- *In class, the teacher used "yucca carnerosana" to mean arborescent yucca of southwestern united states and....*

yucca filamentosa *(noun)*

Yucca with long stiff leaves having filamentlike appendages.

- *Understanding "yucca filamentosa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "yucca filamentosa."*

yucca smalliana *(noun)*

Yucca of southern United States having a clump of basal grasslike leaves and a central stalk with a terminal raceme of small whitish flowers.

- *They discussed "yucca smalliana" during the group presentation.*
- *He looked up "yucca smalliana" because he had never seen it before.*

yucca whipplei *(noun)*

Yucca of southwestern United States and Mexico with a tall spike of creamy white flowers.

- *The article explained what "yucca whipplei" means with a simple example.*
- *In class, the teacher used "yucca whipplei" to mean yucca of southwestern united states and mexico with....*

zaglossus *(noun)*

A genus of Tachyglossidae.

- *She wrote a short paragraph that included "zaglossus."*
- *He looked up "zaglossus" because he had never seen it before.*

zairese *(adjective)*

Of or relating to or characteristic of Zaire or its people.

- *A "zairese" approach may work better in this case.*
- *The speaker chose "zairese" because it captured the feeling precisely.*

---

zairese monetary unit *(noun)*

Monetary unit in Zaire.

- *He looked up "zairese monetary unit" because he had never seen it before.*
- *They discussed "zairese monetary unit" during the group presentation.*

---

zalophus californianus *(noun)*

Often trained as a show animal.

- *He looked up "zalophus californianus" because he had never seen it before.*
- *She wrote a short paragraph that included "zalophus californianus."*

---

zalophus californicus *(noun)*

Often trained as a show animal.

- *He looked up "zalophus californicus" because he had never seen it before.*
- *She wrote a short paragraph that included "zalophus californicus."*

---

zalophus lobatus *(noun)*

A variety of sea lion found in Australia.

- *In class, the teacher used "zalophus lobatus" to mean a variety of sea lion found in australia.*
- *Understanding "zalophus lobatus" helps you talk about this topic clearly.*

---

zamang *(noun)*

Large ornamental tropical American tree with bipinnate leaves and globose clusters of flowers with crimson stamens and seed pods that are eaten by cattle.

- *Understanding "zamang" helps you talk about this topic clearly.*
- *The article explained what "zamang" means with a simple example.*

---

zamiaceae *(noun)*

A family of cycads often included in the family Cycadaceae: zamias.

- *He looked up "zamiaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "zamiaceae."*

---

zannichellia *(noun)*

Horned pondweed: completely submerged herbs; in some classifications included in Potamogetonaceae.

- *In class, the teacher used "zannichellia" to mean horned pondweed: completely submerged herbs; in....*
- *The article explained what "zannichellia" means with a simple example.*

---

zannichellia palustris *(noun)*

Found in still or slow-moving fresh or brackish water; useful to oxygenate cool water ponds and aquaria.

- *They discussed "zannichellia palustris" during the group presentation.*
- *Understanding "zannichellia palustris" helps you talk about this topic clearly.*

---

zannichelliaceae *(noun)*

Alternative classification for some genera included in Potamogetonaceae; one species.

- *Understanding "zannichelliaceae" helps you talk about this topic clearly.*
- *He looked up "zannichelliaceae" because he had never seen it before.*

---

zantedeschia aethiopica *(noun)*

South African plant widely cultivated for its showy pure white spathe and yellow spadix.

- *In class, the teacher used "zantedeschia aethiopica" to mean south african plant widely cultivated for its showy....*
- *The article explained what "zantedeschia aethiopica" means with a simple example.*

---

zantedeschia rehmanii *(noun)*

Calla having a rose-colored spathe.

- *Understanding "zantedeschia rehmanii" helps you talk about this topic clearly.*
- *He looked up "zantedeschia rehmanii" because he had never seen it before.*

zanthoxylum fraxineum *(noun)*

Small deciduous aromatic shrub (or tree) having spiny branches and yellowish flowers; eastern North America.

- *He looked up "zanthoxylum fraxineum" because he had never seen it before.*
- *In class, the teacher used "zanthoxylum fraxineum" to mean small deciduous aromatic shrub (or tree) having....*

zapodidae *(noun)*

Jumping mice.

- *The article explained what "zapodidae" means with a simple example.*
- *They discussed "zapodidae" during the group presentation.*

zapotecan *(noun)*

A member of a large tribe of Mesoamericans living in southern Mexico whose civilization flourished around 300 to 900.

- *They discussed "zapotecan" during the group presentation.*
- *The article explained what "zapotecan" means with a simple example.*

zapus *(noun)*

Type genus of the Zapodidae.

- *They discussed "zapus" during the group presentation.*
- *In class, the teacher used "zapus" to mean type genus of the zapodidae.*

zapus hudsonius *(noun)*

Widely distributed in northeastern and central United States and Canada.

- *They discussed "zapus hudsonius" during the group presentation.*
- *She wrote a short paragraph that included "zapus hudsonius."*

zarf *(noun)*

An ornamental metal cup-shaped holder for a hot coffee cup.

- *The article explained what "zarf" means with a simple example.*
- *They discussed "zarf" during the group presentation.*

zarontin *(noun)*

An anticonvulsant drug (trade names Emeside and Zarontin) used to treat petit mal epilepsy.

- *The article explained what "zarontin" means with a simple example.*
- *They discussed "zarontin" during the group presentation.*

zarpanit *(noun)*

Consort of Marduk.

- *The article explained what "zarpanit" means with a simple example.*
- *Understanding "zarpanit" helps you talk about this topic clearly.*

zauschneria californica *(noun)*

Shrublet of southwestern United States to Mexico having brilliant scarlet flowers.

- *Understanding "zauschneria californica" helps you talk about this topic clearly.*
- *In class, the teacher used "zauschneria californica" to mean shrublet of southwestern united states to mexico....*

zbit *(noun)*

A unit of information equal to 1000 exabits or 10^21 bits.

- *The article explained what "zbit" means with a simple example.*
- *In class, the teacher used "zbit" to mean a unit of information equal to 1000 exabits or....*

zea mays amylacea *(noun)*

Corn having kernels almost entirely of soft starch.

- *They discussed "zea mays amylacea" during the group presentation.*
- *The article explained what "zea mays amylacea" means with a simple example.*

zea mays everta *(noun)*

Corn having small ears and kernels that burst when exposed to dry heat.

- *The article explained what "zea mays everta" means with a simple example.*
- *Understanding "zea mays everta" helps you talk about this topic clearly.*

---

zea mays indentata *(noun)*

Corn whose kernels contain both hard and soft starch and become indented at maturity.

- *Understanding "zea mays indentata" helps you talk about this topic clearly.*
- *The article explained what "zea mays indentata" means with a simple example.*

---

zea mays indurata *(noun)*

Corn having kernels with a hard outer layer enclosing the soft endosperm.

- *Understanding "zea mays indurata" helps you talk about this topic clearly.*
- *They discussed "zea mays indurata" during the group presentation.*

---

zea saccharata *(noun)*

A corn plant developed in order to have young ears that are sweet and suitable for eating.

- *She wrote a short paragraph that included "zea saccharata."*
- *The article explained what "zea saccharata" means with a simple example.*

---

zebibit *(noun)*

A unit of information equal to 1024 exbibits or 2^70 bits.

- *She wrote a short paragraph that included "zebibit."*
- *He looked up "zebibit" because he had never seen it before.*

---

zebibyte *(noun)*

A unit of information equal to 1024 exbibytes or 2^70 bytes.

- *He looked up "zebibyte" because he had never seen it before.*
- *In class, the teacher used "zebibyte" to mean a unit of information equal to 1024 exbibytes or....*

---

zeidae *(noun)*

A family of fish in the order Zeomorphi.

- *Understanding "zeidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "zeidae."*

---

zellig harris *(noun)*

United States linguist (born in Ukraine) who developed mathematical linguistics and interpreted speech and writing in a social context (1909-1992).

- *Understanding "zellig harris" helps you talk about this topic clearly.*
- *The article explained what "zellig harris" means with a simple example.*

---

zellig sabbatai harris *(noun)*

United States linguist (born in Ukraine) who developed mathematical linguistics and interpreted speech and writing in a social context (1909-1992).

- *They discussed "zellig sabbatai harris" during the group presentation.*
- *In class, the teacher used "zellig sabbatai harris" to mean united states linguist (born in ukraine) who....*

---

zenaidura *(noun)*

Mourning doves.

- *The article explained what "zenaidura" means with a simple example.*
- *Understanding "zenaidura" helps you talk about this topic clearly.*

---

zenaidura macroura *(noun)*

Wild dove of the United States having a mournful call.

- *They discussed "zenaidura macroura" during the group presentation.*
- *In class, the teacher used "zenaidura macroura" to mean wild dove of the united states having a mournful call.*

---

zeno of citium *(noun)*

Ancient Greek philosopher who founded the Stoic school (circa 335-263 BC).

- *He looked up "zeno of citium" because he had never seen it before.*

- *In class, the teacher used "zeno of citium" to mean ancient greek philosopher who founded the stoic....*

---

zestfulness *(noun)*

Vigorous and enthusiastic enjoyment.

- *He looked up "zestfulness" because he had never seen it before.*
- *In class, the teacher used "zestfulness" to mean vigorous and enthusiastic enjoyment.*

---

zestril *(noun)*

An ACE inhibiting drug (trade names Prinival or Zestril) administered as an antihypertensive and after heart attacks.

- *She wrote a short paragraph that included "zestril."*
- *Understanding "zestril" helps you talk about this topic clearly.*

---

zettabit *(noun)*

A unit of information equal to 1000 exabits or 10^21 bits.

- *She wrote a short paragraph that included "zettabit."*
- *Understanding "zettabit" helps you talk about this topic clearly.*

---

zibit *(noun)*

A unit of information equal to 1024 exbibits or 2^70 bits.

- *In class, the teacher used "zibit" to mean a unit of information equal to 1024 exbibits or....*
- *The article explained what "zibit" means with a simple example.*

---

zigadene *(noun)*

Any of various plants of the genus Zigadenus having glaucous leaves and terminal racemes of mostly white flowers; all are poisonous.

- *They discussed "zigadene" during the group presentation.*
- *She wrote a short paragraph that included "zigadene."*

---

zigadenus *(noun)*

Genus of mostly North American poisonous plants; sometimes placed in family Melanthiaceae.

- *He looked up "zigadenus" because he had never seen it before.*
- *She wrote a short paragraph that included "zigadenus."*

---

zigadenus elegans *(noun)*

Plant of western North America having grasslike leaves and greenish-white flowers.

- *The article explained what "zigadenus elegans" means with a simple example.*
- *She wrote a short paragraph that included "zigadenus elegans."*

---

zigadenus glaucus *(noun)*

Plant of eastern and central North America having creamy white flowers tinged with brown or purple; poisonous especially to grazing animals.

- *In class, the teacher used "zigadenus glaucus" to mean plant of eastern and central north america having....*
- *They discussed "zigadenus glaucus" during the group presentation.*

---

zigadenus nuttalli *(noun)*

A common perennial death camas; Tennessee to Kansas to Texas.

- *She wrote a short paragraph that included "zigadenus nuttalli."*
- *They discussed "zigadenus nuttalli" during the group presentation.*

---

zigadenus venenosus *(noun)*

Plant of western North America to Mexico; poisonous especially to grazing animals.

- *Understanding "zigadenus venenosus" helps you talk about this topic clearly.*
- *In class, the teacher used "zigadenus venenosus" to mean plant of western north america to mexico; poisonous....*

---

zigadenus venenosus gramineus *(noun)*

Plant of western North America to Mexico; poisonous especially to grazing animals.

- *The article explained what "zigadenus venenosus gramineus" means with a simple example.*
- *Understanding "zigadenus venenosus gramineus" helps you talk about this topic clearly.*

---

zikkurat *(noun)*

A rectangular tiered temple or terraced mound erected by the ancient Assyrians and Babylonians.

- *The article explained what "zikkurat" means with a simple example.*
- *They discussed "zikkurat" during the group presentation.*

---

zikurat *(noun)*

A rectangular tiered temple or terraced mound erected by the ancient Assyrians and Babylonians.

- *He looked up "zikurat" because he had never seen it before.*
- *She wrote a short paragraph that included "zikurat."*

---

zinacef *(noun)*

A cephalosporin that can be given parenterally (trade name Zinacef) or orally by tablets (trade name Ceftin); indicated for infections of the lungs or throat or ears or urinary tract or meninges.

- *He looked up "zinacef" because he had never seen it before.*
- *They discussed "zinacef" during the group presentation.*

---

zinjanthropus *(noun)*

Genus to which Australopithecus boisei was formerly assigned.

- *They discussed "zinjanthropus" during the group presentation.*
- *She wrote a short paragraph that included "zinjanthropus."*

---

zinkenite *(noun)*

A steel grey metallic mineral (a sulphide of lead and antimony).

- *They discussed "zinkenite" during the group presentation.*
- *Understanding "zinkenite" helps you talk about this topic clearly.*

---

zinnia acerosa *(noun)*

Subshrub with slender woolly stems and long narrow leaves and flower heads with white rays; southern United States and northern Mexico.

- *They discussed "zinnia acerosa" during the group presentation.*
- *The article explained what "zinnia acerosa" means with a simple example.*

---

zinnwaldite *(noun)*

A mica containing iron and lithium.

- *They discussed "zinnwaldite" during the group presentation.*
- *In class, the teacher used "zinnwaldite" to mean a mica containing iron and lithium.*

---

ziphiidae *(noun)*

Beaked whales; in some especially former classifications included in the family Physeteridae.

- *The article explained what "ziphiidae" means with a simple example.*
- *In class, the teacher used "ziphiidae" to mean beaked whales; in some especially former....*

---

zirbanit *(noun)*

Consort of Marduk.

- *The article explained what "zirbanit" means with a simple example.*
- *She wrote a short paragraph that included "zirbanit."*

---

zithern *(noun)*

A musical stringed instrument with strings stretched over a flat sounding board; it is laid flat and played with a plectrum and with fingers.

- *He looked up "zithern" because he had never seen it before.*
- *In class, the teacher used "zithern" to mean a musical stringed instrument with strings....*

---

zizania aquatica *(noun)*

Perennial aquatic grass of North America bearing grain used for food.

- *They discussed "zizania aquatica" during the group presentation.*
- *He looked up "zizania aquatica" because he had never seen it before.*

---

ziziphus jujuba *(noun)*

Spiny tree having dark red edible fruits.

- *The article explained what "ziziphus jujuba" means with a simple example.*
- *They discussed "ziziphus jujuba" during the group presentation.*

---

zoanthropy *(noun)*

The delusion that you have assumed the form of an animal.

- *Understanding "zoanthropy" helps you talk about this topic clearly.*
- *The article explained what "zoanthropy" means with a simple example.*

---

zoarces *(noun)*

Type genus of the Zoarcidae.

- *The article explained what "zoarces" means with a simple example.*
- *In class, the teacher used "zoarces" to mean type genus of the zoarcidae.*

---

zoarces viviparus *(noun)*

An eelpout of northern Europe that is viviparous.

- *He looked up "zoarces viviparus" because he had never seen it before.*
- *In class, the teacher used "zoarces viviparus" to mean an eelpout of northern europe that is viviparous.*

---

zoftig *(adjective)*

(of a female body) healthily plump and vigorous ; - Robt.A.Hamilton.

- *A "zoftig" approach may work better in this case.*
- *Her writing became clearer after she learned "zoftig."*

---

zoisia *(noun)*

Lawn grasses native to southeastern Asia and New Zealand; grown especially in warm regions.

- *She wrote a short paragraph that included "zoisia."*
- *He looked up "zoisia" because he had never seen it before.*

---

zolaesque *(adjective)*

In the manner of Emile Zola.

- *Her writing became clearer after she learned "zolaesque."*
- *Students compared "zolaesque" with similar adjectives in the lesson.*

---

zonary *(adjective)*

Relating to or of the nature of a zone.

- *The speaker chose "zonary" because it captured the feeling precisely.*
- *A "zonary" approach may work better in this case.*

---

zonotrichia albicollis *(noun)*

Common North American finch with a white patch on the throat and black-and-white striped crown.

- *In class, the teacher used "zonotrichia albicollis" to mean common north american finch with a white patch on....*
- *Understanding "zonotrichia albicollis" helps you talk about this topic clearly.*

---

zonotrichia leucophrys *(noun)*

Finch with black-and-white striped crown.

- *In class, the teacher used "zonotrichia leucophrys" to mean finch with black-and-white striped crown.*
- *They discussed "zonotrichia leucophrys" during the group presentation.*

---

zonula *(noun)*

Small beltlike zone.

- *They discussed "zonula" during the group presentation.*
- *The article explained what "zonula" means with a simple example.*

---

zonule *(noun)*

Small beltlike zone.

- *The article explained what "zonule" means with a simple example.*
- *In class, the teacher used "zonule" to mean small beltlike zone.*

zooerastia *(noun)*

Sexual activity between a person and an animal.

- *The article explained what "zooerastia" means with a simple example.*
- *In class, the teacher used "zooerastia" to mean sexual activity between a person and an animal.*

zooerasty *(noun)*

Sexual activity between a person and an animal.

- *In class, the teacher used "zooerasty" to mean sexual activity between a person and an animal.*
- *They discussed "zooerasty" during the group presentation.*

zooflagellate *(noun)*

Flagellate protozoan lacking photosynthesis and other plant-like characteristics.

- *They discussed "zooflagellate" during the group presentation.*
- *The article explained what "zooflagellate" means with a simple example.*

zoolatry *(noun)*

The worship of animals.

- *In class, the teacher used "zoolatry" to mean the worship of animals.*
- *Understanding "zoolatry" helps you talk about this topic clearly.*

zoomastigina *(noun)*

In some classifications considered a phylum of the kingdom Protista; holozoic or saprozoic flagellates.

- *They discussed "zoomastigina" during the group presentation.*
- *He looked up "zoomastigina" because he had never seen it before.*

zoomastigote *(noun)*

Flagellate protozoan lacking photosynthesis and other plant-like characteristics.

- *The article explained what "zoomastigote" means with a simple example.*
- *She wrote a short paragraph that included "zoomastigote."*

zoomorphism *(noun)*

The attribution of animal forms or qualities to a god.

- *They discussed "zoomorphism" during the group presentation.*
- *In class, the teacher used "zoomorphism" to mean the attribution of animal forms or qualities to a god.*

zoophagous *(adjective)*

(of animals) carnivorous.

- *A "zoophagous" approach may work better in this case.*
- *It is useful to describe something as "zoophagous" when it is (of animals) carnivorous.*

zoophilism *(noun)*

A sexual attraction to animals.

- *He looked up "zoophilism" because he had never seen it before.*
- *In class, the teacher used "zoophilism" to mean a sexual attraction to animals.*

zoophobia *(noun)*

A morbid fear of animals.

- *They discussed "zoophobia" during the group presentation.*
- *He looked up "zoophobia" because he had never seen it before.*

zoophyte *(noun)*

Any of various invertebrate animals resembling a plant such as a sea anemone or coral or sponge.

- *He looked up "zoophyte" because he had never seen it before.*
- *She wrote a short paragraph that included "zoophyte."*

zoopsia *(noun)*

Visual hallucination of animals; sometimes occurring in delirium tremens.

- *They discussed "zoopsia" during the group presentation.*
- *In class, the teacher used "zoopsia" to mean visual hallucination of animals; sometimes....*

---

zootoxin *(noun)*

A toxin resembling bacterial toxins in its antigenic properties that is found in the fluids of certain animals.

- *In class, the teacher used "zootoxin" to mean a toxin resembling bacterial toxins in its....*
- *The article explained what "zootoxin" means with a simple example.*

---

zoril *(noun)*

Muishond of northern Africa.

- *Understanding "zoril" helps you talk about this topic clearly.*
- *In class, the teacher used "zoril" to mean muishond of northern africa.*

---

zosteraceae *(noun)*

Used in some classifications: essentially equivalent to Potamogetonaceae.

- *He looked up "zosteraceae" because he had never seen it before.*
- *Understanding "zosteraceae" helps you talk about this topic clearly.*

---

zoysia matrella *(noun)*

Lawn grass common in the Philippines; grown also in United States.

- *They discussed "zoysia matrella" during the group presentation.*
- *In class, the teacher used "zoysia matrella" to mean lawn grass common in the philippines; grown also in....*

---

zsigmondy *(noun)*

German chemist (born in Austria) honored for his research on colloidal solutions (1865-1929).

- *In class, the teacher used "zsigmondy" to mean german chemist (born in austria) honored for his....*
- *The article explained what "zsigmondy" means with a simple example.*

---

zubird *(noun)*

Evil storm god represented as a black bird.

- *Understanding "zubird" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "zubird."*

---

zurvanism *(noun)*

A Zoroastrian sect that claims Zurvan was the ultimate source of the universe.

- *They discussed "zurvanism" during the group presentation.*
- *Understanding "zurvanism" helps you talk about this topic clearly.*

---

zygnema *(noun)*

Type genus of the family Zygnemataceae.

- *She wrote a short paragraph that included "zygnema."*
- *He looked up "zygnema" because he had never seen it before.*

---

zygnemales *(noun)*

Pond scums; desmids.

- *She wrote a short paragraph that included "zygnemales."*
- *The article explained what "zygnemales" means with a simple example.*

---

zygnemataceae *(noun)*

Pond scums: common freshwater algae forming green slimy masses.

- *In class, the teacher used "zygnemataceae" to mean pond scums: common freshwater algae forming green....*
- *The article explained what "zygnemataceae" means with a simple example.*

---

zygnematales *(noun)*

Pond scums; desmids.

- *He looked up "zygnematales" because he had never seen it before.*

- *She wrote a short paragraph that included "zygnematales."*

---

zygocactus *(noun)*

Small genus of Brazilian cacti having flat fleshy usually branched joints and showy red or pink flowers followed by red fleshy fruits.

- *Understanding "zygocactus" helps you talk about this topic clearly.*
- *In class, the teacher used "zygocactus" to mean small genus of brazilian cacti having flat fleshy....*

---

zygocactus truncatus *(noun)*

South American jointed cactus with usually red flowers; often cultivated as a houseplant; sometimes classified as genus Schlumbergera.

- *The article explained what "zygocactus truncatus" means with a simple example.*
- *Understanding "zygocactus truncatus" helps you talk about this topic clearly.*

---

zygodactyl *(adjective)*

(of bird feet) having the first and fourth toes directed backward the second and third forward.

- *It is useful to describe something as "zygodactyl" when it is (of bird feet) having the first and fourth toes....*
- *A "zygodactyl" approach may work better in this case.*

---

zygodactyl foot *(noun)*

A bird's foot having the first and fourth toes of each foot directed backward and the second and third forward.

- *He looked up "zygodactyl foot" because he had never seen it before.*
- *She wrote a short paragraph that included "zygodactyl foot."*

---

zygomorphous *(adjective)*

Capable of division into symmetrical halves by only one longitudinal plane passing through the axis.

- *It is useful to describe something as "zygomorphous" when it is capable of division into symmetrical halves by only....*
- *Would you call this situation "zygomorphous"? Explain why.*

---

zygomycetes *(noun)*

Class of fungi coextensive with subdivision Zygomycota.

- *She wrote a short paragraph that included "zygomycetes."*
- *They discussed "zygomycetes" during the group presentation.*

---

zygomycota *(noun)*

Division of fungi having sexually produced zygospores.

- *In class, the teacher used "zygomycota" to mean division of fungi having sexually produced zygospores.*
- *Understanding "zygomycota" helps you talk about this topic clearly.*

---

zygomycotina *(noun)*

Division of fungi having sexually produced zygospores.

- *They discussed "zygomycotina" during the group presentation.*
- *The article explained what "zygomycotina" means with a simple example.*

---

zygophyllaceae *(noun)*

Small trees, shrubs, and herbs of warm arid and saline regions; often resinous; some poisonous: genera Zygophyllum, Tribulus, Guaiacum, Larrea.

- *They discussed "zygophyllaceae" during the group presentation.*
- *The article explained what "zygophyllaceae" means with a simple example.*

---

zygophyllum *(noun)*

Usually tropical herbs or shrubs having ill-smelling foliage and flower buds that are used as capers: bean capers.

- *In class, the teacher used "zygophyllum" to mean usually tropical herbs or shrubs having....*
- *The article explained what "zygophyllum" means with a simple example.*

---

zygophyllum fabago *(noun)*

Perennial shrub of the eastern Mediterranean region and southwestern Asia having flowers whose buds are used as capers.

- *He looked up "zygophyllum fabago" because he had never seen it before.*
- *They discussed "zygophyllum fabago" during the group presentation.*

---

zygoptera *(noun)*

Damselflies.

- *She wrote a short paragraph that included "zygoptera."*
- *The article explained what "zygoptera" means with a simple example.*

---

zygospore *(noun)*

A plant spore formed by two similar sexual cells.

- *Understanding "zygospore" helps you talk about this topic clearly.*
- *In class, the teacher used "zygospore" to mean a plant spore formed by two similar sexual cells.*

---

zygotene *(noun)*

The second stage of the prophase of meiosis.

- *The article explained what "zygotene" means with a simple example.*
- *They discussed "zygotene" during the group presentation.*

---

zymase *(noun)*

A complex of enzymes that cause glycolysis; originally found in yeast but also present in higher organisms.

- *They discussed "zymase" during the group presentation.*
- *The article explained what "zymase" means with a simple example.*

---

zymoid *(adjective)*

Resembling an enzyme.

- *Would you call this situation "zymoid"? Explain why.*
- *The speaker chose "zymoid" because it captured the feeling precisely.*

---

zymology *(noun)*

The branch of chemistry concerned with fermentation (as in making wine or brewing or distilling).

- *In class, the teacher used "zymology" to mean the branch of chemistry concerned with fermentation....*
- *The article explained what "zymology" means with a simple example.*

---

zymolysis *(noun)*

A process in which an agent causes an organic substance to break down into simpler substances; especially, the anaerobic breakdown of sugar into alcohol.

- *She wrote a short paragraph that included "zymolysis."*
- *The article explained what "zymolysis" means with a simple example.*

---

zymolytic *(adjective)*

Of or relating to or causing fermentation.

- *Students compared "zymolytic" with similar adjectives in the lesson.*
- *It is useful to describe something as "zymolytic" when it is of or relating to or causing fermentation.*

---

zymosis *(noun)*

A process in which an agent causes an organic substance to break down into simpler substances; especially, the anaerobic breakdown of sugar into alcohol.

- *In class, the teacher used "zymosis" to mean a process in which an agent causes an organic....*
- *They discussed "zymosis" during the group presentation.*

---

zymotic *(adjective)*

Of or relating to or causing fermentation.

- *The speaker chose "zymotic" because it captured the feeling precisely.*
- *Would you call this situation "zymotic"? Explain why.*

---

zymurgy *(noun)*

The branch of chemistry concerned with fermentation (as in making wine or brewing or distilling).

- *The article explained what "zymurgy" means with a simple example.*
- *She wrote a short paragraph that included "zymurgy."*

---

a'man *(noun)*

Pertaining to a growth of fungi that forms a heaped-up mass.

- *Acervate fungous sporophores.*
- *The speaker chose "acervate" because it captured the feeling precisely.*

---

acervulus *(noun)*

Small asexual fruiting body resembling a cushion or blister consisting of a mat of hyphae that is produced on a host by some fungi.

- *Understanding "acervulus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "acervulus."*

---

acetaldol *(noun)*

Unsaturated aldol.

- *She wrote a short paragraph that included "acetaldol."*
- *The article explained what "acetaldol" means with a simple example.*

---

acetanilid *(noun)*

A white crystalline compound used as an analgesic and also as an antipyretic.

- *In class, the teacher used "acetanilid" to mean a white crystalline compound used as an analgesic....*
- *They discussed "acetanilid" during the group presentation.*

---

acetanilide *(noun)*

A white crystalline compound used as an analgesic and also as an antipyretic.

- *They discussed "acetanilide" during the group presentation.*
- *She wrote a short paragraph that included "acetanilide."*

---

acetify *(verb)*

Make sour or more sour.

- *In everyday English, people use "acetify" when talking about this idea.*
- *Learners should practice how to use "acetify" in real sentences.*

---

acetin *(noun)*

Any of three liquid acetates that are formed when acetic acid and glycerin are heated together.

- *He looked up "acetin" because he had never seen it before.*
- *She wrote a short paragraph that included "acetin."*

---

acetoacetic acid *(noun)*

Unstable acid found in abnormal amounts in the blood and urine in some cases of impaired metabolism (as diabetes mellitus or starvation).

- *Understanding "acetoacetic acid" helps you talk about this topic clearly.*
- *He looked up "acetoacetic acid" because he had never seen it before.*

---

acetonemia *(noun)*

An abnormal increase of ketone bodies in the blood as in diabetes mellitus.

- *Understanding "acetonemia" helps you talk about this topic clearly.*

- *She wrote a short paragraph that included “acetonemia.”*

---

acetonic *(adjective)*

Of or relating to acetone.

- *Students compared “acetonic” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “acetonic.”*

---

acetonuria *(noun)*

Excessive amounts of ketone bodies in the urine as in diabetes mellitus or starvation.

- *They discussed “acetonuria” during the group presentation.*
- *Understanding “acetonuria” helps you talk about this topic clearly.*

---

acetophenetidin *(noun)*

A white crystalline compound used as an analgesic and also as an antipyretic.

- *He looked up “acetophenetidin” because he had never seen it before.*
- *She wrote a short paragraph that included “acetophenetidin.”*

---

acetose *(adjective)*

Tasting or smelling like vinegar.

- *Would you call this situation “acetose”? Explain why.*
- *It is useful to describe something as “acetose” when it is tasting or smelling like vinegar.*

---

acetous *(adjective)*

Tasting or smelling like vinegar.

- *It is useful to describe something as “acetous” when it is tasting or smelling like vinegar.*
- *The speaker chose “acetous” because it captured the feeling precisely.*

---

acetphenetidin *(noun)*

A white crystalline compound used as an analgesic and also as an antipyretic.

- *She wrote a short paragraph that included “acetphenetidin.”*
- *The article explained what “acetphenetidin” means with a simple example.*

---

acetum *(noun)*

A dilute solution of acetic acid that is used as a solvent (e.g. for a drug).

- *The article explained what “acetum” means with a simple example.*
- *In class, the teacher used “acetum” to mean a dilute solution of acetic acid that is used as a....*

---

acetylate *(verb)*

Receive substitution of an acetyl group.

- *The compounds acetylated.*
- *She tried to use “acetylate” carefully so everyone would understand.*

---

acetylenic *(adjective)*

Of or related to acetylene.

- *Her writing became clearer after she learned “acetylenic.”*
- *The speaker chose “acetylenic” because it captured the feeling precisely.*

---

acetylic *(adjective)*

Of or related to acetic acid.

- *It is useful to describe something as “acetylic” when it is of or related to acetic acid.*
- *The speaker chose “acetylic” because it captured the feeling precisely.*

---

acetylise *(verb)*

Receive substitution of an acetyl group.

- *In everyday English, people use “acetylise” when talking about this idea.*
- *She tried to use “acetylise” carefully so everyone would understand.*

---

acetylize *(verb)*

Receive substitution of an acetyl group.

- *The coach explained when to use "acetylize" and when to wait.*
- *Can you use "acetylize" in a sentence that fits this situation?*

---

achaian *(noun)*

A member of one of four linguistic divisions of the prehistoric Greeks.

- *She wrote a short paragraph that included "achaian."*
- *They discussed "achaian" during the group presentation.*

---

achenial *(adjective)*

Pertaining to dry one-seeded indehiscent fruit.

- *A "achenial" approach may work better in this case.*
- *Students compared "achenial" with similar adjectives in the lesson.*

---

acheronian *(adjective)*

Dark and dismal as of the rivers Acheron and Styx in Hades; ; -Wordsworth.

- *In the depths of an Acheronian forest.*
- *Students compared "acheronian" with similar adjectives in the lesson.*

---

acherontia *(noun)*

Death's-head moth.

- *He looked up "acherontia" because he had never seen it before.*
- *Understanding "acherontia" helps you talk about this topic clearly.*

---

acherontia atropos *(noun)*

European hawkmoth with markings on the back resembling a human skull.

- *Understanding "acherontia atropos" helps you talk about this topic clearly.*
- *They discussed "acherontia atropos" during the group presentation.*

---

acherontic *(adjective)*

Dark and dismal as of the rivers Acheron and Styx in Hades; ; -Wordsworth.

- *It is useful to describe something as "acherontic" when it is dark and dismal as of the rivers acheron and styx....*
- *The speaker chose "acherontic" because it captured the feeling precisely.*

---

acheta *(noun)*

Common house and field crickets.

- *Understanding "acheta" helps you talk about this topic clearly.*
- *He looked up "acheta" because he had never seen it before.*

---

acheta assimilis *(noun)*

Common American black cricket; attacks crops and also enters dwellings.

- *In class, the teacher used "acheta assimilis" to mean common american black cricket; attacks crops and....*
- *Understanding "acheta assimilis" helps you talk about this topic clearly.*

---

acheta domestica *(noun)*

Lives in human dwellings; naturalized in parts of America.

- *The article explained what "acheta domestica" means with a simple example.*
- *In class, the teacher used "acheta domestica" to mean lives in human dwellings; naturalized in parts of....*

---

achillea ptarmica *(noun)*

Eurasian herb having loose heads of button-shaped white flowers and long grey-green leaves that cause sneezing when powdered.

- *Understanding "achillea ptarmica" helps you talk about this topic clearly.*
- *In class, the teacher used "achillea ptarmica" to mean eurasian herb having loose heads of button-shaped....*

---

achimenes *(noun)*

Any plant of the genus Achimenes having showy bell-shaped flowers that resemble gloxinias.

- *They discussed “achimenes” during the group presentation.*
- *He looked up “achimenes” because he had never seen it before.*

---

achira *(noun)*

Canna grown especially for its edible rootstock from which arrowroot starch is obtained.

- *He looked up “achira” because he had never seen it before.*
- *They discussed “achira” during the group presentation.*

---

achlamydeous *(adjective)*

Not having a floral envelope or perianth.

- *Her writing became clearer after she learned “achlamydeous.”*
- *A “achlamydeous” approach may work better in this case.*

---

achlorhydria *(noun)*

An abnormal deficiency or absence of free hydrochloric acid in the gastric juice; often associated with severe anemias and cancer of the stomach.

- *Understanding “achlorhydria” helps you talk about this topic clearly.*
- *He looked up “achlorhydria” because he had never seen it before.*

---

achlorhydric *(adjective)*

Lacking hydrochloric acid.

- *Students compared “achlorhydric” with similar adjectives in the lesson.*
- *A “achlorhydric” approach may work better in this case.*

---

achoerodus *(noun)*

A genus of Labridae.

- *She wrote a short paragraph that included “achoerodus.”*
- *They discussed “achoerodus” during the group presentation.*

---

achoerodus gouldii *(noun)*

Found around the Great Barrier Reef.

- *Understanding “achoerodus gouldii” helps you talk about this topic clearly.*
- *In class, the teacher used “achoerodus gouldii” to mean found around the great barrier reef.*

---

acholia *(noun)*

A condition in which little or no bile is secreted or the flow of bile into the digestive tract is obstructed.

- *She wrote a short paragraph that included “acholia.”*
- *Understanding “acholia” helps you talk about this topic clearly.*

---

achomawi *(noun)*

The Shastan language spoken by the Achomawi.

- *She wrote a short paragraph that included “achomawi.”*
- *Understanding “achomawi” helps you talk about this topic clearly.*

---

achondrite *(noun)*

A stony meteor lacking chondrules.

- *She wrote a short paragraph that included “achondrite.”*
- *The article explained what “achondrite” means with a simple example.*

---

achondritic *(adjective)*

Of or related to an achondrite.

- *Would you call this situation “achondritic”? Explain why.*
- *It is useful to describe something as “achondritic” when it is of or related to an achondrite.*

---

achondroplastic *(adjective)*

Of or relating to achondroplasia.

- *Would you call this situation “achondroplastic”? Explain why.*
- *The speaker chose “achondroplastic” because it captured the feeling precisely.*

achondroplasty *(noun)*

An inherited skeletal disorder beginning before birth; cartilage is converted to bone resulting in dwarfism.

- *The article explained what "achondroplasty" means with a simple example.*
- *They discussed "achondroplasty" during the group presentation.*

achras *(noun)*

Tropical trees having papery leaves and large fruit.

- *Understanding "achras" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "achras."*

achras zapota *(noun)*

Large tropical American evergreen yielding chicle gum and edible fruit; sometimes placed in genus Achras.

- *They discussed "achras zapota" during the group presentation.*
- *In class, the teacher used "achras zapota" to mean large tropical american evergreen yielding chicle....*

achromasia *(noun)*

Unnatural lack of color in the skin (as from bruising or sickness or emotional distress).

- *He looked up "achromasia" because he had never seen it before.*
- *She wrote a short paragraph that included "achromasia."*

achromaticity *(noun)*

The visual property of being without chromatic color.

- *She wrote a short paragraph that included "achromaticity."*
- *He looked up "achromaticity" because he had never seen it before.*

achromatin *(noun)*

The part of a cell nucleus that is relatively uncolored by stains or dyes.

- *In class, the teacher used "achromatin" to mean the part of a cell nucleus that is relatively....*
- *He looked up "achromatin" because he had never seen it before.*

achromatinic *(adjective)*

(of substance of a cell nucleus) not readily colored by stains.

- *It is useful to describe something as "achromatinic" when it is (of substance of a cell nucleus) not readily....*
- *The speaker chose "achromatinic" because it captured the feeling precisely.*

achromatise *(verb)*

Remove color from.

- *The coach explained when to use "achromatise" and when to wait.*
- *Can you use "achromatise" in a sentence that fits this situation?*

achromatism *(noun)*

The visual property of being without chromatic color.

- *In class, the teacher used "achromatism" to mean the visual property of being without chromatic color.*
- *The article explained what "achromatism" means with a simple example.*

achromatize *(verb)*

Remove color from.

- *Achromatize the lenses.*
- *He did not know how to use "achromatize" until he saw an example.*

achromatous *(adjective)*

Having little or inadequate color.

- *Would you call this situation "achromatous"? Explain why.*
- *It is useful to describe something as "achromatous" when it is having little or inadequate color.*

achromia *(noun)*

An absence of normal pigmentation especially in the skin (as in albinism) or in red blood cells.

- *Understanding "achromia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "achromia."*

---

achromic *(adjective)*

Having no color.

- *Students compared "achromic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "achromic."*

---

achromous *(adjective)*

Having no color.

- *A "achromous" approach may work better in this case.*
- *Would you call this situation "achromous"? Explain why.*

---

achromycin *(noun)*

An antibiotic (trade name Achromycin) derived from microorganisms of the genus Streptomyces and used broadly to treat infections.

- *She wrote a short paragraph that included "achromycin."*
- *They discussed "achromycin" during the group presentation.*

---

achylia *(noun)*

Absence of gastric juices (partial or complete).

- *They discussed "achylia" during the group presentation.*
- *He looked up "achylia" because he had never seen it before.*

---

achylia gastrica *(noun)*

Absence of gastric juices (partial or complete).

- *She wrote a short paragraph that included "achylia gastrica."*
- *They discussed "achylia gastrica" during the group presentation.*

---

acicula *(noun)*

A needlelike part or structure of a plant or animal or crystal; as a spine or bristle or crystal.

- *Understanding "acicula" helps you talk about this topic clearly.*
- *They discussed "acicula" during the group presentation.*

---

aciculate *(adjective)*

Related to plants or animals or crystals having aciculae or needlelike parts.

- *The speaker chose "aciculate" because it captured the feeling precisely.*
- *It is useful to describe something as "aciculate" when it is related to plants or animals or crystals having....*

---

acidimetric *(adjective)*

Involving or related to acidimetry.

- *Students compared "acidimetric" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "acidimetric."*

---

acidimetry *(noun)*

Volumetric analysis using standard solutions of acids to measure the amount of a base present.

- *They discussed "acidimetry" during the group presentation.*
- *Understanding "acidimetry" helps you talk about this topic clearly.*

---

acidophil *(noun)*

An organism that thrives in a relatively acid environment.

- *They discussed "acidophil" during the group presentation.*
- *He looked up "acidophil" because he had never seen it before.*

---

acidophile *(noun)*

An organism that thrives in a relatively acid environment.

- *He looked up "acidophile" because he had never seen it before.*

- *In class, the teacher used “acidophile” to mean an organism that thrives in a relatively acid....*

---

acidophilous *(adjective)*

Especially of some bacteria; growing well in an acid medium.

- *It is useful to describe something as “acidophilous” when it is especially of some bacteria; growing well in an....*
- *The speaker chose “acidophilous” because it captured the feeling precisely.*

---

acidulate *(verb)*

Make sour or more sour.

- *The coach explained when to use “acidulate” and when to wait.*
- *Can you use “acidulate” in a sentence that fits this situation?*

---

acidulent *(adjective)*

Being sour to the taste.

- *A “acidulent” approach may work better in this case.*
- *It is useful to describe something as “acidulent” when it is being sour to the taste.*

---

acidulousness *(noun)*

The taste experience when something acidic is taken into the mouth.

- *In class, the teacher used “acidulousness” to mean the taste experience when something acidic is taken....*
- *Understanding “acidulousness” helps you talk about this topic clearly.*

---

aciduric *(adjective)*

Especially of some bacteria; growing well in an acid medium.

- *Would you call this situation “aciduric”? Explain why.*
- *Her writing became clearer after she learned “aciduric.”*

---

acinic *(adjective)*

Pertaining to one of the small sacs (as in a compound gland).

- *The speaker chose “acinic” because it captured the feeling precisely.*
- *A “acinic” approach may work better in this case.*

---

acinonyx jubatus *(noun)*

Long-legged spotted cat of Africa and southwestern Asia having nonretractile claws; the swiftest mammal; can be trained to run down game.

- *The article explained what “acinonyx jubatus” means with a simple example.*
- *In class, the teacher used “acinonyx jubatus” to mean long-legged spotted cat of africa and southwestern....*

---

acinos *(noun)*

Plants closely allied to the genera Satureja and Calamintha.

- *She wrote a short paragraph that included “acinos.”*
- *The article explained what “acinos” means with a simple example.*

---

acinos arvensis *(noun)*

Fragrant European mint having clusters of small violet-and-white flowers; naturalized especially in eastern North America.

- *Understanding “acinos arvensis” helps you talk about this topic clearly.*
- *He looked up “acinos arvensis” because he had never seen it before.*

---

acinose *(adjective)*

Pertaining to one of the small sacs (as in a compound gland).

- *It is useful to describe something as “acinose” when it is pertaining to one of the small sacs (as in a....*
- *A “acinose” approach may work better in this case.*

---

acinous *(adjective)*

Pertaining to one of the small sacs (as in a compound gland).

- *Students compared “acinous” with similar adjectives in the lesson.*
- *Would you call this situation “acinous”? Explain why.*

---

acinus *(noun)*

One of the small sacs or saclike dilations in a compound gland.

- *She wrote a short paragraph that included "acinus."*
- *He looked up "acinus" because he had never seen it before.*

---

acipenser transmontanus *(noun)*

Food and game fish of marine and fresh waters of northwestern coast of North America.

- *They discussed "acipenser transmontanus" during the group presentation.*
- *In class, the teacher used "acipenser transmontanus" to mean food and game fish of marine and fresh waters of....*

---

acknowledgeable *(adjective)*

Capable of being acknowledged.

- *It is useful to describe something as "acknowledgeable" when it is capable of being acknowledged.*
- *Would you call this situation "acknowledgeable"? Explain why.*

---

aclant *(noun)*

A major strategic headquarters of NATO located in the United States; is under the authority of the North Atlantic Council.

- *The article explained what "aclant" means with a simple example.*
- *She wrote a short paragraph that included "aclant."*

---

aclinic line *(noun)*

An imaginary line paralleling the equator where a magnetic needle has no dip.

- *The article explained what "aclinic line" means with a simple example.*
- *In class, the teacher used "aclinic line" to mean an imaginary line paralleling the equator where a....*

---

acned *(adjective)*

(of complexion) blemished by imperfections of the skin.

- *The speaker chose "acned" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "acned."*

---

acneiform *(adjective)*

Resembling acne.

- *It is useful to describe something as "acneiform" when it is resembling acne.*
- *A "acneiform" approach may work better in this case.*

---

acnidosporidia *(noun)*

A subclass of Sporozoa.

- *They discussed "acnidosporidia" during the group presentation.*
- *He looked up "acnidosporidia" because he had never seen it before.*

---

acocanthera *(noun)*

Small genus of trees and shrubs containing strongly toxic cardiac glycosides; Arabia to Africa.

- *They discussed "acocanthera" during the group presentation.*
- *The article explained what "acocanthera" means with a simple example.*

---

acocanthera oblongifolia *(noun)*

Medium-sized shrubby tree of South Africa having thick leathery evergreen leaves and white or pink flowers and globose usually two-seeded purplish black fruits.

- *He looked up "acocanthera oblongifolia" because he had never seen it before.*
- *They discussed "acocanthera oblongifolia" during the group presentation.*

---

acocanthera oppositifolia *(noun)*

Evergreen shrub or tree of South Africa.

- *She wrote a short paragraph that included "acocanthera oppositifolia."*
- *The article explained what "acocanthera oppositifolia" means with a simple example.*

---

acocanthera spectabilis *(noun)*

Medium-sized shrubby tree of South Africa having thick leathery evergreen leaves and white or pink flowers and globose usually two-seeded purplish black fruits.

- *Understanding “acocanthera spectabilis” helps you talk about this topic clearly.*
- *The article explained what “acocanthera spectabilis” means with a simple example.*

---

acocanthera venenata *(noun)*

Evergreen shrub or tree of South Africa.

- *They discussed “acocanthera venenata” during the group presentation.*
- *Understanding “acocanthera venenata” helps you talk about this topic clearly.*

---

acokanthera *(noun)*

Small genus of trees and shrubs containing strongly toxic cardiac glycosides; Arabia to Africa.

- *She wrote a short paragraph that included “acokanthera.”*
- *He looked up “acokanthera” because he had never seen it before.*

---

acold *(adjective)*

Of persons; feeling cold; - Shakespeare.

- *Poor Tom's acold.*
- *A “acold” approach may work better in this case.*

---

aconitum lycoctonum *(noun)*

Poisonous Eurasian perennial herb with broad rounded leaves and yellow flowers and fibrous rootstock.

- *They discussed “aconitum lycoctonum” during the group presentation.*
- *Understanding “aconitum lycoctonum” helps you talk about this topic clearly.*

---

aconitum napellus *(noun)*

A poisonous herb native to northern Europe having hooded blue-purple flowers; the dried leaves and roots yield aconite.

- *In class, the teacher used “aconitum napellus” to mean a poisonous herb native to northern europe having....*
- *The article explained what “aconitum napellus” means with a simple example.*

---

acoraceae *(noun)*

Used in some classifications for the genus Acorus which is usually assigned to Araceae.

- *He looked up “acoraceae” because he had never seen it before.*
- *They discussed “acoraceae” during the group presentation.*

---

acorea *(noun)*

Absence of the pupil in an eye.

- *She wrote a short paragraph that included “acorea.”*
- *They discussed “acorea” during the group presentation.*

---

acores *(noun)*

Islands in the Atlantic Ocean belonging to Portugal.

- *She wrote a short paragraph that included “acores.”*
- *The article explained what “acores” means with a simple example.*

---

acousma *(noun)*

Illusory auditory perception of strange nonverbal sounds.

- *She wrote a short paragraph that included “acousma.”*
- *He looked up “acousma” because he had never seen it before.*

---

acousticophobia *(noun)*

A morbid fear of sounds including your own voice.

- *She wrote a short paragraph that included “acousticophobia.”*
- *The article explained what “acousticophobia” means with a simple example.*

---

acragas *(noun)*

A town in Italy in southwestern Sicily near the coast; the site of six Greek temples.

- *Understanding “acragas” helps you talk about this topic clearly.*
- *They discussed “acragas” during the group presentation.*

---

acrasiomycetes *(noun)*

Cellular slime molds; in some classifications placed in kingdom Protoctista.

- *In class, the teacher used "acrasiomycetes" to mean cellular slime molds; in some classifications....*
- *Understanding "acrasiomycetes" helps you talk about this topic clearly.*

---

acridid *(noun)*

Grasshopper with short antennae.

- *In class, the teacher used "acridid" to mean grasshopper with short antennae.*
- *Understanding "acridid" helps you talk about this topic clearly.*

---

acridity *(noun)*

The quality of being sharply disagreeable in language or tone.

- *The acridity of alkali.*
- *They discussed "acridity" during the group presentation.*

---

acridness *(noun)*

The quality of being sharply disagreeable in language or tone.

- *Understanding "acridness" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "acridness."*

---

acridotheres tristis *(noun)*

Dark brown crested bird of southeastern Asia.

- *She wrote a short paragraph that included "acridotheres tristis."*
- *He looked up "acridotheres tristis" because he had never seen it before.*

---

acrilan *(noun)*

Acrylic resin used to make a strong soft crease-resistant fabric (trade name Acrilan).

- *He looked up "acrilan" because he had never seen it before.*
- *She wrote a short paragraph that included "acrilan."*

---

acris crepitans *(noun)*

A cricket frog of eastern and central United States.

- *She wrote a short paragraph that included "acris crepitans."*
- *Understanding "acris crepitans" helps you talk about this topic clearly.*

---

acritical *(adjective)*

Without a crisis (as of some diseases).

- *Students compared "acritical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "acritical."*

---

acroanaesthesia *(noun)*

Loss of sensation in the extremities.

- *She wrote a short paragraph that included "acroanaesthesia."*
- *They discussed "acroanaesthesia" during the group presentation.*

---

acroanesthesia *(noun)*

Loss of sensation in the extremities.

- *In class, the teacher used "acroanesthesia" to mean loss of sensation in the extremities.*
- *He looked up "acroanesthesia" because he had never seen it before.*

---

acrobates *(noun)*

A genus of Phalangeridae.

- *In class, the teacher used "acrobates" to mean a genus of phalangeridae.*
- *They discussed "acrobates" during the group presentation.*

---

acrocarp *(noun)*

A moss in which the main axis is terminated by the archegonium (and hence the capsule).

- *The article explained what "acrocarp" means with a simple example.*
- *Understanding "acrocarp" helps you talk about this topic clearly.*

---

acrocarpous *(adjective)*

(of mosses) having the archegonia at the top of the stem.

- *Students compared "acrocarpous" with similar adjectives in the lesson.*
- *A "acrocarpous" approach may work better in this case.*

---

acrocarpous moss *(noun)*

A moss in which the main axis is terminated by the archegonium (and hence the capsule).

- *In class, the teacher used "acrocarpous moss" to mean a moss in which the main axis is terminated by the....*
- *They discussed "acrocarpous moss" during the group presentation.*

---

acrocarpus *(noun)*

Small genus of trees of Indonesia and Malaysia.

- *She wrote a short paragraph that included "acrocarpus."*
- *He looked up "acrocarpus" because he had never seen it before.*

---

acrocarpus fraxinifolius *(noun)*

East Indian timber tree with hard durable wood used especially for tea boxes.

- *He looked up "acrocarpus fraxinifolius" because he had never seen it before.*
- *She wrote a short paragraph that included "acrocarpus fraxinifolius."*

---

acrocephalus *(noun)*

A genus of Sylviidae.

- *Understanding "acrocephalus" helps you talk about this topic clearly.*
- *He looked up "acrocephalus" because he had never seen it before.*

---

acrocephalus schoenobaenus *(noun)*

Small European warbler that breeds among reeds and wedges and winters in Africa.

- *She wrote a short paragraph that included "acrocephalus schoenobaenus."*
- *He looked up "acrocephalus schoenobaenus" because he had never seen it before.*

---

acrocephaly *(noun)*

A congenital abnormality of the skull; the top of the skull assumes a cone shape.

- *They discussed "acrocephaly" during the group presentation.*
- *In class, the teacher used "acrocephaly" to mean a congenital abnormality of the skull; the top of....*

---

acroclinium *(noun)*

Genus of herbs and shrubs of Australia and South Africa: everlasting flower; most species usually placed in genus Helipterum.

- *He looked up "acroclinium" because he had never seen it before.*
- *Understanding "acroclinium" helps you talk about this topic clearly.*

---

acroclinium roseum *(noun)*

Flower of southwestern Australia having bright pink daisylike papery flowers; grown for drying.

- *She wrote a short paragraph that included "acroclinium roseum."*
- *He looked up "acroclinium roseum" because he had never seen it before.*

---

acrocomia *(noun)*

Central and South American feather palms.

- *In class, the teacher used "acrocomia" to mean central and south american feather palms.*
- *He looked up "acrocomia" because he had never seen it before.*

---

acrocomia aculeata *(noun)*

Tropical American feather palm having a swollen spiny trunk and edible nuts.

- *In class, the teacher used "acrocomia aculeata" to mean tropical american feather palm having a swollen....*
- *The article explained what "acrocomia aculeata" means with a simple example.*

acrocomia vinifera *(noun)*

Tropical American palm having edible nuts and yielding a useful fiber.

- *Understanding "acrocomia vinifera" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "acrocomia vinifera."*

acrocyanosis *(noun)*

Cyanosis of the extremities; can occur when a spasm of the blood vessels is caused by exposure to cold or by strong emotion.

- *He looked up "acrocyanosis" because he had never seen it before.*
- *Understanding "acrocyanosis" helps you talk about this topic clearly.*

acrodont *(noun)*

An animal having teeth consolidated with the summit of the alveolar ridge without sockets.

- *In class, the teacher used "acrodont" to mean an animal having teeth consolidated with the summit....*
- *They discussed "acrodont" during the group presentation.*

acrogen *(noun)*

Any flowerless plant such as a fern (pteridophyte) or moss (bryophyte) in which growth occurs only at the tip of the main stem.

- *The article explained what "acrogen" means with a simple example.*
- *They discussed "acrogen" during the group presentation.*

acrogenic *(adjective)*

Pertaining to flowerless plants (ferns or mosses) in which growth occurs only at the tip of the main stem.

- *The speaker chose "acrogenic" because it captured the feeling precisely.*
- *It is useful to describe something as "acrogenic" when it is pertaining to flowerless plants (ferns or mosses)....*

acrogenous *(adjective)*

Pertaining to flowerless plants (ferns or mosses) in which growth occurs only at the tip of the main stem.

- *Students compared "acrogenous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "acrogenous."*

acromegalia *(noun)*

Enlargement of bones of hands and feet and face; often accompanied by headache and muscle pain and emotional disturbances; caused by overproduction of growth hormone by the anterior pituitary gland (due to a tumor).

- *She wrote a short paragraph that included "acromegalia."*
- *Understanding "acromegalia" helps you talk about this topic clearly.*

acromicria *(noun)*

Abnormally small extremities (underdeveloped fingers and toes).

- *In class, the teacher used "acromicria" to mean abnormally small extremities (underdeveloped....*
- *Understanding "acromicria" helps you talk about this topic clearly.*

acromikria *(noun)*

Abnormally small extremities (underdeveloped fingers and toes).

- *Understanding "acromikria" helps you talk about this topic clearly.*
- *The article explained what "acromikria" means with a simple example.*

acromphalus *(noun)*

Abnormal protrusion of the navel; sometimes the start of umbilical hernia.

- *She wrote a short paragraph that included "acromphalus."*
- *He looked up "acromphalus" because he had never seen it before.*

acromyotonia *(noun)*

Myotonia of the extremities only; causes spastic deformity of the hand or foot.

- *They discussed "acromyotonia" during the group presentation.*
- *He looked up "acromyotonia" because he had never seen it before.*

acronymic *(adjective)*

Characterized by the use of acronyms.

- *A "acronymic" approach may work better in this case.*
- *The speaker chose "acronymic" because it captured the feeling precisely.*

---

acronymous *(adjective)*

Characterized by the use of acronyms.

- *It is useful to describe something as "acronymous" when it is characterized by the use of acronyms.*
- *The speaker chose "acronymous" because it captured the feeling precisely.*

---

acropetal *(adjective)*

Of leaves or flowers; developing or opening in succession from base to apex.

- *Her writing became clearer after she learned "acropetal."*
- *Students compared "acropetal" with similar adjectives in the lesson.*

---

acrophobic *(adjective)*

Suffering from acrophobia; abnormally afraid of high places.

- *It is useful to describe something as "acrophobic" when it is suffering from acrophobia; abnormally afraid of....*
- *Would you call this situation "acrophobic"? Explain why.*

---

acrophony *(noun)*

Naming a letter of the alphabet by using a word whose initial sound is the sound represented by that letter.

- *She wrote a short paragraph that included "acrophony."*
- *They discussed "acrophony" during the group presentation.*

---

acroscopic *(adjective)*

Facing or on the side toward the apex.

- *It is useful to describe something as "acroscopic" when it is facing or on the side toward the apex.*
- *Students compared "acroscopic" with similar adjectives in the lesson.*

---

acrostichum *(noun)*

In some classification systems placed in family Polypodiaceae.

- *He looked up "acrostichum" because he had never seen it before.*
- *They discussed "acrostichum" during the group presentation.*

---

acrostichum aureum *(noun)*

Stout tropical swamp fern (especially tropical America) having large fronds with golden yellow sporangia covering the undersides.

- *She wrote a short paragraph that included "acrostichum aureum."*
- *He looked up "acrostichum aureum" because he had never seen it before.*

---

actable *(adjective)*

Capable of being acted; suitable for the stage.

- *An actable scene.*
- *Would you call this situation "actable"? Explain why.*

---

actias luna *(noun)*

Large pale-green American moth with long-tailed hind wings and a yellow crescent-shaped mark on each forewing.

- *She wrote a short paragraph that included "actias luna."*
- *He looked up "actias luna" because he had never seen it before.*

---

actifed *(noun)*

Trade name for a drug containing an antihistamine and a decongestant; used to treat upper respiratory conditions and minor allergies.

- *In class, the teacher used "actifed" to mean trade name for a drug containing an antihistamine....*
- *Understanding "actifed" helps you talk about this topic clearly.*

---

actinal *(adjective)*

(of radiate organisms) located on the surface or end on which the mouth is situated.

- *It is useful to describe something as "actinal" when it is (of radiate organisms) located on the surface or....*

- *Students compared "actinal" with similar adjectives in the lesson.*

actinaria *(noun)*

Sea anemones.

- *He looked up "actinaria" because he had never seen it before.*
- *She wrote a short paragraph that included "actinaria."*

actinian *(noun)*

Any sea anemone or related animal.

- *They discussed "actinian" during the group presentation.*
- *She wrote a short paragraph that included "actinian."*

actiniaria *(noun)*

Sea anemones.

- *She wrote a short paragraph that included "actiniaria."*
- *He looked up "actiniaria" because he had never seen it before.*

actiniarian *(noun)*

Any sea anemone or related animal.

- *The article explained what "actiniarian" means with a simple example.*
- *They discussed "actiniarian" during the group presentation.*

actinidia arguta *(noun)*

Climbing Asiatic vine having long finely serrate leaves and racemes of white flowers followed by greenish-yellow edible fruit.

- *Understanding "actinidia arguta" helps you talk about this topic clearly.*
- *In class, the teacher used "actinidia arguta" to mean climbing asiatic vine having long finely serrate....*

actinidia polygama *(noun)*

Ornamental vine of eastern Asia having yellow edible fruit and leaves with silver-white markings.

- *In class, the teacher used "actinidia polygama" to mean ornamental vine of eastern asia having yellow....*
- *The article explained what "actinidia polygama" means with a simple example.*

actinidiaceae *(noun)*

Tropical trees or shrubs or woody vines.

- *In class, the teacher used "actinidiaceae" to mean tropical trees or shrubs or woody vines.*
- *He looked up "actinidiaceae" because he had never seen it before.*

actiniopteris *(noun)*

Terrestrial ferns of tropical Asia and Africa.

- *Understanding "actiniopteris" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "actiniopteris."*

actinism *(noun)*

The property of radiation that enables it to produce photochemical effects.

- *He looked up "actinism" because he had never seen it before.*
- *They discussed "actinism" during the group presentation.*

actinoid *(noun)*

Any of a series of radioactive elements with atomic numbers 89 through 103.

- *The article explained what "actinoid" means with a simple example.*
- *Understanding "actinoid" helps you talk about this topic clearly.*

actinomeris *(noun)*

Used in some classification systems for plants now included in genus Verbesina.

- *In class, the teacher used "actinomeris" to mean used in some classification systems for plants now....*
- *He looked up "actinomeris" because he had never seen it before.*

actinomeris alternifolia *(noun)*

Perennial herb with showy yellow flowers; the eastern United States.

- *He looked up "actinomeris alternifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "actinomeris alternifolia."*

---

actinometer *(noun)*

An instrument for measuring the intensity of electromagnetic radiation (usually by the photochemical effect).

- *The article explained what "actinometer" means with a simple example.*
- *In class, the teacher used "actinometer" to mean an instrument for measuring the intensity of....*

---

actinometric *(adjective)*

Of or related to actinometry.

- *Students compared "actinometric" with similar adjectives in the lesson.*
- *It is useful to describe something as "actinometric" when it is of or related to actinometry.*

---

actinometrical *(adjective)*

Of or related to actinometry.

- *A "actinometrical" approach may work better in this case.*
- *Would you call this situation "actinometrical"? Explain why.*

---

actinometry *(noun)*

Measuring the intensity of electromagnetic radiation (especially of the sun's rays).

- *They discussed "actinometry" during the group presentation.*
- *She wrote a short paragraph that included "actinometry."*

---

actinomorphous *(adjective)*

Capable of division into symmetrical halves by any longitudinal plane passing through the axis.

- *Her writing became clearer after she learned "actinomorphous."*
- *Would you call this situation "actinomorphous"? Explain why.*

---

actinomycetaceae *(noun)*

Filamentous anaerobic bacteria.

- *They discussed "actinomycetaceae" during the group presentation.*
- *She wrote a short paragraph that included "actinomycetaceae."*

---

actinomycetal *(adjective)*

Of or belonging to the actinomycetes.

- *The speaker chose "actinomycetal" because it captured the feeling precisely.*
- *It is useful to describe something as "actinomycetal" when it is of or belonging to the actinomycetes.*

---

actinomycetales *(noun)*

Filamentous or rod-shaped bacteria.

- *The article explained what "actinomycetales" means with a simple example.*
- *They discussed "actinomycetales" during the group presentation.*

---

actinomycetous *(adjective)*

Of or belonging to the actinomycetes.

- *The speaker chose "actinomycetous" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "actinomycetous."*

---

actinomycotic *(adjective)*

Of or related to actinomycosis infection.

- *It is useful to describe something as "actinomycotic" when it is of or related to actinomycosis infection.*
- *A "actinomycotic" approach may work better in this case.*

---

actinomyxidia *(noun)*

Parasites of worms.

- *The article explained what "actinomyxidia" means with a simple example.*
- *They discussed "actinomyxidia" during the group presentation.*

---

actinomyxidian *(noun)*

Parasites of worms.

- *They discussed "actinomyxidian" during the group presentation.*
- *The article explained what "actinomyxidian" means with a simple example.*

---

actinon *(noun)*

Any of a series of radioactive elements with atomic numbers 89 through 103.

- *He looked up "actinon" because he had never seen it before.*
- *She wrote a short paragraph that included "actinon."*

---

actinopod *(noun)*

Protozoa having stiff rodlike radiating pseudopods.

- *She wrote a short paragraph that included "actinopod."*
- *Understanding "actinopod" helps you talk about this topic clearly.*

---

actinopoda *(noun)*

Heliozoans; radiolarians.

- *Understanding "actinopoda" helps you talk about this topic clearly.*
- *The article explained what "actinopoda" means with a simple example.*

---

actinotherapy *(noun)*

(medicine) the treatment of disease (especially cancer) by exposure to a radioactive substance.

- *They discussed "actinotherapy" during the group presentation.*
- *In class, the teacher used "actinotherapy" to mean (medicine) the treatment of disease (especially....*

---

actinozoa *(noun)*

A large class of sedentary marine coelenterates that includes sea anemones and corals; the medusoid phase is entirely suppressed.

- *Understanding "actinozoa" helps you talk about this topic clearly.*
- *The article explained what "actinozoa" means with a simple example.*

---

actinozoan *(noun)*

Sessile marine coelenterates including solitary and colonial polyps; the medusoid phase is entirely suppressed.

- *He looked up "actinozoan" because he had never seen it before.*
- *She wrote a short paragraph that included "actinozoan."*

---

actitis *(noun)*

A genus of Scolopacidae.

- *The article explained what "actitis" means with a simple example.*
- *Understanding "actitis" helps you talk about this topic clearly.*

---

actitis hypoleucos *(noun)*

A variety of sandpiper.

- *In class, the teacher used "actitis hypoleucos" to mean a variety of sandpiper.*
- *The article explained what "actitis hypoleucos" means with a simple example.*

---

actitis macularia *(noun)*

Common North American sandpiper.

- *In class, the teacher used "actitis macularia" to mean common north american sandpiper.*
- *They discussed "actitis macularia" during the group presentation.*

---

activase *(noun)*

A thrombolytic agent (trade name Activase) that causes fibrinolysis at the site of a blood clot; used in treating acute myocardial infarction.

- *Understanding "activase" helps you talk about this topic clearly.*
- *The article explained what "activase" means with a simple example.*

activistic *(adjective)*

Advocating or engaged in activism.

- *Her writing became clearer after she learned "activistic."*
- *Students compared "activistic" with similar adjectives in the lesson.*

acuate *(adjective)*

Ending in a sharp point.

- *The speaker chose "acuate" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "acuate."*

acular *(noun)*

Nonsteroidal anti-inflammatory drug (trade names Acular and Toradol) that is administered only intramuscularly.

- *Understanding "acular" helps you talk about this topic clearly.*
- *They discussed "acular" during the group presentation.*

aculea *(noun)*

Small spiny outgrowth on the wings of certain insects.

- *She wrote a short paragraph that included "aculea."*
- *They discussed "aculea" during the group presentation.*

aculeate *(adjective)*

Having or resembling a stinger or barb.

- *Aculeate insects such as bees and wasps.*
- *Would you call this situation "aculeate"? Explain why.*

aculeated *(adjective)*

Having or resembling a stinger or barb.

- *It is useful to describe something as "aculeated" when it is having or resembling a stinger or barb.*
- *The speaker chose "aculeated" because it captured the feeling precisely.*

aculeus *(noun)*

A sharp-pointed process especially a sting of a hymenopterous insect.

- *He looked up "aculeus" because he had never seen it before.*
- *Understanding "aculeus" helps you talk about this topic clearly.*

acute myelocytic leukemia *(noun)*

Acute leukemia characterized by proliferation of granular leukocytes; most common in adolescents and young adults.

- *The article explained what "acute myelocytic leukemia" means with a simple example.*
- *In class, the teacher used "acute myelocytic leukemia" to mean acute leukemia characterized by proliferation of....*

acylglycerol *(noun)*

An ester of glycerol and fatty acids that occurs naturally as fats and fatty oils.

- *In class, the teacher used "acylglycerol" to mean an ester of glycerol and fatty acids that occurs....*
- *Understanding "acylglycerol" helps you talk about this topic clearly.*

adactylia *(noun)*

Congenital absence of fingers and/or toes.

- *He looked up "adactylia" because he had never seen it before.*
- *She wrote a short paragraph that included "adactylia."*

adactylism *(noun)*

Congenital absence of fingers and/or toes.

- *They discussed "adactylism" during the group presentation.*
- *Understanding "adactylism" helps you talk about this topic clearly.*

adactylous *(adjective)*

Without fingers and/or toes.

- *Her writing became clearer after she learned "adactylous."*
- *Would you call this situation "adactylous"? Explain why.*

---

adactyly *(noun)*

Congenital absence of fingers and/or toes.

- *She wrote a short paragraph that included "adactyly."*
- *They discussed "adactyly" during the group presentation.*

---

adalia bipunctata *(noun)*

Red ladybug with a black spot on each wing.

- *They discussed "adalia bipunctata" during the group presentation.*
- *In class, the teacher used "adalia bipunctata" to mean red ladybug with a black spot on each wing.*

---

adamance *(noun)*

Resoluteness by virtue of being unyielding and inflexible.

- *In class, the teacher used "adamance" to mean resoluteness by virtue of being unyielding and....*
- *Understanding "adamance" helps you talk about this topic clearly.*

---

adapa *(noun)*

A Babylonian demigod or first man (sometimes identified with Adam).

- *They discussed "adapa" during the group presentation.*
- *In class, the teacher used "adapa" to mean a babylonian demigod or first man (sometimes....*

---

adapin *(noun)*

A tricyclic antidepressant (trade names Adapin and Sinequan) with numerous side effects (dry mouth and sedation and gastrointestinal disturbances).

- *The article explained what "adapin" means with a simple example.*
- *In class, the teacher used "adapin" to mean a tricyclic antidepressant (trade names adapin and....*

---

adaptational *(adjective)*

Of or relating to adaptation.

- *It is useful to describe something as "adaptational" when it is of or relating to adaptation.*
- *The speaker chose "adaptational" because it captured the feeling precisely.*

---

adaxially *(adverb)*

In an adaxial manner.

- *The narrator describes the scene "adaxially" in the final chapter.*
- *He answered "adaxially," which changed the tone of the conversation.*

---

addable *(adjective)*

Capable of being added or added to.

- *A "addable" approach may work better in this case.*
- *Students compared "addable" with similar adjectives in the lesson.*

---

addax nasomaculatus *(noun)*

Large antelope with lightly spiraled horns of desert regions of northern Africa.

- *He looked up "addax nasomaculatus" because he had never seen it before.*
- *Understanding "addax nasomaculatus" helps you talk about this topic clearly.*

---

addible *(adjective)*

Capable of being added or added to.

- *Her writing became clearer after she learned "addible."*
- *A "addible" approach may work better in this case.*

---

addlebrained *(adjective)*

Stupid and confused; ; - Isaac Sterne.

- *Her writing became clearer after she learned "addlebrained."*

- *Would you call this situation "addlebrained"? Explain why.*

---

addlehead *(noun)*

A person with confused ideas; incapable of serious thought.

- *Understanding "addlehead" helps you talk about this topic clearly.*
- *The article explained what "addlehead" means with a simple example.*

---

addressograph *(noun)*

A printer that automatically prints addresses on letters for mailing.

- *The article explained what "addressograph" means with a simple example.*
- *Understanding "addressograph" helps you talk about this topic clearly.*

---

adducent *(adjective)*

Especially of muscles; bringing together or drawing toward the midline of the body or toward an adjacent part.

- *It is useful to describe something as "adducent" when it is especially of muscles; bringing together or drawing....*
- *Would you call this situation "adducent"? Explain why.*

---

adducer *(noun)*

A discussant who offers an example or a reason or a proof.

- *Understanding "adducer" helps you talk about this topic clearly.*
- *The article explained what "adducer" means with a simple example.*

---

adducting *(adjective)*

Especially of muscles; bringing together or drawing toward the midline of the body or toward an adjacent part.

- *A "adducting" approach may work better in this case.*
- *Would you call this situation "adducting"? Explain why.*

---

adductive *(adjective)*

Especially of muscles; bringing together or drawing toward the midline of the body or toward an adjacent part.

- *A "adductive" approach may work better in this case.*
- *It is useful to describe something as "adductive" when it is especially of muscles; bringing together or drawing....*

---

adelges *(noun)*

Type genus of the Adelgidae: plant lice.

- *They discussed "adelges" during the group presentation.*
- *The article explained what "adelges" means with a simple example.*

---

adelges abietis *(noun)*

A variety of adelgid.

- *In class, the teacher used "adelges abietis" to mean a variety of adelgid.*
- *The article explained what "adelges abietis" means with a simple example.*

---

adelges piceae *(noun)*

A variety of adelgid.

- *He looked up "adelges piceae" because he had never seen it before.*
- *In class, the teacher used "adelges piceae" to mean a variety of adelgid.*

---

adenanthera *(noun)*

Small genus of trees of tropical Asia and Pacific areas.

- *She wrote a short paragraph that included "adenanthera."*
- *The article explained what "adenanthera" means with a simple example.*

---

adenanthera pavonina *(noun)*

East Indian tree with racemes of yellow-white flowers; cultivated as an ornamental.

- *They discussed "adenanthera pavonina" during the group presentation.*
- *She wrote a short paragraph that included "adenanthera pavonina."*

---

adenitis *(noun)*

Inflammation of a gland or lymph node.

- *The article explained what "adenitis" means with a simple example.*
- *In class, the teacher used "adenitis" to mean inflammation of a gland or lymph node.*

---

adenium obesum *(noun)*

South African shrub having a swollen succulent stem and bearing showy pink and white flowers after the leaves fall; popular as an ornamental in tropics.

- *In class, the teacher used "adenium obesum" to mean south african shrub having a swollen succulent stem....*
- *He looked up "adenium obesum" because he had never seen it before.*

---

adenocarcinomatous *(adjective)*

Of or pertaining to adenocarcinoma.

- *A "adenocarcinomatous" approach may work better in this case.*
- *Her writing became clearer after she learned "adenocarcinomatous."*

---

adenohypophysis *(noun)*

The anterior lobe of the pituitary body; primarily glandular in nature.

- *She wrote a short paragraph that included "adenohypophysis."*
- *They discussed "adenohypophysis" during the group presentation.*

---

adenomegaly *(noun)*

Gland enlargement.

- *In class, the teacher used "adenomegaly" to mean gland enlargement.*
- *They discussed "adenomegaly" during the group presentation.*

---

adenomyosarcoma *(noun)*

Malignant renal tumor of young children characterized by hypertension and blood in the urine and the presence of a palpable mass.

- *In class, the teacher used "adenomyosarcoma" to mean malignant renal tumor of young children....*
- *He looked up "adenomyosarcoma" because he had never seen it before.*

---

adenosis *(noun)*

A disorder of the glands of the body.

- *Understanding "adenosis" helps you talk about this topic clearly.*
- *He looked up "adenosis" because he had never seen it before.*

---

adenota *(noun)*

African antelopes: puku.

- *In class, the teacher used "adenota" to mean african antelopes: puku.*
- *He looked up "adenota" because he had never seen it before.*

---

adenota vardoni *(noun)*

An African antelope closely related to the waterbuck.

- *She wrote a short paragraph that included "adenota vardoni."*
- *They discussed "adenota vardoni" during the group presentation.*

---

adenylic acid *(noun)*

A nucleotide found in muscle cells and important in metabolism; reversibly convertible to ADP and ATP.

- *Understanding "adenylic acid" helps you talk about this topic clearly.*
- *He looked up "adenylic acid" because he had never seen it before.*

---

adequateness *(noun)*

The quality of being able to meet a need satisfactorily:.

- *They discussed "adequateness" during the group presentation.*
- *In class, the teacher used "adequateness" to mean the quality of being able to meet a need....*

---

adermin *(noun)*

A B vitamin that is essential for metabolism of amino acids and starch.

- *He looked up "adermin" because he had never seen it before.*
- *They discussed "adermin" during the group presentation.*

---

adesite *(noun)*

Dark greyish extrusive rock.

- *The article explained what "adesite" means with a simple example.*
- *They discussed "adesite" during the group presentation.*

---

adhocracy *(noun)*

An organization with little or no structure.

- *The choice between bureaucracy and adhocracy represents a common dilemma.*
- *The need for informational flexibility can lead to adhocracy.*

---

adiantaceae *(noun)*

Used in some classification systems for some genera of the family Polypodiaceae (or Pteridaceae).

- *He looked up "adiantaceae" because he had never seen it before.*
- *She wrote a short paragraph that included "adiantaceae."*

---

adiantum capillus-veneris *(noun)*

Delicate maidenhair fern with slender shining black leaf stalks; cosmopolitan.

- *The article explained what "adiantum capillus-veneris" means with a simple example.*
- *Understanding "adiantum capillus-veneris" helps you talk about this topic clearly.*

---

adiantum pedatum *(noun)*

Hardy palmately branched North American fern with divergent recurved branches borne on lustrous dark reddish stipes.

- *The article explained what "adiantum pedatum" means with a simple example.*
- *They discussed "adiantum pedatum" during the group presentation.*

---

adiantum tenerum *(noun)*

Tropical American fern with broad pinnae; widely cultivated.

- *She wrote a short paragraph that included "adiantum tenerum."*
- *Understanding "adiantum tenerum" helps you talk about this topic clearly.*

---

adiantum tenerum farleyense *(noun)*

Named for a country house in Barbados where it was discovered.

- *They discussed "adiantum tenerum farleyense" during the group presentation.*
- *In class, the teacher used "adiantum tenerum farleyense" to mean named for a country house in barbados where it was....*

---

adience *(noun)*

(psychology) an urge to accept or approach a situation or an object.

- *They discussed "adience" during the group presentation.*
- *In class, the teacher used "adience" to mean (psychology) an urge to accept or approach a....*

---

adient *(adjective)*

Characterized by acceptance or approach.

- *A "adient" approach may work better in this case.*
- *Her writing became clearer after she learned "adient."*

---

adiposeness *(noun)*

Having the property of containing fat.

- *In class, the teacher used "adiposeness" to mean having the property of containing fat.*
- *He looked up "adiposeness" because he had never seen it before.*

---

adiposis *(noun)*

The property of excessive fatness.

- *Understanding "adiposis" helps you talk about this topic clearly.*
- *In class, the teacher used "adiposis" to mean the property of excessive fatness.*

adjectively *(adverb)*

As an adjective.

- *Nouns are frequently used adjectively.*
- *She spoke "adjectively," and the audience immediately understood her point.*

adjuration *(noun)*

A solemn and earnest appeal to someone to do something.

- *They discussed "adjuration" during the group presentation.*
- *In class, the teacher used "adjuration" to mean a solemn and earnest appeal to someone to do something.*

adjuratory *(adjective)*

Earnestly or solemnly entreating.

- *In adjuratory terms.*
- *Her writing became clearer after she learned "adjuratory."*

adlumia *(noun)*

One species: climbing fumitory.

- *She wrote a short paragraph that included "adlumia."*
- *He looked up "adlumia" because he had never seen it before.*

adlumia fungosa *(noun)*

Vine with feathery leaves and white or pinkish flowers; sometimes placed in genus Fumaria.

- *Understanding "adlumia fungosa" helps you talk about this topic clearly.*
- *In class, the teacher used "adlumia fungosa" to mean vine with feathery leaves and white or pinkish....*

admass *(noun)*

The segment of the public that is easily influenced by mass media (chiefly British).

- *The article explained what "admass" means with a simple example.*
- *Understanding "admass" helps you talk about this topic clearly.*

admeasure *(verb)*

Determine the quantity of someone's share.

- *In everyday English, people use "admeasure" when talking about this idea.*
- *Learners should practice how to use "admeasure" in real sentences.*

administrable *(adjective)*

Capable of being administered or managed.

- *Her writing became clearer after she learned "administrable."*
- *Students compared "administrable" with similar adjectives in the lesson.*

administrivia *(noun)*

The tiresome but essential details that must be taken care of and tasks that must be performed in running an organization.

- *He sets policy and leaves all the administrivia to his assistant.*
- *He looked up "administrivia" because he had never seen it before.*

admirability *(noun)*

Admirable excellence.

- *The article explained what "admirability" means with a simple example.*
- *They discussed "admirability" during the group presentation.*

admirableness *(noun)*

Admirable excellence.

- *Understanding "admirableness" helps you talk about this topic clearly.*
- *In class, the teacher used "admirableness" to mean admirable excellence.*

admissive *(adjective)*

Characterized by or allowing admission.

- *An Elizabethan tragedy admissive of comic scenes.*
- *A "admissive" approach may work better in this case.*

---

admittable *(adjective)*

Deserving to be allowed to enter.

- *The speaker chose "admittable" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "admittable."*

---

admittible *(adjective)*

Deserving to be allowed to enter.

- *A "admittible" approach may work better in this case.*
- *The speaker chose "admittible" because it captured the feeling precisely.*

---

admix *(verb)*

Mix or blend.

- *Hyaline casts were admixed with neutrophils.*
- *In everyday English, people use "admix" when talking about this idea.*

---

admonisher *(noun)*

Someone who gives a warning so that a mistake can be avoided.

- *He looked up "admonisher" because he had never seen it before.*
- *They discussed "admonisher" during the group presentation.*

---

adnoun *(noun)*

An adjective used as a noun.

- *'meek' in 'blessed are the meek' is an adnoun.*
- *The article explained what "adnoun" means with a simple example.*

---

adolesce *(verb)*

Become adolescent; pass through adolescence.

- *The children are beginning to adolesce around the age of 12.*
- *The coach explained when to use "adolesce" and when to wait.*

---

adolf windaus *(noun)*

German chemist who studied steroids and cholesterol and discovered histamine (1876-1959).

- *They discussed "adolf windaus" during the group presentation.*
- *In class, the teacher used "adolf windaus" to mean german chemist who studied steroids and cholesterol....*

---

adonic *(noun)*

- *Her writing became clearer after she learned "adpressed."*

---

adrenarche *(noun)*

The increase in activity of the adrenal glands just before puberty.

- *They discussed "adrenarche" during the group presentation.*
- *Understanding "adrenarche" helps you talk about this topic clearly.*

---

adrenergic agonist eyedrop *(noun)*

A treatment for glaucoma; the eyedrops reduce intraocular pressure by decreasing the production of aqueous humor and increasing its drainage through the uveoscleral pathway.

- *The article explained what "adrenergic agonist eyedrop" means with a simple example.*
- *They discussed "adrenergic agonist eyedrop" during the group presentation.*

---

adrenocorticotrophic *(adjective)*

Stimulating or acting on the adrenal cortex.

- *Her writing became clearer after she learned "adrenocorticotrophic."*
- *A "adrenocorticotrophic" approach may work better in this case.*

---

adrenocorticotrophic hormone *(noun)*

A hormone produced by the anterior pituitary gland that stimulates the adrenal cortex.

- *She wrote a short paragraph that included "adrenocorticotrophic hormone."*
- *Understanding "adrenocorticotrophic hormone" helps you talk about this topic clearly.*

---

adrenocorticotrophin *(noun)*

A hormone produced by the anterior pituitary gland that stimulates the adrenal cortex.

- *In class, the teacher used "adrenocorticotrophin" to mean a hormone produced by the anterior pituitary gland....*
- *Understanding "adrenocorticotrophin" helps you talk about this topic clearly.*

---

adrenocorticotropin *(noun)*

A hormone produced by the anterior pituitary gland that stimulates the adrenal cortex.

- *He looked up "adrenocorticotropin" because he had never seen it before.*
- *They discussed "adrenocorticotropin" during the group presentation.*

---

adrenosterone *(noun)*

A steroid having androgenic activity; obtained from the cortex of the adrenal gland.

- *The article explained what "adrenosterone" means with a simple example.*
- *In class, the teacher used "adrenosterone" to mean a steroid having androgenic activity; obtained from....*

---

adrianopolis *(noun)*

A city in northwestern Turkey; a Thracian town that was rebuilt and renamed by the Roman Emperor Hadrian.

- *She wrote a short paragraph that included "adrianopolis."*
- *He looked up "adrianopolis" because he had never seen it before.*

---

Islands west of Sicily (now known as the Egadi Islands) where the Romans won a naval victory over the Carthaginians that ended the first Punic War in 241 BC.

- *He looked up "aegates isles" because he had never seen it before.*
- *They discussed "aegates isles" during the group presentation.*

aegiceras *(noun)*

A genus of herbs of the family Verbenaceae.

- *Understanding "aegiceras" helps you talk about this topic clearly.*
- *They discussed "aegiceras" during the group presentation.*

aegiceras majus *(noun)*

An Australian tree resembling the black mangrove of the West Indies and Florida.

- *Understanding "aegiceras majus" helps you talk about this topic clearly.*
- *The article explained what "aegiceras majus" means with a simple example.*

---

aegilops triuncalis *(noun)*

European grass naturalized as a weed in North America; sharp-pointed seeds cause injury when eaten by livestock.

- *Understanding "aegilops triuncalis" helps you talk about this topic clearly.*
- *In class, the teacher used "aegilops triuncalis" to mean european grass naturalized as a weed in north....*

---

aegospotami *(noun)*

A creek emptying into the Hellespont in present-day Turkey; at its mouth in 405 BC the Spartan fleet under Lysander defeated the Athenians and ended the Peloponnesian War.

- *She wrote a short paragraph that included "aegospotami."*
- *The article explained what "aegospotami" means with a simple example.*

---

aegospotamos *(noun)*

A creek emptying into the Hellespont in present-day Turkey; at its mouth in 405 BC the Spartan fleet under Lysander defeated the Athenians and ended the Peloponnesian War.

- *Understanding "aegospotamos" helps you talk about this topic clearly.*
- *The article explained what "aegospotamos" means with a simple example.*

---

aegypiidae *(noun)*

In some classifications considered the family comprising the Old World vultures which are more often included in the family Accipitridae.

- *He looked up "aegypiidae" because he had never seen it before.*
- *In class, the teacher used "aegypiidae" to mean in some classifications considered the family....*

---

aegypius *(noun)*

A genus of Accipitridae.

- *She wrote a short paragraph that included "aegypius."*
- *Understanding "aegypius" helps you talk about this topic clearly.*

---

aegypius monachus *(noun)*

Of southern Eurasia and northern Africa.

- *She wrote a short paragraph that included "aegypius monachus."*
- *He looked up "aegypius monachus" because he had never seen it before.*

---

aegyptopithecus *(noun)*

Extinct primate of about 38 million years ago; fossils found in Egypt.

- *He looked up "aegyptopithecus" because he had never seen it before.*
- *She wrote a short paragraph that included "aegyptopithecus."*

---

aeolia *(noun)*

An ancient coastal region of northwestern Asia Minor (including Lesbos) where the Aeolians founded several cities around 1100 BC.

- *She wrote a short paragraph that included "aeolia."*
- *They discussed "aeolia" during the group presentation.*

---

aeolis *(noun)*

An ancient coastal region of northwestern Asia Minor (including Lesbos) where the Aeolians founded several cities around 1100 BC.

- *She wrote a short paragraph that included "aeolis."*
- *The article explained what "aeolis" means with a simple example.*

---

aeolotropic *(adjective)*

Having properties with different values along different axes.

- *The speaker chose "aeolotropic" because it captured the feeling precisely.*
- *A "aeolotropic" approach may work better in this case.*

---

aeonian *(adjective)*

Of or relating to a geological eon (longer than an era).

- *A "aeonian" approach may work better in this case.*

- *Students compared "aeonian" with similar adjectives in the lesson.*

---

aeonium haworthii *(noun)*

Perennial subshrub of Tenerife having leaves in rosettes resembling pinwheels.

- *They discussed "aeonium haworthii" during the group presentation.*
- *Understanding "aeonium haworthii" helps you talk about this topic clearly.*

---

aepyceros *(noun)*

African antelopes: impalas.

- *They discussed "aepyceros" during the group presentation.*
- *He looked up "aepyceros" because he had never seen it before.*

---

aepyceros melampus *(noun)*

African antelope with ridged curved horns; moves with enormous leaps.

- *They discussed "aepyceros melampus" during the group presentation.*
- *He looked up "aepyceros melampus" because he had never seen it before.*

---

aepyornidae *(noun)*

Coextensive with the order Aepyorniformes.

- *They discussed "aepyornidae" during the group presentation.*
- *She wrote a short paragraph that included "aepyornidae."*

---

aepyorniformes *(noun)*

Huge extinct flightless birds: elephant birds.

- *They discussed "aepyorniformes" during the group presentation.*
- *In class, the teacher used "aepyorniformes" to mean huge extinct flightless birds: elephant birds.*

---

aepyornis *(noun)*

Huge (to 9 ft.) extinct flightless bird of Madagascar.

- *Understanding "aepyornis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "aepyornis."*

---

aerides *(noun)*

Any orchid of the genus Aerides.

- *She wrote a short paragraph that included "aerides."*
- *He looked up "aerides" because he had never seen it before.*

---

aeriferous *(adjective)*

Conveying air; as the bronchial tubes.

- *The speaker chose "aeriferous" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "aeriferous."*

---

aeriform *(adjective)*

Characterized by lightness and insubstantiality; as impalpable or intangible as air; - Thomas Carlyle.

- *Figures light and aeriform come unlooked for and melt away.*
- *Her writing became clearer after she learned "aeriform."*

---

aerify *(verb)*

Turn into gas.

- *The coach explained when to use "aerify" and when to wait.*
- *Can you use "aerify" in a sentence that fits this situation?*

---

aerobacter *(noun)*

Aerobic bacteria widely distributed in nature.

- *He looked up "aerobacter" because he had never seen it before.*
- *She wrote a short paragraph that included "aerobacter."*

---

aerobacter aerogenes *(noun)*

A species of Gram-negative aerobic bacteria that produce gas and acid from sugars and are sometimes involved in the souring of milk.

- *They discussed "aerobacter aerogenes" during the group presentation.*
- *In class, the teacher used "aerobacter aerogenes" to mean a species of gram-negative aerobic bacteria that....*

---

aerobe *(noun)*

An organism (especially a bacterium) that requires air or free oxygen for life.

- *He looked up "aerobe" because he had never seen it before.*
- *In class, the teacher used "aerobe" to mean an organism (especially a bacterium) that requires....*

---

aerobiosis *(noun)*

Life sustained in the presence of air or oxygen.

- *He looked up "aerobiosis" because he had never seen it before.*
- *In class, the teacher used "aerobiosis" to mean life sustained in the presence of air or oxygen.*

---

aerobiotic *(adjective)*

Living or active only in the presence of oxygen.

- *Aerobiotic bacteria.*
- *Her writing became clearer after she learned "aerobiotic."*

---

aerodontalgia *(noun)*

Pain in the teeth that results from a change in air pressure (as in flying or mountain climbing).

- *Understanding "aerodontalgia" helps you talk about this topic clearly.*
- *In class, the teacher used "aerodontalgia" to mean pain in the teeth that results from a change in air....*

---

aeroembolism *(noun)*

Pain resulting from rapid change in pressure.

- *She wrote a short paragraph that included "aeroembolism."*
- *They discussed "aeroembolism" during the group presentation.*

---

aerogenerator *(noun)*

Generator that extracts usable energy from winds.

- *He looked up "aerogenerator" because he had never seen it before.*
- *She wrote a short paragraph that included "aerogenerator."*

---

aerogram *(noun)*

A letter sent by air mail.

- *In class, the teacher used "aerogram" to mean a letter sent by air mail.*
- *The article explained what "aerogram" means with a simple example.*

---

aerogramme *(noun)*

A letter sent by air mail.

- *In class, the teacher used "aerogramme" to mean a letter sent by air mail.*
- *The article explained what "aerogramme" means with a simple example.*

---

aerolitic *(adjective)*

Of or pertaining to certain stony meteorites.

- *Would you call this situation "aerolitic"? Explain why.*
- *Her writing became clearer after she learned "aerolitic."*

---

aerological *(adjective)*

Of or pertaining to aerology.

- *Would you call this situation "aerological"? Explain why.*
- *Students compared "aerological" with similar adjectives in the lesson.*

---

aeromechanic *(adjective)*

Of or pertaining to aerodynamics.

- *A "aeromechanic" approach may work better in this case.*
- *Would you call this situation "aeromechanic"? Explain why.*

---

aeromechanics *(noun)*

The branch of mechanics that deals with the motion of gases (especially air) and their effects on bodies in the flow.

