Low tufted evergreen shrubs of colder parts of north temperate regions having moss-like foliage and nodding white or pink flowers.

- *They discussed "genus cassiope" during the group presentation.*
- *In class, the teacher used "genus cassiope" to mean low tufted evergreen shrubs of colder parts of....*

---

genus ceratophyllum *(noun)*

Constituting the family Ceratophyllaceae: hornworts.

- *The article explained what "genus ceratophyllum" means with a simple example.*
- *They discussed "genus ceratophyllum" during the group presentation.*

---

genus cotinga *(noun)*

Type genus of the Cotingidae: cotingas.

- *They discussed "genus cotinga" during the group presentation.*
- *She wrote a short paragraph that included "genus cotinga."*

---

genus cyon *(noun)*

Asiatic wild dog.

- *They discussed "genus cyon" during the group presentation.*
- *She wrote a short paragraph that included "genus cyon."*

---

genus dendroica *(noun)*

A genus of Parulidae.

- *The article explained what "genus dendroica" means with a simple example.*
- *They discussed "genus dendroica" during the group presentation.*

---

genus eichhornia *(noun)*

Water hyacinth; water orchid.

- *Understanding "genus eichhornia" helps you talk about this topic clearly.*
- *The article explained what "genus eichhornia" means with a simple example.*

---

genus feijoa *(noun)*

Small South American shrubs or trees.

- *In class, the teacher used "genus feijoa" to mean small south american shrubs or trees.*
- *Understanding "genus feijoa" helps you talk about this topic clearly.*

---

genus globigerina *(noun)*

Type genus of the family Globigerinidae.

- *They discussed "genus globigerina" during the group presentation.*
- *In class, the teacher used "genus globigerina" to mean type genus of the family globigerinidae.*

---

genus hippodamia *(noun)*

Genus of ladybugs.

- *He looked up "genus hippodamia" because he had never seen it before.*
- *She wrote a short paragraph that included "genus hippodamia."*

---

genus holothuria *(noun)*

Type genus of the Holothuridae.

- *The article explained what "genus holothuria" means with a simple example.*

- *They discussed “genus holothuria” during the group presentation.*

genus mimus *(noun)*

Type genus of the family Mimidae: mockingbirds.

- *They discussed “genus mimus” during the group presentation.*
- *In class, the teacher used “genus mimus” to mean type genus of the family mimidae: mockingbirds.*

genus nitrosomonas *(noun)*

Ellipsoidal soil bacteria.

- *In class, the teacher used “genus nitrosomonas” to mean ellipsoidal soil bacteria.*
- *He looked up “genus nitrosomonas” because he had never seen it before.*

genus physeter *(noun)*

Type genus of the Physeteridae.

- *He looked up “genus physeter” because he had never seen it before.*
- *In class, the teacher used “genus physeter” to mean type genus of the physeteridae.*

genus sturnus *(noun)*

Type genus of the Sturnidae: common starlings.

- *Understanding “genus sturnus” helps you talk about this topic clearly.*
- *They discussed “genus sturnus” during the group presentation.*

genus tamias *(noun)*

Chipmunks of eastern North America.

- *They discussed “genus tamias” during the group presentation.*
- *Understanding “genus tamias” helps you talk about this topic clearly.*

genus tetrahymena *(noun)*

Protozoa having four membranous ciliary organelles.

- *In class, the teacher used “genus tetrahymena” to mean protozoa having four membranous ciliary organelles.*
- *The article explained what “genus tetrahymena” means with a simple example.*

ghanians *(noun)*

A native or inhabitant of Ghana.

- *She wrote a short paragraph that included “ghanians.”*
- *Understanding “ghanians” helps you talk about this topic clearly.*

ghettoised *(verb)*

Type genus of the Auriculariaceae.

- *Understanding "genus auricularia" helps you talk about this topic clearly.*
- *The article explained what "genus auricularia" means with a simple example.*

genus caltha *(noun)*

A genus of Caltha.

- *They discussed "genus caltha" during the group presentation.*
- *She wrote a short paragraph that included "genus caltha."*

genus cambarus *(noun)*

A genus of Astacidae.

- *Understanding "genus cambarus" helps you talk about this topic clearly.*
- *He looked up "genus cambarus" because he had never seen it before.*

genus citrullus *(noun)*

A dicot genus of the family Cucurbitaceae including watermelons.

- *They discussed "genus citrullus" during the group presentation.*
- *Understanding "genus citrullus" helps you talk about this topic clearly.*

genus dreissena *(noun)*

Zebra mussels.

- *In class, the teacher used "genus dreissena" to mean zebra mussels.*
- *The article explained what "genus dreissena" means with a simple example.*

genus epinephelus *(noun)*

Genus of groupers or sea bass.

