus of Accipitridae.

- *The article explained what "genus aegypius" means with a simple example.*
- *In class, the teacher used "genus aegypius" to mean a genus of accipitridae.*

genus aegyptopithecus *(noun)*

A genus of Hominoidea.

- *In class, the teacher used "genus aegyptopithecus" to mean a genus of hominoidea.*
- *They discussed "genus aegyptopithecus" during the group presentation.*

genus aepyceros *(noun)*

African antelopes: impalas.

- *She wrote a short paragraph that included "genus aepyceros."*
- *They discussed "genus aepyceros" during the group presentation.*

genus aepyornis *(noun)*

Type genus of the Aepyornidae: elephant birds.

- *He looked up "genus aepyornis" because he had never seen it before.*
- *Understanding "genus aepyornis" helps you talk about this topic clearly.*

genus aerobacter *(noun)*

Aerobic bacteria widely distributed in nature.

- *In class, the teacher used "genus aerobacter" to mean aerobic bacteria widely distributed in nature.*
- *The article explained what "genus aerobacter" means with a simple example.*

genus aetobatus *(noun)*

A genus of Myliobatidae.

- *He looked up "genus aetobatus" because he had never seen it before.*
- *They discussed "genus aetobatus" during the group presentation.*

genus afropavo *(noun)*

Congo peafowl.

- *In class, the teacher used "genus afropavo" to mean congo peafowl.*
- *Understanding "genus afropavo" helps you talk about this topic clearly.*

genus agapornis *(noun)*

A genus of Psittacidae.

- *In class, the teacher used "genus agapornis" to mean a genus of psittacidae.*
- *He looked up "genus agapornis" because he had never seen it before.*

genus agelaius *(noun)*

Red-winged blackbirds.

- *They discussed "genus agelaius" during the group presentation.*
- *He looked up "genus agelaius" because he had never seen it before.*

genus agonus *(noun)*

Type genus of the Agonidae.

- *She wrote a short paragraph that included "genus agonus."*
- *Understanding "genus agonus" helps you talk about this topic clearly.*

genus agriocharis *(noun)*

A genus of birds of the family Meleagrididae including the ocellated turkey.

- *Understanding "genus agriocharis" helps you talk about this topic clearly.*
- *They discussed "genus agriocharis" during the group presentation.*

genus ailuropoda *(noun)*

Only the giant panda: in some classifications considered a genus of the separate family Ailuropodidae.

- *In class, the teacher used “genus ailuropoda” to mean only the giant panda: in some classifications....*
- *Understanding “genus ailuropoda” helps you talk about this topic clearly.*

---

genus ailurus *(noun)*

Lesser pandas.

- *She wrote a short paragraph that included “genus ailurus.”*
- *Understanding “genus ailurus” helps you talk about this topic clearly.*

---

genus ajaia *(noun)*

A genus of Platalea.

- *In class, the teacher used “genus ajaia” to mean a genus of platalea.*
- *Understanding “genus ajaia” helps you talk about this topic clearly.*

---

genus alcelaphus *(noun)*

African antelopes: hartebeests.

- *He looked up “genus alcelaphus” because he had never seen it before.*
- *They discussed “genus alcelaphus” during the group presentation.*

---

genus alectis *(noun)*

A genus of Carangidae.

- *They discussed “genus alectis” during the group presentation.*
- *She wrote a short paragraph that included “genus alectis.”*

---

genus alectoris *(noun)*

A genus of Perdicidae.

- *Understanding “genus alectoris” helps you talk about this topic clearly.*
- *He looked up “genus alectoris” because he had never seen it before.*

---

genus alectura *(noun)*

Brush turkeys.

- *They discussed “genus alectura” during the group presentation.*
- *Understanding “genus alectura” helps you talk about this topic clearly.*

---

genus alepisaurus *(noun)*

Slender scaleless predaceous tropical deep-sea fishes.

- *In class, the teacher used “genus alepisaurus” to mean slender scaleless predaceous tropical deep-sea fishes.*
- *The article explained what “genus alepisaurus” means with a simple example.*

---

genus aleyrodes *(noun)*

Type genus of the Aleyrodidae.

- *He looked up “genus aleyrodes” because he had never seen it before.*
- *They discussed “genus aleyrodes” during the group presentation.*

---

genus algeripithecus *(noun)*

An extinct genus of Hominoidea.

- *They discussed “genus algeripithecus” during the group presentation.*
- *The article explained what “genus algeripithecus” means with a simple example.*

---

genus alopius *(noun)*

Type genus of the family Alopiidae; in some classifications considered a genus of the family Lamnidae.

- *They discussed “genus alopius” during the group presentation.*
- *In class, the teacher used “genus alopius” to mean type genus of the family alopiidae; in some....*

---

genus alsophila *(noun)*

Geometrid moths.

- *They discussed “genus alsophila” during the group presentation.*
- *The article explained what “genus alsophila” means with a simple example.*

genus alytes *(noun)*

Midwife toads.

- *In class, the teacher used "genus alytes" to mean midwife toads.*
- *The article explained what "genus alytes" means with a simple example.*

genus ambloplites *(noun)*

A genus of Centrarchidae.

- *In class, the teacher used "genus ambloplites" to mean a genus of centrarchidae.*
- *They discussed "genus ambloplites" during the group presentation.*

genus amblyrhynchus *(noun)*

Marine iguanas.

- *The article explained what "genus amblyrhynchus" means with a simple example.*
- *They discussed "genus amblyrhynchus" during the group presentation.*

genus ameiurus *(noun)*

Type genus of the Ameiuridae: bullhead catfishes.

- *She wrote a short paragraph that included "genus ameiurus."*
- *He looked up "genus ameiurus" because he had never seen it before.*

genus ammodytes *(noun)*

Type genus of the Ammodytidae.

- *The article explained what "genus ammodytes" means with a simple example.*
- *She wrote a short paragraph that included "genus ammodytes."*

genus ammotragus *(noun)*

Genus of wild sheep.

- *He looked up "genus ammotragus" because he had never seen it before.*
- *They discussed "genus ammotragus" during the group presentation.*

genus amphibolips *(noun)*

Cynipid gall wasps, especially causing oak-apple galls.

- *Understanding "genus amphibolips" helps you talk about this topic clearly.*
- *He looked up "genus amphibolips" because he had never seen it before.*

genus amphiprion *(noun)*

Damsel fishes.

- *She wrote a short paragraph that included "genus amphiprion."*
- *The article explained what "genus amphiprion" means with a simple example.*

genus amphisbaena *(noun)*

Type genus of the Amphisbaenidae.

- *She wrote a short paragraph that included "genus amphisbaena."*
- *He looked up "genus amphisbaena" because he had never seen it before.*

genus amphisbaenia *(noun)*

Type genus of the Amphisbaenidae.

- *He looked up "genus amphisbaenia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus amphisbaenia."*

genus amphiuma *(noun)*

Congo snakes.

- *In class, the teacher used "genus amphiuma" to mean congo snakes.*
- *They discussed "genus amphiuma" during the group presentation.*

genus anabas *(noun)*

The type genus of the family Anabantidae; small fish that resemble perch.

- *He looked up "genus anabas" because he had never seen it before.*
- *In class, the teacher used "genus anabas" to mean the type genus of the family anabantidae; small....*

---

genus anabrus *(noun)*

A genus of Tettigoniidae.

- *In class, the teacher used "genus anabrus" to mean a genus of tettigoniidae.*
- *The article explained what "genus anabrus" means with a simple example.*

---

genus anagasta *(noun)*

Moth whose larvae are flour moths.

- *In class, the teacher used "genus anagasta" to mean moth whose larvae are flour moths.*
- *Understanding "genus anagasta" helps you talk about this topic clearly.*

---

genus anarhichas *(noun)*

Type genus of the Anarhichadidae.

- *In class, the teacher used "genus anarhichas" to mean type genus of the anarhichadidae.*
- *Understanding "genus anarhichas" helps you talk about this topic clearly.*

---

genus anasa *(noun)*

Squash bugs.

- *Understanding "genus anasa" helps you talk about this topic clearly.*
- *He looked up "genus anasa" because he had never seen it before.*

---

genus anatotitan *(noun)*

Genus of large duck-billed dinosaurs; late Cretaceous.

- *The article explained what "genus anatotitan" means with a simple example.*
- *Understanding "genus anatotitan" helps you talk about this topic clearly.*

---

genus ancistrodon *(noun)*

Copperheads.

- *Understanding "genus ancistrodon" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus ancistrodon."*

---

genus andricus *(noun)*

Cynipid gall wasps, chiefly affecting oaks.

- *She wrote a short paragraph that included "genus andricus."*
- *He looked up "genus andricus" because he had never seen it before.*

---

genus aneides *(noun)*

Climbing salamanders.

- *They discussed "genus aneides" during the group presentation.*
- *Understanding "genus aneides" helps you talk about this topic clearly.*

---

genus anguillula *(noun)*

A genus of Cephalobidae.

- *He looked up "genus anguillula" because he had never seen it before.*
- *She wrote a short paragraph that included "genus anguillula."*

---

genus anhima *(noun)*

Type genus of the Anhimidae; horned screamers.

- *In class, the teacher used "genus anhima" to mean type genus of the anhimidae; horned screamers.*
- *Understanding "genus anhima" helps you talk about this topic clearly.*

---

genus anisotremus *(noun)*

A genus of Haemulidae.

- *In class, the teacher used "genus anisotremus" to mean a genus of haemulidae.*

- *They discussed “genus anisotremus” during the group presentation.*

genus anomalops *(noun)*

Type genus of the family Anomalopidae.

- *In class, the teacher used “genus anomalops” to mean type genus of the family anomalopidae.*
- *They discussed “genus anomalops” during the group presentation.*

genus antedon *(noun)*

A genus of echinoderms of the family Antedonidae.

- *The article explained what “genus antedon” means with a simple example.*
- *Understanding “genus antedon” helps you talk about this topic clearly.*

genus antheraea *(noun)*

Large moths whose larvae produce silk of high quality.

- *The article explained what “genus antheraea” means with a simple example.*
- *They discussed “genus antheraea” during the group presentation.*

genus anthidium *(noun)*

Potter bees.

- *They discussed “genus anthidium” during the group presentation.*
- *He looked up “genus anthidium” because he had never seen it before.*

genus antigonia *(noun)*

A genus of fish in the family Caproidae.

- *Understanding “genus antigonia” helps you talk about this topic clearly.*
- *They discussed “genus antigonia” during the group presentation.*

genus antilocapra *(noun)*

Type and sole genus of the Antilocapridae comprising one species.

- *He looked up “genus antilocapra” because he had never seen it before.*
- *Understanding “genus antilocapra” helps you talk about this topic clearly.*

genus antrodemus *(noun)*

Carnivorous dinosaur of North America; late Jurassic.

- *In class, the teacher used “genus antrodemus” to mean carnivorous dinosaur of north america; late jurassic.*
- *They discussed “genus antrodemus” during the group presentation.*

genus antrozous *(noun)*

A genus of Vespertilionidae.

- *She wrote a short paragraph that included “genus antrozous.”*
- *Understanding “genus antrozous” helps you talk about this topic clearly.*

genus apatura *(noun)*

Large Old World butterflies.

- *Understanding “genus apatura” helps you talk about this topic clearly.*
- *The article explained what “genus apatura” means with a simple example.*

genus aphriza *(noun)*

A genus of Scolopacidae.

- *The article explained what “genus aphriza” means with a simple example.*
- *In class, the teacher used “genus aphriza” to mean a genus of scolopacidae.*

genus aphrophora *(noun)*

A genus of Cercopidae.

- *He looked up “genus aphrophora” because he had never seen it before.*
- *Understanding “genus aphrophora” helps you talk about this topic clearly.*

genus aplodontia *(noun)*

Type genus of the Aplodontiidae: comprising the mountain beavers.

- *She wrote a short paragraph that included "genus aplodontia."*
- *He looked up "genus aplodontia" because he had never seen it before.*

genus apogon *(noun)*

Type genus of the Apogonidae.

- *He looked up "genus apogon" because he had never seen it before.*
- *In class, the teacher used "genus apogon" to mean type genus of the apogonidae.*

genus appendicularia *(noun)*

A genus of chordates in the class Larvacea.

- *In class, the teacher used "genus appendicularia" to mean a genus of chordates in the class larvacea.*
- *He looked up "genus appendicularia" because he had never seen it before.*

genus aptenodytes *(noun)*

Large penguins.

- *Understanding "genus aptenodytes" helps you talk about this topic clearly.*
- *The article explained what "genus aptenodytes" means with a simple example.*

genus aramus *(noun)*

Genus of large brown long-billed wading birds found in warm swampy regions of the western hemisphere: courlan; limpkin.

- *The article explained what "genus aramus" means with a simple example.*
- *She wrote a short paragraph that included "genus aramus."*

genus arcella *(noun)*

Type genus of the Arcellidae.

- *In class, the teacher used "genus arcella" to mean type genus of the arcellidae.*
- *He looked up "genus arcella" because he had never seen it before.*

genus archaeornis *(noun)*

A genus of fossil bird.

- *They discussed "genus archaeornis" during the group presentation.*
- *The article explained what "genus archaeornis" means with a simple example.*

genus archeopteryx *(noun)*

A genus of fossil birds.

- *He looked up "genus archeopteryx" because he had never seen it before.*
- *She wrote a short paragraph that included "genus archeopteryx."*

genus archidiskidon *(noun)*

A genus of Elephantidae.

- *In class, the teacher used "genus archidiskidon" to mean a genus of elephantidae.*
- *Understanding "genus archidiskidon" helps you talk about this topic clearly.*

genus archosargus *(noun)*

A genus of Sparidae.

- *In class, the teacher used "genus archosargus" to mean a genus of sparidae.*
- *The article explained what "genus archosargus" means with a simple example.*

genus arctocebus *(noun)*

A genus of Lorisidae.

- *She wrote a short paragraph that included "genus arctocebus."*
- *He looked up "genus arctocebus" because he had never seen it before.*

genus arctonyx *(noun)*

A genus of Mustelidae.

- *Understanding "genus arctonyx" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus arctonyx."*

---

genus argonauta *(noun)*

Type genus of the family Argonautidae: paper nautilus.

- *He looked up "genus argonauta" because he had never seen it before.*
- *She wrote a short paragraph that included "genus argonauta."*

---

genus argusianus *(noun)*

Argus pheasants.

- *In class, the teacher used "genus argusianus" to mean argus pheasants.*
- *They discussed "genus argusianus" during the group presentation.*

---

genus argynnis *(noun)*

Fritillaries.

- *She wrote a short paragraph that included "genus argynnis."*
- *He looked up "genus argynnis" because he had never seen it before.*

---

genus argyrotaenia *(noun)*

Orange tortrix.

- *He looked up "genus argyrotaenia" because he had never seen it before.*
- *Understanding "genus argyrotaenia" helps you talk about this topic clearly.*

---

genus arilus *(noun)*

A genus of Reduviidae.

- *He looked up "genus arilus" because he had never seen it before.*
- *Understanding "genus arilus" helps you talk about this topic clearly.*

---

genus ariomma *(noun)*

A genus of Stromateidae.

- *In class, the teacher used "genus ariomma" to mean a genus of stromateidae.*
- *Understanding "genus ariomma" helps you talk about this topic clearly.*

---

genus armadillidium *(noun)*

Type genus of the Armadillidiidae.

- *Understanding "genus armadillidium" helps you talk about this topic clearly.*
- *They discussed "genus armadillidium" during the group presentation.*

---

genus artamus *(noun)*

Type genus of the Artamidae.

- *They discussed "genus artamus" during the group presentation.*
- *In class, the teacher used "genus artamus" to mean type genus of the artamidae.*

---

genus arvicola *(noun)*

In some classifications considered synonymous with Microtus.

- *They discussed "genus arvicola" during the group presentation.*
- *Understanding "genus arvicola" helps you talk about this topic clearly.*

---

genus ascaphus *(noun)*

Type genus of the Ascaphidae; in some classifications included in the family Leiopelmatidae.

- *In class, the teacher used "genus ascaphus" to mean type genus of the ascaphidae; in some....*
- *The article explained what "genus ascaphus" means with a simple example.*

---

genus ascaridia *(noun)*

Roundworm having a preanal sucker.

- *She wrote a short paragraph that included "genus ascaridia."*
- *The article explained what "genus ascaridia" means with a simple example.*

genus aspidelaps *(noun)*

African coral snakes.

- *Understanding "genus aspidelaps" helps you talk about this topic clearly.*
- *In class, the teacher used "genus aspidelaps" to mean african coral snakes.*

genus aspidiotus *(noun)*

A genus of Diaspididae.

- *The article explained what "genus aspidiotus" means with a simple example.*
- *In class, the teacher used "genus aspidiotus" to mean a genus of diaspididae.*

genus aspidophoroides *(noun)*

Alligatorfishes.

- *She wrote a short paragraph that included "genus aspidophoroides."*
- *Understanding "genus aspidophoroides" helps you talk about this topic clearly.*

genus astrophyton *(noun)*

Includes many of the basket stars.

- *They discussed "genus astrophyton" during the group presentation.*
- *The article explained what "genus astrophyton" means with a simple example.*

genus astropogon *(noun)*

A genus of fish of the family Apogonidae.

- *He looked up "genus astropogon" because he had never seen it before.*
- *She wrote a short paragraph that included "genus astropogon."*

genus atherinopsis *(noun)*

A genus of Atherinidae.

- *They discussed "genus atherinopsis" during the group presentation.*
- *In class, the teacher used "genus atherinopsis" to mean a genus of atherinidae.*

genus atherurus *(noun)*

A genus of Hystricidae.

- *She wrote a short paragraph that included "genus atherurus."*
- *He looked up "genus atherurus" because he had never seen it before.*

genus atrichornis *(noun)*

Type genus of the Atrichornithidae.

- *He looked up "genus atrichornis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus atrichornis."*

genus aulacorhyncus *(noun)*

A genus of Ramphastidae.

- *She wrote a short paragraph that included "genus aulacorhyncus."*
- *The article explained what "genus aulacorhyncus" means with a simple example.*

genus aulostomus *(noun)*

Type genus of the Aulostomidae.

- *Understanding "genus aulostomus" helps you talk about this topic clearly.*
- *He looked up "genus aulostomus" because he had never seen it before.*

genus auriparus *(noun)*

A genus of Paridae.

- *In class, the teacher used "genus auriparus" to mean a genus of paridae.*
- *The article explained what "genus auriparus" means with a simple example.*

genus babyrousa *(noun)*

A genus of Suidae.

- *He looked up "genus babyrousa" because he had never seen it before.*
- *They discussed "genus babyrousa" during the group presentation.*

---

genus balaeniceps *(noun)*

Type genus of the Balaenicipitidae: shoebills.

- *They discussed "genus balaeniceps" during the group presentation.*
- *He looked up "genus balaeniceps" because he had never seen it before.*

---

genus balistes *(noun)*

Type genus of the Balistidae.

- *They discussed "genus balistes" during the group presentation.*
- *In class, the teacher used "genus balistes" to mean type genus of the balistidae.*

---

genus barosaurus *(noun)*

Huge quadrupedal herbivorous dinosaur; late Jurassic.

- *They discussed "genus barosaurus" during the group presentation.*
- *In class, the teacher used "genus barosaurus" to mean huge quadrupedal herbivorous dinosaur; late jurassic.*

---

genus bartramia *(noun)*

A genus of Scolopacidae.

- *She wrote a short paragraph that included "genus bartramia."*
- *He looked up "genus bartramia" because he had never seen it before.*

---

genus bassariscus *(noun)*

Cacomistles.

- *She wrote a short paragraph that included "genus bassariscus."*
- *He looked up "genus bassariscus" because he had never seen it before.*

---

genus batrachoseps *(noun)*

Slender salamanders.

- *The article explained what "genus batrachoseps" means with a simple example.*
- *She wrote a short paragraph that included "genus batrachoseps."*

---

genus bettongia *(noun)*

Jerboa kangaroo.

- *They discussed "genus bettongia" during the group presentation.*
- *The article explained what "genus bettongia" means with a simple example.*

---

genus bitis *(noun)*

A genus of Viperidae.

- *She wrote a short paragraph that included "genus bitis."*
- *The article explained what "genus bitis" means with a simple example.*

---

genus blaberus *(noun)*

Giant cockroaches.

- *He looked up "genus blaberus" because he had never seen it before.*
- *They discussed "genus blaberus" during the group presentation.*

---

genus blatta *(noun)*

Type genus of the Blattidae: cockroaches infesting buildings worldwide.

- *He looked up "genus blatta" because he had never seen it before.*
- *She wrote a short paragraph that included "genus blatta."*

---

genus blattella *(noun)*

Small cockroaches.

- *The article explained what "genus blattella" means with a simple example.*

- *She wrote a short paragraph that included “genus blattella.”*

---

genus blennius *(noun)*

Type genus of the Blenniidae.

- *Understanding “genus blennius” helps you talk about this topic clearly.*
- *They discussed “genus blennius” during the group presentation.*

---

genus blissus *(noun)*

Chinch bugs.

- *She wrote a short paragraph that included “genus blissus.”*
- *Understanding “genus blissus” helps you talk about this topic clearly.*

---

genus bombina *(noun)*

Fire-bellied toads.

- *He looked up “genus bombina” because he had never seen it before.*
- *They discussed “genus bombina” during the group presentation.*

---

genus bonasa *(noun)*

Ruffed grouse.

- *In class, the teacher used “genus bonasa” to mean ruffed grouse.*
- *The article explained what “genus bonasa” means with a simple example.*

---

genus boselaphus *(noun)*

Indian antelopes: nilgais.

- *In class, the teacher used “genus boselaphus” to mean indian antelopes: nilgais.*
- *The article explained what “genus boselaphus” means with a simple example.*

---

genus brachinus *(noun)*

Bombardier beetles.

- *She wrote a short paragraph that included “genus brachinus.”*
- *The article explained what “genus brachinus” means with a simple example.*

---

genus bradypus *(noun)*

Type genus of the Bradypodidae: three-toed sloths.

- *In class, the teacher used “genus bradypus” to mean type genus of the bradypodidae: three-toed sloths.*
- *He looked up “genus bradypus” because he had never seen it before.*

---

genus branchiobdella *(noun)*

Type genus of the Branchiobdellidae: a small worm that lives on the gills or surface of a crayfish attached by a sucker.

- *In class, the teacher used “genus branchiobdella” to mean type genus of the branchiobdellidae: a small worm....*
- *They discussed “genus branchiobdella” during the group presentation.*

---

genus bruchus *(noun)*

Type genus of the Bruchidae.

- *He looked up “genus bruchus” because he had never seen it before.*
- *In class, the teacher used “genus bruchus” to mean type genus of the bruchidae.*

---

genus bubulcus *(noun)*

Small white egrets.

- *She wrote a short paragraph that included “genus bubulcus.”*
- *The article explained what “genus bubulcus” means with a simple example.*

---

genus bucephala *(noun)*

Buffleheads and goldeneyes.

- *They discussed “genus bucephala” during the group presentation.*
- *He looked up “genus bucephala” because he had never seen it before.*

---

genus buceros *(noun)*

Type genus of the family Bucerotidae.

- *She wrote a short paragraph that included "genus buceros."*
- *He looked up "genus buceros" because he had never seen it before.*

---

genus burhinus *(noun)*

Type genus of the Burhinidae: stone curlews.

- *In class, the teacher used "genus burhinus" to mean type genus of the burhinidae: stone curlews.*
- *They discussed "genus burhinus" during the group presentation.*

---

genus burmeisteria *(noun)*

A genus of Dasypodidae.

- *He looked up "genus burmeisteria" because he had never seen it before.*
- *She wrote a short paragraph that included "genus burmeisteria."*

---

genus cabassous *(noun)*

Solely the tatouay.

- *In class, the teacher used "genus cabassous" to mean solely the tatouay.*
- *He looked up "genus cabassous" because he had never seen it before.*

---

genus cacatua *(noun)*

A genus of Psittacidae.

- *He looked up "genus cacatua" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cacatua."*

---

genus cacicus *(noun)*

A genus of tropical American orioles.

- *She wrote a short paragraph that included "genus cacicus."*
- *They discussed "genus cacicus" during the group presentation.*

---

genus cadra *(noun)*

A genus of Pyralidae.

- *They discussed "genus cadra" during the group presentation.*
- *The article explained what "genus cadra" means with a simple example.*

---

genus caenolestes *(noun)*

Type genus of the family Caenolestidae.

- *In class, the teacher used "genus caenolestes" to mean type genus of the family caenolestidae.*
- *He looked up "genus caenolestes" because he had never seen it before.*

---

genus cairina *(noun)*

A genus of Anatidae.

- *The article explained what "genus cairina" means with a simple example.*
- *They discussed "genus cairina" during the group presentation.*

---

genus callimorpha *(noun)*

Cinnabar moths.

- *Understanding "genus callimorpha" helps you talk about this topic clearly.*
- *They discussed "genus callimorpha" during the group presentation.*

---

genus calliophis *(noun)*

Asian coral snakes.

- *He looked up "genus calliophis" because he had never seen it before.*
- *In class, the teacher used "genus calliophis" to mean asian coral snakes.*

---

genus callisaurus *(noun)*

Zebra-tailed lizard.

- *In class, the teacher used "genus callisaurus" to mean zebra-tailed lizard.*
- *Understanding "genus callisaurus" helps you talk about this topic clearly.*

---

genus callithrix *(noun)*

Type genus of the Callithricidae: true marmosets.

- *He looked up "genus callithrix" because he had never seen it before.*
- *Understanding "genus callithrix" helps you talk about this topic clearly.*

---

genus callophis *(noun)*

Asian coral snakes.

- *She wrote a short paragraph that included "genus callophis."*
- *The article explained what "genus callophis" means with a simple example.*

---

genus calosoma *(noun)*

Genus of large predaceous ground beetles that feed on injurious caterpillars.

- *The article explained what "genus calosoma" means with a simple example.*
- *They discussed "genus calosoma" during the group presentation.*

---

genus calymmatobacterium *(noun)*

A genus of bacterial rods containing only the one species that causes granuloma inguinale.

- *They discussed "genus calymmatobacterium" during the group presentation.*
- *He looked up "genus calymmatobacterium" because he had never seen it before.*

---

genus campephilus *(noun)*

A genus of Picidae.

- *They discussed "genus campephilus" during the group presentation.*
- *Understanding "genus campephilus" helps you talk about this topic clearly.*

---

genus campylorhynchus *(noun)*

Alternative classifications for the cactus wrens.

- *They discussed "genus campylorhynchus" during the group presentation.*
- *She wrote a short paragraph that included "genus campylorhynchus."*

---

genus canachites *(noun)*

Spruce grouse.

- *She wrote a short paragraph that included "genus canachites."*
- *Understanding "genus canachites" helps you talk about this topic clearly.*

---

genus caprella *(noun)*

Skeleton shrimp.

- *He looked up "genus caprella" because he had never seen it before.*
- *Understanding "genus caprella" helps you talk about this topic clearly.*

---

genus caprimulgus *(noun)*

Type genus of the Caprimulgidae.

- *He looked up "genus caprimulgus" because he had never seen it before.*
- *Understanding "genus caprimulgus" helps you talk about this topic clearly.*

---

genus capros *(noun)*

A genus of fish in the family Caproidae.

- *Understanding "genus capros" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus capros."*

---

genus caranx *(noun)*

Type genus of the Carangidae.

- *The article explained what "genus caranx" means with a simple example.*
- *They discussed "genus caranx" during the group presentation.*

genus carduelis *(noun)*

In some classifications considered the type genus of a subfamily Carduelinae of the family Fringillidae: goldfinches; siskins; redpolls; linnets.

- *He looked up "genus carduelis" because he had never seen it before.*
- *Understanding "genus carduelis" helps you talk about this topic clearly.*

genus cariama *(noun)*

The type genus of the Cariamidae comprising only the crested cariama.

- *In class, the teacher used "genus cariama" to mean the type genus of the cariamidae comprising only....*
- *The article explained what "genus cariama" means with a simple example.*

genus carphophis *(noun)*

Thunder snake.

- *She wrote a short paragraph that included "genus carphophis."*
- *Understanding "genus carphophis" helps you talk about this topic clearly.*

genus carpocapsa *(noun)*

Codling moths.

- *They discussed "genus carpocapsa" during the group presentation.*
- *He looked up "genus carpocapsa" because he had never seen it before.*

genus carpodacus *(noun)*

House finches and purple finches.

- *She wrote a short paragraph that included "genus carpodacus."*
- *They discussed "genus carpodacus" during the group presentation.*

genus casmerodius *(noun)*

A white egrets.

- *The article explained what "genus casmerodius" means with a simple example.*
- *In class, the teacher used "genus casmerodius" to mean a white egrets.*

genus castoroides *(noun)*

Extinct beavers of the Pleistocene; of eastern and southern United States.

- *He looked up "genus castoroides" because he had never seen it before.*
- *In class, the teacher used "genus castoroides" to mean extinct beavers of the pleistocene; of eastern and....*

genus casuarius *(noun)*

Type and sole genus of the Casuaridae: cassowaries.

- *In class, the teacher used "genus casuarius" to mean type and sole genus of the casuaridae: cassowaries.*
- *The article explained what "genus casuarius" means with a simple example.*

genus catacala *(noun)*

Moths whose larvae are cutworms: underwings.

- *Understanding "genus catacala" helps you talk about this topic clearly.*
- *The article explained what "genus catacala" means with a simple example.*

genus cathartes *(noun)*

Type genus of the Cathartidae: turkey vultures.

- *She wrote a short paragraph that included "genus cathartes."*
- *The article explained what "genus cathartes" means with a simple example.*

genus cebuella *(noun)*

Pygmy marmosets.

- *The article explained what "genus cebuella" means with a simple example.*
- *She wrote a short paragraph that included "genus cebuella."*

genus centrocercus *(noun)*

Sage grouse.

- *Understanding "genus centrocercus" helps you talk about this topic clearly.*
- *He looked up "genus centrocercus" because he had never seen it before.*

---

genus centropomus *(noun)*

Type genus of the Centropomidae: snooks.

- *They discussed "genus centropomus" during the group presentation.*
- *In class, the teacher used "genus centropomus" to mean type genus of the centropomidae: snooks.*

---

genus centropus *(noun)*

A genus of Cuculidae.

- *She wrote a short paragraph that included "genus centropus."*
- *He looked up "genus centropus" because he had never seen it before.*

---

genus cephalopterus *(noun)*

A genus of Cotingidae.

- *They discussed "genus cephalopterus" during the group presentation.*
- *The article explained what "genus cephalopterus" means with a simple example.*

---

genus cepphus *(noun)*

A genus of birds including: guillemots.

- *In class, the teacher used "genus cepphus" to mean a genus of birds including: guillemots.*
- *They discussed "genus cepphus" during the group presentation.*

---

genus cerapteryx *(noun)*

Antler moths.

- *They discussed "genus cerapteryx" during the group presentation.*
- *In class, the teacher used "genus cerapteryx" to mean antler moths.*

---

genus ceratodus *(noun)*

Type genus of the Ceratodontidae: extinct genus of lungfishes.

- *In class, the teacher used "genus ceratodus" to mean type genus of the ceratodontidae: extinct genus of....*
- *They discussed "genus ceratodus" during the group presentation.*

---

genus ceratopogon *(noun)*

Type genus of the Ceratopogonidae.

- *They discussed "genus ceratopogon" during the group presentation.*
- *In class, the teacher used "genus ceratopogon" to mean type genus of the ceratopogonidae.*

---

genus ceratosaurus *(noun)*

Primitive saurischian carnivorous dinosaurs.

- *She wrote a short paragraph that included "genus ceratosaurus."*
- *Understanding "genus ceratosaurus" helps you talk about this topic clearly.*

---

genus ceratotherium *(noun)*

African genus.

- *Understanding "genus ceratotherium" helps you talk about this topic clearly.*
- *They discussed "genus ceratotherium" during the group presentation.*

---

genus certhia *(noun)*

Type genus of the Certhiidae.

- *In class, the teacher used "genus certhia" to mean type genus of the certhiidae.*
- *The article explained what "genus certhia" means with a simple example.*

---

genus ceryle *(noun)*

A genus of birds of the family Alcedinidae.

- *He looked up "genus ceryle" because he had never seen it before.*

- *In class, the teacher used “genus ceryle” to mean a genus of birds of the family alcedinidae.*

---

genus cestum *(noun)*

Venus’s girdle.

- *They discussed “genus cestum” during the group presentation.*
- *The article explained what “genus cestum” means with a simple example.*

---

genus cetonia *(noun)*

A genus of Cetoniidae.

- *The article explained what “genus cetonia” means with a simple example.*
- *She wrote a short paragraph that included “genus cetonia.”*

---

genus cetorhinus *(noun)*

Comprising only the basking sharks; in some classifications considered the type genus of a separate family Cetorhinidae.

- *Understanding “genus cetorhinus” helps you talk about this topic clearly.*
- *In class, the teacher used “genus cetorhinus” to mean comprising only the basking sharks; in some....*

---

genus chaenopsis *(noun)*

A genus of fish of the family Clinidae including pikeblennies.

- *The article explained what “genus chaenopsis” means with a simple example.*
- *She wrote a short paragraph that included “genus chaenopsis.”*

---

genus chaetodipterus *(noun)*

A genus of Ephippidae.

- *He looked up “genus chaetodipterus” because he had never seen it before.*
- *They discussed “genus chaetodipterus” during the group presentation.*

---

genus chamaea *(noun)*

A genus of Paridae.

- *He looked up “genus chamaea” because he had never seen it before.*
- *In class, the teacher used “genus chamaea” to mean a genus of paridae.*

---

genus chamaeleo *(noun)*

Type genus of the Chamaeleontidae.

- *They discussed “genus chamaeleo” during the group presentation.*
- *The article explained what “genus chamaeleo” means with a simple example.*

---

genus chamaeleon *(noun)*

Type genus of the Chamaeleontidae.

- *She wrote a short paragraph that included “genus chamaeleon.”*
- *He looked up “genus chamaeleon” because he had never seen it before.*

---

genus charina *(noun)*

Boas of western North America.

- *Understanding “genus charina” helps you talk about this topic clearly.*
- *He looked up “genus charina” because he had never seen it before.*

---

genus charronia *(noun)*

A genus of Mustelidae.

- *They discussed “genus charronia” during the group presentation.*
- *She wrote a short paragraph that included “genus charronia.”*

---

genus chateura *(noun)*

A genus of Apodidae.

- *She wrote a short paragraph that included “genus chateura.”*
- *He looked up “genus chateura” because he had never seen it before.*

---

genus chauna *(noun)*

Crested screamers.

- *Understanding "genus chauna" helps you talk about this topic clearly.*
- *They discussed "genus chauna" during the group presentation.*

genus chelifer *(noun)*

A genus of Chelonethida.

- *Understanding "genus chelifer" helps you talk about this topic clearly.*
- *They discussed "genus chelifer" during the group presentation.*

genus chelydra *(noun)*

Snapping turtles.

- *In class, the teacher used "genus chelydra" to mean snapping turtles.*
- *He looked up "genus chelydra" because he had never seen it before.*

genus chilomastix *(noun)*

Flagellates parasitic in intestines of vertebrates including humans.

- *The article explained what "genus chilomastix" means with a simple example.*
- *She wrote a short paragraph that included "genus chilomastix."*

genus chilomeniscus *(noun)*

Sand snakes.

- *Understanding "genus chilomeniscus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus chilomeniscus."*

genus chirocephalus *(noun)*

Fairy shrimp; brine shrimp.

- *Understanding "genus chirocephalus" helps you talk about this topic clearly.*
- *He looked up "genus chirocephalus" because he had never seen it before.*

genus chlamydera *(noun)*

A genus of Ptilonorhynchidae.

- *Understanding "genus chlamydera" helps you talk about this topic clearly.*
- *The article explained what "genus chlamydera" means with a simple example.*

genus chlamydosaurus *(noun)*

Frilled lizards.

- *Understanding "genus chlamydosaurus" helps you talk about this topic clearly.*
- *They discussed "genus chlamydosaurus" during the group presentation.*

genus chlorococcum *(noun)*

Type genus of Chlorococcales; unicellular green algae occurring singly or in a layer on soil or damp rock.

- *They discussed "genus chlorococcum" during the group presentation.*
- *She wrote a short paragraph that included "genus chlorococcum."*

genus chlorophis *(noun)*

African green snakes.

- *They discussed "genus chlorophis" during the group presentation.*
- *He looked up "genus chlorophis" because he had never seen it before.*

genus chlorophoneus *(noun)*

A genus of Malaconotinae.

- *The article explained what "genus chlorophoneus" means with a simple example.*
- *They discussed "genus chlorophoneus" during the group presentation.*

genus choeronycteris *(noun)*

A genus of Phyllostomatidae.

- *They discussed “genus choeronycteris” during the group presentation.*
- *She wrote a short paragraph that included “genus choeronycteris.”*

---

genus choloepus *(noun)*

A genus of Megalonychidae consisting of the two-toed sloth.

- *Understanding “genus choloepus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus choloepus.”*

---

genus chondrus *(noun)*

A genus of protoctist.

- *Understanding “genus chondrus” helps you talk about this topic clearly.*
- *The article explained what “genus chondrus” means with a simple example.*

---

genus chordeiles *(noun)*

A genus of Caprimulgidae.

- *He looked up “genus chordeiles” because he had never seen it before.*
- *They discussed “genus chordeiles” during the group presentation.*

---

genus choriotis *(noun)*

Australian bustard.

- *He looked up “genus choriotis” because he had never seen it before.*
- *She wrote a short paragraph that included “genus choriotis.”*

---

genus chorizagrotis *(noun)*

Moths whose larvae are army cutworms.

- *Understanding “genus chorizagrotis” helps you talk about this topic clearly.*
- *He looked up “genus chorizagrotis” because he had never seen it before.*

---

genus chronoperates *(noun)*

A reptile genus of Therapsida.

- *The article explained what “genus chronoperates” means with a simple example.*
- *Understanding “genus chronoperates” helps you talk about this topic clearly.*

---

genus chrysaora *(noun)*

A genus of Scyphozoa.

- *Understanding “genus chrysaora” helps you talk about this topic clearly.*
- *In class, the teacher used “genus chrysaora” to mean a genus of scyphozoa.*

---

genus chrysemys *(noun)*

Painted turtles.

- *They discussed “genus chrysemys” during the group presentation.*
- *Understanding “genus chrysemys” helps you talk about this topic clearly.*

---

genus chrysochloris *(noun)*

Type genus of the Chrysochloridae.

- *In class, the teacher used “genus chrysochloris” to mean type genus of the chrysochloridae.*
- *They discussed “genus chrysochloris” during the group presentation.*

---

genus chrysolophus *(noun)*

Golden pheasants.

- *She wrote a short paragraph that included “genus chrysolophus.”*
- *They discussed “genus chrysolophus” during the group presentation.*

---

genus chrysophrys *(noun)*

Australian snapper.

- *Understanding “genus chrysophrys” helps you talk about this topic clearly.*
- *The article explained what “genus chrysophrys” means with a simple example.*

genus cinclus *(noun)*

Type genus of the family Cinclidae.

- *They discussed "genus cinclus" during the group presentation.*
- *He looked up "genus cinclus" because he had never seen it before.*

genus circaetus *(noun)*

Harrier eagles.

- *They discussed "genus circaetus" during the group presentation.*
- *He looked up "genus circaetus" because he had never seen it before.*

genus cistothorus *(noun)*

Marsh wrens.

- *She wrote a short paragraph that included "genus cistothorus."*
- *Understanding "genus cistothorus" helps you talk about this topic clearly.*

genus citellus *(noun)*

Typical ground squirrels.

- *She wrote a short paragraph that included "genus citellus."*
- *The article explained what "genus citellus" means with a simple example.*

genus citharichthys *(noun)*

A genus of Bothidae.

- *The article explained what "genus citharichthys" means with a simple example.*
- *She wrote a short paragraph that included "genus citharichthys."*

genus cladorhyncus *(noun)*

One of two genera of stilts; similar to avocets but with straight bills.

- *She wrote a short paragraph that included "genus cladorhyncus."*
- *He looked up "genus cladorhyncus" because he had never seen it before.*

genus clangula *(noun)*

A genus of ducks.

- *She wrote a short paragraph that included "genus clangula."*
- *The article explained what "genus clangula" means with a simple example.*

genus coccothraustes *(noun)*

Large finches.

- *He looked up "genus coccothraustes" because he had never seen it before.*
- *In class, the teacher used "genus coccothraustes" to mean large finches.*

genus coccyzus *(noun)*

A genus of Cuculidae.

- *The article explained what "genus coccyzus" means with a simple example.*
- *In class, the teacher used "genus coccyzus" to mean a genus of cuculidae.*

genus coereba *(noun)*

Type genus of the Coerebidae.

- *The article explained what "genus coereba" means with a simple example.*
- *In class, the teacher used "genus coereba" to mean type genus of the coerebidae.*

genus colaptes *(noun)*

A genus of Picidae.

- *The article explained what "genus colaptes" means with a simple example.*
- *She wrote a short paragraph that included "genus colaptes."*

genus coleonyx *(noun)*

Banded geckos.

- *She wrote a short paragraph that included "genus coleonyx."*
- *They discussed "genus coleonyx" during the group presentation.*

---

genus colinus *(noun)*

New World quail: the bobwhites.

- *They discussed "genus colinus" during the group presentation.*
- *In class, the teacher used "genus colinus" to mean new world quail: the bobwhites.*

---

genus collocalia *(noun)*

A genus of Apodidae.

- *She wrote a short paragraph that included "genus collocalia."*
- *Understanding "genus collocalia" helps you talk about this topic clearly.*

---

genus comatula *(noun)*

Former usage synonymous with Antedon.

- *He looked up "genus comatula" because he had never seen it before.*
- *In class, the teacher used "genus comatula" to mean former usage synonymous with antedon.*

---

genus compsognathus *(noun)*

A reptile genus of Theropoda.

- *They discussed "genus compsognathus" during the group presentation.*
- *Understanding "genus compsognathus" helps you talk about this topic clearly.*

---

genus condylura *(noun)*

Star-nosed moles.

- *She wrote a short paragraph that included "genus condylura."*
- *He looked up "genus condylura" because he had never seen it before.*

---

genus conepatus *(noun)*

A genus of Mustelidae.

- *Understanding "genus conepatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus conepatus."*

---

genus conferva *(noun)*

Type genus of Tribonemaceae.

- *Understanding "genus conferva" helps you talk about this topic clearly.*
- *In class, the teacher used "genus conferva" to mean type genus of tribonemaceae.*

---

genus conilurus *(noun)*

Jerboa rats.

- *Understanding "genus conilurus" helps you talk about this topic clearly.*
- *He looked up "genus conilurus" because he had never seen it before.*

---

genus connochaetes *(noun)*

African antelopes: gnus.

- *He looked up "genus connochaetes" because he had never seen it before.*
- *In class, the teacher used "genus connochaetes" to mean african antelopes: gnus.*

---

genus conuropsis *(noun)*

A genus of Psittacidae.

- *She wrote a short paragraph that included "genus conuropsis."*
- *The article explained what "genus conuropsis" means with a simple example.*

---

genus coracias *(noun)*

Type genus of the Coraciidae.

- *They discussed "genus coracias" during the group presentation.*

- *The article explained what “genus coracias” means with a simple example.*

---

genus coragyps *(noun)*

A genus of Cathartidae.

- *He looked up “genus coragyps” because he had never seen it before.*
- *She wrote a short paragraph that included “genus coragyps.”*

---

genus cordylus *(noun)*

Type genus of the Cordylidae; spiny lizards somewhat resembling tiny crocodiles.

- *They discussed “genus cordylus” during the group presentation.*
- *In class, the teacher used “genus cordylus” to mean type genus of the cordylidae; spiny lizards....*

---

genus corixa *(noun)*

Type genus of the Corixidae: boat bugs.

- *In class, the teacher used “genus corixa” to mean type genus of the corixidae: boat bugs.*
- *The article explained what “genus corixa” means with a simple example.*

---

genus corydalus *(noun)*

Type genus of the Corydalidae.

- *In class, the teacher used “genus corydalus” to mean type genus of the corydalidae.*
- *Understanding “genus corydalus” helps you talk about this topic clearly.*

---

genus corythosaurus *(noun)*

Genus of duck-billed dinosaurs of late Cretaceous.

- *She wrote a short paragraph that included “genus corythosaurus.”*
- *They discussed “genus corythosaurus” during the group presentation.*

---

genus coscoroba *(noun)*

A genus of Anatidae.

- *The article explained what “genus coscoroba” means with a simple example.*
- *Understanding “genus coscoroba” helps you talk about this topic clearly.*

---

genus cosmocampus *(noun)*

A genus of fish in the family Syngnathidae.

- *Understanding “genus cosmocampus” helps you talk about this topic clearly.*
- *They discussed “genus cosmocampus” during the group presentation.*

---

genus costia *(noun)*

A genus of flagellate protoctist.

- *The article explained what “genus costia” means with a simple example.*
- *In class, the teacher used “genus costia” to mean a genus of flagellate protoctist.*

---

genus cracticus *(noun)*

Type genus of the Cracticidae: Australian butcherbirds.

- *The article explained what “genus cracticus” means with a simple example.*
- *In class, the teacher used “genus cracticus” to mean type genus of the cracticidae: australian butcherbirds.*

---

genus crax *(noun)*

Type genus of the Cracidae: curassows.

- *In class, the teacher used “genus crax” to mean type genus of the cracidae: curassows.*
- *They discussed “genus crax” during the group presentation.*

---

genus cricetus *(noun)*

Type genus of the Cricetidae: Old World hamsters.

- *He looked up “genus cricetus” because he had never seen it before.*
- *Understanding “genus cricetus” helps you talk about this topic clearly.*

---

genus crocethia *(noun)*

A genus of Scolopacidae.

- *In class, the teacher used "genus crocethia" to mean a genus of scolopacidae.*
- *The article explained what "genus crocethia" means with a simple example.*

genus crocodilus *(noun)*

Type genus of the Crocodylidae.

- *She wrote a short paragraph that included "genus crocodilus."*
- *The article explained what "genus crocodilus" means with a simple example.*

genus crotaphytus *(noun)*

Collared lizards.

- *In class, the teacher used "genus crotaphytus" to mean collared lizards.*
- *Understanding "genus crotaphytus" helps you talk about this topic clearly.*

genus cryptacanthodes *(noun)*

A genus of Stichaeidae.

- *In class, the teacher used "genus cryptacanthodes" to mean a genus of stichaeidae.*
- *Understanding "genus cryptacanthodes" helps you talk about this topic clearly.*

genus cryptobranchus *(noun)*

Type genus of the Cryptobranchidae.

- *They discussed "genus cryptobranchus" during the group presentation.*
- *The article explained what "genus cryptobranchus" means with a simple example.*

genus cryptocercus *(noun)*

Cockroaches.

- *In class, the teacher used "genus cryptocercus" to mean cockroaches.*
- *The article explained what "genus cryptocercus" means with a simple example.*

genus cryptoprocta *(noun)*

Large primitive cat-like carnivores inhabiting forests of Madagascar.

- *He looked up "genus cryptoprocta" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cryptoprocta."*

genus cryptotermes *(noun)*

Genus of dry wood termites; cosmopolitan in distribution; sometimes considered a subgenus of Kalotermes.

- *They discussed "genus cryptotermes" during the group presentation.*
- *Understanding "genus cryptotermes" helps you talk about this topic clearly.*

genus cryptotis *(noun)*

Least shrews.

- *The article explained what "genus cryptotis" means with a simple example.*
- *She wrote a short paragraph that included "genus cryptotis."*

genus ctenocephalides *(noun)*

An arthropod genus of fleas.

- *The article explained what "genus ctenocephalides" means with a simple example.*
- *She wrote a short paragraph that included "genus ctenocephalides."*

genus ctenocephalus *(noun)*

A former usage synonymous with Ctenocephalides.

- *In class, the teacher used "genus ctenocephalus" to mean a former usage synonymous with ctenocephalides.*
- *They discussed "genus ctenocephalus" during the group presentation.*

genus cuculus *(noun)*

Type genus of the Cuculidae.

- *In class, the teacher used "genus cuculus" to mean type genus of the cuculidae.*
- *Understanding "genus cuculus" helps you talk about this topic clearly.*

---

genus cuterebra *(noun)*

Type genus of the Cuterebridae.

- *They discussed "genus cuterebra" during the group presentation.*
- *The article explained what "genus cuterebra" means with a simple example.*

---

genus cyanocitta *(noun)*

New World jays.

- *They discussed "genus cyanocitta" during the group presentation.*
- *She wrote a short paragraph that included "genus cyanocitta."*

---

genus cyclopterus *(noun)*

Type genus of the Cyclopteridae: lumpfishes.

- *The article explained what "genus cyclopterus" means with a simple example.*
- *In class, the teacher used "genus cyclopterus" to mean type genus of the cyclopteridae: lumpfishes.*

---

genus cynips *(noun)*

Type genus of the Cynipidae: gall wasps.

- *He looked up "genus cynips" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cynips."*

---

genus cynomys *(noun)*

Prairie dogs.

- *Understanding "genus cynomys" helps you talk about this topic clearly.*
- *He looked up "genus cynomys" because he had never seen it before.*

---

genus cynopterus *(noun)*

A genus of Megachiroptera.

- *Understanding "genus cynopterus" helps you talk about this topic clearly.*
- *He looked up "genus cynopterus" because he had never seen it before.*

---

genus cystophora *(noun)*

Hooded seals.

- *He looked up "genus cystophora" because he had never seen it before.*
- *She wrote a short paragraph that included "genus cystophora."*

---

genus dacelo *(noun)*

Australasian kingfishers.

- *In class, the teacher used "genus dacelo" to mean australasian kingfishers.*
- *The article explained what "genus dacelo" means with a simple example.*

---

genus dactylopius *(noun)*

Type genus of the Dactylopiidae.

- *The article explained what "genus dactylopius" means with a simple example.*
- *In class, the teacher used "genus dactylopius" to mean type genus of the dactylopiidae.*

---

genus dactylopterus *(noun)*

A genus of Dactylopteridae.

- *She wrote a short paragraph that included "genus dactylopterus."*
- *He looked up "genus dactylopterus" because he had never seen it before.*

---

genus damaliscus *(noun)*

African antelopes: sassabies.

- *Understanding "genus damaliscus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus damaliscus" to mean african antelopes: sassabies.*

genus dasyatis *(noun)*

Type genus of the Dasyatidae.

- *He looked up "genus dasyatis" because he had never seen it before.*
- *Understanding "genus dasyatis" helps you talk about this topic clearly.*

genus dasyprocta *(noun)*

Type genus of the Dasyproctidae: agoutis.

- *He looked up "genus dasyprocta" because he had never seen it before.*
- *She wrote a short paragraph that included "genus dasyprocta."*

genus dasypus *(noun)*

Type genus of the Dasypodidae.

- *They discussed "genus dasypus" during the group presentation.*
- *The article explained what "genus dasypus" means with a simple example.*

genus dasyurus *(noun)*

Type genus of the family Dasyuridae: native cats.

- *He looked up "genus dasyurus" because he had never seen it before.*
- *Understanding "genus dasyurus" helps you talk about this topic clearly.*

genus daubentonia *(noun)*

Type genus; coextensive with the family Daubentoniidae.

- *In class, the teacher used "genus daubentonia" to mean type genus; coextensive with the family daubentoniidae.*
- *Understanding "genus daubentonia" helps you talk about this topic clearly.*

genus decapterus *(noun)*

Scads especially mackerel scad; cosmopolitan in distribution.

- *In class, the teacher used "genus decapterus" to mean scads especially mackerel scad; cosmopolitan in....*
- *Understanding "genus decapterus" helps you talk about this topic clearly.*

genus delichon *(noun)*

A genus of Hirundinidae.

- *In class, the teacher used "genus delichon" to mean a genus of hirundinidae.*
- *The article explained what "genus delichon" means with a simple example.*

genus delphinapterus *(noun)*

White whale.

- *Understanding "genus delphinapterus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus delphinapterus" to mean white whale.*

genus dendrocolaptes *(noun)*

Type genus of the Dendrocolaptidae.

- *The article explained what "genus dendrocolaptes" means with a simple example.*
- *Understanding "genus dendrocolaptes" helps you talk about this topic clearly.*

genus dendrolagus *(noun)*

Tree wallabies.

- *Understanding "genus dendrolagus" helps you talk about this topic clearly.*
- *He looked up "genus dendrolagus" because he had never seen it before.*

genus denisonia *(noun)*

Copperheads.

- *Understanding "genus denisonia" helps you talk about this topic clearly.*
- *They discussed "genus denisonia" during the group presentation.*

genus dermatobia *(noun)*

Larvae live under the skin of domestic mammals and humans.

- *In class, the teacher used "genus dermatobia" to mean larvae live under the skin of domestic mammals and....*
- *The article explained what "genus dermatobia" means with a simple example.*

---

genus dermochelys *(noun)*

Type genus of the Dermochelyidae: leatherback turtles.

- *The article explained what "genus dermochelys" means with a simple example.*
- *In class, the teacher used "genus dermochelys" to mean type genus of the dermochelyidae: leatherback turtles.*

---

genus desmidium *(noun)*

A genus of protoctist.

- *The article explained what "genus desmidium" means with a simple example.*
- *In class, the teacher used "genus desmidium" to mean a genus of protoctist.*

---

genus desmodus *(noun)*

Type genus of the Desmodontidae: vampire bats.

- *In class, the teacher used "genus desmodus" to mean type genus of the desmodontidae: vampire bats.*
- *The article explained what "genus desmodus" means with a simple example.*

---

genus desmograthus *(noun)*

An amphibian genus of Plethodontidae.

- *Understanding "genus desmograthus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus desmograthus" to mean an amphibian genus of plethodontidae.*

---

genus diadophis *(noun)*

A genus of reptiles of the family Colubridae including ringneck snakes.

- *The article explained what "genus diadophis" means with a simple example.*
- *She wrote a short paragraph that included "genus diadophis."*

---

genus dialeurodes *(noun)*

A genus of Aleyrodidae.

- *She wrote a short paragraph that included "genus dialeurodes."*
- *The article explained what "genus dialeurodes" means with a simple example.*

---

genus diapheromera *(noun)*

A genus of Phasmidae.

- *She wrote a short paragraph that included "genus diapheromera."*
- *He looked up "genus diapheromera" because he had never seen it before.*

---

genus dicamptodon *(noun)*

Type genus of the Dicamptodontidae.

- *Understanding "genus dicamptodon" helps you talk about this topic clearly.*
- *The article explained what "genus dicamptodon" means with a simple example.*

---

genus diceros *(noun)*

Most common species in Africa.

- *The article explained what "genus diceros" means with a simple example.*
- *Understanding "genus diceros" helps you talk about this topic clearly.*

---

genus dicrostonyx *(noun)*

Pied lemmings.

- *In class, the teacher used "genus dicrostonyx" to mean pied lemmings.*
- *Understanding "genus dicrostonyx" helps you talk about this topic clearly.*

---

genus difflugia *(noun)*

Genus of protozoans related to ameba.

- *They discussed "genus difflugia" during the group presentation.*

- *Understanding "genus difflugia" helps you talk about this topic clearly.*

---

genus dinornis *(noun)*

Type genus of the Dinornithidae: large moas.

- *Understanding "genus dinornis" helps you talk about this topic clearly.*
- *The article explained what "genus dinornis" means with a simple example.*

---

genus diodon *(noun)*

Type genus of the Diodontidae.

- *The article explained what "genus diodon" means with a simple example.*
- *They discussed "genus diodon" during the group presentation.*

---

genus diphylla *(noun)*

Vampire bats.

- *They discussed "genus diphylla" during the group presentation.*
- *In class, the teacher used "genus diphylla" to mean vampire bats.*

---

genus diplococcus *(noun)*

A genus of bacteria.

- *Understanding "genus diplococcus" helps you talk about this topic clearly.*
- *He looked up "genus diplococcus" because he had never seen it before.*

---

genus dipsosaurus *(noun)*

Desert iguanas.

- *Understanding "genus dipsosaurus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus dipsosaurus."*

---

genus dipus *(noun)*

Type genus of the Dipodidae; typical jerboas having three toes on each hind foot.

- *They discussed "genus dipus" during the group presentation.*
- *Understanding "genus dipus" helps you talk about this topic clearly.*

---

genus doliolum *(noun)*

Type genus of the Doliolidae.

- *She wrote a short paragraph that included "genus doliolum."*
- *The article explained what "genus doliolum" means with a simple example.*

---

genus drepanis *(noun)*

A genus of Drepanididae.

- *He looked up "genus drepanis" because he had never seen it before.*
- *In class, the teacher used "genus drepanis" to mean a genus of drepanididae.*

---

genus dromaius *(noun)*

A genus of birds in the order Casuariiformes.

- *In class, the teacher used "genus dromaius" to mean a genus of birds in the order casuariiformes.*
- *The article explained what "genus dromaius" means with a simple example.*

---

genus drymarchon *(noun)*

A genus of Colubridae.

- *She wrote a short paragraph that included "genus drymarchon."*
- *The article explained what "genus drymarchon" means with a simple example.*

---

genus dryopithecus *(noun)*

Genus of Old World hominoids; Miocene and Pliocene.

- *The article explained what "genus dryopithecus" means with a simple example.*
- *Understanding "genus dryopithecus" helps you talk about this topic clearly.*

---

genus dusicyon *(noun)*

Crab-eating dog.

- *He looked up “genus dusicyon” because he had never seen it before.*
- *They discussed “genus dusicyon” during the group presentation.*

---

genus dysdercus *(noun)*

A genus of slender long-legged bugs that feed on the developing seeds of cotton and stain it.

- *In class, the teacher used “genus dysdercus” to mean a genus of slender long-legged bugs that feed on....*
- *Understanding “genus dysdercus” helps you talk about this topic clearly.*

---

genus eacles *(noun)*

Imperial moths.

- *They discussed “genus eacles” during the group presentation.*
- *She wrote a short paragraph that included “genus eacles.”*

---

genus echeneis *(noun)*

Type genus of the Echeneididae: typical remoras.

- *He looked up “genus echeneis” because he had never seen it before.*
- *Understanding “genus echeneis” helps you talk about this topic clearly.*

---

genus echidnophaga *(noun)*

A genus of Siphonaptera.

- *The article explained what “genus echidnophaga” means with a simple example.*
- *In class, the teacher used “genus echidnophaga” to mean a genus of siphonaptera.*

---

genus ectopistes *(noun)*

A genus of Columbidae.

- *She wrote a short paragraph that included “genus ectopistes.”*
- *They discussed “genus ectopistes” during the group presentation.*

---

genus edaphosaurus *(noun)*

Type genus of the Edaphosauridae.

- *In class, the teacher used “genus edaphosaurus” to mean type genus of the edaphosauridae.*
- *They discussed “genus edaphosaurus” during the group presentation.*

---

genus egretta *(noun)*

Small Old and New World herons.

- *In class, the teacher used “genus egretta” to mean small old and new world herons.*
- *The article explained what “genus egretta” means with a simple example.*

---

genus elagatis *(noun)*

A genus of Carangidae.

- *He looked up “genus elagatis” because he had never seen it before.*
- *She wrote a short paragraph that included “genus elagatis.”*

---

genus elanoides *(noun)*

A genus of kites.

- *Understanding “genus elanoides” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus elanoides.”*

---

genus elanus *(noun)*

A genus of small kites of both Old and New Worlds.

- *Understanding “genus elanus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus elanus.”*

---

genus elaphurus *(noun)*

A genus of Cervidae.

- *The article explained what "genus elaphurus" means with a simple example.*
- *Understanding "genus elaphurus" helps you talk about this topic clearly.*

---

genus electrophorus *(noun)*

Type genus of the family Electrophoridae; electric eels.

- *The article explained what "genus electrophorus" means with a simple example.*
- *In class, the teacher used "genus electrophorus" to mean type genus of the family electrophoridae; electric eels.*

---

genus elops *(noun)*

Type genus of the Elopidae: tenpounder.

- *The article explained what "genus elops" means with a simple example.*
- *They discussed "genus elops" during the group presentation.*

---

genus endamoeba *(noun)*

The type genus of the family Endamoebidae.

- *Understanding "genus endamoeba" helps you talk about this topic clearly.*
- *They discussed "genus endamoeba" during the group presentation.*

---

genus engraulis *(noun)*

Type genus of the family Engraulidae.

- *In class, the teacher used "genus engraulis" to mean type genus of the family engraulidae.*
- *They discussed "genus engraulis" during the group presentation.*

---

genus eoraptor *(noun)*

Primitive theropod found in Argentina; early Triassic.

- *Understanding "genus eoraptor" helps you talk about this topic clearly.*
- *He looked up "genus eoraptor" because he had never seen it before.*

---

genus ephippiorhynchus *(noun)*

Saddlebills.

- *Understanding "genus ephippiorhynchus" helps you talk about this topic clearly.*
- *He looked up "genus ephippiorhynchus" because he had never seen it before.*

---

genus epilachna *(noun)*

Genus of ladybugs native to Mexico and Central America; both larvae and adults feed on plants.

- *They discussed "genus epilachna" during the group presentation.*
- *He looked up "genus epilachna" because he had never seen it before.*

---

genus eptatretus *(noun)*

A genus of fossil fish of the family Myxinidae.

- *The article explained what "genus eptatretus" means with a simple example.*
- *Understanding "genus eptatretus" helps you talk about this topic clearly.*

---

genus erethizon *(noun)*

A genus of Erethizontidae.

- *Understanding "genus erethizon" helps you talk about this topic clearly.*
- *They discussed "genus erethizon" during the group presentation.*

---

genus erignathus *(noun)*

Bearded seals.

- *He looked up "genus erignathus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus erignathus."*

---

genus eriosoma *(noun)*

Woolly aphids.

- *She wrote a short paragraph that included "genus eriosoma."*
- *Understanding "genus eriosoma" helps you talk about this topic clearly.*

genus erithacus *(noun)*

Old World thrushes.

- *He looked up "genus erithacus" because he had never seen it before.*
- *They discussed "genus erithacus" during the group presentation.*

genus erolia *(noun)*

A genus of Scolopacidae.

- *Understanding "genus erolia" helps you talk about this topic clearly.*
- *He looked up "genus erolia" because he had never seen it before.*

genus eschrichtius *(noun)*

Type and sole genus of the Eschrichtiidae.

- *In class, the teacher used "genus eschrichtius" to mean type and sole genus of the eschrichtiidae.*
- *He looked up "genus eschrichtius" because he had never seen it before.*

genus etropus *(noun)*

A genus of Bothidae.

- *Understanding "genus etropus" helps you talk about this topic clearly.*
- *He looked up "genus etropus" because he had never seen it before.*

genus euarctos *(noun)*

American black bears; in some classifications not a separate genus from Ursus.

- *Understanding "genus euarctos" helps you talk about this topic clearly.*
- *The article explained what "genus euarctos" means with a simple example.*

genus eucinostomus *(noun)*

A genus of Gerreidae.

- *Understanding "genus eucinostomus" helps you talk about this topic clearly.*
- *He looked up "genus eucinostomus" because he had never seen it before.*

genus euderma *(noun)*

A genus of Vespertilionidae.

- *The article explained what "genus euderma" means with a simple example.*
- *She wrote a short paragraph that included "genus euderma."*

genus eudyptes *(noun)*

Rock hoppers.

- *The article explained what "genus eudyptes" means with a simple example.*
- *In class, the teacher used "genus eudyptes" to mean rock hoppers.*

genus eumeces *(noun)*

New World skinks.

- *She wrote a short paragraph that included "genus eumeces."*
- *Understanding "genus eumeces" helps you talk about this topic clearly.*

genus eumops *(noun)*

Mastiff bats.

- *She wrote a short paragraph that included "genus eumops."*
- *He looked up "genus eumops" because he had never seen it before.*

genus euphagus *(noun)*

A genus of Icteridae.

- *He looked up "genus euphagus" because he had never seen it before.*
- *Understanding "genus euphagus" helps you talk about this topic clearly.*

genus euphractus *(noun)*

A genus of Dasypodidae.

- *Understanding "genus euphractus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus euphractus" to mean a genus of dasypodidae.*

---

genus euplectella *(noun)*

A genus of Hyalospongiae.

- *In class, the teacher used "genus euplectella" to mean a genus of hyalospongiae.*
- *The article explained what "genus euplectella" means with a simple example.*

---

genus euproctis *(noun)*

A genus of Lymantriidae.

- *Understanding "genus euproctis" helps you talk about this topic clearly.*
- *The article explained what "genus euproctis" means with a simple example.*

---

genus eutamias *(noun)*

Chipmunks of western America and Asia.

- *She wrote a short paragraph that included "genus eutamias."*
- *He looked up "genus eutamias" because he had never seen it before.*

---

genus euthynnus *(noun)*

A genus of Scombridae.

- *They discussed "genus euthynnus" during the group presentation.*
- *She wrote a short paragraph that included "genus euthynnus."*

---

genus exaeretodon *(noun)*

A genus of reptiles of the division Cynodontia.

- *Understanding "genus exaeretodon" helps you talk about this topic clearly.*
- *In class, the teacher used "genus exaeretodon" to mean a genus of reptiles of the division cynodontia.*

---

genus fasciolopsis *(noun)*

A genus of Fasciolidae.

- *She wrote a short paragraph that included "genus fasciolopsis."*
- *He looked up "genus fasciolopsis" because he had never seen it before.*

---

genus fissurella *(noun)*

Type genus of the family Fissurellidae: keyhole limpets.

- *He looked up "genus fissurella" because he had never seen it before.*
- *She wrote a short paragraph that included "genus fissurella."*

---

genus fistularia *(noun)*

Type genus of the family Fistulariidae.

- *He looked up "genus fistularia" because he had never seen it before.*
- *Understanding "genus fistularia" helps you talk about this topic clearly.*

---

genus forficula *(noun)*

Type genus of Forficulidae.

- *The article explained what "genus forficula" means with a simple example.*
- *Understanding "genus forficula" helps you talk about this topic clearly.*

---

genus formicarius *(noun)*

Type genus of the Formicariidae.

- *Understanding "genus formicarius" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus formicarius."*

---

genus frankliniella *(noun)*

Tobacco thrips.

- *In class, the teacher used "genus frankliniella" to mean tobacco thrips.*

- *Understanding "genus frankliniella" helps you talk about this topic clearly.*

---

genus fregata *(noun)*

Type genus of the Fregatidae.

- *In class, the teacher used "genus fregata" to mean type genus of the fregatidae.*
- *They discussed "genus fregata" during the group presentation.*

---

genus fungia *(noun)*

A genus comprising the usual mushroom corals.

- *In class, the teacher used "genus fungia" to mean a genus comprising the usual mushroom corals.*
- *He looked up "genus fungia" because he had never seen it before.*

---

genus furnarius *(noun)*

Type genus of the family Furnariidae: ovenbirds.

- *The article explained what "genus furnarius" means with a simple example.*
- *In class, the teacher used "genus furnarius" to mean type genus of the family furnariidae: ovenbirds.*

---

genus galeocerdo *(noun)*

Tiger sharks.

- *The article explained what "genus galeocerdo" means with a simple example.*
- *Understanding "genus galeocerdo" helps you talk about this topic clearly.*

---

genus galeorhinus *(noun)*

A genus of Carcharhinidae.

- *They discussed "genus galeorhinus" during the group presentation.*
- *In class, the teacher used "genus galeorhinus" to mean a genus of carcharhinidae.*

---

genus galictis *(noun)*

Alternative name for the genus Grison.

- *He looked up "genus galictis" because he had never seen it before.*
- *They discussed "genus galictis" during the group presentation.*

---

genus gallirallus *(noun)*

Rails of New Zealand.

- *In class, the teacher used "genus gallirallus" to mean rails of new zealand.*
- *They discussed "genus gallirallus" during the group presentation.*

---

genus gambelia *(noun)*

Leopard lizards.

- *He looked up "genus gambelia" because he had never seen it before.*
- *They discussed "genus gambelia" during the group presentation.*

---

genus garrulus *(noun)*

Type genus of the Garrulinae: Old World jays.

- *They discussed "genus garrulus" during the group presentation.*
- *In class, the teacher used "genus garrulus" to mean type genus of the garrulinae: old world jays.*

---

genus gasterophilus *(noun)*

Type genus of the Gasterophilidae: horse botflies.

- *He looked up "genus gasterophilus" because he had never seen it before.*
- *They discussed "genus gasterophilus" during the group presentation.*

---

genus gastrophryne *(noun)*

Primarily tropical narrow-mouthed toads.

- *In class, the teacher used "genus gastrophryne" to mean primarily tropical narrow-mouthed toads.*
- *The article explained what "genus gastrophryne" means with a simple example.*

---

genus gavialis *(noun)*

Type genus of the Gavialidae.

- *He looked up "genus gavialis" because he had never seen it before.*
- *They discussed "genus gavialis" during the group presentation.*

---

genus gelechia *(noun)*

Type genus of the Gelechiidae: pink bollworms.

- *He looked up "genus gelechia" because he had never seen it before.*
- *They discussed "genus gelechia" during the group presentation.*

---

genus gempylus *(noun)*

Type genus of the Gempylidae.

- *In class, the teacher used "genus gempylus" to mean type genus of the gempylidae.*
- *The article explained what "genus gempylus" means with a simple example.*

---

genus genyonemus *(noun)*

A genus of Sciaenidae.

- *Understanding "genus genyonemus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus genyonemus."*

---

genus geochelone *(noun)*

Giant tortoises.

- *She wrote a short paragraph that included "genus geochelone."*
- *The article explained what "genus geochelone" means with a simple example.*

---

genus geococcyx *(noun)*

Roadrunners.

- *In class, the teacher used "genus geococcyx" to mean roadrunners.*
- *He looked up "genus geococcyx" because he had never seen it before.*

---

genus geomys *(noun)*

Type genus of the Geomyidae.

- *Understanding "genus geomys" helps you talk about this topic clearly.*
- *The article explained what "genus geomys" means with a simple example.*

---

genus geophilus *(noun)*

Type genus of the Geophilidae: a cosmopolitan genus of centipedes sometimes called earwigs.

- *In class, the teacher used "genus geophilus" to mean type genus of the geophilidae: a cosmopolitan genus....*
- *The article explained what "genus geophilus" means with a simple example.*

---

genus geothlypis *(noun)*

Yellowthroats.

- *In class, the teacher used "genus geothlypis" to mean yellowthroats.*
- *The article explained what "genus geothlypis" means with a simple example.*

---

genus gerbillus *(noun)*

Type genus of the Gerbillinae: typical gerbils.

- *They discussed "genus gerbillus" during the group presentation.*
- *Understanding "genus gerbillus" helps you talk about this topic clearly.*

---

genus gerres *(noun)*

Type genus of the Gerreidae.

- *Understanding "genus gerres" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus gerres."*

---

genus gerrhonotus *(noun)*

Alligator lizards.

- *In class, the teacher used "genus gerrhonotus" to mean alligator lizards.*

- *The article explained what “genus gerrhonotus” means with a simple example.*

---

genus ginglymostoma *(noun)*

Nurse sharks.

- *He looked up “genus ginglymostoma” because he had never seen it before.*
- *They discussed “genus ginglymostoma” during the group presentation.*

---

genus giraffa *(noun)*

Type genus of the Giraffidae.

- *Understanding “genus giraffa” helps you talk about this topic clearly.*
- *The article explained what “genus giraffa” means with a simple example.*

---

genus glareola *(noun)*

Type genus of the Glareolidae: the pratincoles.

- *She wrote a short paragraph that included “genus glareola.”*
- *The article explained what “genus glareola” means with a simple example.*

---

genus glaucomys *(noun)*

New World flying squirrels.

- *He looked up “genus glaucomys” because he had never seen it before.*
- *She wrote a short paragraph that included “genus glaucomys.”*

---

genus globicephala *(noun)*

Pilot whales.

- *The article explained what “genus globicephala” means with a simple example.*
- *In class, the teacher used “genus globicephala” to mean pilot whales.*

---

genus glossopsitta *(noun)*

A genus of Loriinae.

- *In class, the teacher used “genus glossopsitta” to mean a genus of loriinae.*
- *He looked up “genus glossopsitta” because he had never seen it before.*

---

genus gobiesox *(noun)*

Type genus of the Gobiesocidae.

- *Understanding “genus gobiesox” helps you talk about this topic clearly.*
- *They discussed “genus gobiesox” during the group presentation.*

---

genus gobio *(noun)*

True gudgeons.

- *Understanding “genus gobio” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus gobio.”*

---

genus gomphotherium *(noun)*

Type genus of the Gomphotheriidae.

- *Understanding “genus gomphotherium” helps you talk about this topic clearly.*
- *He looked up “genus gomphotherium” because he had never seen it before.*

---

genus gonorhynchus *(noun)*

Slender cylindrical marine fishes lacking air bladders and teeth.

- *She wrote a short paragraph that included “genus gonorhynchus.”*
- *The article explained what “genus gonorhynchus” means with a simple example.*

---

genus gopherus *(noun)*

Gopher tortoises.

- *The article explained what “genus gopherus” means with a simple example.*
- *They discussed “genus gopherus” during the group presentation.*

---

genus gorgonocephalus *(noun)*

Basket stars.

- *He looked up "genus gorgonocephalus" because he had never seen it before.*
- *Understanding "genus gorgonocephalus" helps you talk about this topic clearly.*

---

genus grison *(noun)*

A genus of Mustelidae.

- *In class, the teacher used "genus grison" to mean a genus of mustelidae.*
- *The article explained what "genus grison" means with a simple example.*

---

genus gymnelis *(noun)*

A genus of Zoarcidae.

- *He looked up "genus gymnelis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus gymnelis."*

---

genus gymnogyps *(noun)*

Containing solely the California condor.

- *They discussed "genus gymnogyps" during the group presentation.*
- *In class, the teacher used "genus gymnogyps" to mean containing solely the california condor.*

---

genus gymnorhina *(noun)*

In some classifications placed in the family Laniidae: Australian piping crows.

- *In class, the teacher used "genus gymnorhina" to mean in some classifications placed in the family....*
- *He looked up "genus gymnorhina" because he had never seen it before.*

---

genus gymnura *(noun)*

Butterfly rays.

- *They discussed "genus gymnura" during the group presentation.*
- *She wrote a short paragraph that included "genus gymnura."*

---

genus gypaetus *(noun)*

In some classifications the type genus of the family Aegypiidae.