- *In class, the teacher used "aeromechanics" to mean the branch of mechanics that deals with the motion....*
- *He looked up "aeromechanics" because he had never seen it before.*

---

aeromedicine *(noun)*

The study and treatment of disorders associated with flight (especially with space flight).

- *They discussed "aeromedicine" during the group presentation.*
- *In class, the teacher used "aeromedicine" to mean the study and treatment of disorders associated....*

---

aerophagia *(noun)*

Swallowing air (usually followed by belching and discomfort and flatulence).

- *The article explained what "aerophagia" means with a simple example.*
- *In class, the teacher used "aerophagia" to mean swallowing air (usually followed by belching and....*

---

aerophilatelic *(adjective)*

Of or relating to airmail stamps.

- *Would you call this situation "aerophilatelic"? Explain why.*
- *The speaker chose "aerophilatelic" because it captured the feeling precisely.*

---

aerophilately *(noun)*

The collection and study of airmail stamps.

- *The article explained what "aerophilately" means with a simple example.*
- *They discussed "aerophilately" during the group presentation.*

---

aerophile *(noun)*

A lover of aviation.

- *They discussed "aerophile" during the group presentation.*
- *In class, the teacher used "aerophile" to mean a lover of aviation.*

---

aerophilic *(adjective)*

Depending on free oxygen or air.

- *It is useful to describe something as "aerophilic" when it is depending on free oxygen or air.*
- *The speaker chose "aerophilic" because it captured the feeling precisely.*

---

aerophilous *(adjective)*

Depending on free oxygen or air.

- *Her writing became clearer after she learned "aerophilous."*
- *Students compared "aerophilous" with similar adjectives in the lesson.*

---

aerophyte *(noun)*

Plant that derives moisture and nutrients from the air and rain; usually grows on another plant but not parasitic on it.

- *They discussed "aerophyte" during the group presentation.*
- *Understanding "aerophyte" helps you talk about this topic clearly.*

---

aerosolise *(verb)*

Become dispersed as an aerosol.

- *The bacteria quickly aerosolised.*
- *The coach explained when to use "aerosolise" and when to wait.*

---

aerosolised *(adjective)*

In the form of ultramicroscopic solid or liquid particles dispersed or suspended in air or gas.

- *Would you call this situation "aerosolised"? Explain why.*
- *The speaker chose "aerosolised" because it captured the feeling precisely.*

aerosolize *(verb)*

Become dispersed as an aerosol.

- *The bacteria suspension was aerosolized.*
- *He did not know how to use "aerosolize" until he saw an example.*

aertex *(noun)*

A trademark for a loosely woven cotton fabric that is used to make shirts and underwear.

- *She wrote a short paragraph that included "aertex."*
- *They discussed "aertex" during the group presentation.*

aeschylean *(adjective)*

Of or relating to or in the manner of Aeschylus.

- *The speaker chose "aeschylean" because it captured the feeling precisely.*
- *Would you call this situation "aeschylean"? Explain why.*

aeschynanthus *(noun)*

A plant of the genus Aeschynanthus having somewhat red or orange flowers and seeds having distinctive hairs at base and apex.

- *Understanding "aeschynanthus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "aeschynanthus."*

aeschynanthus radicans *(noun)*

Epiphyte or creeping on rocks; Malaysian plant having somewhat fleshy leaves and bright red flowers.

- *She wrote a short paragraph that included "aeschynanthus radicans."*
- *He looked up "aeschynanthus radicans" because he had never seen it before.*

aesculus hippocastanum *(noun)*

Tree having palmate leaves and large clusters of white to red flowers followed by brown shiny inedible seeds.

- *She wrote a short paragraph that included "aesculus hippocastanum."*
- *He looked up "aesculus hippocastanum" because he had never seen it before.*

aesthesia *(noun)*

Mental responsiveness and awareness.

- *The article explained what "aesthesia" means with a simple example.*
- *In class, the teacher used "aesthesia" to mean mental responsiveness and awareness.*

aesthesis *(noun)*

An unelaborated elementary awareness of stimulation.

- *The article explained what "aesthesis" means with a simple example.*
- *In class, the teacher used "aesthesis" to mean an unelaborated elementary awareness of stimulation.*

aestival *(adjective)*

(rare) of or occurring in summer.

- *The sky was a burnished aestival blue.*
- *A "aestival" approach may work better in this case.*

aestivate *(verb)*

Sleep during summer.

- *Learners should practice how to use "aestivate" in real sentences.*
- *In everyday English, people use "aestivate" when talking about this idea.*

aethionema *(noun)*

Old World genus of the family Cruciferae.

- *She wrote a short paragraph that included "aethionema."*
- *Understanding "aethionema" helps you talk about this topic clearly.*

aethusa *(noun)*

Fool's parsley.

- *The article explained what "aethusa" means with a simple example.*
- *She wrote a short paragraph that included "aethusa."*

---

aethusa cynapium *(noun)*

European weed naturalized in America that resembles parsley but causes nausea and poisoning when eaten.

- *They discussed "aethusa cynapium" during the group presentation.*
- *She wrote a short paragraph that included "aethusa cynapium."*

---

aetiologic *(adjective)*

Of or relating to the philosophical study of causation.

- *It is useful to describe something as "aetiologic" when it is of or relating to the philosophical study of causation.*
- *The speaker chose "aetiologic" because it captured the feeling precisely.*

---

aetiologist *(noun)*

A specialist in the etiology of diseases.

- *In class, the teacher used "aetiologist" to mean a specialist in the etiology of diseases.*
- *They discussed "aetiologist" during the group presentation.*

---

aetobatus *(noun)*

A genus of Myliobatidae.

- *Understanding "aetobatus" helps you talk about this topic clearly.*
- *The article explained what "aetobatus" means with a simple example.*

---

aetobatus narinari *(noun)*

Ray with back covered with white or yellow spots; widely distributed in warm seas.

- *He looked up "aetobatus narinari" because he had never seen it before.*
- *In class, the teacher used "aetobatus narinari" to mean ray with back covered with white or yellow spots;....*

---

afars and issas *(noun)*

A country in northeastern Africa on the Somali peninsula; formerly under French control but became independent in 1997.

- *The article explained what "afars and issas" means with a simple example.*
- *Understanding "afars and issas" helps you talk about this topic clearly.*

---

- *The speaker chose "albinal" because it captured the feeling precisely.*
- *Would you call this situation "albinal"? Explain why.*

---

albinic *(adjective)*

Of or pertaining to or affected by albinism.

- *Would you call this situation "albinic"? Explain why.*
- *A "albinic" approach may work better in this case.*

---

albinistic *(adjective)*

Of or pertaining to or affected by albinism.

- *Would you call this situation "albinistic"? Explain why.*
- *The speaker chose "albinistic" because it captured the feeling precisely.*

---

albinotic *(adjective)*

Of or pertaining to or affected by albinism.

- *Her writing became clearer after she learned "albinotic."*
- *A "albinotic" approach may work better in this case.*

---

albitic *(adjective)*

Of or related to albite feldspar.

- *Would you call this situation "albitic"? Explain why.*
- *The speaker chose "albitic" because it captured the feeling precisely.*

---

albizia julibrissin *(noun)*

Attractive domed or flat-topped Asiatic tree having bipinnate leaves and flowers with long silky stamens.

- *In class, the teacher used "albizia julibrissin" to mean attractive domed or flat-topped asiatic tree having....*
- *He looked up "albizia julibrissin" because he had never seen it before.*

---

albizia lebbeck *(noun)*

Large spreading Old World tree having large leaves and globose clusters of greenish-yellow flowers and long seed pods that clatter in the wind.

- *In class, the teacher used "albizia lebbeck" to mean large spreading old world tree having large leaves....*
- *The article explained what "albizia lebbeck" means with a simple example.*

---

albizzia *(noun)*

Any of numerous trees of the genus Albizia.

- *Understanding "albizzia" helps you talk about this topic clearly.*
- *He looked up "albizzia" because he had never seen it before.*

---

albizzia julibrissin *(noun)*

Attractive domed or flat-topped Asiatic tree having bipinnate leaves and flowers with long silky stamens.

- *Understanding “albizzia julibrissin” helps you talk about this topic clearly.*
- *He looked up “albizzia julibrissin” because he had never seen it before.*

---

albizzia lebbeck *(noun)*

Large spreading Old World tree having large leaves and globose clusters of greenish-yellow flowers and long seed pods that clatter in the wind.

- *Understanding “albizzia lebbeck” helps you talk about this topic clearly.*
- *The article explained what “albizzia lebbeck” means with a simple example.*

---

alborg *(noun)*

A city and port in northern Jutland.

- *She wrote a short paragraph that included “alborg.”*
- *Understanding “alborg” helps you talk about this topic clearly.*

---

albuca *(noun)*

Any of various plants of the genus Albuca having large clusters of pale yellow flowers; South Africa.

- *He looked up “albuca” because he had never seen it before.*
- *They discussed “albuca” during the group presentation.*

---

albuginaceae *(noun)*

Fungi that produce white sori resembling blisters on certain flowering plants.

- *The article explained what “albuginaceae” means with a simple example.*
- *Understanding “albuginaceae” helps you talk about this topic clearly.*

---

albugo *(noun)*

Type genus of the Albuginaceae; fungi causing white rusts.

- *He looked up “albugo” because he had never seen it before.*
- *Understanding “albugo” helps you talk about this topic clearly.*

---

albuminoid *(noun)*

A simple protein found in horny and cartilaginous tissues and in the lens of the eye.

- *He looked up “albuminoid” because he had never seen it before.*
- *She wrote a short paragraph that included “albuminoid.”*

---

albuminuric *(adjective)*

Of or related to the state of albuminuria.

- *The speaker chose “albuminuric” because it captured the feeling precisely.*
- *It is useful to describe something as “albuminuric” when it is of or related to the state of albuminuria.*

---

alcahest *(noun)*

Hypothetical universal solvent once sought by alchemists.

- *The article explained what “alcahest” means with a simple example.*
- *She wrote a short paragraph that included “alcahest.”*

---

alcaic *(noun)*

Verse in the meter used in Greek and Latin poetry consisting of strophes of 4 tetrametric lines; reputedly invented by Alcaeus.

- *They discussed “alcaic” during the group presentation.*
- *The article explained what “alcaic” means with a simple example.*

---

alcaic verse *(noun)*

Verse in the meter used in Greek and Latin poetry consisting of strophes of 4 tetrametric lines; reputedly invented by Alcaeus.

- *He looked up “alcaic verse” because he had never seen it before.*
- *They discussed “alcaic verse” during the group presentation.*

---

alcalescent *(adjective)*

Tending to become alkaline; slightly alkaline.

- *A “alcalescent” approach may work better in this case.*
- *Students compared “alcalescent” with similar adjectives in the lesson.*

alcapton *(noun)*

An acid formed as an intermediate product of the metabolism of tyrosine and phenylalanine.

- *He looked up "alcapton" because he had never seen it before.*
- *She wrote a short paragraph that included "alcapton."*

alcaptonuria *(noun)*

A rare recessive metabolic anomaly marked by ochronosis and the presence of alkapton in the urine.

- *They discussed "alcaptonuria" during the group presentation.*
- *In class, the teacher used "alcaptonuria" to mean a rare recessive metabolic anomaly marked by....*

alcea *(noun)*

Genus of erect herbs of the Middle East having showy flowers: hollyhocks; in some classification systems synonymous with genus Althaea.

- *He looked up "alcea" because he had never seen it before.*

- *Alcoholize the fruit and let them sit in the refrigerator.*
- *After we finished dinner, we were thoroughly alcoholized.*

---

alcyonacea *(noun)*

Comprising the soft corals.

- *Understanding "alcyonacea" helps you talk about this topic clearly.*
- *In class, the teacher used "alcyonacea" to mean comprising the soft corals.*

---

alcyonaria *(noun)*

Corals and sea anemones having eight branches.

- *The article explained what "alcyonaria" means with a simple example.*
- *In class, the teacher used "alcyonaria" to mean corals and sea anemones having eight branches.*

---

aldehydic *(adjective)*

Of or related to or containing aldehydes.

- *A "aldehydic" approach may work better in this case.*
- *The speaker chose "aldehydic" because it captured the feeling precisely.*

---

alderfly *(noun)*

Dark-colored insect having predaceous aquatic larvae.

- *They discussed "alderfly" during the group presentation.*
- *He looked up "alderfly" because he had never seen it before.*

---

alderleaf juneberry *(noun)*

Shrub or small tree of northwestern North America having fragrant creamy white flowers and small waxy purple-red fruits.

- *He looked up "alderleaf juneberry" because he had never seen it before.*
- *In class, the teacher used "alderleaf juneberry" to mean shrub or small tree of northwestern north america....*

---

aldermanly *(adjective)*

Of or relating to or like an alderman.

- *The speaker chose "aldermanly" because it captured the feeling precisely.*
- *A "aldermanly" approach may work better in this case.*

---

aldohexose *(noun)*

A monosaccharide sugar having six carbon atoms and an aldehyde group.

- *In class, the teacher used "aldohexose" to mean a monosaccharide sugar having six carbon atoms and....*
- *They discussed "aldohexose" during the group presentation.*

---

aldomet *(noun)*

Antihypertensive drug (trade name Aldomet) used in the treatment of high blood pressure.

- *He looked up "aldomet" because he had never seen it before.*
- *In class, the teacher used "aldomet" to mean antihypertensive drug (trade name aldomet) used in....*

---

aldrovanda *(noun)*

One species: waterwheel plant.

- *Understanding "aldrovanda" helps you talk about this topic clearly.*
- *They discussed "aldrovanda" during the group presentation.*

---

aldrovanda vesiculosa *(noun)*

Floating aquatic carnivorous perennial of central and southern Europe, Africa, Asia, Australia having whorls of 6 to 9 leaves ending in hinged lobes for capturing e.g. water fleas.

- *He looked up "aldrovanda vesiculosa" because he had never seen it before.*

- *She wrote a short paragraph that included "aldrovanda vesiculosa."*

alecost *(noun)*

Tansy-scented Eurasian perennial herb with buttonlike yellow flowers; used as potherb or salad green and sometimes for potpourri or tea or flavoring; sometimes placed in genus Chrysanthemum.

- *The article explained what "alecost" means with a simple example.*
- *She wrote a short paragraph that included "alecost."*

alectis *(noun)*

A genus of Carangidae.

- *The article explained what "alectis" means with a simple example.*
- *In class, the teacher used "alectis" to mean a genus of carangidae.*

alectis ciliaris *(noun)*

Fish having greatly elongated front rays on dorsal and anal fins.

- *She wrote a short paragraph that included "alectis ciliaris."*
- *Understanding "alectis ciliaris" helps you talk about this topic clearly.*

alectoria *(noun)*

Lichens having dark brown erect or pendulous much-branched cylindrical thallus.

- *In class, the teacher used "alectoria" to mean lichens having dark brown erect or pendulous....*
- *They discussed "alectoria" during the group presentation.*

alectoris *(noun)*

A genus of Perdicidae.

- *In class, the teacher used "alectoris" to mean a genus of perdicidae.*
- *The article explained what "alectoris" means with a simple example.*

alectoris graeca *(noun)*

Of mountainous areas of southern Europe.

- *She wrote a short paragraph that included "alectoris graeca."*
- *They discussed "alectoris graeca" during the group presentation.*

alectoris ruffa *(noun)*

Common western European partridge with red legs.

- *In class, the teacher used "alectoris ruffa" to mean common western european partridge with red legs.*
- *Understanding "alectoris ruffa" helps you talk about this topic clearly.*

alectura *(noun)*

Brush turkeys.

- *The article explained what "alectura" means with a simple example.*
- *In class, the teacher used "alectura" to mean brush turkeys.*

alectura lathami *(noun)*

Black megapode of wooded regions of Australia and New Guinea.

- *The article explained what "alectura lathami" means with a simple example.*
- *She wrote a short paragraph that included "alectura lathami."*

alehoof *(noun)*

Trailing European aromatic plant of the mint family having rounded leaves and small purplish flowers often grown in hanging baskets; naturalized in North America; sometimes placed in genus Nepeta.

- *Understanding "alehoof" helps you talk about this topic clearly.*
- *He looked up "alehoof" because he had never seen it before.*

aleksandr feodorovich kerensky *(noun)*

Russian revolutionary who was head of state after Nicholas II abdicated but was overthrown by the Bolsheviks (1881-1970).

- *They discussed "aleksandr feodorovich kerensky" during the group presentation.*
- *The article explained what "aleksandr feodorovich kerensky" means with a simple example.*

aleksandr mikjailovich prokhorov *(noun)*

Russian physicist whose research into ways of moving electrons around atoms led to the development of masers and lasers for producing high-intensity radiation (1916-2002).

- *She wrote a short paragraph that included "aleksandr mikjailovich prokhorov."*
- *They discussed "aleksandr mikjailovich prokhorov" during the group presentation.*

aleksandr porfirevich borodin *(noun)*

Russian composer (1833-1887).

- *She wrote a short paragraph that included "aleksandr porfirevich borodin."*
- *The article explained what "aleksandr porfirevich borodin" means with a simple example.*

Russian writer of plays and novels and short stories; noted for his depiction of social outcasts.

- *She wrote a short paragraph that included "aleksey maksimovich peshkov."*
- *Understanding "aleksey maksimovich peshkov" helps you talk about this topic clearly.*

aleksey maximovich peshkov *(noun)*

Russian writer of plays and novels and short stories; noted for his depiction of social outcasts.

- *She wrote a short paragraph that included "aleksey maximovich peshkov."*
- *They discussed "aleksey maximovich peshkov" during the group presentation.*

alepisaurus *(noun)*

Slender scaleless predaceous tropical deep-sea fishes.

- *He looked up "alepisaurus" because he had never seen it before.*
- *She wrote a short paragraph that included "alepisaurus."*

alessandro di mariano dei filipepi *(noun)*

Italian painter of mythological and religious paintings (1444-1510).

- *In class, the teacher used "alessandro di mariano dei filipepi" to mean italian painter of mythological and religious....*
- *Understanding "alessandro di mariano dei filipepi" helps you talk about this topic clearly.*

alethic logic *(noun)*

The modal logic of necessity and possibility and contingency.

- *He looked up "alethic logic" because he had never seen it before.*
- *She wrote a short paragraph that included "alethic logic."*

aletris *(noun)*

Small genus of bitter-rooted herbs of eastern North America and Asia; sometimes placed in family Melanthiaceae.

- *In class, the teacher used "aletris" to mean small genus of bitter-rooted herbs of eastern north....*
- *The article explained what "aletris" means with a simple example.*

aletris aurea *(noun)*

Colicroot with yellow-bracted racemose flowers; smaller than Aletris farinosa; southeastern United States.

- *In class, the teacher used "aletris aurea" to mean colicroot with yellow-bracted racemose flowers;....*
- *The article explained what "aletris aurea" means with a simple example.*

aletris farinosa *(noun)*

Colicroot having a scurfy or granuliferous perianth and white flowers; southeastern United States.

- *She wrote a short paragraph that included "aletris farinosa."*
- *They discussed "aletris farinosa" during the group presentation.*

aleuria aurantia *(noun)*

A discomycete with bright orange cup-shaped or saucer-shaped fruiting bodies and pale orange exteriors.

- *He looked up "aleuria aurantia" because he had never seen it before.*
- *Understanding "aleuria aurantia" helps you talk about this topic clearly.*

aleurites fordii *(noun)*

Chinese tree bearing seeds that yield tung oil.

- *They discussed "aleurites fordii" during the group presentation.*
- *In class, the teacher used "aleurites fordii" to mean chinese tree bearing seeds that yield tung oil.*

---

aleurites moluccana *(noun)*

Large tree native to southeastern Asia; the nuts yield oil used in varnishes; nut kernels strung together are used locally as candles.

- *The article explained what "aleurites moluccana" means with a simple example.*
- *Understanding "aleurites moluccana" helps you talk about this topic clearly.*

---

aleurone *(noun)*

Granular protein in outermost layer of endosperm of many seeds or cereal grains.

- *She wrote a short paragraph that included "aleurone."*
- *They discussed "aleurone" during the group presentation.*

---

aleuronic *(adjective)*

Of or related to aleurone.

- *Would you call this situation "aleuronic"? Explain why.*
- *A "aleuronic" approach may work better in this case.*

---

alex boncayao brigade *(noun)*

An urban hit squad and guerrilla group of the Communist Party in the Philippines; formed in the 1980s.

- *In class, the teacher used "alex boncayao brigade" to mean an urban hit squad and guerrilla group of the....*
- *He looked up "alex boncayao brigade" because he had never seen it before.*

---

alexander isayevich solzhenitsyn *(noun)*

Soviet writer and political dissident whose novels exposed the brutality of Soviet labor camps (born in 1918).

- *The article explained what "alexander isayevich solzhenitsyn" means with a simple example.*
- *They discussed "alexander isayevich solzhenitsyn" during the group presentation.*

---

alexander selcraig *(noun)*

Scottish sailor who was put ashore on a deserted island off the coast of Chile for five years (providing the basis for Daniel Defoe's novel about Robinson Crusoe) (1676-1721).

- *In class, the teacher used "alexander selcraig" to mean scottish sailor who was put ashore on a deserted....*

---

alexic *(adjective)*

Of or relating to or symptomatic of alexia.

- *It is useful to describe something as "alexic" when it is of or relating to or symptomatic of alexia.*
- *Would you call this situation "alexic"? Explain why.*

---

aleyrodes *(noun)*

Type genus of the Aleyrodidae.

- *Understanding "aleyrodes" helps you talk about this topic clearly.*
- *The article explained what "aleyrodes" means with a simple example.*

---

alfilaria *(noun)*

European weed naturalized in southwestern United States and Mexico having reddish decumbent stems with small fernlike leaves and small deep reddish-lavender flowers followed by slender fruits that stick straight up; often grown for forage.

- *The article explained what "alfilaria" means with a simple example.*
- *Understanding "alfilaria" helps you talk about this topic clearly.*

---

alfileria *(noun)*

European weed naturalized in southwestern United States and Mexico having reddish decumbent stems with small fernlike leaves and small deep reddish-lavender flowers followed by slender fruits that stick straight up; often grown for forage.

- *She wrote a short paragraph that included "alfileria."*
- *The article explained what "alfileria" means with a simple example.*

---

alfred habdank skarbek korzybski *(noun)*

United States semanticist (born in Poland) (1879-1950).

- *Understanding “alfred habdank skarbek korzybski” helps you talk about this topic clearly.*
- *In class, the teacher used “alfred habdank skarbek korzybski” to mean united states semanticist (born in poland) (1879-1950).*

---

algarobilla *(noun)*

Mesquite pod used in tanning and dyeing.

- *In class, the teacher used “algarobilla” to mean mesquite pod used in tanning and dyeing.*
- *The article explained what “algarobilla” means with a simple example.*

---

algarroba *(noun)*

Evergreen Mediterranean tree with edible pods; the biblical carob.

- *The article explained what “algarroba” means with a simple example.*
- *In class, the teacher used “algarroba” to mean evergreen mediterranean tree with edible pods; the....*

---

algarroba bean *(noun)*

Long pod containing small beans and sweetish edible pulp; used as animal feed and source of a chocolate substitute.

- *The article explained what “algarroba bean” means with a simple example.*
- *She wrote a short paragraph that included “algarroba bean.”*

---

algarrobilla *(noun)*

Mesquite pod used in tanning and dyeing.

- *In class, the teacher used “algarrobilla” to mean mesquite pod used in tanning and dyeing.*
- *Understanding “algarrobilla” helps you talk about this topic clearly.*

---

algebraical *(adjective)*

Of or relating to algebra.

- *A “algebraical” approach may work better in this case.*
- *Would you call this situation “algebraical”? Explain why.*

---

algeripithecus *(noun)*

An extinct genus of Hominoidea.

- *The article explained what “algeripithecus” means with a simple example.*
- *She wrote a short paragraph that included “algeripithecus.”*

---

algeripithecus minutus *(noun)*

Tiny (150 to 300 grams) extinct primate of 46 to 50 million years ago; fossils found in Algeria; considered by some authorities the leading candidate for the first anthropoid.

- *Understanding “algeripithecus minutus” helps you talk about this topic clearly.*
- *The article explained what “algeripithecus minutus” means with a simple example.*

---

algidity *(noun)*

Prostration characterized by cold and clammy skin and low blood pressure.

- *The article explained what “algidity” means with a simple example.*
- *They discussed “algidity” during the group presentation.*

---

algin *(noun)*

A gum used especially as a thickener or emulsifier.

- *She wrote a short paragraph that included “algin.”*
- *He looked up “algin” because he had never seen it before.*

---

alginic acid *(noun)*

A gum used especially as a thickener or emulsifier.

- *Understanding “alginic acid” helps you talk about this topic clearly.*
- *In class, the teacher used “alginic acid” to mean a gum used especially as a thickener or emulsifier.*

---

algoid *(adjective)*

Of or resembling algae.

- *It is useful to describe something as “algoid” when it is of or resembling algae.*
- *The speaker chose “algoid” because it captured the feeling precisely.*

algolagnia *(noun)*

Sexual pleasure derived from inflicting or experiencing pain.

- *She wrote a short paragraph that included "algolagnia."*
- *They discussed "algolagnia" during the group presentation.*

algolagnic *(adjective)*

Of or relating to algolagnia.

- *The speaker chose "algolagnic" because it captured the feeling precisely.*
- *It is useful to describe something as "algolagnic" when it is of or relating to algolagnia.*

algology *(noun)*

The branch of botany that studies algae.

- *He looked up "algology" because he had never seen it before.*
- *In class, the teacher used "algology" to mean the branch of botany that studies algae.*

algometer *(noun)*

Device for measuring pain caused by pressure.

- *In class, the teacher used "algometer" to mean device for measuring pain caused by pressure.*
- *Understanding "algometer" helps you talk about this topic clearly.*

algometric *(adjective)*

Of or related to algometry.

- *Her writing became clearer after she learned "algometric."*
- *Students compared "algometric" with similar adjectives in the lesson.*

algometrical *(adjective)*

Of or related to algometry.

- *Would you call this situation "algometrical"? Explain why.*
- *The speaker chose "algometrical" because it captured the feeling precisely.*

algometry *(noun)*

Measuring sensitivity to pain or pressure.

- *Understanding "algometry" helps you talk about this topic clearly.*
- *In class, the teacher used "algometry" to mean measuring sensitivity to pain or pressure.*

algophilia *(noun)*

Sexual pleasure derived from inflicting or experiencing pain.

- *In class, the teacher used "algophilia" to mean sexual pleasure derived from inflicting or....*
- *Understanding "algophilia" helps you talk about this topic clearly.*

algophobia *(noun)*

A morbid fear of pain.

- *Understanding "algophobia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "algophobia."*

algophobic *(adjective)*

Suffering from algophobia; abnormally afraid of pain.

- *Students compared "algophobic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "algophobic."*

algorism *(noun)*

The Arabic (or decimal) system of numeration.

- *He looked up "algorism" because he had never seen it before.*
- *In class, the teacher used "algorism" to mean the arabic (or decimal) system of numeration.*

alhacen *(noun)*

An Egyptian polymath (born in Iraq) whose research in geometry and optics was influential into the 17th century; established experiments as the norm of proof in physics (died in 1040).

- *Understanding "alhacen" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "alhacen."*

alice malsenior walker *(noun)*

United States writer (born in 1944).

- *In class, the teacher used "alice malsenior walker" to mean united states writer (born in 1944).*
- *Understanding "alice malsenior walker" helps you talk about this topic clearly.*

alidad *(noun)*

Surveying instrument used with a plane table for drawing lines of sight on a distant object and for measuring angles.

- *She wrote a short paragraph that included "alidad."*
- *The article explained what "alidad" means with a simple example.*

Small genus of aquatic or semiaquatic plants.

- *She wrote a short paragraph that included “alisma.”*
- *Understanding “alisma” helps you talk about this topic clearly.*

---

alisma plantago-aquatica *(noun)*

Marsh plant having clusters of small white or pinkish flowers and broad pointed or rounded leaves.

- *The article explained what “alisma plantago-aquatica” means with a simple example.*
- *Understanding “alisma plantago-aquatica” helps you talk about this topic clearly.*

---

alismales *(noun)*

An order of aquatic monocotyledonous herbaceous plants.

- *She wrote a short paragraph that included “alismales.”*
- *He looked up “alismales” because he had never seen it before.*

---

alismataceae *(noun)*

Perennial or annual aquatic or marsh plants.

- *In class, the teacher used “alismataceae” to mean perennial or annual aquatic or marsh plants.*
- *He looked up “alismataceae” because he had never seen it before.*

---

alismatidae *(noun)*

One of four subclasses or superorders of Monocotyledones; comprises about 500 species in 14 families of aquatic and semiaquatic herbs.

- *He looked up “alismatidae” because he had never seen it before.*
- *She wrote a short paragraph that included “alismatidae.”*

---

aliterate *(noun)*

A person who can read but is disinclined to derive information from literary sources.

- *She wrote a short paragraph that included “aliterate.”*
- *He looked up “aliterate” because he had never seen it before.*

---

aliterate person *(noun)*

A person who can read but is disinclined to derive information from literary sources.

- *In class, the teacher used “aliterate person” to mean a person who can read but is disinclined to derive....*
- *Understanding “aliterate person” helps you talk about this topic clearly.*

---

alizarine *(noun)*

An orange-red crystalline compound used in making red pigments and in dyeing.

- *They discussed “alizarine” during the group presentation.*
- *She wrote a short paragraph that included “alizarine.”*

---

alizarine red *(noun)*

A bright orange-red color produced in cotton cloth with alizarine dye.

- *He looked up "alizarine red" because he had never seen it before.*
- *They discussed "alizarine red" during the group presentation.*

alkahestic *(adjective)*

Of or pertaining to the alkahest that alchemists assumed to exist.

- *A "alkahestic" approach may work better in this case.*
- *Her writing became clearer after she learned "alkahestic."*

alkalemia *(noun)*

A blood disorder characterized by a lower concentration of hydrogen ions in the blood (which rises above 7.45 on the pH scale).

- *They discussed "alkalemia" during the group presentation.*
- *She wrote a short paragraph that included "alkalemia."*

alkalescent *(adjective)*

Tending to become alkaline; slightly alkaline.

- *Her writing became clearer after she learned "alkalescent."*
- *A "alkalescent" approach may work better in this case.*

alkalify *(verb)*

Turn basic and less acidic.

- *He did not know how to use "alkalify" until he saw an example.*
- *In everyday English, people use "alkalify" when talking about this idea.*

alkalimetry *(noun)*

Volumetric analysis using standard solutions of alkali to measure the amount of acid present.

- *She wrote a short paragraph that included "alkalimetry."*
- *He looked up "alkalimetry" because he had never seen it before.*

alkalinise *(verb)*

Make (a substance) alkaline.

- *In everyday English, people use "alkalinise" when talking about this idea.*
- *She tried to use "alkalinise" carefully so everyone would understand.*

alkalinize *(verb)*

Make (a substance) alkaline.

- *The coach explained when to use "alkalinize" and when to wait.*
- *Can you use "alkalinize" in a sentence that fits this situation?*

alkalinuria *(noun)*

A condition in which the urine (which is normally slightly acidic) is alkaline.

- *She wrote a short paragraph that included "alkalinuria."*
- *He looked up "alkalinuria" because he had never seen it before.*

alkalise *(verb)*

Turn basic and less acidic.

- *The coach explained when to use "alkalise" and when to wait.*
- *Can you use "alkalise" in a sentence that fits this situation?*

alkaliser *(noun)*

An agent that counteracts or neutralizes acidity (especially in the stomach).

- *He looked up "alkaliser" because he had never seen it before.*
- *In class, the teacher used "alkaliser" to mean an agent that counteracts or neutralizes acidity....*

alkalize *(verb)*

Turn basic and less acidic.

- *The solution alkalized.*
- *He did not know how to use "alkalize" until he saw an example.*

---

alkalizer *(noun)*

An agent that counteracts or neutralizes acidity (especially in the stomach).

- *They discussed "alkalizer" during the group presentation.*
- *She wrote a short paragraph that included "alkalizer."*

---

alkaloidal *(adjective)*

Pertaining to or consisting of alkaloids.

- *It is useful to describe something as "alkaloidal" when it is pertaining to or consisting of alkaloids.*
- *A "alkaloidal" approach may work better in this case.*

---

alkalotic *(adjective)*

Marked by alkalosis (or a tendency toward alkalosis).

- *It is useful to describe something as "alkalotic" when it is marked by alkalosis (or a tendency toward alkalosis).*
- *A "alkalotic" approach may work better in this case.*

---

alkaluria *(noun)*

A condition in which the urine (which is normally slightly acidic) is alkaline.

- *Understanding "alkaluria" helps you talk about this topic clearly.*
- *In class, the teacher used "alkaluria" to mean a condition in which the urine (which is normally....*

---

alkanet *(noun)*

Perennial or biennial herb cultivated for its delicate usually blue flowers.

- *He looked up "alkanet" because he had never seen it before.*
- *They discussed "alkanet" during the group presentation.*

---

alkapton *(noun)*

An acid formed as an intermediate product of the metabolism of tyrosine and phenylalanine.

- *In class, the teacher used "alkapton" to mean an acid formed as an intermediate product of the....*
- *They discussed "alkapton" during the group presentation.*

---

alkaptonuria *(noun)*

A rare recessive metabolic anomaly marked by ochronosis and the presence of alkapton in the urine.

- *She wrote a short paragraph that included "alkaptonuria."*
- *Understanding "alkaptonuria" helps you talk about this topic clearly.*

---

alkeran *(noun)*

Antineoplastic drug (trade name Alkeran) used to treat multiple myeloma and some other malignancies.

- *Understanding "alkeran" helps you talk about this topic clearly.*
- *He looked up "alkeran" because he had never seen it before.*

---

alkylbenzene *(noun)*

Organic compound that has an alkyl group bound to a benzene ring.

- *In class, the teacher used "alkylbenzene" to mean organic compound that has an alkyl group bound to a....*
- *The article explained what "alkylbenzene" means with a simple example.*

---

alkylbenzenesulfonate *(noun)*

Sulfonate of alkyl benzene.

- *They discussed "alkylbenzenesulfonate" during the group presentation.*
- *He looked up "alkylbenzenesulfonate" because he had never seen it before.*

---

alkylic *(adjective)*

Of or related to an alkyl.

- *Her writing became clearer after she learned "alkylic."*
- *Students compared "alkylic" with similar adjectives in the lesson.*

allamanda *(noun)*

A plant of the genus Allamanda having large showy funnel-shaped flowers in terminal cymes.

- *They discussed "allamanda" during the group presentation.*
- *In class, the teacher used "allamanda" to mean a plant of the genus allamanda having large showy....*

allamanda cathartica *(noun)*

Vigorous evergreen climbing plant of South America having glossy leathery foliage and golden yellow flowers.

- *She wrote a short paragraph that included "allamanda cathartica."*
- *They discussed "allamanda cathartica" during the group presentation.*

allantoic *(adjective)*

Relating to or characterized by an allantois.

- *The speaker chose "allantoic" because it captured the feeling precisely.*
- *It is useful to describe something as "allantoic" when it is relating to or characterized by an allantois.*

allantoid *(adjective)*

Shaped like a sausage.

- *Students compared "allantoid" with similar adjectives in the lesson.*
- *It is useful to describe something as "allantoid" when it is shaped like a sausage.*

allantois *(noun)*

The vascular fetal membrane that lies below the chorion and develops from the hindgut in many embryonic higher vertebrates (reptiles, birds and mammals).

- *She wrote a short paragraph that included "allantois."*
- *The article explained what "allantois" means with a simple example.*

allargando *(adjective)*

Gradually decreasing in tempo and broadening in manner.

- *Her writing became clearer after she learned "allargando."*
- *Students compared "allargando" with similar adjectives in the lesson.*

allayer *(noun)*

A person who reduces the intensity (e.g., of fears) and calms and pacifies.

- *An allayer of fears.*
- *Understanding "allayer" helps you talk about this topic clearly.*

allegement *(noun)*

Statements affirming or denying certain matters of fact that you are prepared to prove.

- *He looked up "allegement" because he had never seen it before.*
- *Understanding "allegement" helps you talk about this topic clearly.*

allegheny chinkapin *(noun)*

Shrubby chestnut tree of southeastern United States having small edible nuts.

- *Understanding "allegheny chinkapin" helps you talk about this topic clearly.*
- *He looked up "allegheny chinkapin" because he had never seen it before.*

allegorise *(verb)*

Make into an allegory.

- *Can you use "allegorise" in a sentence that fits this situation?*
- *The coach explained when to use "allegorise" and when to wait.*

allegoriser *(noun)*

Someone who communicates in allegories.

- *She wrote a short paragraph that included "allegoriser."*
- *The article explained what "allegoriser" means with a simple example.*

allegorize *(verb)*

Make into an allegory.

- *The story was allegorized over time.*
- *She tried to use "allegorize" carefully so everyone would understand.*

---

allegorizer *(noun)*

Someone who communicates in allegories.

- *Understanding "allegorizer" helps you talk about this topic clearly.*
- *He looked up "allegorizer" because he had never seen it before.*

---

allelomorph *(noun)*

(genetics) either of a pair (or series) of alternative forms of a gene that can occupy the same locus on a particular chromosome and that control the same character.

- *She wrote a short paragraph that included "allelomorph."*
- *He looked up "allelomorph" because he had never seen it before.*

---

allelomorphic *(adjective)*

Of or relating to alleles.

- *Her writing became clearer after she learned "allelomorphic."*
- *The speaker chose "allelomorphic" because it captured the feeling precisely.*

---

alleviant *(noun)*

Remedy that alleviates pain without curing.

- *In class, the teacher used "alleviant" to mean remedy that alleviates pain without curing.*
- *Understanding "alleviant" helps you talk about this topic clearly.*

---

alleviative *(adjective)*

Moderating pain or sorrow by making it easier to bear.

- *Students compared "alleviative" with similar adjectives in the lesson.*
- *Would you call this situation "alleviative"? Explain why.*

---

alleviator *(noun)*

A therapist who makes suffering more endurable.

- *She wrote a short paragraph that included "alleviator."*
- *He looked up "alleviator" because he had never seen it before.*

---

alleviatory *(adjective)*

Moderating pain or sorrow by making it easier to bear.

- *Would you call this situation "alleviatory"? Explain why.*
- *Her writing became clearer after she learned "alleviatory."*

---

allhallowtide *(noun)*

The season of All Saints' Day.

- *Understanding "allhallowtide" helps you talk about this topic clearly.*
- *They discussed "allhallowtide" during the group presentation.*

---

alliaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes especially genus Allium.

- *She wrote a short paragraph that included "alliaceae."*
- *He looked up "alliaceae" because he had never seen it before.*

---

alliaceous *(adjective)*

Of or pertaining to the botanical genus Allium.

- *Onions, leeks, garlic, chives are alliaceous plants.*
- *Would you call this situation "alliaceous"? Explain why.*

---

alliaceous plant *(noun)*

Bulbous plants having a characteristic pungent onion odor.

- *She wrote a short paragraph that included "alliaceous plant."*

- *He looked up “alliaceous plant” because he had never seen it before.*

---

alliaria *(noun)*

A genus of herbs of the family Cruciferae; have broad leaves and white flowers and long siliques.

- *The article explained what “alliaria” means with a simple example.*
- *In class, the teacher used “alliaria” to mean a genus of herbs of the family cruciferae; have....*

---

alliaria officinalis *(noun)*

European herb that smells like garlic.

- *In class, the teacher used “alliaria officinalis” to mean european herb that smells like garlic.*
- *He looked up “alliaria officinalis” because he had never seen it before.*

---

allice *(noun)*

European shad.

- *In class, the teacher used “allice” to mean european shad.*
- *They discussed “allice” during the group presentation.*

---

allice shad *(noun)*

European shad.

- *He looked up “allice shad” because he had never seen it before.*
- *They discussed “allice shad” during the group presentation.*

---

alligator mississipiensis *(noun)*

Large alligator of the southeastern United States.

- *He looked up “alligator mississipiensis” because he had never seen it before.*
- *She wrote a short paragraph that included “alligator mississipiensis.”*

---

alligatored *(adjective)*

Of paint or varnish; having the appearance of alligator hide.

- *Would you call this situation “alligatored”? Explain why.*
- *It is useful to describe something as “alligatored” when it is of paint or varnish; having the appearance of....*

---

alligatorfish *(noun)*

Small very elongate sea poachers.

- *They discussed “alligatorfish” during the group presentation.*
- *The article explained what “alligatorfish” means with a simple example.*

---

alligatoridae *(noun)*

Alligators; caimans.

- *In class, the teacher used “alligatoridae” to mean alligators; caimans.*
- *He looked up “alligatoridae” because he had never seen it before.*

---

allionia *(noun)*

Small genus of chiefly American herbs.

- *She wrote a short paragraph that included “allionia.”*
- *Understanding “allionia” helps you talk about this topic clearly.*

---

allionia incarnata *(noun)*

Trailing plant having crowded clusters of 3 brilliant deep pink flowers resembling a single flower blooming near the ground; found in dry gravelly or sandy soil; southwestern United States and Mexico.

- *In class, the teacher used “allionia incarnata” to mean trailing plant having crowded clusters of 3....*
- *They discussed “allionia incarnata” during the group presentation.*

---

allioniaceae *(noun)*

A family of flowering plants of the order Caryophyllales.

- *The article explained what “allioniaceae” means with a simple example.*
- *In class, the teacher used “allioniaceae” to mean a family of flowering plants of the order....*

alliteratively *(adverb)*

In an alliterative manner.

- *The early Norse poets wrote alliteratively.*
- *Using "alliteratively" can make your explanation more exact.*

alliterator *(noun)*

A speaker or writer who makes use of alliteration.

- *They discussed "alliterator" during the group presentation.*
- *Understanding "alliterator" helps you talk about this topic clearly.*

Coarse Old World perennial having a large bulb and tall stalk of greenish purple-tinged flowers; widely naturalized.

- *He looked up "allium ampeloprasum" because he had never seen it before.*
- *She wrote a short paragraph that included "allium ampeloprasum."*

allium ascalonicum *(noun)*

Type of onion plant producing small clustered mild-flavored bulbs used as seasoning.

- *She wrote a short paragraph that included "allium ascalonicum."*
- *He looked up "allium ascalonicum" because he had never seen it before.*

allium cepa aggregatum *(noun)*

Type of onion plant producing small clustered mild-flavored bulbs used as seasoning.

- *They discussed "allium cepa aggregatum" during the group presentation.*
- *Understanding "allium cepa aggregatum" helps you talk about this topic clearly.*

allium cepa viviparum *(noun)*

Type of perennial onion grown chiefly as a curiosity or for early salad onions; having bulbils that replace the flowers.

- *In class, the teacher used "allium cepa viviparum" to mean type of perennial onion grown chiefly as a....*
- *He looked up "allium cepa viviparum" because he had never seen it before.*

allium cernuum *(noun)*

Widely distributed North American wild onion with white to rose flowers.

- *The article explained what "allium cernuum" means with a simple example.*
- *Understanding "allium cernuum" helps you talk about this topic clearly.*

allium fistulosum *(noun)*

Asiatic onion with slender bulbs; used as early green onions.

- *The article explained what "allium fistulosum" means with a simple example.*
- *In class, the teacher used "allium fistulosum" to mean asiatic onion with slender bulbs; used as early....*

allium haematochiton *(noun)*

Onion with white to deep red tunic; California.

- *He looked up "allium haematochiton" because he had never seen it before.*
- *They discussed "allium haematochiton" during the group presentation.*

allium neopolitanum *(noun)*

European onion with white flowers.

- *The article explained what "allium neopolitanum" means with a simple example.*
- *Understanding "allium neopolitanum" helps you talk about this topic clearly.*

allium paradoxum *(noun)*

Leek producing bulbils instead of flowers; Russia and Iran.

- *The article explained what "allium paradoxum" means with a simple example.*
- *Understanding "allium paradoxum" helps you talk about this topic clearly.*

allium porrum *(noun)*

Plant having a large slender white bulb and flat overlapping dark green leaves; used in cooking; believed derived from the wild Allium ampeloprasum.

- *The article explained what "allium porrum" means with a simple example.*
- *Understanding "allium porrum" helps you talk about this topic clearly.*

---

allium schoenoprasum *(noun)*

Perennial having hollow cylindrical leaves used for seasoning.

- *The article explained what "allium schoenoprasum" means with a simple example.*
- *In class, the teacher used "allium schoenoprasum" to mean perennial having hollow cylindrical leaves used for....*

---

allium scorodoprasum *(noun)*

European leek cultivated and used like leeks.

- *She wrote a short paragraph that included "allium scorodoprasum."*
- *Understanding "allium scorodoprasum" helps you talk about this topic clearly.*

---

allium sphaerocephalum *(noun)*

Old World leek with a spherical bulb.

- *The article explained what "allium sphaerocephalum" means with a simple example.*
- *She wrote a short paragraph that included "allium sphaerocephalum."*

---

allium tricoccum *(noun)*

North American perennial having a slender bulb and whitish flowers.

- *She wrote a short paragraph that included "allium tricoccum."*
- *He looked up "allium tricoccum" because he had never seen it before.*

---

allium ursinum *(noun)*

Pungent Old World weedy plant.

- *They discussed "allium ursinum" during the group presentation.*
- *In class, the teacher used "allium ursinum" to mean pungent old world weedy plant.*

---

allium vineale *(noun)*

Pungent Old World wild onion.

- *In class, the teacher used "allium vineale" to mean pungent old world wild onion.*
- *The article explained what "allium vineale" means with a simple example.*

---

allmouth *(noun)*

Fishes having large mouths with a wormlike filament attached for luring prey.

- *In class, the teacher used "allmouth" to mean fishes having large mouths with a wormlike filament....*
- *Understanding "allmouth" helps you talk about this topic clearly.*

---

alloantibody *(noun)*

An antibody that occurs naturally against foreign tissues from a person of the same species.

- *He looked up "alloantibody" because he had never seen it before.*
- *In class, the teacher used "alloantibody" to mean an antibody that occurs naturally against foreign....*

---

allocatable *(adjective)*

Capable of being distributed.

- *It is useful to describe something as "allocatable" when it is capable of being distributed.*
- *Would you call this situation "allocatable"? Explain why.*

---

allochronic *(adjective)*

(of taxa) occurring in different geologic times.

- *Would you call this situation "allochronic"? Explain why.*
- *Her writing became clearer after she learned "allochronic."*

---

allogamous *(adjective)*

Relating to cross-fertilization in plants.

- *Would you call this situation "allogamous"? Explain why.*

- *Her writing became clearer after she learned “allogamous.”*

---

allogamy *(noun)*

Cross-fertilization in plants.

- *Understanding “allogamy” helps you talk about this topic clearly.*
- *He looked up “allogamy” because he had never seen it before.*

---

allograph *(noun)*

A signature written by one person for another.

- *In class, the teacher used “allograph” to mean a signature written by one person for another.*
- *The article explained what “allograph” means with a simple example.*

---

allographic *(adjective)*

Of or relating to an allograph.

- *It is useful to describe something as “allographic” when it is of or relating to an allograph.*
- *A “allographic” approach may work better in this case.*

---

allomerism *(noun)*

(chemistry) variability in chemical composition without variation in crystalline form.

- *The article explained what “allomerism” means with a simple example.*
- *She wrote a short paragraph that included “allomerism.”*

---

allomerous *(adjective)*

Pertaining to allomerism.

- *A “allomerous” approach may work better in this case.*
- *Students compared “allomerous” with similar adjectives in the lesson.*

---

allomorphic *(adjective)*

Pertaining to allomorphs.

- *Would you call this situation “allomorphic”? Explain why.*
- *The speaker chose “allomorphic” because it captured the feeling precisely.*

---

allopatry *(noun)*

The occurrence of related organisms in separate geographical areas with no overlap.

- *In class, the teacher used “allopatry” to mean the occurrence of related organisms in separate....*
- *The article explained what “allopatry” means with a simple example.*

---

allosaur *(noun)*

Late Jurassic carnivorous dinosaur; similar to but somewhat smaller than tyrannosaurus.

- *The article explained what “allosaur” means with a simple example.*
- *She wrote a short paragraph that included “allosaur.”*

---

allotropical *(adjective)*

Of or related to or exhibiting allotropism.

- *Would you call this situation “allotropical”? Explain why.*
- *Her writing became clearer after she learned “allotropical.”*

---

allotropism *(noun)*

The phenomenon of an element existing in two or more physical forms.

- *In class, the teacher used “allotropism” to mean the phenomenon of an element existing in two or....*
- *The article explained what “allotropism” means with a simple example.*

---

allotropy *(noun)*

The phenomenon of an element existing in two or more physical forms.

- *Understanding “allotropy” helps you talk about this topic clearly.*
- *The article explained what “allotropy” means with a simple example.*

---

allowably *(adverb)*

In a permissible manner.

- *Try rewriting the sentence and include "allowably" naturally.*
- *Using "allowably" can make your explanation more exact.*

---

allusiveness *(noun)*

A quality characterized by indirect reference.

- *Understanding "allusiveness" helps you talk about this topic clearly.*
- *In class, the teacher used "allusiveness" to mean a quality characterized by indirect reference.*

---

alluviation *(noun)*

The phenomenon of sediment or gravel accumulating.

- *He looked up "alluviation" because he had never seen it before.*
- *In class, the teacher used "alluviation" to mean the phenomenon of sediment or gravel accumulating.*

---

almandite *(noun)*

A deep red garnet consisting of iron aluminum silicate.

- *She wrote a short paragraph that included "almandite."*
- *He looked up "almandite" because he had never seen it before.*

---

almsgiver *(noun)*

A person who gives alms.

- *He looked up "almsgiver" because he had never seen it before.*
- *She wrote a short paragraph that included "almsgiver."*

---

alnus rhombifolia *(noun)*

Tree of western United States.

- *The article explained what "alnus rhombifolia" means with a simple example.*
- *Understanding "alnus rhombifolia" helps you talk about this topic clearly.*

---

alnus veridis *(noun)*

Shrub of mountainous areas of Europe.

- *They discussed "alnus veridis" during the group presentation.*
- *Understanding "alnus veridis" helps you talk about this topic clearly.*

---

alnus veridis crispa *(noun)*

North American shrub with light green leaves and winged nuts.

- *She wrote a short paragraph that included "alnus veridis crispa."*
- *Understanding "alnus veridis crispa" helps you talk about this topic clearly.*

---

alocasia macrorrhiza *(noun)*

Large evergreen with extremely large erect or spreading leaves; cultivated widely in tropics for its edible rhizome and shoots; used in wet warm regions as a stately ornamental.

- *She wrote a short paragraph that included "alocasia macrorrhiza."*
- *The article explained what "alocasia macrorrhiza" means with a simple example.*

---

aloeaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted.

- *In class, the teacher used "aloeaceae" to mean one of many families or subfamilies into which some....*
- *He looked up "aloeaceae" because he had never seen it before.*

---

alois senefelder *(noun)*

German printer who invented lithography (1771-1834).

- *She wrote a short paragraph that included "alois senefelder."*
- *Understanding "alois senefelder" helps you talk about this topic clearly.*

---

alopecic *(adjective)*

Pertaining to loss of hair or wool or feathers.

- *Students compared "alopecic" with similar adjectives in the lesson.*
- *It is useful to describe something as "alopecic" when it is pertaining to loss of hair or wool or feathers.*

---

alopiidae *(noun)*

Thresher sharks.

- *In class, the teacher used "alopiidae" to mean thresher sharks.*
- *The article explained what "alopiidae" means with a simple example.*

---

alopius *(noun)*

Type genus of the family Alopiidae; in some classifications considered a genus of the family Lamnidae.

- *The article explained what "alopius" means with a simple example.*
- *They discussed "alopius" during the group presentation.*

---

alopius vulpinus *(noun)*

Large pelagic shark of warm seas with a whiplike tail used to round up small fish on which to feed.

- *She wrote a short paragraph that included "alopius vulpinus."*
- *They discussed "alopius vulpinus" during the group presentation.*

---

alosa chrysocloris *(noun)*

Shad that spawns in streams of the Mississippi drainage; very similar to Alosa sapidissima.

- *He looked up "alosa chrysocloris" because he had never seen it before.*
- *They discussed "alosa chrysocloris" during the group presentation.*

---

alosa pseudoharengus *(noun)*

Shad-like food fish that runs rivers to spawn; often salted or smoked; sometimes placed in genus Pomolobus.

- *She wrote a short paragraph that included "alosa pseudoharengus."*
- *The article explained what "alosa pseudoharengus" means with a simple example.*

---

alosa sapidissima *(noun)*

Shad of Atlantic coast of North America; naturalized to Pacific coast.

- *She wrote a short paragraph that included "alosa sapidissima."*
- *He looked up "alosa sapidissima" because he had never seen it before.*

---

aloys senefelder *(noun)*

German printer who invented lithography (1771-1834).

- *They discussed "aloys senefelder" during the group presentation.*
- *Understanding "aloys senefelder" helps you talk about this topic clearly.*

---

alpenstock *(noun)*

A stout staff with a metal point; used by mountain climbers.

- *Understanding "alpenstock" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "alpenstock."*

---

alpestrine *(adjective)*

Growing at high altitudes.

- *A "alpestrine" approach may work better in this case.*
- *Her writing became clearer after she learned "alpestrine."*

---

alpha foetoprotein *(noun)*

An abnormally large amount of this fetoprotein in the fetus can signal an abnormality of the neural tube (as spina bifida or anencephaly).

- *In class, the teacher used "alpha foetoprotein" to mean an abnormally large amount of this fetoprotein in....*
- *Understanding "alpha foetoprotein" helps you talk about this topic clearly.*

---

alpha-tocopheral *(noun)*

A potent form of vitamin E obtained from germ oils or by synthesis.

- *He looked up "alpha-tocopheral" because he had never seen it before.*
- *They discussed "alpha-tocopheral" during the group presentation.*

alphabetisation *(noun)*

The act of putting in alphabetical order.

- *Understanding "alphabetisation" helps you talk about this topic clearly.*
- *They discussed "alphabetisation" during the group presentation.*

alphabetise *(verb)*

Arrange in alphabetical order.

- *She tried to use "alphabetise" carefully so everyone would understand.*
- *The coach explained when to use "alphabetise" and when to wait.*

alphabetised *(adjective)*

Having been put in alphabetical order.

- *It is useful to describe something as "alphabetised" when it is having been put in alphabetical order.*
- *The speaker chose "alphabetised" because it captured the feeling precisely.*

alphabetiser *(noun)*

A literate person who can arrange items in alphabetical order.

- *Understanding "alphabetiser" helps you talk about this topic clearly.*
- *The article explained what "alphabetiser" means with a simple example.*

alphabetizer *(noun)*

A literate person who can arrange items in alphabetical order.

- *The article explained what "alphabetizer" means with a simple example.*
- *They discussed "alphabetizer" during the group presentation.*

alphameric *(adjective)*

Of or pertaining to alphanumeric characters.

- *Would you call this situation "alphameric"? Explain why.*
- *Her writing became clearer after she learned "alphameric."*

alphamerical *(adjective)*

Of or pertaining to alphanumeric characters.

- *The speaker chose "alphamerical" because it captured the feeling precisely.*
- *It is useful to describe something as "alphamerical" when it is of or pertaining to alphanumeric characters.*

alpine besseya *(noun)*

Small pale plant with dense spikes of pale bluish-violet flowers; of high cold meadows from Wyoming and Utah to New Mexico.

- *The article explained what "alpine besseya" means with a simple example.*
- *Understanding "alpine besseya" helps you talk about this topic clearly.*

alpine clubmoss *(noun)*

A variety of club moss.

- *She wrote a short paragraph that included "alpine clubmoss."*
- *The article explained what "alpine clubmoss" means with a simple example.*

alpine enchanter's nightshade *(noun)*

An Alpine variety of enchanter's nightshade.

- *Understanding "alpine enchanter's nightshade" helps you talk about this topic clearly.*
- *The article explained what "alpine enchanter's nightshade" means with a simple example.*

alpine hulsea *(noun)*

Low tufted plant having hairy stems each topped by a flower head with short narrow yellow rays; northwestern United States.

- *They discussed "alpine hulsea" during the group presentation.*
- *Understanding "alpine hulsea" helps you talk about this topic clearly.*

alpine woodsia *(noun)*

Slender fern of northern North America with shining chestnut-colored stipes and bipinnate fronds with usually distinct marginal sori.

- *She wrote a short paragraph that included "alpine woodsia."*
- *He looked up "alpine woodsia" because he had never seen it before.*

---

alpinia *(noun)*

Perennial rhizomatous herbs of Asia and Australia and Polynesia having ginger-scented rhizomes.

- *Understanding "alpinia" helps you talk about this topic clearly.*
- *He looked up "alpinia" because he had never seen it before.*

---

alpinia galanga *(noun)*

Southeastern Asian perennial with aromatic roots.

- *They discussed "alpinia galanga" during the group presentation.*
- *He looked up "alpinia galanga" because he had never seen it before.*

---

alpinia officinalis *(noun)*

Chinese perennial with pyramidal racemes of white flowers and pungent aromatic roots used medicinally and as flavoring.

- *They discussed "alpinia officinalis" during the group presentation.*
- *The article explained what "alpinia officinalis" means with a simple example.*

---

alpinia officinarum *(noun)*

Chinese perennial with pyramidal racemes of white flowers and pungent aromatic roots used medicinally and as flavoring.

- *They discussed "alpinia officinarum" during the group presentation.*
- *Understanding "alpinia officinarum" helps you talk about this topic clearly.*

---

alpinia purpurata *(noun)*

An ornamental ginger native to Pacific islands.

- *He looked up "alpinia purpurata" because he had never seen it before.*
- *In class, the teacher used "alpinia purpurata" to mean an ornamental ginger native to pacific islands.*

---

alpinia speciosa *(noun)*

Cultivated for its shining oblong leaves and arching clusters of white flowers with pink shading and crinkled yellow lips with variegated magenta stripes.

- *She wrote a short paragraph that included "alpinia speciosa."*
- *Understanding "alpinia speciosa" helps you talk about this topic clearly.*

---

alpinia zerumbet *(noun)*

Cultivated for its shining oblong leaves and arching clusters of white flowers with pink shading and crinkled yellow lips with variegated magenta stripes.

- *In class, the teacher used "alpinia zerumbet" to mean cultivated for its shining oblong leaves and....*
- *The article explained what "alpinia zerumbet" means with a simple example.*

---

alsobia *(noun)*

Tropical American herbs sometimes included in genus Episcia.

- *They discussed "alsobia" during the group presentation.*
- *He looked up "alsobia" because he had never seen it before.*

---

alsobia dianthiflora *(noun)*

Low-growing creeping perennial of Central America having deeply fringed white flowers; sometimes placed in genus Episcia.

- *He looked up "alsobia dianthiflora" because he had never seen it before.*
- *In class, the teacher used "alsobia dianthiflora" to mean low-growing creeping perennial of central america....*

---

alsophila *(noun)*

Geometrid moths.

- *The article explained what "alsophila" means with a simple example.*
- *She wrote a short paragraph that included "alsophila."*

---

alsophila pometaria *(noun)*

North American moth with grey-winged males and wingless females; larvae are fall cankerworms.

- *She wrote a short paragraph that included "alsophila pometaria."*

- *Understanding "alsophila pometaria" helps you talk about this topic clearly.*

---

alstonia *(noun)*

Genus of evergreen trees or shrubs with white funnel-shaped flowers and milky sap; tropical Africa to southeastern Asia and Polynesia.

- *She wrote a short paragraph that included "alstonia."*
- *They discussed "alstonia" during the group presentation.*

---

alstonia scholaris *(noun)*

Evergreen tree of eastern Asia and Philippines having large leathery leaves and small green-white flowers in compact cymes; bark formerly used medicinally.

- *They discussed "alstonia scholaris" during the group presentation.*
- *She wrote a short paragraph that included "alstonia scholaris."*

---

alstroemeria pelegrina *(noun)*

An Andean herb having umbels of showy pinkish-purple lily-like flowers.

- *The article explained what "alstroemeria pelegrina" means with a simple example.*
- *In class, the teacher used "alstroemeria pelegrina" to mean an andean herb having umbels of showy....*

---

alstroemeriaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; sometimes included in subfamily Amaryllidaceae.

- *In class, the teacher used "alstroemeriaceae" to mean one of many families or subfamilies into which some....*
- *The article explained what "alstroemeriaceae" means with a simple example.*

---

alterability *(noun)*

The quality of being alterable.

- *Understanding "alterability" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "alterability."*

---

altercate *(verb)*

Have a disagreement over something.

- *Can you use "altercate" in a sentence that fits this situation?*
- *He did not know how to use "altercate" until he saw an example.*

---

alternanthera *(noun)*

Genus of low herbs of tropical America and Australia; includes genus Telanthera.

- *They discussed "alternanthera" during the group presentation.*
- *The article explained what "alternanthera" means with a simple example.*

---

alternanthera philoxeroides *(noun)*

Prolific South American aquatic weed having grasslike leaves and short spikes of white flowers; clogs waterways with dense floating masses.

- *He looked up "alternanthera philoxeroides" because he had never seen it before.*
- *Understanding "alternanthera philoxeroides" helps you talk about this topic clearly.*

---

altitudinous *(adjective)*

Indefinitely high; lofty.

- *The speaker chose "altitudinous" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "altitudinous."*

---

alto relievo *(noun)*

A sculptural relief in which forms extend out from the background to at least half their depth.

- *He looked up "alto relievo" because he had never seen it before.*
- *In class, the teacher used "alto relievo" to mean a sculptural relief in which forms extend out from....*

---

altoist *(noun)*

A musician who plays the alto saxophone.

- *In class, the teacher used "altoist" to mean a musician who plays the alto saxophone.*
- *They discussed "altoist" during the group presentation.*

---

alular *(adjective)*

Pertaining to alulae.

- *A "alular" approach may work better in this case.*
- *Students compared "alular" with similar adjectives in the lesson.*

---

alumbloom *(noun)*

Any of several herbs of the genus Heuchera.

- *Understanding "alumbloom" helps you talk about this topic clearly.*
- *The article explained what "alumbloom" means with a simple example.*

---

aluminiferous *(adjective)*

Containing alum or aluminum.

- *Her writing became clearer after she learned "aluminiferous."*
- *Would you call this situation "aluminiferous"? Explain why.*

---

aluminise *(verb)*

Cover with aluminum.

- *Can you use "aluminise" in a sentence that fits this situation?*
- *In everyday English, people use "aluminise" when talking about this idea.*

---

aluminize *(verb)*

Cover with aluminum.

- *She tried to use "aluminize" carefully so everyone would understand.*
- *The coach explained when to use "aluminize" and when to wait.*

---

alumroot *(noun)*

Any of several herbs of the genus Heuchera.

- *She wrote a short paragraph that included "alumroot."*
- *He looked up "alumroot" because he had never seen it before.*

---

alundum *(noun)*

A substance made of fused alumina.

- *Understanding "alundum" helps you talk about this topic clearly.*
- *The article explained what "alundum" means with a simple example.*

---

alupent *(noun)*

A bronchodilator (trade name Alupent) used to treat asthma and emphysema and other lung conditions; available in oral or inhalant forms; side effects include tachycardia and shakiness.

- *They discussed "alupent" during the group presentation.*
- *He looked up "alupent" because he had never seen it before.*

---

alveolar rhabdosarcoma *(noun)*

Form of rhabdomyosarcoma occurring mainly in adolescents and young adults.

- *Understanding "alveolar rhabdosarcoma" helps you talk about this topic clearly.*
- *They discussed "alveolar rhabdosarcoma" during the group presentation.*

---

alveolate *(adjective)*

Pitted with cell-like cavities (as a honeycomb).

- *The speaker chose "alveolate" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "alveolate."*

---

alveolitis *(noun)*

Inflammation in the socket of a tooth; sometimes occurs after a tooth is extracted and a blood clot fails to form.

- *He looked up "alveolitis" because he had never seen it before.*
- *Understanding "alveolitis" helps you talk about this topic clearly.*

---

alvine *(adjective)*

Of or relating to the intestines.

- *The speaker chose "alvine" because it captured the feeling precisely.*
- *It is useful to describe something as "alvine" when it is of or relating to the intestines.*

---

alytes *(noun)*

Midwife toads.

- *He looked up "alytes" because he had never seen it before.*
- *She wrote a short paragraph that included "alytes."*

---

alytes cisternasi *(noun)*

Similar in habit to Alytes obstetricians.

- *The article explained what "alytes cisternasi" means with a simple example.*
- *She wrote a short paragraph that included "alytes cisternasi."*

---

alytes obstetricans *(noun)*

European toad whose male carries the fertilized eggs wrapped around its hind legs until they hatch.

- *She wrote a short paragraph that included "alytes obstetricans."*
- *The article explained what "alytes obstetricans" means with a simple example.*

---

amadavat *(noun)*

Red Asian weaverbirds often kept as cage birds.

- *The article explained what "amadavat" means with a simple example.*
- *In class, the teacher used "amadavat" to mean red asian weaverbirds often kept as cage birds.*

---

amaethon *(noun)*

The farmer god; ancient god of agriculture.

- *They discussed "amaethon" during the group presentation.*
- *The article explained what "amaethon" means with a simple example.*

---

amalgamative *(adjective)*

Characterized by or tending toward amalgamation.

- *The speaker chose "amalgamative" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "amalgamative."*

---

amalgamator *(noun)*

A businessman who arranges an amalgamation of two or more commercial companies.

- *In class, the teacher used "amalgamator" to mean a businessman who arranges an amalgamation of two....*
- *They discussed "amalgamator" during the group presentation.*

---

amaranthaceae *(noun)*

Cosmopolitan family of herbs and shrubs.

- *She wrote a short paragraph that included "amaranthaceae."*
- *They discussed "amaranthaceae" during the group presentation.*

---

amaranthus cruentus *(noun)*

Tall showy tropical American annual having hairy stems and long spikes of usually red flowers above leaves deeply flushed with purple; seeds often used as cereal.

- *They discussed "amaranthus cruentus" during the group presentation.*
- *Understanding "amaranthus cruentus" helps you talk about this topic clearly.*

---

amaranthus graecizans *(noun)*

Bushy plant of western United States.

- *They discussed "amaranthus graecizans" during the group presentation.*
- *He looked up "amaranthus graecizans" because he had never seen it before.*

---

amaranthus hybridus erythrostachys *(noun)*

Tall showy tropical American annual having hairy stems and long spikes of usually red flowers above leaves deeply flushed with purple; seeds often used as cereal.

- *He looked up "amaranthus hybridus erythrostachys" because he had never seen it before.*
- *In class, the teacher used "amaranthus hybridus erythrostachys" to mean tall showy tropical american annual having hairy....*

amaranthus hybridus hypochondriacus *(noun)*

Tall showy tropical American annual having hairy stems and long spikes of usually red flowers above leaves deeply flushed with purple; seeds often used as cereal.

- *The article explained what "amaranthus hybridus hypochondriacus" means with a simple example.*
- *Understanding "amaranthus hybridus hypochondriacus" helps you talk about this topic clearly.*

amaranthus hypochondriacus *(noun)*

Leaves sometimes used as potherbs; seeds used as cereal; southern United States to Central America; India and China.

- *The article explained what "amaranthus hypochondriacus" means with a simple example.*
- *She wrote a short paragraph that included "amaranthus hypochondriacus."*

amarelle *(noun)*

Pale red sour cherry with colorless or nearly colorless juice.

- *She wrote a short paragraph that included "amarelle."*
- *He looked up "amarelle" because he had never seen it before.*

amastia *(noun)*

Absence of the mammary glands (either through surgery or developmental defect).

- *He looked up "amastia" because he had never seen it before.*
- *They discussed "amastia" during the group presentation.*

amaterasu omikami *(noun)*

Central deity of Shinto; goddess personifying the sun and ancestress of the rulers of Japan.

- *He looked up "amaterasu omikami" because he had never seen it before.*
- *She wrote a short paragraph that included "amaterasu omikami."*

amative *(adjective)*

Inclined toward or displaying love.

- *A "amative" approach may work better in this case.*
- *It is useful to describe something as "amative" when it is inclined toward or displaying love.*

amativeness *(noun)*

The arousal of feelings of sexual desire.

- *Understanding "amativeness" helps you talk about this topic clearly.*
- *He looked up "amativeness" because he had never seen it before.*

amatungulu *(noun)*

Very large closely branched South African shrub having forked bright green spines and shiny leaves.

- *They discussed "amatungulu" during the group presentation.*
- *He looked up "amatungulu" because he had never seen it before.*

amauropelta *(noun)*

Epiphytic or terrestrial ferns of America and Africa and Polynesia.

- *The article explained what "amauropelta" means with a simple example.*
- *In class, the teacher used "amauropelta" to mean epiphytic or terrestrial ferns of america and....*

amaurotic *(adjective)*

Pertaining to blindness caused by amaurosis.

- *A "amaurotic" approach may work better in this case.*
- *The speaker chose "amaurotic" because it captured the feeling precisely.*

ambage *(noun)*

A style that involves indirect ways of expressing things.

- *They discussed "ambage" during the group presentation.*
- *The article explained what "ambage" means with a simple example.*

ambages *(noun)*

(archaic) roundabout or mysterious ways of action.

- *In class, the teacher used "ambages" to mean (archaic) roundabout or mysterious ways of action.*
- *Understanding "ambages" helps you talk about this topic clearly.*

---

ambagious *(adjective)*

Roundabout and unnecessarily wordy; ; -T.S.Eliot; ('ambagious' is archaic).

- *Students compared "ambagious" with similar adjectives in the lesson.*
- *It is useful to describe something as "ambagious" when it is roundabout and unnecessarily wordy; ; -t.s.eliot;....*

---

amberbell *(noun)*

Eastern North American dogtooth having solitary yellow flowers marked with brown or purple and spotted interiors.

- *He looked up "amberbell" because he had never seen it before.*
- *Understanding "amberbell" helps you talk about this topic clearly.*

---

amberboa *(noun)*

Herbs of Mediterranean to central Asia cultivated for their flowers.

- *The article explained what "amberboa" means with a simple example.*
- *They discussed "amberboa" during the group presentation.*

---

amberboa moschata *(noun)*

Asian plant widely grown for its sweetly fragrant pink flowers; sometimes placed in genus Centaurea.

- *She wrote a short paragraph that included "amberboa moschata."*
- *He looked up "amberboa moschata" because he had never seen it before.*

---

amberfish *(noun)*

Any of several amber to coppery fork-tailed warm-water carangid fishes.

- *The article explained what "amberfish" means with a simple example.*
- *They discussed "amberfish" during the group presentation.*

---

ambidextrousness *(noun)*

The property of being equally skillful with each hand.

- *He looked up "ambidextrousness" because he had never seen it before.*
- *Understanding "ambidextrousness" helps you talk about this topic clearly.*

---

ambitionless *(adjective)*

Having little desire for success or achievement.

- *It is useful to describe something as "ambitionless" when it is having little desire for success or achievement.*
- *Would you call this situation "ambitionless"? Explain why.*

---

ambivalency *(noun)*

Mixed feelings or emotions.

- *They discussed "ambivalency" during the group presentation.*
- *In class, the teacher used "ambivalency" to mean mixed feelings or emotions.*

---

ambiversion *(noun)*

(psychology) a balanced disposition intermediate between extroversion and introversion.

- *She wrote a short paragraph that included "ambiversion."*
- *He looked up "ambiversion" because he had never seen it before.*

---

ambiversive *(adjective)*

Intermediate between introversive and extroversive.

- *A "ambiversive" approach may work better in this case.*
- *Students compared "ambiversive" with similar adjectives in the lesson.*

---

ambloplites *(noun)*

A genus of Centrarchidae.

- *He looked up "ambloplites" because he had never seen it before.*

- *She wrote a short paragraph that included "ambloplites."*

ambloplites rupestris *(noun)*

Game and food fish of upper Mississippi and Great Lakes.

- *She wrote a short paragraph that included "ambloplites rupestris."*
- *Understanding "ambloplites rupestris" helps you talk about this topic clearly.*

amblygonite *(noun)*

A white or grey mineral consisting of lithium aluminum phosphate; a source of lithium.

- *The article explained what "amblygonite" means with a simple example.*
- *In class, the teacher used "amblygonite" to mean a white or grey mineral consisting of lithium....*

amblyrhynchus *(noun)*

Marine iguanas.

- *She wrote a short paragraph that included "amblyrhynchus."*
- *The article explained what "amblyrhynchus" means with a simple example.*

amblyrhynchus cristatus *(noun)*

Shore-dwelling seaweed-eating lizard of the Galapagos Islands.

- *She wrote a short paragraph that included "amblyrhynchus cristatus."*
- *He looked up "amblyrhynchus cristatus" because he had never seen it before.*

ambrose gwinett bierce *(noun)*

United States writer of caustic wit (1842-1914).

- *She wrote a short paragraph that included "ambrose gwinett bierce."*
- *The article explained what "ambrose gwinett bierce" means with a simple example.*

ambrosia artemisiifolia *(noun)*

Annual weed with finely divided foliage and spikes of green flowers; common in North America; introduced elsewhere accidentally.

- *He looked up "ambrosia artemisiifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "ambrosia artemisiifolia."*

ambrosia psilostachya *(noun)*

Coarse perennial ragweed with creeping roots of dry barren lands of southwestern United States and Mexico.

- *In class, the teacher used "ambrosia psilostachya" to mean coarse perennial ragweed with creeping roots of dry....*
- *They discussed "ambrosia psilostachya" during the group presentation.*

ambrosia trifida *(noun)*

A coarse annual with some leaves deeply and palmately three-cleft or five-cleft.

- *The article explained what "ambrosia trifida" means with a simple example.*
- *She wrote a short paragraph that included "ambrosia trifida."*

ambrosiaceae *(noun)*

In some classifications considered a separate family comprising a subgroup of the Compositae including the ragweeds.

- *Understanding "ambrosiaceae" helps you talk about this topic clearly.*
- *He looked up "ambrosiaceae" because he had never seen it before.*

ambulacrum *(noun)*

One of the five areas on the undersurface of an echinoderm on which the tube feet are located.

- *The article explained what "ambulacrum" means with a simple example.*
- *They discussed "ambulacrum" during the group presentation.*

ambusher *(noun)*

An attacker who waits in a concealed position to launch a surprise attack.

- *The article explained what "ambusher" means with a simple example.*
- *They discussed "ambusher" during the group presentation.*

ambystoma talpoideum *(noun)*

Brownish-black burrowing salamander of southeastern United States.

- *They discussed "ambystoma talpoideum" during the group presentation.*
- *He looked up "ambystoma talpoideum" because he had never seen it before.*

---

ambystomatidae *(noun)*

New World salamanders.

- *He looked up "ambystomatidae" because he had never seen it before.*
- *In class, the teacher used "ambystomatidae" to mean new world salamanders.*

---

ambystomid *(noun)*

Small to moderate-sized terrestrial or semiaquatic New World salamander.

- *She wrote a short paragraph that included "ambystomid."*
- *Understanding "ambystomid" helps you talk about this topic clearly.*

---

ambystomid salamander *(noun)*

Small to moderate-sized terrestrial or semiaquatic New World salamander.

- *She wrote a short paragraph that included "ambystomid salamander."*
- *Understanding "ambystomid salamander" helps you talk about this topic clearly.*

---

ameban *(adjective)*

Pertaining to or resembling amoebae.

- *It is useful to describe something as "ameban" when it is pertaining to or resembling amoebae.*
- *Students compared "ameban" with similar adjectives in the lesson.*

---

amebiosis *(noun)*

Infection by a disease-causing ameba.

- *Understanding "amebiosis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "amebiosis."*

---

ameboid *(adjective)*

Like an amoeba (especially in having a variable irregular shape).

- *Her writing became clearer after she learned "ameboid."*
- *Would you call this situation "ameboid"? Explain why.*

---

amebous *(adjective)*

Pertaining to or resembling amoebae.

- *Students compared "amebous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "amebous."*

---

amedeo modigliano *(noun)*

Italian painter and sculptor (1884-1920).

- *In class, the teacher used "amedeo modigliano" to mean italian painter and sculptor (1884-1920).*
- *Understanding "amedeo modigliano" helps you talk about this topic clearly.*

---

ameiuridae *(noun)*

North American catfishes.

- *Understanding "ameiuridae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ameiuridae."*

---

ameiurus *(noun)*

Type genus of the Ameiuridae: bullhead catfishes.

- *They discussed "ameiurus" during the group presentation.*
- *The article explained what "ameiurus" means with a simple example.*

---

ameiurus melas *(noun)*

Catfish common in eastern United States.

- *The article explained what "ameiurus melas" means with a simple example.*
- *She wrote a short paragraph that included "ameiurus melas."*

---

amelanchier alnifolia *(noun)*

Shrub or small tree of northwestern North America having fragrant creamy white flowers and small waxy purple-red fruits.

- *Understanding "amelanchier alnifolia" helps you talk about this topic clearly.*
- *In class, the teacher used "amelanchier alnifolia" to mean shrub or small tree of northwestern north america....*

---

amelanchier bartramiana *(noun)*

Open-growing shrub of eastern North America having pure white flowers and small waxy almost black fruits.

- *The article explained what "amelanchier bartramiana" means with a simple example.*
- *In class, the teacher used "amelanchier bartramiana" to mean open-growing shrub of eastern north america having....*

---

amelioratory *(adjective)*

Tending to ameliorate.

- *Would you call this situation "amelioratory"? Explain why.*
- *Students compared "amelioratory" with similar adjectives in the lesson.*

---

ameloblast *(noun)*

A cell from which tooth enamel develops.

- *He looked up "ameloblast" because he had never seen it before.*
- *She wrote a short paragraph that included "ameloblast."*

---

amelogenesis *(noun)*

The developmental process of forming tooth enamel.

- *He looked up "amelogenesis" because he had never seen it before.*
- *They discussed "amelogenesis" during the group presentation.*

---

amenableness *(noun)*

The trait of being cooperative.

- *Understanding "amenableness" helps you talk about this topic clearly.*
- *They discussed "amenableness" during the group presentation.*

---

amenorrheal *(adjective)*

Related to the suppression of normal menstrual flow for any reason other than pregnancy.

- *Would you call this situation "amenorrheal"? Explain why.*
- *Her writing became clearer after she learned "amenorrheal."*

---

amenorrheic *(adjective)*

Related to the suppression of normal menstrual flow for any reason other than pregnancy.

- *Her writing became clearer after she learned "amenorrheic."*
- *Students compared "amenorrheic" with similar adjectives in the lesson.*

---

amenorrhoeal *(adjective)*

Related to the suppression of normal menstrual flow for any reason other than pregnancy.

- *A "amenorrhoeal" approach may work better in this case.*
- *Would you call this situation "amenorrhoeal"? Explain why.*

---

amenorrhoeic *(adjective)*

Related to the suppression of normal menstrual flow for any reason other than pregnancy.

- *Students compared "amenorrhoeic" with similar adjectives in the lesson.*
- *A "amenorrhoeic" approach may work better in this case.*

---

amentaceous *(adjective)*

(of plants) bearing or characterized by aments or catkins.

- *The speaker chose "amentaceous" because it captured the feeling precisely.*
- *Would you call this situation "amentaceous"? Explain why.*

amentia *(noun)*

Extreme mental retardation.

- *The article explained what "amentia" means with a simple example.*
- *They discussed "amentia" during the group presentation.*

amentiferae *(noun)*

Used in some classification systems for plants that bear catkins.

- *She wrote a short paragraph that included "amentiferae."*
- *He looked up "amentiferae" because he had never seen it before.*

amentiferous *(adjective)*

(of plants) bearing or characterized by aments or catkins.

- *Would you call this situation "amentiferous"? Explain why.*
- *The speaker chose "amentiferous" because it captured the feeling precisely.*

amerce *(verb)*

Punish by a fine imposed arbitrarily by the discretion of the court.

- *In everyday English, people use "amerce" when talking about this idea.*
- *Learners should practice how to use "amerce" in real sentences.*

amercement *(noun)*

Money extracted as a penalty.

- *She wrote a short paragraph that included "amercement."*
- *The article explained what "amercement" means with a simple example.*

amerciable *(adjective)*

Of a crime or misdemeanor; punishable by a fine set by a judge.

- *The speaker chose "amerciable" because it captured the feeling precisely.*
- *It is useful to describe something as "amerciable" when it is of a crime or misdemeanor; punishable by a fine set....*

american brooklime *(noun)*

Plant of western North America and northeastern Asia having prostrate stems with dense racemes of pale violet to lilac flowers.

- *He looked up "american brooklime" because he had never seen it before.*
- *She wrote a short paragraph that included "american brooklime."*

american bugbane *(noun)*

Bugbane of the eastern United States having erect racemes of white flowers.

- *He looked up "american bugbane" because he had never seen it before.*
- *She wrote a short paragraph that included "american bugbane."*

american featherfoil *(noun)*

A featherfoil of the eastern United States with submerged spongy inflated flower stalks and white flowers.

- *The article explained what "american featherfoil" means with a simple example.*
- *They discussed "american featherfoil" during the group presentation.*

american flagfish *(noun)*

A fish with a dark-blue back and whitish sides with red stripes; found in swamps and streams of Florida.

- *Understanding "american flagfish" helps you talk about this topic clearly.*
- *In class, the teacher used "american flagfish" to mean a fish with a dark-blue back and whitish sides with....*

american frogbit *(noun)*

American plant with roundish heart-shaped or kidney-shaped leaves; usually rooted in muddy bottoms of ponds and ditches.

- *They discussed "american frogbit" during the group presentation.*
- *In class, the teacher used "american frogbit" to mean american plant with roundish heart-shaped or....*

american mastodont *(noun)*

Mastodon of North America; in some classifications considered a mammoth rather than a mastodon.

- *She wrote a short paragraph that included "american mastodont."*
- *They discussed "american mastodont" during the group presentation.*

---

american pasqueflower *(noun)*

Short hairy perennial with early spring blue-violet or lilac flowers; North America and Siberia.

- *Understanding "american pasqueflower" helps you talk about this topic clearly.*
- *He looked up "american pasqueflower" because he had never seen it before.*

---

american rattlebox *(noun)*

Tropical American annual herb having an inflated pod in which the ripe seeds rattle.

- *The article explained what "american rattlebox" means with a simple example.*
- *They discussed "american rattlebox" during the group presentation.*

---

american smokewood *(noun)*

Shrubby tree of southern United States having large plumes of feathery flowers resembling puffs of smoke.

- *In class, the teacher used "american smokewood" to mean shrubby tree of southern united states having large....*
- *They discussed "american smokewood" during the group presentation.*

---

american twinflower *(noun)*

Similar to the twinflower of northern Europe and Asia.

- *She wrote a short paragraph that included "american twinflower."*
- *They discussed "american twinflower" during the group presentation.*

---

american wistaria *(noun)*

An eastern United States native resembling the cultivated Japanese wisteria having pale purple-lilac flowers.

- *He looked up "american wistaria" because he had never seen it before.*
- *In class, the teacher used "american wistaria" to mean an eastern united states native resembling the....*

---

american wormseed *(noun)*

Rank-smelling tropical American pigweed.

- *In class, the teacher used "american wormseed" to mean rank-smelling tropical american pigweed.*
- *The article explained what "american wormseed" means with a simple example.*

---

americanise *(verb)*

Make American in character.

- *Can you use "americanise" in a sentence that fits this situation?*
- *The coach explained when to use "americanise" and when to wait.*

---

americus vespucius *(noun)*

Florentine navigator who explored the coast of South America; America was named in his honor (1454-1512).

- *He looked up "americus vespucius" because he had never seen it before.*
- *She wrote a short paragraph that included "americus vespucius."*

---

amerindic *(adjective)*

Of or pertaining to American Indians or their culture or languages.

- *Students compared "amerindic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "amerindic."*

---

ametabolic *(adjective)*

Undergoing no (or only slight) metamorphosis.

- *The speaker chose "ametabolic" because it captured the feeling precisely.*
- *It is useful to describe something as "ametabolic" when it is undergoing no (or only slight) metamorphosis.*

---

ametabolous *(adjective)*

Undergoing slight or no metamorphosis.

- *Students compared "ametabolous" with similar adjectives in the lesson.*

- *Her writing became clearer after she learned "ametabolous."*

---

amethopterin *(noun)*

Toxic antimetabolite that limits cellular reproduction by acting as an antagonist to folic acid; used to treat certain cancers and psoriasis and rheumatoid arthritis.

- *In class, the teacher used "amethopterin" to mean toxic antimetabolite that limits cellular....*
- *The article explained what "amethopterin" means with a simple example.*

---

amethystine *(adjective)*

Containing or resembling amethyst.

- *Her writing became clearer after she learned "amethystine."*
- *Students compared "amethystine" with similar adjectives in the lesson.*

---

amethystine python *(noun)*

A python having the color of amethyst.

- *They discussed "amethystine python" during the group presentation.*
- *He looked up "amethystine python" because he had never seen it before.*

---

ametria *(noun)*

Congenital absence of the uterus.

- *She wrote a short paragraph that included "ametria."*
- *They discussed "ametria" during the group presentation.*

---

ametropia *(noun)*

(ophthalmology) faulty refraction of light rays in the eye as in astigmatism or myopia.

- *Understanding "ametropia" helps you talk about this topic clearly.*
- *They discussed "ametropia" during the group presentation.*

---

ametropic *(adjective)*

Of or relating to an abnormal condition of the eye in which visual images are not in focus on the retina.

- *Students compared "ametropic" with similar adjectives in the lesson.*
- *Would you call this situation "ametropic"? Explain why.*

---

amiableness *(noun)*

A disposition to be friendly and approachable (easy to talk to).

- *He looked up "amiableness" because he had never seen it before.*
- *They discussed "amiableness" during the group presentation.*

---

amianthum *(noun)*

One species: fly poison; sometimes placed in family Melanthiaceae.

- *He looked up "amianthum" because he had never seen it before.*
- *Understanding "amianthum" helps you talk about this topic clearly.*

---

amianthum muscaetoxicum *(noun)*

All parts of plant are highly toxic; bulb pounded and used as a fly poison; sometimes placed in subfamily Melanthiaceae.

- *They discussed "amianthum muscaetoxicum" during the group presentation.*
- *He looked up "amianthum muscaetoxicum" because he had never seen it before.*

---

amianthum muscitoxicum *(noun)*

All parts of plant are highly toxic; bulb pounded and used as a fly poison; sometimes placed in subfamily Melanthiaceae.

- *Understanding "amianthum muscitoxicum" helps you talk about this topic clearly.*
- *The article explained what "amianthum muscitoxicum" means with a simple example.*

---

amicability *(noun)*

A disinclination to quarrel.

- *Understanding "amicability" helps you talk about this topic clearly.*
- *In class, the teacher used "amicability" to mean a disinclination to quarrel.*

---

amicableness *(noun)*

A disinclination to quarrel.

- *She wrote a short paragraph that included "amicableness."*
- *He looked up "amicableness" because he had never seen it before.*

---

amidopyrine *(noun)*

A white crystalline substance used as an analgesic and antipyretic.

- *The article explained what "amidopyrine" means with a simple example.*
- *They discussed "amidopyrine" during the group presentation.*

---

amiidae *(noun)*

Only the bowfins.

- *In class, the teacher used "amiidae" to mean only the bowfins.*
- *The article explained what "amiidae" means with a simple example.*

---

aminic *(adjective)*

Pertaining to or containing any of a group of organic compounds of nitrogen derived from ammonia.

- *Her writing became clearer after she learned "aminic."*
- *Students compared "aminic" with similar adjectives in the lesson.*

---

aminoaciduria *(noun)*

Abnormal presence of amino acids in the urine; usually a symptom of metabolic defects.

- *He looked up "aminoaciduria" because he had never seen it before.*
- *They discussed "aminoaciduria" during the group presentation.*

---

aminoalkane *(noun)*

A compound derived from ammonia by replacing hydrogen atoms by univalent hydrocarbon radicals.

- *In class, the teacher used "aminoalkane" to mean a compound derived from ammonia by replacing....*
- *He looked up "aminoalkane" because he had never seen it before.*

---

aminoalkanoic acid *(noun)*

Organic compounds containing an amino group and a carboxylic acid group.

- *Proteins are composed of various proportions of about 20 common amino acids.*
- *They discussed "aminoalkanoic acid" during the group presentation.*

---

aminobenzine *(noun)*

Oily poisonous liquid amine obtained from nitrobenzene and used to make dyes and plastics and medicines.

- *She wrote a short paragraph that included "aminobenzine."*
- *They discussed "aminobenzine" during the group presentation.*

---

aminomethane *(noun)*

A methyl with the hydrogen atom replaced by an amino radical.

- *He looked up "aminomethane" because he had never seen it before.*
- *She wrote a short paragraph that included "aminomethane."*

---

aminopherase *(noun)*

A class of transferases that catalyze transamination (that transfer an amino group from an amino acid to another compound).

- *He looked up "aminopherase" because he had never seen it before.*
- *They discussed "aminopherase" during the group presentation.*

---

aminophylline *(noun)*

A theophylline derivative that is used as a bronchodilator in the treatment of bronchial asthma, emphysema, and bronchitis.

- *The article explained what "aminophylline" means with a simple example.*
- *In class, the teacher used "aminophylline" to mean a theophylline derivative that is used as a....*

---

aminoplast *(noun)*

A plastic (synthetic resin) made from amino compounds; used as an adhesive and as a coating for paper and textiles.

- *In class, the teacher used “aminoplast” to mean a plastic (synthetic resin) made from amino....*
- *Understanding “aminoplast” helps you talk about this topic clearly.*

---

aminopyrine *(noun)*

A white crystalline substance used as an analgesic and antipyretic.

- *She wrote a short paragraph that included “aminopyrine.”*
- *He looked up “aminopyrine” because he had never seen it before.*

---

amitosis *(noun)*

The direct method of cell division characterized by simple division of the nucleus without formation of chromosomes.

- *The article explained what “amitosis” means with a simple example.*
- *Understanding “amitosis” helps you talk about this topic clearly.*

---

amitotic *(adjective)*

Pertaining to a simple method of cell division.

- *It is useful to describe something as “amitotic” when it is pertaining to a simple method of cell division.*
- *A “amitotic” approach may work better in this case.*

---

amlodipine besylate *(noun)*

A vasodilator (trade name Norvasc) taken in tablet form; prescribed for hypertension and angina pectoris.

- *The article explained what “amlodipine besylate” means with a simple example.*
- *She wrote a short paragraph that included “amlodipine besylate.”*

---

ammine *(noun)*

A complex inorganic compound that contains ammonia molecules.

- *She wrote a short paragraph that included “ammine.”*
- *Understanding “ammine” helps you talk about this topic clearly.*

---

ammino *(adjective)*

Pertaining to or characteristic of an ammine (an inorganic coordination compound of ammonia and a metallic salt).

- *A “ammino” approach may work better in this case.*
- *Students compared “ammino” with similar adjectives in the lesson.*

---

ammobium *(noun)*

Any plant of the genus Ammobium having yellow flowers and silvery foliage.

- *The article explained what “ammobium” means with a simple example.*
- *They discussed “ammobium” during the group presentation.*

---

ammobium alatum *(noun)*

Australian plant widely cultivated for its beautiful silvery-white blooms with bright yellow centers on long winged stems.

- *She wrote a short paragraph that included “ammobium alatum.”*
- *Understanding “ammobium alatum” helps you talk about this topic clearly.*

---

ammodytes *(noun)*

Type genus of the Ammodytidae.