- *In class, the teacher used "genus epinephelus" to mean genus of groupers or sea bass.*
- *The article explained what "genus epinephelus" means with a simple example.*

genus gelsemium *(noun)*

Evergreen twining shrubs of Americas and southeastern Asia.

- *He looked up "genus gelsemium" because he had never seen it before.*
- *They discussed "genus gelsemium" during the group presentation.*

genus pagurus *(noun)*

Type genus of the family Paguridae.

- *The article explained what "genus pagurus" means with a simple example.*
- *Understanding "genus pagurus" helps you talk about this topic clearly.*

genus porphyra *(noun)*

A genus of protoctist.

- *They discussed "genus porphyra" during the group presentation.*
- *In class, the teacher used "genus porphyra" to mean a genus of protoctist.*

genus potos *(noun)*

A genus of Procyonidae.

- *The article explained what "genus potos" means with a simple example.*
- *Understanding "genus potos" helps you talk about this topic clearly.*

genus proboscidea *(noun)*

In some classifications included in the genus Martynia and hence the two taxonomic names for some of the unicorn plants.

- *She wrote a short paragraph that included "genus proboscidea."*
- *Understanding "genus proboscidea" helps you talk about this topic clearly.*

Small shrubby tree of eastern North America similar to the Judas tree having usually pink flowers; found in damp sheltered underwood.

- *He looked up "cercis canadensis" because he had never seen it before.*
- *Understanding "cercis canadensis" helps you talk about this topic clearly.*

cervicitis *(noun)*

Inflammation of the uterine cervix.

- *The article explained what "cervicitis" means with a simple example.*
- *She wrote a short paragraph that included "cervicitis."*

chalcid *(noun)*

Any of various tiny insects whose larvae are parasites on eggs and larvae of other insects; many are beneficial in destroying injurious insects.

- *He looked up "chalcid" because he had never seen it before.*
- *In class, the teacher used "chalcid" to mean any of various tiny insects whose larvae are....*

chalcid fly *(noun)*

Any of various tiny insects whose larvae are parasites on eggs and larvae of other insects; many are beneficial in destroying injurious insects.

- *She wrote a short paragraph that included "chalcid fly."*
- *He looked up "chalcid fly" because he had never seen it before.*

---

chalcid wasp *(noun)*

Any of various tiny insects whose larvae are parasites on eggs and larvae of other insects; many are beneficial in destroying injurious insects.

- *They discussed "chalcid wasp" during the group presentation.*
- *Understanding "chalcid wasp" helps you talk about this topic clearly.*

---

chlorobenzene *(noun)*

A colorless volatile flammable liquid with an almond odor that is made from chlorine and benzene; used as a solvent and in the production of phenol and DDT and other organic compounds.

- *He looked up "chlorobenzene" because he had never seen it before.*
- *She wrote a short paragraph that included "chlorobenzene."*

---

choky *(adjective)*

So tight as to tend to choke.

- *A choky collar.*
- *Would you call this situation "choky"? Explain why.*

---

cicily isabel fairfield *(noun)*

British writer (born in Ireland) (1892-1983).

- *The article explained what "cicily isabel fairfield" means with a simple example.*
- *In class, the teacher used "cicily isabel fairfield" to mean british writer (born in ireland) (1892-1983).*

---

clupea *(noun)*

Type genus of the Clupeidae: typical herrings.

- *He looked up "clupea" because he had never seen it before.*
- *Understanding "clupea" helps you talk about this topic clearly.*

---

coalman *(noun)*

Someone who delivers coal.

- *They discussed "coalman" during the group presentation.*
- *He looked up "coalman" because he had never seen it before.*

---

cohabits *(verb)*

Share living quarters; usually said of people who are not married and live together as a couple.

- *He did not know how to use "cohabits" until he saw an example.*
- *In everyday English, people use "cohabits" when talking about this idea.*

---

A smudge made by a (dirty) finger.

- *She wrote a short paragraph that included "fingermarks."*
- *The article explained what "fingermarks" means with a simple example.*

---

fingerpaint *(noun)*

Paint that has the consistency of jelly.

- *They discussed "fingerpaint" during the group presentation.*
- *The article explained what "fingerpaint" means with a simple example.*

---

finocchio *(noun)*

Aromatic bulbous stem base eaten cooked or raw in salads.

- *He looked up "finocchio" because he had never seen it before.*
- *They discussed "finocchio" during the group presentation.*

---

firths *(noun)*

A long narrow estuary (especially in Scotland).

- *Understanding "firths" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "firths."*

---

fishbones *(noun)*

A bone of a fish.

- *She wrote a short paragraph that included "fishbones."*

- *Understanding "fishbones" helps you talk about this topic clearly.*

---

fluorochrome *(noun)*

Any of various fluorescent substances used in fluorescence microscopy to stain specimens.