- *Understanding "genus gypaetus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus gypaetus" to mean in some classifications the type genus of the....*

---

genus haematobia *(noun)*

European genus of bloodsucking flies.

- *They discussed "genus haematobia" during the group presentation.*
- *In class, the teacher used "genus haematobia" to mean european genus of bloodsucking flies.*

---

genus haematopus *(noun)*

Oystercatchers.

- *She wrote a short paragraph that included "genus haematopus."*
- *The article explained what "genus haematopus" means with a simple example.*

---

genus haemoproteus *(noun)*

Type genus of the family Haemoproteidae.

- *Understanding "genus haemoproteus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus haemoproteus."*

---

genus haemulon *(noun)*

Type genus of the Haemulidae.

- *She wrote a short paragraph that included "genus haemulon."*
- *He looked up "genus haemulon" because he had never seen it before.*

---

genus haldea *(noun)*

Ground snakes.

- *The article explained what "genus haldea" means with a simple example.*
- *They discussed "genus haldea" during the group presentation.*

---

genus halicoeres *(noun)*

A genus of Labridae.

- *She wrote a short paragraph that included "genus halicoeres."*
- *He looked up "genus halicoeres" because he had never seen it before.*

---

genus haminoea *(noun)*

Common genus of marine bubble shells of the Pacific coast of North America.

- *Understanding "genus haminoea" helps you talk about this topic clearly.*
- *They discussed "genus haminoea" during the group presentation.*

---

genus harpia *(noun)*

A genus of Accipitridae.

- *She wrote a short paragraph that included "genus harpia."*
- *The article explained what "genus harpia" means with a simple example.*

---

genus heleodytes *(noun)*

Alternative classifications for the cactus wrens.

- *In class, the teacher used "genus heleodytes" to mean alternative classifications for the cactus wrens.*
- *The article explained what "genus heleodytes" means with a simple example.*

---

genus heliobacter *(noun)*

A genus of helical or curved or straight aerobic bacteria with rounded ends and multiple flagella; found in the gastric mucosa of primates (including humans).

- *He looked up "genus heliobacter" because he had never seen it before.*
- *In class, the teacher used "genus heliobacter" to mean a genus of helical or curved or straight aerobic....*

---

genus heloderma *(noun)*

Type genus of the Helodermatidae; American venomous lizards.

- *They discussed "genus heloderma" during the group presentation.*
- *In class, the teacher used "genus heloderma" to mean type genus of the helodermatidae; american venomous....*

---

genus hemigalus *(noun)*

Banded palm civets.

- *She wrote a short paragraph that included "genus hemigalus."*
- *The article explained what "genus hemigalus" means with a simple example.*

---

genus hermissenda *(noun)*

Genus of marine sea slugs.

- *The article explained what "genus hermissenda" means with a simple example.*
- *In class, the teacher used "genus hermissenda" to mean genus of marine sea slugs.*

---

genus herrerasaurus *(noun)*

Primitive theropod found in Argentina; early Triassic.

- *In class, the teacher used "genus herrerasaurus" to mean primitive theropod found in argentina; early triassic.*
- *They discussed "genus herrerasaurus" during the group presentation.*

---

genus hesperiphona *(noun)*

Evening grosbeak.

- *He looked up "genus hesperiphona" because he had never seen it before.*
- *Understanding "genus hesperiphona" helps you talk about this topic clearly.*

---

genus heterodon *(noun)*

A genus of small colubrid snakes containing the North American hognose snakes.

- *He looked up "genus heterodon" because he had never seen it before.*
- *They discussed "genus heterodon" during the group presentation.*

genus hexagrammos *(noun)*

Type genus of the Hexagrammidae.

- *In class, the teacher used "genus hexagrammos" to mean type genus of the hexagrammidae.*
- *They discussed "genus hexagrammos" during the group presentation.*

genus hexamita *(noun)*

Flagellates free-living or parasitic in intestines of birds.

- *They discussed "genus hexamita" during the group presentation.*
- *Understanding "genus hexamita" helps you talk about this topic clearly.*

genus hexanchus *(noun)*

A genus of Hexanchidae.

- *The article explained what "genus hexanchus" means with a simple example.*
- *They discussed "genus hexanchus" during the group presentation.*

genus himantopus *(noun)*

Major one of two genera of stilts; similar to avocets but with straight bills.

- *In class, the teacher used "genus himantopus" to mean major one of two genera of stilts; similar to....*
- *The article explained what "genus himantopus" means with a simple example.*

genus hippobosca *(noun)*

Type genus of the Hippoboscidae.

- *He looked up "genus hippobosca" because he had never seen it before.*
- *In class, the teacher used "genus hippobosca" to mean type genus of the hippoboscidae.*

genus hippoglossoides *(noun)*

A genus of Pleuronectidae.

- *He looked up "genus hippoglossoides" because he had never seen it before.*
- *They discussed "genus hippoglossoides" during the group presentation.*

genus hipposideros *(noun)*

Horseshoe bats.

- *They discussed "genus hipposideros" during the group presentation.*
- *In class, the teacher used "genus hipposideros" to mean horseshoe bats.*

genus hippotragus *(noun)*

Sable antelopes.

- *Understanding "genus hippotragus" helps you talk about this topic clearly.*
- *He looked up "genus hippotragus" because he had never seen it before.*

genus hipsurus *(noun)*

A genus of Embiotocidae.

- *She wrote a short paragraph that included "genus hipsurus."*
- *The article explained what "genus hipsurus" means with a simple example.*

genus holbrookia *(noun)*

Earless lizards.

- *In class, the teacher used "genus holbrookia" to mean earless lizards.*
- *The article explained what "genus holbrookia" means with a simple example.*

genus holocentrus *(noun)*

Type genus of the family Holocentridae; squirrelfishes.

- *Understanding "genus holocentrus" helps you talk about this topic clearly.*
- *He looked up "genus holocentrus" because he had never seen it before.*

genus homona *(noun)*

Tea tortrix.

- *Understanding "genus homona" helps you talk about this topic clearly.*
- *In class, the teacher used "genus homona" to mean tea tortrix.*

---

genus hyalophora *(noun)*

American silkworm moth.

- *She wrote a short paragraph that included "genus hyalophora."*
- *The article explained what "genus hyalophora" means with a simple example.*

---

genus hydrobates *(noun)*

Type genus of the Hydrobatidae.

- *They discussed "genus hydrobates" during the group presentation.*
- *The article explained what "genus hydrobates" means with a simple example.*

---

genus hydrochoerus *(noun)*

A genus of Hydrochoeridae.

- *They discussed "genus hydrochoerus" during the group presentation.*
- *She wrote a short paragraph that included "genus hydrochoerus."*

---

genus hydrodamalis *(noun)*

A genus of the family Dugongidae comprising only Steller's sea cow.

- *They discussed "genus hydrodamalis" during the group presentation.*
- *She wrote a short paragraph that included "genus hydrodamalis."*

---

genus hydromantes *(noun)*

Web-toed salamanders.

- *In class, the teacher used "genus hydromantes" to mean web-toed salamanders.*
- *The article explained what "genus hydromantes" means with a simple example.*

---

genus hyemoschus *(noun)*

Water chevrotains.

- *In class, the teacher used "genus hyemoschus" to mean water chevrotains.*
- *The article explained what "genus hyemoschus" means with a simple example.*

---

genus hylactophryne *(noun)*

Barking frogs.

- *He looked up "genus hylactophryne" because he had never seen it before.*
- *They discussed "genus hylactophryne" during the group presentation.*

---

genus hylocichla *(noun)*

American thrush: wood thrush; hermit thrush; veery.

- *Understanding "genus hylocichla" helps you talk about this topic clearly.*
- *He looked up "genus hylocichla" because he had never seen it before.*

---

genus hylophylax *(noun)*

A genus of Formicariidae.

- *He looked up "genus hylophylax" because he had never seen it before.*
- *Understanding "genus hylophylax" helps you talk about this topic clearly.*

---

genus hynerpeton *(noun)*

Earliest fossil amphibian ever found; of the Devonian; found in Pennsylvania.

- *He looked up "genus hynerpeton" because he had never seen it before.*
- *She wrote a short paragraph that included "genus hynerpeton."*

---

genus hypentelium *(noun)*

A genus of fish in the family Catostomidae.

- *In class, the teacher used "genus hypentelium" to mean a genus of fish in the family catostomidae.*

- *He looked up “genus hypentelium” because he had never seen it before.*

genus hyperoglyphe *(noun)*

A genus of Stromateidae.

- *In class, the teacher used “genus hyperoglyphe” to mean a genus of stromateidae.*
- *Understanding “genus hyperoglyphe” helps you talk about this topic clearly.*

genus hyperoodon *(noun)*

Bottle-nosed whales.

- *They discussed “genus hyperoodon” during the group presentation.*
- *In class, the teacher used “genus hyperoodon” to mean bottle-nosed whales.*

genus hyphantria *(noun)*

Fall webworms.

- *Understanding “genus hyphantria” helps you talk about this topic clearly.*
- *The article explained what “genus hyphantria” means with a simple example.*

genus hypoderma *(noun)*

In some classifications considered the type genus of the family Hypodermatidae: warble flies.

- *They discussed “genus hypoderma” during the group presentation.*
- *Understanding “genus hypoderma” helps you talk about this topic clearly.*

genus hypopachus *(noun)*

Sheep frogs.

- *Understanding “genus hypopachus” helps you talk about this topic clearly.*
- *In class, the teacher used “genus hypopachus” to mean sheep frogs.*

genus hypsiglena *(noun)*

Night snakes.

- *He looked up “genus hypsiglena” because he had never seen it before.*
- *Understanding “genus hypsiglena” helps you talk about this topic clearly.*

genus hypsiprymnodon *(noun)*

Musk kangaroos.

- *The article explained what “genus hypsiprymnodon” means with a simple example.*
- *Understanding “genus hypsiprymnodon” helps you talk about this topic clearly.*

genus hyracotherium *(noun)*

Extinct horse genus; formerly called eohippus.

- *He looked up “genus hyracotherium” because he had never seen it before.*
- *She wrote a short paragraph that included “genus hyracotherium.”*

genus ibero-mesornis *(noun)*

A genus of fossil bird of the subclass Archaeornithes.

- *He looked up “genus ibero-mesornis” because he had never seen it before.*
- *In class, the teacher used “genus ibero-mesornis” to mean a genus of fossil bird of the subclass archaeornithes.*

genus ichthyostega *(noun)*

Second earliest fossil amphibian ever found; of the Devonian; found in Greenland.

- *He looked up “genus ichthyostega” because he had never seen it before.*
- *She wrote a short paragraph that included “genus ichthyostega.”*

genus icteria *(noun)*

New World chats.

- *She wrote a short paragraph that included “genus icteria.”*
- *He looked up “genus icteria” because he had never seen it before.*

genus ictiobus *(noun)*

Buffalo fishes.

- *He looked up "genus ictiobus" because he had never seen it before.*
- *Understanding "genus ictiobus" helps you talk about this topic clearly.*

genus ictonyx *(noun)*

A genus of Mustelidae.

- *He looked up "genus ictonyx" because he had never seen it before.*
- *She wrote a short paragraph that included "genus ictonyx."*

genus inachis *(noun)*

A genus of Nymphalidae.

- *They discussed "genus inachis" during the group presentation.*
- *In class, the teacher used "genus inachis" to mean a genus of nymphalidae.*

genus iridoprocne *(noun)*

A genus of Hirundinidae.

- *Understanding "genus iridoprocne" helps you talk about this topic clearly.*
- *In class, the teacher used "genus iridoprocne" to mean a genus of hirundinidae.*

genus ischigualastia *(noun)*

Early reptile found in Argentina.

- *The article explained what "genus ischigualastia" means with a simple example.*
- *In class, the teacher used "genus ischigualastia" to mean early reptile found in argentina.*

genus istiophorus *(noun)*

Type genus of the Istiophoridae.

- *The article explained what "genus istiophorus" means with a simple example.*
- *Understanding "genus istiophorus" helps you talk about this topic clearly.*

genus javanthropus *(noun)*

Former genus of primitive man; now Homo soloensis: comprises Solo man.

- *They discussed "genus javanthropus" during the group presentation.*
- *The article explained what "genus javanthropus" means with a simple example.*

genus kakatoe *(noun)*

A genus of Psittacidae.

- *In class, the teacher used "genus kakatoe" to mean a genus of psittacidae.*
- *The article explained what "genus kakatoe" means with a simple example.*

genus kalotermes *(noun)*

Type genus of Kalotermitidae; termites destructive of wood and living trees.

- *She wrote a short paragraph that included "genus kalotermes."*
- *The article explained what "genus kalotermes" means with a simple example.*

genus katsuwonus *(noun)*

Oceanic bonitos; in some classifications placed in its own family Katsuwonidae.

- *He looked up "genus katsuwonus" because he had never seen it before.*
- *In class, the teacher used "genus katsuwonus" to mean oceanic bonitos; in some classifications placed in....*

genus kenyapithecus *(noun)*

Extinct primate having powerful chewing muscles along with large molars and small incisors; fossils found in Kenya.

- *The article explained what "genus kenyapithecus" means with a simple example.*
- *Understanding "genus kenyapithecus" helps you talk about this topic clearly.*

genus kinosternon *(noun)*

Type genus of the Kinosternidae.

- *In class, the teacher used "genus kinosternon" to mean type genus of the kinosternidae.*
- *They discussed "genus kinosternon" during the group presentation.*

---

genus kogia *(noun)*

Pygmy sperm whales.

- *The article explained what "genus kogia" means with a simple example.*
- *In class, the teacher used "genus kogia" to mean pygmy sperm whales.*

---

genus krypterophaneron *(noun)*

A genus of fish in the family Anomalopidae.

- *They discussed "genus krypterophaneron" during the group presentation.*
- *In class, the teacher used "genus krypterophaneron" to mean a genus of fish in the family anomalopidae.*

---

genus kyphosus *(noun)*

Type genus of the Kyphosidae.

- *He looked up "genus kyphosus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus kyphosus."*

---

genus lachnolaimus *(noun)*

A genus of Labridae.

- *He looked up "genus lachnolaimus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus lachnolaimus."*

---

genus lactophrys *(noun)*

A genus of Ostraciidae.

- *She wrote a short paragraph that included "genus lactophrys."*
- *He looked up "genus lactophrys" because he had never seen it before.*

---

genus lagidium *(noun)*

A genus of Chinchillidae.

- *In class, the teacher used "genus lagidium" to mean a genus of chinchillidae.*
- *He looked up "genus lagidium" because he had never seen it before.*

---

genus lagodon *(noun)*

A genus of Sparidae.

- *He looked up "genus lagodon" because he had never seen it before.*
- *She wrote a short paragraph that included "genus lagodon."*

---

genus lagorchestes *(noun)*

Hare wallabies.

- *Understanding "genus lagorchestes" helps you talk about this topic clearly.*
- *They discussed "genus lagorchestes" during the group presentation.*

---

genus lagothrix *(noun)*

Woolly monkeys.

- *Understanding "genus lagothrix" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus lagothrix."*

---

genus lambis *(noun)*

Scorpion shells of shallow tropical waters of the eastern hemisphere.

- *He looked up "genus lambis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus lambis."*

---

genus lampris *(noun)*

Type genus of the Lampridae.

- *In class, the teacher used "genus lampris" to mean type genus of the lampridae.*
- *They discussed "genus lampris" during the group presentation.*

genus lampropeltis *(noun)*

King snakes and milk snakes.

- *Understanding "genus lampropeltis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus lampropeltis."*

genus lanthanotus *(noun)*

One species.

- *The article explained what "genus lanthanotus" means with a simple example.*
- *In class, the teacher used "genus lanthanotus" to mean one species.*

genus lasiocampa *(noun)*

Type genus of the Lasiocampidae: eggars.

- *Understanding "genus lasiocampa" helps you talk about this topic clearly.*
- *The article explained what "genus lasiocampa" means with a simple example.*

genus lasiurus *(noun)*

A genus of Vespertilionidae.

- *Understanding "genus lasiurus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus lasiurus."*

genus latimeria *(noun)*

Type genus of the Latimeridae: coelacanth.

- *In class, the teacher used "genus latimeria" to mean type genus of the latimeridae: coelacanth.*
- *Understanding "genus latimeria" helps you talk about this topic clearly.*

genus leiopelma *(noun)*

Type and sole genus of the family Leiopelmatidae.

- *In class, the teacher used "genus leiopelma" to mean type and sole genus of the family leiopelmatidae.*
- *Understanding "genus leiopelma" helps you talk about this topic clearly.*

genus leipoa *(noun)*

Mallee fowl.

- *In class, the teacher used "genus leipoa" to mean mallee fowl.*
- *He looked up "genus leipoa" because he had never seen it before.*

genus lepidocybium *(noun)*

A genus of Gempylidae.

- *He looked up "genus lepidocybium" because he had never seen it before.*
- *Understanding "genus lepidocybium" helps you talk about this topic clearly.*

genus lepisma *(noun)*

Type genus of the Lepismatidae: silverfish.

- *They discussed "genus lepisma" during the group presentation.*
- *The article explained what "genus lepisma" means with a simple example.*

genus lepisosteus *(noun)*

Type genus of the Lepisosteidae: freshwater gars.

- *In class, the teacher used "genus lepisosteus" to mean type genus of the lepisosteidae: freshwater gars.*
- *The article explained what "genus lepisosteus" means with a simple example.*

genus leptinotarsa *(noun)*

Colorado potato beetles.

- *Understanding "genus leptinotarsa" helps you talk about this topic clearly.*
- *In class, the teacher used "genus leptinotarsa" to mean colorado potato beetles.*

genus leptodactylus *(noun)*

Type genus of the Leptodactylidae; in some classifications placed in the family Bufonidae.

- *She wrote a short paragraph that included "genus leptodactylus."*
- *They discussed "genus leptodactylus" during the group presentation.*

genus leptoglossus *(noun)*

Leaf-footed bugs.

- *Understanding "genus leptoglossus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus leptoglossus" to mean leaf-footed bugs.*

genus leptoptilus *(noun)*

Adjutant birds and marabous.

- *They discussed "genus leptoptilus" during the group presentation.*
- *She wrote a short paragraph that included "genus leptoptilus."*

genus leptotyphlops *(noun)*

Blind snakes of Asia and Africa and Americas.

- *The article explained what "genus leptotyphlops" means with a simple example.*
- *They discussed "genus leptotyphlops" during the group presentation.*

genus leucocytozoan *(noun)*

A genus of protoctist.

- *The article explained what "genus leucocytozoan" means with a simple example.*
- *In class, the teacher used "genus leucocytozoan" to mean a genus of protoctist.*

genus leucocytozoon *(noun)*

A genus of protoctist.

- *They discussed "genus leucocytozoon" during the group presentation.*
- *The article explained what "genus leucocytozoon" means with a simple example.*

genus lichanura *(noun)*

Boas of western North America.

- *They discussed "genus lichanura" during the group presentation.*
- *She wrote a short paragraph that included "genus lichanura."*

genus limanda *(noun)*

A genus of Pleuronectidae; righteye flounders having a humped nose and small scales; the underside is often brightly colored.

- *Understanding "genus limanda" helps you talk about this topic clearly.*
- *He looked up "genus limanda" because he had never seen it before.*

genus limenitis *(noun)*

Mainly dark northern butterflies with white wing bars.

- *He looked up "genus limenitis" because he had never seen it before.*
- *In class, the teacher used "genus limenitis" to mean mainly dark northern butterflies with white wing bars.*

genus liomys *(noun)*

Pocket mice.

- *They discussed "genus liomys" during the group presentation.*
- *Understanding "genus liomys" helps you talk about this topic clearly.*

genus liopelma *(noun)*

Type and sole genus of the family Leiopelmatidae.

- *She wrote a short paragraph that included "genus liopelma."*
- *They discussed "genus liopelma" during the group presentation.*

genus liparis *(noun)*

Type genus of the Liparididae: snailfishes.

- *Understanding "genus liparis" helps you talk about this topic clearly.*

- *He looked up “genus liparis” because he had never seen it before.*

genus liposcelis *(noun)*

A genus of Psocidae.

- *She wrote a short paragraph that included “genus liposcelis.”*
- *The article explained what “genus liposcelis” means with a simple example.*

genus litocranius *(noun)*

Antelopes of eastern Africa: gerenuks.

- *They discussed “genus litocranius” during the group presentation.*
- *The article explained what “genus litocranius” means with a simple example.*

genus lobipes *(noun)*

A genus of Phalaropidae.

- *Understanding “genus lobipes” helps you talk about this topic clearly.*
- *The article explained what “genus lobipes” means with a simple example.*

genus lobotes *(noun)*

Type genus of the Lobotidae.

- *In class, the teacher used “genus lobotes” to mean type genus of the lobotidae.*
- *They discussed “genus lobotes” during the group presentation.*

genus lofortyx *(noun)*

California quail.

- *They discussed “genus lofortyx” during the group presentation.*
- *He looked up “genus lofortyx” because he had never seen it before.*

genus lophius *(noun)*

Type genus of family Lophiidae.

- *In class, the teacher used “genus lophius” to mean type genus of family lophiidae.*
- *Understanding “genus lophius” helps you talk about this topic clearly.*

genus lophodytes *(noun)*

A genus of Merginae.

- *The article explained what “genus lophodytes” means with a simple example.*
- *She wrote a short paragraph that included “genus lophodytes.”*

genus lopholatilus *(noun)*

Large brightly colored food fish of deep Atlantic waters.

- *In class, the teacher used “genus lopholatilus” to mean large brightly colored food fish of deep atlantic....*
- *Understanding “genus lopholatilus” helps you talk about this topic clearly.*

genus loxostege *(noun)*

Garden webworms.

- *He looked up “genus loxostege” because he had never seen it before.*
- *Understanding “genus loxostege” helps you talk about this topic clearly.*

genus lufengpithecus *(noun)*

A genus of Hominidae.

- *In class, the teacher used “genus lufengpithecus” to mean a genus of hominidae.*
- *They discussed “genus lufengpithecus” during the group presentation.*

genus lumpenus *(noun)*

A genus of Stichaeidae.

- *The article explained what “genus lumpenus” means with a simple example.*
- *She wrote a short paragraph that included “genus lumpenus.”*

genus luvarus *(noun)*

Type genus of the Luvaridae.

- *Understanding "genus luvarus" helps you talk about this topic clearly.*
- *He looked up "genus luvarus" because he had never seen it before.*

---

genus lycaena *(noun)*

Type genus of the Lycaenidae; small slender butterflies with upper surface of wings usually metallic blue or green or copper.

- *The article explained what "genus lycaena" means with a simple example.*
- *In class, the teacher used "genus lycaena" to mean type genus of the lycaenidae; small slender....*

---

genus lycaeon *(noun)*

African hunting dog.

- *They discussed "genus lycaeon" during the group presentation.*
- *The article explained what "genus lycaeon" means with a simple example.*

---

genus lyrurus *(noun)*

Black grouse.

- *He looked up "genus lyrurus" because he had never seen it before.*
- *Understanding "genus lyrurus" helps you talk about this topic clearly.*

---

genus macrocheira *(noun)*

Giant crabs of Japan.

- *In class, the teacher used "genus macrocheira" to mean giant crabs of japan.*
- *They discussed "genus macrocheira" during the group presentation.*

---

genus macroclemys *(noun)*

Includes the alligator snapping turtle.

- *The article explained what "genus macroclemys" means with a simple example.*
- *In class, the teacher used "genus macroclemys" to mean includes the alligator snapping turtle.*

---

genus macrodactylus *(noun)*

A genus of Melolonthidae.

- *She wrote a short paragraph that included "genus macrodactylus."*
- *Understanding "genus macrodactylus" helps you talk about this topic clearly.*

---

genus macronectes *(noun)*

Giant petrels.

- *He looked up "genus macronectes" because he had never seen it before.*
- *She wrote a short paragraph that included "genus macronectes."*

---

genus macrotis *(noun)*

A genus of Peramelidae.

- *He looked up "genus macrotis" because he had never seen it before.*
- *Understanding "genus macrotis" helps you talk about this topic clearly.*

---

genus macrotus *(noun)*

Leafnose bats.

- *He looked up "genus macrotus" because he had never seen it before.*
- *They discussed "genus macrotus" during the group presentation.*

---

genus macrozoarces *(noun)*

A genus of Zoarcidae.

- *She wrote a short paragraph that included "genus macrozoarces."*
- *The article explained what "genus macrozoarces" means with a simple example.*

---

genus madoqua *(noun)*

Genus comprising some small antelopes of eastern and northeastern Africa.

- *Understanding "genus madoqua" helps you talk about this topic clearly.*
- *They discussed "genus madoqua" during the group presentation.*

---

genus maeandra *(noun)*

Brain corals.

- *They discussed "genus maeandra" during the group presentation.*
- *In class, the teacher used "genus maeandra" to mean brain corals.*

---

genus magicicada *(noun)*

Seventeen-year locust.

- *They discussed "genus magicicada" during the group presentation.*
- *She wrote a short paragraph that included "genus magicicada."*

---

genus malaclemys *(noun)*

American terrapins.

- *He looked up "genus malaclemys" because he had never seen it before.*
- *In class, the teacher used "genus malaclemys" to mean american terrapins.*

---

genus malacosoma *(noun)*

Tent caterpillars.

- *They discussed "genus malacosoma" during the group presentation.*
- *He looked up "genus malacosoma" because he had never seen it before.*

---

genus malopterurus *(noun)*

Electric catfish.

- *She wrote a short paragraph that included "genus malopterurus."*
- *They discussed "genus malopterurus" during the group presentation.*

---

genus mammuthus *(noun)*

Extinct genus: mammoths.

- *They discussed "genus mammuthus" during the group presentation.*
- *He looked up "genus mammuthus" because he had never seen it before.*

---

genus masticophis *(noun)*

Whip snakes.

- *Understanding "genus masticophis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus masticophis."*

---

genus mastigoproctus *(noun)*

Giant whip scorpions.

- *In class, the teacher used "genus mastigoproctus" to mean giant whip scorpions.*
- *They discussed "genus mastigoproctus" during the group presentation.*

---

genus mastotermes *(noun)*

Primitive genus of termites; mostly extinct; sometimes considered the most primitive Isoptera.

- *In class, the teacher used "genus mastotermes" to mean primitive genus of termites; mostly extinct;....*
- *He looked up "genus mastotermes" because he had never seen it before.*

---

genus maxostoma *(noun)*

A genus of fish in the family Catostomidae.

- *The article explained what "genus maxostoma" means with a simple example.*
- *Understanding "genus maxostoma" helps you talk about this topic clearly.*

---

genus mayetiola *(noun)*

A genus of Cecidomyidae.

- *She wrote a short paragraph that included "genus mayetiola."*
- *He looked up "genus mayetiola" because he had never seen it before.*

genus megaderma *(noun)*

Type genus of the Megadermatidae.

- *The article explained what "genus megaderma" means with a simple example.*
- *In class, the teacher used "genus megaderma" to mean type genus of the megadermatidae.*

genus megalobatrachus *(noun)*

Giant salamanders; in some classifications included in the genus Cryptobranchus.

- *He looked up "genus megalobatrachus" because he had never seen it before.*
- *Understanding "genus megalobatrachus" helps you talk about this topic clearly.*

genus melanerpes *(noun)*

A genus of Picidae.

- *Understanding "genus melanerpes" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus melanerpes."*

genus melanotis *(noun)*

A genus of Mimidae.

- *Understanding "genus melanotis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus melanotis" to mean a genus of mimidae.*

genus melogale *(noun)*

A genus of Mustelidae.

- *In class, the teacher used "genus melogale" to mean a genus of mustelidae.*
- *The article explained what "genus melogale" means with a simple example.*

genus melolontha *(noun)*

A genus of Melolonthidae.

- *The article explained what "genus melolontha" means with a simple example.*
- *Understanding "genus melolontha" helps you talk about this topic clearly.*

genus melophagus *(noun)*

An arthropod genus of wingless flies including the sheep ked.

- *They discussed "genus melophagus" during the group presentation.*
- *The article explained what "genus melophagus" means with a simple example.*

genus melopsittacus *(noun)*

A genus of Psittacidae.

- *She wrote a short paragraph that included "genus melopsittacus."*
- *They discussed "genus melopsittacus" during the group presentation.*

genus melospiza *(noun)*

American song sparrow and swamp sparrow.

- *He looked up "genus melospiza" because he had never seen it before.*
- *She wrote a short paragraph that included "genus melospiza."*

genus melursus *(noun)*

Sloth bears; in some classifications not a separate genus from Ursus.

- *He looked up "genus melursus" because he had never seen it before.*
- *Understanding "genus melursus" helps you talk about this topic clearly.*

genus menippe *(noun)*

Stone crabs.

- *Understanding "genus menippe" helps you talk about this topic clearly.*
- *The article explained what "genus menippe" means with a simple example.*

genus menopon *(noun)*

Chicken lice.

- *He looked up "genus menopon" because he had never seen it before.*
- *In class, the teacher used "genus menopon" to mean chicken lice.*

---

genus menticirrhus *(noun)*

Kingfishes; whiting.

- *The article explained what "genus menticirrhus" means with a simple example.*
- *She wrote a short paragraph that included "genus menticirrhus."*

---

genus menura *(noun)*

Type and sole genus of the family Menuridae.

- *Understanding "genus menura" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus menura."*

---

genus mesocricetus *(noun)*

Golden hamsters.

- *Understanding "genus mesocricetus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus mesocricetus" to mean golden hamsters.*

---

genus mesohippus *(noun)*

A genus of Equidae.

- *They discussed "genus mesohippus" during the group presentation.*
- *She wrote a short paragraph that included "genus mesohippus."*

---

genus microdipodops *(noun)*

Kangaroo mice.

- *Understanding "genus microdipodops" helps you talk about this topic clearly.*
- *They discussed "genus microdipodops" during the group presentation.*

---

genus micromyx *(noun)*

Old World harvest mice.

- *Understanding "genus micromyx" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus micromyx."*

---

genus microstomus *(noun)*

A genus of Pleuronectidae.

- *They discussed "genus microstomus" during the group presentation.*
- *She wrote a short paragraph that included "genus microstomus."*

---

genus micruroides *(noun)*

Coral snakes.

- *He looked up "genus micruroides" because he had never seen it before.*
- *She wrote a short paragraph that included "genus micruroides."*

---

genus micrurus *(noun)*

Coral snakes.

- *He looked up "genus micrurus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus micrurus."*

---

genus mirounga *(noun)*

Elephant seals.

- *He looked up "genus mirounga" because he had never seen it before.*
- *Understanding "genus mirounga" helps you talk about this topic clearly.*

---

genus momotus *(noun)*

Type genus of the Momotidae.

- *He looked up "genus momotus" because he had never seen it before.*

- *They discussed "genus momotus" during the group presentation.*

---

genus monocanthus *(noun)*

Type genus of the Monocanthidae.

- *She wrote a short paragraph that included "genus monocanthus."*
- *The article explained what "genus monocanthus" means with a simple example.*

---

genus monochamus *(noun)*

Sawyer beetles.

- *He looked up "genus monochamus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus monochamus."*

---

genus monomorium *(noun)*

A genus of Formicidae.

- *He looked up "genus monomorium" because he had never seen it before.*
- *Understanding "genus monomorium" helps you talk about this topic clearly.*

---

genus mononychus *(noun)*

Authorities disagree over whether to classify the genus as bird or dinosaur.

- *They discussed "genus mononychus" during the group presentation.*
- *The article explained what "genus mononychus" means with a simple example.*

---

genus mulloidichthys *(noun)*

A genus of Mullidae.

- *In class, the teacher used "genus mulloidichthys" to mean a genus of mullidae.*
- *Understanding "genus mulloidichthys" helps you talk about this topic clearly.*

---

genus mullus *(noun)*

Type genus of the Mullidae: goatfishes.

- *He looked up "genus mullus" because he had never seen it before.*
- *In class, the teacher used "genus mullus" to mean type genus of the mullidae: goatfishes.*

---

genus muscardinus *(noun)*

A genus of Gliridae.

- *In class, the teacher used "genus muscardinus" to mean a genus of gliridae.*
- *The article explained what "genus muscardinus" means with a simple example.*

---

genus muscivora *(noun)*

A genus of Tyrannidae.

- *The article explained what "genus muscivora" means with a simple example.*
- *Understanding "genus muscivora" helps you talk about this topic clearly.*

---

genus musophaga *(noun)*

Type genus of the Musophagidae.

- *She wrote a short paragraph that included "genus musophaga."*
- *He looked up "genus musophaga" because he had never seen it before.*

---

genus mustelus *(noun)*

Smooth dogfishes.

- *In class, the teacher used "genus mustelus" to mean smooth dogfishes.*
- *The article explained what "genus mustelus" means with a simple example.*

---

genus mycteria *(noun)*

A genus of storks of the family Ciconiidae now including only the American wood ibis.

- *In class, the teacher used "genus mycteria" to mean a genus of storks of the family ciconiidae now....*
- *Understanding "genus mycteria" helps you talk about this topic clearly.*

---

genus mylodon *(noun)*

Type genus of the Mylodontidae; sometimes included in family Megatheriidae.

- *He looked up "genus mylodon" because he had never seen it before.*
- *She wrote a short paragraph that included "genus mylodon."*

---

genus myocastor *(noun)*

A genus of Capromyidae.

- *They discussed "genus myocastor" during the group presentation.*
- *He looked up "genus myocastor" because he had never seen it before.*

---

genus myopus *(noun)*

A genus of Cricetidae.

- *The article explained what "genus myopus" means with a simple example.*
- *Understanding "genus myopus" helps you talk about this topic clearly.*

---

genus myrmecia *(noun)*

Bulldog ants.

- *They discussed "genus myrmecia" during the group presentation.*
- *In class, the teacher used "genus myrmecia" to mean bulldog ants.*

---

genus myrmecobius *(noun)*

Banded anteater.

- *She wrote a short paragraph that included "genus myrmecobius."*
- *The article explained what "genus myrmecobius" means with a simple example.*

---

genus myrmecophaga *(noun)*

Type genus of the Myrmecophagidae; South American ant bear.

- *She wrote a short paragraph that included "genus myrmecophaga."*
- *He looked up "genus myrmecophaga" because he had never seen it before.*

---

genus myrmeleon *(noun)*

Type genus of the Myrmeleontidae: antlions.

- *Understanding "genus myrmeleon" helps you talk about this topic clearly.*
- *They discussed "genus myrmeleon" during the group presentation.*

---

genus myxine *(noun)*

Type genus of the Myxinidae (typical hagfishes).

- *Understanding "genus myxine" helps you talk about this topic clearly.*
- *He looked up "genus myxine" because he had never seen it before.*

---

genus myxinikela *(noun)*

Fossil hagfishes.

- *They discussed "genus myxinikela" during the group presentation.*
- *He looked up "genus myxinikela" because he had never seen it before.*

---

genus nanomia *(noun)*

A genus of Siphonophora.

- *The article explained what "genus nanomia" means with a simple example.*
- *She wrote a short paragraph that included "genus nanomia."*

---

genus naucrates *(noun)*

A genus of Carangidae.

- *Understanding "genus naucrates" helps you talk about this topic clearly.*
- *He looked up "genus naucrates" because he had never seen it before.*

---

genus necturus *(noun)*

A genus of Proteidae.

- *The article explained what “genus necturus” means with a simple example.*
- *She wrote a short paragraph that included “genus necturus.”*

---

genus negaprion *(noun)*

Lemon sharks.

- *They discussed “genus negaprion” during the group presentation.*
- *He looked up “genus negaprion” because he had never seen it before.*

---

genus neoceratodus *(noun)*

Extant Australian lungfishes.

- *He looked up “genus neoceratodus” because he had never seen it before.*
- *She wrote a short paragraph that included “genus neoceratodus.”*

---

genus neofiber *(noun)*

Round-tailed muskrat.

- *He looked up “genus neofiber” because he had never seen it before.*
- *She wrote a short paragraph that included “genus neofiber.”*

---

genus neomys *(noun)*

A genus of Soricidae.

- *The article explained what “genus neomys” means with a simple example.*
- *They discussed “genus neomys” during the group presentation.*

---

genus neophron *(noun)*

A genus of Accipitridae.

- *They discussed “genus neophron” during the group presentation.*
- *He looked up “genus neophron” because he had never seen it before.*

---

genus neritina *(noun)*

A genus of Neritidae.

- *Understanding “genus neritina” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “genus neritina.”*

---

genus nesokia *(noun)*

Bandicoot rats.

- *He looked up “genus nesokia” because he had never seen it before.*
- *Understanding “genus nesokia” helps you talk about this topic clearly.*

---

genus neurotrichus *(noun)*

Shrew moles.

- *They discussed “genus neurotrichus” during the group presentation.*
- *He looked up “genus neurotrichus” because he had never seen it before.*

---

genus nimravus *(noun)*

False sabertoothed tigers.

- *They discussed “genus nimravus” during the group presentation.*
- *In class, the teacher used “genus nimravus” to mean false sabertoothed tigers.*

---

genus nitrobacter *(noun)*

Rod-shaped soil bacteria.

- *She wrote a short paragraph that included “genus nitrobacter.”*
- *They discussed “genus nitrobacter” during the group presentation.*

---

genus notechis *(noun)*

Tiger snakes.

- *They discussed “genus notechis” during the group presentation.*
- *She wrote a short paragraph that included “genus notechis.”*

genus notemigonus *(noun)*

Golden shiners.

- *He looked up "genus notemigonus" because he had never seen it before.*
- *They discussed "genus notemigonus" during the group presentation.*

genus nothosaurus *(noun)*

A genus of Nothosauria.

- *They discussed "genus nothosaurus" during the group presentation.*
- *The article explained what "genus nothosaurus" means with a simple example.*

genus notomys *(noun)*

Jerboa rats.

- *The article explained what "genus notomys" means with a simple example.*
- *In class, the teacher used "genus notomys" to mean jerboa rats.*

genus notonecta *(noun)*

Type genus of the Notonectidae: backswimmers.

- *She wrote a short paragraph that included "genus notonecta."*
- *They discussed "genus notonecta" during the group presentation.*

genus notornis *(noun)*

A genus of Rallidae.

- *In class, the teacher used "genus notornis" to mean a genus of rallidae.*
- *Understanding "genus notornis" helps you talk about this topic clearly.*

genus notoryctus *(noun)*

Type genus of the family Notoryctidae: comprising solely the marsupial mole.

- *He looked up "genus notoryctus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus notoryctus."*

genus nucifraga *(noun)*

Nutcrackers.

- *He looked up "genus nucifraga" because he had never seen it before.*
- *In class, the teacher used "genus nucifraga" to mean nutcrackers.*

genus numida *(noun)*

Guinea fowl.

- *He looked up "genus numida" because he had never seen it before.*
- *They discussed "genus numida" during the group presentation.*

genus nyctanassa *(noun)*

American night herons.

- *They discussed "genus nyctanassa" during the group presentation.*
- *The article explained what "genus nyctanassa" means with a simple example.*

genus nyctereutes *(noun)*

Raccoon dogs.

- *She wrote a short paragraph that included "genus nyctereutes."*
- *They discussed "genus nyctereutes" during the group presentation.*

genus nycticebus *(noun)*

A genus of Lorisidae.

- *The article explained what "genus nycticebus" means with a simple example.*
- *In class, the teacher used "genus nycticebus" to mean a genus of lorisidae.*

genus nycticorax *(noun)*

Old World night herons.

- *Understanding "genus nycticorax" helps you talk about this topic clearly.*
- *In class, the teacher used "genus nycticorax" to mean old world night herons.*

---

genus nyctimene *(noun)*

East Indian fruit bats.

- *Understanding "genus nyctimene" helps you talk about this topic clearly.*
- *In class, the teacher used "genus nyctimene" to mean east indian fruit bats.*

---

genus nymphalis *(noun)*

Type genus of the Nymphalidae: mourning cloak butterflies.

- *They discussed "genus nymphalis" during the group presentation.*
- *She wrote a short paragraph that included "genus nymphalis."*

---

genus nymphicus *(noun)*

A genus of Psittacidae.

- *He looked up "genus nymphicus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus nymphicus."*

---

genus oceanites *(noun)*

A genus of Hydrobatidae.

- *The article explained what "genus oceanites" means with a simple example.*
- *Understanding "genus oceanites" helps you talk about this topic clearly.*

---

genus ochotona *(noun)*

Type genus of the Ochotonidae.

- *The article explained what "genus ochotona" means with a simple example.*
- *She wrote a short paragraph that included "genus ochotona."*

---

genus odobenus *(noun)*

Type genus of the Odobenidae: walruses.

- *She wrote a short paragraph that included "genus odobenus."*
- *Understanding "genus odobenus" helps you talk about this topic clearly.*

---

genus odontaspis *(noun)*

Type and sole genus of Carchariidae: sand sharks.

- *Understanding "genus odontaspis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus odontaspis" to mean type and sole genus of carchariidae: sand sharks.*

---

genus odontophorus *(noun)*

Genus of Central and South American crested partridges resembling quails; sometimes placed in a distinct subfamily or isolated in a distinct family.

- *Understanding "genus odontophorus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus odontophorus" to mean genus of central and south american crested....*

---

genus oecanthus *(noun)*

Tree crickets.

- *In class, the teacher used "genus oecanthus" to mean tree crickets.*
- *They discussed "genus oecanthus" during the group presentation.*

---

genus oedogonium *(noun)*

Type genus of Oedogoniaceae; freshwater green algae having long unbranched filaments; usually free-floating when mature.

- *In class, the teacher used "genus oedogonium" to mean type genus of oedogoniaceae; freshwater green algae....*
- *The article explained what "genus oedogonium" means with a simple example.*

---

genus oligoplites *(noun)*

Leatherjackets.

- *The article explained what "genus oligoplites" means with a simple example.*

- *Understanding "genus oligoplites" helps you talk about this topic clearly.*

---

genus ommastrephes *(noun)*

A genus of Decapoda.

- *He looked up "genus ommastrephes" because he had never seen it before.*
- *In class, the teacher used "genus ommastrephes" to mean a genus of decapoda.*

---

genus oniscus *(noun)*

Type genus of the Oniscidae; woodlice that cannot roll into a ball.

- *In class, the teacher used "genus oniscus" to mean type genus of the oniscidae; woodlice that cannot....*
- *Understanding "genus oniscus" helps you talk about this topic clearly.*

---

genus onychogalea *(noun)*

A genus of Macropodidae.

- *In class, the teacher used "genus onychogalea" to mean a genus of macropodidae.*
- *Understanding "genus onychogalea" helps you talk about this topic clearly.*

---

genus onychomys *(noun)*

Grasshopper mice.

- *She wrote a short paragraph that included "genus onychomys."*
- *They discussed "genus onychomys" during the group presentation.*

---

genus opheodrys *(noun)*

North American green snakes.

- *She wrote a short paragraph that included "genus opheodrys."*
- *The article explained what "genus opheodrys" means with a simple example.*

---

genus ophiodon *(noun)*

A genus of Ophiodontidae.

- *Understanding "genus ophiodon" helps you talk about this topic clearly.*
- *They discussed "genus ophiodon" during the group presentation.*

---

genus ophisaurus *(noun)*

Glass lizards.

- *They discussed "genus ophisaurus" during the group presentation.*
- *The article explained what "genus ophisaurus" means with a simple example.*

---

genus opisthocomus *(noun)*

Type genus of the Opisthocomidae: hoatzins.

- *She wrote a short paragraph that included "genus opisthocomus."*
- *He looked up "genus opisthocomus" because he had never seen it before.*

---

genus orchestia *(noun)*

Type genus of the family Orchestiidae.

- *He looked up "genus orchestia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus orchestia."*

---

genus oreamnos *(noun)*

Mountain goats.

- *In class, the teacher used "genus oreamnos" to mean mountain goats.*
- *The article explained what "genus oreamnos" means with a simple example.*

---

genus orectolobus *(noun)*

Carpet sharks.

- *The article explained what "genus orectolobus" means with a simple example.*
- *In class, the teacher used "genus orectolobus" to mean carpet sharks.*

---

genus oreortyx *(noun)*

Mountain quail of western United States.

- *He looked up "genus oreortyx" because he had never seen it before.*
- *They discussed "genus oreortyx" during the group presentation.*

genus oriolus *(noun)*

Type genus of the Oriolidae.

- *The article explained what "genus oriolus" means with a simple example.*
- *In class, the teacher used "genus oriolus" to mean type genus of the oriolidae.*

genus ortalis *(noun)*

Chachalacas.

- *In class, the teacher used "genus ortalis" to mean chachalacas.*
- *The article explained what "genus ortalis" means with a simple example.*

genus orthopristis *(noun)*

A genus of Haemulidae.

- *Understanding "genus orthopristis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus orthopristis."*

genus orthotomus *(noun)*

Tailorbirds.

- *He looked up "genus orthotomus" because he had never seen it before.*
- *In class, the teacher used "genus orthotomus" to mean tailorbirds.*

genus orycteropus *(noun)*

Coextensive with the family Orycteropodidae.

- *The article explained what "genus orycteropus" means with a simple example.*
- *In class, the teacher used "genus orycteropus" to mean coextensive with the family orycteropodidae.*

genus osmerus *(noun)*

Type genus of the Osmeridae.

- *He looked up "genus osmerus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus osmerus."*

genus otaria *(noun)*

Type genus of the Otariidae.

- *In class, the teacher used "genus otaria" to mean type genus of the otariidae.*
- *They discussed "genus otaria" during the group presentation.*

genus ouranopithecus *(noun)*

A genus of Hominidae.

- *She wrote a short paragraph that included "genus ouranopithecus."*
- *The article explained what "genus ouranopithecus" means with a simple example.*

genus ovalipes *(noun)*

A genus of Portunidae.

- *They discussed "genus ovalipes" during the group presentation.*
- *The article explained what "genus ovalipes" means with a simple example.*

genus ovibos *(noun)*

Consisting of the musk-ox.

- *In class, the teacher used "genus ovibos" to mean consisting of the musk-ox.*
- *The article explained what "genus ovibos" means with a simple example.*

genus oxybelis *(noun)*

Vine snakes.

- *They discussed “genus oxybelis” during the group presentation.*
- *Understanding “genus oxybelis” helps you talk about this topic clearly.*

---

genus oxylebius *(noun)*

A genus of Hexagrammidae.

- *Understanding “genus oxylebius” helps you talk about this topic clearly.*
- *He looked up “genus oxylebius” because he had never seen it before.*

---

genus pachycephala *(noun)*

Arboreal insectivorous birds.

- *They discussed “genus pachycephala” during the group presentation.*
- *She wrote a short paragraph that included “genus pachycephala.”*

---

genus padda *(noun)*

A genus of Ploceidae.

- *He looked up “genus padda” because he had never seen it before.*
- *Understanding “genus padda” helps you talk about this topic clearly.*

---

genus pagophila *(noun)*

A genus of Laridae.

- *The article explained what “genus pagophila” means with a simple example.*
- *She wrote a short paragraph that included “genus pagophila.”*

---

genus pagrus *(noun)*

A genus of Sparidae.

- *In class, the teacher used “genus pagrus” to mean a genus of sparidae.*
- *The article explained what “genus pagrus” means with a simple example.*

---

genus paleacrita *(noun)*

Geometrid moths.

- *He looked up “genus paleacrita” because he had never seen it before.*
- *Understanding “genus paleacrita” helps you talk about this topic clearly.*

---

genus palometa *(noun)*

A genus of Stromateidae.

- *She wrote a short paragraph that included “genus palometa.”*
- *They discussed “genus palometa” during the group presentation.*

---

genus panonychus *(noun)*

A genus of Tetranychidae.

- *In class, the teacher used “genus panonychus” to mean a genus of tetranychidae.*
- *The article explained what “genus panonychus” means with a simple example.*

---

genus paprilus *(noun)*

A genus of Stromateidae.

- *In class, the teacher used “genus paprilus” to mean a genus of stromateidae.*
- *They discussed “genus paprilus” during the group presentation.*

---

genus paracheirodon *(noun)*

A genus of Characidae.

- *The article explained what “genus paracheirodon” means with a simple example.*
- *Understanding “genus paracheirodon” helps you talk about this topic clearly.*

---

genus paradoxurus *(noun)*

Palm civets.

- *He looked up “genus paradoxurus” because he had never seen it before.*
- *In class, the teacher used “genus paradoxurus” to mean palm civets.*

genus paralichthys *(noun)*

A genus of Bothidae.

- *He looked up "genus paralichthys" because he had never seen it before.*
- *She wrote a short paragraph that included "genus paralichthys."*

genus paralithodes *(noun)*

A genus of Lithodidae.

- *He looked up "genus paralithodes" because he had never seen it before.*
- *She wrote a short paragraph that included "genus paralithodes."*

genus paranthias *(noun)*

A genus of Serranidae.

- *She wrote a short paragraph that included "genus paranthias."*
- *He looked up "genus paranthias" because he had never seen it before.*

genus parascalops *(noun)*

Brewer's moles.

- *The article explained what "genus parascalops" means with a simple example.*
- *They discussed "genus parascalops" during the group presentation.*

genus parophrys *(noun)*

A genus of Soleidae.

- *In class, the teacher used "genus parophrys" to mean a genus of soleidae.*
- *They discussed "genus parophrys" during the group presentation.*

genus passerina *(noun)*

A genus of small North American finches including the New World buntings.

- *Understanding "genus passerina" helps you talk about this topic clearly.*
- *He looked up "genus passerina" because he had never seen it before.*

genus pecari *(noun)*

Type genus of the Tayassuidae.

- *In class, the teacher used "genus pecari" to mean type genus of the tayassuidae.*
- *The article explained what "genus pecari" means with a simple example.*

genus pedioecetes *(noun)*

Sharp-tailed grouse.

- *In class, the teacher used "genus pedioecetes" to mean sharp-tailed grouse.*
- *Understanding "genus pedioecetes" helps you talk about this topic clearly.*

genus pedionomus *(noun)*

Plain wanderer.

- *She wrote a short paragraph that included "genus pedionomus."*
- *They discussed "genus pedionomus" during the group presentation.*

genus pennatula *(noun)*

Type genus of the family Pennatulidae: sea pens.

- *He looked up "genus pennatula" because he had never seen it before.*
- *They discussed "genus pennatula" during the group presentation.*

genus percina *(noun)*

A genus of Percidae.

- *Understanding "genus percina" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus percina."*

genus periophthalmus *(noun)*

A genus of Gobiidae.

- *The article explained what "genus periophthalmus" means with a simple example.*
- *Understanding "genus periophthalmus" helps you talk about this topic clearly.*

---

genus peripatopsis *(noun)*

Type genus of Peripatopsidae; onychophorans of chiefly Asiatic and African tropical regions.

- *The article explained what "genus peripatopsis" means with a simple example.*
- *Understanding "genus peripatopsis" helps you talk about this topic clearly.*

---

genus peripatus *(noun)*

Type genus of Peripatidae; onychophorans of chiefly New World tropical regions.

- *She wrote a short paragraph that included "genus peripatus."*
- *The article explained what "genus peripatus" means with a simple example.*

---

genus perisoreus *(noun)*

Canada jays.

- *The article explained what "genus perisoreus" means with a simple example.*
- *Understanding "genus perisoreus" helps you talk about this topic clearly.*

---

genus peristedion *(noun)*

In some classifications the type genus of the subfamily Peristediinae: armored sea robins.

- *He looked up "genus peristedion" because he had never seen it before.*
- *She wrote a short paragraph that included "genus peristedion."*

---

genus pernis *(noun)*

A common European bird of prey; dull brown with white-streaked underparts.

- *They discussed "genus pernis" during the group presentation.*
- *The article explained what "genus pernis" means with a simple example.*

---

genus perodicticus *(noun)*

A genus of Lorisidae.

- *In class, the teacher used "genus perodicticus" to mean a genus of lorisidae.*
- *He looked up "genus perodicticus" because he had never seen it before.*

---

genus petaurista *(noun)*

Very large Asiatic flying squirrels.

- *In class, the teacher used "genus petaurista" to mean very large asiatic flying squirrels.*
- *They discussed "genus petaurista" during the group presentation.*

---

genus petaurus *(noun)*

A genus of Phalangeridae.

- *The article explained what "genus petaurus" means with a simple example.*
- *She wrote a short paragraph that included "genus petaurus."*

---

genus petrogale *(noun)*

Rock wallabies.

- *They discussed "genus petrogale" during the group presentation.*
- *He looked up "genus petrogale" because he had never seen it before.*

---

genus petromyzon *(noun)*

Typical lampreys.

- *She wrote a short paragraph that included "genus petromyzon."*
- *He looked up "genus petromyzon" because he had never seen it before.*

---

genus pezophaps *(noun)*

Constituted by the extinct solitaire.

- *He looked up "genus pezophaps" because he had never seen it before.*

- *Understanding "genus pezophaps" helps you talk about this topic clearly.*

genus phalaenoptilus *(noun)*

A genus of Caprimulgidae.

- *The article explained what "genus phalaenoptilus" means with a simple example.*
- *In class, the teacher used "genus phalaenoptilus" to mean a genus of caprimulgidae.*

genus phalanger *(noun)*

Type genus of the family Phalangeridae: cuscuses.

- *In class, the teacher used "genus phalanger" to mean type genus of the family phalangeridae: cuscuses.*
- *The article explained what "genus phalanger" means with a simple example.*

genus phalangium *(noun)*

Type genus of the family Phalangiidae.

- *Understanding "genus phalangium" helps you talk about this topic clearly.*
- *In class, the teacher used "genus phalangium" to mean type genus of the family phalangiidae.*

genus phalaropus *(noun)*

Type genus of the Phalaropidae: phalaropes.

- *The article explained what "genus phalaropus" means with a simple example.*
- *They discussed "genus phalaropus" during the group presentation.*

genus pharomacrus *(noun)*

A genus of Trogonidae.

- *The article explained what "genus pharomacrus" means with a simple example.*
- *She wrote a short paragraph that included "genus pharomacrus."*

genus phascogale *(noun)*

Pouched mice.

- *They discussed "genus phascogale" during the group presentation.*
- *The article explained what "genus phascogale" means with a simple example.*

genus phasianus *(noun)*

Type genus of the Phasianidae: the typical pheasants.

- *Understanding "genus phasianus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus phasianus" to mean type genus of the phasianidae: the typical pheasants.*

genus phenacomys *(noun)*

North American voles.

- *She wrote a short paragraph that included "genus phenacomys."*
- *The article explained what "genus phenacomys" means with a simple example.*

genus philaenus *(noun)*

A genus of Cercopidae.

- *They discussed "genus philaenus" during the group presentation.*
- *Understanding "genus philaenus" helps you talk about this topic clearly.*

genus philohela *(noun)*

American woodcocks.

- *He looked up "genus philohela" because he had never seen it before.*
- *She wrote a short paragraph that included "genus philohela."*

genus philophylla *(noun)*

Leaf miners.

- *He looked up "genus philophylla" because he had never seen it before.*
- *She wrote a short paragraph that included "genus philophylla."*

genus phlebotomus *(noun)*

Small bloodsucking sand flies that resemble moths.

- *He looked up "genus phlebotomus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus phlebotomus."*

genus phoeniculus *(noun)*

Type and only genus of the family Phoeniculidae.

- *She wrote a short paragraph that included "genus phoeniculus."*
- *The article explained what "genus phoeniculus" means with a simple example.*

genus phoenicurus *(noun)*

Old World thrushes.

- *She wrote a short paragraph that included "genus phoenicurus."*
- *He looked up "genus phoenicurus" because he had never seen it before.*

genus pholas *(noun)*

Type genus of the family Pholadidae: piddocks.

- *She wrote a short paragraph that included "genus pholas."*
- *He looked up "genus pholas" because he had never seen it before.*

genus pholis *(noun)*

Type genus of the Pholidae: gunnels.

- *The article explained what "genus pholis" means with a simple example.*
- *Understanding "genus pholis" helps you talk about this topic clearly.*

genus photoblepharon *(noun)*

A genus of fish in the family Anomalopidae.

- *They discussed "genus photoblepharon" during the group presentation.*
- *Understanding "genus photoblepharon" helps you talk about this topic clearly.*

genus phrynosoma *(noun)*

Horned lizards.

- *Understanding "genus phrynosoma" helps you talk about this topic clearly.*
- *They discussed "genus phrynosoma" during the group presentation.*

genus phthirius *(noun)*

True lice: crab lice.

- *He looked up "genus phthirius" because he had never seen it before.*
- *She wrote a short paragraph that included "genus phthirius."*

genus phthirus *(noun)*

True lice: crab lice.

- *She wrote a short paragraph that included "genus phthirus."*
- *He looked up "genus phthirus" because he had never seen it before.*

genus phthorimaea *(noun)*

Potato moths.

- *Understanding "genus phthorimaea" helps you talk about this topic clearly.*
- *The article explained what "genus phthorimaea" means with a simple example.*

genus phyllium *(noun)*

Type genus of the Phyllidae.

- *He looked up "genus phyllium" because he had never seen it before.*
- *In class, the teacher used "genus phyllium" to mean type genus of the phyllidae.*

genus phyllorhynchus *(noun)*

Leaf-nosed snakes.

- *Understanding "genus phyllorhynchus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus phyllorhynchus."*

---

genus phyllostomus *(noun)*

Type genus of the family Phyllostomatidae.

- *They discussed "genus phyllostomus" during the group presentation.*
- *The article explained what "genus phyllostomus" means with a simple example.*

---

genus physalia *(noun)*

Portuguese man-of-war.

- *The article explained what "genus physalia" means with a simple example.*
- *She wrote a short paragraph that included "genus physalia."*

---

genus picoides *(noun)*

A genus of Picidae.

- *He looked up "genus picoides" because he had never seen it before.*
- *They discussed "genus picoides" during the group presentation.*

---

genus picumnus *(noun)*

A genus of Picidae.

- *He looked up "genus picumnus" because he had never seen it before.*
- *In class, the teacher used "genus picumnus" to mean a genus of picidae.*

---

genus pineus *(noun)*

A genus of Adelgidae.

- *Understanding "genus pineus" helps you talk about this topic clearly.*
- *The article explained what "genus pineus" means with a simple example.*

---

genus pinicola *(noun)*

A genus of Fringillidae.

- *The article explained what "genus pinicola" means with a simple example.*
- *They discussed "genus pinicola" during the group presentation.*

---

genus pinnotheres *(noun)*

Type genus of the family Pinnotheridae: pea crabs.

- *She wrote a short paragraph that included "genus pinnotheres."*
- *The article explained what "genus pinnotheres" means with a simple example.*

---

genus pipile *(noun)*

Genus of large crested guans (the piping guans).

- *The article explained what "genus pipile" means with a simple example.*
- *In class, the teacher used "genus pipile" to mean genus of large crested guans (the piping guans).*

---

genus pipra *(noun)*

Type genus of the Pipridae containing the typical manakins.

- *Understanding "genus pipra" helps you talk about this topic clearly.*
- *The article explained what "genus pipra" means with a simple example.*

---

genus piranga *(noun)*

A genus of Thraupidae.

- *Understanding "genus piranga" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus piranga."*

---

genus piroplasma *(noun)*

Type genus of the family Babesiidae.

- *Understanding "genus piroplasma" helps you talk about this topic clearly.*
- *The article explained what "genus piroplasma" means with a simple example.*

genus pisanosaurus *(noun)*

Primitive ornithischian dinosaur found in Argentina; early Triassic.

- *She wrote a short paragraph that included "genus pisanosaurus."*
- *He looked up "genus pisanosaurus" because he had never seen it before.*

genus pituophis *(noun)*

Bull snakes.

- *The article explained what "genus pituophis" means with a simple example.*
- *They discussed "genus pituophis" during the group presentation.*

genus placuna *(noun)*

Windowpane oysters.

- *He looked up "genus placuna" because he had never seen it before.*
- *She wrote a short paragraph that included "genus placuna."*

genus planococcus *(noun)*

A genus of Pseudococcidae.

- *He looked up "genus planococcus" because he had never seen it before.*
- *They discussed "genus planococcus" during the group presentation.*

genus platalea *(noun)*

Type genus of the Plataleidae.

- *He looked up "genus platalea" because he had never seen it before.*
- *Understanding "genus platalea" helps you talk about this topic clearly.*

genus platichthys *(noun)*

A genus of Pleuronectidae.

- *They discussed "genus platichthys" during the group presentation.*
- *The article explained what "genus platichthys" means with a simple example.*

genus plecotus *(noun)*

A genus of Vespertilionidae.

- *They discussed "genus plecotus" during the group presentation.*
- *Understanding "genus plecotus" helps you talk about this topic clearly.*

genus plectrophenax *(noun)*

Snow bunting.

- *The article explained what "genus plectrophenax" means with a simple example.*
- *Understanding "genus plectrophenax" helps you talk about this topic clearly.*

genus plesianthropus *(noun)*

Former name for the genus Australopithecus.

- *The article explained what "genus plesianthropus" means with a simple example.*
- *They discussed "genus plesianthropus" during the group presentation.*

genus pleurobrachia *(noun)*

Sea gooseberries.

- *They discussed "genus pleurobrachia" during the group presentation.*
- *The article explained what "genus pleurobrachia" means with a simple example.*

genus pleuronectes *(noun)*

Type genus of the Pleuronectidae.

- *They discussed "genus pleuronectes" during the group presentation.*
- *In class, the teacher used "genus pleuronectes" to mean type genus of the pleuronectidae.*

genus plicatoperipatus *(noun)*

A genus of Peripatidae.

- *They discussed “genus plicatoperipatus” during the group presentation.*
- *The article explained what “genus plicatoperipatus” means with a simple example.*

---

genus ploceus *(noun)*

Type genus of the Ploceidae.

- *The article explained what “genus ploceus” means with a simple example.*
- *In class, the teacher used “genus ploceus” to mean type genus of the ploceidae.*

---

genus podargus *(noun)*

Type genus of the Podargidae.

- *She wrote a short paragraph that included “genus podargus.”*
- *The article explained what “genus podargus” means with a simple example.*

---

genus podilymbus *(noun)*

A genus of Podicipedidae.

- *In class, the teacher used “genus podilymbus” to mean a genus of podicipedidae.*
- *The article explained what “genus podilymbus” means with a simple example.*

---

genus poecilocapsus *(noun)*

A genus of Miridae.

- *In class, the teacher used “genus poecilocapsus” to mean a genus of miridae.*
- *Understanding “genus poecilocapsus” helps you talk about this topic clearly.*

---

genus poephila *(noun)*

Grassfinches.

- *In class, the teacher used “genus poephila” to mean grassfinches.*
- *They discussed “genus poephila” during the group presentation.*

---

genus polioptila *(noun)*

New World gnatcatchers.

- *She wrote a short paragraph that included “genus polioptila.”*
- *He looked up “genus polioptila” because he had never seen it before.*

---

genus polyangium *(noun)*

Type genus of the family Polyangiaceae: myxobacteria with rounded fruiting bodies enclosed in a membrane.

- *The article explained what “genus polyangium” means with a simple example.*
- *In class, the teacher used “genus polyangium” to mean type genus of the family polyangiaceae:....*

---

genus polyborus *(noun)*

A genus of Falconidae.

- *She wrote a short paragraph that included “genus polyborus.”*
- *He looked up “genus polyborus” because he had never seen it before.*

---

genus polycirrus *(noun)*

Genus of soft-bodied polychete marine worms.

- *Understanding “genus polycirrus” helps you talk about this topic clearly.*
- *He looked up “genus polycirrus” because he had never seen it before.*

---

genus polydactylus *(noun)*

A genus of Polynemidae.

- *She wrote a short paragraph that included “genus polydactylus.”*
- *He looked up “genus polydactylus” because he had never seen it before.*

---

genus polyergus *(noun)*

Amazon ants.

- *Understanding “genus polyergus” helps you talk about this topic clearly.*

- *In class, the teacher used "genus polyergus" to mean amazon ants.*

---

genus polygonia *(noun)*

Comma butterflies.

- *Understanding "genus polygonia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus polygonia."*

---

genus polyodon *(noun)*

Type genus of the Polyodontidae.

- *He looked up "genus polyodon" because he had never seen it before.*
- *In class, the teacher used "genus polyodon" to mean type genus of the polyodontidae.*

---

genus polypedates *(noun)*

Type genus of the Polypedatidae.

- *Understanding "genus polypedates" helps you talk about this topic clearly.*
- *They discussed "genus polypedates" during the group presentation.*

---

genus pomacanthus *(noun)*

Angelfishes.

- *She wrote a short paragraph that included "genus pomacanthus."*
- *He looked up "genus pomacanthus" because he had never seen it before.*

---

genus pomacentrus *(noun)*

Type genus of the Pomacentridae: damselfishes.

- *The article explained what "genus pomacentrus" means with a simple example.*
- *In class, the teacher used "genus pomacentrus" to mean type genus of the pomacentridae: damselfishes.*

---

genus pomatomus *(noun)*

Type genus of the Pomatomidae.

- *The article explained what "genus pomatomus" means with a simple example.*
- *They discussed "genus pomatomus" during the group presentation.*

---

genus pomolobus *(noun)*

Genus to which the alewife is sometimes assigned.

- *He looked up "genus pomolobus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pomolobus."*

---

genus pooecetes *(noun)*

A genus of Fringillidae.

- *The article explained what "genus pooecetes" means with a simple example.*
- *They discussed "genus pooecetes" during the group presentation.*

---

genus popillia *(noun)*

A genus of Scarabaeidae.

- *Understanding "genus popillia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus popillia."*

---

genus porcellio *(noun)*

Old World genus of isopod crustaceans.

- *They discussed "genus porcellio" during the group presentation.*
- *Understanding "genus porcellio" helps you talk about this topic clearly.*

---

genus poronotus *(noun)*

A genus of Stromateidae.

- *They discussed "genus poronotus" during the group presentation.*
- *The article explained what "genus poronotus" means with a simple example.*

---

genus porphyrio *(noun)*

Old World purple gallinules.

- *He looked up "genus porphyrio" because he had never seen it before.*
- *In class, the teacher used "genus porphyrio" to mean old world purple gallinules.*

---

genus porphyrula *(noun)*

American purple gallinules.

- *Understanding "genus porphyrula" helps you talk about this topic clearly.*
- *The article explained what "genus porphyrula" means with a simple example.*

---

genus portunus *(noun)*

Type genus of the family Portunidae.

- *Understanding "genus portunus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus portunus" to mean type genus of the family portunidae.*

---

genus porzana *(noun)*

Spotted crakes.

- *The article explained what "genus porzana" means with a simple example.*
- *In class, the teacher used "genus porzana" to mean spotted crakes.*

---

genus potamogale *(noun)*

Type genus of the family Potamogalidae: otter shrews.

- *They discussed "genus potamogale" during the group presentation.*
- *In class, the teacher used "genus potamogale" to mean type genus of the family potamogalidae: otter shrews.*

---

genus potamophis *(noun)*

Ground snakes.

- *Understanding "genus potamophis" helps you talk about this topic clearly.*
- *In class, the teacher used "genus potamophis" to mean ground snakes.*

---

genus praunus *(noun)*

A genus of Mysidae.

- *He looked up "genus praunus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus praunus."*

---

genus priacanthus *(noun)*

Type genus of the Priacanthidae.

- *In class, the teacher used "genus priacanthus" to mean type genus of the priacanthidae.*
- *The article explained what "genus priacanthus" means with a simple example.*

---

genus prinia *(noun)*

A genus of Sylviidae.

- *The article explained what "genus prinia" means with a simple example.*
- *In class, the teacher used "genus prinia" to mean a genus of sylviidae.*

---

genus priodontes *(noun)*

Solely the giant armadillo.

- *They discussed "genus priodontes" during the group presentation.*
- *In class, the teacher used "genus priodontes" to mean solely the giant armadillo.*

---

genus prionace *(noun)*

Blue sharks.

- *They discussed "genus prionace" during the group presentation.*
- *Understanding "genus prionace" helps you talk about this topic clearly.*

---

genus prionotus *(noun)*

A genus of Triglidae.

- *They discussed "genus prionotus" during the group presentation.*
- *She wrote a short paragraph that included "genus prionotus."*

---

genus pristis *(noun)*

Type genus of the Pristidae.

- *He looked up "genus pristis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus pristis."*

---

genus procavia *(noun)*

Type genus of the Procaviidae.

- *The article explained what "genus procavia" means with a simple example.*
- *In class, the teacher used "genus procavia" to mean type genus of the procaviidae.*

---

genus procellaria *(noun)*

Type genus of the Procellariidae.

- *He looked up "genus procellaria" because he had never seen it before.*
- *Understanding "genus procellaria" helps you talk about this topic clearly.*

---

genus prociphilus *(noun)*

A genus of Aphididae.

- *He looked up "genus prociphilus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus prociphilus."*

---

genus progne *(noun)*

A genus of Hirundinidae.

- *They discussed "genus progne" during the group presentation.*
- *She wrote a short paragraph that included "genus progne."*

---

genus prosopium *(noun)*

Whitefishes.

- *In class, the teacher used "genus prosopium" to mean whitefishes.*
- *The article explained what "genus prosopium" means with a simple example.*

---

genus proterochampsa *(noun)*

Early archosaurian carnivore.

- *Understanding "genus proterochampsa" helps you talk about this topic clearly.*
- *In class, the teacher used "genus proterochampsa" to mean early archosaurian carnivore.*

---

genus protoavis *(noun)*

Extinct primitive birds of the Triassic period; 70 million years before archaeopteryx.

- *They discussed "genus protoavis" during the group presentation.*
- *Understanding "genus protoavis" helps you talk about this topic clearly.*

---

genus protohippus *(noun)*

A genus of Equidae.

- *She wrote a short paragraph that included "genus protohippus."*
- *The article explained what "genus protohippus" means with a simple example.*

---

genus psaltriparus *(noun)*

A genus of Paridae.

- *He looked up "genus psaltriparus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus psaltriparus."*

---

genus psenes *(noun)*

A genus of Stromateidae.

- *Understanding "genus psenes" helps you talk about this topic clearly.*
- *They discussed "genus psenes" during the group presentation.*

genus psephurus *(noun)*

A genus of Polyodontidae.

- *She wrote a short paragraph that included "genus psephurus."*
- *He looked up "genus psephurus" because he had never seen it before.*

genus psetta *(noun)*

A genus of Bothidae.

- *They discussed "genus psetta" during the group presentation.*
- *The article explained what "genus psetta" means with a simple example.*

genus psettichthys *(noun)*

A genus of Soleidae.

- *In class, the teacher used "genus psettichthys" to mean a genus of soleidae.*
- *He looked up "genus psettichthys" because he had never seen it before.*

genus pseudacris *(noun)*

Chorus frogs.

- *The article explained what "genus pseudacris" means with a simple example.*
- *Understanding "genus pseudacris" helps you talk about this topic clearly.*

genus pseudaletia *(noun)*

Moths whose larvae are armyworms.

- *She wrote a short paragraph that included "genus pseudaletia."*
- *The article explained what "genus pseudaletia" means with a simple example.*

genus pseudechis *(noun)*

Venomous Australian blacksnakes.

- *The article explained what "genus pseudechis" means with a simple example.*
- *She wrote a short paragraph that included "genus pseudechis."*

genus pseudemys *(noun)*

Sliders; red-bellied terrapin.

- *The article explained what "genus pseudemys" means with a simple example.*
- *In class, the teacher used "genus pseudemys" to mean sliders; red-bellied terrapin.*

genus pseudopleuronectes *(noun)*

A genus of Pleuronectidae.

- *She wrote a short paragraph that included "genus pseudopleuronectes."*
- *They discussed "genus pseudopleuronectes" during the group presentation.*

genus pseudoryx *(noun)*

Species of large cow-like mammals of Vietnam discovered by scientists in 1992.

- *They discussed "genus pseudoryx" during the group presentation.*
- *She wrote a short paragraph that included "genus pseudoryx."*

genus psithyrus *(noun)*

A large bee that resembles the bumblebee but lacks pollen-collecting apparatus and a worker caste.

- *She wrote a short paragraph that included "genus psithyrus."*
- *The article explained what "genus psithyrus" means with a simple example.*

genus psittacosaurus *(noun)*

Most primitive genus of horned dinosaurs; early Cretaceous.

- *In class, the teacher used "genus psittacosaurus" to mean most primitive genus of horned dinosaurs; early....*
- *The article explained what "genus psittacosaurus" means with a simple example.*

genus psittacula *(noun)*

A genus of Psittacidae.

- *He looked up "genus psittacula" because he had never seen it before.*
- *She wrote a short paragraph that included "genus psittacula."*

genus psittacus *(noun)*

Type genus of the Psittacidae: usually restricted to the African grey.

- *He looked up "genus psittacus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus psittacus."*

genus psophia *(noun)*

Type genus of the Psophiidae: trumpeters.

- *Understanding "genus psophia" helps you talk about this topic clearly.*
- *He looked up "genus psophia" because he had never seen it before.*

genus pternohyla *(noun)*

Burrowing tree frogs.

- *He looked up "genus pternohyla" because he had never seen it before.*
- *In class, the teacher used "genus pternohyla" to mean burrowing tree frogs.*

genus pterocles *(noun)*

Type genus of the Pteroclididae.

- *She wrote a short paragraph that included "genus pterocles."*
- *He looked up "genus pterocles" because he had never seen it before.*

genus pterocnemia *(noun)*

A genus of birds of the family Rheidae.

- *She wrote a short paragraph that included "genus pterocnemia."*
- *He looked up "genus pterocnemia" because he had never seen it before.*

genus pterodactylus *(noun)*

A reptile genus of Pterodactylidae.

- *She wrote a short paragraph that included "genus pterodactylus."*
- *He looked up "genus pterodactylus" because he had never seen it before.*

genus ptilonorhynchus *(noun)*

Type genus of the Ptilonorhynchidae.

- *The article explained what "genus ptilonorhynchus" means with a simple example.*
- *They discussed "genus ptilonorhynchus" during the group presentation.*

genus ptloris *(noun)*

A genus of Paradisaeidae.

- *The article explained what "genus ptloris" means with a simple example.*
- *In class, the teacher used "genus ptloris" to mean a genus of paradisaeidae.*

genus ptyas *(noun)*

Asian rat snakes.

- *They discussed "genus ptyas" during the group presentation.*
- *She wrote a short paragraph that included "genus ptyas."*

genus ptychozoon *(noun)*

Flying geckos.

- *The article explained what "genus ptychozoon" means with a simple example.*
- *They discussed "genus ptychozoon" during the group presentation.*

genus pygopus *(noun)*

Type genus of the Pygopodidae; snake-shaped pleurodont lizard with no forelimbs and only rudimentary hind limbs.