- *She wrote a short paragraph that included “ammodytes.”*
- *They discussed “ammodytes” during the group presentation.*

---

ammodytidae *(noun)*

Sand lances.

- *Understanding “ammodytidae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “ammodytidae.”*

---

ammoniate *(verb)*

Treat with ammonia.

- *Can you use “ammoniate” in a sentence that fits this situation?*
- *The coach explained when to use “ammoniate” and when to wait.*

ammonification *(noun)*

Impregnation with ammonia or a compound of ammonia.

- *He looked up "ammonification" because he had never seen it before.*
- *They discussed "ammonification" during the group presentation.*

ammonify *(verb)*

Treat with ammonia; cause to undergo ammonification.

- *Learners should practice how to use "ammonify" in real sentences.*
- *In everyday English, people use "ammonify" when talking about this idea.*

ammonitic *(adjective)*

Of or related to an order of fossil cephalopods.

- *Her writing became clearer after she learned "ammonitic."*
- *Would you call this situation "ammonitic"? Explain why.*

ammoniuria *(noun)*

Excessive ammonia in the urine.

- *In class, the teacher used "ammoniuria" to mean excessive ammonia in the urine.*
- *The article explained what "ammoniuria" means with a simple example.*

ammotragus *(noun)*

Genus of wild sheep.

- *Understanding "ammotragus" helps you talk about this topic clearly.*
- *The article explained what "ammotragus" means with a simple example.*

ammotragus lervia *(noun)*

Wild sheep of northern Africa.

- *They discussed "ammotragus lervia" during the group presentation.*
- *In class, the teacher used "ammotragus lervia" to mean wild sheep of northern africa.*

amnic *(adjective)*

Of or related to the amnion or characterized by developing an amnion.

- *Students compared "amnic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "amnic."*

amnionic *(adjective)*

Of or related to the amnion or characterized by developing an amnion.

- *It is useful to describe something as "amnionic" when it is of or related to the amnion or characterized by....*
- *The speaker chose "amnionic" because it captured the feeling precisely.*

amnionic fluid *(noun)*

The serous fluid in which the embryo is suspended inside the amnion.

- *In class, the teacher used "amnionic fluid" to mean the serous fluid in which the embryo is suspended....*
- *Understanding "amnionic fluid" helps you talk about this topic clearly.*

amnios *(noun)*

Thin innermost membranous sac enclosing the developing embryo of higher vertebrates (reptiles, birds and mammals).

- *They discussed "amnios" during the group presentation.*
- *Understanding "amnios" helps you talk about this topic clearly.*

amniota *(noun)*

Higher vertebrates (reptiles, birds and mammals) possessing an amnion during development.

- *She wrote a short paragraph that included "amniota."*
- *He looked up "amniota" because he had never seen it before.*

amoeban *(adjective)*

Pertaining to or resembling amoebae.

- *The speaker chose “amoeban” because it captured the feeling precisely.*
- *Would you call this situation “amoeban”? Explain why.*

---

amoebida *(noun)*

The animal order including amoebas.

- *Understanding “amoebida” helps you talk about this topic clearly.*
- *The article explained what “amoebida” means with a simple example.*

---

amoebina *(noun)*

The animal order including amoebas.

- *In class, the teacher used “amoebina” to mean the animal order including amoebas.*
- *They discussed “amoebina” during the group presentation.*

---

amoebiosis *(noun)*

Infection by a disease-causing ameba.

- *They discussed “amoebiosis” during the group presentation.*
- *Understanding “amoebiosis” helps you talk about this topic clearly.*

---

amoebous *(adjective)*

Pertaining to or resembling amoebae.

- *Her writing became clearer after she learned “amoebous.”*
- *A “amoebous” approach may work better in this case.*

---

amoralism *(noun)*

The doctrine that moral distinctions are invalid.

- *They discussed “amoralism” during the group presentation.*
- *The article explained what “amoralism” means with a simple example.*

---

amoralist *(noun)*

Someone who adheres to the doctrine that ordinary moral distinctions are invalid.

- *In class, the teacher used “amoralist” to mean someone who adheres to the doctrine that ordinary....*
- *He looked up “amoralist” because he had never seen it before.*

---

amorally *(adverb)*

Without regard for morality.

- *Try rewriting the sentence and include “amorally” naturally.*
- *Place “amorally” carefully so the meaning stays clear.*

---

amorist *(noun)*

One dedicated to love and lovemaking especially one who writes about love.

- *They discussed “amorist” during the group presentation.*
- *Understanding “amorist” helps you talk about this topic clearly.*

---

amoristic *(adjective)*

Of or pertaining to romantic love.

- *A “amoristic” approach may work better in this case.*
- *Students compared “amoristic” with similar adjectives in the lesson.*

---

amorousness *(noun)*

The arousal of feelings of sexual desire.

- *The article explained what “amorousness” means with a simple example.*
- *They discussed “amorousness” during the group presentation.*

---

amorpha *(noun)*

Any plant of the genus Amorpha having odd-pinnate leaves and purplish spicate flowers.

- *In class, the teacher used “amorpha” to mean any plant of the genus amorpha having odd-pinnate....*

- *The article explained what “amorpha” means with a simple example.*

---

amorpha californica *(noun)*

An erect to spreading hairy shrub of the Pacific coast of the United States having racemes of red to indigo flowers.

- *The article explained what “amorpha californica” means with a simple example.*
- *Understanding “amorpha californica” helps you talk about this topic clearly.*

---

amorpha canescens *(noun)*

Shrub of sandy woodlands and stream banks of western United States having hoary pinnate flowers and dull-colored racemose flowers; thought to indicate the presence of lead ore.

- *She wrote a short paragraph that included “amorpha canescens.”*
- *He looked up “amorpha canescens” because he had never seen it before.*

---

amorpha fruticosa *(noun)*

Dense shrub of moist riverbanks and flood plains of the eastern United States having attractive fragrant foliage and dense racemes of dark purple flowers.

- *In class, the teacher used “amorpha fruticosa” to mean dense shrub of moist riverbanks and flood plains of....*
- *He looked up “amorpha fruticosa” because he had never seen it before.*

---

amorphophallus campanulatus *(noun)*

Putrid-smelling aroid of southeastern Asia (especially the Philippines) grown for its edible tuber.

- *She wrote a short paragraph that included “amorphophallus campanulatus.”*
- *He looked up “amorphophallus campanulatus” because he had never seen it before.*

---

amorphophallus paeonifolius *(noun)*

Putrid-smelling aroid of southeastern Asia (especially the Philippines) grown for its edible tuber.

- *She wrote a short paragraph that included “amorphophallus paeonifolius.”*
- *He looked up “amorphophallus paeonifolius” because he had never seen it before.*

---

amorphophallus rivieri *(noun)*

Foul-smelling somewhat fleshy tropical plant of southeastern Asia cultivated for its edible corms or in the greenhouse for its large leaves and showy dark red spathe surrounding a large spadix.

- *The article explained what “amorphophallus rivieri” means with a simple example.*
- *Understanding “amorphophallus rivieri” helps you talk about this topic clearly.*

---

amorphophallus titanum *(noun)*

Malodorous tropical plant having a spathe that resembles the corolla of a morning glory and attains a diameter of several feet.

- *They discussed “amorphophallus titanum” during the group presentation.*
- *He looked up “amorphophallus titanum” because he had never seen it before.*

---

amort *(adjective)*

Utterly cast down.

- *Her writing became clearer after she learned “amort.”*
- *The speaker chose “amort” because it captured the feeling precisely.*

---

amortise *(verb)*

Liquidate gradually.

- *The coach explained when to use “amortise” and when to wait.*
- *Can you use “amortise” in a sentence that fits this situation?*

---

amphibiotic *(adjective)*

Having an aquatic early or larval form and a terrestrial adult form.

- *The speaker chose “amphibiotic” because it captured the feeling precisely.*
- *It is useful to describe something as “amphibiotic” when it is having an aquatic early or larval form and a....*

---

amphibolips *(noun)*

Cynipid gall wasps, especially causing oak-apple galls.

- *In class, the teacher used “amphibolips” to mean cynipid gall wasps, especially causing oak-apple galls.*
- *The article explained what “amphibolips” means with a simple example.*

---

amphibology *(noun)*

An ambiguous grammatical construction; e.g., 'they are flying planes' can mean either that someone is flying planes or that something is flying planes.

- *The article explained what "amphibology" means with a simple example.*
- *In class, the teacher used "amphibology" to mean an ambiguous grammatical construction; e.g., 'they....*

---

amphiboly *(noun)*

An ambiguous grammatical construction; e.g., 'they are flying planes' can mean either that someone is flying planes or that something is flying planes.

- *They discussed "amphiboly" during the group presentation.*
- *The article explained what "amphiboly" means with a simple example.*

---

amphibrach *(noun)*

A metrical unit with unstressed-stressed-unstressed syllables (e.g., 'remember').

- *She wrote a short paragraph that included "amphibrach."*
- *They discussed "amphibrach" during the group presentation.*

---

amphicarpa *(noun)*

Very small genus of twining vines of North America and Asia: hog peanut.

- *Understanding "amphicarpa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "amphicarpa."*

---

amphicarpa bracteata *(noun)*

Vine widely distributed in eastern North America producing racemes of purple to maroon flowers and abundant (usually subterranean) edible one-seeded pods resembling peanuts.

- *The article explained what "amphicarpa bracteata" means with a simple example.*
- *Understanding "amphicarpa bracteata" helps you talk about this topic clearly.*

---

amphicarpaea *(noun)*

Very small genus of twining vines of North America and Asia: hog peanut.

- *Understanding "amphicarpaea" helps you talk about this topic clearly.*
- *He looked up "amphicarpaea" because he had never seen it before.*

---

amphicarpaea bracteata *(noun)*

Vine widely distributed in eastern North America producing racemes of purple to maroon flowers and abundant (usually subterranean) edible one-seeded pods resembling peanuts.

- *The article explained what "amphicarpaea bracteata" means with a simple example.*
- *In class, the teacher used "amphicarpaea bracteata" to mean vine widely distributed in eastern north america....*

---

amphictyony *(noun)*

An association of neighboring states or tribes in ancient Greece; established originally to defend a common religious center.

- *They discussed "amphictyony" during the group presentation.*
- *The article explained what "amphictyony" means with a simple example.*

---

amphidiploid *(noun)*

(genetics) an organism or cell having a diploid set of chromosomes from each parent.

- *Understanding "amphidiploid" helps you talk about this topic clearly.*
- *The article explained what "amphidiploid" means with a simple example.*

---

amphidiploidy *(noun)*

The condition of being amphidiploid.

- *The article explained what "amphidiploidy" means with a simple example.*
- *In class, the teacher used "amphidiploidy" to mean the condition of being amphidiploid.*

---

amphigory *(noun)*

Nonsensical writing (usually verse).

- *He looked up "amphigory" because he had never seen it before.*
- *They discussed "amphigory" during the group presentation.*

---

amphimixis *(noun)*

Union of sperm and egg in sexual reproduction.

- *She wrote a short paragraph that included “amphimixis.”*
- *Understanding “amphimixis” helps you talk about this topic clearly.*

---

amphineura *(noun)*

A class of Gastropoda.

- *He looked up “amphineura” because he had never seen it before.*
- *They discussed “amphineura” during the group presentation.*

---

amphiprion *(noun)*

Damsel fishes.

- *They discussed “amphiprion” during the group presentation.*
- *She wrote a short paragraph that included “amphiprion.”*

---

amphiprion percula *(noun)*

An anemone fish of the genus Amphiprion.

- *They discussed “amphiprion percula” during the group presentation.*
- *She wrote a short paragraph that included “amphiprion percula.”*

---

amphiprostylar *(adjective)*

Marked by columniation having free columns in porticoes either at both ends or at both sides of a structure.

- *A “amphiprostylar” approach may work better in this case.*
- *The speaker chose “amphiprostylar” because it captured the feeling precisely.*

---

amphiprostyle *(adjective)*

Marked by columniation having free columns in porticoes either at both ends or at both sides of a structure.

- *The speaker chose “amphiprostyle” because it captured the feeling precisely.*
- *A “amphiprostyle” approach may work better in this case.*

---

amphiprotic *(adjective)*

Having characteristics of both an acid and a base and capable of reacting as either.

- *Would you call this situation “amphiprotic”? Explain why.*
- *Students compared “amphiprotic” with similar adjectives in the lesson.*

---

amphisbaena *(noun)*

(classical mythology) a serpent with a head at each end of its body.

- *They discussed “amphisbaena” during the group presentation.*
- *The article explained what “amphisbaena” means with a simple example.*

---

amphisbaenia *(noun)*

Type genus of the Amphisbaenidae.

- *Understanding “amphisbaenia” helps you talk about this topic clearly.*
- *In class, the teacher used “amphisbaenia” to mean type genus of the amphisbaenidae.*

---

amphisbaenidae *(noun)*

Worm lizards.

- *They discussed “amphisbaenidae” during the group presentation.*
- *He looked up “amphisbaenidae” because he had never seen it before.*

---

amphistylar *(adjective)*

Having columns either at both ends or at both sides.

- *Students compared “amphistylar” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “amphistylar.”*

---

amphitheatric *(adjective)*

Of or related to an amphitheater.

- *A “amphitheatric” approach may work better in this case.*
- *Her writing became clearer after she learned “amphitheatric.”*

amphitheatrical *(adjective)*

Of or related to an amphitheater.

- *It is useful to describe something as "amphitheatrical" when it is of or related to an amphitheater.*
- *The speaker chose "amphitheatrical" because it captured the feeling precisely.*

amphitheatrum flavium *(noun)*

A large amphitheater in Rome whose construction was begun by Vespasian about AD 75 or 80.

- *They discussed "amphitheatrum flavium" during the group presentation.*
- *She wrote a short paragraph that included "amphitheatrum flavium."*

amphitropous *(adjective)*

(of a plant ovule) partly inverted; turned back 90 degrees on its stalk.

- *The speaker chose "amphitropous" because it captured the feeling precisely.*
- *Would you call this situation "amphitropous"? Explain why.*

amphitropous ovule *(noun)*

A partly inverted ovule turned back 90 degrees on its stalk.

- *Understanding "amphitropous ovule" helps you talk about this topic clearly.*
- *In class, the teacher used "amphitropous ovule" to mean a partly inverted ovule turned back 90 degrees on....*

amphiuma *(noun)*

Aquatic eel-shaped salamander having two pairs of very small feet; of still muddy waters in the southern United States.

- *He looked up "amphiuma" because he had never seen it before.*
- *She wrote a short paragraph that included "amphiuma."*

amphiumidae *(noun)*

Congo snakes.

- *He looked up "amphiumidae" because he had never seen it before.*
- *They discussed "amphiumidae" during the group presentation.*

amphoric *(adjective)*

The sound heard in auscultation resembling the hollow sound made by blowing across the mouth of a bottle.

- *Amphoric breathing indicates a cavity in the lung.*
- *A "amphoric" approach may work better in this case.*

ampleness *(noun)*

The property of impressive largeness in size.

- *He admired the ampleness of its proportions.*
- *The ampleness of her servings more than satisfied his hunger.*

amplexicaul leaf *(noun)*

A leaf with its base clasping the stem.

- *They discussed "amplexicaul leaf" during the group presentation.*
- *In class, the teacher used "amplexicaul leaf" to mean a leaf with its base clasping the stem.*

ampul *(noun)*

A small bottle that contains a drug (especially a sealed sterile container for injection by needle).

- *The article explained what "ampul" means with a simple example.*
- *Understanding "ampul" helps you talk about this topic clearly.*

ampullar *(adjective)*

Of or related to an ampulla.

- *Students compared "ampullar" with similar adjectives in the lesson.*
- *It is useful to describe something as "ampullar" when it is of or related to an ampulla.*

ampullary *(adjective)*

Of or related to an ampulla.

- *A "ampullary" approach may work better in this case.*
- *It is useful to describe something as "ampullary" when it is of or related to an ampulla.*

---

amputator *(noun)*

A surgeon who removes part or all of a limb.

- *They discussed "amputator" during the group presentation.*
- *She wrote a short paragraph that included "amputator."*

---

amrinone *(noun)*

A drug (trade name Inocor) used intravenously in heart failure; increases strength of contraction of myocardium.

- *They discussed "amrinone" during the group presentation.*
- *Understanding "amrinone" helps you talk about this topic clearly.*

---

amsinckia *(noun)*

Rough annual herbs of Europe and the Americas: fiddlenecks.

- *Understanding "amsinckia" helps you talk about this topic clearly.*
- *He looked up "amsinckia" because he had never seen it before.*

---

amsinckia grandiflora *(noun)*

Annual of the western United States having large coiled flower spikes; a threatened species.

- *She wrote a short paragraph that included "amsinckia grandiflora."*
- *The article explained what "amsinckia grandiflora" means with a simple example.*

---

amsinckia intermedia *(noun)*

Annual of western United States with coiled spikes of yellow-orange coiled flowers.

- *In class, the teacher used "amsinckia intermedia" to mean annual of western united states with coiled spikes....*
- *The article explained what "amsinckia intermedia" means with a simple example.*

---

amsonia *(noun)*

Genus of herbs and subshrubs with milky juice and showy bluish flowers; Europe to Asia Minor to Japan and North America.

- *In class, the teacher used "amsonia" to mean genus of herbs and subshrubs with milky juice and....*
- *The article explained what "amsonia" means with a simple example.*

---

amsonia tabernaemontana *(noun)*

Subshrubs of southeastern United States forming slow-growing clumps and having blue flowers in short terminal cymes.

- *Understanding "amsonia tabernaemontana" helps you talk about this topic clearly.*
- *In class, the teacher used "amsonia tabernaemontana" to mean subshrubs of southeastern united states forming....*

---

amusd *(noun)*

A doctor's degree in musical arts.

- *He looked up "amusd" because he had never seen it before.*
- *She wrote a short paragraph that included "amusd."*

---

amusive *(adjective)*

Providing enjoyment; pleasantly entertaining.

- *It is useful to describe something as "amusive" when it is providing enjoyment; pleasantly entertaining.*
- *Students compared "amusive" with similar adjectives in the lesson.*

---

amygdalaceae *(noun)*

Used in former classifications for plum and peach and almond trees which are now usually classified as members of the genus Prunus.

- *In class, the teacher used "amygdalaceae" to mean used in former classifications for plum and peach....*
- *Understanding "amygdalaceae" helps you talk about this topic clearly.*

---

amygdaliform *(adjective)*

Shaped like an almond.

- *Students compared "amygdaliform" with similar adjectives in the lesson.*

- *A "amygdaliform" approach may work better in this case.*

---

amygdaline *(adjective)*

Related to or resembling an almond.

- *Her writing became clearer after she learned "amygdaline."*
- *Would you call this situation "amygdaline"? Explain why.*

---

amygdaloidal *(adjective)*

Shaped like an almond.

- *Would you call this situation "amygdaloidal"? Explain why.*
- *Her writing became clearer after she learned "amygdaloidal."*

---

amygdalotomy *(noun)*

Psychosurgery in which amygdaloid fibers that mediate limbic system activity are severed (in cases of extreme uncontrollable violence).

- *She wrote a short paragraph that included "amygdalotomy."*
- *He looked up "amygdalotomy" because he had never seen it before.*

---

amylaceous *(adjective)*

Resembling starch.

- *Her writing became clearer after she learned "amylaceous."*
- *Students compared "amylaceous" with similar adjectives in the lesson.*

---

amyloidal *(adjective)*

Resembling starch.

- *Would you call this situation "amyloidal"? Explain why.*
- *Her writing became clearer after she learned "amyloidal."*

---

amylolysis *(noun)*

Conversion of starch to sugar.

- *In class, the teacher used "amylolysis" to mean conversion of starch to sugar.*
- *Understanding "amylolysis" helps you talk about this topic clearly.*

---

amylolytic *(adjective)*

Of or related to the process of amylolysis.

- *The speaker chose "amylolytic" because it captured the feeling precisely.*
- *A "amylolytic" approach may work better in this case.*

---

amylum *(noun)*

A complex carbohydrate found chiefly in seeds, fruits, tubers, roots and stem pith of plants, notably in corn, potatoes, wheat, and rice; an important foodstuff and used otherwise especially in adhesives and as fillers and stiffeners for paper and textiles.

- *She wrote a short paragraph that included "amylum."*
- *Understanding "amylum" helps you talk about this topic clearly.*

---

amyotonia *(noun)*

Lack of normal muscular tension or tonus.

- *They discussed "amyotonia" during the group presentation.*
- *Understanding "amyotonia" helps you talk about this topic clearly.*

---

amyotrophia *(noun)*

Progressive wasting of muscle tissues.

- *The article explained what "amyotrophia" means with a simple example.*
- *She wrote a short paragraph that included "amyotrophia."*

---

amyotrophy *(noun)*

Progressive wasting of muscle tissues.

- *In class, the teacher used "amyotrophy" to mean progressive wasting of muscle tissues.*
- *The article explained what "amyotrophy" means with a simple example.*

amyxia *(noun)*

A condition in which no mucus in produced.

- *She wrote a short paragraph that included "amyxia."*
- *They discussed "amyxia" during the group presentation.*

an nafud *(noun)*

A desert in northern Saudi Arabia that is noted for its red sand and violent winds.

- *The article explained what "an nafud" means with a simple example.*
- *They discussed "an nafud" during the group presentation.*

an nefud *(noun)*

A desert in northern Saudi Arabia that is noted for its red sand and violent winds.

- *She wrote a short paragraph that included "an nefud."*
- *They discussed "an nefud" during the group presentation.*

anabantidae *(noun)*

Small freshwater spiny-finned fishes of Africa and southern Asia.

- *In class, the teacher used "anabantidae" to mean small freshwater spiny-finned fishes of africa and....*
- *They discussed "anabantidae" during the group presentation.*

anabas *(noun)*

The type genus of the family Anabantidae; small fish that resemble perch.

- *Understanding "anabas" helps you talk about this topic clearly.*
- *He looked up "anabas" because he had never seen it before.*

anabas testudineus *(noun)*

A small perch of India whose gills are modified to allow it to breathe air; has spiny pectoral fins that enable it to travel on land.

- *They discussed "anabas testudineus" during the group presentation.*
- *She wrote a short paragraph that included "anabas testudineus."*

anabatic *(adjective)*

Of an air current or wind; rising especially up a slope.

- *An anabatic wind.*
- *The speaker chose "anabatic" because it captured the feeling precisely.*

anabiosis *(noun)*

Suspended animation in organisms during periods of extreme drought from which they revive when moisture returns.

- *They discussed "anabiosis" during the group presentation.*
- *In class, the teacher used "anabiosis" to mean suspended animation in organisms during periods of....*

anabiotic *(adjective)*

Of or related to the state of anabiosis.

- *Would you call this situation "anabiotic"? Explain why.*
- *The speaker chose "anabiotic" because it captured the feeling precisely.*

anabrus *(noun)*

A genus of Tettigoniidae.

- *He looked up "anabrus" because he had never seen it before.*
- *She wrote a short paragraph that included "anabrus."*

anabrus simplex *(noun)*

Large dark wingless cricket-like katydid of arid parts of western United States.

- *Understanding "anabrus simplex" helps you talk about this topic clearly.*
- *In class, the teacher used "anabrus simplex" to mean large dark wingless cricket-like katydid of arid....*

anacanthini *(noun)*

At least partially equivalent to the order Gadiformes in some classifications.

- *He looked up "anacanthini" because he had never seen it before.*
- *She wrote a short paragraph that included "anacanthini."*

---

anachronic *(adjective)*

Chronologically misplaced.

- *Would you call this situation "anachronic"? Explain why.*
- *Her writing became clearer after she learned "anachronic."*

---

anachronous *(adjective)*

Chronologically misplaced.

- *The speaker chose "anachronous" because it captured the feeling precisely.*
- *A "anachronous" approach may work better in this case.*

---

anaclinal *(adjective)*

Of valleys and rivers; progressing in a direction opposite to the dip in surrounding rock strata.

- *Her writing became clearer after she learned "anaclinal."*
- *Would you call this situation "anaclinal"? Explain why.*

---

anaclisis *(noun)*

(psychoanalysis) relationship marked by strong dependence on others; especially a libidinal attachment to e.g. a parental figure.

- *The article explained what "anaclisis" means with a simple example.*
- *In class, the teacher used "anaclisis" to mean (psychoanalysis) relationship marked by strong....*

---

anaclitic *(adjective)*

Of or related to relationships that are characterized by the strong dependence of one person on another.

- *It is useful to describe something as "anaclitic" when it is of or related to relationships that are....*
- *The speaker chose "anaclitic" because it captured the feeling precisely.*

---

anaclitic depression *(noun)*

Severe and progressive depression in infants who lose their mother and do not get a suitable substitute.

- *In class, the teacher used "anaclitic depression" to mean severe and progressive depression in infants who....*
- *He looked up "anaclitic depression" because he had never seen it before.*

---

anacoluthia *(noun)*

An abrupt change within a sentence from one syntactic structure to another.

- *The article explained what "anacoluthia" means with a simple example.*
- *In class, the teacher used "anacoluthia" to mean an abrupt change within a sentence from one....*

---

anacoluthic *(adjective)*

Of or related to syntactic inconsistencies of the sort known as anacoluthons.

- *A "anacoluthic" approach may work better in this case.*
- *It is useful to describe something as "anacoluthic" when it is of or related to syntactic inconsistencies of the....*

---

anacoluthon *(noun)*

An abrupt change within a sentence from one syntactic structure to another.

- *He looked up "anacoluthon" because he had never seen it before.*
- *She wrote a short paragraph that included "anacoluthon."*

---

anacyclus *(noun)*

A Spanish pellitory.

- *The article explained what "anacyclus" means with a simple example.*
- *Understanding "anacyclus" helps you talk about this topic clearly.*

---

anacyclus pyrethrum *(noun)*

A small Mediterranean plant containing a volatile oil once used to relieve toothache.

- *They discussed "anacyclus pyrethrum" during the group presentation.*

- *In class, the teacher used “anacyclus pyrethrum” to mean a small mediterranean plant containing a volatile....*

---

anadama bread *(noun)*

A yeast-raised bread made of white flour and cornmeal and molasses.

- *She wrote a short paragraph that included “anadama bread.”*
- *They discussed “anadama bread” during the group presentation.*

---

anadenanthera *(noun)*

2 species of tropical American shrubs or trees.

- *He looked up “anadenanthera” because he had never seen it before.*
- *Understanding “anadenanthera” helps you talk about this topic clearly.*

---

anadenanthera colubrina *(noun)*

Brazilian shrub having twice-pinnate leaves and small spicate flowers followed by flat or irregularly torulose pods; sometimes placed in genus Piptadenia.

- *They discussed “anadenanthera colubrina” during the group presentation.*
- *The article explained what “anadenanthera colubrina” means with a simple example.*

---

anadiplosis *(noun)*

Repetition of the final words of a sentence or line at the beginning of the next.

- *They discussed “anadiplosis” during the group presentation.*
- *The article explained what “anadiplosis” means with a simple example.*

---

anaerobiotic *(adjective)*

Living or active in the absence of free oxygen.

- *Students compared “anaerobiotic” with similar adjectives in the lesson.*
- *Would you call this situation “anaerobiotic”? Explain why.*

---

anaesthetize *(verb)*

Administer an anesthetic drug to.

- *Can you use “anaesthetize” in a sentence that fits this situation?*
- *The coach explained when to use “anaesthetize” and when to wait.*

---

anagallis *(noun)*

Chiefly Old World herbs.

- *He looked up “anagallis” because he had never seen it before.*
- *She wrote a short paragraph that included “anagallis.”*

---

anagallis arvensis *(noun)*

Herb with scarlet or white or purple blossoms that close at approach of rainy weather.

- *They discussed “anagallis arvensis” during the group presentation.*
- *Understanding “anagallis arvensis” helps you talk about this topic clearly.*

---

anagallis tenella *(noun)*

Small creeping European herb having delicate pink flowers.

- *The article explained what “anagallis tenella” means with a simple example.*
- *Understanding “anagallis tenella” helps you talk about this topic clearly.*

---

anagasta *(noun)*

Moth whose larvae are flour moths.

- *He looked up “anagasta” because he had never seen it before.*
- *In class, the teacher used “anagasta” to mean moth whose larvae are flour moths.*

---

anagasta kuehniella *(noun)*

Small moth whose larvae damage stored grain and flour.

- *Understanding “anagasta kuehniella” helps you talk about this topic clearly.*
- *They discussed “anagasta kuehniella” during the group presentation.*

---

anaglyphic *(adjective)*

Related to anaglyphs or anaglyphy.

- *It is useful to describe something as "anaglyphic" when it is related to anaglyphs or anaglyphy.*
- *The speaker chose "anaglyphic" because it captured the feeling precisely.*

anaglyphical *(adjective)*

Related to anaglyphs or anaglyphy.

- *Her writing became clearer after she learned "anaglyphical."*
- *Would you call this situation "anaglyphical"? Explain why.*

anaglyphy *(noun)*

The process of producing pictures in contrasting colors that appear three-dimensional when superimposed and viewed through spectacles with one red and one green lens.

- *She wrote a short paragraph that included "anaglyphy."*
- *He looked up "anaglyphy" because he had never seen it before.*

anaglyptic *(adjective)*

Related to anaglyphs or anaglyphy.

- *It is useful to describe something as "anaglyptic" when it is related to anaglyphs or anaglyphy.*
- *A "anaglyptic" approach may work better in this case.*

anaglyptical *(adjective)*

Related to anaglyphs or anaglyphy.

- *Her writing became clearer after she learned "anaglyptical."*
- *Students compared "anaglyptical" with similar adjectives in the lesson.*

The 10th letter of the Hebrew alphabet.

- *He looked up "yodh" because he had never seen it before.*
- *They discussed "yodh" during the group presentation.*

---

yurak-samoyed *(noun)*

A Uralic language spoken by a Samoyed of northern Siberia.

- *They discussed "yurak-samoyed" during the group presentation.*

- *The article explained what "yurak-samoyed" means with a simple example.*

---

zaar *(noun)*

A Chadic language spoken in northern Nigeria.

- *He looked up "zaar" because he had never seen it before.*
- *She wrote a short paragraph that included "zaar."*

---

zayin *(noun)*

The 7th letter of the Hebrew alphabet.

- *The article explained what "zayin" means with a simple example.*
- *They discussed "zayin" during the group presentation.*

---

zyrian *(noun)*

The Finnic language spoken by the Komi.

- *The article explained what "zyrian" means with a simple example.*
- *In class, the teacher used "zyrian" to mean the finnic language spoken by the komi.*

---

anastatica *(noun)*

One species: rose of Jericho; resurrection plant.

- *They discussed "anastatica" during the group presentation.*
- *She wrote a short paragraph that included "anastatica."*

---

anastatica hierochuntica *(noun)*

Small grey Asiatic desert plant bearing minute white flowers that rolls up when dry and expands when moist.

- *The article explained what "anastatica hierochuntica" means with a simple example.*
- *Understanding "anastatica hierochuntica" helps you talk about this topic clearly.*

---

anastigmat *(noun)*

Compound lens or lens system designed to be free of astigmatism and able to form approximately point images.

- *The article explained what "anastigmat" means with a simple example.*
- *They discussed "anastigmat" during the group presentation.*

---

anastigmatic *(adjective)*

Pertaining to a lens or lens system free of astigmatism (able to form point images).

- *The speaker chose "anastigmatic" because it captured the feeling precisely.*
- *It is useful to describe something as "anastigmatic" when it is pertaining to a lens or lens system free of....*

---

anastigmatic lens *(noun)*

A lens designed to correct astigmatism.

- *She wrote a short paragraph that included "anastigmatic lens."*
- *He looked up "anastigmatic lens" because he had never seen it before.*

---

anastrophe *(noun)*

The reversal of the normal order of words.

- *The article explained what "anastrophe" means with a simple example.*
- *She wrote a short paragraph that included "anastrophe."*

---

anastylosis *(noun)*

The archeological reassembly of ruined monuments from fallen or decayed fragments (incorporating new materials when necessary).

- *He looked up "anastylosis" because he had never seen it before.*
- *She wrote a short paragraph that included "anastylosis."*

---

anathematisation *(noun)*

The formal act of pronouncing (someone or something) accursed.

- *Understanding "anathematisation" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "anathematisation."*

Wish harm upon; invoke evil upon.

- *Learners should practice how to use "anathemize" in real sentences.*
- *The coach explained when to use "anathemize" and when to wait.*

---

anatoli yevgenevich karpov *(noun)*

Russian chess master who was world champion from 1975 until 1985 when he was defeated by Gary Kasparov (born in 1951).

- *Understanding "anatoli yevgenevich karpov" helps you talk about this topic clearly.*
- *The article explained what "anatoli yevgenevich karpov" means with a simple example.*

---

anatomise *(verb)*

Dissect in order to analyze.

- *Can you use "anatomise" in a sentence that fits this situation?*
- *She tried to use "anatomise" carefully so everyone would understand.*

---

anatotitan *(noun)*

One of the largest and most famous duck-billed dinosaurs.

- *She wrote a short paragraph that included "anatotitan."*
- *He looked up "anatotitan" because he had never seen it before.*

---

anatropous *(adjective)*

(of a plant ovule) completely inverted; turned back 180 degrees on its stalk.

- *Would you call this situation "anatropous"? Explain why.*
- *It is useful to describe something as "anatropous" when it is (of a plant ovule) completely inverted; turned back....*

---

anatropous ovule *(noun)*

A completely inverted ovule turned back 180 degrees on its stalk.

- *She wrote a short paragraph that included "anatropous ovule."*
- *The article explained what "anatropous ovule" means with a simple example.*

---

anchoritic *(adjective)*

Characterized by ascetic solitude.

- *Students compared "anchoritic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "anchoritic."*

---

anchorperson *(noun)*

A television reporter who coordinates a broadcast to which several correspondents contribute.

- *Understanding "anchorperson" helps you talk about this topic clearly.*
- *The article explained what "anchorperson" means with a simple example.*

---

anchusa *(noun)*

Any of various Old World herbs of the genus Anchusa having one-sided clusters of trumpet-shaped flowers.

- *She wrote a short paragraph that included “anchusa.”*
- *They discussed “anchusa” during the group presentation.*

---

anchusa capensis *(noun)*

Anchusa of southern Africa having blue flowers with white throats.

- *They discussed “anchusa capensis” during the group presentation.*
- *The article explained what “anchusa capensis” means with a simple example.*

---

anchusa officinalis *(noun)*

Perennial or biennial herb cultivated for its delicate usually blue flowers.

- *He looked up “anchusa officinalis” because he had never seen it before.*
- *She wrote a short paragraph that included “anchusa officinalis.”*

---

anchusa riparia *(noun)*

Anchusa of southern Africa having blue to red-purple flowers.

- *The article explained what “anchusa riparia” means with a simple example.*
- *They discussed “anchusa riparia” during the group presentation.*

---

anchylosis *(noun)*

Abnormal adhesion and rigidity of the bones of a joint.

- *They discussed “anchylosis” during the group presentation.*
- *The article explained what “anchylosis” means with a simple example.*

---

ancientness *(noun)*

Extreme oldness.

- *The article explained what “ancientness” means with a simple example.*
- *In class, the teacher used “ancientness” to mean extreme oldness.*

---

ancistrodon *(noun)*

Copperheads.

- *In class, the teacher used “ancistrodon” to mean copperheads.*
- *They discussed “ancistrodon” during the group presentation.*

---

ancohuma *(noun)*

A mountain peak in the Andes in Bolivia (20,960 feet high).

- *He looked up “ancohuma” because he had never seen it before.*
- *Understanding “ancohuma” helps you talk about this topic clearly.*

---

anconeous muscle *(noun)*

The muscle that extends the forearm and abducts the ulna in pronation of the wrist.

- *Understanding “anconeous muscle” helps you talk about this topic clearly.*
- *They discussed “anconeous muscle” during the group presentation.*

---

ancylidae *(noun)*

Freshwater gastropod.

- *Understanding “ancylidae” helps you talk about this topic clearly.*
- *The article explained what “ancylidae” means with a simple example.*

---

ancylose *(verb)*

Produce ankylosis by surgery.

- *The coach explained when to use “ancylose” and when to wait.*
- *Learners should practice how to use “ancylose” in real sentences.*

---

andelmin *(noun)*

Any of several tropical American trees of the genus Andira.

- *In class, the teacher used “andelmin” to mean any of several tropical american trees of the genus....*
- *Understanding “andelmin” helps you talk about this topic clearly.*

andira *(noun)*

Small genus of evergreen trees of tropical America and western Africa.

- *They discussed "andira" during the group presentation.*
- *In class, the teacher used "andira" to mean small genus of evergreen trees of tropical america....*

andira inermis *(noun)*

Tree with shaggy unpleasant-smelling toxic bark and yielding strong durable wood; bark and seeds used as a purgative and vermifuge and narcotic.

- *He looked up "andira inermis" because he had never seen it before.*
- *Understanding "andira inermis" helps you talk about this topic clearly.*

andiron *(noun)*

Metal supports for logs in a fireplace.

- *The andirons were too hot to touch.*
- *The article explained what "andiron" means with a simple example.*

andradite *(noun)*

A garnet consisting of calcium iron silicate and having any color ranging from yellow and green to brown and black; used as gemstone.

- *He looked up "andradite" because he had never seen it before.*
- *She wrote a short paragraph that included "andradite."*

andre eglevsky *(noun)*

United States ballet dancer (born in Russia) (1917-1977).

- *In class, the teacher used "andre eglevsky" to mean united states ballet dancer (born in russia)....*
- *They discussed "andre eglevsky" during the group presentation.*

andreaea *(noun)*

Brown or blackish Alpine mosses having a dehiscent capsule with 4 longitudinal slits.

- *She wrote a short paragraph that included "andreaea."*
- *The article explained what "andreaea" means with a simple example.*

andreaeales *(noun)*

Comprises a single genus: Andreaea.

- *She wrote a short paragraph that included "andreaeales."*
- *Understanding "andreaeales" helps you talk about this topic clearly.*

andrei arsenevich tarkovsky *(noun)*

Russian filmmaker (1932-1986).

- *She wrote a short paragraph that included "andrei arsenevich tarkovsky."*
- *Understanding "andrei arsenevich tarkovsky" helps you talk about this topic clearly.*

Soviet physicist and dissident; helped develop the first Russian hydrogen bomb; advocated nuclear disarmament and campaigned for human rights (1921-1989).

- *The article explained what "andrei dimitrievich sakharov" means with a simple example.*
- *They discussed "andrei dimitrievich sakharov" during the group presentation.*

andrei voznesenski *(noun)*

Russian poet (born in 1933).

- *Understanding "andrei voznesenski" helps you talk about this topic clearly.*
- *He looked up "andrei voznesenski" because he had never seen it before.*

andrenid *(noun)*

A bee that is a member of the genus Andrena.

- *The article explained what "andrenid" means with a simple example.*
- *She wrote a short paragraph that included "andrenid."*

andrenidae *(noun)*

A large family of solitary short-tongued bees most of which burrow in the ground.

- *The article explained what "andrenidae" means with a simple example.*
- *They discussed "andrenidae" during the group presentation.*

---

andrew's clintonia *(noun)*

Plant with nearly leafless stalk topped by a cluster of red or reddish lavender flowers; California to Oregon.

- *In class, the teacher used "andrew's clintonia" to mean plant with nearly leafless stalk topped by a....*
- *They discussed "andrew's clintonia" during the group presentation.*

---

andricus *(noun)*

Cynipid gall wasps, chiefly affecting oaks.

- *They discussed "andricus" during the group presentation.*
- *Understanding "andricus" helps you talk about this topic clearly.*

---

andrija mohorovicic *(noun)*

Yugoslav geophysicist for whom the Mohorovicic discontinuity was named (1857-1936).

- *The article explained what "andrija mohorovicic" means with a simple example.*
- *She wrote a short paragraph that included "andrija mohorovicic."*

---

androgenesis *(noun)*

Male parthenogenesis in which the embryo contains only paternal chromosomes due to the failure of the egg nucleus to participate in fertilization.

- *He looked up "androgenesis" because he had never seen it before.*
- *In class, the teacher used "androgenesis" to mean male parthenogenesis in which the embryo contains....*

---

androgenous *(adjective)*

Of or related to androgenesis.

- *Her writing became clearer after she learned "androgenous."*
- *A "androgenous" approach may work better in this case.*

---

androgeny *(noun)*

Male parthenogenesis in which the embryo contains only paternal chromosomes due to the failure of the egg nucleus to participate in fertilization.

- *She wrote a short paragraph that included "androgeny."*
- *The article explained what "androgeny" means with a simple example.*

---

androglossia *(noun)*

A woman's voice with male qualities.

- *Understanding "androglossia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "androglossia."*

---

andromeda glaucophylla *(noun)*

Wiry evergreen shrub having pendent clusters of white or pink flowers; of wet acidic areas in Arctic and Canada to northeastern United States.

- *In class, the teacher used "andromeda glaucophylla" to mean wiry evergreen shrub having pendent clusters of....*
- *The article explained what "andromeda glaucophylla" means with a simple example.*

---

andromeda polifolia *(noun)*

Erect to procumbent evergreen shrub having pendent clusters of white or pink flowers; of sphagnum peat bogs and other wet acidic areas in northern Europe.

- *He looked up "andromeda polifolia" because he had never seen it before.*
- *She wrote a short paragraph that included "andromeda polifolia."*

---

androphobia *(noun)*

A morbid fear of men.

- *She wrote a short paragraph that included "androphobia."*
- *They discussed "androphobia" during the group presentation.*

---

andropogon gerardii *(noun)*

Tall grass with smooth bluish leaf sheaths grown for hay in the United States.

- *In class, the teacher used "andropogon gerardii" to mean tall grass with smooth bluish leaf sheaths grown....*

- *Understanding "andropogon gerardii" helps you talk about this topic clearly.*

---

andryala *(noun)*

Any plant of the genus Andryala having milky sap and heads of bright yellow flowers.

- *He looked up "andryala" because he had never seen it before.*
- *Understanding "andryala" helps you talk about this topic clearly.*

---

andvari *(noun)*

(Norse mythology) a dwarf who possessed a treasure that was stolen by Loki.

- *The article explained what "andvari" means with a simple example.*
- *In class, the teacher used "andvari" to mean (norse mythology) a dwarf who possessed a treasure....*

---

Characterized by or given to telling anecdotes.

- *He was at his anecdotic best.*
- *Would you call this situation "anecdotic"? Explain why.*

---

anecdotical *(adjective)*

Characterized by or given to telling anecdotes.

- *The speaker chose "anecdotical" because it captured the feeling precisely.*
- *Would you call this situation "anecdotical"? Explain why.*

---

anecdotist *(noun)*

A person skilled in telling anecdotes.

- *Understanding "anecdotist" helps you talk about this topic clearly.*
- *In class, the teacher used "anecdotist" to mean a person skilled in telling anecdotes.*

---

aneides *(noun)*

Climbing salamanders.

- *The article explained what "aneides" means with a simple example.*
- *In class, the teacher used "aneides" to mean climbing salamanders.*

---

aneides lugubris *(noun)*

Yellow-spotted brown salamander of California woodlands.

- *In class, the teacher used "aneides lugubris" to mean yellow-spotted brown salamander of california woodlands.*
- *They discussed "aneides lugubris" during the group presentation.*

---

anemia adiantifolia *(noun)*

Fern of Florida and West Indies and Central America with rhizome densely clad in grown hairs.

- *Understanding "anemia adiantifolia" helps you talk about this topic clearly.*
- *He looked up "anemia adiantifolia" because he had never seen it before.*

---

anemographic *(adjective)*

Pertaining to the recording of wind measurements.

- *Would you call this situation "anemographic"? Explain why.*
- *A "anemographic" approach may work better in this case.*

---

anemography *(noun)*

Recording anemometrical measurements.

- *The article explained what "anemography" means with a simple example.*
- *In class, the teacher used "anemography" to mean recording anemometrical measurements.*

---

anemometric *(adjective)*

Pertaining to the measurement of wind speed and direction.

- *Would you call this situation "anemometric"? Explain why.*
- *A "anemometric" approach may work better in this case.*

---

anemometrical *(adjective)*

Pertaining to the measurement of wind speed and direction.

- *The speaker chose "anemometrical" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "anemometrical."*

---

anemometry *(noun)*

Measuring wind speed and direction.

- *The article explained what "anemometry" means with a simple example.*
- *In class, the teacher used "anemometry" to mean measuring wind speed and direction.*

---

anemone ludoviciana *(noun)*

Short hairy perennial with early spring blue-violet or lilac flowers; North America and Siberia.

- *In class, the teacher used "anemone ludoviciana" to mean short hairy perennial with early spring blue-violet....*
- *They discussed "anemone ludoviciana" during the group presentation.*

---

anemone quinquefolia *(noun)*

Common anemone of eastern North America with solitary pink-tinged white flowers.

- *In class, the teacher used "anemone quinquefolia" to mean common anemone of eastern north america with....*
- *Understanding "anemone quinquefolia" helps you talk about this topic clearly.*

---

anemone tetonensis *(noun)*

Silky-foliaged herb of the Rocky Mountains with bluish-white flowers.

- *They discussed "anemone tetonensis" during the group presentation.*
- *He looked up "anemone tetonensis" because he had never seen it before.*

---

anemonella *(noun)*

One species: rue anemone.

- *Understanding "anemonella" helps you talk about this topic clearly.*
- *They discussed "anemonella" during the group presentation.*

---

anemonella thalictroides *(noun)*

Woodland flower native to eastern North America having cup-shaped flowers reminiscent of anemone but more delicate.

- *The article explained what "anemonella thalictroides" means with a simple example.*
- *They discussed "anemonella thalictroides" during the group presentation.*

---

anemophilous *(adjective)*

Of flowering plants (especially grasses etc) that are pollinated by the wind.

- *Students compared "anemophilous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "anemophilous."*

---

anemopsis *(noun)*

One species: yerba mansa.

- *The article explained what "anemopsis" means with a simple example.*
- *They discussed "anemopsis" during the group presentation.*

---

anemopsis californica *(noun)*

Stoloniferous herb of southwestern United States and Mexico having a pungent rootstock and small spicate flowers with white bracts suggesting an anemone.

- *In class, the teacher used "anemopsis californica" to mean stoloniferous herb of southwestern united states....*
- *The article explained what "anemopsis californica" means with a simple example.*

---

anencephalia *(noun)*

A defect in brain development resulting in small or missing brain hemispheres.

- *They discussed "anencephalia" during the group presentation.*
- *He looked up "anencephalia" because he had never seen it before.*

---

anencephalous *(adjective)*

Characterized by partial or total absence of a brain.

- *Would you call this situation "anencephalous"? Explain why.*
- *A "anencephalous" approach may work better in this case.*

---

anesthetise *(verb)*

Administer an anesthetic drug to.

- *He did not know how to use "anesthetise" until he saw an example.*
- *The coach explained when to use "anesthetise" and when to wait.*

---

anesthyl *(noun)*

A mixture of methyl and ethyl chloride; sprayed on as a local anesthetic.

- *Understanding "anesthyl" helps you talk about this topic clearly.*
- *They discussed "anesthyl" during the group presentation.*

---

anestric *(adjective)*

Of or relating to anestrus.

- *A "anestric" approach may work better in this case.*
- *Would you call this situation "anestric"? Explain why.*

---

anestrous *(adjective)*

(of lower mammals) not in a state of estrus; not in heat.

- *An anestrous bitch.*
- *It is useful to describe something as "anestrous" when it is (of lower mammals) not in a state of estrus; not in....*

---

anestrum *(noun)*

Applies to nonhuman mammals: a state or interval of sexual inactivity between two periods of estrus.

- *The article explained what "anestrum" means with a simple example.*
- *In class, the teacher used "anestrum" to mean applies to nonhuman mammals: a state or interval of....*

---

anestrus *(noun)*

Applies to nonhuman mammals: a state or interval of sexual inactivity between two periods of estrus.

- *The article explained what "anestrus" means with a simple example.*
- *They discussed "anestrus" during the group presentation.*

---

anethum graveolens *(noun)*

Aromatic Old World herb having aromatic threadlike foliage and seeds used as seasoning.

- *He looked up "anethum graveolens" because he had never seen it before.*
- *Understanding "anethum graveolens" helps you talk about this topic clearly.*

---

aneurismal *(adjective)*

Relating to or affected by an aneurysm.

- *A "aneurismal" approach may work better in this case.*
- *It is useful to describe something as "aneurismal" when it is relating to or affected by an aneurysm.*

---

aneurismatic *(adjective)*

Relating to or affected by an aneurysm.

- *Her writing became clearer after she learned "aneurismatic."*
- *Students compared "aneurismatic" with similar adjectives in the lesson.*

---

aneurysmatic *(adjective)*

Relating to or affected by an aneurysm.

- *A "aneurysmatic" approach may work better in this case.*
- *Students compared "aneurysmatic" with similar adjectives in the lesson.*

---

anfractuous *(adjective)*

Full of twists and turns.

- *Anfractuous cliffs.*
- *Her writing became clearer after she learned "anfractuous."*

angelica archangelica *(noun)*

A biennial cultivated herb; its stems are candied and eaten and its roots are used medicinally.

- *He looked up "angelica archangelica" because he had never seen it before.*
- *They discussed "angelica archangelica" during the group presentation.*

angelim *(noun)*

Any of several tropical American trees of the genus Andira.

- *She wrote a short paragraph that included "angelim."*
- *He looked up "angelim" because he had never seen it before.*

angiitis *(noun)*

Inflammation of a blood vessel or lymph duct.

- *He looked up "angiitis" because he had never seen it before.*
- *They discussed "angiitis" during the group presentation.*

anginose *(adjective)*

Of or related to the pain of angina pectoris.

- *It is useful to describe something as "anginose" when it is of or related to the pain of angina pectoris.*
- *Students compared "anginose" with similar adjectives in the lesson.*

anginous *(adjective)*

Of or related to the pain of angina pectoris.

- *Students compared "anginous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "anginous."*

angiocardiogram *(noun)*

A series of X rays representing the action of the heart and its blood vessels after the injection of a radiopaque substance.

- *The article explained what "angiocardiogram" means with a simple example.*
- *They discussed "angiocardiogram" during the group presentation.*

angiocarp *(noun)*

Tree bearing fruit enclosed in a shell or involucre or husk.

- *In class, the teacher used "angiocarp" to mean tree bearing fruit enclosed in a shell or involucre....*
- *They discussed "angiocarp" during the group presentation.*

angiocarpic *(adjective)*

Having or being fruit enclosed in a shell or husk.

- *It is useful to describe something as "angiocarpic" when it is having or being fruit enclosed in a shell or husk.*
- *Students compared "angiocarpic" with similar adjectives in the lesson.*

angiocarpous *(adjective)*

Having or being fruit enclosed in a shell or husk.

- *Her writing became clearer after she learned "angiocarpous."*
- *Would you call this situation "angiocarpous"? Explain why.*

angiohemophilia *(noun)*

A form of hemophilia discovered by Erik von Willebrand; a genetic disorder that is inherited as an autosomal recessive trait; characterized by a deficiency of the coagulation factor and by mucosal bleeding.

- *He looked up "angiohemophilia" because he had never seen it before.*
- *In class, the teacher used "angiohemophilia" to mean a form of hemophilia discovered by erik von....*

angiologist *(noun)*

A physician who specializes in angiology.

- *Understanding "angiologist" helps you talk about this topic clearly.*
- *He looked up "angiologist" because he had never seen it before.*

angiomatous *(adjective)*

Of or related to or having a tumor of the kind known as an angioma.

- *The speaker chose "angiomatous" because it captured the feeling precisely.*
- *It is useful to describe something as "angiomatous" when it is of or related to or having a tumor of the kind....*

---

angiopteris *(noun)*

Highly variable species of very large primitive ferns of the Pacific tropical areas with high rainfall.

- *She wrote a short paragraph that included "angiopteris."*
- *They discussed "angiopteris" during the group presentation.*

---

angiopteris evecta *(noun)*

Highly variable species of very large primitive ferns of the Pacific tropical areas with high rainfall.

- *They discussed "angiopteris evecta" during the group presentation.*
- *In class, the teacher used "angiopteris evecta" to mean highly variable species of very large primitive....*

---

angioscope *(noun)*

A modified microscope used to study capillary vessels.

- *Understanding "angioscope" helps you talk about this topic clearly.*
- *He looked up "angioscope" because he had never seen it before.*

---

angiospermae *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *The article explained what "angiospermae" means with a simple example.*
- *They discussed "angiospermae" during the group presentation.*

---

angiospermous *(adjective)*

Of or related to or characteristic of plants that are angiosperms.

- *Students compared "angiospermous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "angiospermous."*

---

angiospermous tree *(noun)*

Any tree having seeds and ovules contained in the ovary.

- *In class, the teacher used "angiospermous tree" to mean any tree having seeds and ovules contained in the ovary.*
- *The article explained what "angiospermous tree" means with a simple example.*

---

angiospermous yellowwood *(noun)*

Any of various angiospermous trees having yellow wood.

- *They discussed "angiospermous yellowwood" during the group presentation.*
- *He looked up "angiospermous yellowwood" because he had never seen it before.*

---

angiotelectasia *(noun)*

Dilation and enlargement of arterioles.

- *The article explained what "angiotelectasia" means with a simple example.*
- *In class, the teacher used "angiotelectasia" to mean dilation and enlargement of arterioles.*

---

angiotonin *(noun)*

Any of several vasoconstrictor substances (trade name Hypertensin) that cause narrowing of blood vessels.

- *He looked up "angiotonin" because he had never seen it before.*
- *She wrote a short paragraph that included "angiotonin."*

---

angledozer *(noun)*

A bulldozer with an angled moldboard to push earth to one side.

- *They discussed "angledozer" during the group presentation.*
- *Understanding "angledozer" helps you talk about this topic clearly.*

---

anglewing *(noun)*

Nymphalid butterfly having angular notches on the outer edges of the forewings.

- *Understanding "anglewing" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "anglewing."*

---

angleworm *(noun)*

Terrestrial worm that burrows into and helps aerate soil; often surfaces when the ground is cool or wet; used as bait by anglers.

- *In class, the teacher used "angleworm" to mean terrestrial worm that burrows into and helps aerate....*
- *He looked up "angleworm" because he had never seen it before.*

---

anglophil *(noun)*

An admirer of England and things English.

- *He looked up "anglophil" because he had never seen it before.*
- *She wrote a short paragraph that included "anglophil."*

---

anglophilic *(adjective)*

Characterized by Anglophilia.

- *Students compared "anglophilic" with similar adjectives in the lesson.*
- *It is useful to describe something as "anglophilic" when it is characterized by anglophilia.*

---

- *She wrote a short paragraph that included "antecedence."*
- *He looked up "antecedence" because he had never seen it before.*

antecedency *(noun)*

Preceding in time.

- *The article explained what "antecedency" means with a simple example.*
- *They discussed "antecedency" during the group presentation.*

antediluvial *(adjective)*

Of or relating to the period before the biblical flood.

- *Students compared "antediluvial" with similar adjectives in the lesson.*
- *It is useful to describe something as "antediluvial" when it is of or relating to the period before the biblical flood.*

antedon *(noun)*

A genus of echinoderms of the family Antedonidae.

- *She wrote a short paragraph that included "antedon."*
- *He looked up "antedon" because he had never seen it before.*

antedonidae *(noun)*

Feather stars.

- *Understanding "antedonidae" helps you talk about this topic clearly.*
- *The article explained what "antedonidae" means with a simple example.*

antefix *(noun)*

Carved ornament at the eaves of a tile roof concealing the joints between tiles.

- *She wrote a short paragraph that included "antefix."*
- *Understanding "antefix" helps you talk about this topic clearly.*

antemeridian *(adjective)*

Before noon.

- *A "antemeridian" approach may work better in this case.*
- *The speaker chose "antemeridian" because it captured the feeling precisely.*

antennaria *(noun)*

Small woolly perennial herbs having small whitish discoid flowers surrounded by a ring of club-shaped bristles.

- *She wrote a short paragraph that included "antennaria."*
- *The article explained what "antennaria" means with a simple example.*

antennaria dioica *(noun)*

Low-growing perennial herb having leaves with whitish down and clusters of small white flowers.

- *Understanding "antennaria dioica" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "antennaria dioica."*

---

antennaria plantaginifolia *(noun)*

North American perennial propagated by means of runners.

- *They discussed "antennaria plantaginifolia" during the group presentation.*
- *The article explained what "antennaria plantaginifolia" means with a simple example.*

---

antennariidae *(noun)*

Frogfishes; tropical spiny-finned marine fishes having large nearly vertical mouths; related to toadfishes and anglers.

- *She wrote a short paragraph that included "antennariidae."*
- *He looked up "antennariidae" because he had never seen it before.*

---

antennary *(adjective)*

Of or relating to antennae.

- *Students compared "antennary" with similar adjectives in the lesson.*
- *A "antennary" approach may work better in this case.*

---

antenuptial *(adjective)*

Relating to events before a marriage.

- *Her writing became clearer after she learned "antenuptial."*
- *A "antenuptial" approach may work better in this case.*

---

antepenult *(noun)*

The 3rd syllable of a word counting back from the end.

- *Understanding "antepenult" helps you talk about this topic clearly.*
- *The article explained what "antepenult" means with a simple example.*

---

antepenultima *(noun)*

The 3rd syllable of a word counting back from the end.

- *She wrote a short paragraph that included "antepenultima."*
- *They discussed "antepenultima" during the group presentation.*

---

anterior synechia *(noun)*

Adhesion between the iris and the cornea.

- *In class, the teacher used "anterior synechia" to mean adhesion between the iris and the cornea.*
- *He looked up "anterior synechia" because he had never seen it before.*

---

anteriority *(noun)*

The quality of being in front or (in lower animals) toward the head.

- *He looked up "anteriority" because he had never seen it before.*
- *She wrote a short paragraph that included "anteriority."*

---

anthelminthic *(noun)*

A medication capable of causing the evacuation of parasitic intestinal worms.

- *He looked up "anthelminthic" because he had never seen it before.*
- *Understanding "anthelminthic" helps you talk about this topic clearly.*

---

anthemis cotula *(noun)*

Widespread rank-smelling weed having white-rayed flower heads with yellow discs.

- *She wrote a short paragraph that included "anthemis cotula."*
- *The article explained what "anthemis cotula" means with a simple example.*

---

antheraea *(noun)*

Large moths whose larvae produce silk of high quality.

- *She wrote a short paragraph that included "antheraea."*

- *The article explained what “antheraea” means with a simple example.*

---

antheraea mylitta *(noun)*

Oriental moth that produces brownish silk.

- *She wrote a short paragraph that included “antheraea mylitta.”*
- *Understanding “antheraea mylitta” helps you talk about this topic clearly.*

---

antheraea pernyi *(noun)*

A Chinese moth that produces a brownish silk.

- *In class, the teacher used “antheraea pernyi” to mean a chinese moth that produces a brownish silk.*
- *He looked up “antheraea pernyi” because he had never seen it before.*

---

antheraea polyphemus *(noun)*

Very large yellowish-brown American silkworm moth with large eyespots on hind wings; larvae feed on fruit and shade trees.

- *The article explained what “antheraea polyphemus” means with a simple example.*
- *In class, the teacher used “antheraea polyphemus” to mean very large yellowish-brown american silkworm moth....*

---

antheral *(adjective)*

Capable of fertilizing female organs.

- *Her writing became clearer after she learned “antheral.”*
- *The speaker chose “antheral” because it captured the feeling precisely.*

---

anthericum *(noun)*

Genus of Old World (mainly African) perennial herbs; sometimes placed in family Asphodelaceae.

- *He looked up “anthericum” because he had never seen it before.*
- *In class, the teacher used “anthericum” to mean genus of old world (mainly african) perennial....*

---

anthericum liliago *(noun)*

Southern European plant commonly cultivated for its spikes of small starry greenish-white flowers.

- *They discussed “anthericum liliago” during the group presentation.*
- *He looked up “anthericum liliago” because he had never seen it before.*

---

anthericum torreyi *(noun)*

Plant having basal grasslike leaves and a narrow open cluster of starlike yellowish-orange flowers atop a leafless stalk; southwestern United States; only species of Anthericum growing in North America.

- *Understanding “anthericum torreyi” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “anthericum torreyi.”*

---

antheridial *(adjective)*

Relating to or characterized by an antheridium.

- *A “antheridial” approach may work better in this case.*
- *Would you call this situation “antheridial”? Explain why.*

---

antheridiophore *(noun)*

Gametophore bearing antheridia as in certain mosses and liverworts.

- *The article explained what “antheridiophore” means with a simple example.*
- *They discussed “antheridiophore” during the group presentation.*

---

antheridium *(noun)*

The male sex organ of spore-producing plants; produces antherozoids; equivalent to the anther in flowers.

- *Understanding “antheridium” helps you talk about this topic clearly.*
- *The article explained what “antheridium” means with a simple example.*

---

antheropeas *(noun)*

Small genus of North American herbs often included in genus Eriophyllum.

- *Understanding “antheropeas” helps you talk about this topic clearly.*
- *The article explained what “antheropeas” means with a simple example.*

antheropeas wallacei *(noun)*

Tiny grey woolly tufted annual with small golden-yellow flower heads; southeastern California to northwestern Arizona and southwestern Utah; sometimes placed in genus Eriophyllum.

- *He looked up “antheropeas wallacei” because he had never seen it before.*
- *Understanding “antheropeas wallacei” helps you talk about this topic clearly.*

antherozoid *(noun)*

A motile male gamete of a plant such as an alga or fern or gymnosperm.

- *The article explained what “antherozoid” means with a simple example.*
- *In class, the teacher used “antherozoid” to mean a motile male gamete of a plant such as an alga or....*

anthidium *(noun)*

Potter bees.

- *The article explained what “anthidium” means with a simple example.*
- *Understanding “anthidium” helps you talk about this topic clearly.*

anthoceropsida *(noun)*

Hornworts: in some classification systems included in the class Hepaticopsida.

- *He looked up “anthoceropsida” because he had never seen it before.*
- *In class, the teacher used “anthoceropsida” to mean hornworts: in some classification systems included....*

anthocerotales *(noun)*

Hornworts; liverworts having a thalloid gametophyte; in some classification systems included in the class Hepaticopsida.

- *In class, the teacher used “anthocerotales” to mean hornworts; liverworts having a thalloid....*
- *Understanding “anthocerotales” helps you talk about this topic clearly.*

anthologise *(verb)*

Compile an anthology.

- *He did not know how to use “anthologise” until he saw an example.*
- *The coach explained when to use “anthologise” and when to wait.*

anthologize *(verb)*

Compile an anthology.

- *Learners should practice how to use “anthologize” in real sentences.*
- *He did not know how to use “anthologize” until he saw an example.*

anthophagous *(adjective)*

Feeding on flowers.

- *Some insects are anthophagous.*
- *Her writing became clearer after she learned “anthophagous.”*

anthophilous *(adjective)*

Feeding on flowers.

- *Would you call this situation “anthophilous”? Explain why.*
- *It is useful to describe something as “anthophilous” when it is feeding on flowers.*

anthophyllite *(noun)*

A dark brown mineral of the amphibole group; magnesium iron silicate.

- *The article explained what “anthophyllite” means with a simple example.*
- *Understanding “anthophyllite” helps you talk about this topic clearly.*

anthophyta *(noun)*

Comprising flowering plants that produce seeds enclosed in an ovary; in some systems considered a class (Angiospermae) and in others a division (Magnoliophyta or Anthophyta).

- *Understanding “anthophyta” helps you talk about this topic clearly.*
- *The article explained what “anthophyta” means with a simple example.*

anthozoan *(noun)*

Sessile marine coelenterates including solitary and colonial polyps; the medusoid phase is entirely suppressed.

- *In class, the teacher used "anthozoan" to mean sessile marine coelenterates including solitary and....*
- *They discussed "anthozoan" during the group presentation.*

---

anthracitic *(adjective)*

Relating to or resembling anthracite coal.

- *Students compared "anthracitic" with similar adjectives in the lesson.*
- *It is useful to describe something as "anthracitic" when it is relating to or resembling anthracite coal.*

---

anthracosis *(noun)*

Lung disease caused by inhaling coal dust.

- *She wrote a short paragraph that included "anthracosis."*
- *He looked up "anthracosis" because he had never seen it before.*

---

anthrenus scrophulariae *(noun)*

A small black and red and white carpet beetle.

- *He looked up "anthrenus scrophulariae" because he had never seen it before.*
- *She wrote a short paragraph that included "anthrenus scrophulariae."*

---

anthriscus *(noun)*

Chervil: of Europe, North Africa and Asia.

- *In class, the teacher used "anthriscus" to mean chervil: of europe, north africa and asia.*
- *He looked up "anthriscus" because he had never seen it before.*

---

anthriscus cereifolium *(noun)*

Aromatic annual Old World herb cultivated for its finely divided and often curly leaves for use especially in soups and salads.

- *He looked up "anthriscus cereifolium" because he had never seen it before.*
- *They discussed "anthriscus cereifolium" during the group presentation.*

---

anthriscus sylvestris *(noun)*

Coarse erect biennial Old World herb introduced as a weed in eastern North America.

- *Understanding "anthriscus sylvestris" helps you talk about this topic clearly.*
- *They discussed "anthriscus sylvestris" during the group presentation.*

---

anthropical *(adjective)*

Relating to mankind or the period of mankind's existence.

- *The speaker chose "anthropical" because it captured the feeling precisely.*
- *Would you call this situation "anthropical"? Explain why.*

---

anthropocentricity *(noun)*

An inclination to evaluate reality exclusively in terms of human values.

- *They discussed "anthropocentricity" during the group presentation.*
- *He looked up "anthropocentricity" because he had never seen it before.*

---

anthropogenesis *(noun)*

The evolution or genesis of the human race.

- *They discussed "anthropogenesis" during the group presentation.*
- *The article explained what "anthropogenesis" means with a simple example.*

---

anthropogenetic *(adjective)*

Of or relating to the study of the origins and development of human beings.

- *Would you call this situation "anthropogenetic"? Explain why.*
- *It is useful to describe something as "anthropogenetic" when it is of or relating to the study of the origins and....*

---

anthropogeny *(noun)*

The evolution or genesis of the human race.

- *Understanding "anthropogeny" helps you talk about this topic clearly.*

- *In class, the teacher used “anthropogeny” to mean the evolution or genesis of the human race.*

---

anthropoidal *(adjective)*

Resembling apes.

- *Her writing became clearer after she learned “anthropoidal.”*
- *Students compared “anthropoidal” with similar adjectives in the lesson.*

---

anthropoidea *(noun)*

Monkeys; apes; hominids.

- *In class, the teacher used “anthropoidea” to mean monkeys; apes; hominids.*
- *They discussed “anthropoidea” during the group presentation.*

---

anthropolatry *(noun)*

The worship of human beings.

- *The article explained what “anthropolatry” means with a simple example.*
- *In class, the teacher used “anthropolatry” to mean the worship of human beings.*

---

anthropometrical *(adjective)*

Of or relating to anthropometry.

- *Would you call this situation “anthropometrical”? Explain why.*
- *Students compared “anthropometrical” with similar adjectives in the lesson.*

---

anthropomorphous *(adjective)*

Suggesting human characteristics for animals or inanimate things.

- *Students compared “anthropomorphous” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “anthropomorphous.”*

---

anthropophagite *(noun)*

A person who eats human flesh.

- *They discussed “anthropophagite” during the group presentation.*
- *In class, the teacher used “anthropophagite” to mean a person who eats human flesh.*

---

anthropophagous *(adjective)*

Of or relating to eaters of human flesh.

- *Would you call this situation “anthropophagous”? Explain why.*
- *Students compared “anthropophagous” with similar adjectives in the lesson.*

---

anthropophagus *(noun)*

A person who eats human flesh.

- *They discussed “anthropophagus” during the group presentation.*
- *In class, the teacher used “anthropophagus” to mean a person who eats human flesh.*

---

anthropophagy *(noun)*

Human cannibalism; the eating of human flesh.

- *Understanding “anthropophagy” helps you talk about this topic clearly.*
- *They discussed “anthropophagy” during the group presentation.*

---

anthurium andraeanum *(noun)*

Commonly cultivated anthurium having bright scarlet spathe and spadix.

- *The article explained what “anthurium andraeanum” means with a simple example.*
- *Understanding “anthurium andraeanum” helps you talk about this topic clearly.*

---

anthurium scherzerianum *(noun)*

Commonly cultivated anthurium having bright scarlet spathe and spadix.

- *They discussed “anthurium scherzerianum” during the group presentation.*
- *She wrote a short paragraph that included “anthurium scherzerianum.”*

---

anthyllis *(noun)*

Genus of Mediterranean herbs and shrubs.

- *In class, the teacher used "anthyllis" to mean genus of mediterranean herbs and shrubs.*
- *The article explained what "anthyllis" means with a simple example.*

---

anthyllis barba-jovis *(noun)*

Silvery hairy European shrub with evergreen foliage and pale yellow flowers.

- *Understanding "anthyllis barba-jovis" helps you talk about this topic clearly.*
- *In class, the teacher used "anthyllis barba-jovis" to mean silvery hairy european shrub with evergreen foliage....*

---

anthyllis vulneraria *(noun)*

Perennial Eurasian herb having heads of red or yellow flowers and common in meadows and pastures; formerly used medicinally for kidney disorders.

- *The article explained what "anthyllis vulneraria" means with a simple example.*
- *She wrote a short paragraph that included "anthyllis vulneraria."*

---

antiacid *(noun)*

An agent that counteracts or neutralizes acidity (especially in the stomach).

- *She wrote a short paragraph that included "antiacid."*
- *They discussed "antiacid" during the group presentation.*

---

antiadrenergic *(adjective)*

Relating to blocking or reducing adrenergic effects in the body.

- *Would you call this situation "antiadrenergic"? Explain why.*
- *A "antiadrenergic" approach may work better in this case.*

---

antiapartheid *(adjective)*

Opposing the policy of apartheid in South Africa.

- *An antiapartheid leader.*
- *It is useful to describe something as "antiapartheid" when it is opposing the policy of apartheid in south africa.*

---

antiauthoritarian *(adjective)*

Opposed to authoritarianism.

- *Her writing became clearer after she learned "antiauthoritarian."*
- *Would you call this situation "antiauthoritarian"? Explain why.*

---

antibaryon *(noun)*

The antiparticle of a baryon; a hadron with a baryon number of -1.

- *They discussed "antibaryon" during the group presentation.*
- *She wrote a short paragraph that included "antibaryon."*

---

antiberiberi factor *(noun)*

A B vitamin that prevents beriberi; maintains appetite and growth.

- *The article explained what "antiberiberi factor" means with a simple example.*
- *They discussed "antiberiberi factor" during the group presentation.*

---

antibiosis *(noun)*

An association between organisms that is harmful to one of them or between organisms and a metabolic product of another.

- *The article explained what "antibiosis" means with a simple example.*
- *She wrote a short paragraph that included "antibiosis."*

---

anticatalyst *(noun)*

(chemistry) a substance that retards a chemical reaction or diminishes the activity of a catalyst.

- *She wrote a short paragraph that included "anticatalyst."*
- *The article explained what "anticatalyst" means with a simple example.*

---

anticholinesterase *(noun)*

A medicine that inhibits cholinesterase by combining with it and so has a cholinergic effect.

- *They discussed "anticholinesterase" during the group presentation.*
- *The article explained what "anticholinesterase" means with a simple example.*

---

anticipant *(adjective)*

Marked by eager anticipation.

- *A "anticipant" approach may work better in this case.*
- *Would you call this situation "anticipant"? Explain why.*

---

anticipator *(noun)*

One who anticipates.

- *In class, the teacher used "anticipator" to mean one who anticipates.*
- *He looked up "anticipator" because he had never seen it before.*

---

anticlimactical *(adjective)*

Of or relating to a sudden change from an impressive to a ludicrous style.

- *Students compared "anticlimactical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "anticlimactical."*

---

anticoagulative *(adjective)*

Of or relating to an anticoagulant.

- *Students compared "anticoagulative" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "anticoagulative."*

---

antido *(noun)*

An artificial language related to Ido.

- *The article explained what "antido" means with a simple example.*
- *In class, the teacher used "antido" to mean an artificial language related to ido.*

---

antidorcas euchore *(noun)*

A South African gazelle noted for springing lightly into the air.

- *She wrote a short paragraph that included "antidorcas euchore."*
- *He looked up "antidorcas euchore" because he had never seen it before.*

---

antidorcas marsupialis *(noun)*

A South African gazelle noted for springing lightly into the air.

- *He looked up "antidorcas marsupialis" because he had never seen it before.*
- *She wrote a short paragraph that included "antidorcas marsupialis."*

---

antidromic *(adjective)*

Conducting nerve impulses in a direction opposite to normal.

- *Students compared "antidromic" with similar adjectives in the lesson.*
- *A "antidromic" approach may work better in this case.*

---

antielectron *(noun)*

An elementary particle with positive charge; interaction of a positron and an electron results in annihilation.

- *He looked up "antielectron" because he had never seen it before.*
- *She wrote a short paragraph that included "antielectron."*

---

antiestablishmentarianism *(noun)*

The doctrine of opposition to the social and political establishment.

- *They discussed "antiestablishmentarianism" during the group presentation.*
- *The article explained what "antiestablishmentarianism" means with a simple example.*

---

antiestablishmentism *(noun)*

The doctrine of opposition to the social and political establishment.

- *He looked up "antiestablishmentism" because he had never seen it before.*
- *In class, the teacher used "antiestablishmentism" to mean the doctrine of opposition to the social and....*

antiferromagnetism *(noun)*

Magnetic field creates parallel but opposing spins; varies with temperature.

- *The article explained what "antiferromagnetism" means with a simple example.*
- *They discussed "antiferromagnetism" during the group presentation.*

antifertility *(adjective)*

Capable of preventing conception or impregnation.

- *It is useful to describe something as "antifertility" when it is capable of preventing conception or impregnation.*
- *The speaker chose "antifertility" because it captured the feeling precisely.*

antiflatulent *(noun)*

Any agent that reduces intestinal gas.

- *They discussed "antiflatulent" during the group presentation.*
- *In class, the teacher used "antiflatulent" to mean any agent that reduces intestinal gas.*

antigonia *(noun)*

A genus of fish in the family Caproidae.

- *In class, the teacher used "antigonia" to mean a genus of fish in the family caproidae.*
- *The article explained what "antigonia" means with a simple example.*

antigram *(noun)*

An anagram that means the opposite of the original word or phrase.

- *'restful' is the antigram of 'fluster'.*
- *They discussed "antigram" during the group presentation.*

antihaemophilic factor *(noun)*

A coagulation factor (trade name Hemofil) whose absence is associated with hemophilia A.

- *He looked up "antihaemophilic factor" because he had never seen it before.*
- *Understanding "antihaemophilic factor" helps you talk about this topic clearly.*

antihaemophilic globulin *(noun)*

A coagulation factor (trade name Hemofil) whose absence is associated with hemophilia A.

- *The article explained what "antihaemophilic globulin" means with a simple example.*
- *They discussed "antihaemophilic globulin" during the group presentation.*

antihemophilic factor *(noun)*

A coagulation factor (trade name Hemofil) whose absence is associated with hemophilia A.

- *The article explained what "antihemophilic factor" means with a simple example.*
- *She wrote a short paragraph that included "antihemophilic factor."*

antihemophilic globulin *(noun)*

A coagulation factor (trade name Hemofil) whose absence is associated with hemophilia A.

- *Understanding "antihemophilic globulin" helps you talk about this topic clearly.*
- *The article explained what "antihemophilic globulin" means with a simple example.*

antihemorrhagic factor *(noun)*

A fat-soluble vitamin that helps in the clotting of blood.

- *He looked up "antihemorrhagic factor" because he had never seen it before.*
- *She wrote a short paragraph that included "antihemorrhagic factor."*

antiheretical *(adjective)*

Opposed to heresy.

- *A "antiheretical" approach may work better in this case.*
- *It is useful to describe something as "antiheretical" when it is opposed to heresy.*

antiknocking *(adjective)*

Suppressing or eliminating engine knock in combustion engines.

- *Would you call this situation "antiknocking"? Explain why.*
- *It is useful to describe something as "antiknocking" when it is suppressing or eliminating engine knock in....*

---

antilepton *(noun)*

The antiparticle of a lepton.

- *In class, the teacher used "antilepton" to mean the antiparticle of a lepton.*
- *The article explained what "antilepton" means with a simple example.*

---

antilocapra *(noun)*

Type and sole genus of the Antilocapridae comprising one species.

- *Understanding "antilocapra" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "antilocapra."*

---

antilocapra americana *(noun)*

Fleet antelope-like ruminant of western North American plains with small branched horns.

- *The article explained what "antilocapra americana" means with a simple example.*
- *She wrote a short paragraph that included "antilocapra americana."*

---

antilocapridae *(noun)*

Comprising only the pronghorns.

- *Understanding "antilocapridae" helps you talk about this topic clearly.*
- *They discussed "antilocapridae" during the group presentation.*

---

antilog *(noun)*

The number of which a given number is the logarithm.

- *In class, the teacher used "antilog" to mean the number of which a given number is the logarithm.*
- *Understanding "antilog" helps you talk about this topic clearly.*

---

antilogarithm *(noun)*

The number of which a given number is the logarithm.

- *The article explained what "antilogarithm" means with a simple example.*
- *They discussed "antilogarithm" during the group presentation.*

---

antilope cervicapra *(noun)*

Common Indian antelope with a dark back and spiral horns.

- *He looked up "antilope cervicapra" because he had never seen it before.*
- *She wrote a short paragraph that included "antilope cervicapra."*

---

antimacassar *(noun)*

A piece of ornamented cloth that protects the back of a chair from hair oils.

- *They discussed "antimacassar" during the group presentation.*
- *He looked up "antimacassar" because he had never seen it before.*

---

antimagnetic *(adjective)*

Impervious to the effects of a magnetic field; resistant to magnetization.

- *An antimagnetic watch.*
- *Would you call this situation "antimagnetic"? Explain why.*

---

antimeson *(noun)*

The antiparticle of a meson.

- *Understanding "antimeson" helps you talk about this topic clearly.*
- *He looked up "antimeson" because he had never seen it before.*

---

antimicrobic *(noun)*

An agent (as heat or radiation or a chemical) that destroys microorganisms that might carry disease.

- *Understanding "antimicrobic" helps you talk about this topic clearly.*

- *The article explained what "antimicrobic" means with a simple example.*

---

antimonial *(adjective)*

Containing antimony.

- *Antimonial lead.*
- *It is useful to describe something as "antimonial" when it is containing antimony.*

---

antimonial lead *(noun)*

A lead alloy that contains about 5% antimony.

- *In class, the teacher used "antimonial lead" to mean a lead alloy that contains about 5% antimony.*
- *The article explained what "antimonial lead" means with a simple example.*

---

antimonic *(adjective)*

Relating to or derived from antimony.

- *Would you call this situation "antimonic"? Explain why.*
- *A "antimonic" approach may work better in this case.*

---

antimonious *(adjective)*

Relating to or derived from antimony.

- *Antimonious oxide.*
- *It is useful to describe something as "antimonious" when it is relating to or derived from antimony.*

---

antimuon *(noun)*

The antiparticle of a muon; decays to positron and neutrino and antineutrino.

- *They discussed "antimuon" during the group presentation.*
- *The article explained what "antimuon" means with a simple example.*

---

antimycotic *(noun)*

Any agent that destroys or prevents the growth of fungi.

- *In class, the teacher used "antimycotic" to mean any agent that destroys or prevents the growth of fungi.*
- *They discussed "antimycotic" during the group presentation.*

---

antimycotic agent *(noun)*

Any agent that destroys or prevents the growth of fungi.

- *She wrote a short paragraph that included "antimycotic agent."*
- *The article explained what "antimycotic agent" means with a simple example.*

---

antineutron *(noun)*

The antiparticle of a neutron.

- *She wrote a short paragraph that included "antineutron."*
- *The article explained what "antineutron" means with a simple example.*

---

antinode *(noun)*

(physics) the point of maximum displacement in a periodic system.

- *He looked up "antinode" because he had never seen it before.*
- *She wrote a short paragraph that included "antinode."*

---

antinomasia *(noun)*

Substitution of a title for a name.

- *Understanding "antinomasia" helps you talk about this topic clearly.*
- *They discussed "antinomasia" during the group presentation.*

---

antiophthalmic factor *(noun)*

Any of several fat-soluble vitamins essential for normal vision; prevents night blindness or inflammation or dryness of the eyes.

- *He looked up "antiophthalmic factor" because he had never seen it before.*
- *Understanding "antiophthalmic factor" helps you talk about this topic clearly.*

---

antipathetical *(adjective)*

Characterized by antagonism or antipathy.

- *Her writing became clearer after she learned "antipathetical."*
- *Students compared "antipathetical" with similar adjectives in the lesson.*

---

antipernicious anemia factor *(noun)*

A B vitamin that is used to treat pernicious anemia.

- *She wrote a short paragraph that included "antipernicious anemia factor."*
- *They discussed "antipernicious anemia factor" during the group presentation.*

---

antiphlogistic *(adjective)*

Counteracting inflammation.

- *It is useful to describe something as "antiphlogistic" when it is counteracting inflammation.*
- *The speaker chose "antiphlogistic" because it captured the feeling precisely.*

---

antiphrasis *(noun)*

The use of a word in a sense opposite to its normal sense (especially in irony).

- *Understanding "antiphrasis" helps you talk about this topic clearly.*
- *In class, the teacher used "antiphrasis" to mean the use of a word in a sense opposite to its normal....*

---

antipollution *(adjective)*

Intended to reduce pollution.

- *Antipollution laws.*
- *Antipollution devices on automobile exhaust systems.*

---

antipruritic *(noun)*

A substance that relieves or prevents itching.

- *Understanding "antipruritic" helps you talk about this topic clearly.*
- *In class, the teacher used "antipruritic" to mean a substance that relieves or prevents itching.*

---

antipyresis *(noun)*

Medication with antipyretics to treat a fever.

- *They discussed "antipyresis" during the group presentation.*
- *He looked up "antipyresis" because he had never seen it before.*

---

antiquate *(verb)*

Give an antique appearance to.

- *Learners should practice how to use "antiquate" in real sentences.*
- *The coach explained when to use "antiquate" and when to wait.*

Coloring serving as natural camouflage.

- *She wrote a short paragraph that included “apatetic coloration.”*
- *The article explained what “apatetic coloration” means with a simple example.*

---

apatosaur *(noun)*

Huge quadrupedal herbivorous dinosaur common in North America in the late Jurassic.

- *He looked up “apatosaur” because he had never seen it before.*
- *They discussed “apatosaur” during the group presentation.*

---

apatosaurus excelsus *(noun)*

Huge quadrupedal herbivorous dinosaur common in North America in the late Jurassic.

- *He looked up “apatosaurus excelsus” because he had never seen it before.*
- *They discussed “apatosaurus excelsus” during the group presentation.*

---

apatura *(noun)*

Large Old World butterflies.

- *In class, the teacher used “apatura” to mean large old world butterflies.*
- *Understanding “apatura” helps you talk about this topic clearly.*

---

apatura iris *(noun)*

Large European butterfly the male of which has wings shaded with purple.

- *The article explained what “apatura iris” means with a simple example.*
- *In class, the teacher used “apatura iris” to mean large european butterfly the male of which has....*

---

apercu *(noun)*

A short synopsis.

- *He looked up “apercu” because he had never seen it before.*
- *She wrote a short paragraph that included “apercu.”*

---

aperea *(noun)*

South American cavy; possibly ancestral to the domestic guinea pig.

- *He looked up “aperea” because he had never seen it before.*
- *In class, the teacher used “aperea” to mean south american cavy; possibly ancestral to the....*

---

aperient *(noun)*

A purging medicine; stimulates evacuation of the bowels.

- *He looked up “aperient” because he had never seen it before.*
- *They discussed “aperient” during the group presentation.*

---

apery *(noun)*

The act of mimicking; imitative behavior.

- *They discussed "apery" during the group presentation.*
- *The article explained what "apery" means with a simple example.*

---

apetalous *(adjective)*

(of flowers) having no petals.

- *Would you call this situation "apetalous"? Explain why.*
- *Students compared "apetalous" with similar adjectives in the lesson.*

---

apetalous flower *(noun)*

Flower having no petals.

- *They discussed "apetalous flower" during the group presentation.*
- *He looked up "apetalous flower" because he had never seen it before.*

---

aphaeresis *(noun)*

(linguistics) omission at the beginning of a word as in 'coon' for 'raccoon' or 'till' for 'until'.

- *They discussed "aphaeresis" during the group presentation.*
- *He looked up "aphaeresis" because he had never seen it before.*

---

aphaeretic *(adjective)*

Relating to or formed by or consisting of aphaeresis.

- *Would you call this situation "aphaeretic"? Explain why.*
- *Her writing became clearer after she learned "aphaeretic."*

---

aphagia *(noun)*

Loss of the ability to swallow.

- *She wrote a short paragraph that included "aphagia."*
- *He looked up "aphagia" because he had never seen it before.*

---

aphakia *(noun)*

Absence of the natural lens of the eye (usually resulting from the removal of cataracts).

- *They discussed "aphakia" during the group presentation.*
- *She wrote a short paragraph that included "aphakia."*

---

aphakic *(adjective)*

Of or relating to or afflicted with aphakia.

- *Her writing became clearer after she learned "aphakic."*
- *Would you call this situation "aphakic"? Explain why.*

---

aphanite *(noun)*

Fine-grained homogeneous rock (such as basalt) containing minerals undetectable by the naked eye.

- *Understanding "aphanite" helps you talk about this topic clearly.*
- *They discussed "aphanite" during the group presentation.*

---

aphanitic *(adjective)*

Of or relating to aphanite.

- *The speaker chose "aphanitic" because it captured the feeling precisely.*
- *A "aphanitic" approach may work better in this case.*

---

aphasmidia *(noun)*

One of two subgroups of Nematoda used in some classification systems.

- *The article explained what "aphasmidia" means with a simple example.*
- *In class, the teacher used "aphasmidia" to mean one of two subgroups of nematoda used in some....*

---

apheretic *(adjective)*

Relating to or formed by or consisting of aphaeresis.

- *Her writing became clearer after she learned "apheretic."*
- *A "apheretic" approach may work better in this case.*

---

aphesis *(noun)*

The gradual disappearance of an initial (usually unstressed) vowel or syllable as in 'squire' for 'esquire'.

- *They discussed "aphesis" during the group presentation.*
- *She wrote a short paragraph that included "aphesis."*

---

aphetic *(adjective)*

Produced by aphesis.

- *Would you call this situation "aphetic"? Explain why.*
- *Students compared "aphetic" with similar adjectives in the lesson.*

---

aphonia *(noun)*

A disorder of the vocal organs that results in the loss of voice.

- *He looked up "aphonia" because he had never seen it before.*
- *They discussed "aphonia" during the group presentation.*

---

aphonic *(adjective)*

Being without sound through injury or illness and thus incapable of all but whispered speech.

- *It is useful to describe something as "aphonic" when it is being without sound through injury or illness and....*

A genus of Scolopacidae.

- *She wrote a short paragraph that included "aphriza."*
- *Understanding "aphriza" helps you talk about this topic clearly.*

---

aphriza virgata *(noun)*

Sandpiper-like shorebird of Pacific coasts of North America and South America.

- *The article explained what "aphriza virgata" means with a simple example.*
- *Understanding "aphriza virgata" helps you talk about this topic clearly.*

---

aphrodisia *(noun)*

A desire for heterosexual intimacy.

- *He looked up "aphrodisia" because he had never seen it before.*
- *She wrote a short paragraph that included "aphrodisia."*

---

aphrodisiacal *(adjective)*

Exciting sexual desire.

- *Would you call this situation "aphrodisiacal"? Explain why.*
- *Students compared "aphrodisiacal" with similar adjectives in the lesson.*

---

aphrophora *(noun)*

A genus of Cercopidae.

- *Understanding "aphrophora" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "aphrophora."*

aphrophora saratogensis *(noun)*

Feeds on pines in northern United States.

- *She wrote a short paragraph that included "aphrophora saratogensis."*
- *The article explained what "aphrophora saratogensis" means with a simple example.*

aphyllanthaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae but not widely accepted; includes genus Aphyllanthes.

- *In class, the teacher used "aphyllanthaceae" to mean one of many families or subfamilies into which some....*
- *He looked up "aphyllanthaceae" because he had never seen it before.*

aphyllanthes *(noun)*

One species; small fibrous-rooted perennial with rushlike foliage and deep blue flowers; sometimes placed in its own family Aphyllanthaceae.

- *The article explained what "aphyllanthes" means with a simple example.*
- *Understanding "aphyllanthes" helps you talk about this topic clearly.*

aphyllophorales *(noun)*

Includes chiefly saprophytic fungi typically with shelflike bodies; sometimes placed in class Hymenomycetes or included in Agaricales.

- *The article explained what "aphyllophorales" means with a simple example.*
- *Understanding "aphyllophorales" helps you talk about this topic clearly.*

aphyllous *(adjective)*

Having no leaves.

- *The speaker chose "aphyllous" because it captured the feeling precisely.*
- *Would you call this situation "aphyllous"? Explain why.*

apiarian *(adjective)*

Relating to bees or beekeeping.

- *The speaker chose "apiarian" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "apiarian."*

apiculate *(adjective)*

(of a leaf shape) having a short sharply pointed tip.

- *Students compared "apiculate" with similar adjectives in the lesson.*
- *It is useful to describe something as "apiculate" when it is (of a leaf shape) having a short sharply pointed tip.*

apicultural *(adjective)*

Relating to the care and breeding of bees.

- *Would you call this situation "apicultural"? Explain why.*
- *It is useful to describe something as "apicultural" when it is relating to the care and breeding of bees.*

apiculturist *(noun)*

A farmer who keeps bees for their honey.

- *She wrote a short paragraph that included "apiculturist."*
- *Understanding "apiculturist" helps you talk about this topic clearly.*

apios *(noun)*

Twining perennial North American plants.

- *In class, the teacher used "apios" to mean twining perennial north american plants.*
- *Understanding "apios" helps you talk about this topic clearly.*

apios americana *(noun)*

A North American vine with fragrant blossoms and edible tubers; important food crop of Native Americans.

- *She wrote a short paragraph that included "apios americana."*
- *Understanding "apios americana" helps you talk about this topic clearly.*

apios tuberosa *(noun)*

A North American vine with fragrant blossoms and edible tubers; important food crop of Native Americans.

- *She wrote a short paragraph that included "apios tuberosa."*
- *Understanding "apios tuberosa" helps you talk about this topic clearly.*

---

apis mellifera adansonii *(noun)*

A strain of bees that originated in Brazil in the 1950s as a cross between an aggressive African bee and a honeybee; retains most of the traits of the African bee; now spread as far north as Texas.

- *In class, the teacher used "apis mellifera adansonii" to mean a strain of bees that originated in brazil in the....*
- *They discussed "apis mellifera adansonii" during the group presentation.*

---

apis mellifera scutellata *(noun)*

A strain of bees that originated in Brazil in the 1950s as a cross between an aggressive African bee and a honeybee; retains most of the traits of the African bee; now spread as far north as Texas.

- *He looked up "apis mellifera scutellata" because he had never seen it before.*
- *In class, the teacher used "apis mellifera scutellata" to mean a strain of bees that originated in brazil in the....*

---

apishamore *(noun)*

A saddle blanket made of buffalo hide.