- *They discussed "fluorochrome" during the group presentation.*
- *He looked up "fluorochrome" because he had never seen it before.*

---

forepaw *(noun)*

Front paw; analogous to the human hand.

- *In class, the teacher used "forepaw" to mean front paw; analogous to the human hand.*
- *The article explained what "forepaw" means with a simple example.*

---

forewent *(verb)*

Do without or cease to hold or adhere to.

- *The coach explained when to use "forewent" and when to wait.*
- *She tried to use "forewent" carefully so everyone would understand.*

---

friedreich's ataxia *(noun)*

Sclerosis of the posterior and lateral columns of the spinal cord; characterized by muscular weakness and abnormal gait; occurs in children.

- *The article explained what "friedreich's ataxia" means with a simple example.*
- *Understanding "friedreich's ataxia" helps you talk about this topic clearly.*

---

fritillaria liliaceae *(noun)*

California herb with white conic or bell-shaped flowers usually tinged with green.

- *In class, the teacher used "fritillaria liliaceae" to mean california herb with white conic or bell-shaped....*
- *The article explained what "fritillaria liliaceae" means with a simple example.*

---

frostily *(adverb)*

Without warmth or enthusiasm.

- *'Come in if you have to,' he said frostily.*
- *Place "frostily" carefully so the meaning stays clear.*

---

fruiterer *(noun)*

- *In class, the teacher used "fruiterer" to mean a person who sells fruit.*
- *The article explained what "fruiterer" means with a simple example.*

---

furloughing *(verb)*

Dismiss, usually for economic reasons.

- *Learners should practice how to use "furloughing" in real sentences.*
- *In everyday English, people use "furloughing" when talking about this idea.*

---

gabbros *(noun)*

One of a family of granular intrusive rocks.

- *He looked up "gabbros" because he had never seen it before.*
- *They discussed "gabbros" during the group presentation.*

---

genus abelia *(noun)*

Chiefly east Asian shrubs.

- *Understanding "genus abelia" helps you talk about this topic clearly.*
- *He looked up "genus abelia" because he had never seen it before.*

---

genus acorus *(noun)*

Sweet flags; sometimes placed in subfamily Acoraceae.

- *She wrote a short paragraph that included "genus acorus."*
- *Understanding "genus acorus" helps you talk about this topic clearly.*

---

genus aeonium *(noun)*

A genus of plants of the family Crassulaceae.

- *Understanding "genus aeonium" helps you talk about this topic clearly.*
- *The article explained what "genus aeonium" means with a simple example.*

---

genus baccharis *(noun)*

Shrubs of western hemisphere often having honey-scented flowers followed by silky thistlelike heads of tiny fruits; often used for erosion control.

- *In class, the teacher used "genus baccharis" to mean shrubs of western hemisphere often having....*
- *The article explained what "genus baccharis" means with a simple example.*

---

genus butea *(noun)*

Genus of East Indian trees or shrubs: dhak.

- *The article explained what "genus butea" means with a simple example.*
- *She wrote a short paragraph that included "genus butea."*

---

genus calliphora *(noun)*

Type genus of the Calliphoridae: blowflies.

- *She wrote a short paragraph that included "genus calliphora."*
- *He looked up "genus calliphora" because he had never seen it before.*

---

genus clupea *(noun)*

Type genus of the Clupeidae: typical herrings.

- *In class, the teacher used "genus clupea" to mean type genus of the clupeidae: typical herrings.*
- *He looked up "genus clupea" because he had never seen it before.*

---

genus corchorus *(noun)*

Widely distributed genus of tropical herbs or subshrubs; especially Asia.

- *Understanding "genus corchorus" helps you talk about this topic clearly.*
- *They discussed "genus corchorus" during the group presentation.*

---

genus dieffenbachia *(noun)*

Evergreen perennial herbs of tropical America with lush foliage and poisonous sap; often cultivated as houseplants.

- *The article explained what "genus dieffenbachia" means with a simple example.*
- *In class, the teacher used "genus dieffenbachia" to mean evergreen perennial herbs of tropical america with....*

---

genus dipodomys *(noun)*

Kangaroo rats.

- *Understanding "genus dipodomys" helps you talk about this topic clearly.*
- *They discussed "genus dipodomys" during the group presentation.*

---

genus epimedium *(noun)*

Herbaceous perennials of Mediterranean to India and eastern Asia.

- *She wrote a short paragraph that included "genus epimedium."*
- *The article explained what "genus epimedium" means with a simple example.*

---

genus heracleum *(noun)*

Widely distributed genus of plants with usually thick rootstocks and large umbels of white flowers.