- *She wrote a short paragraph that included "genus pygopus."*

- *They discussed “genus pygopus” during the group presentation.*

genus pygoscelis *(noun)*

A genus of Spheniscidae.

- *In class, the teacher used “genus pygoscelis” to mean a genus of spheniscidae.*
- *They discussed “genus pygoscelis” during the group presentation.*

genus pylodictus *(noun)*

Flathead catfishes.

- *Understanding “genus pylodictus” helps you talk about this topic clearly.*
- *They discussed “genus pylodictus” during the group presentation.*

genus pyralis *(noun)*

Type genus of the Pyralidae.

- *In class, the teacher used “genus pyralis” to mean type genus of the pyralidae.*
- *Understanding “genus pyralis” helps you talk about this topic clearly.*

genus pyrausta *(noun)*

Moths whose larvae are corn borers.

- *The article explained what “genus pyrausta” means with a simple example.*
- *She wrote a short paragraph that included “genus pyrausta.”*

genus pyrocephalus *(noun)*

A genus of Tyrannidae.

- *They discussed “genus pyrocephalus” during the group presentation.*
- *She wrote a short paragraph that included “genus pyrocephalus.”*

genus pyrophorus *(noun)*

Tropical click beetles.

- *They discussed “genus pyrophorus” during the group presentation.*
- *She wrote a short paragraph that included “genus pyrophorus.”*

genus pyrrhula *(noun)*

Bullfinches.

- *She wrote a short paragraph that included “genus pyrrhula.”*
- *He looked up “genus pyrrhula” because he had never seen it before.*

genus pyrrhuloxia *(noun)*

Large showy finches related to cardinals.

- *She wrote a short paragraph that included “genus pyrrhuloxia.”*
- *Understanding “genus pyrrhuloxia” helps you talk about this topic clearly.*

genus rachycentron *(noun)*

Genus and family are coextensive and comprise only the cobia.

- *Understanding “genus rachycentron” helps you talk about this topic clearly.*
- *He looked up “genus rachycentron” because he had never seen it before.*

genus ranatra *(noun)*

Elongate very slender water scorpions.

- *The article explained what “genus ranatra” means with a simple example.*
- *Understanding “genus ranatra” helps you talk about this topic clearly.*

genus raphicerus *(noun)*

African antelopes: steenboks.

- *In class, the teacher used “genus raphicerus” to mean african antelopes: steenboks.*
- *The article explained what “genus raphicerus” means with a simple example.*

genus raphus *(noun)*

Type genus of the Raphidae: dodos.

- *She wrote a short paragraph that included "genus raphus."*
- *The article explained what "genus raphus" means with a simple example.*

genus recurvirostra *(noun)*

Type genus of the Recurvirostridae: avocets.

- *The article explained what "genus recurvirostra" means with a simple example.*
- *Understanding "genus recurvirostra" helps you talk about this topic clearly.*

genus regalecus *(noun)*

Type genus of the Regalecidae.

- *The article explained what "genus regalecus" means with a simple example.*
- *Understanding "genus regalecus" helps you talk about this topic clearly.*

genus reithrodontomys *(noun)*

New World harvest mice.

- *He looked up "genus reithrodontomys" because he had never seen it before.*
- *They discussed "genus reithrodontomys" during the group presentation.*

genus remilegia *(noun)*

A genus of Echeneididae.

- *The article explained what "genus remilegia" means with a simple example.*
- *In class, the teacher used "genus remilegia" to mean a genus of echeneididae.*

genus reticulitermes *(noun)*

Includes species highly destructive to structures and living trees.

- *They discussed "genus reticulitermes" during the group presentation.*
- *She wrote a short paragraph that included "genus reticulitermes."*

genus rhincodon *(noun)*

Whale sharks.

- *In class, the teacher used "genus rhincodon" to mean whale sharks.*
- *He looked up "genus rhincodon" because he had never seen it before.*

genus rhinonicteris *(noun)*

Orange horseshoe bats.

- *She wrote a short paragraph that included "genus rhinonicteris."*
- *The article explained what "genus rhinonicteris" means with a simple example.*

genus rhinoptera *(noun)*

A genus of Myliobatidae.

- *In class, the teacher used "genus rhinoptera" to mean a genus of myliobatidae.*
- *He looked up "genus rhinoptera" because he had never seen it before.*

genus rhodymenia *(noun)*

Type genus of the family Rhodymeniaceae.

- *In class, the teacher used "genus rhodymenia" to mean type genus of the family rhodymeniaceae.*
- *Understanding "genus rhodymenia" helps you talk about this topic clearly.*

genus rhyacotriton *(noun)*

Olympic salamanders.

- *In class, the teacher used "genus rhyacotriton" to mean olympic salamanders.*
- *The article explained what "genus rhyacotriton" means with a simple example.*

genus rhynchoelaps *(noun)*

Australian coral snakes.

- *Understanding "genus rhynchoelaps" helps you talk about this topic clearly.*
- *He looked up "genus rhynchoelaps" because he had never seen it before.*

---

genus roccus *(noun)*

A genus of Serranidae.

- *The article explained what "genus roccus" means with a simple example.*
- *Understanding "genus roccus" helps you talk about this topic clearly.*

---

genus rodolia *(noun)*

Genus of Australian ladybugs.

- *He looked up "genus rodolia" because he had never seen it before.*
- *Understanding "genus rodolia" helps you talk about this topic clearly.*

---

genus rupicola *(noun)*

Cock of the rocks.

- *She wrote a short paragraph that included "genus rupicola."*
- *Understanding "genus rupicola" helps you talk about this topic clearly.*

---

genus rynchops *(noun)*

Type genus of the Rynchopidae: skimmers.

- *In class, the teacher used "genus rynchops" to mean type genus of the rynchopidae: skimmers.*
- *The article explained what "genus rynchops" means with a simple example.*

---

genus rypticus *(noun)*

A genus of fish of the family Serranidae, including soapfishes.

- *She wrote a short paragraph that included "genus rypticus."*
- *The article explained what "genus rypticus" means with a simple example.*

---

genus salpinctes *(noun)*

A genus of Troglodytidae.

- *In class, the teacher used "genus salpinctes" to mean a genus of troglodytidae.*
- *The article explained what "genus salpinctes" means with a simple example.*

---

genus sarcophilus *(noun)*

Tasmanian devil.

- *They discussed "genus sarcophilus" during the group presentation.*
- *The article explained what "genus sarcophilus" means with a simple example.*

---

genus sarcorhamphus *(noun)*

Usually containing only the king vulture.

- *In class, the teacher used "genus sarcorhamphus" to mean usually containing only the king vulture.*
- *The article explained what "genus sarcorhamphus" means with a simple example.*

---

genus sauromalus *(noun)*

Chuckwallas.

- *He looked up "genus sauromalus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus sauromalus."*

---

genus saurosuchus *(noun)*

Early archosaurian carnivore.

- *They discussed "genus saurosuchus" during the group presentation.*
- *She wrote a short paragraph that included "genus saurosuchus."*

---

genus saxicola *(noun)*

Old World chats.

- *Understanding "genus saxicola" helps you talk about this topic clearly.*
- *In class, the teacher used "genus saxicola" to mean old world chats.*

genus scaphiopus *(noun)*

New World spadefoot toads.

- *The article explained what "genus scaphiopus" means with a simple example.*
- *They discussed "genus scaphiopus" during the group presentation.*

genus scartella *(noun)*

A genus of Blenniidae.

- *The article explained what "genus scartella" means with a simple example.*
- *Understanding "genus scartella" helps you talk about this topic clearly.*

genus sceliphron *(noun)*

Mud daubers.

- *She wrote a short paragraph that included "genus sceliphron."*
- *The article explained what "genus sceliphron" means with a simple example.*

genus sceloglaux *(noun)*

A genus of Strigidae.

- *She wrote a short paragraph that included "genus sceloglaux."*
- *The article explained what "genus sceloglaux" means with a simple example.*

genus sciaena *(noun)*

Type genus of the Sciaenidae: croakers.

- *In class, the teacher used "genus sciaena" to mean type genus of the sciaenidae: croakers.*
- *He looked up "genus sciaena" because he had never seen it before.*

genus sciaenops *(noun)*

A genus of Sciaenidae.

- *She wrote a short paragraph that included "genus sciaenops."*
- *He looked up "genus sciaenops" because he had never seen it before.*

genus scincella *(noun)*

A reptile genus of Scincidae.

- *Understanding "genus scincella" helps you talk about this topic clearly.*
- *In class, the teacher used "genus scincella" to mean a reptile genus of scincidae.*

genus scincus *(noun)*

Type genus of Scincidae.

- *In class, the teacher used "genus scincus" to mean type genus of scincidae.*
- *They discussed "genus scincus" during the group presentation.*

genus scleropages *(noun)*

A genus of large freshwater fishes of Australia and Borneo.

- *Understanding "genus scleropages" helps you talk about this topic clearly.*
- *He looked up "genus scleropages" because he had never seen it before.*

genus scolopax *(noun)*

Type of the Scolopacidae: Old World woodcocks.

- *They discussed "genus scolopax" during the group presentation.*
- *He looked up "genus scolopax" because he had never seen it before.*

genus scomberesox *(noun)*

A genus of Scomberesocidae.

- *Understanding "genus scomberesox" helps you talk about this topic clearly.*
- *They discussed "genus scomberesox" during the group presentation.*

genus scomberomorus *(noun)*

Spanish mackerels.

- *He looked up "genus scomberomorus" because he had never seen it before.*
- *In class, the teacher used "genus scomberomorus" to mean spanish mackerels.*

---

genus scombresox *(noun)*

A genus of Scomberesocidae.

- *The article explained what "genus scombresox" means with a simple example.*
- *In class, the teacher used "genus scombresox" to mean a genus of scomberesocidae.*

---

genus scophthalmus *(noun)*

A genus of Bothidae.

- *She wrote a short paragraph that included "genus scophthalmus."*
- *He looked up "genus scophthalmus" because he had never seen it before.*

---

genus scorpaena *(noun)*

Type genus of the Scorpaenidae: scorpionfishes.

- *He looked up "genus scorpaena" because he had never seen it before.*
- *Understanding "genus scorpaena" helps you talk about this topic clearly.*

---

genus scutigera *(noun)*

A genus of Scutigeridae.

- *The article explained what "genus scutigera" means with a simple example.*
- *They discussed "genus scutigera" during the group presentation.*

---

genus scutigerella *(noun)*

Garden centipedes.

- *Understanding "genus scutigerella" helps you talk about this topic clearly.*
- *They discussed "genus scutigerella" during the group presentation.*

---

genus seismosaurus *(noun)*

Genus of large herbivorous dinosaurs of Cretaceous found in western North America.

- *She wrote a short paragraph that included "genus seismosaurus."*
- *They discussed "genus seismosaurus" during the group presentation.*

---

genus seiurus *(noun)*

Ovenbirds and water thrushes.

- *In class, the teacher used "genus seiurus" to mean ovenbirds and water thrushes.*
- *He looked up "genus seiurus" because he had never seen it before.*

---

genus selenarctos *(noun)*

Asiatic black bears; in some classifications not a separate genus from Ursus.

- *She wrote a short paragraph that included "genus selenarctos."*
- *He looked up "genus selenarctos" because he had never seen it before.*

---

genus serinus *(noun)*

Old World finches; e.g. canaries and serins.

- *They discussed "genus serinus" during the group presentation.*
- *The article explained what "genus serinus" means with a simple example.*

---

genus seriola *(noun)*

A genus of Carangidae.

- *The article explained what "genus seriola" means with a simple example.*
- *In class, the teacher used "genus seriola" to mean a genus of carangidae.*

---

genus seriphus *(noun)*

A genus of Sciaenidae.

- *The article explained what "genus seriphus" means with a simple example.*

- *In class, the teacher used "genus seriphus" to mean a genus of sciaenidae.*

---

genus sertularia *(noun)*

Sessile hydroid that forms feathery colonies.

- *In class, the teacher used "genus sertularia" to mean sessile hydroid that forms feathery colonies.*
- *He looked up "genus sertularia" because he had never seen it before.*

---

genus setophaga *(noun)*

A genus of Parulidae.

- *He looked up "genus setophaga" because he had never seen it before.*
- *Understanding "genus setophaga" helps you talk about this topic clearly.*

---

genus sialia *(noun)*

North American bluebirds.

- *They discussed "genus sialia" during the group presentation.*
- *The article explained what "genus sialia" means with a simple example.*

---

genus sialis *(noun)*

Type genus of the Sialidae.

- *They discussed "genus sialis" during the group presentation.*
- *In class, the teacher used "genus sialis" to mean type genus of the sialidae.*

---

genus sigmodon *(noun)*

American cotton rats.

- *Understanding "genus sigmodon" helps you talk about this topic clearly.*
- *They discussed "genus sigmodon" during the group presentation.*

---

genus sillago *(noun)*

Type genus of the Sillaginidae.

- *They discussed "genus sillago" during the group presentation.*
- *The article explained what "genus sillago" means with a simple example.*

---

genus silurus *(noun)*

Type genus of the Siluridae: catfishes.

- *She wrote a short paragraph that included "genus silurus."*
- *They discussed "genus silurus" during the group presentation.*

---

genus sinanthropus *(noun)*

Genus to which Peking man was formerly assigned.

- *Understanding "genus sinanthropus" helps you talk about this topic clearly.*
- *He looked up "genus sinanthropus" because he had never seen it before.*

---

genus sinornis *(noun)*

A genus of fossil birds.

- *They discussed "genus sinornis" during the group presentation.*
- *In class, the teacher used "genus sinornis" to mean a genus of fossil birds.*

---

genus sistrurus *(noun)*

Pygmy rattlesnakes.

- *He looked up "genus sistrurus" because he had never seen it before.*
- *They discussed "genus sistrurus" during the group presentation.*

---

genus sitophylus *(noun)*

A genus of Bruchidae.

- *He looked up "genus sitophylus" because he had never seen it before.*
- *In class, the teacher used "genus sitophylus" to mean a genus of bruchidae.*

---

genus sitotroga *(noun)*

Grain moths.

- *In class, the teacher used "genus sitotroga" to mean grain moths.*
- *The article explained what "genus sitotroga" means with a simple example.*

genus sivapithecus *(noun)*

Extinct primates; lower Pliocene.

- *He looked up "genus sivapithecus" because he had never seen it before.*
- *In class, the teacher used "genus sivapithecus" to mean extinct primates; lower pliocene.*

genus smiledon *(noun)*

Saber-toothed tigers.

- *The article explained what "genus smiledon" means with a simple example.*
- *She wrote a short paragraph that included "genus smiledon."*

genus somateria *(noun)*

Eider ducks.

- *She wrote a short paragraph that included "genus somateria."*
- *He looked up "genus somateria" because he had never seen it before.*

genus spadella *(noun)*

Marine worms resembling the sagittas but with a broader body and only one pair of lateral fins.

- *In class, the teacher used "genus spadella" to mean marine worms resembling the sagittas but with a....*
- *The article explained what "genus spadella" means with a simple example.*

genus sphecius *(noun)*

Large solitary wasps: cicada killer.

- *In class, the teacher used "genus sphecius" to mean large solitary wasps: cicada killer.*
- *The article explained what "genus sphecius" means with a simple example.*

genus sphecotheres *(noun)*

A genus of Old World orioles.

- *They discussed "genus sphecotheres" during the group presentation.*
- *He looked up "genus sphecotheres" because he had never seen it before.*

genus spheniscus *(noun)*

Type genus of the Spheniscidae: jackass penguins.

- *The article explained what "genus spheniscus" means with a simple example.*
- *In class, the teacher used "genus spheniscus" to mean type genus of the spheniscidae: jackass penguins.*

genus sphyraena *(noun)*

Type and sole genus of the Sphyraenidae: barracuda.

- *She wrote a short paragraph that included "genus sphyraena."*
- *They discussed "genus sphyraena" during the group presentation.*

genus sphyrapicus *(noun)*

A genus of Picidae.

- *She wrote a short paragraph that included "genus sphyrapicus."*
- *They discussed "genus sphyrapicus" during the group presentation.*

genus sphyrna *(noun)*

Type genus of the Sphyrnidae.

- *She wrote a short paragraph that included "genus sphyrna."*
- *Understanding "genus sphyrna" helps you talk about this topic clearly.*

genus spilogale *(noun)*

A genus of Mustelidae.

- *Understanding "genus spilogale" helps you talk about this topic clearly.*
- *The article explained what "genus spilogale" means with a simple example.*

---

genus spinus *(noun)*

In some classifications considered a subgenus of Carduelis: siskins and New World goldfinches.

- *He looked up "genus spinus" because he had never seen it before.*
- *In class, the teacher used "genus spinus" to mean in some classifications considered a subgenus of....*

---

genus spirochaeta *(noun)*

The type genus of the family Spirochaetaceae; a bacterium that is flexible, undulating, and chiefly aquatic.

- *The article explained what "genus spirochaeta" means with a simple example.*
- *In class, the teacher used "genus spirochaeta" to mean the type genus of the family spirochaetaceae; a....*

---

genus spirula *(noun)*

Genus of small cephalopods with many-chambered spiral shells resembling those of the extinct belemnites.

- *Understanding "genus spirula" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus spirula."*

---

genus spizella *(noun)*

Chipping sparrow; field sparrow; tree sparrow.

- *In class, the teacher used "genus spizella" to mean chipping sparrow; field sparrow; tree sparrow.*
- *The article explained what "genus spizella" means with a simple example.*

---

genus spyeria *(noun)*

Fritillaries.

- *They discussed "genus spyeria" during the group presentation.*
- *In class, the teacher used "genus spyeria" to mean fritillaries.*

---

genus squatina *(noun)*

Type genus of the Squatinidae: angel sharks.

- *Understanding "genus squatina" helps you talk about this topic clearly.*
- *The article explained what "genus squatina" means with a simple example.*

---

genus staurikosaurus *(noun)*

Primitive ornithischian dinosaur found in Brazil.

- *They discussed "genus staurikosaurus" during the group presentation.*
- *The article explained what "genus staurikosaurus" means with a simple example.*

---

genus steatornis *(noun)*

Type and sole genus of the family Steatornithidae.

- *He looked up "genus steatornis" because he had never seen it before.*
- *She wrote a short paragraph that included "genus steatornis."*

---

genus steganopus *(noun)*

A genus of Phalaropidae.

- *She wrote a short paragraph that included "genus steganopus."*
- *He looked up "genus steganopus" because he had never seen it before.*

---

genus stenopelmatus *(noun)*

Sand crickets.

- *Understanding "genus stenopelmatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus stenopelmatus."*

---

genus stenopterygius *(noun)*

A reptile genus of Ichthyosauridae.

- *They discussed "genus stenopterygius" during the group presentation.*
- *The article explained what "genus stenopterygius" means with a simple example.*

genus stercorarius *(noun)*

Type genus of the Stercorariidae: jaegers.

- *In class, the teacher used "genus stercorarius" to mean type genus of the stercorariidae: jaegers.*
- *The article explained what "genus stercorarius" means with a simple example.*

genus sternotherus *(noun)*

Musk turtles.

- *He looked up "genus sternotherus" because he had never seen it before.*
- *In class, the teacher used "genus sternotherus" to mean musk turtles.*

genus stictomys *(noun)*

Mountain pacas.

- *She wrote a short paragraph that included "genus stictomys."*
- *He looked up "genus stictomys" because he had never seen it before.*

genus stictopelia *(noun)*

A genus of Columbidae.

- *They discussed "genus stictopelia" during the group presentation.*
- *In class, the teacher used "genus stictopelia" to mean a genus of columbidae.*

genus stizostedion *(noun)*

Pike-perches.

- *The article explained what "genus stizostedion" means with a simple example.*
- *They discussed "genus stizostedion" during the group presentation.*

genus storeria *(noun)*

A genus of Colubridae.

- *They discussed "genus storeria" during the group presentation.*
- *He looked up "genus storeria" because he had never seen it before.*

genus strepera *(noun)*

Bell magpies.

- *Understanding "genus strepera" helps you talk about this topic clearly.*
- *The article explained what "genus strepera" means with a simple example.*

genus strepsiceros *(noun)*

African antelopes: kudus; bongos; nyalas; bushbucks.

- *In class, the teacher used "genus strepsiceros" to mean african antelopes: kudus; bongos; nyalas; bushbucks.*
- *The article explained what "genus strepsiceros" means with a simple example.*

genus streptopelia *(noun)*

Turtledoves.

- *Understanding "genus streptopelia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus streptopelia."*

genus struthio *(noun)*

Type genus of the Struthionidae: African ostriches.

- *In class, the teacher used "genus struthio" to mean type genus of the struthionidae: african ostriches.*
- *The article explained what "genus struthio" means with a simple example.*

genus struthiomimus *(noun)*

Small toothless saurischian dinosaurs; later Cretaceous period in Canada.

- *The article explained what "genus struthiomimus" means with a simple example.*
- *In class, the teacher used "genus struthiomimus" to mean small toothless saurischian dinosaurs; later....*

genus sturnella *(noun)*

A genus of passerine birds including the meadowlarks.

- *He looked up "genus sturnella" because he had never seen it before.*
- *Understanding "genus sturnella" helps you talk about this topic clearly.*

---

genus styracosaurus *(noun)*

Genus of horned dinosaurs.

- *He looked up "genus styracosaurus" because he had never seen it before.*
- *They discussed "genus styracosaurus" during the group presentation.*

---

genus surnia *(noun)*

A genus of hawk-like owls.

- *In class, the teacher used "genus surnia" to mean a genus of hawk-like owls.*
- *The article explained what "genus surnia" means with a simple example.*

---

genus symphalangus *(noun)*

Used in some classifications for the siamangs.

- *Understanding "genus symphalangus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus symphalangus."*

---

genus synagrops *(noun)*

A genus of Serranidae.

- *He looked up "genus synagrops" because he had never seen it before.*
- *They discussed "genus synagrops" during the group presentation.*

---

genus synanceja *(noun)*

Stonefishes.

- *He looked up "genus synanceja" because he had never seen it before.*
- *Understanding "genus synanceja" helps you talk about this topic clearly.*

---

genus synaptomys *(noun)*

Bog lemmings.

- *She wrote a short paragraph that included "genus synaptomys."*
- *He looked up "genus synaptomys" because he had never seen it before.*

---

genus synercus *(noun)*

Cape buffalo.

- *In class, the teacher used "genus synercus" to mean cape buffalo.*
- *Understanding "genus synercus" helps you talk about this topic clearly.*

---

genus syngnathus *(noun)*

Type genus of the family Syngnathidae.

- *In class, the teacher used "genus syngnathus" to mean type genus of the family syngnathidae.*
- *The article explained what "genus syngnathus" means with a simple example.*

---

genus syrrhaptes *(noun)*

A genus of Pteroclididae.

- *She wrote a short paragraph that included "genus syrrhaptes."*
- *The article explained what "genus syrrhaptes" means with a simple example.*

---

genus tachyglossus *(noun)*

Type genus of the family Tachyglossidae.

- *The article explained what "genus tachyglossus" means with a simple example.*
- *In class, the teacher used "genus tachyglossus" to mean type genus of the family tachyglossidae.*

---

genus tachypleus *(noun)*

A genus of Limulidae.

- *In class, the teacher used "genus tachypleus" to mean a genus of limulidae.*

- *They discussed “genus tachypleus” during the group presentation.*

genus tadarida *(noun)*

Freetail bats.

- *In class, the teacher used “genus tadarida” to mean freetail bats.*
- *The article explained what “genus tadarida” means with a simple example.*

genus tamiasciurus *(noun)*

American red squirrels.

- *In class, the teacher used “genus tamiasciurus” to mean american red squirrels.*
- *The article explained what “genus tamiasciurus” means with a simple example.*

genus tantilla *(noun)*

Black-headed snakes.

- *She wrote a short paragraph that included “genus tantilla.”*
- *He looked up “genus tantilla” because he had never seen it before.*

genus tapirus *(noun)*

Type genus of the Tapiridae.

- *He looked up “genus tapirus” because he had never seen it before.*
- *Understanding “genus tapirus” helps you talk about this topic clearly.*

genus taricha *(noun)*

Pacific newts.

- *Understanding “genus taricha” helps you talk about this topic clearly.*
- *In class, the teacher used “genus taricha” to mean pacific newts.*

genus taurotragus *(noun)*

African antelopes: elands.

- *She wrote a short paragraph that included “genus taurotragus.”*
- *He looked up “genus taurotragus” because he had never seen it before.*

genus tautogolabrus *(noun)*

A genus of Labridae.

- *In class, the teacher used “genus tautogolabrus” to mean a genus of labridae.*
- *They discussed “genus tautogolabrus” during the group presentation.*

genus taxidea *(noun)*

In some classifications considered a genus of subfamily Melinae.

- *In class, the teacher used “genus taxidea” to mean in some classifications considered a genus of....*
- *The article explained what “genus taxidea” means with a simple example.*

genus tayassu *(noun)*

Type genus of the Tayassuidae.

- *In class, the teacher used “genus tayassu” to mean type genus of the tayassuidae.*
- *The article explained what “genus tayassu” means with a simple example.*

genus tenrec *(noun)*

Type genus of the family Tenrecidae: tenrecs.

- *She wrote a short paragraph that included “genus tenrec.”*
- *They discussed “genus tenrec” during the group presentation.*

genus terebella *(noun)*

Type genus of Terebellidae; tube-forming marine polychete worms with many filamentous tentacles.

- *He looked up “genus terebella” because he had never seen it before.*
- *In class, the teacher used “genus terebella” to mean type genus of terebellidae; tube-forming marine....*

genus terrapene *(noun)*

Box turtles.

- *Understanding "genus terrapene" helps you talk about this topic clearly.*
- *He looked up "genus terrapene" because he had never seen it before.*

---

genus tethus *(noun)*

Type genus of the family Aplysiidae.

- *They discussed "genus tethus" during the group presentation.*
- *Understanding "genus tethus" helps you talk about this topic clearly.*

---

genus tetragonurus *(noun)*

A genus of Stromateidae.

- *She wrote a short paragraph that included "genus tetragonurus."*
- *They discussed "genus tetragonurus" during the group presentation.*

---

genus tetrapturus *(noun)*

A genus of Istiophoridae.

- *She wrote a short paragraph that included "genus tetrapturus."*
- *He looked up "genus tetrapturus" because he had never seen it before.*

---

genus thalarctos *(noun)*

Polar bears; in some classifications not a separate genus from Ursus.

- *They discussed "genus thalarctos" during the group presentation.*
- *The article explained what "genus thalarctos" means with a simple example.*

---

genus thalassoma *(noun)*

A genus of Labridae.

- *The article explained what "genus thalassoma" means with a simple example.*
- *She wrote a short paragraph that included "genus thalassoma."*

---

genus thamnophilus *(noun)*

A genus of Formicariidae.

- *Understanding "genus thamnophilus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus thamnophilus."*

---

genus thermobia *(noun)*

A genus of Lepismatidae.

- *The article explained what "genus thermobia" means with a simple example.*
- *Understanding "genus thermobia" helps you talk about this topic clearly.*

---

genus threskiornis *(noun)*

Type genus of the Threskiornithidae.

- *They discussed "genus threskiornis" during the group presentation.*
- *The article explained what "genus threskiornis" means with a simple example.*

---

genus thryothorus *(noun)*

Carolina wrens.

- *The article explained what "genus thryothorus" means with a simple example.*
- *In class, the teacher used "genus thryothorus" to mean carolina wrens.*

---

genus thylacinus *(noun)*

Tasmanian wolf.

- *Understanding "genus thylacinus" helps you talk about this topic clearly.*
- *In class, the teacher used "genus thylacinus" to mean tasmanian wolf.*

---

genus tibicen *(noun)*

Harvest flies.

- *He looked up “genus tibicen” because he had never seen it before.*
- *In class, the teacher used “genus tibicen” to mean harvest flies.*

---

genus tichodroma *(noun)*

Wall creepers; in some classifications placed in family Sittidae.

- *In class, the teacher used “genus tichodroma” to mean wall creepers; in some classifications placed in....*
- *The article explained what “genus tichodroma” means with a simple example.*

---

genus timalia *(noun)*

Type genus of the Timaliidae.

- *She wrote a short paragraph that included “genus timalia.”*
- *He looked up “genus timalia” because he had never seen it before.*

---

genus tineola *(noun)*

Webbing clothes moths.

- *In class, the teacher used “genus tineola” to mean webbing clothes moths.*
- *The article explained what “genus tineola” means with a simple example.*

---

genus titanosaurus *(noun)*

Genus of herbivorous dinosaurs flourishing during the Cretaceous in South America.

- *In class, the teacher used “genus titanosaurus” to mean genus of herbivorous dinosaurs flourishing during....*
- *They discussed “genus titanosaurus” during the group presentation.*

---

genus todus *(noun)*

Type genus of the Todidae.

- *The article explained what “genus todus” means with a simple example.*
- *She wrote a short paragraph that included “genus todus.”*

---

genus tolypeutes *(noun)*

A genus of Dasypodidae.

- *He looked up “genus tolypeutes” because he had never seen it before.*
- *They discussed “genus tolypeutes” during the group presentation.*

---

genus tomistoma *(noun)*

A genus of Malayan crocodiles.

- *She wrote a short paragraph that included “genus tomistoma.”*
- *The article explained what “genus tomistoma” means with a simple example.*

---

genus toxotes *(noun)*

Type genus of the Toxotidae.

- *In class, the teacher used “genus toxotes” to mean type genus of the toxotidae.*
- *They discussed “genus toxotes” during the group presentation.*

---

genus trachinotus *(noun)*

A genus of Carangidae.

- *In class, the teacher used “genus trachinotus” to mean a genus of carangidae.*
- *He looked up “genus trachinotus” because he had never seen it before.*

---

genus trachipterus *(noun)*

Type genus of the Trachipteridae.

- *He looked up “genus trachipterus” because he had never seen it before.*
- *She wrote a short paragraph that included “genus trachipterus.”*

---

genus trachodon *(noun)*

A reptile genus of the suborder Euronithopoda.

- *He looked up “genus trachodon” because he had never seen it before.*
- *She wrote a short paragraph that included “genus trachodon.”*

genus tragelaphus *(noun)*

African antelopes: kudus; bongos; nyalas; bushbucks.

- *He looked up "genus tragelaphus" because he had never seen it before.*
- *In class, the teacher used "genus tragelaphus" to mean african antelopes: kudus; bongos; nyalas; bushbucks.*

genus tragopan *(noun)*

A genus of Phasianidae.

- *He looked up "genus tragopan" because he had never seen it before.*
- *She wrote a short paragraph that included "genus tragopan."*

genus tragulus *(noun)*

Type genus of the Tragulidae.

- *She wrote a short paragraph that included "genus tragulus."*
- *He looked up "genus tragulus" because he had never seen it before.*

genus triaenodon *(noun)*

A genus of Triakidae.

- *The article explained what "genus triaenodon" means with a simple example.*
- *Understanding "genus triaenodon" helps you talk about this topic clearly.*

genus tribonema *(noun)*

Type genus of Tribonemaceae.

- *The article explained what "genus tribonema" means with a simple example.*
- *In class, the teacher used "genus tribonema" to mean type genus of tribonemaceae.*

genus trichecus *(noun)*

Type and sole genus of the Trichechidae.

- *In class, the teacher used "genus trichecus" to mean type and sole genus of the trichechidae.*
- *They discussed "genus trichecus" during the group presentation.*

genus trichodesmium *(noun)*

A genus of blue-green algae.

- *The article explained what "genus trichodesmium" means with a simple example.*
- *Understanding "genus trichodesmium" helps you talk about this topic clearly.*

genus trichoglossus *(noun)*

A genus of Loriinae.

- *She wrote a short paragraph that included "genus trichoglossus."*
- *Understanding "genus trichoglossus" helps you talk about this topic clearly.*

genus trichophaga *(noun)*

Carpet moths.

- *In class, the teacher used "genus trichophaga" to mean carpet moths.*
- *Understanding "genus trichophaga" helps you talk about this topic clearly.*

genus trichosurus *(noun)*

A genus of Phalangeridae.

- *They discussed "genus trichosurus" during the group presentation.*
- *The article explained what "genus trichosurus" means with a simple example.*

genus trichys *(noun)*

A genus of Hystricidae.

- *Understanding "genus trichys" helps you talk about this topic clearly.*
- *They discussed "genus trichys" during the group presentation.*

genus trimorphodon *(noun)*

Lyre snakes.

- *They discussed “genus trimorphodon” during the group presentation.*
- *The article explained what “genus trimorphodon” means with a simple example.*

---

genus trinectes *(noun)*

A genus of Soleidae.

- *She wrote a short paragraph that included “genus trinectes.”*
- *He looked up “genus trinectes” because he had never seen it before.*

---

genus trionyx *(noun)*

Type genus of the Trionychidae.

- *She wrote a short paragraph that included “genus trionyx.”*
- *He looked up “genus trionyx” because he had never seen it before.*

---

genus trogium *(noun)*

A genus of Psocidae.

- *The article explained what “genus trogium” means with a simple example.*
- *Understanding “genus trogium” helps you talk about this topic clearly.*

---

genus trombicula *(noun)*

Type genus of the family Trombiculidae.

- *Understanding “genus trombicula” helps you talk about this topic clearly.*
- *They discussed “genus trombicula” during the group presentation.*

---

genus tropidoclonion *(noun)*

Lined snakes.

- *She wrote a short paragraph that included “genus tropidoclonion.”*
- *Understanding “genus tropidoclonion” helps you talk about this topic clearly.*

---

genus turbatrix *(noun)*

A genus of Cephalobidae.

- *The article explained what “genus turbatrix” means with a simple example.*
- *They discussed “genus turbatrix” during the group presentation.*

---

genus turnix *(noun)*

Type genus of the Turnicidae: button quail.

- *In class, the teacher used “genus turnix” to mean type genus of the turnicidae: button quail.*
- *Understanding “genus turnix” helps you talk about this topic clearly.*

---

genus tylenchus *(noun)*

Type genus of the family Tylenchidae.

- *The article explained what “genus tylenchus” means with a simple example.*
- *In class, the teacher used “genus tylenchus” to mean type genus of the family tylenchidae.*

---

genus tympanuchus *(noun)*

Prairie chickens.

- *She wrote a short paragraph that included “genus tympanuchus.”*
- *He looked up “genus tympanuchus” because he had never seen it before.*

---

genus uintatherium *(noun)*

Type genus of the Uintatheriidae; extinct large herbivorous ungulates somewhat resembling elephants; from the Eocene in Wyoming.

- *They discussed “genus uintatherium” during the group presentation.*
- *She wrote a short paragraph that included “genus uintatherium.”*

---

genus upupa *(noun)*

Type genus of the Upupidae.

- *They discussed “genus upupa” during the group presentation.*

- *In class, the teacher used "genus upupa" to mean type genus of the upupidae.*

---

genus uropsilus *(noun)*

Shrew moles.

- *Understanding "genus uropsilus" helps you talk about this topic clearly.*
- *They discussed "genus uropsilus" during the group presentation.*

---

genus urosaurus *(noun)*

A reptile genus of Iguanidae.

- *They discussed "genus urosaurus" during the group presentation.*
- *The article explained what "genus urosaurus" means with a simple example.*

---

genus vanellus *(noun)*

Eurasian lapwings.

- *In class, the teacher used "genus vanellus" to mean eurasian lapwings.*
- *He looked up "genus vanellus" because he had never seen it before.*

---

genus vedalia *(noun)*

Genus of Australian ladybugs.

- *Understanding "genus vedalia" helps you talk about this topic clearly.*
- *He looked up "genus vedalia" because he had never seen it before.*

---

genus vespertilio *(noun)*

A genus of Vespertilionidae.

- *Understanding "genus vespertilio" helps you talk about this topic clearly.*
- *He looked up "genus vespertilio" because he had never seen it before.*

---

genus vicugna *(noun)*

A genus of Camelidae.

- *She wrote a short paragraph that included "genus vicugna."*
- *The article explained what "genus vicugna" means with a simple example.*

---

genus viverricula *(noun)*

A genus of Viverridae.

- *He looked up "genus viverricula" because he had never seen it before.*
- *Understanding "genus viverricula" helps you talk about this topic clearly.*

---

genus vorticella *(noun)*

Ciliated protozoans that have a goblet-shaped body with a retractile stalk.

- *They discussed "genus vorticella" during the group presentation.*
- *The article explained what "genus vorticella" means with a simple example.*

---

genus vultur *(noun)*

A bird that is usually restricted to the Andean condor.

- *Understanding "genus vultur" helps you talk about this topic clearly.*
- *The article explained what "genus vultur" means with a simple example.*

---

genus xenicus *(noun)*

Type genus for the Xenicidae.

- *She wrote a short paragraph that included "genus xenicus."*
- *He looked up "genus xenicus" because he had never seen it before.*

---

genus xenorhyncus *(noun)*

East Indian and Australian storks.

- *In class, the teacher used "genus xenorhyncus" to mean east indian and australian storks.*
- *Understanding "genus xenorhyncus" helps you talk about this topic clearly.*

---

genus xenosaurus *(noun)*

Type and sole genus of Xenosauridae: slender-bodied Mexican lizards having the upper surface covered with tiny granules and tubercles.

- *The article explained what "genus xenosaurus" means with a simple example.*
- *They discussed "genus xenosaurus" during the group presentation.*

---

genus xylocopa *(noun)*

Carpenter bees.

- *They discussed "genus xylocopa" during the group presentation.*
- *Understanding "genus xylocopa" helps you talk about this topic clearly.*

---

genus zaglossus *(noun)*

A genus of Tachyglossidae.

- *The article explained what "genus zaglossus" means with a simple example.*
- *In class, the teacher used "genus zaglossus" to mean a genus of tachyglossidae.*

---

genus zapus *(noun)*

Type genus of the Zapodidae.

- *She wrote a short paragraph that included "genus zapus."*
- *Understanding "genus zapus" helps you talk about this topic clearly.*

---

genus zenaidura *(noun)*

Mourning doves.

- *They discussed "genus zenaidura" during the group presentation.*
- *He looked up "genus zenaidura" because he had never seen it before.*

---

genus zinjanthropus *(noun)*

Genus to which Australopithecus boisei was formerly assigned.

- *She wrote a short paragraph that included "genus zinjanthropus."*
- *The article explained what "genus zinjanthropus" means with a simple example.*

---

genus zoarces *(noun)*

Type genus of the Zoarcidae.

- *They discussed "genus zoarces" during the group presentation.*
- *Understanding "genus zoarces" helps you talk about this topic clearly.*

---

genus zygnema *(noun)*

Type genus of the family Zygnemataceae.

- *The article explained what "genus zygnema" means with a simple example.*
- *In class, the teacher used "genus zygnema" to mean type genus of the family zygnemataceae.*

---

genus-fenusa *(noun)*

Birch leaf miner.

- *The article explained what "genus-fenusa" means with a simple example.*
- *Understanding "genus-fenusa" helps you talk about this topic clearly.*

---

genus-megapodius *(noun)*

Type genus of the Megapodiidae.

- *They discussed "genus-megapodius" during the group presentation.*
- *He looked up "genus-megapodius" because he had never seen it before.*

---

genyonemus *(noun)*

A genus of Sciaenidae.

- *In class, the teacher used "genyonemus" to mean a genus of sciaenidae.*
- *They discussed "genyonemus" during the group presentation.*

---

genyonemus lineatus *(noun)*

Small silvery marine food fish found off California.

- *She wrote a short paragraph that included "genyonemus lineatus."*

- *They discussed "genyonemus lineatus" during the group presentation.*

---

geochelone *(noun)*

Giant tortoises.

- *They discussed "geochelone" during the group presentation.*
- *She wrote a short paragraph that included "geochelone."*

---

geococcyx *(noun)*

Roadrunners.

- *He looked up "geococcyx" because he had never seen it before.*
- *Understanding "geococcyx" helps you talk about this topic clearly.*

---

geomyidae *(noun)*

North American pocket gophers.

- *In class, the teacher used "geomyidae" to mean north american pocket gophers.*
- *They discussed "geomyidae" during the group presentation.*

---

geomys *(noun)*

Type genus of the Geomyidae.

- *In class, the teacher used "geomys" to mean type genus of the geomyidae.*
- *Understanding "geomys" helps you talk about this topic clearly.*

---

geomys bursarius *(noun)*

Gopher of chiefly grasslands of central North America.

- *He looked up "geomys bursarius" because he had never seen it before.*
- *Understanding "geomys bursarius" helps you talk about this topic clearly.*

---

geomys pinetis *(noun)*

Gopher of Alabama and Georgia and Florida.

- *He looked up "geomys pinetis" because he had never seen it before.*
- *They discussed "geomys pinetis" during the group presentation.*

---

geophilidae *(noun)*

Small extremely elongate centipedes that live in earth.

- *She wrote a short paragraph that included "geophilidae."*
- *The article explained what "geophilidae" means with a simple example.*

---

geophilomorpha *(noun)*

Small elongate centipedes living in soil and under stones and having more than 30 pairs of legs.

- *Understanding "geophilomorpha" helps you talk about this topic clearly.*
- *They discussed "geophilomorpha" during the group presentation.*

---

geophilus *(noun)*

Type genus of the Geophilidae: a cosmopolitan genus of centipedes sometimes called earwigs.

- *He looked up "geophilus" because he had never seen it before.*
- *They discussed "geophilus" during the group presentation.*

---

geothlypis *(noun)*

Yellowthroats.

- *He looked up "geothlypis" because he had never seen it before.*
- *They discussed "geothlypis" during the group presentation.*

---

geothlypis trichas *(noun)*

An American warbler.

- *In class, the teacher used "geothlypis trichas" to mean an american warbler.*
- *They discussed "geothlypis trichas" during the group presentation.*

---

gerbille *(noun)*

Small Old World burrowing desert rodent with long soft pale fur and hind legs adapted for leaping.

- *He looked up “gerbille” because he had never seen it before.*
- *She wrote a short paragraph that included “gerbille.”*

gerbillus *(noun)*

Type genus of the Gerbillinae: typical gerbils.

- *The article explained what “gerbillus” means with a simple example.*
- *In class, the teacher used “gerbillus” to mean type genus of the gerbillinae: typical gerbils.*

gerfalcon *(noun)*

Large and rare Arctic falcon having white and dark color phases.

- *The article explained what “gerfalcon” means with a simple example.*
- *They discussed “gerfalcon” during the group presentation.*

gerres *(noun)*

Type genus of the Gerreidae.

- *In class, the teacher used “gerres” to mean type genus of the gerreidae.*
- *They discussed “gerres” during the group presentation.*

gerres cinereus *(noun)*

Popular panfish from Bermuda and Gulf of Mexico to Brazil.

- *In class, the teacher used “gerres cinereus” to mean popular panfish from bermuda and gulf of mexico to....*
- *He looked up “gerres cinereus” because he had never seen it before.*

gerrhonotus *(noun)*

Alligator lizards.

- *He looked up “gerrhonotus” because he had never seen it before.*
- *They discussed “gerrhonotus” during the group presentation.*

gerridae *(noun)*

An arthropod family that includes water striders.

- *She wrote a short paragraph that included “gerridae.”*
- *He looked up “gerridae” because he had never seen it before.*

gerrididae *(noun)*

An arthropod family that includes water striders.

- *Understanding “gerrididae” helps you talk about this topic clearly.*
- *In class, the teacher used “gerrididae” to mean an arthropod family that includes water striders.*

ghostfish *(noun)*

Eellike Atlantic bottom fish with large almost vertical mouth.

- *The article explained what “ghostfish” means with a simple example.*
- *They discussed “ghostfish” during the group presentation.*

giant northwest shipworm *(noun)*

Giant shipworm of the Pacific coast of North America.

- *In class, the teacher used “giant northwest shipworm” to mean giant shipworm of the pacific coast of north america.*
- *Understanding “giant northwest shipworm” helps you talk about this topic clearly.*

giant pigfish *(noun)*

Found around the Great Barrier Reef.

- *She wrote a short paragraph that included “giant pigfish.”*
- *They discussed “giant pigfish” during the group presentation.*

giant seaperch *(noun)*

A species of large perch noted for its sporting and eating qualities; lives in marine, estuary, and freshwater habitats.

- *Understanding "giant seaperch" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "giant seaperch."*

---

gigartinaceae *(noun)*

A family of protoctist.

- *He looked up "gigartinaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "gigartinaceae."*

---

gimpiness *(noun)*

Disability of walking due to crippling of the legs or feet.

- *The article explained what "gimpiness" means with a simple example.*
- *They discussed "gimpiness" during the group presentation.*

---

ginglymoid joint *(noun)*

A freely moving joint in which the bones are so articulated as to allow extensive movement in one plane.

- *They discussed "ginglymoid joint" during the group presentation.*
- *The article explained what "ginglymoid joint" means with a simple example.*

---

ginglymostoma *(noun)*

Nurse sharks.

- *Understanding "ginglymostoma" helps you talk about this topic clearly.*
- *The article explained what "ginglymostoma" means with a simple example.*

---

ginglymostoma cirratum *(noun)*

Small bottom-dwelling shark of warm shallow waters on both coasts of North America and South America and from southeast Asia to Australia.

- *They discussed "ginglymostoma cirratum" during the group presentation.*
- *He looked up "ginglymostoma cirratum" because he had never seen it before.*

---

ginglymus *(noun)*

A freely moving joint in which the bones are so articulated as to allow extensive movement in one plane.

- *She wrote a short paragraph that included "ginglymus."*
- *Understanding "ginglymus" helps you talk about this topic clearly.*

---

giraffa *(noun)*

Type genus of the Giraffidae.

- *In class, the teacher used "giraffa" to mean type genus of the giraffidae.*
- *Understanding "giraffa" helps you talk about this topic clearly.*

---

giraffa camelopardalis *(noun)*

Tallest living quadruped; having a spotted coat and small horns and very long neck and legs; of savannahs of tropical Africa.

- *They discussed "giraffa camelopardalis" during the group presentation.*
- *The article explained what "giraffa camelopardalis" means with a simple example.*

---

glandulae cervicales uteri *(noun)*

Mucus-secreting glands in the mucosa of the uterine cervix.

- *They discussed "glandulae cervicales uteri" during the group presentation.*
- *The article explained what "glandulae cervicales uteri" means with a simple example.*

---

glandulae sebaceae *(noun)*

A cutaneous gland that secretes sebum (usually into a hair follicle) for lubricating hair and skin.

- *In class, the teacher used "glandulae sebaceae" to mean a cutaneous gland that secretes sebum (usually into....*
- *He looked up "glandulae sebaceae" because he had never seen it before.*

---

glans clitoridis *(noun)*

Small mass of erectile tissue at the end of the body of the clitoris.

- *They discussed "glans clitoridis" during the group presentation.*
- *In class, the teacher used "glans clitoridis" to mean small mass of erectile tissue at the end of the....*

glareola *(noun)*

Type genus of the Glareolidae: the pratincoles.

- *They discussed "glareola" during the group presentation.*
- *She wrote a short paragraph that included "glareola."*

glareole *(noun)*

Old World shorebird with long pointed wings and short legs; closely related to the coursers.

- *The article explained what "glareole" means with a simple example.*
- *Understanding "glareole" helps you talk about this topic clearly.*

glareolidae *(noun)*

Old World shorebirds: pratincoles and coursers.

- *They discussed "glareolidae" during the group presentation.*
- *The article explained what "glareolidae" means with a simple example.*

glaucomys *(noun)*

New World flying squirrels.

- *Understanding "glaucomys" helps you talk about this topic clearly.*
- *In class, the teacher used "glaucomys" to mean new world flying squirrels.*

glaucomys sabrinus *(noun)*

Large flying squirrel; chiefly of Canada.

- *They discussed "glaucomys sabrinus" during the group presentation.*
- *In class, the teacher used "glaucomys sabrinus" to mean large flying squirrel; chiefly of canada.*

glaucomys volans *(noun)*

Small large-eyed nocturnal flying squirrel of eastern United States.

- *The article explained what "glaucomys volans" means with a simple example.*
- *In class, the teacher used "glaucomys volans" to mean small large-eyed nocturnal flying squirrel of....*

gleet *(noun)*

A thin morbid discharge as from a wound or especially chronic gonorrhea.

- *She wrote a short paragraph that included "gleet."*
- *They discussed "gleet" during the group presentation.*

gliridae *(noun)*

Dormice and other Old World forms.

- *They discussed "gliridae" during the group presentation.*
- *In class, the teacher used "gliridae" to mean dormice and other old world forms.*

globefish *(noun)*

Any of numerous marine fishes whose elongated spiny body can inflate itself with water or air to form a globe; several species contain a potent nerve poison; closely related to spiny puffers.

- *They discussed "globefish" during the group presentation.*
- *Understanding "globefish" helps you talk about this topic clearly.*

globicephala *(noun)*

Pilot whales.

- *She wrote a short paragraph that included "globicephala."*
- *He looked up "globicephala" because he had never seen it before.*

globicephala melaena *(noun)*

Small dark-colored whale of the Atlantic coast of the United States; the largest male acts as pilot or leader for the school.

- *In class, the teacher used "globicephala melaena" to mean small dark-colored whale of the atlantic coast of....*
- *They discussed "globicephala melaena" during the group presentation.*

globigerinidae *(noun)*

A family of protoctists.

- *The article explained what "globigerinidae" means with a simple example.*
- *In class, the teacher used "globigerinidae" to mean a family of protoctists.*

---

glossalgia *(noun)*

Pain in the tongue.

- *In class, the teacher used "glossalgia" to mean pain in the tongue.*
- *He looked up "glossalgia" because he had never seen it before.*

---

glossinidae *(noun)*

Flies closely related to the Muscidae: tsetse flies.

- *In class, the teacher used "glossinidae" to mean flies closely related to the muscidae: tsetse flies.*
- *Understanding "glossinidae" helps you talk about this topic clearly.*

---

glossodynia *(noun)*

Pain in the tongue.

- *Understanding "glossodynia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "glossodynia."*

---

glossodynia exfoliativa *(noun)*

A superficial form of glossitis marked by irregular red patches on the tongue and sensitivity to hot or spicy food.

- *Understanding "glossodynia exfoliativa" helps you talk about this topic clearly.*
- *The article explained what "glossodynia exfoliativa" means with a simple example.*

---

glossopsitta *(noun)*

A genus of Loriinae.

- *He looked up "glossopsitta" because he had never seen it before.*
- *Understanding "glossopsitta" helps you talk about this topic clearly.*

---

glossopsitta versicolor *(noun)*

Lorikeet with a colorful coat.

- *He looked up "glossopsitta versicolor" because he had never seen it before.*
- *In class, the teacher used "glossopsitta versicolor" to mean lorikeet with a colorful coat.*

---

glossoptosis *(noun)*

Abnormal downward or back placement of the tongue.

- *They discussed "glossoptosis" during the group presentation.*
- *Understanding "glossoptosis" helps you talk about this topic clearly.*

---

glottis spuria *(noun)*

The opening between the false vocal folds.

- *Understanding "glottis spuria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "glottis spuria."*

---

glucosuria *(noun)*

The presence of abnormally high levels of glucose in the urine.

- *In class, the teacher used "glucosuria" to mean the presence of abnormally high levels of glucose....*
- *The article explained what "glucosuria" means with a simple example.*

---

glumness *(noun)*

An atmosphere of depression and melancholy.

- *Understanding "glumness" helps you talk about this topic clearly.*
- *The article explained what "glumness" means with a simple example.*

---

glycerolise *(verb)*

Place in glycerol.

- *The coach explained when to use "glycerolise" and when to wait.*

- *He did not know how to use “glycerolise” until he saw an example.*

---

glycerolize *(verb)*

Place in glycerol.

- *He did not know how to use “glycerolize” until he saw an example.*
- *Learners should practice how to use “glycerolize” in real sentences.*

---

gnathion *(noun)*

The most inferior point of the mandible in the midline.

- *He looked up “gnathion” because he had never seen it before.*
- *They discussed “gnathion” during the group presentation.*

---

gnathostomata *(noun)*

Comprising all vertebrates with upper and lower jaws.

- *He looked up “gnathostomata” because he had never seen it before.*
- *In class, the teacher used “gnathostomata” to mean comprising all vertebrates with upper and lower jaws.*

---

gnathostome *(noun)*

A vertebrate animal possessing true jaws.

- *They discussed “gnathostome” during the group presentation.*
- *In class, the teacher used “gnathostome” to mean a vertebrate animal possessing true jaws.*

---

gnawer *(noun)*

Relatively small placental mammals having a single pair of constantly growing incisor teeth specialized for gnawing.

- *Understanding “gnawer” helps you talk about this topic clearly.*
- *He looked up “gnawer” because he had never seen it before.*

---

goatsucker *(noun)*

Mainly crepuscular or nocturnal nonpasserine birds with mottled greyish-brown plumage and large eyes; feed on insects.

- *In class, the teacher used “goatsucker” to mean mainly crepuscular or nocturnal nonpasserine birds....*
- *Understanding “goatsucker” helps you talk about this topic clearly.*

---

gobiesocidae *(noun)*

Clingfishes.

- *He looked up “gobiesocidae” because he had never seen it before.*
- *They discussed “gobiesocidae” during the group presentation.*

---

gobiesox *(noun)*

Type genus of the Gobiesocidae.

- *In class, the teacher used “gobiesox” to mean type genus of the gobiesocidae.*
- *The article explained what “gobiesox” means with a simple example.*

---

gobiesox strumosus *(noun)*

Clingfish with typical skillet shape.

- *They discussed “gobiesox strumosus” during the group presentation.*
- *The article explained what “gobiesox strumosus” means with a simple example.*

---

gobio *(noun)*

True gudgeons.

- *In class, the teacher used “gobio” to mean true gudgeons.*
- *They discussed “gobio” during the group presentation.*

---

gobio gobio *(noun)*

Small slender European freshwater fish often used as bait by anglers.

- *Understanding “gobio gobio” helps you talk about this topic clearly.*
- *The article explained what “gobio gobio” means with a simple example.*

---

golgi's cell *(noun)*

A neuron in the cerebral cortex with short dendrites and with either a long axon or a short axon that ramifies in the grey matter.

- *He looked up "golgi's cell" because he had never seen it before.*
- *In class, the teacher used "golgi's cell" to mean a neuron in the cerebral cortex with short....*

gomphothere *(noun)*

Extinct elephants of Central American and South America; of the Miocene and Pleistocene.

- *He looked up "gomphothere" because he had never seen it before.*
- *They discussed "gomphothere" during the group presentation.*

gomphotheriidae *(noun)*

Elephants extinct since the Pleistocene.

- *The article explained what "gomphotheriidae" means with a simple example.*
- *Understanding "gomphotheriidae" helps you talk about this topic clearly.*

gomphotherium *(noun)*

Type genus of the Gomphotheriidae.

- *In class, the teacher used "gomphotherium" to mean type genus of the gomphotheriidae.*
- *The article explained what "gomphotherium" means with a simple example.*

gonadotrophic hormone *(noun)*

Hormone secreted by the anterior pituitary gland and placenta; stimulates the gonads and controls reproductive activity.

- *She wrote a short paragraph that included "gonadotrophic hormone."*
- *He looked up "gonadotrophic hormone" because he had never seen it before.*

gonion *(noun)*

The craniometric point on either side at the apex of the lower jaw.

- *Understanding "gonion" helps you talk about this topic clearly.*
- *In class, the teacher used "gonion" to mean the craniometric point on either side at the apex....*

gonococcus *(noun)*

The pus-producing bacterium that causes gonorrhea.

- *She wrote a short paragraph that included "gonococcus."*
- *He looked up "gonococcus" because he had never seen it before.*

gonorhynchidae *(noun)*

Coextensive with the genus Gonorhynchus.

- *Understanding "gonorhynchidae" helps you talk about this topic clearly.*
- *In class, the teacher used "gonorhynchidae" to mean coextensive with the genus gonorhynchus.*

gonorhynchus *(noun)*

Slender cylindrical marine fishes lacking air bladders and teeth.

- *They discussed "gonorhynchus" during the group presentation.*
- *She wrote a short paragraph that included "gonorhynchus."*

gonorhynchus gonorhynchus *(noun)*

Fish of sandy areas of western Pacific and Indian oceans having an angular snout for burrowing into sand.

- *In class, the teacher used "gonorhynchus gonorhynchus" to mean fish of sandy areas of western pacific and indian....*
- *Understanding "gonorhynchus gonorhynchus" helps you talk about this topic clearly.*

goosefish *(noun)*

Fishes having large mouths with a wormlike filament attached for luring prey.

- *She wrote a short paragraph that included "goosefish."*
- *The article explained what "goosefish" means with a simple example.*

gopherus *(noun)*

Gopher tortoises.

- *She wrote a short paragraph that included "gopherus."*
- *The article explained what "gopherus" means with a simple example.*

---

gopherus agassizii *(noun)*

Burrowing tortoise of the arid western United States and northern Mexico; may be reclassified as a member of genus Xerobates.

- *She wrote a short paragraph that included "gopherus agassizii."*
- *He looked up "gopherus agassizii" because he had never seen it before.*

---

gopherus polypemus *(noun)*

Burrowing edible land tortoise of southeastern North America.

- *She wrote a short paragraph that included "gopherus polypemus."*
- *He looked up "gopherus polypemus" because he had never seen it before.*

---

gorgonacea *(noun)*

Red corals and sea fans.

- *Understanding "gorgonacea" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gorgonacea."*

---

gorgoniacea *(noun)*

Red corals and sea fans.

- *They discussed "gorgoniacea" during the group presentation.*
- *He looked up "gorgoniacea" because he had never seen it before.*

---

gorgonocephalus *(noun)*

Basket stars.

- *Understanding "gorgonocephalus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gorgonocephalus."*

---

gorilla gorilla beringei *(noun)*

Gorilla of Kivu highlands.

- *They discussed "gorilla gorilla beringei" during the group presentation.*
- *In class, the teacher used "gorilla gorilla beringei" to mean gorilla of kivu highlands.*

---

gorilla gorilla grauri *(noun)*

A kind of gorilla.

- *He looked up "gorilla gorilla grauri" because he had never seen it before.*
- *They discussed "gorilla gorilla grauri" during the group presentation.*

---

graafian follicle *(noun)*

A vascular body in a mammalian ovary enclosing a developing egg.

- *She wrote a short paragraph that included "graafian follicle."*
- *They discussed "graafian follicle" during the group presentation.*

---

gracilariid *(noun)*

Small dull or metallic-colored tineoid moths whose larvae mine in plant leaves.

- *She wrote a short paragraph that included "gracilariid."*
- *The article explained what "gracilariid" means with a simple example.*

---

gracilariid moth *(noun)*

Small dull or metallic-colored tineoid moths whose larvae mine in plant leaves.

- *They discussed "gracilariid moth" during the group presentation.*
- *She wrote a short paragraph that included "gracilariid moth."*

---

gracilariidae *(noun)*

Leaf miners.

- *She wrote a short paragraph that included "gracilariidae."*
- *He looked up "gracilariidae" because he had never seen it before.*

gracillariidae *(noun)*

Leaf miners.

- *She wrote a short paragraph that included "gracillariidae."*
- *He looked up "gracillariidae" because he had never seen it before.*

gracula religiosa *(noun)*

Glossy black Asiatic starling often taught to mimic speech.

- *He looked up "gracula religiosa" because he had never seen it before.*
- *They discussed "gracula religiosa" during the group presentation.*

granulocytopenia *(noun)*

An acute blood disorder (often caused by radiation or drug therapy) characterized by severe reduction in granulocytes.

- *He looked up "granulocytopenia" because he had never seen it before.*
- *In class, the teacher used "granulocytopenia" to mean an acute blood disorder (often caused by radiation....*

granuloma inguinale *(noun)*

A venereal disease caused by a bacterium of the genus Calymmatobacterium; characterized by a pimply rash of the skin in the genital and groin region.

- *He looked up "granuloma inguinale" because he had never seen it before.*
- *Understanding "granuloma inguinale" helps you talk about this topic clearly.*

granuloma venereum *(noun)*

A venereal disease caused by a bacterium of the genus Calymmatobacterium; characterized by a pimply rash of the skin in the genital and groin region.

- *The article explained what "granuloma venereum" means with a simple example.*
- *In class, the teacher used "granuloma venereum" to mean a venereal disease caused by a bacterium of the....*

graphospasm *(noun)*

Muscular spasms of thumb and forefinger while writing with a pen or pencil.

- *She wrote a short paragraph that included "graphospasm."*
- *They discussed "graphospasm" during the group presentation.*

grassfinch *(noun)*

Usually brightly-colored Australian weaverbirds; often kept as cage birds.

- *Understanding "grassfinch" helps you talk about this topic clearly.*
- *He looked up "grassfinch" because he had never seen it before.*

gravidation *(noun)*

Technical terms for pregnancy.

- *In class, the teacher used "gravidation" to mean technical terms for pregnancy.*
- *The article explained what "gravidation" means with a simple example.*

gravidity *(noun)*

Technical terms for pregnancy.

- *She wrote a short paragraph that included "gravidity."*
- *They discussed "gravidity" during the group presentation.*

gravidness *(noun)*

Technical terms for pregnancy.

- *He looked up "gravidness" because he had never seen it before.*
- *She wrote a short paragraph that included "gravidness."*

grayback *(noun)*

A sandpiper that breeds in the Arctic and winters in the southern hemisphere.

- *Understanding "grayback" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "grayback."*

grayhen *(noun)*

Female black grouse.

- *In class, the teacher used "grayhen" to mean female black grouse.*
- *Understanding "grayhen" helps you talk about this topic clearly.*

---

graylag *(noun)*

Common grey wild goose of Europe; ancestor of many domestic breeds.

- *They discussed "graylag" during the group presentation.*
- *In class, the teacher used "graylag" to mean common grey wild goose of europe; ancestor of many....*

---

graylag goose *(noun)*

Common grey wild goose of Europe; ancestor of many domestic breeds.

- *Understanding "graylag goose" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "graylag goose."*

---

greater pichiciego *(noun)*

Of southern South America.

- *He looked up "greater pichiciego" because he had never seen it before.*
- *In class, the teacher used "greater pichiciego" to mean of southern south america.*

---

greenbottle *(noun)*

Blowfly with brilliant coppery green body.

- *The article explained what "greenbottle" means with a simple example.*
- *In class, the teacher used "greenbottle" to mean blowfly with brilliant coppery green body.*

---

greenbottle fly *(noun)*

Blowfly with brilliant coppery green body.

- *In class, the teacher used "greenbottle fly" to mean blowfly with brilliant coppery green body.*
- *He looked up "greenbottle fly" because he had never seen it before.*

---

greeneye *(noun)*

Bottom-dwellers having large eyes with metallic green luster.

- *In class, the teacher used "greeneye" to mean bottom-dwellers having large eyes with metallic....*
- *He looked up "greeneye" because he had never seen it before.*

---

greenling *(noun)*

Food fish of the northern Pacific.

- *She wrote a short paragraph that included "greenling."*
- *He looked up "greenling" because he had never seen it before.*

---

greensickness *(noun)*

Iron deficiency anemia in young women; characterized by weakness and menstrual disturbances and a green color to the skin.

- *He looked up "greensickness" because he had never seen it before.*
- *They discussed "greensickness" during the group presentation.*

---

greenwing *(noun)*

Common teal of Eurasia and North America.

- *In class, the teacher used "greenwing" to mean common teal of eurasia and north america.*
- *The article explained what "greenwing" means with a simple example.*

---

gregarine *(noun)*

Vermiform protozoans parasitic in insects and other invertebrates.

- *In class, the teacher used "gregarine" to mean vermiform protozoans parasitic in insects and other....*
- *They discussed "gregarine" during the group presentation.*

---

gregarinida *(noun)*

An order in the subclass Telosporidia.

- *The article explained what "gregarinida" means with a simple example.*

- *In class, the teacher used "gregarinida" to mean an order in the subclass telosporidia.*

---

greyhen *(noun)*

Female black grouse.

- *He looked up "greyhen" because he had never seen it before.*
- *Understanding "greyhen" helps you talk about this topic clearly.*

---

griminess *(noun)*

The state of being grimy.

- *They discussed "griminess" during the group presentation.*
- *Understanding "griminess" helps you talk about this topic clearly.*

---

grison *(noun)*

Carnivore of Central America and South America resembling a weasel with a greyish-white back and dark underparts.

- *He looked up "grison" because he had never seen it before.*
- *She wrote a short paragraph that included "grison."*

---

grison vittatus *(noun)*

Carnivore of Central America and South America resembling a weasel with a greyish-white back and dark underparts.

- *In class, the teacher used "grison vittatus" to mean carnivore of central america and south america....*
- *Understanding "grison vittatus" helps you talk about this topic clearly.*

---

grivet *(noun)*

White and olive green East African monkey with long white tufts of hair beside the face.

- *The article explained what "grivet" means with a simple example.*
- *She wrote a short paragraph that included "grivet."*

---

groenendael *(noun)*

Black-coated sheepdog with a heavily plumed tail.

- *He looked up "groenendael" because he had never seen it before.*
- *They discussed "groenendael" during the group presentation.*

---

grossbeak *(noun)*

Any of various finches of Europe or America having a massive and powerful bill.

- *She wrote a short paragraph that included "grossbeak."*
- *Understanding "grossbeak" helps you talk about this topic clearly.*

---

grubbiness *(noun)*

The state of being grimy.

- *Understanding "grubbiness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "grubbiness."*

---

gruiformes *(noun)*

Inland marsh-dwelling birds with long legs and necks and bills that wade in water in search of food: cranes; rails; bustards.

- *They discussed "gruiformes" during the group presentation.*
- *He looked up "gruiformes" because he had never seen it before.*

---

grume *(noun)*

A semisolid mass of coagulated red and white blood cells.

- *He looked up "grume" because he had never seen it before.*
- *Understanding "grume" helps you talk about this topic clearly.*

---

guacharo *(noun)*

Nocturnal fruit-eating bird of South America that has fatty young yielding an oil that is used instead of butter.

- *Understanding "guacharo" helps you talk about this topic clearly.*
- *They discussed "guacharo" during the group presentation.*

---

guereza *(noun)*

A colobus monkey with a reddish brown coat and white silky fringes down both sides of the body.

- *They discussed "guereza" during the group presentation.*
- *The article explained what "guereza" means with a simple example.*

---

guib *(noun)*

Antelope with white markings like a harness and twisted horns.

- *The article explained what "guib" means with a simple example.*
- *Understanding "guib" helps you talk about this topic clearly.*

---

guiltlessness *(noun)*

A state of innocence.

- *She wrote a short paragraph that included "guiltlessness."*
- *They discussed "guiltlessness" during the group presentation.*

---

guitarfish *(noun)*

Primitive tropical bottom-dwelling ray with a guitar-shaped body.

- *He looked up "guitarfish" because he had never seen it before.*
- *She wrote a short paragraph that included "guitarfish."*

---

gulfweed *(noun)*

Brown algae with rounded bladders forming dense floating masses in tropical Atlantic waters as in the Sargasso Sea.

- *They discussed "gulfweed" during the group presentation.*
- *He looked up "gulfweed" because he had never seen it before.*

---

gulo luscus *(noun)*

Stocky shaggy-coated North American carnivorous mammal.

- *Understanding "gulo luscus" helps you talk about this topic clearly.*
- *They discussed "gulo luscus" during the group presentation.*

---

gumboil *(noun)*

A boil or abscess on the gums.

- *She wrote a short paragraph that included "gumboil."*
- *Understanding "gumboil" helps you talk about this topic clearly.*

---

gummosis *(noun)*

Disease of citrus trees caused by the fungus Phytophthora citrophthora.

- *Understanding "gummosis" helps you talk about this topic clearly.*
- *He looked up "gummosis" because he had never seen it before.*

---

gymnelis *(noun)*

A genus of Zoarcidae.

- *Understanding "gymnelis" helps you talk about this topic clearly.*
- *They discussed "gymnelis" during the group presentation.*

---

gymnelis viridis *(noun)*

Brightly colored scaleless Arctic eelpout.

- *He looked up "gymnelis viridis" because he had never seen it before.*
- *They discussed "gymnelis viridis" during the group presentation.*

---

gymnogyps *(noun)*

Containing solely the California condor.

- *The article explained what "gymnogyps" means with a simple example.*
- *They discussed "gymnogyps" during the group presentation.*

---

gymnogyps californianus *(noun)*

North American condor; chiefly dull black; almost extinct.

- *The article explained what "gymnogyps californianus" means with a simple example.*
- *She wrote a short paragraph that included "gymnogyps californianus."*

---

gymnophiona *(noun)*

An order of amphibians including caecilians.

- *They discussed "gymnophiona" during the group presentation.*
- *In class, the teacher used "gymnophiona" to mean an order of amphibians including caecilians.*

---

gymnorhina *(noun)*

In some classifications placed in the family Laniidae: Australian piping crows.

- *He looked up "gymnorhina" because he had never seen it before.*
- *Understanding "gymnorhina" helps you talk about this topic clearly.*

---

gymnorhina tibicen *(noun)*

Crow-sized black-and-white bird; a good mimic often caged.

- *Understanding "gymnorhina tibicen" helps you talk about this topic clearly.*
- *In class, the teacher used "gymnorhina tibicen" to mean crow-sized black-and-white bird; a good mimic often....*

---

gymnura *(noun)*

Butterfly rays.

- *The article explained what "gymnura" means with a simple example.*
- *In class, the teacher used "gymnura" to mean butterfly rays.*

---

gynophobia *(noun)*

A morbid fear of women.

- *He looked up "gynophobia" because he had never seen it before.*
- *In class, the teacher used "gynophobia" to mean a morbid fear of women.*

---

gypaetus *(noun)*

In some classifications the type genus of the family Aegypiidae.

- *In class, the teacher used "gypaetus" to mean in some classifications the type genus of the....*
- *He looked up "gypaetus" because he had never seen it before.*

---

gypaetus barbatus *(noun)*

The largest Eurasian bird of prey; having black feathers hanging around the bill.

- *Understanding "gypaetus barbatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gypaetus barbatus."*

---

gyrinidae *(noun)*

Whirligig beetles.

- *Understanding "gyrinidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "gyrinidae."*

---

gyrus cinguli *(noun)*

A long curved structure on the medial surface of the cerebral hemispheres; the cortical part of the limbic system.

- *They discussed "gyrus cinguli" during the group presentation.*
- *She wrote a short paragraph that included "gyrus cinguli."*

---

hadrosauridae *(noun)*

Duck-billed dinosaurs; upper Cretaceous.

- *He looked up "hadrosauridae" because he had never seen it before.*
- *In class, the teacher used "hadrosauridae" to mean duck-billed dinosaurs; upper cretaceous.*

---

hadrosaurus *(noun)*

Any of numerous large bipedal ornithischian dinosaurs having a horny duck-like bill and webbed feet; may have been partly aquatic.

- *She wrote a short paragraph that included "hadrosaurus."*
- *Understanding "hadrosaurus" helps you talk about this topic clearly.*

haemangioma *(noun)*

Benign angioma consisting of a mass of blood vessels; some appear as birthmarks.

- *The article explained what "haemangioma" means with a simple example.*
- *Understanding "haemangioma" helps you talk about this topic clearly.*

haematobia *(noun)*

European genus of bloodsucking flies.

- *The article explained what "haematobia" means with a simple example.*
- *They discussed "haematobia" during the group presentation.*

haematobia irritans *(noun)*

Small black European fly introduced into North America; sucks blood from cattle especially at the base of the horn.

- *They discussed "haematobia irritans" during the group presentation.*
- *In class, the teacher used "haematobia irritans" to mean small black european fly introduced into north....*

haematocele *(noun)*

Swelling caused by blood collecting in a body cavity (especially a swelling of the membrane covering the testis).

- *He looked up "haematocele" because he had never seen it before.*
- *Understanding "haematocele" helps you talk about this topic clearly.*

haematocoele *(noun)*

Swelling caused by blood collecting in a body cavity (especially a swelling of the membrane covering the testis).

- *She wrote a short paragraph that included "haematocoele."*
- *He looked up "haematocoele" because he had never seen it before.*

haematocolpometra *(noun)*

Accumulation of blood in the vagina and uterus.

- *She wrote a short paragraph that included "haematocolpometra."*
- *He looked up "haematocolpometra" because he had never seen it before.*

haematocolpos *(noun)*

Accumulation of menstrual blood in the vagina (usually due to an imperforate hymen).

- *They discussed "haematocolpos" during the group presentation.*
- *He looked up "haematocolpos" because he had never seen it before.*

haematocytopenia *(noun)*

An abnormally low number of red blood cells in the blood.

- *The article explained what "haematocytopenia" means with a simple example.*
- *She wrote a short paragraph that included "haematocytopenia."*

haematocyturia *(noun)*

The presence of red blood cells in the urine.

- *He looked up "haematocyturia" because he had never seen it before.*
- *Understanding "haematocyturia" helps you talk about this topic clearly.*

haematopodidae *(noun)*

Oystercatchers.

- *The article explained what "haematopodidae" means with a simple example.*
- *In class, the teacher used "haematopodidae" to mean oystercatchers.*

haematopus *(noun)*

Oystercatchers.

- *They discussed "haematopus" during the group presentation.*
- *She wrote a short paragraph that included "haematopus."*

haemoglobinemia *(noun)*

Presence of excessive hemoglobin in the blood plasma.

- *The article explained what "haemoglobinemia" means with a simple example.*
- *In class, the teacher used "haemoglobinemia" to mean presence of excessive hemoglobin in the blood plasma.*

---

haemoglobinopathy *(noun)*

A blood disease characterized by the presence of abnormal hemoglobins in the blood.

- *In class, the teacher used "haemoglobinopathy" to mean a blood disease characterized by the presence of....*
- *They discussed "haemoglobinopathy" during the group presentation.*

---

haemoglobinuria *(noun)*

Presence of hemoglobin in the urine.

- *In class, the teacher used "haemoglobinuria" to mean presence of hemoglobin in the urine.*
- *Understanding "haemoglobinuria" helps you talk about this topic clearly.*

---

haemoproteid *(noun)*

Related to malaria parasite and having a phase in the viscera of various birds.

- *The article explained what "haemoproteid" means with a simple example.*
- *In class, the teacher used "haemoproteid" to mean related to malaria parasite and having a phase in....*

---

haemoproteidae *(noun)*

Bird parasites.

- *The article explained what "haemoproteidae" means with a simple example.*
- *In class, the teacher used "haemoproteidae" to mean bird parasites.*

---

haemoproteus *(noun)*

Type genus of the family Haemoproteidae.