- *The article explained what "apishamore" means with a simple example.*
- *They discussed "apishamore" during the group presentation.*

---

apium graveolens rapaceum *(noun)*

Grown for its thickened edible aromatic root.

- *Understanding "apium graveolens rapaceum" helps you talk about this topic clearly.*
- *The article explained what "apium graveolens rapaceum" means with a simple example.*

---

apivorous *(adjective)*

Feeding on bees.

- *Students compared "apivorous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "apivorous."*

---

aplacental *(adjective)*

Having no placenta.

- *Monotremes and marsupials are aplacental mammals.*
- *Her writing became clearer after she learned "aplacental."*

---

aplacophora *(noun)*

An order of Amphineura.

- *He looked up "aplacophora" because he had never seen it before.*
- *In class, the teacher used "aplacophora" to mean an order of amphineura.*

---

aplacophoran *(noun)*

Deep-water wormlike mollusks lacking calcareous plates on the body but having fine slimy spicules on the covering mantle.

- *In class, the teacher used "aplacophoran" to mean deep-water wormlike mollusks lacking calcareous....*
- *He looked up "aplacophoran" because he had never seen it before.*

---

aplanatic *(adjective)*

Free from or corrected for spherical aberration.

- *An aplanatic mirror.*
- *A "aplanatic" approach may work better in this case.*

---

aplectrum *(noun)*

A monocotyledonous genus of the family Orchidaceae.

- *She wrote a short paragraph that included "aplectrum."*
- *He looked up "aplectrum" because he had never seen it before.*

---

aplectrum hyemale *(noun)*

North American orchid bearing a single leaf and yellowish-brown flowers.

- *In class, the teacher used "aplectrum hyemale" to mean north american orchid bearing a single leaf and....*

- *The article explained what “aplectrum hyemale” means with a simple example.*

---

aplite *(noun)*

Light-colored and fine-grained granitic rock consisting chiefly of quartz and feldspars.

- *The article explained what “aplite” means with a simple example.*
- *In class, the teacher used “aplite” to mean light-colored and fine-grained granitic rock....*

---

aplitic *(adjective)*

Of or related to aplite.

- *Students compared “aplitic” with similar adjectives in the lesson.*
- *It is useful to describe something as “aplitic” when it is of or related to aplite.*

---

aplodontia *(noun)*

Type genus of the Aplodontiidae: comprising the mountain beavers.

- *They discussed “aplodontia” during the group presentation.*
- *Understanding “aplodontia” helps you talk about this topic clearly.*

---

aplodontia rufa *(noun)*

Bulky nocturnal burrowing rodent of uplands of the Pacific coast of North America; the most primitive living rodent.

- *They discussed “aplodontia rufa” during the group presentation.*
- *She wrote a short paragraph that included “aplodontia rufa.”*

---

aplodontiidae *(noun)*

Mountain beavers.

- *They discussed “aplodontiidae” during the group presentation.*
- *In class, the teacher used “aplodontiidae” to mean mountain beavers.*

---

apnoeic *(adjective)*

Of or relating to apnea.

- *The speaker chose “apnoeic” because it captured the feeling precisely.*
- *A “apnoeic” approach may work better in this case.*

---

apocarpous *(adjective)*

(of ovaries of flowering plants) consisting of carpels that are free from one another as in buttercups or roses.

- *A “apocarpous” approach may work better in this case.*
- *The speaker chose “apocarpous” because it captured the feeling precisely.*

---

apocope *(noun)*

Abbreviation of a word by omitting the final sound or sounds.

- *The British get ‘pud’ from ‘pudding’ by apocope.*
- *They discussed “apocope” during the group presentation.*

---

apocynaceous *(adjective)*

Of or relating to tropical plants of the family Apocynaceae.

- *It is useful to describe something as “apocynaceous” when it is of or relating to tropical plants of the family....*
- *Would you call this situation “apocynaceous”? Explain why.*

---

apocynum androsaemifolium *(noun)*

North American perennial having pinkish flowers in loose cymes; used in folk medicine for pain or inflammation in joints.

- *The article explained what “apocynum androsaemifolium” means with a simple example.*
- *In class, the teacher used “apocynum androsaemifolium” to mean north american perennial having pinkish flowers in....*

---

apocynum cannabinum *(noun)*

Canadian dogbane yielding a tough fiber used as cordage by Native Americans; used in folk medicine for pain or inflammation in joints.

- *He looked up “apocynum cannabinum” because he had never seen it before.*
- *She wrote a short paragraph that included “apocynum cannabinum.”*

---

apocynum pumilum *(noun)*

North American plant similar to common dogbane.

- *They discussed "apocynum pumilum" during the group presentation.*
- *The article explained what "apocynum pumilum" means with a simple example.*

---

apodal *(adjective)*

(of snakes and eels) naturally footless.

- *Eels are apodal.*
- *Her writing became clearer after she learned "apodal."*

---

apodeictic *(adjective)*

Of a proposition; necessarily true or logically certain.

- *Her writing became clearer after she learned "apodeictic."*
- *Students compared "apodeictic" with similar adjectives in the lesson.*

---

apodeme *(noun)*

Ridge-like ingrowth of the exoskeleton of an arthropod that supports internal organs and provides attachment points for muscles.

- *They discussed "apodeme" during the group presentation.*
- *He looked up "apodeme" because he had never seen it before.*

---

apodidae *(noun)*

Swifts; in former classifications included in the order Coraciiformes.

- *She wrote a short paragraph that included "apodidae."*
- *He looked up "apodidae" because he had never seen it before.*

---

apodiform bird *(noun)*

Nonpasserine bird having long wings and weak feet; spends much of its time in flight.

- *In class, the teacher used "apodiform bird" to mean nonpasserine bird having long wings and weak feet;....*
- *Understanding "apodiform bird" helps you talk about this topic clearly.*

---

apodiformes *(noun)*

Swifts; hummingbirds.

- *She wrote a short paragraph that included "apodiformes."*
- *The article explained what "apodiformes" means with a simple example.*

---

apodous *(adjective)*

(of snakes and eels) naturally footless.

- *Her writing became clearer after she learned "apodous."*
- *Students compared "apodous" with similar adjectives in the lesson.*

---

apoenzyme *(noun)*

A protein that combines with a coenzyme to form an active enzyme.

- *In class, the teacher used "apoenzyme" to mean a protein that combines with a coenzyme to form an....*
- *The article explained what "apoenzyme" means with a simple example.*

---

apogametic *(adjective)*

Of or relating to the development of an embryo in the absence of fertilization.

- *It is useful to describe something as "apogametic" when it is of or relating to the development of an embryo in....*
- *Would you call this situation "apogametic"? Explain why.*

---

apogamic *(adjective)*

Of or relating to the development of an embryo in the absence of fertilization.

- *A "apogamic" approach may work better in this case.*
- *It is useful to describe something as "apogamic" when it is of or relating to the development of an embryo in....*

---

apogamous *(adjective)*

Of or relating to the development of an embryo in the absence of fertilization.

- *It is useful to describe something as "apogamous" when it is of or relating to the development of an embryo in....*
- *Students compared "apogamous" with similar adjectives in the lesson.*

---

apogamy *(noun)*

(botany) development of an embryo without fertilization; especially the development in some ferns of a sporophyte from the gametophyte without fertilization.

- *In class, the teacher used "apogamy" to mean (botany) development of an embryo without....*
- *Understanding "apogamy" helps you talk about this topic clearly.*

---

apogean *(adjective)*

Relating to or characteristic of an apogee.

- *Apogean tides occur when the moon is at the apogee of its orbit.*
- *A "apogean" approach may work better in this case.*

---

apogon *(noun)*

Type genus of the Apogonidae.

- *Understanding "apogon" helps you talk about this topic clearly.*
- *He looked up "apogon" because he had never seen it before.*

---

apogon maculatus *(noun)*

A cardinalfish found in tropical Atlantic coastal waters.

- *She wrote a short paragraph that included "apogon maculatus."*
- *Understanding "apogon maculatus" helps you talk about this topic clearly.*

---

apogonidae *(noun)*

Bright-colored marine fishes that incubate eggs in the mouth.

- *The article explained what "apogonidae" means with a simple example.*
- *She wrote a short paragraph that included "apogonidae."*

---

apojove *(noun)*

Apoapsis in orbit around Jupiter.

- *In class, the teacher used "apojove" to mean apoapsis in orbit around jupiter.*
- *The article explained what "apojove" means with a simple example.*

---

apolemia *(noun)*

Large siphonophore of up to 50 ft long.

- *In class, the teacher used "apolemia" to mean large siphonophore of up to 50 ft long.*
- *Understanding "apolemia" helps you talk about this topic clearly.*

---

apologue *(noun)*

A short moral story (often with animal characters).

- *Understanding "apologue" helps you talk about this topic clearly.*
- *In class, the teacher used "apologue" to mean a short moral story (often with animal characters).*

---

Having uncoordinated muscular movements, symptomatic of a CNS disorder.

- *A "apractic" approach may work better in this case.*
- *Her writing became clearer after she learned "apractic."*

apraxic *(adjective)*

Having uncoordinated muscular movements, symptomatic of a CNS disorder.

- *It is useful to describe something as "apraxic" when it is having uncoordinated muscular movements,....*
- *The speaker chose "apraxic" because it captured the feeling precisely.*

apresoline *(noun)*

An antihypertensive drug (trade name Apresoline) that dilates blood vessels; used (often with a diuretic) to treat hypertension and congestive heart failure.

- *In class, the teacher used "apresoline" to mean an antihypertensive drug (trade name apresoline)....*
- *The article explained what "apresoline" means with a simple example.*

aptenodytes *(noun)*

Large penguins.

- *In class, the teacher used "aptenodytes" to mean large penguins.*
- *Understanding "aptenodytes" helps you talk about this topic clearly.*

aptenodytes forsteri *(noun)*

The largest penguin; an Antarctic penguin.

- *He looked up "aptenodytes forsteri" because he had never seen it before.*
- *She wrote a short paragraph that included "aptenodytes forsteri."*

aptenodytes patagonica *(noun)*

Large penguin on islands bordering the Antarctic Circle.

- *They discussed "aptenodytes patagonica" during the group presentation.*
- *She wrote a short paragraph that included "aptenodytes patagonica."*

apteral *(adjective)*

Having columns at one or both ends but not along the sides.

- *Her writing became clearer after she learned "apteral."*
- *Students compared "apteral" with similar adjectives in the lesson.*

apterous *(adjective)*

(of insects) without wings.

- *Her writing became clearer after she learned “apterous.”*
- *Students compared “apterous” with similar adjectives in the lesson.*

---

apterygidae *(noun)*

Coextensive with the order Apterygiformes.

- *The article explained what “apterygidae” means with a simple example.*
- *She wrote a short paragraph that included “apterygidae.”*

---

apterygiformes *(noun)*

A ratite bird order: flightless ground birds having vestigial wings and long bills and small eyes: kiwis.

- *The article explained what “apterygiformes” means with a simple example.*
- *In class, the teacher used “apterygiformes” to mean a ratite bird order: flightless ground birds having....*

---

aptitudinal *(adjective)*

Of or relating to aptitudes.

- *Her writing became clearer after she learned “aptitudinal.”*
- *Students compared “aptitudinal” with similar adjectives in the lesson.*

---

apyretic tetanus *(noun)*

Clinical neurological syndrome characterized by muscular twitching and cramps and (when severe) seizures; associated with calcium deficiency (hypoparathyroidism) or vitamin D deficiency or alkalosis.

- *She wrote a short paragraph that included “apyretic tetanus.”*
- *They discussed “apyretic tetanus” during the group presentation.*

---

aquacultural *(adjective)*

Of or relating to aquiculture.

- *Aquacultural methods.*
- *Students compared “aquacultural” with similar adjectives in the lesson.*

---

aquaphobia *(noun)*

A morbid fear of drowning.

- *She wrote a short paragraph that included “aquaphobia.”*
- *Understanding “aquaphobia” helps you talk about this topic clearly.*

---

aquaphobic *(adjective)*

Abnormally afraid of water.

- *The speaker chose “aquaphobic” because it captured the feeling precisely.*
- *Would you call this situation “aquaphobic”? Explain why.*

---

aqueductus cerebri *(noun)*

A canal connecting the third and fourth ventricles.

- *Understanding “aqueductus cerebri” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “aqueductus cerebri.”*

---

aquicultural *(adjective)*

Of or relating to aquiculture.

- *It is useful to describe something as “aquicultural” when it is of or relating to aquiculture.*
- *A “aquicultural” approach may work better in this case.*

---

A technique of growing plants (without soil) in water containing dissolved nutrients.

- *He looked up “aquiculture” because he had never seen it before.*
- *Understanding “aquiculture” helps you talk about this topic clearly.*

---

aquiferous *(adjective)*

Of or relating to an aquifer.

- *It is useful to describe something as “aquiferous” when it is of or relating to an aquifer.*

- *Students compared “aquiferous” with similar adjectives in the lesson.*

---

aquifoliaceae *(noun)*

Widely distributed shrubs and trees.

- *The article explained what “aquifoliaceae” means with a simple example.*
- *Understanding “aquifoliaceae” helps you talk about this topic clearly.*

---

aquila chrysaetos *(noun)*

Large eagle of mountainous regions of the northern hemisphere having a golden-brown head and neck.

- *He looked up “aquila chrysaetos” because he had never seen it before.*
- *In class, the teacher used “aquila chrysaetos” to mean large eagle of mountainous regions of the northern....*

---

aquilege *(noun)*

A plant of the genus Aquilegia having irregular showy spurred flowers; north temperate regions especially mountains.

- *They discussed “aquilege” during the group presentation.*
- *The article explained what “aquilege” means with a simple example.*

---

ar rimsal *(noun)*

A desert in southern Saudi Arabia.

- *The article explained what “ar rimsal” means with a simple example.*
- *In class, the teacher used “ar rimsal” to mean a desert in southern saudi arabia.*

---

arabidopsis lyrata *(noun)*

A small noninvasive cross-pollinating plant with white flowers; closely related to Arabidopsis thaliana.

- *In class, the teacher used “arabidopsis lyrata” to mean a small noninvasive cross-pollinating plant with....*
- *The article explained what “arabidopsis lyrata” means with a simple example.*

---

arability *(noun)*

The quality of land that is appropriate for cultivation.

- *She wrote a short paragraph that included “arability.”*
- *Understanding “arability” helps you talk about this topic clearly.*

---

arabis turrita *(noun)*

European cress having stiff erect stems; sometimes placed in genus Turritis.

- *The article explained what “arabis turrita” means with a simple example.*
- *She wrote a short paragraph that included “arabis turrita.”*

---

araceous *(adjective)*

Relating to a plant of the family Araceae.

- *A “araceous” approach may work better in this case.*
- *Students compared “araceous” with similar adjectives in the lesson.*

---

arachnidian *(adjective)*

Relating to or resembling a member of the class Arachnida.

- *Students compared “arachnidian” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “arachnidian.”*

---

araguaya *(noun)*

A river in central Brazil that flows generally northward (with many falls) to join the Tocantins River.

- *The article explained what “araguaya” means with a simple example.*
- *Understanding “araguaya” helps you talk about this topic clearly.*

---

araguaya river *(noun)*

A river in central Brazil that flows generally northward (with many falls) to join the Tocantins River.

- *They discussed “araguaya river” during the group presentation.*
- *Understanding “araguaya river” helps you talk about this topic clearly.*

---

arales *(noun)*

Araceae; Lemnaceae.

- *Understanding "arales" helps you talk about this topic clearly.*
- *They discussed "arales" during the group presentation.*

---

aralia nudicaulis *(noun)*

Common perennial herb having aromatic roots used as a substitute for sarsaparilla; central and eastern North America.

- *She wrote a short paragraph that included "aralia nudicaulis."*
- *He looked up "aralia nudicaulis" because he had never seen it before.*

---

aralia stipulata *(noun)*

Similar to American angelica tree but less prickly; China.

- *She wrote a short paragraph that included "aralia stipulata."*
- *He looked up "aralia stipulata" because he had never seen it before.*

---

araliaceae *(noun)*

Mostly tropical trees and shrubs and lianas: genera Panax and Hedera.

- *Understanding "araliaceae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "araliaceae."*

---

aram kachaturian *(noun)*

Armenian composer who incorporated oriental folk music (1903-1978).

- *He looked up "aram kachaturian" because he had never seen it before.*
- *In class, the teacher used "aram kachaturian" to mean armenian composer who incorporated oriental folk....*

---

arame *(noun)*

An edible seaweed with a mild flavor.

- *Understanding "arame" helps you talk about this topic clearly.*
- *The article explained what "arame" means with a simple example.*

---

aramus *(noun)*

Genus of large brown long-billed wading birds found in warm swampy regions of the western hemisphere: courlan; limpkin.

- *She wrote a short paragraph that included "aramus."*
- *They discussed "aramus" during the group presentation.*

---

aramus guarauna *(noun)*

Wading bird of South America and Central America.

- *The article explained what "aramus guarauna" means with a simple example.*
- *Understanding "aramus guarauna" helps you talk about this topic clearly.*

---

aramus pictus *(noun)*

Wading bird of Florida, Cuba and Jamaica having a drooping bill and a distinctive wailing call.

- *She wrote a short paragraph that included "aramus pictus."*
- *He looked up "aramus pictus" because he had never seen it before.*

---

aranea diademata *(noun)*

A spider common in European gardens.

- *He looked up "aranea diademata" because he had never seen it before.*
- *She wrote a short paragraph that included "aranea diademata."*

---

araneidal *(adjective)*

Relating to or resembling a spider.

- *A "araneidal" approach may work better in this case.*
- *Her writing became clearer after she learned "araneidal."*

---

araneidan *(adjective)*

Relating to or resembling a spider.

- *Her writing became clearer after she learned "araneidan."*

- *Would you call this situation "araneidan"? Explain why.*

---

araneus cavaticus *(noun)*

An orange and tan spider with darkly banded legs that spins an orb web daily.

- *In class, the teacher used "araneus cavaticus" to mean an orange and tan spider with darkly banded legs....*
- *The article explained what "araneus cavaticus" means with a simple example.*

---

arariba *(noun)*

Brazilian tree with handsomely marked wood.

- *Understanding "arariba" helps you talk about this topic clearly.*
- *They discussed "arariba" during the group presentation.*

---

araroba *(noun)*

A bitter yellow powder used to treat skin diseases.

- *Understanding "araroba" helps you talk about this topic clearly.*
- *The article explained what "araroba" means with a simple example.*

---

araucaria bidwillii *(noun)*

Australian conifer bearing two-inch seeds tasting like roasted chestnuts; among the aborigines the tree is hereditary property protected by law.

- *Understanding "araucaria bidwillii" helps you talk about this topic clearly.*
- *They discussed "araucaria bidwillii" during the group presentation.*

---

araucariaceae *(noun)*

Tall evergreen cone-bearing trees of South America and Australia with broad leathery leaves; in some classifications included in the Pinaceae.

- *The article explained what "araucariaceae" means with a simple example.*
- *They discussed "araucariaceae" during the group presentation.*

---

araujia *(noun)*

Small genus of South American evergreen vines.

- *She wrote a short paragraph that included "araujia."*
- *He looked up "araujia" because he had never seen it before.*

---

araujia sericofera *(noun)*

Robust twining shrub having racemes of fragrant white or pink flowers with flat spreading terminal petals that trap nocturnal moths and hold them until dawn.

- *In class, the teacher used "araujia sericofera" to mean robust twining shrub having racemes of fragrant....*

The worship of trees.

- *She wrote a short paragraph that included “arborolatry.”*
- *Understanding “arborolatry” helps you talk about this topic clearly.*

---

arborous *(adjective)*

Of or relating to or formed by trees.

- *An arborous roof.*
- *Her writing became clearer after she learned “arborous.”*

---

arbutus unedo *(noun)*

Small evergreen European shrubby tree bearing many-seeded scarlet berries that are edible but bland; of Ireland, southern Europe, Asia Minor.

- *She wrote a short paragraph that included “arbutus unedo.”*
- *He looked up “arbutus unedo” because he had never seen it before.*

---

arc-boutant *(noun)*

A buttress that stands apart from the main structure and connected to it by an arch.

- *He looked up “arc-boutant” because he had never seen it before.*
- *She wrote a short paragraph that included “arc-boutant.”*

---

arcadic *(noun)*

The dialect of Ancient Greek spoken by Arcadians.

- *The article explained what “arcadic” means with a simple example.*
- *In class, the teacher used “arcadic” to mean the dialect of ancient greek spoken by arcadians.*

---

arcadic dialect *(noun)*

The dialect of Ancient Greek spoken by Arcadians.

- *They discussed “arcadic dialect” during the group presentation.*
- *She wrote a short paragraph that included “arcadic dialect.”*

---

arcado-cyprians *(noun)*

The ancient Greek inhabitants of Achaea.

- *In class, the teacher used “arcado-cyprians” to mean the ancient greek inhabitants of achaea.*
- *The article explained what “arcado-cyprians” means with a simple example.*

---

arccosecant *(noun)*

The angle that has a cosecant equal to a given number.

- *In class, the teacher used “arccosecant” to mean the angle that has a cosecant equal to a given number.*
- *They discussed “arccosecant” during the group presentation.*

---

arccosine *(noun)*

The inverse function of the cosine; the angle that has a cosine equal to a given number.

- *The article explained what “arccosine” means with a simple example.*
- *In class, the teacher used “arccosine” to mean the inverse function of the cosine; the angle that....*

---

arccotangent *(noun)*

The inverse function of the cotangent; the angle that has a cotangent equal to a given number.

- *She wrote a short paragraph that included “arccotangent.”*
- *He looked up “arccotangent” because he had never seen it before.*

---

arcdegree *(noun)*

A measure for arcs and angles.

- *In class, the teacher used “arcdegree” to mean a measure for arcs and angles.*
- *Understanding “arcdegree” helps you talk about this topic clearly.*

---

arcella *(noun)*

An amoeba-like protozoan with a chitinous shell resembling an umbrella.

- *He looked up “arcella” because he had never seen it before.*
- *Understanding “arcella” helps you talk about this topic clearly.*

arcellidae *(noun)*

Soil and freshwater protozoa; cosmopolitan in distribution.

- *He looked up "arcellidae" because he had never seen it before.*
- *She wrote a short paragraph that included "arcellidae."*

arceuthobium *(noun)*

Genus of chiefly American plants parasitic on conifers.

- *He looked up "arceuthobium" because he had never seen it before.*
- *She wrote a short paragraph that included "arceuthobium."*

arceuthobium pusillum *(noun)*

Small herb with scalelike leaves on reddish-brown stems and berrylike fruits; parasitic on spruce and larch trees.

- *The article explained what "arceuthobium pusillum" means with a simple example.*
- *In class, the teacher used "arceuthobium pusillum" to mean small herb with scalelike leaves on reddish-brown....*

archaebacterium *(noun)*

Considered ancient life forms that evolved separately from bacteria and blue-green algae.

- *Understanding "archaebacterium" helps you talk about this topic clearly.*
- *The article explained what "archaebacterium" means with a simple example.*

archaeobacteria *(noun)*

Considered ancient life forms that evolved separately from bacteria and blue-green algae.

- *Understanding "archaeobacteria" helps you talk about this topic clearly.*
- *In class, the teacher used "archaeobacteria" to mean considered ancient life forms that evolved....*

archaeologic *(adjective)*

Related to or dealing with or devoted to archaeology.

- *An archaeological dig.*
- *A dramatic archaeological discovery.*

archaeopteryx lithographica *(noun)*

Extinct primitive toothed bird of the Jurassic period having a long feathered tail and hollow bones; usually considered the most primitive of all birds.

- *In class, the teacher used "archaeopteryx lithographica" to mean extinct primitive toothed bird of the jurassic....*
- *The article explained what "archaeopteryx lithographica" means with a simple example.*

archaeornis *(noun)*

Extinct primitive toothed bird with a long feathered tail and three free clawed digits on each wing.

- *The article explained what "archaeornis" means with a simple example.*
- *She wrote a short paragraph that included "archaeornis."*

archaeornithes *(noun)*

Primitive reptile-like fossil birds of the Jurassic or early Cretaceous.

- *In class, the teacher used "archaeornithes" to mean primitive reptile-like fossil birds of the jurassic....*
- *They discussed "archaeornithes" during the group presentation.*

archaeozoic *(adjective)*

Of or belonging to earlier of two divisions of the Precambrian era.

- *Would you call this situation "archaeozoic"? Explain why.*
- *It is useful to describe something as "archaeozoic" when it is of or belonging to earlier of two divisions of the....*

archaeozoic aeon *(noun)*

The time from 3,800 million years to 2,500 million years ago; earth's crust formed; unicellular organisms are earliest forms of life.

- *The article explained what "archaeozoic aeon" means with a simple example.*
- *In class, the teacher used "archaeozoic aeon" to mean the time from 3,800 million years to 2,500 million....*

archaicism *(noun)*

The use of an archaic expression.

- *In class, the teacher used "archaicism" to mean the use of an archaic expression.*
- *The article explained what "archaicism" means with a simple example.*

---

archaise *(verb)*

Give an archaic appearance of character to.

- *The coach explained when to use "archaise" and when to wait.*
- *Learners should practice how to use "archaise" in real sentences.*

---

archaist *(noun)*

An expert or collector of antiquities.

- *She wrote a short paragraph that included "archaist."*
- *The article explained what "archaist" means with a simple example.*

---

archaistic *(adjective)*

Imitative of an archaic style or manner.

- *Archaistic writing.*
- *Her writing became clearer after she learned "archaistic."*

---

archaize *(verb)*

Give an archaic appearance of character to.

- *Archaized craftwork.*
- *He did not know how to use "archaize" until he saw an example.*

---

archangelic *(adjective)*

Of or relating to or resembling archangels.

- *The speaker chose "archangelic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "archangelic."*

---

archangelical *(adjective)*

Of or relating to or resembling archangels.

- *Students compared "archangelical" with similar adjectives in the lesson.*
- *It is useful to describe something as "archangelical" when it is of or relating to or resembling archangels.*

---

archducal *(adjective)*

Belonging to or befitting an archduke or his archduchy.

- *A "archducal" approach may work better in this case.*
- *The speaker chose "archducal" because it captured the feeling precisely.*

---

archduchy *(noun)*

The domain controlled by an archduke or archduchess.

- *She wrote a short paragraph that included "archduchy."*
- *He looked up "archduchy" because he had never seen it before.*

---

archegonial *(adjective)*

Of or relating to an archegonium.

- *The speaker chose "archegonial" because it captured the feeling precisely.*
- *It is useful to describe something as "archegonial" when it is of or relating to an archegonium.*

---

archegoniate *(adjective)*

Of or relating to an archegonium.

- *Students compared "archegoniate" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "archegoniate."*

---

archegonium *(noun)*

A female sex organ occurring in mosses, ferns, and most gymnosperms.

- *In class, the teacher used "archegonium" to mean a female sex organ occurring in mosses, ferns, and....*

- *Understanding "archegonium" helps you talk about this topic clearly.*

---

archenteron *(noun)*

Central cavity of the gastrula; becomes the intestinal or digestive cavity.

- *She wrote a short paragraph that included "archenteron."*
- *The article explained what "archenteron" means with a simple example.*

---

archeobacteria *(noun)*

Considered ancient life forms that evolved separately from bacteria and blue-green algae.

- *She wrote a short paragraph that included "archeobacteria."*
- *He looked up "archeobacteria" because he had never seen it before.*

---

archeologic *(adjective)*

Related to or dealing with or devoted to archaeology.

- *It is useful to describe something as "archeologic" when it is related to or dealing with or devoted to archaeology.*
- *Students compared "archeologic" with similar adjectives in the lesson.*

---

archeopteryx *(noun)*

Extinct primitive toothed bird of the Jurassic period having a long feathered tail and hollow bones; usually considered the most primitive of all birds.

- *Understanding "archeopteryx" helps you talk about this topic clearly.*
- *In class, the teacher used "archeopteryx" to mean extinct primitive toothed bird of the jurassic....*

---

archeozoic *(adjective)*

Of or belonging to earlier of two divisions of the Precambrian era.

- *Archeozoic life forms.*
- *Her writing became clearer after she learned "archeozoic."*

---

archeozoic eon *(noun)*

The time from 3,800 million years to 2,500 million years ago; earth's crust formed; unicellular organisms are earliest forms of life.

- *She wrote a short paragraph that included "archeozoic eon."*
- *The article explained what "archeozoic eon" means with a simple example.*

---

archepiscopal *(adjective)*

Of or associated with an archbishop.

- *It is useful to describe something as "archepiscopal" when it is of or associated with an archbishop.*
- *The speaker chose "archepiscopal" because it captured the feeling precisely.*

---

archespore *(noun)*

Primitive cell or group of cells from which a mother cell develops.

- *In class, the teacher used "archespore" to mean primitive cell or group of cells from which a....*
- *They discussed "archespore" during the group presentation.*

---

archesporial *(adjective)*

Of or relating to the cells in a sporangium that give rise to spores.

- *A "archesporial" approach may work better in this case.*
- *Would you call this situation "archesporial"? Explain why.*

---

archesporium *(noun)*

Primitive cell or group of cells from which a mother cell develops.

- *Understanding "archesporium" helps you talk about this topic clearly.*
- *The article explained what "archesporium" means with a simple example.*

---

archiannelid *(noun)*

Small primitive marine worm lacking external segmentation and resembling polychaete larvae.

- *Understanding "archiannelid" helps you talk about this topic clearly.*
- *In class, the teacher used "archiannelid" to mean small primitive marine worm lacking external....*

---

archiannelida *(noun)*

A class of Annelida.

- *The article explained what "archiannelida" means with a simple example.*
- *She wrote a short paragraph that included "archiannelida."*

---

archidiaconal *(adjective)*

Of or relating to an archdeacon or his office.

- *Would you call this situation "archidiaconal"? Explain why.*
- *Her writing became clearer after she learned "archidiaconal."*

---

archidiaconate *(noun)*

Office or position of an archdeacon.

- *The article explained what "archidiaconate" means with a simple example.*
- *They discussed "archidiaconate" during the group presentation.*

---

archidiskidon *(noun)*

A genus of Elephantidae.

- *He looked up "archidiskidon" because he had never seen it before.*
- *In class, the teacher used "archidiskidon" to mean a genus of elephantidae.*

---

archidiskidon imperator *(noun)*

Largest known mammoth; of America.

- *She wrote a short paragraph that included "archidiskidon imperator."*
- *He looked up "archidiskidon imperator" because he had never seen it before.*

---

archilochus colubris *(noun)*

A kind of hummingbird.

- *Understanding "archilochus colubris" helps you talk about this topic clearly.*
- *They discussed "archilochus colubris" during the group presentation.*

---

archine *(noun)*

A Russian unit of length (71 cm).

- *He looked up "archine" because he had never seen it before.*
- *She wrote a short paragraph that included "archine."*

---

archipallium *(noun)*

The olfactory cortex of the cerebrum.

- *The article explained what "archipallium" means with a simple example.*
- *They discussed "archipallium" during the group presentation.*

---

archosargus *(noun)*

A genus of Sparidae.

- *He looked up "archosargus" because he had never seen it before.*
- *They discussed "archosargus" during the group presentation.*

---

archosargus probatocephalus *(noun)*

Large (up to 20 lbs) food fish of the eastern coast of the United States and Mexico.

- *He looked up "archosargus probatocephalus" because he had never seen it before.*
- *She wrote a short paragraph that included "archosargus probatocephalus."*

---

archosargus rhomboidalis *(noun)*

Sea bream of warm Atlantic waters.

- *They discussed "archosargus rhomboidalis" during the group presentation.*
- *The article explained what "archosargus rhomboidalis" means with a simple example.*

---

archosaur *(noun)*

Extinct reptiles including: dinosaurs; plesiosaurs; pterosaurs; ichthyosaurs; thecodonts.

- *Understanding "archosaur" helps you talk about this topic clearly.*
- *The article explained what "archosaur" means with a simple example.*

---

archosauria *(noun)*

A large subclass of diapsid reptiles including: crocodiles; alligators; dinosaurs; pterosaurs; plesiosaurs; ichthyosaurs; thecodonts.

- *In class, the teacher used "archosauria" to mean a large subclass of diapsid reptiles including:....*
- *Understanding "archosauria" helps you talk about this topic clearly.*

---

archosaurian *(adjective)*

Of or relating to reptiles of the subclass Archosauria.

- *Would you call this situation "archosaurian"? Explain why.*
- *It is useful to describe something as "archosaurian" when it is of or relating to reptiles of the subclass archosauria.*

---

archosaurian reptile *(noun)*

Extinct reptiles including: dinosaurs; plesiosaurs; pterosaurs; ichthyosaurs; thecodonts.

- *They discussed "archosaurian reptile" during the group presentation.*
- *She wrote a short paragraph that included "archosaurian reptile."*

---

arciform *(adjective)*

Forming or resembling an arch.

- *A "arciform" approach may work better in this case.*
- *Students compared "arciform" with similar adjectives in the lesson.*

---

arcminute *(noun)*

A unit of angular distance equal to a 60th of a degree.

- *Understanding "arcminute" helps you talk about this topic clearly.*
- *The article explained what "arcminute" means with a simple example.*

---

arcsecant *(noun)*

The inverse function of the secant; the angle that has a secant equal to a given number.

- *In class, the teacher used "arcsecant" to mean the inverse function of the secant; the angle that....*
- *They discussed "arcsecant" during the group presentation.*

---

arctictis bintourong *(noun)*

Arboreal civet of Asia having a long prehensile tail and shaggy black hair.

- *They discussed "arctictis bintourong" during the group presentation.*
- *In class, the teacher used "arctictis bintourong" to mean arboreal civet of asia having a long prehensile....*

---

arctiid *(noun)*

Stout-bodied broad-winged moth with conspicuously striped or spotted wings; larvae are hairy caterpillars.

- *He looked up "arctiid" because he had never seen it before.*
- *They discussed "arctiid" during the group presentation.*

---

arctiid moth *(noun)*

Stout-bodied broad-winged moth with conspicuously striped or spotted wings; larvae are hairy caterpillars.

- *Understanding "arctiid moth" helps you talk about this topic clearly.*
- *The article explained what "arctiid moth" means with a simple example.*

---

arctiidae *(noun)*

Tiger moths.

- *He looked up "arctiidae" because he had never seen it before.*
- *Understanding "arctiidae" helps you talk about this topic clearly.*

---

arctocebus *(noun)*

A genus of Lorisidae.

- *They discussed "arctocebus" during the group presentation.*
- *Understanding "arctocebus" helps you talk about this topic clearly.*

arctocebus calabarensis *(noun)*

A kind of lemur.

- *The article explained what “arctocebus calabarensis” means with a simple example.*
- *They discussed “arctocebus calabarensis” during the group presentation.*

arctocephalus philippi *(noun)*

A fur seal of the Pacific coast of California and southward.

- *They discussed “arctocephalus philippi” during the group presentation.*
- *The article explained what “arctocephalus philippi” means with a simple example.*

arctonyx *(noun)*

A genus of Mustelidae.

- *In class, the teacher used “arctonyx” to mean a genus of mustelidae.*
- *They discussed “arctonyx” during the group presentation.*

arctonyx collaris *(noun)*

Southeast Asian badger with a snout like a pig.

- *She wrote a short paragraph that included “arctonyx collaris.”*
- *The article explained what “arctonyx collaris” means with a simple example.*

arctostaphylos andersonii *(noun)*

Erect California shrub having leaves with heart-shaped lobes at the base.

- *Understanding “arctostaphylos andersonii” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “arctostaphylos andersonii.”*

arctotis *(noun)*

Herbs and subshrubs: African daisy.

- *The article explained what “arctotis” means with a simple example.*
- *Understanding “arctotis” helps you talk about this topic clearly.*

arctotis stoechadifolia *(noun)*

Bushy perennial of South Africa with white or violet flowers; in its native region often clothes entire valley sides in a sheet of color.

- *In class, the teacher used “arctotis stoechadifolia” to mean bushy perennial of south africa with white or....*
- *The article explained what “arctotis stoechadifolia” means with a simple example.*

arctotis venusta *(noun)*

Bushy perennial of South Africa with white or violet flowers; in its native region often clothes entire valley sides in a sheet of color.

- *They discussed “arctotis venusta” during the group presentation.*
- *She wrote a short paragraph that included “arctotis venusta.”*

ardea herodius *(noun)*

Large American heron having bluish-grey plumage.

- *He looked up “ardea herodius” because he had never seen it before.*
- *She wrote a short paragraph that included “ardea herodius.”*

ardeb *(noun)*

A unit of dry measure used in Egypt.

- *In class, the teacher used “ardeb” to mean a unit of dry measure used in egypt.*
- *Understanding “ardeb” helps you talk about this topic clearly.*

ardeidae *(noun)*

Herons; egrets; night herons; bitterns.

- *They discussed “ardeidae” during the group presentation.*
- *The article explained what “ardeidae” means with a simple example.*

ardisia *(noun)*

Tropical evergreen subshrubs (some climbers) to trees of Asia and Australasia to Americas.

- *She wrote a short paragraph that included "ardisia."*
- *He looked up "ardisia" because he had never seen it before.*

---

ardisia crenata *(noun)*

Shrub with coral-red berries; Japan to northern India.

- *They discussed "ardisia crenata" during the group presentation.*
- *She wrote a short paragraph that included "ardisia crenata."*

---

ardisia escallonoides *(noun)*

Tropical American shrub or small tree with brown wood and dark berries.

- *He looked up "ardisia escallonoides" because he had never seen it before.*
- *They discussed "ardisia escallonoides" during the group presentation.*

---

ardisia paniculata *(noun)*

Tropical American shrub or small tree with brown wood and dark berries.

- *They discussed "ardisia paniculata" during the group presentation.*
- *In class, the teacher used "ardisia paniculata" to mean tropical american shrub or small tree with brown....*

---

arduousness *(noun)*

Extreme effortfulness.

- *In class, the teacher used "arduousness" to mean extreme effortfulness.*
- *He looked up "arduousness" because he had never seen it before.*

---

areaway *(noun)*

A passageway between buildings or giving access to a basement.

- *Understanding "areaway" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "areaway."*

---

arecaceae *(noun)*

Chiefly tropical trees and shrubs and vines usually having a tall columnar trunk bearing a crown of very large leaves; coextensive with the order Palmales.

- *In class, the teacher used "arecaceae" to mean chiefly tropical trees and shrubs and vines usually....*
- *The article explained what "arecaceae" means with a simple example.*

---

arecidae *(noun)*

One of four subclasses or superorder of Monocotyledones; comprises about 6400 species in 5 families of trees and shrubs and terrestrial herbs and a few free-floating aquatics including: Palmae; Araceae; Pandanaceae and Lemnaceae.

- *He looked up "arecidae" because he had never seen it before.*
- *Understanding "arecidae" helps you talk about this topic clearly.*

---

areflexia *(noun)*

Absence of a reflex; a sign of possible nerve damage.

- *The article explained what "areflexia" means with a simple example.*
- *They discussed "areflexia" during the group presentation.*

---

arenaceous *(adjective)*

Resembling or containing or abounding in sand; or growing in sandy areas.

- *Arenaceous limestone.*
- *Arenaceous grasses.*

---

arenaceous rock *(noun)*

A sedimentary rock composed of sand.

- *She wrote a short paragraph that included "arenaceous rock."*
- *He looked up "arenaceous rock" because he had never seen it before.*

---

arenaria peploides *(noun)*

Perennial succulent herb with small solitary axillary or terminal flowers.

- *Understanding "arenaria peploides" helps you talk about this topic clearly.*

- *They discussed "arenaria peploides" during the group presentation.*

---

arenaria serpyllifolia *(noun)*

Eurasian annual sprawling plant naturalized throughout North America.

- *In class, the teacher used "arenaria serpyllifolia" to mean eurasian annual sprawling plant naturalized....*
- *The article explained what "arenaria serpyllifolia" means with a simple example.*

---

arenaria-melanocephala *(noun)*

Common turnstone of the Pacific coast of North America.

- *Understanding "arenaria-melanocephala" helps you talk about this topic clearly.*
- *He looked up "arenaria-melanocephala" because he had never seen it before.*

---

arenaviridae *(noun)*

A family of arborviruses carried by arthropods.

- *They discussed "arenaviridae" during the group presentation.*
- *She wrote a short paragraph that included "arenaviridae."*

---

arenavirus *(noun)*

Animal viruses belonging to the family Arenaviridae.

- *Understanding "arenavirus" helps you talk about this topic clearly.*
- *The article explained what "arenavirus" means with a simple example.*

---

arenga *(noun)*

A genus of tropical Asian and Malaysian palm trees.

- *He looked up "arenga" because he had never seen it before.*
- *In class, the teacher used "arenga" to mean a genus of tropical asian and malaysian palm trees.*

---

arenga pinnata *(noun)*

Malaysian feather palm with base densely clothed with fibers; yields a sweet sap used in wine and trunk pith yields sago.

- *The article explained what "arenga pinnata" means with a simple example.*
- *In class, the teacher used "arenga pinnata" to mean malaysian feather palm with base densely clothed....*

---

arenicolous *(adjective)*

Growing or living or burrowing in sand.

- *Arenicolous worms.*
- *It is useful to describe something as "arenicolous" when it is growing or living or burrowing in sand.*

---

arere *(noun)*

Large west African tree having large palmately lobed leaves and axillary cymose panicles of small white flowers and one-winged seeds; yields soft white to pale yellow wood.

- *They discussed "arere" during the group presentation.*
- *Understanding "arere" helps you talk about this topic clearly.*

---

areteria cervicalis *(noun)*

An artery that supplies the muscles of the neck.

- *In class, the teacher used "areteria cervicalis" to mean an artery that supplies the muscles of the neck.*
- *They discussed "areteria cervicalis" during the group presentation.*

---

argasid *(noun)*

Tick lacking a dorsal shield and having mouth parts on the under side of the head.

- *They discussed "argasid" during the group presentation.*
- *He looked up "argasid" because he had never seen it before.*

---

argentic *(adjective)*

Relating to compounds in which silver is bivalent.

- *A "argentic" approach may work better in this case.*
- *The speaker chose "argentic" because it captured the feeling precisely.*

---

argentiferous *(adjective)*

Containing or yielding silver.

- *Argentiferous ore.*
- *Would you call this situation "argentiferous"? Explain why.*

---

argentinidae *(noun)*

Small marine soft-finned fishes with long silvery bodies; related to salmons and trouts.

- *They discussed "argentinidae" during the group presentation.*
- *She wrote a short paragraph that included "argentinidae."*

---

argentinosaur *(noun)*

Huge herbivorous dinosaur of Cretaceous found in Argentina.

- *In class, the teacher used "argentinosaur" to mean huge herbivorous dinosaur of cretaceous found in....*
- *Understanding "argentinosaur" helps you talk about this topic clearly.*

---

argentite *(noun)*

A valuable silver ore consisting of silver sulfide (Ag2S).

- *The article explained what "argentite" means with a simple example.*
- *Understanding "argentite" helps you talk about this topic clearly.*

---

argentous *(adjective)*

Relating to compounds in which silver is univalent.

- *It is useful to describe something as "argentous" when it is relating to compounds in which silver is univalent.*
- *The speaker chose "argentous" because it captured the feeling precisely.*

---

argil *(noun)*

A white clay (especially a white clay used by potters).

- *They discussed "argil" during the group presentation.*
- *Understanding "argil" helps you talk about this topic clearly.*

---

argiopidae *(noun)*

Spiders that spin orb webs; cosmopolitan in distribution.

- *She wrote a short paragraph that included "argiopidae."*
- *He looked up "argiopidae" because he had never seen it before.*

---

argle-bargle *(noun)*

A verbal dispute; a wrangling argument.

- *She wrote a short paragraph that included "argle-bargle."*
- *They discussed "argle-bargle" during the group presentation.*

---

argonauta *(noun)*

Type genus of the family Argonautidae: paper nautilus.

- *Understanding "argonauta" helps you talk about this topic clearly.*
- *They discussed "argonauta" during the group presentation.*

---

argonauta argo *(noun)*

Cephalopod mollusk of warm seas whose females have delicate papery spiral shells.

- *The article explained what "argonauta argo" means with a simple example.*
- *In class, the teacher used "argonauta argo" to mean cephalopod mollusk of warm seas whose females have....*

---

argonautidae *(noun)*

Represented solely by the genus Argonauta.

- *Understanding "argonautidae" helps you talk about this topic clearly.*
- *The article explained what "argonautidae" means with a simple example.*

---

argonon *(noun)*

Any of the chemically inert gaseous elements of the helium group in the periodic table.

- *In class, the teacher used "argonon" to mean any of the chemically inert gaseous elements of the....*
- *The article explained what "argonon" means with a simple example.*

---

argufy *(verb)*

Have a disagreement over something.

- *Learners should practice how to use "argufy" in real sentences.*
- *In everyday English, people use "argufy" when talking about this idea.*

---

argusianus *(noun)*

Argus pheasants.

- *He looked up "argusianus" because he had never seen it before.*
- *She wrote a short paragraph that included "argusianus."*

---

argynnis *(noun)*

Fritillaries.

- *They discussed "argynnis" during the group presentation.*
- *The article explained what "argynnis" means with a simple example.*

---

argyranthemum *(noun)*

Comprises plants often included in the genus Chrysanthemum.

- *Understanding "argyranthemum" helps you talk about this topic clearly.*
- *They discussed "argyranthemum" during the group presentation.*

---

argyranthemum frutescens *(noun)*

Perennial subshrub of the Canary Islands having usually pale yellow daisylike flowers; often included in genus Chrysanthemum.

- *Understanding "argyranthemum frutescens" helps you talk about this topic clearly.*
- *He looked up "argyranthemum frutescens" because he had never seen it before.*

---

argyreia *(noun)*

Woody climbers of tropical Asia to Australia.

- *In class, the teacher used "argyreia" to mean woody climbers of tropical asia to australia.*
- *He looked up "argyreia" because he had never seen it before.*

---

argyrodite *(noun)*

A rare steel-grey mineral consisting of silver and germanium and sulfur.

- *Understanding "argyrodite" helps you talk about this topic clearly.*
- *They discussed "argyrodite" during the group presentation.*

---

argyrol *(noun)*

Antiseptic consisting of a compound of protein and silver (trade name Argyrol).

- *In class, the teacher used "argyrol" to mean antiseptic consisting of a compound of protein and....*
- *They discussed "argyrol" during the group presentation.*

---

argyrotaenia *(noun)*

Orange tortrix.

- *Understanding "argyrotaenia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "argyrotaenia."*

---

argyrotaenia citrana *(noun)*

California moth whose larvae live in especially oranges.

- *He looked up "argyrotaenia citrana" because he had never seen it before.*
- *They discussed "argyrotaenia citrana" during the group presentation.*

---

argyroxiphium *(noun)*

Small genus of Hawaiian spreading and rosette-forming shrubs.

- *He looked up "argyroxiphium" because he had never seen it before.*
- *In class, the teacher used "argyroxiphium" to mean small genus of hawaiian spreading and....*

argyroxiphium sandwicense *(noun)*

Low-growing plant found only in volcanic craters on Hawaii having rosettes of narrow pointed silver-green leaves and clusters of profuse red-purple flowers on a tall stem.

- *Understanding "argyroxiphium sandwicense" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "argyroxiphium sandwicense."*

arhant *(noun)*

A Buddhist who has attained nirvana.

- *Understanding "arhant" helps you talk about this topic clearly.*
- *The article explained what "arhant" means with a simple example.*

arianist *(noun)*

An adherent of Arianism (the belief that Jesus Christ was not truly God).

- *She wrote a short paragraph that included "arianist."*
- *They discussed "arianist" during the group presentation.*

arianrod *(noun)*

Celtic goddess famous for her beauty; mother of Dylan.

- *Understanding "arianrod" helps you talk about this topic clearly.*
- *The article explained what "arianrod" means with a simple example.*

aricara *(noun)*

The Caddoan language spoken by the Arikara.

- *The article explained what "aricara" means with a simple example.*
- *Understanding "aricara" helps you talk about this topic clearly.*

aridness *(noun)*

A deficiency of moisture (especially when resulting from a permanent absence of rainfall).

- *They discussed "aridness" during the group presentation.*
- *Understanding "aridness" helps you talk about this topic clearly.*

ariidae *(noun)*

Sea catfishes.

- *They discussed "ariidae" during the group presentation.*
- *She wrote a short paragraph that included "ariidae."*

ariled *(adjective)*

(of some seeds) having a fleshy and usually brightly colored cover.

- *Her writing became clearer after she learned "ariled."*
- *Students compared "ariled" with similar adjectives in the lesson.*

arillate *(adjective)*

(of some seeds) having a fleshy and usually brightly colored cover.

- *It is useful to describe something as "arillate" when it is (of some seeds) having a fleshy and usually....*
- *The speaker chose "arillate" because it captured the feeling precisely.*

arilus *(noun)*

A genus of Reduviidae.

- *Understanding "arilus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "arilus."*

arilus cristatus *(noun)*

Large predatory North American bug that sucks the blood of other insects.

- *Understanding "arilus cristatus" helps you talk about this topic clearly.*
- *They discussed "arilus cristatus" during the group presentation.*

ariocarpus *(noun)*

Slow-growing geophytic cacti; northern and eastern Mexico; southern Texas.

- *She wrote a short paragraph that included "ariocarpus."*
- *Understanding "ariocarpus" helps you talk about this topic clearly.*

---

ariocarpus fissuratus *(noun)*

Usually unbranched usually spineless cactus covered with warty tubercles and having magenta flowers and white or green fruit; resembles the related mescal; northeastern Mexico and southwestern United States.

- *In class, the teacher used "ariocarpus fissuratus" to mean usually unbranched usually spineless cactus covered....*
- *The article explained what "ariocarpus fissuratus" means with a simple example.*

---

ariomma *(noun)*

A genus of Stromateidae.

- *He looked up "ariomma" because he had never seen it before.*
- *In class, the teacher used "ariomma" to mean a genus of stromateidae.*

---

ariose *(adjective)*

Having a melody (as distinguished from recitative).

- *Her writing became clearer after she learned "ariose."*
- *Students compared "ariose" with similar adjectives in the lesson.*

---

arisaema atrorubens *(noun)*

Common American spring-flowering woodland herb having sheathing leaves and an upright club-shaped spadix with overarching green and purple spathe producing scarlet berries.

- *He looked up "arisaema atrorubens" because he had never seen it before.*
- *She wrote a short paragraph that included "arisaema atrorubens."*

---

arisaema dracontium *(noun)*

Early spring-flowering plant of eastern North America resembling the related jack-in-the-pulpit but having digitate leaves, slender greenish yellow spathe and elongated spadix.

- *She wrote a short paragraph that included "arisaema dracontium."*
- *He looked up "arisaema dracontium" because he had never seen it before.*

---

arisaema triphyllum *(noun)*

Common American spring-flowering woodland herb having sheathing leaves and an upright club-shaped spadix with overarching green and purple spathe producing scarlet berries.

- *She wrote a short paragraph that included "arisaema triphyllum."*
- *Understanding "arisaema triphyllum" helps you talk about this topic clearly.*

---

arisarum *(noun)*

Tuberous or rhizomatous perennial herbs; mainly Mediterranean area.

- *He looked up "arisarum" because he had never seen it before.*
- *She wrote a short paragraph that included "arisarum."*

---

arisarum vulgare *(noun)*

Tuberous perennial having a cowl-shaped maroon or violet-black spathe; Mediterranean; Canaries; Azores.

- *Understanding "arisarum vulgare" helps you talk about this topic clearly.*
- *The article explained what "arisarum vulgare" means with a simple example.*

---

arishth *(noun)*

Large semi-evergreen tree of the East Indies; trunk exudes a tenacious gum; bitter bark used as a tonic; seeds yield an aromatic oil; sometimes placed in genus Melia.

- *They discussed "arishth" during the group presentation.*
- *The article explained what "arishth" means with a simple example.*

---

aristocort *(noun)*

A synthetic corticosteroid (trade names Aristocort or Aristopak or Kenalog) used as an anti-inflammatory agent.

- *In class, the teacher used "aristocort" to mean a synthetic corticosteroid (trade names aristocort....*
- *They discussed "aristocort" during the group presentation.*

---

aristocratical *(adjective)*

Belonging to or characteristic of the nobility or aristocracy.

- *A "aristocratical" approach may work better in this case.*

- *It is useful to describe something as "aristocratical" when it is belonging to or characteristic of the nobility or....*

---

aristolochia clematitis *(noun)*

Creeping plant having curving flowers thought to resemble fetuses; native to Europe; naturalized Great Britain and eastern North America.

- *The article explained what "aristolochia clematitis" means with a simple example.*
- *They discussed "aristolochia clematitis" during the group presentation.*

---

aristolochia durior *(noun)*

Hardy deciduous vine having large leaves and flowers with the calyx tube curved like the bowl of a pipe.

- *She wrote a short paragraph that included "aristolochia durior."*
- *He looked up "aristolochia durior" because he had never seen it before.*

---

aristolochia serpentaria *(noun)*

Birthwort of the eastern United States woodlands.

- *In class, the teacher used "aristolochia serpentaria" to mean birthwort of the eastern united states woodlands.*
- *The article explained what "aristolochia serpentaria" means with a simple example.*

---

aristolochiaceae *(noun)*

Family of birthworts (including wild ginger).

- *In class, the teacher used "aristolochiaceae" to mean family of birthworts (including wild ginger).*
- *Understanding "aristolochiaceae" helps you talk about this topic clearly.*

---

aristolochiales *(noun)*

Order of plants distinguished by tubular petaloid perianth and inferior ovary.

- *He looked up "aristolochiales" because he had never seen it before.*
- *They discussed "aristolochiales" during the group presentation.*

---

aristopak *(noun)*

A synthetic corticosteroid (trade names Aristocort or Aristopak or Kenalog) used as an anti-inflammatory agent.

- *Understanding "aristopak" helps you talk about this topic clearly.*
- *He looked up "aristopak" because he had never seen it before.*

---

aristotelean *(adjective)*

Of or relating to Aristotle or his philosophy.

- *Aristotelean logic.*
- *Her writing became clearer after she learned "aristotelean."*

---

aristotelia *(noun)*

Small genus of shrubs or small trees of Australia and New Zealand and western South America.

- *The article explained what "aristotelia" means with a simple example.*
- *They discussed "aristotelia" during the group presentation.*

---

aristotelia racemosa *(noun)*

Graceful deciduous shrub or small tree having attractive foliage and small red berries that turn black at maturity and are used for making wine.

- *Understanding "aristotelia racemosa" helps you talk about this topic clearly.*
- *In class, the teacher used "aristotelia racemosa" to mean graceful deciduous shrub or small tree having....*

---

aristotelia serrata *(noun)*

Graceful deciduous shrub or small tree having attractive foliage and small red berries that turn black at maturity and are used for making wine.

- *The article explained what "aristotelia serrata" means with a simple example.*
- *In class, the teacher used "aristotelia serrata" to mean graceful deciduous shrub or small tree having....*

---

aristotelic *(adjective)*

Of or relating to Aristotle or his philosophy.

- *A "aristotelic" approach may work better in this case.*
- *Would you call this situation "aristotelic"? Explain why.*

---

arithmancy *(noun)*

Divination by means of numbers.

- *He looked up "arithmancy" because he had never seen it before.*
- *In class, the teacher used "arithmancy" to mean divination by means of numbers.*

arithmetician *(noun)*

Someone who specializes in arithmetic.

- *He looked up "arithmetician" because he had never seen it before.*
- *She wrote a short paragraph that included "arithmetician."*

arkansawyer *(noun)*

A native or resident of Arkansas.

- *He looked up "arkansawyer" because he had never seen it before.*
- *In class, the teacher used "arkansawyer" to mean a native or resident of arkansas.*

armadillidium *(noun)*

Type genus of the Armadillidiidae.

- *In class, the teacher used "armadillidium" to mean type genus of the armadillidiidae.*
- *The article explained what "armadillidium" means with a simple example.*

armerican cheddar *(noun)*

Hard smooth-textured cheese; originally made in Cheddar in southwestern England.

- *She wrote a short paragraph that included "armerican cheddar."*
- *He looked up "armerican cheddar" because he had never seen it before.*

armet *(noun)*

A medieval helmet with a visor and a neck guard.

- *The article explained what "armet" means with a simple example.*
- *She wrote a short paragraph that included "armet."*

armguard *(noun)*

A protective covering for the wrist or arm that is used in archery and fencing and other sports.

- *They discussed "armguard" during the group presentation.*
- *He looked up "armguard" because he had never seen it before.*

armilla *(noun)*

A celestial globe consisting of metal hoops; used by early astronomers to determine the positions of stars.

- *In class, the teacher used "armilla" to mean a celestial globe consisting of metal hoops; used....*
- *They discussed "armilla" during the group presentation.*

armillaria caligata *(noun)*

Fungus with a brown cap and white gills and a membranous ring halfway up the stalk.

- *In class, the teacher used "armillaria caligata" to mean fungus with a brown cap and white gills and a....*
- *They discussed "armillaria caligata" during the group presentation.*

armillaria zelleri *(noun)*

A large fungus with viscid cap that dries and turns brown with age; gills are off-white.

- *The article explained what "armillaria zelleri" means with a simple example.*
- *They discussed "armillaria zelleri" during the group presentation.*

armillariella *(noun)*

A honey-colored diminutive form of genus Armillaria; grows in clusters; edible (when cooked) but most attention has been on how to get rid of it.

- *The article explained what "armillariella" means with a simple example.*
- *In class, the teacher used "armillariella" to mean a honey-colored diminutive form of genus....*

armillariella mellea *(noun)*

A honey-colored edible mushroom commonly associated with the roots of trees in late summer and fall; do not eat raw.

- *They discussed “armillariella mellea” during the group presentation.*
- *Understanding “armillariella mellea” helps you talk about this topic clearly.*

---

armlike *(adjective)*

Resembling an arm.

- *The speaker chose “armlike” because it captured the feeling precisely.*
- *It is useful to describe something as “armlike” when it is resembling an arm.*

---

armoracia *(noun)*

Horseradish.

- *She wrote a short paragraph that included “armoracia.”*
- *He looked up “armoracia” because he had never seen it before.*

---

armoracia rusticana *(noun)*

Coarse Eurasian plant cultivated for its thick white pungent root.

- *She wrote a short paragraph that included “armoracia rusticana.”*
- *He looked up “armoracia rusticana” because he had never seen it before.*

---

armored searobin *(noun)*

Sea robins having bony scutes on the body and barbels on the chin; found mostly on the continental slope.

- *The article explained what “armored searobin” means with a simple example.*
- *In class, the teacher used “armored searobin” to mean sea robins having bony scutes on the body and....*

---

arnoseris *(noun)*

Lamb succory.

- *He looked up “arnoseris” because he had never seen it before.*
- *In class, the teacher used “arnoseris” to mean lamb succory.*

---

arnoseris minima *(noun)*

Small European herb with small yellow flowers.

- *They discussed “arnoseris minima” during the group presentation.*
- *She wrote a short paragraph that included “arnoseris minima.”*

---

aroeira blanca *(noun)*

Small resinous tree or shrub of Brazil.

- *In class, the teacher used “aroeira blanca” to mean small resinous tree or shrub of brazil.*
- *Understanding “aroeira blanca” helps you talk about this topic clearly.*

---

arolla pine *(noun)*

Large five-needled European pine; yields cembra nuts and a resinous exudate.

- *The article explained what “arolla pine” means with a simple example.*
- *They discussed “arolla pine” during the group presentation.*

---

aromatise *(verb)*

Fill or impregnate with an odor.

- *He did not know how to use “aromatise” until he saw an example.*
- *In everyday English, people use “aromatise” when talking about this idea.*

---

aromatize *(verb)*

Fill or impregnate with an odor.

- *Learners should practice how to use “aromatize” in real sentences.*
- *The coach explained when to use “aromatize” and when to wait.*

---

arouser *(noun)*

Someone who rouses others from sleep.

- *She wrote a short paragraph that included “arouser.”*
- *They discussed “arouser” during the group presentation.*

arpent *(noun)*

A former French unit of area; equal approximately to an acre.

- *Understanding "arpent" helps you talk about this topic clearly.*
- *In class, the teacher used "arpent" to mean a former french unit of area; equal approximately....*

arrhenatherum elatius *(noun)*

Coarse perennial Eurasian grass resembling oat; found on roadside verges and rough grassland and in hay meadows; introduced in North America for forage.

- *They discussed "arrhenatherum elatius" during the group presentation.*
- *She wrote a short paragraph that included "arrhenatherum elatius."*

arrhythmical *(adjective)*

Without regard for rhythm.

- *Students compared "arrhythmical" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "arrhythmical."*

arriere pensee *(noun)*

An unstated doubt that prevents you from accepting something wholeheartedly.

- *Understanding "arriere pensee" helps you talk about this topic clearly.*
- *The article explained what "arriere pensee" means with a simple example.*

arrogation *(noun)*

Seizure by the government.

- *He looked up "arrogation" because he had never seen it before.*
- *She wrote a short paragraph that included "arrogation."*

arrogator *(noun)*

A person who through conceit makes pretentious claims to rights or advantages that he or she is not entitled to or to qualities that he or she does not possess.

- *They discussed "arrogator" during the group presentation.*
- *Understanding "arrogator" helps you talk about this topic clearly.*

arrowleaf groundsel *(noun)*

Perennial with sharply toothed triangular leaves on leafy stems bearing a cluster of yellow flower heads; moist places in mountains of western North America.

- *In class, the teacher used "arrowleaf groundsel" to mean perennial with sharply toothed triangular leaves on....*
- *The article explained what "arrowleaf groundsel" means with a simple example.*

arrowworm *(noun)*

Any worm of the Chaetognatha; transparent marine worm with horizontal lateral and caudal fins and a row of movable curved spines at each side of the mouth.

- *In class, the teacher used "arrowworm" to mean any worm of the chaetognatha; transparent marine....*
- *They discussed "arrowworm" during the group presentation.*

arsenious *(adjective)*

Relating to compounds in which arsenic is trivalent.

- *Her writing became clearer after she learned "arsenious."*
- *Students compared "arsenious" with similar adjectives in the lesson.*

arsenous anhydride *(noun)*

A white powdered poisonous trioxide of arsenic; used in manufacturing glass and as a pesticide (rat poison) and weed killer.

- *He looked up "arsenous anhydride" because he had never seen it before.*
- *Understanding "arsenous anhydride" helps you talk about this topic clearly.*

arsenous oxide *(noun)*

A white powdered poisonous trioxide of arsenic; used in manufacturing glass and as a pesticide (rat poison) and weed killer.

- *The article explained what "arsenous oxide" means with a simple example.*
- *In class, the teacher used "arsenous oxide" to mean a white powdered poisonous trioxide of arsenic;....*

artamidae *(noun)*

Wood swallows.

- *In class, the teacher used "artamidae" to mean wood swallows.*
- *The article explained what "artamidae" means with a simple example.*

---

artamus *(noun)*

Type genus of the Artamidae.

- *The article explained what "artamus" means with a simple example.*
- *They discussed "artamus" during the group presentation.*

---

artemis pontica *(noun)*

European wormwood; minor source of absinthe.

- *The article explained what "artemis pontica" means with a simple example.*
- *In class, the teacher used "artemis pontica" to mean european wormwood; minor source of absinthe.*

---

artemis spinescens *(noun)*

A perennial that is valuable as sheep forage in the United States.

- *In class, the teacher used "artemis spinescens" to mean a perennial that is valuable as sheep forage in the....*
- *He looked up "artemis spinescens" because he had never seen it before.*

---

artemisia abrotanum *(noun)*

Shrubby European wormwood naturalized in North America; sometimes used in brewing beer.

- *He looked up "artemisia abrotanum" because he had never seen it before.*
- *She wrote a short paragraph that included "artemisia abrotanum."*

---

artemisia filifolia *(noun)*

Silver-haired shrub of central and southern United States and Mexico; a troublesome weed on rangelands.

- *Understanding "artemisia filifolia" helps you talk about this topic clearly.*
- *He looked up "artemisia filifolia" because he had never seen it before.*

---

artemisia gnaphalodes *(noun)*

Perennial cottony-white herb of southwestern United States.

- *She wrote a short paragraph that included "artemisia gnaphalodes."*
- *They discussed "artemisia gnaphalodes" during the group presentation.*

---

artemisia ludoviciana *(noun)*

Perennial cottony-white herb of southwestern United States.

- *He looked up "artemisia ludoviciana" because he had never seen it before.*
- *She wrote a short paragraph that included "artemisia ludoviciana."*

---

artemisia stelleriana *(noun)*

Herb with greyish leaves found along the east coast of North America; used as an ornamental plant.

- *The article explained what "artemisia stelleriana" means with a simple example.*
- *Understanding "artemisia stelleriana" helps you talk about this topic clearly.*

---

artemision at ephesus *(noun)*

The large temple of the Greek goddess Artemis which was begun at Ephesus in 541 BC and completed 220 years later; the temple was destroyed by the Goths in 262.

- *She wrote a short paragraph that included "artemision at ephesus."*
- *He looked up "artemision at ephesus" because he had never seen it before.*

---

arteria alveolaris *(noun)*

A branch of the maxillary artery that supplies the alveolar process.

- *Understanding "arteria alveolaris" helps you talk about this topic clearly.*
- *In class, the teacher used "arteria alveolaris" to mean a branch of the maxillary artery that supplies the....*

---

arteria alveolaris inferior *(noun)*

The alveolar artery that goes through the mandibular canal to supply the lower teeth.

- *Understanding "arteria alveolaris inferior" helps you talk about this topic clearly.*

- *He looked up “arteria alveolaris inferior” because he had never seen it before.*

arteria alveolaris superior *(noun)*

The alveolar artery that supplies the upper teeth.

- *They discussed “arteria alveolaris superior” during the group presentation.*
- *He looked up “arteria alveolaris superior” because he had never seen it before.*

arteria appendicularis *(noun)*

The branch of the ileocolic artery that supplies the vermiform appendix.

- *In class, the teacher used “arteria appendicularis” to mean the branch of the ileocolic artery that supplies....*
- *They discussed “arteria appendicularis” during the group presentation.*

arteria ascendens *(noun)*

The branch of the ileocolic artery that supplies the ascending colon.

- *Understanding “arteria ascendens” helps you talk about this topic clearly.*
- *He looked up “arteria ascendens” because he had never seen it before.*

arteria auricularis *(noun)*

Artery that supplies blood to the ear.

- *Understanding “arteria auricularis” helps you talk about this topic clearly.*
- *He looked up “arteria auricularis” because he had never seen it before.*

arteria basilaris *(noun)*

An unpaired artery; supplies the pons and cerebellum and the back part of the cerebrum and the inner ear.

- *Understanding “arteria basilaris” helps you talk about this topic clearly.*
- *In class, the teacher used “arteria basilaris” to mean an unpaired artery; supplies the pons and....*

arteria buccalis *(noun)*

A branch of the maxillary artery that supplies blood to the buccinator muscle and the cheek.

- *In class, the teacher used “arteria buccalis” to mean a branch of the maxillary artery that supplies....*
- *The article explained what “arteria buccalis” means with a simple example.*

arteria bulbi penis *(noun)*

A branch of the internal pudendal artery of males that supplies the bulb of the penis.

- *They discussed “arteria bulbi penis” during the group presentation.*
- *Understanding “arteria bulbi penis” helps you talk about this topic clearly.*

arteria bulbi vestibuli *(noun)*

A branch of the internal pudendal artery in females that supplies the bulb of the vestibule.

- *She wrote a short paragraph that included “arteria bulbi vestibuli.”*
- *The article explained what “arteria bulbi vestibuli” means with a simple example.*

arteria carotis *(noun)*

Either of two major arteries of the neck and head; branches from the aorta.

- *The article explained what “arteria carotis” means with a simple example.*
- *Understanding “arteria carotis” helps you talk about this topic clearly.*

arteria celiaca *(noun)*

An artery that originates from the abdominal aorta just below the diaphragm and branches into the left gastric artery and the common hepatic artery and the splenic artery.

- *In class, the teacher used “arteria celiaca” to mean an artery that originates from the abdominal aorta....*
- *He looked up “arteria celiaca” because he had never seen it before.*

arteria centralis retinae *(noun)*

A branch of the ophthalmic artery; enters the eyeball with the optic nerve.

- *The article explained what “arteria centralis retinae” means with a simple example.*
- *She wrote a short paragraph that included “arteria centralis retinae.”*

arteria cerebelli *(noun)*

An artery that supplies the cerebellum.

- *She wrote a short paragraph that included “arteria cerebelli.”*
- *Understanding “arteria cerebelli” helps you talk about this topic clearly.*

arteria choroidea *(noun)*

An artery that supplies the choroid plexus.

- *Understanding “arteria choroidea” helps you talk about this topic clearly.*
- *The article explained what “arteria choroidea” means with a simple example.*

arteria circumflexa femoris *(noun)*

An artery that supplies the hip joint and thigh muscles.

- *In class, the teacher used “arteria circumflexa femoris” to mean an artery that supplies the hip joint and thigh muscles.*
- *The article explained what “arteria circumflexa femoris” means with a simple example.*

arteria circumflexa humeri *(noun)*

An artery that supplies the shoulder joint and shoulder muscles.

- *She wrote a short paragraph that included “arteria circumflexa humeri.”*
- *They discussed “arteria circumflexa humeri” during the group presentation.*

arteria circumflexa ilium *(noun)*

An artery that supplies the lower abdominal walls and skin and the sartorius muscle.

- *The article explained what “arteria circumflexa ilium” means with a simple example.*
- *Understanding “arteria circumflexa ilium” helps you talk about this topic clearly.*

arteria circumflexa scapulae *(noun)*

An artery that serves the muscles of the shoulder and scapular area.

- *They discussed “arteria circumflexa scapulae” during the group presentation.*
- *The article explained what “arteria circumflexa scapulae” means with a simple example.*

arteria colica *(noun)*

Arteries that supply blood to the colon.

- *The article explained what “arteria colica” means with a simple example.*
- *They discussed “arteria colica” during the group presentation.*

arteria communicans *(noun)*

Any of three arteries in the brain that make up the circle of Willis.

- *She wrote a short paragraph that included “arteria communicans.”*
- *The article explained what “arteria communicans” means with a simple example.*

arteria cystica *(noun)*

A branch of the hepatic artery; supplies the gall bladder and the surface of the liver.

- *He looked up “arteria cystica” because he had never seen it before.*
- *She wrote a short paragraph that included “arteria cystica.”*

arteria epigastrica *(noun)*

One of three arteries supplying the anterior walls of the abdomen.

- *Understanding “arteria epigastrica” helps you talk about this topic clearly.*
- *In class, the teacher used “arteria epigastrica” to mean one of three arteries supplying the anterior walls....*

arteria ethmoidalis *(noun)*

A branch of the ophthalmic artery supplying structures in and around the nasal capsule.

- *The article explained what “arteria ethmoidalis” means with a simple example.*
- *She wrote a short paragraph that included “arteria ethmoidalis.”*

arteria facialis *(noun)*

An artery that originates in the external carotid and gives off branches that supply the neck and face.

- *Understanding “arteria facialis” helps you talk about this topic clearly.*
- *He looked up “arteria facialis” because he had never seen it before.*

---

arteria femoralis *(noun)*

The chief artery of the thigh; a continuation of the external iliac artery.

- *He looked up “arteria femoralis” because he had never seen it before.*
- *She wrote a short paragraph that included “arteria femoralis.”*

---

arteria gastrica *(noun)*

The arteries that supply the walls of the stomach.

- *Understanding “arteria gastrica” helps you talk about this topic clearly.*
- *They discussed “arteria gastrica” during the group presentation.*

---

arteria gastrica breves *(noun)*

Several small arteries branching off of the splenic artery and going to the greater curvature of the stomach.

- *The article explained what “arteria gastrica breves” means with a simple example.*
- *In class, the teacher used “arteria gastrica breves” to mean several small arteries branching off of the splenic....*

---

arteria gastrica sinistra *(noun)*

A branch of the celiac artery that supplies the lesser curvature of the stomach and the abdominal part of the esophagus.

- *They discussed “arteria gastrica sinistra” during the group presentation.*
- *He looked up “arteria gastrica sinistra” because he had never seen it before.*

---

arteria ileocolica *(noun)*

An artery that originates from the superior mesenteric artery and supplies the terminal part of the ileum and the cecum and the vermiform appendix and the ascending colon.

- *Understanding “arteria ileocolica” helps you talk about this topic clearly.*
- *In class, the teacher used “arteria ileocolica” to mean an artery that originates from the superior....*

---

arteria iliaca *(noun)*

One of the large arteries supplying blood to the pelvis and legs.

- *She wrote a short paragraph that included “arteria iliaca.”*
- *The article explained what “arteria iliaca” means with a simple example.*

---

arteria iliolumbalis *(noun)*

An artery that originates in the internal iliac artery and supplies the pelvic muscles and bones.

- *He looked up “arteria iliolumbalis” because he had never seen it before.*
- *In class, the teacher used “arteria iliolumbalis” to mean an artery that originates in the internal iliac....*

---

arteria infraorbitalis *(noun)*

An artery that originates from the maxillary artery and supplies structures below the orbit (from lower eyelid to upper lip).

- *They discussed “arteria infraorbitalis” during the group presentation.*
- *In class, the teacher used “arteria infraorbitalis” to mean an artery that originates from the maxillary artery....*

---

arteria intercostalis *(noun)*

Several arteries and supplying the intercostal spaces of the rib cage.

- *He looked up “arteria intercostalis” because he had never seen it before.*
- *She wrote a short paragraph that included “arteria intercostalis.”*

---

arteria lacrimalis *(noun)*

An artery that originates from the ophthalmic artery and supplies the lacrimal gland and rectal eye muscles and the upper eyelid and the forehead.

- *The article explained what “arteria lacrimalis” means with a simple example.*
- *Understanding “arteria lacrimalis” helps you talk about this topic clearly.*

---

arteria laryngea *(noun)*

Either of two arteries that supply blood to the larynx.

- *She wrote a short paragraph that included “arteria laryngea.”*
- *The article explained what “arteria laryngea” means with a simple example.*

arteria lienalis *(noun)*

An artery that originates from the celiac trunk and supplies blood to the spleen.

- *They discussed "arteria lienalis" during the group presentation.*
- *The article explained what "arteria lienalis" means with a simple example.*

arteria lingualis *(noun)*

An artery originating from the external carotid artery and supplying the under side of the tongue.

- *He looked up "arteria lingualis" because he had never seen it before.*
- *Understanding "arteria lingualis" helps you talk about this topic clearly.*

arteria lumbalis *(noun)*

One of four or five pairs of arteries that originate in the abdominal aorta and supply the lumbar vertebrae and the back muscles and abdominal wall.

- *She wrote a short paragraph that included "arteria lumbalis."*
- *He looked up "arteria lumbalis" because he had never seen it before.*

arteria maxillaris *(noun)*

Either of two arteries branching from the external carotid artery and supplying structure of the face.

- *In class, the teacher used "arteria maxillaris" to mean either of two arteries branching from the external....*
- *The article explained what "arteria maxillaris" means with a simple example.*

arteria meningea *(noun)*

Any of three arteries supplying the meninges of the brain and neighboring structures.

- *He looked up "arteria meningea" because he had never seen it before.*
- *In class, the teacher used "arteria meningea" to mean any of three arteries supplying the meninges of the....*

arteria mesenterica *(noun)*

One of two branches of the aorta that pass between the two layers of the mesentery to the intestines.

- *In class, the teacher used "arteria mesenterica" to mean one of two branches of the aorta that pass between....*
- *The article explained what "arteria mesenterica" means with a simple example.*

arteria metacarpea *(noun)*

Dorsal and palmar arteries of the hand.

- *She wrote a short paragraph that included "arteria metacarpea."*
- *They discussed "arteria metacarpea" during the group presentation.*

arteria metatarsea *(noun)*

Dorsal and plantar arteries to the metatarsal region of the foot.

- *The article explained what "arteria metatarsea" means with a simple example.*
- *In class, the teacher used "arteria metatarsea" to mean dorsal and plantar arteries to the metatarsal....*

arteria musculophrenica *(noun)*

An artery that supplies the abdomen and intercostal muscles.

- *In class, the teacher used "arteria musculophrenica" to mean an artery that supplies the abdomen and intercostal....*
- *The article explained what "arteria musculophrenica" means with a simple example.*

arteria ophthalmica *(noun)*

A branch of the internal carotid artery that supplies the eye and neighboring structures.

- *In class, the teacher used "arteria ophthalmica" to mean a branch of the internal carotid artery that....*
- *They discussed "arteria ophthalmica" during the group presentation.*

arteria ovarica *(noun)*

The artery that branches from the aorta and supplies blood to the ovaries.

- *They discussed "arteria ovarica" during the group presentation.*
- *Understanding "arteria ovarica" helps you talk about this topic clearly.*

arteria pancreatica *(noun)*

A branch of the splenic artery that supplies the pancreas.

- *The article explained what “arteria pancreatica” means with a simple example.*
- *Understanding “arteria pancreatica” helps you talk about this topic clearly.*

---

arteria perinealis *(noun)*

A branch of the internal pudendal artery that supplies superficial structures of the perineum.

- *Understanding “arteria perinealis” helps you talk about this topic clearly.*
- *He looked up “arteria perinealis” because he had never seen it before.*

---

arteria poplitea *(noun)*

A continuation of the femoral artery that branches to supply the legs and feet.

- *In class, the teacher used “arteria poplitea” to mean a continuation of the femoral artery that branches....*
- *They discussed “arteria poplitea” during the group presentation.*

---

arteria pulmonalis *(noun)*

One of two arteries (branches of the pulmonary trunk) that carry venous blood from the heart to the lungs.

- *Understanding “arteria pulmonalis” helps you talk about this topic clearly.*
- *The article explained what “arteria pulmonalis” means with a simple example.*

---

arteria rectalis *(noun)*

One of the arteries supplying the rectal area.

- *They discussed “arteria rectalis” during the group presentation.*
- *He looked up “arteria rectalis” because he had never seen it before.*

---

arteria renalis *(noun)*

An artery originating from the abdominal aorta and supplying the kidneys and adrenal glands and ureters.

- *Understanding “arteria renalis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “arteria renalis.”*

---

arteria subclavia *(noun)*

Either of two arteries that supply blood to the neck and arms.

- *Understanding “arteria subclavia” helps you talk about this topic clearly.*
- *In class, the teacher used “arteria subclavia” to mean either of two arteries that supply blood to the....*

---

arteria testicularis *(noun)*

A branch of the aorta supplying the testicles.

- *Understanding “arteria testicularis” helps you talk about this topic clearly.*
- *He looked up “arteria testicularis” because he had never seen it before.*

---

arteria uterina *(noun)*

A branch of the internal iliac artery that supplies the uterus and the upper part of the vagina.

- *In class, the teacher used “arteria uterina” to mean a branch of the internal iliac artery that supplies....*
- *The article explained what “arteria uterina” means with a simple example.*

---

arteria vertebralis *(noun)*

The first branch of the subclavian artery; divided into four parts.

- *She wrote a short paragraph that included “arteria vertebralis.”*
- *He looked up “arteria vertebralis” because he had never seen it before.*

---

arterialise *(verb)*

Change venous blood into arterial blood.

- *In everyday English, people use “arterialise” when talking about this idea.*
- *She tried to use “arterialise” carefully so everyone would understand.*

---

arterialize *(verb)*

Change venous blood into arterial blood.

- *The coach explained when to use “arterialize” and when to wait.*

- *Can you use “arterialize” in a sentence that fits this situation?*

---

arteriectasia *(noun)*

An abnormal distension of an artery.

- *The article explained what “arteriectasia” means with a simple example.*
- *She wrote a short paragraph that included “arteriectasia.”*

---

arteriectasis *(noun)*

An abnormal distension of an artery.

- *The article explained what “arteriectasis” means with a simple example.*
- *They discussed “arteriectasis” during the group presentation.*

---

arteriola *(noun)*

One of the small thin-walled arteries that end in capillaries.

- *The article explained what “arteriola” means with a simple example.*
- *Understanding “arteriola” helps you talk about this topic clearly.*

---

arteriolosclerosis *(noun)*

Sclerosis of the arterioles.

- *He looked up “arteriolosclerosis” because he had never seen it before.*
- *She wrote a short paragraph that included “arteriolosclerosis.”*

---

arthralgic *(adjective)*

Of or relating to arthralgia.

- *Her writing became clearer after she learned “arthralgic.”*
- *The speaker chose “arthralgic” because it captured the feeling precisely.*

---

arthrocentesis *(noun)*

Removal of fluid from a joint by centesis.

- *In class, the teacher used “arthrocentesis” to mean removal of fluid from a joint by centesis.*
- *They discussed “arthrocentesis” during the group presentation.*

---

arthrogram *(noun)*

An X ray of a joint after the injection of a contrast medium.

- *They discussed “arthrogram” during the group presentation.*
- *She wrote a short paragraph that included “arthrogram.”*

---

arthrography *(noun)*

Roentgenographic examination of a joint after injection of radiopaque contrast medium; produces an arthrogram.

- *They discussed “arthrography” during the group presentation.*
- *Understanding “arthrography” helps you talk about this topic clearly.*

---

arthromere *(noun)*

Any of the segments in the body of a jointed animal like an arthropod.

- *She wrote a short paragraph that included “arthromere.”*
- *Understanding “arthromere” helps you talk about this topic clearly.*

---

arthromeric *(adjective)*

Of or relating to one of the body segments of jointed animals.

- *Would you call this situation “arthromeric”? Explain why.*
- *Students compared “arthromeric” with similar adjectives in the lesson.*

---

arthropodal *(adjective)*

Of or relating to invertebrates of the phylum Arthropoda.

- *Would you call this situation “arthropodal”? Explain why.*
- *Students compared “arthropodal” with similar adjectives in the lesson.*

---

arthropodan *(adjective)*

Of or relating to invertebrates of the phylum Arthropoda.

- *Students compared "arthropodan" with similar adjectives in the lesson.*
- *A "arthropodan" approach may work better in this case.*

---

arthropodous *(adjective)*

Of or relating to invertebrates of the phylum Arthropoda.

- *Would you call this situation "arthropodous"? Explain why.*
- *A "arthropodous" approach may work better in this case.*

---

arthropteris *(noun)*

Tropical and subtropical Old World epiphytic or lithophytic ferns.

- *They discussed "arthropteris" during the group presentation.*
- *She wrote a short paragraph that included "arthropteris."*

---

arthrospore *(noun)*

A body that resembles a spore but is not an endospore; produced by some bacteria.

- *The article explained what "arthrospore" means with a simple example.*
- *In class, the teacher used "arthrospore" to mean a body that resembles a spore but is not an....*

---

arthrosporic *(adjective)*

Of or relating to arthrospores.

- *Students compared "arthrosporic" with similar adjectives in the lesson.*
- *It is useful to describe something as "arthrosporic" when it is of or relating to arthrospores.*

---

arthrosporous *(adjective)*

Of or relating to arthrospores.

- *A "arthrosporous" approach may work better in this case.*
- *Students compared "arthrosporous" with similar adjectives in the lesson.*

---

arthur jacob arshawsky *(noun)*

United States clarinetist and leader of a swing band (1910-2004).

- *In class, the teacher used "arthur jacob arshawsky" to mean united states clarinetist and leader of a swing....*
- *The article explained what "arthur jacob arshawsky" means with a simple example.*

---

articulary *(adjective)*

Relating to or affecting the joints of the body.

- *Would you call this situation "articulary"? Explain why.*
- *The speaker chose "articulary" because it captured the feeling precisely.*

---

articulateness *(noun)*

The quality of being facile in speech and writing.

- *They discussed "articulateness" during the group presentation.*
- *He looked up "articulateness" because he had never seen it before.*

---

articulatio *(noun)*

(anatomy) the point of connection between two bones or elements of a skeleton (especially if it allows motion).

- *The article explained what "articulatio" means with a simple example.*
- *They discussed "articulatio" during the group presentation.*

---

articulatio coxae *(noun)*

The ball-and-socket joint between the head of the femur and the acetabulum.

- *They discussed "articulatio coxae" during the group presentation.*
- *The article explained what "articulatio coxae" means with a simple example.*

---

articulatio cubiti *(noun)*

Hinge joint between the forearm and upper arm and the corresponding joint in the forelimb of a quadruped.

- *The article explained what “articulatio cubiti” means with a simple example.*
- *She wrote a short paragraph that included “articulatio cubiti.”*

---

articulatio genus *(noun)*

Hinge joint in the human leg connecting the tibia and fibula with the femur and protected in front by the patella.

- *They discussed “articulatio genus” during the group presentation.*
- *In class, the teacher used “articulatio genus” to mean hinge joint in the human leg connecting the tibia....*

---

articulatio humeri *(noun)*

A ball-and-socket joint between the head of the humerus and a cavity of the scapula.

- *She wrote a short paragraph that included “articulatio humeri.”*
- *The article explained what “articulatio humeri” means with a simple example.*

---

articulatio plana *(noun)*

A freely moving joint in which the articulations allow only gliding motions.

- *She wrote a short paragraph that included “articulatio plana.”*
- *Understanding “articulatio plana” helps you talk about this topic clearly.*

---

articulatio radiocarpea *(noun)*

A joint between the distal end of the radius and the proximal row of carpal bones.

- *In class, the teacher used “articulatio radiocarpea” to mean a joint between the distal end of the radius and....*
- *The article explained what “articulatio radiocarpea” means with a simple example.*

---

articulatio spheroidea *(noun)*

A freely moving joint in which a sphere on the head of one bone fits into a rounded cavity in the other bone.

- *The article explained what “articulatio spheroidea” means with a simple example.*
- *She wrote a short paragraph that included “articulatio spheroidea.”*

---

articulatio synovialis *(noun)*

A joint so articulated as to move freely.

- *In class, the teacher used “articulatio synovialis” to mean a joint so articulated as to move freely.*
- *He looked up “articulatio synovialis” because he had never seen it before.*

---

articulatio talocruralis *(noun)*

A gliding joint between the distal ends of the tibia and fibula and the proximal end of the talus.

- *He looked up “articulatio talocruralis” because he had never seen it before.*
- *She wrote a short paragraph that included “articulatio talocruralis.”*

---

articulatio temporomandibularis *(noun)*

The joint between the head of the lower jawbone and the temporal bone.

- *Understanding “articulatio temporomandibularis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “articulatio temporomandibularis.”*

---

articulatio trochoidea *(noun)*

A freely moving joint in which movement is limited to rotation.

- *The articulation of the radius and ulna in the arm is a pivot joint.*
- *She wrote a short paragraph that included “articulatio trochoidea.”*

---

articulative *(adjective)*

Of or relating to articulation.

- *The speaker chose “articulative” because it captured the feeling precisely.*
- *Would you call this situation “articulative”? Explain why.*

---

artiodactylous *(adjective)*

Of or relating to or belonging to mammals of the order Artiodactyla.

- *The speaker chose “artiodactylous” because it captured the feeling precisely.*
- *Her writing became clearer after she learned “artiodactylous.”*

artium baccalaurens *(noun)*

A bachelor's degree in arts and sciences.

- *He looked up "artium baccalaurens" because he had never seen it before.*
- *In class, the teacher used "artium baccalaurens" to mean a bachelor's degree in arts and sciences.*

artocarpus altilis *(noun)*

Native to Pacific islands and having edible fruit with a texture like bread.

- *In class, the teacher used "artocarpus altilis" to mean native to pacific islands and having edible fruit....*
- *They discussed "artocarpus altilis" during the group presentation.*

artocarpus heterophyllus *(noun)*

East Indian tree cultivated for its immense edible fruit and seeds.

- *In class, the teacher used "artocarpus heterophyllus" to mean east indian tree cultivated for its immense edible....*
- *The article explained what "artocarpus heterophyllus" means with a simple example.*

artocarpus odoratissima *(noun)*

Philippine tree similar to the breadfruit tree bearing edible fruit.

- *She wrote a short paragraph that included "artocarpus odoratissima."*
- *They discussed "artocarpus odoratissima" during the group presentation.*

artsd *(noun)*

An honorary arts degree.

- *Understanding "artsd" helps you talk about this topic clearly.*
- *They discussed "artsd" during the group presentation.*

arui *(noun)*

Wild sheep of northern Africa.

- *She wrote a short paragraph that included "arui."*
- *He looked up "arui" because he had never seen it before.*

arulo *(noun)*

An artificial language intended for international use as an auxiliary language.

- *She wrote a short paragraph that included "arulo."*
- *The article explained what "arulo" means with a simple example.*

arum palaestinum *(noun)*

Ornamental plant of Middle East cultivated for its dark purple spathe.

- *In class, the teacher used "arum palaestinum" to mean ornamental plant of middle east cultivated for its....*
- *The article explained what "arum palaestinum" means with a simple example.*

arundinaceous *(adjective)*

Of or relating to or resembling reedlike plants of the genus Arundinaria.

- *Her writing became clearer after she learned "arundinaceous."*
- *Students compared "arundinaceous" with similar adjectives in the lesson.*

arundinaria *(noun)*

North American bamboo.

- *Understanding "arundinaria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "arundinaria."*

arundinaria gigantea *(noun)*

Tall grass of southern United States growing in thickets.

- *Understanding "arundinaria gigantea" helps you talk about this topic clearly.*
- *In class, the teacher used "arundinaria gigantea" to mean tall grass of southern united states growing in....*

arundinaria tecta *(noun)*

Small cane of watery or moist areas in southern United States.

- *They discussed "arundinaria tecta" during the group presentation.*
- *Understanding "arundinaria tecta" helps you talk about this topic clearly.*

---

arundo conspicua *(noun)*

Used by Maoris for thatching.

- *Understanding "arundo conspicua" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "arundo conspicua."*

---

arundo richardii *(noun)*

Tall grass of New Zealand grown for plumelike flower heads.

- *He looked up "arundo richardii" because he had never seen it before.*
- *Understanding "arundo richardii" helps you talk about this topic clearly.*

---

aruru *(noun)*

Mother and earth goddess in Gilgamish epic; identified with Sumerian Ki and Ninkhursag.

- *She wrote a short paragraph that included "aruru."*
- *They discussed "aruru" during the group presentation.*

---

arvicola *(noun)*

In some classifications considered synonymous with Microtus.

- *The article explained what "arvicola" means with a simple example.*
- *In class, the teacher used "arvicola" to mean in some classifications considered synonymous with....*

---

arvicola amphibius *(noun)*

Common large Eurasian vole.

- *She wrote a short paragraph that included "arvicola amphibius."*
- *He looked up "arvicola amphibius" because he had never seen it before.*

---

arytaenoid *(noun)*

Either of two small cartilages at the back of the larynx to which the vocal folds are attached.

- *He looked up "arytaenoid" because he had never seen it before.*
- *In class, the teacher used "arytaenoid" to mean either of two small cartilages at the back of the....*

---

asa yoelson *(noun)*

United States singer (born in Russia) who appeared in the first full-length talking film (1886-1950).

- *Understanding "asa yoelson" helps you talk about this topic clearly.*
- *The article explained what "asa yoelson" means with a simple example.*

---

asadha *(noun)*

The fourth month of the Hindu calendar.

- *He looked up "asadha" because he had never seen it before.*
- *She wrote a short paragraph that included "asadha."*

---

asamiya *(noun)*

The Magadhan language spoken by the Assamese people; closely related to Bengali.