- *He looked up "genus heracleum" because he had never seen it before.*
- *She wrote a short paragraph that included "genus heracleum."*

---

genus isoetes *(noun)*

Type and genus of the Isoetaceae and sole extant genus of the order Isoetales.

- *He looked up "genus isoetes" because he had never seen it before.*
- *In class, the teacher used "genus isoetes" to mean type and genus of the isoetaceae and sole extant....*

---

genus mugil *(noun)*

Type genus of the Mugilidae: mullets.

- *He looked up "genus mugil" because he had never seen it before.*
- *She wrote a short paragraph that included "genus mugil."*

---

genus nelumbo *(noun)*

Sometimes placed in the family Nymphaeaceae: lotuses.

- *In class, the teacher used "genus nelumbo" to mean sometimes placed in the family nymphaeaceae: lotuses.*
- *He looked up "genus nelumbo" because he had never seen it before.*

---

genus nerodia *(noun)*

North American water snakes.

- *Understanding "genus nerodia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "genus nerodia."*

---

genus pterocarpus *(noun)*

Genus of tropical trees or climbers having usually broadly winged pods.

- *He looked up "genus pterocarpus" because he had never seen it before.*
- *They discussed "genus pterocarpus" during the group presentation.*

---

genus retama *(noun)*

Small genus of Mediterranean shrubs; often included in genus Genista.

- *In class, the teacher used "genus retama" to mean small genus of mediterranean shrubs; often included....*
- *He looked up "genus retama" because he had never seen it before.*

---

genus scolytus *(noun)*

Type genus of the Scolytidae comprising numerous small bark beetles.

- *He looked up "genus scolytus" because he had never seen it before.*
- *She wrote a short paragraph that included "genus scolytus."*

---

genus sterculia *(noun)*

Type genus of the Sterculiaceae: deciduous or evergreen trees of Old and New World tropics and subtropics.

- *Understanding "genus sterculia" helps you talk about this topic clearly.*
- *In class, the teacher used "genus sterculia" to mean type genus of the sterculiaceae: deciduous or....*

---

genus sylvilagus *(noun)*

North American rabbits.

- *They discussed "genus sylvilagus" during the group presentation.*
- *The article explained what "genus sylvilagus" means with a simple example.*

---

genus thiobacillus *(noun)*

A genus of bacteria.

- *She wrote a short paragraph that included "genus thiobacillus."*
- *Understanding "genus thiobacillus" helps you talk about this topic clearly.*

---

genus thomomys *(noun)*

Western pocket gophers.

- *He looked up "genus thomomys" because he had never seen it before.*
- *Understanding "genus thomomys" helps you talk about this topic clearly.*

---

genus tridacna *(noun)*

Type genus of the family Tridacnidae: giant clams.

- *In class, the teacher used "genus tridacna" to mean type genus of the family tridacnidae: giant clams.*
- *The article explained what "genus tridacna" means with a simple example.*

---

gillespies *(noun)*

United States jazz trumpeter and exponent of bebop (1917-1993).

- *They discussed "gillespies" during the group presentation.*
- *In class, the teacher used "gillespies" to mean united states jazz trumpeter and exponent of bebop....*

glycosuria *(noun)*

The presence of abnormally high levels of sugar in the urine.

- *He looked up "glycosuria" because he had never seen it before.*
- *She wrote a short paragraph that included "glycosuria."*

gonadotrophin *(noun)*

Hormone secreted by the anterior pituitary gland and placenta; stimulates the gonads and controls reproductive activity.

- *In class, the teacher used "gonadotrophin" to mean hormone secreted by the anterior pituitary gland....*
- *The article explained what "gonadotrophin" means with a simple example.*

gooseflesh *(noun)*

Reflex erection of hairs of the skin in response to cold or emotional stress or skin irritation.

- *The article explained what "gooseflesh" means with a simple example.*
- *In class, the teacher used "gooseflesh" to mean reflex erection of hairs of the skin in response to....*

goosefoot *(noun)*

Any of various weeds of the genus Chenopodium having small greenish flowers.

- *The article explained what "goosefoot" means with a simple example.*
- *In class, the teacher used "goosefoot" to mean any of various weeds of the genus chenopodium....*

goosefoot family *(noun)*

Includes spinach and beets.

- *They discussed "goosefoot family" during the group presentation.*
- *The article explained what "goosefoot family" means with a simple example.*

goosefoot maple *(noun)*

Maple of eastern North America with striped bark and large two-lobed leaves clear yellow in autumn.

- *He looked up "goosefoot maple" because he had never seen it before.*
- *She wrote a short paragraph that included "goosefoot maple."*

gratingly *(adverb)*

In a harsh and grating manner.

- *Her voice fell gratingly on our ears.*
- *The narrator describes the scene "gratingly" in the final chapter.*