- *In class, the teacher used "haemoproteus" to mean type genus of the family haemoproteidae.*
- *They discussed "haemoproteus" during the group presentation.*

---

haemosiderosis *(noun)*

Abnormal deposit of hemosiderin; often a symptom of thalassemia or hemochromatosis.

- *The article explained what "haemosiderosis" means with a simple example.*
- *Understanding "haemosiderosis" helps you talk about this topic clearly.*

---

haemosporidia *(noun)*

An order in the subclass Telosporidia.

- *She wrote a short paragraph that included "haemosporidia."*
- *Understanding "haemosporidia" helps you talk about this topic clearly.*

---

haemosporidian *(noun)*

Minute protozoans parasitic at some stage of the life cycle in blood cells of vertebrates including many pathogens.

- *The article explained what "haemosporidian" means with a simple example.*
- *In class, the teacher used "haemosporidian" to mean minute protozoans parasitic at some stage of the....*

---

haemothorax *(noun)*

Accumulation of blood in the pleural cavity (the space between the lungs and the walls of the chest).

- *Understanding "haemothorax" helps you talk about this topic clearly.*
- *He looked up "haemothorax" because he had never seen it before.*

---

haemulon *(noun)*

Type genus of the Haemulidae.

- *They discussed "haemulon" during the group presentation.*
- *Understanding "haemulon" helps you talk about this topic clearly.*

---

haemulon album *(noun)*

A grunt with a red mouth that is found from Florida to Brazil.

- *Understanding "haemulon album" helps you talk about this topic clearly.*

- *The article explained what "haemulon album" means with a simple example.*

haemulon aurolineatum *(noun)*

Found off the West Indies and Florida.

- *She wrote a short paragraph that included "haemulon aurolineatum."*
- *Understanding "haemulon aurolineatum" helps you talk about this topic clearly.*

haemulon macrostomum *(noun)*

A kind of grunt.

- *Understanding "haemulon macrostomum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "haemulon macrostomum."*

haemulon malanurum *(noun)*

Of warm Atlantic waters.

- *She wrote a short paragraph that included "haemulon malanurum."*
- *The article explained what "haemulon malanurum" means with a simple example.*

haemulon parra *(noun)*

A grunt found from Florida to Brazil and Gulf of Mexico.

- *She wrote a short paragraph that included "haemulon parra."*
- *He looked up "haemulon parra" because he had never seen it before.*

hairtail *(noun)*

Long-bodied marine fishes having a long whiplike scaleless body and sharp teeth; closely related to snake mackerel.

- *In class, the teacher used "hairtail" to mean long-bodied marine fishes having a long whiplike....*
- *The article explained what "hairtail" means with a simple example.*

haldea *(noun)*

Ground snakes.

- *She wrote a short paragraph that included "haldea."*
- *The article explained what "haldea" means with a simple example.*

haldea striatula *(noun)*

In some classifications placed in genus Haldea; small reddish-grey snake of eastern North America.

- *He looked up "haldea striatula" because he had never seen it before.*
- *Understanding "haldea striatula" helps you talk about this topic clearly.*

haleness *(noun)*

A state of robust good health.

- *They discussed "haleness" during the group presentation.*
- *He looked up "haleness" because he had never seen it before.*

halfbeak *(noun)*

Tropical and subtropical marine and freshwater fishes having an elongated body and long protruding lower jaw.

- *He looked up "halfbeak" because he had never seen it before.*
- *Understanding "halfbeak" helps you talk about this topic clearly.*

haliaeetus leucorhyphus *(noun)*

Of southeast Europe and central Asia.

- *He looked up "haliaeetus leucorhyphus" because he had never seen it before.*
- *They discussed "haliaeetus leucorhyphus" during the group presentation.*

haliatus albicilla *(noun)*

Bulky greyish-brown eagle with a short wedge-shaped white tail; of Europe and Greenland.

- *He looked up "haliatus albicilla" because he had never seen it before.*
- *They discussed "haliatus albicilla" during the group presentation.*

halicoeres *(noun)*

A genus of Labridae.

- *They discussed "halicoeres" during the group presentation.*
- *The article explained what "halicoeres" means with a simple example.*

---

halicoeres bivittatus *(noun)*

Small wrasse of tropical Atlantic.

- *In class, the teacher used "halicoeres bivittatus" to mean small wrasse of tropical atlantic.*
- *Understanding "halicoeres bivittatus" helps you talk about this topic clearly.*

---

halicoeres radiatus *(noun)*

Bluish and bronze wrasse; found from Florida keys to Brazil.

- *He looked up "halicoeres radiatus" because he had never seen it before.*
- *She wrote a short paragraph that included "halicoeres radiatus."*

---

halictidae *(noun)*

A family of small solitary bees; many are valuable pollinators for agriculture.

- *In class, the teacher used "halictidae" to mean a family of small solitary bees; many are valuable....*
- *He looked up "halictidae" because he had never seen it before.*

---

halobacter *(noun)*

Halophiles in saline environments such as the Dead Sea or salt flats.

- *She wrote a short paragraph that included "halobacter."*
- *He looked up "halobacter" because he had never seen it before.*

---

halobacteria *(noun)*

Halophiles in saline environments such as the Dead Sea or salt flats.

- *They discussed "halobacteria" during the group presentation.*
- *Understanding "halobacteria" helps you talk about this topic clearly.*

---

halophil *(noun)*

Archaebacteria requiring a salt-rich environment for growth and survival.

- *The article explained what "halophil" means with a simple example.*
- *In class, the teacher used "halophil" to mean archaebacteria requiring a salt-rich environment....*

---

halophile *(noun)*

Archaebacteria requiring a salt-rich environment for growth and survival.

- *Understanding "halophile" helps you talk about this topic clearly.*
- *In class, the teacher used "halophile" to mean archaebacteria requiring a salt-rich environment....*

---

haltere *(noun)*

Either of the rudimentary hind wings of dipterous insects; used for maintaining equilibrium during flight.

- *The article explained what "haltere" means with a simple example.*
- *In class, the teacher used "haltere" to mean either of the rudimentary hind wings of dipterous....*

---

haminoea *(noun)*

Common genus of marine bubble shells of the Pacific coast of North America.

- *In class, the teacher used "haminoea" to mean common genus of marine bubble shells of the pacific....*
- *The article explained what "haminoea" means with a simple example.*

---

hammertoe *(noun)*

A deformed toe which is bent in a clawlike arch.

- *Understanding "hammertoe" helps you talk about this topic clearly.*
- *They discussed "hammertoe" during the group presentation.*

---

hangbird *(noun)*

Eastern subspecies of northern oriole.

- *The article explained what "hangbird" means with a simple example.*
- *In class, the teacher used "hangbird" to mean eastern subspecies of northern oriole.*

---

haploidy *(noun)*

The condition of being haploid.

- *In class, the teacher used "haploidy" to mean the condition of being haploid.*
- *They discussed "haploidy" during the group presentation.*

---

haplosporidia *(noun)*

An order in the subclass Acnidosporidia.

- *They discussed "haplosporidia" during the group presentation.*
- *He looked up "haplosporidia" because he had never seen it before.*

---

haplosporidian *(noun)*

Parasite in invertebrates and lower vertebrates of no known economic importance.

- *She wrote a short paragraph that included "haplosporidian."*
- *Understanding "haplosporidian" helps you talk about this topic clearly.*

---

harpia *(noun)*

A genus of Accipitridae.

- *They discussed "harpia" during the group presentation.*
- *She wrote a short paragraph that included "harpia."*

---

harpia harpyja *(noun)*

Large black-and-white crested eagle of tropical America.

- *Understanding "harpia harpyja" helps you talk about this topic clearly.*
- *They discussed "harpia harpyja" during the group presentation.*

---

harvestfish *(noun)*

Butterfish up to a foot long of Atlantic waters from Chesapeake Bay to Argentina.

- *The article explained what "harvestfish" means with a simple example.*
- *In class, the teacher used "harvestfish" to mean butterfish up to a foot long of atlantic waters....*

---

hawaiian honeycreeper *(noun)*

Small to medium-sized finches of the Hawaiian islands.

- *She wrote a short paragraph that included "hawaiian honeycreeper."*
- *He looked up "hawaiian honeycreeper" because he had never seen it before.*

---

hawkbill *(noun)*

Pugnacious tropical sea turtle with a hawk-like beak; source of food and the best tortoiseshell.

- *In class, the teacher used "hawkbill" to mean pugnacious tropical sea turtle with a hawk-like....*
- *The article explained what "hawkbill" means with a simple example.*

---

hazardousness *(noun)*

The state of being dangerous.

- *Understanding "hazardousness" helps you talk about this topic clearly.*
- *The article explained what "hazardousness" means with a simple example.*

---

headful *(noun)*

A covering over the surface of your head.

- *A headful of tight curls.*
- *A headful of lice.*

---

heartrot *(noun)*

Any plant disease in which the central part of a plant rots (especially in trees).

- *The article explained what "heartrot" means with a simple example.*
- *Understanding "heartrot" helps you talk about this topic clearly.*

heat hyperpyrexia *(noun)*

Collapse caused by exposure to excessive heat.

- *Understanding "heat hyperpyrexia" helps you talk about this topic clearly.*
- *They discussed "heat hyperpyrexia" during the group presentation.*

heathfowl *(noun)*

Large northern European grouse that is black with a lyre-shaped tail.

- *Understanding "heathfowl" helps you talk about this topic clearly.*
- *They discussed "heathfowl" during the group presentation.*

hedgehop *(verb)*

Fly very close to the ground.

- *She tried to use "hedgehop" carefully so everyone would understand.*
- *Can you use "hedgehop" in a sentence that fits this situation?*

heelbone *(noun)*

The largest tarsal bone; forms the human heel.

- *In class, the teacher used "heelbone" to mean the largest tarsal bone; forms the human heel.*
- *The article explained what "heelbone" means with a simple example.*

heleodytes *(noun)*

Alternative classifications for the cactus wrens.

- *He looked up "heleodytes" because he had never seen it before.*
- *She wrote a short paragraph that included "heleodytes."*

helicidae *(noun)*

Land snails including the common edible snail and some pests.

- *Understanding "helicidae" helps you talk about this topic clearly.*
- *In class, the teacher used "helicidae" to mean land snails including the common edible snail and....*

heliobacter *(noun)*

A genus of helical or curved or straight aerobic bacteria with rounded ends and multiple flagella; found in the gastric mucosa of primates (including humans).

- *Understanding "heliobacter" helps you talk about this topic clearly.*
- *He looked up "heliobacter" because he had never seen it before.*

heliobacter pylori *(noun)*

The type species of genus Heliobacter; produces urease and is associated with several gastroduodenal diseases (including gastritis and gastric ulcers and duodenal ulcers and other peptic ulcers).

- *The article explained what "heliobacter pylori" means with a simple example.*
- *She wrote a short paragraph that included "heliobacter pylori."*

heliozoa *(noun)*

Mostly freshwater protozoa.

- *She wrote a short paragraph that included "heliozoa."*
- *They discussed "heliozoa" during the group presentation.*

heliozoan *(noun)*

Protozoa with spherical bodies and stiff radiating pseudopods.

- *The article explained what "heliozoan" means with a simple example.*
- *In class, the teacher used "heliozoan" to mean protozoa with spherical bodies and stiff radiating....*

helix pomatia *(noun)*

One of the chief edible snails.

- *The article explained what "helix pomatia" means with a simple example.*
- *She wrote a short paragraph that included "helix pomatia."*

helleri *(noun)*

Freshwater fish of Central America having a long swordlike tail; popular aquarium fish.

- *The article explained what "helleri" means with a simple example.*
- *In class, the teacher used "helleri" to mean freshwater fish of central america having a long....*

---

hellgrammiate *(noun)*

Large brown aquatic larva of the dobsonfly; used as fishing bait.

- *He looked up "hellgrammiate" because he had never seen it before.*
- *In class, the teacher used "hellgrammiate" to mean large brown aquatic larva of the dobsonfly; used as....*

---

heloderma *(noun)*

Type genus of the Helodermatidae; American venomous lizards.

- *The article explained what "heloderma" means with a simple example.*
- *They discussed "heloderma" during the group presentation.*

---

heloderma horridum *(noun)*

Lizard with black and yellowish beadlike scales; of western Mexico.

- *The article explained what "heloderma horridum" means with a simple example.*
- *In class, the teacher used "heloderma horridum" to mean lizard with black and yellowish beadlike scales; of....*

---

heloderma suspectum *(noun)*

Large orange and black lizard of southwestern United States; not dangerous unless molested.

- *He looked up "heloderma suspectum" because he had never seen it before.*
- *She wrote a short paragraph that included "heloderma suspectum."*

---

helodermatidae *(noun)*

Only known venomous lizards.

- *In class, the teacher used "helodermatidae" to mean only known venomous lizards.*
- *The article explained what "helodermatidae" means with a simple example.*

---

hemachatus haemachatus *(noun)*

Highly venomous snake of southern Africa able to spit venom up to seven feet.

- *The article explained what "hemachatus haemachatus" means with a simple example.*
- *She wrote a short paragraph that included "hemachatus haemachatus."*

---

hematocele *(noun)*

Swelling caused by blood collecting in a body cavity (especially a swelling of the membrane covering the testis).

- *The article explained what "hematocele" means with a simple example.*
- *She wrote a short paragraph that included "hematocele."*

---

hematocoele *(noun)*

Swelling caused by blood collecting in a body cavity (especially a swelling of the membrane covering the testis).

- *In class, the teacher used "hematocoele" to mean swelling caused by blood collecting in a body....*
- *They discussed "hematocoele" during the group presentation.*

---

hematocolpometra *(noun)*

Accumulation of blood in the vagina and uterus.

- *In class, the teacher used "hematocolpometra" to mean accumulation of blood in the vagina and uterus.*
- *The article explained what "hematocolpometra" means with a simple example.*

---

hematocolpos *(noun)*

Accumulation of menstrual blood in the vagina (usually due to an imperforate hymen).

- *He looked up "hematocolpos" because he had never seen it before.*
- *Understanding "hematocolpos" helps you talk about this topic clearly.*

---

hematocyst *(noun)*

A cyst containing blood.

- *The article explained what "hematocyst" means with a simple example.*

- *In class, the teacher used "hematocyst" to mean a cyst containing blood.*

---

hematocytopenia *(noun)*

An abnormally low number of red blood cells in the blood.

- *Understanding "hematocytopenia" helps you talk about this topic clearly.*
- *In class, the teacher used "hematocytopenia" to mean an abnormally low number of red blood cells in the....*

---

hematocyturia *(noun)*

The presence of red blood cells in the urine.

- *The article explained what "hematocyturia" means with a simple example.*
- *She wrote a short paragraph that included "hematocyturia."*

---

hematopoeitic stem cell *(noun)*

Blood forming stem cells in the bone marrow; T cells and B cells arise from these stem cells.

- *He looked up "hematopoeitic stem cell" because he had never seen it before.*
- *She wrote a short paragraph that included "hematopoeitic stem cell."*

---

hemeralopia *(noun)*

Inability to see clearly in bright light.

- *She wrote a short paragraph that included "hemeralopia."*
- *They discussed "hemeralopia" during the group presentation.*

---

hemerobiid *(noun)*

Small dark-colored lacewing fly.

- *He looked up "hemerobiid" because he had never seen it before.*
- *She wrote a short paragraph that included "hemerobiid."*

---

hemerobiid fly *(noun)*

Small dark-colored lacewing fly.

- *She wrote a short paragraph that included "hemerobiid fly."*
- *Understanding "hemerobiid fly" helps you talk about this topic clearly.*

---

hemerobiidae *(noun)*

Brown lacewings.

- *He looked up "hemerobiidae" because he had never seen it before.*
- *They discussed "hemerobiidae" during the group presentation.*

---

hemianopic scotoma *(noun)*

A scotoma involving half of the visual field.

- *She wrote a short paragraph that included "hemianopic scotoma."*
- *He looked up "hemianopic scotoma" because he had never seen it before.*

---

hemicrania *(noun)*

A severe recurring vascular headache; occurs more frequently in women than men.

- *The article explained what "hemicrania" means with a simple example.*
- *In class, the teacher used "hemicrania" to mean a severe recurring vascular headache; occurs more....*

---

hemigalus *(noun)*

Banded palm civets.

- *They discussed "hemigalus" during the group presentation.*
- *She wrote a short paragraph that included "hemigalus."*

---

hemigalus hardwickii *(noun)*

An East Indian civet.

- *In class, the teacher used "hemigalus hardwickii" to mean an east indian civet.*
- *The article explained what "hemigalus hardwickii" means with a simple example.*

---

hemimetabola *(noun)*

Subclass of insects characterized by gradual and usually incomplete metamorphosis.

- *Understanding "hemimetabola" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hemimetabola."*

hemiprocnidae *(noun)*

Tree swifts.

- *In class, the teacher used "hemiprocnidae" to mean tree swifts.*
- *They discussed "hemiprocnidae" during the group presentation.*

hemipteran *(noun)*

Insects with sucking mouthparts and forewings thickened and leathery at the base; usually show incomplete metamorphosis.

- *She wrote a short paragraph that included "hemipteran."*
- *They discussed "hemipteran" during the group presentation.*

hemipteron *(noun)*

Insects with sucking mouthparts and forewings thickened and leathery at the base; usually show incomplete metamorphosis.

- *The article explained what "hemipteron" means with a simple example.*
- *Understanding "hemipteron" helps you talk about this topic clearly.*

hemipteronatus novacula *(noun)*

A kind of razor fish.

- *They discussed "hemipteronatus novacula" during the group presentation.*
- *Understanding "hemipteronatus novacula" helps you talk about this topic clearly.*

hemipterous insect *(noun)*

Insects with sucking mouthparts and forewings thickened and leathery at the base; usually show incomplete metamorphosis.

- *They discussed "hemipterous insect" during the group presentation.*
- *In class, the teacher used "hemipterous insect" to mean insects with sucking mouthparts and forewings....*

hemiramphidae *(noun)*

Halfbeaks; marine and freshwater fishes closely related to the flying fishes but not able to glide.

- *Understanding "hemiramphidae" helps you talk about this topic clearly.*
- *The article explained what "hemiramphidae" means with a simple example.*

hemitripterus americanus *(noun)*

Large sculpin of western Atlantic; inflates itself when caught.

- *They discussed "hemitripterus americanus" during the group presentation.*
- *The article explained what "hemitripterus americanus" means with a simple example.*

hemizygos vein *(noun)*

A continuation of the left ascending lumbar vein; crosses the midline at the 8th vertebra and empties into the azygos vein.

- *They discussed "hemizygos vein" during the group presentation.*
- *Understanding "hemizygos vein" helps you talk about this topic clearly.*

hemizygous vein *(noun)*

A continuation of the left ascending lumbar vein; crosses the midline at the 8th vertebra and empties into the azygos vein.

- *Understanding "hemizygous vein" helps you talk about this topic clearly.*
- *He looked up "hemizygous vein" because he had never seen it before.*

hemoglobinemia *(noun)*

Presence of excessive hemoglobin in the blood plasma.

- *Understanding "hemoglobinemia" helps you talk about this topic clearly.*
- *They discussed "hemoglobinemia" during the group presentation.*

hemoglobinopathy *(noun)*

A blood disease characterized by the presence of abnormal hemoglobins in the blood.

- *They discussed "hemoglobinopathy" during the group presentation.*
- *He looked up "hemoglobinopathy" because he had never seen it before.*

---

hemosiderosis *(noun)*

Abnormal deposit of hemosiderin; often a symptom of thalassemia or hemochromatosis.

- *Understanding "hemosiderosis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hemosiderosis."*

---

hepadnavirus *(noun)*

A group of animal DNA viruses including viruses of ducks and woodchucks and squirrels and others as well as the virus causing hepatitis B in humans.

- *In class, the teacher used "hepadnavirus" to mean a group of animal dna viruses including viruses of....*
- *Understanding "hepadnavirus" helps you talk about this topic clearly.*

---

hepatocarcinoma *(noun)*

Carcinoma of the liver.

- *He looked up "hepatocarcinoma" because he had never seen it before.*
- *In class, the teacher used "hepatocarcinoma" to mean carcinoma of the liver.*

---

hepatojugular reflux *(noun)*

A venous reflux occurring in congestive heart failure.

- *The article explained what "hepatojugular reflux" means with a simple example.*
- *She wrote a short paragraph that included "hepatojugular reflux."*

---

hepatolenticular degeneration *(noun)*

A rare inherited disorder of copper metabolism; copper accumulates in the liver and then in the red blood cells and brain.

- *They discussed "hepatolenticular degeneration" during the group presentation.*
- *Understanding "hepatolenticular degeneration" helps you talk about this topic clearly.*

---

herediatry spinal ataxia *(noun)*

Sclerosis of the posterior and lateral columns of the spinal cord; characterized by muscular weakness and abnormal gait; occurs in children.

- *He looked up "herediatry spinal ataxia" because he had never seen it before.*
- *They discussed "herediatry spinal ataxia" during the group presentation.*

---

hereness *(noun)*

The state of being here in this place.

- *The article explained what "hereness" means with a simple example.*
- *In class, the teacher used "hereness" to mean the state of being here in this place.*

---

hermaphrodism *(noun)*

Congenital condition in which external genitalia and internal sex organs have both male and female characteristics.

- *The article explained what "hermaphrodism" means with a simple example.*
- *They discussed "hermaphrodism" during the group presentation.*

---

hermissenda *(noun)*

Genus of marine sea slugs.

- *She wrote a short paragraph that included "hermissenda."*
- *Understanding "hermissenda" helps you talk about this topic clearly.*

---

hermissenda crassicornis *(noun)*

A kind of sea slug.

- *In class, the teacher used "hermissenda crassicornis" to mean a kind of sea slug.*
- *He looked up "hermissenda crassicornis" because he had never seen it before.*

---

herpangia *(noun)*

A viral infection (usually in children) marked by sore throat and fever and papules in the mouth and throat and headache and abdominal pain; usually subsides in a short time.

- *She wrote a short paragraph that included "herpangia."*
- *He looked up "herpangia" because he had never seen it before.*

herpes genitalis *(noun)*

An infection caused by herpes simplex virus type 2 (HSV-2) that is usually transmitted by sexual contact; marked by recurrent attacks of painful eruptions on the skin and mucous membranes of the genital area.

- *She wrote a short paragraph that included "herpes genitalis."*
- *They discussed "herpes genitalis" during the group presentation.*

herpestes ichneumon *(noun)*

Northern African mongoose; in ancient times thought to devour crocodile eggs.

- *The article explained what "herpestes ichneumon" means with a simple example.*
- *She wrote a short paragraph that included "herpestes ichneumon."*

herpestes nyula *(noun)*

Keen-sighted viverrine of southern Asia about the size of a ferret; often domesticated.

- *He looked up "herpestes nyula" because he had never seen it before.*
- *Understanding "herpestes nyula" helps you talk about this topic clearly.*

herrerasaur *(noun)*

A kind of theropod dinosaur found in Argentina.

- *In class, the teacher used "herrerasaur" to mean a kind of theropod dinosaur found in argentina.*
- *They discussed "herrerasaur" during the group presentation.*

herrerasaurus *(noun)*

A kind of theropod dinosaur found in Argentina.

- *He looked up "herrerasaurus" because he had never seen it before.*
- *She wrote a short paragraph that included "herrerasaurus."*

hesperiphona *(noun)*

Evening grosbeak.

- *Understanding "hesperiphona" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hesperiphona."*

hesperiphona vespertina *(noun)*

North American grosbeak.

- *She wrote a short paragraph that included "hesperiphona vespertina."*
- *The article explained what "hesperiphona vespertina" means with a simple example.*

heterocercal fin *(noun)*

A tail fin with unequal lobes in which the vertebral column turns upward into the larger lobe as in sharks.

- *In class, the teacher used "heterocercal fin" to mean a tail fin with unequal lobes in which the....*
- *The article explained what "heterocercal fin" means with a simple example.*

heterodactyl foot *(noun)*

A bird's foot having the first and second toes of each foot directed backward and the third and fourth forward.

- *Understanding "heterodactyl foot" helps you talk about this topic clearly.*
- *In class, the teacher used "heterodactyl foot" to mean a bird's foot having the first and second toes of....*

heterodon *(noun)*

A genus of small colubrid snakes containing the North American hognose snakes.

- *Understanding "heterodon" helps you talk about this topic clearly.*
- *The article explained what "heterodon" means with a simple example.*

heterograft *(noun)*

Tissue from an animal of one species used as a temporary graft (as in cases of severe burns) on an individual of another species.

- *The article explained what "heterograft" means with a simple example.*
- *In class, the teacher used "heterograft" to mean tissue from an animal of one species used as a....*

heterokontae *(noun)*

All the yellow-green algae having flagella of unequal length.

- *They discussed "heterokontae" during the group presentation.*
- *She wrote a short paragraph that included "heterokontae."*

---

heterokontophyta *(noun)*

Algae having chlorophyll a and usually c, and flagella of unequal lengths; terminology supersedes Chrysophyta in some classifications.

- *In class, the teacher used "heterokontophyta" to mean algae having chlorophyll a and usually c, and....*
- *He looked up "heterokontophyta" because he had never seen it before.*

---

heteromyidae *(noun)*

Small New World burrowing mouselike rodents with fur-lined cheek pouches and hind limbs and tail adapted to leaping; adapted to desert conditions: pocket mice; kangaroo mice; kangaroo rats.

- *Understanding "heteromyidae" helps you talk about this topic clearly.*
- *In class, the teacher used "heteromyidae" to mean small new world burrowing mouselike rodents with....*

---

heteroploid *(noun)*

(genetics) an organism or cell having a chromosome number that is not an even multiple of the haploid chromosome number for that species.

- *She wrote a short paragraph that included "heteroploid."*
- *He looked up "heteroploid" because he had never seen it before.*

---

heteroploidy *(noun)*

The condition of being heteroploid.

- *Understanding "heteroploidy" helps you talk about this topic clearly.*
- *He looked up "heteroploidy" because he had never seen it before.*

---

heteropterous insect *(noun)*

True bugs: insects whose forewings are membranous but have leathery tips.

- *They discussed "heteropterous insect" during the group presentation.*
- *He looked up "heteropterous insect" because he had never seen it before.*

---

heteroscelus incanus *(noun)*

Tattler of Pacific coastal regions.

- *They discussed "heteroscelus incanus" during the group presentation.*
- *Understanding "heteroscelus incanus" helps you talk about this topic clearly.*

---

heterosomata *(noun)*

Flatfishes: halibut; sole; flounder; plaice; turbot; tonguefishes.

- *Understanding "heterosomata" helps you talk about this topic clearly.*
- *They discussed "heterosomata" during the group presentation.*

---

heterostracan *(noun)*

Extinct jawless fish with the anterior part of the body covered with bony plates; of the Silurian and Devonian.

- *The article explained what "heterostracan" means with a simple example.*
- *They discussed "heterostracan" during the group presentation.*

---

heterostraci *(noun)*

Extinct group of armored jawless fishes or fish-like vertebrate; taxonomy is not clear.

- *The article explained what "heterostraci" means with a simple example.*
- *Understanding "heterostraci" helps you talk about this topic clearly.*

---

heterotaxy *(noun)*

Any abnormal position of the organs of the body.

- *The article explained what "heterotaxy" means with a simple example.*
- *In class, the teacher used "heterotaxy" to mean any abnormal position of the organs of the body.*

---

heterotrichales *(noun)*

Yellow-green algae with simple or branching filaments; comprising the single family Tribonemaceae.

- *He looked up "heterotrichales" because he had never seen it before.*
- *They discussed "heterotrichales" during the group presentation.*

---

hexagrammos *(noun)*

Type genus of the Hexagrammidae.

- *He looked up "hexagrammos" because he had never seen it before.*
- *She wrote a short paragraph that included "hexagrammos."*

---

hexagrammos decagrammus *(noun)*

Common food and sport fish of western coast of North America.

- *The article explained what "hexagrammos decagrammus" means with a simple example.*
- *Understanding "hexagrammos decagrammus" helps you talk about this topic clearly.*

---

hexamita *(noun)*

Flagellates free-living or parasitic in intestines of birds.

- *The article explained what "hexamita" means with a simple example.*
- *In class, the teacher used "hexamita" to mean flagellates free-living or parasitic in intestines....*

---

hexanchidae *(noun)*

Primitive sharks.

- *He looked up "hexanchidae" because he had never seen it before.*
- *She wrote a short paragraph that included "hexanchidae."*

---

hexanchus *(noun)*

A genus of Hexanchidae.

- *She wrote a short paragraph that included "hexanchus."*
- *The article explained what "hexanchus" means with a simple example.*

---

hexanchus griseus *(noun)*

Large primitive shark widely distributed in warm seas.

- *They discussed "hexanchus griseus" during the group presentation.*
- *She wrote a short paragraph that included "hexanchus griseus."*

---

hexapoda *(noun)*

Insects; about five-sixths of all known animal species.

- *Understanding "hexapoda" helps you talk about this topic clearly.*
- *They discussed "hexapoda" during the group presentation.*

---

hilus *(noun)*

(anatomy) a depression or fissure where vessels or nerves or ducts enter a bodily organ.

- *The hilus of the kidney.*
- *The article explained what "hilus" means with a simple example.*

---

himantopus *(noun)*

Major one of two genera of stilts; similar to avocets but with straight bills.

- *He looked up "himantopus" because he had never seen it before.*
- *They discussed "himantopus" during the group presentation.*

---

himantopus himantopus *(noun)*

Stilt of Europe and Africa and Asia having mostly white plumage but with black wings.

- *He looked up "himantopus himantopus" because he had never seen it before.*
- *Understanding "himantopus himantopus" helps you talk about this topic clearly.*

---

himantopus himantopus leucocephalus *(noun)*

Stilt of the southwest Pacific including Australia and New Zealand having mostly white plumage but with black wings and nape of neck.

- *The article explained what "himantopus himantopus leucocephalus" means with a simple example.*
- *They discussed "himantopus himantopus leucocephalus" during the group presentation.*

himantopus mexicanus *(noun)*

Stilt of southwestern United States to northern South America having black plumage extending from the head down the back of the neck.

- *She wrote a short paragraph that included "himantopus mexicanus."*
- *Understanding "himantopus mexicanus" helps you talk about this topic clearly.*

himantopus novae-zelandiae *(noun)*

Blackish stilt of New Zealand sometimes considered a color phase of the white-headed stilt.

- *They discussed "himantopus novae-zelandiae" during the group presentation.*
- *He looked up "himantopus novae-zelandiae" because he had never seen it before.*

himantopus stilt *(noun)*

Long-legged three-toed black-and-white wading bird of inland ponds and marshes or brackish lagoons.

- *Understanding "himantopus stilt" helps you talk about this topic clearly.*
- *The article explained what "himantopus stilt" means with a simple example.*

hippobosca *(noun)*

Type genus of the Hippoboscidae.

- *Understanding "hippobosca" helps you talk about this topic clearly.*
- *He looked up "hippobosca" because he had never seen it before.*

hippobosca equina *(noun)*

Winged fly parasitic on horses.

- *They discussed "hippobosca equina" during the group presentation.*
- *She wrote a short paragraph that included "hippobosca equina."*

hippoboscid *(noun)*

Bloodsucking dipterous fly parasitic on birds and mammals.

- *Understanding "hippoboscid" helps you talk about this topic clearly.*
- *They discussed "hippoboscid" during the group presentation.*

hippoboscidae *(noun)*

Winged or wingless dipterans: louse flies.

- *Understanding "hippoboscidae" helps you talk about this topic clearly.*
- *In class, the teacher used "hippoboscidae" to mean winged or wingless dipterans: louse flies.*

hippodamia convergens *(noun)*

A variety of ladybug.

- *In class, the teacher used "hippodamia convergens" to mean a variety of ladybug.*
- *The article explained what "hippodamia convergens" means with a simple example.*

hippoglossoides *(noun)*

A genus of Pleuronectidae.

- *Understanding "hippoglossoides" helps you talk about this topic clearly.*
- *The article explained what "hippoglossoides" means with a simple example.*

hippoglossoides platessoides *(noun)*

Large American food fish.

- *He looked up "hippoglossoides platessoides" because he had never seen it before.*
- *They discussed "hippoglossoides platessoides" during the group presentation.*

hippoglossus hippoglossus *(noun)*

Largest United States flatfish.

- *In class, the teacher used "hippoglossus hippoglossus" to mean largest united states flatfish.*
- *They discussed "hippoglossus hippoglossus" during the group presentation.*

hippoglossus stenolepsis *(noun)*

A righteye flounder found in the Pacific.

- *She wrote a short paragraph that included "hippoglossus stenolepsis."*
- *They discussed "hippoglossus stenolepsis" during the group presentation.*

---

hippopotamidae *(noun)*

Hippopotami.

- *He looked up "hippopotamidae" because he had never seen it before.*
- *In class, the teacher used "hippopotamidae" to mean hippopotami.*

---

hippopotamus amphibius *(noun)*

Massive thick-skinned herbivorous animal living in or around rivers of tropical Africa.

- *They discussed "hippopotamus amphibius" during the group presentation.*
- *The article explained what "hippopotamus amphibius" means with a simple example.*

---

hipposideridae *(noun)*

Old World leafnose bats.

- *In class, the teacher used "hipposideridae" to mean old world leafnose bats.*
- *He looked up "hipposideridae" because he had never seen it before.*

---

hipposideros *(noun)*

Horseshoe bats.

- *The article explained what "hipposideros" means with a simple example.*
- *They discussed "hipposideros" during the group presentation.*

---

hippotragus *(noun)*

Sable antelopes.

- *In class, the teacher used "hippotragus" to mean sable antelopes.*
- *The article explained what "hippotragus" means with a simple example.*

---

hippotragus niger *(noun)*

Large black East African antelope with sharp backward-curving horns.

- *She wrote a short paragraph that included "hippotragus niger."*
- *Understanding "hippotragus niger" helps you talk about this topic clearly.*

---

hipsurus *(noun)*

A genus of Embiotocidae.

- *They discussed "hipsurus" during the group presentation.*
- *She wrote a short paragraph that included "hipsurus."*

---

hipsurus caryi *(noun)*

Pacific coast fish.

- *The article explained what "hipsurus caryi" means with a simple example.*
- *She wrote a short paragraph that included "hipsurus caryi."*

---

hirschsprung's disease *(noun)*

Congenital condition in which the colon does not have the normal network of nerves; there is little urge to defecate so the feces accumulate and cause megacolon.

- *In class, the teacher used "hirschsprung's disease" to mean congenital condition in which the colon does not....*
- *He looked up "hirschsprung's disease" because he had never seen it before.*

---

hirudinidae *(noun)*

A family of Hirudinea.

- *In class, the teacher used "hirudinidae" to mean a family of hirudinea.*
- *They discussed "hirudinidae" during the group presentation.*

---

hirudo medicinalis *(noun)*

Large European freshwater leech formerly used for bloodletting.

- *She wrote a short paragraph that included "hirudo medicinalis."*

- *The article explained what "hirudo medicinalis" means with a simple example.*

---

hirundinidae *(noun)*

Swallows and martins.

- *Understanding "hirundinidae" helps you talk about this topic clearly.*
- *The article explained what "hirundinidae" means with a simple example.*

---

hirundo pyrrhonota *(noun)*

North American swallow that lives in colonies and builds bottle-shaped mud nests on cliffs and walls.

- *She wrote a short paragraph that included "hirundo pyrrhonota."*
- *He looked up "hirundo pyrrhonota" because he had never seen it before.*

---

histiocyte *(noun)*

A macrophage that is found in connective tissue.

- *She wrote a short paragraph that included "histiocyte."*
- *He looked up "histiocyte" because he had never seen it before.*

---

histoincompatibility *(noun)*

Incompatibility in which one person's tissue cannot be transplanted to another person.

- *Understanding "histoincompatibility" helps you talk about this topic clearly.*
- *The article explained what "histoincompatibility" means with a simple example.*

---

historicalness *(noun)*

The state of having in fact existed in the past.

- *The article explained what "historicalness" means with a simple example.*
- *They discussed "historicalness" during the group presentation.*

---

hoactzin *(noun)*

Crested ill-smelling South American bird whose young have claws on the first and second digits of the wings.

- *In class, the teacher used "hoactzin" to mean crested ill-smelling south american bird whose....*
- *The article explained what "hoactzin" means with a simple example.*

---

hogchoker *(noun)*

Useless as food; in coastal streams from Maine to Texas and Panama.

- *In class, the teacher used "hogchoker" to mean useless as food; in coastal streams from maine to....*
- *The article explained what "hogchoker" means with a simple example.*

---

hognosed skunk *(noun)*

Large naked-muzzled skunk with white back and tail; of southwestern North America and Mexico.

- *The article explained what "hognosed skunk" means with a simple example.*
- *Understanding "hognosed skunk" helps you talk about this topic clearly.*

---

holandric gene *(noun)*

A gene located on a Y chromosome.

- *The article explained what "holandric gene" means with a simple example.*
- *They discussed "holandric gene" during the group presentation.*

---

holbrookia *(noun)*

Earless lizards.

- *He looked up "holbrookia" because he had never seen it before.*
- *They discussed "holbrookia" during the group presentation.*

---

holibut *(noun)*

Marine food fish of the northern Atlantic or northern Pacific; the largest flatfish and one of the largest teleost fishes.

- *The article explained what "holibut" means with a simple example.*
- *In class, the teacher used "holibut" to mean marine food fish of the northern atlantic or....*

---

holocanthus tricolor *(noun)*

Gold and black butterflyfish found from West Indies to Brazil.

- *Understanding "holocanthus tricolor" helps you talk about this topic clearly.*
- *They discussed "holocanthus tricolor" during the group presentation.*

---

holocentridae *(noun)*

Squirrelfishes and soldierfishes.

- *The article explained what "holocentridae" means with a simple example.*
- *She wrote a short paragraph that included "holocentridae."*

---

holocentrus *(noun)*

Type genus of the family Holocentridae; squirrelfishes.

- *In class, the teacher used "holocentrus" to mean type genus of the family holocentridae; squirrelfishes.*
- *The article explained what "holocentrus" means with a simple example.*

---

holocentrus ascensionis *(noun)*

Bright red fish of West Indies and Bermuda.

- *The article explained what "holocentrus ascensionis" means with a simple example.*
- *In class, the teacher used "holocentrus ascensionis" to mean bright red fish of west indies and bermuda.*

---

holocentrus bullisi *(noun)*

A squirrelfish found from South Carolina to Bermuda and Gulf of Mexico.

- *Understanding "holocentrus bullisi" helps you talk about this topic clearly.*
- *He looked up "holocentrus bullisi" because he had never seen it before.*

---

holocentrus coruscus *(noun)*

On reefs from Bermuda and Florida to northern South America.

- *She wrote a short paragraph that included "holocentrus coruscus."*
- *He looked up "holocentrus coruscus" because he had never seen it before.*

---

holocephali *(noun)*

Chimaeras and extinct forms.

- *Understanding "holocephali" helps you talk about this topic clearly.*
- *In class, the teacher used "holocephali" to mean chimaeras and extinct forms.*

---

holometabola *(noun)*

Insects that undergo complete metamorphosis.

- *They discussed "holometabola" during the group presentation.*
- *He looked up "holometabola" because he had never seen it before.*

---

holothurian *(noun)*

Echinoderm having a flexible sausage-shaped body, tentacles surrounding the mouth and tube feet; free-living mud feeders.

- *The article explained what "holothurian" means with a simple example.*
- *She wrote a short paragraph that included "holothurian."*

---

holothuridae *(noun)*

A family of Holothuroidea.

- *He looked up "holothuridae" because he had never seen it before.*
- *She wrote a short paragraph that included "holothuridae."*

---

holothuroidea *(noun)*

Class of echinoderms including the sea cucumbers.

- *She wrote a short paragraph that included "holothuroidea."*
- *They discussed "holothuroidea" during the group presentation.*

---

homaridae *(noun)*

Large-clawed lobsters.

- *Understanding "homaridae" helps you talk about this topic clearly.*
- *The article explained what "homaridae" means with a simple example.*

---

hominoidea *(noun)*

Anthropoid apes and human beings.

- *The article explained what "hominoidea" means with a simple example.*
- *Understanding "hominoidea" helps you talk about this topic clearly.*

---

homo soloensis *(noun)*

Extinct primitive hominid of late Pleistocene; Java; formerly Javanthropus.

- *In class, the teacher used "homo soloensis" to mean extinct primitive hominid of late pleistocene;....*
- *They discussed "homo soloensis" during the group presentation.*

---

homocercal fin *(noun)*

Symmetrical tail fin extending beyond the end of the vertebral column as in most bony fishes.

- *He looked up "homocercal fin" because he had never seen it before.*
- *In class, the teacher used "homocercal fin" to mean symmetrical tail fin extending beyond the end of....*

---

homograft *(noun)*

Tissue or organ transplanted from a donor of the same species but different genetic makeup; recipient's immune system must be suppressed to prevent rejection of the graft.

- *She wrote a short paragraph that included "homograft."*
- *The article explained what "homograft" means with a simple example.*

---

homona *(noun)*

Tea tortrix.

- *In class, the teacher used "homona" to mean tea tortrix.*
- *He looked up "homona" because he had never seen it before.*

---

homona coffearia *(noun)*

Small Indian moth infesting e.g. tea and coffee plants.

- *In class, the teacher used "homona coffearia" to mean small indian moth infesting e.g. tea and coffee plants.*
- *He looked up "homona coffearia" because he had never seen it before.*

---

homopteran *(noun)*

Insects having membranous forewings and hind wings.

- *They discussed "homopteran" during the group presentation.*
- *The article explained what "homopteran" means with a simple example.*

---

homopterous insect *(noun)*

Insects having membranous forewings and hind wings.

- *The article explained what "homopterous insect" means with a simple example.*
- *In class, the teacher used "homopterous insect" to mean insects having membranous forewings and hind wings.*

---

honeycreeper *(noun)*

Small to medium-sized finches of the Hawaiian islands.

- *They discussed "honeycreeper" during the group presentation.*
- *She wrote a short paragraph that included "honeycreeper."*

---

honeysucker *(noun)*

Australasian bird with tongue and bill adapted for extracting nectar.

- *In class, the teacher used "honeysucker" to mean australasian bird with tongue and bill adapted for....*
- *Understanding "honeysucker" helps you talk about this topic clearly.*

---

hooknose *(noun)*

A nose with a prominent slightly aquiline bridge.

- *In class, the teacher used "hooknose" to mean a nose with a prominent slightly aquiline bridge.*
- *Understanding "hooknose" helps you talk about this topic clearly.*

hoopoo *(noun)*

Any of several crested Old World birds with a slender downward-curved bill.

- *In class, the teacher used "hoopoo" to mean any of several crested old world birds with a....*
- *Understanding "hoopoo" helps you talk about this topic clearly.*

hordeolum *(noun)*

An infection of the sebaceous gland of the eyelid.

- *The article explained what "hordeolum" means with a simple example.*
- *They discussed "hordeolum" during the group presentation.*

hornpout *(noun)*

Catfish common in eastern United States.

- *She wrote a short paragraph that included "hornpout."*
- *He looked up "hornpout" because he had never seen it before.*

horsefish *(noun)*

Any of several silvery marine fishes with very flat bodies.

- *They discussed "horsefish" during the group presentation.*
- *He looked up "horsefish" because he had never seen it before.*

horseleech *(noun)*

Any of several large freshwater leeches.

- *Understanding "horseleech" helps you talk about this topic clearly.*
- *The article explained what "horseleech" means with a simple example.*

horseshoe whipsnake *(noun)*

Slender fast-moving Eurasian snake.

- *He looked up "horseshoe whipsnake" because he had never seen it before.*
- *She wrote a short paragraph that included "horseshoe whipsnake."*

housedog *(noun)*

A dog trained to guard a house.

- *He looked up "housedog" because he had never seen it before.*
- *In class, the teacher used "housedog" to mean a dog trained to guard a house.*

humblebee *(noun)*

Robust hairy social bee of temperate regions.

- *She wrote a short paragraph that included "humblebee."*
- *The article explained what "humblebee" means with a simple example.*

humidness *(noun)*

Wetness in the atmosphere.

- *He looked up "humidness" because he had never seen it before.*
- *They discussed "humidness" during the group presentation.*

hyalinisation *(noun)*

The state of being hyaline or having become hyaline.

- *In class, the teacher used "hyalinisation" to mean the state of being hyaline or having become hyaline.*
- *The article explained what "hyalinisation" means with a simple example.*

hyalinization *(noun)*

The state of being hyaline or having become hyaline.

- *The patient's arterioles showed marked hyalinization.*
- *She wrote a short paragraph that included "hyalinization."*

hyalophora *(noun)*

American silkworm moth.

- *They discussed "hyalophora" during the group presentation.*
- *She wrote a short paragraph that included "hyalophora."*

---

hyalophora cecropia *(noun)*

North American silkworm moth; larvae feed on the leaves of forest trees.

- *They discussed "hyalophora cecropia" during the group presentation.*
- *She wrote a short paragraph that included "hyalophora cecropia."*

---

hyaloplasm *(noun)*

The clear nongranular portion of the cytoplasm of a cell.

- *Understanding "hyaloplasm" helps you talk about this topic clearly.*
- *They discussed "hyaloplasm" during the group presentation.*

---

hyalospongiae *(noun)*

Sponges with siliceous spicules that have six rays; choanocytes are restricted to finger-shaped chambers.

- *The article explained what "hyalospongiae" means with a simple example.*
- *They discussed "hyalospongiae" during the group presentation.*

---

hydatidosis *(noun)*

Infestation with larval echinococci (tapeworms).

- *She wrote a short paragraph that included "hydatidosis."*
- *They discussed "hydatidosis" during the group presentation.*

---

hydramnios *(noun)*

An abnormality of pregnancy; accumulation of excess amniotic fluid.

- *In class, the teacher used "hydramnios" to mean an abnormality of pregnancy; accumulation of excess....*
- *The article explained what "hydramnios" means with a simple example.*

---

hydrarthrosis *(noun)*

Inflammation and swelling of a movable joint because of excess synovial fluid.

- *Understanding "hydrarthrosis" helps you talk about this topic clearly.*
- *In class, the teacher used "hydrarthrosis" to mean inflammation and swelling of a movable joint....*

---

hydremia *(noun)*

Blood disorder in which there is excess fluid volume compared with the cell volume of the blood.

- *They discussed "hydremia" during the group presentation.*
- *He looked up "hydremia" because he had never seen it before.*

---

hydrobates *(noun)*

Type genus of the Hydrobatidae.

- *The article explained what "hydrobates" means with a simple example.*
- *She wrote a short paragraph that included "hydrobates."*

---

hydrobates pelagicus *(noun)*

Sooty black petrel with white markings; of the northern Atlantic and Mediterranean.

- *Understanding "hydrobates pelagicus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hydrobates pelagicus."*

---

hydrobatidae *(noun)*

Storm petrels.

- *He looked up "hydrobatidae" because he had never seen it before.*
- *Understanding "hydrobatidae" helps you talk about this topic clearly.*

---

hydrocephaly *(noun)*

An abnormal condition in which cerebrospinal fluid collects in the ventricles of the brain; in infants it can cause abnormally rapid growth of the head and bulging fontanelles and a small face; in adults the symptoms are primarily neurological.

- *Understanding "hydrocephaly" helps you talk about this topic clearly.*

- *They discussed "hydrocephaly" during the group presentation.*

hydrochoerus *(noun)*

A genus of Hydrochoeridae.

- *The article explained what "hydrochoerus" means with a simple example.*
- *In class, the teacher used "hydrochoerus" to mean a genus of hydrochoeridae.*

hydrochoerus hydrochaeris *(noun)*

Pig-sized tailless South American amphibious rodent with partly webbed feet; largest living rodent.

- *In class, the teacher used "hydrochoerus hydrochaeris" to mean pig-sized tailless south american amphibious rodent....*
- *They discussed "hydrochoerus hydrochaeris" during the group presentation.*

hydrodamalis *(noun)*

A genus of the family Dugongidae comprising only Steller's sea cow.

- *The article explained what "hydrodamalis" means with a simple example.*
- *In class, the teacher used "hydrodamalis" to mean a genus of the family dugongidae comprising only....*

hydrodamalis gigas *(noun)*

Extinct large sirenian mammal formerly found near the Asiatic coast of the Bering Sea.

- *In class, the teacher used "hydrodamalis gigas" to mean extinct large sirenian mammal formerly found near....*
- *The article explained what "hydrodamalis gigas" means with a simple example.*

hydromantes *(noun)*

Web-toed salamanders.

- *He looked up "hydromantes" because he had never seen it before.*
- *She wrote a short paragraph that included "hydromantes."*

hydromantes brunus *(noun)*

Similar to Shasta salamander; lives in cliff crevices and taluses.

- *They discussed "hydromantes brunus" during the group presentation.*
- *He looked up "hydromantes brunus" because he had never seen it before.*

hydromantes shastae *(noun)*

Primarily a cave dweller in the Mount Shasta area.

- *She wrote a short paragraph that included "hydromantes shastae."*
- *He looked up "hydromantes shastae" because he had never seen it before.*

hydromyinae *(noun)*

Water rats of Australia and New Guinea.

- *They discussed "hydromyinae" during the group presentation.*
- *In class, the teacher used "hydromyinae" to mean water rats of australia and new guinea.*

hydrothorax *(noun)*

Accumulation of fluid in the pleural cavity (the space between the lungs and the walls of the chest) often resulting from disease of the heart or kidneys.

- *In class, the teacher used "hydrothorax" to mean accumulation of fluid in the pleural cavity (the....*
- *He looked up "hydrothorax" because he had never seen it before.*

hydrozoan *(noun)*

Colonial coelenterates having the polyp phase dominant.

- *In class, the teacher used "hydrozoan" to mean colonial coelenterates having the polyp phase dominant.*
- *Understanding "hydrozoan" helps you talk about this topic clearly.*

hyemoschus *(noun)*

Water chevrotains.

- *He looked up "hyemoschus" because he had never seen it before.*
- *They discussed "hyemoschus" during the group presentation.*

hyemoschus aquaticus *(noun)*

Largest chevrotain; of marshy areas of west Africa.

- *He looked up "hyemoschus aquaticus" because he had never seen it before.*
- *Understanding "hyemoschus aquaticus" helps you talk about this topic clearly.*

hyla arenicolor *(noun)*

A small chiefly ground dweller that stays within easy jumping distance of water; of United States southwest and northern Mexico.

- *Understanding "hyla arenicolor" helps you talk about this topic clearly.*
- *They discussed "hyla arenicolor" during the group presentation.*

hyla regilla *(noun)*

The most commonly heard frog on the Pacific coast of America.

- *He looked up "hyla regilla" because he had never seen it before.*
- *She wrote a short paragraph that included "hyla regilla."*

hylactophryne *(noun)*

Barking frogs.

- *Understanding "hylactophryne" helps you talk about this topic clearly.*
- *The article explained what "hylactophryne" means with a simple example.*

hylactophryne augusti *(noun)*

Of southwest United States and Mexico; call is like a dog's bark.

- *In class, the teacher used "hylactophryne augusti" to mean of southwest united states and mexico; call is like....*
- *Understanding "hylactophryne augusti" helps you talk about this topic clearly.*

hylidae *(noun)*

The amphibian family of tree frogs.

- *He looked up "hylidae" because he had never seen it before.*
- *They discussed "hylidae" during the group presentation.*

hylobates syndactylus *(noun)*

Large black gibbon of Sumatra having the 2nd and 3rd toes partially united by a web.

- *Understanding "hylobates syndactylus" helps you talk about this topic clearly.*
- *They discussed "hylobates syndactylus" during the group presentation.*

hylobatidae *(noun)*

Used in some classifications for the lesser apes (gibbons and siamangs); sometimes considered a subfamily of Pongidae.

- *In class, the teacher used "hylobatidae" to mean used in some classifications for the lesser apes....*
- *They discussed "hylobatidae" during the group presentation.*

hylocichla *(noun)*

American thrush: wood thrush; hermit thrush; veery.

- *In class, the teacher used "hylocichla" to mean american thrush: wood thrush; hermit thrush; veery.*
- *The article explained what "hylocichla" means with a simple example.*

hylocichla fuscescens *(noun)*

Tawny brown North American thrush noted for its song.

- *Understanding "hylocichla fuscescens" helps you talk about this topic clearly.*
- *They discussed "hylocichla fuscescens" during the group presentation.*

hylocichla mustelina *(noun)*

Large thrush common in eastern American woodlands; noted for its melodious song.

- *Understanding "hylocichla mustelina" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hylocichla mustelina."*

hylophylax *(noun)*

A genus of Formicariidae.

- *Understanding "hylophylax" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hylophylax."*

---

hylophylax naevioides *(noun)*

A kind of antbird.

- *They discussed "hylophylax naevioides" during the group presentation.*
- *He looked up "hylophylax naevioides" because he had never seen it before.*

---

hymenopter *(noun)*

Insects having two pairs of membranous wings and an ovipositor specialized for stinging or piercing.

- *She wrote a short paragraph that included "hymenopter."*
- *They discussed "hymenopter" during the group presentation.*

---

hymenopteran *(noun)*

Insects having two pairs of membranous wings and an ovipositor specialized for stinging or piercing.

- *He looked up "hymenopteran" because he had never seen it before.*
- *They discussed "hymenopteran" during the group presentation.*

---

hymenopteron *(noun)*

Insects having two pairs of membranous wings and an ovipositor specialized for stinging or piercing.

- *In class, the teacher used "hymenopteron" to mean insects having two pairs of membranous wings and an....*
- *Understanding "hymenopteron" helps you talk about this topic clearly.*

---

hymenopterous insect *(noun)*

Insects having two pairs of membranous wings and an ovipositor specialized for stinging or piercing.

- *Understanding "hymenopterous insect" helps you talk about this topic clearly.*
- *In class, the teacher used "hymenopterous insect" to mean insects having two pairs of membranous wings and an....*

---

hynerpeton *(noun)*

Earliest fossil amphibian ever found; of the Devonian; found in Pennsylvania.

- *Understanding "hynerpeton" helps you talk about this topic clearly.*
- *In class, the teacher used "hynerpeton" to mean earliest fossil amphibian ever found; of the....*

---

hypentelium *(noun)*

A genus of fish in the family Catostomidae.

- *He looked up "hypentelium" because he had never seen it before.*
- *Understanding "hypentelium" helps you talk about this topic clearly.*

---

hypentelium nigricans *(noun)*

Widely distributed in warm clear shallow streams.

- *He looked up "hypentelium nigricans" because he had never seen it before.*
- *Understanding "hypentelium nigricans" helps you talk about this topic clearly.*

---

hyperacusia *(noun)*

Abnormal acuteness of hearing due to increased irritability of the sensory neural mechanism; characterized by intolerance for ordinary sound levels.

- *In class, the teacher used "hyperacusia" to mean abnormal acuteness of hearing due to increased....*
- *He looked up "hyperacusia" because he had never seen it before.*

---

hyperadrenalism *(noun)*

A glandular disorder caused by excessive ACTH resulting in greater than normal functioning of the adrenal gland; characterized by obesity.

- *In class, the teacher used "hyperadrenalism" to mean a glandular disorder caused by excessive acth....*
- *They discussed "hyperadrenalism" during the group presentation.*

---

hyperadrenocorticism *(noun)*

A glandular disorder caused by excessive cortisol.

- *He looked up "hyperadrenocorticism" because he had never seen it before.*
- *She wrote a short paragraph that included "hyperadrenocorticism."*

hyperaemia *(noun)*

Increased blood in an organ or other body part.

- *They discussed "hyperaemia" during the group presentation.*
- *He looked up "hyperaemia" because he had never seen it before.*

hyperbetalipoproteinemia *(noun)*

A genetic disorder characterized by high levels of beta-lipoproteins and cholesterol; can lead to atherosclerosis at an early age.

- *She wrote a short paragraph that included "hyperbetalipoproteinemia."*
- *Understanding "hyperbetalipoproteinemia" helps you talk about this topic clearly.*

hypercalcinuria *(noun)*

The presence of abnormally high levels of calcium in the urine; usually the result of excessive bone resorption in hyperparathyroidism or osteoporosis.

- *She wrote a short paragraph that included "hypercalcinuria."*
- *He looked up "hypercalcinuria" because he had never seen it before.*

hypercalciuria *(noun)*

The presence of abnormally high levels of calcium in the urine; usually the result of excessive bone resorption in hyperparathyroidism or osteoporosis.

- *They discussed "hypercalciuria" during the group presentation.*
- *In class, the teacher used "hypercalciuria" to mean the presence of abnormally high levels of calcium....*

hypercarbia *(noun)*

The physical condition of having the presence of an abnormally high level of carbon dioxide in the circulating blood.

- *He looked up "hypercarbia" because he had never seen it before.*
- *In class, the teacher used "hypercarbia" to mean the physical condition of having the presence of an....*

hypercellularity *(noun)*

The state of having abnormally many cells.

- *In class, the teacher used "hypercellularity" to mean the state of having abnormally many cells.*
- *The article explained what "hypercellularity" means with a simple example.*

hypercholesteremia *(noun)*

The presence of an abnormal amount of cholesterol in the cells and plasma of the blood; associated with the risk of atherosclerosis.

- *She wrote a short paragraph that included "hypercholesteremia."*
- *He looked up "hypercholesteremia" because he had never seen it before.*

hyperchromic anaemia *(noun)*

Anemia characterized by an increase in the concentration of corpuscular hemoglobin.

- *She wrote a short paragraph that included "hyperchromic anaemia."*
- *Understanding "hyperchromic anaemia" helps you talk about this topic clearly.*

hyperchromic anemia *(noun)*

Anemia characterized by an increase in the concentration of corpuscular hemoglobin.

- *In class, the teacher used "hyperchromic anemia" to mean anemia characterized by an increase in the....*
- *The article explained what "hyperchromic anemia" means with a simple example.*

hyperdactyly *(noun)*

Birth defect characterized by the presence of more than the normal number of fingers or toes.

- *In class, the teacher used "hyperdactyly" to mean birth defect characterized by the presence of more....*
- *The article explained what "hyperdactyly" means with a simple example.*

hyperglyphe perciformis *(noun)*

Blackish fish of New England waters.

- *Understanding "hyperglyphe perciformis" helps you talk about this topic clearly.*
- *In class, the teacher used "hyperglyphe perciformis" to mean blackish fish of new england waters.*

hypericism *(noun)*

A severe dermatitis of herbivorous domestic animals attributable to photosensitivity from eating Saint John's wort.

- *They discussed "hypericism" during the group presentation.*
- *The article explained what "hypericism" means with a simple example.*

---

hyperlipaemia *(noun)*

Presence of excess lipids in the blood.

- *In class, the teacher used "hyperlipaemia" to mean presence of excess lipids in the blood.*
- *The article explained what "hyperlipaemia" means with a simple example.*

---

hyperlipemia *(noun)*

Presence of excess lipids in the blood.

- *They discussed "hyperlipemia" during the group presentation.*
- *She wrote a short paragraph that included "hyperlipemia."*

---

hyperlipoidaemia *(noun)*

Presence of excess lipids in the blood.

- *He looked up "hyperlipoidaemia" because he had never seen it before.*
- *In class, the teacher used "hyperlipoidaemia" to mean presence of excess lipids in the blood.*

---

hyperlipoidemia *(noun)*

Presence of excess lipids in the blood.

- *The article explained what "hyperlipoidemia" means with a simple example.*
- *They discussed "hyperlipoidemia" during the group presentation.*

---

hyperlipoproteinemia *(noun)*

Any of various disorders of lipoprotein and cholesterol metabolism that result in high levels of lipoprotein and cholesterol in the circulating blood.

- *The article explained what "hyperlipoproteinemia" means with a simple example.*
- *In class, the teacher used "hyperlipoproteinemia" to mean any of various disorders of lipoprotein and....*

---

hypermastigina *(noun)*

Cellulose-producing flagellates.

- *The article explained what "hypermastigina" means with a simple example.*
- *In class, the teacher used "hypermastigina" to mean cellulose-producing flagellates.*

---

hypermastigote *(noun)*

Flagellate symbiotic in the intestines of e.g. termites.

- *She wrote a short paragraph that included "hypermastigote."*
- *He looked up "hypermastigote" because he had never seen it before.*

---

hypermetropia *(noun)*

Abnormal condition in which vision for distant objects is better than for near objects.

- *She wrote a short paragraph that included "hypermetropia."*
- *The article explained what "hypermetropia" means with a simple example.*

---

hypermetropy *(noun)*

Abnormal condition in which vision for distant objects is better than for near objects.

- *He looked up "hypermetropy" because he had never seen it before.*
- *They discussed "hypermetropy" during the group presentation.*

---

hypermotility *(noun)*

Excessive movement; especially excessive motility of the gastrointestinal tract.

- *The article explained what "hypermotility" means with a simple example.*
- *Understanding "hypermotility" helps you talk about this topic clearly.*

---

hyperoartia *(noun)*

Lampreys as distinguished from hagfishes.

- *He looked up "hyperoartia" because he had never seen it before.*

- *In class, the teacher used "hyperoartia" to mean lampreys as distinguished from hagfishes.*

---

hyperodontidae *(noun)*

Beaked whales; in some especially former classifications included in the family Physeteridae.

- *The article explained what "hyperodontidae" means with a simple example.*
- *Understanding "hyperodontidae" helps you talk about this topic clearly.*

---

hyperoglyphe *(noun)*

A genus of Stromateidae.

- *He looked up "hyperoglyphe" because he had never seen it before.*
- *In class, the teacher used "hyperoglyphe" to mean a genus of stromateidae.*

---

hyperoodon *(noun)*

Bottle-nosed whales.

- *The article explained what "hyperoodon" means with a simple example.*
- *They discussed "hyperoodon" during the group presentation.*

---

hyperoodon ampullatus *(noun)*

Northern Atlantic beaked whale with a bulbous forehead.

- *The article explained what "hyperoodon ampullatus" means with a simple example.*
- *Understanding "hyperoodon ampullatus" helps you talk about this topic clearly.*

---

hyperotreta *(noun)*

Hagfishes as distinguished from lampreys.

- *She wrote a short paragraph that included "hyperotreta."*
- *The article explained what "hyperotreta" means with a simple example.*

---

hyperpiesia *(noun)*

Persistent and pathological high blood pressure for which no specific cause can be found.

- *They discussed "hyperpiesia" during the group presentation.*
- *Understanding "hyperpiesia" helps you talk about this topic clearly.*

---

hyperpiesis *(noun)*

Persistent and pathological high blood pressure for which no specific cause can be found.

- *They discussed "hyperpiesis" during the group presentation.*
- *The article explained what "hyperpiesis" means with a simple example.*

---

hyperpituitarism *(noun)*

Excessive activity of the pituitary gland (especially overactivity of the anterior lobe which leads to excess secretion of growth hormone).

- *They discussed "hyperpituitarism" during the group presentation.*
- *In class, the teacher used "hyperpituitarism" to mean excessive activity of the pituitary gland....*

---

hyperpyrexia *(noun)*

Extremely high fever (especially in children).

- *Understanding "hyperpyrexia" helps you talk about this topic clearly.*
- *They discussed "hyperpyrexia" during the group presentation.*

---

hypersplenism *(noun)*

Enlarged spleen and a decrease in one or more types of blood cells; associated with many disorders.

- *They discussed "hypersplenism" during the group presentation.*
- *Understanding "hypersplenism" helps you talk about this topic clearly.*

---

hyperthermy *(noun)*

Abnormally high body temperature; sometimes induced (as in treating some forms of cancer).

- *They discussed "hyperthermy" during the group presentation.*
- *Understanding "hyperthermy" helps you talk about this topic clearly.*

---

hypertonicity *(noun)*

(of muscular tissue) the state of being hypertonic.

- *She wrote a short paragraph that included "hypertonicity."*
- *He looked up "hypertonicity" because he had never seen it before.*

---

hypertonus *(noun)*

(of muscular tissue) the state of being hypertonic.

- *They discussed "hypertonus" during the group presentation.*
- *He looked up "hypertonus" because he had never seen it before.*

---

hypervolaemia *(noun)*

A blood disorder consisting of an increase in the volume of circulating blood.

- *In class, the teacher used "hypervolaemia" to mean a blood disorder consisting of an increase in the....*
- *They discussed "hypervolaemia" during the group presentation.*

---

hypervolemia *(noun)*

A blood disorder consisting of an increase in the volume of circulating blood.

- *They discussed "hypervolemia" during the group presentation.*
- *He looked up "hypervolemia" because he had never seen it before.*

---

hypesthesia *(noun)*

Impairment of tactile sensitivity; decrease of sensitivity.

- *The article explained what "hypesthesia" means with a simple example.*
- *In class, the teacher used "hypesthesia" to mean impairment of tactile sensitivity; decrease of....*

---

hyphantria *(noun)*

Fall webworms.

- *In class, the teacher used "hyphantria" to mean fall webworms.*
- *Understanding "hyphantria" helps you talk about this topic clearly.*

---

hyphantria cunea *(noun)*

A variety of webworm.

- *He looked up "hyphantria cunea" because he had never seen it before.*
- *They discussed "hyphantria cunea" during the group presentation.*

---

hypnophobia *(noun)*

A morbid fear of falling asleep.

- *The article explained what "hypnophobia" means with a simple example.*
- *They discussed "hypnophobia" during the group presentation.*

---

hypoadrenalism *(noun)*

A glandular disorder caused by failure of function of the cortex of the adrenal gland and marked by anemia and prostration with brownish skin.

- *He looked up "hypoadrenalism" because he had never seen it before.*
- *Understanding "hypoadrenalism" helps you talk about this topic clearly.*

---

hypoadrenocorticism *(noun)*

A glandular disorder caused by failure of function of the cortex of the adrenal gland and marked by anemia and prostration with brownish skin.

- *Understanding "hypoadrenocorticism" helps you talk about this topic clearly.*
- *He looked up "hypoadrenocorticism" because he had never seen it before.*

---

hypobetalipoproteinemia *(noun)*

A hereditary disorder characterized by low levels of beta-lipoproteins and lipids and cholesterol.

- *They discussed "hypobetalipoproteinemia" during the group presentation.*
- *Understanding "hypobetalipoproteinemia" helps you talk about this topic clearly.*

---

hypocalcaemia *(noun)*

Abnormally low level of calcium in the blood; associated with hypoparathyroidism or kidney malfunction or vitamin D deficiency.

- *He looked up "hypocalcaemia" because he had never seen it before.*
- *She wrote a short paragraph that included "hypocalcaemia."*

---

hypocapnia *(noun)*

A state in which the level of carbon dioxide in the blood is lower than normal; can result from deep or rapid breathing.

- *In class, the teacher used "hypocapnia" to mean a state in which the level of carbon dioxide in the....*
- *They discussed "hypocapnia" during the group presentation.*

---

hypocellularity *(noun)*

The state of having abnormally few cells.

- *He looked up "hypocellularity" because he had never seen it before.*
- *In class, the teacher used "hypocellularity" to mean the state of having abnormally few cells.*

---

hypochondrium *(noun)*

The upper region of the abdomen just below the lowest ribs on either side of the epigastrium.

- *She wrote a short paragraph that included "hypochondrium."*
- *The article explained what "hypochondrium" means with a simple example.*

---

hypoderma *(noun)*

In some classifications considered the type genus of the family Hypodermatidae: warble flies.

- *The article explained what "hypoderma" means with a simple example.*
- *In class, the teacher used "hypoderma" to mean in some classifications considered the type genus....*

---

hypodermatidae *(noun)*

Warble flies.

- *In class, the teacher used "hypodermatidae" to mean warble flies.*
- *They discussed "hypodermatidae" during the group presentation.*

---

hypoesthesia *(noun)*

Impairment of tactile sensitivity; decrease of sensitivity.

- *In class, the teacher used "hypoesthesia" to mean impairment of tactile sensitivity; decrease of....*
- *He looked up "hypoesthesia" because he had never seen it before.*

---

hypolipoproteinemia *(noun)*

Any of various disorders of lipoprotein and cholesterol metabolism that result in low levels of lipoprotein and cholesterol in the circulating blood.

- *She wrote a short paragraph that included "hypolipoproteinemia."*
- *He looked up "hypolipoproteinemia" because he had never seen it before.*

---

hypopachus *(noun)*

Sheep frogs.

- *In class, the teacher used "hypopachus" to mean sheep frogs.*
- *He looked up "hypopachus" because he had never seen it before.*

---

hypophyseal stalk *(noun)*

The funnel-shaped stalk connecting the pituitary gland to the hypothalamus.

- *They discussed "hypophyseal stalk" during the group presentation.*
- *He looked up "hypophyseal stalk" because he had never seen it before.*

---

hypophysectomised *(adjective)*

Having the pituitary gland removed by surgery.

- *The speaker chose "hypophysectomised" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "hypophysectomised."*

---

hypophysectomized *(adjective)*

Having the pituitary gland removed by surgery.

- *Hypophysectomized tadpoles.*
- *Students compared "hypophysectomized" with similar adjectives in the lesson.*

hypoproteinemia *(noun)*

Abnormally low level of protein in the blood; can indicate inadequate diet or intestinal or renal disorders.

- *The article explained what "hypoproteinemia" means with a simple example.*
- *In class, the teacher used "hypoproteinemia" to mean abnormally low level of protein in the blood; can....*

hyposmia *(noun)*

Lessened sensitivity to odors.

- *He looked up "hyposmia" because he had never seen it before.*
- *Understanding "hyposmia" helps you talk about this topic clearly.*

hypothrombinemia *(noun)*

A low level of prothrombin (factor II) in the circulating blood; results in long clotting time and poor clot formation and sometimes excessive bleeding; can result from vitamin K deficiency.

- *They discussed "hypothrombinemia" during the group presentation.*
- *Understanding "hypothrombinemia" helps you talk about this topic clearly.*

hypotonicity *(noun)*

(of muscular tissue) the state of being hypotonic.

- *They discussed "hypotonicity" during the group presentation.*
- *He looked up "hypotonicity" because he had never seen it before.*

hypotonus *(noun)*

(of muscular tissue) the state of being hypotonic.

- *The article explained what "hypotonus" means with a simple example.*
- *She wrote a short paragraph that included "hypotonus."*

hypovitaminosis *(noun)*

Any of several diseases caused by deficiency of one or more vitamins.

- *He looked up "hypovitaminosis" because he had never seen it before.*
- *Understanding "hypovitaminosis" helps you talk about this topic clearly.*

hypovolaemia *(noun)*

A blood disorder consisting of a decrease in the volume of circulating blood.

- *He looked up "hypovolaemia" because he had never seen it before.*
- *Understanding "hypovolaemia" helps you talk about this topic clearly.*

hypsiglena *(noun)*

Night snakes.

- *Understanding "hypsiglena" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "hypsiglena."*

hypsiglena torquata *(noun)*

Nocturnal prowler of western United States and Mexico.

- *The article explained what "hypsiglena torquata" means with a simple example.*
- *In class, the teacher used "hypsiglena torquata" to mean nocturnal prowler of western united states and mexico.*

hypsiprymnodon *(noun)*

Musk kangaroos.

- *She wrote a short paragraph that included "hypsiprymnodon."*
- *He looked up "hypsiprymnodon" because he had never seen it before.*

hypsiprymnodon moschatus *(noun)*

Small kangaroo of northeastern Australia.

- *Understanding "hypsiprymnodon moschatus" helps you talk about this topic clearly.*
- *In class, the teacher used "hypsiprymnodon moschatus" to mean small kangaroo of northeastern australia.*

hyracoidea *(noun)*

Hyraxes and some extinct animals.

- *They discussed "hyracoidea" during the group presentation.*
- *She wrote a short paragraph that included "hyracoidea."*

---

hyracotherium *(noun)*

Extinct horse genus; formerly called eohippus.

- *Understanding "hyracotherium" helps you talk about this topic clearly.*
- *They discussed "hyracotherium" during the group presentation.*

---

hysterocatalepsy *(noun)*

Hysteria with cataleptic symptoms.

- *Understanding "hysterocatalepsy" helps you talk about this topic clearly.*
- *The article explained what "hysterocatalepsy" means with a simple example.*

---

hystricidae *(noun)*

Old World porcupines.

- *She wrote a short paragraph that included "hystricidae."*
- *The article explained what "hystricidae" means with a simple example.*

---

hystricomorpha *(noun)*

An order of rodents including: porcupines; guinea pigs; chinchillas; etc.

- *Understanding "hystricomorpha" helps you talk about this topic clearly.*
- *They discussed "hystricomorpha" during the group presentation.*

---

ibero-mesornis *(noun)*

Sparrow-sized fossil bird of the Cretaceous period having a vestigial tail; found in Spain; considered possibly the third most primitive of all birds.

- *Understanding "ibero-mesornis" helps you talk about this topic clearly.*
- *He looked up "ibero-mesornis" because he had never seen it before.*

---

ibizan podenco *(noun)*

Breed of slender agile medium-sized hound found chiefly in the Balearic Islands; said to have been bred originally by the Pharaohs of ancient Egypt.

- *The article explained what "ibizan podenco" means with a simple example.*
- *Understanding "ibizan podenco" helps you talk about this topic clearly.*

---

ichthyosauria *(noun)*

Extinct marine reptiles: ichthyosaurs.

- *She wrote a short paragraph that included "ichthyosauria."*
- *He looked up "ichthyosauria" because he had never seen it before.*

---

ichthyosauridae *(noun)*

Later ichthyosaurs of the Jurassic and Cretaceous; widely distributed in both hemispheres.

- *He looked up "ichthyosauridae" because he had never seen it before.*
- *They discussed "ichthyosauridae" during the group presentation.*

---

ichyostega *(noun)*

Early tetrapod amphibian found in Greenland.

- *He looked up "ichyostega" because he had never seen it before.*
- *In class, the teacher used "ichyostega" to mean early tetrapod amphibian found in greenland.*

---

icteria *(noun)*

New World chats.

- *They discussed "icteria" during the group presentation.*
- *Understanding "icteria" helps you talk about this topic clearly.*

---

icteria virens *(noun)*

American warbler noted for imitating songs of other birds.

- *He looked up "icteria virens" because he had never seen it before.*

- *In class, the teacher used "icteria virens" to mean american warbler noted for imitating songs of other....*

---

icteridae *(noun)*

American orioles; American blackbirds; bobolinks; meadowlarks.

- *Understanding "icteridae" helps you talk about this topic clearly.*
- *The article explained what "icteridae" means with a simple example.*

---

icterus galbula *(noun)*

A kind of New World oriole.