- *The article explained what "asamiya" means with a simple example.*
- *In class, the teacher used "asamiya" to mean the magadhan language spoken by the assamese....*

---

asarabacca *(noun)*

Thick creeping evergreen herb of western Europe.

- *Understanding "asarabacca" helps you talk about this topic clearly.*
- *In class, the teacher used "asarabacca" to mean thick creeping evergreen herb of western europe.*

---

asarh *(noun)*

The fourth month of the Hindu calendar.

- *They discussed "asarh" during the group presentation.*

- *Understanding “asarh” helps you talk about this topic clearly.*

---

asarum europaeum *(noun)*

Thick creeping evergreen herb of western Europe.

- *He looked up “asarum europaeum” because he had never seen it before.*
- *She wrote a short paragraph that included “asarum europaeum.”*

---

asarum shuttleworthii *(noun)*

Wild ginger having persistent heart-shaped pungent leaves; West Virginia to Alabama.

- *In class, the teacher used “asarum shuttleworthii” to mean wild ginger having persistent heart-shaped pungent....*
- *He looked up “asarum shuttleworthii” because he had never seen it before.*

---

asarum virginicum *(noun)*

Evergreen low-growing perennial having mottled green and silvery-grey heart-shaped pungent leaves; Virginia to South Carolina.

- *Understanding “asarum virginicum” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “asarum virginicum.”*

---

asbat al-ansar *(noun)*

An extremist Palestinian Sunni group active in Lebanon in the early 1990s that advocates Salafism; responsible for murders and bombings; seeks to overthrow the Lebanese government and control Palestinian refugee camps; funded by al-Qaeda.

- *In class, the teacher used “asbat al-ansar” to mean an extremist palestinian sunni group active in....*
- *They discussed “asbat al-ansar” during the group presentation.*

---

ascaphidae *(noun)*

Family of one species of frog: tailed frog.

- *She wrote a short paragraph that included “ascaphidae.”*
- *The article explained what “ascaphidae” means with a simple example.*

---

ascaphus *(noun)*

Type genus of the Ascaphidae; in some classifications included in the family Leiopelmatidae.

- *He looked up “ascaphus” because he had never seen it before.*
- *They discussed “ascaphus” during the group presentation.*

---

ascaphus trui *(noun)*

Western North American frog with a taillike copulatory organ.

- *Understanding “ascaphus trui” helps you talk about this topic clearly.*
- *In class, the teacher used “ascaphus trui” to mean western north american frog with a taillike....*

---

ascaridae *(noun)*

Large roundworms parasitic in intestines of vertebrates.

- *She wrote a short paragraph that included “ascaridae.”*
- *He looked up “ascaridae” because he had never seen it before.*

---

ascaridia *(noun)*

Roundworm having a preanal sucker.

- *They discussed “ascaridia” during the group presentation.*
- *She wrote a short paragraph that included “ascaridia.”*

---

ascaridia galli *(noun)*

Intestinal parasite of domestic fowl.

- *In class, the teacher used “ascaridia galli” to mean intestinal parasite of domestic fowl.*
- *He looked up “ascaridia galli” because he had never seen it before.*

---

ascendable *(adjective)*

Capable of being ascended.

- *It is useful to describe something as “ascendable” when it is capable of being ascended.*
- *The speaker chose “ascendable” because it captured the feeling precisely.*

---

ascendible *(adjective)*

Capable of being ascended.

- *Would you call this situation "ascendible"? Explain why.*
- *Students compared "ascendible" with similar adjectives in the lesson.*

ascensional *(adjective)*

Tending to rise.

- *Students compared "ascensional" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "ascensional."*

ascensive *(adjective)*

Tending or directed upward; - John Ruskin.

- *Her writing became clearer after she learned "ascensive."*
- *Would you call this situation "ascensive"? Explain why.*

ascesis *(noun)*

Rigorous self-denial and active self-restraint.

- *The article explained what "ascesis" means with a simple example.*
- *She wrote a short paragraph that included "ascesis."*

aschelminthes *(noun)*

Unsegmented worms: roundworms; threadworms; eelworms.

- *He looked up "aschelminthes" because he had never seen it before.*
- *Understanding "aschelminthes" helps you talk about this topic clearly.*

ascidiaceae *(noun)*

Sometimes classified as an order: sea squirts.

- *In class, the teacher used "ascidiaceae" to mean sometimes classified as an order: sea squirts.*
- *The article explained what "ascidiaceae" means with a simple example.*

asclepia meadii *(noun)*

Milkweed of central North America; a threatened species.

- *She wrote a short paragraph that included "asclepia meadii."*
- *He looked up "asclepia meadii" because he had never seen it before.*

asclepiad *(noun)*

Any plant of the family Asclepiadaceae.

- *He looked up "asclepiad" because he had never seen it before.*
- *Understanding "asclepiad" helps you talk about this topic clearly.*

asclepiadaceae *(noun)*

Widely distributed family of herbs and shrubs of the order Gentianales; most with milky juice.

- *She wrote a short paragraph that included "asclepiadaceae."*
- *They discussed "asclepiadaceae" during the group presentation.*

asclepiadaceous *(adjective)*

Of or relating to plants of the milkweed family.

- *Would you call this situation "asclepiadaceous"? Explain why.*
- *Students compared "asclepiadaceous" with similar adjectives in the lesson.*

asclepias curassavica *(noun)*

Tropical herb having orange-red flowers followed by pods suggesting a swallow with outspread wings; a weed throughout the tropics.

- *In class, the teacher used "asclepias curassavica" to mean tropical herb having orange-red flowers followed by....*
- *The article explained what "asclepias curassavica" means with a simple example.*

asclepias exaltata *(noun)*

Milkweed of the eastern United States with leaves resembling those of pokeweed.

- *The article explained what “asclepias exaltata” means with a simple example.*
- *Understanding “asclepias exaltata” helps you talk about this topic clearly.*

---

asclepias meadii *(noun)*

Milkweed of central North America; a threatened species.

- *Understanding “asclepias meadii” helps you talk about this topic clearly.*
- *The article explained what “asclepias meadii” means with a simple example.*

---

asclepias subverticillata *(noun)*

Milkweed of southwestern United States and Mexico; poisonous to livestock.

- *The article explained what “asclepias subverticillata” means with a simple example.*
- *They discussed “asclepias subverticillata” during the group presentation.*

---

ascocarp *(noun)*

Mature fruiting body of an ascomycetous fungus.

- *He looked up “ascocarp” because he had never seen it before.*
- *Understanding “ascocarp” helps you talk about this topic clearly.*

---

ascocarpous *(adjective)*

Of or relating to ascocarps.

- *A “ascocarpous” approach may work better in this case.*
- *Would you call this situation “ascocarpous”? Explain why.*

---

ascolichen *(noun)*

A lichen in which the fungus component is an ascomycete.

- *They discussed “ascolichen” during the group presentation.*
- *She wrote a short paragraph that included “ascolichen.”*

---

ascoma *(noun)*

An ascocarp having the spore-bearing layer of cells (the hymenium) on a broad disklike receptacle.

- *He looked up “ascoma” because he had never seen it before.*
- *She wrote a short paragraph that included “ascoma.”*

---

ascomycetous *(adjective)*

Related to or characteristic of fungi of the class Ascomycetes.

- *The speaker chose “ascomycetous” because it captured the feeling precisely.*
- *It is useful to describe something as “ascomycetous” when it is related to or characteristic of fungi of the class....*

---

ascomycetous fungus *(noun)*

Any fungus of the class Ascomycetes (or subdivision Ascomycota) in which the spores are formed inside an ascus.

- *The article explained what “ascomycetous fungus” means with a simple example.*
- *She wrote a short paragraph that included “ascomycetous fungus.”*

---

ascomycotina *(noun)*

A large subdivision of Eumycota including Hemiascomycetes and Plectomycetes and Pyrenomycetes and Discomycetes; sac fungi; in some classification systems considered a division of the kingdom Fungi.

- *In class, the teacher used “ascomycotina” to mean a large subdivision of eumycota including....*
- *Understanding “ascomycotina” helps you talk about this topic clearly.*

---

ascophyllum *(noun)*

Brown algae distinguished by compressed or inflated branchlets along the axis.

- *She wrote a short paragraph that included “ascophyllum.”*
- *Understanding “ascophyllum” helps you talk about this topic clearly.*

---

ascophyllum nodosum *(noun)*

Similar to and found with black rockweed.

- *Understanding “ascophyllum nodosum” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “ascophyllum nodosum.”*

ascospore *(noun)*

Sexually produced fungal spore formed within an ascus.

- *The article explained what "ascospore" means with a simple example.*
- *They discussed "ascospore" during the group presentation.*

ascosporic *(adjective)*

Of or relating to ascospores.

- *Students compared "ascosporic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "ascosporic."*

ascosporous *(adjective)*

Of or relating to ascospores.

- *A "ascosporous" approach may work better in this case.*
- *Would you call this situation "ascosporous"? Explain why.*

ashbin *(noun)*

A bin that holds rubbish until it is collected.

- *They discussed "ashbin" during the group presentation.*
- *She wrote a short paragraph that included "ashbin."*

ashcake *(noun)*

Corn bread wrapped in cabbage leaves and baked in hot ashes (southern).

- *In class, the teacher used "ashcake" to mean corn bread wrapped in cabbage leaves and baked in....*
- *Understanding "ashcake" helps you talk about this topic clearly.*

ashir *(noun)*

Chief god of the Assyrians; god of military prowess and empire; identified with Babylonian Anshar.

- *She wrote a short paragraph that included "ashir."*
- *He looked up "ashir" because he had never seen it before.*

asilidae *(noun)*

Robber flies.

- *In class, the teacher used "asilidae" to mean robber flies.*
- *They discussed "asilidae" during the group presentation.*

asimina triloba *(noun)*

Small tree native to the eastern United States having oblong leaves and fleshy fruit.

- *She wrote a short paragraph that included "asimina triloba."*
- *They discussed "asimina triloba" during the group presentation.*

asininity *(noun)*

The quality of being asinine; stupidity combined with stubbornness.

- *In class, the teacher used "asininity" to mean the quality of being asinine; stupidity combined....*
- *The article explained what "asininity" means with a simple example.*

askant *(adjective)*

(used especially of glances) directed to one side with or as if with doubt or suspicion or envy; - Elizabeth Bowen.

- *It is useful to describe something as "askant" when it is (used especially of glances) directed to one side....*
- *Students compared "askant" with similar adjectives in the lesson.*

aslope *(adjective)*

Having an oblique or slanted direction.

- *Would you call this situation "aslope"? Explain why.*
- *Students compared "aslope" with similar adjectives in the lesson.*

asmera *(noun)*

The capital of Eritrea.

- *The article explained what "asmera" means with a simple example.*
- *Understanding "asmera" helps you talk about this topic clearly.*

---

aspadana *(noun)*

City in central Iran; former capital of Persia.

- *The article explained what "aspadana" means with a simple example.*
- *They discussed "aspadana" during the group presentation.*

---

aspalathus *(noun)*

Genus of South African heathlike shrubs.

- *He looked up "aspalathus" because he had never seen it before.*
- *She wrote a short paragraph that included "aspalathus."*

---

aspalathus cedcarbergensis *(noun)*

South African shrub having flat acuminate leaves and yellow flowers; leaves are aromatic when dried and used to make an herbal tea.

- *In class, the teacher used "aspalathus cedcarbergensis" to mean south african shrub having flat acuminate leaves....*
- *He looked up "aspalathus cedcarbergensis" because he had never seen it before.*

---

aspalathus linearis *(noun)*

South African shrub having flat acuminate leaves and yellow flowers; leaves are aromatic when dried and used to make an herbal tea.

- *The article explained what "aspalathus linearis" means with a simple example.*
- *They discussed "aspalathus linearis" during the group presentation.*

---

asparagaceae *(noun)*

One of many families or subfamilies into which some classification systems subdivide the Liliaceae: includes genera Asparagus and sometimes Ruscus.

- *In class, the teacher used "asparagaceae" to mean one of many families or subfamilies into which some....*
- *Understanding "asparagaceae" helps you talk about this topic clearly.*

---

asparagus asparagoides *(noun)*

Fragile twining plant of South Africa with bright green flattened stems and glossy foliage popular as a floral decoration.

- *He looked up "asparagus asparagoides" because he had never seen it before.*
- *They discussed "asparagus asparagoides" during the group presentation.*

---

asparagus officinales *(noun)*

Plant whose succulent young shoots are cooked and eaten as a vegetable.

- *In class, the teacher used "asparagus officinales" to mean plant whose succulent young shoots are cooked and....*
- *The article explained what "asparagus officinales" means with a simple example.*

---

asparagus setaceous *(noun)*

A fernlike plant native to South Africa.

- *The article explained what "asparagus setaceous" means with a simple example.*
- *In class, the teacher used "asparagus setaceous" to mean a fernlike plant native to south africa.*

---

aspergill *(noun)*

A short-handled device with a globe containing a sponge; used for sprinkling holy water.

- *The article explained what "aspergill" means with a simple example.*
- *Understanding "aspergill" helps you talk about this topic clearly.*

---

aspergillaceae *(noun)*

Family of fungi including some common molds.

- *In class, the teacher used "aspergillaceae" to mean family of fungi including some common molds.*
- *They discussed "aspergillaceae" during the group presentation.*

---

aspergillales *(noun)*

Order of fungi having a closed ascocarp (cleistothecium) with the asci scattered rather than gathered in a hymenium.

- *He looked up "aspergillales" because he had never seen it before.*

- *Understanding "aspergillales" helps you talk about this topic clearly.*

---

Old World fragrant stoloniferous perennial having small white flowers and narrow leaves used as flavoring and in sachets; widely cultivated as a ground cover; in some classifications placed in genus Asperula.

- *She wrote a short paragraph that included "asperula odorata."*
- *They discussed "asperula odorata" during the group presentation.*

---

asperula tinctoria *(noun)*

Creeping European perennial having red or pinkish-white flowers and red roots sometimes used as a substitute for madder in dyeing.

- *In class, the teacher used "asperula tinctoria" to mean creeping european perennial having red or....*
- *The article explained what "asperula tinctoria" means with a simple example.*

---

asphodelaceae *(noun)*

One of many subfamilies into which some classification systems subdivide the Liliaceae.

- *They discussed "asphodelaceae" during the group presentation.*
- *In class, the teacher used "asphodelaceae" to mean one of many subfamilies into which some....*

---

asphodeline *(noun)*

Genus of rhizomatous perennial or biennial herbs with numerous sometimes fragrant flowers in long cylindrical racemes; Mediterranean region to Caucasus; sometimes placed in family Asphodelaceae.

- *In class, the teacher used "asphodeline" to mean genus of rhizomatous perennial or biennial herbs....*
- *The article explained what "asphodeline" means with a simple example.*

---

asphodeline lutea *(noun)*

Asphodel with leafy stem and fragrant yellow flowers.

- *She wrote a short paragraph that included "asphodeline lutea."*
- *He looked up "asphodeline lutea" because he had never seen it before.*

---

asphodelus *(noun)*

Small genus of tall striking annuals or perennials with grasslike foliage and flowers in dense racemes or panicles; Mediterranean to Himalayas; sometimes placed in family Asphodelaceae.

- *In class, the teacher used "asphodelus" to mean small genus of tall striking annuals or perennials....*
- *Understanding "asphodelus" helps you talk about this topic clearly.*

---

asphyxiator *(noun)*

A manually operated device for extinguishing small fires.

- *In class, the teacher used "asphyxiator" to mean a manually operated device for extinguishing small....*
- *He looked up "asphyxiator" because he had never seen it before.*

---

aspidelaps *(noun)*

African coral snakes.

- *In class, the teacher used "aspidelaps" to mean african coral snakes.*
- *He looked up "aspidelaps" because he had never seen it before.*

---

aspidelaps lubricus *(noun)*

Small widely distributed arboreal snake of southern Africa banded in black and orange.

- *They discussed "aspidelaps lubricus" during the group presentation.*
- *Understanding "aspidelaps lubricus" helps you talk about this topic clearly.*

aspidiotus *(noun)*

A genus of Diaspididae.

- *She wrote a short paragraph that included "aspidiotus."*
- *He looked up "aspidiotus" because he had never seen it before.*

aspidiotus perniciosus *(noun)*

Small east Asian insect naturalized in the United States that damages fruit trees.

- *She wrote a short paragraph that included "aspidiotus perniciosus."*
- *They discussed "aspidiotus perniciosus" during the group presentation.*

aspidistra elatio *(noun)*

Evergreen perennial with large handsome basal leaves; grown primarily as a foliage houseplant.

- *In class, the teacher used "aspidistra elatio" to mean evergreen perennial with large handsome basal....*
- *The article explained what "aspidistra elatio" means with a simple example.*

aspidophoroides *(noun)*

Alligatorfishes.

- *They discussed "aspidophoroides" during the group presentation.*
- *In class, the teacher used "aspidophoroides" to mean alligatorfishes.*

aspidophoroides monopterygius *(noun)*

Small very elongate sea poachers.

- *In class, the teacher used "aspidophoroides monopterygius" to mean small very elongate sea poachers.*
- *Understanding "aspidophoroides monopterygius" helps you talk about this topic clearly.*

aspirer *(noun)*

An ambitious and aspiring young person.

- *Understanding "aspirer" helps you talk about this topic clearly.*
- *The article explained what "aspirer" means with a simple example.*

aspleniaceae *(noun)*

One of a number of families into which Polypodiaceae has been subdivided in some classification systems; includes genera Asplenium, Pleurosorus, Schaffneria.

- *She wrote a short paragraph that included "aspleniaceae."*
- *He looked up "aspleniaceae" because he had never seen it before.*

asplenium billotii *(noun)*

A spleenwort of western Europe.

- *Understanding "asplenium billotii" helps you talk about this topic clearly.*
- *They discussed "asplenium billotii" during the group presentation.*

asplenium bradleyi *(noun)*

A spleenwort of eastern to southern United States.

- *Understanding "asplenium bradleyi" helps you talk about this topic clearly.*
- *In class, the teacher used "asplenium bradleyi" to mean a spleenwort of eastern to southern united states.*

asplenium ceterach *(noun)*

Small European fern with chaffy leathery fronds.

- *She wrote a short paragraph that included "asplenium ceterach."*
- *The article explained what "asplenium ceterach" means with a simple example.*

asplenium pinnatifidum *(noun)*

A spleenwort of eastern and southern United States.

- *Understanding "asplenium pinnatifidum" helps you talk about this topic clearly.*
- *He looked up "asplenium pinnatifidum" because he had never seen it before.*

asplenium platyneuron *(noun)*

Common North American fern with polished black stripes.

- *The article explained what "asplenium platyneuron" means with a simple example.*
- *Understanding "asplenium platyneuron" helps you talk about this topic clearly.*

---

asplenium rhizophyllum *(noun)*

Ferns having lanceolate fronds that root at the tip.

- *She wrote a short paragraph that included "asplenium rhizophyllum."*
- *Understanding "asplenium rhizophyllum" helps you talk about this topic clearly.*

---

asplenium ruta-muraria *(noun)*

Small delicate spleenwort found on a steep slope (as a wall or cliff) of Eurasia and North America.

- *He looked up "asplenium ruta-muraria" because he had never seen it before.*
- *She wrote a short paragraph that included "asplenium ruta-muraria."*

---

asplenium scolopendrium *(noun)*

Eurasian fern with simple lanceolate fronds.

- *In class, the teacher used "asplenium scolopendrium" to mean eurasian fern with simple lanceolate fronds.*
- *They discussed "asplenium scolopendrium" during the group presentation.*

---

asquint *(adjective)*

(used especially of glances) directed to one side with or as if with doubt or suspicion or envy; - Elizabeth Bowen.

- *A "asquint" approach may work better in this case.*

Growing or extending upward.

- *An assurgent stem or leaf.*
- *A seahorse assurgent.*

---

astasia *(noun)*

Inability to stand due to muscular incoordination.

- *He looked up "astasia" because he had never seen it before.*
- *In class, the teacher used "astasia" to mean inability to stand due to muscular incoordination.*

---

aster arenosus *(noun)*

Common North American perennial with heathlike foliage and small white flower heads.

- *The article explained what "aster arenosus" means with a simple example.*

- *They discussed “aster arenosus” during the group presentation.*

aster cordifolius *(noun)*

Perennial wood aster of eastern North America.

- *He looked up “aster cordifolius” because he had never seen it before.*
- *In class, the teacher used “aster cordifolius” to mean perennial wood aster of eastern north america.*

aster divaricatus *(noun)*

Rhizomatous perennial wood aster of eastern North America with white flowers.

- *In class, the teacher used “aster divaricatus” to mean rhizomatous perennial wood aster of eastern north....*
- *They discussed “aster divaricatus” during the group presentation.*

aster dumosus *(noun)*

Stiff perennial of the eastern United States having small linear leaves and numerous tiny white flower heads.

- *The article explained what “aster dumosus” means with a simple example.*
- *In class, the teacher used “aster dumosus” to mean stiff perennial of the eastern united states having....*

aster ericoides *(noun)*

Common much-branched North American perennial with heathlike foliage and small starry white flowers.

- *Understanding “aster ericoides” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “aster ericoides.”*

aster falcatus *(noun)*

Perennial of western North America having white flowers.

- *He looked up “aster falcatus” because he had never seen it before.*
- *They discussed “aster falcatus” during the group presentation.*

aster linarifolius *(noun)*

Wiry tufted perennial of the eastern United States with stiff erect rough stems, linear leaves and large violet flowers.

- *In class, the teacher used “aster linarifolius” to mean wiry tufted perennial of the eastern united states....*
- *He looked up “aster linarifolius” because he had never seen it before.*

aster linosyris *(noun)*

Early-flowering perennial of southern and southeastern Europe with flower heads resembling those of goldenrod.

- *She wrote a short paragraph that included “aster linosyris.”*
- *They discussed “aster linosyris” during the group presentation.*

aster macrophyllus *(noun)*

Tufted perennial wood aster of North America; naturalized in Europe.

- *In class, the teacher used “aster macrophyllus” to mean tufted perennial wood aster of north america;....*
- *Understanding “aster macrophyllus” helps you talk about this topic clearly.*

aster novi-belgii *(noun)*

North American perennial herb having small autumn-blooming purple or pink or white flowers; widely naturalized in Europe.

- *He looked up “aster novi-belgii” because he had never seen it before.*
- *Understanding “aster novi-belgii” helps you talk about this topic clearly.*

aster ptarmicoides *(noun)*

Tufted rigid North American perennial with loose clusters of white flowers.

- *They discussed “aster ptarmicoides” during the group presentation.*
- *She wrote a short paragraph that included “aster ptarmicoides.”*

aster shortii *(noun)*

Perennial of southeastern United States having usually blue flowers.

- *She wrote a short paragraph that included “aster shortii.”*
- *He looked up “aster shortii” because he had never seen it before.*

aster tripolium *(noun)*

A common European aster that grows in salt marshes.

- *In class, the teacher used "aster tripolium" to mean a common european aster that grows in salt marshes.*
- *He looked up "aster tripolium" because he had never seen it before.*

---

aster turbinellis *(noun)*

Violet-flowered perennial aster of central United States having solitary heads.

- *Understanding "aster turbinellis" helps you talk about this topic clearly.*
- *They discussed "aster turbinellis" during the group presentation.*

---

astereognosis *(noun)*

A loss of the ability to recognize objects by handling them.

- *He looked up "astereognosis" because he had never seen it before.*
- *Understanding "astereognosis" helps you talk about this topic clearly.*

---

asteriated *(adjective)*

(of some crystals especially gemstones) exhibiting asterism.

- *It is useful to describe something as "asteriated" when it is (of some crystals especially gemstones) exhibiting....*
- *Students compared "asteriated" with similar adjectives in the lesson.*

---

asterid dicot family *(noun)*

Family of more or less advanced dicotyledonous herbs and some trees and shrubs.

- *They discussed "asterid dicot family" during the group presentation.*
- *The article explained what "asterid dicot family" means with a simple example.*

---

asterid dicot genus *(noun)*

Genus of more or less advanced dicotyledonous herbs and some trees and shrubs.

- *They discussed "asterid dicot genus" during the group presentation.*
- *She wrote a short paragraph that included "asterid dicot genus."*

---

asteridae *(noun)*

A group of mostly sympetalous herbs and some trees and shrubs mostly with 2 fused carpels; contains 43 families including Campanulales; Solanaceae; Scrophulariaceae; Labiatae; Verbenaceae; Rubiaceae; Compositae; sometimes classified as a superorder.

- *He looked up "asteridae" because he had never seen it before.*
- *They discussed "asteridae" during the group presentation.*

---

asterismal *(adjective)*

Relating to asterisms or constellations.

- *The speaker chose "asterismal" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "asterismal."*

---

asternal *(adjective)*

Not connected to the sternum or breastbone.

- *Asternal ribs.*
- *It is useful to describe something as "asternal" when it is not connected to the sternum or breastbone.*

---

asterope *(noun)*

One of the stars in the star cluster Pleiades.

- *The article explained what "asterope" means with a simple example.*
- *She wrote a short paragraph that included "asterope."*

---

asthenopia *(noun)*

A tiredness of the eyes caused by prolonged close work by a person with an uncorrected vision problem.

- *In class, the teacher used "asthenopia" to mean a tiredness of the eyes caused by prolonged close....*
- *They discussed "asthenopia" during the group presentation.*

---

astheny *(noun)*

An abnormal loss of strength.

- *Understanding "asthenу" helps you talk about this topic clearly.*
- *He looked up "asthenу" because he had never seen it before.*

---

astigmia *(noun)*

(optics) defect in an optical system in which light rays from a single point fail to converge in a single focal point.

- *She wrote a short paragraph that included "astigmia."*
- *The article explained what "astigmia" means with a simple example.*

---

astilbe biternata *(noun)*

North American astilbe with panicles of creamy white flowers.

- *He looked up "astilbe biternata" because he had never seen it before.*
- *They discussed "astilbe biternata" during the group presentation.*

---

astomatal *(adjective)*

Lacking a stoma or stomata.

- *It is useful to describe something as "astomatal" when it is lacking a stoma or stomata.*
- *The speaker chose "astomatal" because it captured the feeling precisely.*

---

astomatous *(adjective)*

Having no mouth or mouthlike opening.

- *It is useful to describe something as "astomatous" when it is having no mouth or mouthlike opening.*
- *The speaker chose "astomatous" because it captured the feeling precisely.*

---

astonied *(adjective)*

Filled with the emotional impact of overwhelming surprise or shock.

- *The speaker chose "astonied" because it captured the feeling precisely.*
- *A "astonied" approach may work better in this case.*

---

A beaded molding for edging or decorating furniture.

- *She wrote a short paragraph that included "astragal."*
- *The article explained what "astragal" means with a simple example.*

---

astragalar *(adjective)*

Of or relating to the anklebone.

- *Would you call this situation "astragalar"? Explain why.*
- *The speaker chose "astragalar" because it captured the feeling precisely.*

---

astragalus danicus *(noun)*

Perennial of southern and western Europe having dense racemes of purple or violet flowers.

- *In class, the teacher used "astragalus danicus" to mean perennial of southern and western europe having....*
- *The article explained what "astragalus danicus" means with a simple example.*

---

astragalus glycyphyllos *(noun)*

European perennial.

- *In class, the teacher used "astragalus glycyphyllos" to mean european perennial.*
- *He looked up "astragalus glycyphyllos" because he had never seen it before.*

---

astrantia *(noun)*

Any plant of the genus Astrantia.

- *She wrote a short paragraph that included "astrantia."*
- *The article explained what "astrantia" means with a simple example.*

---

astrantia major *(noun)*

European herb with aromatic roots and leaves in a basal tuft and showy compound umbels of white to rosy flowers.

- *In class, the teacher used "astrantia major" to mean european herb with aromatic roots and leaves in a....*
- *The article explained what "astrantia major" means with a simple example.*

astraphobia *(noun)*

A morbid fear of thunder and lightning.

- *Understanding "astraphobia" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "astraphobia."*

astreus *(noun)*

A genus of fungi belonging to the family Geastraceae.

- *She wrote a short paragraph that included "astreus."*
- *He looked up "astreus" because he had never seen it before.*

astreus hygrometricus *(noun)*

A common species of earthstar widely distributed in sandy soil; the gleba is a pale tan.

- *He looked up "astreus hygrometricus" because he had never seen it before.*
- *They discussed "astreus hygrometricus" during the group presentation.*

astreus pteridis *(noun)*

The largest earthstar; the fruiting body can measure 15 cm across when the rays are expanded.

- *She wrote a short paragraph that included "astreus pteridis."*
- *He looked up "astreus pteridis" because he had never seen it before.*

astringe *(verb)*

Become constricted or compressed.

- *The cold substance astringes.*
- *Lemon juice astringes the tissue in the mouth.*

astringence *(noun)*

A sharp astringent taste; the taste experience when a substance causes the mouth to pucker.

- *She wrote a short paragraph that included "astringence."*
- *Understanding "astringence" helps you talk about this topic clearly.*

Guide in interplanetary travel.

- *The coach explained when to use "astrogate" and when to wait.*
- *Can you use "astrogate" in a sentence that fits this situation?*

astrogator *(noun)*

The navigator of a spacecraft.

- *Understanding "astrogator" helps you talk about this topic clearly.*
- *He looked up "astrogator" because he had never seen it before.*

astroglia *(noun)*

Tissue consisting of large stellate neuroglial cells.

- *In class, the teacher used "astroglia" to mean tissue consisting of large stellate neuroglial cells.*
- *The article explained what "astroglia" means with a simple example.*

astrolatry *(noun)*

The worship of planets or stars.

- *They discussed "astrolatry" during the group presentation.*
- *She wrote a short paragraph that included "astrolatry."*

astroloma *(noun)*

Evergreen shrubs of Australia and Tasmania.

- *In class, the teacher used "astroloma" to mean evergreen shrubs of australia and tasmania.*
- *They discussed "astroloma" during the group presentation.*

astroloma humifusum *(noun)*

Small prostrate or ascending shrub having scarlet flowers and succulent fruit resembling cranberries; sometimes placed in genus Styphelia.

- *She wrote a short paragraph that included "astroloma humifusum."*
- *He looked up "astroloma humifusum" because he had never seen it before.*

---

astronautic *(adjective)*

Of or belonging to astronauts or the science of astronautics.

- *The speaker chose "astronautic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "astronautic."*

---

astronavigation *(noun)*

Navigating according to the positions of the stars.

- *They discussed "astronavigation" during the group presentation.*
- *The article explained what "astronavigation" means with a simple example.*

---

astronium *(noun)*

A genus of dicotyledonous plants of the family Anacardiaceae.

- *He looked up "astronium" because he had never seen it before.*
- *Understanding "astronium" helps you talk about this topic clearly.*

---

astronium fraxinifolium *(noun)*

Tall tropical American timber tree especially abundant in eastern Brazil; yields hard strong durable zebrawood with straight grain and dark strips on a pinkish to yellowish ground; widely used for veneer and furniture and heavy construction.

- *She wrote a short paragraph that included "astronium fraxinifolium."*
- *Understanding "astronium fraxinifolium" helps you talk about this topic clearly.*

---

astrophyton *(noun)*

Includes many of the basket stars.

- *The article explained what "astrophyton" means with a simple example.*
- *She wrote a short paragraph that included "astrophyton."*

---

astrophyton muricatum *(noun)*

A variety of basket star.

- *He looked up "astrophyton muricatum" because he had never seen it before.*
- *In class, the teacher used "astrophyton muricatum" to mean a variety of basket star.*

---

astropogon *(noun)*

A genus of fish of the family Apogonidae.

- *Understanding "astropogon" helps you talk about this topic clearly.*
- *In class, the teacher used "astropogon" to mean a genus of fish of the family apogonidae.*

---

astropogon stellatus *(noun)*

Found in West Indies; lives in mantle cavity of a living conch.

- *She wrote a short paragraph that included "astropogon stellatus."*
- *He looked up "astropogon stellatus" because he had never seen it before.*

Small spiny-finned fishes of both salt and fresh water.

- *He looked up "atherinidae" because he had never seen it before.*
- *She wrote a short paragraph that included "atherinidae."*

---

atherinopsis *(noun)*

A genus of Atherinidae.

- *The article explained what "atherinopsis" means with a simple example.*
- *They discussed "atherinopsis" during the group presentation.*

---

atherinopsis californiensis *(noun)*

A relatively large silversides of the Pacific coast of North America (known to reach 18 inches in length).

- *Understanding "atherinopsis californiensis" helps you talk about this topic clearly.*
- *He looked up "atherinopsis californiensis" because he had never seen it before.*

---

atherodyde *(noun)*

A simple type of jet engine; must be launched at high speed.

- *The article explained what "atherodyde" means with a simple example.*
- *They discussed "atherodyde" during the group presentation.*

---

atheromatic *(adjective)*

Of or relating to or resembling atheroma.

- *A "atheromatic" approach may work better in this case.*
- *Her writing became clearer after she learned "atheromatic."*

atherurus *(noun)*

A genus of Hystricidae.

- *They discussed "atherurus" during the group presentation.*
- *The article explained what "atherurus" means with a simple example.*

athinai *(noun)*

The capital and largest city of Greece; named after Athena (its patron goddess).

- *Understanding "athinai" helps you talk about this topic clearly.*
- *He looked up "athinai" because he had never seen it before.*

athiorhodaceae *(noun)*

Small motile sulphur bacteria.

- *They discussed "athiorhodaceae" during the group presentation.*
- *Understanding "athiorhodaceae" helps you talk about this topic clearly.*

athodyd *(noun)*

A simple type of jet engine; must be launched at high speed.

- *They discussed "athodyd" during the group presentation.*
- *She wrote a short paragraph that included "athodyd."*

athrotaxis *(noun)*

A genus of gymnosperm.

- *The article explained what "athrotaxis" means with a simple example.*
- *They discussed "athrotaxis" during the group presentation.*

athrotaxis selaginoides *(noun)*

Evergreen of Tasmanian mountains having sharp-pointed leaves that curve inward.

- *He looked up "athrotaxis selaginoides" because he had never seen it before.*
- *She wrote a short paragraph that included "athrotaxis selaginoides."*

athyriaceae *(noun)*

Alternative names for one of a number of families into which the family Polypodiaceae has been subdivided in some classification systems.

- *In class, the teacher used "athyriaceae" to mean alternative names for one of a number of families....*

Trumpetfishes.

- *The article explained what "aulostomidae" means with a simple example.*
- *She wrote a short paragraph that included "aulostomidae."*

---

aulostomus *(noun)*

Type genus of the Aulostomidae.

- *In class, the teacher used "aulostomus" to mean type genus of the aulostomidae.*
- *The article explained what "aulostomus" means with a simple example.*

---

aulostomus maculatus *(noun)*

Tropical Atlantic fish with a long snout; swims snout down.

- *They discussed "aulostomus maculatus" during the group presentation.*
- *In class, the teacher used "aulostomus maculatus" to mean tropical atlantic fish with a long snout; swims....*

---

aureolaria *(noun)*

Small genus of North American herbs often root-parasitic and bearing golden-yellow flowers; sometimes placed in genus Gerardia.

- *They discussed "aureolaria" during the group presentation.*
- *He looked up "aureolaria" because he had never seen it before.*

---

aureolaria pedicularia *(noun)*

Multi-stemmed North American annual having solitary axillary dark golden-yellow flowers resembling those of the foxglove; sometimes placed in genus Gerardia.

- *He looked up "aureolaria pedicularia" because he had never seen it before.*
- *She wrote a short paragraph that included "aureolaria pedicularia."*

---

aureolaria virginica *(noun)*

Sparsely branched North American perennial with terminal racemes of bright yellow flowers resembling those of the foxglove; sometimes placed in genus Gerardia.

- *The article explained what "aureolaria virginica" means with a simple example.*
- *In class, the teacher used "aureolaria virginica" to mean sparsely branched north american perennial with....*

---

aureomycin *(noun)*

A yellow crystalline antibiotic (trade name Aureomycin) used to treat certain bacterial and rickettsial diseases.

- *He looked up "aureomycin" because he had never seen it before.*
- *Understanding "aureomycin" helps you talk about this topic clearly.*

---

auricula atrii *(noun)*

A small conical pouch projecting from the upper anterior part of each atrium of the heart.

- *She wrote a short paragraph that included "auricula atrii."*
- *He looked up "auricula atrii" because he had never seen it before.*

---

auriculare *(noun)*

The craniometric point at the center of the opening of the external acoustic meatus.

- *She wrote a short paragraph that included "auriculare."*
- *They discussed "auriculare" during the group presentation.*

---

auriculariaceae *(noun)*

Fungi having gelatinous sporophores.

- *Understanding "auriculariaceae" helps you talk about this topic clearly.*

- *The article explained what "auriculariaceae" means with a simple example.*

---

auriculariales *(noun)*

Coextensive with the family Auriculariaceae; sometimes included in the order Tremellales.

- *In class, the teacher used "auriculariales" to mean coextensive with the family auriculariaceae;....*
- *The article explained what "auriculariales" means with a simple example.*

---

auriculate *(adjective)*

Having auricles.

- *The speaker chose "auriculate" because it captured the feeling precisely.*
- *It is useful to describe something as "auriculate" when it is having auricles.*

---

auriculated *(adjective)*

Having auricles.

- *Her writing became clearer after she learned "auriculated."*
- *Would you call this situation "auriculated"? Explain why.*

---

auriculoventricular *(adjective)*

Relating to or affecting the atria and ventricles of the heart.

- *The speaker chose "auriculoventricular" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "auriculoventricular."*

---

auriform *(adjective)*

Having a shape resembling an ear.

- *A "auriform" approach may work better in this case.*
- *Her writing became clearer after she learned "auriform."*

---

aurify *(verb)*

Turn golden.

- *She tried to use "aurify" carefully so everyone would understand.*
- *Can you use "aurify" in a sentence that fits this situation?*

---

auriparus *(noun)*

A genus of Paridae.

- *He looked up "auriparus" because he had never seen it before.*
- *She wrote a short paragraph that included "auriparus."*

---

auriparus flaviceps *(noun)*

Very small yellow-headed titmouse of western North America.

- *The article explained what "auriparus flaviceps" means with a simple example.*
- *She wrote a short paragraph that included "auriparus flaviceps."*

---

auriscope *(noun)*

Medical instrument consisting of a magnifying lens and light; used for examining the external ear (the auditory meatus and especially the tympanic membrane).

- *They discussed "auriscope" during the group presentation.*
- *He looked up "auriscope" because he had never seen it before.*

---

aurorean *(adjective)*

Characteristic of the dawn.

- *The speaker chose "aurorean" because it captured the feeling precisely.*
- *It is useful to describe something as "aurorean" when it is characteristic of the dawn.*

---

auroscope *(noun)*

Medical instrument consisting of a magnifying lens and light; used for examining the external ear (the auditory meatus and especially the tympanic membrane).

- *They discussed "auroscope" during the group presentation.*
- *Understanding "auroscope" helps you talk about this topic clearly.*

---

aurous *(adjective)*

Of or relating to or containing or derived from gold.

- *A "aurous" approach may work better in this case.*
- *Students compared "aurous" with similar adjectives in the lesson.*

---

auspicate *(verb)*

Commence in a manner calculated to bring good luck.

- *They auspicated the trip with a bottle of champagne.*
- *He did not know how to use "auspicate" until he saw an example.*

---

austereness *(noun)*

Extreme plainness.

- *Understanding "austereness" helps you talk about this topic clearly.*
- *They discussed "austereness" during the group presentation.*

---

australian bonytongue *(noun)*

A species of large fish found in Australian rivers.

- *He looked up "australian bonytongue" because he had never seen it before.*
- *They discussed "australian bonytongue" during the group presentation.*

---

austrocedrus *(noun)*

One species; formerly included in genus Libocedrus.

- *Understanding "austrocedrus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "austrocedrus."*

---

austrocedrus chilensis *(noun)*

A small South American evergreen having coppery bark and pretty foliage.

- *In class, the teacher used "austrocedrus chilensis" to mean a small south american evergreen having coppery....*
- *Understanding "austrocedrus chilensis" helps you talk about this topic clearly.*

---

austronesia *(noun)*

Islands of central and South Pacific (Indonesia and Melanesia and Micronesia and Polynesia).

- *He looked up "austronesia" because he had never seen it before.*
- *She wrote a short paragraph that included "austronesia."*

---

austrotaxus *(noun)*

A gymnosperm genus having one species: New Caledonian yew.

- *They discussed "austrotaxus" during the group presentation.*
- *The article explained what "austrotaxus" means with a simple example.*

---

austrotaxus spicata *(noun)*

Large yew native to New Caledonia; cultivated in eastern Australia and New Zealand and Hawaii.

- *He looked up "austrotaxus spicata" because he had never seen it before.*
- *She wrote a short paragraph that included "austrotaxus spicata."*

---

autacoid *(noun)*

Any physiologically active internal secretion especially one of uncertain classification.

- *Understanding "autacoid" helps you talk about this topic clearly.*
- *They discussed "autacoid" during the group presentation.*

---

autacoidal *(adjective)*

Of or relating to an autacoid.

- *The speaker chose "autacoidal" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "autacoidal."*

---

autarchical *(adjective)*

Of or relating to or characterized by autarchy.

- *Her writing became clearer after she learned "autarchical."*
- *Students compared "autarchical" with similar adjectives in the lesson.*

---

autarkical *(adjective)*

Of or relating to or characterized by autarchy.

- *Her writing became clearer after she learned "autarkical."*
- *The speaker chose "autarkical" because it captured the feeling precisely.*

---

authoriser *(noun)*

An authority who authorizes (people or actions).

- *Understanding "authoriser" helps you talk about this topic clearly.*
- *He looked up "authoriser" because he had never seen it before.*

---

authorizer *(noun)*

An authority who authorizes (people or actions).

- *The agents report back to their authorizers.*
- *The article explained what "authorizer" means with a simple example.*

---

autocatalysis *(noun)*

Catalysis in which the catalyst is one of the products of the reaction.

- *He looked up "autocatalysis" because he had never seen it before.*
- *Understanding "autocatalysis" helps you talk about this topic clearly.*

---

autochthonal *(adjective)*

Originating where it is found.

- *The autochthonal fauna of Australia includes the kangaroo.*
- *It is useful to describe something as "autochthonal" when it is originating where it is found.*

---

autochthonic *(adjective)*

Originating where it is found.

- *A "autochthonic" approach may work better in this case.*
- *Her writing became clearer after she learned "autochthonic."*

---

autochthony *(noun)*

Nativeness by virtue of originating or occurring naturally (as in a particular place).

- *In class, the teacher used "autochthony" to mean nativeness by virtue of originating or occurring....*
- *The article explained what "autochthony" means with a simple example.*

---

autocoid *(noun)*

Any physiologically active internal secretion especially one of uncertain classification.

- *He looked up "autocoid" because he had never seen it before.*
- *They discussed "autocoid" during the group presentation.*

---

autoecious *(adjective)*

Of parasites especially rust fungi; completing the entire life cycle on a single host.

- *Autoecious rust fungi.*
- *The speaker chose "autoecious" because it captured the feeling precisely.*

---

autoeroticism *(noun)*

Using you own body as a sexual object.

- *In class, the teacher used "autoeroticism" to mean using you own body as a sexual object.*
- *The article explained what "autoeroticism" means with a simple example.*

---

autoerotism *(noun)*

Using you own body as a sexual object.

- *In class, the teacher used "autoerotism" to mean using you own body as a sexual object.*
- *He looked up "autoerotism" because he had never seen it before.*

autofluorescent *(adjective)*

Emitting light via self-induced fluorescence.

- *The speaker chose "autofluorescent" because it captured the feeling precisely.*
- *A "autofluorescent" approach may work better in this case.*

autogamic *(adjective)*

Characterized by or fit for autogamy.

- *It is useful to describe something as "autogamic" when it is characterized by or fit for autogamy.*
- *The speaker chose "autogamic" because it captured the feeling precisely.*

autogamous *(adjective)*

Characterized by or fit for autogamy.

- *Her writing became clearer after she learned "autogamous."*
- *Students compared "autogamous" with similar adjectives in the lesson.*

autogenesis *(noun)*

A hypothetical organic phenomenon by which living organisms are created from nonliving matter.

- *The article explained what "autogenesis" means with a simple example.*
- *In class, the teacher used "autogenesis" to mean a hypothetical organic phenomenon by which living....*

autogenetic *(adjective)*

Of or relating to autogenesis.

- *It is useful to describe something as "autogenetic" when it is of or relating to autogenesis.*
- *The speaker chose "autogenetic" because it captured the feeling precisely.*

autogenics *(noun)*

Training patients in self-induced relaxation.

- *In class, the teacher used "autogenics" to mean training patients in self-induced relaxation.*
- *The article explained what "autogenics" means with a simple example.*

autogeny *(noun)*

A hypothetical organic phenomenon by which living organisms are created from nonliving matter.

- *In class, the teacher used "autogeny" to mean a hypothetical organic phenomenon by which living....*
- *The article explained what "autogeny" means with a simple example.*

autoicous *(adjective)*

Having male and female reproductive organs in separate clusters on the same plant.

- *Students compared "autoicous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "autoicous."*

autolatry *(noun)*

The worship of yourself.

- *She wrote a short paragraph that included "autolatry."*
- *The article explained what "autolatry" means with a simple example.*

autolytic *(adjective)*

Of or relating to self-digestion.

- *It is useful to describe something as "autolytic" when it is of or relating to self-digestion.*
- *Would you call this situation "autolytic"? Explain why.*

automatise *(verb)*

Make automatic or control or operate automatically.

- *The coach explained when to use "automatise" and when to wait.*
- *She tried to use "automatise" carefully so everyone would understand.*

automatize *(verb)*

Make automatic or control or operate automatically.

- *Automatize the production.*
- *He did not know how to use "automatize" until he saw an example.*

---

automatonlike *(adjective)*

Resembling the unthinking functioning of a machine.

- *Her writing became clearer after she learned "automatonlike."*
- *Students compared "automatonlike" with similar adjectives in the lesson.*

---

automeris io *(noun)*

Large yellow American moth having a large eyelike spot on each hind wing; the larvae have stinging spines.

- *The article explained what "automeris io" means with a simple example.*
- *Understanding "automeris io" helps you talk about this topic clearly.*

---

automobilist *(noun)*

Someone who drives (or travels in) an automobile.

- *In class, the teacher used "automobilist" to mean someone who drives (or travels in) an automobile.*
- *They discussed "automobilist" during the group presentation.*

---

automysophobia *(noun)*

A morbid fear of being dirty.

- *In class, the teacher used "automysophobia" to mean a morbid fear of being dirty.*
- *The article explained what "automysophobia" means with a simple example.*

---

autophyte *(noun)*

Plant capable of synthesizing its own food from simple organic substances.

- *They discussed "autophyte" during the group presentation.*
- *The article explained what "autophyte" means with a simple example.*

---

autophytic *(adjective)*

Of or relating to organisms (as green plants) that can make complex organic nutritive compounds from simple inorganic sources by photosynthesis.

- *It is useful to describe something as "autophytic" when it is of or relating to organisms (as green plants) that....*
- *A "autophytic" approach may work better in this case.*

---

autophytic plant *(noun)*

Plant capable of synthesizing its own food from simple organic substances.

- *They discussed "autophytic plant" during the group presentation.*
- *In class, the teacher used "autophytic plant" to mean plant capable of synthesizing its own food from....*

---

autoplastic *(adjective)*

Of or relating to or involved in autoplasty.

- *A "autoplastic" approach may work better in this case.*
- *It is useful to describe something as "autoplastic" when it is of or relating to or involved in autoplasty.*

---

autoplasty *(noun)*

Tissue that is taken from one site and grafted to another site on the same person.

- *In class, the teacher used "autoplasty" to mean tissue that is taken from one site and grafted to....*
- *Understanding "autoplasty" helps you talk about this topic clearly.*

---

autoradiograph *(noun)*

A radiogram produced by radiation emitted by the specimen being photographed.

- *He looked up "autoradiograph" because he had never seen it before.*
- *She wrote a short paragraph that included "autoradiograph."*

---

autosemantic *(adjective)*

Of a word or phrase meaningful in isolation, independent of context.

- *The speaker chose "autosemantic" because it captured the feeling precisely.*

- *Would you call this situation "autosemantic"? Explain why.*

---

autosexing *(noun)*

(especially of domestic fowl) breeding to reveal differential sex characteristics at hatching.

- *The article explained what "autosexing" means with a simple example.*
- *They discussed "autosexing" during the group presentation.*

---

autotelism *(noun)*

Belief that a work of art is an end in itself or its own justification.

- *The article explained what "autotelism" means with a simple example.*
- *They discussed "autotelism" during the group presentation.*

---

autotomic *(adjective)*

Of or relating to autotomy.

- *The speaker chose "autotomic" because it captured the feeling precisely.*
- *It is useful to describe something as "autotomic" when it is of or relating to autotomy.*

---

autotomise *(verb)*

Cause a body part to undergo autotomy.

- *Learners should practice how to use "autotomise" in real sentences.*
- *He did not know how to use "autotomise" until he saw an example.*

---

autotomize *(verb)*

Cause a body part to undergo autotomy.

- *Can you use "autotomize" in a sentence that fits this situation?*
- *The coach explained when to use "autotomize" and when to wait.*

---

autotroph *(noun)*

Plant capable of synthesizing its own food from simple organic substances.

- *Understanding "autotroph" helps you talk about this topic clearly.*
- *The article explained what "autotroph" means with a simple example.*

---

autotype *(noun)*

An exact copy or reproduction.

- *The article explained what "autotype" means with a simple example.*
- *In class, the teacher used "autotype" to mean an exact copy or reproduction.*

---

autotypic *(adjective)*

Of or relating to autotypy.

- *Students compared "autotypic" with similar adjectives in the lesson.*
- *Would you call this situation "autotypic"? Explain why.*

---

autotypy *(noun)*

Process for producing permanent prints in a carbon pigment.

- *They discussed "autotypy" during the group presentation.*
- *He looked up "autotypy" because he had never seen it before.*

---

autumn sneezeweed *(noun)*

North American perennial with bright yellow late summer flowers.

- *They discussed "autumn sneezeweed" during the group presentation.*
- *She wrote a short paragraph that included "autumn sneezeweed."*

---

auxesis *(noun)*

Growth from increase in cell size without cell division.

- *Understanding "auxesis" helps you talk about this topic clearly.*
- *In class, the teacher used "auxesis" to mean growth from increase in cell size without cell division.*

---

auxetic *(adjective)*

Of or relating to growth by auxesis.

- *A "auxetic" approach may work better in this case.*
- *The speaker chose "auxetic" because it captured the feeling precisely.*

---

auxinic *(adjective)*

Relating to or containing auxins.

- *The speaker chose "auxinic" because it captured the feeling precisely.*
- *Would you call this situation "auxinic"? Explain why.*

---

avadavat *(noun)*

Red Asian weaverbirds often kept as cage birds.

- *In class, the teacher used "avadavat" to mean red asian weaverbirds often kept as cage birds.*
- *Understanding "avadavat" helps you talk about this topic clearly.*

---

avahi laniger *(noun)*

Nocturnal indris with thick grey-brown fur and a long tail.

- *She wrote a short paragraph that included "avahi laniger."*
- *Understanding "avahi laniger" helps you talk about this topic clearly.*

---

availableness *(noun)*

The quality of being at hand when needed.

- *Understanding "availableness" helps you talk about this topic clearly.*
- *In class, the teacher used "availableness" to mean the quality of being at hand when needed.*

---

avaram *(noun)*

Evergreen Indian shrub with vivid yellow flowers whose bark is used in tanning; sometimes placed in genus Cassia.

- *Understanding "avaram" helps you talk about this topic clearly.*
- *They discussed "avaram" during the group presentation.*

---

avariciously *(adverb)*

In a greedy manner.

- *The narrator describes the scene "avariciously" in the final chapter.*
- *She spoke "avariciously," and the audience immediately understood her point.*

---

avariciousness *(noun)*

Extreme greed for material wealth.

- *She wrote a short paragraph that included "avariciousness."*
- *They discussed "avariciousness" during the group presentation.*

---

avellan *(adjective)*

Pertaining to filberts or hazelnuts.

- *Her writing became clearer after she learned "avellan."*
- *A "avellan" approach may work better in this case.*

---

avellane *(adjective)*

Pertaining to filberts or hazelnuts.

- *It is useful to describe something as "avellane" when it is pertaining to filberts or hazelnuts.*
- *Would you call this situation "avellane"? Explain why.*

---

avena fatua *(noun)*

Common in meadows and pastures.

- *He looked up "avena fatua" because he had never seen it before.*
- *Understanding "avena fatua" helps you talk about this topic clearly.*

---

avene sterilis *(noun)*

Mediterranean oat held to be progenitor of modern cultivated oat.

- *He looked up “avene sterilis” because he had never seen it before.*
- *She wrote a short paragraph that included “avene sterilis.”*

---

aventail *(noun)*

A medieval hood of mail suspended from a basinet to protect the head and neck.

- *In class, the teacher used “aventail” to mean a medieval hood of mail suspended from a basinet to....*
- *He looked up “aventail” because he had never seen it before.*

---

averment *(noun)*

A declaration that is made emphatically (as if no supporting evidence were necessary).

- *Understanding “averment” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “averment.”*

---

averrhoa *(noun)*

Trees native to East Indies having pinnate leaves: carambolas.

- *He looked up “averrhoa” because he had never seen it before.*
- *They discussed “averrhoa” during the group presentation.*

---

averrhoa bilimbi *(noun)*

East Indian evergreen tree bearing very acid fruit.

- *Understanding “averrhoa bilimbi” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “averrhoa bilimbi.”*

---

averrhoa carambola *(noun)*

East Indian tree bearing deeply ridged yellow-brown fruit.

- *In class, the teacher used “averrhoa carambola” to mean east indian tree bearing deeply ridged yellow-brown....*
- *They discussed “averrhoa carambola” during the group presentation.*

---

avertable *(adjective)*

Capable of being avoided or warded off.

- *Would you call this situation “avertable”? Explain why.*
- *It is useful to describe something as “avertable” when it is capable of being avoided or warded off.*

---

avertible *(adjective)*

Capable of being avoided or warded off.

- *Students compared “avertible” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “avertible.”*

---

avianise *(verb)*

To modify microorganisms by repeated culture in the developing chick embryo.

- *She tried to use “avianise” carefully so everyone would understand.*
- *In everyday English, people use “avianise” when talking about this idea.*

---

avianize *(verb)*

To modify microorganisms by repeated culture in the developing chick embryo.

- *In everyday English, people use “avianize” when talking about this idea.*
- *He did not know how to use “avianize” until he saw an example.*

---

aviatress *(noun)*

A woman aviator.

- *In class, the teacher used “aviatress” to mean a woman aviator.*
- *They discussed “aviatress” during the group presentation.*

---

avicenniaceae *(noun)*

Used in some classifications: coextensive with the genus Avicennia.

- *Understanding “avicenniaceae” helps you talk about this topic clearly.*
- *In class, the teacher used “avicenniaceae” to mean used in some classifications: coextensive with the....*

avidness *(noun)*

A positive feeling of wanting to push ahead with something.

- *The article explained what "avidness" means with a simple example.*
- *In class, the teacher used "avidness" to mean a positive feeling of wanting to push ahead with....*

avifaunal *(adjective)*

Of or relating to birds of a particular region or period.

- *The speaker chose "avifaunal" because it captured the feeling precisely.*
- *It is useful to describe something as "avifaunal" when it is of or relating to birds of a particular region or....*

avifaunistic *(adjective)*

Of or relating to birds of a particular region or period.

- *Would you call this situation "avifaunistic"? Explain why.*
- *Her writing became clearer after she learned "avifaunistic."*

avirulent *(adjective)*

Not virulent; unable to produce disease.

- *Would you call this situation "avirulent"? Explain why.*
- *Her writing became clearer after she learned "avirulent."*

avitaminosis *(noun)*

Any of several diseases caused by deficiency of one or more vitamins.

- *She wrote a short paragraph that included "avitaminosis."*
- *He looked up "avitaminosis" because he had never seen it before.*

avitaminotic *(adjective)*

Of or relating to or characteristic of avitaminosis.

- *Students compared "avitaminotic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "avitaminotic."*

avouchment *(noun)*

A statement asserting the existence or the truth of something.

- *Understanding "avouchment" helps you talk about this topic clearly.*
- *They discussed "avouchment" during the group presentation.*

avower *(noun)*

Someone who claims to speak the truth.

- *An avower of his own great intelligence.*
- *In class, the teacher used "avower" to mean someone who claims to speak the truth.*

avulse *(verb)*

Separate by avulsion.

- *She tried to use "avulse" carefully so everyone would understand.*
- *Can you use "avulse" in a sentence that fits this situation?*

awayness *(noun)*

The state of being elsewhere than in particular place.

- *They discussed "awayness" during the group presentation.*
- *The article explained what "awayness" means with a simple example.*

aweless *(adjective)*

Devoid of any feeling of awe or reverence.

- *It is useful to describe something as "aweless" when it is devoid of any feeling of awe or reverence.*
- *The speaker chose "aweless" because it captured the feeling precisely.*

awestricken *(adjective)*

Having or showing a feeling of mixed reverence and respect and wonder and dread.

- *Would you call this situation "awestricken"? Explain why.*
- *Students compared "awestricken" with similar adjectives in the lesson.*

---

awheel *(adjective)*

Traveling by wheeled vehicle such as bicycle or automobile e.g.

- *The public was awheel.*
- *It is useful to describe something as "awheel" when it is traveling by wheeled vehicle such as bicycle or....*

---

awless *(adjective)*

Devoid of any feeling of awe or reverence.

- *Her writing became clearer after she learned "awless."*
- *Students compared "awless" with similar adjectives in the lesson.*

---

awlwort *(noun)*

Small aquatic plant having tufted awl-shaped leaves in a basal rosette and minute white flowers; circumboreal.

- *He looked up "awlwort" because he had never seen it before.*
- *Understanding "awlwort" helps you talk about this topic clearly.*

---

awned *(adjective)*

Having awns i.e. bristlelike or hairlike appendages on the flowering parts of some cereals and grasses.

- *Awned wheatgrass.*
- *A "awned" approach may work better in this case.*

---

awninged *(adjective)*

Covered with an awning.

- *With awninged windows on the west side.*
- *A "awninged" approach may work better in this case.*

---

awnless *(adjective)*

Lacking or having only very short awns.

- *Awnless bromegrass.*
- *The speaker chose "awnless" because it captured the feeling precisely.*

---

awnless bromegrass *(noun)*

Drought-resistant perennial with awns lacking or very short and long creeping rhizomes; Europe and temperate Asia.

- *Understanding "awnless bromegrass" helps you talk about this topic clearly.*
- *He looked up "awnless bromegrass" because he had never seen it before.*

---

awny *(adjective)*

Having awns i.e. bristlelike or hairlike appendages on the flowering parts of some cereals and grasses.

- *The speaker chose "awny" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "awny."*

---

axerophthol *(noun)*

Any of several fat-soluble vitamins essential for normal vision; prevents night blindness or inflammation or dryness of the eyes.

- *He looked up "axerophthol" because he had never seen it before.*
- *She wrote a short paragraph that included "axerophthol."*

---

axile *(adjective)*

Relating to or attached to the axis.

- *The speaker chose "axile" because it captured the feeling precisely.*
- *It is useful to describe something as "axile" when it is relating to or attached to the axis.*

---

axile placentation *(noun)*

Ovules are borne at or around the center of a compound ovary on an axis formed from joined septa.

- *The article explained what "axile placentation" means with a simple example.*

- *They discussed "axile placentation" during the group presentation.*

---

axiomatical *(adjective)*

Of or relating to or derived from axioms; ; - S.S.Stevens.

- *It is useful to describe something as "axiomatical" when it is of or relating to or derived from axioms; ; -....*
- *The speaker chose "axiomatical" because it captured the feeling precisely.*

---

axletree *(noun)*

A dead axle on a carriage or wagon that has terminal spindles on which the wheels revolve.

- *In class, the teacher used "axletree" to mean a dead axle on a carriage or wagon that has....*
- *They discussed "axletree" during the group presentation.*

---

axolemma *(noun)*

Outer membrane covering an axon.

- *In class, the teacher used "axolemma" to mean outer membrane covering an axon.*
- *He looked up "axolemma" because he had never seen it before.*

---

axone *(noun)*

Long nerve fiber that conducts away from the cell body of the neuron.

- *They discussed "axone" during the group presentation.*
- *She wrote a short paragraph that included "axone."*

---

axseed *(noun)*

European herb resembling vetch; naturalized in the eastern United States; having umbels of pink-and-white flowers and sharp-angled pods.

- *He looked up "axseed" because he had never seen it before.*
- *Understanding "axseed" helps you talk about this topic clearly.*

---

ayapana *(noun)*

Low spreading tropical American shrub with long slender leaves used to make a mildly stimulating drink resembling tea; sometimes placed in genus Eupatorium.

- *They discussed "ayapana" during the group presentation.*
- *He looked up "ayapana" because he had never seen it before.*

---

ayapana triplinervis *(noun)*

Low spreading tropical American shrub with long slender leaves used to make a mildly stimulating drink resembling tea; sometimes placed in genus Eupatorium.

- *He looked up "ayapana triplinervis" because he had never seen it before.*
- *They discussed "ayapana triplinervis" during the group presentation.*

---

ayatollah ruholla khomeini *(noun)*

Iranian religious leader of the Shiites; when Shah Pahlavi's regime fell Khomeini established a new constitution giving himself supreme powers (1900-1989).

- *In class, the teacher used "ayatollah ruholla khomeini" to mean iranian religious leader of the shiites; when shah....*
- *The article explained what "ayatollah ruholla khomeini" means with a simple example.*

---

aythya ferina *(noun)*

Heavy-bodied Old World diving duck having a grey-and-black body and reddish head.

- *The article explained what "aythya ferina" means with a simple example.*
- *She wrote a short paragraph that included "aythya ferina."*

---

aythya marila *(noun)*

Large scaup of North America having a greenish iridescence on the head of the male.

- *He looked up "aythya marila" because he had never seen it before.*
- *She wrote a short paragraph that included "aythya marila."*

---

aythya valisineria *(noun)*

North American wild duck valued for sport and food.

- *The article explained what "aythya valisineria" means with a simple example.*
- *Understanding "aythya valisineria" helps you talk about this topic clearly.*

---

azactam *(noun)*

An antibiotic (trade name Azactam) used against severe infections; has minimal side effects.

- *They discussed "azactam" during the group presentation.*
- *Understanding "azactam" helps you talk about this topic clearly.*

azaleastrum *(noun)*

Group of evergreen or deciduous shrubs formerly considered a separate genus; now included in the genus Rhododendron.

- *They discussed "azaleastrum" during the group presentation.*
- *In class, the teacher used "azaleastrum" to mean group of evergreen or deciduous shrubs formerly....*

azedarach *(noun)*

Tree of northern India and China having purple blossoms and small inedible yellow fruits; naturalized in the southern United States as a shade tree.

- *She wrote a short paragraph that included "azedarach."*
- *Understanding "azedarach" helps you talk about this topic clearly.*

azederach *(noun)*

Tree of northern India and China having purple blossoms and small inedible yellow fruits; naturalized in the southern United States as a shade tree.

- *They discussed "azederach" during the group presentation.*
- *The article explained what "azederach" means with a simple example.*

azerbajdzhan *(noun)*

A landlocked republic in southwestern Asia; formerly an Asian soviet.

- *Understanding "azerbajdzhan" helps you talk about this topic clearly.*
- *The article explained what "azerbajdzhan" means with a simple example.*

azerbajdzhan republic *(noun)*

A landlocked republic in southwestern Asia; formerly an Asian soviet.

- *In class, the teacher used "azerbajdzhan republic" to mean a landlocked republic in southwestern asia;....*
- *The article explained what "azerbajdzhan republic" means with a simple example.*

azoimide *(noun)*

A colorless explosive liquid that is volatile and poisonous and foul-smelling.

- *He looked up "azoimide" because he had never seen it before.*
- *She wrote a short paragraph that included "azoimide."*

azollaceae *(noun)*

Used in some classifications for the genus Azolla.

- *The article explained what "azollaceae" means with a simple example.*
- *In class, the teacher used "azollaceae" to mean used in some classifications for the genus azolla.*

azonal *(adjective)*

Not divided into zones.

- *Azonal heating.*
- *The speaker chose "azonal" because it captured the feeling precisely.*

azonic *(adjective)*

Not restricted to any particular zone or region.

- *Would you call this situation "azonic"? Explain why.*
- *Students compared "azonic" with similar adjectives in the lesson.*

azotaemia *(noun)*

Accumulation in the blood of nitrogenous waste products (urea) that are usually excreted in the urine.

- *She wrote a short paragraph that included "azotaemia."*
- *He looked up "azotaemia" because he had never seen it before.*

azotemic *(adjective)*

Of or involving excess nitrogenous waste products in the urine (usually due to kidney insufficiency).

- *Would you call this situation "azotemic"? Explain why.*
- *It is useful to describe something as "azotemic" when it is of or involving excess nitrogenous waste products....*

---

azotic *(adjective)*

Of or containing nitrogen.

- *Would you call this situation "azotic"? Explain why.*
- *It is useful to describe something as "azotic" when it is of or containing nitrogen.*

---

azoturia *(noun)*

Excess of urea in the urine.

- *The article explained what "azoturia" means with a simple example.*
- *In class, the teacher used "azoturia" to mean excess of urea in the urine.*

---

azygous *(adjective)*

Occurring singly; not one of a pair.

- *The azygous muscle of the uvula.*
- *It is useful to describe something as "azygous" when it is occurring singly; not one of a pair.*

---

---

azymia *(noun)*

Absence of an enzyme.

- *The article explained what "azymia" means with a simple example.*
- *In class, the teacher used "azymia" to mean absence of an enzyme.*

---

baal merodach *(noun)*

The chief Babylonian god; his consort was Sarpanitu.

- *She wrote a short paragraph that included "baal merodach."*
- *The article explained what "baal merodach" means with a simple example.*

---

babacu oil *(noun)*

Fatty oil from kernels of babassu nuts similar to coconut oil.

- *Understanding "babacu oil" helps you talk about this topic clearly.*
- *They discussed "babacu oil" during the group presentation.*

---

babbitting *(noun)*

Lining a surface or bearing with Babbitt metal.

- *Understanding "babbitting" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "babbitting."*

---

babelike *(adjective)*

Like a baby especially in dependence.

- *Babelike innocence and dependence.*
- *A "babelike" approach may work better in this case.*

---

babesiidae *(noun)*

Piroplasms and cattle pathogens.

- *The article explained what "babesiidae" means with a simple example.*
- *She wrote a short paragraph that included "babesiidae."*

---

babiroussa *(noun)*

Indonesian wild pig with enormous curved canine teeth.

- *They discussed "babiroussa" during the group presentation.*
- *Understanding "babiroussa" helps you talk about this topic clearly.*

babirussa *(noun)*

Indonesian wild pig with enormous curved canine teeth.

- *Understanding "babirussa" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "babirussa."*

baboonish *(adjective)*

Resembling a baboon.

- *Her writing became clearer after she learned "baboonish."*
- *A "baboonish" approach may work better in this case.*

babyminder *(noun)*

A person who looks after babies (usually in the person's own home) while the babys' parents are working.

- *The article explained what "babyminder" means with a simple example.*
- *Understanding "babyminder" helps you talk about this topic clearly.*

babyrousa *(noun)*

A genus of Suidae.

- *Understanding "babyrousa" helps you talk about this topic clearly.*
- *The article explained what "babyrousa" means with a simple example.*

babyrousa babyrussa *(noun)*

Indonesian wild pig with enormous curved canine teeth.

- *He looked up "babyrousa babyrussa" because he had never seen it before.*
- *In class, the teacher used "babyrousa babyrussa" to mean indonesian wild pig with enormous curved canine teeth.*

baccate *(adjective)*

Producing or bearing berries.

- *A "baccate" approach may work better in this case.*
- *Would you call this situation "baccate"? Explain why.*

bacchant *(noun)*

A drunken reveller; a devotee of Bacchus.

- *He looked up "bacchant" because he had never seen it before.*
- *She wrote a short paragraph that included "bacchant."*

- *Students compared "bacchantic" with similar adjectives in the lesson.*
- *Would you call this situation "bacchantic"? Explain why.*

baccharis halimifolia *(noun)*

A shrub of salt marshes of eastern and south central North America and West Indies; fruit is surrounded with white plumelike hairy tufts.

- *They discussed "baccharis halimifolia" during the group presentation.*
- *He looked up "baccharis halimifolia" because he had never seen it before.*

baccharis pilularis *(noun)*

Widely spreading evergreen shrub of southwestern United States with flower heads in a leafy panicle.

- *The article explained what "baccharis pilularis" means with a simple example.*
- *In class, the teacher used "baccharis pilularis" to mean widely spreading evergreen shrub of southwestern....*

baccharis viminea *(noun)*

California shrub with slender leafy shoots that are important browse for mule deer.

- *She wrote a short paragraph that included "baccharis viminea."*
- *He looked up "baccharis viminea" because he had never seen it before.*

bacciferous *(adjective)*

Producing or bearing berries.

- *It is useful to describe something as "bacciferous" when it is producing or bearing berries.*
- *A "bacciferous" approach may work better in this case.*

---

baccivorous *(adjective)*

Feeding on berries.

- *Would you call this situation "baccivorous"? Explain why.*
- *Students compared "baccivorous" with similar adjectives in the lesson.*

---

bacillaceae *(noun)*

Typically rod-shaped usually Gram-positive bacteria that produce endospores.

- *In class, the teacher used "bacillaceae" to mean typically rod-shaped usually gram-positive bacteria....*
- *Understanding "bacillaceae" helps you talk about this topic clearly.*

---

bacillar *(adjective)*

Relating to or produced by or containing bacilli.

- *Students compared "bacillar" with similar adjectives in the lesson.*
- *A "bacillar" approach may work better in this case.*

---

bacillariophyceae *(noun)*

Marine and freshwater eukaryotic algae: diatoms.

- *She wrote a short paragraph that included "bacillariophyceae."*
- *The article explained what "bacillariophyceae" means with a simple example.*

---

bacilliform *(adjective)*

Formed like a bacillus.

- *Students compared "bacilliform" with similar adjectives in the lesson.*
- *A "bacilliform" approach may work better in this case.*

---

bacillus globigii *(noun)*

A species of bacillus found in soil and decomposing organic matter; some strains produce antibiotics.

- *She wrote a short paragraph that included "bacillus globigii."*
- *The article explained what "bacillus globigii" means with a simple example.*

---

backband *(noun)*

A broad band that passes over the back of a horse and supports the shafts of a vehicle.

- *Understanding "backband" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "backband."*

---

- *In class, the teacher used "backstroker" to mean someone who swims the backstroke.*

---

backswept *(adjective)*

Used of hair.

- *Students compared "backswept" with similar adjectives in the lesson.*
- *Would you call this situation "backswept"? Explain why.*

---

backswimmer *(noun)*

Predaceous aquatic insect that swims on its back and may inflict painful bites.

- *The article explained what "backswimmer" means with a simple example.*
- *Understanding "backswimmer" helps you talk about this topic clearly.*

---

backsword *(noun)*

A stick used instead of a sword for fencing.

- *In class, the teacher used "backsword" to mean a stick used instead of a sword for fencing.*
- *Understanding "backsword" helps you talk about this topic clearly.*

---

bacteremic *(adjective)*

Of or relating to or having bacteremia.

- *Her writing became clearer after she learned "bacteremic."*
- *A "bacteremic" approach may work better in this case.*

---

bacteriacide *(noun)*

Any chemical agent that destroys bacteria.

- *Understanding "bacteriacide" helps you talk about this topic clearly.*
- *They discussed "bacteriacide" during the group presentation.*

---

bacteriaemia *(noun)*

Transient presence of bacteria (or other microorganisms) in the blood.

- *The article explained what "bacteriaemia" means with a simple example.*
- *In class, the teacher used "bacteriaemia" to mean transient presence of bacteria (or other....*

---

bacteriemia *(noun)*

Transient presence of bacteria (or other microorganisms) in the blood.

- *Understanding "bacteriemia" helps you talk about this topic clearly.*
- *They discussed "bacteriemia" during the group presentation.*

---

bacteriochlorophyll *(noun)*

A substance in photosensitive bacteria that is related to but different from chlorophyll of higher plants.

- *She wrote a short paragraph that included "bacteriochlorophyll."*
- *Understanding "bacteriochlorophyll" helps you talk about this topic clearly.*

---

bacterioid *(adjective)*

Resembling bacteria.

- *Would you call this situation "bacterioid"? Explain why.*
- *Her writing became clearer after she learned "bacterioid."*

---

bacterioidal *(adjective)*

Resembling bacteria.

- *The speaker chose "bacterioidal" because it captured the feeling precisely.*
- *It is useful to describe something as "bacterioidal" when it is resembling bacteria.*

---

bacteriologic *(adjective)*

Of or relating to bacteriology.

- *A "bacteriologic" approach may work better in this case.*
- *Would you call this situation "bacteriologic"? Explain why.*

---

bacteriolysis *(noun)*

Dissolution or destruction of bacteria.

- *She wrote a short paragraph that included "bacteriolysis."*
- *He looked up "bacteriolysis" because he had never seen it before.*

---

bacteriolytic *(adjective)*

Of or relating to or causing bacteriolysis.

- *Students compared "bacteriolytic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "bacteriolytic."*

---

bacteriophagic *(adjective)*

Of or relating to bacteriophages.

- *The speaker chose "bacteriophagic" because it captured the feeling precisely.*
- *It is useful to describe something as "bacteriophagic" when it is of or relating to bacteriophages.*

---

bacteriophagous *(adjective)*

Of or relating to bacteriophages.

- *Students compared "bacteriophagous" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "bacteriophagous."*

---

bacteriostasis *(noun)*

Inhibition of the growth of bacteria.

- *He looked up "bacteriostasis" because he had never seen it before.*
- *Understanding "bacteriostasis" helps you talk about this topic clearly.*

---

bacteriostat *(noun)*

A chemical or biological material that inhibits bacterial growth.

- *She wrote a short paragraph that included "bacteriostat."*
- *He looked up "bacteriostat" because he had never seen it before.*

---

bacterise *(verb)*

Subject to the action of bacteria.

- *The coach explained when to use “bacterise” and when to wait.*
- *He did not know how to use “bacterise” until he saw an example.*

---

bacterize *(verb)*

Subject to the action of bacteria.

- *He did not know how to use “bacterize” until he saw an example.*
- *Learners should practice how to use “bacterize” in real sentences.*

---

bacteroid *(noun)*

A rodlike bacterium (especially any of the rod-shaped or branched bacteria in the root nodules of nitrogen-fixing plants).

- *They discussed “bacteroid” during the group presentation.*
- *He looked up “bacteroid” because he had never seen it before.*

---

bacteroidaceae *(noun)*

Family of bacteria living usually in the alimentary canal or on mucous surfaces of warm-blooded animals; sometimes associated with acute infective processes.

- *Understanding “bacteroidaceae” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “bacteroidaceae.”*

---

bacteroidal *(adjective)*

Resembling bacteria.

- *It is useful to describe something as “bacteroidal” when it is resembling bacteria.*
- *The speaker chose “bacteroidal” because it captured the feeling precisely.*

---

baculiform *(adjective)*

Formed like a bacillus.

- *Students compared “baculiform” with similar adjectives in the lesson.*
- *Her writing became clearer after she learned “baculiform.”*

---

badaga *(noun)*

The dialect of Kannada that is spoken by the Badaga.

- *He looked up “badaga” because he had never seen it before.*
- *In class, the teacher used “badaga” to mean the dialect of kannada that is spoken by the badaga.*

---

baddeleyite *(noun)*

A mineral consisting of zirconium oxide.

- *Understanding “baddeleyite” helps you talk about this topic clearly.*
- *The article explained what “baddeleyite” means with a simple example.*

---

badgerer *(noun)*

Someone who tries to embarrass you with gibes and questions and objections.

- *In class, the teacher used “badgerer” to mean someone who tries to embarrass you with gibes and....*
- *They discussed “badgerer” during the group presentation.*

---

baeda *(noun)*

(Roman Catholic Church) English monk and scholar (672-735).

- *She wrote a short paragraph that included “baeda.”*
- *He looked up “baeda” because he had never seen it before.*

---

bagascosis *(noun)*

Alveolitis caused by inhaling bagasse (sugarcane dust).

- *They discussed “bagascosis” during the group presentation.*
- *The article explained what “bagascosis” means with a simple example.*

---

bagassosis *(noun)*

Alveolitis caused by inhaling bagasse (sugarcane dust).

- *The article explained what “bagassosis” means with a simple example.*
- *In class, the teacher used “bagassosis” to mean alveolitis caused by inhaling bagasse (sugarcane dust).*

baggageman *(noun)*

An attendant who takes care of baggage.

- *He looked up "baggageman" because he had never seen it before.*
- *She wrote a short paragraph that included "baggageman."*

bagnio *(noun)*

A building where prostitutes are available.

- *In class, the teacher used "bagnio" to mean a building where prostitutes are available.*
- *The article explained what "bagnio" means with a simple example.*

baguet *(noun)*

Narrow French stick loaf.

- *Understanding "baguet" helps you talk about this topic clearly.*
- *They discussed "baguet" during the group presentation.*

- *They discussed "bairdiella chrysoura" during the group presentation.*
- *Understanding "bairdiella chrysoura" helps you talk about this topic clearly.*

---

bairiki *(noun)*

National capital of Kiribati.

- *They discussed "bairiki" during the group presentation.*
- *He looked up "bairiki" because he had never seen it before.*

---

baisa *(noun)*

1,000 baiza equal 1 riyal-omani in Oman.

- *Understanding "baisa" helps you talk about this topic clearly.*
- *They discussed "baisa" during the group presentation.*

---

baisakh *(noun)*

The second month of the Hindu calendar.

- *The article explained what "baisakh" means with a simple example.*
- *Understanding "baisakh" helps you talk about this topic clearly.*

---

baiza *(noun)*

1,000 baiza equal 1 riyal-omani in Oman.

- *The article explained what "baiza" means with a simple example.*
- *In class, the teacher used "baiza" to mean 1,000 baiza equal 1 riyal-omani in oman.*

---

bakeapple *(noun)*

Creeping raspberry of north temperate regions with yellow or orange berries.

- *The article explained what "bakeapple" means with a simple example.*
- *Understanding "bakeapple" helps you talk about this topic clearly.*

---

bakshis *(noun)*

A relatively small amount of money given for services rendered (as by a waiter).

- *The article explained what "bakshis" means with a simple example.*
- *In class, the teacher used "bakshis" to mean a relatively small amount of money given for....*

---

bakshish *(noun)*

A relatively small amount of money given for services rendered (as by a waiter).

- *They discussed "bakshish" during the group presentation.*
- *The article explained what "bakshish" means with a simple example.*

---

balaena mysticetus *(noun)*

Large-mouthed Arctic whale.

- *In class, the teacher used "balaena mysticetus" to mean large-mouthed arctic whale.*
- *The article explained what "balaena mysticetus" means with a simple example.*

---

balaeniceps *(noun)*

Type genus of the Balaenicipitidae: shoebills.

- *The article explained what "balaeniceps" means with a simple example.*
- *Understanding "balaeniceps" helps you talk about this topic clearly.*

---

balaeniceps rex *(noun)*

Large stork-like bird of the valley of the White Nile with a broad bill suggesting a wooden shoe.

- *He looked up "balaeniceps rex" because he had never seen it before.*
- *She wrote a short paragraph that included "balaeniceps rex."*

---

balaenidae *(noun)*

Right whales.

- *In class, the teacher used "balaenidae" to mean right whales.*

- *The article explained what "balaenidae" means with a simple example.*

balaenoptera acutorostrata *(noun)*

Small finback of coastal waters of Atlantic and Pacific.

- *Understanding "balaenoptera acutorostrata" helps you talk about this topic clearly.*
- *He looked up "balaenoptera acutorostrata" because he had never seen it before.*

balaenoptera physalus *(noun)*

Large flat-headed whalebone whale having deep furrows along the throat; of Atlantic and Pacific.

- *They discussed "balaenoptera physalus" during the group presentation.*
- *In class, the teacher used "balaenoptera physalus" to mean large flat-headed whalebone whale having deep....*

balaenopteridae *(noun)*

Rorquals; blue whales.

- *Understanding "balaenopteridae" helps you talk about this topic clearly.*
- *The article explained what "balaenopteridae" means with a simple example.*

balanidae *(noun)*

Stalkless barnacles.

- *She wrote a short paragraph that included "balanidae."*
- *He looked up "balanidae" because he had never seen it before.*

balanoposthitis *(noun)*

Inflammation of both the head of the penis and the foreskin.

- *In class, the teacher used "balanoposthitis" to mean inflammation of both the head of the penis and the....*
- *Understanding "balanoposthitis" helps you talk about this topic clearly.*

balanus balanoides *(noun)*

Barnacle that attaches to rocks especially in intertidal zones.

- *He looked up "balanus balanoides" because he had never seen it before.*
- *They discussed "balanus balanoides" during the group presentation.*

balefire *(noun)*

A large outdoor fire that is lighted as a signal or in celebration.

- *He looked up "balefire" because he had never seen it before.*
- *They discussed "balefire" during the group presentation.*

bidens trichosperma *(noun)*

North American bur marigold with large flowers.

- *Understanding “bidens trichosperma” helps you talk about this topic clearly.*
- *The article explained what “bidens trichosperma” means with a simple example.*

---

bidens tripartita *(noun)*

Bur marigold of temperate Eurasia.

- *She wrote a short paragraph that included “bidens tripartita.”*
- *He looked up “bidens tripartita” because he had never seen it before.*

---

biflagellate *(adjective)*

Having two flagella.

- *A biflagellate zoospore.*
- *Would you call this situation “biflagellate”? Explain why.*

---

bifoliate *(adjective)*

Having two leaves.

- *Her writing became clearer after she learned “bifoliate.”*
- *Students compared “bifoliate” with similar adjectives in the lesson.*

---

biform *(adjective)*

Having or combining two forms.

- *A biform crystal.*
- *The biform body of a mermaid.*

---

big shellbark *(noun)*

Hickory of the eastern United States resembling the shagbark but having a much larger nut.

- *In class, the teacher used “big shellbark” to mean hickory of the eastern united states resembling the....*
- *Understanding “big shellbark” helps you talk about this topic clearly.*

---

big shellbark hickory *(noun)*

Hickory of the eastern United States resembling the shagbark but having a much larger nut.

- *She wrote a short paragraph that included “big shellbark hickory.”*
- *He looked up “big shellbark hickory” because he had never seen it before.*

---

bigarade *(noun)*

Any of various common orange trees yielding sour or bitter fruit; used as grafting stock.

- *They discussed “bigarade” during the group presentation.*
- *The article explained what “bigarade” means with a simple example.*

bigeminal *(adjective)*

Occurring in pairs.

- *A bigeminal pulse.*
- *It is useful to describe something as "bigeminal" when it is occurring in pairs.*

bigeneric *(adjective)*

Resulting from a cross between species of different genera.

- *It is useful to describe something as "bigeneric" when it is resulting from a cross between species of different....*
- *The speaker chose "bigeneric" because it captured the feeling precisely.*

bigheartedness *(noun)*

The quality of being kind and generous.

- *He looked up "bigheartedness" because he had never seen it before.*
- *She wrote a short paragraph that included "bigheartedness."*

bigmouthed *(adjective)*

Unwisely talking too much.

- *Would you call this situation "bigmouthed"? Explain why.*
- *Students compared "bigmouthed" with similar adjectives in the lesson.*

bignonia *(noun)*

One species: cross vine.

- *They discussed "bignonia" during the group presentation.*
- *She wrote a short paragraph that included "bignonia."*

bignonia capreolata *(noun)*

Woody flowering vine of southern United States; stems show a cross in transverse section.

- *The article explained what "bignonia capreolata" means with a simple example.*
- *Understanding "bignonia capreolata" helps you talk about this topic clearly.*

bignoniaceae *(noun)*

Trees or shrubs or woody vines or herbs having fruit resembling gourds or capsules; sometimes placed in the order Scrophulariales.

- *She wrote a short paragraph that included "bignoniaceae."*
- *The article explained what "bignoniaceae" means with a simple example.*

bignoniaceous *(adjective)*

Of or pertaining to or characteristic of plants of the family Bignoniaceae.

- *Would you call this situation "bignoniaceous"? Explain why.*
- *A "bignoniaceous" approach may work better in this case.*

bignoniad *(noun)*

Any woody plant of the family Bignoniaceae.

- *The article explained what "bignoniad" means with a simple example.*
- *In class, the teacher used "bignoniad" to mean any woody plant of the family bignoniaceae.*

bigtooth aspen *(noun)*

Aspen with a narrow crown; eastern North America.

- *The article explained what "bigtooth aspen" means with a simple example.*
- *In class, the teacher used "bigtooth aspen" to mean aspen with a narrow crown; eastern north america.*

bigtoothed aspen *(noun)*

Aspen with a narrow crown; eastern North America.

- *In class, the teacher used "bigtoothed aspen" to mean aspen with a narrow crown; eastern north america.*
- *He looked up "bigtoothed aspen" because he had never seen it before.*

bijugate leaf *(noun)*

A pinnate leaf having two pairs of leaflets.

- *They discussed "bijugate leaf" during the group presentation.*
- *In class, the teacher used "bijugate leaf" to mean a pinnate leaf having two pairs of leaflets.*

bijugous leaf *(noun)*

A pinnate leaf having two pairs of leaflets.

- *He looked up "bijugous leaf" because he had never seen it before.*
- *In class, the teacher used "bijugous leaf" to mean a pinnate leaf having two pairs of leaflets.*

Having two lips.

- *The corolla of a snapdragon is bilabiate.*
- *Her writing became clearer after she learned "bilabiate."*

bilateralism *(noun)*

The property of being symmetrical about a vertical plane.

- *She wrote a short paragraph that included "bilateralism."*
- *He looked up "bilateralism" because he had never seen it before.*

bilaterality *(noun)*

The property of being symmetrical about a vertical plane.

- *Understanding "bilaterality" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "bilaterality."*

bilestone *(noun)*

A calculus formed in the gall bladder or its ducts.

- *They discussed "bilestone" during the group presentation.*
- *The article explained what "bilestone" means with a simple example.*

bilgy *(adjective)*

Smelling like bilge water.

- *Her writing became clearer after she learned "bilgy."*
- *Students compared "bilgy" with similar adjectives in the lesson.*

bilharziasis *(noun)*

An infestation with or a resulting infection caused by a parasite of the genus Schistosoma; common in the tropics and Far East; symptoms depend on the part of the body infected.

- *She wrote a short paragraph that included "bilharziasis."*
- *He looked up "bilharziasis" because he had never seen it before.*

biliary ductule *(noun)*

Excretory ducts of the liver; empty into the hepatic ducts.

- *Understanding "biliary ductule" helps you talk about this topic clearly.*
- *The article explained what "biliary ductule" means with a simple example.*

bilimbi *(noun)*

East Indian evergreen tree bearing very acid fruit.

- *Understanding "bilimbi" helps you talk about this topic clearly.*
- *The article explained what "bilimbi" means with a simple example.*

bilingualist *(noun)*

A person who speaks two languages fluently.

- *The article explained what "bilingualist" means with a simple example.*
- *She wrote a short paragraph that included "bilingualist."*

biliousness *(noun)*

A disposition to exhibit uncontrolled anger.

- *In class, the teacher used "biliousness" to mean a disposition to exhibit uncontrolled anger.*

- *Understanding "biliousness" helps you talk about this topic clearly.*

---

billyo *(noun)*

An unimaginably large amount.

- *British say 'it rained like billyo' where Americans say 'it rained like all get out'.*
- *The article explained what "billyo" means with a simple example.*

---

billyoh *(noun)*

An unimaginably large amount.

- *They discussed "billyoh" during the group presentation.*
- *The article explained what "billyoh" means with a simple example.*

---

billystick *(noun)*

A short stout club used primarily by policemen.

- *Understanding "billystick" helps you talk about this topic clearly.*
- *They discussed "billystick" during the group presentation.*

---

bilobate *(adjective)*

Having two lobes.

- *A bilobate leaf.*
- *It is useful to describe something as "bilobate" when it is having two lobes.*

---

bilobated *(adjective)*

Having two lobes.

- *Students compared "bilobated" with similar adjectives in the lesson.*
- *Would you call this situation "bilobated"? Explain why.*

---

bilocular *(adjective)*

Divided into or containing two cells or chambers.

- *Having a bilocular capsule.*
- *The speaker chose "bilocular" because it captured the feeling precisely.*

---

bilocular capsule *(noun)*

A capsule divided into two cells or compartments.

- *He looked up "bilocular capsule" because he had never seen it before.*
- *She wrote a short paragraph that included "bilocular capsule."*

---

biloculate *(adjective)*

Divided into or containing two cells or chambers.

- *Students compared "biloculate" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "biloculate."*

---

bilsted *(noun)*

A North American tree of the genus Liquidambar having prickly spherical fruit clusters and fragrant sap.

- *They discussed "bilsted" during the group presentation.*
- *In class, the teacher used "bilsted" to mean a north american tree of the genus liquidambar....*

---

bimester *(noun)*

A period of 2 months.

- *She wrote a short paragraph that included "bimester."*
- *They discussed "bimester" during the group presentation.*

---

bimestrial *(adjective)*

Occurring every two months.

- *It is useful to describe something as "bimestrial" when it is occurring every two months.*
- *A "bimestrial" approach may work better in this case.*

---

bimetallist *(noun)*

An advocate of bimetallism.

- *Understanding "bimetallist" helps you talk about this topic clearly.*
- *The article explained what "bimetallist" means with a simple example.*

---

bimetallistic *(adjective)*

Pertaining to a monetary system based on two metals.

- *In a bimetallistic system both gold and silver can constitute legal tender.*
- *Would you call this situation "bimetallistic"? Explain why.*

---

bimillenary *(noun)*

The 2000th anniversary (or the celebration of it).

- *In class, the teacher used "bimillenary" to mean the 2000th anniversary (or the celebration of it).*
- *The article explained what "bimillenary" means with a simple example.*

---

bimillenial *(adjective)*

Of or relating to a bimillennium.

- *Would you call this situation "bimillenial"? Explain why.*
- *Students compared "bimillenial" with similar adjectives in the lesson.*

---

bimillennium *(noun)*

The 2000th anniversary (or the celebration of it).

- *She wrote a short paragraph that included "bimillennium."*
- *He looked up "bimillennium" because he had never seen it before.*

---

bimli *(noun)*

Valuable fiber plant of East Indies now widespread in cultivation.

- *The article explained what "bimli" means with a simple example.*
- *They discussed "bimli" during the group presentation.*

---

bimli hemp *(noun)*

Valuable fiber plant of East Indies now widespread in cultivation.

- *They discussed "bimli hemp" during the group presentation.*
- *In class, the teacher used "bimli hemp" to mean valuable fiber plant of east indies now widespread....*

---

bimorphemic *(adjective)*

Consisting of two morphemes.

- *The bimorphemic word 'rays'.*
- *The speaker chose "bimorphemic" because it captured the feeling precisely.*

---

bimotored *(adjective)*

Having two motors.

- *A "bimotored" approach may work better in this case.*
- *The speaker chose "bimotored" because it captured the feeling precisely.*

---

binate *(adjective)*

Growing in two parts or in pairs.

- *Binate leaves.*
- *The speaker chose "binate" because it captured the feeling precisely.*

---

binaurally *(adverb)*

In a binaural manner.

- *The stimulus was presented binaurally.*
- *Try rewriting the sentence and include "binaurally" naturally.*

---

bindable *(adjective)*

Capable of being fastened or secured with a rope or bond.

- *Her writing became clearer after she learned "bindable."*
- *The speaker chose "bindable" because it captured the feeling precisely.*

---

binful *(noun)*

The quantity contained in a bin.

- *He looked up "binful" because he had never seen it before.*
- *She wrote a short paragraph that included "binful."*

---

binuclear *(adjective)*

Having two nuclei.

- *Her writing became clearer after she learned "binuclear."*
- *A "binuclear" approach may work better in this case.*

---

binucleate *(adjective)*

Having two nuclei.

- *Would you call this situation "binucleate"? Explain why.*
- *A "binucleate" approach may work better in this case.*

---

binucleated *(adjective)*

Having two nuclei.

- *It is useful to describe something as "binucleated" when it is having two nuclei.*
- *Students compared "binucleated" with similar adjectives in the lesson.*

---

bioarm *(noun)*

Any weapon usable in biological warfare.

- *He looked up "bioarm" because he had never seen it before.*
- *Understanding "bioarm" helps you talk about this topic clearly.*

---

bioattack *(noun)*

The use of bacteria or viruses or toxins to destroy men and animals or food.

- *He looked up "bioattack" because he had never seen it before.*
- *They discussed "bioattack" during the group presentation.*

---

bioclimatology *(noun)*

The study of effects of climate on living organisms.

- *Understanding "bioclimatology" helps you talk about this topic clearly.*
- *They discussed "bioclimatology" during the group presentation.*

---

biodefence *(noun)*

Procedures involved in taking defensive measures against attacks using biological agents.

- *Understanding "biodefence" helps you talk about this topic clearly.*
- *The article explained what "biodefence" means with a simple example.*

---

bioflavinoid *(noun)*

A vitamin that maintains the resistance of cell and capillary walls to permeation.

- *He looked up "bioflavinoid" because he had never seen it before.*
- *She wrote a short paragraph that included "bioflavinoid."*

---

biogenous *(adjective)*

Producing or produced by living things.

- *A "biogenous" approach may work better in this case.*
- *Students compared "biogenous" with similar adjectives in the lesson.*

---

biogeny *(noun)*

The production of living organisms from other living organisms.

- *They discussed "biogeny" during the group presentation.*
- *She wrote a short paragraph that included "biogeny."*

biologism *(noun)*

Use of biological principles in explaining human especially social behavior.

- *They discussed "biologism" during the group presentation.*
- *The article explained what "biologism" means with a simple example.*

biologistic *(adjective)*

Of or relating to biologism.

- *It is useful to describe something as "biologistic" when it is of or relating to biologism.*
- *The speaker chose "biologistic" because it captured the feeling precisely.*

bionomic *(adjective)*

Of or relating to the science of ecology.

- *Would you call this situation "bionomic"? Explain why.*
- *The speaker chose "bionomic" because it captured the feeling precisely.*

bionomical *(adjective)*

Of or relating to the science of ecology.

- *The speaker chose "bionomical" because it captured the feeling precisely.*
- *Would you call this situation "bionomical"? Explain why.*

biont *(noun)*

A discrete unit of living matter.

- *In class, the teacher used "biont" to mean a discrete unit of living matter.*
- *Understanding "biont" helps you talk about this topic clearly.*

biopiracy *(noun)*

Biological theft; illegal collection of indigenous plants by corporations who patent them for their own use.

- *Understanding "biopiracy" helps you talk about this topic clearly.*
- *They discussed "biopiracy" during the group presentation.*

biosystematic *(adjective)*

Of or relating to biosystematics.

- *Students compared "biosystematic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "biosystematic."*

biosystematics *(noun)*

Use of data (e.g. cytogenetic or biochemical) to assess taxonomic relations especially within an evolutionary framework.

- *They discussed "biosystematics" during the group presentation.*
- *In class, the teacher used "biosystematics" to mean use of data (e.g. cytogenetic or biochemical) to....*

biosystematy *(noun)*

Use of data (e.g. cytogenetic or biochemical) to assess taxonomic relations especially within an evolutionary framework.

- *They discussed "biosystematy" during the group presentation.*
- *The article explained what "biosystematy" means with a simple example.*

biotitic *(adjective)*

Relating to or involving biotite.

- *The speaker chose "biotitic" because it captured the feeling precisely.*
- *A "biotitic" approach may work better in this case.*

biotypic *(adjective)*

Of or relating to a biotype.

- *The speaker chose "biotypic" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "biotypic."*

biovular *(adjective)*

(of twins) derived from two separate fertilized ova.

- *Fraternal twins are biovular.*
- *Students compared "biovular" with similar adjectives in the lesson.*

---

biparous *(adjective)*

Producing two offspring at a time.

- *A "biparous" approach may work better in this case.*
- *Her writing became clearer after she learned "biparous."*

---

bipartizan *(adjective)*

Supported by both sides.

- *Would you call this situation "bipartizan"? Explain why.*
- *Her writing became clearer after she learned "bipartizan."*

---

bipinnatifid *(adjective)*

Pinnatifid with the segments also pinnatifid.

- *A "bipinnatifid" approach may work better in this case.*
- *The speaker chose "bipinnatifid" because it captured the feeling precisely.*

---

biprism *(noun)*

An optical device for obtaining interference fringes.

- *Understanding "biprism" helps you talk about this topic clearly.*
- *The article explained what "biprism" means with a simple example.*

---

biquadrate *(noun)*

An algebraic equation of the fourth degree.

- *Understanding "biquadrate" helps you talk about this topic clearly.*
- *The article explained what "biquadrate" means with a simple example.*

---

biradial *(adjective)*

Showing both bilateral and radial symmetry.

- *Some sea anemones are biradial.*
- *Would you call this situation "biradial"? Explain why.*

---

biradially *(adverb)*

In a biradial manner.

- *Biradially symmetrical.*
- *Using "biradially" can make your explanation more exact.*

---

birchen *(adjective)*

Consisting of or made of wood of the birch tree.

- *A "birchen" approach may work better in this case.*
- *Students compared "birchen" with similar adjectives in the lesson.*

---

birdcall *(noun)*

The characteristic sound produced by a bird.

- *She wrote a short paragraph that included "birdcall."*
- *They discussed "birdcall" during the group presentation.*

---

birdlime *(noun)*

A sticky adhesive that is smeared on small branches to capture small birds.

- *In class, the teacher used "birdlime" to mean a sticky adhesive that is smeared on small branches....*
- *Understanding "birdlime" helps you talk about this topic clearly.*

---

birdnest *(noun)*

Nest where birds lay their eggs and hatch their young.

- *She wrote a short paragraph that included "birdnest."*

- *They discussed "birdnest" during the group presentation.*

---

birdnesting *(noun)*

Hunting for birds' nests to get the eggs.

- *She wrote a short paragraph that included "birdnesting."*
- *The article explained what "birdnesting" means with a simple example.*

---

biriani *(noun)*

An Indian dish made with highly seasoned rice and meat or fish or vegetables.

- *Understanding "biriani" helps you talk about this topic clearly.*
- *He looked up "biriani" because he had never seen it before.*

---

birl *(verb)*

Cause a floating log to rotate by treading.

- *He did not know how to use "birl" until he saw an example.*
- *In everyday English, people use "birl" when talking about this idea.*

---

birle *(verb)*

Cause a floating log to rotate by treading.

- *The coach explained when to use "birle" and when to wait.*
- *He did not know how to use "birle" until he saw an example.*

---

birretta *(noun)*

A stiff cap with ridges across the crown; worn by Roman Catholic clergy.

- *The article explained what "birretta" means with a simple example.*
- *In class, the teacher used "birretta" to mean a stiff cap with ridges across the crown; worn by....*

---

birthroot *(noun)*

Trillium of eastern North America having malodorous pink to purple flowers and an astringent root used in folk medicine especially to ease childbirth.

- *They discussed "birthroot" during the group presentation.*
- *She wrote a short paragraph that included "birthroot."*

---

birthwort *(noun)*

Creeping plant having curving flowers thought to resemble fetuses; native to Europe; naturalized Great Britain and eastern North America.

- *She wrote a short paragraph that included "birthwort."*
- *The article explained what "birthwort" means with a simple example.*

---

birthwort family *(noun)*

Family of birthworts (including wild ginger).

- *The article explained what "birthwort family" means with a simple example.*
- *In class, the teacher used "birthwort family" to mean family of birthworts (including wild ginger).*

---

bisayan *(noun)*

A member of the most numerous indigenous people of the Philippines.

- *They discussed "bisayan" during the group presentation.*
- *In class, the teacher used "bisayan" to mean a member of the most numerous indigenous people of....*

---

bisayas *(noun)*

Group of islands in the central Philippines.

- *He looked up "bisayas" because he had never seen it before.*
- *She wrote a short paragraph that included "bisayas."*

---

biscutalla laevigata *(noun)*

Plant of southeastern Europe having yellow flowers like those of mustard and pods with open valves resembling bucklers.

- *In class, the teacher used "biscutalla laevigata" to mean plant of southeastern europe having yellow flowers....*
- *The article explained what "biscutalla laevigata" means with a simple example.*

---

biscutella *(noun)*

Genus of Eurasian herbs and small shrubs: buckler mustard.

- *Understanding "biscutella" helps you talk about this topic clearly.*
- *He looked up "biscutella" because he had never seen it before.*

---

bisectional *(adjective)*

Of or relating to bisection.

- *Her writing became clearer after she learned "bisectional."*
- *Students compared "bisectional" with similar adjectives in the lesson.*

---

biserrate *(adjective)*

Having saw-like notches with the notches themselves similarly notched.

- *Her writing became clearer after she learned "biserrate."*
- *Would you call this situation "biserrate"? Explain why.*

---

bishop ulfila *(noun)*

A Christian believed to be of Cappadocian descent who became bishop of the Visigoths in 341 and translated the Bible from Greek into Gothic; traditionally held to have invented the Gothic alphabet (311-382).

---

bishopry *(noun)*

The office and dignity of a bishop.

- *He looked up "bishopry" because he had never seen it before.*
- *She wrote a short paragraph that included "bishopry."*

---

biskek *(noun)*

The capital of Kyrgyzstan (known as Frunze 1926-1991).

- *The article explained what "biskek" means with a simple example.*
- *Understanding "biskek" helps you talk about this topic clearly.*

---

bismuthal *(adjective)*

Of or relating to bismuth.

- *The speaker chose "bismuthal" because it captured the feeling precisely.*
- *It is useful to describe something as "bismuthal" when it is of or relating to bismuth.*

---

bismuthic *(adjective)*

Containing bismuth (especially in the pentavalent state).

- *Would you call this situation "bismuthic"? Explain why.*
- *The speaker chose "bismuthic" because it captured the feeling precisely.*

---

bison bonasus *(noun)*

European bison having a smaller and higher head than the North American bison.

- *Understanding "bison bonasus" helps you talk about this topic clearly.*
- *He looked up "bison bonasus" because he had never seen it before.*

---

bisontine *(adjective)*

Relating to or characteristic of bison.

- *A "bisontine" approach may work better in this case.*
- *Students compared "bisontine" with similar adjectives in the lesson.*

---

bister *(noun)*

A water-soluble brownish-yellow pigment made by boiling wood soot.

- *She wrote a short paragraph that included "bister."*
- *They discussed "bister" during the group presentation.*

---

bistered *(adjective)*

Colored with or as if with bister.

- *Students compared "bistered" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "bistered."*

---

bistred *(adjective)*

Colored with or as if with bister.

- *A "bistred" approach may work better in this case.*
- *Her writing became clearer after she learned "bistred."*

---

bistroic *(adjective)*

Of or relating to or resembling a bistro.

- *A "bistroic" approach may work better in this case.*
- *It is useful to describe something as "bistroic" when it is of or relating to or resembling a bistro.*

---

bisulcate *(adjective)*

(used of hooves) split, divided.

- *Bisulcate hoof.*
- *Would you call this situation "bisulcate"? Explain why.*

---

biteplate *(noun)*

A removable dental appliance that is worn in the palate for diagnostic or therapeutic purposes.

- *In class, the teacher used "biteplate" to mean a removable dental appliance that is worn in the....*
- *The article explained what "biteplate" means with a simple example.*

---

bitewing *(noun)*

A dental X-ray film that can be held in place by the teeth during radiography.

- *They discussed "bitewing" during the group presentation.*
- *Understanding "bitewing" helps you talk about this topic clearly.*

---

bitis *(noun)*

A genus of Viperidae.

- *They discussed "bitis" during the group presentation.*
- *She wrote a short paragraph that included "bitis."*

---

bitis arietans *(noun)*

Large African viper that inflates its body when alarmed.

- *He looked up "bitis arietans" because he had never seen it before.*
- *They discussed "bitis arietans" during the group presentation.*

---

bitis gabonica *(noun)*

Large heavy-bodied brilliantly marked and extremely venomous west African viper.

- *They discussed "bitis gabonica" during the group presentation.*
- *He looked up "bitis gabonica" because he had never seen it before.*

---

bitok *(noun)*

A Russian dish made with patties of ground meat (mixed with onions and bread and milk) and served with a sauce of sour cream.

- *The article explained what "bitok" means with a simple example.*

- *She wrote a short paragraph that included “bitok.”*

---

bitstock *(noun)*

A carpenter’s tool having a crank handle for turning and a socket to hold a bit for boring.

- *The article explained what “bitstock” means with a simple example.*
- *She wrote a short paragraph that included “bitstock.”*

---

bittacidae *(noun)*

A family of predacious tropical insects of the order Mecoptera.

- *Understanding “bittacidae” helps you talk about this topic clearly.*
- *He looked up “bittacidae” because he had never seen it before.*

---

bitter floom *(noun)*

Any of several pink-flowered marsh plant of the eastern United States resembling a true centaury.

- *They discussed “bitter floom” during the group presentation.*
- *In class, the teacher used “bitter floom” to mean any of several pink-flowered marsh plant of the....*

---

bitterish *(adjective)*

Somewhat bitter.

- *Would you call this situation “bitterish”? Explain why.*
- *Students compared “bitterish” with similar adjectives in the lesson.*

---

bitternut *(noun)*

Hickory of the eastern United States having a leaves with 7 or 9 leaflets and thin-shelled very bitter nuts.

- *The article explained what “bitternut” means with a simple example.*
- *Understanding “bitternut” helps you talk about this topic clearly.*

---

bitternut hickory *(noun)*

Hickory of the eastern United States having a leaves with 7 or 9 leaflets and thin-shelled very bitter nuts.

- *He looked up “bitternut hickory” because he had never seen it before.*
- *They discussed “bitternut hickory” during the group presentation.*

---

bitterweed *(noun)*

Widespread European weed with spiny tongue-shaped leaves and yellow flowers; naturalized in United States.

- *The article explained what “bitterweed” means with a simple example.*
- *In class, the teacher used “bitterweed” to mean widespread european weed with spiny tongue-shaped....*

---

bitterwood *(noun)*

West Indian tree yielding the drug Jamaica quassia.

- *They discussed “bitterwood” during the group presentation.*
- *He looked up “bitterwood” because he had never seen it before.*

---

bitterwood tree *(noun)*

Any of various trees or shrubs of the family Simaroubaceae having wood and bark with a bitter taste.

- *She wrote a short paragraph that included “bitterwood tree.”*
- *He looked up “bitterwood tree” because he had never seen it before.*

---

bitthead *(noun)*

The upper end of a bitt.

- *The article explained what “bitthead” means with a simple example.*
- *She wrote a short paragraph that included “bitthead.”*

---

bittie *(adjective)*

(used informally) very small.

- *A “bittie” approach may work better in this case.*
- *Students compared “bittie” with similar adjectives in the lesson.*

---

bitumastic *(noun)*

A protective coating of asphalt and filter used on structural metals that are exposed to weathering.

- *The article explained what "bitumastic" means with a simple example.*
- *She wrote a short paragraph that included "bitumastic."*

bitumenoid *(adjective)*

Like bitumen.

- *Students compared "bitumenoid" with similar adjectives in the lesson.*
- *It is useful to describe something as "bitumenoid" when it is like bitumen.*

bituminise *(verb)*

Treat with bitumen.

- *Can you use "bituminise" in a sentence that fits this situation?*
- *She tried to use "bituminise" carefully so everyone would understand.*

bituminize *(verb)*

Treat with bitumen.

- *She tried to use "bituminize" carefully so everyone would understand.*
- *In everyday English, people use "bituminize" when talking about this idea.*

bituminoid *(adjective)*

Like bitumen.

- *Would you call this situation "bituminoid"? Explain why.*
- *Her writing became clearer after she learned "bituminoid."*

- *A "blameable" approach may work better in this case.*
- *Would you call this situation "blameable"? Explain why.*

---

blameful *(adjective)*

Deserving blame or censure as being wrong or evil or injurious.

- *It is useful to describe something as "blameful" when it is deserving blame or censure as being wrong or evil....*
- *Would you call this situation "blameful"? Explain why.*

---

blandfordia *(noun)*

Small genus of tuberous Australian perennial herbs.

- *Understanding "blandfordia" helps you talk about this topic clearly.*
- *They discussed "blandfordia" during the group presentation.*

---

blandishment *(noun)*

The act of urging by means of teasing or flattery.

- *She wrote a short paragraph that included "blandishment."*
- *He looked up "blandishment" because he had never seen it before.*

---

blanquillo *(noun)*

Important marine food fishes.

- *She wrote a short paragraph that included "blanquillo."*
- *He looked up "blanquillo" because he had never seen it before.*

---

blarina brevicauda *(noun)*

North American shrew with tail less than half its body length.

- *She wrote a short paragraph that included "blarina brevicauda."*

- *The article explained what “blarina brevicauda” means with a simple example.*

---

blastemal *(adjective)*

Of or relating to blastemata.

- *Her writing became clearer after she learned “blastemal.”*
- *A “blastemal” approach may work better in this case.*

---

blastematic *(adjective)*

Of or relating to blastemata.

- *The speaker chose “blastematic” because it captured the feeling precisely.*
- *It is useful to describe something as “blastematic” when it is of or relating to blastemata.*

---

blastemic *(adjective)*

Of or relating to blastemata.

- *It is useful to describe something as “blastemic” when it is of or relating to blastemata.*
- *A “blastemic” approach may work better in this case.*

---

blastocele *(noun)*

The fluid-filled cavity inside a blastula.

- *He looked up “blastocele” because he had never seen it before.*
- *Understanding “blastocele” helps you talk about this topic clearly.*

---

blastocladia *(noun)*

A genus of fungi of the family Blastodiaceae.

- *The article explained what “blastocladia” means with a simple example.*
- *In class, the teacher used “blastocladia” to mean a genus of fungi of the family blastodiaceae.*

---

blastocladiales *(noun)*

Fungi that carry out asexual reproduction by thick-walled resting spores that produce zoospores upon germination; sometimes placed in class Oomycetes.

- *The article explained what “blastocladiales” means with a simple example.*
- *They discussed “blastocladiales” during the group presentation.*

---

blastocoel *(noun)*

The fluid-filled cavity inside a blastula.

- *Understanding “blastocoel” helps you talk about this topic clearly.*
- *He looked up “blastocoel” because he had never seen it before.*

---

blastocoele *(noun)*

The fluid-filled cavity inside a blastula.

- *She wrote a short paragraph that included “blastocoele.”*
- *He looked up “blastocoele” because he had never seen it before.*

---

blastocoelic *(adjective)*

Of or relating to a segmentation cavity.

- *Would you call this situation “blastocoelic”? Explain why.*
- *The speaker chose “blastocoelic” because it captured the feeling precisely.*

---

blastocyte *(noun)*

An undifferentiated embryonic cell.

- *Understanding “blastocyte” helps you talk about this topic clearly.*
- *They discussed “blastocyte” during the group presentation.*

---

blastocytoma *(noun)*

A tumor composed of immature undifferentiated cells.

- *Understanding “blastocytoma” helps you talk about this topic clearly.*
- *The article explained what “blastocytoma” means with a simple example.*

---

blastodermatic *(adjective)*

Of or relating to a blastoderm.

- *Students compared "blastodermatic" with similar adjectives in the lesson.*
- *A "blastodermatic" approach may work better in this case.*

---

blastodermic *(adjective)*

Of or relating to a blastoderm.

- *Her writing became clearer after she learned "blastodermic."*
- *Students compared "blastodermic" with similar adjectives in the lesson.*

---

blastodermic vessicle *(noun)*

The blastula of a placental mammal in which some differentiation of cells has occurred.

- *She wrote a short paragraph that included "blastodermic vessicle."*
- *The article explained what "blastodermic vessicle" means with a simple example.*

---

blastodiaceae *(noun)*

A family of saprobic fungi of order Blastocladiales.

- *She wrote a short paragraph that included "blastodiaceae."*
- *He looked up "blastodiaceae" because he had never seen it before.*

---

blastodisc *(noun)*

A layer of cells on the inside of the blastula.

- *Understanding "blastodisc" helps you talk about this topic clearly.*
- *He looked up "blastodisc" because he had never seen it before.*

---

blastogenesis *(noun)*

Theory that inherited characteristics are transmitted by germ plasm.

- *The article explained what "blastogenesis" means with a simple example.*
- *They discussed "blastogenesis" during the group presentation.*

---

blastogenetic *(adjective)*

Of or relating to blastogenesis.

- *It is useful to describe something as "blastogenetic" when it is of or relating to blastogenesis.*
- *Would you call this situation "blastogenetic"? Explain why.*

---

blastoma *(noun)*

A tumor composed of immature undifferentiated cells.

- *They discussed "blastoma" during the group presentation.*
- *He looked up "blastoma" because he had never seen it before.*

---

blastomeric *(adjective)*

Of or relating to a blastomere.

- *The speaker chose "blastomeric" because it captured the feeling precisely.*
- *Would you call this situation "blastomeric"? Explain why.*

---

blastomyces *(noun)*

Genus of pathogenic yeastlike fungi.

- *Understanding "blastomyces" helps you talk about this topic clearly.*
- *In class, the teacher used "blastomyces" to mean genus of pathogenic yeastlike fungi.*

---

blastomycete *(noun)*

Any of various yeastlike budding fungi of the genus Blastomyces; cause disease in humans and other animals.

- *Understanding "blastomycete" helps you talk about this topic clearly.*
- *They discussed "blastomycete" during the group presentation.*

---

blastomycotic *(adjective)*

Of or relating to or characteristic of blastomycosis.

- *Her writing became clearer after she learned "blastomycotic."*
- *Students compared "blastomycotic" with similar adjectives in the lesson.*

---

blastoporal *(adjective)*

Of or relating to a blastopore.

- *A "blastoporal" approach may work better in this case.*
- *Would you call this situation "blastoporal"? Explain why.*

---

blastoporic *(adjective)*

Of or relating to a blastopore.

- *Students compared "blastoporic" with similar adjectives in the lesson.*
- *A "blastoporic" approach may work better in this case.*

---

blastosphere *(noun)*

Early stage of an embryo produced by cleavage of an ovum; a liquid-filled sphere whose wall is composed of a single layer of cells; during this stage (about eight days after fertilization) implantation in the wall of the uterus occurs.

- *Understanding "blastosphere" helps you talk about this topic clearly.*
- *They discussed "blastosphere" during the group presentation.*

---

blastospheric *(adjective)*

Of or relating to a blastula.

- *The speaker chose "blastospheric" because it captured the feeling precisely.*
- *A "blastospheric" approach may work better in this case.*

---

blastular *(adjective)*

Of or relating to a blastula.

- *Students compared "blastular" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "blastular."*

---

blatancy *(noun)*

The property of being both obvious and offensive.

- *The blatancy of his attempt to whitewash the crime was unforgivable.*
- *In class, the teacher used "blatancy" to mean the property of being both obvious and offensive.*

---

Make dim or indistinct.

- *She tried to use "blear" carefully so everyone would understand.*
- *In everyday English, people use "blear" when talking about this idea.*

blear-eyed *(adjective)*

Tired to the point of exhaustion.

- *Would you call this situation "blear-eyed"? Explain why.*
- *Her writing became clearer after she learned "blear-eyed."*

blebbed *(adjective)*

(of glass or quartzite) marred by small bubbles or small particles of foreign material.

- *Would you call this situation "blebbed"? Explain why.*
- *Students compared "blebbed" with similar adjectives in the lesson.*

blebby *(adjective)*

(of glass or quartzite) marred by small bubbles or small particles of foreign material.

- *It is useful to describe something as "blebby" when it is (of glass or quartzite) marred by small bubbles or....*
- *The speaker chose "blebby" because it captured the feeling precisely.*

blechnaceae *(noun)*

One of a number of families into which the family Polypodiaceae has been subdivided in some classification systems; includes genera Blechnum, Doodia, Sadleria, Stenochlaena, and Woodwardia.

- *They discussed "blechnaceae" during the group presentation.*
- *The article explained what "blechnaceae" means with a simple example.*

blechnum *(noun)*

In some classification systems placed in family Polypodiaceae; terrestrial ferns of cosmopolitan distribution mainly in southern hemisphere: hard ferns.

- *In class, the teacher used "blechnum" to mean in some classification systems placed in family....*
- *The article explained what "blechnum" means with a simple example.*

blechnum spicant *(noun)*

Fern with erect fronds of Europe and western North America; often cultivated for deer browse.

- *In class, the teacher used "blechnum spicant" to mean fern with erect fronds of europe and western north....*
- *He looked up "blechnum spicant" because he had never seen it before.*

---

bleeder's disease *(noun)*

Congenital tendency to uncontrolled bleeding; usually affects males and is transmitted from mother to son.

- *They discussed "bleeder's disease" during the group presentation.*
- *In class, the teacher used "bleeder's disease" to mean congenital tendency to uncontrolled bleeding;....*

---

blenniidae *(noun)*

A family of fish including: combtooth blennies.

- *The article explained what "blenniidae" means with a simple example.*
- *They discussed "blenniidae" during the group presentation.*

---

blennioid *(noun)*

Elongated mostly scaleless marine fishes with large pectoral fins and reduced pelvic fins.

- *In class, the teacher used "blennioid" to mean elongated mostly scaleless marine fishes with large....*
- *They discussed "blennioid" during the group presentation.*

---

blennioid fish *(noun)*

Elongated mostly scaleless marine fishes with large pectoral fins and reduced pelvic fins.

- *Understanding "blennioid fish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "blennioid fish."*

---

blennioidea *(noun)*

Blennies; butterfishes; gunnels.

- *In class, the teacher used "blennioidea" to mean blennies; butterfishes; gunnels.*
- *The article explained what "blennioidea" means with a simple example.*

---

blennius *(noun)*

Type genus of the Blenniidae.

- *In class, the teacher used "blennius" to mean type genus of the blenniidae.*
- *The article explained what "blennius" means with a simple example.*

---

blennius pholis *(noun)*

European scaleless blenny.

- *The article explained what "blennius pholis" means with a simple example.*
- *In class, the teacher used "blennius pholis" to mean european scaleless blenny.*

---

blepharism *(noun)*

Condition in which a person blinks continuously.

- *She wrote a short paragraph that included "blepharism."*
- *He looked up "blepharism" because he had never seen it before.*

---

Abounding with bracken; - William Browne.

- *The woods and braky glens.*
- *The speaker chose "braky" because it captured the feeling precisely.*

---

bramidae *(noun)*

Deep-bodied percoid fishes of the open seas.

- *They discussed "bramidae" during the group presentation.*
- *He looked up "bramidae" because he had never seen it before.*

---

bramley's seedling *(noun)*

Very large cooking apple.

- *She wrote a short paragraph that included "bramley's seedling."*
- *The article explained what "bramley's seedling" means with a simple example.*

---

branched chain ketoaciduria *(noun)*

An inherited disorder of metabolism in which the urine has a odor characteristic of maple syrup; if untreated it can lead to mental retardation and death in early childhood.

- *She wrote a short paragraph that included "branched chain ketoaciduria."*
- *Understanding "branched chain ketoaciduria" helps you talk about this topic clearly.*

---

branchia *(noun)*

Respiratory organ of aquatic animals that breathe oxygen dissolved in water.

- *Understanding "branchia" helps you talk about this topic clearly.*
- *He looked up "branchia" because he had never seen it before.*

---

branchiate *(adjective)*

Provided with gills.

- *The speaker chose "branchiate" because it captured the feeling precisely.*
- *It is useful to describe something as "branchiate" when it is provided with gills.*

branchiobdella *(noun)*

Type genus of the Branchiobdellidae: a small worm that lives on the gills or surface of a crayfish attached by a sucker.

- *He looked up "branchiobdella" because he had never seen it before.*
- *She wrote a short paragraph that included "branchiobdella."*

branchiobdellidae *(noun)*

Small annelid worms with the posterior end modified into an adhesive sucker; especially formerly regarded as modified leeches.

- *He looked up "branchiobdellidae" because he had never seen it before.*
- *They discussed "branchiobdellidae" during the group presentation.*

branchiopod *(adjective)*

Of or relating to or characteristic of the subclass Branchiopoda.

- *The speaker chose "branchiopod" because it captured the feeling precisely.*
- *It is useful to describe something as "branchiopod" when it is of or relating to or characteristic of the subclass....*

branchiopod crustacean *(noun)*

Aquatic crustaceans typically having a carapace and many pairs of leaflike appendages used for swimming as well as respiration and feeding.

- *Understanding "branchiopod crustacean" helps you talk about this topic clearly.*
- *The article explained what "branchiopod crustacean" means with a simple example.*

branchiopoda *(noun)*

Primitive aquatic mainly freshwater crustaceans: fairy shrimps; brine shrimps; tadpole shrimps; can shrimps; water fleas.

- *He looked up "branchiopoda" because he had never seen it before.*
- *She wrote a short paragraph that included "branchiopoda."*

branchiopodan *(adjective)*

Of or relating to or characteristic of the subclass Branchiopoda.

- *It is useful to describe something as "branchiopodan" when it is of or relating to or characteristic of the subclass....*
- *A "branchiopodan" approach may work better in this case.*

branchiopodous *(adjective)*

Of or relating to or characteristic of the subclass Branchiopoda.

- *Students compared "branchiopodous" with similar adjectives in the lesson.*
- *Would you call this situation "branchiopodous"? Explain why.*

branchiostegidae *(noun)*

Small family of marine fishes having covered gills.

- *Understanding "branchiostegidae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "branchiostegidae."*

branchiura *(noun)*

Copepods with suctorial mouthparts; parasitic on fishes.

- *They discussed "branchiura" during the group presentation.*
- *The article explained what "branchiura" means with a simple example.*

branchlet *(noun)*

A small branch or division of a branch (especially a terminal division); usually applied to branches of the current or preceding year.

- *They discussed "branchlet" during the group presentation.*
- *Understanding "branchlet" helps you talk about this topic clearly.*

brandmark *(verb)*

Mark with a brand or trademark.

- *The coach explained when to use "brandmark" and when to wait.*
- *He did not know how to use "brandmark" until he saw an example.*

Having trim or fittings of brass.

- *A brassbound campaign chest.*
- *The heavy brassbound door.*

---

brassia *(noun)*

Genus of tropical American epiphytic orchids having striking axillary racemes of yellow to green spiderlike flowers with long slender sepals and warty lips: spider orchids.

- *The article explained what "brassia" means with a simple example.*
- *In class, the teacher used "brassia" to mean genus of tropical american epiphytic orchids having....*

---

brassia lawrenceana *(noun)*

South American orchid with spiderlike pale-yellow to pale-green flowers.

- *In class, the teacher used "brassia lawrenceana" to mean south american orchid with spiderlike pale-yellow....*
- *The article explained what "brassia lawrenceana" means with a simple example.*

---

brassia verrucosa *(noun)*

Central American orchid having spiderlike flowers with prominent green warts.

- *She wrote a short paragraph that included "brassia verrucosa."*

- *They discussed “brassia verrucosa” during the group presentation.*

brassica kaber *(noun)*

Weedy Eurasian plant often a pest in grain fields.

- *The article explained what “brassica kaber” means with a simple example.*
- *In class, the teacher used “brassica kaber” to mean weedy eurasian plant often a pest in grain fields.*

brassica napus napobrassica *(noun)*

A cruciferous plant with a thick bulbous edible yellow root.

- *She wrote a short paragraph that included “brassica napus napobrassica.”*
- *He looked up “brassica napus napobrassica” because he had never seen it before.*

brassica oleracea acephala *(noun)*

A hardy cabbage with coarse curly leaves that do not form a head.

- *The article explained what “brassica oleracea acephala” means with a simple example.*
- *She wrote a short paragraph that included “brassica oleracea acephala.”*

brassica oleracea gemmifera *(noun)*

Plant grown for its stout stalks of edible small green heads resembling diminutive cabbages.

- *The article explained what “brassica oleracea gemmifera” means with a simple example.*
- *Understanding “brassica oleracea gemmifera” helps you talk about this topic clearly.*

brassica oleracea gongylodes *(noun)*

Plant cultivated for its enlarged fleshy turnip-shaped edible stem.

- *She wrote a short paragraph that included “brassica oleracea gongylodes.”*
- *He looked up “brassica oleracea gongylodes” because he had never seen it before.*

brassica perviridis *(noun)*

Asiatic plant cultivated for its swollen root crown and edible foliage.

- *They discussed “brassica perviridis” during the group presentation.*
- *He looked up “brassica perviridis” because he had never seen it before.*

brassica rapa pekinensis *(noun)*

Plant with an elongated head of broad stalked leaves resembling celery; used as a vegetable in east Asia.

- *They discussed “brassica rapa pekinensis” during the group presentation.*
- *The article explained what “brassica rapa pekinensis” means with a simple example.*

brassica rapa perviridis *(noun)*

Asiatic plant cultivated for its swollen root crown and edible foliage.

- *She wrote a short paragraph that included “brassica rapa perviridis.”*
- *He looked up “brassica rapa perviridis” because he had never seen it before.*

brassie *(noun)*

(formerly) a golfing wood with a face more elevated that a driver but less than a spoon.

- *She wrote a short paragraph that included “brassie.”*
- *He looked up “brassie” because he had never seen it before.*

brasslike *(adjective)*

Resembling the sound of a brass instrument.

- *It is useful to describe something as “brasslike” when it is resembling the sound of a brass instrument.*
- *Would you call this situation “brasslike”? Explain why.*

Any of various woodland and meadow grasses of the genus Bromus; native to temperate regions.

- *The article explained what "bromegrass" means with a simple example.*
- *She wrote a short paragraph that included "bromegrass."*

---

bromelia *(noun)*

The type genus of the family Bromeliaceae which includes tropical American plants with deeply cleft calyx.

- *The article explained what "bromelia" means with a simple example.*
- *Understanding "bromelia" helps you talk about this topic clearly.*

---

bromeliaceae *(noun)*

A family of tropical American plants of order Xyridales including several (as the pineapple) of economic importance.

- *They discussed "bromeliaceae" during the group presentation.*
- *He looked up "bromeliaceae" because he had never seen it before.*

---

bromeosin *(noun)*

A red fluorescent dye resulting from the action of bromine on fluorescein; used in cosmetics and as a biological stain for studying cell structures.

- *Understanding "bromeosin" helps you talk about this topic clearly.*
- *He looked up "bromeosin" because he had never seen it before.*

---

bromic *(adjective)*

Relating to or containing bromine (especially pentavalent bromine).

- *It is useful to describe something as "bromic" when it is relating to or containing bromine (especially....*
- *The speaker chose "bromic" because it captured the feeling precisely.*

---

bromic acid *(noun)*

An unstable acid used as an oxidizing agent.

- *She wrote a short paragraph that included "bromic acid."*
- *They discussed "bromic acid" during the group presentation.*

---

bromidic *(adjective)*

Dull and tiresome but with pretensions of significance or originality.

- *Bromidic sermons.*
- *Her writing became clearer after she learned "bromidic."*

---

brominate *(verb)*

React with bromine.

- *Can you use "brominate" in a sentence that fits this situation?*
- *She tried to use "brominate" carefully so everyone would understand.*

---

bromoform *(noun)*

Colorless liquid haloform CHBr3.

- *She wrote a short paragraph that included "bromoform."*

- *They discussed "bromoform" during the group presentation.*

---

bromophenol blue *(noun)*

A dye used as an acid-base indicator.

- *She wrote a short paragraph that included "bromophenol blue."*
- *He looked up "bromophenol blue" because he had never seen it before.*

---

bromothymol blue *(noun)*

A dye used as an acid-base indicator.

- *In class, the teacher used "bromothymol blue" to mean a dye used as an acid-base indicator.*
- *They discussed "bromothymol blue" during the group presentation.*

---

brompheniramine maleate *(noun)*

Antihistamine (trade name Dimetane) used to treat hypersensitivity reactions (as rhinitis).

- *The article explained what "brompheniramine maleate" means with a simple example.*
- *In class, the teacher used "brompheniramine maleate" to mean antihistamine (trade name dimetane) used to treat....*

---

bromphenol blue *(noun)*

A dye used as an acid-base indicator.

- *He looked up "bromphenol blue" because he had never seen it before.*
- *Understanding "bromphenol blue" helps you talk about this topic clearly.*

---

bromthymol blue *(noun)*

A dye used as an acid-base indicator.

- *The article explained what "bromthymol blue" means with a simple example.*
- *She wrote a short paragraph that included "bromthymol blue."*

---

bromus secalinus *(noun)*

Weedy annual native to Europe but widely distributed as a weed especially in wheat.

- *She wrote a short paragraph that included "bromus secalinus."*
- *He looked up "bromus secalinus" because he had never seen it before.*

---

bronchiolar *(adjective)*

Of or relating to or involving bronchioles.

- *Her writing became clearer after she learned "bronchiolar."*
- *Would you call this situation "bronchiolar"? Explain why.*

---

bronchiole *(noun)*

Any of the smallest bronchial ducts; ending in alveoli.

- *They discussed "bronchiole" during the group presentation.*
- *He looked up "bronchiole" because he had never seen it before.*

---

bronchitic *(adjective)*

Suffering from or prone to bronchitis.

- *A "bronchitic" approach may work better in this case.*
- *Students compared "bronchitic" with similar adjectives in the lesson.*

---

broncobuster *(noun)*

A person who breaks horses.

- *Understanding "broncobuster" helps you talk about this topic clearly.*
- *He looked up "broncobuster" because he had never seen it before.*

---

brontosaur *(noun)*

Huge quadrupedal herbivorous dinosaur common in North America in the late Jurassic.

- *They discussed "brontosaur" during the group presentation.*
- *In class, the teacher used "brontosaur" to mean huge quadrupedal herbivorous dinosaur common in....*

---

brooklime *(noun)*

European plant having low-lying stems with blue flowers; sparsely naturalized in North America.

- *He looked up "brooklime" because he had never seen it before.*
- *Understanding "brooklime" helps you talk about this topic clearly.*

brookweed *(noun)*

Water pimpernel of Europe to China.

- *Understanding "brookweed" helps you talk about this topic clearly.*
- *They discussed "brookweed" during the group presentation.*

broomrape family *(noun)*

Brown or yellow leafless herbs; sometimes placed in the order Scrophulariales.

- *The article explained what "broomrape family" means with a simple example.*
- *In class, the teacher used "broomrape family" to mean brown or yellow leafless herbs; sometimes placed in....*

broomweed *(noun)*

Annual of southwestern United States having rigid woody branches with sticky foliage and yellow flowers.

- *He looked up "broomweed" because he had never seen it before.*
- *Understanding "broomweed" helps you talk about this topic clearly.*

brosme brosme *(noun)*

Large edible marine fish of northern coastal waters; related to cod.

- *Understanding "brosme brosme" helps you talk about this topic clearly.*
- *The article explained what "brosme brosme" means with a simple example.*

brotherlike *(adjective)*

Like or characteristic of or befitting a brother.

- *The speaker chose "brotherlike" because it captured the feeling precisely.*
- *It is useful to describe something as "brotherlike" when it is like or characteristic of or befitting a brother.*

brotula *(noun)*

Deep-sea fishes.

- *They discussed "brotula" during the group presentation.*
- *He looked up "brotula" because he had never seen it before.*

brotulidae *(noun)*

Chiefly deep-sea fishes related to the Ophidiidae.

- *They discussed "brotulidae" during the group presentation.*
- *Understanding "brotulidae" helps you talk about this topic clearly.*

broussonetia *(noun)*

Paper mulberry.

- *Understanding "broussonetia" helps you talk about this topic clearly.*
- *In class, the teacher used "broussonetia" to mean paper mulberry.*

broussonetia papyrifera *(noun)*

Shrubby Asiatic tree having bark (tapa) that resembles cloth; grown as a shade tree in Europe and America; male flowers are pendulous catkins and female are urn-shaped followed by small orange-red aggregate berries.

- *They discussed "broussonetia papyrifera" during the group presentation.*
- *Understanding "broussonetia papyrifera" helps you talk about this topic clearly.*

browallia *(noun)*

Any of several herbs of the genus Browallia cultivated for their blue or violet or white flowers.

- *The article explained what "browallia" means with a simple example.*
- *She wrote a short paragraph that included "browallia."*

brown rot gummosis *(noun)*

Disease of citrus trees caused by the fungus Phytophthora citrophthora.

- *They discussed "brown rot gummosis" during the group presentation.*
- *He looked up "brown rot gummosis" because he had never seen it before.*

---

browntail *(noun)*

Small brown and white European moth introduced into eastern United States; pest of various shade and fruit trees.

- *In class, the teacher used "browntail" to mean small brown and white european moth introduced into....*
- *They discussed "browntail" during the group presentation.*

---

bruchidae *(noun)*

Seed beetles.

- *They discussed "bruchidae" during the group presentation.*
- *The article explained what "bruchidae" means with a simple example.*

---

bruchus *(noun)*

Type genus of the Bruchidae.

- *Understanding "bruchus" helps you talk about this topic clearly.*
- *He looked up "bruchus" because he had never seen it before.*

---

bruchus pisorum *(noun)*

Larvae live in and feed on seeds of the pea plant.

- *She wrote a short paragraph that included "bruchus pisorum."*
- *They discussed "bruchus pisorum" during the group presentation.*

---

brucine *(noun)*

A bitter alkaloid poison resembling strychnine and extracted from nux vomica.

- *In class, the teacher used "brucine" to mean a bitter alkaloid poison resembling strychnine and....*
- *The article explained what "brucine" means with a simple example.*

---

bruckenthalia *(noun)*

A genus containing only one species: spike heath.

- *They discussed "bruckenthalia" during the group presentation.*
- *In class, the teacher used "bruckenthalia" to mean a genus containing only one species: spike heath.*

---

bruckenthalia spiculifolia *(noun)*

Small evergreen mat-forming shrub of southern Europe and Asia Minor having stiff stems and terminal clusters of small bell-shaped flowers.

- *She wrote a short paragraph that included "bruckenthalia spiculifolia."*
- *They discussed "bruckenthalia spiculifolia" during the group presentation.*

---

brumal *(adjective)*

Characteristic of or relating to winter.

- *Bears in brumal sleep.*
- *Her writing became clearer after she learned "brumal."*

---

brumous *(adjective)*

Filled or abounding with fog or mist.

- *A brumous October morning.*
- *Her writing became clearer after she learned "brumous."*

---

brunanburh *(noun)*

A battle in 937 when Athelstan defeated the Scots.

- *They discussed "brunanburh" during the group presentation.*
- *She wrote a short paragraph that included "brunanburh."*

---

brunfelsia *(noun)*

Genus of tropical American shrubs grown for their flowers followed by fleshy berrylike fruits.

- *They discussed "brunfelsia" during the group presentation.*
- *Understanding "brunfelsia" helps you talk about this topic clearly.*

brunfelsia americana *(noun)*

West Indian shrub with fragrant showy yellowish-white flowers.

- *In class, the teacher used "brunfelsia americana" to mean west indian shrub with fragrant showy....*
- *They discussed "brunfelsia americana" during the group presentation.*

brush-tailed phalanger *(noun)*

Bushy-tailed phalanger.

- *Understanding "brush-tailed phalanger" helps you talk about this topic clearly.*
- *The article explained what "brush-tailed phalanger" means with a simple example.*

brushlike *(adjective)*

Resembling a brush.

- *Brushlike blue blooms.*
- *The speaker chose "brushlike" because it captured the feeling precisely.*

brushup *(noun)*

Practice intended to polish performance or refresh the memory.

- *The article explained what "brushup" means with a simple example.*
- *She wrote a short paragraph that included "brushup."*

Genus of prickly shrubs and small trees of the Caribbean region; source of a durable hardwood.

- *He looked up "brya" because he had never seen it before.*
- *She wrote a short paragraph that included "brya."*

brya ebenus *(noun)*

West Indian tree yielding a fine grade of green ebony.

- *In class, the teacher used "brya ebenus" to mean west indian tree yielding a fine grade of green ebony.*
- *The article explained what "brya ebenus" means with a simple example.*

bryaceae *(noun)*

A family of acrocarpous mosses.

- *In class, the teacher used "bryaceae" to mean a family of acrocarpous mosses.*
- *They discussed "bryaceae" during the group presentation.*

bryales *(noun)*

Category used in some classification systems for mosses having the spore case separated from the capsule wall by a hollow intercellular space.

- *He looked up "bryales" because he had never seen it before.*
- *Understanding "bryales" helps you talk about this topic clearly.*

bryanthus *(noun)*

Procumbent Old World mat-forming evergreen shrub with racemes of pinkish-white flowers.

- *Understanding "bryanthus" helps you talk about this topic clearly.*
- *They discussed "bryanthus" during the group presentation.*

---

bryanthus taxifolius *(noun)*

Small shrub with tiny evergreen leaves and pink or purple flowers; Alpine summits and high ground in Asia and Europe and United States.

- *Understanding "bryanthus taxifolius" helps you talk about this topic clearly.*
- *In class, the teacher used "bryanthus taxifolius" to mean small shrub with tiny evergreen leaves and pink or....*

---

bryonia alba *(noun)*

White-flowered vine having thick roots and bearing small black berries; Europe to Iran.

- *In class, the teacher used "bryonia alba" to mean white-flowered vine having thick roots and bearing....*
- *They discussed "bryonia alba" during the group presentation.*

---

bryonia dioica *(noun)*

Bryony having fleshy roots pale green flowers and very small red berries; Europe; North Africa; western Asia.

- *She wrote a short paragraph that included "bryonia dioica."*
- *He looked up "bryonia dioica" because he had never seen it before.*

---

bryophytic *(adjective)*

Relating to plants of the division Bryophyta.

- *The speaker chose "bryophytic" because it captured the feeling precisely.*
- *It is useful to describe something as "bryophytic" when it is relating to plants of the division bryophyta.*

---

bryopsida *(noun)*

True mosses: bryophytes having leafy rather than thalloid gametophytes: comprises orders Andreaeales; Bryales; Dicranales; Eubryales; Sphagnales.

- *She wrote a short paragraph that included "bryopsida."*
- *He looked up "bryopsida" because he had never seen it before.*

---

bsarch *(noun)*

A bachelor's degree in architecture.

- *The article explained what "bsarch" means with a simple example.*
- *She wrote a short paragraph that included "bsarch."*

---

bubaline *(adjective)*

Relating to or resembling a buffalo.

- *It is useful to describe something as "bubaline" when it is relating to or resembling a buffalo.*
- *The speaker chose "bubaline" because it captured the feeling precisely.*

---

bubalus bubalis *(noun)*

An Asian buffalo that is often domesticated for use as a draft animal.

- *Understanding "bubalus bubalis" helps you talk about this topic clearly.*
- *In class, the teacher used "bubalus bubalis" to mean an asian buffalo that is often domesticated for use....*

---

bubalus mindorensis *(noun)*

Small buffalo of Mindoro in the Philippines.

- *The article explained what "bubalus mindorensis" means with a simple example.*
- *She wrote a short paragraph that included "bubalus mindorensis."*

---

bubblejet *(noun)*

A kind of ink-jet printer.

- *She wrote a short paragraph that included "bubblejet."*
- *He looked up "bubblejet" because he had never seen it before.*

---

bubbliness *(noun)*

The property of giving off bubbles.

- *The article explained what "bubbliness" means with a simple example.*

- *They discussed "bubbliness" during the group presentation.*

---

bubulcus *(noun)*

Small white egrets.

- *They discussed "bubulcus" during the group presentation.*
- *She wrote a short paragraph that included "bubulcus."*

---

bubulcus ibis *(noun)*

Small white egret widely distributed in warm regions often found around grazing animals.

- *He looked up "bubulcus ibis" because he had never seen it before.*
- *Understanding "bubulcus ibis" helps you talk about this topic clearly.*

---

buccula *(noun)*

A fold of fatty tissue under the chin.

- *The article explained what "buccula" means with a simple example.*
- *They discussed "buccula" during the group presentation.*

---

bucephala *(noun)*

Buffleheads and goldeneyes.

- *The article explained what "bucephala" means with a simple example.*
- *Understanding "bucephala" helps you talk about this topic clearly.*

---

bucephala islandica *(noun)*

North American goldeneye diving duck.

- *They discussed "bucephala islandica" during the group presentation.*
- *He looked up "bucephala islandica" because he had never seen it before.*

---

bucephela albeola *(noun)*

Small North American diving duck; males have bushy head plumage.

- *The article explained what "bucephela albeola" means with a simple example.*
- *In class, the teacher used "bucephela albeola" to mean small north american diving duck; males have bushy....*

---

bucephela clangula *(noun)*

Large-headed swift-flying diving duck of Arctic regions.

- *Understanding "bucephela clangula" helps you talk about this topic clearly.*
- *The article explained what "bucephela clangula" means with a simple example.*

---

buceros *(noun)*

Type genus of the family Bucerotidae.

- *They discussed "buceros" during the group presentation.*
- *The article explained what "buceros" means with a simple example.*

---

bucharesti *(noun)*

National capital and largest city of Romania in southeastern Romania.

- *He looked up "bucharesti" because he had never seen it before.*
- *They discussed "bucharesti" during the group presentation.*

---

buchloe *(noun)*

Buffalo grass.

- *In class, the teacher used "buchloe" to mean buffalo grass.*
- *They discussed "buchloe" during the group presentation.*

---

buchloe dactyloides *(noun)*

Short grass growing on dry plains of central United States (where buffalo roam).

- *They discussed "buchloe dactyloides" during the group presentation.*
- *In class, the teacher used "buchloe dactyloides" to mean short grass growing on dry plains of central united....*

---

buckbean *(noun)*

Perennial plant of Europe and America having racemes of white or purplish flowers and intensely bitter trifoliate leaves; often rooting at water margin and spreading across the surface.

- *They discussed "buckbean" during the group presentation.*
- *Understanding "buckbean" helps you talk about this topic clearly.*

buckbean family *(noun)*

A dicotyledonous family of marsh plants of order Gentianales.

- *She wrote a short paragraph that included "buckbean family."*
- *Understanding "buckbean family" helps you talk about this topic clearly.*

buckeroo *(noun)*

Local names for a cowboy ('vaquero' is used especially in southwestern and central Texas and 'buckaroo' is used especially in California).

- *In class, the teacher used "buckeroo" to mean local names for a cowboy ('vaquero' is used....*
- *They discussed "buckeroo" during the group presentation.*

buckleya *(noun)*

Parasitic shrub of the eastern United States having opposite leaves and insignificant greenish flowers followed by oily dull green olivelike fruits.

- *Understanding "buckleya" helps you talk about this topic clearly.*
- *The article explained what "buckleya" means with a simple example.*

buckleya distichophylla *(noun)*

Parasitic shrub of the eastern United States having opposite leaves and insignificant greenish flowers followed by oily dull green olivelike fruits.

- *The article explained what "buckleya distichophylla" means with a simple example.*
- *They discussed "buckleya distichophylla" during the group presentation.*

buckminsterfullerene *(noun)*

A spheroidal fullerene; the first known example of a fullerene.

- *They discussed "buckminsterfullerene" during the group presentation.*
- *In class, the teacher used "buckminsterfullerene" to mean a spheroidal fullerene; the first known example of....*

bucksaw *(noun)*

A saw that is set in a frame in the shape of an H; used with both hands to cut wood that is held in a sawbuck.

- *Understanding "bucksaw" helps you talk about this topic clearly.*
- *They discussed "bucksaw" during the group presentation.*

buckshee *(adjective)*

Free of charge; - Economist.

- *If they deposit these shares in the scheme they will get further buckshee shares on a one-for-one basis.*
- *Would you call this situation "buckshee"? Explain why.*

budgereegah *(noun)*

Small Australian parakeet usually light green with black and yellow markings in the wild but bred in many colors.

- *They discussed "budgereegah" during the group presentation.*
- *She wrote a short paragraph that included "budgereegah."*

budgerygah *(noun)*

Small Australian parakeet usually light green with black and yellow markings in the wild but bred in many colors.

- *Understanding "budgerygah" helps you talk about this topic clearly.*
- *The article explained what "budgerygah" means with a simple example.*

budorcas taxicolor *(noun)*

Large heavily built goat antelope of eastern Himalayan area.

- *He looked up "budorcas taxicolor" because he had never seen it before.*
- *Understanding "budorcas taxicolor" helps you talk about this topic clearly.*

buffalofish *(noun)*

Any of several large suckers of the Mississippi valley.

- *The article explained what "buffalofish" means with a simple example.*
- *In class, the teacher used "buffalofish" to mean any of several large suckers of the mississippi valley.*

---

bufferin *(noun)*

Aspirin coated with a substance capable of neutralizing acid (trade name Bufferin).

- *The article explained what "bufferin" means with a simple example.*
- *In class, the teacher used "bufferin" to mean aspirin coated with a substance capable of....*

---

bufo calamita *(noun)*

Common brownish-yellow short-legged toad of western Europe; runs rather than hops.

- *He looked up "bufo calamita" because he had never seen it before.*
- *She wrote a short paragraph that included "bufo calamita."*

---

bufo canorus *(noun)*

Of high Sierra Nevada meadows and forest borders.

- *They discussed "bufo canorus" during the group presentation.*
- *In class, the teacher used "bufo canorus" to mean of high sierra nevada meadows and forest borders.*

---

bufo microscaphus *(noun)*

A uniformly warty stocky toad of washes and streams of semiarid southwestern United States.

- *They discussed "bufo microscaphus" during the group presentation.*
- *Understanding "bufo microscaphus" helps you talk about this topic clearly.*

---

bugbane *(noun)*

A plant of the genus Cimicifuga having flowers in long racemes or panicles reported to be distasteful to insects.

- *He looked up "bugbane" because he had never seen it before.*
- *Understanding "bugbane" helps you talk about this topic clearly.*

---

bugginess *(noun)*

The state of having bugs.

- *She wrote a short paragraph that included "bugginess."*
- *The article explained what "bugginess" means with a simple example.*

---

bugleweed *(noun)*

A mildly narcotic and astringent aromatic herb having small whitish flowers; eastern United States.

- *In class, the teacher used "bugleweed" to mean a mildly narcotic and astringent aromatic herb....*
- *They discussed "bugleweed" during the group presentation.*

---

bugologist *(noun)*

A zoologist who studies insects.

- *She wrote a short paragraph that included "bugologist."*
- *The article explained what "bugologist" means with a simple example.*

---

bugology *(noun)*

The branch of zoology that studies insects.

- *Understanding "bugology" helps you talk about this topic clearly.*
- *They discussed "bugology" during the group presentation.*

---

buirdly *(adjective)*

Muscular and heavily built.

- *'buirdly' is a Scottish term.*
- *Her writing became clearer after she learned "buirdly."*

---

bulbaceous *(adjective)*

Producing or growing from bulbs.

- *A "bulbaceous" approach may work better in this case.*
- *Students compared "bulbaceous" with similar adjectives in the lesson.*

bulbed *(adjective)*

Having a bulb.

- *Students compared "bulbed" with similar adjectives in the lesson.*
- *It is useful to describe something as "bulbed" when it is having a bulb.*

bulbil *(noun)*

Small bulb or bulb-shaped growth arising from the leaf axil or in the place of flowers.

- *He looked up "bulbil" because he had never seen it before.*
- *Understanding "bulbil" helps you talk about this topic clearly.*

bulblet *(noun)*

Small bulb or bulb-shaped growth arising from the leaf axil or in the place of flowers.

- *Understanding "bulblet" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "bulblet."*

bulblet bladder fern *(noun)*

North American fern often bearing bulbils on the leaflets.

- *They discussed "bulblet bladder fern" during the group presentation.*
- *The article explained what "bulblet bladder fern" means with a simple example.*

bulblet fern *(noun)*

North American fern often bearing bulbils on the leaflets.

- *They discussed "bulblet fern" during the group presentation.*
- *The article explained what "bulblet fern" means with a simple example.*

bulblike *(adjective)*

Shaped like a bulb.

- *Would you call this situation "bulblike"? Explain why.*
- *A "bulblike" approach may work better in this case.*

bulbourethral gland *(noun)*

Either of two glands that discharge a component of seminal fluid into the urethra; homologous to Bartholin's gland in the female.

- *The article explained what "bulbourethral gland" means with a simple example.*
- *Understanding "bulbourethral gland" helps you talk about this topic clearly.*

bulghur *(noun)*

Parched crushed wheat.

- *They discussed "bulghur" during the group presentation.*
- *He looked up "bulghur" because he had never seen it before.*

bulginess *(noun)*

The property possessed by a rounded convexity.

- *In class, the teacher used "bulginess" to mean the property possessed by a rounded convexity.*
- *He looked up "bulginess" because he had never seen it before.*

bulima nervosa *(noun)*

A disorder of eating in which the person alternates between strong craving for food and aversion to food; characterized by excessive eating followed by periods of fasting or self-induced vomiting.

- *He looked up "bulima nervosa" because he had never seen it before.*

Someone who mooches or cadges (tries to get something free).

- *Understanding "cadger" helps you talk about this topic clearly.*
- *He looked up "cadger" because he had never seen it before.*

---

cadra *(noun)*

A genus of Pyralidae.

- *The article explained what "cadra" means with a simple example.*
- *She wrote a short paragraph that included "cadra."*

---

cadra cautella *(noun)*

A moth whose larvae feed on and mat together with webbing various stored products of vegetable origin.

- *Understanding "cadra cautella" helps you talk about this topic clearly.*
- *They discussed "cadra cautella" during the group presentation.*

---

cadra figulilella *(noun)*

Moth whose larvae attack dried fruits and cereal products.

- *The article explained what "cadra figulilella" means with a simple example.*
- *In class, the teacher used "cadra figulilella" to mean moth whose larvae attack dried fruits and cereal....*

---

caducean *(adjective)*

Of or relating to a caduceus.

- *Students compared "caducean" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "caducean."*

---

caeciliadae *(noun)*

Coextensive with the order Gymnophiona: legless amphibians.

- *They discussed "caeciliadae" during the group presentation.*

- *She wrote a short paragraph that included "caeciliadae."*

---

caeciliidae *(noun)*

Coextensive with the order Gymnophiona: legless amphibians.

- *She wrote a short paragraph that included "caeciliidae."*
- *The article explained what "caeciliidae" means with a simple example.*

---

caenogenesis *(noun)*

Introduction during embryonic development of characters or structure not present in the earlier evolutionary history of the strain or species (such as the addition of the placenta in mammalian evolution).

- *Understanding "caenogenesis" helps you talk about this topic clearly.*
- *The article explained what "caenogenesis" means with a simple example.*

---

caenolestes *(noun)*

Type genus of the family Caenolestidae.

- *He looked up "caenolestes" because he had never seen it before.*
- *Understanding "caenolestes" helps you talk about this topic clearly.*

---

caenolestidae *(noun)*

Small marsupials of southern South America.

- *They discussed "caenolestidae" during the group presentation.*
- *He looked up "caenolestidae" because he had never seen it before.*

---

caesalpinia bonduc *(noun)*

Tropical tree with large prickly pods of seeds that resemble beans and are used for jewelry and rosaries.

- *She wrote a short paragraph that included "caesalpinia bonduc."*
- *He looked up "caesalpinia bonduc" because he had never seen it before.*

---

caesalpinia bonducella *(noun)*

Tropical tree with large prickly pods of seeds that resemble beans and are used for jewelry and rosaries.

- *She wrote a short paragraph that included "caesalpinia bonducella."*
- *The article explained what "caesalpinia bonducella" means with a simple example.*

---

caesalpinia coriaria *(noun)*

Small thornless tree or shrub of tropical America whose seed pods are a source of tannin.

- *He looked up "caesalpinia coriaria" because he had never seen it before.*
- *She wrote a short paragraph that included "caesalpinia coriaria."*

---

caesalpinia decapetala *(noun)*

Spreading thorny shrub of tropical Asia bearing large erect racemes of red-marked yellow flowers.

- *He looked up "caesalpinia decapetala" because he had never seen it before.*
- *They discussed "caesalpinia decapetala" during the group presentation.*

---

caesalpinia gilliesii *(noun)*

A tropical flowering shrub having bright orange or red flowers; sometimes placed in genus Poinciana.

- *The article explained what "caesalpinia gilliesii" means with a simple example.*
- *Understanding "caesalpinia gilliesii" helps you talk about this topic clearly.*

---

caesalpinia sepiaria *(noun)*

Spreading thorny shrub of tropical Asia bearing large erect racemes of red-marked yellow flowers.

- *Understanding "caesalpinia sepiaria" helps you talk about this topic clearly.*
- *He looked up "caesalpinia sepiaria" because he had never seen it before.*

---

caesalpiniaceae *(noun)*

Spiny trees, shrubs, or perennial herbs, including the genera Caesalpinia, Cassia, Ceratonia, Bauhinia; commonly included in the family Leguminosae.

- *Understanding "caesalpiniaceae" helps you talk about this topic clearly.*
- *He looked up "caesalpiniaceae" because he had never seen it before.*

caesalpinioideae *(noun)*

Alternative name in some classification systems for the family Caesalpiniaceae.

- *Understanding "caesalpinioideae" helps you talk about this topic clearly.*
- *He looked up "caesalpinioideae" because he had never seen it before.*

caesarism *(noun)*

A form of government in which the ruler is an absolute dictator (not restricted by a constitution or laws or opposition etc.).

- *He looked up "caesarism" because he had never seen it before.*

A member of the Taracahitian people of central Mexico.

- *In class, the teacher used "cahita" to mean a member of the taracahitian people of central mexico.*
- *They discussed "cahita" during the group presentation.*

caiman sclerops *(noun)*

Caiman with bony ridges about the eyes; found from southern Mexico to Argentina.

- *In class, the teacher used "caiman sclerops" to mean caiman with bony ridges about the eyes; found from....*
- *The article explained what "caiman sclerops" means with a simple example.*

---

caimitillo *(noun)*

Tropical American timber tree with dark hard heavy wood and small plumlike purple fruit.

- *She wrote a short paragraph that included "caimitillo."*
- *He looked up "caimitillo" because he had never seen it before.*

---

caimito *(noun)*

Evergreen tree of West Indies and Central America having edible purple fruit star-shaped in cross section and dark green leaves with golden silky undersides.

- *He looked up "caimito" because he had never seen it before.*
- *In class, the teacher used "caimito" to mean evergreen tree of west indies and central america....*

---

cainogenesis *(noun)*

Introduction during embryonic development of characters or structure not present in the earlier evolutionary history of the strain or species (such as the addition of the placenta in mammalian evolution).

- *In class, the teacher used "cainogenesis" to mean introduction during embryonic development of....*
- *He looked up "cainogenesis" because he had never seen it before.*

---

cairina *(noun)*

A genus of Anatidae.

- *She wrote a short paragraph that included "cairina."*
- *The article explained what "cairina" means with a simple example.*

---

cairina moschata *(noun)*

Large crested wild duck of Central America and South America; widely domesticated.

- *They discussed "cairina moschata" during the group presentation.*
- *Understanding "cairina moschata" helps you talk about this topic clearly.*

---

cairned *(adjective)*

Marked by cairns.

- *It is useful to describe something as "cairned" when it is marked by cairns.*
- *The speaker chose "cairned" because it captured the feeling precisely.*

---

caitra *(noun)*

The first Hindu calendar month (corresponding to March in the Gregorian calendar).

- *He looked up "caitra" because he had never seen it before.*
- *She wrote a short paragraph that included "caitra."*

---

cajolery *(noun)*

Flattery intended to persuade.

- *They discussed "cajolery" during the group presentation.*
- *Understanding "cajolery" helps you talk about this topic clearly.*

---

In a cajoling manner.

- *He answered "cajolingly," which changed the tone of the conversation.*
- *The narrator describes the scene "cajolingly" in the final chapter.*

---

cakchiquel *(noun)*

The Mayan language spoken by the Cakchiquel.

- *In class, the teacher used "cakchiquel" to mean the mayan language spoken by the cakchiquel.*
- *Understanding "cakchiquel" helps you talk about this topic clearly.*

---

cakile *(noun)*

Small genus of succulent annual herbs found on sandy shores of North America and Europe.

- *They discussed "cakile" during the group presentation.*

- *Understanding “cakile” helps you talk about this topic clearly.*

cakile maritima *(noun)*

Salt-tolerant seashore annual grown for its fragrant rose or violet flowers and fleshy grey-green foliage.

- *She wrote a short paragraph that included “cakile maritima.”*
- *Understanding “cakile maritima” helps you talk about this topic clearly.*

calaba *(noun)*

West Indian tree having racemes of fragrant white flowers and yielding a durable timber and resinous juice.

- *Understanding “calaba” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “calaba.”*

calabazilla *(noun)*

Perennial vine of dry parts of central and southwestern United States and Mexico having small hard mottled green inedible fruit.

- *Understanding “calabazilla” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “calabazilla.”*

calabur tree *(noun)*

A fast-growing tropical American evergreen having white flowers and white fleshy edible fruit; bark yields a silky fiber used in cordage and wood is valuable for staves.

- *In class, the teacher used “calabur tree” to mean a fast-growing tropical american evergreen having....*
- *The article explained what “calabur tree” means with a simple example.*

calabura *(noun)*

A fast-growing tropical American evergreen having white flowers and white fleshy edible fruit; bark yields a silky fiber used in cordage and wood is valuable for staves.

- *They discussed “calabura” during the group presentation.*
- *Understanding “calabura” helps you talk about this topic clearly.*

caladenia *(noun)*

Any of various orchids of the genus Caladenia.

- *Understanding “caladenia” helps you talk about this topic clearly.*
- *He looked up “caladenia” because he had never seen it before.*

caladenia cairnsiana *(noun)*

Orchid with reddish linear leaves and panicle of purple-marked pale-yellow flowers with deep red or purple lip; southwestern Australia.

- *The article explained what “caladenia cairnsiana” means with a simple example.*
- *They discussed “caladenia cairnsiana” during the group presentation.*

calamagrostic quadriseta *(noun)*

Tall Australian reedlike grass sometimes used for hay.

- *They discussed “calamagrostic quadriseta” during the group presentation.*
- *Understanding “calamagrostic quadriseta” helps you talk about this topic clearly.*

calamagrostis acutiflora *(noun)*

A variety of reed grass.

- *In class, the teacher used “calamagrostis acutiflora” to mean a variety of reed grass.*
- *The article explained what “calamagrostis acutiflora” means with a simple example.*

calamary *(noun)*

(Italian cuisine) squid prepared as food.

- *Understanding “calamary” helps you talk about this topic clearly.*
- *They discussed “calamary” during the group presentation.*

calamint *(noun)*

Perennial aromatic herbs growing in hedgerows or scrub or open woodlands from western Europe to central Asia and in North America.

- *She wrote a short paragraph that included “calamint.”*
- *Understanding “calamint” helps you talk about this topic clearly.*

calamintha grandiflora *(noun)*

Aromatic herb with large pink flowers; southern and southeastern Europe; Anatolia; northern Iran.

- *The article explained what "calamintha grandiflora" means with a simple example.*
- *They discussed "calamintha grandiflora" during the group presentation.*

calamintha nepeta *(noun)*

Low-growing strongly aromatic perennial herb of southern Europe to Great Britain; naturalized in United States.

- *She wrote a short paragraph that included "calamintha nepeta."*
- *Understanding "calamintha nepeta" helps you talk about this topic clearly.*

calamintha nepeta glantulosa *(noun)*

Low-growing strongly aromatic perennial herb of southern Europe to Great Britain; naturalized in United States.

- *They discussed "calamintha nepeta glantulosa" during the group presentation.*
- *The article explained what "calamintha nepeta glantulosa" means with a simple example.*

calamintha sylvatica *(noun)*

Mint-scented perennial of central and southern Europe.

- *He looked up "calamintha sylvatica" because he had never seen it before.*
- *She wrote a short paragraph that included "calamintha sylvatica."*

calamus rotang *(noun)*

Climbing palm of Sri Lanka and southern India remarkable for the great length of the stems which are used for malacca canes.

- *The article explained what "calamus rotang" means with a simple example.*
- *They discussed "calamus rotang" during the group presentation.*

calando *(adjective)*

Gradually decreasing in tempo and volume.

- *Would you call this situation "calando"? Explain why.*
- *A "calando" approach may work better in this case.*

calandrinia *(noun)*

Large genus of low-growing herbs; widespread throughout tropical and warm temperate regions having usually basal leaves and panicles of purplish ephemeral flowers.

- *Understanding "calandrinia" helps you talk about this topic clearly.*
- *They discussed "calandrinia" during the group presentation.*

calandrinia ciliata *(noun)*

Succulent carpet-forming plant having small brilliant reddish-pink flowers; southwestern United States.

- *They discussed "calandrinia ciliata" during the group presentation.*
- *He looked up "calandrinia ciliata" because he had never seen it before.*

calapooya *(noun)*

A member of the North American Indian people of Oregon.

- *They discussed "calapooya" during the group presentation.*
- *In class, the teacher used "calapooya" to mean a member of the north american indian people of oregon.*

calapuya *(noun)*

A member of the North American Indian people of Oregon.

- *Understanding "calapuya" helps you talk about this topic clearly.*
- *The article explained what "calapuya" means with a simple example.*

calash *(noun)*

The folding hood of a horse-drawn carriage.

- *Understanding "calash" helps you talk about this topic clearly.*
- *In class, the teacher used "calash" to mean the folding hood of a horse-drawn carriage.*

calash top *(noun)*

The folding hood of a horse-drawn carriage.

- *She wrote a short paragraph that included "calash top."*
- *Understanding "calash top" helps you talk about this topic clearly.*

---

calathian violet *(noun)*

Perennial Eurasian gentian with sky-blue funnel-shaped flowers of damp open heaths.

- *He looked up "calathian violet" because he had never seen it before.*
- *Understanding "calathian violet" helps you talk about this topic clearly.*

---

calcarine fissure *(noun)*

A sulcus in the mesial surface of the occipital lobe of the cerebrum.

- *The article explained what "calcarine fissure" means with a simple example.*
- *In class, the teacher used "calcarine fissure" to mean a sulcus in the mesial surface of the occipital....*

---

calcarine sulcus *(noun)*

A sulcus in the mesial surface of the occipital lobe of the cerebrum.

- *She wrote a short paragraph that included "calcarine sulcus."*
- *He looked up "calcarine sulcus" because he had never seen it before.*

---

calced *(adjective)*

Used of certain religious orders who wear shoes.

- *Students compared "calced" with similar adjectives in the lesson.*
- *Would you call this situation "calced"? Explain why.*

---

A milky or greyish translucent to transparent quartz.

- *He looked up "calcedony" because he had never seen it before.*
- *They discussed "calcedony" during the group presentation.*

---

calceiform *(adjective)*

Of slipper-shaped blossoms.

- *The calceiform lip of certain orchids.*
- *Her writing became clearer after she learned "calceiform."*

---

calceolate *(adjective)*

Of slipper-shaped blossoms.

- *A "calceolate" approach may work better in this case.*
- *Would you call this situation "calceolate"? Explain why.*

---

calceus *(noun)*

A shoe covering the ankle; worn by ancient Romans.

- *He looked up "calceus" because he had never seen it before.*
- *They discussed "calceus" during the group presentation.*

---

calcicolous *(adjective)*

Growing or living in soil rich in lime.

- *A "calcicolous" approach may work better in this case.*
- *Her writing became clearer after she learned "calcicolous."*

---

calciferol *(noun)*

A fat-soluble vitamin that prevents rickets.

- *In class, the teacher used "calciferol" to mean a fat-soluble vitamin that prevents rickets.*
- *The article explained what "calciferol" means with a simple example.*

---

calcifugous *(adjective)*

Growing or living in acid soil.

- *The speaker chose "calcifugous" because it captured the feeling precisely.*
- *Would you call this situation "calcifugous"? Explain why.*

calcimine *(noun)*

A water-base paint containing zinc oxide and glue and coloring; used as a wash for walls and ceilings.

- *The article explained what "calcimine" means with a simple example.*
- *Understanding "calcimine" helps you talk about this topic clearly.*

calcium octadecanoate *(noun)*

An insoluble calcium salt of stearic acid and palmitic acid; it is formed when soap is mixed with water that contains calcium ions and is the scum produced in regions of hard water.

- *The article explained what "calcium octadecanoate" means with a simple example.*
- *In class, the teacher used "calcium octadecanoate" to mean an insoluble calcium salt of stearic acid and....*

calcuttan *(adjective)*

Of or relating to or characteristic of Calcutta or its inhabitants.

- *A "calcuttan" approach may work better in this case.*
- *Her writing became clearer after she learned "calcuttan."*

calean *(noun)*

An oriental tobacco pipe with a long flexible tube connected to a container where the smoke is cooled by passing through water.

- *In class, the teacher used "calean" to mean an oriental tobacco pipe with a long flexible tube....*
- *He looked up "calean" because he had never seen it before.*

caleche *(noun)*

The folding hood of a horse-drawn carriage.

- *She wrote a short paragraph that included "caleche."*
- *They discussed "caleche" during the group presentation.*

calefacient *(adjective)*

Producing the sensation of heat when applied to the body.

- *A mustard plaster is calefacient.*
- *Her writing became clearer after she learned "calefacient."*

calefaction *(noun)*

The property of being warming.

Of or relating to or expressed in calligraphy.

- *Students compared "calligraphical" with similar adjectives in the lesson.*
- *A "calligraphical" approach may work better in this case.*

---

calligraphist *(noun)*

Someone skilled in penmanship.

- *The article explained what "calligraphist" means with a simple example.*
- *Understanding "calligraphist" helps you talk about this topic clearly.*

---

callimorpha *(noun)*

Cinnabar moths.

- *In class, the teacher used "callimorpha" to mean cinnabar moths.*

- *The article explained what "callimorpha" means with a simple example.*

---

callimorpha jacobeae *(noun)*

Large red-and-black European moth; larvae feed on leaves of ragwort; introduced into United States to control ragwort.

- *Understanding "callimorpha jacobeae" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "callimorpha jacobeae."*

---

calliophis *(noun)*

Asian coral snakes.

- *Understanding "calliophis" helps you talk about this topic clearly.*
- *He looked up "calliophis" because he had never seen it before.*

---

calliopsis *(noun)*

North American annual widely cultivated for its yellow flowers with purple-red to brownish centers; in some classifications placed in a subgenus Calliopsis.

- *She wrote a short paragraph that included "calliopsis."*
- *He looked up "calliopsis" because he had never seen it before.*

---

callipygian *(adjective)*

Pertaining to or having finely developed buttocks.

- *The quest for the callipygian ideal.*
- *Her writing became clearer after she learned "callipygian."*

---

callipygous *(adjective)*

Pertaining to or having finely developed buttocks.

- *Would you call this situation "callipygous"? Explain why.*
- *Her writing became clearer after she learned "callipygous."*

---

callirhoe involucrata *(noun)*

Hairy perennial of central United States having round deeply lobed leaves and loose panicles of large crimson-purple or cherry-red flowers.

- *They discussed "callirhoe involucrata" during the group presentation.*
- *He looked up "callirhoe involucrata" because he had never seen it before.*

---

callirhoe triangulata *(noun)*

Densely hairy perennial having mostly triangular basal leaves and rose-purple flowers in panicled clusters.

- *They discussed "callirhoe triangulata" during the group presentation.*
- *She wrote a short paragraph that included "callirhoe triangulata."*

---

callisaurus *(noun)*

Zebra-tailed lizard.

- *He looked up "callisaurus" because he had never seen it before.*
- *In class, the teacher used "callisaurus" to mean zebra-tailed lizard.*

---

callisaurus draconoides *(noun)*

Swift lizard with long black-banded tail and long legs; of deserts of United States and Mexico.

- *They discussed "callisaurus draconoides" during the group presentation.*
- *Understanding "callisaurus draconoides" helps you talk about this topic clearly.*

---

callistephus *(noun)*

One species: erect Asiatic herb with large flowers.

- *She wrote a short paragraph that included "callistephus."*
- *The article explained what "callistephus" means with a simple example.*

---

callistephus chinensis *(noun)*

Valued for their beautiful flowers in a wide range of clear bright colors; grown primarily for cutting.

- *She wrote a short paragraph that included "callistephus chinensis."*
- *He looked up "callistephus chinensis" because he had never seen it before.*

---

callithrix *(noun)*

Type genus of the Callithricidae: true marmosets.

- *Understanding "callithrix" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "callithrix."*

callithump *(noun)*

A noisy mock serenade (made by banging pans and kettles) to a newly married couple.

- *She wrote a short paragraph that included "callithump."*
- *He looked up "callithump" because he had never seen it before.*

callithump parade *(noun)*

A noisy boisterous parade.

- *In class, the teacher used "callithump parade" to mean a noisy boisterous parade.*
- *They discussed "callithump parade" during the group presentation.*

callithumpian *(adjective)*

Of or relating to a callithump.

- *Her writing became clearer after she learned "callithumpian."*
- *The speaker chose "callithumpian" because it captured the feeling precisely.*

callitrichaceae *(noun)*

Dicot aquatic herbs.

- *Understanding "callitrichaceae" helps you talk about this topic clearly.*
- *In class, the teacher used "callitrichaceae" to mean dicot aquatic herbs.*

callitriche *(noun)*

Water starworts.

- *He looked up "callitriche" because he had never seen it before.*
- *They discussed "callitriche" during the group presentation.*

callitris *(noun)*

Evergreen monoecious coniferous trees or shrubs: cypress pines.

- *She wrote a short paragraph that included "callitris."*
- *The article explained what "callitris" means with a simple example.*

callitris calcarata *(noun)*

Australian tree with small flattened scales as leaves and numerous dark brown seed; valued for its timber and resin.

- *The article explained what "callitris calcarata" means with a simple example.*
- *Understanding "callitris calcarata" helps you talk about this topic clearly.*

callitris cupressiformis *(noun)*

Australian cypress pine having globular cones.

- *She wrote a short paragraph that included "callitris cupressiformis."*
- *He looked up "callitris cupressiformis" because he had never seen it before.*

callitris endlicheri *(noun)*

Australian tree with small flattened scales as leaves and numerous dark brown seed; valued for its timber and resin.

- *In class, the teacher used "callitris endlicheri" to mean australian tree with small flattened scales as....*
- *The article explained what "callitris endlicheri" means with a simple example.*

callitris glauca *(noun)*

Small tree or shrub of southern Australia.

- *In class, the teacher used "callitris glauca" to mean small tree or shrub of southern australia.*
- *Understanding "callitris glauca" helps you talk about this topic clearly.*

callitris glaucophylla *(noun)*

Small tree or shrub of southern Australia.

- *He looked up “callitris glaucophylla” because he had never seen it before.*
- *Understanding “callitris glaucophylla” helps you talk about this topic clearly.*

---

callitris parlatorei *(noun)*

Australian cypress pine with fibrous inner bark.

- *He looked up “callitris parlatorei” because he had never seen it before.*
- *Understanding “callitris parlatorei” helps you talk about this topic clearly.*

---

callitris quadrivalvis *(noun)*

Large coniferous evergreen tree of North Africa and Spain having flattened branches and scalelike leaves yielding a hard fragrant wood; bark yields a resin used in varnishes.

- *Understanding “callitris quadrivalvis” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “callitris quadrivalvis.”*

---

callophis *(noun)*

Asian coral snakes.

- *They discussed “callophis” during the group presentation.*
- *She wrote a short paragraph that included “callophis.”*

---

callorhinus ursinus *(noun)*

Of Pacific coast from Alaska southward to California.

- *The article explained what “callorhinus ursinus” means with a simple example.*
- *Understanding “callorhinus ursinus” helps you talk about this topic clearly.*

---

callosectomy *(noun)*

Severing the corpus callosum so that communication between the cerebral hemispheres is interrupted (in cases of severe intractable epilepsy).

- *They discussed “callosectomy” during the group presentation.*
- *The article explained what “callosectomy” means with a simple example.*

---

callosity *(noun)*

An area of skin that is thick or hard from continual pressure or friction (as the sole of the foot).

- *Understanding “callosity” helps you talk about this topic clearly.*
- *In class, the teacher used “callosity” to mean an area of skin that is thick or hard from....*

---

callosotomy *(noun)*

Severing the corpus callosum so that communication between the cerebral hemispheres is interrupted (in cases of severe intractable epilepsy).

- *In class, the teacher used “callosotomy” to mean severing the corpus callosum so that communication....*
- *The article explained what “callosotomy” means with a simple example.*

---

callowness *(noun)*

Lacking and evidencing lack of experience of life.

- *The article explained what “callowness” means with a simple example.*
- *Understanding “callowness” helps you talk about this topic clearly.*

---

calnada pea *(noun)*

Common perennial climber of temperate regions of Eurasia and North America having dense elongate clusters of flowers.

- *In class, the teacher used “calnada pea” to mean common perennial climber of temperate regions of....*
- *Understanding “calnada pea” helps you talk about this topic clearly.*

---

calocarpum *(noun)*

A genus of tropical American trees of the family Sapotaceae.

- *She wrote a short paragraph that included “calocarpum.”*
- *He looked up “calocarpum” because he had never seen it before.*

---

calocarpum zapota *(noun)*

Tropical American tree having wood like mahogany and sweet edible egg-shaped fruit; in some classifications placed in the genus Calocarpum.

- *He looked up “calocarpum zapota” because he had never seen it before.*
- *She wrote a short paragraph that included “calocarpum zapota.”*

calocedrus *(noun)*

Tall evergreens of western North America and eastern Asia; formerly included in genus Libocedrus.

- *They discussed "calocedrus" during the group presentation.*
- *He looked up "calocedrus" because he had never seen it before.*

calocedrus decurrens *(noun)*

Tall tree of the Pacific coast of North America having foliage like cypress and cinnamon-red bark.

- *In class, the teacher used "calocedrus decurrens" to mean tall tree of the pacific coast of north america....*
- *The article explained what "calocedrus decurrens" means with a simple example.*

calochortus *(noun)*

Large genus of western North American leafy-stemmed bulbous herbs.

- *The article explained what "calochortus" means with a simple example.*
- *In class, the teacher used "calochortus" to mean large genus of western north american leafy-stemmed....*

calochortus albus *(noun)*

Globe lily having open branched clusters of egg-shaped white flowers; southern California.

- *In class, the teacher used "calochortus albus" to mean globe lily having open branched clusters of....*
- *They discussed "calochortus albus" during the group presentation.*

calochortus amabilis *(noun)*

Globe lily having open branched clusters of clear yellow egg-shaped flowers; northern California.

- *They discussed "calochortus amabilis" during the group presentation.*
- *Understanding "calochortus amabilis" helps you talk about this topic clearly.*

calochortus amoenus *(noun)*

Globe lily with deep rose-pink or purple egg-shaped flowers on flexuous stems; western slopes of Sierra Nevada in San Joaquin Valley.

- *The article explained what "calochortus amoenus" means with a simple example.*
- *Understanding "calochortus amoenus" helps you talk about this topic clearly.*

calochortus elegans *(noun)*

Small plant with slender bent stems bearing branched clusters of a few white star-shaped flowers with petals shaped like cat's ears; southeastern Washington and northeastern Oregon to Montana.

- *Understanding "calochortus elegans" helps you talk about this topic clearly.*
- *The article explained what "calochortus elegans" means with a simple example.*

calochortus kennedyi *(noun)*

Mariposa with clusters of bell-shaped vermilion or orange or yellow flowers atop short stems; southern California to Arizona and Mexico.

- *Understanding "calochortus kennedyi" helps you talk about this topic clearly.*
- *The article explained what "calochortus kennedyi" means with a simple example.*

calochortus luteus *(noun)*

Mariposa having clusters of a few large deep yellow bell-shaped flowers atop slender stems; California coastal ranges.

- *She wrote a short paragraph that included "calochortus luteus."*
- *The article explained what "calochortus luteus" means with a simple example.*

calochortus macrocarpus *(noun)*

Mariposa having loose clusters of one to three handsome lilac flowers resembling umbels atop stout erect stems; arid northwestern North America east of Cascade Mountains from southern British Columbia to northern California.

- *She wrote a short paragraph that included "calochortus macrocarpus."*
- *The article explained what "calochortus macrocarpus" means with a simple example.*

calochortus nuttallii *(noun)*

Perennial plant having clusters of one to four showy white bell-shaped flowers atop erect unbranched stems; edible bulbs useful in times of scarcity; eastern Montana and western North Dakota south to northern Arizona and northwestern New Mexico.

- *The article explained what "calochortus nuttallii" means with a simple example.*
- *They discussed "calochortus nuttallii" during the group presentation.*

calophyllum calaba *(noun)*

West Indian tree having racemes of fragrant white flowers and yielding a durable timber and resinous juice.

- *He looked up "calophyllum calaba" because he had never seen it before.*
- *In class, the teacher used "calophyllum calaba" to mean west indian tree having racemes of fragrant white....*

calophyllum candidissimum *(noun)*

Tropical American tree; valued for its hard durable wood.

- *Understanding "calophyllum candidissimum" helps you talk about this topic clearly.*
- *They discussed "calophyllum candidissimum" during the group presentation.*

calophyllum inophyllum *(noun)*

East Indian tree having racemes of fragrant white flowers; coastal areas southern India to Malaysia.

- *The article explained what "calophyllum inophyllum" means with a simple example.*
- *In class, the teacher used "calophyllum inophyllum" to mean east indian tree having racemes of fragrant white....*

calophyllum longifolium *(noun)*

Valuable timber tree of Panama.

- *The article explained what "calophyllum longifolium" means with a simple example.*
- *They discussed "calophyllum longifolium" during the group presentation.*

calopogon *(noun)*

Terrestrial orchids of North America.

- *Understanding "calopogon" helps you talk about this topic clearly.*
- *They discussed "calopogon" during the group presentation.*

calorifacient *(adjective)*

Producing heat; usually used of foods.

- *Calorifacient chili peppers.*
- *Would you call this situation "calorifacient"? Explain why.*

caloscypha fulgens *(noun)*

An early spring variety of discomycete with yellow to orange yellow lining of the cup.

- *The article explained what "caloscypha fulgens" means with a simple example.*
- *In class, the teacher used "caloscypha fulgens" to mean an early spring variety of discomycete with yellow....*

calosoma *(noun)*

Any beetle of the genus Calosoma.

- *She wrote a short paragraph that included "calosoma."*
- *The article explained what "calosoma" means with a simple example.*

calosoma scrutator *(noun)*

Large metallic blue-green beetle that preys on caterpillars; found in North America.

- *In class, the teacher used "calosoma scrutator" to mean large metallic blue-green beetle that preys on....*
- *They discussed "calosoma scrutator" during the group presentation.*

calostoma cinnabarina *(noun)*

A gasteromycete with a leathery stalk and a fruiting body this globose and has a red spore case.

- *She wrote a short paragraph that included "calostoma cinnabarina."*
- *The article explained what "calostoma cinnabarina" means with a simple example.*

calostoma lutescens *(noun)*

A gasteromycete with a leathery stalk and a fruiting body that is globose and has a pale yellow spore case.

- *The article explained what "calostoma lutescens" means with a simple example.*
- *She wrote a short paragraph that included "calostoma lutescens."*

calostoma ravenelii *(noun)*

A gasteromycete with a leathery stalk and a fruiting body with a thin gelatinous spore case and elliptical spores.

- *He looked up “calostoma ravenelii” because he had never seen it before.*
- *Understanding “calostoma ravenelii” helps you talk about this topic clearly.*

---

calostomataceae *(noun)*

A family of fungi belonging to the order Tulostomatales.

- *Understanding “calostomataceae” helps you talk about this topic clearly.*
- *He looked up “calostomataceae” because he had never seen it before.*

---

calpac *(noun)*

A high-crowned black cap (usually made of felt or sheepskin) worn by men in Turkey and Iran and the Caucasus.

- *In class, the teacher used “calpac” to mean a high-crowned black cap (usually made of felt or....*
- *He looked up “calpac” because he had never seen it before.*

---

calpack *(noun)*

A high-crowned black cap (usually made of felt or sheepskin) worn by men in Turkey and Iran and the Caucasus.

- *They discussed “calpack” during the group presentation.*
- *She wrote a short paragraph that included “calpack.”*

---

calumniate *(verb)*

Charge falsely or with malicious intent; attack the good name and reputation of someone.

- *In everyday English, people use “calumniate” when talking about this idea.*
- *Learners should practice how to use “calumniate” in real sentences.*

- *In class, the teacher used "calycanthaceae" to mean shrubs or small trees having aromatic bark; the....*
- *The article explained what "calycanthaceae" means with a simple example.*

calycanthus *(noun)*

A magnoliid dicot genus of the family Calycanthaceae including: allspice.

- *She wrote a short paragraph that included "calycanthus."*
- *He looked up "calycanthus" because he had never seen it before.*

calycanthus family *(noun)*

Shrubs or small trees having aromatic bark; the eastern United States and eastern Asia.

- *The article explained what "calycanthus family" means with a simple example.*
- *She wrote a short paragraph that included "calycanthus family."*

calycanthus floridus *(noun)*

Hardy shrub of southeastern United States having clove-scented wood and fragrant red-brown flowers.

- *They discussed "calycanthus floridus" during the group presentation.*
- *Understanding "calycanthus floridus" helps you talk about this topic clearly.*

calycanthus occidentalis *(noun)*

Straggling aromatic shrub of southwestern United States having fragrant brown flowers.

- *The article explained what "calycanthus occidentalis" means with a simple example.*
- *In class, the teacher used "calycanthus occidentalis" to mean straggling aromatic shrub of southwestern united....*

calyceal *(adjective)*

Of or relating to or resembling a calyx.

- *Would you call this situation "calyceal"? Explain why.*
- *It is useful to describe something as "calyceal" when it is of or relating to or resembling a calyx.*

calycinal *(adjective)*

Of or relating to or resembling a calyx.

- *Would you call this situation "calycinal"? Explain why.*
- *Students compared "calycinal" with similar adjectives in the lesson.*

calycine *(adjective)*

Of or relating to or resembling a calyx.

- *It is useful to describe something as "calycine" when it is of or relating to or resembling a calyx.*
- *Would you call this situation "calycine"? Explain why.*

calycle *(noun)*

A group of bracts simulating a calyx as in a carnation or hibiscus.

- *She wrote a short paragraph that included "calycle."*
- *He looked up "calycle" because he had never seen it before.*

calycled *(adjective)*

Having a calyculus.

- *A "calycled" approach may work better in this case.*
- *It is useful to describe something as "calycled" when it is having a calyculus.*

calycophyllum *(noun)*

Medium to large tropical American trees having shiny reddish-brown shredding bark.

- *He looked up "calycophyllum" because he had never seen it before.*
- *Understanding "calycophyllum" helps you talk about this topic clearly.*

calycophyllum candidissimum *(noun)*

Source of a tough elastic wood.