- *The article explained what "icterus galbula" means with a simple example.*
- *She wrote a short paragraph that included "icterus galbula."*

---

icterus galbula bullockii *(noun)*

Western subspecies of northern oriole.

- *The article explained what "icterus galbula bullockii" means with a simple example.*
- *She wrote a short paragraph that included "icterus galbula bullockii."*

---

icterus galbula galbula *(noun)*

Eastern subspecies of northern oriole.

- *She wrote a short paragraph that included "icterus galbula galbula."*
- *The article explained what "icterus galbula galbula" means with a simple example.*

---

icterus neonatorum *(noun)*

Yellowish appearance in newborn infants; usually subsides spontaneously.

- *They discussed "icterus neonatorum" during the group presentation.*
- *The article explained what "icterus neonatorum" means with a simple example.*

---

ictiobus *(noun)*

Buffalo fishes.

- *Understanding "ictiobus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ictiobus."*

---

ictiobus niger *(noun)*

Fish of the lower Mississippi.

- *The article explained what "ictiobus niger" means with a simple example.*
- *In class, the teacher used "ictiobus niger" to mean fish of the lower mississippi.*

---

ictodosauria *(noun)*

Extinct reptiles of the later Triassic period.

- *The article explained what "ictodosauria" means with a simple example.*
- *She wrote a short paragraph that included "ictodosauria."*

---

ictonyx *(noun)*

A genus of Mustelidae.

- *Understanding "ictonyx" helps you talk about this topic clearly.*
- *They discussed "ictonyx" during the group presentation.*

---

ictonyx frenata *(noun)*

Muishond of northern Africa.

- *The article explained what "ictonyx frenata" means with a simple example.*
- *In class, the teacher used "ictonyx frenata" to mean muishond of northern africa.*

---

ictonyx striata *(noun)*

Ferret-sized muishond often tamed.

- *Understanding "ictonyx striata" helps you talk about this topic clearly.*
- *He looked up "ictonyx striata" because he had never seen it before.*

---

idiopathy *(noun)*

Any disease arising from internal dysfunctions of unknown cause.

- *They discussed "idiopathy" during the group presentation.*
- *He looked up "idiopathy" because he had never seen it before.*

iguania *(noun)*

New World lizards.

- *Understanding "iguania" helps you talk about this topic clearly.*
- *He looked up "iguania" because he had never seen it before.*

iguanid *(noun)*

Lizards of the New World and Madagascar and some Pacific islands; typically having a long tail and bright throat patch in males.

- *They discussed "iguanid" during the group presentation.*
- *Understanding "iguanid" helps you talk about this topic clearly.*

iguanid lizard *(noun)*

Lizards of the New World and Madagascar and some Pacific islands; typically having a long tail and bright throat patch in males.

- *They discussed "iguanid lizard" during the group presentation.*
- *The article explained what "iguanid lizard" means with a simple example.*

iguanidae *(noun)*

New World lizards.

- *They discussed "iguanidae" during the group presentation.*
- *The article explained what "iguanidae" means with a simple example.*

ileitis *(noun)*

Inflammation of the ileum.

- *They discussed "ileitis" during the group presentation.*
- *The article explained what "ileitis" means with a simple example.*

ileocolic artery *(noun)*

An artery that originates from the superior mesenteric artery and supplies the terminal part of the ileum and the cecum and the vermiform appendix and the ascending colon.

- *He looked up "ileocolic artery" because he had never seen it before.*
- *In class, the teacher used "ileocolic artery" to mean an artery that originates from the superior....*

ileocolic vein *(noun)*

A vein that drains the end of the ileum and the appendix and the cecum and the lower part of the ascending colon.

- *The article explained what "ileocolic vein" means with a simple example.*
- *Understanding "ileocolic vein" helps you talk about this topic clearly.*

iliolumbar artery *(noun)*

An artery that originates in the internal iliac artery and supplies the pelvic muscles and bones.

- *The article explained what "iliolumbar artery" means with a simple example.*
- *She wrote a short paragraph that included "iliolumbar artery."*

iliolumbar vein *(noun)*

A branch of the internal iliac vein.

- *Understanding "iliolumbar vein" helps you talk about this topic clearly.*
- *The article explained what "iliolumbar vein" means with a simple example.*

immaculateness *(noun)*

The state of being spotlessly clean.

- *They discussed "immaculateness" during the group presentation.*
- *She wrote a short paragraph that included "immaculateness."*

immanency *(noun)*

The state of being within or not going beyond a given domain.

- *She wrote a short paragraph that included "immanency."*
- *Understanding "immanency" helps you talk about this topic clearly.*

---

immatureness *(noun)*

Not having reached maturity.

- *She wrote a short paragraph that included "immatureness."*
- *They discussed "immatureness" during the group presentation.*

---

imminency *(noun)*

The state of being imminent and liable to happen soon.

- *The article explained what "imminency" means with a simple example.*
- *In class, the teacher used "imminency" to mean the state of being imminent and liable to happen soon.*

---

imminentness *(noun)*

The state of being imminent and liable to happen soon.

- *He looked up "imminentness" because he had never seen it before.*
- *They discussed "imminentness" during the group presentation.*

---

immunocompetence *(noun)*

The ability to develop an immune response following exposure to an antigen.

- *He looked up "immunocompetence" because he had never seen it before.*
- *She wrote a short paragraph that included "immunocompetence."*

---

immurement *(noun)*

The state of being imprisoned.

- *He practiced the immurement of his enemies in the castle dungeon.*
- *They discussed "immurement" during the group presentation.*

---

impeachability *(noun)*

The state of being liable to impeachment.

- *She wrote a short paragraph that included "impeachability."*
- *The article explained what "impeachability" means with a simple example.*

---

impecuniousness *(noun)*

A state of lacking money.

- *He looked up "impecuniousness" because he had never seen it before.*
- *In class, the teacher used "impecuniousness" to mean a state of lacking money.*

---

impendence *(noun)*

The state of being imminent and liable to happen soon.

- *He looked up "impendence" because he had never seen it before.*
- *She wrote a short paragraph that included "impendence."*

---

impendency *(noun)*

The state of being imminent and liable to happen soon.

- *In class, the teacher used "impendency" to mean the state of being imminent and liable to happen soon.*
- *They discussed "impendency" during the group presentation.*

---

imperativeness *(noun)*

The state of demanding notice or attention.

- *She wrote a short paragraph that included "imperativeness."*
- *They discussed "imperativeness" during the group presentation.*

---

imperfectness *(noun)*

The state or an instance of being imperfect.

- *Understanding "imperfectness" helps you talk about this topic clearly.*
- *In class, the teacher used "imperfectness" to mean the state or an instance of being imperfect.*

impossibleness *(noun)*

Incapability of existing or occurring.

- *Understanding "impossibleness" helps you talk about this topic clearly.*
- *In class, the teacher used "impossibleness" to mean incapability of existing or occurring.*

impureness *(noun)*

The condition of being impure.

- *She wrote a short paragraph that included "impureness."*
- *They discussed "impureness" during the group presentation.*

inachis *(noun)*

A genus of Nymphalidae.

- *The article explained what "inachis" means with a simple example.*
- *They discussed "inachis" during the group presentation.*

inachis io *(noun)*

European butterfly having reddish-brown wings each marked with a purple eyespot.

- *They discussed "inachis io" during the group presentation.*
- *In class, the teacher used "inachis io" to mean european butterfly having reddish-brown wings each....*

inclemency *(noun)*

Weather unsuitable for outdoor activities.

- *She wrote a short paragraph that included "inclemency."*
- *He looked up "inclemency" because he had never seen it before.*

inclementness *(noun)*

Weather unsuitable for outdoor activities.

- *Understanding "inclementness" helps you talk about this topic clearly.*
- *In class, the teacher used "inclementness" to mean weather unsuitable for outdoor activities.*

incommodiousness *(noun)*

An inconvenient discomfort.

- *The article explained what "incommodiousness" means with a simple example.*
- *Understanding "incommodiousness" helps you talk about this topic clearly.*

inconceivability *(noun)*

The state of being impossible to conceive.

- *He looked up "inconceivability" because he had never seen it before.*
- *She wrote a short paragraph that included "inconceivability."*

inconceivableness *(noun)*

The state of being impossible to conceive.

- *The article explained what "inconceivableness" means with a simple example.*
- *Understanding "inconceivableness" helps you talk about this topic clearly.*

inculpability *(noun)*

A state of innocence.

- *The article explained what "inculpability" means with a simple example.*
- *In class, the teacher used "inculpability" to mean a state of innocence.*

inculpableness *(noun)*

A state of innocence.

- *Understanding "inculpableness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "inculpableness."*

indicatoridae *(noun)*

Honey guides.

- *He looked up "indicatoridae" because he had never seen it before.*
- *She wrote a short paragraph that included "indicatoridae."*

---

indictability *(noun)*

The state of being liable to impeachment.

- *They discussed "indictability" during the group presentation.*
- *The article explained what "indictability" means with a simple example.*

---

indispose *(verb)*

Cause to feel unwell.

- *She was indisposed.*
- *She tried to use "indispose" carefully so everyone would understand.*

---

indri brevicaudatus *(noun)*

Large short-tailed lemur of Madagascar having thick silky fur in black and white and fawn.

- *He looked up "indri brevicaudatus" because he had never seen it before.*
- *She wrote a short paragraph that included "indri brevicaudatus."*

---

indriidae *(noun)*

A family of Lemuroidea.

- *She wrote a short paragraph that included "indriidae."*
- *The article explained what "indriidae" means with a simple example.*

---

indris *(noun)*

Large short-tailed lemur of Madagascar having thick silky fur in black and white and fawn.

- *She wrote a short paragraph that included "indris."*
- *They discussed "indris" during the group presentation.*

---

infantile amaurotic idiocy *(noun)*

A hereditary disorder of lipid metabolism occurring most frequently in individuals of Jewish descent in eastern Europe; accumulation of lipids in nervous tissue results in death in early childhood.

- *Understanding "infantile amaurotic idiocy" helps you talk about this topic clearly.*
- *He looked up "infantile amaurotic idiocy" because he had never seen it before.*

---

infectious polyneuritis *(noun)*

A form of peripheral polyneuritis characterized by pain and weakness and sometimes paralysis of the limbs; cause is unknown.

- *In class, the teacher used "infectious polyneuritis" to mean a form of peripheral polyneuritis characterized by....*
- *They discussed "infectious polyneuritis" during the group presentation.*

---

inferior thalamostriate vein *(noun)*

Tributaries to the basal vein.

- *He looked up "inferior thalamostriate vein" because he had never seen it before.*
- *They discussed "inferior thalamostriate vein" during the group presentation.*

---

infusorian *(noun)*

Any member of the subclass Infusoria.

- *In class, the teacher used "infusorian" to mean any member of the subclass infusoria.*
- *The article explained what "infusorian" means with a simple example.*

---

inguen *(noun)*

The crease at the junction of the inner part of the thigh with the trunk together with the adjacent region and often including the external genitals.

- *He looked up "inguen" because he had never seen it before.*
- *They discussed "inguen" during the group presentation.*

---

inherency *(noun)*

The state of inhering; the state of being a fixed characteristic.

- *They discussed "inherency" during the group presentation.*

- *The article explained what "inherency" means with a simple example.*

inmarriage *(noun)*

Marriage within one's own tribe or group as required by custom or law.

- *They discussed "inmarriage" during the group presentation.*
- *The article explained what "inmarriage" means with a simple example.*

inoculator *(noun)*

A medical practitioner who inoculates people against diseases.

- *Understanding "inoculator" helps you talk about this topic clearly.*
- *The article explained what "inoculator" means with a simple example.*

inosculation *(noun)*

A natural or surgical joining of parts or branches of tubular structures so as to make or become continuous.

- *Understanding "inosculation" helps you talk about this topic clearly.*
- *He looked up "inosculation" because he had never seen it before.*

insaneness *(noun)*

Obsolete terms for legal insanity.

- *They discussed "insaneness" during the group presentation.*
- *She wrote a short paragraph that included "insaneness."*

insectivora *(noun)*

Shrews; moles; hedgehogs; tenrecs.

- *The article explained what "insectivora" means with a simple example.*
- *In class, the teacher used "insectivora" to mean shrews; moles; hedgehogs; tenrecs.*

insessores *(noun)*

A bird with feet adapted for perching (as on tree branches); this order is now generally abandoned by taxonomists.

- *He looked up "insessores" because he had never seen it before.*
- *In class, the teacher used "insessores" to mean a bird with feet adapted for perching (as on tree....*

insistency *(noun)*

The state of demanding notice or attention.

- *They discussed "insistency" during the group presentation.*
- *Understanding "insistency" helps you talk about this topic clearly.*

insobriety *(noun)*

A temporary state resulting from excessive consumption of alcohol.

- *He looked up "insobriety" because he had never seen it before.*
- *They discussed "insobriety" during the group presentation.*

instillator *(noun)*

Medical apparatus that puts a liquid into a cavity drop by drop.

- *They discussed "instillator" during the group presentation.*
- *The article explained what "instillator" means with a simple example.*

insufflate *(verb)*

Treat by blowing a powder or vapor into a bodily cavity.

- *He did not know how to use "insufflate" until he saw an example.*
- *Learners should practice how to use "insufflate" in real sentences.*

insularism *(noun)*

The state of being isolated or detached.

- *The article explained what "insularism" means with a simple example.*
- *They discussed "insularism" during the group presentation.*

interbrain *(noun)*

The posterior division of the forebrain; connects the cerebral hemispheres with the mesencephalon.

- *Understanding "interbrain" helps you talk about this topic clearly.*
- *In class, the teacher used "interbrain" to mean the posterior division of the forebrain; connects....*

intercapitular vein *(noun)*

Veins connecting the dorsal and palmar veins of the hand or the dorsal and plantar veins of the foot.

- *The article explained what "intercapitular vein" means with a simple example.*
- *She wrote a short paragraph that included "intercapitular vein."*

intermaxillary suture *(noun)*

The suture between the two maxillae of the upper jawbone.

- *They discussed "intermaxillary suture" during the group presentation.*
- *Understanding "intermaxillary suture" helps you talk about this topic clearly.*

internasal suture *(noun)*

The suture between the two nasal bones.

- *The article explained what "internasal suture" means with a simple example.*
- *They discussed "internasal suture" during the group presentation.*

interoceptor *(noun)*

Any receptor that responds to stimuli inside the body.

- *Understanding "interoceptor" helps you talk about this topic clearly.*
- *In class, the teacher used "interoceptor" to mean any receptor that responds to stimuli inside the body.*

intracapsular surgery *(noun)*

Cataract surgery in which the entire lens is removed.

- *He looked up "intracapsular surgery" because he had never seen it before.*
- *She wrote a short paragraph that included "intracapsular surgery."*

intravasation *(noun)*

Entry of foreign matter into a blood vessel.

- *She wrote a short paragraph that included "intravasation."*
- *Understanding "intravasation" helps you talk about this topic clearly.*

inunct *(verb)*

Administer an oil or ointment to ; often in a religious ceremony of blessing.

- *In everyday English, people use "inunct" when talking about this idea.*
- *Can you use "inunct" in a sentence that fits this situation?*

invalidism *(noun)*

Chronic ill health.

- *He looked up "invalidism" because he had never seen it before.*
- *In class, the teacher used "invalidism" to mean chronic ill health.*

involutional depression *(noun)*

A major depressive episode associated with the climacteric.

- *Understanding "involutional depression" helps you talk about this topic clearly.*
- *They discussed "involutional depression" during the group presentation.*

iodise *(verb)*

Treat with iodine so as to prevent infection.

- *Can you use "iodise" in a sentence that fits this situation?*
- *In everyday English, people use "iodise" when talking about this idea.*

iodize *(verb)*

Treat with iodine so as to prevent infection.

- *Iodize a wound.*
- *Iodize salt.*

---

ipidae *(noun)*

Large family of bark-boring or wood-boring short-beaked beetles; very destructive to forest and fruit trees.

- *Understanding "ipidae" helps you talk about this topic clearly.*
- *In class, the teacher used "ipidae" to mean large family of bark-boring or wood-boring....*

---

irenidae *(noun)*

A family of birds of the suborder Oscines.

- *They discussed "irenidae" during the group presentation.*
- *In class, the teacher used "irenidae" to mean a family of birds of the suborder oscines.*

---

iridocyclitis *(noun)*

Inflammation of the iris and ciliary body of the eye.

- *They discussed "iridocyclitis" during the group presentation.*
- *In class, the teacher used "iridocyclitis" to mean inflammation of the iris and ciliary body of the eye.*

---

iridokeratitis *(noun)*

Inflammation of the iris and cornea of the eye.

- *They discussed "iridokeratitis" during the group presentation.*
- *He looked up "iridokeratitis" because he had never seen it before.*

---

iridoncus *(noun)*

Swelling of the iris of the eye.

- *He looked up "iridoncus" because he had never seen it before.*
- *They discussed "iridoncus" during the group presentation.*

---

iridoprocne *(noun)*

A genus of Hirundinidae.

- *In class, the teacher used "iridoprocne" to mean a genus of hirundinidae.*
- *He looked up "iridoprocne" because he had never seen it before.*

---

iridoprocne bicolor *(noun)*

Bluish-green-and-white North American swallow; nests in tree cavities.

- *He looked up "iridoprocne bicolor" because he had never seen it before.*
- *She wrote a short paragraph that included "iridoprocne bicolor."*

---

irreality *(noun)*

The state of being insubstantial or imaginary; not existing objectively or in fact.

- *The article explained what "irreality" means with a simple example.*
- *In class, the teacher used "irreality" to mean the state of being insubstantial or imaginary; not....*

---

ischigualastia *(noun)*

Early reptile found in Argentina.

- *She wrote a short paragraph that included "ischigualastia."*
- *He looked up "ischigualastia" because he had never seen it before.*

---

isogamete *(noun)*

Either of a pair of conjugating gametes of the same size and structure.

- *He looked up "isogamete" because he had never seen it before.*
- *She wrote a short paragraph that included "isogamete."*

---

isometropia *(noun)*

Equality of refractive power in the two eyes.

- *Understanding "isometropia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "isometropia."*

isospondyli *(noun)*

Most primitive teleost fishes; all are soft-finned: salmon; trout; herring; shad; sardines; anchovies; whitefish; smelts; tarpon.

- *She wrote a short paragraph that included "isospondyli."*
- *He looked up "isospondyli" because he had never seen it before.*

istiophoridae *(noun)*

Sailfishes; spearfishes; marlins.

- *He looked up "istiophoridae" because he had never seen it before.*
- *They discussed "istiophoridae" during the group presentation.*

istiophorus *(noun)*

Type genus of the Istiophoridae.

- *She wrote a short paragraph that included "istiophorus."*
- *He looked up "istiophorus" because he had never seen it before.*

istiophorus albicans *(noun)*

A kind of sailfish.

- *He looked up "istiophorus albicans" because he had never seen it before.*
- *They discussed "istiophorus albicans" during the group presentation.*

isuridae *(noun)*

In some classifications another name for the family Lamnidae.

- *Understanding "isuridae" helps you talk about this topic clearly.*
- *He looked up "isuridae" because he had never seen it before.*

isurus oxyrhincus *(noun)*

Very swift active bluish shark found worldwide in warm waters; important game fish.

- *She wrote a short paragraph that included "isurus oxyrhincus."*
- *Understanding "isurus oxyrhincus" helps you talk about this topic clearly.*

isurus paucus *(noun)*

Similar to shortfin mako but darker blue.

- *He looked up "isurus paucus" because he had never seen it before.*
- *In class, the teacher used "isurus paucus" to mean similar to shortfin mako but darker blue.*

itinerate *(verb)*

Travel from place to place, as for work.

- *He did not know how to use "itinerate" until he saw an example.*
- *In everyday English, people use "itinerate" when talking about this idea.*

ivorybill *(noun)*

Large black-and-white woodpecker of southern United States and Cuba having an ivory bill; nearly extinct.

- *He looked up "ivorybill" because he had never seen it before.*
- *She wrote a short paragraph that included "ivorybill."*

ixobrychus exilis *(noun)*

Small American bittern.

- *Understanding "ixobrychus exilis" helps you talk about this topic clearly.*
- *In class, the teacher used "ixobrychus exilis" to mean small american bittern.*

ixodes dammini *(noun)*

A northeastern tick now recognized as same species as Ixodes scapularis.

- *The article explained what "ixodes dammini" means with a simple example.*
- *In class, the teacher used "ixodes dammini" to mean a northeastern tick now recognized as same species....*

ixodes neotomae *(noun)*

A tick that usually does not bite humans; transmits Lyme disease spirochete to dusky-footed wood rats.

- *He looked up “ixodes neotomae” because he had never seen it before.*
- *She wrote a short paragraph that included “ixodes neotomae.”*

---

ixodes persulcatus *(noun)*

Bites humans; a vector for Lyme disease spirochete.

- *They discussed “ixodes persulcatus” during the group presentation.*
- *The article explained what “ixodes persulcatus” means with a simple example.*

---

ixodes spinipalpis *(noun)*

Usually does not bite humans; transmits Lyme disease spirochete to cottontail rabbits and wood rats.

- *Understanding “ixodes spinipalpis” helps you talk about this topic clearly.*
- *In class, the teacher used “ixodes spinipalpis” to mean usually does not bite humans; transmits lyme....*

---

ixodid *(noun)*

Ticks having a hard shield on the back and mouth parts that project from the head.

- *They discussed “ixodid” during the group presentation.*
- *He looked up “ixodid” because he had never seen it before.*

---

jabiru mycteria *(noun)*

Large white stork of warm regions of the world especially America.

- *She wrote a short paragraph that included “jabiru mycteria.”*
- *Understanding “jabiru mycteria” helps you talk about this topic clearly.*

---

jacamar *(noun)*

Tropical American insectivorous bird having a long sharp bill and iridescent green or bronze plumage.

- *They discussed “jacamar” during the group presentation.*
- *She wrote a short paragraph that included “jacamar.”*

---

jacksmelt *(noun)*

A relatively large silversides of the Pacific coast of North America (known to reach 18 inches in length).

- *He looked up “jacksmelt” because he had never seen it before.*
- *She wrote a short paragraph that included “jacksmelt.”*

---

jacksnipe *(noun)*

A small short-billed Old World snipe.

- *He looked up “jacksnipe” because he had never seen it before.*
- *In class, the teacher used “jacksnipe” to mean a small short-billed old world snipe.*

---

jacquemier’s sign *(noun)*

A purplish discoloration of the mucous membrane of the vagina that occurs early in pregnancy.

- *She wrote a short paragraph that included “jacquemier’s sign.”*
- *Understanding “jacquemier’s sign” helps you talk about this topic clearly.*

---

jactitate *(verb)*

Move or stir about violently.

- *He did not know how to use “jactitate” until he saw an example.*
- *Learners should practice how to use “jactitate” in real sentences.*

---

jaculus jaculus *(noun)*

A variety of jerboa.

- *Understanding “jaculus jaculus” helps you talk about this topic clearly.*
- *In class, the teacher used “jaculus jaculus” to mean a variety of jerboa.*

---

jaguarondi *(noun)*

Long-bodied long-tailed tropical American wildcat.

- *He looked up “jaguarondi” because he had never seen it before.*

- *She wrote a short paragraph that included "jaguarondi."*

---

jaguarundi *(noun)*

Long-bodied long-tailed tropical American wildcat.

- *He looked up "jaguarundi" because he had never seen it before.*
- *They discussed "jaguarundi" during the group presentation.*

---

jaguarundi cat *(noun)*

Long-bodied long-tailed tropical American wildcat.

- *In class, the teacher used "jaguarundi cat" to mean long-bodied long-tailed tropical american wildcat.*
- *Understanding "jaguarundi cat" helps you talk about this topic clearly.*

---

jassid *(noun)*

A variety of leafhopper.

- *Understanding "jassid" helps you talk about this topic clearly.*
- *The article explained what "jassid" means with a simple example.*

---

jassidae *(noun)*

Family of small leafhoppers coextensive with the Cicadellidae and not distinguished from it in some classifications.

- *Understanding "jassidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "jassidae."*

---

javanthropus *(noun)*

Former genus of primitive man; now Homo soloensis: comprises Solo man.

- *The article explained what "javanthropus" means with a simple example.*
- *She wrote a short paragraph that included "javanthropus."*

---

jawfish *(noun)*

Small large-mouthed tropical marine fishes common along sandy bottoms; males brood egg balls in their mouths; popular aquarium fishes.

- *He looked up "jawfish" because he had never seen it before.*
- *She wrote a short paragraph that included "jawfish."*

---

jejunitis *(noun)*

Inflammation of the jejunum of the small intestine.

- *The article explained what "jejunitis" means with a simple example.*
- *In class, the teacher used "jejunitis" to mean inflammation of the jejunum of the small intestine.*

---

jejunoileitis *(noun)*

Inflammation of the jejunum and the ileum of the small intestine.

- *Understanding "jejunoileitis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "jejunoileitis."*

---

jird *(noun)*

Gerbil of northern Africa.

- *They discussed "jird" during the group presentation.*
- *The article explained what "jird" means with a simple example.*

---

jointworm *(noun)*

Larva of chalcid flies injurious to the straw of wheat and other grains.

- *They discussed "jointworm" during the group presentation.*
- *He looked up "jointworm" because he had never seen it before.*

---

jordanella floridae *(noun)*

A fish with a dark-blue back and whitish sides with red stripes; found in swamps and streams of Florida.

- *Understanding "jordanella floridae" helps you talk about this topic clearly.*
- *They discussed "jordanella floridae" during the group presentation.*

---

jugale *(noun)*

The craniometric point at the union of the frontal and temporal processes of the zygomatic bone.

- *Understanding "jugale" helps you talk about this topic clearly.*
- *They discussed "jugale" during the group presentation.*

jument *(noun)*

An animal such as a donkey or ox or elephant used for transporting loads or doing other heavy work.

- *They discussed "jument" during the group presentation.*
- *She wrote a short paragraph that included "jument."*

jumping bristletail *(noun)*

Wingless insect living in dark moist places as under dead tree trunks; they make erratic leaps when disturbed.

- *The article explained what "jumping bristletail" means with a simple example.*
- *She wrote a short paragraph that included "jumping bristletail."*

junketeer *(verb)*

Go on a pleasure trip.

- *Can you use "junketeer" in a sentence that fits this situation?*
- *The coach explained when to use "junketeer" and when to wait.*

juvenile amaurotic idiocy *(noun)*

A congenital progressive disorder of lipid metabolism having an onset at age 5 and characterized by blindness and dementia and early death.

- *He looked up "juvenile amaurotic idiocy" because he had never seen it before.*
- *They discussed "juvenile amaurotic idiocy" during the group presentation.*

kafocin *(noun)*

Antibiotic related to cephalosporin but no longer in common use.

- *They discussed "kafocin" during the group presentation.*
- *He looked up "kafocin" because he had never seen it before.*

kakatoe *(noun)*

A genus of Psittacidae.

- *He looked up "kakatoe" because he had never seen it before.*
- *They discussed "kakatoe" during the group presentation.*

kakatoe galerita *(noun)*

White cockatoo with a yellow erectile crest.

- *She wrote a short paragraph that included "kakatoe galerita."*
- *They discussed "kakatoe galerita" during the group presentation.*

kakatoe leadbeateri *(noun)*

White Australian cockatoo with roseate tinged plumage.

- *He looked up "kakatoe leadbeateri" because he had never seen it before.*
- *They discussed "kakatoe leadbeateri" during the group presentation.*

kakke disease *(noun)*

The endemic form of beriberi.

- *She wrote a short paragraph that included "kakke disease."*
- *He looked up "kakke disease" because he had never seen it before.*

kalemia *(noun)*

The presence of excess potassium in the circulating blood.

- *He looked up "kalemia" because he had never seen it before.*
- *Understanding "kalemia" helps you talk about this topic clearly.*

kaliuresis *(noun)*

The presence of excess potassium in the urine.

- *He looked up “kaliuresis” because he had never seen it before.*
- *Understanding “kaliuresis” helps you talk about this topic clearly.*

---

kallman’s syndrome *(noun)*

Hypogonadism with anosmia; a congenital sexual disorder that prevents the testicles from maturing at puberty.

- *The article explained what “kallman’s syndrome” means with a simple example.*
- *Understanding “kallman’s syndrome” helps you talk about this topic clearly.*

---

kalotermes *(noun)*

Type genus of Kalotermitidae; termites destructive of wood and living trees.

- *They discussed “kalotermes” during the group presentation.*
- *She wrote a short paragraph that included “kalotermes.”*

---

kalotermitidae *(noun)*

Primitive termites of warm regions.

- *They discussed “kalotermitidae” during the group presentation.*
- *Understanding “kalotermitidae” helps you talk about this topic clearly.*

---

kaluresis *(noun)*

The presence of excess potassium in the urine.

- *She wrote a short paragraph that included “kaluresis.”*
- *They discussed “kaluresis” during the group presentation.*

---

kamchatkan sea eagle *(noun)*

Found on coasts of the northwestern Pacific.

- *He looked up “kamchatkan sea eagle” because he had never seen it before.*
- *She wrote a short paragraph that included “kamchatkan sea eagle.”*

---

kanchil *(noun)*

Small chevrotain of southeastern Asia.

- *He looked up “kanchil” because he had never seen it before.*
- *She wrote a short paragraph that included “kanchil.”*

---

kaposi’s varicelliform eruption *(noun)*

A now rare complication of vaccinia superimposed on atopic dermatitis with high fever and generalized vesicles and papulovesicles.

- *He looked up “kaposi’s varicelliform eruption” because he had never seen it before.*
- *In class, the teacher used “kaposi’s varicelliform eruption” to mean a now rare complication of vaccinia superimposed on....*

---

karyolymph *(noun)*

A clear liquid in the cell nucleus in which the nucleolus and chromatin and other structures are dispersed.

- *In class, the teacher used “karyolymph” to mean a clear liquid in the cell nucleus in which the....*
- *The article explained what “karyolymph” means with a simple example.*

---

karyon *(noun)*

A part of the cell containing DNA and RNA and responsible for growth and reproduction.

- *In class, the teacher used “karyon” to mean a part of the cell containing dna and rna and....*
- *Understanding “karyon” helps you talk about this topic clearly.*

---

karyoplasm *(noun)*

The protoplasm that constitutes the nucleus of a cell.

- *They discussed “karyoplasm” during the group presentation.*
- *He looked up “karyoplasm” because he had never seen it before.*

---

katsuwonidae *(noun)*

In some classifications considered a separate family comprising the oceanic bonitos.

- *They discussed “katsuwonidae” during the group presentation.*
- *The article explained what “katsuwonidae” means with a simple example.*

katsuwonus *(noun)*

Oceanic bonitos; in some classifications placed in its own family Katsuwonidae.

- *Understanding "katsuwonus" helps you talk about this topic clearly.*
- *He looked up "katsuwonus" because he had never seen it before.*

katsuwonus pelamis *(noun)*

Fish whose flesh is dried and flaked for Japanese cookery; may be same species as skipjack tuna.

- *She wrote a short paragraph that included "katsuwonus pelamis."*
- *He looked up "katsuwonus pelamis" because he had never seen it before.*

kelp greenling *(noun)*

Common food and sport fish of western coast of North America.

- *They discussed "kelp greenling" during the group presentation.*
- *The article explained what "kelp greenling" means with a simple example.*

kenyapithecus *(noun)*

Extinct primate having powerful chewing muscles along with large molars and small incisors; fossils found in Kenya.

- *She wrote a short paragraph that included "kenyapithecus."*
- *He looked up "kenyapithecus" because he had never seen it before.*

keratalgia *(noun)*

Pain in the cornea.

- *She wrote a short paragraph that included "keratalgia."*
- *He looked up "keratalgia" because he had never seen it before.*

keratectasia *(noun)*

Abnormal bulging of the cornea of the eye.

- *They discussed "keratectasia" during the group presentation.*
- *The article explained what "keratectasia" means with a simple example.*

keratoacanthoma *(noun)*

Skin tumor that grows rapidly (especially in older people) and resembles a carcinoma but does not spread; it usually disappears spontaneously, often leaving a scar.

- *Understanding "keratoacanthoma" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "keratoacanthoma."*

keratocele *(noun)*

Hernia of the cornea.

- *They discussed "keratocele" during the group presentation.*
- *The article explained what "keratocele" means with a simple example.*

keratoderma *(noun)*

Any skin disorder consisting of a growth that appears horny.

- *The article explained what "keratoderma" means with a simple example.*
- *She wrote a short paragraph that included "keratoderma."*

keratoderma blennorrhagica *(noun)*

Skin disease characterized by a scaly rash on the palms and soles; associated with Reiter's syndrome.

- *In class, the teacher used "keratoderma blennorrhagica" to mean skin disease characterized by a scaly rash on the....*
- *Understanding "keratoderma blennorrhagica" helps you talk about this topic clearly.*

keratodermia *(noun)*

Any skin disorder consisting of a growth that appears horny.

- *In class, the teacher used "keratodermia" to mean any skin disorder consisting of a growth that....*
- *He looked up "keratodermia" because he had never seen it before.*

keratoiritis *(noun)*

Inflammation of the cornea and the iris of the eye.

- *He looked up "keratoiritis" because he had never seen it before.*
- *They discussed "keratoiritis" during the group presentation.*

---

keratomalacia *(noun)*

Softening and drying and ulceration of the cornea resulting from vitamin A deficiency; symptom of cystic fibrosis or sprue.

- *Understanding "keratomalacia" helps you talk about this topic clearly.*
- *The article explained what "keratomalacia" means with a simple example.*

---

keratomycosis *(noun)*

Fungal infection of the cornea.

- *They discussed "keratomycosis" during the group presentation.*
- *He looked up "keratomycosis" because he had never seen it before.*

---

keratonosis *(noun)*

Any abnormal condition of the outer skin (epidermis).

- *Understanding "keratonosis" helps you talk about this topic clearly.*
- *They discussed "keratonosis" during the group presentation.*

---

keratonosus *(noun)*

Any disease of the cornea.

- *Understanding "keratonosus" helps you talk about this topic clearly.*
- *He looked up "keratonosus" because he had never seen it before.*

---

keratoscleritis *(noun)*

Inflammation of the cornea and sclera of the eye.

- *He looked up "keratoscleritis" because he had never seen it before.*
- *Understanding "keratoscleritis" helps you talk about this topic clearly.*

---

keratoscope *(noun)*

Medical instrument to examine the cornea in order to detect irregularities in its anterior surface.

- *Understanding "keratoscope" helps you talk about this topic clearly.*
- *He looked up "keratoscope" because he had never seen it before.*

---

keratosis blennorrhagica *(noun)*

Skin disease characterized by a scaly rash on the palms and soles; associated with Reiter's syndrome.

- *In class, the teacher used "keratosis blennorrhagica" to mean skin disease characterized by a scaly rash on the....*
- *The article explained what "keratosis blennorrhagica" means with a simple example.*

---

keratosis follicularis *(noun)*

A rare hereditary condition marked by dark crusted patches (sometimes containing pus).

- *He looked up "keratosis follicularis" because he had never seen it before.*
- *In class, the teacher used "keratosis follicularis" to mean a rare hereditary condition marked by dark crusted....*

---

kerion *(noun)*

Ringworm infection of the hair follicles of the scalp and beard that usually results in a swelling that is covered with pustules and oozes fluid.

- *In class, the teacher used "kerion" to mean ringworm infection of the hair follicles of the....*
- *They discussed "kerion" during the group presentation.*

---

kernig's sign *(noun)*

Symptom of meningitis; patient cannot extend the leg at the knee when the thigh is flexed because of stiffness in the hamstrings.

- *They discussed "kernig's sign" during the group presentation.*
- *She wrote a short paragraph that included "kernig's sign."*

---

ketoaciduria *(noun)*

Excessive amounts of ketone bodies in the urine as in diabetes mellitus or starvation.

- *The article explained what "ketoaciduria" means with a simple example.*

- *In class, the teacher used "ketoaciduria" to mean excessive amounts of ketone bodies in the urine as....*

---

ketonemia *(noun)*

An abnormal increase of ketone bodies in the blood as in diabetes mellitus.

- *The article explained what "ketonemia" means with a simple example.*
- *She wrote a short paragraph that included "ketonemia."*

---

ketonuria *(noun)*

Excessive amounts of ketone bodies in the urine as in diabetes mellitus or starvation.

- *In class, the teacher used "ketonuria" to mean excessive amounts of ketone bodies in the urine as....*
- *They discussed "ketonuria" during the group presentation.*

---

kildeer *(noun)*

American plover of inland waters and fields having a distinctive cry.

- *He looked up "kildeer" because he had never seen it before.*
- *They discussed "kildeer" during the group presentation.*

---

kinetosis *(noun)*

The state of being dizzy or nauseated because of the motions that occur while traveling in or on a moving vehicle.

- *She wrote a short paragraph that included "kinetosis."*
- *He looked up "kinetosis" because he had never seen it before.*

---

kingdom monera *(noun)*

Prokaryotic bacteria and blue-green algae and various primitive pathogens; because of lack of consensus on how to divide the organisms into phyla informal names are used for the major divisions.

- *The article explained what "kingdom monera" means with a simple example.*
- *In class, the teacher used "kingdom monera" to mean prokaryotic bacteria and blue-green algae and....*

---

kingdom prokaryotae *(noun)*

Prokaryotic bacteria and blue-green algae and various primitive pathogens; because of lack of consensus on how to divide the organisms into phyla informal names are used for the major divisions.

- *He looked up "kingdom prokaryotae" because he had never seen it before.*
- *She wrote a short paragraph that included "kingdom prokaryotae."*

---

kinosternidae *(noun)*

Mud turtles; musk turtles.

- *In class, the teacher used "kinosternidae" to mean mud turtles; musk turtles.*
- *He looked up "kinosternidae" because he had never seen it before.*

---

kinosternon *(noun)*

Type genus of the Kinosternidae.

- *He looked up "kinosternon" because he had never seen it before.*
- *She wrote a short paragraph that included "kinosternon."*

---

kneepan *(noun)*

A small flat triangular bone in front of the knee that protects the knee joint.

- *In class, the teacher used "kneepan" to mean a small flat triangular bone in front of the knee....*
- *They discussed "kneepan" during the group presentation.*

---

kogia *(noun)*

Pygmy sperm whales.

- *She wrote a short paragraph that included "kogia."*
- *He looked up "kogia" because he had never seen it before.*

---

kogia breviceps *(noun)*

Small sperm whale of warm waters of both coasts of North America.

- *In class, the teacher used "kogia breviceps" to mean small sperm whale of warm waters of both coasts of....*
- *They discussed "kogia breviceps" during the group presentation.*

---

kogia simus *(noun)*

Very small (to 8 feet) sperm whale of central coasts of Atlantic and Pacific.

- *In class, the teacher used "kogia simus" to mean very small (to 8 feet) sperm whale of central....*
- *The article explained what "kogia simus" means with a simple example.*

---

koodoo *(noun)*

Either of two spiral-horned antelopes of the African bush.

- *The article explained what "koodoo" means with a simple example.*
- *In class, the teacher used "koodoo" to mean either of two spiral-horned antelopes of the....*

---

koplik's spots *(noun)*

Small red spots with white centers found on the mucous membranes of the mouth and tongue; symptom of measles that appears one or two days before the measles rash appears.

- *She wrote a short paragraph that included "koplik's spots."*
- *He looked up "koplik's spots" because he had never seen it before.*

---

korsakoff's psychosis *(noun)*

Dementia observed during the last stages of severe chronic alcoholism; involves loss of memory for recent events although long term memory is intact.

- *She wrote a short paragraph that included "korsakoff's psychosis."*
- *They discussed "korsakoff's psychosis" during the group presentation.*

---

korsakoff's syndrome *(noun)*

Dementia observed during the last stages of severe chronic alcoholism; involves loss of memory for recent events although long term memory is intact.

- *They discussed "korsakoff's syndrome" during the group presentation.*
- *In class, the teacher used "korsakoff's syndrome" to mean dementia observed during the last stages of severe....*

---

koudou *(noun)*

Either of two spiral-horned antelopes of the African bush.

- *The article explained what "koudou" means with a simple example.*
- *Understanding "koudou" helps you talk about this topic clearly.*

---

kraurosis *(noun)*

Atrophy and shriveling of the skin or mucous membrane.

- *They discussed "kraurosis" during the group presentation.*
- *The article explained what "kraurosis" means with a simple example.*

---

kraurosis vulvae *(noun)*

Kraurosis of the vulva; often a precancerous lesion.

- *In class, the teacher used "kraurosis vulvae" to mean kraurosis of the vulva; often a precancerous lesion.*
- *The article explained what "kraurosis vulvae" means with a simple example.*

---

krypterophaneron *(noun)*

A genus of fish in the family Anomalopidae.

- *The article explained what "krypterophaneron" means with a simple example.*
- *They discussed "krypterophaneron" during the group presentation.*

---

kupffer's cell *(noun)*

Specialized cells in the liver that destroy bacteria, foreign proteins, and worn-out blood cells.

- *She wrote a short paragraph that included "kupffer's cell."*
- *The article explained what "kupffer's cell" means with a simple example.*

---

kuvasz *(noun)*

Long-established Hungarian breed of tall light-footed but sturdy white dog; used also as a hunting dog.

- *He looked up "kuvasz" because he had never seen it before.*
- *They discussed "kuvasz" during the group presentation.*

---

kyphosus *(noun)*

Type genus of the Kyphosidae.

- *Understanding "kyphosus" helps you talk about this topic clearly.*
- *They discussed "kyphosus" during the group presentation.*

---

kyphosus sectatrix *(noun)*

Food and game fish around Bermuda and Florida; often follow ships.

- *The article explained what "kyphosus sectatrix" means with a simple example.*
- *She wrote a short paragraph that included "kyphosus sectatrix."*

---

labrocyte *(noun)*

A large connective tissue cell that contains histamine and heparin and serotonin which are released in allergic reactions or in response to injury or inflammation.

- *They discussed "labrocyte" during the group presentation.*
- *The article explained what "labrocyte" means with a simple example.*

---

labyrinthodont *(noun)*

An amphibian of the superorder Labyrinthodontia.

- *The article explained what "labyrinthodont" means with a simple example.*
- *In class, the teacher used "labyrinthodont" to mean an amphibian of the superorder labyrinthodontia.*

---

labyrinthodonta *(noun)*

Extinct amphibians typically resembling heavy-bodied salamanders or crocodiles and having a solid flattened skull and conical teeth; Devonian through Triassic.

- *He looked up "labyrinthodonta" because he had never seen it before.*
- *She wrote a short paragraph that included "labyrinthodonta."*

---

labyrinthodontia *(noun)*

Extinct amphibians typically resembling heavy-bodied salamanders or crocodiles and having a solid flattened skull and conical teeth; Devonian through Triassic.

- *She wrote a short paragraph that included "labyrinthodontia."*
- *He looked up "labyrinthodontia" because he had never seen it before.*

---

lacertidae *(noun)*

Old World lizards.

- *In class, the teacher used "lacertidae" to mean old world lizards.*
- *They discussed "lacertidae" during the group presentation.*

---

lacertilia *(noun)*

True lizards; including chameleons and geckos.

- *In class, the teacher used "lacertilia" to mean true lizards; including chameleons and geckos.*
- *Understanding "lacertilia" helps you talk about this topic clearly.*

---

lachnolaimus *(noun)*

A genus of Labridae.

- *Understanding "lachnolaimus" helps you talk about this topic clearly.*
- *In class, the teacher used "lachnolaimus" to mean a genus of labridae.*

---

lachnolaimus maximus *(noun)*

Large wrasse of western Atlantic; head of male resembles a pig's snout.

- *Understanding "lachnolaimus maximus" helps you talk about this topic clearly.*
- *He looked up "lachnolaimus maximus" because he had never seen it before.*

---

lactobacillaceae *(noun)*

Lactic acid bacteria and important pathogens; bacteria that ferment carbohydrates chiefly into lactic acid.

- *The article explained what "lactobacillaceae" means with a simple example.*
- *In class, the teacher used "lactobacillaceae" to mean lactic acid bacteria and important pathogens;....*

---

lactobacteriaceae *(noun)*

Lactic acid bacteria and important pathogens; bacteria that ferment carbohydrates chiefly into lactic acid.

- *He looked up "lactobacteriaceae" because he had never seen it before.*
- *They discussed "lactobacteriaceae" during the group presentation.*

lactophrys *(noun)*

A genus of Ostraciidae.

- *They discussed "lactophrys" during the group presentation.*
- *Understanding "lactophrys" helps you talk about this topic clearly.*

lactophrys quadricornis *(noun)*

Trunkfish having hornlike spines over the eyes.

- *They discussed "lactophrys quadricornis" during the group presentation.*
- *She wrote a short paragraph that included "lactophrys quadricornis."*

lactosuria *(noun)*

Presence of lactose in the urine; can occur during pregnancy or lactation.

- *They discussed "lactosuria" during the group presentation.*
- *She wrote a short paragraph that included "lactosuria."*

ladybeetle *(noun)*

Small round bright-colored and spotted beetle that usually feeds on aphids and other insect pests.

- *She wrote a short paragraph that included "ladybeetle."*
- *Understanding "ladybeetle" helps you talk about this topic clearly.*

lagidium *(noun)*

A genus of Chinchillidae.

- *He looked up "lagidium" because he had never seen it before.*
- *Understanding "lagidium" helps you talk about this topic clearly.*

lagodon *(noun)*

A genus of Sparidae.

- *Understanding "lagodon" helps you talk about this topic clearly.*
- *In class, the teacher used "lagodon" to mean a genus of sparidae.*

lagodon rhomboides *(noun)*

Similar to sea bream; small spiny-finned fish found in bays along the southeastern coast of the United States.

- *He looked up "lagodon rhomboides" because he had never seen it before.*
- *She wrote a short paragraph that included "lagodon rhomboides."*

lagomorpha *(noun)*

Rabbits; hares; pikas; formerly considered the suborder Duplicidentata of the order Rodentia.

- *He looked up "lagomorpha" because he had never seen it before.*
- *They discussed "lagomorpha" during the group presentation.*

lagophthalmos *(noun)*

Abnormal condition in which an eye cannot close completely.

- *The article explained what "lagophthalmos" means with a simple example.*
- *They discussed "lagophthalmos" during the group presentation.*

lagopus scoticus *(noun)*

Reddish-brown grouse of upland moors of Great Britain.

- *He looked up "lagopus scoticus" because he had never seen it before.*
- *In class, the teacher used "lagopus scoticus" to mean reddish-brown grouse of upland moors of great britain.*

lagorchestes *(noun)*

Hare wallabies.

- *In class, the teacher used "lagorchestes" to mean hare wallabies.*
- *The article explained what "lagorchestes" means with a simple example.*

lagostomus maximus *(noun)*

Gregarious burrowing rodent larger than the chinchillas.

- *He looked up "lagostomus maximus" because he had never seen it before.*
- *They discussed "lagostomus maximus" during the group presentation.*

---

lagothrix *(noun)*

Woolly monkeys.

- *In class, the teacher used "lagothrix" to mean woolly monkeys.*
- *They discussed "lagothrix" during the group presentation.*

---

lambdacism *(noun)*

Speech defect involving excessive use or unusual pronunciation of the phoneme 'l'.

- *They discussed "lambdacism" during the group presentation.*
- *Understanding "lambdacism" helps you talk about this topic clearly.*

---

lambis *(noun)*

Scorpion shells of shallow tropical waters of the eastern hemisphere.

- *Understanding "lambis" helps you talk about this topic clearly.*
- *They discussed "lambis" during the group presentation.*

---

lamboid suture *(noun)*

The suture between the occipital and parietal bones.

- *In class, the teacher used "lamboid suture" to mean the suture between the occipital and parietal bones.*
- *Understanding "lamboid suture" helps you talk about this topic clearly.*

---

lamellibranch *(noun)*

Marine or freshwater mollusks having a soft body with platelike gills enclosed within two shells hinged together.

- *Understanding "lamellibranch" helps you talk about this topic clearly.*
- *The article explained what "lamellibranch" means with a simple example.*

---

lamellibranchia *(noun)*

Oysters; clams; scallops; mussels.

- *In class, the teacher used "lamellibranchia" to mean oysters; clams; scallops; mussels.*
- *Understanding "lamellibranchia" helps you talk about this topic clearly.*

---

lamellicorn beetle *(noun)*

Beetle having antennae with hard platelike terminal segments.

- *The article explained what "lamellicorn beetle" means with a simple example.*
- *She wrote a short paragraph that included "lamellicorn beetle."*

---

lamellicornia *(noun)*

Scarabaeid beetles and stag beetles.

- *He looked up "lamellicornia" because he had never seen it before.*
- *In class, the teacher used "lamellicornia" to mean scarabaeid beetles and stag beetles.*

---

laminariaceae *(noun)*

Large family of marine brown algae including many economically important large kelps chiefly of northern waters.

- *Understanding "laminariaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "laminariaceae" to mean large family of marine brown algae including many....*

---

laminariales *(noun)*

In some classifications coextensive with family Laminariaceae: marine brown algae of cold or polar seas.

- *In class, the teacher used "laminariales" to mean in some classifications coextensive with family....*
- *The article explained what "laminariales" means with a simple example.*

---

lammergeyer *(noun)*

The largest Eurasian bird of prey; having black feathers hanging around the bill.

- *Understanding "lammergeyer" helps you talk about this topic clearly.*

- *The article explained what “lammergeyer” means with a simple example.*

---

lamnidae *(noun)*

Oceanic sharks.

- *They discussed “lamnidae” during the group presentation.*
- *Understanding “lamnidae” helps you talk about this topic clearly.*

---

lamper eel *(noun)*

Primitive eellike freshwater or anadromous cyclostome having round sucking mouth with a rasping tongue.

- *They discussed “lamper eel” during the group presentation.*
- *In class, the teacher used “lamper eel” to mean primitive eellike freshwater or anadromous....*

---

lampris *(noun)*

Type genus of the Lampridae.

- *He looked up “lampris” because he had never seen it before.*
- *She wrote a short paragraph that included “lampris.”*

---

lampris guttatus *(noun)*

From Nova Scotia to West Indies and Gulf of Mexico.

- *The article explained what “lampris guttatus” means with a simple example.*
- *In class, the teacher used “lampris guttatus” to mean from nova scotia to west indies and gulf of mexico.*

---

lampris regius *(noun)*

Large elliptical brightly colored deep-sea fish of Atlantic and Pacific and Mediterranean.

- *She wrote a short paragraph that included “lampris regius.”*
- *The article explained what “lampris regius” means with a simple example.*

---

lampropeltis *(noun)*

King snakes and milk snakes.

- *In class, the teacher used “lampropeltis” to mean king snakes and milk snakes.*
- *They discussed “lampropeltis” during the group presentation.*

---

lampropeltis getulus *(noun)*

Widespread in United States except northern regions; black or brown with yellow bands.

- *They discussed “lampropeltis getulus” during the group presentation.*
- *Understanding “lampropeltis getulus” helps you talk about this topic clearly.*

---

lampropeltis triangulum *(noun)*

Nonvenomous tan and brown king snake with an arrow-shaped occipital spot; southeastern ones have red stripes like coral snakes.

- *In class, the teacher used “lampropeltis triangulum” to mean nonvenomous tan and brown king snake with an....*
- *The article explained what “lampropeltis triangulum” means with a simple example.*

---

lampshell *(noun)*

Marine animal with bivalve shell having a pair of arms bearing tentacles for capturing food; found worldwide.

- *Understanding “lampshell” helps you talk about this topic clearly.*
- *They discussed “lampshell” during the group presentation.*

---

lancelet *(noun)*

Small translucent lancet-shaped burrowing marine animal; primitive forerunner of the vertebrates.

- *In class, the teacher used “lancelet” to mean small translucent lancet-shaped burrowing marine....*
- *Understanding “lancelet” helps you talk about this topic clearly.*

---

lancetfish *(noun)*

Large elongate scaleless oceanic fishes with sharp teeth and a long dorsal fin that resembles a sail.

- *She wrote a short paragraph that included “lancetfish.”*
- *The article explained what “lancetfish” means with a simple example.*

---

langouste *(noun)*

Large edible marine crustacean having a spiny carapace but lacking the large pincers of true lobsters.

- *In class, the teacher used "langouste" to mean large edible marine crustacean having a spiny....*
- *They discussed "langouste" during the group presentation.*

---

lanius excubitor *(noun)*

A common European butcherbird.

- *The article explained what "lanius excubitor" means with a simple example.*
- *They discussed "lanius excubitor" during the group presentation.*

---

lanius lucovicianus *(noun)*

A common shrike of southeastern United States having black bands around the eyes.

- *They discussed "lanius lucovicianus" during the group presentation.*
- *The article explained what "lanius lucovicianus" means with a simple example.*

---

lanius ludovicianus excubitorides *(noun)*

A butcherbird of western North America; grey with white underparts.

- *In class, the teacher used "lanius ludovicianus excubitorides" to mean a butcherbird of western north america; grey with....*
- *Understanding "lanius ludovicianus excubitorides" helps you talk about this topic clearly.*

---

lanternfish *(noun)*

Small fish having rows of luminous organs along each side; some surface at night.

- *In class, the teacher used "lanternfish" to mean small fish having rows of luminous organs along....*
- *He looked up "lanternfish" because he had never seen it before.*

---

lanthanotidae *(noun)*

Stout-bodied lizards.

- *He looked up "lanthanotidae" because he had never seen it before.*
- *In class, the teacher used "lanthanotidae" to mean stout-bodied lizards.*

---

lanthanotus *(noun)*

One species.

- *She wrote a short paragraph that included "lanthanotus."*
- *Understanding "lanthanotus" helps you talk about this topic clearly.*

---

lanthanotus borneensis *(noun)*

A stout-bodied pleurodont lizard of Borneo.

- *The article explained what "lanthanotus borneensis" means with a simple example.*
- *Understanding "lanthanotus borneensis" helps you talk about this topic clearly.*

---

laparocele *(noun)*

Hernia through the abdomen.

- *He looked up "laparocele" because he had never seen it before.*
- *She wrote a short paragraph that included "laparocele."*

---

largemouthed bass *(noun)*

A large black bass; the angle of the jaw falls behind the eye.

- *He looked up "largemouthed bass" because he had never seen it before.*
- *She wrote a short paragraph that included "largemouthed bass."*

---

largemouthed black bass *(noun)*

A large black bass; the angle of the jaw falls behind the eye.

- *They discussed "largemouthed black bass" during the group presentation.*
- *She wrote a short paragraph that included "largemouthed black bass."*

---

laricariidae *(noun)*

Armored catfish.

- *In class, the teacher used "laricariidae" to mean armored catfish.*
- *He looked up "laricariidae" because he had never seen it before.*

---

larid *(noun)*

Long-winged web-footed aquatic bird of the gull family.

- *Understanding "larid" helps you talk about this topic clearly.*
- *He looked up "larid" because he had never seen it before.*

---

laridae *(noun)*

Gull family: gulls and terns.

- *Understanding "laridae" helps you talk about this topic clearly.*
- *They discussed "laridae" during the group presentation.*

---

larus ridibundus *(noun)*

Small black-headed European gull.

- *Understanding "larus ridibundus" helps you talk about this topic clearly.*
- *He looked up "larus ridibundus" because he had never seen it before.*

---

larvacea *(noun)*

Small free-swimming tunicates; sometimes classified as an order.

- *The article explained what "larvacea" means with a simple example.*
- *In class, the teacher used "larvacea" to mean small free-swimming tunicates; sometimes classified....*

---

larvacean *(noun)*

Any member of the class Larvacea.

- *They discussed "larvacean" during the group presentation.*
- *He looked up "larvacean" because he had never seen it before.*

---

laryngopharyngitis *(noun)*

Inflammation of the larynx and pharynx.

- *He looked up "laryngopharyngitis" because he had never seen it before.*
- *They discussed "laryngopharyngitis" during the group presentation.*

---

laryngopharynx *(noun)*

The lower part of the pharynx.

- *In class, the teacher used "laryngopharynx" to mean the lower part of the pharynx.*
- *He looked up "laryngopharynx" because he had never seen it before.*

---

laryngostenosis *(noun)*

Abnormal narrowing of the larynx.

- *Understanding "laryngostenosis" helps you talk about this topic clearly.*
- *They discussed "laryngostenosis" during the group presentation.*

---

laryngotracheobronchitis *(noun)*

Inflammation of the larynx and trachea and bronchial passageways.

- *The article explained what "laryngotracheobronchitis" means with a simple example.*
- *Understanding "laryngotracheobronchitis" helps you talk about this topic clearly.*

---

lasiocampa *(noun)*

Type genus of the Lasiocampidae: eggars.

- *In class, the teacher used "lasiocampa" to mean type genus of the lasiocampidae: eggars.*
- *Understanding "lasiocampa" helps you talk about this topic clearly.*

---

lasiocampid *(noun)*

Medium-sized stout-bodied neutral-colored moths with comb-like antennae.

- *In class, the teacher used "lasiocampid" to mean medium-sized stout-bodied neutral-colored moths....*
- *They discussed "lasiocampid" during the group presentation.*

lasiocampid moth *(noun)*

Medium-sized stout-bodied neutral-colored moths with comb-like antennae.

- *He looked up "lasiocampid moth" because he had never seen it before.*
- *She wrote a short paragraph that included "lasiocampid moth."*

lasiocampidae *(noun)*

Tent caterpillars; eggars; lappet moths.

- *In class, the teacher used "lasiocampidae" to mean tent caterpillars; eggars; lappet moths.*
- *The article explained what "lasiocampidae" means with a simple example.*

lasiurus *(noun)*

A genus of Vespertilionidae.

- *In class, the teacher used "lasiurus" to mean a genus of vespertilionidae.*
- *They discussed "lasiurus" during the group presentation.*

lasiurus borealis *(noun)*

North American bat of a brick or rusty red color with hairs tipped with white.

- *They discussed "lasiurus borealis" during the group presentation.*
- *She wrote a short paragraph that included "lasiurus borealis."*

lateralize *(verb)*

Move or displace to one side so as to make lateral.

- *Can you use "lateralize" in a sentence that fits this situation?*
- *He did not know how to use "lateralize" until he saw an example.*

lates calcarifer *(noun)*

A species of large perch noted for its sporting and eating qualities; lives in marine, estuary, and freshwater habitats.

- *The article explained what "lates calcarifer" means with a simple example.*
- *They discussed "lates calcarifer" during the group presentation.*

latimeria *(noun)*

Type genus of the Latimeridae: coelacanth.

- *He looked up "latimeria" because he had never seen it before.*
- *In class, the teacher used "latimeria" to mean type genus of the latimeridae: coelacanth.*

latimeria chalumnae *(noun)*

Fish thought to have been extinct since the Cretaceous period but found in 1938 off the coast of Africa.

- *In class, the teacher used "latimeria chalumnae" to mean fish thought to have been extinct since the....*
- *The article explained what "latimeria chalumnae" means with a simple example.*

latimeridae *(noun)*

Extinct except for the coelacanth.

- *She wrote a short paragraph that included "latimeridae."*
- *He looked up "latimeridae" because he had never seen it before.*

latrodectus mactans *(noun)*

Venomous New World spider; the female is black with an hourglass-shaped red mark on the underside of the abdomen.

- *She wrote a short paragraph that included "latrodectus mactans."*
- *They discussed "latrodectus mactans" during the group presentation.*

launce *(noun)*

Very small silvery eellike schooling fishes that burrow into sandy beaches.

- *Understanding "launce" helps you talk about this topic clearly.*
- *They discussed "launce" during the group presentation.*

leafnose bat *(noun)*

Bat having a leaflike flap at the end of the nose; especially of the families Phyllostomatidae and Rhinolophidae and Hipposideridae.

- *In class, the teacher used "leafnose bat" to mean bat having a leaflike flap at the end of the nose;....*
- *They discussed "leafnose bat" during the group presentation.*

---

leatherfish *(noun)*

Any of several brightly colored tropical filefishes.

- *The article explained what "leatherfish" means with a simple example.*
- *She wrote a short paragraph that included "leatherfish."*

---

leatherjack *(noun)*

Any of several New World tropical fishes having tiny embedded scales.

- *He looked up "leatherjack" because he had never seen it before.*
- *She wrote a short paragraph that included "leatherjack."*

---

lebistes reticulatus *(noun)*

Small freshwater fish of South America and the West Indies; often kept in aquariums.

- *Understanding "lebistes reticulatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lebistes reticulatus."*

---

lefteye flounder *(noun)*

Flatfishes with both eyes on the left side of the head.

- *She wrote a short paragraph that included "lefteye flounder."*
- *He looked up "lefteye flounder" because he had never seen it before.*

---

lefteyed flounder *(noun)*

Flatfishes with both eyes on the left side of the head.

- *They discussed "lefteyed flounder" during the group presentation.*
- *The article explained what "lefteyed flounder" means with a simple example.*

---

leiopelma *(noun)*

Type and sole genus of the family Leiopelmatidae.

- *He looked up "leiopelma" because he had never seen it before.*
- *In class, the teacher used "leiopelma" to mean type and sole genus of the family leiopelmatidae.*

---

leiopelmatidae *(noun)*

Primitive New Zealand frogs.

- *She wrote a short paragraph that included "leiopelmatidae."*
- *Understanding "leiopelmatidae" helps you talk about this topic clearly.*

---

leipoa *(noun)*

Australian mound bird; incubates eggs naturally in sandy mounds.

- *He looked up "leipoa" because he had never seen it before.*
- *Understanding "leipoa" helps you talk about this topic clearly.*

---

leipoa ocellata *(noun)*

Australian mound bird; incubates eggs naturally in sandy mounds.

- *The article explained what "leipoa ocellata" means with a simple example.*
- *Understanding "leipoa ocellata" helps you talk about this topic clearly.*

---

leishmaniosis *(noun)*

Sores resulting from a tropical infection by protozoa of the genus Leishmania which are spread by sandflies.

- *Understanding "leishmaniosis" helps you talk about this topic clearly.*
- *In class, the teacher used "leishmaniosis" to mean sores resulting from a tropical infection by....*

---

lemmus lemmus *(noun)*

Notable for mass migrations even into the sea where many drown.

- *In class, the teacher used "lemmus lemmus" to mean notable for mass migrations even into the sea where....*

- *Understanding "lemmus lemmus" helps you talk about this topic clearly.*

---

lemmus trimucronatus *(noun)*

Of northwestern Canada and Alaska.

- *She wrote a short paragraph that included "lemmus trimucronatus."*
- *Understanding "lemmus trimucronatus" helps you talk about this topic clearly.*

---

lemuridae *(noun)*

Typical lemurs; of Madagascar.

- *He looked up "lemuridae" because he had never seen it before.*
- *In class, the teacher used "lemuridae" to mean typical lemurs; of madagascar.*

---

lemuroidea *(noun)*

Lemuridae; Lorisidae; Daubentoniidae; Indriidae; used in some classifications instead of Prosimii; in others considered a subdivision of Prosimii.

- *She wrote a short paragraph that included "lemuroidea."*
- *He looked up "lemuroidea" because he had never seen it before.*

---

lenitive *(noun)*

Remedy that eases pain and discomfort.

- *In class, the teacher used "lenitive" to mean remedy that eases pain and discomfort.*
- *The article explained what "lenitive" means with a simple example.*

---

lente iletin *(noun)*

Trade names for forms of insulin that are used to treat diabetes mellitus.

- *She wrote a short paragraph that included "lente iletin."*
- *He looked up "lente iletin" because he had never seen it before.*

---

lentiform nucleus *(noun)*

A basal ganglion shaped like a lens and including the outer reddish putamen and the inner pale yellow pallidum.

- *They discussed "lentiform nucleus" during the group presentation.*
- *The article explained what "lentiform nucleus" means with a simple example.*

---

leonberg *(noun)*

A large dog (usually with a golden coat) produced by crossing a St Bernard and a Newfoundland.

- *In class, the teacher used "leonberg" to mean a large dog (usually with a golden coat) produced....*
- *The article explained what "leonberg" means with a simple example.*

---

leoncita *(noun)*

Small South American marmoset with silky fur and long nonprehensile tail.

- *She wrote a short paragraph that included "leoncita."*
- *The article explained what "leoncita" means with a simple example.*

---

leontocebus oedipus *(noun)*

South American tamarin with a tufted head.

- *In class, the teacher used "leontocebus oedipus" to mean south american tamarin with a tufted head.*
- *Understanding "leontocebus oedipus" helps you talk about this topic clearly.*

---

leontocebus rosalia *(noun)*

Golden South American monkey with long soft hair forming a mane.

- *He looked up "leontocebus rosalia" because he had never seen it before.*
- *They discussed "leontocebus rosalia" during the group presentation.*

---

leopardess *(noun)*

Female leopard.

- *In class, the teacher used "leopardess" to mean female leopard.*
- *The article explained what "leopardess" means with a simple example.*

---

lepadidae *(noun)*

Goose barnacles.

- *The article explained what "lepadidae" means with a simple example.*
- *In class, the teacher used "lepadidae" to mean goose barnacles.*

lepidochelys kempii *(noun)*

Grey sea turtle of the Atlantic and Gulf Coasts of North America.

- *In class, the teacher used "lepidochelys kempii" to mean grey sea turtle of the atlantic and gulf coasts of....*
- *The article explained what "lepidochelys kempii" means with a simple example.*

lepidochelys olivacea *(noun)*

Olive-colored sea turtle of tropical Pacific and Indian and the southern Atlantic oceans.

- *They discussed "lepidochelys olivacea" during the group presentation.*
- *In class, the teacher used "lepidochelys olivacea" to mean olive-colored sea turtle of tropical pacific and....*

lepidocybium *(noun)*

A genus of Gempylidae.

- *Understanding "lepidocybium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "lepidocybium."*

lepidocybium flavobrunneum *(noun)*

Large snake mackerel with rings like spectacles around its eyes.

- *In class, the teacher used "lepidocybium flavobrunneum" to mean large snake mackerel with rings like spectacles....*
- *Understanding "lepidocybium flavobrunneum" helps you talk about this topic clearly.*

lepidophobia *(noun)*

A morbid fear of snakes.

- *He looked up "lepidophobia" because he had never seen it before.*
- *Understanding "lepidophobia" helps you talk about this topic clearly.*

lepidopteron *(noun)*

Insect that in the adult state has four wings more or less covered with tiny scales.

- *They discussed "lepidopteron" during the group presentation.*
- *He looked up "lepidopteron" because he had never seen it before.*

lepidopterous insect *(noun)*

Insect that in the adult state has four wings more or less covered with tiny scales.

- *She wrote a short paragraph that included "lepidopterous insect."*
- *Understanding "lepidopterous insect" helps you talk about this topic clearly.*

lepidosauria *(noun)*

Diapsid reptiles: lizards; snakes; tuataras.

- *He looked up "lepidosauria" because he had never seen it before.*
- *In class, the teacher used "lepidosauria" to mean diapsid reptiles: lizards; snakes; tuataras.*

lepisma *(noun)*

Type genus of the Lepismatidae: silverfish.

- *The article explained what "lepisma" means with a simple example.*
- *She wrote a short paragraph that included "lepisma."*

lepisma saccharina *(noun)*

Silver-grey wingless insect found in houses feeding on book bindings and starched clothing.

- *He looked up "lepisma saccharina" because he had never seen it before.*
- *They discussed "lepisma saccharina" during the group presentation.*

lepisosteidae *(noun)*

Comprises the genus Lepisosteus.

- *She wrote a short paragraph that included "lepisosteidae."*
- *The article explained what "lepisosteidae" means with a simple example.*

---

lepisosteus *(noun)*

Type genus of the Lepisosteidae: freshwater gars.

- *He looked up "lepisosteus" because he had never seen it before.*
- *They discussed "lepisosteus" during the group presentation.*

---

lepisosteus osseus *(noun)*

Primitive predaceous North American fish covered with hard scales and having long jaws with needlelike teeth.

- *Understanding "lepisosteus osseus" helps you talk about this topic clearly.*
- *They discussed "lepisosteus osseus" during the group presentation.*

---

lepomis macrochirus *(noun)*

Important edible sunfish of eastern and central United States.

- *The article explained what "lepomis macrochirus" means with a simple example.*
- *She wrote a short paragraph that included "lepomis macrochirus."*

---

leporid *(noun)*

Rabbits and hares.

- *She wrote a short paragraph that included "leporid."*
- *Understanding "leporid" helps you talk about this topic clearly.*

---

leporid mammal *(noun)*

Rabbits and hares.

- *Understanding "leporid mammal" helps you talk about this topic clearly.*
- *They discussed "leporid mammal" during the group presentation.*

---

leporidae *(noun)*

Hares and rabbits.

- *She wrote a short paragraph that included "leporidae."*
- *They discussed "leporidae" during the group presentation.*

---

leporide *(noun)*

Red breed of domestic rabbits; hybrid between Old World rabbit and hare.

- *In class, the teacher used "leporide" to mean red breed of domestic rabbits; hybrid between old....*
- *He looked up "leporide" because he had never seen it before.*

---

leppy *(noun)*

Motherless calf in a range herd of cattle.

- *Understanding "leppy" helps you talk about this topic clearly.*
- *He looked up "leppy" because he had never seen it before.*

---

lepromatous leprosy *(noun)*

A very serious form of leprosy characterized by lesions that spread over much of the body and affecting many systems of the body.

- *The article explained what "lepromatous leprosy" means with a simple example.*
- *They discussed "lepromatous leprosy" during the group presentation.*

---

leptinotarsa *(noun)*

Colorado potato beetles.

- *In class, the teacher used "leptinotarsa" to mean colorado potato beetles.*
- *He looked up "leptinotarsa" because he had never seen it before.*

---

leptinotarsa decemlineata *(noun)*

Black-and-yellow beetle that feeds in adult and larval stages on potato leaves; originally of eastern Rocky Mountains; now worldwide.

- *He looked up "leptinotarsa decemlineata" because he had never seen it before.*
- *She wrote a short paragraph that included "leptinotarsa decemlineata."*

leptocephalus *(noun)*

Slender transparent larva of eels and certain fishes.

- *The article explained what "leptocephalus" means with a simple example.*
- *In class, the teacher used "leptocephalus" to mean slender transparent larva of eels and certain fishes.*

leptodactylidae *(noun)*

New World frogs; in some classifications essentially coextensive with the family Bufonidae.

- *Understanding "leptodactylidae" helps you talk about this topic clearly.*
- *They discussed "leptodactylidae" during the group presentation.*

leptodactylus *(noun)*

Type genus of the Leptodactylidae; in some classifications placed in the family Bufonidae.

- *They discussed "leptodactylus" during the group presentation.*
- *He looked up "leptodactylus" because he had never seen it before.*

leptodactylus pentadactylus *(noun)*

Large toothed frog of South America and Central America resembling the bullfrog.

- *In class, the teacher used "leptodactylus pentadactylus" to mean large toothed frog of south america and central....*
- *He looked up "leptodactylus pentadactylus" because he had never seen it before.*

leptoglossus *(noun)*

Leaf-footed bugs.

- *In class, the teacher used "leptoglossus" to mean leaf-footed bugs.*
- *He looked up "leptoglossus" because he had never seen it before.*

leptomeninges *(noun)*

The two innermost layers of the meninges; cerebrospinal fluid circulates between these innermost layers.

- *He looked up "leptomeninges" because he had never seen it before.*
- *In class, the teacher used "leptomeninges" to mean the two innermost layers of the meninges;....*

leptomeningitis *(noun)*

Inflammation of the leptomeninges.

- *She wrote a short paragraph that included "leptomeningitis."*
- *The article explained what "leptomeningitis" means with a simple example.*

leptoptilus *(noun)*

Adjutant birds and marabous.

- *The article explained what "leptoptilus" means with a simple example.*
- *In class, the teacher used "leptoptilus" to mean adjutant birds and marabous.*

leptoptilus crumeniferus *(noun)*

Large African black-and-white carrion-eating stork; its downy underwing feathers are used to trim garments.

- *She wrote a short paragraph that included "leptoptilus crumeniferus."*
- *The article explained what "leptoptilus crumeniferus" means with a simple example.*

leptoptilus dubius *(noun)*

Large Indian stork with a military gait.

- *The article explained what "leptoptilus dubius" means with a simple example.*
- *They discussed "leptoptilus dubius" during the group presentation.*

leptotyphlopidae *(noun)*

Blind snakes.

- *She wrote a short paragraph that included "leptotyphlopidae."*
- *He looked up "leptotyphlopidae" because he had never seen it before.*

leptotyphlops *(noun)*

Blind snakes of Asia and Africa and Americas.

- *She wrote a short paragraph that included "leptotyphlops."*
- *The article explained what "leptotyphlops" means with a simple example.*

---

leptotyphlops humilis *(noun)*

Burrows among roots of shrubs and beneath rocks in desert and rocky hillside areas and beach sand of western United States.

- *He looked up "leptotyphlops humilis" because he had never seen it before.*
- *In class, the teacher used "leptotyphlops humilis" to mean burrows among roots of shrubs and beneath rocks in....*

---

lepus townsendi *(noun)*

Largest hare of northern plains and western mountains of United States; brownish-grey in summer and pale grey in winter; tail nearly always all white.

- *In class, the teacher used "lepus townsendi" to mean largest hare of northern plains and western....*
- *He looked up "lepus townsendi" because he had never seen it before.*

---

lerot *(noun)*

Dormouse of southern Europe and northern Africa.

- *He looked up "lerot" because he had never seen it before.*
- *She wrote a short paragraph that included "lerot."*

---

leucaemia *(noun)*

Malignant neoplasm of blood-forming tissues; characterized by abnormal proliferation of leukocytes; one of the four major types of cancer.

- *He looked up "leucaemia" because he had never seen it before.*
- *Understanding "leucaemia" helps you talk about this topic clearly.*

---

leucocytosis *(noun)*

An abnormal increase in the number of white blood cells in the blood as a result of infection (as in leukemia).

- *He looked up "leucocytosis" because he had never seen it before.*
- *She wrote a short paragraph that included "leucocytosis."*

---

leucocytozoan *(noun)*

Parasitic in birds.

- *She wrote a short paragraph that included "leucocytozoan."*
- *He looked up "leucocytozoan" because he had never seen it before.*

---

leucocytozoon *(noun)*

Parasitic in birds.

- *The article explained what "leucocytozoon" means with a simple example.*
- *She wrote a short paragraph that included "leucocytozoon."*

---

leucoma *(noun)*

Eye disease consisting of an opaque white spot on the cornea.

- *He looked up "leucoma" because he had never seen it before.*
- *In class, the teacher used "leucoma" to mean eye disease consisting of an opaque white spot on....*

---

leucopenia *(noun)*

An abnormal lowering of the white blood cell count.