- *In class, the teacher used "calycophyllum candidissimum" to mean source of a tough elastic wood.*
- *He looked up "calycophyllum candidissimum" because he had never seen it before.*

---

calycular *(adjective)*

Relating to or resembling a calyculus.

- *It is useful to describe something as "calycular" when it is relating to or resembling a calyculus.*
- *Would you call this situation "calycular"? Explain why.*

---

calyculate *(adjective)*

Having a calyculus.

- *Her writing became clearer after she learned "calyculate."*
- *Students compared "calyculate" with similar adjectives in the lesson.*

---

calyculus *(noun)*

A group of bracts simulating a calyx as in a carnation or hibiscus.

- *The article explained what "calyculus" means with a simple example.*
- *In class, the teacher used "calyculus" to mean a group of bracts simulating a calyx as in a....*

---

calymmatobacterium *(noun)*

A genus of bacterial rods containing only the one species that causes granuloma inguinale.

- *The article explained what "calymmatobacterium" means with a simple example.*
- *Understanding "calymmatobacterium" helps you talk about this topic clearly.*

---

calymmatobacterium granulomatis *(noun)*

The species of bacteria that causes granuloma inguinale.

- *They discussed "calymmatobacterium granulomatis" during the group presentation.*
- *Understanding "calymmatobacterium granulomatis" helps you talk about this topic clearly.*

---

calypter *(noun)*

Scalelike structure between the base of the wing and the halter of a two-winged fly.

- *He looked up "calypter" because he had never seen it before.*
- *She wrote a short paragraph that included "calypter."*

---

calyptrate *(adjective)*

Having calypters.

- *Her writing became clearer after she learned "calyptrate."*
- *Would you call this situation "calyptrate"? Explain why.*

---

calyptridium umbellatum *(noun)*

Pink clusters of densely packed flowers on prostrate stems resemble upturned pads of cats' feet; grow in coniferous forests of western North America.

- *The article explained what "calyptridium umbellatum" means with a simple example.*
- *They discussed "calyptridium umbellatum" during the group presentation.*

---

calystegia *(noun)*

Climbing or scrambling herbs: bindweed.

- *In class, the teacher used "calystegia" to mean climbing or scrambling herbs: bindweed.*
- *He looked up "calystegia" because he had never seen it before.*

---

calystegia sepium *(noun)*

Common Eurasian and American wild climber with pink flowers; sometimes placed in genus Convolvulus.

- *She wrote a short paragraph that included "calystegia sepium."*
- *He looked up "calystegia sepium" because he had never seen it before.*

---

camachile *(noun)*

Common thorny tropical American tree having terminal racemes of yellow flowers followed by sickle-shaped or circinate edible pods and yielding good timber and a yellow dye and mucilaginous gum.

- *She wrote a short paragraph that included "camachile."*

- *They discussed "camachile" during the group presentation.*

---

camail *(noun)*

A medieval hood of mail suspended from a basinet to protect the head and neck.

- *The article explained what "camail" means with a simple example.*
- *They discussed "camail" during the group presentation.*

---

camash *(noun)*

Any of several plants of the genus Camassia; North and South America.

- *The article explained what "camash" means with a simple example.*
- *In class, the teacher used "camash" to mean any of several plants of the genus camassia; north....*

---

camass *(noun)*

Any of several plants of the genus Camassia; North and South America.

- *Understanding "camass" helps you talk about this topic clearly.*
- *They discussed "camass" during the group presentation.*

---

camassia *(noun)*

Genus of scapose herbs of North and South America having large edible bulbs.

- *In class, the teacher used "camassia" to mean genus of scapose herbs of north and south america....*
- *The article explained what "camassia" means with a simple example.*

---

camassia leichtlinii *(noun)*

Camas found to the west of Cascade Mountains.

- *He looked up "camassia leichtlinii" because he had never seen it before.*
- *In class, the teacher used "camassia leichtlinii" to mean camas found to the west of cascade mountains.*

---

camassia quamash *(noun)*

Plant having a large edible bulb and linear basal leaves and racemes of light to deep violet-blue star-shaped flowers on tall green scapes; western North America.

- *He looked up "camassia quamash" because he had never seen it before.*
- *She wrote a short paragraph that included "camassia quamash."*

---

camassia scilloides *(noun)*

Eastern camas; eastern and central North America.

- *She wrote a short paragraph that included "camassia scilloides."*
- *He looked up "camassia scilloides" because he had never seen it before.*

---

camelhair *(noun)*

A soft tan cloth made with the hair of a camel.

- *He looked up "camelhair" because he had never seen it before.*
- *Understanding "camelhair" helps you talk about this topic clearly.*

---

camelidae *(noun)*

Camels and llamas and vicunas.

- *They discussed "camelidae" during the group presentation.*
- *Understanding "camelidae" helps you talk about this topic clearly.*

---

camelopard *(noun)*

Tallest living quadruped; having a spotted coat and small horns and very long neck and legs; of savannahs of tropical Africa.

- *He looked up "camelopard" because he had never seen it before.*
- *She wrote a short paragraph that included "camelopard."*

---

camelpox *(noun)*

A viral disease of camels closely related to smallpox.

- *With a little genetic engineering camelpox could be used as a bioweapon.*
- *They discussed "camelpox" during the group presentation.*

---

camelus bactrianus *(noun)*

Two-humped camel of the cold deserts of central Asia.

- *He looked up "camelus bactrianus" because he had never seen it before.*
- *They discussed "camelus bactrianus" during the group presentation.*

camelus dromedarius *(noun)*

One-humped camel of the hot deserts of northern Africa and southwestern Asia.

- *They discussed "camelus dromedarius" during the group presentation.*
- *He looked up "camelus dromedarius" because he had never seen it before.*

camise *(noun)*

A loose shirt or tunic; originally worn in the Middle Ages.

- *Understanding "camise" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "camise."*

camlan *(noun)*

(Arthurian legend) the battlefield where King Arthur was mortally wounded.

- *Understanding "camlan" helps you talk about this topic clearly.*
- *In class, the teacher used "camlan" to mean (arthurian legend) the battlefield where king....*

camlet *(noun)*

A fabric of Asian origin; originally made of silk and camel's hair.

- *In class, the teacher used "camlet" to mean a fabric of asian origin; originally made of silk....*
- *Understanding "camlet" helps you talk about this topic clearly.*

camosh *(noun)*

Any of several plants of the genus Camassia; North and South America.

- *They discussed "camosh" during the group presentation.*
- *The article explained what "camosh" means with a simple example.*

campanula aparinoides *(noun)*

Bellflower common in marshes of eastern North America having lanceolate linear leaves and small whitish flowers.

- *The article explained what "campanula aparinoides" means with a simple example.*
- *They discussed "campanula aparinoides" during the group presentation.*

campanula carpatica *(noun)*

European perennial bellflower that grows in clumps with spreading stems and blue or white flowers.

- *In class, the teacher used "campanula carpatica" to mean european perennial bellflower that grows in clumps....*
- *The article explained what "campanula carpatica" means with a simple example.*

campanula persicifolia *(noun)*

Perennial European bellflower with racemose white or blue flowers.

- *Understanding "campanula persicifolia" helps you talk about this topic clearly.*
- *They discussed "campanula persicifolia" during the group presentation.*

campanula rapunculoides *(noun)*

Erect European herb with creeping rootstocks and nodding spikelike racemes of blue to violet flowers.

- *Understanding "campanula rapunculoides" helps you talk about this topic clearly.*
- *He looked up "campanula rapunculoides" because he had never seen it before.*

campanula rapunculus *(noun)*

Bellflower of Europe and Asia and North Africa having bluish flowers and an edible tuberous root used with the leaves in salad.

- *Understanding "campanula rapunculus" helps you talk about this topic clearly.*
- *He looked up "campanula rapunculus" because he had never seen it before.*

campanula trachelium *(noun)*

European bellflower with blue-purple to lilac flowers formerly used to treat sore throat.

- *Understanding "campanula trachelium" helps you talk about this topic clearly.*
- *The article explained what "campanula trachelium" means with a simple example.*

---

campanulaceae *(noun)*

Family of plants of the order Campanulales; in some classifications includes Lobeliaceae.

- *In class, the teacher used "campanulaceae" to mean family of plants of the order campanulales; in some....*
- *The article explained what "campanulaceae" means with a simple example.*

---

campanulales *(noun)*

An order of plants of the subclass Asteridae including: Campanulaceae; Lobeliaceae; Cucurbitaceae; Goodeniaceae; Compositae.

- *He looked up "campanulales" because he had never seen it before.*
- *She wrote a short paragraph that included "campanulales."*

---

campanular *(adjective)*

Shaped like a bell or campana.

- *Students compared "campanular" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "campanular."*

---

campanulated *(adjective)*

Shaped like a bell or campana.

- *The speaker chose "campanulated" because it captured the feeling precisely.*
- *Would you call this situation "campanulated"? Explain why.*

---

campeachy *(noun)*

Spiny shrub or small tree of Central America and West Indies having bipinnate leaves and racemes of small bright yellow flowers and yielding a hard brown or brownish-red heartwood used in preparing a black dye.

- *The article explained what "campeachy" means with a simple example.*
- *In class, the teacher used "campeachy" to mean spiny shrub or small tree of central america and....*

---

campephilus *(noun)*

A genus of Picidae.

- *The article explained what "campephilus" means with a simple example.*
- *In class, the teacher used "campephilus" to mean a genus of picidae.*

---

campephilus principalis *(noun)*

Large black-and-white woodpecker of southern United States and Cuba having an ivory bill; nearly extinct.

- *They discussed "campephilus principalis" during the group presentation.*
- *In class, the teacher used "campephilus principalis" to mean large black-and-white woodpecker of southern united....*

---

campestral *(adjective)*

Of fields or open country.

- *Living in campestral seclusion.*
- *It is useful to describe something as "campestral" when it is of fields or open country.*

---

camphoraceous *(adjective)*

Being or having the properties of camphor.

- *Camphoraceous odor.*
- *It is useful to describe something as "camphoraceous" when it is being or having the properties of camphor.*

---

camphorate *(verb)*

Treat with camphor.

- *The coach explained when to use "camphorate" and when to wait.*
- *Can you use "camphorate" in a sentence that fits this situation?*

---

camphoric *(adjective)*

Relating to or derived from or containing camphor.

- *Camphoric liniments.*
- *Would you call this situation "camphoric"? Explain why.*

camphorweed *(noun)*

Aromatic plant of western United States.

- *The article explained what "camphorweed" means with a simple example.*
- *She wrote a short paragraph that included "camphorweed."*

campmate *(noun)*

Someone who lives in the same camp you do.

- *In class, the teacher used "campmate" to mean someone who lives in the same camp you do.*
- *Understanding "campmate" helps you talk about this topic clearly.*

campong *(noun)*

A native village in Malaysia.

- *The article explained what "campong" means with a simple example.*
- *In class, the teacher used "campong" to mean a native village in malaysia.*

campsis radicans *(noun)*

A North American woody vine having pinnate leaves and large red trumpet-shaped flowers.

- *She wrote a short paragraph that included "campsis radicans."*
- *Understanding "campsis radicans" helps you talk about this topic clearly.*

campstool *(noun)*

A folding stool.

- *In class, the teacher used "campstool" to mean a folding stool.*
- *They discussed "campstool" during the group presentation.*

camptosorus *(noun)*

Classification used in some especially former systems for plants usually placed in genus Asplenium.

- *He looked up "camptosorus" because he had never seen it before.*
- *They discussed "camptosorus" during the group presentation.*

camptosorus rhizophyllus *(noun)*

Ferns having lanceolate fronds that root at the tip.

- *The article explained what "camptosorus rhizophyllus" means with a simple example.*
- *In class, the teacher used "camptosorus rhizophyllus" to mean ferns having lanceolate fronds that root at the tip.*

campyloneurum *(noun)*

Epiphytic ferns of tropical America.

- *The article explained what "campyloneurum" means with a simple example.*
- *They discussed "campyloneurum" during the group presentation.*

campyloneurum augustifolium *(noun)*

Fern with shorter and narrower leaves than Florida strap fern; Florida to West Indies and Mexico and south to Argentina.

- *They discussed "campyloneurum augustifolium" during the group presentation.*
- *She wrote a short paragraph that included "campyloneurum augustifolium."*

campylorhynchus *(noun)*

Alternative classifications for the cactus wrens.

- *The article explained what "campylorhynchus" means with a simple example.*
- *In class, the teacher used "campylorhynchus" to mean alternative classifications for the cactus wrens.*

campylotropous *(adjective)*

(of a plant ovule) curved with the micropyle near the base almost touching its stalk.

- *A "campylotropous" approach may work better in this case.*
- *It is useful to describe something as "campylotropous" when it is (of a plant ovule) curved with the micropyle near....*

campylotropous ovule *(noun)*

A curved ovule with the micropyle almost touching the funiculus.

- *He looked up "campylotropous ovule" because he had never seen it before.*
- *She wrote a short paragraph that included "campylotropous ovule."*

---

camwood *(noun)*

Small shrubby African tree with hard wood used as a dyewood yielding a red dye.

- *Understanding "camwood" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "camwood."*

---

canaanitic *(noun)*

A group of Semitic languages.

- *The article explained what "canaanitic" means with a simple example.*
- *They discussed "canaanitic" during the group presentation.*

---

canaanitic language *(noun)*

A group of Semitic languages.

- *She wrote a short paragraph that included "canaanitic language."*
- *He looked up "canaanitic language" because he had never seen it before.*

---

canachites *(noun)*

Spruce grouse.

- *They discussed "canachites" during the group presentation.*
- *In class, the teacher used "canachites" to mean spruce grouse.*

---

canachites canadensis *(noun)*

North American grouse that feeds on evergreen buds and needles.

- *In class, the teacher used "canachites canadensis" to mean north american grouse that feeds on evergreen buds....*
- *The article explained what "canachites canadensis" means with a simple example.*

---

canada moonseed *(noun)*

A woody vine of eastern North America having large oval leaves and small white flowers and purple to blue-black fruits.

- *Understanding "canada moonseed" helps you talk about this topic clearly.*
- *In class, the teacher used "canada moonseed" to mean a woody vine of eastern north america having large....*

---

canafistola *(noun)*

Deciduous or semi-evergreen tree having scented sepia to yellow flowers in drooping racemes and pods whose pulp is used medicinally; tropical Asia and Central and South America and Australia.

- *They discussed "canafistola" during the group presentation.*
- *Understanding "canafistola" helps you talk about this topic clearly.*

---

canafistula *(noun)*

Deciduous or semi-evergreen tree having scented sepia to yellow flowers in drooping racemes and pods whose pulp is used medicinally; tropical Asia and Central and South America and Australia.

- *They discussed "canafistula" during the group presentation.*

- *In class, the teacher used "carageen" to mean dark purple edible seaweed of the atlantic coasts....*
- *He looked up "carageen" because he had never seen it before.*

carancha *(noun)*

South American caracara.

- *She wrote a short paragraph that included "carancha."*

- *The article explained what “carancha” means with a simple example.*

---

caranda *(noun)*

South American palm yielding a wax similar to carnauba wax.

- *In class, the teacher used “caranda” to mean south american palm yielding a wax similar to....*
- *The article explained what “caranda” means with a simple example.*

---

caranda palm *(noun)*

South American palm yielding a wax similar to carnauba wax.

- *Understanding “caranda palm” helps you talk about this topic clearly.*
- *They discussed “caranda palm” during the group presentation.*

---

caranday *(noun)*

South American palm yielding a wax similar to carnauba wax.

- *She wrote a short paragraph that included “caranday.”*
- *He looked up “caranday” because he had never seen it before.*

---

carangid *(adjective)*

Of or relating to fish of the family Carangidae.

- *The speaker chose “carangid” because it captured the feeling precisely.*
- *A “carangid” approach may work better in this case.*

---

carangid fish *(noun)*

A percoid fish of the family Carangidae.

- *They discussed “carangid fish” during the group presentation.*
- *In class, the teacher used “carangid fish” to mean a percoid fish of the family carangidae.*

---

carangidae *(noun)*

Large family of narrow-bodied marine food fishes with widely forked tails; chiefly of warm seas.

- *The article explained what “carangidae” means with a simple example.*
- *Understanding “carangidae” helps you talk about this topic clearly.*

---

caranx *(noun)*

Type genus of the Carangidae.

- *She wrote a short paragraph that included “caranx.”*
- *The article explained what “caranx” means with a simple example.*

---

caranx bartholomaei *(noun)*

Fish of western Atlantic and Gulf of Mexico.

- *Understanding “caranx bartholomaei” helps you talk about this topic clearly.*
- *In class, the teacher used “caranx bartholomaei” to mean fish of western atlantic and gulf of mexico.*

---

caranx crysos *(noun)*

Fish of western Atlantic: Cape Cod to Brazil.

- *In class, the teacher used “caranx crysos” to mean fish of western atlantic: cape cod to brazil.*
- *The article explained what “caranx crysos” means with a simple example.*

---

caranx hippos *(noun)*

Fish of western Atlantic and Gulf of Mexico.

- *Understanding “caranx hippos” helps you talk about this topic clearly.*
- *The article explained what “caranx hippos” means with a simple example.*

---

carapidae *(noun)*

Pearlfishes: related to the Brotulidae.

- *He looked up “carapidae” because he had never seen it before.*
- *In class, the teacher used “carapidae” to mean pearlfishes: related to the brotulidae.*

---

carbamic acid *(noun)*

An acid that is known only by virtue of its salts (as ammonium carbamate) or its esters (as urethane).

- *The article explained what "carbamic acid" means with a simple example.*
- *In class, the teacher used "carbamic acid" to mean an acid that is known only by virtue of its salts....*

---

carbineer *(noun)*

A soldier (historically a mounted soldier) who is armed with a carbine.

- *The article explained what "carbineer" means with a simple example.*
- *In class, the teacher used "carbineer" to mean a soldier (historically a mounted soldier) who is....*

---

carbolated *(adjective)*

Containing or treated with carbolic acid.

- *The speaker chose "carbolated" because it captured the feeling precisely.*
- *It is useful to describe something as "carbolated" when it is containing or treated with carbolic acid.*

---

carboloy *(noun)*

An alloy based on tungsten with cobalt or nickel as a binder; used in making metal-cutting tools.

- *She wrote a short paragraph that included "carboloy."*
- *They discussed "carboloy" during the group presentation.*

---

carbomycin *(noun)*

A colorless basic antibiotic that inhibits the growth of Gram-positive organisms.

- *She wrote a short paragraph that included "carbomycin."*
- *He looked up "carbomycin" because he had never seen it before.*

---

carbon tetrahalide *(noun)*

Compounds composed of 1 carbon and 4 halogen molecules.

- *Understanding "carbon tetrahalide" helps you talk about this topic clearly.*
- *In class, the teacher used "carbon tetrahalide" to mean compounds composed of 1 carbon and 4 halogen molecules.*

---

carbonise *(verb)*

Turn into carbon, as by burning.

- *She tried to use "carbonise" carefully so everyone would understand.*
- *Learners should practice how to use "carbonise" in real sentences.*

---

carbonnade flamande *(noun)*

Beef stewed in beer seasoned with garlic and served with boiled potatoes.

- *The article explained what "carbonnade flamande" means with a simple example.*
- *Understanding "carbonnade flamande" helps you talk about this topic clearly.*

---

carbonous *(adjective)*

Relating to or consisting of or yielding carbon.

- *It is useful to describe something as "carbonous" when it is relating to or consisting of or yielding carbon.*
- *Students compared "carbonous" with similar adjectives in the lesson.*

---

carbonylic *(adjective)*

Relating to or containing the carbonyl group.

- *It is useful to describe something as "carbonylic" when it is relating to or containing the carbonyl group.*
- *Students compared "carbonylic" with similar adjectives in the lesson.*

---

carbuncled *(adjective)*

Afflicted with or resembling a carbuncle.

- *A "carbuncled" approach may work better in this case.*
- *It is useful to describe something as "carbuncled" when it is afflicted with or resembling a carbuncle.*

---

carbuncular *(adjective)*

Afflicted with or resembling a carbuncle.

- *It is useful to describe something as "carbuncular" when it is afflicted with or resembling a carbuncle.*
- *Would you call this situation "carbuncular"? Explain why.*

---

carburet *(verb)*

Combine with carbon.

- *The coach explained when to use "carburet" and when to wait.*
- *He did not know how to use "carburet" until he saw an example.*

---

carburise *(verb)*

Unite with carbon.

- *Learners should practice how to use "carburise" in real sentences.*
- *She tried to use "carburise" carefully so everyone would understand.*

---

carburize *(verb)*

Unite with carbon.

- *Carburize metal.*
- *Can you use "carburize" in a sentence that fits this situation?*

---

carcajou *(noun)*

Stocky shaggy-coated North American carnivorous mammal.

- *In class, the teacher used "carcajou" to mean stocky shaggy-coated north american carnivorous mammal.*
- *Understanding "carcajou" helps you talk about this topic clearly.*

---

carcharhinidae *(noun)*

Largest family of living sharks; found worldwide especially in tropical waters; dorsal fin lacks spines: requiem sharks including tiger sharks and soupfin sharks.

- *In class, the teacher used "carcharhinidae" to mean largest family of living sharks; found worldwide....*
- *The article explained what "carcharhinidae" means with a simple example.*

---

carcharhinus limbatus *(noun)*

Widely distributed shallow-water shark with fins seemingly dipped in ink.

- *In class, the teacher used "carcharhinus limbatus" to mean widely distributed shallow-water shark with fins....*
- *He looked up "carcharhinus limbatus" because he had never seen it before.*

---

carcharhinus plumbeus *(noun)*

Most common grey shark along coasts of middle Atlantic states; sluggish and occasionally caught by fishermen.

- *In class, the teacher used "carcharhinus plumbeus" to mean most common grey shark along coasts of middle....*
- *The article explained what "carcharhinus plumbeus" means with a simple example.*

---

carchariidae *(noun)*

Sand sharks; in some classifications coextensive with family Carcharhinidae.

- *Understanding "carchariidae" helps you talk about this topic clearly.*
- *They discussed "carchariidae" during the group presentation.*

---

carcharinus longimanus *(noun)*

Large deep-water shark with white-tipped dorsal fin; worldwide distribution; most dangerous shark.

- *Understanding "carcharinus longimanus" helps you talk about this topic clearly.*
- *The article explained what "carcharinus longimanus" means with a simple example.*

---

carcinomatous *(adjective)*

Being or relating to carcinoma.

- *A carcinomatous lesion.*
- *Would you call this situation "carcinomatous"? Explain why.*

---

carcinomatous myopathy *(noun)*

A disease seen in patients with lung cancer and characterized by weakness and fatigue of hip and thigh muscles and an aching back; caused by antibodies directed against the neuromuscular junctions.

- *She wrote a short paragraph that included "carcinomatous myopathy."*
- *He looked up "carcinomatous myopathy" because he had never seen it before.*

carcinosarcoma *(noun)*

A malignant neoplasm composed of carcinoma and sarcoma extensively intermixed.

- *She wrote a short paragraph that included "carcinosarcoma."*
- *The article explained what "carcinosarcoma" means with a simple example.*

cardamine bulbifera *(noun)*

European bittercress having a knotted white rootstock.

- *Understanding "cardamine bulbifera" helps you talk about this topic clearly.*
- *He looked up "cardamine bulbifera" because he had never seen it before.*

cardamine diphylla *(noun)*

North American herb with pungent scaly or toothed roots.

- *She wrote a short paragraph that included "cardamine diphylla."*
- *They discussed "cardamine diphylla" during the group presentation.*

cardamum *(noun)*

Aromatic seeds used as seasoning like cinnamon and cloves especially in pickles and barbecue sauces.

- *Understanding "cardamum" helps you talk about this topic clearly.*
- *They discussed "cardamum" during the group presentation.*

cardcase *(noun)*

A small case for carrying business cards.

- *In class, the teacher used "cardcase" to mean a small case for carrying business cards.*
- *He looked up "cardcase" because he had never seen it before.*

cardcastle *(noun)*

An unstable construction with playing cards.

- *He built three levels of his cardcastle before it collapsed.*
- *Understanding "cardcastle" helps you talk about this topic clearly.*

cardhouse *(noun)*

An unstable construction with playing cards.

- *He looked up "cardhouse" because he had never seen it before.*
- *She wrote a short paragraph that included "cardhouse."*

cardiidae *(noun)*

Somewhat heart-shaped sand-burrowing bivalve mollusks.

- *In class, the teacher used "cardiidae" to mean somewhat heart-shaped sand-burrowing bivalve mollusks.*
- *They discussed "cardiidae" during the group presentation.*

cardinalfish *(noun)*

Small red fishes of coral reefs and inshore tropical waters.

- *Understanding "cardinalfish" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cardinalfish."*

cardinalship *(noun)*

The office of cardinal.

- *In class, the teacher used "cardinalship" to mean the office of cardinal.*
- *The article explained what "cardinalship" means with a simple example.*

cardiographic *(adjective)*

Of or relating to a cardiograph.

- *Students compared "cardiographic" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "cardiographic."*

cardiography *(noun)*

Diagnostic procedure consisting of recording the activity of the heart electronically with a cardiograph (and producing a cardiogram).

- *They discussed "cardiography" during the group presentation.*
- *Understanding "cardiography" helps you talk about this topic clearly.*

---

cardiologic *(adjective)*

Of or relating to or used in or practicing cardiology.

- *Cardiologic evidence.*
- *It is useful to describe something as "cardiologic" when it is of or relating to or used in or practicing cardiology.*

---

cardiopathy *(noun)*

A disease of the heart.

- *In class, the teacher used "cardiopathy" to mean a disease of the heart.*
- *The article explained what "cardiopathy" means with a simple example.*

---

cardiospasm *(noun)*

A spasm of the cardiac sphincter (between the esophagus and the stomach); if the cardiac sphincter does not relax during swallowing the passage of food into the stomach is obstructed.

- *He looked up "cardiospasm" because he had never seen it before.*
- *Understanding "cardiospasm" helps you talk about this topic clearly.*

---

cardiospermum *(noun)*

Tendril-climbing herbs or shrubs whose seeds have a white heart-shaped spot.

- *They discussed "cardiospermum" during the group presentation.*
- *In class, the teacher used "cardiospermum" to mean tendril-climbing herbs or shrubs whose seeds have a....*

---

cardiospermum grandiflorum *(noun)*

Herbaceous vine of tropical America and Africa.

- *She wrote a short paragraph that included "cardiospermum grandiflorum."*
- *He looked up "cardiospermum grandiflorum" because he had never seen it before.*

---

cardiospermum halicacabum *(noun)*

Woody perennial climbing plant with large ornamental seed pods that resemble balloons; tropical India and Africa and America.

- *The article explained what "cardiospermum halicacabum" means with a simple example.*
- *They discussed "cardiospermum halicacabum" during the group presentation.*

---

cardsharper *(noun)*

A professional card player who makes a living by cheating at card games.

- *The article explained what "cardsharper" means with a simple example.*
- *She wrote a short paragraph that included "cardsharper."*

---

carduelinae *(noun)*

Used in some classifications for a subgroup of finches.

- *The article explained what "carduelinae" means with a simple example.*
- *In class, the teacher used "carduelinae" to mean used in some classifications for a subgroup of finches.*

---

carduelis *(noun)*

In some classifications considered the type genus of a subfamily Carduelinae of the family Fringillidae: goldfinches; siskins; redpolls; linnets.

- *Understanding "carduelis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "carduelis."*

---

carduelis cannabina *(noun)*

Small Old World finch whose male has a red breast and forehead.

- *The article explained what "carduelis cannabina" means with a simple example.*
- *In class, the teacher used "carduelis cannabina" to mean small old world finch whose male has a red breast....*

---

carduelis carduelis *(noun)*

Small European finch having a crimson face and yellow-and-black wings.

- *In class, the teacher used "carduelis carduelis" to mean small european finch having a crimson face and....*

- *The article explained what “carduelis carduelis” means with a simple example.*

---

carduelis cucullata *(noun)*

South American species of scarlet finch with black head and wings and tail.

- *Understanding “carduelis cucullata” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “carduelis cucullata.”*

---

carduelis flammea *(noun)*

Small siskin-like finch with a red crown and a rosy breast and rump.

- *She wrote a short paragraph that included “carduelis flammea.”*
- *Understanding “carduelis flammea” helps you talk about this topic clearly.*

---

carduelis hornemanni *(noun)*

Small siskin-like finch with a red crown.

- *She wrote a short paragraph that included “carduelis hornemanni.”*
- *They discussed “carduelis hornemanni” during the group presentation.*

---

carduelis spinus *(noun)*

Small yellow-and-black Eurasian finch with a sharp beak.

- *In class, the teacher used “carduelis spinus” to mean small yellow-and-black eurasian finch with a sharp beak.*
- *He looked up “carduelis spinus” because he had never seen it before.*

---

cardura *(noun)*

An antihypertensive drug (trade name Cardura) that works by relaxing blood vessels so that blood passes through them more easily; it is also used to treat benign prostatic hyperplasia.

- *In class, the teacher used “cardura” to mean an antihypertensive drug (trade name cardura) that....*
- *They discussed “cardura” during the group presentation.*

---

carefreeness *(noun)*

The trait of being without worry or responsibility.

- *He looked up “carefreeness” because he had never seen it before.*
- *She wrote a short paragraph that included “carefreeness.”*

---

carelian *(noun)*

A Finnic language spoken by the people of Karelia.

- *The article explained what “carelian” means with a simple example.*
- *In class, the teacher used “carelian” to mean a finnic language spoken by the people of karelia.*

---

carex pseudocyperus *(noun)*

Tufted sedge of temperate regions; nearly cosmopolitan.

- *In class, the teacher used “carex pseudocyperus” to mean tufted sedge of temperate regions; nearly cosmopolitan.*
- *They discussed “carex pseudocyperus” during the group presentation.*

---

cariama *(noun)*

The type genus of the Cariamidae comprising only the crested cariama.

- *He looked up “cariama” because he had never seen it before.*
- *She wrote a short paragraph that included “cariama.”*

---

cariama cristata *(noun)*

Brazilian Cariama; sole representative of the genus Cariama.

- *She wrote a short paragraph that included “cariama cristata.”*
- *They discussed “cariama cristata” during the group presentation.*

---

cariamidae *(noun)*

Crane-like South American wading birds.

- *He looked up “cariamidae” because he had never seen it before.*
- *Understanding “cariamidae” helps you talk about this topic clearly.*

---

caribees *(noun)*

A group of islands in the southeastern West Indies.

- *Understanding "caribees" helps you talk about this topic clearly.*
- *In class, the teacher used "caribees" to mean a group of islands in the southeastern west indies.*

---

caricaceae *(noun)*

Trees native to tropical America and Africa with milky juice and large palmately lobed leaves.

- *She wrote a short paragraph that included "caricaceae."*
- *They discussed "caricaceae" during the group presentation.*

---

carillonneur *(noun)*

A musician who plays a carillon.

- *He looked up "carillonneur" because he had never seen it before.*
- *Understanding "carillonneur" helps you talk about this topic clearly.*

---

carina fornicis *(noun)*

Ridge on the lower surface of the fornix of the brain.

- *The article explained what "carina fornicis" means with a simple example.*
- *They discussed "carina fornicis" during the group presentation.*

---

carinal *(adjective)*

Relating to or resembling a carina.

- *Students compared "carinal" with similar adjectives in the lesson.*
- *Her writing became clearer after she learned "carinal."*

---

carissa bispinosa *(noun)*

South African shrub having forked spines and plumlike fruit; frequently used as hedging.

- *Understanding "carissa bispinosa" helps you talk about this topic clearly.*
- *They discussed "carissa bispinosa" during the group presentation.*

---

carl gustaf mossander *(noun)*

Swedish chemist who discovered rare earth elements (1797-1858).

- *He looked up "carl gustaf mossander" because he had never seen it before.*
- *Understanding "carl gustaf mossander" helps you talk about this topic clearly.*

---

carlovingian *(noun)*

A member of the Carolingian dynasty.

- *They discussed "carlovingian" during the group presentation.*
- *Understanding "carlovingian" helps you talk about this topic clearly.*

---

carlovingian dynasty *(noun)*

A Frankish dynasty founded by Charlemagne's father that ruled from 751 to 987.

- *She wrote a short paragraph that included "carlovingian dynasty."*
- *They discussed "carlovingian dynasty" during the group presentation.*

---

carnalise *(verb)*

Debase through carnal gratification.

- *The coach explained when to use "carnalise" and when to wait.*
- *He did not know how to use "carnalise" until he saw an example.*

---

Represent materialistically, as in a painting or a sculpture.

- *He did not know how to use "carnalize" until he saw an example.*
- *Learners should practice how to use "carnalize" in real sentences.*

---

carnegiea *(noun)*

Caryophylloid dicot genus with only one species: saguaro.

- *The article explained what "carnegiea" means with a simple example.*
- *She wrote a short paragraph that included "carnegiea."*

---

carnegiea gigantea *(noun)*

Extremely large treelike cactus of desert regions of southwestern United States having a thick columnar sparsely branched trunk bearing white flowers and edible red pulpy fruit.

- *The article explained what "carnegiea gigantea" means with a simple example.*
- *In class, the teacher used "carnegiea gigantea" to mean extremely large treelike cactus of desert regions....*

---

carnify *(verb)*

Become muscular or fleshy.

- *The coach explained when to use "carnify" and when to wait.*
- *Can you use "carnify" in a sentence that fits this situation?*

---

carniolan bee *(noun)*

Greyish highly productive European honeybee that has a quiet disposition.

- *They discussed "carniolan bee" during the group presentation.*
- *In class, the teacher used "carniolan bee" to mean greyish highly productive european honeybee that....*

---

carnosaura *(noun)*

Largest carnivorous land animals ever known.

- *The article explained what "carnosaura" means with a simple example.*
- *In class, the teacher used "carnosaura" to mean largest carnivorous land animals ever known.*

---

carnot's ideal cycle *(noun)*

A cycle (of expansion and compression) of an idealized reversible heat engine that does work without loss of heat.

- *Understanding "carnot's ideal cycle" helps you talk about this topic clearly.*
- *He looked up "carnot's ideal cycle" because he had never seen it before.*

---

carnotite *(noun)*

A yellow radioactive mineral; an ore of uranium and radium and vanadium.

- *The article explained what "carnotite" means with a simple example.*
- *In class, the teacher used "carnotite" to mean a yellow radioactive mineral; an ore of uranium and....*

---

caroche *(noun)*

A luxurious carriage suitable for nobility in the 16th and 17th century.

- *They discussed "caroche" during the group presentation.*
- *The article explained what "caroche" means with a simple example.*

carolean *(adjective)*

Of or relating to the life and times of kings Charles I or Charles II of England.

- *The speaker chose "carolean" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "carolean."*

---

carolina moonseed *(noun)*

Woody vine of southeastern United States resembling the common moonseed but having red fruits.

- *The article explained what "carolina moonseed" means with a simple example.*
- *In class, the teacher used "carolina moonseed" to mean woody vine of southeastern united states resembling....*

---

caroller *(noun)*

A singer of carols.

- *In class, the teacher used "caroller" to mean a singer of carols.*
- *He looked up "caroller" because he had never seen it before.*

---

carotenemia *(noun)*

Excess carotene in the blood stream; can cause the skin to turn a pale yellow or red color.

- *Understanding "carotenemia" helps you talk about this topic clearly.*
- *In class, the teacher used "carotenemia" to mean excess carotene in the blood stream; can cause the....*

carotin *(noun)*

An orange isomer of an unsaturated hydrocarbon found in many plants; is converted into vitamin A in the liver.

- *Understanding "carotin" helps you talk about this topic clearly.*
- *They discussed "carotin" during the group presentation.*

carouser *(noun)*

Someone who enjoys riotous drinking.

- *He looked up "carouser" because he had never seen it before.*
- *She wrote a short paragraph that included "carouser."*

carpellary *(adjective)*

Belonging to or forming or containing carpels.

- *The speaker chose "carpellary" because it captured the feeling precisely.*
- *It is useful to describe something as "carpellary" when it is belonging to or forming or containing carpels.*

carpellate *(adjective)*

Bearing or consisting of carpels.

- *The speaker chose "carpellate" because it captured the feeling precisely.*
- *Would you call this situation "carpellate"? Explain why.*

carpenteria *(noun)*

California evergreen shrub having glossy opposite leaves and terminal clusters of a few fragrant white flowers.

- *Understanding "carpenteria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "carpenteria."*

carpenteria californica *(noun)*

California evergreen shrub having glossy opposite leaves and terminal clusters of a few fragrant white flowers.

- *They discussed "carpenteria californica" during the group presentation.*
- *The article explained what "carpenteria californica" means with a simple example.*

carpetweed *(noun)*

Annual prostrate mat-forming weed having whorled leaves and small greenish-white flowers; widespread throughout North America.

- *He looked up "carpetweed" because he had never seen it before.*
- *She wrote a short paragraph that included "carpetweed."*

carpetweed family *(noun)*

Succulent herbs or small shrubs mostly of South Africa but also New Zealand and North America: carpetweeds; fig marigolds.

- *In class, the teacher used "carpetweed family" to mean succulent herbs or small shrubs mostly of south....*
- *The article explained what "carpetweed family" means with a simple example.*

carphophis *(noun)*

Thunder snake.

- *They discussed "carphophis" during the group presentation.*
- *In class, the teacher used "carphophis" to mean thunder snake.*

carphophis amoenus *(noun)*

Small reddish wormlike snake of eastern United States.

- *They discussed "carphophis amoenus" during the group presentation.*
- *The article explained what "carphophis amoenus" means with a simple example.*

carpinaceae *(noun)*

Used in some classification systems for the genera Carpinus, Ostryopsis, and Ostryopsis.

- *He looked up "carpinaceae" because he had never seen it before.*
- *In class, the teacher used "carpinaceae" to mean used in some classification systems for the genera....*

carpinus betulus *(noun)*

Medium-sized Old World tree with smooth grey bark and leaves like beech that turn yellow-orange in autumn.

- *They discussed “carpinus betulus” during the group presentation.*
- *In class, the teacher used “carpinus betulus” to mean medium-sized old world tree with smooth grey bark....*

---

carpobrotus *(noun)*

A caryophyllaceous genus of Carpobrotus.

- *He looked up “carpobrotus” because he had never seen it before.*
- *Understanding “carpobrotus” helps you talk about this topic clearly.*

---

carpobrotus edulis *(noun)*

Low-growing South African succulent plant having a capsular fruit containing edible pulp.

- *He looked up “carpobrotus edulis” because he had never seen it before.*
- *In class, the teacher used “carpobrotus edulis” to mean low-growing south african succulent plant having a....*

---

carpocapsa *(noun)*

Codling moths.

- *The article explained what “carpocapsa” means with a simple example.*
- *Understanding “carpocapsa” helps you talk about this topic clearly.*

---

carpocapsa pomonella *(noun)*

A small grey moth whose larvae live in apples and English walnuts.

- *In class, the teacher used “carpocapsa pomonella” to mean a small grey moth whose larvae live in apples and....*
- *He looked up “carpocapsa pomonella” because he had never seen it before.*

---

carpodacus *(noun)*

House finches and purple finches.

- *They discussed “carpodacus” during the group presentation.*
- *He looked up “carpodacus” because he had never seen it before.*

---

carpodacus mexicanus *(noun)*

Small finch originally of the western United States and Mexico.

- *Understanding “carpodacus mexicanus” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “carpodacus mexicanus.”*

---

carpodacus purpureus *(noun)*

North American finch having a raspberry-red head and breast and rump.

- *In class, the teacher used “carpodacus purpureus” to mean north american finch having a raspberry-red head....*
- *He looked up “carpodacus purpureus” because he had never seen it before.*

---

carpophagous *(adjective)*

Feeding on fruit.

- *Would you call this situation “carpophagous”? Explain why.*
- *A “carpophagous” approach may work better in this case.*

---

carpophore *(noun)*

A slender stalk that furnishes an axis for a carpel.

- *She wrote a short paragraph that included “carpophore.”*
- *He looked up “carpophore” because he had never seen it before.*

---

carpospore *(noun)*

A nonmotile spore of red algae.

- *In class, the teacher used “carpospore” to mean a nonmotile spore of red algae.*
- *The article explained what “carpospore” means with a simple example.*

---

carposporic *(adjective)*

Relating to or resembling a carpospore.

- *Her writing became clearer after she learned “carposporic.”*

- *A "carposporic" approach may work better in this case.*

---

carposporous *(adjective)*

Having carpospores.

- *Would you call this situation "carposporous"? Explain why.*
- *The speaker chose "carposporous" because it captured the feeling precisely.*

---

carrageen *(noun)*

Dark purple edible seaweed of the Atlantic coasts of Europe and North America.

- *In class, the teacher used "carrageen" to mean dark purple edible seaweed of the atlantic coasts....*
- *The article explained what "carrageen" means with a simple example.*

---

carrageenin *(noun)*

A colloidal extract from carrageen seaweed and other red algae.

- *They discussed "carrageenin" during the group presentation.*
- *He looked up "carrageenin" because he had never seen it before.*

---

carragheen *(noun)*

Dark purple edible seaweed of the Atlantic coasts of Europe and North America.

- *Understanding "carragheen" helps you talk about this topic clearly.*
- *In class, the teacher used "carragheen" to mean dark purple edible seaweed of the atlantic coasts....*

---

carrottop *(noun)*

Someone who has red hair.

- *In class, the teacher used "carrottop" to mean someone who has red hair.*
- *Understanding "carrottop" helps you talk about this topic clearly.*

---

carrycot *(noun)*

Box-shaped baby bed with handles (for a baby to sleep in while being carried).

- *She wrote a short paragraph that included "carrycot."*
- *Understanding "carrycot" helps you talk about this topic clearly.*

---

cartilaginification *(noun)*

Abnormal formation of cartilage from other tissues; observed in some Asians.

- *In class, the teacher used "cartilaginification" to mean abnormal formation of cartilage from other tissues;....*
- *The article explained what "cartilaginification" means with a simple example.*

---

cartonful *(noun)*

The quantity contained in a carton.

- *Understanding "cartonful" helps you talk about this topic clearly.*
- *He looked up "cartonful" because he had never seen it before.*

---

cartouch *(noun)*

A cartridge (usually with paper casing).

- *They discussed "cartouch" during the group presentation.*
- *Understanding "cartouch" helps you talk about this topic clearly.*

---

cartroad *(noun)*

Any road or path affording passage especially a rough one.

- *Understanding "cartroad" helps you talk about this topic clearly.*
- *The article explained what "cartroad" means with a simple example.*

---

carum carvi *(noun)*

A Eurasian plant with small white flowers yielding caraway seed.

- *The article explained what "carum carvi" means with a simple example.*
- *In class, the teacher used "carum carvi" to mean a eurasian plant with small white flowers yielding....*

---

caruncula *(noun)*

An outgrowth on a plant or animal such as a fowl's wattle or a protuberance near the hilum of certain seeds.

- *He looked up "caruncula" because he had never seen it before.*
- *She wrote a short paragraph that included "caruncula."*

---

caruncular *(adjective)*

Resembling a caruncle.

- *Students compared "caruncular" with similar adjectives in the lesson.*
- *It is useful to describe something as "caruncular" when it is resembling a caruncle.*

---

carunculate *(adjective)*

Having a caruncle.

- *A "carunculate" approach may work better in this case.*
- *The speaker chose "carunculate" because it captured the feeling precisely.*

---

carunculated *(adjective)*

Having a caruncle.

- *The speaker chose "carunculated" because it captured the feeling precisely.*
- *A "carunculated" approach may work better in this case.*

---

carunculous *(adjective)*

Resembling a caruncle.

- *Students compared "carunculous" with similar adjectives in the lesson.*
- *Would you call this situation "carunculous"? Explain why.*

---

carya cordiformis *(noun)*

Hickory of the eastern United States having a leaves with 7 or 9 leaflets and thin-shelled very bitter nuts.

- *They discussed "carya cordiformis" during the group presentation.*
- *The article explained what "carya cordiformis" means with a simple example.*

---

carya illinoensis *(noun)*

Tree of southern United States and Mexico cultivated for its nuts.

- *She wrote a short paragraph that included "carya illinoensis."*
- *He looked up "carya illinoensis" because he had never seen it before.*

---

carya illinoinsis *(noun)*

Tree of southern United States and Mexico cultivated for its nuts.

- *They discussed "carya illinoinsis" during the group presentation.*
- *Understanding "carya illinoinsis" helps you talk about this topic clearly.*

---

carya laciniosa *(noun)*

Hickory of the eastern United States resembling the shagbark but having a much larger nut.

- *She wrote a short paragraph that included "carya laciniosa."*
- *The article explained what "carya laciniosa" means with a simple example.*

---

carya myristicaeformis *(noun)*

Hickory of southern United States and Mexico having hard nutmeg-shaped nuts.

- *In class, the teacher used "carya myristicaeformis" to mean hickory of southern united states and mexico having....*
- *They discussed "carya myristicaeformis" during the group presentation.*

---

carya myristiciformis *(noun)*

Hickory of southern United States and Mexico having hard nutmeg-shaped nuts.

- *The article explained what "carya myristiciformis" means with a simple example.*
- *They discussed "carya myristiciformis" during the group presentation.*

---

caryocar *(noun)*

Type genus of the Caryocaraceae; South American trees yielding strong fine-grained wood and edible nuts.

- *In class, the teacher used "caryocar" to mean type genus of the caryocaraceae; south american....*
- *He looked up "caryocar" because he had never seen it before.*

---

caryocar nuciferum *(noun)*

Large South American evergreen tree trifoliate leaves and drupes with nutlike seeds used as food and a source of cooking oil.

- *He looked up "caryocar nuciferum" because he had never seen it before.*
- *She wrote a short paragraph that included "caryocar nuciferum."*

---

caryocaraceae *(noun)*

Small genus of tropical South American trees.

- *The article explained what "caryocaraceae" means with a simple example.*
- *She wrote a short paragraph that included "caryocaraceae."*

---

caryophyllaceous *(adjective)*

Of or pertaining to plants of the family Caryophyllaceae.

- *Her writing became clearer after she learned "caryophyllaceous."*
- *Students compared "caryophyllaceous" with similar adjectives in the lesson.*

---

caryophyllaceous plant *(noun)*

A plant of the family Caryophyllaceae.

- *In class, the teacher used "caryophyllaceous plant" to mean a plant of the family caryophyllaceae.*
- *Understanding "caryophyllaceous plant" helps you talk about this topic clearly.*

---

caryophyllales *(noun)*

Corresponds approximately to the older group Centrospermae.

- *He looked up "caryophyllales" because he had never seen it before.*
- *They discussed "caryophyllales" during the group presentation.*

---

caryophylloid dicot family *(noun)*

Family of relatively early dicotyledonous plants including mostly flowers.

- *Understanding "caryophylloid dicot family" helps you talk about this topic clearly.*
- *The article explained what "caryophylloid dicot family" means with a simple example.*

---

caryophylloid dicot genus *(noun)*

Genus of relatively early dicotyledonous plants including mostly flowers.

- *Understanding "caryophylloid dicot genus" helps you talk about this topic clearly.*
- *They discussed "caryophylloid dicot genus" during the group presentation.*

---

caryota *(noun)*

Fishtail palms.

- *They discussed "caryota" during the group presentation.*
- *The article explained what "caryota" means with a simple example.*

---

caryota urens *(noun)*

Fishtail palm of India to Malay Peninsula; sap yields a brown sugar (jaggery) and trunk pith yields sago.

- *In class, the teacher used "caryota urens" to mean fishtail palm of india to malay peninsula; sap....*
- *The article explained what "caryota urens" means with a simple example.*

---

casanova de seingalt *(noun)*

An Italian adventurer who wrote vivid accounts of his sexual encounters (1725-1798).

- *Understanding "casanova de seingalt" helps you talk about this topic clearly.*
- *He looked up "casanova de seingalt" because he had never seen it before.*

---

casava *(noun)*

Any of several plants of the genus Manihot having fleshy roots yielding a nutritious starch.

- *They discussed "casava" during the group presentation.*
- *In class, the teacher used "casava" to mean any of several plants of the genus manihot having....*

cascade liquefier *(noun)*

An apparatus used to liquefy air or oxygen etc.

- *Understanding "cascade liquefier" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cascade liquefier."*

cascarilla *(noun)*

West Indian shrub with aromatic bark.

- *She wrote a short paragraph that included "cascarilla."*
- *They discussed "cascarilla" during the group presentation.*

cascarilla bark *(noun)*

Aromatic bark of cascarilla; used as a tonic and for making incense.

- *They discussed "cascarilla bark" during the group presentation.*
- *Understanding "cascarilla bark" helps you talk about this topic clearly.*

caseate *(verb)*

Turn into cheese.

- *The milk caseated.*
- *Necrotic tissue caseates.*

caseful *(noun)*

The quantity contained in a case.

- *She wrote a short paragraph that included "caseful."*
- *They discussed "caseful" during the group presentation.*

casemaking clothes moth *(noun)*

The larvae live in tubes of its food material fastened with silk that it spins.

- *The article explained what "casemaking clothes moth" means with a simple example.*
- *In class, the teacher used "casemaking clothes moth" to mean the larvae live in tubes of its food material....*

caseous *(adjective)*

Of damaged or necrotic tissue; cheeselike.

- *A "caseous" approach may work better in this case.*
- *The speaker chose "caseous" because it captured the feeling precisely.*

casern *(noun)*

Military barracks in a garrison town.

- *In class, the teacher used "casern" to mean military barracks in a garrison town.*
- *The article explained what "casern" means with a simple example.*

caseworm *(noun)*

Insect larva that constructs a protective case around its body.

- *She wrote a short paragraph that included "caseworm."*
- *He looked up "caseworm" because he had never seen it before.*

cashable *(adjective)*

Able to be converted into ready money or the equivalent.

- *A cashable check.*
- *Cashable gambling chips.*

cashcard *(noun)*

A credit card that entitles the holder to receive cash.

- *The article explained what "cashcard" means with a simple example.*
- *They discussed "cashcard" during the group presentation.*

caskful *(noun)*

The quantity a cask will hold.

- *She wrote a short paragraph that included "caskful."*
- *He looked up "caskful" because he had never seen it before.*

---

casmerodius *(noun)*

A white egrets.

- *She wrote a short paragraph that included "casmerodius."*
- *He looked up "casmerodius" because he had never seen it before.*

---

casmerodius albus *(noun)*

Widely distributed Old World white egret.

- *He looked up "casmerodius albus" because he had never seen it before.*
- *She wrote a short paragraph that included "casmerodius albus."*

---

casquet *(noun)*

A light open casque without a visor or beaver.

- *Understanding "casquet" helps you talk about this topic clearly.*
- *The article explained what "casquet" means with a simple example.*

---

casquetel *(noun)*

A light open casque without a visor or beaver.

- *She wrote a short paragraph that included "casquetel."*
- *The article explained what "casquetel" means with a simple example.*

---

cassareep *(noun)*

A flavoring made by boiling down the juice of the bitter cassava; used in West Indian cooking.

- *The article explained what "cassareep" means with a simple example.*
- *In class, the teacher used "cassareep" to mean a flavoring made by boiling down the juice of the....*

---

cassegrainian telescope *(noun)*

A reflecting telescope that has a paraboloidal primary mirror and a hyperboloidal secondary mirror; light is brought to a focus through an aperture in the center of the primary mirror.

- *In class, the teacher used "cassegrainian telescope" to mean a reflecting telescope that has a paraboloidal....*
- *The article explained what "cassegrainian telescope" means with a simple example.*

---

cassia acutifolia *(noun)*

Erect shrub having racemes of tawny yellow flowers; the dried leaves are used medicinally as a cathartic; sometimes placed in genus Cassia.

- *She wrote a short paragraph that included "cassia acutifolia."*
- *The article explained what "cassia acutifolia" means with a simple example.*

---

cassia augustifolia *(noun)*

Erect shrub having racemes of tawny yellow flowers; the dried leaves are used medicinally as a cathartic; sometimes placed in genus Cassia.

- *The article explained what "cassia augustifolia" means with a simple example.*
- *Understanding "cassia augustifolia" helps you talk about this topic clearly.*

---

cassia javonica *(noun)*

Deciduous ornamental hybrid of southeastern Asia and Hawaii having racemes of flowers ranging in color from cream-colored to orange and red.

- *The article explained what "cassia javonica" means with a simple example.*
- *Understanding "cassia javonica" helps you talk about this topic clearly.*

---

cassia marilandica *(noun)*

North American perennial herb; leaves are used medicinally; sometimes placed in genus Cassia.

- *She wrote a short paragraph that included "cassia marilandica."*
- *Understanding "cassia marilandica" helps you talk about this topic clearly.*

---

cassia roxburghii *(noun)*

East Indian tree having long pods containing a black cathartic pulp used as a horse medicine.

- *They discussed "cassia roxburghii" during the group presentation.*

- *He looked up “cassia roxburghii” because he had never seen it before.*

---

cassin’s kingbird *(noun)*

A kingbird seen in the southwestern United States; largely grey with a yellow abdomen.

- *She wrote a short paragraph that included “cassin’s kingbird.”*
- *They discussed “cassin’s kingbird” during the group presentation.*

---

cassiope mertensiana *(noun)*

Heath of mountains of western United States having bell-shaped white flowers.

- *He looked up “cassiope mertensiana” because he had never seen it before.*
- *In class, the teacher used “cassiope mertensiana” to mean heath of mountains of western united states having....*

---

cassiri *(noun)*

A drink resembling beer; made from fermented cassava juice.

- *In class, the teacher used “cassiri” to mean a drink resembling beer; made from fermented....*
- *Understanding “cassiri” helps you talk about this topic clearly.*

---

cassite *(noun)*

An ancient language spoken by the Kassites.

- *He looked up “cassite” because he had never seen it before.*
- *She wrote a short paragraph that included “cassite.”*

---

cassocked *(adjective)*

Dressed in a cassock.

- *Cassocked monks.*
- *Would you call this situation “cassocked”? Explain why.*

---

castanea chrysophylla *(noun)*

Small ornamental evergreen tree of Pacific Coast whose glossy yellow-green leaves are yellow beneath; bears edible nuts.

- *In class, the teacher used “castanea chrysophylla” to mean small ornamental evergreen tree of pacific coast....*
- *They discussed “castanea chrysophylla” during the group presentation.*

---

castanea ozarkensis *(noun)*

Shrubby tree closely related to the Allegheny chinkapin but with larger leaves; southern midwestern United States.

- *They discussed “castanea ozarkensis” during the group presentation.*
- *He looked up “castanea ozarkensis” because he had never seen it before.*

---

castanopsis *(noun)*

Evergreen trees and shrubs of warm regions valued for their foliage; southeastern United States and eastern Australia and northern New Zealand.

- *He looked up “castanopsis” because he had never seen it before.*
- *In class, the teacher used “castanopsis” to mean evergreen trees and shrubs of warm regions valued....*

---

castanopsis chrysophylla *(noun)*

Small ornamental evergreen tree of Pacific Coast whose glossy yellow-green leaves are yellow beneath; bears edible nuts.

- *In class, the teacher used “castanopsis chrysophylla” to mean small ornamental evergreen tree of pacific coast....*
- *They discussed “castanopsis chrysophylla” during the group presentation.*

---

castanospermum *(noun)*

A rosid dicot genus of the subfamily Papilionoideae having one species: Moreton Bay chestnut.

- *He looked up “castanospermum” because he had never seen it before.*
- *In class, the teacher used “castanospermum” to mean a rosid dicot genus of the subfamily papilionoideae....*

---

castilleia *(noun)*

Genus of western North and South American perennials often partially parasitic on roots of grasses.

- *She wrote a short paragraph that included “castilleia.”*
- *Understanding “castilleia” helps you talk about this topic clearly.*

---

castilleja chromosa *(noun)*

Most common paintbrush of western United States dry lands; having erect stems ending in dense spikes of bright orange to red flowers.

- *In class, the teacher used "castilleja chromosa" to mean most common paintbrush of western united states dry....*
- *The article explained what "castilleja chromosa" means with a simple example.*

castilleja sessiliflora *(noun)*

Hairy plant with pinkish flowers; Great Plains to northern Mexico.

- *He looked up "castilleja sessiliflora" because he had never seen it before.*
- *She wrote a short paragraph that included "castilleja sessiliflora."*

castilleja sulphurea *(noun)*

Plant of moist highland meadows having ragged clusters of pale yellow flowers.

- *They discussed "castilleja sulphurea" during the group presentation.*
- *She wrote a short paragraph that included "castilleja sulphurea."*

castoroides *(noun)*

Extinct beavers of the Pleistocene; of eastern and southern United States.

- *Understanding "castoroides" helps you talk about this topic clearly.*
- *He looked up "castoroides" because he had never seen it before.*

castroism *(noun)*

A form of communism developed in Cuba by Fidel Castro.

- *The article explained what "castroism" means with a simple example.*
- *In class, the teacher used "castroism" to mean a form of communism developed in cuba by fidel castro.*

casuaridae *(noun)*

A family of large ostrich-like birds including cassowaries.

- *He looked up "casuaridae" because he had never seen it before.*
- *In class, the teacher used "casuaridae" to mean a family of large ostrich-like birds including....*

casuariiformes *(noun)*

A ratite bird order: cassowaries and emus.

- *She wrote a short paragraph that included "casuariiformes."*
- *Understanding "casuariiformes" helps you talk about this topic clearly.*

casuarina equisetfolia *(noun)*

Common Australian tree widely grown as an ornamental in tropical regions; yields heavy hard red wood.

- *In class, the teacher used "casuarina equisetfolia" to mean common australian tree widely grown as an....*
- *The article explained what "casuarina equisetfolia" means with a simple example.*

casuarinaceae *(noun)*

One genus: genus Casuarina.

- *They discussed "casuarinaceae" during the group presentation.*
- *She wrote a short paragraph that included "casuarinaceae."*

casuarinales *(noun)*

Order of chiefly Australian trees and shrubs comprising the casuarinas; 1 family: Casuarinaceae.

- *The article explained what "casuarinales" means with a simple example.*
- *They discussed "casuarinales" during the group presentation.*

casuarius *(noun)*

Type and sole genus of the Casuaridae: cassowaries.

- *He looked up "casuarius" because he had never seen it before.*
- *They discussed "casuarius" during the group presentation.*

casuist *(noun)*

Someone whose reasoning is subtle and often specious.

- *Understanding "casuist" helps you talk about this topic clearly.*
- *He looked up "casuist" because he had never seen it before.*

---

casuistical *(adjective)*

Of or relating to or practicing casuistry.

- *The speaker chose "casuistical" because it captured the feeling precisely.*
- *Would you call this situation "casuistical"? Explain why.*

---

catabatic *(adjective)*

Of an air current or wind; moving downward or down a slope because of cooling especially at night.

- *It is useful to describe something as "catabatic" when it is of an air current or wind; moving downward or down....*
- *The speaker chose "catabatic" because it captured the feeling precisely.*

---

catabatic wind *(noun)*

A wind caused by the downward motion of cold air.

- *He looked up "catabatic wind" because he had never seen it before.*
- *She wrote a short paragraph that included "catabatic wind."*

---

catabiosis *(noun)*

Normal aging of cells.

- *Understanding "catabiosis" helps you talk about this topic clearly.*
- *The article explained what "catabiosis" means with a simple example.*

---

catabolise *(verb)*

Subject to catabolism.

- *In everyday English, people use "catabolise" when talking about this idea.*
- *Can you use "catabolise" in a sentence that fits this situation?*

---

catabolize *(verb)*

Subject to catabolism.

- *The coach explained when to use "catabolize" and when to wait.*
- *She tried to use "catabolize" carefully so everyone would understand.*

---

catacala *(noun)*

Moths whose larvae are cutworms: underwings.

- *In class, the teacher used "catacala" to mean moths whose larvae are cutworms: underwings.*
- *Understanding "catacala" helps you talk about this topic clearly.*

---

catachresis *(noun)*

Strained or paradoxical use of words either in error (as 'blatant' to mean 'flagrant') or deliberately (as in a mixed metaphor: 'blind mouths').

- *He looked up "catachresis" because he had never seen it before.*
- *In class, the teacher used "catachresis" to mean strained or paradoxical use of words either in....*

---

catachrestic *(adjective)*

Constituting or characterized by or given to catachresis.

- *Would you call this situation "catachrestic"? Explain why.*
- *A "catachrestic" approach may work better in this case.*

---

catachrestical *(adjective)*

Constituting or characterized by or given to catachresis.

- *The speaker chose "catachrestical" because it captured the feeling precisely.*
- *Her writing became clearer after she learned "catachrestical."*

---

cataclinal *(adjective)*

Of valleys and rivers; running in the direction of the dip in surrounding rock strata.

- *Students compared "cataclinal" with similar adjectives in the lesson.*
- *A "cataclinal" approach may work better in this case.*

cataclysmal *(adjective)*

Severely destructive.

- *Would you call this situation "cataclysmal"? Explain why.*
- *Her writing became clearer after she learned "cataclysmal."*

catacorner *(adjective)*

Slanted across a polygon on a diagonal line.

- *Would you call this situation "catacorner"? Explain why.*
- *The speaker chose "catacorner" because it captured the feeling precisely.*

catadromous *(adjective)*

Migrating from fresh water to the sea to spawn.

- *Students compared "catadromous" with similar adjectives in the lesson.*
- *A "catadromous" approach may work better in this case.*

cataflam *(noun)*

A nonsteroidal anti-inflammatory drug (trade name Cataflam).

- *The article explained what "cataflam" means with a simple example.*
- *They discussed "cataflam" during the group presentation.*

catalatic *(adjective)*

Of or relating to the enzyme catalase.

- *Students compared "catalatic" with similar adjectives in the lesson.*
- *Would you call this situation "catalatic"? Explain why.*

catalectic *(noun)*

(prosody) a line of verse that lacks a syllable in the last metrical foot.

- *They discussed "catalectic" during the group presentation.*
- *Understanding "catalectic" helps you talk about this topic clearly.*

Bushy-tailed wildcat of Europe that resembles the domestic cat and is regarded as the ancestor of the domestic cat.

- *In class, the teacher used "catamountain" to mean bushy-tailed wildcat of europe that resembles the....*
- *The article explained what "catamountain" means with a simple example.*

catananche *(noun)*

Any of several plants of the genus Catananche having long-stalked heads of blue or yellow flowers.

- *He looked up "catananche" because he had never seen it before.*
- *She wrote a short paragraph that included "catananche."*

catananche caerulea *(noun)*

South European plant having dark-eyed flowers with flat blue rays.

- *In class, the teacher used "catananche caerulea" to mean south european plant having dark-eyed flowers with....*
- *The article explained what "catananche caerulea" means with a simple example.*

---

cataphasia *(noun)*

A speech disorder in which the same word is repeated several times in succession.

- *She wrote a short paragraph that included "cataphasia."*
- *They discussed "cataphasia" during the group presentation.*

---

cataphatic *(adjective)*

Of or relating to the religious belief that God can be known to humans positively or affirmatively.

- *Students compared "cataphatic" with similar adjectives in the lesson.*
- *It is useful to describe something as "cataphatic" when it is of or relating to the religious belief that god can....*

---

cataphatism *(noun)*

The religious belief that God has given enough clues to be known to humans positively and affirmatively (e.g., God created Adam 'in his own image').

- *The article explained what "cataphatism" means with a simple example.*
- *She wrote a short paragraph that included "cataphatism."*

---

cataphoresis *(noun)*

The motion of charged particles in a colloid under the influence of an electric field; particles with a positive charge go to the cathode and negative to the anode.

- *Understanding "cataphoresis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cataphoresis."*

---

cataphoretic *(adjective)*

Of or relating to electrophoresis.

- *A "cataphoretic" approach may work better in this case.*
- *Students compared "cataphoretic" with similar adjectives in the lesson.*

---

cataphyll *(noun)*

A reduced or scarcely developed leaf at the start of a plant's life (i.e., cotyledons) or in the early stages of leaf development.

- *Understanding "cataphyll" helps you talk about this topic clearly.*
- *They discussed "cataphyll" during the group presentation.*

---

cataplasia *(noun)*

(biology) degenerative reversion of cells or tissue to a less differentiated or more primitive form.

- *They discussed "cataplasia" during the group presentation.*
- *In class, the teacher used "cataplasia" to mean (biology) degenerative reversion of cells or tissue....*

---

cataplasm *(noun)*

A medical dressing consisting of a soft heated mass of meal or clay that is spread on a cloth and applied to the skin to treat inflamed areas or improve circulation etc.

- *Understanding "cataplasm" helps you talk about this topic clearly.*
- *In class, the teacher used "cataplasm" to mean a medical dressing consisting of a soft heated mass....*

---

cataplastic *(adjective)*

Of or relating to cataplasia.

- *The speaker chose "cataplastic" because it captured the feeling precisely.*
- *It is useful to describe something as "cataplastic" when it is of or relating to cataplasia.*

---

catapres *(noun)*

An antihypertensive (trade name Catapres) that can be administered orally or via transdermal patches.

- *They discussed "catapres" during the group presentation.*
- *He looked up "catapres" because he had never seen it before.*

---

catapultian *(adjective)*

Of or like a catapult.

- *Students compared "catapultian" with similar adjectives in the lesson.*

- *Would you call this situation “catapultian”? Explain why.*

---

- *Understanding “catjang pea” helps you talk about this topic clearly.*
- *In class, the teacher used “catjang pea” to mean tropical woody herb with showy yellow flowers and....*

---

catkinate *(adjective)*

Resembling a catkin.

- *It is useful to describe something as “catkinate” when it is resembling a catkin.*
- *A “catkinate” approach may work better in this case.*

---

catocala nupta *(noun)*

Moth having dull forewings and red-marked hind wings.

- *He looked up “catocala nupta” because he had never seen it before.*
- *She wrote a short paragraph that included “catocala nupta.”*

---

catoptric *(adjective)*

Of or relating to catoptrics; produced by or based on mirrors.

- *The speaker chose “catoptric” because it captured the feeling precisely.*
- *It is useful to describe something as “catoptric” when it is of or relating to catoptrics; produced by or based....*

catoptrical *(adjective)*

Of or relating to catoptrics; produced by or based on mirrors.

- *Students compared "catoptrical" with similar adjectives in the lesson.*
- *Would you call this situation "catoptrical"? Explain why.*

catoptrics *(noun)*

Branch of optics dealing with formation of images by mirrors.

- *He looked up "catoptrics" because he had never seen it before.*
- *Understanding "catoptrics" helps you talk about this topic clearly.*

catoptrophorus semipalmatus *(noun)*

Large North American shorebird of eastern and Gulf Coasts.

- *Understanding "catoptrophorus semipalmatus" helps you talk about this topic clearly.*
- *They discussed "catoptrophorus semipalmatus" during the group presentation.*

catostomid *(noun)*

A cypriniform fish of the family Catostomidae.

- *They discussed "catostomid" during the group presentation.*
- *She wrote a short paragraph that included "catostomid."*

catostomidae *(noun)*

Suckers; closely related to the family Cyprinidae.

- *They discussed "catostomidae" during the group presentation.*
- *Understanding "catostomidae" helps you talk about this topic clearly.*

cattalo *(noun)*

Hardy breed of cattle resulting from crossing domestic cattle with the American buffalo; yields leaner beef than conventional breeds.

- *In class, the teacher used "cattalo" to mean hardy breed of cattle resulting from crossing....*
- *The article explained what "cattalo" means with a simple example.*

cattie *(noun)*

Any of various units of weight used in southeastern Asia (especially a Chinese measure equal to 500 grams).

- *He looked up "cattie" because he had never seen it before.*
- *Understanding "cattie" helps you talk about this topic clearly.*

cattish *(adjective)*

Marked by or arising from malice.

- *Would you call this situation "cattish"? Explain why.*
- *A "cattish" approach may work better in this case.*

cattleship *(noun)*

A cargo ship for the transport of livestock.

- *They discussed "cattleship" during the group presentation.*
- *In class, the teacher used "cattleship" to mean a cargo ship for the transport of livestock.*

cattley guava *(noun)*

Small tropical shrubby tree bearing deep red oval fruit.

- *Understanding "cattley guava" helps you talk about this topic clearly.*
- *They discussed "cattley guava" during the group presentation.*

cattleya citrina *(noun)*

Mexican epiphytic orchid with glaucous grey-green leaves and lemon- to golden-yellow flowers appearing only partially opened; sometimes placed in genus Cattleya.

- *She wrote a short paragraph that included "cattleya citrina."*
- *He looked up "cattleya citrina" because he had never seen it before.*

caucasic *(adjective)*

Of or relating to the geographical region of Caucasia.

- *It is useful to describe something as "caucasic" when it is of or relating to the geographical region of caucasia.*
- *A "caucasic" approach may work better in this case.*

Pygmy marmosets.

- *She wrote a short paragraph that included "cebuella."*
- *They discussed "cebuella" during the group presentation.*

---

cebuella pygmaea *(noun)*

The smallest monkey; of tropical forests of the Amazon.

- *They discussed "cebuella pygmaea" during the group presentation.*
- *He looked up "cebuella pygmaea" because he had never seen it before.*

---

cebus capucinus *(noun)*

Monkey of Central America and South America having thick hair on the head that resembles a monk's cowl.

- *The article explained what "cebus capucinus" means with a simple example.*
- *Understanding "cebus capucinus" helps you talk about this topic clearly.*

---

cecidomyidae *(noun)*

Gall midges.

- *In class, the teacher used "cecidomyidae" to mean gall midges.*
- *They discussed "cecidomyidae" during the group presentation.*

---

cecity *(noun)*

The state of being blind or lacking sight.

- *They discussed "cecity" during the group presentation.*
- *He looked up "cecity" because he had never seen it before.*

---

cecropia peltata *(noun)*

Tropical American tree with large peltate leaves and hollow stems.

- *The article explained what "cecropia peltata" means with a simple example.*
- *She wrote a short paragraph that included "cecropia peltata."*

---

cecropiaceae *(noun)*

In some classifications included in family Moraceae.

- *In class, the teacher used "cecropiaceae" to mean in some classifications included in family moraceae.*
- *The article explained what "cecropiaceae" means with a simple example.*

---

cedarbird *(noun)*

Widely distributed over temperate North America.

- *He looked up "cedarbird" because he had never seen it before.*
- *She wrote a short paragraph that included "cedarbird."*

---

cedarn *(adjective)*

Consisting of or made of cedar.

- *Carved cedarn doors.*
- *The speaker chose "cedarn" because it captured the feeling precisely.*

---

cedilla *(noun)*

A diacritical mark (¸) placed below the letter c to indicate that it is pronounced as an s.

- *He looked up "cedilla" because he had never seen it before.*
- *She wrote a short paragraph that included "cedilla."*

---

cedrela calantas *(noun)*

Philippine timber tree having hard red fragrant wood.

- *She wrote a short paragraph that included "cedrela calantas."*
- *Understanding "cedrela calantas" helps you talk about this topic clearly.*

---

cedrus deodara *(noun)*

Tall East Indian cedar having spreading branches with nodding tips; highly valued for its appearance as well as its timber.

- *In class, the teacher used "cedrus deodara" to mean tall east indian cedar having spreading branches....*
- *They discussed "cedrus deodara" during the group presentation.*

---

cedrus libani *(noun)*

Cedar of Lebanon and northwestern Syria that attains great age and height.

- *They discussed "cedrus libani" during the group presentation.*
- *He looked up "cedrus libani" because he had never seen it before.*

---

cefobid *(noun)*

A parenteral cephalosporin (trade name Cefobid) used for severe infections.

- *Understanding "cefobid" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "cefobid."*

---

cefoperazone *(noun)*

A parenteral cephalosporin (trade name Cefobid) used for severe infections.

- *The article explained what "cefoperazone" means with a simple example.*
- *In class, the teacher used "cefoperazone" to mean a parenteral cephalosporin (trade name cefobid)....*

---

ceftin *(noun)*

A cephalosporin that can be given parenterally (trade name Zinacef) or orally by tablets (trade name Ceftin); indicated for infections of the lungs or throat or ears or urinary tract or meninges.

- *The article explained what "ceftin" means with a simple example.*
- *Understanding "ceftin" helps you talk about this topic clearly.*

---

ceiba pentandra *(noun)*

Massive tropical tree with deep ridges on its massive trunk and bearing large pods of seeds covered with silky floss; source of the silky kapok fiber.

- *She wrote a short paragraph that included "ceiba pentandra."*
- *They discussed "ceiba pentandra" during the group presentation.*

---

ceibo *(noun)*

Small South American spiny tree with dark crimson and scarlet flowers solitary or clustered.

- *He looked up "ceibo" because he had never seen it before.*
- *Understanding "ceibo" helps you talk about this topic clearly.*

---

celastraceae *(noun)*

Trees and shrubs and woody vines usually having bright-colored fruits.

- *The article explained what "celastraceae" means with a simple example.*
- *They discussed "celastraceae" during the group presentation.*

---

celastric articulatus *(noun)*

Ornamental Asiatic vine with showy orange-yellow fruit with a scarlet aril; naturalized in North America.

- *The article explained what "celastric articulatus" means with a simple example.*
- *She wrote a short paragraph that included "celastric articulatus."*

---

celastrus *(noun)*

Genus of woody vines and erect shrubs (type genus of the Celastraceae) that is native chiefly to Asia and Australia: includes bittersweet.

- *He looked up "celastrus" because he had never seen it before.*
- *In class, the teacher used "celastrus" to mean genus of woody vines and erect shrubs (type genus....*

---

celastrus orbiculatus *(noun)*

Ornamental Asiatic vine with showy orange-yellow fruit with a scarlet aril; naturalized in North America.

- *The article explained what "celastrus orbiculatus" means with a simple example.*
- *In class, the teacher used "celastrus orbiculatus" to mean ornamental asiatic vine with showy orange-yellow....*

celastrus scandens *(noun)*

Twining shrub of North America having yellow capsules enclosing scarlet seeds.

- *She wrote a short paragraph that included "celastrus scandens."*
- *Understanding "celastrus scandens" helps you talk about this topic clearly.*

celebrater *(noun)*

A person who is celebrating.

- *They discussed "celebrater" during the group presentation.*
- *She wrote a short paragraph that included "celebrater."*

celiocentesis *(noun)*

Removal of fluid from the abdomen by centesis.

- *In class, the teacher used "celiocentesis" to mean removal of fluid from the abdomen by centesis.*
- *The article explained what "celiocentesis" means with a simple example.*

celioma *(noun)*

An abdominal tumor.

- *He looked up "celioma" because he had never seen it before.*
- *She wrote a short paragraph that included "celioma."*

celioscopy *(noun)*

Endoscopic examination of the abdomen through the abdominal wall.

- *Understanding "celioscopy" helps you talk about this topic clearly.*
- *They discussed "celioscopy" during the group presentation.*

cellarage *(noun)*

A storage area in a cellar.

- *He looked up "cellarage" because he had never seen it before.*
- *She wrote a short paragraph that included "cellarage."*

cellaret *(noun)*

Sideboard with compartments for holding bottles.

- *He looked up "cellaret" because he had never seen it before.*
- *Understanding "cellaret" helps you talk about this topic clearly.*

cellulosid *(adjective)*

Of or containing or made from cellulose.

- *Students compared "cellulosid" with similar adjectives in the lesson.*
- *It is useful to describe something as "cellulosid" when it is of or containing or made from cellulose.*

celom *(noun)*

A cavity in the mesoderm of an embryo that gives rise in humans to the pleural cavity and pericardial cavity and peritoneal cavity.

- *In class, the teacher used "celom" to mean a cavity in the mesoderm of an embryo that gives....*
- *They discussed "celom" during the group presentation.*

celoma *(noun)*

A cavity in the mesoderm of an embryo that gives rise in humans to the pleural cavity and pericardial cavity and peritoneal cavity.

- *She wrote a short paragraph that included "celoma."*
- *He looked up "celoma" because he had never seen it before.*

celtuce *(noun)*

Lettuce valued especially for its edible stems.

- *The article explained what "celtuce" means with a simple example.*
- *In class, the teacher used "celtuce" to mean lettuce valued especially for its edible stems.*

cembra nut *(noun)*

The seed of the Swiss pine.

- *The article explained what "cembra nut" means with a simple example.*
- *Understanding "cembra nut" helps you talk about this topic clearly.*

---

cembra nut tree *(noun)*

Large five-needled European pine; yields cembra nuts and a resinous exudate.

- *They discussed "cembra nut tree" during the group presentation.*
- *Understanding "cembra nut tree" helps you talk about this topic clearly.*

---

cenchrus tribuloides *(noun)*

Grass of the eastern United States and tropical America having spikelets enclosed in prickly burs.

- *They discussed "cenchrus tribuloides" during the group presentation.*
- *He looked up "cenchrus tribuloides" because he had never seen it before.*

---

cenobitic *(adjective)*

Of or relating to or befitting cenobites or their practices of communal living.

- *Would you call this situation "cenobitic"? Explain why.*
- *Students compared "cenobitic" with similar adjectives in the lesson.*

---

- *The speaker chose "cenobitical" because it captured the feeling precisely.*
- *It is useful to describe something as "cenobitical" when it is of or relating to or befitting cenobites or their....*

---

cenogenesis *(noun)*

Introduction during embryonic development of characters or structure not present in the earlier evolutionary history of the strain or species (such as the addition of the placenta in mammalian evolution).

- *She wrote a short paragraph that included "cenogenesis."*
- *Understanding "cenogenesis" helps you talk about this topic clearly.*

---

cenogenetic *(adjective)*

Of or relating to cenogenesis.

- *Students compared "cenogenetic" with similar adjectives in the lesson.*
- *A "cenogenetic" approach may work better in this case.*

---

censurable *(adjective)*

Deserving blame or censure as being wrong or evil or injurious.

- *Censurable misconduct.*
- *Students compared "censurable" with similar adjectives in the lesson.*

---

centare *(noun)*

A centare is 1/100th of an are.

- *In class, the teacher used "centare" to mean a centare is 1/100th of an are.*
- *They discussed "centare" during the group presentation.*

---

centas *(noun)*

100 centas equal 1 litas in Lithuania.

- *Understanding "centas" helps you talk about this topic clearly.*
- *The article explained what "centas" means with a simple example.*

---

centaurea cyanus *(noun)*

An annual Eurasian plant cultivated in North America having showy heads of blue or purple or pink or white flowers.

- *They discussed "centaurea cyanus" during the group presentation.*
- *In class, the teacher used "centaurea cyanus" to mean an annual eurasian plant cultivated in north....*

---

centaurea gymnocarpa *(noun)*

A plant having leaves and stems covered with down that resembles dust.

- *They discussed "centaurea gymnocarpa" during the group presentation.*

- *Understanding “centaurea gymnocarpa” helps you talk about this topic clearly.*

odocoileus hemionus columbianus *(noun)*

Mule deer of western Rocky Mountains.

- *Understanding “odocoileus hemionus columbianus” helps you talk about this topic clearly.*
- *In class, the teacher used “odocoileus hemionus columbianus” to mean mule deer of western rocky mountains.*

epilobium canum canum *(noun)*

Shrublet of southwestern United States to Mexico having brilliant scarlet flowers.

- *In class, the teacher used “epilobium canum canum” to mean shrublet of southwestern united states to mexico....*
- *The article explained what “epilobium canum canum” means with a simple example.*

rhagoletis pomonella *(noun)*

Larvae bore into and feed on apples.

- *The article explained what “rhagoletis pomonella” means with a simple example.*
- *Understanding “rhagoletis pomonella” helps you talk about this topic clearly.*

crocuta crocuta *(noun)*

African hyena noted for its distinctive howl.

- *Understanding “crocuta crocuta” helps you talk about this topic clearly.*
- *The article explained what “crocuta crocuta” means with a simple example.*

cygnus columbianus columbianus *(noun)*

North American subspecies of tundra swan having a soft whistling note.

- *They discussed “cygnus columbianus columbianus” during the group presentation.*
- *He looked up “cygnus columbianus columbianus” because he had never seen it before.*

clitocybe inornata *(noun)*

A fungus with a cap that is creamy grey when young and turns brown with age and a whitish stalk that stains yellow when handled.

- *Understanding “clitocybe inornata” helps you talk about this topic clearly.*
- *In class, the teacher used “clitocybe inornata” to mean a fungus with a cap that is creamy grey when young....*

lophophora williamsii *(noun)*

A small spineless globe-shaped cactus; source of mescal buttons.

- *Understanding “lophophora williamsii” helps you talk about this topic clearly.*
- *They discussed “lophophora williamsii” during the group presentation.*

aquilegia scopulorum calcarea *(noun)*

Columbine of the Rocky Mountains having long-spurred blue flowers.

- *She wrote a short paragraph that included “aquilegia scopulorum calcarea.”*
- *He looked up “aquilegia scopulorum calcarea” because he had never seen it before.*

bemisia tabaci *(noun)*

A strain of pest accidentally imported into Florida from the Middle East then spread to California where it is a very serious pest feeding on almost all vegetable crops and poinsettias.

- *In class, the teacher used “bemisia tabaci” to mean a strain of pest accidentally imported into florida....*
- *The article explained what “bemisia tabaci” means with a simple example.*

coptis groenlandica *(noun)*

Low-growing perennial of North America woodlands having trifoliate leaves and yellow rootstock and white flowers.

- *She wrote a short paragraph that included “coptis groenlandica.”*
- *He looked up “coptis groenlandica” because he had never seen it before.*

cyathea medullaris *(noun)*

A showy tree fern of New Zealand and Australia having a crown of pinnated fronds with whitish undersides.

- *They discussed “cyathea medullaris” during the group presentation.*
- *He looked up “cyathea medullaris” because he had never seen it before.*

pinctada margaritifera *(noun)*

Tropical marine bivalve found chiefly off eastern Asia and Pacific coast of North America and Central America; a major source of pearls.

- *He looked up "pinctada margaritifera" because he had never seen it before.*
- *In class, the teacher used "pinctada margaritifera" to mean tropical marine bivalve found chiefly off eastern....*

---

agastache foeniculum *(noun)*

Much-branched North American herb with an odor like fennel.

- *In class, the teacher used "agastache foeniculum" to mean much-branched north american herb with an odor like....*
- *Understanding "agastache foeniculum" helps you talk about this topic clearly.*

---

leuciscus leuciscus *(noun)*

Small European freshwater fish with a slender bluish-green body.

- *He looked up "leuciscus leuciscus" because he had never seen it before.*
- *Understanding "leuciscus leuciscus" helps you talk about this topic clearly.*

---

tacca pinnatifida *(noun)*

Perennial herb of East Indies to Polynesia and Australia; cultivated for its large edible root yielding Otaheite arrowroot starch.

- *She wrote a short paragraph that included "tacca pinnatifida."*
- *They discussed "tacca pinnatifida" during the group presentation.*

---

diomedea nigripes *(noun)*

A variety of albatross with black feet.

- *They discussed "diomedea nigripes" during the group presentation.*
- *He looked up "diomedea nigripes" because he had never seen it before.*

---

hedysarum boreale *(noun)*

Perennial of western United States having racemes of pink to purple flowers followed by flat pods that separate into nearly orbicular joints.

- *In class, the teacher used "hedysarum boreale" to mean perennial of western united states having racemes....*
- *Understanding "hedysarum boreale" helps you talk about this topic clearly.*

---

nuphar advena *(noun)*

Common water lily of eastern and central North America, having broad leaves and globe-shaped yellow flowers; in sluggish fresh or slightly brackish water.

- *She wrote a short paragraph that included "nuphar advena."*
- *They discussed "nuphar advena" during the group presentation.*

---

pipistrellus pipistrellus *(noun)*

Small European brown bat.

- *In class, the teacher used "pipistrellus pipistrellus" to mean small european brown bat.*
- *They discussed "pipistrellus pipistrellus" during the group presentation.*

---

brugmansia suaveolens *(noun)*

South American plant cultivated for its very large nocturnally fragrant trumpet-shaped flowers.

- *In class, the teacher used "brugmansia suaveolens" to mean south american plant cultivated for its very large....*
- *Understanding "brugmansia suaveolens" helps you talk about this topic clearly.*

---

crex crex *(noun)*

Common Eurasian rail that frequents grain fields.

- *In class, the teacher used "crex crex" to mean common eurasian rail that frequents grain fields.*
- *Understanding "crex crex" helps you talk about this topic clearly.*

---

elaeis guineensis *(noun)*

Oil palm of Africa.

- *She wrote a short paragraph that included "elaeis guineensis."*
- *Understanding "elaeis guineensis" helps you talk about this topic clearly.*

---

erythronium californicum *(noun)*

California dogtooth violet with creamy white flowers sometimes yellow-tinged.

- *He looked up "erythronium californicum" because he had never seen it before.*
- *She wrote a short paragraph that included "erythronium californicum."*

---

sium latifolium *(noun)*

Large stout white-flowered perennial found wild in shallow fresh water; Europe.

- *Understanding "sium latifolium" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sium latifolium."*

---

vladimir kosma zworykin *(noun)*

United States physicist who invented the iconoscope (1889-1982).

- *He looked up "vladimir kosma zworykin" because he had never seen it before.*
- *She wrote a short paragraph that included "vladimir kosma zworykin."*

---

elaphe obsoleta *(noun)*

Large harmless shiny black North American snake.

- *In class, the teacher used "elaphe obsoleta" to mean large harmless shiny black north american snake.*
- *He looked up "elaphe obsoleta" because he had never seen it before.*

---

erythronium montanum *(noun)*

Perennial herb having large white flowers marked with orange; found near the snow line in the northwestern United States.

- *The article explained what "erythronium montanum" means with a simple example.*
- *Understanding "erythronium montanum" helps you talk about this topic clearly.*

---

luscinia luscinia *(noun)*

Large nightingale of eastern Europe.

- *He looked up "luscinia luscinia" because he had never seen it before.*
- *Understanding "luscinia luscinia" helps you talk about this topic clearly.*

---

tinca tinca *(noun)*

Freshwater dace-like game fish of Europe and western Asia noted for ability to survive outside water.

- *In class, the teacher used "tinca tinca" to mean freshwater dace-like game fish of europe and....*
- *The article explained what "tinca tinca" means with a simple example.*

---

lychnis coronaria *(noun)*

An old cottage garden plant of southeastern Europe widely cultivated for its attractive white woolly foliage and showy crimson flowers.

- *In class, the teacher used "lychnis coronaria" to mean an old cottage garden plant of southeastern europe....*
- *He looked up "lychnis coronaria" because he had never seen it before.*

---

morchella conica *(noun)*

A morel whose pitted fertile body is attached to the stalk with little free skirt around it; the fertile body is grey when young and black in old age.

- *Understanding "morchella conica" helps you talk about this topic clearly.*
- *He looked up "morchella conica" because he had never seen it before.*

---

pilosella aurantiaca *(noun)*

European hawkweed having flower heads with bright orange-red rays; a troublesome weed especially as naturalized in northeastern North America; sometimes placed in genus Hieracium.

- *In class, the teacher used "pilosella aurantiaca" to mean european hawkweed having flower heads with bright....*
- *The article explained what "pilosella aurantiaca" means with a simple example.*

---

zanthoxylum clava-herculis *(noun)*

Densely spiny ornamental of southeastern United States and West Indies.

- *In class, the teacher used "zanthoxylum clava-herculis" to mean densely spiny ornamental of southeastern united....*
- *The article explained what "zanthoxylum clava-herculis" means with a simple example.*

---

cerastium tomentosum *(noun)*

Chickweed with hairy silver-grey leaves and rather large white flowers.

- *Understanding "cerastium tomentosum" helps you talk about this topic clearly.*
- *In class, the teacher used "cerastium tomentosum" to mean chickweed with hairy silver-grey leaves and rather....*

kochia scoparia *(noun)*

Densely branched Eurasian plant; foliage turns purple-red in autumn.

- *They discussed "kochia scoparia" during the group presentation.*
- *The article explained what "kochia scoparia" means with a simple example.*

sphenodon punctatum *(noun)*

Only extant member of the order Rhynchocephalia of large spiny lizard-like diapsid reptiles of coastal islands off New Zealand.

- *She wrote a short paragraph that included "sphenodon punctatum."*
- *They discussed "sphenodon punctatum" during the group presentation.*

callinectes sapidus *(noun)*

Bluish edible crab of Atlantic and Gulf Coasts of North America.

- *Understanding "callinectes sapidus" helps you talk about this topic clearly.*
- *They discussed "callinectes sapidus" during the group presentation.*

cocculus carolinus *(noun)*

Woody vine of southeastern United States resembling the common moonseed but having red fruits.

- *She wrote a short paragraph that included "cocculus carolinus."*
- *He looked up "cocculus carolinus" because he had never seen it before.*

equus hemionus hemionus *(noun)*

Mongolian wild ass.

- *She wrote a short paragraph that included "equus hemionus hemionus."*
- *Understanding "equus hemionus hemionus" helps you talk about this topic clearly.*

lutjanus analis *(noun)*

Similar to and often marketed as 'red snapper'.

- *Understanding "lutjanus analis" helps you talk about this topic clearly.*
- *In class, the teacher used "lutjanus analis" to mean similar to and often marketed as 'red snapper'.*

pilosella officinarum *(noun)*

European hawkweed having soft hairy leaves; sometimes placed in genus Hieracium.

- *Understanding "pilosella officinarum" helps you talk about this topic clearly.*
- *The article explained what "pilosella officinarum" means with a simple example.*

poitrine d'agneau *(noun)*

A cut of lamb including the breastbone and attached muscles dressed as meat.

- *Understanding "poitrine d'agneau" helps you talk about this topic clearly.*
- *In class, the teacher used "poitrine d'agneau" to mean a cut of lamb including the breastbone and attached....*

secale cereale *(noun)*

Hardy annual cereal grass widely cultivated in northern Europe where its grain is the chief ingredient of black bread and in North America for forage and soil improvement.

- *In class, the teacher used "secale cereale" to mean hardy annual cereal grass widely cultivated in....*
- *The article explained what "secale cereale" means with a simple example.*

trachurus trachurus *(noun)*

Large elongated compressed food fish of the Atlantic waters of Europe.

- *Understanding "trachurus trachurus" helps you talk about this topic clearly.*
- *The article explained what "trachurus trachurus" means with a simple example.*

adansonia gregorii *(noun)*

Australian tree having an agreeably acid fruit that resembles a gourd.

- *In class, the teacher used "adansonia gregorii" to mean australian tree having an agreeably acid fruit that....*
- *Understanding "adansonia gregorii" helps you talk about this topic clearly.*

dipodomys ordi *(noun)*

Most widely distributed kangaroo rat: plains and mountain areas of central and western United States.

- *In class, the teacher used "dipodomys ordi" to mean most widely distributed kangaroo rat: plains and....*
- *The article explained what "dipodomys ordi" means with a simple example.*

---

habenaria dilatata *(noun)*

Orchid with spikes of many fragrant white flowers on erect leafy stems; of wet or boggy ground through most of the West and northern North America.

- *The article explained what "habenaria dilatata" means with a simple example.*
- *In class, the teacher used "habenaria dilatata" to mean orchid with spikes of many fragrant white flowers....*

---

haliaeetus pelagicus *(noun)*

Found on coasts of the northwestern Pacific.

- *He looked up "haliaeetus pelagicus" because he had never seen it before.*
- *She wrote a short paragraph that included "haliaeetus pelagicus."*

---

momordica charantia *(noun)*

Tropical Old World vine with yellow-orange fruit.