- *They discussed "leucopenia" during the group presentation.*
- *He looked up "leucopenia" because he had never seen it before.*

---

leucorrhea *(noun)*

Discharge of white mucous material from the vagina; often an indication of infection.

- *He looked up "leucorrhea" because he had never seen it before.*
- *They discussed "leucorrhea" during the group presentation.*

---

leukoderma *(noun)*

A congenital skin condition characterized by spots or bands of unpigmented skin.

- *The article explained what "leukoderma" means with a simple example.*

- *They discussed "leukoderma" during the group presentation.*

leukoencephalitis *(noun)*

Inflammation of the white matter of the brain.

- *They discussed "leukoencephalitis" during the group presentation.*
- *Understanding "leukoencephalitis" helps you talk about this topic clearly.*

leukoma *(noun)*

Eye disease consisting of an opaque white spot on the cornea.

- *In class, the teacher used "leukoma" to mean eye disease consisting of an opaque white spot on....*
- *Understanding "leukoma" helps you talk about this topic clearly.*

leukorrhea *(noun)*

Discharge of white mucous material from the vagina; often an indication of infection.

- *In class, the teacher used "leukorrhea" to mean discharge of white mucous material from the vagina;....*
- *The article explained what "leukorrhea" means with a simple example.*

leydig's cell *(noun)*

A cell in the testes that secretes the hormone testosterone.

- *He looked up "leydig's cell" because he had never seen it before.*
- *She wrote a short paragraph that included "leydig's cell."*

librate *(verb)*

Vibrate before coming to a total rest.

- *The children's swing librated.*
- *Can you use "librate" in a sentence that fits this situation?*

lichanura *(noun)*

Boas of western North America.

- *The article explained what "lichanura" means with a simple example.*
- *In class, the teacher used "lichanura" to mean boas of western north america.*

lichanura trivirgata *(noun)*

Boa of rocky desert of southwestern United States.

- *He looked up "lichanura trivirgata" because he had never seen it before.*
- *She wrote a short paragraph that included "lichanura trivirgata."*

lichtenoid eczema *(noun)*

Eczema characterized by thickening of the skin with accentuated skin lines.

- *He looked up "lichtenoid eczema" because he had never seen it before.*
- *She wrote a short paragraph that included "lichtenoid eczema."*

lienal artery *(noun)*

An artery that originates from the celiac trunk and supplies blood to the spleen.

- *He looked up "lienal artery" because he had never seen it before.*
- *Understanding "lienal artery" helps you talk about this topic clearly.*

lightlessness *(noun)*

Total absence of light.

- *In class, the teacher used "lightlessness" to mean total absence of light.*
- *The article explained what "lightlessness" means with a simple example.*

limanda *(noun)*

A genus of Pleuronectidae; righteye flounders having a humped nose and small scales; the underside is often brightly colored.

- *In class, the teacher used "limanda" to mean a genus of pleuronectidae; righteye flounders....*
- *The article explained what "limanda" means with a simple example.*

limanda ferruginea *(noun)*

American flounder having a yellowish tail.

- *He looked up “limanda ferruginea” because he had never seen it before.*
- *In class, the teacher used “limanda ferruginea” to mean american flounder having a yellowish tail.*

limenitis *(noun)*

Mainly dark northern butterflies with white wing bars.

- *Understanding “limenitis” helps you talk about this topic clearly.*
- *He looked up “limenitis” because he had never seen it before.*

limenitis archippus *(noun)*

Showy American butterfly resembling the monarch but smaller.

- *She wrote a short paragraph that included “limenitis archippus.”*
- *Understanding “limenitis archippus” helps you talk about this topic clearly.*

limenitis arthemis *(noun)*

North American butterfly with blue-black wings crossed by a broad white band.

- *She wrote a short paragraph that included “limenitis arthemis.”*
- *The article explained what “limenitis arthemis” means with a simple example.*

limenitis astyanax *(noun)*

Similar to the banded purple but with red spots on underwing surfaces.

- *She wrote a short paragraph that included “limenitis astyanax.”*
- *They discussed “limenitis astyanax” during the group presentation.*

limenitis camilla *(noun)*

Eurasian butterfly with brown wings and white markings.

- *She wrote a short paragraph that included “limenitis camilla.”*
- *They discussed “limenitis camilla” during the group presentation.*

limicolae *(noun)*

Term used in some classifications for migratory shorebirds; coextensive with the Charadrii.

- *She wrote a short paragraph that included “limicolae.”*
- *He looked up “limicolae” because he had never seen it before.*

limicoline bird *(noun)*

Any of numerous wading birds that frequent mostly seashores and estuaries.

- *He looked up “limicoline bird” because he had never seen it before.*
- *She wrote a short paragraph that included “limicoline bird.”*

limnocryptes minima *(noun)*

A small short-billed Old World snipe.

- *Understanding “limnocryptes minima” helps you talk about this topic clearly.*
- *The article explained what “limnocryptes minima” means with a simple example.*

limnodromus griseus *(noun)*

A dowitcher with a grey back.

- *She wrote a short paragraph that included “limnodromus griseus.”*
- *Understanding “limnodromus griseus” helps you talk about this topic clearly.*

limnodromus scolopaceus *(noun)*

A dowitcher with a red breast.

- *Understanding “limnodromus scolopaceus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “limnodromus scolopaceus.”*

limosa haemastica *(noun)*

New World godwit.

- *She wrote a short paragraph that included "limosa haemastica."*
- *The article explained what "limosa haemastica" means with a simple example.*

---

limpkin *(noun)*

Wading bird of Florida, Cuba and Jamaica having a drooping bill and a distinctive wailing call.

- *In class, the teacher used "limpkin" to mean wading bird of florida, cuba and jamaica having a....*
- *The article explained what "limpkin" means with a simple example.*

---

limulidae *(noun)*

Horseshoe crabs.

- *Understanding "limulidae" helps you talk about this topic clearly.*
- *In class, the teacher used "limulidae" to mean horseshoe crabs.*

---

lintwhite *(noun)*

Small Old World finch whose male has a red breast and forehead.

- *In class, the teacher used "lintwhite" to mean small old world finch whose male has a red breast....*
- *The article explained what "lintwhite" means with a simple example.*

---

liomys *(noun)*

Pocket mice.

- *The article explained what "liomys" means with a simple example.*
- *In class, the teacher used "liomys" to mean pocket mice.*

---

liomys irroratus *(noun)*

Large pocket mouse of Mexico.

- *In class, the teacher used "liomys irroratus" to mean large pocket mouse of mexico.*
- *The article explained what "liomys irroratus" means with a simple example.*

---

lionet *(noun)*

A small or young lion.

- *The article explained what "lionet" means with a simple example.*
- *In class, the teacher used "lionet" to mean a small or young lion.*

---

liopelma *(noun)*

Type and sole genus of the family Leiopelmatidae.

- *They discussed "liopelma" during the group presentation.*
- *He looked up "liopelma" because he had never seen it before.*

---

liopelma hamiltoni *(noun)*

Primitive New Zealand frog with four unwebbed toes on forefeet and five on hind feet.

- *In class, the teacher used "liopelma hamiltoni" to mean primitive new zealand frog with four unwebbed toes....*
- *They discussed "liopelma hamiltoni" during the group presentation.*

---

liopelmidae *(noun)*

Primitive New Zealand frogs.

- *They discussed "liopelmidae" during the group presentation.*
- *Understanding "liopelmidae" helps you talk about this topic clearly.*

---

liothyronine *(noun)*

Thyroid hormone similar to thyroxine but with one less iodine atom per molecule and produced in smaller quantity; exerts the same biological effects as thyroxine but is more potent and briefer.

- *Understanding "liothyronine" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "liothyronine."*

---

lipaemia *(noun)*

Presence of excess lipids in the blood.

- *In class, the teacher used "lipaemia" to mean presence of excess lipids in the blood.*
- *The article explained what "lipaemia" means with a simple example.*

liparidae *(noun)*

Snailfishes.

- *The article explained what "liparidae" means with a simple example.*
- *In class, the teacher used "liparidae" to mean snailfishes.*

liparididae *(noun)*

Snailfishes.

- *He looked up "liparididae" because he had never seen it before.*
- *Understanding "liparididae" helps you talk about this topic clearly.*

liparis liparis *(noun)*

Small tadpole-shaped cold-water fishes with pelvic fins forming a sucker; related to lumpfish.

- *Understanding "liparis liparis" helps you talk about this topic clearly.*
- *He looked up "liparis liparis" because he had never seen it before.*

lipemia *(noun)*

Presence of excess lipids in the blood.

- *They discussed "lipemia" during the group presentation.*
- *Understanding "lipemia" helps you talk about this topic clearly.*

lipidaemia *(noun)*

Presence of excess lipids in the blood.

- *She wrote a short paragraph that included "lipidaemia."*
- *They discussed "lipidaemia" during the group presentation.*

lipidemia *(noun)*

Presence of excess lipids in the blood.

- *In class, the teacher used "lipidemia" to mean presence of excess lipids in the blood.*
- *He looked up "lipidemia" because he had never seen it before.*

lipidosis *(noun)*

A disorder of lipid metabolism; abnormal levels of certain fats accumulate in the body.

- *He looked up "lipidosis" because he had never seen it before.*
- *They discussed "lipidosis" during the group presentation.*

lipizzan *(noun)*

A compact and sturdy saddle horse that is bred and trained in Vienna; smart and docile and excellent for dressage.

- *They discussed "lipizzan" during the group presentation.*
- *He looked up "lipizzan" because he had never seen it before.*

lipoidaemia *(noun)*

Presence of excess lipids in the blood.

- *He looked up "lipoidaemia" because he had never seen it before.*
- *She wrote a short paragraph that included "lipoidaemia."*

lipoidemia *(noun)*

Presence of excess lipids in the blood.

- *The article explained what "lipoidemia" means with a simple example.*
- *Understanding "lipoidemia" helps you talk about this topic clearly.*

lipomatosis *(noun)*

Pathology in which fat accumulates in lipomas in the body.

- *He looked up "lipomatosis" because he had never seen it before.*
- *Understanding "lipomatosis" helps you talk about this topic clearly.*

liposcelis *(noun)*

A genus of Psocidae.

- *They discussed "liposcelis" during the group presentation.*
- *She wrote a short paragraph that included "liposcelis."*

---

liposcelis divinatorius *(noun)*

Minute wingless psocopterous insects injurious to books and papers.

- *In class, the teacher used "liposcelis divinatorius" to mean minute wingless psocopterous insects injurious to....*
- *The article explained what "liposcelis divinatorius" means with a simple example.*

---

lipotyphla *(noun)*

Moles; hedgehogs; true shrews.

- *Understanding "lipotyphla" helps you talk about this topic clearly.*
- *He looked up "lipotyphla" because he had never seen it before.*

---

lippizan *(noun)*

A compact and sturdy saddle horse that is bred and trained in Vienna; smart and docile and excellent for dressage.

- *A Lippizan is black or brown when born but turns white by the time it is five years old.*
- *She wrote a short paragraph that included "lippizan."*

---

lippizaner *(noun)*

A compact and sturdy saddle horse that is bred and trained in Vienna; smart and docile and excellent for dressage.

- *In class, the teacher used "lippizaner" to mean a compact and sturdy saddle horse that is bred and....*
- *The article explained what "lippizaner" means with a simple example.*

---

lithiasis *(noun)*

The formation of stones (calculi) in an internal organ.

- *He looked up "lithiasis" because he had never seen it before.*
- *She wrote a short paragraph that included "lithiasis."*

---

lithodidae *(noun)*

Deep-sea crabs of cold waters.

- *The article explained what "lithodidae" means with a simple example.*
- *She wrote a short paragraph that included "lithodidae."*

---

litocranius *(noun)*

Antelopes of eastern Africa: gerenuks.

- *The article explained what "litocranius" means with a simple example.*
- *She wrote a short paragraph that included "litocranius."*

---

litocranius walleri *(noun)*

Slender East African antelope with slim neck and backward-curving horns.

- *She wrote a short paragraph that included "litocranius walleri."*
- *Understanding "litocranius walleri" helps you talk about this topic clearly.*

---

littorinidae *(noun)*

Periwinkles.

- *He looked up "littorinidae" because he had never seen it before.*
- *She wrote a short paragraph that included "littorinidae."*

---

livedo *(noun)*

Skin disorder characterized by patchy bluish discolorations on the skin.

- *She wrote a short paragraph that included "livedo."*
- *He looked up "livedo" because he had never seen it before.*

---

lizardfish *(noun)*

Tropical fishes with large mouths in lizard-like heads; found worldwide.

- *He looked up "lizardfish" because he had never seen it before.*

- *In class, the teacher used "lizardfish" to mean tropical fishes with large mouths in lizard-like....*

---

lobefin *(noun)*

Any fish of the order Crossopterygii; most known only in fossil form.

- *The article explained what "lobefin" means with a simple example.*
- *They discussed "lobefin" during the group presentation.*

---

lobipes *(noun)*

A genus of Phalaropidae.

- *In class, the teacher used "lobipes" to mean a genus of phalaropidae.*
- *Understanding "lobipes" helps you talk about this topic clearly.*

---

lobipes lobatus *(noun)*

Breeds in Arctic regions of Old and New Worlds; large flocks often seen far out at sea.

- *Understanding "lobipes lobatus" helps you talk about this topic clearly.*
- *He looked up "lobipes lobatus" because he had never seen it before.*

---

lobotes *(noun)*

Type genus of the Lobotidae.

- *He looked up "lobotes" because he had never seen it before.*
- *She wrote a short paragraph that included "lobotes."*

---

lobotes pacificus *(noun)*

Tripletail found in the Pacific.

- *The article explained what "lobotes pacificus" means with a simple example.*
- *Understanding "lobotes pacificus" helps you talk about this topic clearly.*

---

lobotes surinamensis *(noun)*

Tripletail found from Cape Cod to northern South America.

- *They discussed "lobotes surinamensis" during the group presentation.*
- *The article explained what "lobotes surinamensis" means with a simple example.*

---

lobotidae *(noun)*

Tripletails.

- *They discussed "lobotidae" during the group presentation.*
- *Understanding "lobotidae" helps you talk about this topic clearly.*

---

lobworm *(noun)*

Marine worms having a row of tufted gills along each side of the back; often used for fishing bait.

- *Understanding "lobworm" helps you talk about this topic clearly.*
- *In class, the teacher used "lobworm" to mean marine worms having a row of tufted gills along....*

---

locoism *(noun)*

A disease of livestock caused by locoweed poisoning; characterized by weakness and lack of coordination and trembling and partial paralysis.

- *Understanding "locoism" helps you talk about this topic clearly.*
- *The article explained what "locoism" means with a simple example.*

---

locustidae *(noun)*

Short-horned grasshoppers; true locusts.

- *She wrote a short paragraph that included "locustidae."*
- *They discussed "locustidae" during the group presentation.*

---

lofortyx *(noun)*

California quail.

- *The article explained what "lofortyx" means with a simple example.*
- *Understanding "lofortyx" helps you talk about this topic clearly.*

---

lofortyx californicus *(noun)*

Plump chunky bird of coastal California and Oregon.

- *The article explained what “lofortyx californicus” means with a simple example.*
- *She wrote a short paragraph that included “lofortyx californicus.”*

logagraphia *(noun)*

A loss of the ability to write or to express thoughts in writing because of a brain lesion.

- *They discussed “logagraphia” during the group presentation.*
- *He looked up “logagraphia” because he had never seen it before.*

logginess *(noun)*

A dull and listless state resulting from weariness.

- *They discussed “logginess” during the group presentation.*
- *He looked up “logginess” because he had never seen it before.*

loginess *(noun)*

A dull and listless state resulting from weariness.

- *He looked up “loginess” because he had never seen it before.*
- *She wrote a short paragraph that included “loginess.”*

lollop *(verb)*

Walk clumsily and with a bounce.

- *The coach explained when to use “lollop” and when to wait.*
- *Can you use “lollop” in a sentence that fits this situation?*

longicorn *(noun)*

Long-bodied beetle having very long antennae.

- *They discussed “longicorn” during the group presentation.*
- *He looked up “longicorn” because he had never seen it before.*

longicorn beetle *(noun)*

Long-bodied beetle having very long antennae.

- *Understanding “longicorn beetle” helps you talk about this topic clearly.*
- *The article explained what “longicorn beetle” means with a simple example.*

longsightedness *(noun)*

Abnormal condition in which vision for distant objects is better than for near objects.

- *The article explained what “longsightedness” means with a simple example.*
- *She wrote a short paragraph that included “longsightedness.”*

longwool *(noun)*

A domestic long-wool sheep.

- *They discussed “longwool” during the group presentation.*
- *He looked up “longwool” because he had never seen it before.*

lookdown *(noun)*

Similar to moonfish but with eyes high on the truncated forehead.

- *She wrote a short paragraph that included “lookdown.”*
- *The article explained what “lookdown” means with a simple example.*

lookdown fish *(noun)*

Similar to moonfish but with eyes high on the truncated forehead.

- *The article explained what “lookdown fish” means with a simple example.*
- *They discussed “lookdown fish” during the group presentation.*

lophiidae *(noun)*

Large-headed marine fishes comprising the anglers.

- *She wrote a short paragraph that included “lophiidae.”*
- *He looked up “lophiidae” because he had never seen it before.*

---

lophius *(noun)*

Type genus of family Lophiidae.

- *He looked up “lophius” because he had never seen it before.*
- *In class, the teacher used “lophius” to mean type genus of family lophiidae.*

---

lophius americanus *(noun)*

Fishes having large mouths with a wormlike filament attached for luring prey.

- *Understanding “lophius americanus” helps you talk about this topic clearly.*
- *The article explained what “lophius americanus” means with a simple example.*

---

lophodytes *(noun)*

A genus of Merginae.

- *She wrote a short paragraph that included “lophodytes.”*
- *They discussed “lophodytes” during the group presentation.*

---

lophodytes cucullatus *(noun)*

Small North American duck with a high circular crest on the male’s head.

- *He looked up “lophodytes cucullatus” because he had never seen it before.*
- *Understanding “lophodytes cucullatus” helps you talk about this topic clearly.*

---

lopholatilus *(noun)*

Large brightly colored food fish of deep Atlantic waters.

- *He looked up “lopholatilus” because he had never seen it before.*
- *In class, the teacher used “lopholatilus” to mean large brightly colored food fish of deep atlantic....*

---

lopholatilus chamaeleonticeps *(noun)*

Yellow-spotted violet food fish of warm deep waters.

- *They discussed “lopholatilus chamaeleonticeps” during the group presentation.*
- *She wrote a short paragraph that included “lopholatilus chamaeleonticeps.”*

---

loricata *(noun)*

Former name for the order Crocodylia.

- *She wrote a short paragraph that included “loricata.”*
- *The article explained what “loricata” means with a simple example.*

---

lorisidae *(noun)*

sidestroke *(noun)*

A swimming stroke in which the arms move forward and backward while the legs do a scissors kick.

- *They discussed "sidestroke" during the group presentation.*
- *The article explained what "sidestroke" means with a simple example.*

---

sieva bean *(noun)*

Small flat green bean similar to lima beans.

- *Understanding "sieva bean" helps you talk about this topic clearly.*
- *He looked up "sieva bean" because he had never seen it before.*

---

sightreader *(noun)*

A performer who reads without preparation or prior acquaintance (as in music).

- *In class, the teacher used "sightreader" to mean a performer who reads without preparation or prior....*
- *Understanding "sightreader" helps you talk about this topic clearly.*

---

sigmodon *(noun)*

American cotton rats.

- *In class, the teacher used "sigmodon" to mean american cotton rats.*
- *The article explained what "sigmodon" means with a simple example.*

---

sigmodon hispidus *(noun)*

Destructive long-haired burrowing rat of southern North America and Central America.

- *They discussed "sigmodon hispidus" during the group presentation.*
- *She wrote a short paragraph that included "sigmodon hispidus."*

---

sigmoidectomy *(noun)*

Surgical removal of part or all of the sigmoid colon (usually to remove a malignant tumor).

- *She wrote a short paragraph that included "sigmoidectomy."*
- *He looked up "sigmoidectomy" because he had never seen it before.*

---

sigmoidoscope *(noun)*

An endoscope (a flexible fiberoptic probe) for examining the sigmoid colon.

- *They discussed "sigmoidoscope" during the group presentation.*
- *Understanding "sigmoidoscope" helps you talk about this topic clearly.*

---

signory *(noun)*

The estate of a seigneur.

- *They discussed "signory" during the group presentation.*
- *She wrote a short paragraph that included "signory."*

---

sihasapa *(noun)*

- *Understanding "sihasapa" helps you talk about this topic clearly.*
- *They discussed "sihasapa" during the group presentation.*

---

silicious *(adjective)*

Relating to or containing or resembling silica.

- *Would you call this situation "silicious"? Explain why.*
- *It is useful to describe something as "silicious" when it is relating to or containing or resembling silica.*

---

silicle *(noun)*

Short broad silique occurring in some cruciferous plants.

- *The article explained what "silicle" means with a simple example.*
- *In class, the teacher used "silicle" to mean short broad silique occurring in some cruciferous....*

---

silique *(noun)*

Narrow elongated seed capsule peculiar to the family Cruciferae.

- *Understanding "silique" helps you talk about this topic clearly.*
- *He looked up "silique" because he had never seen it before.*

---

silkgrass *(noun)*

Valuable forage grass of dry upland areas and plains of western North America to northern Mexico.

- *She wrote a short paragraph that included "silkgrass."*
- *They discussed "silkgrass" during the group presentation.*

---

silklike *(adjective)*

Having a smooth, gleaming surface reflecting light.

- *A silklike fabric.*
- *Students compared "silklike" with similar adjectives in the lesson.*

---

silkweed *(noun)*

Any of numerous plants of the genus Asclepias having milky juice and pods that split open releasing seeds with downy tufts.

- *He looked up "silkweed" because he had never seen it before.*
- *They discussed "silkweed" during the group presentation.*

---

sillabub *(noun)*

Sweetened cream beaten with wine or liquor.

- *In class, the teacher used "sillabub" to mean sweetened cream beaten with wine or liquor.*
- *The article explained what "sillabub" means with a simple example.*

sillaginidae *(noun)*

Small family of small food fishes in shallow waters of the Pacific around Indonesia.

- *In class, the teacher used "sillaginidae" to mean small family of small food fishes in shallow waters....*
- *The article explained what "sillaginidae" means with a simple example.*

sillago *(noun)*

Type genus of the Sillaginidae.

- *The article explained what "sillago" means with a simple example.*
- *She wrote a short paragraph that included "sillago."*

silphium laciniatum *(noun)*

North American perennial having a resinous odor and yellow flowers.

- *Understanding "silphium laciniatum" helps you talk about this topic clearly.*
- *In class, the teacher used "silphium laciniatum" to mean north american perennial having a resinous odor and....*

silurid *(noun)*

Old World freshwater catfishes having naked skin and a long anal fin more or less merged with the eellike caudal fin.

- *Understanding "silurid" helps you talk about this topic clearly.*
- *He looked up "silurid" because he had never seen it before.*

silurid fish *(noun)*

Old World freshwater catfishes having naked skin and a long anal fin more or less merged with the eellike caudal fin.

- *He looked up "silurid fish" because he had never seen it before.*
- *In class, the teacher used "silurid fish" to mean old world freshwater catfishes having naked skin....*

siluridae *(noun)*

Old World catfishes.

- *Understanding "siluridae" helps you talk about this topic clearly.*
- *They discussed "siluridae" during the group presentation.*

siluriform fish *(noun)*

Any of numerous mostly freshwater bottom-living fishes of Eurasia and North America with barbels like whiskers around the mouth.

- *He looked up "siluriform fish" because he had never seen it before.*
- *She wrote a short paragraph that included "siluriform fish."*

siluriformes *(noun)*

An order of fish belonging to the superorder Malacopterygii including catfishes.

- *Understanding "siluriformes" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "siluriformes."*

silurus *(noun)*

Type genus of the Siluridae: catfishes.

- *They discussed "silurus" during the group presentation.*
- *He looked up "silurus" because he had never seen it before.*

silurus glanis *(noun)*

Large elongated catfish of central and eastern Europe.

- *The article explained what "silurus glanis" means with a simple example.*
- *In class, the teacher used "silurus glanis" to mean large elongated catfish of central and eastern europe.*

silver quandong *(noun)*

Pale easily worked timber from the quandong tree.

- *In class, the teacher used "silver quandong" to mean pale easily worked timber from the quandong tree.*
- *The article explained what "silver quandong" means with a simple example.*

silver quandong tree *(noun)*

Australian tree having hard white timber and glossy green leaves with white flowers followed by one-seeded glossy blue fruit.

- *Understanding "silver quandong tree" helps you talk about this topic clearly.*
- *The article explained what "silver quandong tree" means with a simple example.*

---

silverbell tree *(noun)*

Medium-sized tree of West Virginia to Florida and Texas.

- *He looked up "silverbell tree" because he had never seen it before.*
- *She wrote a short paragraph that included "silverbell tree."*

---

silverberry *(noun)*

Deciduous unarmed North American shrub with silvery leaves and fruits.

- *The article explained what "silverberry" means with a simple example.*
- *In class, the teacher used "silverberry" to mean deciduous unarmed north american shrub with silvery....*

---

silverbush *(noun)*

Deciduous unarmed North American shrub with silvery leaves and fruits.

- *The article explained what "silverbush" means with a simple example.*
- *They discussed "silverbush" during the group presentation.*

---

silverish *(adjective)*

Of lustrous grey; covered with or tinged with the color of silver.

- *Her writing became clearer after she learned "silverish."*
- *Students compared "silverish" with similar adjectives in the lesson.*

---

silvern *(adjective)*

Having the white lustrous sheen of silver.

- *A land of silver (or silvern) rivers where the salmon leap.*
- *A soft silvern voice.*

---

silverpoint *(noun)*

A drawing made on specially prepared paper with an instrument having a silver tip (15th and 16th centuries).

- *The article explained what "silverpoint" means with a simple example.*
- *They discussed "silverpoint" during the group presentation.*

---

silverrod *(noun)*

Plant of eastern North America having creamy white flowers.

- *Understanding "silverrod" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "silverrod."*

---

silverspot *(noun)*

Butterfly with silver spots on the underside of the hind wings.

- *They discussed "silverspot" during the group presentation.*
- *The article explained what "silverspot" means with a simple example.*

---

silversword *(noun)*

Low-growing plant found only in volcanic craters on Hawaii having rosettes of narrow pointed silver-green leaves and clusters of profuse red-purple flowers on a tall stem.

- *Understanding "silversword" helps you talk about this topic clearly.*
- *In class, the teacher used "silversword" to mean low-growing plant found only in volcanic craters on....*

---

silvertop palmetto *(noun)*

Small stocky fan palm of southern Florida and Cuba.

- *In class, the teacher used "silvertop palmetto" to mean small stocky fan palm of southern florida and cuba.*
- *He looked up "silvertop palmetto" because he had never seen it before.*

---

silverweed *(noun)*

Low-growing perennial having leaves silvery beneath; northern United States; Europe; Asia.

- *Understanding "silverweed" helps you talk about this topic clearly.*

- *They discussed "silverweed" during the group presentation.*

---

silverworker *(noun)*

Someone who makes or repairs articles of silver.

- *She wrote a short paragraph that included "silverworker."*
- *The article explained what "silverworker" means with a simple example.*

---

silvery spleenwort *(noun)*

North American fern with narrow fronds on yellowish leafstalks.

- *She wrote a short paragraph that included "silvery spleenwort."*
- *Understanding "silvery spleenwort" helps you talk about this topic clearly.*

---

silvex *(noun)*

A herbicide that is effective in controlling woody plants but is toxic to animals.

- *She wrote a short paragraph that included "silvex."*
- *The article explained what "silvex" means with a simple example.*

---

silvia atricapilla *(noun)*

Small brownish-grey warbler with a black crown.

- *Understanding "silvia atricapilla" helps you talk about this topic clearly.*
- *The article explained what "silvia atricapilla" means with a simple example.*

---

silybum *(noun)*

Small genus of east African herbs.

- *They discussed "silybum" during the group presentation.*
- *In class, the teacher used "silybum" to mean small genus of east african herbs.*

---

silybum marianum *(noun)*

Tall Old World biennial thistle with large clasping white-blotched leaves and purple flower heads; naturalized in California and South America.

- *She wrote a short paragraph that included "silybum marianum."*
- *He looked up "silybum marianum" because he had never seen it before.*

---

simal *(noun)*

East Indian silk cotton tree yielding fibers inferior to kapok.

- *In class, the teacher used "simal" to mean east indian silk cotton tree yielding fibers....*
- *The article explained what "simal" means with a simple example.*

---

simarouba *(noun)*

Type genus of Simaroubaceae; tropical American trees and shrubs having a pale soft wood and bitter bark.

- *The article explained what "simarouba" means with a simple example.*
- *Understanding "simarouba" helps you talk about this topic clearly.*

---

simarouba amara *(noun)*

Tree of the Amazon valley yielding a light brittle timber locally regarded as resistant to insect attack.

- *The article explained what "simarouba amara" means with a simple example.*
- *In class, the teacher used "simarouba amara" to mean tree of the amazon valley yielding a light brittle....*

---

simarouba glauca *(noun)*

Medium to large tree of tropical North and South America having odd-pinnate leaves and long panicles of small pale yellow flowers followed by scarlet fruits.

- *Understanding "simarouba glauca" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "simarouba glauca."*

---

simaroubaceae *(noun)*

Chiefly tropical trees and shrubs with bitter bark having dry usually one-seeded winged fruit.

- *They discussed "simaroubaceae" during the group presentation.*
- *He looked up "simaroubaceae" because he had never seen it before.*

---

simazine *(noun)*

A herbicide used to control weeds (especially among crops).

- *In class, the teacher used "simazine" to mean a herbicide used to control weeds (especially among....*
- *The article explained what "simazine" means with a simple example.*

simchas torah *(noun)*

(Judaism) a Jewish holy day celebrated on the 22nd or 23rd of Tishri to celebrate the completion of the annual cycle of readings of the Torah.

- *He looked up "simchas torah" because he had never seen it before.*
- *She wrote a short paragraph that included "simchas torah."*

simchat torah *(noun)*

(Judaism) a Jewish holy day celebrated on the 22nd or 23rd of Tishri to celebrate the completion of the annual cycle of readings of the Torah.

- *They discussed "simchat torah" during the group presentation.*
- *She wrote a short paragraph that included "simchat torah."*

simhat torah *(noun)*

(Judaism) a Jewish holy day celebrated on the 22nd or 23rd of Tishri to celebrate the completion of the annual cycle of readings of the Torah.

- *Understanding "simhat torah" helps you talk about this topic clearly.*
- *In class, the teacher used "simhat torah" to mean (judaism) a jewish holy day celebrated on the 22nd....*

simhath torah *(noun)*

(Judaism) a Jewish holy day celebrated on the 22nd or 23rd of Tishri to celebrate the completion of the annual cycle of readings of the Torah.

- *He looked up "simhath torah" because he had never seen it before.*
- *Understanding "simhath torah" helps you talk about this topic clearly.*

simmpleness *(noun)*

Absence of affectation or pretense.

- *In class, the teacher used "simmpleness" to mean absence of affectation or pretense.*
- *Understanding "simmpleness" helps you talk about this topic clearly.*

simon zelotes *(noun)*

One of the twelve Apostles (first century).

- *In class, the teacher used "simon zelotes" to mean one of the twelve apostles (first century).*
- *The article explained what "simon zelotes" means with a simple example.*

simonise *(verb)*

Polish with wax.

- *Can you use "simonise" in a sentence that fits this situation?*
- *She tried to use "simonise" carefully so everyone would understand.*

simoniz *(noun)*

A brand of car polish.

- *The article explained what "simoniz" means with a simple example.*
- *She wrote a short paragraph that included "simoniz."*

simonize *(verb)*

Polish with wax.

- *The motorcycle has been Simonized.*
- *She tried to use "simonize" carefully so everyone would understand.*

simoon *(noun)*

A violent hot sand-laden wind on the deserts of Arabia and North Africa.

- *She wrote a short paragraph that included "simoon."*
- *Understanding "simoon" helps you talk about this topic clearly.*

The front part of the head or skull (including the forehead).

- *The article explained what "sinciput" means with a simple example.*
- *In class, the teacher used "sinciput" to mean the front part of the head or skull (including the....*

---

singan *(noun)*

A city of central China; capital of ancient Chinese empire 221-206 BC.

- *He looked up "singan" because he had never seen it before.*
- *She wrote a short paragraph that included "singan."*

---

singlestick *(noun)*

A stick used instead of a sword for fencing.

- *Understanding "singlestick" helps you talk about this topic clearly.*
- *He looked up "singlestick" because he had never seen it before.*

---

sinistrality *(noun)*

Preference for using the left hand.

- *She wrote a short paragraph that included "sinistrality."*
- *The article explained what "sinistrality" means with a simple example.*

---

sinistrorsal *(adjective)*

Spiraling upward from right to left.

- *A "sinistrorsal" approach may work better in this case.*
- *The speaker chose "sinistrorsal" because it captured the feeling precisely.*

sinistrorse *(adjective)*

Spiraling upward from right to left.

- *Sinistrorse vines.*
- *The speaker chose "sinistrorse" because it captured the feeling precisely.*

sinkable *(adjective)*

Capable of being sunk.

- *Her writing became clearer after she learned "sinkable."*
- *Would you call this situation "sinkable"? Explain why.*

sinningia *(noun)*

Genus of perennial tuberous herbs and shrubs of Central and South America.

- *In class, the teacher used "sinningia" to mean genus of perennial tuberous herbs and shrubs of....*
- *Understanding "sinningia" helps you talk about this topic clearly.*

sinningia speciosa *(noun)*

South American herb cultivated in many varieties as a houseplant for its large handsome leaves and large variously colored bell-shaped flowers.

- *They discussed "sinningia speciosa" during the group presentation.*
- *Understanding "sinningia speciosa" helps you talk about this topic clearly.*

sinoper *(noun)*

A red ocher formerly used as a pigment.

- *In class, the teacher used "sinoper" to mean a red ocher formerly used as a pigment.*
- *They discussed "sinoper" during the group presentation.*

sinopia *(noun)*

A red ocher formerly used as a pigment.

- *They discussed "sinopia" during the group presentation.*
- *The article explained what "sinopia" means with a simple example.*

sinopis *(noun)*

A red ocher formerly used as a pigment.

- *They discussed "sinopis" during the group presentation.*
- *In class, the teacher used "sinopis" to mean a red ocher formerly used as a pigment.*

sinornis *(noun)*

Sparrow-sized fossil bird of the Jurassic period to the Cretaceous period having a keeled breastbone and vestigial tail; found in China; considered possibly the second most primitive of all birds.

- *The article explained what "sinornis" means with a simple example.*
- *They discussed "sinornis" during the group presentation.*

sinuousness *(noun)*

Having curves.

- *She wrote a short paragraph that included "sinuousness."*
- *Understanding "sinuousness" helps you talk about this topic clearly.*

sinus cavernosus *(noun)*

Either of a pair of large venous sinuses in the cranial cavity.

- *They discussed "sinus cavernosus" during the group presentation.*
- *He looked up "sinus cavernosus" because he had never seen it before.*

sinus coronarius *(noun)*

A short sinus receiving most of the veins of the heart; empties into the right atrium.

- *She wrote a short paragraph that included "sinus coronarius."*
- *The article explained what "sinus coronarius" means with a simple example.*

sinus ethmoidales *(noun)*

A sinus of the meatuses of the nasal cavity (behind the bridge of the nose).

- *The article explained what "sinus ethmoidales" means with a simple example.*
- *In class, the teacher used "sinus ethmoidales" to mean a sinus of the meatuses of the nasal cavity (behind....*

---

sinus paranasales *(noun)*

Any of the paired sinuses in the bones of the face adjacent to the nasal cavity that are lined with mucous membrane that is continuous with the lining of the nasal cavities.

- *They discussed "sinus paranasales" during the group presentation.*
- *Understanding "sinus paranasales" helps you talk about this topic clearly.*

---

sinus sigmoideus *(noun)*

An S-shaped dural sinus on the temporal and occipital bones.

- *She wrote a short paragraph that included "sinus sigmoideus."*
- *He looked up "sinus sigmoideus" because he had never seen it before.*

---

sinus venosus sclerae *(noun)*

A circular canal in the eye that drains aqueous humor from the anterior chamber of the eye into the anterior ciliary veins.

- *In class, the teacher used "sinus venosus sclerae" to mean a circular canal in the eye that drains aqueous....*
- *They discussed "sinus venosus sclerae" during the group presentation.*

---

siphonophora *(noun)*

Marine colonial hydrozoans.

- *He looked up "siphonophora" because he had never seen it before.*
- *They discussed "siphonophora" during the group presentation.*

---

sipuncula *(noun)*

Peanut worms.

- *Understanding "sipuncula" helps you talk about this topic clearly.*
- *In class, the teacher used "sipuncula" to mean peanut worms.*

---

sipunculid *(noun)*

Small unsegmented marine worm that when disturbed retracts its anterior portion into the body giving the appearance of a peanut.

- *Understanding "sipunculid" helps you talk about this topic clearly.*
- *The article explained what "sipunculid" means with a simple example.*

---

sir edwin landseer luytens *(noun)*

English architect who planned the city of New Delhi (1869-1944).

- *She wrote a short paragraph that included "sir edwin landseer luytens."*
- *They discussed "sir edwin landseer luytens" during the group presentation.*

---

sir henry maxmilian beerbohm *(noun)*

English writer and caricaturist (1872-1956).

- *He looked up "sir henry maxmilian beerbohm" because he had never seen it before.*
- *They discussed "sir henry maxmilian beerbohm" during the group presentation.*

---

sir john hawkyns *(noun)*

English privateer involved in the slave trade; later helped build the fleet that in 1588 defeated the Spanish Armada (1532-1595).

- *In class, the teacher used "sir john hawkyns" to mean english privateer involved in the slave trade;....*
- *He looked up "sir john hawkyns" because he had never seen it before.*

---

sir john vanbrigh *(noun)*

English architect (1664-1726).

- *He looked up "sir john vanbrigh" because he had never seen it before.*
- *She wrote a short paragraph that included "sir john vanbrigh."*

---

sir paul gavrilovich vinogradoff *(noun)*

British historian (born in Russia) (1854-1925).

- *The article explained what "sir paul gavrilovich vinogradoff" means with a simple example.*

- *In class, the teacher used "sir paul gavrilovich vinogradoff" to mean british historian (born in russia) (1854-1925).*

---

sir richrd steele *(noun)*

English writer (1672-1729).

- *Understanding "sir richrd steele" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sir richrd steele."*

---

sirenian *(noun)*

Any of two families of large herbivorous aquatic mammals with paddle-shaped tails and flipper-like forelimbs and no hind limbs.

- *They discussed "sirenian" during the group presentation.*
- *Understanding "sirenian" helps you talk about this topic clearly.*

---

sirenian mammal *(noun)*

Any of two families of large herbivorous aquatic mammals with paddle-shaped tails and flipper-like forelimbs and no hind limbs.

- *In class, the teacher used "sirenian mammal" to mean any of two families of large herbivorous aquatic....*
- *They discussed "sirenian mammal" during the group presentation.*

---

sisham *(noun)*

East Indian tree whose leaves are used for fodder; yields a compact dark brown durable timber used in shipbuilding and making railroad ties.

- *The article explained what "sisham" means with a simple example.*
- *They discussed "sisham" during the group presentation.*

---

siskiyou lewisia *(noun)*

Evergreen perennial having a dense basal rosette of long spatula-shaped leaves and panicles of pink or white-and-red-striped or pink-purple flowers; found on cliffs and in rock crevices in mountains of southwestern Oregon and northern California.

- *He looked up "siskiyou lewisia" because he had never seen it before.*
- *She wrote a short paragraph that included "siskiyou lewisia."*

---

sison amomum *(noun)*

A slender roadside herb of western Europe and Mediterranean areas that has foliage resembling parsley and has white flowers with aromatic seeds.

- *He looked up "sison amomum" because he had never seen it before.*
- *She wrote a short paragraph that included "sison amomum."*

---

Pygmy rattlesnake found in moist areas from the Great Lakes to Mexico; feeds on mice and small amphibians.

- *In class, the teacher used "sistrurus catenatus" to mean pygmy rattlesnake found in moist areas from the....*
- *They discussed "sistrurus catenatus" during the group presentation.*

sistrurus miliaris *(noun)*

Small pygmy rattlesnake.

- *He looked up "sistrurus miliaris" because he had never seen it before.*
- *She wrote a short paragraph that included "sistrurus miliaris."*

sisymbrium barbarea *(noun)*

Noxious cress with yellow flowers; sometimes placed in genus Sisymbrium.

- *In class, the teacher used "sisymbrium barbarea" to mean noxious cress with yellow flowers; sometimes placed....*
- *The article explained what "sisymbrium barbarea" means with a simple example.*

sisymbrium officinale *(noun)*

Stiffly branching Old World annual with pale yellow flowers; widely naturalized in North America; formerly used medicinally.

- *Understanding "sisymbrium officinale" helps you talk about this topic clearly.*
- *In class, the teacher used "sisymbrium officinale" to mean stiffly branching old world annual with pale yellow....*

sisymbrium tanacetifolia *(noun)*

Perennial stellate and hairy herb with small yellow flowers of mountains of southern Europe; sometimes placed in genus Sisymbrium.

- *Understanding "sisymbrium tanacetifolia" helps you talk about this topic clearly.*
- *He looked up "sisymbrium tanacetifolia" because he had never seen it before.*

sisyridae *(noun)*

An arthropod family of the order Neuroptera that includes spongeflies.

- *She wrote a short paragraph that included "sisyridae."*
- *He looked up "sisyridae" because he had never seen it before.*

sisyrinchium *(noun)*

Chiefly North American grasslike herbs.

- *They discussed "sisyrinchium" during the group presentation.*
- *She wrote a short paragraph that included "sisyrinchium."*

sitophylus *(noun)*

A genus of Bruchidae.

- *Understanding "sitophylus" helps you talk about this topic clearly.*
- *He looked up "sitophylus" because he had never seen it before.*

sitophylus oryzae *(noun)*

Brown weevil that infests stored grain especially rice.

- *He looked up "sitophylus oryzae" because he had never seen it before.*
- *In class, the teacher used "sitophylus oryzae" to mean brown weevil that infests stored grain especially rice.*

sitotroga *(noun)*

Grain moths.

- *He looked up "sitotroga" because he had never seen it before.*
- *She wrote a short paragraph that included "sitotroga."*

sitotroga cerealella *(noun)*

Small moth whose larvae feed on kernels of stored grains.

- *Understanding "sitotroga cerealella" helps you talk about this topic clearly.*
- *He looked up "sitotroga cerealella" because he had never seen it before.*

---

sitsang *(noun)*

An autonomous region of the Peoples Republic of China; located in the Himalayas.

- *They discussed "sitsang" during the group presentation.*
- *He looked up "sitsang" because he had never seen it before.*

---

sium sisarum *(noun)*

An Asiatic herb cultivated in Europe for its sweet edible tuberous root.

- *Understanding "sium sisarum" helps you talk about this topic clearly.*

---

sorrower *(noun)*

A person who is feeling grief (as grieving over someone who has died).

- *They discussed "sorrower" during the group presentation.*
- *She wrote a short paragraph that included "sorrower."*

---

sorus *(noun)*

A spore-producing structure in certain lichens and fungi.

- *Understanding "sorus" helps you talk about this topic clearly.*
- *They discussed "sorus" during the group presentation.*

---

sottish *(adjective)*

Given to or marked by the consumption of alcohol.

- *Sottish behavior.*
- *Would you call this situation "sottish"? Explain why.*

---

sottishly *(adverb)*

In a sottish manner.

- *Using "sottishly" can make your explanation more exact.*

- *He answered “sottishly,” which changed the tone of the conversation.*

---

sottishness *(noun)*

Lack of restraint in use of alcohol.

- *They discussed “sottishness” during the group presentation.*
- *In class, the teacher used “sottishness” to mean lack of restraint in use of alcohol.*

---

sou’easter *(noun)*

A strong wind from the southeast.

- *In class, the teacher used “sou’easter” to mean a strong wind from the southeast.*
- *The article explained what “sou’easter” means with a simple example.*

---

sou’west *(adverb)*

To, toward, or in the southwest.

- *The narrator describes the scene “sou’west” in the final chapter.*
- *He answered “sou’west,” which changed the tone of the conversation.*

---

souari *(noun)*

Large South American evergreen tree trifoliate leaves and drupes with nutlike seeds used as food and a source of cooking oil.

- *They discussed “souari” during the group presentation.*
- *She wrote a short paragraph that included “souari.”*

---

souari nut *(noun)*

A large nutlike seed of a South American tree.

- *Understanding “souari nut” helps you talk about this topic clearly.*
- *He looked up “souari nut” because he had never seen it before.*

---

souari tree *(noun)*

Large South American evergreen tree trifoliate leaves and drupes with nutlike seeds used as food and a source of cooking oil.

- *She wrote a short paragraph that included “souari tree.”*
- *He looked up “souari tree” because he had never seen it before.*

---

soufflot *(noun)*

French architect (1713-1780).

- *In class, the teacher used “soufflot” to mean french architect (1713-1780).*
- *He looked up “soufflot” because he had never seen it before.*

---

soughing *(adjective)*

Characterized by soft sounds; ; ; - R.P.Warren.

- *A soughing wind in the pines.*
- *Students compared “soughing” with similar adjectives in the lesson.*

---

soughingly *(adverb)*

With a soft sound.

- *The branches of the trees moved soughingly in the breeze.*
- *The narrator describes the scene “soughingly” in the final chapter.*

---

soullessly *(adverb)*

In a soulless manner.

- *They were soullessly grubbing for profit.*
- *Using “soullessly” can make your explanation more exact.*

---

soundable *(adjective)*

(of depth) capable of being sounded or measured for depth.

- *The speaker chose “soundable” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “soundable.”*

---

soundlessness *(noun)*

The property of making no sound.

- *They discussed "soundlessness" during the group presentation.*
- *In class, the teacher used "soundlessness" to mean the property of making no sound.*

---

soupfin *(noun)*

Pacific shark valued for its fins (used by Chinese in soup) and liver (rich in vitamin A).

- *He looked up "soupfin" because he had never seen it before.*
- *In class, the teacher used "soupfin" to mean pacific shark valued for its fins (used by chinese....*

---

soupfin shark *(noun)*

Pacific shark valued for its fins (used by Chinese in soup) and liver (rich in vitamin A).

- *The article explained what "soupfin shark" means with a simple example.*
- *In class, the teacher used "soupfin shark" to mean pacific shark valued for its fins (used by chinese....*

---

soupiness *(noun)*

The property of having the thickness of heavy cream.

- *They discussed "soupiness" during the group presentation.*
- *He looked up "soupiness" because he had never seen it before.*

---

soupspoon *(noun)*

A spoon with a rounded bowl for eating soup.

- *In class, the teacher used "soupspoon" to mean a spoon with a rounded bowl for eating soup.*
- *The article explained what "soupspoon" means with a simple example.*

---

sourball *(noun)*

Round piece of tart hard candy.

- *He looked up "sourball" because he had never seen it before.*
- *She wrote a short paragraph that included "sourball."*

---

sourdine *(noun)*

An organ stop resulting in a soft muted sound.

- *The article explained what "sourdine" means with a simple example.*
- *Understanding "sourdine" helps you talk about this topic clearly.*

---

sourish *(adjective)*

Tasting sour like a lemon.

- *Her writing became clearer after she learned "sourish."*
- *Would you call this situation "sourish"? Explain why.*

---

sousing *(noun)*

The act of making something completely wet.

- *Understanding "sousing" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sousing."*

---

souslik *(noun)*

Rather large central Eurasian ground squirrel.

- *He looked up "souslik" because he had never seen it before.*
- *She wrote a short paragraph that included "souslik."*

---

soutache *(noun)*

A narrow braid used as a decorative trimming.

- *Understanding "soutache" helps you talk about this topic clearly.*
- *In class, the teacher used "soutache" to mean a narrow braid used as a decorative trimming.*

---

southeaster *(noun)*

A strong wind from the southeast.

- *She wrote a short paragraph that included "southeaster."*
- *The article explained what "southeaster" means with a simple example.*

---

southeastwardly *(adverb)*

In a southeastward direction.

- *Try rewriting the sentence and include "southeastwardly" naturally.*
- *She spoke "southeastwardly," and the audience immediately understood her point.*

---

southern spatterdock *(noun)*

Of flowing waters of the southeastern United States; may form obstructive mats in streams.

- *Understanding "southern spatterdock" helps you talk about this topic clearly.*
- *The article explained what "southern spatterdock" means with a simple example.*

---

southernness *(noun)*

The property of being to the south.

- *The article explained what "southernness" means with a simple example.*
- *In class, the teacher used "southernness" to mean the property of being to the south.*

---

southwester *(noun)*

A strong wind from the southwest.

- *They discussed "southwester" during the group presentation.*
- *She wrote a short paragraph that included "southwester."*

---

southwestwardly *(adverb)*

In a southwestward direction.

- *The narrator describes the scene "southwestwardly" in the final chapter.*
- *He answered "southwestwardly," which changed the tone of the conversation.*

---

souvlakia *(noun)*

Made of lamb.

- *The article explained what "souvlakia" means with a simple example.*
- *They discussed "souvlakia" during the group presentation.*

---

sowbane *(noun)*

Herb considered fatal to swine.

- *She wrote a short paragraph that included "sowbane."*
- *Understanding "sowbane" helps you talk about this topic clearly.*

---

sowbelly *(noun)*

Salt pork from the belly of a hog carcass.

- *They discussed "sowbelly" during the group presentation.*
- *He looked up "sowbelly" because he had never seen it before.*

---

sowbread *(noun)*

Common wild European cyclamen with pink flowers.

- *The article explained what "sowbread" means with a simple example.*
- *They discussed "sowbread" during the group presentation.*

---

spaceward *(adverb)*

Towards outer space.

- *He answered "spaceward," which changed the tone of the conversation.*
- *Using "spaceward" can make your explanation more exact.*

---

spacewards *(adverb)*

Towards outer space.

- *Try rewriting the sentence and include "spacewards" naturally.*
- *The narrator describes the scene "spacewards" in the final chapter.*

spaciotemporal *(adjective)*

Existing in both space and time; having both spatial extension and temporal duration.

- *Her writing became clearer after she learned "spaciotemporal."*
- *The speaker chose "spaciotemporal" because it captured the feeling precisely.*

spaciously *(adverb)*

With ample room.

- *The furniture was spaciously spread out.*
- *She spoke "spaciously," and the audience immediately understood her point.*

spadeful *(noun)*

The quantity a shovel can hold.

- *In class, the teacher used "spadeful" to mean the quantity a shovel can hold.*
- *He looked up "spadeful" because he had never seen it before.*

spandril *(noun)*

An approximately triangular surface area between two adjacent arches and the horizontal plane above them.

- *The article explained what "spandril" means with a simple example.*
- *In class, the teacher used "spandril" to mean an approximately triangular surface area between....*

sparaxis *(noun)*

Deciduous perennial herbs of South Africa.

- *They discussed "sparaxis" during the group presentation.*
- *The article explained what "sparaxis" means with a simple example.*

sparaxis tricolor *(noun)*

A showy often-cultivated plant with tawny yellow often purple-spotted flowers.

- *The article explained what "sparaxis tricolor" means with a simple example.*
- *They discussed "sparaxis tricolor" during the group presentation.*

sparerib *(noun)*

A cut of pork ribs with much of the meat trimmed off.

- *He looked up "sparerib" because he had never seen it before.*
- *They discussed "sparerib" during the group presentation.*

sparganiaceae *(noun)*

Coextensive with the genus Sparganium.

- *He looked up "sparganiaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "sparganiaceae."*

sparganium *(noun)*

Type and sole genus of Sparganiaceae; marsh or aquatic herbs of temperate regions.

- *They discussed "sparganium" during the group presentation.*
- *She wrote a short paragraph that included "sparganium."*

sparid *(noun)*

Spiny-finned food fishes of warm waters having well-developed teeth.

- *She wrote a short paragraph that included "sparid."*
- *He looked up "sparid" because he had never seen it before.*

sparid fish *(noun)*

Spiny-finned food fishes of warm waters having well-developed teeth.

- *The article explained what "sparid fish" means with a simple example.*
- *In class, the teacher used "sparid fish" to mean spiny-finned food fishes of warm waters having....*

sparidae *(noun)*

Porgies; scups.

- *She wrote a short paragraph that included "sparidae."*
- *Understanding "sparidae" helps you talk about this topic clearly.*

---

sparkleberry *(noun)*

Shrub or small tree of eastern United States having black inedible berries.

- *In class, the teacher used "sparkleberry" to mean shrub or small tree of eastern united states having....*
- *He looked up "sparkleberry" because he had never seen it before.*

---

sparmannia *(noun)*

Small genus of tropical African shrubs.

- *He looked up "sparmannia" because he had never seen it before.*
- *They discussed "sparmannia" during the group presentation.*

---

sparmannia africana *(noun)*

Large shrub of South Africa having many conspicuously hairy branches with large hairy leaves and clusters of conspicuous white flowers.

- *They discussed "sparmannia africana" during the group presentation.*
- *She wrote a short paragraph that included "sparmannia africana."*

---

spartina cynosuroides *(noun)*

Tall reedlike grass common in salt meadows.

- *The article explained what "spartina cynosuroides" means with a simple example.*
- *She wrote a short paragraph that included "spartina cynosuroides."*

---

spartina pectinmata *(noun)*

North American cordgrass having leaves with dry membranous margins and glumes with long awns.

- *He looked up "spartina pectinmata" because he had never seen it before.*
- *She wrote a short paragraph that included "spartina pectinmata."*

---

spartium *(noun)*

One species: Spanish broom.

- *The article explained what "spartium" means with a simple example.*
- *They discussed "spartium" during the group presentation.*

---

spartium junceum *(noun)*

Tall thornless shrub having pale yellow flowers and flexible rushlike twigs used in basketry; of southwestern Europe and Mediterranean; naturalized in California.

- *Understanding "spartium junceum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "spartium junceum."*

---

spasmolysis *(noun)*

The relaxation or relief of muscle spasms.

- *They discussed "spasmolysis" during the group presentation.*
- *In class, the teacher used "spasmolysis" to mean the relaxation or relief of muscle spasms.*

---

spasmolytic *(noun)*

A drug used to relieve or prevent spasms (especially of the smooth muscles).

- *Understanding "spasmolytic" helps you talk about this topic clearly.*
- *The article explained what "spasmolytic" means with a simple example.*

---

spatangoida *(noun)*

Heart-shaped sea urchins.

- *They discussed "spatangoida" during the group presentation.*
- *In class, the teacher used "spatangoida" to mean heart-shaped sea urchins.*

---

spatterdock *(noun)*

Common water lily of eastern and central North America, having broad leaves and globe-shaped yellow flowers; in sluggish fresh or slightly brackish water.

- *In class, the teacher used "spatterdock" to mean common water lily of eastern and central north....*

- *They discussed “spatterdock” during the group presentation.*

---

spavined *(adjective)*

(of horses) afflicted with a swelling of the hock-joint.

- *It is useful to describe something as “spavined” when it is (of horses) afflicted with a swelling of the hock-joint.*
- *A “spavined” approach may work better in this case.*

---

spawl *(noun)*

A fragment broken off from the edge or face of stone or ore and having at least one thin edge.

- *They discussed “spawl” during the group presentation.*
- *He looked up “spawl” because he had never seen it before.*

---

speakable *(adjective)*

Capable of being uttered in words or sentences.

- *It is useful to describe something as “speakable” when it is capable of being uttered in words or sentences.*
- *The speaker chose “speakable” because it captured the feeling precisely.*

---

spearnose bat *(noun)*

New World bat with a pointed nose leaf; found from southern United States to Paraguay.

- *They discussed “spearnose bat” during the group presentation.*
- *She wrote a short paragraph that included “spearnose bat.”*

---

specialiser *(noun)*

An expert who is devoted to one occupation or branch of learning.

- *Understanding “specialiser” helps you talk about this topic clearly.*
- *They discussed “specialiser” during the group presentation.*

---

specialistic *(adjective)*

Of or related to or characteristic of specialists.

- *A “specialistic” approach may work better in this case.*
- *Would you call this situation “specialistic”? Explain why.*

---

specializer *(noun)*

An expert who is devoted to one occupation or branch of learning.

- *The article explained what “specializer” means with a simple example.*
- *In class, the teacher used “specializer” to mean an expert who is devoted to one occupation or....*

---

speciate *(verb)*

Evolve so as to lead to a new species or develop in a way most suited to the environment.

- *Learners should practice how to use “speciate” in real sentences.*
- *In everyday English, people use “speciate” when talking about this idea.*

---

An appearance of truth that is false or deceptive; seeming plausibility.

- *The speciousness of his argument.*
- *Understanding “speciousness” helps you talk about this topic clearly.*

---

speckless *(adjective)*

Completely neat and clean.

- *Her writing became clearer after she learned “speckless.”*
- *Students compared “speckless” with similar adjectives in the lesson.*

---

spectinomycin *(noun)*

An antibiotic used to treat gonorrhea.

- *The article explained what “spectinomycin” means with a simple example.*
- *Understanding “spectinomycin” helps you talk about this topic clearly.*

---

spectrographically *(adverb)*

By spectrographic means.

- *The speech spectrum was displayed spectrographically.*
- *Place "spectrographically" carefully so the meaning stays clear.*

---

spectroscopical *(adjective)*

Of or relating to or involving spectroscopy.

- *It is useful to describe something as "spectroscopical" when it is of or relating to or involving spectroscopy.*
- *The speaker chose "spectroscopical" because it captured the feeling precisely.*

---

speculativeness *(noun)*

The quality of being a conclusion or opinion based on supposition and conjecture rather than on fact or investigation.

- *Her work is highly contentious because of its speculativeness and lack of supporting evidence.*
- *He rejected stocks that didn't pay dividends because of their speculativeness.*

---

speechifier *(noun)*

A person who delivers a speech or oration.

- *She wrote a short paragraph that included "speechifier."*
- *They discussed "speechifier" during the group presentation.*

---

speechlessly *(adverb)*

Without speaking.

- *He stood up soundlessly and speechlessly and glided across the hallway and through a door.*
- *Place "speechlessly" carefully so the meaning stays clear.*

---

spelaeologist *(noun)*

A person who explores caves.

- *They discussed "spelaeologist" during the group presentation.*
- *In class, the teacher used "spelaeologist" to mean a person who explores caves.*

---

speleologist *(noun)*

A person who explores caves.

- *He looked up "speleologist" because he had never seen it before.*
- *They discussed "speleologist" during the group presentation.*

---

spelldown *(noun)*

A contest in which you are eliminated if you fail to spell a word correctly.

- *In class, the teacher used "spelldown" to mean a contest in which you are eliminated if you fail....*
- *The article explained what "spelldown" means with a simple example.*

---

spergula *(noun)*

Small genus of Old World annual herbs: corn spurry.

- *The article explained what "spergula" means with a simple example.*
- *She wrote a short paragraph that included "spergula."*

---

spergula arvensis *(noun)*

Small European weed with whorled leaves and white flowers.

- *He looked up "spergula arvensis" because he had never seen it before.*
- *Understanding "spergula arvensis" helps you talk about this topic clearly.*

---

spergularia *(noun)*

Chiefly maritime Eurasian herbs: sand spurry; sea spurry.

- *She wrote a short paragraph that included "spergularia."*
- *He looked up "spergularia" because he had never seen it before.*

---

spergularia rubra *(noun)*

Prostrate weedy herb with tiny pink flowers; widespread throughout Europe and Asia on sand dunes and heath and coastal cliffs; naturalized in eastern North America.

- *The article explained what “spergularia rubra” means with a simple example.*
- *They discussed “spergularia rubra” during the group presentation.*

---

spermatid *(noun)*

An immature gamete produced by a spermatocyte; develops into a spermatozoon.

- *The article explained what “spermatid” means with a simple example.*
- *In class, the teacher used “spermatid” to mean an immature gamete produced by a spermatocyte;....*

---

spermatocele *(noun)*

A swelling on the epididymis or the testis; usually contains spermatozoa.

- *In class, the teacher used “spermatocele” to mean a swelling on the epididymis or the testis; usually....*
- *The article explained what “spermatocele” means with a simple example.*

---

spermatocide *(noun)*

A contraceptive agent that kills spermatozoa.

- *Understanding “spermatocide” helps you talk about this topic clearly.*
- *In class, the teacher used “spermatocide” to mean a contraceptive agent that kills spermatozoa.*

---

spermatocyte *(noun)*

A male gametocyte that develops into four spermatids.

- *He looked up “spermatocyte” because he had never seen it before.*
- *In class, the teacher used “spermatocyte” to mean a male gametocyte that develops into four spermatids.*

---

spermatophyte *(noun)*

Plant that reproduces by means of seeds not spores.

- *She wrote a short paragraph that included “spermatophyte.”*
- *They discussed “spermatophyte” during the group presentation.*

---

spermatozoan *(noun)*

The male reproductive cell; the male gamete.

- *She wrote a short paragraph that included “spermatozoan.”*
- *He looked up “spermatozoan” because he had never seen it before.*

---

spermatozoid *(noun)*

A motile male gamete of a plant such as an alga or fern or gymnosperm.

- *They discussed “spermatozoid” during the group presentation.*
- *In class, the teacher used “spermatozoid” to mean a motile male gamete of a plant such as an alga or....*

---

spermophile *(noun)*

Any of various terrestrial burrowing rodents of Old and New Worlds; often destroy crops.

- *He looked up “spermophile” because he had never seen it before.*
- *In class, the teacher used “spermophile” to mean any of various terrestrial burrowing rodents of old....*

---

spermous *(adjective)*

Consisting of or resembling spermatozoa.

- *It is useful to describe something as “spermous” when it is consisting of or resembling spermatozoa.*
- *The speaker chose “spermous” because it captured the feeling precisely.*

---

spewer *(noun)*

A person who vomits.

- *Understanding “spewer” helps you talk about this topic clearly.*
- *They discussed “spewer” during the group presentation.*

---

sphacelate *(verb)*

Undergo necrosis.

- *Learners should practice how to use “sphacelate” in real sentences.*
- *She tried to use “sphacelate” carefully so everyone would understand.*

sphacele *(noun)*

A dicotyledonous genus of the family Labiatae.

- *The article explained what "sphacele" means with a simple example.*
- *She wrote a short paragraph that included "sphacele."*

sphacele calycina *(noun)*

California plant with woolly stems and leaves and large white flowers.

- *She wrote a short paragraph that included "sphacele calycina."*
- *He looked up "sphacele calycina" because he had never seen it before.*

sphacelotheca *(noun)*

Genus of smut fungus.

- *Understanding "sphacelotheca" helps you talk about this topic clearly.*
- *He looked up "sphacelotheca" because he had never seen it before.*

sphacelotheca reiliana *(noun)*

Smut fungus attacking heads of corn or sorghum and causing a covered smut.

- *She wrote a short paragraph that included "sphacelotheca reiliana."*
- *He looked up "sphacelotheca reiliana" because he had never seen it before.*

sphacelus *(noun)*

The localized death of living cells (as from infection or the interruption of blood supply).

- *Understanding "sphacelus" helps you talk about this topic clearly.*
- *The article explained what "sphacelus" means with a simple example.*

sphaeralcea *(noun)*

Large genus of chiefly tropical herbs with showy flowers and mostly globose fruits: globe mallows.

- *They discussed "sphaeralcea" during the group presentation.*
- *The article explained what "sphaeralcea" means with a simple example.*

sphaeralcea coccinea *(noun)*

False mallow of western United States having racemose red flowers; sometimes placed in genus Malvastrum.

- *In class, the teacher used "sphaeralcea coccinea" to mean false mallow of western united states having....*
- *They discussed "sphaeralcea coccinea" during the group presentation.*

sphaeralcea fasciculata *(noun)*

Shrub of coastal ranges of California and Baja California having hairy branches and spikes of numerous mauve flowers; sometimes placed in genus Sphaeralcea.

- *She wrote a short paragraph that included "sphaeralcea fasciculata."*
- *They discussed "sphaeralcea fasciculata" during the group presentation.*

sphaeralcea remota *(noun)*

A rare mallow found only in Illinois resembling the common hollyhock and having pale rose-mauve flowers; sometimes placed in genus Sphaeralcea.

- *She wrote a short paragraph that included "sphaeralcea remota."*
- *He looked up "sphaeralcea remota" because he had never seen it before.*

sphaeriaceae *(noun)*

Parasitic fungi having globose and sometimes necked or beaked perithecia.

- *She wrote a short paragraph that included "sphaeriaceae."*
- *He looked up "sphaeriaceae" because he had never seen it before.*

sphaeriales *(noun)*

Large order of ascomycetous fungi usually having a dark hard perithecia with definite ostioles; in more recent classifications often divided among several orders.

- *They discussed "sphaeriales" during the group presentation.*
- *She wrote a short paragraph that included "sphaeriales."*

sphaerobolaceae *(noun)*

Monotypic family of fungi in which the more or less spherical gleba is forcibly ejected at maturity.

- *In class, the teacher used "sphaerobolaceae" to mean monotypic family of fungi in which the more or less....*
- *The article explained what "sphaerobolaceae" means with a simple example.*

---

sphaerocarpaceae *(noun)*

Liverworts with bilaterally symmetrical gametophytes; sometimes placed in the order Jungermanniales.

- *The article explained what "sphaerocarpaceae" means with a simple example.*
- *In class, the teacher used "sphaerocarpaceae" to mean liverworts with bilaterally symmetrical....*

---

sphaerocarpales *(noun)*

Small order sometimes included in the order Jungermanniales.

- *She wrote a short paragraph that included "sphaerocarpales."*
- *The article explained what "sphaerocarpales" means with a simple example.*

---

sphaerocarpos *(noun)*

Type genus of Sphaerocarpaceae; liverworts with small many-lobed usually orbicular thallus.

- *He looked up "sphaerocarpos" because he had never seen it before.*
- *In class, the teacher used "sphaerocarpos" to mean type genus of sphaerocarpaceae; liverworts with....*

---

sphaerocarpus *(noun)*

Type genus of Sphaerocarpaceae; liverworts with small many-lobed usually orbicular thallus.

- *He looked up "sphaerocarpus" because he had never seen it before.*
- *She wrote a short paragraph that included "sphaerocarpus."*

---

sphagnales *(noun)*

Coextensive with the genus Sphagnum; in some classifications isolated in a separate subclass.

- *In class, the teacher used "sphagnales" to mean coextensive with the genus sphagnum; in some....*
- *He looked up "sphagnales" because he had never seen it before.*

---

sphecidae *(noun)*

Mud daubers; some digger wasps.

- *He looked up "sphecidae" because he had never seen it before.*
- *Understanding "sphecidae" helps you talk about this topic clearly.*

---

sphecius *(noun)*

Large solitary wasps: cicada killer.

- *He looked up "sphecius" because he had never seen it before.*
- *She wrote a short paragraph that included "sphecius."*

---

sphecius speciosis *(noun)*

Large black or rust-colored wasp that preys on cicadas.

- *In class, the teacher used "sphecius speciosis" to mean large black or rust-colored wasp that preys on cicadas.*
- *They discussed "sphecius speciosis" during the group presentation.*

---

sphecoid *(noun)*

Any of various solitary wasps.

- *She wrote a short paragraph that included "sphecoid."*
- *The article explained what "sphecoid" means with a simple example.*

---

sphecoid wasp *(noun)*

Any of various solitary wasps.

- *Understanding "sphecoid wasp" helps you talk about this topic clearly.*
- *They discussed "sphecoid wasp" during the group presentation.*

---

sphecoidea *(noun)*

Families Sphecidae and Stizidae.

- *She wrote a short paragraph that included "sphecoidea."*

- *He looked up "sphecoidea" because he had never seen it before.*

---

sphecotheres *(noun)*

A genus of Old World orioles.

- *The article explained what "sphecotheres" means with a simple example.*
- *Understanding "sphecotheres" helps you talk about this topic clearly.*

---

sphenion *(noun)*

The anterior tip of the parietal bone.

- *He looked up "sphenion" because he had never seen it before.*
- *She wrote a short paragraph that included "sphenion."*

---

spheniscidae *(noun)*

Comprising all existing penguins.

- *He looked up "spheniscidae" because he had never seen it before.*
- *Understanding "spheniscidae" helps you talk about this topic clearly.*

---

spheniscidae seabird *(noun)*

Flightless cold-water seabirds: penguins.

- *He looked up "spheniscidae seabird" because he had never seen it before.*
- *Understanding "spheniscidae seabird" helps you talk about this topic clearly.*

---

spheniscus *(noun)*

Type genus of the Spheniscidae: jackass penguins.

- *She wrote a short paragraph that included "spheniscus."*
- *He looked up "spheniscus" because he had never seen it before.*

---

spheniscus demersus *(noun)*

Small penguin of South America and southern Africa with a braying call.

- *They discussed "spheniscus demersus" during the group presentation.*
- *Understanding "spheniscus demersus" helps you talk about this topic clearly.*

---

sphenopsida *(noun)*

Horsetails and related forms.

- *In class, the teacher used "sphenopsida" to mean horsetails and related forms.*
- *He looked up "sphenopsida" because he had never seen it before.*

---

sphericalness *(noun)*

The roundness of a 3-dimensional object.

- *He looked up "sphericalness" because he had never seen it before.*
- *They discussed "sphericalness" during the group presentation.*

---

spherocyte *(noun)*

An abnormal spherical red blood cell.

- *Understanding "spherocyte" helps you talk about this topic clearly.*
- *He looked up "spherocyte" because he had never seen it before.*

---

spherometer *(noun)*

A measuring instrument for measuring the curvature of a surface.

- *He looked up "spherometer" because he had never seen it before.*
- *She wrote a short paragraph that included "spherometer."*

---

spherule *(noun)*

A small sphere.

- *Understanding "spherule" helps you talk about this topic clearly.*
- *They discussed "spherule" during the group presentation.*

---

sphingid *(noun)*

Any of various moths with long narrow forewings capable of powerful flight and hovering over flowers to feed.

- *Understanding "sphingid" helps you talk about this topic clearly.*
- *He looked up "sphingid" because he had never seen it before.*

---

sphingine *(adjective)*

Resembling a sphinx.

- *A sphingine smile.*
- *A "sphingine" approach may work better in this case.*

---

sphyraena *(noun)*

Type and sole genus of the Sphyraenidae: barracuda.

- *They discussed "sphyraena" during the group presentation.*
- *He looked up "sphyraena" because he had never seen it before.*

---

sphyraena barracuda *(noun)*

Large (up to 6 ft) greyish-brown barracuda highly regarded as a food and sport fish; may be dangerous to swimmers.

- *He looked up "sphyraena barracuda" because he had never seen it before.*
- *They discussed "sphyraena barracuda" during the group presentation.*

---

sphyraenidae *(noun)*

Monotypic family of large active fishes of tropical and subtropical waters: barracuda.

- *They discussed "sphyraenidae" during the group presentation.*
- *Understanding "sphyraenidae" helps you talk about this topic clearly.*

---

sphyrapicus *(noun)*

A genus of Picidae.

- *They discussed "sphyrapicus" during the group presentation.*
- *He looked up "sphyrapicus" because he had never seen it before.*

---

sphyrapicus varius *(noun)*

Eastern North American sapsucker having a pale yellow abdomen.

- *She wrote a short paragraph that included "sphyrapicus varius."*
- *They discussed "sphyrapicus varius" during the group presentation.*

---

sphyrapicus varius ruber *(noun)*

Western North American sapsucker.

- *She wrote a short paragraph that included "sphyrapicus varius ruber."*
- *He looked up "sphyrapicus varius ruber" because he had never seen it before.*

---

sphyrna *(noun)*

Type genus of the Sphyrnidae.

- *They discussed "sphyrna" during the group presentation.*
- *In class, the teacher used "sphyrna" to mean type genus of the sphyrnidae.*

---

sphyrna tiburo *(noun)*

Small harmless hammerhead having a spade-shaped head; abundant in bays and estuaries.

- *Understanding "sphyrna tiburo" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sphyrna tiburo."*

---

sphyrna tudes *(noun)*

Fished for the hide and vitamin-rich liver.

- *He looked up "sphyrna tudes" because he had never seen it before.*
- *Understanding "sphyrna tudes" helps you talk about this topic clearly.*

---

sphyrna zygaena *(noun)*

Fished for the hides and vitamin-rich liver.

- *Understanding "sphyrna zygaena" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sphyrna zygaena."*

---

sphyrnidae *(noun)*

Hammerhead sharks; bonnethead sharks.

- *They discussed "sphyrnidae" during the group presentation.*
- *She wrote a short paragraph that included "sphyrnidae."*

---

spicate *(adjective)*

Having or relating to spikes.

- *Spicate inflorescence.*
- *Her writing became clearer after she learned "spicate."*

---

spiceberry *(noun)*

Spicy red berrylike fruit; source of wintergreen oil.

- *In class, the teacher used "spiceberry" to mean spicy red berrylike fruit; source of wintergreen oil.*
- *Understanding "spiceberry" helps you talk about this topic clearly.*

---

spicemill *(noun)*

A mill for grinding spices.

- *Understanding "spicemill" helps you talk about this topic clearly.*
- *They discussed "spicemill" during the group presentation.*

---

spicery *(noun)*

The property of being seasoned with spice and so highly flavored.

- *They discussed "spicery" during the group presentation.*
- *Understanding "spicery" helps you talk about this topic clearly.*

---

spicily *(adverb)*

With strong spices; in a spicy manner.

- *The soup was spicily flavored.*
- *Using "spicily" can make your explanation more exact.*

---

spiculum *(noun)*

Small pointed structure serving as a skeletal element in various marine and freshwater invertebrates e.g. sponges and corals.

- *In class, the teacher used "spiculum" to mean small pointed structure serving as a skeletal....*
- *He looked up "spiculum" because he had never seen it before.*

---

spiderflower *(noun)*

Any of various often strong-smelling plants of the genus Cleome having showy spider-shaped flowers.

- *In class, the teacher used "spiderflower" to mean any of various often strong-smelling plants of the....*
- *He looked up "spiderflower" because he had never seen it before.*

---

spiderlike *(adjective)*

Relating to or resembling a member of the class Arachnida.