- *In class, the teacher used "momordica charantia" to mean tropical old world vine with yellow-orange fruit.*
- *The article explained what "momordica charantia" means with a simple example.*

---

pterocarpus marsupium *(noun)*

East Indian tree yielding a resin or extract often used medicinally and in e.g. tanning.

- *The article explained what "pterocarpus marsupium" means with a simple example.*
- *They discussed "pterocarpus marsupium" during the group presentation.*

---

pyrola uniflora *(noun)*

Delicate evergreen dwarf herb of north temperate regions having a solitary white terminal flower; sometimes placed in genus Pyrola.

- *They discussed "pyrola uniflora" during the group presentation.*
- *She wrote a short paragraph that included "pyrola uniflora."*

---

tarsius glis *(noun)*

A variety of tarsier.

- *In class, the teacher used "tarsius glis" to mean a variety of tarsier.*
- *He looked up "tarsius glis" because he had never seen it before.*

---

acer negundo californicum *(noun)*

Maple of the Pacific coast of the United States; fruits are white when mature.

- *She wrote a short paragraph that included "acer negundo californicum."*
- *He looked up "acer negundo californicum" because he had never seen it before.*

---

adenium multiflorum *(noun)*

South African shrub having a swollen succulent stem and bearing showy pink and white flowers after the leaves fall; popular as an ornamental in tropics.

- *She wrote a short paragraph that included "adenium multiflorum."*
- *The article explained what "adenium multiflorum" means with a simple example.*

---

cajanus cajan *(noun)*

Tropical woody herb with showy yellow flowers and flat pods; much cultivated in the tropics.

- *He looked up "cajanus cajan" because he had never seen it before.*
- *In class, the teacher used "cajanus cajan" to mean tropical woody herb with showy yellow flowers and....*

---

calliphora vicina *(noun)*

Blowfly with iridescent blue body; makes a loud buzzing noise in flight.

- *They discussed "calliphora vicina" during the group presentation.*
- *He looked up "calliphora vicina" because he had never seen it before.*

---

cardamine bulbosa *(noun)*

Small white-flowered cress common in wet places in eastern North America.

- *He looked up "cardamine bulbosa" because he had never seen it before.*

- *She wrote a short paragraph that included "cardamine bulbosa."*

dendroica petechia *(noun)*

Yellow-throated American wood warbler.

- *He looked up "dendroica petechia" because he had never seen it before.*
- *Understanding "dendroica petechia" helps you talk about this topic clearly.*

elaphe guttata *(noun)*

Large harmless snake of southeastern United States; often on farms.

- *She wrote a short paragraph that included "elaphe guttata."*
- *The article explained what "elaphe guttata" means with a simple example.*

lycopersicon esculentum *(noun)*

Native to South America; widely cultivated in many varieties.

- *She wrote a short paragraph that included "lycopersicon esculentum."*
- *Understanding "lycopersicon esculentum" helps you talk about this topic clearly.*

musculus obliquus externus abdominis *(noun)*

A diagonally arranged abdominal muscle on either side of the torso.

- *She wrote a short paragraph that included "musculus obliquus externus abdominis."*
- *Understanding "musculus obliquus externus abdominis" helps you talk about this topic clearly.*

podiceps ruficollis *(noun)*

Small European grebe.

- *The article explained what "podiceps ruficollis" means with a simple example.*
- *In class, the teacher used "podiceps ruficollis" to mean small european grebe.*

tanacetum parthenium *(noun)*

Bushy aromatic European perennial herb having clusters of buttonlike white-rayed flower heads; valued traditionally for medicinal uses; sometimes placed in genus Chrysanthemum.

- *The article explained what "tanacetum parthenium" means with a simple example.*
- *In class, the teacher used "tanacetum parthenium" to mean bushy aromatic european perennial herb having....*

trichomanes speciosum *(noun)*

Large stout fern of extreme western Europe.

- *She wrote a short paragraph that included "trichomanes speciosum."*
- *The article explained what "trichomanes speciosum" means with a simple example.*

ulugh muz tagh *(noun)*

A mountain in the Kunlun range in China (25,340 feet high).

- *She wrote a short paragraph that included "ulugh muz tagh."*
- *Understanding "ulugh muz tagh" helps you talk about this topic clearly.*

ajuga reptans *(noun)*

Low rhizomatous European carpeting plant having spikes of blue flowers; naturalized in parts of United States.

- *The article explained what "ajuga reptans" means with a simple example.*
- *She wrote a short paragraph that included "ajuga reptans."*

apodemus sylvaticus *(noun)*

Nocturnal yellowish-brown mouse inhabiting woods and fields and gardens.

- *She wrote a short paragraph that included "apodemus sylvaticus."*
- *He looked up "apodemus sylvaticus" because he had never seen it before.*

emberiza aureola *(noun)*

Common in Russia and Siberia.

- *He looked up "emberiza aureola" because he had never seen it before.*
- *Understanding "emberiza aureola" helps you talk about this topic clearly.*

holcus lanatus *(noun)*

Tall European perennial grass having a velvety stem; naturalized in United States and used for forage.

- *In class, the teacher used "holcus lanatus" to mean tall european perennial grass having a velvety....*
- *The article explained what "holcus lanatus" means with a simple example.*

morchella crassipes *(noun)*

A delicious morel with a conic fertile portion having deep and irregular pits.

- *In class, the teacher used "morchella crassipes" to mean a delicious morel with a conic fertile portion....*
- *The article explained what "morchella crassipes" means with a simple example.*

mucuna pruriens utilis *(noun)*

The annual woody vine of Asia having long clusters of purplish flowers and densely hairy pods; cultivated in southern United States for green manure and grazing.

- *They discussed "mucuna pruriens utilis" during the group presentation.*
- *Understanding "mucuna pruriens utilis" helps you talk about this topic clearly.*

talipes equinus *(noun)*

Talipes in which the toes are pointed downward.

- *He looked up "talipes equinus" because he had never seen it before.*
- *Understanding "talipes equinus" helps you talk about this topic clearly.*

al-gama'a al-islamiyya *(noun)*

A terrorist organization of militant Islamists organized into tiny cells of extreme fundamentalists; emerged during the 1970s mainly in Egyptian jails.

- *Al-Gama'a al-Islamiyya uses force to push Egyptian society toward Islamic rule.*
- *In class, the teacher used "al-gama'a al-islamiyya" to mean a terrorist organization of militant islamists....*

alca torda *(noun)*

Black-and-white northern Atlantic auk having a compressed sharp-edged bill.

- *They discussed "alca torda" during the group presentation.*
- *He looked up "alca torda" because he had never seen it before.*

butea frondosa *(noun)*

East Indian tree bearing a profusion of intense vermilion velvet-textured blooms and yielding a yellow dye.

- *They discussed "butea frondosa" during the group presentation.*
- *He looked up "butea frondosa" because he had never seen it before.*

ciconia ciconia *(noun)*

The common stork of Europe; white with black wing feathers and a red bill.

- *Understanding "ciconia ciconia" helps you talk about this topic clearly.*
- *He looked up "ciconia ciconia" because he had never seen it before.*

erythronium grandiflorum *(noun)*

Dogtooth violet of western North America having bright yellow flowers.

- *In class, the teacher used "erythronium grandiflorum" to mean dogtooth violet of western north america having....*
- *The article explained what "erythronium grandiflorum" means with a simple example.*

haliaeetus leucocephalus *(noun)*

A large eagle of North America that has a white head and dark wings and body.

- *He looked up "haliaeetus leucocephalus" because he had never seen it before.*
- *In class, the teacher used "haliaeetus leucocephalus" to mean a large eagle of north america that has a white....*

tanacetum douglasii *(noun)*

Lightly hairy rhizomatous perennial having aromatic feathery leaves and stems bearing open clusters of small buttonlike yellow flowers; sand dunes of Pacific coast of North America.

- *They discussed "tanacetum douglasii" during the group presentation.*
- *The article explained what "tanacetum douglasii" means with a simple example.*

arctium lappa *(noun)*

Burdock having heart-shaped leaves found in open woodland, hedgerows and rough grassland of Europe (except extreme N) and Asia Minor; sometimes cultivated for medicinal and culinary use.

- *She wrote a short paragraph that included "arctium lappa."*
- *He looked up "arctium lappa" because he had never seen it before.*

---

carthamus tinctorius *(noun)*

Thistlelike Eurasian plant widely grown for its red or orange flower heads and seeds that yield a valuable oil.

- *Understanding "carthamus tinctorius" helps you talk about this topic clearly.*
- *The article explained what "carthamus tinctorius" means with a simple example.*

---

elymus arenarius *(noun)*

A dune grass of the Pacific seacoast used as a sand binder.

- *They discussed "elymus arenarius" during the group presentation.*
- *In class, the teacher used "elymus arenarius" to mean a dune grass of the pacific seacoast used as a sand....*

---

epinephelus fulvus *(noun)*

Black-spotted usually dusky-colored fish with reddish fins.

- *They discussed "epinephelus fulvus" during the group presentation.*
- *The article explained what "epinephelus fulvus" means with a simple example.*

---

fritillaria micrantha *(noun)*

California herb with brownish-purple or greenish bell-shaped flowers.

- *In class, the teacher used "fritillaria micrantha" to mean california herb with brownish-purple or greenish....*
- *The article explained what "fritillaria micrantha" means with a simple example.*

---

galina sergeevna ulanova *(noun)*

Russian ballet dancer (1910-1998).

- *Understanding "galina sergeevna ulanova" helps you talk about this topic clearly.*
- *They discussed "galina sergeevna ulanova" during the group presentation.*

---

gaultheria shallon *(noun)*

Small evergreen shrub of Pacific coast of North America having edible dark purple grape-sized berries.

- *They discussed "gaultheria shallon" during the group presentation.*
- *Understanding "gaultheria shallon" helps you talk about this topic clearly.*

---

idria columnaris *(noun)*

Candlewood of Mexico and southwestern California having tall columnar stems and bearing honey-scented creamy yellow flowers.

- *In class, the teacher used "idria columnaris" to mean candlewood of mexico and southwestern california....*
- *They discussed "idria columnaris" during the group presentation.*

---

perognathus hispidus *(noun)*

Large stiff-haired rodent of shortgrass prairies of United States.

- *They discussed "perognathus hispidus" during the group presentation.*
- *The article explained what "perognathus hispidus" means with a simple example.*

---

asarum canadense *(noun)*

Deciduous low-growing perennial of Canada and eastern and central United States.

- *The article explained what "asarum canadense" means with a simple example.*
- *In class, the teacher used "asarum canadense" to mean deciduous low-growing perennial of canada and....*

---

brugmansia sanguinea *(noun)*

Arborescent South American shrub having very large orange-red flowers.

- *In class, the teacher used "brugmansia sanguinea" to mean arborescent south american shrub having very large....*
- *He looked up "brugmansia sanguinea" because he had never seen it before.*

---

caragana arborescens *(noun)*

Large spiny shrub of eastern Asia having clusters of yellow flowers; often cultivated in shelterbelts and hedges.

- *They discussed "caragana arborescens" during the group presentation.*
- *He looked up "caragana arborescens" because he had never seen it before.*

cerastes cornutus *(noun)*

Highly venomous viper of northern Africa and southwestern Asia having a horny spine above each eye.

- *She wrote a short paragraph that included "cerastes cornutus."*
- *They discussed "cerastes cornutus" during the group presentation.*

cortinarius gentilis *(noun)*

A poisonous fungus with a bright yellow brown cap and a long cinnamon colored stalk.

- *He looked up "cortinarius gentilis" because he had never seen it before.*
- *She wrote a short paragraph that included "cortinarius gentilis."*

crotalus horridus horridus *(noun)*

Widely distributed in rugged ground of eastern United States.

- *She wrote a short paragraph that included "crotalus horridus horridus."*
- *Understanding "crotalus horridus horridus" helps you talk about this topic clearly.*

eryngium maritimum *(noun)*

European evergreen eryngo with twisted spiny leaves naturalized on United States east coast; roots formerly used as an aphrodisiac.

- *The article explained what "eryngium maritimum" means with a simple example.*
- *Understanding "eryngium maritimum" helps you talk about this topic clearly.*

euonymus fortunei radicans *(noun)*

Broad and bushy Asiatic twining shrub with pinkish fruit; many subspecies or varieties.

- *Understanding "euonymus fortunei radicans" helps you talk about this topic clearly.*
- *The article explained what "euonymus fortunei radicans" means with a simple example.*

glis glis *(noun)*

Large European dormouse.

- *In class, the teacher used "glis glis" to mean large european dormouse.*
- *The article explained what "glis glis" means with a simple example.*

inula helenium *(noun)*

Tall coarse Eurasian herb having daisylike yellow flowers with narrow petals whose rhizomatous roots are used medicinally.

- *Understanding "inula helenium" helps you talk about this topic clearly.*
- *He looked up "inula helenium" because he had never seen it before.*

jasminum sambac *(noun)*

East Indian evergreen vine cultivated for its profuse fragrant white flowers.

- *The article explained what "jasminum sambac" means with a simple example.*
- *They discussed "jasminum sambac" during the group presentation.*

mammillaria plumosa *(noun)*

A low tuberculate cactus with white feathery spines; northeastern Mexico.

- *The article explained what "mammillaria plumosa" means with a simple example.*
- *In class, the teacher used "mammillaria plumosa" to mean a low tuberculate cactus with white feathery....*

micropterus salmoides *(noun)*

A large black bass; the angle of the jaw falls behind the eye.

- *He looked up "micropterus salmoides" because he had never seen it before.*
- *They discussed "micropterus salmoides" during the group presentation.*

pisonia aculeata *(noun)*

Small spiny West Indian tree.

- *They discussed "pisonia aculeata" during the group presentation.*
- *She wrote a short paragraph that included "pisonia aculeata."*

pleurotus ostreatus *(noun)*

Edible agaric with a soft greyish cap growing in shelving masses on dead wood.

- *They discussed "pleurotus ostreatus" during the group presentation.*
- *The article explained what "pleurotus ostreatus" means with a simple example.*

---

ruscus aculeatus *(noun)*

Shrub with stiff flattened stems resembling leaves (cladophylls); used for making brooms.

- *Understanding "ruscus aculeatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "ruscus aculeatus."*

---

thamnophis sirtalis *(noun)*

A garter snake that is widespread in North America.

- *He looked up "thamnophis sirtalis" because he had never seen it before.*
- *She wrote a short paragraph that included "thamnophis sirtalis."*

---

actinidia deliciosa *(noun)*

Climbing vine native to China; cultivated in New Zealand for its fuzzy edible fruit with green meat.

- *They discussed "actinidia deliciosa" during the group presentation.*
- *Understanding "actinidia deliciosa" helps you talk about this topic clearly.*

---

ambystoma mexicanum *(noun)*

Larval salamander of mountain lakes of Mexico that usually lives without metamorphosing.

- *He looked up "ambystoma mexicanum" because he had never seen it before.*
- *In class, the teacher used "ambystoma mexicanum" to mean larval salamander of mountain lakes of mexico that....*

---

andropogon furcatus *(noun)*

Tall grass with smooth bluish leaf sheaths grown for hay in the United States.

- *Understanding "andropogon furcatus" helps you talk about this topic clearly.*
- *The article explained what "andropogon furcatus" means with a simple example.*

---

arteria angularis *(noun)*

The terminal branch of the facial artery.

- *Understanding "arteria angularis" helps you talk about this topic clearly.*
- *They discussed "arteria angularis" during the group presentation.*

---

arteria axillaris *(noun)*

The part of the main artery of the arm that lies in the armpit and is continuous with the subclavian artery above and the brachial artery below.

- *They discussed "arteria axillaris" during the group presentation.*
- *The article explained what "arteria axillaris" means with a simple example.*

---

arteria coronaria *(noun)*

The artery that branches from the aorta to supply blood to the heart.

- *In class, the teacher used "arteria coronaria" to mean the artery that branches from the aorta to supply....*
- *The article explained what "arteria coronaria" means with a simple example.*

---

commiphora myrrha *(noun)*

Tree of eastern Africa and Asia yielding myrrh.

- *He looked up "commiphora myrrha" because he had never seen it before.*
- *In class, the teacher used "commiphora myrrha" to mean tree of eastern africa and asia yielding myrrh.*

---

consolida ambigua *(noun)*

Commonly cultivated larkspur of southern Europe having unbranched spikelike racemes of blue or sometimes purplish or pinkish flowers; sometime placed in genus Delphinium.

- *He looked up "consolida ambigua" because he had never seen it before.*
- *Understanding "consolida ambigua" helps you talk about this topic clearly.*

---

elaeis oleifera *(noun)*

Palm of Central and South America.

- *He looked up "elaeis oleifera" because he had never seen it before.*

- *She wrote a short paragraph that included "elaeis oleifera."*

---

habenaria hookeri *(noun)*

A long-spurred orchid with base leaves and petals converging under the upper sepal.

- *He looked up "habenaria hookeri" because he had never seen it before.*
- *She wrote a short paragraph that included "habenaria hookeri."*

---

lanius ludovicianus migrans *(noun)*

A shrike of central North America; winters in Texas and the southern Mississippi valley.

- *They discussed "lanius ludovicianus migrans" during the group presentation.*
- *He looked up "lanius ludovicianus migrans" because he had never seen it before.*

---

mesembryanthemum edule *(noun)*

Low-growing South African succulent plant having a capsular fruit containing edible pulp.

- *He looked up "mesembryanthemum edule" because he had never seen it before.*
- *She wrote a short paragraph that included "mesembryanthemum edule."*

---

monarda citriodora *(noun)*

An annual horsemint of central and western United States and northern Mexico.

- *In class, the teacher used "monarda citriodora" to mean an annual horsemint of central and western united....*
- *He looked up "monarda citriodora" because he had never seen it before.*

---

podocarpus elatus *(noun)*

Large Australian tree with straight-grained yellow wood that turns brown on exposure.

- *He looked up "podocarpus elatus" because he had never seen it before.*
- *Understanding "podocarpus elatus" helps you talk about this topic clearly.*

---

pulex irritans *(noun)*

The most common flea attacking humans.

- *Understanding "pulex irritans" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pulex irritans."*

---

callirhoe digitata *(noun)*

Perennial poppy mallow of United States southern plains states having rose-red or rose-purple flowers.

- *In class, the teacher used "callirhoe digitata" to mean perennial poppy mallow of united states southern....*
- *They discussed "callirhoe digitata" during the group presentation.*

---

cirsium lanceolatum *(noun)*

European thistle with rather large heads and prickly leaves; extensively naturalized as a weed in the United States.

- *She wrote a short paragraph that included "cirsium lanceolatum."*
- *They discussed "cirsium lanceolatum" during the group presentation.*

---

cortinarius mutabilis *(noun)*

A fungus with a reddish purple cap having a smooth slimy surface; close violet gills; all parts stain dark purple when bruised.

- *The article explained what "cortinarius mutabilis" means with a simple example.*
- *They discussed "cortinarius mutabilis" during the group presentation.*

---

dendroica tigrina *(noun)*

North American wood warbler; olive green and yellow striped with black.

- *The article explained what "dendroica tigrina" means with a simple example.*
- *In class, the teacher used "dendroica tigrina" to mean north american wood warbler; olive green and yellow....*

---

eichhornia crassipes *(noun)*

A tropical floating aquatic plant having spikes of large blue flowers; troublesome in clogging waterways especially in southern United States.

- *The article explained what "eichhornia crassipes" means with a simple example.*
- *They discussed "eichhornia crassipes" during the group presentation.*

---

fritillaria mutica *(noun)*

Herb of northwestern America having green-and-purple bell-shaped flowers.

- *He looked up "fritillaria mutica" because he had never seen it before.*
- *They discussed "fritillaria mutica" during the group presentation.*

---

gasterosteus aculeatus *(noun)*

Of rivers and coastal regions.

- *He looked up "gasterosteus aculeatus" because he had never seen it before.*
- *She wrote a short paragraph that included "gasterosteus aculeatus."*

---

lepomis gibbosus *(noun)*

Small brilliantly colored North American sunfish.

- *They discussed "lepomis gibbosus" during the group presentation.*
- *The article explained what "lepomis gibbosus" means with a simple example.*

---

publius aelius hadrianus *(noun)*

Roman Emperor who was the adoptive son of Trajan; travelled throughout his empire to strengthen its frontiers and encourage learning and architecture; on a visit to Britain in 122 he ordered the construction of Hadrian's Wall (76-138).

- *Understanding "publius aelius hadrianus" helps you talk about this topic clearly.*
- *The article explained what "publius aelius hadrianus" means with a simple example.*

---

sansevieria guineensis *(noun)*

Bowstring hemp of South Africa.

- *In class, the teacher used "sansevieria guineensis" to mean bowstring hemp of south africa.*
- *He looked up "sansevieria guineensis" because he had never seen it before.*

---

sylvilagus floridanus *(noun)*

Widely distributed in United States except northwest and far west regions.

- *He looked up "sylvilagus floridanus" because he had never seen it before.*
- *She wrote a short paragraph that included "sylvilagus floridanus."*

---

teucrium canadense *(noun)*

Subshrub with serrate leaves and cream-colored to pink or purple flowers in spikelike racemes; North America.

- *He looked up "teucrium canadense" because he had never seen it before.*
- *She wrote a short paragraph that included "teucrium canadense."*

---

tunga penetrans *(noun)*

Small tropical flea; the fertile female burrows under the skin of the host including humans.

- *The article explained what "tunga penetrans" means with a simple example.*
- *In class, the teacher used "tunga penetrans" to mean small tropical flea; the fertile female burrows....*

---

ajuga pyramidalis *(noun)*

European evergreen carpeting perennial.

- *She wrote a short paragraph that included "ajuga pyramidalis."*
- *He looked up "ajuga pyramidalis" because he had never seen it before.*

---

arteria nutricia *(noun)*

An artery that supplies the medullary cavity of the long bone.

- *She wrote a short paragraph that included "arteria nutricia."*
- *They discussed "arteria nutricia" during the group presentation.*

---

asplenium trichomanes *(noun)*

Small rock-inhabiting fern of northern temperate zone and Hawaii with pinnate fronds.

- *The article explained what "asplenium trichomanes" means with a simple example.*
- *She wrote a short paragraph that included "asplenium trichomanes."*

---

boswellia carteri *(noun)*

Tree yielding an aromatic gum resin burned as incense.

- *In class, the teacher used "boswellia carteri" to mean tree yielding an aromatic gum resin burned as incense.*
- *Understanding "boswellia carteri" helps you talk about this topic clearly.*

---

botrychium lunaria *(noun)*

Of America and Eurasia and Australia.

- *Understanding "botrychium lunaria" helps you talk about this topic clearly.*
- *He looked up "botrychium lunaria" because he had never seen it before.*

---

capparis flexuosa *(noun)*

Shrub or small tree of southern Florida to Central and South America.

- *Understanding "capparis flexuosa" helps you talk about this topic clearly.*
- *He looked up "capparis flexuosa" because he had never seen it before.*

---

cypripedium fasciculatum *(noun)*

Clusters of several short stems each having 2 broad leaves and 2-4 drooping brownish to greenish flowers with pouches mottled with purple; British Columbia to central California and northern Colorado.

- *In class, the teacher used "cypripedium fasciculatum" to mean clusters of several short stems each having 2 broad....*
- *They discussed "cypripedium fasciculatum" during the group presentation.*

---

gentiana clausa *(noun)*

Similar to Gentiana andrewsii but with larger flowers.

- *He looked up "gentiana clausa" because he had never seen it before.*
- *Understanding "gentiana clausa" helps you talk about this topic clearly.*

---

lauritz lebrecht hommel melchior *(noun)*

United States operatic tenor (born in Denmark) noted for his Wagnerian roles (1890-1973).

- *They discussed "lauritz lebrecht hommel melchior" during the group presentation.*
- *She wrote a short paragraph that included "lauritz lebrecht hommel melchior."*

---

ledum palustre *(noun)*

Bog shrub of northern and central Europe and eastern Siberia to Korea and Japan.

- *She wrote a short paragraph that included "ledum palustre."*
- *The article explained what "ledum palustre" means with a simple example.*

---

oenothera biennis *(noun)*

A coarse biennial of eastern North America with yellow flowers that open in the evening; naturalized in Europe.

- *She wrote a short paragraph that included "oenothera biennis."*
- *Understanding "oenothera biennis" helps you talk about this topic clearly.*

---

phocoena phocoena *(noun)*

The common porpoise of the northern Atlantic and Pacific.

- *In class, the teacher used "phocoena phocoena" to mean the common porpoise of the northern atlantic and....*
- *He looked up "phocoena phocoena" because he had never seen it before.*

---

punica granatum *(noun)*

Shrub or small tree native to southwestern Asia having large red many-seeded fruit.

- *They discussed "punica granatum" during the group presentation.*
- *The article explained what "punica granatum" means with a simple example.*

---

pyrola elliptica *(noun)*

North American evergreen with small pinkish bell-shaped flowers and oblong leaves used formerly for shinplasters.

- *Understanding "pyrola elliptica" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "pyrola elliptica."*

---

roseola infantum *(noun)*

A viral disease of infants and young children; characterized by abrupt high fever and mild sore throat; a few days later there is a faint pinkish rash that lasts for a few hours to a few days.

- *They discussed "roseola infantum" during the group presentation.*
- *The article explained what "roseola infantum" means with a simple example.*

teucrium marum *(noun)*

Mediterranean germander having small hairy leaves and reddish purple flowers; attractive to cats.

- *He looked up "teucrium marum" because he had never seen it before.*
- *They discussed "teucrium marum" during the group presentation.*

arteria arcuata *(noun)*

Curved artery in the foot.

- *She wrote a short paragraph that included "arteria arcuata."*
- *He looked up "arteria arcuata" because he had never seen it before.*

arteria ulnaris *(noun)*

Large artery that branches from the brachial artery to supply the muscles of the forearm and wrist and hand.

- *In class, the teacher used "arteria ulnaris" to mean large artery that branches from the brachial artery....*
- *He looked up "arteria ulnaris" because he had never seen it before.*

baptisia lactea *(noun)*

Erect or spreading herb having racemes of creamy white flowers; the eastern United States.

- *She wrote a short paragraph that included "baptisia lactea."*
- *He looked up "baptisia lactea" because he had never seen it before.*

caesalpinia pulcherrima *(noun)*

Tropical shrub or small tree having showy yellow to orange-red flowers; sometimes placed in genus Poinciana.

- *In class, the teacher used "caesalpinia pulcherrima" to mean tropical shrub or small tree having showy yellow to....*
- *They discussed "caesalpinia pulcherrima" during the group presentation.*

cercopithecus aethiops *(noun)*

White and olive green East African monkey with long white tufts of hair beside the face.

- *In class, the teacher used "cercopithecus aethiops" to mean white and olive green east african monkey with long....*
- *The article explained what "cercopithecus aethiops" means with a simple example.*

cistus albidus *(noun)*

Compact white pubescent shrub of southwestern Europe having pink flowers.

- *They discussed "cistus albidus" during the group presentation.*
- *She wrote a short paragraph that included "cistus albidus."*

claytonia caroliniana *(noun)*

Similar to Claytonia virginica but having usually pink flowers; eastern North America.

- *She wrote a short paragraph that included "claytonia caroliniana."*
- *They discussed "claytonia caroliniana" during the group presentation.*

galium lanceolatum *(noun)*

Bedstraw with sweetish roots.

- *Understanding "galium lanceolatum" helps you talk about this topic clearly.*
- *He looked up "galium lanceolatum" because he had never seen it before.*

helleborus foetidus *(noun)*

Digitate-leaved hellebore with an offensive odor and irritant qualities when taken internally.

- *Understanding "helleborus foetidus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "helleborus foetidus."*

locusta migratoria *(noun)*

Old World locust that travels in vast swarms stripping large areas of vegetation.

- *In class, the teacher used "locusta migratoria" to mean old world locust that travels in vast swarms....*
- *The article explained what "locusta migratoria" means with a simple example.*

ocimum basilicum *(noun)*

Annual or perennial of tropical Asia having spikes of small white flowers and aromatic leaves; one of the most important culinary herbs; used in salads, casseroles, sauces and some liqueurs.

- *The article explained what "ocimum basilicum" means with a simple example.*
- *They discussed "ocimum basilicum" during the group presentation.*

---

puffinus puffinus *(noun)*

Small black-and-white shearwater common in the northeastern Atlantic.

- *He looked up "puffinus puffinus" because he had never seen it before.*
- *In class, the teacher used "puffinus puffinus" to mean small black-and-white shearwater common in the....*

---

rudbeckia laciniata hortensia *(noun)*

Very tall branching herb with showy much-doubled yellow flower heads.

- *They discussed "rudbeckia laciniata hortensia" during the group presentation.*
- *She wrote a short paragraph that included "rudbeckia laciniata hortensia."*

---

salamandra maculosa *(noun)*

European salamander having dark skin with usually yellow spots.

- *The article explained what "salamandra maculosa" means with a simple example.*
- *In class, the teacher used "salamandra maculosa" to mean european salamander having dark skin with usually....*

---

salvinia auriculata *(noun)*

Free-floating aquatic ferns.

- *He looked up "salvinia auriculata" because he had never seen it before.*
- *Understanding "salvinia auriculata" helps you talk about this topic clearly.*

---

ursus arctos syriacus *(noun)*

Yellowish-grey Syrian brown bear.

- *They discussed "ursus arctos syriacus" during the group presentation.*
- *Understanding "ursus arctos syriacus" helps you talk about this topic clearly.*

---

verbascum thapsus *(noun)*

Tall-stalked very woolly mullein with densely packed yellow flowers; ancient Greeks and Romans dipped the stalks in tallow for funeral torches.

- *In class, the teacher used "verbascum thapsus" to mean tall-stalked very woolly mullein with densely....*
- *The article explained what "verbascum thapsus" means with a simple example.*

---

alopex lagopus *(noun)*

Thickly-furred fox of Arctic regions; brownish in summer and white in winter.

- *He looked up "alopex lagopus" because he had never seen it before.*
- *Understanding "alopex lagopus" helps you talk about this topic clearly.*

---

ancylus fluviatilis *(noun)*

Minute conical gastropod superficially resembling a limpet but living and feeding on freshwater plants.

- *The article explained what "ancylus fluviatilis" means with a simple example.*
- *They discussed "ancylus fluviatilis" during the group presentation.*

---

capreolus capreolus *(noun)*

Small graceful deer of Eurasian woodlands having small forked antlers.

- *In class, the teacher used "capreolus capreolus" to mean small graceful deer of eurasian woodlands having....*
- *Understanding "capreolus capreolus" helps you talk about this topic clearly.*

---

carcharhinus leucas *(noun)*

A most common shark in temperate and tropical coastal waters worldwide; heavy-bodied and dangerous.

- *In class, the teacher used "carcharhinus leucas" to mean a most common shark in temperate and tropical....*
- *The article explained what "carcharhinus leucas" means with a simple example.*

---

cerastium alpinum *(noun)*

Widespread in the Arctic and on mountains in Europe.

- *They discussed "cerastium alpinum" during the group presentation.*

- *In class, the teacher used “cerastium alpinum” to mean widespread in the arctic and on mountains in europe.*

cinnamomum camphora *(noun)*

Large evergreen tree of warm regions whose aromatic wood yields camphor.

- *She wrote a short paragraph that included “cinnamomum camphora.”*
- *Understanding “cinnamomum camphora” helps you talk about this topic clearly.*

cleome serrulata *(noun)*

Plant of western North America having trifoliate leaves and white or pink spider-shaped flowers; sometimes used as an ornamental.

- *Understanding “cleome serrulata” helps you talk about this topic clearly.*
- *In class, the teacher used “cleome serrulata” to mean plant of western north america having trifoliate....*

clitocybe nuda *(noun)*

Edible agaric that is pale lilac when young; has a smooth moist cap.

- *He looked up “clitocybe nuda” because he had never seen it before.*
- *Understanding “clitocybe nuda” helps you talk about this topic clearly.*

dendroica coronata *(noun)*

Similar to Audubon’s warbler.

- *In class, the teacher used “dendroica coronata” to mean similar to audubon’s warbler.*
- *The article explained what “dendroica coronata” means with a simple example.*

george charles hevesy de hevesy *(noun)*

Hungarian chemist who studied radioisotopes and was one of the discoverers of the element hafnium (1885-1966).

- *Understanding “george charles hevesy de hevesy” helps you talk about this topic clearly.*
- *In class, the teacher used “george charles hevesy de hevesy” to mean hungarian chemist who studied radioisotopes and was....*

gerris lacustris *(noun)*

A variety of water strider.

- *Understanding “gerris lacustris” helps you talk about this topic clearly.*
- *In class, the teacher used “gerris lacustris” to mean a variety of water strider.*

liriodendron tulipifera *(noun)*

Tall North American deciduous timber tree having large tulip-shaped greenish yellow flowers and conelike fruit; yields soft white woods used especially for cabinet work.

- *He looked up “liriodendron tulipifera” because he had never seen it before.*
- *She wrote a short paragraph that included “liriodendron tulipifera.”*

liriope muscari *(noun)*

Asiatic perennial tufted herb with grasslike evergreen foliage and clusters of dark mauve grapelike flowers; grown as ground cover.

- *Understanding “liriope muscari” helps you talk about this topic clearly.*
- *He looked up “liriope muscari” because he had never seen it before.*

nephrops norvegicus *(noun)*

Edible European lobster resembling the American lobster but slenderer.

- *In class, the teacher used “nephrops norvegicus” to mean edible european lobster resembling the american....*
- *The article explained what “nephrops norvegicus” means with a simple example.*

nervus ulnaris *(noun)*

A nerve running along the inner side of the arm and passing near the elbow; supplies intrinsic muscles of the hand and the skin of the medial side of the hand.

- *The article explained what “nervus ulnaris” means with a simple example.*
- *Understanding “nervus ulnaris” helps you talk about this topic clearly.*

perognathus flavescens *(noun)*

Small rodent of open areas of United States plains states.

- *In class, the teacher used “perognathus flavescens” to mean small rodent of open areas of united states plains....*
- *They discussed “perognathus flavescens” during the group presentation.*

polistes annularis *(noun)*

A variety of paper wasp.

- *He looked up "polistes annularis" because he had never seen it before.*
- *She wrote a short paragraph that included "polistes annularis."*

sansevieria zeylanica *(noun)*

Plant having thick fibrous leaves transversely banded in light and dark green.

- *He looked up "sansevieria zeylanica" because he had never seen it before.*
- *She wrote a short paragraph that included "sansevieria zeylanica."*

stephanotis floribunda *(noun)*

Twining woody vine of Madagascar having thick dark waxy evergreen leaves and clusters of large fragrant waxy white flowers along the stems; widely cultivated in warm regions.

- *He looked up "stephanotis floribunda" because he had never seen it before.*
- *They discussed "stephanotis floribunda" during the group presentation.*

tomentum cerebri *(noun)*

A network of tiny blood vessels between the cerebral surface of the pia mater and the cerebral cortex.

- *The article explained what "tomentum cerebri" means with a simple example.*
- *Understanding "tomentum cerebri" helps you talk about this topic clearly.*

zanthoxylum flavum *(noun)*

West Indian tree with smooth lustrous and slightly oily wood.

- *He looked up "zanthoxylum flavum" because he had never seen it before.*
- *She wrote a short paragraph that included "zanthoxylum flavum."*

adansonia digitata *(noun)*

African tree having an exceedingly thick trunk and fruit that resembles a gourd and has an edible pulp called monkey bread.

- *She wrote a short paragraph that included "adansonia digitata."*
- *He looked up "adansonia digitata" because he had never seen it before.*

ananas comosus *(noun)*

A tropical American plant bearing a large fleshy edible fruit with a terminal tuft of stiff leaves; widely cultivated in the tropics.

- *She wrote a short paragraph that included "ananas comosus."*
- *He looked up "ananas comosus" because he had never seen it before.*

asplenium nigripes *(noun)*

A fern of the genus Schaffneria.

- *They discussed "asplenium nigripes" during the group presentation.*
- *He looked up "asplenium nigripes" because he had never seen it before.*

brugmansia arborea *(noun)*

A South American plant that is cultivated for its large fragrant trumpet-shaped flowers.

- *They discussed "brugmansia arborea" during the group presentation.*
- *She wrote a short paragraph that included "brugmansia arborea."*

cedrela odorata *(noun)*

Tropical American tree yielding fragrant wood used especially for boxes.

- *He looked up "cedrela odorata" because he had never seen it before.*
- *She wrote a short paragraph that included "cedrela odorata."*

cnemidophorus velox *(noun)*

Having distinct longitudinal stripes: of Colorado Plateau from Arizona to western Colorado.

- *In class, the teacher used "cnemidophorus velox" to mean having distinct longitudinal stripes: of colorado....*
- *They discussed "cnemidophorus velox" during the group presentation.*

crocodylus porosus *(noun)*

Estuarine crocodile of eastern Asia and Pacific islands.

- *Understanding "crocodylus porosus" helps you talk about this topic clearly.*
- *They discussed "crocodylus porosus" during the group presentation.*

---

crotalus cerastes *(noun)*

Small pale-colored desert rattlesnake of southwestern United States; body moves in an s-shaped curve.

- *The article explained what "crotalus cerastes" means with a simple example.*
- *She wrote a short paragraph that included "crotalus cerastes."*

---

epimedium grandiflorum *(noun)*

Slow-growing creeping plant with semi-evergreen leaves on erect wiry stems; used as ground cover.

- *She wrote a short paragraph that included "epimedium grandiflorum."*
- *Understanding "epimedium grandiflorum" helps you talk about this topic clearly.*

---

humulus lupulus *(noun)*

European twining plant whose flowers are used chiefly to flavor malt liquors; cultivated in America.

- *They discussed "humulus lupulus" during the group presentation.*
- *In class, the teacher used "humulus lupulus" to mean european twining plant whose flowers are used....*

---

lamna nasus *(noun)*

Voracious pointed-nose shark of northern Atlantic and Pacific.

- *The article explained what "lamna nasus" means with a simple example.*
- *She wrote a short paragraph that included "lamna nasus."*

---

mashie niblick *(noun)*

Iron with a lofted face for hitting high shots to the green.

- *The article explained what "mashie niblick" means with a simple example.*
- *They discussed "mashie niblick" during the group presentation.*

---

peziza coccinea *(noun)*

A scarlet European fungus with cup-shaped ascocarp.

- *In class, the teacher used "peziza coccinea" to mean a scarlet european fungus with cup-shaped ascocarp.*
- *He looked up "peziza coccinea" because he had never seen it before.*

---

pteridium esculentum *(noun)*

Fern of southeastern Asia; not hardy in cold temperate regions.

- *He looked up "pteridium esculentum" because he had never seen it before.*
- *Understanding "pteridium esculentum" helps you talk about this topic clearly.*

---

araucaria cunninghamii *(noun)*

Pine of Australia and New Guinea; yields a valuable light even-textured wood.

- *They discussed "araucaria cunninghamii" during the group presentation.*
- *In class, the teacher used "araucaria cunninghamii" to mean pine of australia and new guinea; yields a valuable....*

---

arteria pudenda *(noun)*

Arteries supplying the external genital organs of humans.

- *She wrote a short paragraph that included "arteria pudenda."*
- *He looked up "arteria pudenda" because he had never seen it before.*

---

caesalpinia echinata *(noun)*

Tropical tree with prickly trunk; its heavy red wood yields a red dye and is used for cabinetry.

- *The article explained what "caesalpinia echinata" means with a simple example.*
- *She wrote a short paragraph that included "caesalpinia echinata."*

---

castilleja miniata *(noun)*

Wildflower of western North America having ragged clusters of crimson or scarlet flowers.

- *They discussed "castilleja miniata" during the group presentation.*
- *In class, the teacher used "castilleja miniata" to mean wildflower of western north america having ragged....*

cerastium arvense *(noun)*

Densely tufted perennial chickweed of north temperate zone.

- *The article explained what "cerastium arvense" means with a simple example.*
- *In class, the teacher used "cerastium arvense" to mean densely tufted perennial chickweed of north....*

cimex lectularius *(noun)*

Bug of temperate regions that infests especially beds and feeds on human blood.

- *They discussed "cimex lectularius" during the group presentation.*
- *In class, the teacher used "cimex lectularius" to mean bug of temperate regions that infests especially....*

cupressus arizonica *(noun)*

Arizona timber tree with bluish silvery foliage.

- *They discussed "cupressus arizonica" during the group presentation.*
- *Understanding "cupressus arizonica" helps you talk about this topic clearly.*

cytisus scoparius *(noun)*

Deciduous erect spreading broom native to western Europe; widely cultivated for its rich yellow flowers.

- *They discussed "cytisus scoparius" during the group presentation.*
- *The article explained what "cytisus scoparius" means with a simple example.*

dandie dinmont terrier *(noun)*

A breed of small terrier with long wiry coat and drooping ears.

- *She wrote a short paragraph that included "dandie dinmont terrier."*
- *He looked up "dandie dinmont terrier" because he had never seen it before.*

eptesicus fuscus *(noun)*

Rather large North American brown bat; widely distributed.

- *He looked up "eptesicus fuscus" because he had never seen it before.*
- *She wrote a short paragraph that included "eptesicus fuscus."*

erythronium americanum *(noun)*

Eastern North American dogtooth having solitary yellow flowers marked with brown or purple and spotted interiors.

- *Understanding "erythronium americanum" helps you talk about this topic clearly.*
- *They discussed "erythronium americanum" during the group presentation.*

francisella tularensis *(noun)*

The type species of the genus Francisella and the causal agent of tularemia in humans; can be used as a bioweapon.

- *In class, the teacher used "francisella tularensis" to mean the type species of the genus francisella and the....*
- *The article explained what "francisella tularensis" means with a simple example.*

gadus macrocephalus *(noun)*

Closely related to Atlantic cod.

- *The article explained what "gadus macrocephalus" means with a simple example.*
- *She wrote a short paragraph that included "gadus macrocephalus."*

leuciscus cephalus *(noun)*

European freshwater game fish with a thick spindle-shaped body.

- *She wrote a short paragraph that included "leuciscus cephalus."*
- *Understanding "leuciscus cephalus" helps you talk about this topic clearly.*

mergus merganser americanus *(noun)*

Common North American diving duck considered a variety of the European goosander.

- *The article explained what "mergus merganser americanus" means with a simple example.*
- *In class, the teacher used "mergus merganser americanus" to mean common north american diving duck considered a....*

morchella esculenta *(noun)*

An edible and choice morel with a globular to elongate head with an irregular pattern of pits and ridges.

- *The article explained what "morchella esculenta" means with a simple example.*
- *She wrote a short paragraph that included "morchella esculenta."*

---

proboscidea fragrans *(noun)*

A herbaceous plant of the genus Proboscidea.

- *She wrote a short paragraph that included "proboscidea fragrans."*
- *The article explained what "proboscidea fragrans" means with a simple example.*

---

pyrola rotundifolia *(noun)*

Evergreen with rounded leaves and very fragrant creamy-white flowers; widely distributed in northern parts of Old and New Worlds.

- *They discussed "pyrola rotundifolia" during the group presentation.*
- *He looked up "pyrola rotundifolia" because he had never seen it before.*

---

pyrola rotundifolia americana *(noun)*

Evergreen of eastern North America with leathery leaves and numerous white flowers.

- *In class, the teacher used "pyrola rotundifolia americana" to mean evergreen of eastern north america with leathery....*
- *He looked up "pyrola rotundifolia americana" because he had never seen it before.*

---

salsola kali tenuifolia *(noun)*

Prickly bushy Eurasian plant; a troublesome weed in central and western United States.

- *In class, the teacher used "salsola kali tenuifolia" to mean prickly bushy eurasian plant; a troublesome weed in....*
- *The article explained what "salsola kali tenuifolia" means with a simple example.*

---

scabiosa atropurpurea *(noun)*

Old World annual having fragrant purple to deep crimson flower heads; naturalized in United States.

- *She wrote a short paragraph that included "scabiosa atropurpurea."*
- *Understanding "scabiosa atropurpurea" helps you talk about this topic clearly.*

---

scire facias *(noun)*

A judicial writ based on some record and requiring the party against whom it is brought to show cause why the record should not be enforced or annulled.

- *They discussed "scire facias" during the group presentation.*
- *He looked up "scire facias" because he had never seen it before.*

---

scomber colias *(noun)*

Medium-sized mackerel of temperate Atlantic and Gulf of Mexico.

- *He looked up "scomber colias" because he had never seen it before.*
- *Understanding "scomber colias" helps you talk about this topic clearly.*

---

talipes calcaneus *(noun)*

Talipes in which the toes are pointed upward and the person walks on the heel of the foot.

- *She wrote a short paragraph that included "talipes calcaneus."*
- *They discussed "talipes calcaneus" during the group presentation.*

---

vipera aspis *(noun)*

Of southern Europe; similar to but smaller than the adder.

- *They discussed "vipera aspis" during the group presentation.*
- *In class, the teacher used "vipera aspis" to mean of southern europe; similar to but smaller than the....*

---

ambystoma tigrinum *(noun)*

Widely distributed brown or black North American salamander with vertical yellowish blotches.

- *In class, the teacher used "ambystoma tigrinum" to mean widely distributed brown or black north american....*
- *The article explained what "ambystoma tigrinum" means with a simple example.*

---

arenaria interpres *(noun)*

Common Arctic turnstone that winters in South America and Australia.

- *She wrote a short paragraph that included "arenaria interpres."*

- *He looked up “arenaria interpres” because he had never seen it before.*

argiope aurantia *(noun)*

A widely distributed North American garden spider.

- *Understanding “argiope aurantia” helps you talk about this topic clearly.*
- *The article explained what “argiope aurantia” means with a simple example.*

caesalpinia ferrea *(noun)*

Thornless tree yielding heavy wood.

- *She wrote a short paragraph that included “caesalpinia ferrea.”*
- *The article explained what “caesalpinia ferrea” means with a simple example.*

dandie dinmont *(noun)*

A breed of small terrier with long wiry coat and drooping ears.

- *Understanding “dandie dinmont” helps you talk about this topic clearly.*
- *She wrote a short paragraph that included “dandie dinmont.”*

dryopteris dilatata *(noun)*

European shield fern.

- *The article explained what “dryopteris dilatata” means with a simple example.*
- *She wrote a short paragraph that included “dryopteris dilatata.”*

galium boreale *(noun)*

North American stoloniferous perennial having white flowers; sometimes used as an ornamental.

- *The article explained what “galium boreale” means with a simple example.*
- *In class, the teacher used “galium boreale” to mean north american stoloniferous perennial having white....*

ipomoea fastigiata *(noun)*

Tropical American prostrate or climbing herbaceous perennial having an enormous starchy root; sometimes held to be source of the sweet potato.

- *She wrote a short paragraph that included “ipomoea fastigiata.”*
- *Understanding “ipomoea fastigiata” helps you talk about this topic clearly.*

lutjanus griseus *(noun)*

Found in shallow waters off the coast of Florida.

- *Understanding “lutjanus griseus” helps you talk about this topic clearly.*
- *The article explained what “lutjanus griseus” means with a simple example.*

morone interrupta *(noun)*

North American freshwater bass resembling the larger marine striped bass.

- *Understanding “morone interrupta” helps you talk about this topic clearly.*
- *In class, the teacher used “morone interrupta” to mean north american freshwater bass resembling the....*

odocoileus hemionus *(noun)*

Long-eared deer of western North America with two-pronged antlers.

- *Understanding “odocoileus hemionus” helps you talk about this topic clearly.*
- *They discussed “odocoileus hemionus” during the group presentation.*

olea cunninghamii *(noun)*

Northern Zealand tree having dense hard light-brown wood.

- *She wrote a short paragraph that included “olea cunninghamii.”*
- *He looked up “olea cunninghamii” because he had never seen it before.*

oxalis acetosella *(noun)*

Eurasian plant with heart-shaped trifoliate leaves and white purple-veined flowers.

- *She wrote a short paragraph that included “oxalis acetosella.”*
- *Understanding “oxalis acetosella” helps you talk about this topic clearly.*

papaver argemone *(noun)*

Annual Old World poppy with orange-red flowers and bristly fruit.

- *The article explained what "papaver argemone" means with a simple example.*
- *In class, the teacher used "papaver argemone" to mean annual old world poppy with orange-red flowers and....*

---

rumex acetosella *(noun)*

Small plant having pleasantly acid-tasting arrow-shaped leaves; common in dry places.

- *Understanding "rumex acetosella" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "rumex acetosella."*

---

sylvilagus aquaticus *(noun)*

A wood rabbit of southeastern United States swamps and lowlands.

- *The article explained what "sylvilagus aquaticus" means with a simple example.*
- *They discussed "sylvilagus aquaticus" during the group presentation.*

---

thorstein bunde veblen *(noun)*

United States economist who wrote about conspicuous consumption (1857-1929).

- *He looked up "thorstein bunde veblen" because he had never seen it before.*
- *She wrote a short paragraph that included "thorstein bunde veblen."*

---

tulipa suaveolens *(noun)*

Small early blooming tulip.

- *He looked up "tulipa suaveolens" because he had never seen it before.*
- *She wrote a short paragraph that included "tulipa suaveolens."*

---

vena nasalis externa *(noun)*

One of the veins that drain the external nose and empty into the angular or facial vein.

- *He looked up "vena nasalis externa" because he had never seen it before.*
- *They discussed "vena nasalis externa" during the group presentation.*

---

alopecurus pratensis *(noun)*

Stout erect perennial grass of northern parts of Old World having silky flowering spikes; widely cultivated for pasture and hay; naturalized in North America.

- *Understanding "alopecurus pratensis" helps you talk about this topic clearly.*
- *The article explained what "alopecurus pratensis" means with a simple example.*

---

andropogon virginicus *(noun)*

Tall tufted grass of southeastern United States.

- *In class, the teacher used "andropogon virginicus" to mean tall tufted grass of southeastern united states.*
- *He looked up "andropogon virginicus" because he had never seen it before.*

---

auricularia auricula *(noun)*

Widely distributed edible fungus shaped like a human ear and growing on decaying wood.

- *He looked up "auricularia auricula" because he had never seen it before.*
- *They discussed "auricularia auricula" during the group presentation.*

---

cardamine douglasii *(noun)*

Small perennial herb of cooler regions of North America with racemose purple flowers.

- *They discussed "cardamine douglasii" during the group presentation.*
- *The article explained what "cardamine douglasii" means with a simple example.*

---

cenchrus ciliaris *(noun)*

Erect tussock-forming perennial bur grass used particularly in South Africa and Australia for pasture and forage.

- *They discussed "cenchrus ciliaris" during the group presentation.*
- *She wrote a short paragraph that included "cenchrus ciliaris."*

---

ceratitis capitata *(noun)*

Small black-and-white fly that damages citrus and other fruits by implanting eggs that hatch inside the fruit.

- *The article explained what "ceratitis capitata" means with a simple example.*
- *In class, the teacher used "ceratitis capitata" to mean small black-and-white fly that damages citrus and....*

---

erinaceus europaeus *(noun)*

Small nocturnal Old World mammal covered with both hair and protective spines.

- *Understanding "erinaceus europaeus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "erinaceus europaeus."*

---

festuca elatior *(noun)*

Grass with wide flat leaves cultivated in Europe and America for permanent pasture and hay and for lawns.

- *She wrote a short paragraph that included "festuca elatior."*
- *Understanding "festuca elatior" helps you talk about this topic clearly.*

---

habenaria fimbriata *(noun)*

North American orchid similar to Habenaria psycodes with larger paler flowers.

- *Understanding "habenaria fimbriata" helps you talk about this topic clearly.*
- *The article explained what "habenaria fimbriata" means with a simple example.*

---

lespedeza cuneata *(noun)*

Perennial widely planted as for forage and as hay crop especially on poor land.

- *He looked up "lespedeza cuneata" because he had never seen it before.*
- *They discussed "lespedeza cuneata" during the group presentation.*

---

monodon monoceros *(noun)*

Small Arctic whale the male having a long spiral ivory tusk.

- *They discussed "monodon monoceros" during the group presentation.*
- *The article explained what "monodon monoceros" means with a simple example.*

---

mustela nigripes *(noun)*

Musteline mammal of prairie regions of United States; nearly extinct.

- *He looked up "mustela nigripes" because he had never seen it before.*
- *She wrote a short paragraph that included "mustela nigripes."*

---

myristica fragrans *(noun)*

East Indian tree widely cultivated in the tropics for its aromatic seed; source of two spices: nutmeg and mace.

- *They discussed "myristica fragrans" during the group presentation.*
- *The article explained what "myristica fragrans" means with a simple example.*

---

oryctolagus cuniculus *(noun)*

Common greyish-brown burrowing animal native to southern Europe and northern Africa but introduced elsewhere; widely domesticated and developed in various colors and for various needs; young are born naked and helpless.

- *They discussed "oryctolagus cuniculus" during the group presentation.*
- *He looked up "oryctolagus cuniculus" because he had never seen it before.*

---

passiflora mollissima *(noun)*

Cultivated for fruit.

- *In class, the teacher used "passiflora mollissima" to mean cultivated for fruit.*
- *Understanding "passiflora mollissima" helps you talk about this topic clearly.*

---

perilla frutescens crispa *(noun)*

Plant grown for its ornamental red or purple foliage.

- *The article explained what "perilla frutescens crispa" means with a simple example.*
- *In class, the teacher used "perilla frutescens crispa" to mean plant grown for its ornamental red or purple foliage.*

---

pteris serrulata *(noun)*

Fern of North Africa and Azores and Canary Islands.

- *In class, the teacher used "pteris serrulata" to mean fern of north africa and azores and canary islands.*
- *The article explained what "pteris serrulata" means with a simple example.*

talipes valgus *(noun)*

Deformity of the foot in which the foot is twisted outward.

- *He looked up "talipes valgus" because he had never seen it before.*
- *Understanding "talipes valgus" helps you talk about this topic clearly.*

tamias striatus *(noun)*

Small striped semiterrestrial eastern American squirrel with cheek pouches.

- *In class, the teacher used "tamias striatus" to mean small striped semiterrestrial eastern american....*
- *The article explained what "tamias striatus" means with a simple example.*

taxodium distichum *(noun)*

Common cypress of southeastern United States having trunk expanded at base; found in coastal swamps and flooding river bottoms.

- *They discussed "taxodium distichum" during the group presentation.*
- *Understanding "taxodium distichum" helps you talk about this topic clearly.*

toxicodendron vernix *(noun)*

Smooth American swamp shrub with pinnate leaves and greenish flowers followed by greenish white berries; yields an irritating oil.

- *Understanding "toxicodendron vernix" helps you talk about this topic clearly.*
- *The article explained what "toxicodendron vernix" means with a simple example.*

trapa bicornis *(noun)*

Water chestnut whose spiny fruit has two rather than 4 prongs.

- *The article explained what "trapa bicornis" means with a simple example.*
- *They discussed "trapa bicornis" during the group presentation.*

turdus migratorius *(noun)*

Large American thrush having a rust-red breast and abdomen.

- *The article explained what "turdus migratorius" means with a simple example.*
- *She wrote a short paragraph that included "turdus migratorius."*

xiphias gladius *(noun)*

Large toothless marine food fish with a long swordlike upper jaw; not completely cold-blooded i.e. they are able to warm their brains and eyes: worldwide in warm waters but feed on cold ocean floor coming to surface at night.

- *They discussed "xiphias gladius" during the group presentation.*
- *The article explained what "xiphias gladius" means with a simple example.*

zanthoxylum americanum *(noun)*

Small deciduous aromatic shrub (or tree) having spiny branches and yellowish flowers; eastern North America.

- *The article explained what "zanthoxylum americanum" means with a simple example.*
- *They discussed "zanthoxylum americanum" during the group presentation.*

alauda arvensis *(noun)*

Brown-speckled European lark noted for singing while hovering at a great height.

- *They discussed "alauda arvensis" during the group presentation.*
- *In class, the teacher used "alauda arvensis" to mean brown-speckled european lark noted for singing....*

arenaria groenlandica *(noun)*

Boreal or alpine sandwort.

- *He looked up "arenaria groenlandica" because he had never seen it before.*
- *In class, the teacher used "arenaria groenlandica" to mean boreal or alpine sandwort.*

carduus nutans *(noun)*

Eurasian perennial naturalized in eastern North America having very spiny white cottony foliage and nodding musky crimson flower heads; valuable source of nectar.

- *He looked up "carduus nutans" because he had never seen it before.*
- *They discussed "carduus nutans" during the group presentation.*

corticium solani *(noun)*

Fungus causing bottom rot in lettuce.

- *The article explained what "corticium solani" means with a simple example.*
- *Understanding "corticium solani" helps you talk about this topic clearly.*

cynocephalus variegatus *(noun)*

A variety of flying lemur.

- *The article explained what "cynocephalus variegatus" means with a simple example.*
- *In class, the teacher used "cynocephalus variegatus" to mean a variety of flying lemur.*

cypripedium californicum *(noun)*

Often having many yellow-green orchids with white pouches growing along streams and seeps of southwestern Oregon and northern California.

- *She wrote a short paragraph that included "cypripedium californicum."*
- *He looked up "cypripedium californicum" because he had never seen it before.*

foeniculum vulgare *(noun)*

Strongly aromatic with a smell of aniseed; leaves and seeds used for seasoning.

- *The article explained what "foeniculum vulgare" means with a simple example.*
- *In class, the teacher used "foeniculum vulgare" to mean strongly aromatic with a smell of aniseed; leaves....*

foeniculum vulgare dulce *(noun)*

Grown especially for its edible aromatic bulbous stem base.

- *Understanding "foeniculum vulgare dulce" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "foeniculum vulgare dulce."*

lychnis dioica *(noun)*

Biennial European catchfly having red or pink flowers; sometimes placed in genus Lychnis.

- *She wrote a short paragraph that included "lychnis dioica."*
- *Understanding "lychnis dioica" helps you talk about this topic clearly.*

mephitis mephitis *(noun)*

Most common and widespread North American skunk.

- *Understanding "mephitis mephitis" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "mephitis mephitis."*

mergus merganser *(noun)*

Common merganser of Europe and North America.

- *They discussed "mergus merganser" during the group presentation.*
- *The article explained what "mergus merganser" means with a simple example.*

muscicapa striata *(noun)*

Common European woodland flycatcher with greyish-brown plumage.

- *Understanding "muscicapa striata" helps you talk about this topic clearly.*
- *They discussed "muscicapa striata" during the group presentation.*

mustela putorius *(noun)*

Dark brown mustelid of woodlands of Eurasia that gives off an unpleasant odor when threatened.

- *He looked up "mustela putorius" because he had never seen it before.*
- *In class, the teacher used "mustela putorius" to mean dark brown mustelid of woodlands of eurasia that....*

oncorhynchus kisutch *(noun)*

Small salmon of northern Pacific coasts and the Great Lakes.

- *He looked up "oncorhynchus kisutch" because he had never seen it before.*
- *She wrote a short paragraph that included "oncorhynchus kisutch."*

passiflora quadrangularis *(noun)*

Tropical American passionflower yielding the large granadilla fruit.

- *They discussed "passiflora quadrangularis" during the group presentation.*
- *The article explained what "passiflora quadrangularis" means with a simple example.*

---

pilea microphylla *(noun)*

Tropical American stingless nettle that discharges its pollen explosively.

- *The article explained what "pilea microphylla" means with a simple example.*
- *Understanding "pilea microphylla" helps you talk about this topic clearly.*

---

plethodon cinereus *(noun)*

Common salamander of eastern North America.

- *She wrote a short paragraph that included "plethodon cinereus."*
- *The article explained what "plethodon cinereus" means with a simple example.*

---

ranunculus aquatilis *(noun)*

Plant of ponds and slow streams having submerged and floating leaves and white flowers; Europe and North America.

- *The article explained what "ranunculus aquatilis" means with a simple example.*
- *In class, the teacher used "ranunculus aquatilis" to mean plant of ponds and slow streams having submerged....*

---

salvadora persica *(noun)*

Glabrous or pubescent evergreen shrub or tree of the genus Salvadora; twigs are fibrous and in some parts of the world are bound together in clusters and used as a toothbrush; shoots are used as camel fodder; plant ash provides salt.

- *He looked up "salvadora persica" because he had never seen it before.*
- *In class, the teacher used "salvadora persica" to mean glabrous or pubescent evergreen shrub or tree of....*

---

scarabaeus sacer *(noun)*

Scarabaeid beetle considered divine by ancient Egyptians.

- *In class, the teacher used "scarabaeus sacer" to mean scarabaeid beetle considered divine by ancient....*
- *They discussed "scarabaeus sacer" during the group presentation.*

---

solidago odora *(noun)*

Goldenrod of eastern America having aromatic leaves from which a medicinal tea is made.

- *They discussed "solidago odora" during the group presentation.*
- *The article explained what "solidago odora" means with a simple example.*

---

usnea barbata *(noun)*

Greenish grey pendulous lichen growing on trees.

- *They discussed "usnea barbata" during the group presentation.*
- *She wrote a short paragraph that included "usnea barbata."*

---

vaccinium vitis-idaea *(noun)*

Low evergreen shrub of high north temperate regions of Europe and Asia and America bearing red edible berries.

- *She wrote a short paragraph that included "vaccinium vitis-idaea."*
- *He looked up "vaccinium vitis-idaea" because he had never seen it before.*

---

allium triquetrum *(noun)*

European leek naturalized in Great Britain; leaves are triangular.

- *He looked up "allium triquetrum" because he had never seen it before.*
- *She wrote a short paragraph that included "allium triquetrum."*

---

arteria labialis *(noun)*

An artery that is a branch of the facial artery that supplies the lips of the mouth.

- *She wrote a short paragraph that included "arteria labialis."*
- *They discussed "arteria labialis" during the group presentation.*

---

arteria labialis inferior *(noun)*

An artery that is a branch of the facial artery that supplies the lower lip.

- *She wrote a short paragraph that included "arteria labialis inferior."*
- *He looked up "arteria labialis inferior" because he had never seen it before.*

arteria labialis superior *(noun)*

An artery that is a branch of the facial artery that supplies the upper lip.

- *He looked up "arteria labialis superior" because he had never seen it before.*
- *She wrote a short paragraph that included "arteria labialis superior."*

asplenium montanum *(noun)*

A spleenwort of eastern North America.

- *She wrote a short paragraph that included "asplenium montanum."*
- *He looked up "asplenium montanum" because he had never seen it before.*

astatic galvanometer *(noun)*

Has a moving magnet and astatic coils arranged to cancel the effect of the Earth's magnetic field.

- *He looked up "astatic galvanometer" because he had never seen it before.*
- *In class, the teacher used "astatic galvanometer" to mean has a moving magnet and astatic coils arranged to....*

caragana sinica *(noun)*

Shrub with dark-green glossy foliage and solitary pale yellow flowers; northern China.

- *She wrote a short paragraph that included "caragana sinica."*
- *The article explained what "caragana sinica" means with a simple example.*

castanea mollissima *(noun)*

A small tree with small sweet nuts; wild or naturalized in Korea and China.

- *Understanding "castanea mollissima" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "castanea mollissima."*

clitocybe robusta *(noun)*

A large white agaric; edible but not palatable.

- *In class, the teacher used "clitocybe robusta" to mean a large white agaric; edible but not palatable.*
- *They discussed "clitocybe robusta" during the group presentation.*

cuon alpinus *(noun)*

Fierce wild dog of the forests of central and southeast Asia that hunts in packs.

- *The article explained what "cuon alpinus" means with a simple example.*
- *Understanding "cuon alpinus" helps you talk about this topic clearly.*

deoxyadenosine monophosphate *(noun)*

One of the four nucleotides used in building DNA; all four nucleotides have a common phosphate group and a sugar (ribose).

- *Understanding "deoxyadenosine monophosphate" helps you talk about this topic clearly.*
- *The article explained what "deoxyadenosine monophosphate" means with a simple example.*

gaius plinius caecilius secundus *(noun)*

Roman writer and nephew of Pliny the Elder; author of books of letters that commented on affairs of the day (62-113).

- *The article explained what "gaius plinius caecilius secundus" means with a simple example.*
- *They discussed "gaius plinius caecilius secundus" during the group presentation.*

genista anglica *(noun)*

Prickly yellow-flowered shrub of the moors of New England and Europe.

- *He looked up "genista anglica" because he had never seen it before.*
- *She wrote a short paragraph that included "genista anglica."*

gentiana acaulis *(noun)*

Low-growing alpine plant cultivated for its dark glossy green leaves in basal rosettes and showy solitary bell-shaped blue flowers.

- *She wrote a short paragraph that included "gentiana acaulis."*
- *They discussed "gentiana acaulis" during the group presentation.*

glyceryl trinitrate *(noun)*

A heavy yellow poisonous oily explosive liquid obtained by nitrating glycerol; used in making explosives and medically as a vasodilator (trade names Nitrospan and Nitrostat).

- *The article explained what "glyceryl trinitrate" means with a simple example.*
- *In class, the teacher used "glyceryl trinitrate" to mean a heavy yellow poisonous oily explosive liquid....*

---

marcus aurelius valerius maximianus *(noun)*

Roman Emperor from 286 until he abdicated in 305; when Diocletian divided the Roman Empire in 286 Maximian became emperor in the west (died in 311).

- *He looked up "marcus aurelius valerius maximianus" because he had never seen it before.*
- *She wrote a short paragraph that included "marcus aurelius valerius maximianus."*

---

marmota monax *(noun)*

Reddish brown North American marmot.

- *In class, the teacher used "marmota monax" to mean reddish brown north american marmot.*
- *He looked up "marmota monax" because he had never seen it before.*

---

monarda didyma *(noun)*

Perennial aromatic herb of eastern North America having variously colored tubular flowers in dense showy heads.

- *He looked up "monarda didyma" because he had never seen it before.*
- *In class, the teacher used "monarda didyma" to mean perennial aromatic herb of eastern north america....*

---

nelumbo nucifera *(noun)*

Native to eastern Asia; widely cultivated for its large pink or white flowers.

- *They discussed "nelumbo nucifera" during the group presentation.*
- *He looked up "nelumbo nucifera" because he had never seen it before.*

---

ostrya virginiana *(noun)*

Medium-sized hop hornbeam of eastern North America.

- *In class, the teacher used "ostrya virginiana" to mean medium-sized hop hornbeam of eastern north america.*
- *Understanding "ostrya virginiana" helps you talk about this topic clearly.*

---

parus caeruleus *(noun)*

Widely distributed European titmouse with bright cobalt blue wings and tail and crown of the head.

- *Understanding "parus caeruleus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "parus caeruleus."*

---

perognathus flavus *(noun)*

Small pale yellowish soft-furred rodent of southwestern United States and Mexico.

- *They discussed "perognathus flavus" during the group presentation.*
- *She wrote a short paragraph that included "perognathus flavus."*

---

platanus wrightii *(noun)*

Medium-sized tree of Arizona and adjacent regions having deeply lobed leaves and collective fruits in groups of 3 to 5.

- *They discussed "platanus wrightii" during the group presentation.*
- *The article explained what "platanus wrightii" means with a simple example.*

---

potamogeton nodosus *(noun)*

Pondweed with floating leaves; of northern United States and Europe.

- *He looked up "potamogeton nodosus" because he had never seen it before.*
- *She wrote a short paragraph that included "potamogeton nodosus."*

---

primula elatior *(noun)*

Eurasian primrose with yellow flowers clustered in a one-sided umbel.

- *He looked up "primula elatior" because he had never seen it before.*
- *They discussed "primula elatior" during the group presentation.*

---

prosopis juliflora *(noun)*

Mesquite of Gulf Coast and Caribbean Islands from Mexico to Venezuela.

- *They discussed "prosopis juliflora" during the group presentation.*

- *The article explained what “prosopis juliflora” means with a simple example.*

rangifer tarandus *(noun)*

Arctic deer with large antlers in both sexes; called ‘reindeer’ in Eurasia and ‘caribou’ in North America.

- *He looked up “rangifer tarandus” because he had never seen it before.*
- *Understanding “rangifer tarandus” helps you talk about this topic clearly.*

rudbeckia laciniata *(noun)*

Tall leafy plant with erect branches ending in large yellow flower heads with downward-arching rays; grow in Rocky Mountains south to Arizona and east to the Atlantic coast.

- *Understanding “rudbeckia laciniata” helps you talk about this topic clearly.*
- *He looked up “rudbeckia laciniata” because he had never seen it before.*

sphenoidal fontanel *(noun)*

The irregularly shaped area on either side of the cranium where the frontal bone and the anterior tip of the parietal bone and the temporal bone and the greater wing of the sphenoid bone meet; corresponds to the pterion when bones have ossified.

- *In class, the teacher used “sphenoidal fontanel” to mean the irregularly shaped area on either side of the....*
- *Understanding “sphenoidal fontanel” helps you talk about this topic clearly.*

suborder sauria *(noun)*

True lizards; including chameleons and geckos.

- *They discussed “suborder sauria” during the group presentation.*
- *Understanding “suborder sauria” helps you talk about this topic clearly.*

subphylum vertebrata *(noun)*

Fishes; amphibians; reptiles; birds; mammals.

- *They discussed “subphylum vertebrata” during the group presentation.*
- *The article explained what “subphylum vertebrata” means with a simple example.*

trapa natans *(noun)*

A variety of water chestnut.

- *She wrote a short paragraph that included “trapa natans.”*
- *He looked up “trapa natans” because he had never seen it before.*

ulex europaeus *(noun)*

Very spiny and dense evergreen shrub with fragrant golden-yellow flowers; common throughout western Europe.

- *They discussed “ulex europaeus” during the group presentation.*
- *In class, the teacher used “ulex europaeus” to mean very spiny and dense evergreen shrub with fragrant....*

actaea rubra *(noun)*

North American perennial herb with alternately compound leaves and racemes of small white flowers followed by bright red oval poisonous berries.

- *The article explained what “actaea rubra” means with a simple example.*
- *In class, the teacher used “actaea rubra” to mean north american perennial herb with alternately....*

agropyron smithii *(noun)*

Valuable forage grass of western United States.

- *Understanding “agropyron smithii” helps you talk about this topic clearly.*
- *He looked up “agropyron smithii” because he had never seen it before.*

alcedo atthis *(noun)*

Small kingfisher with greenish-blue and orange plumage.

- *They discussed “alcedo atthis” during the group presentation.*
- *He looked up “alcedo atthis” because he had never seen it before.*

anacardium occidentale *(noun)*

Tropical American evergreen tree bearing kidney-shaped nuts that are edible only when roasted.

- *He looked up “anacardium occidentale” because he had never seen it before.*
- *Understanding “anacardium occidentale” helps you talk about this topic clearly.*

andropogon scoparius *(noun)*

Handsome hardy North American grass with foliage turning pale bronze in autumn.

- *Understanding "andropogon scoparius" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "andropogon scoparius."*

arethusa bulbosa *(noun)*

A bog orchid with usually a solitary fragrant magenta pink blossom with a wide gaping corolla; Canada.

- *They discussed "arethusa bulbosa" during the group presentation.*
- *Understanding "arethusa bulbosa" helps you talk about this topic clearly.*

arteria palatina *(noun)*

One of several arteries supplying the face.

- *He looked up "arteria palatina" because he had never seen it before.*
- *She wrote a short paragraph that included "arteria palatina."*

basso rilievo *(noun)*

A sculptural relief in which forms extend only slightly from the background; no figures are undercut.

- *He looked up "basso rilievo" because he had never seen it before.*
- *She wrote a short paragraph that included "basso rilievo."*

capparis arborea *(noun)*

Small Australian tree bearing edible fruit resembling the pomegranate.

- *She wrote a short paragraph that included "capparis arborea."*
- *He looked up "capparis arborea" because he had never seen it before.*

carlina acaulis *(noun)*

Stemless perennial having large flowers with white or purple-brown florets nestled in a rosette of long spiny leaves hairy beneath; of alpine regions of southern and eastern Europe.

- *In class, the teacher used "carlina acaulis" to mean stemless perennial having large flowers with white....*
- *Understanding "carlina acaulis" helps you talk about this topic clearly.*

claytonia virginica *(noun)*

Small cormous perennial grown for its low rosette of succulent foliage and racemes of pink-tinged white flowers; eastern North America.

- *Understanding "claytonia virginica" helps you talk about this topic clearly.*
- *They discussed "claytonia virginica" during the group presentation.*

eriophorum angustifolium *(noun)*

Having densely tufted white cottony or downlike glumes.

- *She wrote a short paragraph that included "eriophorum angustifolium."*
- *He looked up "eriophorum angustifolium" because he had never seen it before.*

felis chaus *(noun)*

Small Asiatic wildcat.

- *The article explained what "felis chaus" means with a simple example.*
- *They discussed "felis chaus" during the group presentation.*

galium odoratum *(noun)*

Old World fragrant stoloniferous perennial having small white flowers and narrow leaves used as flavoring and in sachets; widely cultivated as a ground cover; in some classifications placed in genus Asperula.

- *He looked up "galium odoratum" because he had never seen it before.*
- *They discussed "galium odoratum" during the group presentation.*

lathyrus tuberosus *(noun)*

European herb bearing small tubers used for food and in Scotland to flavor whiskey.

- *Understanding "lathyrus tuberosus" helps you talk about this topic clearly.*
- *The article explained what "lathyrus tuberosus" means with a simple example.*

leucaena leucocephala *(noun)*

Low scrubby tree of tropical and subtropical North America having white flowers tinged with yellow resembling mimosa and long flattened pods.

- *He looked up "leucaena leucocephala" because he had never seen it before.*
- *They discussed "leucaena leucocephala" during the group presentation.*

---

marchantia polymorpha *(noun)*

A common liverwort.

- *She wrote a short paragraph that included "marchantia polymorpha."*
- *They discussed "marchantia polymorpha" during the group presentation.*

---

monarda pectinata *(noun)*

Annual of southern United States.

- *She wrote a short paragraph that included "monarda pectinata."*
- *He looked up "monarda pectinata" because he had never seen it before.*

---

peromyscus maniculatus *(noun)*

Brownish New World mouse; most widely distributed member of the genus.

- *Understanding "peromyscus maniculatus" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "peromyscus maniculatus."*

---

picea engelmannii *(noun)*

Tall spruce of Rocky Mountains and British Columbia with blue-green needles and acutely conic crown; wood used for rough lumber and boxes.

- *She wrote a short paragraph that included "picea engelmannii."*
- *He looked up "picea engelmannii" because he had never seen it before.*

---

reseda luteola *(noun)*

European mignonette cultivated as a source of yellow dye; naturalized in North America.

- *Understanding "reseda luteola" helps you talk about this topic clearly.*
- *The article explained what "reseda luteola" means with a simple example.*

---

sanguinaria canadensis *(noun)*

Perennial woodland native of North America having a red root and red sap and bearing a solitary lobed leaf and white flower in early spring and having acrid emetic properties; rootstock used as a stimulant and expectorant.

- *She wrote a short paragraph that included "sanguinaria canadensis."*
- *Understanding "sanguinaria canadensis" helps you talk about this topic clearly.*

---

saxifraga granulata *(noun)*

Rosette-forming perennial having compact panicles of white flowers; Europe.

- *The article explained what "saxifraga granulata" means with a simple example.*
- *In class, the teacher used "saxifraga granulata" to mean rosette-forming perennial having compact panicles....*

---

sterculia rupestris *(noun)*

Large tree of Queensland having cream-colored flowers blotched with red inside; sometimes placed in genus Sterculia.

- *The article explained what "sterculia rupestris" means with a simple example.*
- *Understanding "sterculia rupestris" helps you talk about this topic clearly.*

---

superclass myriapoda *(noun)*

Used in some classifications to encompass the millipedes (Diplopoda) and centipedes (Chilopoda); formerly a large taxon including also the Pauropoda and Symphyla; the term Myriapoda now usually used synonymously with Diplopoda and limited to the millipedes.

- *The article explained what "superclass myriapoda" means with a simple example.*
- *In class, the teacher used "superclass myriapoda" to mean used in some classifications to encompass the....*

---

tanacetum vulgare *(noun)*

Common perennial aromatic herb native to Eurasia having buttonlike yellow flower heads and bitter-tasting pinnate leaves sometimes used medicinally.

- *In class, the teacher used "tanacetum vulgare" to mean common perennial aromatic herb native to eurasia....*
- *He looked up "tanacetum vulgare" because he had never seen it before.*

---

toxicodendron radicans *(noun)*

Climbing plant common in eastern and central United States with ternate leaves and greenish flowers followed by white berries; yields an irritating oil that causes a rash on contact.

- *The article explained what "toxicodendron radicans" means with a simple example.*
- *She wrote a short paragraph that included "toxicodendron radicans."*

---

venire facias *(noun)*

A judicial writ ordering a sheriff to summon people for jury duty.

- *In class, the teacher used "venire facias" to mean a judicial writ ordering a sheriff to summon people....*
- *The article explained what "venire facias" means with a simple example.*

---

yellowbelly marmot *(noun)*

Heavy-bodied yellowish-brown marmot of rocky areas of western North America.

- *Understanding "yellowbelly marmot" helps you talk about this topic clearly.*
- *They discussed "yellowbelly marmot" during the group presentation.*

---

zoysia tenuifolia *(noun)*

Asiatic creeping perennial grass; introduced in southern United States as a drought-resistant lawn grass.

- *They discussed "zoysia tenuifolia" during the group presentation.*
- *The article explained what "zoysia tenuifolia" means with a simple example.*

---

amygdalus communis amara *(noun)*

Almond trees having white blossoms and poisonous nuts yielding an oil used for flavoring and for medicinal purposes.

- *Understanding "amygdalus communis amara" helps you talk about this topic clearly.*
- *In class, the teacher used "amygdalus communis amara" to mean almond trees having white blossoms and poisonous....*

---

aquila rapax *(noun)*

Brownish eagle of Africa and parts of Asia.

- *The article explained what "aquila rapax" means with a simple example.*
- *In class, the teacher used "aquila rapax" to mean brownish eagle of africa and parts of asia.*

---

calidris ferruginea *(noun)*

Old World sandpiper with a curved bill like a curlew.

- *She wrote a short paragraph that included "calidris ferruginea."*
- *They discussed "calidris ferruginea" during the group presentation.*

---

celosia argentea cristata *(noun)*

Garden annual with featherlike spikes of red or yellow flowers.

- *Understanding "celosia argentea cristata" helps you talk about this topic clearly.*
- *The article explained what "celosia argentea cristata" means with a simple example.*

---

chenopodium murale *(noun)*

European annual with coarsely dentate leaves; widespread in United States and southern Canada.

- *The article explained what "chenopodium murale" means with a simple example.*
- *She wrote a short paragraph that included "chenopodium murale."*

---

cirsium eriophorum *(noun)*

Woolly thistle of western and central Europe and Balkan Peninsula.

- *He looked up "cirsium eriophorum" because he had never seen it before.*
- *Understanding "cirsium eriophorum" helps you talk about this topic clearly.*

---

convolvulus sepium *(noun)*

Common Eurasian and American wild climber with pink flowers; sometimes placed in genus Convolvulus.

- *The article explained what "convolvulus sepium" means with a simple example.*
- *Understanding "convolvulus sepium" helps you talk about this topic clearly.*

---

cypripedium montanum *(noun)*

Leafy plant having a few stems in a clump with 1 white and dull purple flower in each upper leaf axil; Alaska to northern California and Wyoming.

- *In class, the teacher used "cypripedium montanum" to mean leafy plant having a few stems in a clump with 1....*

- *The article explained what "cypripedium montanum" means with a simple example.*

dag hjalmar agne carl hammarskjold *(noun)*

Swedish diplomat who greatly extended the influence of the United Nations in peacekeeping matters (1905-1961).

- *They discussed "dag hjalmar agne carl hammarskjold" during the group presentation.*
- *She wrote a short paragraph that included "dag hjalmar agne carl hammarskjold."*

danaus plexippus *(noun)*

Large migratory American butterfly having deep orange wings with black and white markings; the larvae feed on milkweed.

- *Understanding "danaus plexippus" helps you talk about this topic clearly.*
- *In class, the teacher used "danaus plexippus" to mean large migratory american butterfly having deep....*

eucalyptus maculata citriodora *(noun)*

Similar to but smaller than the spotted gum and having lemon-scented leaves.

- *She wrote a short paragraph that included "eucalyptus maculata citriodora."*
- *They discussed "eucalyptus maculata citriodora" during the group presentation.*

glyceria grandis *(noun)*

A pasture grass of moist places throughout North America.

- *He looked up "glyceria grandis" because he had never seen it before.*
- *Understanding "glyceria grandis" helps you talk about this topic clearly.*

grewia asiatica *(noun)*

Drought-resistant Asiatic treelike shrub bearing pleasantly acid small red edible fruits commonly used in sherbets.

- *Understanding "grewia asiatica" helps you talk about this topic clearly.*
- *They discussed "grewia asiatica" during the group presentation.*

guine-bissau *(noun)*

A republic on the northwestern coast of Africa; recognized as independent by Portugal in 1974.

- *He looked up "guine-bissau" because he had never seen it before.*
- *She wrote a short paragraph that included "guine-bissau."*

gyps fulvus *(noun)*

Large vulture of southern Europe and northern Africa having pale plumage with black wings.

- *Understanding "gyps fulvus" helps you talk about this topic clearly.*
- *In class, the teacher used "gyps fulvus" to mean large vulture of southern europe and northern....*

hibiscus elatus *(noun)*

Erect forest tree of Cuba and Jamaica having variably hairy leaves and orange-yellow or orange-red flowers; yields a moderately dense timber for cabinetwork and gunstocks.

- *Understanding "hibiscus elatus" helps you talk about this topic clearly.*
- *He looked up "hibiscus elatus" because he had never seen it before.*

hypo-eutectoid steel *(noun)*

A steel that contains less that 0.9% carbon.

- *He looked up "hypo-eutectoid steel" because he had never seen it before.*
- *In class, the teacher used "hypo-eutectoid steel" to mean a steel that contains less that 0.9% carbon.*

le douanier rousseau *(noun)*

French primitive painter (1844-1910).

- *They discussed "le douanier rousseau" during the group presentation.*
- *The article explained what "le douanier rousseau" means with a simple example.*

manassa mauler *(noun)*

United States prizefighter who was world heavyweight champion (1895-1983).

- *Understanding "manassa mauler" helps you talk about this topic clearly.*
- *The article explained what "manassa mauler" means with a simple example.*

mercenaria mercenaria *(noun)*

An edible American clam; the heavy shells were used as money by some American Indians.

- *Understanding "mercenaria mercenaria" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "mercenaria mercenaria."*

---

mezzo-rilievo *(noun)*

A sculptural relief between low relief and high relief.

- *He looked up "mezzo-rilievo" because he had never seen it before.*
- *In class, the teacher used "mezzo-rilievo" to mean a sculptural relief between low relief and high relief.*

---

mildred ella didrikson zaharias *(noun)*

Outstanding United States athlete (1914-1956).

- *They discussed "mildred ella didrikson zaharias" during the group presentation.*
- *The article explained what "mildred ella didrikson zaharias" means with a simple example.*

---

milvus migrans *(noun)*

Dark Old World kite feeding chiefly on carrion.

- *They discussed "milvus migrans" during the group presentation.*
- *Understanding "milvus migrans" helps you talk about this topic clearly.*

---

musculus abductor digiti minimi pedis *(noun)*

The abductor muscles of the little toe.

- *The article explained what "musculus abductor digiti minimi pedis" means with a simple example.*
- *She wrote a short paragraph that included "musculus abductor digiti minimi pedis."*

---

oenanthe aquatica *(noun)*

European poisonous herb with fibrous roots.

- *She wrote a short paragraph that included "oenanthe aquatica."*
- *He looked up "oenanthe aquatica" because he had never seen it before.*

---

papaver californicum *(noun)*

Showy annual of California with red flowers.

- *She wrote a short paragraph that included "papaver californicum."*
- *They discussed "papaver californicum" during the group presentation.*

---

pediculosis capitis *(noun)*

Infestation of the scalp with lice.

- *She wrote a short paragraph that included "pediculosis capitis."*
- *They discussed "pediculosis capitis" during the group presentation.*

---

phaseolus angularis *(noun)*

Bushy annual widely grown in China and Japan for the flour made from its seeds.

- *He looked up "phaseolus angularis" because he had never seen it before.*
- *She wrote a short paragraph that included "phaseolus angularis."*

---

prunus padus *(noun)*

Small European cherry tree closely resembling the American chokecherry.

- *He looked up "prunus padus" because he had never seen it before.*
- *She wrote a short paragraph that included "prunus padus."*

---

rangifer arcticus *(noun)*

Of tundra of northern Canada; in some classifications included in the species Rangifer tarandus.

- *In class, the teacher used "rangifer arcticus" to mean of tundra of northern canada; in some....*
- *Understanding "rangifer arcticus" helps you talk about this topic clearly.*

---

rodya raskolnikov *(noun)*

A fictional character in Dostoevsky's novel 'Crime and Punishment'; he kills old women because he believes he is beyond the bounds of good or evil.

- *Understanding "rodya raskolnikov" helps you talk about this topic clearly.*
- *The article explained what "rodya raskolnikov" means with a simple example.*

---

A fungus with a scaly cap and white flesh and a ring on the stalk (with scales below the ring); odor reminiscent of licorice.

- *Understanding "scaly lentinus" helps you talk about this topic clearly.*
- *He looked up "scaly lentinus" because he had never seen it before.*

---

soapwort gentian *(noun)*

Erect perennial of wet woodlands of North America having leaves and flower buds resembling those of soapwort.

- *She wrote a short paragraph that included "soapwort gentian."*
- *They discussed "soapwort gentian" during the group presentation.*

---

sterculia foetida *(noun)*

Large tree of Old World tropics having foul-smelling orange-red blossoms followed by red pods enclosing oil-rich seeds sometimes used as food.

- *Understanding "sterculia foetida" helps you talk about this topic clearly.*
- *She wrote a short paragraph that included "sterculia foetida."*

---

abdications *(noun)*

A formal resignation and renunciation of powers.

- *She wrote a short paragraph that included "abdications."*
- *He looked up "abdications" because he had never seen it before.*

---

accentor *(noun)*

Small sparrow-like songbird of mountainous regions of Eurasia.

- *She wrote a short paragraph that included "accentor."*
- *The article explained what "accentor" means with a simple example.*

---

accouchement *(noun)*

The parturition process in human beings; having a baby; the process of giving birth to a child.

- *The article explained what "accouchement" means with a simple example.*
- *Understanding "accouchement" helps you talk about this topic clearly.*

---

achievability *(noun)*

The state of being achievable.

- *In class, the teacher used "achievability" to mean the state of being achievable.*
- *The article explained what "achievability" means with a simple example.*

---

achondrites *(noun)*

A stony meteor lacking chondrules.

- *Understanding "achondrites" helps you talk about this topic clearly.*
- *They discussed "achondrites" during the group presentation.*

---

adenoidectomy *(noun)*

Surgical removal of the adenoids; commonly performed along with tonsillectomy.

- *She wrote a short paragraph that included "adenoidectomy."*
- *Understanding "adenoidectomy" helps you talk about this topic clearly.*

---

adjured *(verb)*

Ask for or request earnestly.

- *In everyday English, people use "adjured" when talking about this idea.*
- *He did not know how to use "adjured" until he saw an example.*

---

Related to anagrams or containing or making an anagram.

- *A "anagrammatic" approach may work better in this case.*
- *It is useful to describe something as "anagrammatic" when it is related to anagrams or containing or making an anagram.*

anemone nemorosa *(noun)*

European anemone with solitary white flowers common in deciduous woodlands.

- *She wrote a short paragraph that included "anemone nemorosa."*
- *They discussed "anemone nemorosa" during the group presentation.*

anglians *(noun)*

One of the major dialects of Old English.

- *They discussed "anglians" during the group presentation.*
- *The article explained what "anglians" means with a simple example.*

---

anhinga anhinga *(noun)*

Blackish New World snakebird of swampy regions.

- *Understanding "anhinga anhinga" helps you talk about this topic clearly.*
- *He looked up "anhinga anhinga" because he had never seen it before.*

---

antimetabolite *(noun)*

An antineoplastic drug that inhibits the utilization of a metabolite.

- *Understanding "antimetabolite" helps you talk about this topic clearly.*
- *In class, the teacher used "antimetabolite" to mean an antineoplastic drug that inhibits the....*

---

aotus *(noun)*

Douroucoulis.

- *He looked up "aotus" because he had never seen it before.*
- *They discussed "aotus" during the group presentation.*

---

aquaplane *(noun)*

A board that is pulled by a speedboat as a person stands on it and skims over the top of the water.

- *He looked up "aquaplane" because he had never seen it before.*
- *In class, the teacher used "aquaplane" to mean a board that is pulled by a speedboat as a person....*

---

aralia elata *(noun)*

Deciduous clump-forming Asian shrub or small tree; adventive in the eastern United States.

- *They discussed "aralia elata" during the group presentation.*
- *She wrote a short paragraph that included "aralia elata."*

---

aranyaka *(noun)*

A treatise resembling a Brahmana but to be read or expounded by anchorites in the quiet of the forest.

- *In class, the teacher used "aranyaka" to mean a treatise resembling a brahmana but to be read or....*
- *Understanding "aranyaka" helps you talk about this topic clearly.*

---

arguers *(noun)*

Someone who engages in debate.

- *They discussed "arguers" during the group presentation.*
- *He looked up "arguers" because he had never seen it before.*

---

ascaris lumbricoides *(noun)*

Intestinal parasite of humans and pigs.

- *He looked up "ascaris lumbricoides" because he had never seen it before.*
- *They discussed "ascaris lumbricoides" during the group presentation.*

---

ascendence *(noun)*

The state that exists when one person or group has power over another.

- *She wrote a short paragraph that included "ascendence."*
- *He looked up "ascendence" because he had never seen it before.*

---

ascomycota *(noun)*

A large subdivision of Eumycota including Hemiascomycetes and Plectomycetes and Pyrenomycetes and Discomycetes; sac fungi; in some classification systems considered a division of the kingdom Fungi.

- *She wrote a short paragraph that included "ascomycota."*
- *He looked up "ascomycota" because he had never seen it before.*

---

assimilations *(noun)*

The process of absorbing nutrients into the body after digestion.

- *He looked up "assimilations" because he had never seen it before.*

- *She wrote a short paragraph that included "assimilations."*

athyrium *(noun)*

Temperate and tropical lady ferns; in some classifications placed in family Polypodiaceae or in the genus Asplenium.

- *She wrote a short paragraph that included "athyrium."*
- *He looked up "athyrium" because he had never seen it before.*

audiograms *(noun)*

A graphical representation of a person's auditory sensitivity to sound.

- *In class, the teacher used "audiograms" to mean a graphical representation of a person's auditory....*
- *They discussed "audiograms" during the group presentation.*

auditory hyperesthesia *(noun)*

Abnormal acuteness of hearing due to increased irritability of the sensory neural mechanism; characterized by intolerance for ordinary sound levels.

- *The article explained what "auditory hyperesthesia" means with a simple example.*
- *In class, the teacher used "auditory hyperesthesia" to mean abnormal acuteness of hearing due to increased....*

badmouths *(verb)*

Speak unfavorably about.

- *She badmouths her husband everywhere.*
- *Can you use "badmouths" in a sentence that fits this situation?*

basiliscus *(noun)*

A reptile genus of Iguanidae.

- *In class, the teacher used "basiliscus" to mean a reptile genus of iguanidae.*
- *The article explained what "basiliscus" means with a simple example.*

basts *(noun)*

Cat- or lion-headed Egyptian goddess; represents life-giving power of the sun.

- *She wrote a short paragraph that included "basts."*
- *Understanding "basts" helps you talk about this topic clearly.*