- *It is useful to describe something as "spiderlike" when it is relating to or resembling a member of the class....*
- *A "spiderlike" approach may work better in this case.*

---

spiderly *(adjective)*

Relating to or resembling a member of the class Arachnida.

- *It is useful to describe something as "spiderly" when it is relating to or resembling a member of the class....*
- *The speaker chose "spiderly" because it captured the feeling precisely.*

---

spiderwort *(noun)*

Any plant of the family Commelinaceae.

- *The article explained what "spiderwort" means with a simple example.*
- *She wrote a short paragraph that included "spiderwort."*

spiderwort family *(noun)*

Large widely distributed family of chiefly perennial herbs or climbers: spiderworts.

- *They discussed "spiderwort family" during the group presentation.*
- *He looked up "spiderwort family" because he had never seen it before.*

spiegeleisen *(noun)*

Pig iron containing manganese; used as a deoxidizing agent and to raise the manganese content in making steel.

- *They discussed "spiegeleisen" during the group presentation.*
- *Understanding "spiegeleisen" helps you talk about this topic clearly.*

spikelike *(adjective)*

Resembling a spike.

- *Her writing became clearer after she learned "spikelike."*
- *Would you call this situation "spikelike"? Explain why.*

spikemoss *(noun)*

Any of numerous fern allies of the genus Selaginella.

- *In class, the teacher used "spikemoss" to mean any of numerous fern allies of the genus selaginella.*
- *Understanding "spikemoss" helps you talk about this topic clearly.*

spillikin *(noun)*

A thin strip of wood used in playing the game of jackstraws.

- *The article explained what "spillikin" means with a simple example.*
- *They discussed "spillikin" during the group presentation.*

spillikins *(noun)*

A game in which players try to pick each jackstraw (or spillikin) off of a pile without moving any of the others.

- *He looked up "spillikins" because he had never seen it before.*
- *She wrote a short paragraph that included "spillikins."*

spilogale *(noun)*

A genus of Mustelidae.

- *In class, the teacher used "spilogale" to mean a genus of mustelidae.*
- *Understanding "spilogale" helps you talk about this topic clearly.*

spilogale putorius *(noun)*

Small skunk with a marbled black and white coat; of United States and Mexico.

- *The article explained what "spilogale putorius" means with a simple example.*
- *In class, the teacher used "spilogale putorius" to mean small skunk with a marbled black and white coat; of....*

spinacia oleracea *(noun)*

Southwestern Asian plant widely cultivated for its succulent edible dark green leaves.

- *Understanding "spinacia oleracea" helps you talk about this topic clearly.*
- *In class, the teacher used "spinacia oleracea" to mean southwestern asian plant widely cultivated for its....*

spinally *(adverb)*

In the spine.

- *Spinally administered.*
- *He answered "spinally," which changed the tone of the conversation.*

spindleberry *(noun)*

Any shrubby trees or woody vines of the genus Euonymus having showy usually reddish berries.

- *The article explained what "spindleberry" means with a simple example.*
- *In class, the teacher used "spindleberry" to mean any shrubby trees or woody vines of the genus....*

spindleberry tree *(noun)*

Any shrubby trees or woody vines of the genus Euonymus having showy usually reddish berries.

- *They discussed "spindleberry tree" during the group presentation.*
- *In class, the teacher used "spindleberry tree" to mean any shrubby trees or woody vines of the genus....*

---

spindlelegs *(noun)*

A thin person with long thin legs.

- *Understanding "spindlelegs" helps you talk about this topic clearly.*
- *The article explained what "spindlelegs" means with a simple example.*

---

spindleshanks *(noun)*

A thin person with long thin legs.

- *She wrote a short paragraph that included "spindleshanks."*
- *They discussed "spindleshanks" during the group presentation.*

---

spininess *(noun)*

The quality of being covered with prickly thorns or spines.

- *He looked up "spininess" because he had never seen it before.*
- *She wrote a short paragraph that included "spininess."*

---

spinmeister *(noun)*

A public relations person who tries to forestall negative publicity by publicizing a favorable interpretation of the words or actions of a company or political party or famous person.

- *The article explained what "spinmeister" means with a simple example.*
- *Understanding "spinmeister" helps you talk about this topic clearly.*

---

spinnability *(noun)*

The quality of being suitable for spinning or the capability of being spun (used of textile fibers).

- *In class, the teacher used "spinnability" to mean the quality of being suitable for spinning or the....*
- *He looked up "spinnability" because he had never seen it before.*

---

spinnbar *(adjective)*

Capable of being spun into fibres.

- *The speaker chose "spinnbar" because it captured the feeling precisely.*
- *It is useful to describe something as "spinnbar" when it is capable of being spun into fibres.*

---

spinnbarkeit *(noun)*

The capacity of a viscous liquid (especially the cervical mucus) to be drawn out into a strand or blown up into a bubble.

- *In class, the teacher used "spinnbarkeit" to mean the capacity of a viscous liquid (especially the....*
- *Understanding "spinnbarkeit" helps you talk about this topic clearly.*

---

spinus *(noun)*

In some classifications considered a subgenus of Carduelis: siskins and New World goldfinches.

- *Understanding "spinus" helps you talk about this topic clearly.*
- *He looked up "spinus" because he had never seen it before.*

---

spinus pinus *(noun)*

Small finch of North American coniferous forests.

- *They discussed "spinus pinus" during the group presentation.*
- *The article explained what "spinus pinus" means with a simple example.*

---

spinus tristis *(noun)*

American finch whose male has yellow body plumage in summer.

- *He looked up "spinus tristis" because he had never seen it before.*
- *In class, the teacher used "spinus tristis" to mean american finch whose male has yellow body plumage....*

---

spiny talinum *(noun)*

Low cushion-forming plant with rose to crimson-magenta flowers and leaf midribs that persist as spines when the leaves die; southwestern United States.

- *She wrote a short paragraph that included "spiny talinum."*

- *The article explained what “spiny talinum” means with a simple example.*

spipistrellus hesperus *(noun)*

Of western North America.

- *Understanding “spipistrellus hesperus” helps you talk about this topic clearly.*
- *He looked up “spipistrellus hesperus” because he had never seen it before.*

spiraea prunifolia *(noun)*

Shrub having copious small white flowers in spring.

- *In class, the teacher used “spiraea prunifolia” to mean shrub having copious small white flowers in spring.*
- *The article explained what “spiraea prunifolia” means with a simple example.*

spiranthes *(noun)*

Large cosmopolitan genus of white-flowered terrestrial orchids.

- *The article explained what “spiranthes” means with a simple example.*
- *In class, the teacher used “spiranthes” to mean large cosmopolitan genus of white-flowered....*

spiranthes cernua *(noun)*

An orchid of the genus Spiranthes having tall erect densely flowered spiraling clusters of creamy white vanilla-scented flowers; widely distributed especially in low damp places of eastern and central North America.

- *She wrote a short paragraph that included “spiranthes cernua.”*
- *They discussed “spiranthes cernua” during the group presentation.*

spiranthes porrifolia *(noun)*

Similar to Spiranthes romanzoffiana;States.

- *He looked up “spiranthes porrifolia” because he had never seen it before.*
- *She wrote a short paragraph that included “spiranthes porrifolia.”*

spiranthes romanzoffiana *(noun)*

Orchid having dense clusters of gently spiraling creamy white flowers with 2 upper petals forming a hood; western North America.

- *In class, the teacher used “spiranthes romanzoffiana” to mean orchid having dense clusters of gently spiraling....*
- *They discussed “spiranthes romanzoffiana” during the group presentation.*

spiranthes spiralis *(noun)*

European orchid having shorter racemes of strongly spiraling snow-white flowers.

- *In class, the teacher used “spiranthes spiralis” to mean european orchid having shorter racemes of strongly....*
- *He looked up “spiranthes spiralis” because he had never seen it before.*

spirilla *(noun)*

Any flagellated aerobic bacteria having a spirally twisted rodlike form.

- *In class, the teacher used “spirilla” to mean any flagellated aerobic bacteria having a spirally....*
- *The article explained what “spirilla” means with a simple example.*

spirillaceae *(noun)*

Rigid spirally curved elongate bacteria.

- *Understanding “spirillaceae” helps you talk about this topic clearly.*
- *They discussed “spirillaceae” during the group presentation.*

spiritise *(verb)*

Imbue with a spirit.

- *The coach explained when to use “spiritise” and when to wait.*
- *Can you use “spiritise” in a sentence that fits this situation?*

spiritize *(verb)*

Imbue with a spirit.

- *He did not know how to use “spiritize” until he saw an example.*
- *In everyday English, people use “spiritize” when talking about this idea.*

spiritlessness *(noun)*

The trait of lacking enthusiasm for or interest in things generally.

- *They discussed "spiritlessness" during the group presentation.*
- *Understanding "spiritlessness" helps you talk about this topic clearly.*

spiritous *(adjective)*

Containing or of the nature of alcohol.

- *Spiritous beverages.*
- *Would you call this situation "spiritous"? Explain why.*

spiritualisation *(noun)*

The act of making something spiritual; infusing it with spiritual content.

- *Understanding "spiritualisation" helps you talk about this topic clearly.*
- *The article explained what "spiritualisation" means with a simple example.*

spiritualise *(verb)*

Purify from the corrupting influences of the world.

- *She tried to use "spiritualise" carefully so everyone would understand.*
- *Learners should practice how to use "spiritualise" in real sentences.*

spiritualization *(noun)*

The act of making something spiritual; infusing it with spiritual content.

- *The article explained what "spiritualization" means with a simple example.*
- *They discussed "spiritualization" during the group presentation.*

spiritualty *(noun)*

Property or income owned by a church.

- *Understanding "spiritualty" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "spiritualty."*

spirochaeta *(noun)*

The type genus of the family Spirochaetaceae; a bacterium that is flexible, undulating, and chiefly aquatic.

- *She wrote a short paragraph that included "spirochaeta."*
- *Understanding "spirochaeta" helps you talk about this topic clearly.*

spirochaetaceae *(noun)*

Large coarsely spiral bacteria; free-living in fresh or salt water or commensal in bodies of oysters.

- *The article explained what "spirochaetaceae" means with a simple example.*
- *In class, the teacher used "spirochaetaceae" to mean large coarsely spiral bacteria; free-living in....*

spirochaetales *(noun)*

Higher bacteria; slender spiral rodlike forms.

- *She wrote a short paragraph that included "spirochaetales."*
- *He looked up "spirochaetales" because he had never seen it before.*

spirochaete *(noun)*

Parasitic or free-living bacteria; many pathogenic to humans and other animals.

- *They discussed "spirochaete" during the group presentation.*
- *The article explained what "spirochaete" means with a simple example.*

spirodela *(noun)*

Minute aquatic herbs floating on the water surface consisting of a shiny leaflike frond and 2-21 roots.

- *The article explained what "spirodela" means with a simple example.*
- *Understanding "spirodela" helps you talk about this topic clearly.*

spirodela polyrrhiza *(noun)*

Cosmopolitan except South America and New Zealand and some oceanic islands.

- *The article explained what "spirodela polyrrhiza" means with a simple example.*
- *Understanding "spirodela polyrrhiza" helps you talk about this topic clearly.*

---

spirogram *(noun)*

A recording of breathing made with a spirograph.

- *Understanding "spirogram" helps you talk about this topic clearly.*
- *In class, the teacher used "spirogram" to mean a recording of breathing made with a spirograph.*

---

spirula *(noun)*

A small tropical cephalopod of the genus Spirula having prominent eyes and short arms and a many-chambered shell coiled in a flat spiral.

- *In class, the teacher used "spirula" to mean a small tropical cephalopod of the genus spirula....*
- *They discussed "spirula" during the group presentation.*

---

spirula peronii *(noun)*

A small tropical cephalopod of the genus Spirula having prominent eyes and short arms and a many-chambered shell coiled in a flat spiral.

- *He looked up "spirula peronii" because he had never seen it before.*
- *She wrote a short paragraph that included "spirula peronii."*

---

spirulidae *(noun)*

Coextensive with the genus Spirula; included in the order Belemnoidea in some older classifications.

- *In class, the teacher used "spirulidae" to mean coextensive with the genus spirula; included in the....*
- *The article explained what "spirulidae" means with a simple example.*

---

spittlebug *(noun)*

Small leaping herbivorous insect that lives in a mass of protective froth which it and its larvae secrete.

- *They discussed "spittlebug" during the group presentation.*
- *He looked up "spittlebug" because he had never seen it before.*

---

spizella *(noun)*

Chipping sparrow; field sparrow; tree sparrow.

- *He looked up "spizella" because he had never seen it before.*
- *She wrote a short paragraph that included "spizella."*

---

spizella arborea *(noun)*

Finch common in winter in the northern U.S.

- *In class, the teacher used "spizella arborea" to mean finch common in winter in the northern u.s.*
- *He looked up "spizella arborea" because he had never seen it before.*

---

spizella passerina *(noun)*

Small North American finch common in urban areas.

- *In class, the teacher used "spizella passerina" to mean small north american finch common in urban areas.*
- *The article explained what "spizella passerina" means with a simple example.*

---

spizella pusilla *(noun)*

Common North American finch of brushy pasturelands.

- *In class, the teacher used "spizella pusilla" to mean common north american finch of brushy pasturelands.*
- *He looked up "spizella pusilla" because he had never seen it before.*

---

splashboard *(noun)*

Protective covering consisting of a panel to protect people from the splashing water or mud etc.

- *She wrote a short paragraph that included "splashboard."*
- *Understanding "splashboard" helps you talk about this topic clearly.*

---

splashiness *(noun)*

Lack of elegance as a consequence of being pompous and puffed up with vanity.

- *The article explained what "splashiness" means with a simple example.*

- *She wrote a short paragraph that included "splashiness."*

---

splayfoot *(noun)*

A foot afflicted with a fallen arch; abnormally flattened and spread out.

- *The article explained what "splayfoot" means with a simple example.*
- *Understanding "splayfoot" helps you talk about this topic clearly.*

---

splayfooted *(adjective)*

Having feet that turn outward.

- *It is useful to describe something as "splayfooted" when it is having feet that turn outward.*
- *The speaker chose "splayfooted" because it captured the feeling precisely.*

---

spleenwort *(noun)*

Any of various chiefly rock-inhabiting ferns of the genus Asplenium.

- *The article explained what "spleenwort" means with a simple example.*
- *She wrote a short paragraph that included "spleenwort."*

---

splenius *(noun)*

Either of two flat muscles that extend from the upper vertebrae to the base of the skull and serve to rotate or flex or extend the head and neck.

- *She wrote a short paragraph that included "splenius."*
- *He looked up "splenius" because he had never seen it before.*

---

splenius muscle *(noun)*

Either of two flat muscles that extend from the upper vertebrae to the base of the skull and serve to rotate or flex or extend the head and neck.

- *He looked up "splenius muscle" because he had never seen it before.*
- *Understanding "splenius muscle" helps you talk about this topic clearly.*

---

splinterless *(adjective)*

Resistant to shattering or splintering.

- *It is useful to describe something as "splinterless" when it is resistant to shattering or splintering.*
- *Would you call this situation "splinterless"? Explain why.*

---

splinterproof *(adjective)*

Resistant to shattering or splintering.

- *The speaker chose "splinterproof" because it captured the feeling precisely.*
- *It is useful to describe something as "splinterproof" when it is resistant to shattering or splintering.*

---

splitsaw *(noun)*

A handsaw for cutting with the grain of the wood.

- *They discussed "splitsaw" during the group presentation.*
- *Understanding "splitsaw" helps you talk about this topic clearly.*

---

splitworm *(noun)*

Greyish-brown moth whose larva is the potato tuberworm.

- *She wrote a short paragraph that included "splitworm."*
- *They discussed "splitworm" during the group presentation.*

---

spodoptera frugiperda *(noun)*

Larva of a migratory American noctuid moth; destroys grasses and small grains.

- *Understanding "spodoptera frugiperda" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "spodoptera frugiperda."*

---

spoilable *(noun)*

Food that will decay rapidly if not refrigerated.

- *She wrote a short paragraph that included "spoilable."*
- *He looked up "spoilable" because he had never seen it before.*

---

spoilation *(noun)*

The act of stripping and taking by force.

- *He looked up "spoilation" because he had never seen it before.*
- *She wrote a short paragraph that included "spoilation."*

---

spokeshave *(noun)*

A small plane that has a handle on each side of its blade; used for shaping or smoothing cylindrical wooden surfaces (originally wheel spokes).

- *She wrote a short paragraph that included "spokeshave."*
- *Understanding "spokeshave" helps you talk about this topic clearly.*

---

spondaic *(adjective)*

Of or consisting of spondees.

- *Spondaic hexameter.*
- *The speaker chose "spondaic" because it captured the feeling precisely.*

---

spondias *(noun)*

Tropical trees having one-seeded fruit.

- *She wrote a short paragraph that included "spondias."*
- *He looked up "spondias" because he had never seen it before.*

---

spondias mombin *(noun)*

Tropical American tree having edible yellow fruit.

- *The article explained what "spondias mombin" means with a simple example.*
- *In class, the teacher used "spondias mombin" to mean tropical american tree having edible yellow fruit.*

---

spondias purpurea *(noun)*

Common tropical American shrub or small tree with purplish fruit.

- *They discussed "spondias purpurea" during the group presentation.*
- *He looked up "spondias purpurea" because he had never seen it before.*

---

spongefly *(noun)*

Hairy-bodied insect whose larvae feed on freshwater sponges.

- *They discussed "spongefly" during the group presentation.*
- *In class, the teacher used "spongefly" to mean hairy-bodied insect whose larvae feed on freshwater....*

---

spongillafly *(noun)*

Hairy-bodied insect whose larvae feed on freshwater sponges.

- *He looked up "spongillafly" because he had never seen it before.*
- *She wrote a short paragraph that included "spongillafly."*

---

spongioblast *(noun)*

Any of various columnar epithelial cells in the central nervous system that develop into neuroglia.

- *They discussed "spongioblast" during the group presentation.*
- *He looked up "spongioblast" because he had never seen it before.*

---

spontaneousness *(noun)*

The quality of being spontaneous and coming from natural feelings without constraint.

- *In class, the teacher used "spontaneousness" to mean the quality of being spontaneous and coming from....*
- *The article explained what "spontaneousness" means with a simple example.*

---

spoondrift *(noun)*

Spray blown up from the surface of the sea.

- *He looked up "spoondrift" because he had never seen it before.*
- *They discussed "spoondrift" during the group presentation.*

---

spoonfeeding *(noun)*

Feeding someone (as a baby) from a spoon.

- *The article explained what "spoonfeeding" means with a simple example.*
- *In class, the teacher used "spoonfeeding" to mean feeding someone (as a baby) from a spoon.*

---

spoonleaf yucca *(noun)*

Yucca with long stiff leaves having filamentlike appendages.

- *Understanding "spoonleaf yucca" helps you talk about this topic clearly.*
- *They discussed "spoonleaf yucca" during the group presentation.*

---

sporangiophore *(noun)*

Stalk bearing one or more sporangia.

- *Understanding "sporangiophore" helps you talk about this topic clearly.*
- *In class, the teacher used "sporangiophore" to mean stalk bearing one or more sporangia.*

---

sporobolus cryptandrus *(noun)*

Erect smooth grass of sandy places in eastern North America.

- *She wrote a short paragraph that included "sporobolus cryptandrus."*
- *They discussed "sporobolus cryptandrus" during the group presentation.*

---

sporobolus poiretii *(noun)*

Grass native to West Indies but common in southern United States having tufted wiry stems often infested with a dark fungus.

- *The article explained what "sporobolus poiretii" means with a simple example.*
- *Understanding "sporobolus poiretii" helps you talk about this topic clearly.*

---

sporocarp *(noun)*

Specialized leaf branch in certain aquatic ferns that encloses the sori or clusters of sporangia.

- *She wrote a short paragraph that included "sporocarp."*
- *He looked up "sporocarp" because he had never seen it before.*

---

sporogenous *(adjective)*

Producing spores or reproducing by means of spores.

- *Would you call this situation "sporogenous"? Explain why.*
- *It is useful to describe something as "sporogenous" when it is producing spores or reproducing by means of spores.*

---

sporophore *(noun)*

A spore-bearing branch or organ: the part of the thallus of a sporophyte that develops spores; in ferns and mosses and liverworts is practically equivalent to the sporophyte.

- *She wrote a short paragraph that included "sporophore."*
- *He looked up "sporophore" because he had never seen it before.*

---

sporophyl *(noun)*

Leaf in ferns and mosses that bears the sporangia.

- *In class, the teacher used "sporophyl" to mean leaf in ferns and mosses that bears the sporangia.*
- *They discussed "sporophyl" during the group presentation.*

---

sporophyll *(noun)*

Leaf in ferns and mosses that bears the sporangia.

- *In class, the teacher used "sporophyll" to mean leaf in ferns and mosses that bears the sporangia.*
- *The article explained what "sporophyll" means with a simple example.*

---

sporozoa *(noun)*

Strictly parasitic protozoans that are usually immobile; includes plasmodia and coccidia and piroplasms and malaria parasites.

- *They discussed "sporozoa" during the group presentation.*
- *In class, the teacher used "sporozoa" to mean strictly parasitic protozoans that are usually....*

---

sporozoan *(noun)*

Parasitic spore-forming protozoan.

- *She wrote a short paragraph that included "sporozoan."*
- *He looked up "sporozoan" because he had never seen it before.*

sporozoite *(noun)*

One of the minute active bodies into which sporozoans divide in one stage of their life cycle.

- *Understanding "sporozoite" helps you talk about this topic clearly.*
- *The article explained what "sporozoite" means with a simple example.*

sportively *(adverb)*

In a merry sportive manner.

- *The narrator describes the scene "sportively" in the final chapter.*
- *Place "sportively" carefully so the meaning stays clear.*

sportiveness *(noun)*

Lively high-spirited playfulness.

- *She wrote a short paragraph that included "sportiveness."*
- *He looked up "sportiveness" because he had never seen it before.*

spotted antbird *(noun)*

A kind of antbird.

- *She wrote a short paragraph that included "spotted antbird."*
- *He looked up "spotted antbird" because he had never seen it before.*

spotted bonytongue *(noun)*

A species of large fish found in Australian rivers.

- *They discussed "spotted bonytongue" during the group presentation.*
- *He looked up "spotted bonytongue" because he had never seen it before.*

spotted cowbane *(noun)*

Tall biennial water hemlock of northeastern North America having purple-spotted stems and clusters of extremely poisonous tuberous roots resembling small sweet potatoes.

- *Understanding "spotted cowbane" helps you talk about this topic clearly.*
- *The article explained what "spotted cowbane" means with a simple example.*

spotted squeateague *(noun)*

Weakfish of southern Atlantic and Gulf Coasts of United States.

- *She wrote a short paragraph that included "spotted squeateague."*
- *Understanding "spotted squeateague" helps you talk about this topic clearly.*

spotweld *(verb)*

Make circular welds.

- *These pipes are only spotwelded.*
- *Learners should practice how to use "spotweld" in real sentences.*

spouter *(noun)*

An obnoxious and foolish and loquacious talker.

- *In class, the teacher used "spouter" to mean an obnoxious and foolish and loquacious talker.*
- *The article explained what "spouter" means with a simple example.*

spraguea *(noun)*

Small genus of usually perennial herbs having deep woody taproots and flower heads of umbels or cymes.

- *He looked up "spraguea" because he had never seen it before.*
- *They discussed "spraguea" during the group presentation.*

- *In class, the teacher used "stanleya pinnata" to mean perennial of southwestern united states having....*
- *The article explained what "stanleya pinnata" means with a simple example.*

---

stannic *(adjective)*

Of or relating to or containing tin.

- *Would you call this situation "stannic"? Explain why.*
- *A "stannic" approach may work better in this case.*

---

stannic chloride *(noun)*

A colorless caustic liquid made by treating tin with chlorine.

- *In class, the teacher used "stannic chloride" to mean a colorless caustic liquid made by treating tin....*
- *The article explained what "stannic chloride" means with a simple example.*

---

stannic sulfide *(noun)*

A yellow pigment sometimes suspended in lacquer.

- *Understanding "stannic sulfide" helps you talk about this topic clearly.*
- *They discussed "stannic sulfide" during the group presentation.*

---

stannite *(noun)*

A dark grey mineral with a metallic luster that is a source of tin.

- *In class, the teacher used "stannite" to mean a dark grey mineral with a metallic luster that is....*
- *Understanding "stannite" helps you talk about this topic clearly.*

---

stapedectomy *(noun)*

Surgical removal of the stapes of the middle ear.

- *Understanding "stapedectomy" helps you talk about this topic clearly.*
- *The article explained what "stapedectomy" means with a simple example.*

---

stapelia *(noun)*

Any of various plants of the genus Stapelia having succulent leafless toothed stems resembling cacti and large foul-smelling (often star-shaped) flowers.

- *They discussed "stapelia" during the group presentation.*
- *He looked up "stapelia" because he had never seen it before.*

---

stapelias asterias *(noun)*

Stapelia of Cape Province having mostly dark red-brown flowers with flat starlike corollas.

- *He looked up "stapelias asterias" because he had never seen it before.*
- *She wrote a short paragraph that included "stapelias asterias."*

---

staphylaceae *(noun)*

A family of dicotyledonous plants of order Sapindales found mostly in the north temperate zone.

- *Understanding "staphylaceae" helps you talk about this topic clearly.*
- *The article explained what "staphylaceae" means with a simple example.*

---

staphylea *(noun)*

A genus of small trees or shrubs of the family Staphylaceae.

- *They discussed "staphylea" during the group presentation.*
- *He looked up "staphylea" because he had never seen it before.*

---

staplegun *(noun)*

A hand-held machine for driving staples home.

- *She wrote a short paragraph that included "staplegun."*
- *They discussed "staplegun" during the group presentation.*

---

star earthball *(noun)*

An earthball with a smooth upper surface that is at first buried in sand; the top of the fruiting body opens up to form segments like the ray of an umbel.

- *She wrote a short paragraph that included "star earthball."*
- *The article explained what "star earthball" means with a simple example.*

---

starchless *(adjective)*

Lacking starch.

- *Students compared "starchless" with similar adjectives in the lesson.*
- *Would you call this situation "starchless"? Explain why.*

---

starchlike *(adjective)*

Resembling starch.

- *Students compared "starchlike" with similar adjectives in the lesson.*
- *A "starchlike" approach may work better in this case.*

---

starets *(noun)*

A religious adviser (not necessarily a priest) in the Eastern Orthodox Church.

- *In class, the teacher used "starets" to mean a religious adviser (not necessarily a priest) in....*
- *The article explained what "starets" means with a simple example.*

---

starnose mole *(noun)*

Amphibious mole of eastern North America having pink fleshy tentacles around the nose.

- *Understanding "starnose mole" helps you talk about this topic clearly.*
- *In class, the teacher used "starnose mole" to mean amphibious mole of eastern north america having....*

---

starwort *(noun)*

Low-growing north temperate herb having small white star-shaped flowers; named for its alleged ability to ease sharp pains in the side.

- *Understanding "starwort" helps you talk about this topic clearly.*
- *They discussed "starwort" during the group presentation.*

---

stassano furnace *(noun)*

An electric furnace in which an electric arc provides the source of heat for making steel.

- *He looked up "stassano furnace" because he had never seen it before.*
- *She wrote a short paragraph that included "stassano furnace."*

---

statant *(adjective)*

Standing on four feet.

- *A "statant" approach may work better in this case.*
- *Would you call this situation "statant"? Explain why.*

---

An extreme accumulation of fat on the buttocks.

- *In class, the teacher used "steatopygia" to mean an extreme accumulation of fat on the buttocks.*
- *The article explained what "steatopygia" means with a simple example.*

steatornis *(noun)*

Type and sole genus of the family Steatornithidae.

- *Understanding "steatornis" helps you talk about this topic clearly.*
- *In class, the teacher used "steatornis" to mean type and sole genus of the family steatornithidae.*

steatornis caripensis *(noun)*

Nocturnal fruit-eating bird of South America that has fatty young yielding an oil that is used instead of butter.

- *The article explained what "steatornis caripensis" means with a simple example.*
- *They discussed "steatornis caripensis" during the group presentation.*

steenbok *(noun)*

Small plains antelope of southeastern Africa.

- *She wrote a short paragraph that included "steenbok."*
- *They discussed "steenbok" during the group presentation.*

steepish *(adjective)*

Somewhat steep.

- *A "steepish" approach may work better in this case.*
- *Her writing became clearer after she learned "steepish."*

steerageway *(noun)*

(nautical) the minimum rate of motion needed for a vessel to be maneuvered.

- *The article explained what "steerageway" means with a simple example.*
- *They discussed "steerageway" during the group presentation.*

steganopus *(noun)*

A genus of Phalaropidae.

- *They discussed "steganopus" during the group presentation.*
- *Understanding "steganopus" helps you talk about this topic clearly.*

steganopus tricolor *(noun)*

Breeds on the northern great plains of Canada.

- *The article explained what “steganopus tricolor” means with a simple example.*
- *She wrote a short paragraph that included “steganopus tricolor.”*

---

stegocephalia *(noun)*

In former classifications a division of class Amphibia comprising all pre-Jurassic and some later extinct large salamandriform amphibia.

- *She wrote a short paragraph that included “stegocephalia.”*
- *They discussed “stegocephalia” during the group presentation.*

---

stegosaur *(noun)*

Herbivorous ornithischian dinosaur with a row of bony plates along its back and a spiked tail probably used as a weapon.

- *They discussed “stegosaur” during the group presentation.*
- *She wrote a short paragraph that included “stegosaur.”*

---

stegosaur stenops *(noun)*

Herbivorous ornithischian dinosaur with a row of bony plates along its back and a spiked tail probably used as a weapon.

- *She wrote a short paragraph that included “stegosaur stenops.”*
- *Understanding “stegosaur stenops” helps you talk about this topic clearly.*

---

steinbok *(noun)*

Small plains antelope of southeastern Africa.

- *They discussed “steinbok” during the group presentation.*
- *In class, the teacher used “steinbok” to mean small plains antelope of southeastern africa.*

---

stelis *(noun)*

Any of various small tropical American orchids of the genus Stelis having long slender racemes of numerous small to minute flowers.

- *In class, the teacher used “stelis” to mean any of various small tropical american orchids of....*
- *Understanding “stelis” helps you talk about this topic clearly.*

---

stellaria holostea *(noun)*

Low-growing north temperate herb having small white star-shaped flowers; named for its alleged ability to ease sharp pains in the side.

- *Understanding “stellaria holostea” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “stellaria holostea.”*

---

stellate venule *(noun)*

A star-shaped group of venules in the renal cortex.

- *She wrote a short paragraph that included “stellate venule.”*
- *They discussed “stellate venule” during the group presentation.*

---

stemless hymenoxys *(noun)*

Perennial having tufted basal leaves and short leafless stalks each bearing a solitary yellow flower head; dry hillsides and plains of west central North America.

- *He looked up “stemless hymenoxys” because he had never seen it before.*
- *Understanding “stemless hymenoxys” helps you talk about this topic clearly.*

---

stemmatic *(adjective)*

Of or relating to a textual stemma.

- *Her writing became clearer after she learned “stemmatic.”*
- *The speaker chose “stemmatic” because it captured the feeling precisely.*

---

stenocarpus *(noun)*

Small genus of timber trees; Australia to Malaysia.

- *She wrote a short paragraph that included “stenocarpus.”*
- *The article explained what “stenocarpus” means with a simple example.*

---

stenocarpus salignus *(noun)*

Tree or tall shrub with shiny leaves and umbels of fragrant creamy-white flowers; yields hard heavy reddish wood.

- *The article explained what “stenocarpus salignus” means with a simple example.*

- *In class, the teacher used “stenocarpus salignus” to mean tree or tall shrub with shiny leaves and umbels of....*

---

stenocarpus sinuatus *(noun)*

Eastern Australian tree widely cultivated as a shade tree and for its glossy leaves and circular clusters of showy red to orange-scarlet flowers.

- *She wrote a short paragraph that included “stenocarpus sinuatus.”*
- *Understanding “stenocarpus sinuatus” helps you talk about this topic clearly.*

---

stenochlaena *(noun)*

Large tropical ferns; some epiphytic climbers and some terrestrial bog ferns; Africa; Asia; Australasia.

- *The article explained what “stenochlaena” means with a simple example.*
- *In class, the teacher used “stenochlaena” to mean large tropical ferns; some epiphytic climbers and....*

---

stenograph *(noun)*

A machine for typewriting shorthand characters.

- *The article explained what “stenograph” means with a simple example.*
- *Understanding “stenograph” helps you talk about this topic clearly.*

---

stenographical *(adjective)*

Of or relating to or employing stenography.

- *Students compared “stenographical” with similar adjectives in the lesson.*
- *It is useful to describe something as “stenographical” when it is of or relating to or employing stenography.*

---

stenopelmatidae *(noun)*

Long-horned grasshoppers.

- *The article explained what “stenopelmatidae” means with a simple example.*
- *In class, the teacher used “stenopelmatidae” to mean long-horned grasshoppers.*

---

stenopelmatus *(noun)*

Sand crickets.

- *In class, the teacher used “stenopelmatus” to mean sand crickets.*
- *They discussed “stenopelmatus” during the group presentation.*

---

stenopelmatus fuscus *(noun)*

Large wingless nocturnal grasshopper that burrows in loose soil along the Pacific coast of the United States.

- *She wrote a short paragraph that included “stenopelmatus fuscus.”*
- *He looked up “stenopelmatus fuscus” because he had never seen it before.*

---

stenopterygius *(noun)*

An ichthyosaur of the genus Stenopterygius.

- *The article explained what “stenopterygius” means with a simple example.*
- *She wrote a short paragraph that included “stenopterygius.”*

---

stenopterygius quadrisicissus *(noun)*

An ichthyosaur of the genus Stenopterygius.

- *She wrote a short paragraph that included “stenopterygius quadrisicissus.”*
- *Understanding “stenopterygius quadrisicissus” helps you talk about this topic clearly.*

---

stenosed *(adjective)*

Abnormally constricted body canal or passage.

- *A stenosed coronary artery.*
- *A “stenosed” approach may work better in this case.*

---

stenotaphrum *(noun)*

Lawn grasses.

- *Understanding “stenotaphrum” helps you talk about this topic clearly.*
- *They discussed “stenotaphrum” during the group presentation.*

---

stenotaphrum secundatum *(noun)*

Low mat-forming grass of southern United States and tropical America; grown as a lawn grass.

- *They discussed "stenotaphrum secundatum" during the group presentation.*
- *The article explained what "stenotaphrum secundatum" means with a simple example.*

---

stenotomus aculeatus *(noun)*

Porgy of southern Atlantic coastal waters of North America.

- *Understanding "stenotomus aculeatus" helps you talk about this topic clearly.*
- *In class, the teacher used "stenotomus aculeatus" to mean porgy of southern atlantic coastal waters of north....*

---

stenotomus chrysops *(noun)*

Found in Atlantic coastal waters of North America from South Carolina to Maine; esteemed as a panfish.

- *He looked up "stenotomus chrysops" because he had never seen it before.*
- *Understanding "stenotomus chrysops" helps you talk about this topic clearly.*

---

stenotus *(noun)*

Genus of western North American low evergreen shrubs growing in dense tufts.

- *She wrote a short paragraph that included "stenotus."*
- *Understanding "stenotus" helps you talk about this topic clearly.*

---

stenotus acaulis *(noun)*

Dark green erect herb of northwestern United States and southwestern Canada having stiff leaves in dense tufts and yellow flower heads; sometimes placed in genus Haplopappus.

- *The article explained what "stenotus acaulis" means with a simple example.*
- *In class, the teacher used "stenotus acaulis" to mean dark green erect herb of northwestern united states....*

---

stephane mallarme *(noun)*

French symbolist poet noted for his free verse (1842-1898).

- *The article explained what "stephane mallarme" means with a simple example.*
- *In class, the teacher used "stephane mallarme" to mean french symbolist poet noted for his free verse....*

---

stephanion *(noun)*

The craniometric point on the coronal suture above the acoustic meatus.

- *She wrote a short paragraph that included "stephanion."*
- *Understanding "stephanion" helps you talk about this topic clearly.*

---

stephanomeria *(noun)*

Malheur wire lettuce.

- *In class, the teacher used "stephanomeria" to mean malheur wire lettuce.*
- *He looked up "stephanomeria" because he had never seen it before.*

---

stephanomeria malheurensis *(noun)*

A small plant of Oregon resembling mustard; a threatened species.

- *Understanding "stephanomeria malheurensis" helps you talk about this topic clearly.*
- *In class, the teacher used "stephanomeria malheurensis" to mean a small plant of oregon resembling mustard; a....*

---

steradian *(noun)*

The unit of solid angle adopted under the Systeme International d'Unites.

- *She wrote a short paragraph that included "steradian."*
- *He looked up "steradian" because he had never seen it before.*

---

stercobilinogen *(noun)*

A chromogen formed in the intestine from the breakdown of bilirubin; yields urobilins on oxidation; some is excreted in the feces and some is resorbed and excreted in bile or urine.

- *They discussed "stercobilinogen" during the group presentation.*
- *Understanding "stercobilinogen" helps you talk about this topic clearly.*

---

stercolith *(noun)*

A hard mass of fecal matter.

- *The article explained what "stercolith" means with a simple example.*
- *In class, the teacher used "stercolith" to mean a hard mass of fecal matter.*

---

stercorariidae *(noun)*

Jaegers and skuas:.

- *She wrote a short paragraph that included "stercorariidae."*
- *They discussed "stercorariidae" during the group presentation.*

---

stercorarius *(noun)*

Type genus of the Stercorariidae: jaegers.

- *He looked up "stercorarius" because he had never seen it before.*
- *She wrote a short paragraph that included "stercorarius."*

---

stercorarius parasiticus *(noun)*

A variety of jaeger.

- *He looked up "stercorarius parasiticus" because he had never seen it before.*
- *In class, the teacher used "stercorarius parasiticus" to mean a variety of jaeger.*

---

sterculia acerifolia *(noun)*

South Australian tree having panicles of brilliant scarlet flowers.

- *The article explained what "sterculia acerifolia" means with a simple example.*
- *Understanding "sterculia acerifolia" helps you talk about this topic clearly.*

---

sterculia apetala *(noun)*

Large deciduous tree native to Panama and from which the country takes its name; having densely leafy crown and naked trunk.

- *He looked up "sterculia apetala" because he had never seen it before.*
- *In class, the teacher used "sterculia apetala" to mean large deciduous tree native to panama and from....*

---

sterculiaceae *(noun)*

A large family of plants of order Malvales.

- *Understanding "sterculiaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "sterculiaceae" to mean a large family of plants of order malvales.*

---

stereophony *(noun)*

Reproducer in which two microphones feed two or more loudspeakers to give a three-dimensional effect to the sound.

- *He looked up "stereophony" because he had never seen it before.*
- *They discussed "stereophony" during the group presentation.*

---

stereospondyli *(noun)*

Formerly a suborder of Stegocephalia; amphibia having vertebrae whose component elements are fused into a single piece.

- *He looked up "stereospondyli" because he had never seen it before.*
- *She wrote a short paragraph that included "stereospondyli."*

---

sternocleido mastoideus *(noun)*

One of two thick muscles running from the sternum and clavicle to the mastoid and occipital bone; turns head obliquely to the opposite side; when acting together they flex the neck and extend the head.

- *The article explained what "sternocleido mastoideus" means with a simple example.*
- *In class, the teacher used "sternocleido mastoideus" to mean one of two thick muscles running from the sternum....*

---

sternotherus *(noun)*

Musk turtles.

- *Understanding "sternotherus" helps you talk about this topic clearly.*
- *He looked up "sternotherus" because he had never seen it before.*

---

Of or relating to or like or in the manner of Stravinsky.

- *Her writing became clearer after she learned "stravinskian."*
- *A "stravinskian" approach may work better in this case.*

stravinskyan *(adjective)*

Of or relating to or like or in the manner of Stravinsky.

- *A "stravinskyan" approach may work better in this case.*
- *The speaker chose "stravinskyan" because it captured the feeling precisely.*

strawberry blite *(noun)*

European annual with clusters of greenish flowers followed by red pulpy berrylike fruit; naturalized North America.

- *She wrote a short paragraph that included "strawberry blite."*
- *They discussed "strawberry blite" during the group presentation.*

strawboard *(noun)*

A coarse yellow cardboard made of straw pulp.

- *She wrote a short paragraph that included "strawboard."*
- *Understanding "strawboard" helps you talk about this topic clearly.*

strawflower *(noun)*

Any of various plants of the genus Helipterum.

- *He looked up "strawflower" because he had never seen it before.*
- *They discussed "strawflower" during the group presentation.*

strawworm *(noun)*

Larva of chalcid flies injurious to the straw of wheat and other grains.

- *In class, the teacher used "strawworm" to mean larva of chalcid flies injurious to the straw of....*
- *The article explained what "strawworm" means with a simple example.*

streamlet *(noun)*

A small stream.

- *They discussed "streamlet" during the group presentation.*
- *Understanding "streamlet" helps you talk about this topic clearly.*

streetwalk *(verb)*

Walk the streets in search of customers.

- *She tried to use "streetwalk" carefully so everyone would understand.*
- *The coach explained when to use "streetwalk" and when to wait.*

strekelia *(noun)*

A monocotyledonous genus of the amaryllis family.

- *He looked up "strekelia" because he had never seen it before.*
- *Understanding "strekelia" helps you talk about this topic clearly.*

strekelia formosissima *(noun)*

Mexican bulbous herb cultivated for its handsome bright red solitary flower.

- *In class, the teacher used "strekelia formosissima" to mean mexican bulbous herb cultivated for its handsome....*
- *The article explained what "strekelia formosissima" means with a simple example.*

strelitziaceae *(noun)*

Woody plants with erect stems of tropical South America and South Africa and Madagascar; in some classifications included in the family Musaceae.

- *The article explained what "strelitziaceae" means with a simple example.*
- *She wrote a short paragraph that included "strelitziaceae."*

---

strenuosity *(noun)*

Intense energy.

- *They discussed "strenuosity" during the group presentation.*
- *He looked up "strenuosity" because he had never seen it before.*

---

strenuousness *(noun)*

Extreme effortfulness.

- *They discussed "strenuousness" during the group presentation.*
- *Understanding "strenuousness" helps you talk about this topic clearly.*

---

strepera *(noun)*

Bell magpies.

- *In class, the teacher used "strepera" to mean bell magpies.*
- *Understanding "strepera" helps you talk about this topic clearly.*

---

strepsiceros *(noun)*

African antelopes: kudus; bongos; nyalas; bushbucks.

- *He looked up "strepsiceros" because he had never seen it before.*
- *She wrote a short paragraph that included "strepsiceros."*

---

strepsirhini *(noun)*

In some classifications either coextensive with the Lemuroidea or comprising the true lemurs.

- *Understanding "strepsirhini" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "strepsirhini."*

---

streptobacillus *(noun)*

Any of various rod-shaped Gram-negative bacteria.

- *In class, the teacher used "streptobacillus" to mean any of various rod-shaped gram-negative bacteria.*
- *He looked up "streptobacillus" because he had never seen it before.*

---

streptococcic *(adjective)*

Of or relating to or caused by streptococci.

- *A "streptococcic" approach may work better in this case.*
- *Would you call this situation "streptococcic"? Explain why.*

---

streptococcus anhemolyticus *(noun)*

A species of bacteria.

- *Understanding "streptococcus anhemolyticus" helps you talk about this topic clearly.*
- *In class, the teacher used "streptococcus anhemolyticus" to mean a species of bacteria.*

---

streptodornase *(noun)*

An enzyme produced by some hemolytic strains of streptococcus that dissolves fibrinous secretions from infections; used medicinally (often in combination with streptokinase).

- *The article explained what "streptodornase" means with a simple example.*
- *Understanding "streptodornase" helps you talk about this topic clearly.*

---

streptolysin *(noun)*

Any of several hemolysins derived from strains of streptococcus.

- *In class, the teacher used "streptolysin" to mean any of several hemolysins derived from strains of....*
- *The article explained what "streptolysin" means with a simple example.*

---

streptomyces erythreus *(noun)*

Source of the antibiotic erythromycin.

- *She wrote a short paragraph that included "streptomyces erythreus."*

- *He looked up “streptomyces erythreus” because he had never seen it before.*

---

streptomycetaceae *(noun)*

Higher bacteria typically aerobic soil saprophytes.

- *Understanding “streptomycetaceae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “streptomycetaceae.”*

---

streptopelia *(noun)*

Turtledoves.

- *In class, the teacher used “streptopelia” to mean turtledoves.*
- *They discussed “streptopelia” during the group presentation.*

---

streptopelia risoria *(noun)*

Greyish Old World turtledove with a black band around the neck; often caged.

- *She wrote a short paragraph that included “streptopelia risoria.”*
- *Understanding “streptopelia risoria” helps you talk about this topic clearly.*

---

streptopelia turtur *(noun)*

The common European wild dove noted for its plaintive cooing.

- *In class, the teacher used “streptopelia turtur” to mean the common european wild dove noted for its....*
- *The article explained what “streptopelia turtur” means with a simple example.*

---

streptosolen *(noun)*

One species: marmalade bush.

- *He looked up “streptosolen” because he had never seen it before.*
- *She wrote a short paragraph that included “streptosolen.”*

---

streptothricin *(noun)*

A basic antibiotic derived from a soil actinomycete.

- *Understanding “streptothricin” helps you talk about this topic clearly.*
- *The article explained what “streptothricin” means with a simple example.*

---

stretchability *(noun)*

The capacity for being stretched.

- *The article explained what “stretchability” means with a simple example.*
- *They discussed “stretchability” during the group presentation.*

---

stretchiness *(noun)*

The capacity for being stretched.

- *The article explained what “stretchiness” means with a simple example.*
- *In class, the teacher used “stretchiness” to mean the capacity for being stretched.*

---

strickle *(noun)*

A tool used in a foundry to shape a mold in sand.

- *She wrote a short paragraph that included “strickle.”*
- *He looked up “strickle” because he had never seen it before.*

---

stridence *(noun)*

Having the timbre of a loud high-pitched sound.

- *She wrote a short paragraph that included “stridence.”*
- *Understanding “stridence” helps you talk about this topic clearly.*

---

stridulate *(verb)*

Make a shrill creaking noise by rubbing together special bodily structures.

- *Male insects such as crickets or grasshoppers stridulate.*
- *In everyday English, people use “stridulate” when talking about this idea.*

---

strigidae *(noun)*

A family of nocturnal birds of the order Strigiformes.

- *Understanding "strigidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "strigidae."*

---

strikebound *(adjective)*

Closed or immobilized by a strike.

- *A strikebound airline.*
- *It is useful to describe something as "strikebound" when it is closed or immobilized by a strike.*

---

strikingness *(noun)*

The quality of standing out strongly and distinctly.

- *Understanding "strikingness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "strikingness."*

---

striped muishond *(noun)*

Ferret-sized muishond often tamed.

- *He looked up "striped muishond" because he had never seen it before.*
- *They discussed "striped muishond" during the group presentation.*

---

stripteaser *(noun)*

A performer who provides erotic entertainment by undressing to music.

- *In class, the teacher used "stripteaser" to mean a performer who provides erotic entertainment by....*
- *The article explained what "stripteaser" means with a simple example.*

---

strix aluco *(noun)*

Reddish-brown European owl having a round head with black eyes.

- *In class, the teacher used "strix aluco" to mean reddish-brown european owl having a round head with....*
- *The article explained what "strix aluco" means with a simple example.*

---

strizostedion vitreum glaucum *(noun)*

Variety inhabiting the Great Lakes.

- *They discussed "strizostedion vitreum glaucum" during the group presentation.*
- *The article explained what "strizostedion vitreum glaucum" means with a simple example.*

---

strobile *(noun)*

Cone-shaped mass of ovule- or spore-bearing scales or bracts.

- *He looked up "strobile" because he had never seen it before.*
- *She wrote a short paragraph that included "strobile."*

---

strobilomyces *(noun)*

Fungi similar to Boletus but with a shaggy scaly cap.

- *She wrote a short paragraph that included "strobilomyces."*
- *He looked up "strobilomyces" because he had never seen it before.*

---

strobilomyces floccopus *(noun)*

Edible mild-tasting mushroom found in coniferous woodlands of eastern North America.

- *They discussed "strobilomyces floccopus" during the group presentation.*
- *She wrote a short paragraph that included "strobilomyces floccopus."*

---

strobilus *(noun)*

Cone-shaped mass of ovule- or spore-bearing scales or bracts.

- *The article explained what "strobilus" means with a simple example.*
- *In class, the teacher used "strobilus" to mean cone-shaped mass of ovule- or spore-bearing scales....*

---

stromateidae *(noun)*

Butterfishes: harvest fishes; dollar fishes.

- *He looked up "stromateidae" because he had never seen it before.*
- *In class, the teacher used "stromateidae" to mean butterfishes: harvest fishes; dollar fishes.*

---

strombidae *(noun)*

The family of conchs.

- *He looked up "strombidae" because he had never seen it before.*
- *They discussed "strombidae" during the group presentation.*

---

strongylodon *(noun)*

Genus of Polynesian or southeastern Asian shrubs or vines.

- *He looked up "strongylodon" because he had never seen it before.*
- *She wrote a short paragraph that included "strongylodon."*

---

strongylodon macrobotrys *(noun)*

Vigorous Philippine evergreen twining liana; grown for spectacular festoons of green flowers that resemble lobster claws.

- *They discussed "strongylodon macrobotrys" during the group presentation.*
- *Understanding "strongylodon macrobotrys" helps you talk about this topic clearly.*

---

strontianite *(noun)*

A mineral consisting of strontium carbonate.

- *Understanding "strontianite" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "strontianite."*

---

strophanthin *(noun)*

A bitter and very toxic glycoside derived from plants of the genus Strophanthus; in moderate doses it is a cardiac stimulant but in larger doses it is a powerful poison; used in Africa as an arrow poison.

- *In class, the teacher used "strophanthin" to mean a bitter and very toxic glycoside derived from....*
- *The article explained what "strophanthin" means with a simple example.*

---

strophanthus kombe *(noun)*

Plant that is a source of strophanthin.

- *They discussed "strophanthus kombe" during the group presentation.*
- *She wrote a short paragraph that included "strophanthus kombe."*

---

stropharia *(noun)*

Genus of gill fungi with brown spores that is closely related to Agaricus; here placed in its own family Strophariaceae.

- *They discussed "stropharia" during the group presentation.*
- *The article explained what "stropharia" means with a simple example.*

---

stropharia ambigua *(noun)*

A gilled fungus with a long stalk and a yellow slimy cap from which fragments of the broken veil hang; gills are initially white but become dark brown as spores are released.

- *She wrote a short paragraph that included "stropharia ambigua."*
- *He looked up "stropharia ambigua" because he had never seen it before.*

---

stropharia hornemannii *(noun)*

A gilled fungus with a large slimy purple or olive cap; gills become purple with age; the stalk is long and richly decorated with pieces of the white sheath that extends up to a ring.

- *She wrote a short paragraph that included "stropharia hornemannii."*
- *He looked up "stropharia hornemannii" because he had never seen it before.*

---

stropharia rugoso-annulata *(noun)*

A large gilled fungus with a broad cap and a long stalk; the cap is dark brown; the white gills turn dark purplish brown with age; edible and choice.

- *The article explained what "stropharia rugoso-annulata" means with a simple example.*
- *They discussed "stropharia rugoso-annulata" during the group presentation.*

---

strophariaceae *(noun)*

Sometimes included in family Agaricaceae.

- *She wrote a short paragraph that included "strophariaceae."*
- *He looked up "strophariaceae" because he had never seen it before.*

struthio *(noun)*

Type genus of the Struthionidae: African ostriches.

- *He looked up "struthio" because he had never seen it before.*
- *She wrote a short paragraph that included "struthio."*

struthio camelus *(noun)*

Fast-running African flightless bird with two-toed feet; largest living bird.

- *Understanding "struthio camelus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "struthio camelus."*

struthiomimus *(noun)*

Small light-boned toothless dinosaur resembling an ostrich in size and proportions.

- *She wrote a short paragraph that included "struthiomimus."*
- *He looked up "struthiomimus" because he had never seen it before.*

struthionidae *(noun)*

Tall terrestrial birds: ostriches.

- *She wrote a short paragraph that included "struthionidae."*
- *Understanding "struthionidae" helps you talk about this topic clearly.*

struthioniformes *(noun)*

A ratite bird order: ostriches and related extinct birds; known from the Pleistocene onward.

- *She wrote a short paragraph that included "struthioniformes."*
- *He looked up "struthioniformes" because he had never seen it before.*

strymon melinus *(noun)*

Larvae are pests of various economic plants.

- *The article explained what "strymon melinus" means with a simple example.*
- *Understanding "strymon melinus" helps you talk about this topic clearly.*

stubbiness *(noun)*

The property of being short and broad.

- *He looked up "stubbiness" because he had never seen it before.*
- *She wrote a short paragraph that included "stubbiness."*

studhorse *(noun)*

Adult male horse kept for breeding.

- *The article explained what "studhorse" means with a simple example.*
- *Understanding "studhorse" helps you talk about this topic clearly.*

stuffily *(adverb)*

In a stuffy manner.

- *'Come in please,' he said stuffily.*
- *Place "stuffily" carefully so the meaning stays clear.*

stultification *(noun)*

The act of making something futile and useless (as by routine).

- *He looked up "stultification" because he had never seen it before.*
- *In class, the teacher used "stultification" to mean the act of making something futile and useless (as....*

stultify *(verb)*

Deprive of strength or efficiency; make useless or worthless.

- *Nobody is legally allowed to stultify himself.*
- *Learners should practice how to use "stultify" in real sentences.*

stumblebum *(noun)*

A second-rate prize fighter.

- *Understanding "stumblebum" helps you talk about this topic clearly.*
- *The article explained what "stumblebum" means with a simple example.*

---

stumbler *(noun)*

A walker or runner who trips and almost falls.

- *Understanding "stumbler" helps you talk about this topic clearly.*
- *The article explained what "stumbler" means with a simple example.*

---

stumpknocker *(noun)*

Inhabits streams from South Carolina to Florida; esteemed panfish.

- *He looked up "stumpknocker" because he had never seen it before.*
- *She wrote a short paragraph that included "stumpknocker."*

---

stuntedness *(noun)*

Smallness of stature.

- *He looked up "stuntedness" because he had never seen it before.*
- *They discussed "stuntedness" during the group presentation.*

---

stuporous *(adjective)*

Stunned or confused and slow to react (as from blows or drunkenness or exhaustion).

- *Would you call this situation "stuporous"? Explain why.*
- *The speaker chose "stuporous" because it captured the feeling precisely.*

---

sturnella *(noun)*

A genus of passerine birds including the meadowlarks.

- *Understanding "sturnella" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sturnella."*

---

sturnella magna *(noun)*

A meadowlark of eastern North America.

- *He looked up "sturnella magna" because he had never seen it before.*
- *Understanding "sturnella magna" helps you talk about this topic clearly.*

---

sturnella neglecta *(noun)*

A meadowlark of western North America.

- *They discussed "sturnella neglecta" during the group presentation.*
- *In class, the teacher used "sturnella neglecta" to mean a meadowlark of western north america.*

---

sturnidae *(noun)*

Old World starlings.

- *The article explained what "sturnidae" means with a simple example.*
- *They discussed "sturnidae" during the group presentation.*

---

styleless *(adjective)*

Lacking in style or elegance.

- *A styleless way of dressing.*
- *Expensive but styleless country tweeds.*

---

stylemark *(noun)*

A distinctive characteristic or attribute.

- *He looked up "stylemark" because he had never seen it before.*
- *She wrote a short paragraph that included "stylemark."*

---

stylite *(noun)*

An early Christian ascetic who lived on top of high pillars.

- *Understanding "stylite" helps you talk about this topic clearly.*

- *They discussed "stylite" during the group presentation.*

stylomastoid vein *(noun)*

A vein that drains the tympanic cavity and empties into the retromandibular vein.

- *Understanding "stylomastoid vein" helps you talk about this topic clearly.*
- *In class, the teacher used "stylomastoid vein" to mean a vein that drains the tympanic cavity and empties....*

stylomecon *(noun)*

One species: wind poppy.

- *The article explained what "stylomecon" means with a simple example.*
- *In class, the teacher used "stylomecon" to mean one species: wind poppy.*

stylomecon heterophyllum *(noun)*

California wild poppy with bright red flowers.

- *The article explained what "stylomecon heterophyllum" means with a simple example.*
- *In class, the teacher used "stylomecon heterophyllum" to mean california wild poppy with bright red flowers.*

stylophorum *(noun)*

Wood poppies.

- *Understanding "stylophorum" helps you talk about this topic clearly.*
- *The article explained what "stylophorum" means with a simple example.*

stylophorum diphyllum *(noun)*

Perennial herb native to woodland of the eastern United States having yellow flowers.

- *He looked up "stylophorum diphyllum" because he had never seen it before.*
- *Understanding "stylophorum diphyllum" helps you talk about this topic clearly.*

stylopodium *(noun)*

An enlargement at the base of the style in some Umbelliferae.

- *She wrote a short paragraph that included "stylopodium."*
- *He looked up "stylopodium" because he had never seen it before.*

stylostixis *(noun)*

Treatment of pain or disease by inserting the tips of needles at specific points on the skin.

- *They discussed "stylostixis" during the group presentation.*
- *Understanding "stylostixis" helps you talk about this topic clearly.*

stymy *(verb)*

Hinder or prevent the progress or accomplishment of.

- *Learners should practice how to use "stymy" in real sentences.*
- *The coach explained when to use "stymy" and when to wait.*

styphelia *(noun)*

Australian heathlike shrubs.

- *She wrote a short paragraph that included "styphelia."*
- *They discussed "styphelia" during the group presentation.*

styphelia humifusum *(noun)*

Small prostrate or ascending shrub having scarlet flowers and succulent fruit resembling cranberries; sometimes placed in genus Styphelia.

- *Understanding "styphelia humifusum" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "styphelia humifusum."*

styphelia triflora *(noun)*

Heathlike shrub of southwestern Australia grown for its sharply scented foliage and pink flowers followed by pentagonal fruit.

- *In class, the teacher used "styphelia triflora" to mean heathlike shrub of southwestern australia grown for....*
- *They discussed "styphelia triflora" during the group presentation.*

stypsis *(noun)*

The ability to contract or draw together soft body tissues to check blood flow or restrict secretion of fluids.

- *She wrote a short paragraph that included "stypsis."*
- *They discussed "stypsis" during the group presentation.*

---

styracaceae *(noun)*

A widely distributed family of shrubs and trees of order Ebenales.

- *They discussed "styracaceae" during the group presentation.*
- *Understanding "styracaceae" helps you talk about this topic clearly.*

---

styracosaur *(noun)*

An unusual ceratopsian dinosaur having many large spikes around the edge of its bony frill and a long nose horn; late Cretaceous.

- *He looked up "styracosaur" because he had never seen it before.*
- *They discussed "styracosaur" during the group presentation.*

---

styracosaurus *(noun)*

An unusual ceratopsian dinosaur having many large spikes around the edge of its bony frill and a long nose horn; late Cretaceous.

- *Understanding "styracosaurus" helps you talk about this topic clearly.*
- *The article explained what "styracosaurus" means with a simple example.*

---

styrax obassia *(noun)*

Small tree native to Japan.

- *She wrote a short paragraph that included "styrax obassia."*
- *He looked up "styrax obassia" because he had never seen it before.*

---

suasible *(adjective)*

Being susceptible to persuasion.

- *Students compared "suasible" with similar adjectives in the lesson.*
- *A "suasible" approach may work better in this case.*

---

suaveness *(noun)*

The quality of being bland and gracious or ingratiating in manner.

- *They discussed "suaveness" during the group presentation.*
- *She wrote a short paragraph that included "suaveness."*

---

subartesian *(adjective)*

(of water) rising naturally in a well to a height appreciably above that of the surrounding water table but not flowing out of the well.

- *The speaker chose "subartesian" because it captured the feeling precisely.*
- *A "subartesian" approach may work better in this case.*

---

subclass acnidosporidia *(noun)*

A subclass of Sporozoa.

- *She wrote a short paragraph that included "subclass acnidosporidia."*
- *The article explained what "subclass acnidosporidia" means with a simple example.*

---

subclass actinopoda *(noun)*

Heliozoans; radiolarians.

- *He looked up "subclass actinopoda" because he had never seen it before.*
- *Understanding "subclass actinopoda" helps you talk about this topic clearly.*

---

subclass alismatidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises about 500 species in 14 families of aquatic and semiaquatic herbs.

- *In class, the teacher used "subclass alismatidae" to mean one of four subclasses or superorders of....*
- *The article explained what "subclass alismatidae" means with a simple example.*

---

subclass amphineura *(noun)*

A class of Gastropoda.

- *In class, the teacher used "subclass amphineura" to mean a class of gastropoda.*
- *He looked up "subclass amphineura" because he had never seen it before.*

---

subclass anapsida *(noun)*

Oldest known reptiles; turtles and extinct Permian forms.

- *She wrote a short paragraph that included "subclass anapsida."*
- *They discussed "subclass anapsida" during the group presentation.*

---

subclass archaeornithes *(noun)*

Primitive reptile-like fossil birds of the Jurassic or early Cretaceous.

- *Understanding "subclass archaeornithes" helps you talk about this topic clearly.*
- *He looked up "subclass archaeornithes" because he had never seen it before.*

---

subclass archosauria *(noun)*

A large subclass of diapsid reptiles including: crocodiles; alligators; dinosaurs; pterosaurs; plesiosaurs; ichthyosaurs; thecodonts.

- *Understanding "subclass archosauria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "subclass archosauria."*

---

subclass arecidae *(noun)*

One of four subclasses or superorder of Monocotyledones; comprises about 6400 species in 5 families of trees and shrubs and terrestrial herbs and a few free-floating aquatics including: Palmae; Araceae; Pandanaceae and Lemnaceae.

- *In class, the teacher used "subclass arecidae" to mean one of four subclasses or superorder of....*
- *Understanding "subclass arecidae" helps you talk about this topic clearly.*

---

subclass asteridae *(noun)*

A group of mostly sympetalous herbs and some trees and shrubs mostly with 2 fused carpels; contains 43 families including Campanulales; Solanaceae; Scrophulariaceae; Labiatae; Verbenaceae; Rubiaceae; Compositae; sometimes classified as a superorder.

- *In class, the teacher used "subclass asteridae" to mean a group of mostly sympetalous herbs and some trees....*
- *He looked up "subclass asteridae" because he had never seen it before.*

---

subclass branchiopoda *(noun)*

Primitive aquatic mainly freshwater crustaceans: fairy shrimps; brine shrimps; tadpole shrimps; can shrimps; water fleas.

- *In class, the teacher used "subclass branchiopoda" to mean primitive aquatic mainly freshwater crustaceans:....*
- *The article explained what "subclass branchiopoda" means with a simple example.*

---

subclass cnidosporidia *(noun)*

Single-host parasites of lower vertebrates and invertebrates.

- *In class, the teacher used "subclass cnidosporidia" to mean single-host parasites of lower vertebrates and....*
- *Understanding "subclass cnidosporidia" helps you talk about this topic clearly.*

---

subclass commelinidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises about 19,000 species in 25 families of mostly terrestrial herbs especially of moist places including: Cyperaceae; Gramineae; Bromeliaceae; and Zingiberaceae.

- *The article explained what "subclass commelinidae" means with a simple example.*
- *In class, the teacher used "subclass commelinidae" to mean one of four subclasses or superorders of....*

---

subclass copepoda *(noun)*

Minute planktonic or parasitic crustaceans.

- *They discussed "subclass copepoda" during the group presentation.*
- *She wrote a short paragraph that included "subclass copepoda."*

---

subclass crossopterygii *(noun)*

Fishes having paired fins resembling limbs and regarded as ancestral to amphibians.

- *Understanding "subclass crossopterygii" helps you talk about this topic clearly.*
- *The article explained what "subclass crossopterygii" means with a simple example.*

---

subclass diapsida *(noun)*

Used in former classifications to include all living reptiles except turtles; superseded by the two subclasses Lepidosauria and Archosauria.

- *They discussed "subclass diapsida" during the group presentation.*

- *Understanding "subclass diapsida" helps you talk about this topic clearly.*

subclass dibranchia *(noun)*

Comprising all living cephalopods except the family Nautilidae: the orders Octopoda (octopuses) and Decapoda (squids and cuttlefish).

- *They discussed "subclass dibranchia" during the group presentation.*
- *The article explained what "subclass dibranchia" means with a simple example.*

subclass dibranchiata *(noun)*

Comprising all living cephalopods except the family Nautilidae: the orders Octopoda (octopuses) and Decapoda (squids and cuttlefish).

- *Understanding "subclass dibranchiata" helps you talk about this topic clearly.*
- *The article explained what "subclass dibranchiata" means with a simple example.*

subclass dipnoi *(noun)*

Bony fishes of the southern hemisphere that breathe by a modified air bladder as well as gills; sometimes classified as an order of Crossopterygii.

- *The article explained what "subclass dipnoi" means with a simple example.*
- *In class, the teacher used "subclass dipnoi" to mean bony fishes of the southern hemisphere that breathe....*

subclass discomycetes *(noun)*

A large and taxonomically difficult group of Ascomycetes in which the fleshy fruiting body is disklike or cup-shaped.

- *He looked up "subclass discomycetes" because he had never seen it before.*
- *She wrote a short paragraph that included "subclass discomycetes."*

subclass elasmobranchii *(noun)*

Sharks; rays; dogfishes; skates.

- *They discussed "subclass elasmobranchii" during the group presentation.*
- *She wrote a short paragraph that included "subclass elasmobranchii."*

subclass entomostraca *(noun)*

In some older classifications includes the Branchiopoda and Copepoda and Ostracoda and Cirripedia; no longer in technical use.

- *Understanding "subclass entomostraca" helps you talk about this topic clearly.*
- *They discussed "subclass entomostraca" during the group presentation.*

subclass euascomycetes *(noun)*

Category not used in many classification systems.

- *In class, the teacher used "subclass euascomycetes" to mean category not used in many classification systems.*
- *They discussed "subclass euascomycetes" during the group presentation.*

subclass euryalida *(noun)*

Basket stars.

- *Understanding "subclass euryalida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "subclass euryalida."*

subclass eutheria *(noun)*

All mammals except monotremes and marsupials.

- *They discussed "subclass eutheria" during the group presentation.*
- *He looked up "subclass eutheria" because he had never seen it before.*

subclass exopterygota *(noun)*

Subclass of insects characterized by gradual and usually incomplete metamorphosis.

- *They discussed "subclass exopterygota" during the group presentation.*
- *She wrote a short paragraph that included "subclass exopterygota."*

subclass heterobasidiomycetes *(noun)*

Category used in some classification systems for various basidiomycetous fungi including rusts and smuts.

- *In class, the teacher used "subclass heterobasidiomycetes" to mean category used in some classification systems for....*
- *The article explained what "subclass heterobasidiomycetes" means with a simple example.*

subclass holocephali *(noun)*

Chimaeras and extinct forms.

- *He looked up "subclass holocephali" because he had never seen it before.*
- *They discussed "subclass holocephali" during the group presentation.*

subclass homobasidiomycetes *(noun)*

Category used in some classification systems for various basidiomycetous fungi including e.g. mushrooms and puffballs which are usually placed in the classes Gasteromycetes and Hymenomycetes.

- *He looked up "subclass homobasidiomycetes" because he had never seen it before.*
- *Understanding "subclass homobasidiomycetes" helps you talk about this topic clearly.*

subclass lepidosauria *(noun)*

Diapsid reptiles: lizards; snakes; tuataras.

- *In class, the teacher used "subclass lepidosauria" to mean diapsid reptiles: lizards; snakes; tuataras.*
- *They discussed "subclass lepidosauria" during the group presentation.*

subclass liliidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises 17 families including: Liliaceae; Alliaceae; Amaryllidaceae; Iridaceae; Orchidaceae; Trilliaceae.

- *The article explained what "subclass liliidae" means with a simple example.*
- *They discussed "subclass liliidae" during the group presentation.*

subclass metatheria *(noun)*

Pouched animals.

- *In class, the teacher used "subclass metatheria" to mean pouched animals.*
- *The article explained what "subclass metatheria" means with a simple example.*

subclass ophiurida *(noun)*

Brittle stars.

- *She wrote a short paragraph that included "subclass ophiurida."*
- *Understanding "subclass ophiurida" helps you talk about this topic clearly.*

subclass opisthobranchia *(noun)*

Gastropods having the gills when present posterior to the heart and having no operculum: includes sea slugs; sea butterflies; sea hares.

- *He looked up "subclass opisthobranchia" because he had never seen it before.*
- *Understanding "subclass opisthobranchia" helps you talk about this topic clearly.*

subclass pantotheria *(noun)*

Generalized extinct mammals widespread during the Jurassic; commonly conceded to be ancestral to marsupial and placental mammals.

- *The article explained what "subclass pantotheria" means with a simple example.*
- *In class, the teacher used "subclass pantotheria" to mean generalized extinct mammals widespread during the....*

subclass phytomastigina *(noun)*

Plantlike flagellates containing chlorophyll; often considered unicellular algae.

- *They discussed "subclass phytomastigina" during the group presentation.*
- *Understanding "subclass phytomastigina" helps you talk about this topic clearly.*

subclass prototheria *(noun)*

Echidnas; platypus.

- *The article explained what "subclass prototheria" means with a simple example.*
- *She wrote a short paragraph that included "subclass prototheria."*

subclass rhizopoda *(noun)*

Creeping protozoans: amoebas and foraminifers.

- *In class, the teacher used "subclass rhizopoda" to mean creeping protozoans: amoebas and foraminifers.*
- *He looked up "subclass rhizopoda" because he had never seen it before.*

subclass rosidae *(noun)*

A group of trees and shrubs and herbs mostly with polypetalous flowers; contains 108 families including Rosaceae; Crassulaceae; Myrtaceae; Melastomaceae; Euphorbiaceae; Umbelliferae.

- *She wrote a short paragraph that included "subclass rosidae."*
- *They discussed "subclass rosidae" during the group presentation.*

---

subclass selachii *(noun)*

Sharks; rays; dogfishes; skates.

- *Understanding "subclass selachii" helps you talk about this topic clearly.*
- *In class, the teacher used "subclass selachii" to mean sharks; rays; dogfishes; skates.*

---

subclass synapsida *(noun)*

Extinct reptiles of the Permian to Jurassic considered ancestral to mammals.

- *Understanding "subclass synapsida" helps you talk about this topic clearly.*
- *The article explained what "subclass synapsida" means with a simple example.*

---

subclass telosporidia *(noun)*

Parasitic sporozoans that form spores containing one or more infective sporozoites.

- *She wrote a short paragraph that included "subclass telosporidia."*
- *Understanding "subclass telosporidia" helps you talk about this topic clearly.*

---

subclass zoomastigina *(noun)*

In some classifications considered a phylum of the kingdom Protista; holozoic or saprozoic flagellates.

- *She wrote a short paragraph that included "subclass zoomastigina."*
- *The article explained what "subclass zoomastigina" means with a simple example.*

---

subdivider *(noun)*

Someone who divides parts into smaller parts (especially a divider of land into building sites).

- *They discussed "subdivider" during the group presentation.*
- *In class, the teacher used "subdivider" to mean someone who divides parts into smaller parts....*

---

subdivision ascomycotina *(noun)*

A large subdivision of Eumycota including Hemiascomycetes and Plectomycetes and Pyrenomycetes and Discomycetes; sac fungi; in some classification systems considered a division of the kingdom Fungi.

- *She wrote a short paragraph that included "subdivision ascomycotina."*
- *Understanding "subdivision ascomycotina" helps you talk about this topic clearly.*

---

subdivision cycadophyta *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *Understanding "subdivision cycadophyta" helps you talk about this topic clearly.*
- *The article explained what "subdivision cycadophyta" means with a simple example.*

---

subdivision cycadophytina *(noun)*

Palmlike gymnosperms: includes the surviving order Cycadales and several extinct orders; possibly not a natural group; in some systems considered a class (Cycadopsida) and in others a subdivision (Cycadophytina or Cycadophyta).

- *She wrote a short paragraph that included "subdivision cycadophytina."*
- *He looked up "subdivision cycadophytina" because he had never seen it before.*

---

subdivision deuteromycota *(noun)*

Large and heterogeneous form division of fungi comprising forms for which no sexually reproductive stage is known.

- *He looked up "subdivision deuteromycota" because he had never seen it before.*
- *Understanding "subdivision deuteromycota" helps you talk about this topic clearly.*

---

subdivision deuteromycotina *(noun)*

Large and heterogeneous form division of fungi comprising forms for which no sexually reproductive stage is known.

- *The article explained what "subdivision deuteromycotina" means with a simple example.*
- *In class, the teacher used "subdivision deuteromycotina" to mean large and heterogeneous form division of fungi....*

---

subdivision ginkgophyta *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *Understanding "subdivision ginkgophyta" helps you talk about this topic clearly.*

- *In class, the teacher used "subdivision ginkgophyta" to mean ginkgos: in some systems classified as a class and....*

subdivision ginkgophytina *(noun)*

Ginkgos: in some systems classified as a class and in others as a subdivision; used in some classifications for one of five subdivisions of Gymnospermophyta.

- *She wrote a short paragraph that included "subdivision ginkgophytina."*
- *He looked up "subdivision ginkgophytina" because he had never seen it before.*

subdivision gnetophytina *(noun)*

Gymnospermous flowering plants; supposed link between conifers and angiosperms; in some systems classified as a class (Gnetopsida) and in others as a subdivision (Gnetophytina or Gnetophyta).

- *They discussed "subdivision gnetophytina" during the group presentation.*
- *Understanding "subdivision gnetophytina" helps you talk about this topic clearly.*

subdivision mastigomycota *(noun)*

Fungi in which the spores and gametes are motile; in some systems placed in the Phycomycetes group with the Zygomycota.

- *In class, the teacher used "subdivision mastigomycota" to mean fungi in which the spores and gametes are motile;....*
- *Understanding "subdivision mastigomycota" helps you talk about this topic clearly.*

subdivision mastigomycotina *(noun)*

Fungi in which the spores and gametes are motile; in some systems placed in the Phycomycetes group with the Zygomycota.

- *They discussed "subdivision mastigomycotina" during the group presentation.*
- *The article explained what "subdivision mastigomycotina" means with a simple example.*

subdivision pinophytina *(noun)*

Most conifers: in some systems classified as a class (Pinopsida) and in others as a subdivision (Pinophytina); used in some classifications for one of five subdivisions of Gymnospermophyta.

- *He looked up "subdivision pinophytina" because he had never seen it before.*
- *Understanding "subdivision pinophytina" helps you talk about this topic clearly.*

subdivision pteropsida *(noun)*

Used in former classifications to include all ferns and flowering plants and divided into the three classes Filicinae and Gymnospermae and Angiospermae.

- *He looked up "subdivision pteropsida" because he had never seen it before.*
- *Understanding "subdivision pteropsida" helps you talk about this topic clearly.*

subdivision taxophytina *(noun)*

Yews: in some systems classified as a class (Taxopsida) and in others as a subdivision (Taxophytina) used in some classifications for one of five subdivisions of Gymnospermophyta.

- *He looked up "subdivision taxophytina" because he had never seen it before.*
- *She wrote a short paragraph that included "subdivision taxophytina."*

subdivision zygomycota *(noun)*

Division of fungi having sexually produced zygospores.

- *She wrote a short paragraph that included "subdivision zygomycota."*
- *Understanding "subdivision zygomycota" helps you talk about this topic clearly.*

subdivision zygomycotina *(noun)*

Division of fungi having sexually produced zygospores.

- *In class, the teacher used "subdivision zygomycotina" to mean division of fungi having sexually produced zygospores.*
- *The article explained what "subdivision zygomycotina" means with a simple example.*

subduable *(adjective)*

Susceptible to being subjugated.

- *The speaker chose "subduable" because it captured the feeling precisely.*
- *It is useful to describe something as "subduable" when it is susceptible to being subjugated.*

subduedness *(noun)*

A disposition to be patient and long suffering.

- *She wrote a short paragraph that included "subduedness."*
- *They discussed "subduedness" during the group presentation.*

subduer *(noun)*

Someone who overcomes and establishes ascendancy and control by force or persuasion.

- *In class, the teacher used "subduer" to mean someone who overcomes and establishes ascendancy....*
- *He looked up "subduer" because he had never seen it before.*

---

suberic acid *(noun)*

A dicarboxylic acid found in cork.

- *In class, the teacher used "suberic acid" to mean a dicarboxylic acid found in cork.*
- *He looked up "suberic acid" because he had never seen it before.*

---

subfamily acoraceae *(noun)*

Used in some classifications for the genus Acorus which is usually assigned to Araceae.

- *In class, the teacher used "subfamily acoraceae" to mean used in some classifications for the genus acorus....*
- *Understanding "subfamily acoraceae" helps you talk about this topic clearly.*

---

subfamily anserinae *(noun)*

Used in some classifications for the swans.

- *He looked up "subfamily anserinae" because he had never seen it before.*
- *Understanding "subfamily anserinae" helps you talk about this topic clearly.*

---

subfamily bassariscidae *(noun)*

In some classifications considered a separate family.

- *He looked up "subfamily bassariscidae" because he had never seen it before.*
- *In class, the teacher used "subfamily bassariscidae" to mean in some classifications considered a separate family.*

---

subfamily bovinae *(noun)*

Term not used technically; essentially coextensive with genus Bos: cattle; buffalo; and sometimes includes kudu.

- *He looked up "subfamily bovinae" because he had never seen it before.*
- *Understanding "subfamily bovinae" helps you talk about this topic clearly.*

---

subfamily cabombaceae *(noun)*

In some classifications considered an independent family of water lilies; comprises the genera Cabomba and Brasenia.

- *They discussed "subfamily cabombaceae" during the group presentation.*
- *He looked up "subfamily cabombaceae" because he had never seen it before.*

---

subfamily caesalpinioideae *(noun)*

Alternative name in some classification systems for the family Caesalpiniaceae.

- *He looked up "subfamily caesalpinioideae" because he had never seen it before.*
- *She wrote a short paragraph that included "subfamily caesalpinioideae."*

---

subfamily carduelinae *(noun)*

Used in some classifications for a subgroup of finches.

- *They discussed "subfamily carduelinae" during the group presentation.*
- *In class, the teacher used "subfamily carduelinae" to mean used in some classifications for a subgroup of finches.*

---

subfamily carpinaceae *(noun)*

Used in some classification systems for the genera Carpinus, Ostryopsis, and Ostryopsis.

- *In class, the teacher used "subfamily carpinaceae" to mean used in some classification systems for the genera....*
- *The article explained what "subfamily carpinaceae" means with a simple example.*

---

subfamily cetoniidae *(noun)*

Considered a separate family in some classification systems.

- *The article explained what "subfamily cetoniidae" means with a simple example.*
- *In class, the teacher used "subfamily cetoniidae" to mean considered a separate family in some classification....*

---

subfamily corylaceae *(noun)*

Used in some classification systems for the genus Corylus.

- *In class, the teacher used "subfamily corylaceae" to mean used in some classification systems for the genus....*
- *He looked up "subfamily corylaceae" because he had never seen it before.*

---

subfamily dracaenaceae *(noun)*

One of two subfamilies to which some classification systems assign some members of the Agavaceae.

- *The article explained what "subfamily dracaenaceae" means with a simple example.*
- *She wrote a short paragraph that included "subfamily dracaenaceae."*

---

subfamily dracenaceae *(noun)*

One of two subfamilies to which some classification systems assign some members of the Agavaceae.

- *Understanding "subfamily dracenaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "subfamily dracenaceae" to mean one of two subfamilies to which some classification....*

---

subfamily emberizidae *(noun)*

Buntings and some New World sparrows.

- *The article explained what "subfamily emberizidae" means with a simple example.*
- *She wrote a short paragraph that included "subfamily emberizidae."*

---

subfamily emberizinae *(noun)*

Buntings and some New World sparrows.

- *She wrote a short paragraph that included "subfamily emberizinae."*
- *The article explained what "subfamily emberizinae" means with a simple example.*

---

subfamily garrulinae *(noun)*

Subfamily of the crow family: jays.

- *In class, the teacher used "subfamily garrulinae" to mean subfamily of the crow family: jays.*
- *Understanding "subfamily garrulinae" helps you talk about this topic clearly.*

---

subfamily hydromyinae *(noun)*

Water rats of Australia and New Guinea.

- *She wrote a short paragraph that included "subfamily hydromyinae."*
- *The article explained what "subfamily hydromyinae" means with a simple example.*

---

subfamily lutrinae *(noun)*

Subdivision not used in some classifications: otters.

- *In class, the teacher used "subfamily lutrinae" to mean subdivision not used in some classifications: otters.*
- *He looked up "subfamily lutrinae" because he had never seen it before.*

---

subfamily malaconotinae *(noun)*

An African bush shrikes.

- *They discussed "subfamily malaconotinae" during the group presentation.*
- *The article explained what "subfamily malaconotinae" means with a simple example.*

---

subfamily melinae *(noun)*

Subdivision not used in some classifications: badgers.

- *She wrote a short paragraph that included "subfamily melinae."*
- *He looked up "subfamily melinae" because he had never seen it before.*

---

subfamily melolonthidae *(noun)*

Considered a separate family in some classification systems.

- *The article explained what "subfamily melolonthidae" means with a simple example.*
- *They discussed "subfamily melolonthidae" during the group presentation.*

---

subfamily mephitinae *(noun)*

Subdivision not used in some classifications: skunks.

- *In class, the teacher used "subfamily mephitinae" to mean subdivision not used in some classifications: skunks.*
- *The article explained what "subfamily mephitinae" means with a simple example.*

subfamily merginae *(noun)*

Mergansers and closely related diving birds.

- *Understanding "subfamily merginae" helps you talk about this topic clearly.*
- *He looked up "subfamily merginae" because he had never seen it before.*

subfamily mimosoideae *(noun)*

Alternative name used in some classification systems for the family Mimosaceae.

- *Understanding "subfamily mimosoideae" helps you talk about this topic clearly.*
- *The article explained what "subfamily mimosoideae" means with a simple example.*

subfamily nelumbonaceae *(noun)*

In some classifications considered an independent family of water lilies; comprises the single genus Nelumbo.

- *They discussed "subfamily nelumbonaceae" during the group presentation.*
- *In class, the teacher used "subfamily nelumbonaceae" to mean in some classifications considered an independent....*

subfamily numididae *(noun)*

Guinea fowl and related birds of Africa and Madagascar.

- *He looked up "subfamily numididae" because he had never seen it before.*
- *She wrote a short paragraph that included "subfamily numididae."*

subfamily numidinae *(noun)*

Guinea fowl and related birds of Africa and Madagascar.

- *Understanding "subfamily numidinae" helps you talk about this topic clearly.*
- *The article explained what "subfamily numidinae" means with a simple example.*

subfamily papilionoideae *(noun)*

Alternative name used in some classification systems for the family Papilionaceae.

- *She wrote a short paragraph that included "subfamily papilionoideae."*
- *They discussed "subfamily papilionoideae" during the group presentation.*

subfamily perdicidae *(noun)*

Old World partridges.

- *He looked up "subfamily perdicidae" because he had never seen it before.*
- *She wrote a short paragraph that included "subfamily perdicidae."*

subfamily perdicinae *(noun)*

Old World partridges.

- *Understanding "subfamily perdicinae" helps you talk about this topic clearly.*
- *The article explained what "subfamily perdicinae" means with a simple example.*

subfamily peristediinae *(noun)*

In some classifications considered a subfamily of Triglidae comprising the armored searobins.

- *He looked up "subfamily peristediinae" because he had never seen it before.*
- *They discussed "subfamily peristediinae" during the group presentation.*

subfamily petauristidae *(noun)*

Old World flying squirrels.

- *In class, the teacher used "subfamily petauristidae" to mean old world flying squirrels.*
- *Understanding "subfamily petauristidae" helps you talk about this topic clearly.*

subfamily philadelphaceae *(noun)*

One genus; usually included in family Hydrangeaceae.

- *In class, the teacher used "subfamily philadelphaceae" to mean one genus; usually included in family hydrangeaceae.*
- *Understanding "subfamily philadelphaceae" helps you talk about this topic clearly.*

subfamily potoroinae *(noun)*

Rat kangaroos.

- *He looked up "subfamily potoroinae" because he had never seen it before.*
- *In class, the teacher used "subfamily potoroinae" to mean rat kangaroos.*

---

subfamily pythoninae *(noun)*

Old World boas: pythons; in some classifications considered a separate family from Boidae.

- *The article explained what "subfamily pythoninae" means with a simple example.*
- *In class, the teacher used "subfamily pythoninae" to mean old world boas: pythons; in some classifications....*

---

subfamily smilacaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *Understanding "subfamily smilacaceae" helps you talk about this topic clearly.*
- *They discussed "subfamily smilacaceae" during the group presentation.*

---

subfamily sylviinae *(noun)*

Alternative classification for the Old World warblers.

- *He looked up "subfamily sylviinae" because he had never seen it before.*
- *Understanding "subfamily sylviinae" helps you talk about this topic clearly.*

---

subfamily triglinae *(noun)*

In some classifications considered a subfamily of Triglidae comprising searobins having ordinary scales and no barbels (true searobins).

- *She wrote a short paragraph that included "subfamily triglinae."*
- *He looked up "subfamily triglinae" because he had never seen it before.*

---

subfamily turdinae *(noun)*

Alternative classification for the thrushes.

- *He looked up "subfamily turdinae" because he had never seen it before.*
- *Understanding "subfamily turdinae" helps you talk about this topic clearly.*

---

subfamily uvulariaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae.

- *She wrote a short paragraph that included "subfamily uvulariaceae."*
- *He looked up "subfamily uvulariaceae" because he had never seen it before.*

---

subfigure *(noun)*

A figure that is a part of another figure.

- *In class, the teacher used "subfigure" to mean a figure that is a part of another figure.*
- *He looked up "subfigure" because he had never seen it before.*

---

subfusc *(adjective)*

Devoid of brightness or appeal.

- *A subfusc mining town.*
- *Dark subfusc clothing.*

---

subgenus azaleastrum *(noun)*

Group of evergreen or deciduous shrubs formerly considered a separate genus; now included in the genus Rhododendron.

- *She wrote a short paragraph that included "subgenus azaleastrum."*
- *Understanding "subgenus azaleastrum" helps you talk about this topic clearly.*

---

subgenus calliopsis *(noun)*

Used in some classification systems for some plants of genus Coreopsis.

- *The article explained what "subgenus calliopsis" means with a simple example.*
- *Understanding "subgenus calliopsis" helps you talk about this topic clearly.*

---

subgross *(adjective)*

Too small to be visible to the naked eye.

- *It is useful to describe something as "subgross" when it is too small to be visible to the naked eye.*

- *A "subgross" approach may work better in this case.*

---

subjoin *(verb)*

Add to the end.

- *Learners should practice how to use "subjoin" in real sentences.*
- *The coach explained when to use "subjoin" and when to wait.*

---

subjoining *(noun)*

The act of supplementing.

- *In class, the teacher used "subjoining" to mean the act of supplementing.*
- *Understanding "subjoining" helps you talk about this topic clearly.*

---

subjugable *(adjective)*

Susceptible to being subjugated.

- *Students compared "subjugable" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "subjugable."*

---

subjugator *(noun)*

A conqueror who defeats and enslaves.

- *Understanding "subjugator" helps you talk about this topic clearly.*
- *He looked up "subjugator" because he had never seen it before.*

---

subjunction *(noun)*

The act of supplementing.

- *He looked up "subjunction" because he had never seen it before.*
- *Understanding "subjunction" helps you talk about this topic clearly.*

---

subkingdom *(noun)*

(biology) a taxonomic group comprising a major division of a kingdom.

- *She wrote a short paragraph that included "subkingdom."*
- *He looked up "subkingdom" because he had never seen it before.*

---

subkingdom metazoa *(noun)*

Multicellular animals having cells differentiated into tissues and organs and usually a digestive cavity and nervous system.

- *In class, the teacher used "subkingdom metazoa" to mean multicellular animals having cells differentiated....*
- *Understanding "subkingdom metazoa" helps you talk about this topic clearly.*

---

subkingdom parazoa *(noun)*

Multicellular organisms having less-specialized cells than in the Metazoa; comprises the single phylum Porifera.

- *The article explained what "subkingdom parazoa" means with a simple example.*
- *She wrote a short paragraph that included "subkingdom parazoa."*

---

sublieutenant *(noun)*

An officer ranking next below a lieutenant.

- *She wrote a short paragraph that included "sublieutenant."*
- *Understanding "sublieutenant" helps you talk about this topic clearly.*

---

sublunar *(adjective)*

Situated between the earth and the moon.

- *It is useful to describe something as "sublunar" when it is situated between the earth and the moon.*
- *The speaker chose "sublunar" because it captured the feeling precisely.*

---

subluxate *(verb)*

Sprain or dislocate slightly.

- *Subluxate the hip.*
- *He did not know how to use "subluxate" until he saw an example.*

---

submaxilla *(noun)*

The jaw in vertebrates that is hinged to open the mouth.

- *In class, the teacher used "submaxilla" to mean the jaw in vertebrates that is hinged to open the mouth.*
- *The article explained what "submaxilla" means with a simple example.*

---

submergible *(adjective)*

Capable of being immersed in water or functioning while submerged.

- *A submergible electric frying pan.*
- *A "submergible" approach may work better in this case.*

---

submerse *(verb)*

Sink below the surface; go under or as if under water.

- *Learners should practice how to use "submerse" in real sentences.*
- *She tried to use "submerse" carefully so everyone would understand.*

---

subocean *(adjective)*

Formed or situated or occurring beneath the ocean or the ocean bed.

- *Suboceanic oil resources.*
- *Would you call this situation "subocean"? Explain why.*

---

suboceanic *(adjective)*

Formed or situated or occurring beneath the ocean or the ocean bed.

- *Suboceanic oil resources.*
- *Would you call this situation "suboceanic"? Explain why.*

---

subocular *(adjective)*

Situated on or below the floor of the eye socket.

- *Students compared "subocular" with similar adjectives in the lesson.*
- *A "subocular" approach may work better in this case.*

---

suborder alcyonacea *(noun)*

Comprising the soft corals.

- *He looked up "suborder alcyonacea" because he had never seen it before.*
- *In class, the teacher used "suborder alcyonacea" to mean comprising the soft corals.*

---

suborder anisoptera *(noun)*

Dragonflies.

- *In class, the teacher used "suborder anisoptera" to mean dragonflies.*
- *Understanding "suborder anisoptera" helps you talk about this topic clearly.*

---

suborder anseres *(noun)*

Used in some especially older classifications; coextensive with the family Anatidae.

- *They discussed "suborder anseres" during the group presentation.*
- *The article explained what "suborder anseres" means with a simple example.*

---

suborder anthropoidea *(noun)*

Monkeys; apes; hominids.

- *Understanding "suborder anthropoidea" helps you talk about this topic clearly.*
- *In class, the teacher used "suborder anthropoidea" to mean monkeys; apes; hominids.*

---

suborder blattaria *(noun)*

Cockroaches; in some classifications considered an order.

- *Understanding "suborder blattaria" helps you talk about this topic clearly.*
- *In class, the teacher used "suborder blattaria" to mean cockroaches; in some classifications considered an....*

---

suborder blattodea *(noun)*

Cockroaches; in some classifications considered an order.

- *He looked up "suborder blattodea" because he had never seen it before.*
- *They discussed "suborder blattodea" during the group presentation.*

---

suborder blennioidea *(noun)*

Blennies; butterfishes; gunnels.

- *Understanding "suborder blennioidea" helps you talk about this topic clearly.*
- *The article explained what "suborder blennioidea" means with a simple example.*

---

suborder carnosaura *(noun)*

Largest carnivorous land animals ever known.

- *They discussed "suborder carnosaura" during the group presentation.*
- *In class, the teacher used "suborder carnosaura" to mean largest carnivorous land animals ever known.*

---

suborder cephalaspida *(noun)*

Extinct group of armored fish-like vertebrates; taxonomy is not clear.

- *She wrote a short paragraph that included "suborder cephalaspida."*
- *They discussed "suborder cephalaspida" during the group presentation.*

---

suborder ceratopsia *(noun)*

Horned dinosaurs.

- *She wrote a short paragraph that included "suborder ceratopsia."*
- *They discussed "suborder ceratopsia" during the group presentation.*

---

suborder ceratosaura *(noun)*

Primitive saurischian dinosaurs.

- *He looked up "suborder ceratosaura" because he had never seen it before.*
- *She wrote a short paragraph that included "suborder ceratosaura."*

---

suborder charadrii *(noun)*

Shorebirds: plovers; sandpipers; avocets; phalaropes; coursers; stone curlews.

- *She wrote a short paragraph that included "suborder charadrii."*
- *The article explained what "suborder charadrii" means with a simple example.*

---

suborder clamatores *(noun)*

Used in some classification systems; a suborder or superfamily nearly coextensive with suborder Tyranni; Passeriformes having relatively simple vocal organs and little power of song; clamatorial birds.

- *She wrote a short paragraph that included "suborder clamatores."*
- *They discussed "suborder clamatores" during the group presentation.*

---

suborder euronithopoda *(noun)*

Widespread group including duck-billed dinosaurs and their early relatives (hadrosaurs, trachodon and iguanodon).

- *She wrote a short paragraph that included "suborder euronithopoda."*
- *Understanding "suborder euronithopoda" helps you talk about this topic clearly.*

---

suborder gorgonacea *(noun)*

Red corals and sea fans.

- *He looked up "suborder gorgonacea" because he had never seen it before.*
- *She wrote a short paragraph that included "suborder gorgonacea."*

---

suborder gorgoniacea *(noun)*

Red corals and sea fans.

- *She wrote a short paragraph that included "suborder gorgoniacea."*
- *He looked up "suborder gorgoniacea" because he had never seen it before.*

---

suborder heterostraci *(noun)*

Extinct group of armored jawless fishes or fish-like vertebrate; taxonomy is not clear.

- *They discussed "suborder heterostraci" during the group presentation.*
- *The article explained what "suborder heterostraci" means with a simple example.*

suborder hyperoartia *(noun)*

Lampreys as distinguished from hagfishes.

- *In class, the teacher used "suborder hyperoartia" to mean lampreys as distinguished from hagfishes.*
- *The article explained what "suborder hyperoartia" means with a simple example.*

suborder hyperotreta *(noun)*

Hagfishes as distinguished from lampreys.

- *The article explained what "suborder hyperotreta" means with a simple example.*
- *In class, the teacher used "suborder hyperotreta" to mean hagfishes as distinguished from lampreys.*

suborder hystricomorpha *(noun)*

An order of rodents including: porcupines; guinea pigs; chinchillas; etc.

- *He looked up "suborder hystricomorpha" because he had never seen it before.*
- *Understanding "suborder hystricomorpha" helps you talk about this topic clearly.*

suborder lacertilia *(noun)*

True lizards; including chameleons and geckos.

- *Understanding "suborder lacertilia" helps you talk about this topic clearly.*
- *They discussed "suborder lacertilia" during the group presentation.*

suborder lemuroidea *(noun)*

Lemuridae; Lorisidae; Daubentoniidae; Indriidae; used in some classifications instead of Prosimii; in others considered a subdivision of Prosimii.

- *The article explained what "suborder lemuroidea" means with a simple example.*
- *They discussed "suborder lemuroidea" during the group presentation.*

suborder limicolae *(noun)*

Term used in some classifications for migratory shorebirds; coextensive with the Charadrii.

- *The article explained what "suborder limicolae" means with a simple example.*
- *They discussed "suborder limicolae" during the group presentation.*

suborder lipotyphla *(noun)*

Moles; hedgehogs; true shrews.

- *He looked up "suborder lipotyphla" because he had never seen it before.*
- *They discussed "suborder lipotyphla" during the group presentation.*

suborder maniraptora *(noun)*

Advanced theropods including oviraptorids and dromaeosaurs and possibly even modern birds.

- *Understanding "suborder maniraptora" helps you talk about this topic clearly.*
- *He looked up "suborder maniraptora" because he had never seen it before.*

suborder manteodea *(noun)*

Mantises; in former classifications considered a suborder of Orthoptera.

- *Understanding "suborder manteodea" helps you talk about this topic clearly.*
- *He looked up "suborder manteodea" because he had never seen it before.*

suborder marginocephalia *(noun)*

Includes boneheaded (pachycephalosaurs) and horned (ceratopsian) dinosaurs.

- *Understanding "suborder marginocephalia" helps you talk about this topic clearly.*
- *He looked up "suborder marginocephalia" because he had never seen it before.*

suborder megaloptera *(noun)*

In some classifications considered a separate order: alderflies; dobsonflies; snake flies.

- *She wrote a short paragraph that included "suborder megaloptera."*
- *Understanding "suborder megaloptera" helps you talk about this topic clearly.*

suborder menotyphla *(noun)*

Elephant shrews; tree shrews.

- *They discussed "suborder menotyphla" during the group presentation.*
- *He looked up "suborder menotyphla" because he had never seen it before.*

---

suborder menurae *(noun)*

Lyrebirds and scrubbirds.

- *She wrote a short paragraph that included "suborder menurae."*
- *Understanding "suborder menurae" helps you talk about this topic clearly.*

---

suborder microchiroptera *(noun)*

Most of the bats in the world; all bats except fruit bats insectivorous bats.

- *They discussed "suborder microchiroptera" during the group presentation.*
- *In class, the teacher used "suborder microchiroptera" to mean most of the bats in the world; all bats except....*

---

suborder mugiloidea *(noun)*

Fishes distinguished by abdominal pelvic fins: families Mugilidae; Atherinidae; Sphyraenidae.

- *Understanding "suborder mugiloidea" helps you talk about this topic clearly.*
- *The article explained what "suborder mugiloidea" means with a simple example.*

---

suborder myomorpha *(noun)*

True rats and mice and related rodents.

- *In class, the teacher used "suborder myomorpha" to mean true rats and mice and related rodents.*
- *Understanding "suborder myomorpha" helps you talk about this topic clearly.*

---

suborder mysticeti *(noun)*

Baleen whales: right whales; rorquals; blue whales; humpbacks.

- *They discussed "suborder mysticeti" during the group presentation.*
- *She wrote a short paragraph that included "suborder mysticeti."*

---

suborder myxiniformes *(noun)*

Hagfishes as distinguished from lampreys.

- *He looked up "suborder myxiniformes" because he had never seen it before.*
- *Understanding "suborder myxiniformes" helps you talk about this topic clearly.*

---

suborder myxinoidei *(noun)*

Hagfishes as distinguished from lampreys.

- *The article explained what "suborder myxinoidei" means with a simple example.*
- *In class, the teacher used "suborder myxinoidei" to mean hagfishes as distinguished from lampreys.*

---

suborder natantia *(noun)*

Shrimp; prawns; etc.

- *He looked up "suborder natantia" because he had never seen it before.*
- *She wrote a short paragraph that included "suborder natantia."*

---

suborder nematocera *(noun)*

Mosquitoes; fungus gnats; crane flies; gnats; sand flies.

- *She wrote a short paragraph that included "suborder nematocera."*
- *The article explained what "suborder nematocera" means with a simple example.*

---

suborder nothosauria *(noun)*

A suborder of Sauropterygia.

- *They discussed "suborder nothosauria" during the group presentation.*
- *She wrote a short paragraph that included "suborder nothosauria."*

---

suborder odontoceti *(noun)*

Toothed whales: dolphins; porpoises; sperm whales; beaked whales.

- *Understanding "suborder odontoceti" helps you talk about this topic clearly.*

- *They discussed “suborder odontoceti” during the group presentation.*

suborder ornithomimida *(noun)*

Lightly built medium-size theropods.

- *In class, the teacher used “suborder ornithomimida” to mean lightly built medium-size theropods.*
- *They discussed “suborder ornithomimida” during the group presentation.*

suborder ornithopoda *(noun)*

Widespread group including duck-billed dinosaurs and their early relatives (hadrosaurs, trachodon and iguanodon).

- *They discussed “suborder ornithopoda” during the group presentation.*
- *In class, the teacher used “suborder ornithopoda” to mean widespread group including duck-billed dinosaurs....*

suborder oscines *(noun)*

Two names for the suborder of typical songbirds.

- *Understanding “suborder oscines” helps you talk about this topic clearly.*
- *The article explained what “suborder oscines” means with a simple example.*

suborder osteostraci *(noun)*

Extinct group of armored fish-like vertebrates; taxonomy is not clear.

- *Understanding “suborder osteostraci” helps you talk about this topic clearly.*
- *They discussed “suborder osteostraci” during the group presentation.*

suborder otides *(noun)*

Terrestrial game birds of the Old World and Australia: bustards.

- *Understanding “suborder otides” helps you talk about this topic clearly.*
- *In class, the teacher used “suborder otides” to mean terrestrial game birds of the old world and....*

suborder pachycephalosaurus *(noun)*

Boneheaded dinosaurs; late Cretaceous.

- *He looked up “suborder pachycephalosaurus” because he had never seen it before.*
- *In class, the teacher used “suborder pachycephalosaurus” to mean boneheaded dinosaurs; late cretaceous.*

suborder passeres *(noun)*

Two names for the suborder of typical songbirds.

- *Understanding “suborder passeres” helps you talk about this topic clearly.*
- *They discussed “suborder passeres” during the group presentation.*

suborder percoidea *(noun)*

In some classifications nearly or exactly equivalent to the Perciformes which are considered a suborder.

- *In class, the teacher used “suborder percoidea” to mean in some classifications nearly or exactly....*
- *He looked up “suborder percoidea” because he had never seen it before.*

suborder petromyzoniformes *(noun)*

Lampreys as distinguished from hagfishes.

- *Understanding “suborder petromyzoniformes” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “suborder petromyzoniformes.”*

suborder pinnipedia *(noun)*

Seals; sea lions; walruses.

- *The article explained what “suborder pinnipedia” means with a simple example.*
- *In class, the teacher used “suborder pinnipedia” to mean seals; sea lions; walruses.*

suborder plesiosauria *(noun)*

Any of the plesiosaurs.

- *The article explained what “suborder plesiosauria” means with a simple example.*
- *In class, the teacher used “suborder plesiosauria” to mean any of the plesiosaurs.*

suborder prosauropoda *(noun)*

The earliest known dinosaurs.

- *They discussed "suborder prosauropoda" during the group presentation.*
- *In class, the teacher used "suborder prosauropoda" to mean the earliest known dinosaurs.*

---

suborder prosimii *(noun)*

Not used in all classifications; in some classifications considered coextensive with the Lemuroidea; in others includes both Lemuroidea and Tarsioidea.

- *Understanding "suborder prosimii" helps you talk about this topic clearly.*
- *The article explained what "suborder prosimii" means with a simple example.*

---

suborder reptantia *(noun)*

Lobsters; crabs.

- *He looked up "suborder reptantia" because he had never seen it before.*
- *She wrote a short paragraph that included "suborder reptantia."*

---

suborder ruminantia *(noun)*

Cattle; bison; sheep; goats; antelopes; deer; chevrotains; giraffes; camels.

- *Understanding "suborder ruminantia" helps you talk about this topic clearly.*
- *They discussed "suborder ruminantia" during the group presentation.*

---

suborder sauropoda *(noun)*

Any of the sauropod dinosaurs.

- *He looked up "suborder sauropoda" because he had never seen it before.*
- *They discussed "suborder sauropoda" during the group presentation.*

---

suborder sauropodomorpha *(noun)*

Gigantic herbivorous dinosaurs having huge bodies with long necks and small heads: Prosauropoda and Sauropoda (apatosaurus, diplodocus and titanosaurs).

- *They discussed "suborder sauropodomorpha" during the group presentation.*
- *Understanding "suborder sauropodomorpha" helps you talk about this topic clearly.*

---

suborder sciuromorpha *(noun)*

Large more or less primitive rodents: squirrels; marmots; gophers; beavers; etc.

- *Understanding "suborder sciuromorpha" helps you talk about this topic clearly.*
- *In class, the teacher used "suborder sciuromorpha" to mean large more or less primitive rodents: squirrels;....*

---

suborder scombroidea *(noun)*

Mackerels; tunas; albacores; bonitos; swordfishes; sailfishes.

- *He looked up "suborder scombroidea" because he had never seen it before.*
- *In class, the teacher used "suborder scombroidea" to mean mackerels; tunas; albacores; bonitos; swordfishes;....*

---

suborder scorpaenoidea *(noun)*

Mail-cheeked fishes: scorpionfishes; gurnards.

- *She wrote a short paragraph that included "suborder scorpaenoidea."*
- *He looked up "suborder scorpaenoidea" because he had never seen it before.*

---

suborder strepsirhini *(noun)*

In some classifications either coextensive with the Lemuroidea or comprising the true lemurs.

- *He looked up "suborder strepsirhini" because he had never seen it before.*
- *She wrote a short paragraph that included "suborder strepsirhini."*

---

suborder tarsioidea *(noun)*

In some classifications assigned to the suborder Prosimii.

- *She wrote a short paragraph that included "suborder tarsioidea."*
- *He looked up "suborder tarsioidea" because he had never seen it before.*

---

suborder theropoda *(noun)*

Carnivorous saurischian dinosaurs with short forelimbs; Jurassic and Cretaceous.

- *Understanding "suborder theropoda" helps you talk about this topic clearly.*
- *The article explained what "suborder theropoda" means with a simple example.*

---

suborder thyreophora *(noun)*

Armored dinosaurs: stegosaurs and ankylosaurs.

- *She wrote a short paragraph that included "suborder thyreophora."*
- *The article explained what "suborder thyreophora" means with a simple example.*

---

suborder tyranni *(noun)*

New World flycatchers; antbirds; oven birds; woodhewers.

- *She wrote a short paragraph that included "suborder tyranni."*
- *He looked up "suborder tyranni" because he had never seen it before.*

---

suborder xenarthra *(noun)*

Armadillos; American anteaters; sloths.

- *The article explained what "suborder xenarthra" means with a simple example.*
- *They discussed "suborder xenarthra" during the group presentation.*

---

suborder zygoptera *(noun)*

Damselflies.

- *The article explained what "suborder zygoptera" means with a simple example.*
- *In class, the teacher used "suborder zygoptera" to mean damselflies.*

---

subordinative *(adjective)*

Serving to connect a subordinate clause to a main clause.

- *The speaker chose "subordinative" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "subordinative."*

---

suborner *(noun)*

Someone who pays (or otherwise incites) you to commit a wrongful act.

- *He looked up "suborner" because he had never seen it before.*
- *She wrote a short paragraph that included "suborner."*

---

subphylum craniata *(noun)*

Fishes; amphibians; reptiles; birds; mammals.

- *Understanding "subphylum craniata" helps you talk about this topic clearly.*
- *The article explained what "subphylum craniata" means with a simple example.*

---

subphylum pentastomida *(noun)*

Tongue worms.

- *In class, the teacher used "subphylum pentastomida" to mean tongue worms.*
- *He looked up "subphylum pentastomida" because he had never seen it before.*

---

subsequentness *(noun)*

Following in time.

- *Understanding "subsequentness" helps you talk about this topic clearly.*
- *He looked up "subsequentness" because he had never seen it before.*

---

subserviently *(adverb)*

In an obsequious manner.

- *The narrator describes the scene "subserviently" in the final chapter.*
- *Try rewriting the sentence and include "subserviently" naturally.*

---

subshrub *(noun)*

Low-growing woody shrub or perennial with woody base.

- *Understanding "subshrub" helps you talk about this topic clearly.*
- *The article explained what "subshrub" means with a simple example.*

subsidiser *(noun)*

Someone who assists or supports by giving a subsidy.

- *They discussed "subsidiser" during the group presentation.*
- *The article explained what "subsidiser" means with a simple example.*

subsidizer *(noun)*

Someone who assists or supports by giving a subsidy.

- *In class, the teacher used "subsidizer" to mean someone who assists or supports by giving a subsidy.*
- *He looked up "subsidizer" because he had never seen it before.*

subsister *(noun)*

One who lives through affliction.

- *In class, the teacher used "subsister" to mean one who lives through affliction.*
- *The article explained what "subsister" means with a simple example.*

substantialness *(noun)*

The quality of being substantial or having substance.

- *The article explained what "substantialness" means with a simple example.*
- *They discussed "substantialness" during the group presentation.*

substantiative *(adjective)*

Serving to support or corroborate.

- *Would you call this situation "substantiative"? Explain why.*
- *Her writing became clearer after she learned "substantiative."*

substantival *(adjective)*

Of or relating to or having the nature or function of a substantive (i.e. a noun or noun equivalent).

- *A substantival constituent.*
- *Students compared "substantival" with similar adjectives in the lesson.*

subterraneous *(adjective)*

Being or operating under the surface of the earth.

- *Students compared "subterraneous" with similar adjectives in the lesson.*
- *A "subterraneous" approach may work better in this case.*

subthalamus *(noun)*

The ventral part of the thalamus.

- *They discussed "subthalamus" during the group presentation.*
- *In class, the teacher used "subthalamus" to mean the ventral part of the thalamus.*

subtilin *(noun)*

A polypeptide antibiotic (similar to bacitracin) obtained from a soil bacterium.

- *He looked up "subtilin" because he had never seen it before.*
- *Understanding "subtilin" helps you talk about this topic clearly.*

subtilise *(verb)*

Make (senses) more keen.

- *She tried to use "subtilise" carefully so everyone would understand.*
- *Learners should practice how to use "subtilise" in real sentences.*

subtopia *(noun)*

Monotonous urban sprawl of standardized buildings.

- *She wrote a short paragraph that included "subtopia."*
- *Understanding "subtopia" helps you talk about this topic clearly.*

subtracter *(noun)*

A person who subtracts numbers.

- *She wrote a short paragraph that included "subtracter."*
- *The article explained what "subtracter" means with a simple example.*

---

subtrahend *(noun)*

The number to be subtracted from the minuend.

- *He looked up "subtrahend" because he had never seen it before.*
- *In class, the teacher used "subtrahend" to mean the number to be subtracted from the minuend.*

---

subtreasury *(noun)*

A subordinate treasury or place of deposit.

- *She wrote a short paragraph that included "subtreasury."*
- *He looked up "subtreasury" because he had never seen it before.*

---

subtropic *(adjective)*

Of or relating to or characteristic of conditions in the subtropics.

- *Even near the equator vegetation at 5000 ft is subtropical rather than tropical.*
- *The speaker chose "subtropic" because it captured the feeling precisely.*

---

subularia *(noun)*

Small genus of herbs of north temperate regions and mountains of tropical Africa.

- *Understanding "subularia" helps you talk about this topic clearly.*
- *The article explained what "subularia" means with a simple example.*

---

subularia aquatica *(noun)*

Small aquatic plant having tufted awl-shaped leaves in a basal rosette and minute white flowers; circumboreal.

- *They discussed "subularia aquatica" during the group presentation.*
- *He looked up "subularia aquatica" because he had never seen it before.*

---

suburbanise *(verb)*

Take on suburban character.

- *He did not know how to use "suburbanise" until he saw an example.*
- *She tried to use "suburbanise" carefully so everyone would understand.*

---

suburbanised *(adjective)*

Surrounded by many suburbs.

- *The speaker chose "suburbanised" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "suburbanised."*

---

suburbanize *(verb)*

Take on suburban character.

- *The city suburbanized.*
- *Highly suburbanized cities.*

---

subverter *(noun)*

A radical supporter of political or social revolution.

- *He looked up "subverter" because he had never seen it before.*
- *Understanding "subverter" helps you talk about this topic clearly.*

---

subvocaliser *(noun)*

Someone who articulates speech without uttering sounds.

- *Understanding "subvocaliser" helps you talk about this topic clearly.*
- *The article explained what "subvocaliser" means with a simple example.*

---

subvocalizer *(noun)*

Someone who articulates speech without uttering sounds.

- *The article explained what "subvocalizer" means with a simple example.*

- *They discussed "subvocalizer" during the group presentation.*

---

succade *(noun)*

Fruit cooked in sugar syrup and encrusted with a sugar crystals.

- *Understanding "succade" helps you talk about this topic clearly.*
- *The article explained what "succade" means with a simple example.*

---

succeeder *(noun)*

A person with a record of successes.

- *They discussed "succeeder" during the group presentation.*
- *Understanding "succeeder" helps you talk about this topic clearly.*

---

successiveness *(noun)*

A following of one thing after another in time.

- *Understanding "successiveness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "successiveness."*

---

succorer *(noun)*

Someone who gives help in times of need or distress or difficulty.

- *In class, the teacher used "succorer" to mean someone who gives help in times of need or distress....*
- *Understanding "succorer" helps you talk about this topic clearly.*

---

succory *(noun)*

Perennial Old World herb having rayed flower heads with blue florets cultivated for its root and its heads of crisp edible leaves used in salads.

- *Understanding "succory" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "succory."*

---

succos *(noun)*

A major Jewish festival beginning on the eve of the 15th of Tishri and commemorating the shelter of the Israelites during their 40 years in the wilderness.

- *Understanding "succos" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "succos."*

---

succourer *(noun)*

Someone who gives help in times of need or distress or difficulty.

- *The article explained what "succourer" means with a simple example.*
- *She wrote a short paragraph that included "succourer."*

---

succuba *(noun)*

A female demon believed to have sexual intercourse with sleeping men.

- *He looked up "succuba" because he had never seen it before.*
- *In class, the teacher used "succuba" to mean a female demon believed to have sexual intercourse....*

---

succulency *(noun)*

A juicy appetizingness.

- *In class, the teacher used "succulency" to mean a juicy appetizingness.*
- *The article explained what "succulency" means with a simple example.*

---

succus *(noun)*

Any of several liquids of the body.

- *Understanding "succus" helps you talk about this topic clearly.*
- *They discussed "succus" during the group presentation.*

---

succuss *(verb)*

Shake; especially (a patient to detect fluids or air in the body).

- *In everyday English, people use "succuss" when talking about this idea.*
- *Can you use "succuss" in a sentence that fits this situation?*

---

succussion *(noun)*

Shaking a person to determine whether a large amount of liquid is present in a body cavity.

- *They discussed "succussion" during the group presentation.*
- *In class, the teacher used "succussion" to mean shaking a person to determine whether a large....*

---

suckerfish *(noun)*

Marine fishes with a flattened elongated body and a sucking disk on the head for attaching to large fish or moving objects.

- *They discussed "suckerfish" during the group presentation.*
- *She wrote a short paragraph that included "suckerfish."*

---

suction lipectomy *(noun)*

Lipectomy (especially for cosmetic purposes) in which excess fatty tissue is removed from under the skin by suction.

- *They discussed "suction lipectomy" during the group presentation.*
- *Understanding "suction lipectomy" helps you talk about this topic clearly.*

---

suctorial *(adjective)*

Adapted for sucking or clinging by suction.

- *Students compared "suctorial" with similar adjectives in the lesson.*
- *It is useful to describe something as "suctorial" when it is adapted for sucking or clinging by suction.*

---

sudate *(verb)*

Excrete perspiration through the pores in the skin.

- *The coach explained when to use "sudate" and when to wait.*
- *He did not know how to use "sudate" until he saw an example.*

---

sudation *(noun)*

The process of the sweat glands of the skin secreting a salty fluid.

- *She wrote a short paragraph that included "sudation."*
- *Understanding "sudation" helps you talk about this topic clearly.*

---

sudatorium *(noun)*

A bathhouse for hot air baths or steam baths.

- *The article explained what "sudatorium" means with a simple example.*
- *In class, the teacher used "sudatorium" to mean a bathhouse for hot air baths or steam baths.*

---

sudatory *(noun)*

A medicine that causes or increases sweating.

- *The article explained what "sudatory" means with a simple example.*
- *In class, the teacher used "sudatory" to mean a medicine that causes or increases sweating.*

---

sudor *(noun)*

Salty fluid secreted by sweat glands.

- *They discussed "sudor" during the group presentation.*
- *Understanding "sudor" helps you talk about this topic clearly.*

---

sudoriferous gland *(noun)*

Any of the glands in the skin that secrete perspiration.

- *In class, the teacher used "sudoriferous gland" to mean any of the glands in the skin that secrete perspiration.*
- *He looked up "sudoriferous gland" because he had never seen it before.*

---

sudorific *(noun)*

A medicine that causes or increases sweating.

- *Understanding "sudorific" helps you talk about this topic clearly.*
- *The article explained what "sudorific" means with a simple example.*

---

suety *(adjective)*

Like or full of suet.

- *Suety lamb chops.*

- *It is useful to describe something as "suety" when it is like or full of suet.*

---

suffocative *(adjective)*

Causing difficulty in breathing especially through lack of fresh air and presence of heat.

- *Her writing became clearer after she learned "suffocative."*
- *Students compared "suffocative" with similar adjectives in the lesson.*

---

suffrutescent *(adjective)*

Of a plant; having a woody base that does not die down each year.

- *The speaker chose "suffrutescent" because it captured the feeling precisely.*
- *A "suffrutescent" approach may work better in this case.*

---

suffrutex *(noun)*

Low-growing woody shrub or perennial with woody base.

- *Understanding "suffrutex" helps you talk about this topic clearly.*
- *He looked up "suffrutex" because he had never seen it before.*

---

suffusive *(adjective)*

Spreading through.

- *Suffusive purple light.*
- *Would you call this situation "suffusive"? Explain why.*

---

suggester *(noun)*

Someone who advances a suggestion or proposal.

- *The suggester of this absurd strategy was a fool.*
- *She wrote a short paragraph that included "suggester."*

---

suidae *(noun)*

Pigs; hogs; boars.

- *They discussed "suidae" during the group presentation.*
- *The article explained what "suidae" means with a simple example.*

---

suillus *(noun)*

A genus of fungi belonging to the family Boletaceae.

- *They discussed "suillus" during the group presentation.*
- *The article explained what "suillus" means with a simple example.*

---

suillus albivelatus *(noun)*

A short squat edible fungus with a reddish brown cap and white stalk; fruits under pines in the spring.

- *They discussed "suillus albivelatus" during the group presentation.*
- *Understanding "suillus albivelatus" helps you talk about this topic clearly.*

---

suitableness *(noun)*

The quality of having the properties that are right for a specific purpose.

- *Understanding "suitableness" helps you talk about this topic clearly.*
- *The article explained what "suitableness" means with a simple example.*

---

sukkoth *(noun)*

A major Jewish festival beginning on the eve of the 15th of Tishri and commemorating the shelter of the Israelites during their 40 years in the wilderness.

- *The article explained what "sukkoth" means with a simple example.*
- *She wrote a short paragraph that included "sukkoth."*

---

suksdorfia *(noun)*

Any of several American plants of the genus Suksdorfia having orbicular to kidney-shaped somewhat succulent leaves and white or rose or violet flowers in terminal panicles.

- *The article explained what "suksdorfia" means with a simple example.*
- *Understanding "suksdorfia" helps you talk about this topic clearly.*

---

suksdorfia violaceae *(noun)*

Slender delicate plant with wide roundish deeply lobed leaves and deep pink to violet funnel-shaped flowers; British Columbia to northern Oregon and west to Idaho and Montana.

- *In class, the teacher used "suksdorfia violaceae" to mean slender delicate plant with wide roundish deeply....*
- *He looked up "suksdorfia violaceae" because he had never seen it before.*

---

sula bassana *(noun)*

Very large white gannet with black wing tips.

- *He looked up "sula bassana" because he had never seen it before.*
- *She wrote a short paragraph that included "sula bassana."*

---

sulamyd *(noun)*

A topical sulfonamide (trade name Sulamyd) used to treat eye infections.

- *They discussed "sulamyd" during the group presentation.*
- *Understanding "sulamyd" helps you talk about this topic clearly.*

---

sulfacetamide *(noun)*

A topical sulfonamide (trade name Sulamyd) used to treat eye infections.

- *They discussed "sulfacetamide" during the group presentation.*
- *Understanding "sulfacetamide" helps you talk about this topic clearly.*

---

sulfamethazine *(noun)*

A sulfa drug used like sulfadiazine and also in veterinary medicine.

- *He looked up "sulfamethazine" because he had never seen it before.*
- *Understanding "sulfamethazine" helps you talk about this topic clearly.*

---

sulfamezathine *(noun)*

A sulfa drug used like sulfadiazine and also in veterinary medicine.

- *He looked up "sulfamezathine" because he had never seen it before.*
- *Understanding "sulfamezathine" helps you talk about this topic clearly.*

---

sulfanilic acid *(noun)*

A crystalline acid made from aniline and used as a dye.

- *They discussed "sulfanilic acid" during the group presentation.*
- *She wrote a short paragraph that included "sulfanilic acid."*

---

sulfapyridine *(noun)*

Sulfa drug derived from pyridine and sulfanilamide.

- *The article explained what "sulfapyridine" means with a simple example.*
- *She wrote a short paragraph that included "sulfapyridine."*

---

sulfisoxazole *(noun)*

A sulfonamide (trade name Gantrisin) used to treat infections of the urinary tract.

- *He looked up "sulfisoxazole" because he had never seen it before.*
- *In class, the teacher used "sulfisoxazole" to mean a sulfonamide (trade name gantrisin) used to treat....*

---

sulfurette *(verb)*

Combine with sulfur.

- *In everyday English, people use "sulfurette" when talking about this idea.*
- *Can you use "sulfurette" in a sentence that fits this situation?*

---

sulfuretted *(adjective)*

Treated or impregnated with sulfur.

- *Sulfuretted hydrogen.*
- *Her writing became clearer after she learned "sulfuretted."*

---

sulfurized *(adjective)*

sutura intermaxillaris *(noun)*

The suture between the two maxillae of the upper jawbone.

- *He looked up "sutura intermaxillaris" because he had never seen it before.*
- *In class, the teacher used "sutura intermaxillaris" to mean the suture between the two maxillae of the upper....*

sutura internasalis *(noun)*

The suture between the two nasal bones.

- *The article explained what "sutura internasalis" means with a simple example.*
- *In class, the teacher used "sutura internasalis" to mean the suture between the two nasal bones.*

sutura lamboidea *(noun)*

The suture between the occipital and parietal bones.

- *Understanding "sutura lamboidea" helps you talk about this topic clearly.*
- *He looked up "sutura lamboidea" because he had never seen it before.*

sutura sagittalis *(noun)*

The suture uniting the two parietal bones.

- *The article explained what "sutura sagittalis" means with a simple example.*
- *They discussed "sutura sagittalis" during the group presentation.*

swaggerer *(noun)*

Someone who walks in an arrogant manner.

- *She wrote a short paragraph that included "swaggerer."*
- *The article explained what "swaggerer" means with a simple example.*

swaggie *(noun)*

An itinerant Australian laborer who carries his personal belongings in a bundle as he travels around in search of work.

- *They discussed "swaggie" during the group presentation.*
- *In class, the teacher used "swaggie" to mean an itinerant australian laborer who carries his....*

swainsona *(noun)*

A genus of Australian herbs and subshrubs: darling peas.

- *She wrote a short paragraph that included "swainsona."*
- *They discussed "swainsona" during the group presentation.*

swainsona galegifolia *(noun)*

Erect or trailing perennial of eastern Australia having axillary racemes of blue to purple or red flowers.

- *The article explained what "swainsona galegifolia" means with a simple example.*
- *In class, the teacher used "swainsona galegifolia" to mean erect or trailing perennial of eastern australia....*

swainsona grandiflora *(noun)*

Shrubby perennial of southern Australia having downy or woolly stems and undersides of leaves and racemes of red to pink flowers.

- *In class, the teacher used "swainsona grandiflora" to mean shrubby perennial of southern australia having....*
- *He looked up "swainsona grandiflora" because he had never seen it before.*

swainsona greyana *(noun)*

Shrubby perennial of southern Australia having downy or woolly stems and undersides of leaves and racemes of red to pink flowers.

- *Understanding "swainsona greyana" helps you talk about this topic clearly.*
- *He looked up "swainsona greyana" because he had never seen it before.*

---

swallowwort *(noun)*

Perennial herb with branched woody stock and bright yellow flowers.

- *She wrote a short paragraph that included "swallowwort."*
- *The article explained what "swallowwort" means with a simple example.*

---

swamp candleberry *(noun)*

Deciduous aromatic shrub of eastern North America with grey-green wax-coated berries.

- *She wrote a short paragraph that included "swamp candleberry."*
- *The article explained what "swamp candleberry" means with a simple example.*

---

swamphen *(noun)*

Any of various small aquatic birds of the genus Gallinula distinguished from rails by a frontal shield and a resemblance to domestic hens.

- *The article explained what "swamphen" means with a simple example.*
- *She wrote a short paragraph that included "swamphen."*

---

swanflower *(noun)*

Any of several orchids of the genus Cycnoches having slender arching columns of flowers suggesting the neck of a swan.

- *He looked up "swanflower" because he had never seen it before.*
- *They discussed "swanflower" during the group presentation.*

---

swanneck *(noun)*

Any of several orchids of the genus Cycnoches having slender arching columns of flowers suggesting the neck of a swan.

- *In class, the teacher used "swanneck" to mean any of several orchids of the genus cycnoches....*
- *They discussed "swanneck" during the group presentation.*

---

swarthiness *(noun)*

A swarthy complexion.

- *They discussed "swarthiness" during the group presentation.*
- *He looked up "swarthiness" because he had never seen it before.*

---

swaybacked *(adjective)*

Having abnormal sagging of the spine (especially in horses).

- *Students compared "swaybacked" with similar adjectives in the lesson.*
- *Would you call this situation "swaybacked"? Explain why.*

---

swayer *(noun)*

A person who rules or commands.

- *Swayer of the universe.*
- *She wrote a short paragraph that included "swayer."*

---

swbs *(noun)*

The compass point that is one point south of southwest.

- *The article explained what "swbs" means with a simple example.*
- *She wrote a short paragraph that included "swbs."*

---

swbw *(noun)*

The compass point that is one point west of southwest.

- *She wrote a short paragraph that included "swbw."*
- *Understanding "swbw" helps you talk about this topic clearly.*

---

sweet pepperbush *(noun)*

Shrub of eastern and southern coastal United States having beautiful racemes of spice-scented white flowers.

- *Understanding "sweet pepperbush" helps you talk about this topic clearly.*

- *In class, the teacher used "sweet pepperbush" to mean shrub of eastern and southern coastal united states....*

---

sweetbrier *(noun)*

Eurasian rose with prickly stems and fragrant leaves and bright pink flowers followed by scarlet hips.

- *He looked up "sweetbrier" because he had never seen it before.*
- *Understanding "sweetbrier" helps you talk about this topic clearly.*

---

sweetsop *(noun)*

Sweet pulpy tropical fruit with thick scaly rind and shiny black seeds.

- *Understanding "sweetsop" helps you talk about this topic clearly.*
- *In class, the teacher used "sweetsop" to mean sweet pulpy tropical fruit with thick scaly rind....*

---

sweetsop tree *(noun)*

Tropical American tree bearing sweet pulpy fruit with thick scaly rind and shiny black seeds.

- *He looked up "sweetsop tree" because he had never seen it before.*
- *Understanding "sweetsop tree" helps you talk about this topic clearly.*

---

sweetwood bark *(noun)*

Aromatic bark of cascarilla; used as a tonic and for making incense.

- *She wrote a short paragraph that included "sweetwood bark."*
- *Understanding "sweetwood bark" helps you talk about this topic clearly.*

---

swellhead *(noun)*

A conceited and self-centered person.

- *They discussed "swellhead" during the group presentation.*
- *In class, the teacher used "swellhead" to mean a conceited and self-centered person.*

---

sweltry *(adjective)*

Excessively hot and humid or marked by sweating and faintness.

- *Would you call this situation "sweltry"? Explain why.*
- *Students compared "sweltry" with similar adjectives in the lesson.*

---

sweptback *(adjective)*

(especially of aircraft wings) angled rearward from the point of attachment.

- *Aircraft with sweptback wings.*
- *Students compared "sweptback" with similar adjectives in the lesson.*

---

sweptwing *(adjective)*

(of an aircraft) having sweptback wings.

- *A sweptwing aircraft.*
- *Students compared "sweptwing" with similar adjectives in the lesson.*

---

swertia *(noun)*

Genus of herbs of mountains of North America and Eurasia and Africa.

- *They discussed "swertia" during the group presentation.*
- *Understanding "swertia" helps you talk about this topic clearly.*

---

swertia perennia *(noun)*

Perennial of damp places in mountains of Eurasia and North America having dull-colored blue or violet flowers.

- *They discussed "swertia perennia" during the group presentation.*
- *She wrote a short paragraph that included "swertia perennia."*

---

swertia speciosa *(noun)*

Tall herb with panicles of white flowers flushed with green; northwestern United States; sometimes placed in genus Swertia.

- *He looked up "swertia speciosa" because he had never seen it before.*
- *Understanding "swertia speciosa" helps you talk about this topic clearly.*

---

swietinia *(noun)*

Tropical American mahogany trees.

- *She wrote a short paragraph that included "swietinia."*
- *He looked up "swietinia" because he had never seen it before.*

---

swietinia macrophylla *(noun)*

An important Central American mahogany tree.

- *She wrote a short paragraph that included "swietinia macrophylla."*
- *He looked up "swietinia macrophylla" because he had never seen it before.*

---

swietinia mahogani *(noun)*

Mahogany tree of West Indies.

- *They discussed "swietinia mahogani" during the group presentation.*
- *He looked up "swietinia mahogani" because he had never seen it before.*

---

swiftlet *(noun)*

Swift of eastern Asia; produces the edible bird's nest.

- *In class, the teacher used "swiftlet" to mean swift of eastern asia; produces the edible bird's nest.*
- *He looked up "swiftlet" because he had never seen it before.*

---

swimmeret *(noun)*

One of the paired abdominal appendages of certain aquatic crustaceans that function primarily for carrying the eggs in females and are usually adapted for swimming.

- *They discussed "swimmeret" during the group presentation.*
- *She wrote a short paragraph that included "swimmeret."*

---

swingletree *(noun)*

A crossbar that is attached to the traces of a draft horse and to the vehicle or implement that the horse is pulling.

- *They discussed "swingletree" during the group presentation.*
- *In class, the teacher used "swingletree" to mean a crossbar that is attached to the traces of a....*

---

swiz *(noun)*

British slang for a swindle.

- *They discussed "swiz" during the group presentation.*
- *He looked up "swiz" because he had never seen it before.*

---

swob *(verb)*

Wash with a swab or a mop.

- *He did not know how to use "swob" until he saw an example.*
- *Learners should practice how to use "swob" in real sentences.*

---

swordlike *(adjective)*

Shaped like a sword blade.

- *Would you call this situation "swordlike"? Explain why.*
- *It is useful to describe something as "swordlike" when it is shaped like a sword blade.*

---

swordtail *(noun)*

Freshwater fish of Central America having a long swordlike tail; popular aquarium fish.

- *She wrote a short paragraph that included "swordtail."*
- *He looked up "swordtail" because he had never seen it before.*

---

swosh *(verb)*

Move with or cause to move with a whistling or hissing sound.

- *The bubbles swoshed around in the glass.*
- *Learners should practice how to use "swosh" in real sentences.*

---

syconium *(noun)*

The fleshy multiple fruit of the fig consisting of an enlarged hollow receptacle containing numerous fruitlets.

- *They discussed "syconium" during the group presentation.*
- *Understanding "syconium" helps you talk about this topic clearly.*

---

syllabically *(adverb)*

In or with syllables.

- *Syllabically pronounced.*
- *Try rewriting the sentence and include "syllabically" naturally.*

---

syllabicate *(verb)*

Divide into syllables.

- *Can you use "syllabicate" in a sentence that fits this situation?*
- *The coach explained when to use "syllabicate" and when to wait.*

---

syllabication *(noun)*

Forming or dividing words into syllables.

- *He looked up "syllabication" because he had never seen it before.*
- *She wrote a short paragraph that included "syllabication."*

---

syllabify *(verb)*

Divide into syllables.

- *Syllabify the words.*
- *In everyday English, people use "syllabify" when talking about this idea.*

---

syllabled *(adjective)*

Pronounced in syllables.

- *Would you call this situation "syllabled"? Explain why.*
- *Her writing became clearer after she learned "syllabled."*

---

syllogiser *(noun)*

Logician skilled in syllogistic reasoning.

- *The article explained what "syllogiser" means with a simple example.*
- *In class, the teacher used "syllogiser" to mean logician skilled in syllogistic reasoning.*

---

syllogist *(noun)*

Logician skilled in syllogistic reasoning.

- *In class, the teacher used "syllogist" to mean logician skilled in syllogistic reasoning.*
- *He looked up "syllogist" because he had never seen it before.*

---

syllogizer *(noun)*

Logician skilled in syllogistic reasoning.

- *He looked up "syllogizer" because he had never seen it before.*
- *She wrote a short paragraph that included "syllogizer."*

---

sylphlike *(adjective)*

Moving and bending with ease.

- *The speaker chose "sylphlike" because it captured the feeling precisely.*
- *It is useful to describe something as "sylphlike" when it is moving and bending with ease.*

---

sylvanite *(noun)*

A silver-white mineral consisting of silver gold telluride; a source of gold in Australia and America.

- *She wrote a short paragraph that included "sylvanite."*
- *Understanding "sylvanite" helps you talk about this topic clearly.*

---

sylvia curruca *(noun)*

Old World warbler similar to the greater whitethroat but smaller.

- *She wrote a short paragraph that included "sylvia curruca."*
- *He looked up "sylvia curruca" because he had never seen it before.*

sylviidae *(noun)*

In some classifications considered a subfamily (Sylviinae) of the family Muscicapidae: Old World (true) warblers; American kinglets and gnatcatchers.

- *He looked up "sylviidae" because he had never seen it before.*
- *She wrote a short paragraph that included "sylviidae."*

sylviinae *(noun)*

Alternative classification for the Old World warblers.

- *Understanding "sylviinae" helps you talk about this topic clearly.*
- *In class, the teacher used "sylviinae" to mean alternative classification for the old world warblers.*

sylvine *(noun)*

A mineral consisting of native potassium chloride; an important ore of potassium that is found in sedimentary beds.

- *He looked up "sylvine" because he had never seen it before.*
- *She wrote a short paragraph that included "sylvine."*

sylvite *(noun)*

A mineral consisting of native potassium chloride; an important ore of potassium that is found in sedimentary beds.

- *He looked up "sylvite" because he had never seen it before.*
- *Understanding "sylvite" helps you talk about this topic clearly.*

symbolatry *(noun)*

The worship of symbols.

- *In class, the teacher used "symbolatry" to mean the worship of symbols.*
- *Understanding "symbolatry" helps you talk about this topic clearly.*

symbolisation *(noun)*

The practice of investing things with symbolic meaning.

- *They discussed "symbolisation" during the group presentation.*
- *He looked up "symbolisation" because he had never seen it before.*

symboliser *(noun)*

Someone skilled in the interpretation or representation of symbols.

- *They discussed "symboliser" during the group presentation.*
- *Understanding "symboliser" helps you talk about this topic clearly.*

symbolizer *(noun)*

Someone skilled in the interpretation or representation of symbols.

- *In class, the teacher used "symbolizer" to mean someone skilled in the interpretation or....*
- *The article explained what "symbolizer" means with a simple example.*

symbololatry *(noun)*

The worship of symbols.

- *The article explained what "symbololatry" means with a simple example.*
- *In class, the teacher used "symbololatry" to mean the worship of symbols.*

symmetricalness *(noun)*

(mathematics) an attribute of a shape or relation; exact reflection of form on opposite sides of a dividing line or plane.

- *The article explained what "symmetricalness" means with a simple example.*
- *They discussed "symmetricalness" during the group presentation.*

symmetrise *(verb)*

Make symmetric.

- *She tried to use "symmetrise" carefully so everyone would understand.*
- *Can you use "symmetrise" in a sentence that fits this situation?*

symmetrize *(verb)*

Make symmetric.

- *Symmetrized waves.*
- *In everyday English, people use "symmetrize" when talking about this idea.*

---

sympetalous *(adjective)*

Having a corolla composed of partially or wholly fused petals forming a corolla shaped like a tube or funnel.

- *Students compared "sympetalous" with similar adjectives in the lesson.*
- *It is useful to describe something as "sympetalous" when it is having a corolla composed of partially or wholly....*

---

symphalangus *(noun)*

Used in some classifications for the siamangs.

- *In class, the teacher used "symphalangus" to mean used in some classifications for the siamangs.*
- *They discussed "symphalangus" during the group presentation.*

---

symphalangus syndactylus *(noun)*

Large black gibbon of Sumatra having the 2nd and 3rd toes partially united by a web.

- *The article explained what "symphalangus syndactylus" means with a simple example.*
- *In class, the teacher used "symphalangus syndactylus" to mean large black gibbon of sumatra having the 2nd and....*

---

symphilid *(noun)*

Minute arthropod often infesting the underground parts of truck-garden and greenhouse crops.

- *She wrote a short paragraph that included "symphilid."*
- *They discussed "symphilid" during the group presentation.*

---

symphonious *(adjective)*

Harmonious in sound.

- *It is useful to describe something as "symphonious" when it is harmonious in sound.*
- *Would you call this situation "symphonious"? Explain why.*

---

symphonist *(noun)*

A composer of symphonies.

- *Understanding "symphonist" helps you talk about this topic clearly.*
- *The article explained what "symphonist" means with a simple example.*

---

symphoricarpos *(noun)*

Deciduous shrubs of North America and Central America and China.

- *The article explained what "symphoricarpos" means with a simple example.*
- *In class, the teacher used "symphoricarpos" to mean deciduous shrubs of north america and central....*

---

symphoricarpos alba *(noun)*

Deciduous shrub of western North America having spikes of pink flowers followed by round white berries.

- *The article explained what "symphoricarpos alba" means with a simple example.*
- *In class, the teacher used "symphoricarpos alba" to mean deciduous shrub of western north america having....*

---

symphoricarpos orbiculatus *(noun)*

North American deciduous shrub cultivated for it abundant clusters of coral-red berrylike fruits.

- *Understanding "symphoricarpos orbiculatus" helps you talk about this topic clearly.*
- *The article explained what "symphoricarpos orbiculatus" means with a simple example.*

---

symphyla *(noun)*

Small class of minute arthropods; unimportant except for the garden centipede.

- *They discussed "symphyla" during the group presentation.*
- *Understanding "symphyla" helps you talk about this topic clearly.*

---

symphysion *(noun)*

The most forward point of the alveolar process of the mandible.

- *She wrote a short paragraph that included "symphysion."*

- *He looked up "symphysion" because he had never seen it before.*

---

symphytum officinale *(noun)*

European herb having small white, pink or purple flowers; naturalized as a weed in North America.

- *Understanding "symphytum officinale" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "symphytum officinale."*

---

symplocaceae *(noun)*

A dicotyledonous family of order Ebenales.

- *He looked up "symplocaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "symplocaceae."*

---

symplocarpus *(noun)*

One species: skunk cabbage.

- *He looked up "symplocarpus" because he had never seen it before.*
- *She wrote a short paragraph that included "symplocarpus."*

---

symplocarpus foetidus *(noun)*

Deciduous perennial low-growing fetid swamp plant of eastern North America having minute flowers enclosed in a mottled greenish or purple cowl-shaped spathe.

- *The article explained what "symplocarpus foetidus" means with a simple example.*
- *In class, the teacher used "symplocarpus foetidus" to mean deciduous perennial low-growing fetid swamp plant....*

---

symplocus *(noun)*

Type and sole genus of Symplocaceae including sweetleaf.

- *They discussed "symplocus" during the group presentation.*
- *Understanding "symplocus" helps you talk about this topic clearly.*

---

symplocus paniculata *(noun)*

Deciduous shrub of eastern Asia bearing decorative bright blue fruit.

- *The article explained what "symplocus paniculata" means with a simple example.*
- *She wrote a short paragraph that included "symplocus paniculata."*

---

symplocus tinctoria *(noun)*

Small yellowwood tree of southern United States having small fragrant white flowers; leaves and bark yield a yellow dye.

- *Understanding "symplocus tinctoria" helps you talk about this topic clearly.*
- *They discussed "symplocus tinctoria" during the group presentation.*

---

symposiarch *(noun)*

The person who proposes toasts and introduces speakers at a banquet.

- *Understanding "symposiarch" helps you talk about this topic clearly.*
- *They discussed "symposiarch" during the group presentation.*

---

symposiast *(noun)*

Someone who participates in a symposium.

- *In class, the teacher used "symposiast" to mean someone who participates in a symposium.*
- *The article explained what "symposiast" means with a simple example.*

---

synaeresis *(noun)*

The contraction of two vowels into a diphthong.

- *Understanding "synaeresis" helps you talk about this topic clearly.*
- *He looked up "synaeresis" because he had never seen it before.*

---

synagrops *(noun)*

A genus of Serranidae.

- *Understanding "synagrops" helps you talk about this topic clearly.*
- *The article explained what "synagrops" means with a simple example.*

---

synagrops bellus *(noun)*

Small marine fish with black mouth and gill cavity.

- *The article explained what "synagrops bellus" means with a simple example.*
- *She wrote a short paragraph that included "synagrops bellus."*

---

synanceja *(noun)*

Stonefishes.

- *Understanding "synanceja" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "synanceja."*

---

synanceja verrucosa *(noun)*

Venomous tropical marine fish resembling a piece of rock.

- *In class, the teacher used "synanceja verrucosa" to mean venomous tropical marine fish resembling a piece of....*
- *The article explained what "synanceja verrucosa" means with a simple example.*

---

synapsida *(noun)*

Extinct reptiles of the Permian to Jurassic considered ancestral to mammals.

- *In class, the teacher used "synapsida" to mean extinct reptiles of the permian to jurassic....*
- *He looked up "synapsida" because he had never seen it before.*

---

synaptomys *(noun)*

Bog lemmings.

- *They discussed "synaptomys" during the group presentation.*
- *Understanding "synaptomys" helps you talk about this topic clearly.*

---

synaptomys borealis *(noun)*

Of wet alpine and subalpine meadows of Canada and Alaska.

- *He looked up "synaptomys borealis" because he had never seen it before.*
- *She wrote a short paragraph that included "synaptomys borealis."*

---

synaptomys cooperi *(noun)*

Of low bogs and meadows of northeastern and central United States and southern Canada.

- *He looked up "synaptomys cooperi" because he had never seen it before.*
- *In class, the teacher used "synaptomys cooperi" to mean of low bogs and meadows of northeastern and central....*

---

syncarp *(noun)*

Fruit consisting of many individual small fruits or drupes derived from separate ovaries within a common receptacle: e.g. blackberry; raspberry; pineapple.

- *In class, the teacher used "syncarp" to mean fruit consisting of many individual small fruits or....*
- *They discussed "syncarp" during the group presentation.*

---

syncarpous *(adjective)*

(of ovaries of flowering plants) consisting of united carpels.

- *Her writing became clearer after she learned "syncarpous."*
- *Would you call this situation "syncarpous"? Explain why.*

---

syncategorematic *(adjective)*

Of a term that cannot stand as the subject or (especially) the predicate of a proposition but must be used in conjunction with other terms.

- *'or' is a syncategorematic term.*
- *Students compared "syncategorematic" with similar adjectives in the lesson.*

---

synchrocyclotron *(noun)*

Cyclotron that achieves relativistic velocities by modulating the frequency of the accelerating electric field.

- *They discussed "synchrocyclotron" during the group presentation.*
- *In class, the teacher used "synchrocyclotron" to mean cyclotron that achieves relativistic velocities by....*

---

synchroflash *(noun)*

A device used in photography to synchronize the peak of a flash with the opening of the camera shutter.

- *He looked up "synchroflash" because he had never seen it before.*
- *She wrote a short paragraph that included "synchroflash."*

---

synchronal *(adjective)*

Occurring or existing at the same time or having the same period or phase; - Jour.A.M.A.

- *The speaker chose "synchronal" because it captured the feeling precisely.*
- *It is useful to describe something as "synchronal" when it is occurring or existing at the same time or having....*

---

synchroneity *(noun)*

The relation that exists when things occur at the same time.

- *She wrote a short paragraph that included "synchroneity."*
- *The article explained what "synchroneity" means with a simple example.*

---

synchroniser *(noun)*

An instrument that indicates whether two periodic motions are synchronous (especially an instrument that enables a pilot to synchronize the propellers of a plane that has two or more engines).

- *They discussed "synchroniser" during the group presentation.*
- *She wrote a short paragraph that included "synchroniser."*

---

synchronoscope *(noun)*

An instrument that indicates whether two periodic motions are synchronous (especially an instrument that enables a pilot to synchronize the propellers of a plane that has two or more engines).

- *The article explained what "synchronoscope" means with a simple example.*
- *Understanding "synchronoscope" helps you talk about this topic clearly.*

---

synchroscope *(noun)*

An instrument that indicates whether two periodic motions are synchronous (especially an instrument that enables a pilot to synchronize the propellers of a plane that has two or more engines).

- *He looked up "synchroscope" because he had never seen it before.*
- *In class, the teacher used "synchroscope" to mean an instrument that indicates whether two periodic....*

---

synchytriaceae *(noun)*

A fungus family of order Chytridiales.

- *In class, the teacher used "synchytriaceae" to mean a fungus family of order chytridiales.*
- *Understanding "synchytriaceae" helps you talk about this topic clearly.*

---

synchytrium *(noun)*

Simple parasitic fungi including pond scum parasites.

- *She wrote a short paragraph that included "synchytrium."*
- *Understanding "synchytrium" helps you talk about this topic clearly.*

---

synchytrium endobioticum *(noun)*

Fungus causing potato wart disease in potato tubers.

- *She wrote a short paragraph that included "synchytrium endobioticum."*
- *He looked up "synchytrium endobioticum" because he had never seen it before.*

---

syncopator *(noun)*

A musician who plays syncopated jazz music (usually in a dance band).

- *They called themselves the Dixie Syncopators.*
- *Understanding "syncopator" helps you talk about this topic clearly.*

---

syncretical *(adjective)*

Relating to a historical tendency for a language to reduce its use of inflections.

- *The speaker chose "syncretical" because it captured the feeling precisely.*
- *A "syncretical" approach may work better in this case.*

---

syncretistical *(adjective)*

Relating to a historical tendency for a language to reduce its use of inflections.

- *The speaker chose "syncretistical" because it captured the feeling precisely.*
- *It is useful to describe something as "syncretistical" when it is relating to a historical tendency for a language to....*

syndetic *(adjective)*

Connected by a conjunction.

- *The speaker chose "syndetic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "syndetic."*

synecdochic *(adjective)*

Using the name of a part for that of the whole or the whole for the part; or the special for the general or the general for the special; or the material for the thing made of it.

- *To use 'hand' for 'worker' or 'ten sail' for 'ten ships' or 'steel' for 'sword' is to use a synecdochic figure of speech.*
- *It is useful to describe something as "synecdochic" when it is using the name of a part for that of the whole or....*

synecdochical *(adjective)*

Using the name of a part for that of the whole or the whole for the part; or the special for the general or the general for the special; or the material for the thing made of it.

- *Her writing became clearer after she learned "synecdochical."*
- *A "synecdochical" approach may work better in this case.*

synentognathi *(noun)*

Order of fishes having spineless fins; needlefishes; sauries; flying fishes; halfbeaks.

- *The article explained what "synentognathi" means with a simple example.*
- *In class, the teacher used "synentognathi" to mean order of fishes having spineless fins;....*

synercus *(noun)*

Cape buffalo.

- *He looked up "synercus" because he had never seen it before.*
- *In class, the teacher used "synercus" to mean cape buffalo.*

synercus caffer *(noun)*

Large often savage buffalo of southern Africa having upward-curving horns; mostly in game reserves.

- *The article explained what "synercus caffer" means with a simple example.*
- *In class, the teacher used "synercus caffer" to mean large often savage buffalo of southern africa....*

synezesis *(noun)*

The contraction of chromatin towards one side of the nucleus during the prophase of meiosis.

- *The article explained what "synezesis" means with a simple example.*
- *They discussed "synezesis" during the group presentation.*

syngnathus *(noun)*

Type genus of the family Syngnathidae.

- *He looked up "syngnathus" because he had never seen it before.*
- *She wrote a short paragraph that included "syngnathus."*

syngnathus hildebrandi *(noun)*

Small (4 inches) fish found off the Florida Gulf Coast.

- *Understanding "syngnathus hildebrandi" helps you talk about this topic clearly.*
- *They discussed "syngnathus hildebrandi" during the group presentation.*

synizesis *(noun)*

The contraction of chromatin towards one side of the nucleus during the prophase of meiosis.

- *She wrote a short paragraph that included "synizesis."*
- *They discussed "synizesis" during the group presentation.*

synodontidae *(noun)*

Soft-finned bottom-dwelling fishes.

- *She wrote a short paragraph that included "synodontidae."*
- *The article explained what "synodontidae" means with a simple example.*

synoecious *(adjective)*
